A No. Unless she was instructed, you know, to do it, you know, a different way.

Q Are you aware of her being instructed to do it in a different way?

A I am not.

Q Did you instruct her to do --

MR. TUBIN: Objection, CMO. Any communications between you and your staff are not discoverable so don't answer that.

CMO 17. Sorry.

BY MR. ROMANO:

Q Now, at any time since you have undertaken expert work in this case, have you been submitting proposals for work you need to do?

A I don't understand.

Q All right. I understand that if CCA does

work, like, ten hours of work on a given project, on the 1st and 15th you send an invoice for that amount and get paid; right?

A Yes.

Q All right. If you contemplate work that you need to do, do you just do it, or do you have to get pre-approval for it?

A Just do it.

Q And that is in all instances of the work you've done so far in this case?

A Yes.

Q All right. Regarding -- I'm going to skip around a little bit here for clarification on a few items with different cases. So if you need to pull the reports for any reason, take your time and do that.

Regarding Mr. Peterson's case, despite Eddie Peterson's prior employer stating that he was not competent to practice law in any capacity, is it still your opinion that Mr. Peterson still could have worked as a lawyer by conducting legal research or proofreading or reviewing documents for a few years after December 2003?

A No. I never said he could work as a practicing lawyer. He would have been more in a

paraprofessional capacity doing those kinds of things, making use of skills he developed as a lawyer, but not as a practicing lawyer. That was not my testimony before.

Q Regarding Mr. Sparks, do you stand by your opinion in your report that Mr. Sparks would be a competitive candidate to be a TSA officer?

A At what period of time? That's the question.

When he voluntarily left his job with the customs, I think he could have at that time. Today, no. I think he's 71 years old now too, and he's been out of the workplace a number of years. But it depends on what point in time.

Q Well, we're going back to that time period when you say he could have still been working in some capacity --

A Yeah --

Q -- due to the transferable skills.

A Yeah. That was just an example, but that was not an exhaustive example of jobs that would have been accessible to him. But that particular job was similar, if not less demanding than what he did as a customs agent. And he voluntarily left the job, workplace at that time. So, yes, at that time

I think that would have been viable for him.

Q All right. You said that there were five or six individuals within CCA who assisted in doing work on these cases, these reports. First, who are they?

A Ms. Navarro, Rose Bock, Armen Zakaryan, Jennifer Drapeau, Cheryl Wilson.

Q When those individuals who are not rehab specialists or life care planners do work on the file, are their hours billed to the file?

A No. They're subsumed in my hourly rate.

Q And tell me which employees have the billing subsumed in your hourly rate and which you bill for, such as Navarro.

A Ms. Navarro billed for her own cases that she did -- worked on the case.

The other people are support staff and I do not -- oh, Rose Bock is one other person -- I think I mentioned her. Yeah. But, no, they -- they don't bill for their work. They're employees of mine and their work that they do is incorporated in my hourly rate.

Q In terms of the work that you did overall on these seven cases, what is your best estimate as the percentage of work you did as compared to the

percentage of work done by your support staff?

MR. TUBIN: Objection, form.

THE WITNESS: I don't know that I can give you any accurate estimate, sir. My hours are, you know -- they're accounted for in the invoices. There is a lot of administrative work that went on, a lot of coordination work that went on, getting tens of thousands of documents. And then there were some -- a lot of logistical issues, including how they were transmitted to us from the Department of Justice.

BY MR. ROMANO:

Q Let's take, for example, a medical records review. If you have 3,000 pages of a given hospital record on an individual for which you were doing work like you're doing in these cases, who is it that actually sits down and reads the entire 3,000 pages of the hospital record?

A I have staff who help at different points in time. I have some staff who basically sort the records chronologically and categorically. That's a very tedious task to undertake.

Then I have other staff who will review the records, and they will extract information out

for me to review, to streamline it for me. Those staff are the ones who would be more likely to review every single record. I don't review every single page of every single record. That would be not feasible to do.

Q Have you utilized AI or artificial intelligence in any aspect whatsoever regarding the evaluation and assessment of these seven cases?

A No. We're just starting to use it now, but, no, not in these cases.

Q As to methodology, do you have any criticism of the plaintiff life care planners and their work?

A I -- as we sit here, sir, you know, again, there's been so much documentation to review, I think there were some things that were similar to what I did. I mentioned Mr. Fryer uses the same sources that we used for life care planning. Context4 Health and FAIR Health are two of the ones. And he probably uses Physicians Fee reference as well. We use the same percentiles for our cutoffs.

There are some differences of opinions. I think there were many more similarities than differences in the life care plan content.

Q Yeah, I understand there are certainly

differences as to your conclusions or opinions. My question is: Do you have any criticism of either of the plaintiff life care planners as to their methodology, the steps which they took in order to arrive at their opinions?

A There were some concerns I had about Ms. Hairston's.

I -- and, again, I'm going from my recollection here. But I don't recall that in all instances she identified who the source of her intervention was or where the protocols came from or specifically where the cost information came from.

Q Are there any other criticisms you have as to Ms. Hairston?

A You know, again, I'm going from my memory with a lot of -- a lot of information here. I don't recall who wrote the life care plan for Mr. Peterson that you retained.

Do you recall?

Q Mr. Stadler.

A Mister who?

Q Yeah. You have referred to it right there.

A No. Peterson's. Your life care planner for Peterson, I don't recall who it was. But

they're -- and -- oh, so the other thing, too, about Hairston, now you're refreshing my memory, there were some really inflated costs that she had for some of the therapies that I think she must have made a typo or some type of a, you know, scribner's error or whatever it was. But some of the therapies were very inflated. I recall that.

Q Right.

A And she didn't cite her source so that's a methodological thing I could not verify.

Q All right. Any other criticisms you can think of?

A Again, the best -- I'm doing the best I can to field your questions after a long day and much information to reflect on. And I'm going back to the Peterson, I don't remember who recommended some of his incontinent supplies but they appeared to be very, let's say, inflated.

Q Assuming the first contract with the government was signed in 2023, did you begin your work immediately on these cases?

A Best I can do to answer that question is refer you to the invoices because we billed -- our practice is to bill for work as it is performed.

Q All right. And you covered that

previously, whenever it was you would have started, you would have also commenced sending out bills on a regular basis?

A Yes.

MR. ROMANO: I have no further questions.

MR. TUBIN: Okay. Let me make a statement on the record for the United States that we object to and disagree with keeping the deposition open especially under the pretense of -- well, under the reason of the documents that were produced this morning, as it was a total of less than ten pages, and counsel walked through and derived questions from them with the witness as well as the other documents that were produced.

So I want to take a break and just think if there's anything we need to discuss, but I just want to put that on the record.

VIDEOGRAPHER: Off record, 5:21 p.m.

(A brief recess is had from 5:21 p.m. to 5:24 p.m.)

VIDEOGRAPHER: On record, 5:24 p.m.

MR. TUBIN: The United States will reserve its right to review the transcript under Rule 38. And I have no questions for you,

Dr. Shahnasarian.

VIDEOGRAPHER: This concludes today's testimony. The time is 5:25 p.m. We're off record.

CERTIFIED STENOGRAPHER: Okay. And if I could get everyone's transcript orders, please.

MR. ROMANO: We do need to order it, yes.

CERTIFIED STENOGRAPHER: Okay. Do you need a rough draft?

MR. ROMANO: What's that?

CERTIFIED STENOGRAPHER: Do you need a rough draft?

MR. ROMANO: Let me check and see what -- I know there's a protocol in place, and I don't want to violate the protocol.

MR. TUBIN: There's so many protocols in place. Yeah.

And we requested a rough, yes.

CERTIFIED STENOGRAPHER: Okay.

MR. ROMANO: But we do need to order it.

THE WITNESS: I will be able to read this?

MR. TUBIN: Yes.

CERTIFIED STENOGRAPHER: Yes.

(The reading and signing of the deposition is not waived.)

(At 5:25 p.m. the deposition was concluded.)

CERTIFICATE OF OATH

STATE OF FLORIDA)
COUNTY OF HILLSBOROUGH`)

I, the undersigned authority, certify that MICHAEL SHAHNASARIAN, PH.D. appeared before me remotely and was duly sworn.

WITNESS my hand and official seal this 24th day of February 2026.

_____

DAWN A. HILLIER, RMR, CRR, CLR
Notary Public - State of Florida
My Commission No.: HH 300744
Expires: 12-15-2026

CERTIFICATE

STATE OF FLORIDA)
COUNTY OF HILLSBOROUGH)

I, DAWN A. HILLIER, RMR, CRR, CLR certify that I was authorized to and did stenographically report the deposition of MICHAEL SHAHNASARIAN, PH.D.; that a review of the transcript was requested; and that the transcript is a true and complete record of my stenographic notes.

I further certify that I am not a relative, employee, attorney, or counsel of any of the parties, nor am I a relative or employee of any of the parties' attorney or counsel connected with the action, nor am I financially interested in the action.

DATED this 24th day of February 2026.

_____

DAWN A. HILLIER, RMR, CRR, CLR

February 24, 2026

IN RE: Camp LeJeune Water Litigation

Dear Dr. Shahnasarian:

Herein, you will find the transcript of your deposition taken on February 17, 2026, and a Errata Sheet for your use in entering any changes to the deposition.

Please do not edit or make marks on the transcript itself. If you desire to make any changes, they should be noted on the Errata Sheet. If no changes are to be noted, please indicate that on the Errata Sheet so counsel are aware that no changes were made.

After reading the transcript, please execute the Errata Sheet, including date and place of signing and return to Golkow at the address indicated below.

Thank you for your prompt attention.

Sincerely,

Dawn A. Hillier, RMR, CRR, CLR
GOLKOW LITIGATION SERVICES, LLC
1650 Market Street, Suite 5150
Philadelphia, PA 19103
877.370.3377

ERRATA SHEET

I, MICHAEL SHAHNASARIAN, PH.D., have read the foregoing pages of my deposition given on February 17, 2026 in the case of In Re: Camp LeJeune Water Litigation, Case No. 7:34-CV-00897, and wish to make the following additions, deletions or corrections:

PAGE	LINE	CHANGE AND REASON FOR CHANGE
____	____	_____
____	____	_____

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

THE VIDEOGRAPHER: We are now on the record. My name is David Lane, a videographer for Golkow, a Veritext division. Today's date is March 10, 2026, and our time on the record is 9:12 a.m.

This video deposition is being held in Haddonfield, New Jersey, in the matter of Camp Lejeune Water Litigation. Our deponent today is Chad Staller.

Counsel, please introduce yourselves and state whom you represent.

MR. CROMWELL: Michael Cromwell on behalf of the DOJ.

MR. TURNER: Joseph Turner for the United States.

MR. RUZICKA: Ted Ruzicka with the Plaintiffs' Leadership Group.

MR. VanSLYKE: Ben VanSlyke with the Plaintiffs' Leadership Group.

THE VIDEOGRAPHER: Our court

reporter today is Robin Clark and will now swear in our witness.

- - - - -

CHAD STALLER, having been duly sworn, was examined and testified as follows:

- - - - -

BY MR. CROMWELL:

Q. Good morning, Mr. Staller. Would you please state your name?

A. Chad Lawrence, Lawrence is spelled L-A-W-R-E-N-C-E, Staller.

Q. Mr. Staller, my name is Michael Cromwell, I'm an attorney with the U.S. Department of Justice and you understand you're testifying here in the Camp Lejeune Water Litigation; is that correct?

A. Yes.

Q. Okay. And you have been deposed before; is that correct?

A. Yes.

Q. And you're familiar with the rules and procedures of depositions?

A. Yes.
Q. Okay. So just so that I'm clear, you've done very well, I'll be asking you questions, you'll be responding. I will do my best not to talk over you and let you complete your answers. I will ask that you let me complete my questions; is that fair?
A. Yes.
Q. Counsel, obviously, may object from time to time, but unless instructed otherwise, I'll ask that you answer my questions; is that fair?
A. Yes.
Q. If you don't understand a question, which, undoubtedly, I will ask some poor ones, please let me know. If you do answer the question, I'm going to assume you understood the question; is that fair?
A. It is.
Q. Is there any reason today, medical or otherwise, that you cannot hear, understand, or respond to my questions today?

A. No.
Q. And you understand you're testifying under oath which is the same as testifying in front of a court?
A. Yes.
Q. Okay. You indicated before that you have been deposed before; is that correct?
A. Yes.
Q. I'm going to go ahead and enter Exhibit 1. I'll let you mark that first.

- - - - -

(Résumé and Testimony List marked Staller Exhibit 1 for identification.)

- - - - -

BY MR. CROMWELL:
Q. Mr. Staller, this is simply a copy of your résumé and testimony list that you have produced in this case; is that correct?
A. Yes.
Q. Okay. And according to your

testimony list, you last gave deposition testimony in October of 2025; is that right?

A. No.

Q. When is the last time you gave -- well, let me ask you this. How many times have you testified since October of 2025?

A. I would approximate 20 to 30 times.

Q. Were those all depositions?

A. No.

Q. Okay. How many of those were depositions?

A. Probably half, so if we went with the estimate of 30, which I think there was more than 20, so as an approximation 30, 15, I would approximate, were depositions, 15 would have been trials.

Q. Okay. When was the last time you testified under oath?

A. The week of February -- the last week of February.

Q. Okay. Mr. Staller, just based looking at your testimony list, is it correct that you have been deposed over 100 times in the last two years?

A. I haven't totaled up my testimony list, I wouldn't disagree with that estimate.

Q. Okay. All right. And since May of 2018, you have given testimony in depositions 400 times; is that correct?

A. I haven't totaled up but I wouldn't disagree with that estimate.

Q. Okay. You are testifying today as a result of a Notice of Deposition and subpoena; is that correct?

A. Yes.

Q. Okay. And you would have received two versions. I'm going to mark both just for the record.

A. Thank you.

- - - - -

(Notice of Deposition and Subpoena dated 1/16/2026 marked Staller Exhibit 2 for

identification.)

- - - - -

BY MR. CROMWELL:

Q. The first one is dated January 16, 2016 [sic]; is that correct?

A. Yes.

Q. The second one, which we'll mark as Exhibit 3. The second one is dated February 18, 2018, [sic]; is that correct?

A. Yes.

- - - - -

(Notice of Deposition and Subpoena dated 2/18/2026 marked Staller Exhibit 3 for identification.)

- - - - -

BY MR. CROMWELL:

Q. Did you review both of these --

A. Yes.

Q. -- documents before? And did you review the various requests for documents contained within each of these subpoenas?

A. Yes.
Q. And it's my understanding you provided documents that were responsive to the requests in these subpoenas; is that correct?
A. Prior to today, yes.
Q. In general, you produced retention letters and invoices; is that correct?
A. Yes.
Q. Are you aware of any documents that are responsive to the document requests that were not produced?
A. No.
Q. Are you aware of any documents that were withheld because they were attorney-client or work product documents?
A. No, I don't believe any documents were withheld for that reason.
Q. Okay. I'm going to go ahead and enter the Plaintiff's Objections and Responses and mark this as Exhibit 4.

- - - - -

(Plaintiff's Objections and Responses to Defendant's Notice of Videotaped Deposition of Chad Staller marked Staller Exhibit 4 for identification.)

- - - - -

BY MR. CROMWELL:

Q. Mr. Staller, these are Plaintiff's Objections and Responses to Defendant's Notice of Videotaped Deposition of Chad Staller; is that correct?

A. Yes.

Q. And just for clarification, these, and for the completeness of the record, these objections and responses were originally served in response to Exhibit 2 dated -- these are dated February 3, 2026; is that right?

A. Yes.

Q. Okay. If the date was the only thing that changed on the amended notice, would you presume that the responses would be the same?

A. I have no reason to think

that aside from the date change that the substance would be different.

Q. Okay. Did you have any role in formulating these responses and objections?

A. Yes, I recall going through these with Plaintiff's counsel --

Q. Okay.

A. -- assisting in the responses.

Q. Did you approve the responses?

MR. RUZICKA: Object to the extent that that calls for any communications that were between you and counsel. To the extent you can answer with that stipulation, go ahead and respond.

THE WITNESS: I mean, I'm not -- approve, I know I discussed the content, I don't know if I saw the final iteration and quote, unquote, approved it, as if someone would approve a piece of artwork or

something of that nature, but I remember discussing the responses.

BY MR. CROMWELL:

Q. Understood. Do you --

THE VIDEOGRAPHER: Someone is beeping.

THE WITNESS: Is it beeping now?

THE VIDEOGRAPHER: I don't know, I was hearing a phone the going off, I wasn't sure who it was.

THE WITNESS: Do you hear it now?

THE VIDEOGRAPHER: Not right now, I'll tell you if it comes up. It's, like, alerts.

THE WITNESS: I think this is on mute.

MR. RUZICKA: I'm not hearing anything.

BY MR. CROMWELL:

Q. Make sure we keep that on the record. Mr. Staller, do you have any Excel

files or documents that contain formulas or calculations that you used to arrive at your opinions in these cases?

A. Yes.

Q. Do you know if those documents were produced?

A. Not the underlying Excel. I know they weren't produced.

Q. But they do exist?

A. Yes.

Q. Okay. Did you prepare an Excel for each of the cases in which you are offering an opinion?

A. Yes.

Q. Okay. Mr. Staller, if you look at request number four, which is on page 7 and this is the responses, Plaintiff's responses on Exhibit 4 and this asks specifically, "For any and all notes, memos, calculations, tables, graphs, charts, and other similar documents you have created in connection with these Camp Lejeune water contamination cases;" is that correct?

A. Yes.
Q. I'll let you get to that section, it's on page 7.
A. Of the request?
Q. No, sorry on Exhibit 4, these are the objections and responses to the requests. And in response to request number four, Plaintiffs stated that, "Chad Staller has made a reasonable and diligent search of his records and does not have any documents responsive to request number four;" is that correct?
A. To number four?
Q. Yes.
A. I'm reading the response and I think it says, "PLG objects to request number 4 as overly broad, unduly burdensome in that it seeks and any and all and on the grounds that it seeks materials that were prepared in anticipation of or for use in litigation, as such materials are protected from disclosure by the work product doctrine."
Q. Right. And, "Subject to and

without waiving the foregoing objections, Chad Staller has made a reasonable and diligent search of his records and does not have any documents responsive to request number 4;" is that correct?

A. It goes on to say that, yes.

Q. And you're indicating that there are Excel files that contain formulas for your calculations in these cases; is that correct?

A. Yes, so when I read this, I don't see a request for Excel files, but there are Excel files that have office macros that are proprietary in nature and I'm aware of federal court decisions that prevent the disclosure of proprietary data development, especially in the circuit of North Carolina.

Q. If you look at request number 5 and the objections that Plaintiffs prepared, this is the bottom of page 7, top of page 8. This also asks for any and all information, factual observations, tests, supporting data, calculations, et cetera,

in which made by or provided to you or which you have reviewed or relied upon in reaching any opinions with respect to matters relevant in this litigation, aside from information identified in your reports or your Materials Considered Lists; is that correct?

A. You're paraphrasing.

Q. I did not include videotapes, measurements, examinations, that's true, but --

A. Okay.

Q. -- but, generally speaking, is that what the request asks for?

A. It has a laundry list of requests in five, but some of the items noted in request 5 would be tests, supporting data, calculations, then it goes on with other requests.

Q. Right. And in response, it says, "Chad Staller has made a reasonable and diligent search of his records and does not have any documents responsive to request number 5;" is that right?

A. That's the response, yes.
Q. You would agree with me there are no similar objections in request number 5 that there were for request number 4?
A. There are none.
MR. CROMWELL: Okay. At this time, and on the record, I would like to make a request for the Excel files that were not produced that Mr. Staller has indicated exist that contain formulas. I think the parties in this litigation have generally reached agreement that those formulas are discoverable and have been produced to each party and so --
MR. RUZICKA: We can talk about this later, but my understanding, that this issue has been addressed with other counsel and that there's a dispute as to whether they should be discoverable especially in light of his testimony that they're proprietary

in nature, but we can talk about it after the deposition.

BY MR. CROMWELL:

Q. Okay. Just for the record, did you rely upon these Excel files in formulating your opinions in this case?

A. I don't know about the term, "relied upon," I use them and --

Q. Okay. Do they help -- sorry.

A. I was going to say just for the record, all my Excels are presented in my respective reports, so all the basis for the Excel calculations are set forth in the report in narrative. The Excel calculations are presented in the attached tables, that any of the three opposing economists could recreate my tables based upon the narrative and my output of the tables.

Q. But would you agree with me that the formulas themselves that are in your Excel files we're discussing are not similarly identified in your reports; is that correct?

A. No, they couldn't be -- well, I say I do net present value and then to any economist that has a certain meaning of a specific formula that's established for centuries, and then I give the respective inputs of those variables being inflationary or growth factor, the discount rate being the denominator, the number of periods are set forth in the report. For any of the other specific calculations, all of the basis are established in the specific paragraphs of the reports, but the specific, in an Excel, it would have to be like equals in a cell --

Q. Sure.

A. -- and then two plus two, that's not displayed as an illustration, true.

Q. Right. So just to be clear, the formulas themselves are not in your reports, even though the inputs may be?

A. The inputs, well, I would say the inputs are in narrative form, the output is in the actual Excel, but the

actual visualization of a cell, say, four where it might be two plus two is not be displayed with a cell seeing two plus two.

Q. We'll maintain our objection and request for those to be produced, obviously, we can discuss those at a later time.

Mr. Staller, what, if anything, did you do to prepare for today's deposition?

A. Got reacquainted with my files. To get reacquainted with my files, that would consist of reading my reports, reviewing the opposing defense economist reports, generally looking at the materials, there's too many files to reread with specificity all the substantive documents, but I did read my reports, defense reports.

I think it's just the notifications of the watch, but --

THE VIDEOGRAPHER: Are you able to silence that?

THE WITNESS: I think it is on

silence, I think, is there? I'm so sorry. I think it is. Here, let me hit this button. No, that doesn't do it. Oh, yeah, all these, sorry, oh my God.

MR. CROMWELL: We can go off the record for a second.

THE WITNESS: Sorry about that.

THE VIDEOGRAPHER: Off the record, 9:28 a.m.

- - - - -

(Discussion was held off the record.)

- - - - -

THE VIDEOGRAPHER: We're back on the record at 9:29 a.m.

BY MR. CROMWELL:

Q. Mr. Staller --

A. Sorry about that.

Q. -- it's okay, we were just discussing what you did to prepare for today's deposition. You indicated that you read your reports that you have prepared in this case?

A. Yes.
Q. You indicated that you reviewed defense expert reports that were produced in this case?
A. For the respective Plaintiffs, yes.
Q. Okay. Can you tell me the experts whose reports you were reviewing for the defense experts' reports you were reviewing?
A. For each of the -- it would have been Ms. Yount, Tosic and then there was the third economist, I don't recall the name right now.
Q. Do you recall the name Dr. Andrew Brod?
A. Yes.
Q. Was that one of the reports -- or were those the reports you were reviewing?
A. Yes.
Q. Okay. Were there any other defense expert reports you were reviewing?
A. No.

Q. Do you know if you identified any of defense expert reports in your materials considered lists?

A. I don't know.

Q. Prior to preparing for this deposition, had you ever reviewed their reports before?

A. Yes, I believe of Ms. Yount, I believe she had -- I think we had an initial version, then a supplemental version. So I believe I have seen her report, supplemental versions of her reports.

Q. When you say, "supplemental version," what are you referring to?

A. I believe there was an initial disclosure back in the summer or early fall and then there was an additional round of updated reports.

Q. Okay. Just for clarity of the record, are you referring to the reports that were produced by the United States in the spring of 2025 during the initial disclosures of damage expert

reports?

A. That would be the initial ones I'm referring to, yes.

Q. All right. There aren't -- there isn't some other report in between that you're referring to, just making sure?

A. No.

Q. Okay. Did you review your Excel files at all in preparing for this deposition?

A. No.

Q. Did you review any of the items or materials that you cite in your report or that you refer to in your materials considered lists?

A. Not in detail, no.

Q. Anything that wasn't in detail?

A. Some of the materials in Section 1 of my reports is typically documents relied upon. I might have perused some of the Plaintiffs' records in some of those Plaintiffs, but I can't say in detail on any of them.

Q. Did you review any of these documents with counsel during your -- first of all, did you meet with counsel for Plaintiffs in preparing for your deposition?

A. Yes.

Q. And when did you meet?

A. Last night.

Q. And for how long?

A. Two and a half to three hours approximately.

Q. Okay. Did you review any documents with counsel during your meetings?

A. It would have been discussion of my report, my reports, and then the corresponding defense economist reports.

Q. Have you had any communications with anyone other than Plaintiff's counsel to prepare for your deposition?

A. No.

Q. Did you discuss -- well, let me take a step back.

Did you have members or colleagues who were helping prepare your reports in these cases?

A. Yes.

Q. Can you tell me who those people were?

A. It would have been Adam Gilham, G-I-L-H-A-M, and then Stephen Dripps.

Q. Did you discuss this physician with either Mr. Gilham or Mr. Dripps?

A. Yesterday, I did speak to Mr. Gilham about these, yes.

Q. Okay. And what was the nature of that conversation?

A. More of the fact that it's going to be a long day of deposition on many Plaintiffs. I don't think anything of substance of our calculations or our conclusions.

Q. Okay. Just to clarify, did you discuss your opinions or the opinions you would be offering in this case with Mr.

Gilham?

A. Nothing specific, no.

Q. Okay. Have you ever had any communications with the individual Plaintiffs in the Camp Lejeune litigation?

A. No.

Q. Have you ever had any communication with the individual Plaintiff's treating physicians?

A. No.

Q. When did you first become aware of the Camp Lejeune litigation?

A. I don't have the retention letter in front of me. It might have been winter '24, I believe, probably initial contact was sometime in the winter of '24.

Q. Okay. When you were initially contacted for these cases, was that the first time you learned about Camp Lejeune litigation?

A. No.

Q. When did you first learn about Camp Lejeune Water Litigation?

A. I have been seeing

commercials on it on TV since, like, the early 2000s. I don't know, just as a casual person in the marketplace, I know it is on, I think lawyers were advertising for issues related to it for many years in between sporting events or Price is Right.

Q. Prior to being engaged by Plaintiffs in these cases, had you ever been sought or did anyone ever reach out to you to work on any kind of litigation involving Camp Lejeune water?

A. I don't believe so.

Q. Okay. Mr. Staller, you understand you were named by Plaintiffs in Camp Lejeune Justice Act Litigation as an expert witness, correct?

A. Yes.

Q. And you were named as a retained expert to provide opinions on behalf of Plaintiffs with kidney cancer, bladder cancer, NHL or non-Hodgkin's lymphoma, leukemia, and Parkinson's; is that correct?

A. Yes.

Q. And you were originally disclosed in February of 2025, does that sound right?

A. That sounds right. I'm going to go ahead and enter Exhibit 5.

- - - - -

(Plaintiffs' Designation and Disclosure of Phase III Expert Witnesses marked Staller Exhibit 5 for identification.)

- - - - -

BY MR. CROMWELL:

Q. And just for the record, Exhibit 5 is "Plaintiffs' Designation and Disclosure of Phase III Expert Witnesses," and this is dated February 7, 2025; is that right?

A. Yes.

Q. And this has you listed as an expert in each of the diseases except for non-Hodgkin's lymphoma; is that right?

A. Yes, that's correct.

Q. So in February 2025, you were not, at the time, offering any opinions

with any Plaintiffs that were claiming non-Hodgkin's lymphoma from Camp Lejeune water; is that correct?

A. At that time, yes.

Q. Okay. I'm going to go ahead and introduce Exhibit 6, this is, "Plaintiffs' Designation and Disclosure of Phase III Damage and Offset Expert Witnesses." And this is dated October 29, 2025.

- - - - -

(Plaintiffs' Designation and Disclosure of Phase III Expert Witnesses marked Staller Exhibit 6 for identification.)

- - - - -

BY MR. CROMWELL:

Q. Mr. Staller, in the October 2025 disclosure, you were named as an expert in each of the five diseases listed there; is that correct?

A. Yes.

Q. Are you familiar with each of the 25 what we call Track 1 -- first of

all, are you familiar with the term Track 1 Plaintiffs?

A. No.

Q. Okay. Do you recall how many individual Plaintiffs you were originally retained to review in these cases?

A. No.

Q. Okay. Do you know who the 25 trial Plaintiffs are in this case?

A. I'm reading the caption, I imagine it's them, but I don't know if that's inclusive or if there has been changes, but just from the caption, it appears to be around 25 names listed there.

Q. Okay. Would you agree with me just based off the number of reports, you are not offering an expert opinion in each of the Track 1 Plaintiffs cases?

A. Correct.

Q. Am I correct that you are offering an expert opinion in 19 Track 1 cases; is that correct?

A. Yes.

Q. And this includes Plaintiffs

Amsler, Connard, Carter, Criswell, Davis, Dyer, Fancher, Gleesing, Hill, Howard, Keller, Laramore, McElhiney, Mousser, Peterson, Rothchild, Sparks, Tukes, and Welch; is that correct?

A. Yes.

Q. Any that I have not listed or left out?

A. Not that I am aware of.

Q. Okay. Just to be clear, you are not offering expert report or opinions for Mr. Mark Cagiano; is that correct?

A. True.

Q. And you are not offering any expert report or opinions for Mr. David Downs; is that correct?

A. True.

Q. You are not offering an expert report or opinions for Mr. Robert Kidd; is that correct?

A. True.

Q. Okay. What information, if anything, did you receive between your initial disclosure in February 2025 and

your subsequent disclosure in October of 2025?

MR. RUZICKA: I'm going to object just to the extent it calls for any communications between you and counsel. With that stipulation, you can answer.

THE WITNESS: Documents received, if your question is documents received between February of '25 and October of '25?

BY MR. CROMWELL:

Q. Yes, we'll start there.

A. A significant amount of documents, specific documents for the Plaintiffs I was working on, which would be deposition testimony for life care plans for some of them, wage records for some of them, medical records, medical billing records, damages, assessment forms, other discovery, I can't recall for each of the Plaintiffs in here, but, basically, I would describe it as relevant case file materials for each of the Plaintiffs I was tasked

with developing economic loss models for.

Q. Okay. You indicated damages forms. You received all the amended damages forms for each of the Plaintiffs you're offering testimony for?

A. Yes.

Q. You also indicated medical records; is that correct?

A. Yes.

Q. What role do the medical records have in your opinions in this case?

A. More for general context of, I'm not a physician, obviously, so it would give me context either sometimes those records were relied upon or referenced by Michael Fryar, the life care planner, that prepared life care plan reports for some of the Plaintiffs. Other medical records that did not have life care plans, just give me background information, kind of how the Plaintiff might be doing, just learn about the Plaintiff in addition to learning about them from their deposition testimony.

Q. Okay. Fair to say you did

review individual Plaintiff's medical records as part of developing your opinions in this case?

A. Obviously not to form medical conclusions, but to learn about Plaintiffs, yes.

Q. Sure. You indicated that you reviewed life care testimony. Who -- whose testimony were you specifically referring to?

MR. RUZICKA: Objection, form. Go ahead. You can answer if you can.

THE WITNESS: I thought I testified of life care plans, not testimony.

MR. CROMWELL: Okay.

THE WITNESS: But I did read the life care plans of Michael Fryar.

BY MR. CROMWELL:

Q. Okay. Did you review the life care plans of Ms. Hairston?

A. I might have had those. I

think I did have those, yes.

Q. Okay. Did you review the life care plans of the United States experts, Dr. Shahnasarian or Ms. Navarro?

A. To my recollection, I thought Shahnasarian was a vocational expert. I didn't see a life care plan of Shahnasarian or Navarro.

Q. Does the distinction between Mr. -- or Dr. Shahnasarian being a vocational expert change whether you reviewed materials produced by him?

A. No.

Q. Okay. In October of -- or forgive me. In February 2025, you would agree with me, you did not prepare a report for, in the cases of Criswell, Tukes, Howard, Mousser, Davis, or Keller; is that correct?

A. True. In February of 2025, that's true.

Q. And since then you have now prepared reports for each of those individuals; is that right?

A. Yes.
Q. Is the reason you prepared reports now for those individuals based off new information that you received from them?
A. Since February of '25, correct, additional information was received that allowed for the calculation of certain damages, models for those Plaintiffs.
Q. And is it your testimony that you did not have that information prior to February 2025?
A. That would be my recollection.
Q. All right. Forgive me, this is just logistical, you have a lot of reports.
A. Yes, a lot of Plaintiffs to discuss.
Q. I am going to go ahead and enter these into the record and then eventually we'll talk about them.
A. Okay.

Q. So we'll go ahead, you prepared 14 Plaintiff-specific standalone reports; is that correct?

A. Yes.

Q. Okay. I'll go ahead and mark this as Exhibit 7 and this is your expert report from October 2025 in the Amsler case.

- - - - -

(Amsler Expert Report dated 10/29/25 marked Staller Exhibit 7 for identification.)

- - - - -

MR. CROMWELL: We will mark as Exhibit 8 your expert report from October 2025 in the Connard case.

- - - - -

(Connard Expert Report dated 10/29/25 marked Staller Exhibit 8 for identification.)

- - - - -

MR. CROMWELL: We will mark as Exhibit 10 your expert report from October 2025 in the Dyer case.

MR. RUZICKA: I'm sorry, did I just miss something? Did you say ten?

MR. CROMWELL: Yes.

MR. RUZICKA: It should be Exhibit 9, right.

THE WITNESS: It should be nine.

MR. CROMWELL: I apologize, nine, you are correct. That's my fault. Dyer's exhibit should be -- Exhibit number is number nine. Thank you for that.

MR. RUZICKA: Sure.

- - - - -

(Dyer Expert Report dated 10/29/25 marked Staller Exhibit 9 for identification.)

- - - - -

MR. CROMWELL: We'll mark as Exhibit 10 your October 2025 for Mr. Gleesing.

- - - - -

(Gleesing Expert Report

dated 10/29/25 marked Staller Exhibit 10 for identification.)

- - - - -

MR. CROMWELL: We'll mark as Exhibit 11 your October 2025 report for Mr. Hill.

- - - - -

(Hill Expert Report dated 10/29/25 marked Staller Exhibit 11 for identification.)

- - - - -

MR. CROMWELL: We'll mark your October 2025 report for Mr. Howard as Exhibit 12.

- - - - -

(Howard Expert Report dated 10/29/25 marked Staller Exhibit 12 for identification.)

- - - - -

MR. CROMWELL: We'll mark your October 2025 report for Mr. Laramore as Exhibit 13.

- - - - -

(Laramore Expert Report

dated 10/29/25 marked Staller Exhibit 13 for identification.)

- - - - -

MR. CROMWELL: We'll mark your October 2025 report for Mr. McElhiney as Exhibit 14.

- - - - -

(McElhiney Expert Report dated 10/29/25 marked Staller Exhibit 14 for identification.)

- - - - -

MR. CROMWELL: We'll mark your October 2025 report for Mr. Mousser as Exhibit 15.

- - - - -

(Mousser Expert Report dated 10/29/25 marked Staller Exhibit 15 for identification.)

- - - - -

MR. CROMWELL: We will mark your October 2025 report for Mr. Peterson as Exhibit 16.

- - - - -

(Peterson Expert Report

dated 10/29/25 marked Staller Exhibit 16 for identification.)

- - - - -

MR. CROMWELL: We will mark your October 2025 report for Ms. Rothchild as Exhibit 17.

- - - - -

(Rothchild Expert Report dated 10/29/25 marked Staller Exhibit 17 for identification.)

- - - - -

MR. CROMWELL: We will mark your October 2025 report for Mr. Sparks as Exhibit 18.

- - - - -

(Sparks Expert Report dated 10/29/25 marked Staller Exhibit 18 for identification.)

- - - - -

MR. CROMWELL: We will mark your October 2025 report for Ms. Tukes as Exhibit 19.

- - - - -

(Tukes Expert Report dated

10/29/25 marked Staller Exhibit 19 for identification.)

- - - - -

MR. CROMWELL: We will mark your October 2025 report for Mr. Welch as Exhibit 20.

- - - - -

(Welch Expert Report dated 10/29/25 marked Staller Exhibit 20 for identification.)

- - - - -

BY MR. CROMWELL:

Q. Thank you for your patience. Those would be the total 14 Plaintiff-specific reports that you prepared in these cases; is that correct?

A. Yes.

Q. Okay. You also prepared a combined an omnibus household and home health aide services report; is that correct?

A. Yes.

Q. We will mark that report as Exhibit 21.

- - - - -

(Household Services and Home Health Care Services Omnibus Report marked Staller Exhibit 21 for identification.)

- - - - -

BY MR. CROMWELL:

Q. And, Mr. Staller, in your omnibus report, is it okay if we just commonly refer to it as that?

A. I'll know what you're talking about, yes.

Q. Exhibit 21, in that report, you value past and future loss of household services incurred by Scott Keller, Ronald Carter, Jefferson Criswell, and Cometto Davis; is that correct?

A. Yes.

Q. And, additionally, you assess the value of past medical and related care services incurred by Scott Keller, Ronald Carter, and David Fancher; is that correct?

A. Yes.

Q. Is it accurate to say that

the opinions contained in the household report for Scott Keller, Ronald Carter, Jefferson Criswell, Davis, and Cametto Davis is all the total opinions that you hold for these Plaintiffs in these cases; is that correct?

A. For those Plaintiffs, correct.

Q. For instance, you do not have a separate report for those individuals; is that right?

A. True.

Q. Okay. You also prepared a single page rebuttal report; is that correct?

A. Yes.

Q. I'll go ahead and mark your rebuttal report as Exhibit 22.

- - - - -

(Staller Rebuttal Report dated 1/30/26 marked Staller Exhibit 22 for identification.)

- - - - -

BY MR. CROMWELL:

Q. All right. Mr. Staller, Exhibits 7 through 22 are the only reports you have created and are relying upon in the Camp Lejeune cases you're testifying for; is that correct?

A. Yes.

Q. As you sit here today, do you plan to offer any other reports in these cases?

A. Sitting here today, no.

Q. Do you have any intention of creating reports for any of the other cases?

A. I don't, no, not as I sit here today.

Q. Okay. Do these 16 reports set out the totality of and the scope of the opinions and testimony you plan to offer in these cases?

A. Yes.

Q. Are you planning to form any additional opinions about these cases?

A. To the -- as I sit here

today, no, but to the extent between now and trial if there's additional information presented to me that would require either modifying or updating my opinions for these Plaintiffs, I would be happy to do so. If defense economists issue new reports that need review and comment, I'll take a look at that information. But as I sit here today, this is the universe of what I would testify to as of today.

Q. Understood. Okay. Mr. Staller, you also provided various compositions of Materials Considered Lists for these cases; is that right?

A. Yes.

Q. And you divided these, we'll call them MCLs, by the Plaintiff's Track 1 disease; is that right?

A. Yes.

Q. You have an MCL for bladder cancer Plaintiffs Dyer and Laramore, that we will mark as Exhibit 23.

- - - - -

(Materials Considered Lists

for bladder cancer for Plaintiffs Dyer and Laramore marked Staller Exhibit 23 for identification.)

- - - - -

BY MR. CROMWELL:

Q. You have an MCL for kidney cancer Plaintiffs Mousser and Tukes and Howard that we will mark as Exhibit 24. I apologize, I have one copy of this, sorry. No, I lied.

- - - - -

(Materials Considered Lists for kidney cancer for Plaintiffs Mousser, Tukes, and Howard marked Staller Exhibit 24 for identification.)

- - - - -

THE WITNESS: You're not under oath.

BY MR. CROMWELL:

Q. Huh?

A. You're not oath.

Q. Not yet. Not yet anyways. All right. You have an MCL for leukemia

Plaintiffs Amsler, Connard, Gleesing and Bruce Hill that we will mark as Exhibit 25.

- - - - -

(Materials Considered Lists for leukemia Plaintiffs Amsler, Connard, Gleesing, and Hill marked Staller Exhibit 25 for identification.)

- - - - -

BY MR. CROMWELL:

Q. You have an MCL for Parkinson's disease Plaintiffs McElhiney, Peterson, Rothchild, and Welch and we will mark that as Exhibit 26.

- - - - -

(Materials Considered Lists for Parkinson's disease for Plaintiffs McElhiney, Peterson, Rothchild, and Welch marked Staller Exhibit 26 for identification.)

- - - - -

BY MR. CROMWELL:

Q. You also prepared an MCL for

your omnibus report; is that correct?
A. Yes.
Q. And we'll mark that as Exhibit 27.

- - - - -

(Materials Considered List for Omnibus Report marked Staller Exhibit 27 for identification.)

- - - - -

BY MR. CROMWELL:
Q. You have an MCL for rebuttal reports and we'll mark that as Exhibit 28. Almost through the hard part, I promise.

- - - - -

(Materials Considered List for Rebuttal Reports marked Staller Exhibit 28 for identification.)

- - - - -

BY MR. CROMWELL:
Q. You also provided a first supplemental MCL dated February 5, 2026; is that correct?
A. Yes.

Q. We will mark this as Exhibit 29.

- - - - -

(First Supplemental Materials Considered List dated 2/5/26 marked Staller Exhibit 29 for identification.)

- - - - -

BY MR. CROMWELL:

Q. For this MCL identified as Exhibit 29, this generally disclosed that you reviewed the expert report of Peter Rybolt dated January 20, 2026; is that right?

A. Yes.

Q. You reviewed his report; is that correct?

A. That's true, yes.

Q. Did your review of his report change any of your opinions in this case?

A. No.

Q. Was there any particular reason you reviewed his report?

MR. RUZICKA: I object to the

extent that it calls for any communications with counsel. Outside of that stipulation, you can answer, if you can.

THE WITNESS: Plaintiff's counsel said there was an additional expert that I -- they asked me to take a look at to read the report, so I read the report.

BY MR. CROMWELL:

Q. In your view, does his report have any relevance to the opinions you're offering in this case, these cases?

A. No.

Q. You also prepared a second supplemental MCL dated March 5, 2026; is that correct?

A. Yes.

Q. We will mark this as Exhibit 30.

- - - - -

(Second Supplemental Materials Considered List dated 3/5/26 marked Staller Exhibit 30

for identification.)

- - - - -

BY MR. CROMWELL:

Q. And this generally disclosed Mr. Michael Fryar's first amended therapies cost analysis table for Plaintiffs Terry Dyer and Richard Sparks; is that correct?

A. Yes.

Q. And you reviewed those tables; is that right?

A. Yes.

Q. Did the review of those tables change your opinions that you're offering in these cases?

A. They will, yes. I have a few cost change for these respective Plaintiffs, so that would necessitate me updating my present value of the future medical care for these two individuals.

Q. As you sit here today, do you know how it will change those calculations?

A. For Sparks, I believe, right, that was the adjustment for home health aide that, I believe, he had a 1,092 hours,

but that should really start in year three, it should be something less, so it would likely bring down the present value for Sparks.

For Mr. Dyer, I would have to look at that table again. I don't recall the number adjustment there off the top of my head.

Q. Okay. With regards to your opinion in Sparks, do you know exactly what the present value will be for home healthcare at this time?

A. No, not off the top of my head.

Q. Okay. When do you plan on formulating your opinions or updated opinions with regard to those two cases?

A. Today is the 10th, probably within the next two weeks.

Q. And will you be producing or providing updated expert reports in those two cases?

A. Yes, these changes would require updated reports, yes.

Q. Okay. Aside from these two reports, or these two issues in those reports, are there any other issues in those cases that you plan on updating your opinions in?

A. No, I think a prior question was, would I do updates or additional reports, with the life care plan cases, typically, I would make them prospective so at a time of a trial, so I should have clarified a prior answer that the life care plan cases should be updated or I'll probably update all of the reports for the passage of time when there's an actual trial in this matter to adjust for current inflation rates, current discount rates.

And also some of the life care plans, those should start prospectively at the time of trial, so I would eliminate elapsed past months as, you know, depending on when the trial occurs. So there would be updates to all the reports for passage of time. And then -- but no other reason for these two, it would

just be for these two data point changes and then the passage of time, so I would probably use current interest rate and discount rate for those two.

Thinking about it, maybe I wouldn't and just keep it consistent with my initial reports and then update them all collectively for the same interest rate, same discount rate at the time of trial versus having an inconsistent two reports with the others.

Q. Understood. Understood. Mr. Staller, this collection of MCLs, is that the total -- does that contain the total amount of materials that you have reviewed or considered in preparing your opinions in these cases?

A. Yes, Exhibit 23 --

Q. Through Exhibit 29?

A. -- thirty --

Q. Or 30, my apologies.

A. -- would contain the universe of documents I considered --

Q. Okay.

A. -- for these cases.
Q. Do you know whether your review of the United States experts' reports are contained at all in the MCLs that you provided in these cases?
A. I know it was a report was prepared as Exhibit 22.
Q. When you say, "Exhibit 22," you're referring to your rebuttal report?
A. Yeah, so it identifies that I've read the various reports for Ms. Yount, Dr. Brod, and Dr. Tosic. Whether those actual reports are listed in 23 through 30 --
Q. I think if you look at Exhibit 28, it lists those reports.
A. It does, yes.
Q. Okay. Prior to formulating your opinions -- sorry, strike that.
In response to -- excuse me. In response to the subpoena you received in this case, you provided certain contracting documents or retainer letters; is that correct?

A. Yes.
Q. Okay. And for the record, this is a collection of letters produced by Plaintiffs Bates-stamped PLG-EXPERT__ STALLER__ 24 through 41. And we'll mark this as Exhibit 31.

- - - - -

(Collection of Retention Letters Bates-stamped PLG-EXPERT__ STALLER__ 0000000024 through 41 marked Staller Exhibit 31 for identification.)

- - - - -

BY MR. CROMWELL:
Q. Mr. Staller, these retention letters indicate that you were originally engaged in these Camp Lejeune cases as early as July 2024; is that your recollection?
A. Yes.
Q. In these documents, you identify that you receive for each case a $2500 retainer; is that correct?
A. Yes.

Q. Is that -- did you actually charge this retainer, or is that simply a standard form to your billing practices or both?

A. So standard form for Plaintiff matters. Do we actually charge a retainer for 2500 for each of these? I don't recall.

Q. Okay. Is your standard rate $385 an hour?

A. In 2024 it was, yes.

Q. Okay. What is it now?

A. 425.

Q. And in 2024, you charged $2,600 for a half a day of testimony; is that correct?

A. Yes.

Q. What is that rate today?

A. 2700.

Q. Okay. So for a full day, is that just double?

A. Yes.

Q. Okay. So 5400?

A. Yes.

Q. Okay. You provided a retention letter to perform work on the Mark Cagiano case and this is Bates number ending in 31. Do you see that? Nope, that's not right. This is Bates number and ending in 25, my apologies.

A. Yes.

Q. I think we already established you did not prepare a report for Mr. Cagiano?

A. True.

Q. Were you asked to prepare or reach opinions regarding Mr. Cagiano's past or future economic damages?

MR. RUZICKA: I'm going to object to the extent that that calls for any communication between counsel. To the extent you can answer with that stipulation, you can go ahead.

THE WITNESS: In July of 2024, I was asked to consider materials or review materials for Mr. Cagiano. Ultimately, I did not

prepare a report after reviewing initial materials.

BY MR. CROMWELL:

Q. Okay. Why did you not prepare a report, excluding any conversations that you've had with counsel?

A. Ultimately, it would be that in reviewing fact-specifics material to Mr. Cagiano, there wasn't a need for an economic loss calculation of either future medical care or diminished earning -- earnings or earning capacity.

Q. Okay. Same question with regards to Mr. David Downs, you provided a retention letter for Mr. Downs ending in Bates number 31. I keep saying 31, it's not. It's Exhibit 31, Bates number ending in 28.

A. Yes, I see the retention letter for Mr. Downs.

Q. Okay. And aside from any counsel -- or conversations you've had with counsel, can you tell me why you did not ultimately prepare a report with regards to

Mr. Downs' past or future economic damages?

A. After reviewing initial materials related to Mr. Downs, there was no basis to prepare an economic loss report for the categories of economic damages typically associated with the diseases that we're discussing today.

Q. Do you have any retention agreements for Scott Keller, Ronald Carter, David Fancher, or Cometto Davis?

A. I don't believe so.

Q. You are offering opinions for those individuals though; is that correct?

A. Yes.

Q. Okay. In response to the subpoena, you also produced a number of invoices; is that correct?

A. Yes.

Q. And this is a collection of invoices produced in response to your subpoena Bates numbered PLG-EXPERT__STALLER__ 42 through 91. We'll identify this as Exhibit 32.

- - - - -

(Collection of Invoices Bates PLG-EXPERT__STALLER__ 0000000042 through 91 marked Staller Exhibit 32 for identification.)

- - - - -

BY MR. CROMWELL:

Q. Mr. Staller, does this appear to be a complete collection of the invoices you have submitted in the cases that you have been working on with regards to Camp Lejeune?

A. Appears to be, yes.

Q. These are the invoices you submitted for work on these cases; is that right?

A. Yes.

Q. Do you have any kind of estimate as to how much you have billed for your work in these cases?

A. It would be a guess, no idea. It's in here.

Q. Sure. You would have no reason to dispute the numbers in the

invoices you submitted; is that fair?

A. No reason to dispute those, correct.

Q. Okay. You indicated before that you have staff members like Mr. Gilham and Mr. Drapes -- Dripps, I'm sorry, that helps you with these, your reports in these cases; is that right?

A. Yes.

Q. And you understand that Mr. Dripps was originally named and disclosed as an expert economist in these cases; is that right?

A. Yes.

Q. Do you know why he was named and disclosed as an expert besides any conversations you've had with Plaintiff's counsel?

A. Our standard practice is typically to have two senior economists cosign reports. We typically do that really just for belt and suspenders to make sure there's two competent witnesses available to provide live trial testimony.

We try not to overlap our vacation schedules, personal days, so that way with the variability of trials and continuances and rescheduling, that one of us would be available.

Q. Just so I understand, was the basis for naming two economists generally with regards to making sure you had availability for testifying on behalf -- for the opinions that are being offered?

A. Yes, at the time of trial, our goal is to provide a live witness when available and feasible and to help further that goal, we have two senior economists that are competent and have reviewed cases cosign reports.

Q. Okay. Does Mr. Gilham or Mr. Dripps review case materials in these -- for the opinions that you're offering?

A. They would have, yes.

Q. Did they help prepare any sections of your reports that you're offering?

A. Mr. Dripps would have reviewed the final reports, so to make sure he was comfortable with cosigning reports initially that would have entailed reviewing the reports in the sense of an editor, read the reports, check the tables, check the reports.

Mr. Gilham's role was that to assist me with, since we had so many reports to prepare, we collaborated to get all the materials reviewed and then reports written.

Q. Did Mr. Dripps, during the conversations that you've had -- or sorry, strike that.

In Mr. Dripps review and cosigning of the reports you're offering in this case, did you all ever have any disagreement as to the ultimate opinions being offered in these cases?

MR. RUZICKA: I'm going to object to the extent that it calls for communications between experts and is protected by CMO 17 and Rule

26, so I'm going to -- you can talk about any assumptions or facts that were relied upon in your reports, but you don't need to disclose the communications between you and Mr. Dripps.

THE WITNESS: Based upon that response, I don't have a response then, because it would be conversations with --

MR. CROMWELL: Fair enough.

THE WITNESS: -- me and Mr. Dripps.

BY MR. CROMWELL:

Q. Was there any information, assumptions, or data that Mr. Dripps or Mr. Gilham provided to you that you're relying upon for the reports you're offering in this case?

A. No verbal assumptions or anything -- it would have just been source documents that are referenced in Section 1 or cited in our footnotes, so nothing from them individually.

Q. Okay. Besides Mr. Gilham and Mr. Dripps, were there any other individuals who worked own these reports or the information that went into these reports?

A. No.

Q. Okay. You have also prepared -- or sorry, are you familiar with the Plaintiff-specific intake forms that were prepared for a number of the Plaintiffs in these cases?

A. Not my intake forms, but intake forms from Plaintiffs, yes.

Q. Well, correct me if I'm wrong, these are intake forms that are on your company's letterhead that Plaintiffs or Plaintiff's counsel completed; is that right?

A. So we don't have -- so that might be, I think the damages checklist.

Q. Yes.

A. I'm familiar with those.

Q. My apologies just for nomenclature.

A. Yes.
Q. So you consider these damages checklists --
A. Not -- sorry.
Q. So I'll start over, you are familiar with the Plaintiff-specific damages checklist that you all provided to Plaintiffs to complete in these cases; is that right?
A. That's correct, yes.
Q. Okay. And you provided these forms to counsel; is that right?
A. Yeah, it would have been two generic forms from our office, it would either be an injury adult form or a death adult form, so depending on the respective Plaintiff, those were the two standard documents presented to Plaintiff's counsel.
Q. Okay. You never sent these directly to any of the individual Plaintiffs though; is that right?
A. That's true.
Q. Okay. And then you -- these would have been completed and you would

have received these completed forms back; is that right?

A. Yes.

Q. Okay. Do you know who completed these damage forms?

A. To my recollection, the last question on the form asks who completed it. I don't remember the response on the 19, I don't know.

Q. Okay. Do you know if these damages forms were completed for each of the individual Plaintiffs that you're offering opinions about?

A. I don't know if I got -- not for every Plaintiff, I don't think I got them back for the omnibus Plaintiffs. And then for the individual Plaintiffs, I don't recall who I got them completed, as I sit here, I don't know off the top of my head.

Q. Okay. Do you know if you received a form or damages form from -- that contain information with regards to Ms. Tukes or Mr. Howard?

A. Off the top of my head, no.

If I did receive it, it would have been in Section 1 of the report.

Q. Okay. Mr. Staller, to the extent that those particular intake forms exist, I would ask that those be produced, those have not been produced to us, if you can let us know. I understand that -- I understand that the omnibus ones you do not have one for.

A. Sure. I'll take a look if we have them.

Q. What is the purpose of these damages forms?

A. Background information on the Plaintiffs. I mean, if you have taken a look at them, I imagine you have, it starts everything with just the generic case caption, the who, what, when, where. It goes into learning about the Plaintiff biographical information. We can usually get that information or we should from depositions or Answers to Interrogatories or medical records, but it's just a nice form to synthesize a lot of information

about the Plaintiff that would be typical inputs for an economic loss model.

Q. Okay. Do you rely on these reports for certain information you're identifying in your reports? Sorry, it's a horrible question.

Do you rely on these damages forms for any of the Plaintiff-specific opinions that you have in these cases?

A. If I do, it's footnoted within my report. In these cases, most of the information that was presented in the damages checklist were corroborated from other documents set forth in Section 1 and I would typically use those source materials. A few times I do recall I had to use data points from the damages checklist.

Q. To the extent you footnote or cite to these damages checklists, is that your source of information for that particular statement in your report versus any kind of other corroborating evidence?

A. Yeah. So I would just give a

hypothetical to your question, so if the date of birth was 1/1/1950 and I cite to damages checklist, that means I got that date of birth and that illustration from the damages checklist and not from another source.

Q. Okay. Do those damages checklists help you determine what kind of damages the Plaintiffs are seeking in any given case, or is that an independent determination that you make?

A. Possibly. I mean, it would give some underlying foundational information. It's going to depend on the checklist, so we do have a household service section in the checklists. So some Plaintiffs may have, again, I'm speaking collectively, may have completed it, because there's a pre and post section or checklist. Some questions in the checklist are occupation and wages before incident. So they might guide us to where the Plaintiffs believe there may be economic loss, not conclusive, but it will give us

maybe a starting point to further investigate.

Q. With regards to household services, did you see any information in these damages checklists that identified what particular services an individual Plaintiff could or could not do before or after their diagnosis?

A. Off the top of my head, I don't remember each respective checklist for the 19 of them. I would have to go through. So sitting here, I can't say yes or no.

Q. Okay. If there is not any information in those checklists, what kind of information would you rely upon to determine what kind of, for instance, household services a person or Plaintiff did before and after their diagnosis?

A. Deposition testimony, sometimes there might be a reference in a medical record to pain or limitation generally. Michael Fryar's report, life care plan reports might talk about

limitations, physical. These are all going to be mostly physical, not cognitive, in these cases. So mainly physical limitations, physical pain, fatigue. Ultimately as a reduction in household services to me is just a true factual question from the evidence of the Plaintiff of, I used to be able to do ABC, because of my bladder cancer, either I do things in pain or I can't do things as an illustration. So that's for me, as an economist, I kind of just look to the base foundation of limitation and then I would leave it to the trier of fact to determine the ultimate losses, which is why throughout many of the reports, as you see, I do this one hour per week that I'm sure we'll discuss in a bit.

Q. Sure. But before you get to the kind of one hour per week, so to speak, you made some determination as to whether the person has limitations or complete inability to perform some services due to their diagnosis, correct?

A. Yes.
Q. All right. If they don't have such limitations or inability to perform those services, is it fair to say you would not be offering an opinion with regards to lost household services; is that fair?
MR. RUZICKA: Objection, form. You can go ahead.
BY MR. CROMWELL:
Q. In other words, there would not be an economic damages -- there would not be economic damages for lost household services if, for instance, you did not see any sort of limitations or inability to perform household services after a diagnosis; is that fair?
MR. RUZICKA: Objection to form.
THE WITNESS: Generally, again, I would have to see what the -- it's going to depend on we're kind of just talking collectively here --

BY MR. CROMWELL:

Q. Sure.

A. -- and at a higher level, because, for example, someone might be doing household services, but they might have sequelae from their diagnosis where they're doing things but it's painful to do things, where I imagine they should be compensated to me to not have to do things in pain just because they might not have the financial resources to currently hire somebody to do those tasks, so they have to be completed, laundry has to get done even though there might be lingering effects from the diagnosis or from continued treatment. So, yes, it either would be that, in my mind, household services exists if there has either been limitation not doing certain things, household members picking up those tasks, third parties picking up those tasks, whether that's at gratis or through third-party payment or the individual doing such services but in a limited fashion, meaning in pain,

discomfort, or the service taking longer than what it normally should. So, for example, if one says I do the laundry, but I have to take breaks, I could fold five pieces of clothing and then I have to got to take a break whereas if I was not impacted, I would be able to do it in a shorter period of time. Because that's what we're virtually measuring, right, time, we're valuing time and the opportunity cost of that time.

MR. CROMWELL: All right. We have been going for over an hour, do you want to take a break? I don't know if you need one, we can keep going, it's up to you all.

THE VIDEOGRAPHER: All right. We're going to go off the record at 10:29.

- - - - -

(A recess was taken at this time.)

- - - - -

THE VIDEOGRAPHER: We're back on the record at 10:41 a.m.

BY MR. CROMWELL:

Q. Okay. Mr. Staller, just one thing, when we were talking about before, I asked you questions about the Excel files that you had indicated that you had prepared but not produced in this case.

Do you recall that testimony?

A. Yes.

Q. And you indicated or testified that it contains proprietary information with regards to the formulas that you're using; is that correct?

A. Yes.

Q. You also testified that any economist, including the United States government economist, could recreate the calculations that you're using in this case; is that right?

A. Yes.

Q. What is the nature of the formulas, if that's true, what is the nature of the formulas that makes it proprietary in this situation?

A. The Excel sheet itself has

schedules that allow us to do our NPV, our net present value calculations, in a more efficient and routine manner. So we've created schedules where you put inflation rate in, you put the discount rate, and then it will populate through the duration period. So it is an efficiency thing for our office. But as far as the inputs, the inputs will be the same for all of us whether Ms. Yount is using it, Dr. Tosic or I'm using it, it's more so we create the schedules, macros within Excel that allow us to do the calculations with efficiency by not having to recreate the wheel for every year of calculation.

Q. But what about that makes it proprietary is my question, because any economist is going to, right, have to make that same schedule whether there's a formula or not, as you've indicated, other experts can do it, what about the efficiency part of the Excel makes it proprietary?

A. So it's just not using Excel,

it's -- we've created a macro within Excel that allows us to put in growth rate, put in discount rate, and then a duration period and then it will carry out the calculation for that duration period. So it's establishing a macro, a formula or not -- a process within Excel that if we, for example, provide it to another economist or anybody, then they would not have to do the year-by-year calculation that they would have to do, if I just gave the inputs, they would have our system that would make it easier for them or anybody to do the NPV calculation in a particular case. That, I guess, that's easiest to say, the macro is -- we're presented with Excel. Excel gives end users the opportunity to create macros, which are calculation shortcuts to do certain calculations and we've created such a calculation that synthesizes and simplifies the calculation as far as time and efficiency that we've created that I don't think, I believe it to be proprietary, that

if another person had it, they would be getting the benefit of our labor in creating that macro for doing net present value calculations.

Q. You would agree with me these macros though are simply you're using the inputs that are generally known to you as a forensic economist or any kind of economist and it's simply populating it for multiple years instead of a single year; is that correct?

A. Well, the inputs are disclosed in the reports.

Q. Right.

A. So there's no, I'm not trying to be secret about those, because even, I believe, in many cases, Ms. Yount and other -- the other, Brod and Tosic agree with my inputs as being within reason. The macro is a, similar to a production line, like someone has created instead of having to fill a bottle of water one at a time with one production worker --

Q. Right.

A. -- they're able to create a production line and send through in a system; likewise, that's what this macro has done for us, it creates a production line of calculations that instead of having to do things by hand, we've spent the time and labor to create a system within Excel that allows us to do these calculations in a streamlined fashion that if it was shared with others, they would be getting the benefit of our labor and time on the back end that created a present value macro that while the inputs are commonly known, and I imagine other end users of Excel could create such a macro, our office has kept that as a proprietary protection of our time and sweat equity to streamline calculations of net present value.

Q. That was going to be -- I think you hit on part of my next question, which is, you would agree with me that another economist could recreate the same macro to populate the same information, correct?

A. True, they could spend their time and effort to do that.

Q. Okay. All right. I want to turn back to your CV just for a moment.

A. Sure.

Q. And it's Exhibit 1. And Exhibit 1 identified as your résumé or CV, just first off, has this been updated since October 29, 2025, when it was produced to us?

A. Yes.

Q. Okay. What has changed or been updated aside from the testimony list that we previously discussed?

A. Sure. So testimony list would be updated for the passage of time. Non-substantive, but relevant, new address in the banner, we moved from October 29.

Q. Okay.

A. So you're in our current office, so the updated version has 30 Washington Avenue. As far as substantive, since October, the only substantive change, I testified in an additional state, so on

the page that lists where I've testified in various jurisdictions, to add to the state courts would be Indiana.

Q. Okay. Anything else?

A. No.

Q. Just for the record, I think your subpoena requested a CV, I know this had been produced previously, but if you would, I would appreciate sending whatever your most current version of the CV in response to the subpoena?

A. At a break, we could print, that I have readily accessible, so I could print this out at break.

Q. Perfectly fine. Any other substantive changes that you know of that have been -- that would be made to this version of your CV?

A. No, not that I'm aware of.

Q. Your CV lists your education, background; is that correct?

A. Yes.

Q. You have your law degree, and you received that in 2001; is that right?

A. Yes.
Q. Did you practice law after graduating in 2001?
A. Yes.
Q. Where did you practice?
A. Initially, I clerked, so I don't know if that's the definition of practiced law, but I clerked for the first 13 months or so, down in the Circuit Court of Montgomery County, Maryland, for Judge S. Michael Pincus. After that clerkship, I returned to Philadelphia where I began a civil practice for a firm called McCandless, M-C-C-A-N-D-L-E-S-S, Law Associates.
Q. And your civil practice, what did that consist of, what practice areas did you practice in?
A. So primary, so when I say, "primary," I would say that's probably 60 percent of my time, but not exclusive, it would have been in coverage disputes, so a lot of dec actions, declaratory judgment actions between two insurance companies

competing for -- well, trying to determine who had first layer of coverage in typically a tractor trailer event, whether it was an MVA or a loading or unloading event.

Q. How long did you work at that law firm?

A. Fall '02 to winter '05, so I probably left there February, March of '05.

Q. Okay. You received your MBA in 2005; is that correct?

A. Yes.

Q. Were you going to school at the same time you were practicing?

A. For a portion of it, yes.

Q. Okay. Why did you decide to get your MBA?

A. I mean, if you ever did dec work, you would leave it too. I mean, it was so horribly boring.

Q. Sorry.

A. But, I mean, so just one of those things, when you're a young attorney, to be honest, I'm under oath, you get into

a law practice and they put you in this department and they say do this and I'm, like, I'll do this and it was horribly boring. I mean it was just -- oh, sorry, Tammy -- it was just, it was just so very trite to me. There was a lot of interpretation of insurance contracts that I didn't find mentally stimulating and I sat there and I said I couldn't do this for five years, let alone 30 years. My father had started this company, so I was aware of the work of forensic economists, so knowing that and knowing that I couldn't continue to practice law and just learning more about the business of law, I felt that I was better suited as a forensic economist, so that's when I went back at night to get my MBA.

Q. Got it. When you're getting your MBA, oftentimes, there are different concentrations you can have, did you have a particular concentration?

A. So doing it at night, I was -- so Temple, I was at Temple

University, their main campus is on North Broad Street, I was at their Center City campus, it made it a little more restrictive of concentrations --

Q. Okay.

A. -- so I have to self-create one which was economics, informally. The formal concentration I did have, I think, it was just in business management, because of the selection of courses that were available to Center City students at night. But I was able to gear that towards economics.

Q. Okay. Did you ever consider getting your master's or PhD in economics?

A. I did, yes.

Q. Why did you not pursue that avenue?

A. Ultimately, so I went back after my MBA and I got a master's in accounting. After that, I considered going back, but then I spoke to a professor at Temple and I wasn't going into academics, so I didn't need my PhD. Typically, the

most critical point for a PhD is to teach and to publish, and that wasn't my goal with my career. So the professor that I became friendly with from the MBA program said at best maybe a master's, but then they said what are you going to do with that? And I said I'm already in my career as a forensic economist, and they said, well, you could spend the next two years doing a master's or you're very well credentialed for what you wanted and after talking it out with that professor, I just said it wasn't going to further my professional goals.

Q. When you were getting your MBA, was it your intention to be a forensic economist? Was that your ultimate goal?

A. At that point, yes.

Q. Okay. All right. And you indicated that your father started this practice; is that correct?

A. Yes.

Q. When did he start this practice?

A. 1980.
Q. Okay. Does he still work for this group or --
A. No, unfortunately, he passed sometime ago in '08.
Q. My apologies. On your CV, you list a set of publications. Do you mind turning to those? It's on the third page of Exhibit 1. And you have, I counted about 17 publications; is that right?
A. Yes, that sounds about right.
Q. Are any of them peer reviewed?
A. Peer reviewed meaning within a traditional definition of an academic journal?
Q. Yes.
A. No, peer reviewed within prior to publication, there were review boards and editorial boards reviewing the articles. But as I understand your question, peer reviewed, typically, means within an academic journal, these are not academic journals.

Q. Understood. You have an article from the U.S. Law Magazine spring/summer 2012 entitled, "Personal Injury Damages Roadmap."

Do you see that?

A. Yes.

Q. And were you the only author on this particular publication?

A. I think so, it has been a bit of time. I think I was.

Q. Okay. Do you have a copy of this publication, electronic or in hard copy?

A. Not electronic, hard copy, I don't think so either, I would have to look again, but that's a common question, I have not found them in my -- recently.

Q. Okay. Same question with regards to the second to the last article, you have an article entitled, "Economic Damages 101."

Do you see that line?

A. Yes.

Q. And are you the only author

on this particular publication?
A. To my recollection, yes.
Q. Can you tell me what that article was about, if you know or recall?
A. Nineteen years ago.
Q. Sure.
A. So that was for the AAJ, so that, I believe, is probably an overview of the typical damage categories in personal injury cases. I don't think we talk about wrongful death or I didn't talk about wrongful death. It would have been related to loss of earnings/earning capacity, probably present value. I imagine household services and probably life care valuation. That's kind of the typical roadmap when I was writing about those topics that I would cover.
Q. Similar topics to what you're offering opinions on in this case; is that correct?
A. Similar topics, yes.
Q. Do you have a copy of this publication, electronic or in hard copy

anywhere?

A. No, I have not found that one in years.

Q. Okay. Okay. You can put this away. Thank you.

Mr. Staller, are you familiar with the Camp Lejeune Justice Act?

A. I only became familiar with it through this litigation.

Q. Have you read it?

A. Parts of it.

Q. Okay. Do you use or rely upon the language of that statute for formulating any of your opinions in this case?

A. No, I don't believe so.

Q. Okay. You would agree with me it's not cited anywhere in your reports, correct?

A. True.

Q. You are an attorney, correct?

A. Yes.

Q. Do you still hold an active bar license anywhere?

A. Yes.
Q. Where?
A. Maryland, New Jersey, and the Commonwealth of Pennsylvania.
Q. Would you agree with me you are not offering any legal opinions in this case?
A. Agreed.
Q. That's -- you're here as a forensic economist; is that correct?
A. Yes.
Q. Okay. And you are offering opinions regarding economic damages for individual Plaintiffs; is that right?
A. Yes.
Q. You are not, however, offering any opinions on past medical expenses incurred by any individual Plaintiff; is that right?
A. That's true.
Q. You understand there's a different expert that's opining on that topic?
A. Yes.

Q. Are you familiar with Marjorie Hackett-Wallace?
A. Just through this litigation.
Q. Have you read any of her reports in these cases?
A. No.
Q. Okay. You are also not offering any opinions regarding the reasonable value of past medical expenses incurred by any individual Plaintiff; is that correct?
A. That's true.
Q. And you're not offering any opinions on the amounts an individual Plaintiff actually paid for any of their medical expenses; is that correct?
A. True.
Q. You're also not offering any opinions on any past or future medical or disability payments made by the United States government to or on behalf of any individual Plaintiff; is that right?
A. True.
Q. And you're not offering any

opinions as to whether any amounts paid or to be paid by the United States should or should not be offset against any potential damages award a Plaintiff may receive in this litigation; is that correct?

A. Correct.

Q. You're also not offering any opinion regarding whether offsets are permitted under the Camp Lejeune Justice Act, correct?

A. Permitted, I would defer to the court interpretation --

Q. Okay.

A. -- of the act.

Q. If permitted, you're not offering any opinion regarding the amount that should be offset in any given case; is that correct?

A. Can I hear that, if --

Q. If offsets are permitted, because you just noted that's for the court to interpret --

A. Uh-huh.

Q. -- you're not offering any

opinion regarding the amount that should be offset in any given case; is that correct?

A. I haven't done such a calculation, if the court deems under the Camp Lejeune Act that such offsets should be considered for economic damages, I could update my reports with such deductions.

Q. As you sit here, you're not planning to do that though; is that correct?

A. Correct, I would have to be instructed by the court first interpreting the statute.

Q. Okay. Similarly, you are not offering any opinions on noneconomic damages any individual Plaintiff may be seeking in this litigation; is that correct?

A. True, I would leave that to the trier of fact, the court, to ascertain those values.

Q. You agree your estimates of economic loss do not, for instance, include any calculations with regards to pain and

suffering; is that right?

A. True, that would be for the court as the trier of fact to award.

Q. Okay. All right. I want to talk about some of the broad categories of economic damages that you're opining on in these cases. I'm going to start with life expectancy. You are offering a number of opinions about Plaintiffs that are at least in part based upon an individual Plaintiff's life expectancy as you've calculated it, correct?

A. Yes, for the individuals that have life care plans, they go out to a life expectancy. Individuals with no life care plan would not have calculations going out to life expectancies.

Q. What about those Plaintiffs where you're calculating future household services, lost household services, would you use their statistical life expectancy in those situations?

A. So just as an anchor point, not as a calculation anchor, the

calculation anchors goes out to something called healthy life expectancy, which is a data point period of time that is prior to life expectancy. So life expectancy in that context is only referenced as an anchor point to make sure that healthy life is below life expectancy.

Q. Are you saying that when you determine a person's future lost household services, you are only taking that -- taking those services out to their healthy life expectancy, is that what you're saying?

A. The damages calculation duration terminates at the respective individual's healthy life expectancy.

Q. Okay. In your award, can you define life expectancy for me?

A. We have to clarify, so statistical life expectancy would be the period of time that a population would have a mean survival rate, meaning a period of time under statistical life expectancy is the duration in which a population's period

of survival would be at 50 percent. So, statistically, after that point that we typically see in the United States life tables, so at birth right now, it's around age 77, general population. That's the mean survival rate at birth, that means there's many individuals that live beyond 77, but that population drops below 50 percent.

Q. Understood. You base your statistical life expectancy opinions on life tables created by the National Center for Health Statistics, which are provided by the CDC; is that correct?

A. Maintained by the CDC, yes.

Q. Or maintained --

A. Yes.

Q. Is this a source you typically rely upon as a forensic economist?

A. Yes, it's a generally accepted source, the U.S. Vital Statistics are generally accepted.

Q. And I think you noted before,

this is one of the areas in which United States experts tend to agree with your particular opinions on statistical life expectancy; is that correct?

A. They do, yes.

Q. Do you normally rely on statistical life expectancy tables when forming opinions in personal injury cases?

A. That would be my typical practice, yes.

Q. Is offering an opinion regarding statistical life expectancy part of your standard methodology as a forensic economist?

A. Yes.

Q. Do you know what factors go into creating these life expectancy tables, for instance, gender, race, age?

A. Those would be the demographic -- the data is cut, the tables are cut by gender, race, and age.

Q. Any other factors that allow the tables to be cut in different ways?

A. Not as published in the U.S.

Vital Statistics.

Q. Okay. And I think you mentioned it before, but you understand that life expectancy or statistical life expectancy is determined by taking the mean life expectancy for an identified segment of the general population, correct?

A. True.

Q. And in determining statistical life expectancy, you would agree that half of the people who fall into an identified segment of the general population die before the given statistical life expectancy, correct?

A. If you're using the life expectancy as a median, that -- if using not mean, mean is an average, so that could have tails, but from the median standpoint, that's true, half the population would not make it to that data point duration and another half would go beyond it.

Q. That's my next follow-up, you agree the other half would go beyond that particular point in time; is that correct?

A. Yes.
Q. So in offering your opinions about these individual Plaintiffs, you're aware that, for instance, an individual Plaintiff could die sooner than their statistical life expectancy, correct?
A. That's one possibility.
Q. And they could live beyond their statistical life expectancy, correct?
A. Another possibility.
Q. To the extent you are offering opinions that rely on these life expectancy tables, you would agree that, in the end, a person may be over or undercompensated depending on when they actually pass away, correct?
A. For the life care plans that use statistical life expectancy? Yeah, when using a data point, there's three ways the results can be when you're building a model, right, the person could fall below the estimated value, they could equal the estimated value, or they could exceed the estimated value, so --

Q. Those are all possibilities, right?

A. Yeah, which is why we go with the point of central tendency, which is go with the mean or median point of survival.

Q. Okay. Does the fact that individual Plaintiffs may die before their statistical life expectancy render your opinions unreasonable?

MR. RUZICKA: Objection to form.

THE WITNESS: No, not in any way. I don't have, Ms. Yount, Dr. Tosic, and Dr. Brod don't have crystal balls. If we had those, or if I had it, I know I wouldn't be doing this. So we've got to build models to a reasonable degree of economic certainty, not absolute certainty, that's not the legal standard, not professional standard, so the best we can do is use reliable data as published by the United States government on

life expectancy in the United States, use the relevant demographic cohort group to model it out and go with the mean duration. Again, we're building models, as we sit here today, going out 10, 15, 20 years, depending on the age of the Plaintiff, so it's not unreasonable or unreliable, it's reliable using reliable data, knowing that it's not to an absolute certainty, but to a reasonable degree.

BY MR. CROMWELL:

Q. Well, doesn't the fact that someone can die before or after their statistical life expectancy render any kind of calculations based upon those statistical life expectancies speculative?

MR. RUZICKA: Objection, form.

THE WITNESS: No, when you use the term, "speculative," to me that means, like, there's no foundation or no basis or just being

whimsical. That's speculative. A person is going to live to 82, a person is going to live to 94, we have a basis, we have life tables that have been studied by the Bureau of Labor Statistics for over probably 75 years, at least the last 50 years of survival patterns and that's what gives it relevance.

That's why insurance companies use it for doing insurance policies. That's why workers' comp companies use them for measuring workers' comp benefits, because workers' comp benefits go out to a certain period of time life expectancy. We use them all the time in society to build reasonable reliable models. We're not here to guarantee with absolute certainty what will happen in the future. We can't do that. But we could use reliable data that

has been peer reviewed, published by the statisticians at U.S. Vital Statistics to give us good proxies of life expectancy. And it makes it reliable for us for these purposes.

BY MR. CROMWELL:

Q. So the fact that a Plaintiff may die before or after their statistical life expectancy, in your opinion, does not render your opinions unreasonable or speculative, correct?

A. True.

Q. Okay. Did you account for the variability in life expectancy, statistical life expectancy for these individual Plaintiffs, the fact that they may die before or after?

A. No, my pattern, my practice and many other forensic economists, standard practice is to build models of future medical care out to life expectancy as published by the U.S. Vital Statistics, which is what I did here. And no, I didn't

deviate from my standard practice.

Q. Does the fact that you do not opine on this variability render your methods and conclusions unreliable?

MR. RUZICKA: Objection to form. Go ahead.

THE WITNESS: No, I think quite the opposite, using what's disclosed in my report, they're quite reliable. They're reliable because I'm using reliable data, using a reliable methodology, and a reliable practice of doing the calculations. My present value formula is a reliable method that's agreed upon by forensic economists and the government's economists in this case. Life expectancy data source, agreed upon by the government's economists in this case. The duration period and dataset are agreed upon by the government's economists in this case. So I think it's quite the

opposite for building a model to not to an absolute certainty, which we can't do, but to a reasonable degree of economic certainty using the sources I use and the methodology I employ creates a reliable model for the trier of fact to rely upon.

BY MR. CROMWELL:

Q. So is it fair to say that it is normal and the standard methodology as a forensic economist to rely on life expectancy tables in formulating your economic damages calculations?

A. That's true.

Q. You had indicated in an MCL in previous testimony that you reviewed and considered the expert report of Peter Rybolt; is that correct?

A. Reviewed and considered, yeah, those are a fair description of what I did with that report, yes.

Q. Prior to seeing his report, did you know who Peter Rybolt was?

A. No.
Q. Since you reviewed his report, you're familiar with his opinions in that case -- in this case?
A. I reviewed them generally, yes.
Q. Okay. Are you familiar with his opinion that it was an error for the United States experts to fail to acknowledge or account for variability in life expectancy?
A. I would have to take a look at that portion of his report, I don't recall the specific language.
Q. Sure.
A. You were ready for that response?
Q. Huh?
A. You have that readily available ready for that response.
Q. I'm going to go ahead and mark -- am I on 45?
MR. RUZICKA: 33.
MR. CROMWELL: No, 33, sorry.

MR. RUZICKA: Close.

MR. CROMWELL: Close, very close.

THE WITNESS: Thank you.

- - - - -

(Expert Report of Peter Rybolt dated 1/20/26 marked Staller Exhibit 33 for identification.)

- - - - -

BY MR. CROMWELL:

Q. Mr. Staller, we have marked as Exhibit 33 the expert report of Peter Rybolt dated January 20, 2026; is that correct?

A. Yes.

Q. And this is the report that you reviewed and considered in this case; is that correct?

A. Yes.

Q. And if you would, turn to page 20 of Exhibit 33. Is they're numbered paragraphs, but there's a subsection number 3.

Do you see that?

A. Yes, yes, page 20.

Q. And one of Mr. Rybolt's critiques is that, "The government's experts fail to acknowledge or account for variability in life expectancy."

Do you see that?

A. Yes.

Q. And according to, actually, let's go to page 4, if you don't mind, of Exhibit 33. There's a section entitled, "Summary of Opinions."

Do you see that?

A. Yes.

Q. And under paragraph 13, the second bullet point that says, "even assuming," do you see that?

A. Yes, yes.

Q. I'll just read it and then I'll ask you a few questions, "Even assuming the VBA disability benefit offsets proposed by the government were appropriate, the government's analyses are funded speculative, and in many cases

include material omissions that collectively render the government's methodology and conclusions unreliable. These include the failure to consider fluctuations in ratings for injuries attributed to Camp Lejeune exposure, fluctuations in ratings for injuries unrelated to Camp Lejeune exposure, fluctuations in life expectancy, fluctuations in amounts withheld from VBA benefits as a result of military pensions (or vice versa) and the inherent uncertainties of future VBA disability benefits themselves."

First of all, did I read that correctly?

A. Yes.

Q. Would you agree with me that according to Mr. Rybolt, failure to account for variability and life expectancy renders the government's analysis fundamentally speculative and renders the government's methodology and conclusions unreliable?

MR. RUZICKA: Objection, form.

THE WITNESS: He says that in a string cite as just read --

MR. CROMWELL: Right.

THE WITNESS: -- but that's one of his conclusions, I would have to go back and read page, where you initially started out, but from his summary point, that's what he's suggesting in a string cite with other things.

BY MR. CROMWELL:

Q. Sure. And we can go back to page 20 on Exhibit 4?

MR. RUZICKA: I think you meant to say Exhibit 33.

MR. CROMWELL: Sorry.

MR. RUZICKA: Not four.

MR. CROMWELL: Yes.

Exhibit 33, page 20. And we're looking at again subsection three there. And there's a paragraph 60 that follows.

Do you see that?

THE WITNESS: Yes.

BY MR. CROMWELL:

Q. And he says, "A second fundamental assumption in the government's experts' calculation of the proposed offsets concerns the life expectancy of the Plaintiffs. The calculation proposed by the government's experts is straightforward, the expected monthly VBA disability benefit multiplied by the expected remaining duration of each Plaintiff's life. For the latter, all three of the government's experts rely on unadjusted data on life expectancy from the U.S. Centers for Disease Control and Prevention, or CDC. As above, this assumption leads to estimates that are unduly speculative, leading to the potential under-compensation of many, if not most, Plaintiffs while creating a substantial windfall for the government."

First of all, did I read that correctly?

A. Yes, you did.

Q. Does the fact that there are

fluctuations in life expectancy render your opinions that rely on life expectancy tables fundamentally speculative?

MR. RUZICKA: Objection, form.

THE WITNESS: No.

BY MR. CROMWELL:

Q. Does it render your opinions unreliable?

A. No.

Q. Would you agree with me that according to Mr. Rybolt, your failure to account for the fluctuations in life expectancy would render your analysis relying on those life expectancy tables fundamentally speculative?

MR. RUZICKA: Objection, form.

THE WITNESS: I don't know how Mr. Rybolt would respond to that. He seems to be talking about the VBA disability benefits going up to life expectancy.

BY MR. CROMWELL:

Q. Right, but his critique here is the use of life expectancy tables and

the variability of some Plaintiffs and whether they may actually die at the moment of life expectancy, correct?

MR. RUZICKA: Objection, form.

THE WITNESS: That's how I'm interpreting his paragraph 60.

BY MR. CROMWELL:

Q. So putting aside the issue of VBA disability benefits, would you agree with me that according to Mr. Rybolt, your failure to account for fluctuations in life expectancy would render your analysis relying upon life expectancy tables fundamentally speculative?

MR. RUZICKA: Objection, form.

THE WITNESS: If one is applying his language, again, I can't speak for Mr. Rybolt, but if one is applying what he wrote in paragraph 60, it seems to me that Mr. Rybolt would have an issue with my calculations going to a statistical life expectancy. That's my interpretation of his

paragraph 60 that I still defer to his response to that.

BY MR. CROMWELL:

Q. Would you agree that according to what Mr. Rybolt has written here, your failure to account for fluctuations in life expectancy would render your methodology and conclusions unreliable?

MR. RUZICKA: Objection, form.

THE WITNESS: I believe that's what -- it appears that's what Mr. Rybolt would suggest, I disagree with that for the reasons that I've already stated, but it appears what Mr. Rybolt would suggest about a calculation to statistical life expectancy.

BY MR. CROMWELL:

Q. That's my next question. Do you disagree with Mr. Rybolt's assessment with regards to the use of statistical life expectancy tables?

MR. RUZICKA: Objection, form.

THE WITNESS: I disagree with his conclusions, yes.

BY MR. CROMWELL:

Q. For few of the Plaintiffs, you are offering opinions about a reduced life expectancy; is that correct?

A. Yes.

Q. And your opinions in those cases are essentially you would expect on average of a patient of a certain age and gender to live to a particular age, but because of some medical condition, you are expecting that person to live some period of time shorter; is that correct?

A. True, based on other medical foundation, yes.

Q. Right. And when you opine on a reduced life expectancy, are you relying upon the opinions of other experts or are you formulating your own opinion about the Plaintiff's reduced life expectancy?

A. Other experts, other medical or medically trained experts.

Q. Okay. If for any of the

Plaintiffs you're offering an opinion on you do not offer a reduced life expectancy opinion, is it fair to assume you are expecting them to live to their statistical life expectancy?

A. Yes.

Q. In other words, unless you have expressly noted their reduced life expectancy in your reports, the Plaintiffs present medical conditions have not altered your opinions regarding their statistical life expectancy?

A. Reduced life expectancy present medical conditions, I'm just --

Q. Yes, as you know it at the time.

A. Right, so I mean many of the Plaintiffs or many of the people in the U.S. life tables have things going on as 65-year-olds, 70-year-olds, so in the population of the U.S. life tables, they might have bladder cancer, they might have heart conditions. So as a population for the Plaintiffs, I've done life care plan

present value calculations for being aware of their health outlook or current conditions where it doesn't cause me to deviate from the life tables.

Q. Okay.

A. Absent the ones that have specific life expectancy opinions.

Q. I think we're saying the same thing, that's what I'm trying to get at.

A. Sure.

Q. In other words, unless you have noted in your reports that a person has a reduced life expectancy based off of a medical condition, you would agree that the Plaintiff's current medical conditions regardless of what it is have not altered your opinions regarding their statistical life expectancy?

A. Correct.

Q. You are also, we touched on this before, you're also offering a number of opinions about these Plaintiffs that are based in part on the individual's healthy life expectancy, correct?

A. Yes.

Q. And you define healthy life expectancy as the age to which an individual has a full range of functional capacity; is that correct?

A. That's how the study defines it and I'm relaying the study's definition. So it's just not my definition, but the accepted definition of healthy life expectancy from the healthy life expectancy tables.

Q. Okay. In your own words, can you just define for me what you mean by functional capacity?

A. The way I would define it and the way it's generally defined by forensic economists would be, functional capacity is commonly referred to as the ability to maintain one's self, so that would include the ability to dress, bathe, prepare meals. It would be the ability to maintain one's abode, or their house, maintain their living structure, so it would be to do the cooking, cleaning, shopping.

Q. And this is why you use healthy life expectancy as part of your calculations for lost household services, future lost household services; is that correct?

A. The duration period for future lost household services, correct.

Q. Besides future lost household services, are there other categories of damages in which you rely upon a person's healthy life expectancy?

A. In the Camp Lejeune cases?

Q. Yes, sorry, I should have been more specific.

A. I don't believe so, no.

Q. Okay. I apologize, I meant to ask, when we're talking about statistical life expectancy rather than healthy life expectancy, you mentioned before, statistical life expectancy tables are not specific to a particular disease that somebody may have, that's correct?

A. That's true.

Q. The data is not cut based off

of a person having bladder cancer, kidney cancer, leukemia, NHL, or Parkinson's disease; is that correct?

A. True, it's all of those diseases.

Q. The tables that you rely upon, the healthy life expectancy tables that you rely upon for your opinions, do you know, again, what factors go into creating the healthy life expectancy tables?

A. Gender, age, and there might be -- there might be a small cut for race. Not as many cuts within the United States life tables, but to my recollection, I believe there's an African -- there's an all and there's a white Caucasian and then an African-American population.

Q. And these tables, similar to the statistical life expectancy tables, they're built upon mean determinations; is that correct?

A. True.

Q. Which means half the people

have a healthy life expectancy that ends before the calculated date and half have a healthy life expectancy that ends after the calculated date; is that correct?

A. Well, from a median, so the median in statistics, right --

Q. Yeah, sorry.

A. -- two points of central tendency --

Q. Yeah.

A. -- not to give a lecture, sorry, but the median would definitely be a population of half below, half above, the mean could be skewed a little bit because it's the sum of all responses divided by the population which gives another point of central tendency.

Q. Understood, and my apologies.

A. That's okay.

Q. I took economics at one point. It has been a while.

A. Right. That's the part of the lecture when everyone falls asleep, yes.

Q. Is it speculative to suggest that a Plaintiff's healthy life expectancy would be -- strike that.

Is it speculative to rely upon the healthy life expectancy tables for any of the individual Plaintiffs when calculating their future lost household services?

MR. RUZICKA: Objection to form.

THE WITNESS: Could I hear that question again, please?

BY MR. CROMWELL:

Q. Sure. Let me just take a step back.

A. Okay.

Q. Because a given Plaintiff's healthy life expectancy may end before or after their healthy life expectancy, does that in and of itself render any opinions based upon that healthy life expectancy speculative or unreliable?

MR. RUZICKA: Objection, form.

THE WITNESS: No.

BY MR. CROMWELL:

Q. You mentioned factors like ability to maintain one's self by dressing, bathing, cooking meals, and maintaining their house as factors you consider when determining their functional capacity; is that correct?

A. Yes.

Q. And you looked at these same factors when assessing the Plaintiffs', in these cases, healthy life expectancy; is that correct?

A. So it's the definition of healthy life expectancy. When you say examined it for these Plaintiffs in the Camp Lejeune cases, I use that as a data point of when we would expect their healthy life expectancy to exist to. I don't want to suggest on the record that I made sure everyone could tie their shoes or made sure everyone could -- to a certain period. That's the definition of healthy life, that we expect people to maintain such activities to a certain point in time.

Q. But did you evaluate those kinds of activities for the individual Plaintiffs when determining what kind of lost household services they may have incurred?

A. I mean, I'm confused by that question, because, for example, on household services, we don't value dressing oneself, a certain part of household services would be the cooking, cleaning, but certain activities would just be bathing oneself. Where in certain life care plans, Mr. Fryar has provided an allowance for a home health aide to assist with such tasks, but I didn't do a pre-assessment of that because I used the healthy life as an anchor endpoint to which one would statistically expect this population or this individual based upon the demographics that we've discussed to have such functionality until.

Q. We'll talk about this more in a minute, but is that, you mentioned that Mr. Fryar has life care plans for certain

future care. Am I correct in assuming that to the extent there is a life care plan provided for a given Plaintiff, you did not include a separate calculation for future household, lost household services in your damages opinions?

A. Correct. So if -- for the some of the Plaintiffs that had a life care plan that had an allocation for household -- housekeeping services, I did not do a future loss of household service model for those individuals.

Q. Understood. Okay. Okay. You're also offering a number of opinions about these individual Plaintiffs that are based, in part, upon the individual Plaintiff's work-life expectancy; is that correct?

A. The individuals that have wage claims, yes.

Q. That was a follow-up, which is, you use work-life expectancy when determining any kind of lost earning capacity; is that correct?

A. Yes.
Q. Okay. Same would be true for -- do you use work-life expectancy when calculating any kind of taxes that may be paid at the same time, retirement that may be paid or obtained at the same time, same thing?
A. So the work-life would be an anchor point for the duration of which income taxes would be deducted, because income taxes are associated with the generation of income, so that only goes on until the work-life period. And then depending if someone individuals had access to a pension, defined benefit plan, the defined benefit plan would commence at retirement age, work-life period. So that's probably where work-life is the anchor point for those topics.
Q. Okay. For work-life expectancy, you're simply projecting how long you would expect someone to work into the future; is that correct?
A. Work-life expectancy would be

defined as the period of consecutive years of full-time labor force participation.

Q. And when you say full-time labor force participation, this is a little academic, you're not necessarily saying the person is employed, you're saying they could be employed; is that right? They're in the labor force looking for a position; is that right?

A. You do remember your labor economics class.

Q. I'm trying.

A. So the definition of being in the labor force is seeking work or actively working.

Q. Actively working. Understood. Okay. Did you look at case-specific information for these individuals in the Camp Lejeune cases to determine how long they expected to work?

A. A Plaintiff stated intention of work-life?

Q. Yes.

A. No, I generally don't do

that, because, again, forecasting or building economic models, we use the data for that reason. Towards your life expectancy questions, I'm sure most people want to live to 100, that's their intention, most people don't, unfortunately, achieve that intention, so, likewise, with work-life asking someone how long I wanted to work for before a diagnosis in the '90s or mid 2000s, no, because it just wouldn't create a reliable basis.

Q. Wouldn't that change the -- if someone only expected to work until, say, 65, but they're work-life expectancy was until 67, wouldn't any calculations based upon 67 years overcompensate a given Plaintiff for their lost earning capacity?

A. So I don't think it overcompensates them, but in a couple of the cases, I did do that. The Plaintiff, I forget the Plaintiff now that worked with Upjohn, but the individual that was working for Upjohn, said -- stated intention was

absent his diagnosis, he was going to work for 18 more months, so I did the calculation for 18 more months at Upjohn. I know he had ancillary work as a teacher, professor, but I think from a calculations standpoint, no, to go to their work-life, even if their work-life extends beyond their intention, depending on the facts and circumstance, because, again, they're making a projection of what they would have done in a different universe, a different world, like, had I not had cancer, had I not had Parkinson's, this was what I was going to do. So a lot of that is a contemporaneous look here in the 2023, 2024, 2025, when they're being deposed compared to when they were dealing with the illness and their work-life, so I can't say necessarily that would overstate it, we would need more specific information on it.

Q. Sure. But I guess in a vacuum, you generally did not consider a Plaintiff's intentionality as to when they plan to retire as part of your calculations

of lost earning capacity?

A. I can't say never. So, you know, having done thousands of personal injury cases, it's going to depend on the facts and circumstances, so, for example, if someone testified in their deposition I wanted to make it to 70, I have a second marriage and I have a young kid and I wanted to get to at least through high school for that child, so even though the work-life might, statistical work-life might be two years earlier, there might be a foundation or basis to take that person to age 70 --

Q. Okay.

A. -- or earlier, depending on the facts and circumstances, so I can't say I never consider it, it's going to depend on the facts and circumstances of the case, generally, I do focus on work-life as the duration period from the statistical standpoint.

Q. So there are situations though in which you do consider someone's

intentionality?

A. Yes, but if someone says, I wanted to work to 80, and that's ten years beyond work-life, I'm likely -- very unlikely to do such a calculation or if they're ten years under work-life, that might be, you know, a reason to consider. But, again, if they had a pension or something, I would be considering -- I would need more facts and information on a specific case before I'd say I don't consider intention. But you have to be mindful of intention, intention is not a guarantee of outcome in building models.

MR. CROMWELL: We can go off the record.

THE VIDEOGRAPHER: We're going to go off the record 11:37 a.m.

- - - - -

(Discussion was held off the record.)

- - - - -

THE VIDEOGRAPHER: Back on the record at 11:38 a.m.

BY MR. CROMWELL:

Q. Okay. I want to switch topics, Mr. Staller. In many of your reports, you're offering opinions what you're calling lost past medical and related care; is that correct?

A. Yes.

Q. When you use the term, "past medical care," how is that different than past medical expenses? How are you differentiating those?

A. So, as discussed earlier, past medical expenses I didn't tabulate, again, there's really nothing for an economist to do except summation, get bills and add them up, and I believe Plaintiffs have other individuals to provide that summation for the respective Plaintiffs.

Past medical care, how I'm using it is not for the actual therapies and treatments received by medical professionals. This would be tantamount to that of a home health aide, the medical care. Another term I could have used would

have been the home care provided by a spouse, typically, a spouse for individuals when they were in a convalescent period either actively getting treatment, recovering from surgery, or some aspect of their journey with their unfortunate illness and recoveries that they needed assistance for tasks that would be equivalent to those tasks of a home health aide.

Q. Okay. And what is it you mean by related care, aside from what you've already described as a home health aide? Is there anything in addition you would include there?

A. I think my definition would cover medical related, medical, being that of a home health aide, a primary care assistant, those terms are synonymous, but those chores associated with caring for someone when they're sick and helping them out when they need assistance.

Q. Okay. Do you identify anywhere in your reports what kind of

services that go into providing home healthcare or being a personal aide?

A. Off the top of my head, without a specific reference point, it would probably be generally spousal care, it's probably coming from deposition testimony of either the claimant talking about their medical treatments, post-treatments, being convalescent, and then just needing general assistance and then overlaying with that my familiarity with the definition of a home health aide and the general job description of a home health aide or a PCA, primary care assistant, within the definition of the occupational employment statistics that talks about the tasks those individuals are typically charged with when caring for an infirm individual.

Q. Did you look at any of the medical -- or sorry, did you look at any of the kinds of medical or personal care services that any of the Plaintiffs required in these cases?

MR. RUZICKA: Objection, form.
THE WITNESS: Required, you're saying the past tense?
BY MR. CROMWELL:
Q. Sure. When you were looking at lost past medical and related care, is it fair to assume that that's referring to care that has already been provided up through December 31, 2025, I think that's the date you use, right?
A. That is the date, yes.
Q. Okay. So did you look at any of the kinds, either in deposition testimony or records you received, of kinds of medical or personal aide services that an individual Plaintiff actually required in the past?
A. So it wouldn't have come from the medical records, it would have come more from the discovery, the deposition testimony, of the Plaintiffs that I had surgery, my spouse drove me around, drove me to appointments, or post-medical treatment, chemotherapy, or depending on

the Plaintiff and the care, I had significant fatigue. Obviously, when one suffers significant fatigue, they need assistance. So it would be taking the basis typically of the Plaintiff's testimony, because medical records, again, I just generally use those as a general context, but they don't typically say a person needs a home health aide. The medical records will describe had X procedure, come back and see me, procedure was successful, further treatments, take this, it doesn't say they need help cooking or they're really, really tired. So it would have been more of the fact-specific testimony from the Plaintiffs.

Q. Okay. In the reports for the Plaintiffs in which you're offering an opinion on this topic, you provide calculations of losses based on hourly wages of home health or personal care aides; is that correct?

A. Yes.

Q. Essentially, this is the

equivalent of costs of having a home nurse or personal caretaker in the home providing similar services; is that right?

A. So we can't use the term, "nurse," because --

Q. My apologies, yeah, that's -- I'll rephrase that.

A. Okay.

Q. This would be the equivalent of, this wage is equivalent to having a personal care aide or home health assistant helping a person with tasks that they are no longer able to to perform due to their injury; is that correct, or diagnosis?

A. Yes, but, again I think, as put in my footnotes, that's correct, but we're being a conservative wage rate, because we're only using the wage rate, right, that's identified by the Bureau of Labor Statistics, which, generally, depending on where the Plaintiff's geographic locale was, is between probably 15 to $20 per hour, depending on the year, but it's important to note, and I say that

in my footnote, that that does not represent probably the true cost of acquisition of the service. If they were to actually acquire the service from Mr. Smith's Home Care Company, they're not -- Mr. Smith's Home Care is not charging 15 bucks an hour to bring someone out, they're going to charge $30 or more to cover their operational overhead, profit margin, business expenses, and general markup. So the rate I use, everything you said is yes, but I just wanted to make sure that caveat is on the record.

Q. Understood. But you would agree with me that you're not planning to offer any kind of opinion as to the actual cost or amount for acquiring such home healthcare in these cases; is that correct?

A. That's true, what I would tell the court as the gatekeeper and as trier of fact exactly what I just said here, that the number I've presented in these reports is a conservative number for the reason I just stated, that it doesn't

account for true marketplace purchasing of the service.

Q. Are you aware of any of the Plaintiffs which you're offering opinions in these cases of having acquired a personal care or home health aide?

A. I don't recall off the top of my head.

Q. Okay. So, as you sit here, you're not aware of any of the Plaintiffs having acquired such care?

A. I did reports for 19, off the top of my head, I don't recall.

Q. And just for clarification, your opinions about the value of past medical and related care are based on historical hourly wages of home health personal care aides in the geographic state where the Plaintiff resides; is that right?

A. Yes.

Q. You do not, however, opine on the number of hours a Plaintiff needed home healthcare or a personal care aide; is that correct?

A. That's true.
Q. Is it fair to say you are assuming -- or well, let me step back, are you opining though, that even though you're not opining on the number of hours a person may need, you are opining that they do in fact need some level of past home -- or past medical or related care?
A. So I would have to just change the tense, right, they needed at some point from the date of diagnosis, the commencement of treatment up through December 31 of 2025, that they needed some type of care associated with their illness from the Camp Lejeune exposure.
Q. And this would be based primarily on deposition testimony that you reviewed for these individual Plaintiffs?
A. The primary source collectively, yes, for the individuals that have that calculation would have been from deposition testimony of the Plaintiffs talking about illness, treatment, general recovery that would trigger the need for

someone to help them.

Q. Generally speaking, your opinions about the value of past medical and related care are based upon the Plaintiff's spouse or partner taking care of the Plaintiff since their date of diagnosis; is that right?

A. Generally, yeah, taking care of helping out is a broad term, yes.

Q. Can you explain to me how personal care or home healthcare provided by a Plaintiff's partner or spouse is an economic loss to the Plaintiff?

MR. RUZICKA: Objection, form.

THE WITNESS: To the Plaintiff, the spouse or just the injured Plaintiff?

BY MR. CROMWELL:

Q. The injured Plaintiff.

MR. RUZICKA: Objection, form.

THE WITNESS: To me, that would be specific to the Plaintiff, either to the extent that they testify that they incurred costs

for individuals, that should be compensable. To the extent that they needed assistance, to me, that is an expense that they should be compensated for.

BY MR. CROMWELL:

Q. Well, putting the incurred costs aside, because we'll talk about whether they actually incurred that momentarily, but the idea of needing assistance, I'm trying to understand in economic loss terms how services provided by a Plaintiff's partner or spouse amounts to an economic loss to the injured Plaintiff.

MR. RUZICKA: Objection, form.

THE WITNESS: In my mind, this is care that they needed to incur because of their illness. So the way I see it as an injury to the Plaintiff is it's similar to me of replacement value of household services that I'm sure we'll talk about, but I get injured, so now I

can't cook for myself. I can't clean. I can't get to my doctor's appointments. I have fatigue, so now I need the assistance, I've borne the cost of having assistance from somebody else that creates economic value to me that I need to expend either dollars or time to get someone to help me.

BY MR. CROMWELL:

Q. What dollar -- what additional dollars are out the door though when a spouse is taking on those services?

A. For the spouse, the additional dollars can either be their lost leisure time, lost work time, to the extent that they have to take sabbatical, leave a job, so there could be lost wages to the spouse, or forgone leisure time of the spouse.

Q. It sounds like that's referring to, like, an opportunity kind of cost to the spouse though, right? They're forgoing doing particular leisure or work

to take care of their injured spouse or partner, right?

A. Well, for the forgone leisure, not for the wages, the wages would be a diminishment of income to the house.

Q. Sure.

A. So that's an economic loss for the household.

Q. Are you aware of any spouse that had to forgo work for taking care of their -- the injured Plaintiff in any of these cases?

A. I don't recall.

Q. Just, so I'm clear, is the valuation of personal care based on the assumption that because of a Plaintiff's diagnosis, the spouse had to perform certain care which they did not have to perform prior to the Plaintiff's diagnosis?

A. That's a general overview, I would say that's a fair summary.

Q. Okay. Do you have any evidence that a Plaintiff's partner or spouse forewent anything or because they

were taking care of their partner or spouse for the issues caused by their Track 1 disease?

MR. RUZICKA: Objection, form.

THE STENOGRAPHER: For their what disease?

MR. CROMWELL: Their Track 1 disease, sorry.

THE WITNESS: I don't recall off the top of my head. It's 19 Plaintiffs. I don't know.

BY MR. CROMWELL:

Q. No, I understand, but this is my opportunity to ask, so if --

A. Okay. Yeah, sure.

Q. I'm trying to understand if there's any Plaintiff out there whose spouse actually had to forgo work, leisure, et cetera, because of they were taking care of their injured spouse or partner?

A. Yeah, as I sit here, I don't have a specific recollection of the testimony of all relevant spouses or the injured parties that may have described it.

Q. The rate that you use for a personal care aide is for -- well, so the rate you use is for a personal care aide who is performing a whole host of services for an individual, right?

A. Within the definition of what a home health aide would be, there's multiple services they perform, yes.

Q. And we've discussed some of those services already; is that right?

A. We did.

Q. Do you have anything else -- let me just generically, what kind of services would you expect a home health aide or personal care aide to provide to justify the hourly wage that you're offering?

A. General services associated with home health aides would be -- or personal care assistants would be dressing, bathing, providing meal prep, transfers, helping with mobility, assist with medication that's non-intravenous. That would probably be the general categories of

home health aide that I recall. There might be more to it within the definition, but that's what I recall.

Q. Okay. Did you make any attempt to determine which of these services a specific partner of a Plaintiff was actually having to perform due to the Plaintiff's injury or diagnosis?

A. No, that's why I give the one hour a week. That question to me just underlies a factual determination from hearing from the Plaintiff or the Plaintiff's partner or spouse and the court would apply an hours per week per year per Plaintiff, because to me that would just -- that's pure factual.

Q. Okay. So your opinions essentially presume that a Plaintiff needed personal care aide or home healthcare aide; is that correct?

A. My analysis presumes that as a result of their illness, there was some period of time in the past that they needed convalescent assistance, I'll use that

term, for the assistance of another. And then the ultimate number of that would be based upon the court listening to the testimony of the relevant individuals providing evidence on that topic and the court would then have the tool from my one hour a week to divide it if it's less or multiply it if it's more.

Q. But as you sit here, you don't know if an individual Plaintiff actually needed a personal aide or home health services --

MR. RUZICKA: Object to form.

MR. CROMWELL: -- correct?

THE WITNESS: As I sit here today when we talk collectively about the 19 Plaintiffs, I recall general testimony within the Plaintiffs' depositions talking about specific treatments where they were convalescent and recovering, ongoing therapies that were debilitating to them that would trigger the need for

assistance.

As far as specific date and time, I don't recall, but I do recall broadly within all of the Plaintiffs' depositions talking about their respective illnesses, therapies, and how those treatments created periods of time that they could not fully function without assistance.

BY MR. CROMWELL:

Q. You start your past medical and related care calculations on the date of diagnosis; is that correct?

A. Yes.

Q. How is it you decided to start those calculations on the date of diagnosis?

A. A defined anchor point of when to me the parties would agree treatment would commence, right, reasonably therein. I imagine by the date of diagnosis, they were probably feeling debilitated or physically impacted before

that, which probably led them to get evaluated by medical professionals, so a date of diagnosis might be a late period in time, but it's a point in my mind that's an anchor of that commencement date that everyone agreed upon that something changed for all these Plaintiffs on that date at least.

Q. Well, did you do anything to determine whether any of the Plaintiffs did in fact need home health or personal care aide starting on the date of diagnosis?

A. To me, from my general recollection of the deposition testimony, it generally went back, depending on what was asked by the Plaintiffs, but what led you to get medical evaluation and a medical test to determine you had an active disease or one of the five diseases we're talking about, so it was feeling unwell before their official dates of diagnosis, so, to me, my general recollection of the testimony was that the illnesses were already clearly functioning or active in a

person before the date of diagnosis that caused them to get medical care. I don't recall if anyone said, I'm just looking here at Ms. Amsler's case, that she was diagnosed with leukemia on December 12, 2020, that they got care on 2020. I imagine she got medical report from a biopsy or some medical test that said she had leukemia. I imagine, and I don't have her deposition testimony in front of me, that that was probably feeling unwell before September 12th that may have required assistance from a partner or spouse to help her do daily tasks that eventually, I believe, a court would listen to that testimony to say she needed home care, but as conservatively measured, we started from the date of her diagnosis, which was on September 12.

Q. Is it your testimony that each of the individual Plaintiffs was experiencing symptoms before -- of their disease prior to their date of diagnosis?

MR. RUZICKA: Objection, form.

THE WITNESS: I can't speak from a medical perspective, obviously, I'm not a medical doctor and I don't recall the specific deposition testimony for all 19, so I can't say yes or no here.

BY MR. CROMWELL:

Q. Okay. I guess I'm trying to understand the methodology of how you went about determining whether any of the Plaintiffs in fact needed personal home healthcare aides starting on the date of diagnosis versus when their disease may have actually caused some sort of limitation, as you put it, in their daily life?

A. Could I hear that question again? Could you repeat it?

Q. Sure. Could you repeat the question, Madam Court Reporter?

- - - - -

(Whereupon, the reporter read back as requested.)

- - - - -

MR. RUZICKA: Objection, form.
THE WITNESS: Methodology would have been reading the deposition testimony of the respective Plaintiffs or other discovery records to talk about how they were feeling and then the discovery of the illness or disease and then looking at the discovery records available.

BY MR. CROMWELL:

Q. Okay. And you do this for each individual Plaintiff?

A. Yes.

Q. Okay. You understand that the date of diagnosis, right, is in the past, right, and so this information would be available to you, whether a Plaintiff actually needed home healthcare aide on the date of diagnosis is something that could be determined at this point in time, correct?

A. Depending on the evidence, yes.

THE STENOGRAPHER: Depending on the what?

THE WITNESS: Oh, I'm sorry, depending on the evidence, yes.

BY MR. CROMWELL:

Q. Did you make any effort to contact Plaintiffs to determine whether they in fact needed personal home healthcare, personal aide care on the date of diagnosis?

A. I didn't contact them, no.

Q. Would you agree with me on the general principle that simply because somebody is diagnosed with a disease does not mean that they need home health or personal aide care; is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: On a specific date, are you saying, so I just have Amsler in front of me, that's why I just keeping using her as example, so are you saying Ms. Amsler was diagnosed on September 12 of 2020, are you

saying because she got leukemia or because she got the diagnosis on September 12?

BY MR. CROMWELL:

Q. So we'll break it apart. Simply because somebody is diagnosed with, say, leukemia on a given day, it does not necessarily follow that that person needs home healthcare or personal aide care on that same day; is that correct?

A. I imagine when they're diagnosed with a tragic illness, they're going to need a lot of support on that day of diagnosis. So, again, I can't say they wouldn't need the assistance of a home health aide to provide them comfort and support when they get terrible news. I wouldn't say -- I couldn't say no to that, they probably need a home health aide on that day.

Q. Well, wouldn't the type and severity of the illness play a role as to whether a person needed home healthcare or personal aide care or does that play no

role in your calculations?

A. So I'm not a medical expert, but the five diseases that we're dealing with that I have written reports in, to me, all of these five diseases are significant for me as a layperson that would trigger the need for a home health aide definitely on the date of diagnosis, just merely for the comfort impact of receiving unfortunate news. And then the subsequent frequency of home care, that's going to vary on the disease and the progression of the disease and the treatment program, but they're all going to need assistance from these five diseases. And I think they talk about various periods of time in their respective 19 depositions of treatments and frequency of visits, medical visits, and then medical care.

Q. You mentioned that what kind of care they need going into -- well, the kind of care they may need after their date of diagnosis may depend upon the type and severity of their illness, am I capturing

what you just said correctly?

A. Yes, again, talking as a layperson, I'm not a medical expert, but just common sense, there's going to be a range of treatments depending on multiple factors.

Q. You, in your calculations of past medical and related care, have ended those calculations on the same date for each of the Plaintiffs, December 31, 2025; is that correct?

A. The last day of last year, yes.

Q. Okay. And what is the basis for -- well, strike that.

You did not differentiate between the individual Plaintiffs needed care or home healthcare if you ended all of their related care on the same day; is that correct?

MR. RUZICKA: Objection to form.

THE WITNESS: I don't understand that question.

BY MR. CROMWELL:

Q. Yeah. Because it was a poor question. If you, as you've testified that you did, ended each of these individual Plaintiffs' home health and personal aide care on the same date, how did you account for the differentiation in the type and severity of their illness that may have been different from Plaintiff to Plaintiff?

A. So the 12/31 is selected as a demarcation line from when the life care plans would start for Mr. Fryar. So I used, at that point in time, when I wrote my reports in essence November 1st of 2025, I finished the calendar year for past medical expenses because then the life care plans start January 1st of 2026. So there's a demarcation there.

As far as the frequency of care needed, that's going to have to be based upon the testimony presented at trial that the court will make the determination. Again, just using Ms. Amsler, alphabetically at the top of the reports

for Exhibit 7, I'll imagine she'll testify given her leukemia, she needed assistance through 2023 possibly and then, you know, when possible treatments subsided, then that went away, so the court could take my numbers and stop it in 2023 or if she was getting care or getting assistance from family members or a spouse through 2025, they would have that data for the court to determine based upon what she testifies to at trial, as far as needing someone to help her get to medical appointments, someone to help her after medical appointments, someone to help her prepare her meals, someone to help her after she was tired after leukemia treatments just to put a blanket over her, to help her with, to get her upstairs to take a shower. I'll imagine she'll testify how she will from her recollection of the cancer over the last five years and the court will take that information, have the tool that I have presented the court with to then make any final calculations.

Q. Just to clarify, you're not offering any sort of opinion as to the amount of care that an individual Plaintiff needed as far as home healthcare, personal aide care?

A. Frequency of how much, correct, I am not.

Q. Okay. So are your opinions with regards to past medical and related care limited to the hourly wage rate for a home health or personal aide care for these individual Plaintiffs?

MR. RUZICKA: Objection, form.

THE WITNESS: My opinion would be that the inclusion of such a calculation based upon the records I reviewed as set forth in the respective Roman numeral I of my reports and then presenting the court with, correct, the one hour per week multiplied out per year. There is no present values or in the past, so I would be adjusting that rate for just historical

inflation.

BY MR. CROMWELL:

Q. Okay. So the Plaintiff-specific information that you reviewed and have relied upon go to your first point, which is whether to include past medical or related care as a measure -- as a category of economic damages at all; is that correct?

A. Yes.

Q. Okay. Would you agree with me that the amount of care, if at all, a person needed with regards to home health or personal aide care would affect the overall calculations you would make for any such damages, the frequency, as you put it?

A. Yes, it would change the amount. So if one Plaintiff needed ten hours in the past, that would take my numbers and multiply by ten. If someone is only at two, that would be a lower value, yes.

Q. In many of your reports, you are offering economic damage opinions

regarding lost household services, correct?
A. Yes.
Q. And can you, in your own words, define what you mean by lost household services?
A. Yes. Household services is typically defined as the upkeep and maintenance of one's home, so that would include everything from caring for household members to the physical structure itself. So, maintenance, cooking, cleaning, interior, exterior upkeep, food shopping, that's going to include going to the food store to buy food for the home, so everything it takes to upkeep and maintain an orderly household.
Q. Do you define anywhere in your reports what services go into lost household services?
A. I don't know if I ever define it.
Q. Okay. What -- what do you consider in the calculation of lost household services for a given Plaintiff?

What are your inputs?

A. It would be hours per week of loss multiplied by a replacement value of those services to attempt to purchase those services in the marketplace with the same caveat that I just used, the hourly rate for a collection of occupations commonly associated with household production and that hourly rate would be far below the market cost of purchasing outdoor maintenance services or if you wanted to actually purchase the service of a maid, these are just the direct hourly rates.

Q. You said you include the hourly wages for the occupations of providing the service that you listed previously, correct?

A. Yes.

Q. What did you do, if anything, to determine whether a given Plaintiff needed each and every one of those occupational services?

A. So I didn't do an individual inquiry for those 15 or so occupations that

are cited within my respective footnote for household services. In my experience, household services is a true hodgepodge or collection of household production. So if you take an individual with a minor child, they might be an Uber driver for ten minutes taking the kid to an activity and then they're doing meal prep or they might then be going outside and raking leaves for 15 minutes or unless the winter, shoveling or adding salt to the blacktop.

So having looked at the data and the 15 jobs I've selected, what you find out is the hourly wage is very tightly banded together, meaning you don't have jobs at 7.25 per hour for federal minimum wage and then other jobs at $42 an hour that would create a very wide variance and could distort an average.

All of the occupations having looked at the data for the last 20 years, they tend to be within a dollar to $2 of each other for these selected occupations in the respected geographic area. So

knowing that they're centrally bound to each other and knowing just in human nature what we do to upkeep our home, we wear many different hats at many different times.

Q. Sure. But you would agree with me that the services needed for any particular individual Plaintiff, household services, is unique to that Plaintiff. What one Plaintiff may need is not necessarily going to be the same as what another Plaintiff may need?

A. Possibly, some could have the same limitations, but there could be variances in the Plaintiffs.

Q. Did you make any effort to make any kind of determination as to the variances between the individual Plaintiffs that you're offering opinions about in this case?

A. No, because that's why I give the one hour per week, which ultimately, I think, that's a -- the question you just asked is a pure question of fact of what does Ms. Amsler's limitations create

compared to Mr. Connard's.

Q. I'm not necessarily talking about the frequency, I'm talking about the kinds of services, the hourly wage input that you do calculate is made up of various occupations that an individual Plaintiff may or may not need, depending on that Plaintiff's situation, correct?

A. Possibly.

Q. And I'm asking, based off of that, did you make any determinations as to the services provided by the occupations you listed as to whether these individual Plaintiffs in these cases did or did not need those kinds of services?

A. No, for the reasons that I've stated with regard to my experience with the wage rates and the occupations I selected and, again, just with my experience of household production that many hats are worn sometimes simultaneously.

Q. To calculate the number of hours an individual spends performing

household services, you use data from the 2023 American Time Use Survey; is that correct?

A. In some cases, mostly cases have one hour per week, but, yes, otherwise, if I'm showing what the average production is, it's coming from the American Time Use Survey.

Q. Okay. It wasn't clear to me, are you using the American Time Use Survey to calculate both past and future lost household services or only lost future household services?

A. It's going to depend on the Plaintiff.

Q. Okay.

A. Some of them, I think, a couple of them, three of them are death cases, I believe, where there's probably a past calculation of the average hours, especially in a death case, you know, it's permanent.

With regard to the injury cases, that would have all been

prospective.

Q. Okay. I guess I am trying to figure out, how did you determine whether to use ATUS data for past lost household services for a given Plaintiff?

A. So I typically show the ATUS hours --

Q. Yes.

A. -- as an illustration for the trier of fact, for the court. So should the court make the determination that, let's just switch names, if Connard, Mr. Connard could not do the full complement of household production, the court then is instructed on what that multiplier should be. Thirteen hours per week is the typical average for working males, retired males, on average, it goes up to around 21, but that would be based upon the testimony presented at trial.

Q. No, I understand, I'm trying to understand taking a step back, how you decide whether to give this second scenario for a past -- or past lost household

services and whether to provide that scenario that relies upon ATUS data or not.

A. To my recollection, the past would only be for the death cases.

Q. Okay.

A. To my recollection, the other individuals' past calculations would not include an ATUS calculation. It's probably highlighted in there to show the court here's the hours per week for disclosure, but I don't think I did a calculation to the ATUS --

Q. Okay.

A. -- in the past, for a non-death case.

Q. Okay. Why would you include it for death cases versus those that were not?

A. The household production, the average household production has been lost in a death case, where in an injury case it could be a marginal loss in the past that, you know, because of the treatments and therapies, I used to do ten hours a week of

care, but now I -- or household production, but now I can only do five hours per week of household production. In a death case, unfortunately, a hundred percent of production is lost.

MR. CROMWELL: We have been going for a decent amount, if you guys want to take a break. I don't know what time it is. I'm sorry.

MR. RUZICKA: 12:24, do you want to take a 30-, 45-minute break to eat some lunch.

THE VIDEOGRAPHER: All right. We're going to go off the record at 12:22 p.m.

- - - - -

(A recess was taken at this time.)

- - - - -

THE VIDEOGRAPHER: Back on the record at 1:08 p.m.

BY MR. CROMWELL:

Q. Mr. Staller, before we broke, we were discussing your general calculations with regards to lost household

services.

Do you recall that testimony?

A. Yes.

Q. I want to specifically look at past lost household services. You estimate the value of past lost household services using two scenarios, depending on the individual case; is that correct?

A. Two scenarios either being one hour per week or the ATUS hours, yes.

Q. Correct. For each of the scenarios you presume that a Plaintiff had economic damages for the value of lost household services from the date of their diagnosis until December 31, 2025; is that correct?

A. For past, yes.

Q. Okay. And as you just mentioned, first, your first scenario you provided an illustrative calculation of one weekly hour of lost household services; is that right?

A. Yes.

Q. And as part of that

calculation, you determined the hourly rate for the lost household services and provided an estimate for that one hour; is that right?

A. Yes.

Q. Okay. And to determine the hourly rate for household services, you rely upon specific occupations; is that correct?

A. Yes.

Q. And you looked at a group of occupations and in your report you entitled this group, household service occupational groups; is that right?

A. I think that's the term I used, some term like that, yes.

Q. Okay. And this includes healthcare support, food preparation and serving, building and grounds cleaning and maintenance, personal care and service, sales and related office and administrative support, installation, maintenance and repair, and transportation and material moving; is that correct?

A. So those are not the specific occupations, but those would be the broader category. If you go up within the Bureau of Labor Statistics, yeah, those would be the job classification codes within where you'll find the specific occupations identified.

Q. So these are the general broad categories that will contain the actual occupations of which you rely on in forming that hourly wage rate; is that correct?

A. Yes.

Q. Okay. And the occupations you're referring to, you identify them as, quote, "the representative occupations;" is that right?

A. Yes.

Q. I think you just explained it to me, but the representative occupations are essentially subsumed within these larger broad categories of occupations and you use these grouped together to determine the hourly wage rate that you're relying

upon; is that right?
A. Yes, so just for some specificity --
Q. Sure.
A. -- so looking, I'm just looking by illustration on Ms. Amsler's case again, the broad grouping categories are coming from footnote 26, right, where then in footnote 25 is going to have the specific occupations, but where you just read from, it's going to have the broader categorization which I used really for the wage growth.
Q. Understood. And so just for the clarity of the record, you're referring to Exhibit 7, which is Ms. Amsler's report; is that correct?
A. Yes.
Q. Okay. When looking at Ms. Amsler's report specifically footnote 26, the -- well, my apologies, looking at footnote 25, the representative occupations, did you select which occupations to include in this

representative group?

A. Yeah, so footnote 25 would be a standard footnote that I use for the last 15 years or so to model out a replacement value of household services.

Q. But you're the one who selected the occupations that go into your hourly wage calculation; is that correct?

A. True.

Q. Do you have anywhere in your report a description of the methodology as to how you determine which occupations you do or do not include in your calculation?

A. What I do include is set forth in footnote 25, as far as a narrative describing it, it would've -- I believe you asked me a question about it before lunch where I narratively described it in today's deposition, but not in the report.

Q. Okay. Were there other -- are there other occupations that could have been included within this representative occupational group that you rely upon?

A. There are other occupations

for sure, yes.

Q. For instance, in other personal injury cases, are there other occupations that sometimes you include in your --

A. Oh.

Q. -- say that again, I'm sorry?

A. I just said, "oh."

Q. In other personal injury cases, are there other occupations you rely upon in formulating your hourly wage rate?

A. The only additional job that I include would be childcare workers, but here with this population, I removed childcare workers.

Q. Okay. And I think if I'm understanding your testimony from before lunch, would you agree with me that you did not make any attempt to compare the occupations that you did select for the representative occupations based upon what the individual Plaintiffs in these cases needed or will need in the future?

MR. RUZICKA: Objection, form.

MR. CROMWELL: -- is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: Agreed, my list, I didn't specifically tailor to a specific Plaintiff. In my experience, just knowing, and from personal experience of what household production is, it's a collection of occupations all at once or at different times throughout a day or an hour, so I did not limit one Plaintiff's hourly rate replacement value to one specific occupation.

BY MR. CROMWELL:

Q. Just to break that apart a little, do you know whether any individual Plaintiff for which you've rendered a report will need, for instance, assistance with food preparation?

A. So I don't recall, and, again, there's 19 depositions or more, but 19 are Plaintiffs, I don't recall a

specific person off the top of my head saying, I can't cook, but I do recall people saying there's many things I can't do, so and I don't know if it was explored further in the depositions by you or your colleagues.

Q. Did you evaluate whether any individual Plaintiff will need help or did need help washing dishes as a result of their diagnosis?

A. I have personal facts about that, again, in the depositions that I recall, generally, I think there was general discussion in many of the depositions about fatigue, limitations, general limitations, but I don't know if the specific task was Q and A questioned and answered about dishwashing.

Q. Okay. So, as you sit here, you don't know whether any individual Plaintiff will need help washing dishes; is that right, or did need help with washing dishes?

A. So, in the past, I don't

recall someone specifically enumerating saying they could not wash dishes. I do recall from their deposition testimony limitations from their illness and treatment and sequelae, which may include washing dishes, which I imagine would be developed further at testimony, trial testimony, but as far as a record of that being stated explicitly, I don't have a recollection of that explicit statement.

Q. Okay. Did you evaluate based off the records you did have available to you whether any individual Plaintiff will need help cleaning their house?

A. It would be the same answer, I don't -- just to answer that, I don't have a specific recollection of the testimony saying I didn't clean my house or I couldn't clean my house. I do have a recollection of the testimony saying, a common theme was recovering from treatments, fatigue, tiredness, limitations moving around for periods of time. But not that specific verbiage, I don't recall.

Q. Right. So, as you sit here, you don't recall any evidence that showed an individual Plaintiff will need help cleaning their house or did need help cleaning their house?

MR. RUZICKA: Objection, form.

THE WITNESS: Well, I don't know about that question, because evidence to me, there's evidence that they had illnesses and they had illnesses that created physical limitations that would necessitate them to have assistance. As far as the specific statement, cleaning your house, I don't, sitting here today, recall that specific statement, but there is evidence of limitations and there's evidence of illness and that required treatment and the treatments created care periods or limitation periods, you know, given the either chemical cocktails one was taking, surgeries, or therapies, but as far

as that statement, I don't recall that statement off the top of my head.

BY MR. CROMWELL:

Q. Okay.

A. And the statement being, for the record, housecleaning.

Q. Right. So I understand you're referring to testimony generally speaking about limitations in someone being diagnosed, but I'm asking pretty specific questions as to based off of the evidence that you have available to you and the evidence you've reviewed, do you have any information that an individual Plaintiff needed help cleaning their house?

A. I don't know off the top of my head.

Q. Okay. Do you have any evidence, sitting here, that an individual Plaintiff needed help keeping up their landscaping?

MR. RUZICKA: Objection, form.

THE WITNESS: I don't know off

the top of my head.
BY MR. CROMWELL:
Q. Do you have any evidence whether any individual Plaintiff needed help with performing maintenance and repairs around their house?
A. I don't know off the top of my head.
Q. Do you have any evidence whether any individual Plaintiff could perform maintenance and repairs around their house but eventually could not because of their diagnosis?
A. I don't know off the top of my head.
Q. Did you or anyone on your team interview anyone, including the Plaintiffs, regarding what household services the individual Plaintiffs could perform prior to their diagnosis?
A. No.
Q. Did you or anyone on your team interview any of the -- anyone, including Plaintiffs, regarding the

household services they -- well, strike that.

Would you agree with me that the idea of lost household services is to replace the services that a Plaintiff would need help with or did need help with?

MR. RUZICKA: Objection, form.

THE WITNESS: I guess, generally, in my mind, I don't know if we're saying the same thing, but in my mind, household services replacement is someone used to be able to maintain their household and can no longer do certain activities. So, no, I think we're saying the same thing, but --

MR. CROMWELL: Okay.

THE WITNESS: -- that's how I look at it in my lens that I used to be able to cook, clean, shop --

MR. CROMWELL: Right.

THE WITNESS: -- I can't do some of those activities, I need help.

BY MR. CROMWELL:

Q. For the basis of you determining your hourly wage rate, you are presuming that a Plaintiff needs help with each of the services offered by the occupations you've included in your hourly wage rate, correct?

MR. RUZICKA: Objection to form.

THE WITNESS: I don't view it that way. I view my hourly rate as, again, an average of the 15 or so occupations that represent general household production. As mentioned earlier, the household hourly rate when you look at those 15 wages are tightly banded together, so there's not much distinction between the hourly rate right now for an Uber driver and a fast-food cook or for a short-order cook or a dishwasher or janitor, they're all within a dollar to two at most, typically, in the

geographic area.

BY MR. CROMWELL:

Q. Right, but inherently if you're including the wages of those occupations, you are presuming that the services offered by those occupations will be something that the individual Plaintiff needs, correct?

A. Or can no longer perform, that there's some level of limitation across the board of those hodgepodge collection of occupations, yes.

Q. Okay. In your general practice as a forensic economist, do you typically obtain information from the individual Plaintiffs regarding the household services they were able to perform prior to their diagnosis and unable to perform after their diagnosis?

MR. RUZICKA: Objection, form.

THE WITNESS: Generally, no, just because having used that damages checklist where we have a pre and post, I tend to find when

you ask those questions, people's memory of hour estimates are not very reliable, which is why we reference and which I reference the American Time Use Survey, just because what people remember from a year ago about their cooking habits or cleaning habits, it's not very reliable on just time just because we're not forced to keep time records, so.

BY MR. CROMWELL:

Q. Just to clarify, because the damages checklists that were provided to the Plaintiffs in this case do include a section of household services asking for pre-injury services and post-injury services, correct?

A. That's our standard checklist that does have that delineation, yes.

Q. Why do you include that in your checklist if you as a general rule don't rely upon it for offering your opinions?

A. It's a standard form that we've had for 20 years, I have been here 22 years. It's kind of interesting to see what someone may respond, but having looked at that form for 22 years, I've learned when comparing that to the American Time Use Survey, which is a time diary that people do have to keep track of their time, and just knowing how I personally keep track of time, unless I have a time diary, sense of reliability on those estimates are very reliable for time, meaning they'll be housecleaning, pre or post. The pre number isn't very reliable, the post number is not very reliable, because these individuals, like all of us, don't keep track of our time of, in 1999, I can't tell you how long I spent per hour cleaning my kitchen. I can't tell you in 2017 how long I spent cleaning my kitchen. I know the task got done. I know I completed the task. So I don't like to use those as proxies of marginal loss of time just knowing the inherent lack of reliability when there's

not a contemporaneous timekeeping metric.

Q. I'm going to strike it as not responsive.

Your forms don't say anything about time, correct? You're not asking for someone's allocation of time. Your forms ask about whether certain services were performed prior to their injury and whether those certain services were performed after their injury, correct?

A. Not to my recollection, I think they have a --

Q. Sure.

A. -- I think it says hours per week or per day in the pre and post.

Q. Let's -- I grabbed the right one -- enter this as Exhibit 34.

Mr. Staller, what has been marked as Exhibit 34 is what we have been referring to as a damages checklist and this is in particular with regards to Plaintiff Amsler, Bates number 1 through 11; is that correct?

A. Yes.

- - - - -

(Damages Checklist/Injury/Adult for Amsler Bates PLG-EXPERT__STALLER__AMSLER__ 0000000001 to 11 marked Staller Exhibit 34 for identification.)

- - - - -

BY MR. CROMWELL:

Q. And if you would turn to the page ending in Bates number 8. This section is entitled at the top, "Household Services;" is that correct?

A. Yes.

Q. And it lists a number of household services on the left, is that right, including housework, cooking, pets, vehicle maintenance, et cetera?

A. Yes.

Q. And you have two columns, pre-injury services and post-injury services; is that right?

A. Yes.

Q. And as you sit here, is it

your testimony that you don't rely on this particular -- these particular answers in formulating opinions in personal injury cases?

A. It's my testimony that typically what I'll see is individuals will assign hours either per day or per week under the two headers, pre-injury and post-injury. And my testimony is I would not rely upon that hour differential in my analysis.

Q. If they included the hours that they did it, wouldn't that also indicate which services they did or did not do prior to their injury and after their injury, right? Inherently within providing a time, they're suggesting that they performed the service to begin with, correct?

A. Possibly.

Q. Are you aware of this particular section being completed for any of the Plaintiffs that completed the damages checklist?

A. I don't know off the top of my head.

Q. Okay. If you can go back to Exhibit 7, which is your Amsler report. If you look at page 5, we were talking about footnote 25 previously, the representative occupations.

A. Yes.

Q. And in that you include home health and personal care -- you include these hourly wage rate for home health and personal care aides; is that correct?

A. Yes.

Q. In a number of your reports, you have already accounted for the home health and personal care aide wages for past medical care; is that correct?

A. In some of the reports, yes.

Q. To the extent that your reports have both a calculation for household services and past medical and related care, would you agree that it's duplicative to include that particular wage when calculating household services?

A. I could see the rationale for excluding the home health aide. It's, again, not going to do anything to change the average wage rate represented, but that's fair that it could be removed.

Q. You offer a second scenario, we already talked about, for calculating lost, past household services and you utilize the ATUS rates you found applicable for a given Plaintiff; is that correct?

A. Yes.

Q. And the ATUS rate is simply an estimate of the hours per week, is that what you mean by ATUS rate?

A. That's what I'm representing in my respective table when it's presented, that's going to be hours per week depending on the specific demographic cut.

Q. Okay. Do you know whether the ATUS rates are empirically tested?

A. The hours per week?

Q. The ATUS rates, and specifically the hours per week that you rely upon?

A. It's vetted published data from the Bureau of Labor Statistics American Time Use Survey. I would have to look at their technical footnotes again to look at their review process, but it's coming from published data from the Bureau of Labor Statistics.

Q. Okay. And it's common practice for you to rely on statistics from those government agencies?

A. Yes.

Q. And these rates offered by ATUS -- included in the ATUS tables, these are based upon employment status, presence or absence of dependents in the household and the age of the youngest child; is that correct?

A. Yes.

Q. Okay. How do you know whether the hours per week proposed by the ATUS are the same number of hours an individual Plaintiff needed for their past household services?

A. It's a statistical average,

which has been peer reviewed and vetted by the Bureau of Labor Statistics as an average figure, the same way we have average expectancy, average work-life expectancy --

Q. Right?

A. -- it's a statistical average.

Q. But you would agree it's not specific to the Plaintiff, right?

A. Agreed for the reason I have mentioned a few minutes ago that individuals without having a contemporaneous time diary are not going to be accurate historians of their time spent doing any task, whether it's a work task or a household production task, which is why we use the American Time Use Survey, because it gives reliability to the calculations, because these individuals, around 12 to 13,000 Americans every year, are asked to use a 24-hour time diary where they account for every minute of their day, bathing, toileting, commuting, working,

shopping, cleaning, interior, exterior, meal preparation, helping people in the household. Every one of those tasks is delineated in a time diary, which gives it reliability that my questionnaire provided to Ms. Amsler in 2025 for when she gets ill in 2020, lacks the reliability of time allocation, not general production, but of time allocation, which is the very reason we use the ATUS.

Q. Just I'm trying to understand, so you use the ATUS because the information you would receive from the individual is based off faulty, oftentimes, based off faulty recollection or what's the -- sorry. I'm going to withdraw that.

I'm still trying to understand the use of the ATUS numbers. Is it because that, and I think you alluded to it in Ms. Amsler's damages checklist is that these are not going to be accurate numbers or a recollection of what a Plaintiff would have performed?

A. Yeah, so, for example, and I

don't mean this pejoratively, if I asked you in 2022, today, in 2022, in March how long did you spend cooking dinner each night? And I imagine you would likely say I don't know. Dinner was made and prepared, whether it was by me, my spouse, somebody else, but I don't know how long on March 10 in 2022, it took me to cook dinner. I know dinner got cooked. How long did it take to clean up dinner in 2022? I don't know, apparently, the dishes got put away either by me hand washing them or putting them into a dishwasher, but I don't know if that took ten minutes or 25 minutes. So you knew the task, you can say, I have made a meal, I cleaned up a meal in 2022, but you cannot say reliably how long it took you to do such a task.

Q. Okay.

A. Which is the very reason we use the American Time Use Survey, because that question has been answered by those 12 to 13,000 Americans that are blindly selected and then they're given this time

diary that said, hey, in 2023, when I took this diary, meal prep took me 30 minutes a day and then to get a week, you multiply it by seven, but that's the very nature of why this data is so great, because it keeps a time diary of the questions that we don't track. How long did you walk the dog in 2024? Was it a nice winter? Was a cold winter, a lot of rain, lack of rain, I don't know, but the dog, hopefully, didn't go outside and went inside. But these people keep maintaining pets, they are asked that question. The individuals, obviously, that don't have pets, they put a zero, they're excluded. People with pets respond to that question with the time. I walked the dog for 12 minutes a day, so then we know, on average, the household would spend 12 minutes a day, multiply that by seven, you get a little over an hour of a week of dog care, just not dogs, there are other pets, but pet care, which is exactly why I don't use individuals, going back to my bifurcation in my survey, I'm

generally looking for a flavor of service. Did they do stuff? Do they talk about stuff, either in my checklist or deposition testimony, Answers to Interrogatories, other damages assessment forms, is there some other basis for it? Once I have basis, I then go to either to the one hour per week or the ATUS. In the death cases, we see we do the ATUS, because on average, we expect that that has been lost to the household.

Q. Okay. Okay. So you don't -- you don't use individual estimates as to amounts of time, because they are, in your experience, unreliable?

A. Well, poor historians for good reason. We're not meant -- we don't keep track of our time doing these tasks.

Q. Understood. And so a person may say, for instance, I think I spent two hours, you know, cleaning, you know, a week, but in your experience, that doesn't -- isn't necessarily a reliable estimate and so you rely on something like

the ATUS to provide those kind of calculations?

A. Correct. So working with this form and many cases over 22 years, I would see wacky numbers. There's 168 hours in a week, 24 times seven, and sometimes I've seen household production of, you know, 140 hours, which seems really, really high to me or it was a family of three kids and she was a mother that's injured, unfortunately, and she had, like, three hours. I'm, like, that doesn't seem right either --

Q. Yeah.

A. -- it doesn't make sense. So just we're just, from my experience, I like the form for context of household activity, not for specific hours per week, just given that I know that people are not keeping time diaries, which then brings you to, okay, where can we find such a survey? Well, there is such a survey that exists that gives us the reliability question to be checkmarked. We have a reliable source

where people are doing household tasks on an everyday nature where they were keeping a 24-hour time diary, very similar to that of a defense attorney, an accountant, anyone that bills by hours or quarter or tenths of an hour.

Q. So just to bring this all together, so for you to calculate lost household services, aside from the wage rate, you would rely upon empirically tested information like the ATUS to give you the estimated amount of hours an individual would have been spending on a particular task; is that right?

A. Correct.

Q. Okay. A number of your -- the Plaintiffs for which you offer lost household service opinions simply provide the hourly wage rate, correct? They don't offer necessarily the frequency that the individual performed.

A. Is your question some of my reports I don't give an ATUS column?

Q. Yes.

A. I just do -- but I do one hour per week, so it's 52 weeks -- 52 hours per year.

Q. Right, with that caveat, but you do have a number of reports where your lost household service calculations are simply for one hour per week and you leave it up to the fact finder to determine the frequency; is that correct?

A. That is correct.

Q. If individuals are faulty historians, as you've testified, then how would a fact finder come up with a reliable number of hours that a person performed for household services?

MR. RUZICKA: Objection, form.

THE WITNESS: So I'm not the fact finder in this case --

BY MR. CROMWELL:

Q. I understand.

A. -- but if I was to answer that question, the way I would describe it as an economist is I would give reference to the ATUS that if we're talking about,

for example, a working professional with no children, so looking at Ms. Amsler, that's rounded out to 19 hours per week. So one assumes she can't do everything, there would be a loss of 19 hours per week on average.

I would imagine Ms. Amsler will testify and then she would testify to the court that pre-diagnosis, I used to do a full complement of things and then post-diagnosis, there was a period of time, and I'm hypothetical what her testimony will be, I'm just giving the illustration, that during my treatment and everything else, there was a period of time I couldn't do anything. So then the court would say, in my mind as a finder of fact, I would say, hey, for a period of time, Mr. Staller's number should be multiplied by $19 -- or $19 per a week, his hourly rate for those years, 2020, 2021, '22.

Then she might testify, hypothetically, I got a little better but I have residuals. I still have a hard time

picking up heavy things. I get fatigued easily, so I really can't do mopping, household cleaning, or cooking. Okay. So the finder of fact would then say, well, if the entire complement of household production is 19 hours for a working person, and it sounds like from the testimony I heard from Ms. Amsler, it sounds like she can't do half of it, there's going to have to be some assessment made by the trier of fact, that's their role, so they might come up with a ten-hour loss for the remaining period of time, because she might describe, hypothetically, that I have lingering effects from the medications or I have lingering effects from the leukemia, and here's what I can't -- it's just going in the future, this is the way it is. I suffer, I always get tired more easily compared to what I used to do, and the court would say, all right, if we know on average a working woman does 19 hours, I think, in my judgment as the fact finder, there has been

a loss of half and then they would have the tool to do both, complete loss, 19 hours for those years of aggressive treatment and care for those first four years, and then that's an average, and then afterwards, based upon her testimony, some modification to that number and they would be guided by the American Time Use Survey and then the testimony presented by the respective witness.

Q. But in your experience and in your opinion, the fact finder would be relying upon testimony of what you call a poor historian; is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: So I think the fact finder would possibly run into trouble if they listen or accepted the hours per week from the witness. If they said, I used to do it 22 hours a week and now I can only do it four. I would agree, in my experience, I'm not here to weigh the credibility of that

witness, but in my experience, those hours might tend to be inaccurate, whether over or under, but inaccurate. The trier of fact here, for good reason, might find those numbers to be accurate.

Should they not find those hours to be accurate, I'm not concerned with that, because what I use it for is more of the context. I used to do all these tasks and now it's been reduced by some level, partially or completely, and then the fact finder will have to make some interpretation of what does that mean to that fact finder, to that judge, in this case, does that mean a 25 percent loss? Okay, there's a 25 percent loss on 20 hours, right? That's going to be five hours lost. And that gives them the tool. There will have to be some fact-finding personal

assessment of the evidence presented.

I'm talking fast, I'm sorry. I get excited about this stuff.

BY MR. CROMWELL:

Q. For each Plaintiff, to estimate the value of lost household services -- scratch that.

Would you agree that the data you rely upon from the ATUS does not apply exclusively to any of the individual Plaintiffs' diseases?

A. Right, it's not household production for individuals that did not have --

Q. That had bladder cancer.

A. Right, or that didn't have it or then got bladder cancer, it's -- no, it's a population, in this population to get to an average figure, there will be people with various comorbidities.

Q. The data that you rely upon applies to people in the Plaintiff's, in your opinion, the Plaintiff's demographic

range, right, gender, marital status, retired or not; is that correct?

A. Correct, so the demographics cuts, right, would generally be male, female, age, children in the household, and their cut based upon age brackets for the children.

Q. Okay. Did you perform any kind of independent analysis regarding what household services were performed by any Plaintiff prior to their disease diagnosis?

A. I did not do an individual reassessment of a respective Plaintiff, no.

Q. Is it true you don't know what household services any Plaintiff was able to to perform that they already -- that they did prior to their diagnosis, correct?

A. Can I hear that one more time?

Q. Yeah. If you didn't identify what kind of services an individual Plaintiff performed prior to their diagnosis, you don't have a way to compare

and determine what household services they were unable to do because of their diagnosis, correct?

MR. RUZICKA: Objection, form.

THE WITNESS: True, I would defer to testimony on that, which would be a factual determination.

BY MR. CROMWELL:

Q. All right. To estimate the value of future lost household services, you again provide two scenarios; is that correct?

A. In most of the cases, yes.

Q. Okay. And the first is an illustrative calculation of one hour, one weekly hour of future lost household services; is that right?

A. Yes.

Q. And the second scenario you utilize, again, the ATUS rates -- ATUS rates, based upon the representative occupations and the corresponding geographic state; is that right?

A. Yes.

Q. If you would get out your Connard report, which is Exhibit 8.

A. Eight.

Q. And if you would, if you would turn to page 5, it starts at the top, household services.

A. Yes.

Q. And under, in table B, you provide two rows of information for the type of household, one is working, no dependent children, and retired, age 65 to 74; is that correct?

A. Yes.

Q. Okay. If you look at the Table 4, which is your -- which is on page 11 of Exhibit 8, this is your calculation of lost household services from January 1, 2026, to age 73.5; is that right?

A. Yes.

Q. Okay. Can you tell me where the two rates, the hours per week that you identify in table B, can you tell me which rows used those individual rates or did you

only simply use one of the rates?

A. So if you are looking at his age, so in the future, it's all 21.98, because he was already going to be retired in all future years.

Q. Okay. Understood. So what is -- what part or relevance, I guess, does the working no dependent children rate have to your opinions?

A. That would have been for Table 3, I didn't do an ATUS, but it gives --

Q. Right?

A. -- context to the trier of fact that if they want to award during the working years, he, unfortunately, passed away very young, the $10,067, which is the total number of one hour per week would be multiplied by 13.

Q. Got it. So if you wanted to rely on the ATUS data, you would multiply the 13.02 times the 10,067 from Table 3; is that right?

A. That's true.

Q. Okay. If you would get out Exhibit 22, which is your rebuttal report.

A. Sure.

Q. First of all, would you agree with me that, as you sit here, the diminished number of hours of household production can't be ascertained from empirically tested sources -- from an empirically tested source?

A. True, that's going to be a case-by-case factual inquiry.

Q. Okay. In your rebuttal report, Exhibit 22, you state, "Given that the diminished number of hours of household production can't be ascertained from an empirically tested source, our illustrative calculation of one weekly hour of lost household services allows the trier of fact to decide what number is reasonable based upon the evidence presented at trial."

First of all, did I read that correctly?

A. Yes.

Q. What do you mean by,

"empirically tested source"?

A. So I don't recall which of the three government economists, it was either Tosic or Brod, I don't think it was Ms. Yount, but they have attempted to do a specific reduction in services based upon some of the testimony that existed in the record and they attempted to ascribe certain hour reductions, which to me, those experts are then sitting in the seat of the judge who is the trier of fact in this case. As economists, as experts, we're not the trier of fact to interpret factual determinations, that's not our role as economist expert witnesses. So the numbers that they've selected, Brod and Tosic, I believe those are the two that did it, can't be tested. There's no way to measure their accuracy and they're simply supplanting their opinions for the judge in this case as the trier of fact, which is the one hour a week is a better metric, because if I read testimony, then I'm giving weight to testimony, I'm giving

weight to the credibility and then weight to how much, because I don't recall any Plaintiff or any spouse providing a time allotment. They said I used to cook or clean, they did say some things of household production, but they didn't really give --

Q. Right.

A. -- hours per week and then there has been an interpretation by that economist, Tosic or Brod, to that narrative, to that testimony, which is outside our expertise as economists. So that's how I'm referring to as empirically tested.

The numbers they've selected arbitrarily for the testimony, I can't test it to any source or it can't be peer reviewed, it can't be tested by other economists, so I find it to be an unreliable measure to offer an alleged opinion to a reasonable degree of economic certainty of the loss of household services when that's purely a fact-finding inquiry.

Q. So if a Plaintiff were to testify about the amount of time they spent on certain household services, you would agree that you would be unable to, within a reasonable degree of economic certainty, reach a conclusion as to the actual amount of hours that person spent on the service?

A. So, yeah, I would be concerned about the reliability sitting here at deposition in 2025 for things that occurred either in 2010, 2023, whenever, I would be concerned about their reliability. But that could be tested, if they gave specific hours, that could be tested across the American time use data, the average production. So if they said they did cooking for X hours, we do have average data for what a male or female would be expected to spend on cooking tasks, cleaning, likewise.

Q. Right, but for a number of the Plaintiffs, you don't provide the amount of hours from the ATUS for household services, correct, so you wouldn't be able

to compare those rates?

A. I would need a different, I don't understand that question for --

Q. Sure. There are a number of reports in which you do not offer the amount of hours from the ATUS for Plaintiffs past household services, correct?

A. Past, I do not do an ATUS calculation for past, correct.

Q. So in those cases where you don't have a calculation based off the ATUS, you would agree with me, you can't make a comparison between the ATUS hours and what the person may or may not testify to as to the actual hours they say they spent on a given service?

A. So, in my report, I probably -- it depends which report but, I likely gave a table that set forth for the future the average hours for working, retired, which of these individuals fit in one of those two categories, so that data is within each respective report that the

trier of fact, as I just gave the illustration --

Q. I just want to make sure, I'm talking about past lost household services, not future.

A. No, agreed, but is it just in Mr. Connard's case -- yes, in Mr. Connard's case, I just gave the illustration of how the court would do that. I went to page 5 where it was the 13 hours rounded and then I used that data and applied it to Table 3, which is the past loss of household services at one hour per week, so I just gave the illustration of how the court would use that using the average data from the American Time Use Survey for the one hour per week illustration.

If the court made the determination that in the past, based on the totality of the evidence they received on a particular Plaintiff, that 50 percent of production was lost, then they would take that and for Mr. Connard's case, they would take six and a half and multiply that

by the $10,067.

Q. Okay. Let's move on to another one of your opinions, lost earning capacity. In your reports for certain Plaintiffs, you have sections entitled, "Lost Earning Capacity;" is that correct?

A. Yes.

Q. And can you just briefly define for me what lost earning capacity means?

A. As I use it, it's the diminished marginal loss in the ability to generate a wage or income in the labor market.

Q. Okay. And you would agree with me that a person's expected earnings or wages plays a fairly pivotal role in how you determine a person's lost earning capacity?

MR. RUZICKA: Objection, form.

THE WITNESS: It would definitely be a factor, yes.

BY MR. CROMWELL:

Q. Well, in fact, in your

reports -- in your reports calculating lost earning capacity, you consider the Plaintiffs lost earnings or wages every time, correct?

A. I don't understand that question.

Q. Sure. So you have sections -- well, let's walk through an example, if you can pull out Exhibit 7, which is your Amsler report.

A. Yes.

Q. And if you look at page 3, the bottom, you have a Section 6 entitled, "Lost Earning Capacity," correct?

A. Yes.

Q. And if you flip to page 4, you have two sections, one entitled, "Past Lost Earnings" and the second one is "Future Lost Earnings;" is that right?

A. Yes.

Q. To estimate the Plaintiff's earning capacity, absent the incident, you utilize Ms. Amsler's, for instance, annual earnings at the time of their diagnosis,

correct?

A. Yes.

Q. And to estimate a Plaintiff like Ms. Amsler's potential future lost earnings, you utilized the annual earnings the Plaintiff had at the time of the injury or their premature retirement, right?

A. Or passing, one of the three, yes.

Q. Okay. Or passing. So, in short, you are relying on the Plaintiff's -- strike that.

In offering opinions on lost earning capacity in these cases, you are relying upon the Plaintiff's annual earnings to formulate your opinions; is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: Historical annual earnings?

BY MR. CROMWELL:

Q. Yes.

A. In most of the cases, yes, to measure the past or future loss of

earnings, as to get a benchmark of that loss, it will typically be looking at their historical earnings in these cases, yes.

Q. Right. And is that generally true for the other personal injury cases you testify in?

A. Generally, not always. It's going to vary on the plaintiff's age, if you have a minor plaintiff, obviously, you can't use historical earnings, because they don't have labor force history. If an individual transfers into a new occupation or gets retrained, there will be reasons why you don't use historical earnings, but in a fair number of cases, I'll use their historical earnings, yes.

Q. Okay. And you've done that here, correct?

A. Yes.

Q. What is the difference between lost earnings and lost earning capacity?

A. That's going to vary on state definition or statutory definition.

Each -- various states have various definitions for those two topics, those two labels.

Q. In an economic sense, how do those compare?

A. In an economic sense, holding at bay any legal definition from a statute or case law, generally, lost earning capacity is more potential energy versus kinetic energy. What I mean by potential energy, that is the ability to generate a wage in the labor market based upon background, training, and experience, physical and cognitive abilities. And when I use the term, "potential," versus kinetic energy from science, right, that doesn't actually have to mean that the person per se did generate that specific amount of money. It's their potential given their occupation, training, et cetera.

Lost earnings, typically, is a more kinetic measure where it has been specific to -- it's more frequently used in employment cases where it would be an

employer/employee relationship or in personal injury cases that have that specific definition in a specific statute or state, it would be more limited to, typically, some historical performance in the labor market.

Q. Okay. But for the lost earning capacity opinions you're offering for these individual Plaintiffs, you agree that you are relying specifically on their past or future earnings, correct?

MR. RUZICKA: Objection, form.

THE WITNESS: I would agree to measure their past loss or future loss. In most all of these cases, just given the age of these Plaintiffs and their labor force access, to measure that, I use their historical earnings --

MR. CROMWELL: Okay.

THE WITNESS: -- pre-diagnosis, pre-incident earnings, yes.

BY MR. CROMWELL:

Q. Understood. Okay. So for purposes of your report, a person's lost earning capacity is simply based upon the historical earnings, aside from one case, of the individual Plaintiff; is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: For the majority of the Plaintiffs in the Camp Lejeune cases that I measured, loss of earning capacity from diagnosis, so there would be some past period and future period, yes, the guidepost, the benchmark I use is coming from their historical earning performance.

BY MR. CROMWELL:

Q. Okay. Are lost wages different from lost earnings?

MR. RUZICKA: Objection to form.

BY MR. CROMWELL:

Q. Do you treat them the same?

A. I treat them the same.
Q. Okay. Same question, are lost wages and lost earnings different from the term, "lost income," or do you treat them the same?
A. Absent a specific statute or other legal definition, I treat loss of income and loss of earning capacity the same, yeah.
Q. All right. You have certain sections with regards to earning growth in some of your reports; is that correct?
A. Yes.
Q. And earning growth is simply how much particular wages have changed over time, correct, or will change over time?
A. Correct.
Q. And when looking at past growth, you're starting from the time of injury or what you can classify as premature retirement to the present for a given Plaintiff; is that right?
A. Yes.
Q. And then for future growth,

you're estimating what the future growth might be per year for the Plaintiff's remaining work-life expectancy, correct?

A. True.

Q. And future growth is based upon, for instance, the specific occupation the person may have; is that correct?

A. That's true.

Q. And it may be based upon where they work geographically, correct?

A. True.

Q. So is it fair to say your calculations for future earning growth assumes, for instance, that a person's job will remain the same through their life expectancy or work-life expectancy?

A. The job would remain the same industry through their work-life period, yes.

Q. And it also assumes that the person would be living in the same place for the remainder of their work-life --

A. True.

Q. -- expectancy?

So it would follow that if a person changed jobs and into a different industry and they moved, their future wages would also inherently change, correct?

A. Future wages may change. If you see, the growth rates tend to be within the future, you know, I did multiple Plaintiffs' earnings here, they tend to be very close between, like, two three and two nine in future wage growth, but it may change, that's true.

Q. Okay. Does the fact that someone could change jobs in the future or move to a different market add reliability to your projections of future earnings for an individual Plaintiff?

MR. RUZICKA: Objection, form.

THE WITNESS: No, I mean, that's a common question to me, that's a kitchen sink question, I mean --

BY MR. CROMWELL: --

Q. It's meant to be.

A. -- yeah, I mean, anything

could happen, right, and that's why I don't testify to an absolute certainty, I testify to a reasonable degree of economic certainty. That's the legal standard under the federal rules, almost every state rule, because we don't have the crystal ball, but especially with these individuals, for that specific question, they're mostly older and more advanced in their career, they're, on average, are likely to be less transient, they're likely to be more established in their geographic area and their occupations. You can see from the number of years of future calculations, there's not a lot of work-life left for these individuals on average compared to a 25-year-old or a 30-year-old that's injured in some event, so, no, just anything could happen to anybody at any time, but to build a model, I can say to a reasonable degree of economic certainty, my model meets that standard using this data and this presentation that is commonly presented by forensic economists.

Q. To offer your opinions in this case or any cases, you agree that absolute certainty is not required, correct?

A. True.

Q. Absolute certainty about the future is not required; is that correct?

A. We do not have that ability.

Q. Right. The fact that events in the future may change some of the variables you rely upon does not render your opinions unreliable or speculative, correct?

MR. RUZICKA: Objection, form.

THE WITNESS: Well, it's going to depend on what opinions are being offered, but for the opinions of lost earnings and future medical care and household services, and agreed, it wouldn't make them unreliable.

BY MR. CROMWELL:

Q. Okay. Would you agree with me that it's common practice for a forensic

economists like yourself to make certain assumptions about what may occur in the future?

A. On certain topics, we have to make certain assumptions. I don't think we're making assumptions about political outcomes or something or Powerball numbers, but there are certain assumptions that we have to make into the future.

Q. Okay. All right. In many of your reports, you have a section entitled, "Present Value," correct?

A. Yes.

Q. And this provides the value for future values that are essentially discounted to their present value in recognition that a lump sum will be awarded in the present year and the recipient will be able to invest that -- this principal amount received; is that correct?

A. Yes.

Q. Okay. As part of your opinion, you make a distinction between the rate of return on the principal and that

received on reinvested interest; is that right?

A. Yes.

Q. What is the basis for using different discount rates for the principal and the reinvested interest?

A. We -- I would agree and we do know that interest rates change daily. So to account for the fluctuation in interest rates, I use those two rates, because the principal amount is the rate you would initially start with, that's why it gets the currently available municipal bond rate, which I'm just looking at Connard -- I'm looking at the at Amsler, they should be the same, but I'm looking at the September 6 rate of 4.88 percent, because that was what was immediately available for the principal. We see do know these calculations where there's future medical care, loss of household services, the wages are a little more limited in duration and time, just given the age of the Plaintiffs, but for household services and future

medical care, they go out many years into the future. So to account for rate variability, that's what the reinvested rate gets at 3.78 percent.

Q. Okay. So you're using, for each of your reports, 4.88 percent to identify -- as the rate of return on the principal and 3.78 percent for the reinvested interest; is that right?

A. Correct, because what we know in all these calculations are called self-depleting funds. At the end of each person's either work-life, there should be no wages left over or for a life care plan, at the last year of life, there should be nothing left over that there would be reinvested interest. So you have a principal amount, the first 50 grand gets pulled out, the balance remains and that would get interest on that amount. That interest payment would technically be the last payment to the Plaintiff so they could get a different rate of return.

Q. Okay. Just briefly, in your

reports, have sections entitled, "Personal Maintenance Expenditures." And you reduced your estimate of lost earnings in order to reflect these expenditures which the Plaintiff may have incurred. What do you -- what are you referring to as -- how do you define personal maintenance expenditures?

A. So that term is applicable only to the three death cases.

Q. Okay.

A. Personal maintenance, and that is a concept in forensic economics to put decedents on the same footing as personal injury plaintiffs and what I mean by personal maintenance is that's the amount of money the decedent would have spent on him or herself for their everyday expenditures, so topics would include clothing, transportation, food, healthcare, entertainment, things of everyday life that they would have to spend themselves on. So if a plaintiff in a personal injury award gets $100,000, from that $100,000, the next

month they're paying for their car payment, they're paying for their healthcare, they're paying for their sneakers, whatever they may do. So to put the decedent, if the decedents were awarded $100,000, if we don't make that deduction, then, technically, there could be an overpayment to a decedent in a wrongful death case, so it puts them on the same footing as a personal injury plaintiff.

Q. Got it. So you only provide personal maintenance expenditure opinions in cases where the plaintiff has passed away?

A. Correct, because the personal -- in the personal injury case, those claimants, those plaintiffs will have those expenditures. They're going to have a pay for Chick-fil-A. They're going to have to pay for their new Nikes. But in the death case, obviously, because of the passing, those actual outlays in the real world won't occur, so to do that in a death case, we account for their expenditures.

Q. Okay. I want to talk about your calculations for future medical care based upon life care plans. In cases in which there is a life care plan for a Plaintiff, you are offering an opinion as to the present value of the Plaintiff's future medical care; is that correct?

A. Yes.

Q. And for those opinions, you are relying on expert reports by Plaintiffs' life care planners, Mr. Fryar and Ms. Hairston; is that right?

A. Yes.

Q. And these life care plans set out what they opine is the type of course or treatment a Plaintiff will need in the future and the amounts of those individual treatments, correct?

A. Yes.

Q. You do not make any of your own determinations as to which medical procedures are or are not likely to be needed for a given Plaintiff; is that correct?

A. True.
Q. You're relying entirely on the Plaintiffs' life care planners for that part of your opinion, correct?
A. Yes.
Q. You also did not make any of your own determinations as to the costs of those medical procedures or care; is that correct?
A. Base year cost, that's correct.
Q. Okay. And you're relying upon the life care planners' opinions regarding those amounts; is that right?
A. Yes.
Q. And you are simply adding them up and providing a present value calculation for those particular life care plans; is that right?
A. Yes.
Q. You I think you previously testified you did not look at the life care plans by Dr. Shahnasarian or Ms. Navarro, the United States life care planner

experts; is that correct?
A. True.
Q. Okay. So, fair to say, you have not placed any particular values based upon their proposed life care plans; is that right?
A. That's correct.
Q. Okay. All right. How long have we been going?
MR. VanSLYKE: About an hour.
MR. CROMWELL: Do you want to take a five-minute break?
THE WITNESS: Yeah, that's good. It's getting warm in here.
MR. CROMWELL: Yeah, I was going to say, it is getting a little warm, I noticed the temperature.
THE WITNESS: Strategy, my new strategy.
MR. CROMWELL: They call it a hotbox for a reason.
THE VIDEOGRAPHER: All right. Going off the record at 2:16.

- - - - -

(A recess was taken at this time.)

- - - - -

THE VIDEOGRAPHER: We're back on the record at 2:27 p.m.

BY MR. CROMWELL:

Q. Okay. Mr. Staller, I want to turn and talk about your individual reports that you you've prepared in this case. So if we can start with your report for Ms. Amsler, which has been identified as Exhibit 7. You assessed the economic loss suffered by Karen Amsler as a result of her leukemia diagnosis that occurred in September of 2020; is that correct?

A. Yes.

Q. Okay. And based off of your report you agree that Ms. Amsler's statistical life expectancy calculated from her age is to an age of 85.1 in the year 2045; is that right?

A. Yes.

Q. Okay. You're familiar with Ms. Amsler's previous employment?

A. Yes.
Q. You're aware she worked for Johnson & Johnson from 2003 to 2019?
A. Yes.
Q. And is it your understanding that she retired from Johnson & Johnson in 2019?
A. Yes.
Q. Okay. And you're aware -- are you aware that the next year Ms. Amsler was found disabled by the Social Security Administration as of September 12, 2020; is that correct?
A. Yes.
Q. And this was resulting from her leukemia diagnosis; is that right?
A. That's my understanding, yes.
Q. Okay. And Ms. Amsler was deemed no longer disabled as of April 1st of 2022, approximately one and a half years later; is that correct?
A. Yes.
Q. And her benefits for that disability ended in June -- on June 30,

2022; is that right?
A. Yes.
Q. You opined that Mrs. Amsler's husband has taken care of her since her diagnosis, leukemia diagnosis, on September 12 of 2020; is that correct?
A. Yes.
Q. Did you investigate anything about what Mrs. Amsler -- strike that.
Did you determine what, if anything, her husband in fact did to take care of Mrs. Amsler after her diagnosis in September 12, 2020?
A. I didn't personally, as I mentioned earlier in some questions, I didn't personally interview her or her husband, so it would have just been from what she describes in her testimony.
Q. Okay. What activities, based off her testimony, what activities did Mr. Amsler perform for Mrs. Amsler due to her diagnosis?
A. One that comes to mind and, again, I don't have all of the 19

deposition transcripts memorized, but one that comes to mind, I believe, he was helping her drive to and from appointments.

Q. Anything else?

A. That's what I recall. There could be others in the testimony, but from what rings -- what triggers my mind is that testimony.

Q. You would agree with me that you have not listed any specific activities that Mr. Amsler performed for Mrs. Amsler due to her diagnosis in your report; is that correct?

A. That's true.

Q. Do you have any idea how long Mr. Amsler was helping Mrs. Amsler drive due to her diagnosis?

A. I don't know off the top of my head.

Q. As part of your opinions, you value the services that her husband is providing her from the date of her diagnosis through December 31, 2025; is that right?

A. The medical, the medical-related care, yes.

Q. And that's true even though she was no longer considered disabled as of April 2022; is that correct?

A. Disabled through the Social Security Administration, which has their own standard for disability. That doesn't mean she doesn't have sequelae from her leukemia.

Q. What word are you saying, I'm sorry?

A. Sequelae, S-E-Q-U-E-L-A-E. I think it's -- it might be too big of a word even for me, but it's usually related to or as a consequence of --

Q. Got it?

A. It might be, you see it in medical records, like, sequelae.

Q. Yes.

A. Okay.

Q. Got it.

A. I can change the word, maybe I'm using the wrong.

Q. No, I just want to make sure we understand each other so I can follow up.

So her being no longer disabled plays no role with whether she would need home health or personal aide care between April 2022 and December of 2025; is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: To me, that's a factual question. Again, there's a specific standard within Social Security to be deemed disabled and they use a standard called SGA, substantial gainful activity, where they have a certain definition of what that meets, so under their lens, she might not meet the criteria of being disabled under the SGA standard, but continuing to need assistance after '22, to me, is a factual question that ultimately the judge will have to resolve based upon what Mrs. Amsler

and Mr. Amsler discuss in testimony with regard to after going into remission, do you have any residuals? That's how I was using the term sequelae, like, residuals, lingering effects, that's how I was using that term.

BY MR. CROMWELL:

Q. Okay. You concluded that Mrs. Amsler would have been able to to return to the labor market without restrictions approximately two years after her bone marrow implant in October of 2020; is that correct?

A. After her transplant in October 2020, by the end of the year 2022.

Q. Right.

A. Yes.

Q. Right.

A. Yes.

Q. So you would agree with me though that you did not stop your calculations for past human health personal care aide in December of 2022; is that

correct?

A. I don't terminate it in December of 2022, correct, I run out the one hour per week through '25.

Q. Okay. Did you do anything to verify that Ms. Amsler needed human health or personal care aide?

A. Home health.

Q. Home health.

A. It would have just come from what was described in her deposition testimony.

Q. Okay. And what testimony are you recalling that she needed besides driving assistance?

A. That's one that just rings a bell in my mind. I don't recall if she -- the specifics, what she talked about in time periods, like, in '23, '24, I don't recall that Q and A in the deposition.

Q. Okay. As we sit here, the only home health and personal care aide that Mrs. Amsler needed was assistance with driving to certain appointments; is that

your recollection?

MR. RUZICKA: Objection, form.

THE WITNESS: That's what I can recall from the testimony with regard to after the leukemia diagnosis, that's the one that stands out in my mind. That's doesn't mean it's exhaustive, but that's what I can recall.

BY MR. CROMWELL:

Q. Sure, but you understand this is my opportunity to ask and I don't know that we have time to read all 19 depositions, so I'm asking based off the recollection that you have as you're sitting here, are you aware of any home health or personal care aide services that Mrs. Amsler needed aside from her husband driving for her?

MR. RUZICKA: Objection, form.

THE WITNESS: That's what I recall off the top of my head. Again, no, we're not reading the depositions and knowing my memory

is not exhaustive on 19 Plaintiffs, but yes, that's what I recall.

BY MR. CROMWELL:

Q. Okay. You estimate Ms. Amsler's potential future lost earnings, assuming Ms. Amsler will suffer a medical recurrence and will be unable to work as of January 1st of each year beginning in 2026 through 2028; is that correct?

A. As a potential recurrence, yes, so there's a -- it gives where there is no recurrence and that's presented on Table 3, page 10 --

Q. Right.

A. -- to the extent that there is a recurrence, yes.

Q. As you sit here today, do you know whether there has been a recurrence of Mrs. Amsler's leukemia?

A. My understanding as of today, March of 2026, I don't think there has been a recurrence.

Q. Okay. So if true, if she has

not had a recurrence as of today, you would agree that her future lost earning capacity would be zero dollars in your opinion?

MR. RUZICKA: Objection, form.

THE WITNESS: Well, not as of today, that just means then if you look at Table 3, if there would be a recurrence in '27, the loss then would be $106,783. If there's a recurrence that doesn't occur until the year 2028, the loss would be $40,011. If there is no recurrence through her work-life period, which is to her age, 68.3, then it would be zero.

BY MR. CROMWELL:

Q. So just to clarify, if there is no recurrence through her work-life period --

A. Yes.

Q. -- you would agree with me that her lost, her future lost earning capacity is zero dollars?

A. Yes.

Q. Do you have -- do you know the likelihood of a recurrence for Ms. Amsler?

MR. RUZICKA: Objection, form.

THE WITNESS: No, not off the top of my head.

BY MR. CROMWELL:

Q. Does likelihood or probability of recurrence play any part of economic calculations for future damages?

A. Possibly with the chance of recurrence, because it's going to be the recurrence and what the impact of recurrence has on labor market assess. So recurrence with treatment may force Mrs. Amsler or anybody to withdraw from the labor market, so I would need more information to give a more specific answer, if that answers it nay.

Q. Okay. Just to be clear, the likelihood or the probability of recurrence is not a factor you include in calculating future lost earning capacity, correct?

A. It's not a factor I include,

because to me, that seems more of a weight determination that the court may want to consider as the trier of fact depending on the likelihood of recurrence for Ms. Amsler.

Q. Okay. All right. You evaluated Ms. Amsler's lost household services from September 12, 2020, through the December 31, 2025; is that correct?

A. Past, yes.

Q. And that is true even though Ms. Amsler was treated for her disease and no longer considered disabled -- well, never mind. Strike that.

Did you perform any independent analysis regarding the household services performed by Mrs. Amsler prior to her leukemia diagnosis?

A. No.

Q. Okay. So you don't know what household services Ms. Amsler did or did not perform as a result of her diagnosis, correct?

A. What she could or could not

do or which she formerly performed, true.

Q. And similar, you calculated future lost household services from January 1, 2026; is that right?

A. Yes.

Q. And as we've discussed before, you provided two scenarios consistent with your methodology for future lost earning capacity; is that correct?

A. Yes.

Q. Sorry, consistent with future lost household services. I'm sorry, I got tangled up in my own language.

A. Consistent with future loss of household services, yes.

Q. Okay. All right. Let us look at your report for Mr. Stephen Connard, Exhibit 8, please.

Mr. Connard was diagnosed with leukemia in March 2001; is that correct?

A. Yes.

Q. And he passed away in May 2010; is that correct?

A. Yes.
Q. You estimate that Mr. Connard would have worked an additional 14.9 years and retired sometime in 2025; is that right?
A. Yes.
Q. Part of your opinions, you estimated Mr. Connard's lost earning capacity; is that right?
A. Yes.
Q. And to do that, you utilized Mr. Connard's 2008 annual earnings; is that right?
A. Yes.
Q. Did you look at anything else to determine his lost earning capacity?
A. Not for the exact calculation, but as you see, I had historical earnings for Mr. Connard going back to 2004. There was clearly a demonstrated trend of increasing earnings. So as far as the actual calculation, just his 2008, but as far as context and looking at trends, I did have other historical

earnings.

Q. Okay. But either way, you relied on Mr. Connard's historical earnings and wages to estimate his lost earning capacity; is that correct?

MR. RUZICKA: Objection to form.

THE WITNESS: True.

BY MR. CROMWELL:

Q. You also have a section of retirement benefits and specifically you estimated the marginal loss of FERS pension benefits; is that right?

A. Yes.

Q. Are you familiar with the FERS system?

A. Yes.

Q. What is your understanding of it?

A. It's the Federal Employee Retirement System that allows for a defined benefit plan after vesting in the plan. I thought my recollection was it's 1 percent per year for the first 20 years and then

the multiplier increases to 1.1 for years over 20.

Q. Is that where that 1.1 percent comes from in your calculation?

A. Yes, below 20 years of service, it's a 1 percent multiplier and then anything above 20 years of service gets a 1.1 percent.

Q. Okay. And what is that -- what source is that based off of?

A. I imagine the OPM, Office of Personnel Management, website for FERS. Oh, yeah, right there, footnote 13.

Q. Yup. I was just about to ask, is that what footnote 13 is referring to --

A. Yes.

Q. -- and 14?

A. Yes. The computation. The one was the schedule, 13 is the schedule, 14 is the computation.

Q. Understood. What do you mean by marginal loss in the first system?

A. So Mr. Connard had already

accrued certain years of service in federal service, so I'm only doing, when I do my calculator, my calculation, I'm doing all the lost years, so the 15 years of lost employment. So instead of doing the pension at 30 years, you know, where the first 20 would be multiplied by 1 percent, I'm just doing what has been lost to him given his untimely passing, so it's 15 years of lost service, so --

Q. You're calculating from 2010 to 2025?

A. Yes, so when it says, so for example, just the formula, it's 1.1 percent multiplied by years of service. The years of service I'm using as 15, not 30 as an illustration.

Q. Understood. Part of your calculation it's multiplied by the high-3 average salary. What does that mean?

A. That's within the OPM's definition, it's your three highest years of earnings with the federal government. I forget right now if it has to be

consecutive. Typically, it will be consecutive, especially when they're on the GS scale, so it would typically be your last three years of earnings --

Q. Of earnings?

A. -- you get an average.

Q. You've totaled the marginal loss of FERS pension benefits at $18,513; is that right?

A. Yes.

Q. In the simplest of terms can you explain what that number represents?

A. Yup, that's the marginal loss benefit to the Connards given his untimely passing, that but for his passing in 2010, he would have been expected to receive as of 2025 an additional pension benefit, monthly benefit of -- well, it's annual, so an annual benefit of an additional $18,513. And then you would divide that out by 12 to get an additional monthly benefit.

Q. Okay. Your Table 2, which is on page 9 of Exhibit 8 lists the kind of annual lost FERS benefit from 2025 to 2038.

How is that different than the $18,513 we were just discussing?

A. The $12,403 is the 18,513, but is prorated. That 18,513 is for a 12-month period, but this would start May 1st, so your -- May 1st is .33 percent of the year, so the 12,000 represents 67 percent of the year.

Q. Okay. So your opinion is these portions of lost FERS benefit that Mr. Connard would have attained had he worked until 2025; is that right?

A. Yes, so had he worked until April of 2025, he would have 15 more years of service, that would have created that additional benefit of 18,000 which would commence upon his retirement, it's typically one month after your retirement, so that puts him into May 1st of 2025. And he would have been expected to receive an additional $18,000 per year through his life expectancy.

Q. Okay. In your calculations of lost FERS benefits, do you take into

account the amount that Ms. Connard has been receiving from his FERS pension?

A. No, because that goes towards your earlier question, this is just the margin --

Q. Okay.

A. -- so that -- so the answer would be one should do that, if my multiplier was all his years of service, so if I did it of 30 years to get the entire pension amount, then you should deduct out her survivor benefit, but since I'm only doing it on the margin, his lost years, it's not necessary to deduct the survivor benefit.

Q. Okay. Are you aware that there is a congressional pension formula that's different from the regular FERS pension formula?

A. Yes.

Q. Did you take into account the formula used by the congressional pension in your calculations given his occupation?

A. So I didn't know if he would

be eligible for it given his status, because he wasn't a congressman, I didn't consider it, but it's -- this is a more conservative approach, it's a richer pension, go figure, the people that make the laws get the -- but nonetheless, it's a greater multiplier.

Q. Okay.

A. I have done that in other cases and it's not 1.1 percent.

Q. But it's not something you took into account here?

A. No, I didn't know if he would be eligible for it given his status within Congress, but I didn't do it. So I went with the more conservative measure, which is the 1.1 percent.

Q. Okay. You're also opining on lost household services for Mr. Connard; is that correct?

A. Yes.

Q. And you are calculating lost, past lost household services from the date of his passing, May 14, 2010, through

December 31, 2025; is that right?

A. Yes.

Q. Just stepping back, lost household services represent the type of care he would have needed but for his illness, right?

A. No, that's typically the home care. This is maintaining his household for his wife and caring for the general household, cooking, cleaning, shopping.

Q. Well, why not commence the household services on the date of his diagnosis, which was 2001 like you've done for other Plaintiffs?

A. I could have, and again, that goes back to the marginal loss of those services from 2001 through 2010, I could have started then.

Q. What do you mean, "marginal loss"?

A. So we kind of been talking a lot about the household services for the injury Plaintiffs, that some of your questions today have been what were they

doing before diagnosis and what would they do after diagnosis, so that middle area, right, is the marginal loss that I used to do A, B, and C, post diagnosis, I could only do A, so what has been lost is B and C in my illustration, that's the marginal loss. So I could have done that while he was ill getting treatment in the '01, '02, maybe he was able to take out the trash, but not mow the lawn, so there would be a marginal loss. I didn't include it just for conservatism given that he passed some subsequent years later, but I could have included it.

Q. That would be, you could make that determination -- well, strike that.

You started lost household services calculation on the day he passed away, correct?

A. Yes.

Q. And you've continued it through December 31, 2025, I guess to bring it up to current date, correct?

A. For past, yes.

Q. Why would you continue past -- lost past household services beyond when Mr. Connard passed away?

A. Why would I do household services from 2010 to 2025?

Q. Right.

A. Or just 2010 to whenever?

Q. Sure.

A. Because that's what has been lost to the household, that's what has been lost to, I believe, his wife is Vivian. She's missed, given his passing that she would have expected to have the benefit of her husband doing chores around the house, exterior maintenance, cooking steaks on the barbecue, food shopping, whatever it is, but she's now lost out on that household production from his passing through his healthy life expectancy.

Q. You would agree, though, that's a loss to her, correct, economic loss to her rather than to him, correct?

A. So in a death case the loss in household services tends to be a loss to

the survivor, unlike an injury case where it is a loss to the individual.

Q. Do you know one way or the other whether Ms. Connard would be entitled to an economic loss damages in this case?

MR. RUZICKA: Objection, form.

THE WITNESS: I don't know.

BY MR. CROMWELL:

Q. But you would agree with me that this is not an economic loss to the Plaintiff, correct, this is an economic loss to his spouse, Ms. Connard?

MR. RUZICKA: Objection, form.

THE WITNESS: In a death case, the loss of household production is the loss to the survivor.

MR. CROMWELL: Okay.

MR. RUZICKA: Beneficiary, survivor, technically, I think is the decedent.

BY MR. CROMWELL:

Q. When evaluating and calculating lost household services, did you take into account any deposition

testimony that identified any household services Mr. Connard performed before being diagnosed?

A. I don't recall.

Q. Did you obtain any information from Ms. Connard regarding household services she now has to do because of Mr. Connard's illness and eventual passing?

A. I didn't speak to her, so I didn't get a specific enumerated list from her.

Q. Okay. You're not aware of any sort of list of services?

A. It would just be common sense to me, but I don't have an enumerated list from her, no.

Q. If you look at page 5, you, this is with regards to household services you calculated, you chose an hourly wage rate for representative occupations in the state of North Carolina; is that correct?

A. Yes.

Q. You did not use a

representative wage rate where Plaintiff lived at the time of his death, which is Maryland; is that correct?

A. True.

Q. And is that because you're valuing future lost household services as it pertains to Ms. Connard rather than Mr. Connard?

A. Correct, so I believe that when he was alive, they lived in Crofton, Maryland, he passes, she relocates to North Carolina. So if we were to give her the monies to buy the household production where she's residing now, it should be North Carolina wages.

Q. Understood. All right. We can put Connard away. Let's look at Ms. Dyer, which is Exhibit 9.

All right. Ms. Dyer was diagnosed with bladder cancer at the age of 52; is that correct?

A. Yes.

Q. And she is currently 68 years old; is that right?

A. Yes, yes.
Q. You have calculated past lost household services for her; is that right?
A. Yes.
Q. And in doing so, you have provided ATUS hours per week for a working woman; is that right?
A. For a period of time, yes.
Q. Okay. And then you've moved it from to retired age 65 to 74 and then retired at 75 and above; is that right?
A. Yes.
Q. Okay. Does her marriage status have any role with regards to these rates?
A. Marital status will, yes.
Q. Have you factored it in for Mrs. Dyer though?
A. Yes.
Q. Which rate on Table B refers to her status as being married?
A. The three do, that's a woman with a dependent -- or a spouse.
Q. So each of these rates

factors in the fact that she's married?
A. Correct.
Q. Okay. Just curious, where does it, where in your report does it say that?
A. Well, in the background section it says is she's married to John. As far as in the data source in set Roman numeral number V, I don't think it specifies where those rates are coming from, a working married individual with no dependent, a married retired female, married retired, it doesn't say the word, "married," before those categories.
Q. Okay. Have you made any determination as to what household services Ms. Dyer was able to perform prior to her bladder cancer diagnosis?
MR. RUZICKA: Objection, form.
THE WITNESS: Perform before, no.
BY MR. CROMWELL:
Q. Look at page 2. You've opined that Mrs. Dyer's husband has taken

care of her since her diagnosis on May 20, 2009; is that correct?

A. Yes.

Q. And you also note in your background section that she -- Mrs. Dyer worked until she was -- until 2010; is that correct?

A. Yes.

Q. All right. Do you know one way or the other whether she required any past medical and related care from her husband while she was working full time?

A. While she was working, I don't know off the top of my head.

Q. Okay. You did not include this category of damages, past medical and related care, for Ms. Dyer in your original report from February 2025; is that correct?

A. I think that's correct, yes.

Q. What additional information do you now have that necessitated you including -- what new information do you have now that necessitated including it in your October 2025 report?

MR. RUZICKA: Objection, form. And to the extent that it calls for any communication with counsel, refrain from disclosing those communications.

THE WITNESS: I can't answer that based upon conversations with counsel between the two reports.

BY MR. CROMWELL:

Q. Okay. Previously, you testified that you had certain cases in which you didn't provide an expert report in February 2025 that you're now offering reports for or new opinions for based off of new information that was provided to you.

So to the extent there is new data or information that you're relying upon to offer such opinions, can you explain to me why you're now offering a past medical and related care opinion for Mrs. Dyer?

MR. RUZICKA: Same objection.

THE WITNESS: To my

recollection with Mrs. Dyer's case, I don't think there was any new information, I think it was going to be based upon conversations with counsel for the additional calculation.

BY MR. CROMWELL:

Q. You have valued household services from May 9 -- or May 2009 through December 31, 2025; is that correct?

A. Yes.

Q. And that's based upon average hourly wages for home health and personal care --

A. Yes.

Q. Personal care from 2020 to 2024; is that right?

Let me step back, with regards to your lost -- your household, lost household services calculations, we discussed previously that you include a number of wage rates from various occupations, correct?

A. Yes.

Q. Do you average the average wages of each of those occupations, is that how you come up with your average hourly wage rate?

A. Yes, so if we look here in Mrs. Dyer's case, footnote 15 has the first one is a home health and personal care aide and that average wage rate for that is, hypothetically, $15.25. The next one by illustration would be cooks, fast-food, cooks, that might be $13.75. Going down, I get an average wage for each of those occupations and I take an average of all those average wages.

Q. Got it. And that's true for each Plaintiff in this case?

A. That I do household services for, yes.

Q. Okay. Do you know as we're looking at footnote 15 for Mrs. Dyer, do you know what services or household tasks she was unable to perform due to her bladder cancer diagnosis?

A. Not off the top of my head,

no.

Q. You are not offering an opinion about future lost household services for Mrs. Dyer; is that correct?

A. True.

Q. And is that because she has a life care plan --

A. Correct.

Q. -- currently offered?

A. True.

Q. You are offering an opinion on the future cost of medical and related care; is that correct?

A. Yes.

Q. And this is based upon the life care plan of Mr. Michael Fryar?

A. Yes.

Q. Okay. Conceptually speaking, you would agree that if the court were to disagree with the medical procedures or the cost of those procedures offered by Mr. Fryar, that your calculations for future medical care would be impacted, correct?

A. True.
Q. Okay. Let's move on to Mr. Gleesing, Exhibit 10. Mr. Gleesing was diagnosed with leukemia in September of 2015 at age 56; is that correct?
A. Yes.
Q. You note in here that Mr. Gleesing began receiving VA disability benefits at a 100 percent disability rating in 2016 related to his leukemia diagnosis; is that right?
A. Yes.
Q. What relevance, if any, does his VA disability benefits have with regards to your opinions in this case?
A. Basis to establish no residual earning ability.
Q. Okay. So you're relying upon to suggest he's unable to work?
A. Correct.
Q. Okay. Are you familiar with the requirements for obtaining VA disability benefits?
A. I've reviewed them over the

years, but I don't have them memorized as far as the criteria to get VA benefits.

Q. Do you know whether the VA considers a person's ability to work or not as part of the criteria for awarding disability benefits?

A. I don't recall off the top of my head.

Q. Now, according to you, Mr. Gleesing opted to take an earlier severance payout and retire in 2016; is that correct?

A. Yes.

Q. Okay. And you note his severance payout was 18 months' worth of salary; is that right?

A. Yes.

Q. Okay. And you assumed that absent the diagnosis, Mr. Gleesing would have remained employed for an additional year; is that right?

A. Eighteen months, yes.

Q. Okay. Just if we look at page 3, if you look in Section V, 1, under Upjohn employment, halfway through that

paragraph, you note, "Accordingly, absent the diagnosis, we assume Mr. Gleesing would have remained employed for an additional year and then he would have taken his severance payout."

First of all, did I read that correctly?

A. You did.

Q. And so where is the 18 months coming from when you say an additional year?

A. Oh, I misspoke, I think that what I wrote is correct, one year.

Q. Okay. So you're calculating his lost earning capacity for a salary of one year that he forewent; is that right?

A. Yes.

Q. Okay.

A. From Upjohn.

Q. From Upjohn, correct. And you determined that was $107,055; is that correct?

A. Yes.

Q. Okay. If you turn to

Table 1, which is page 8 of Exhibit 10, Table 1 is entitled, "Gleesing Value of Lost Earning Capacity Assuming Worklife to Age 67;" is that correct?

A. Yes.

Q. Under the column, "Earnings Absent Upjohn/Pfizer," you have noted earnings -- or lost earnings of $107,055 for the year 2018; is that correct?

A. Yes.

Q. You have also included $54,956 for the year 2019; is that correct?

A. Yes.

Q. Simply put, where does that number come from?

A. That's half of 107,000 with one year of inflation.

Q. So I just need to make sure I understand, are you calculating an additional year of working at Upjohn or are you calculating an additional 18 months of working at Upjohn?

A. No, one year, because if you look at, I back out in the three columns

over earnings given from Upjohn, I back out the 40,655, so.

Q. Got it. So, essentially, it's kind of halfway through 2018 --

A. Exactly.

Q. -- 2019?

A. Exactly, so --

Q. Okay.

A. -- he worked a portion of the year in 2018, so I back out that so if it was to be a straight 118 months, it would be 107 plus 54,000 with no deduction, but since I'm doing the deduction, it's one year of loss from Upjohn.

Q. Okay. I'm still struggling, give me second, because on page 3, we're back at the same section we were talking about before, you note, "We value this loss from January 1, 2018 through July 1, 2019."

A. Uh-huh.

Q. Eighteen months. And so you're simply -- I'm trying to rectify -- or reconcile that with what we just discussed. Simply put, what time period

are you evaluating a lost earning capacity for Mr. Gleesing?

A. So that's a fair question. The time period set forth is right, 18 months of time, so it's January 1 to December 31 of '18 is 12 months --

Q. Right.

A. -- right? Then there's additional six months, 1/1/19 through 7/1/19. I started 1/1/18 for the 107,000, but the last sentence, right --

Q. You deduct?

A. Because he worked slightly less than a half a year --

Q. Okay.

A. -- in -- so that's how you get a year's worth of loss, because he, I calculated for 18 months of earnings, but then I deduct out the year that -- or he did slightly less than a half a year, so this now becomes a little over a year's worth of loss. He made 41,000 rounded in '18. He would have been expected to make a little more than 41,000.

Q. Understood. Okay. I think I'm with you. So, just to be clear, the lost earning capacity for Mr. Gleesing specific to his work at Upjohn Pfizer would be the $162,011 minus the $40,655?

A. Correct.

Q. Is that correct?

A. Uh-huh.

Q. Thank you for the clarification.

A. Yup. Thank you.

Q. And is it fair to say you're using his severance payout, the value of his severance payout as the measure of lost earning capacity, rather than his wages or are they in intricately tied together since his severance is tied to his wages?

A. I'm not really using his severance.

Q. Okay.

A. And I think you said intrinsically, I think they measure, Upjohn determined his severance by using a year and a half of salary --

Q. Right.
A. -- but I don't use his severance, I think I saw that comment by Ms. Yount, I don't use his severance at all. I use his historical earnings from '16 and '17 to measure '18's performance --
Q. Okay.
A. -- and then just do it for the year.
Q. You are also offering an opinion about his lost earning capacity for his time as an educator; is that correct?
A. Yes.
Q. Okay. And as part of your opinions and calculations, you're assuming that Mr. Gleesing would have continued working as an educator until his work-life expectancy in 2026; is that correct?
A. Yes.
Q. Okay. Why did you conclude that Mr. Gleesing was working an additional year at Upjohn, but an additional ten more years as an educator? What information are you basing that distinction on?

A. From my recollection, it would have come from his deposition testimony.

Q. If you don't mind, do you know, can you point in your report where you cite to the particular deposition testimony?

A. Footnotes one through -- one through ten and then footnote 17.

Q. Just for clarification, you're pinpointing the times you have cited to Mr. Gleesing's deposition testimony. Do you know where in his deposition Mr. Gleesing indicated he was continuing to work or he was going to continue working as an educator for ten more years?

MR. RUZICKA: Objection, form.

THE WITNESS: It probably would have been around pages 41 to 55 from I'm looking at my footnotes, but I don't specifically recall the testimony just looking from my footnotes and what they're referring to.

BY MR. CROMWELL:
Q. Okay. How much certainty is there that he would have continued working as an educator for another ten years?
MR. RUZICKA: Objection, form.
THE WITNESS: Enough certainty to a reasonable degree of economic certainty.
BY MR. CROMWELL:
Q. Well, you testified earlier that people projecting when they were going to retire was an uncertainty, so I'm trying to understand in this scenario, you decided to indicate, using his deposition testimony, that he would work for another ten years?
MR. RUZICKA: Objection, form.
BY MR. CROMWELL:
Q. Does that question make sense?
A. No.
Q. Earlier you testified that you did not rely upon -- sorry -- you did not rely upon an individual's testimony to

tell you when they would retire in the future.

Do you recall that testimony?

MR. RUZICKA: Objection, form.

THE WITNESS: I said yes, in most cases, yes.

BY MR. CROMWELL:

Q. And am I correct in understanding that you are relying upon Mr. Gleesing's deposition testimony to support your calculation that he would have worked as an educator for another ten years after his diagnosis?

A. To my recollection, I think his testimony gave more on the Upjohn that he was going to retire anyways from Upjohn and that my recollection, generally, of his testimony is that he was just going to continue to work generally. But I think it's not so much the educator earnings going on through a work-life period, it's more so that he was planning on ending the Upjohn career anyways within an 18-month window.

Q. Right. Okay. Would you agree with me, generally speaking, that workers experience some likelihood that they will not be employed each year until their work-life expectancy?

MR. RUZICKA: Objection to form.

THE WITNESS: There's a chance of that. I saw that criticism of Ms. Yount about an unemployment percentage. There's a chance that a person might be unemployed at a period of time in the future.

BY MR. CROMWELL:

Q. I mean, you understand the work-life expectancy considers the probability of being in the workforce, right?

A. Yes, the work-life tables account for survival, chance of disability, or withdraw from the labor force, but not for a chance of unemployment, yes.

Q. Okay. That's -- I want to make sure we're on the same page.

A. Yup.
Q. You prepared a calculation for lost household services for Mr. Gleesing; is that correct?
A. Yes.
Q. As I've asked for other individuals, did you evaluate and make any kind of determination as to what particular household services Mr. Gleesing performed prior to his diagnosis?
A. No.
Q. You said you evaluated Mr. Gleesing's deposition testimony; is that correct?
A. I have.
Q. Did you take into account Mr. Gleesing's deposition testimony that he continues to perform certain household tasks following his diagnosis?
A. Yes.
Q. Did you factor that in?
A. Yes.
Q. Okay. And how does that come into your opinions in this case?

A. That comes into what we observe discussing for a significant period of time today, the one hour per week, so that allows the trier of fact to do that marginal analysis, if you look at page 10, Table 3, there's that one-hour calculation of $10,288 of one hour per week. So, again, that allows the court as the trier of fact to capture the marginal loss. So, again, using the guidepost of the ATUS hours, which is on page 5, Table B, the 13 hours per week for a working married individual, if the court determines complete disability is right, 13 hours, testimony that I can do some stuff, the court determines that to be I can do some stuff and they ascribe five hours to that, hypothetically, right, so then the loss has been seven hours. So then that gives, my calculation gives the tool to the court to take $10,288 and multiply by seven, the lost amount, considering a full loss would be 13, able to do some, hypothetically, for our answer here is five hours, the loss is

seven, multiply seven by 10,288, you get 79,000, approximately, as a loss.

Q. But as you sit here today, you're, again, you're not offering an opinion as to the amount of hours Mr. Gleesing did or did not need household services, correct?

A. True.

Q. Okay. All right. Let's look at Mr. Hill. All right. Mr. Hill's report is identified as Exhibit 11. And Mr. Hill was diagnosed with leukemia in 2004 at the age of 52; is that right?

A. Yes.

Q. And you understand that Mr. Hill continued working after his diagnosis in 2004; is that correct?

A. Yes.

Q. He was employed by the state of Florida from 2004 through 2012; is that right?

A. Yes.

Q. You have stated that Mr. Hill prematurely retired; is that correct?

A. Yes.
Q. And that's -- is it your opinion he prematurely retired based off his leukemia diagnosis?
A. Yes.
Q. Even though his diagnosis was eight years prior to his retirement; is that correct?
A. Yes.
Q. Do you know what issues Mr. Hill was having in 2012 that caused him to retire?
A. I don't know off the top of my head.
Q. You aren't offering an opinion on the future cost of medical care -- medical related medical care for Mr. Hill; is that correct?
A. Yes.
Q. And, again, this is based off of Mr. Fryar's life care plan?
A. Yes.
Q. Okay. Sorry, I didn't mean to -- you have a section in here with

regards to retirement and fringe benefits; is that correct?

A. Yes.

Q. And what type of retirement benefits do you consider in your calculation of lost retirement benefits?

A. That would be coming from the Department of Labor site that's set forth in footnote 17, but for a public employee, I went to the department of Florida's correction website and that would include a 403(b) contribution and I do believe they have some form of a defined benefit. I don't recall the specifics of it.

Q. Do you know what percent of government employers offer both a defined benefit and defined contribution plan with an employer match?

A. I don't know what percent of public employees do that, no.

Q. Did you adjust any of your figures by the probability that Mr. Hill would have had access to both types of retirement plans throughout his employment?

A. No, because it's either A plus B or A or B, but what we're seeing is that I would expect on average between those three scenarios to be roughly 21 percent of earnings.

Q. Okay. You had at your disposal, well, the expert report by Mr. Fryar, correct?

A. Yes.

Q. And he's a vocational expert as well, you understand that?

A. I believe he has a designation as a rehabilitation counselor, yes.

Q. You would agree with me, you did not rely upon Mr. Fryar's report in calculating past household service losses for Mr. Hill; is that correct?

A. True.

Q. And you did not use his report to develop an estimate of the value of Mr. Hill's potential past lost household services; is that right?

A. True.

Q. Instead, you relied, again, on what we have been discussing, the representative occupations?
A. Yes.
Q. Did you make any determination or evaluation as to what household services Mr. Hill was able to perform prior to his diagnosis?
A. No.
Q. And did you make any review or evaluation of the kinds of household services that Mr. Hill was able to perform after his diagnosis?
A. No.
Q. You did not calculate any future lost household services in your report for Mr. Hill; is that correct?
A. True.
Q. And is that, again, solely due to the existence of a life care plan?
A. Correct.
Q. Okay. You also did not offer an opinion for Mr. Hill for past medical or related care; is that right?

A. Yes.
Q. Is that simply because he did not have a spouse at the time or what is the basis for not providing a category of damages for him?
A. I know he's a widower. It would be primarily because of his status as a widower.
Q. Okay. Does the fact that he's a widower mean that he wouldn't need past medical or personal aide care though?
MR. RUZICKA: Objection to form.
THE WITNESS: No, he wouldn't need it, but as similar to what we were talking about in, I think, Mr. Connard's case, the services that have been lost here, it is the person providing the service. So here it would have been the decedent providing, hypothetically, the care to Mr. Hill.
BY MR. CROMWELL:
Q. Okay. And you're not aware

of Mr. Hill actually engaging or acquiring a home health aide or a personal care aide, correct?

A. I'm not aware of direct expenditures, but that would be a measure, if during that time period of his convalescent period, that would be a measure, if he had to hire an aide or if a family member had to do such services besides his late wife.

Q. But as you sit here, you're not aware of that actually happening, correct?

A. I'm not aware of that happening.

Q. Let's look at Mr. Howard. This is Exhibit 12. You submitted an expert report for Mr. Allan Howard; is that correct?

A. Yes.

Q. And you assessed the economic loss for Mr. Howard as a result of his kidney cancer diagnosis in December 2008 and his NHL diagnosis in September of 2023;

is that right?
A. Yes.
Q. Now, you understand Mr. Howard worked for the U.S. Marshals Service from 2008 through approximately 2016?
A. Yes.
Q. He was also a security guard at Sinclair College from 2016 to 2017?
A. Yes.
Q. Okay. Aside from any conversations with counsel, can you tell me why you did not issue a report for Mr. Howard in February 2025?
A. I don't know off the top of my head.
Q. Okay. You have prepared a calculation with regards to Mr. Howard's lost earning capacity; is that correct?
A. Yes.
Q. And as we have been discussing lost earning capacity is meant to compensate, right, an injured party who cannot work or has to leave their work

early due to their injury; is that right?
MR. RUZICKA: Objection, form.
THE WITNESS: Or work at a reduced level, yes.
BY MR. CROMWELL:
Q. Okay. To estimate Mr. Howard's earning capacity, absent the diagnosis, you utilized Mr. Howard's annualized regular earnings at the time of his retirement in 2008; is that correct?
MR. RUZICKA: Objection, form.
THE WITNESS: Yes.
BY MR. CROMWELL:
Q. And you commence that calculation starting in 2008 when he, according to your report, prematurely retired from the Ohio Police Department; is that right?
A. Yes.
Q. And based off your citation, you learned that his retirement was premature as expressed to you by counsel; is that right?
A. Yes.

Q. What were you informed about Mr. Howard's retirement from counsel?

MR. RUZICKA: Objection, form. To the extent that it calls for any communications between counsel and yourself, please refrain from disclosing those communications. Otherwise, you can answer in terms of facts or assumptions that was provided to you.

THE WITNESS: It would have been an assumption that Mr. Howard left the police department because of his cancer diagnosis.

BY MR. CROMWELL:

Q. When you say, "cancer diagnosis," he left the police department because of his kidney cancer diagnosis?

A. That's my recollection of the assumption being provided.

Q. Okay. Because it was information provided by counsel, did you do anything to verify that information?

A. I don't recall.

Q. How is it that Mr. Howard was -- had to prematurely retire from the Ohio Police Department because of his kidney cancer diagnosis, but was able to work for the U.S. Marshals from 2008 through 2016?

MR. RUZICKA: Objection, form, to the extent that it calls for any communications provided to you by counsel. You can answer regarding any facts or assumptions.

THE WITNESS: From a medical standpoint, I don't know.

BY MR. CROMWELL:

Q. Okay. But from a work and earning capacity standpoint, what distinction -- well, let me back up.

Is it fair to say that part of your opinion that he would have continued working at the Ohio Police Department if not for his kidney cancer diagnosis?

MR. RUZICKA: Objection, form.

THE WITNESS: Yes, my

understanding was he wanted to enter into the DROP program, which is a special pension program that is a fixed period in duration, so he would have at max had an additional eight years. Yes, so it's my understanding that he wanted to enter into the DROP and he would have had a fixed set of time of eight additional years.

BY MR. CROMWELL:

Q. And it's your opinion that he would have worked those additional eight years with the Ohio Police Department?

MR. RUZICKA: Objection, form.

THE WITNESS: Yes.

BY MR. CROMWELL:

Q. Just to be clear, your report does state that Mr. Howard prematurely retired -- well, strike that.

You note that Mr. Howard entered into the Ohio Police and Fireman's Fund Deferred Retirement Option Plan known as DROP in July 2007; is that correct?

A. Yes.
Q. And you indicated that you learned that he entered into the DROP in July 2007 as expressed to you by counsel; is that right?
A. Yes.
Q. Okay. Again, because this was expressed by counsel, did you do anything to verify that Mr. Howard entered into the DROP and intended to continue in the program?
MR. RUZICKA: Objection, form.
THE WITNESS: Can I hear that question again?
BY MR. CROMWELL:
Q. Sure. Did you do anything to verify that Mr. Howard entered into the DROP in July 2007?
MR. RUZICKA: Objection, form.
THE WITNESS: Not outside of the representations from counsel.
BY MR. CROMWELL:
Q. Did you do anything to verify that Mr. Howard intended to continue in the

Deferred Retirement Option Plan for eight years?

MR. RUZICKA: Objection, form.

THE WITNESS: Nothing beyond the representations from counsel.

BY MR. CROMWELL:

Q. And you say on page 4 under Section VIII titled, "DROP Accumulation," that in that first paragraph, "Due to Mr. Howard's diagnosis, he left the DROP and forfeited his interest accumulations and began receiving his pension benefit."

First of all, did I read that correctly?

A. Yes.

Q. And it's your understanding that Mr. Howard left the DROP and forfeited his interest accumulations due to his kidney cancer diagnosis; is that correct?

A. That's my understanding, yes.

Q. Okay. So for both your opinions regarding lost earning capacity and DROP accumulation, you are relying upon the assumption that Mr. Howard's kidney

cancer caused him to prematurely retire; is that correct?

A. Yes.

Q. You agree, you had access to and relied upon Mr. Howard's deposition; is that correct?

A. Yes.

Q. Did you evaluate Mr. Howard's testimony about when he retired from the Ohio Police Department?

A. I don't recall that specific provision or that part of the deposition.

Q. Am I on 35? Do you want to mark that?

- - - - -

(Deposition Transcript of Allan Wayne Howard taken 2/16/24 marked Staller Exhibit 35 for identification.)

- - - - -

BY MR. CROMWELL:

Q. Mr. Staller, we have marked as Exhibit 35 as Mr. Allan Howard's deposition dated February 16, 2024; is that

correct?

A. Yes.

Q. This is the same deposition you've identified as a document you relied upon in formulating your opinions in this case?

A. Yes.

Q. If you would turn to page 55 and this is a condensed version, so it's technically page 15 with pages 55 and 56 on it.

A. Okay.

Q. Now, on page 55, line 11, "QUESTION: Why did you decide to retire?

"ANSWER: I was one year past my retirement date. And I had a great job, and I -- you know, I mean, something came over me, and it just told me that I needed to retire right now, and to this day, I can't -- I can't explain it. But I had applied for a job here at the federal building, and the guys in the blue coats, they're contractors, contract employees to the marshal service.

"And so I decided I was gonna retire, and then so we got my replacement and I retired. And shortly after I retired, they called, the marshal's office called and asked if I was still interested in that position, and I said I would, and I took a physical, and that's when they found out I had cancer.

"Do you remember how long before your cancer diagnosis you had retired?

"ANSWER: I retired in April of 2008. I was diagnosed in October of 2008. I would never have taken a physical had I --" and then it continues.

First of all, did I read that testimony correctly?

A. Yes.

Q. Would you agree with me that according to Mr. Howard's own testimony, he planned to and did retire in April of 2008?

A. Yes.

Q. You agree with me that, according to Mr. Howard's own testimony, he

was not diagnosed with kidney cancer until October 2008?

A. True.

Q. And, in fact, he discovered his cancer during a physical applying for his subsequent job at the U.S. Marshal's office; is that correct?

A. That's what Mr. Howard testified to.

Q. Okay. Would you agree that from Mr. Howard's testimony that it was not his intention to stay with the Ohio Police Department and in fact planned to retire in April 2008 prior to his kidney cancer diagnosis?

A. Yes.

Q. And, in fact, you agree he did retire prior to being diagnosed with kidney cancer?

A. Yes.

Q. Given that, you would agree that he would not be entitled to lost earning capacity damages, as his disease did not prevent him from continuing on at

the Ohio Police Department, correct?

MR. RUZICKA: Objection, form.

THE WITNESS: Well, the disease once he discovered it six months later might have in '9, '10 and '11 prevented him from continuing to work at the Ohio Police given the requirements of a police officer, but it wasn't the cause of his retirement, I would agree with that.

BY MR. CROMWELL:

Q. Okay. You agree that despite his diagnosis, he went to and did work for the U.S. Marshals Service from 2008 through 2016, correct?

A. True.

Q. Nothing about his diagnosis kept him from performing that position, correct?

A. That's true.

Q. Do you agree with me that because Mr. Howard intended and did retire prior to his kidney cancer diagnosis, he

did not leave the DROP plan because of his kidney cancer diagnosis?

MR. RUZICKA: Objection, form.

THE WITNESS: That appears to be the testimony of Mr. Howard.

BY MR. CROMWELL:

Q. And given that, would you not agree that the lost DROP interest accumulations would actually be zero dollars for him?

A. Based upon his testimony on pages 55 and 56 if he was going to leave the Ohio Police Department regardless and not enter the DROP and had nothing to do with his cancer, that would be a true statement.

Q. All right. You would agree with me that your current opinions with regards to his lost earning capacity are based on the notion that he retired from the Ohio Police Department due to his kidney cancer diagnosis; is that correct?

A. That is true.

Q. All right. Let's look at

Mr. Laramore.

A. Let's take a little bit of a break, I need a refresher.

Q. That's fine. You are the witness.

THE VIDEOGRAPHER: All right. We're going off the record at 3:45 p.m.

- - - - -

(A recess was taken at this time.)

- - - - -

THE VIDEOGRAPHER: We're back on the record at 4:04 p.m.

BY MR. CROMWELL:

Q. All right. Mr. Staller, we are going to discuss just for a moment your opinions in Mr. Laramore's case. All right. If you can get Exhibit 13 out, which is your report for Mr. Laramore.

You would agree with me that what you have done is essentially take Mr. Fryar's medical recommendations and applied the present value to those particular numbers and scenarios; is that

correct?

A. For Mr. Laramore?

Q. Yes.

A. I don't know if it's present value, I think I just repeated what Mr. Fryar outlined as the cost to be incurred in the first year, so I didn't do any present value.

Q. Okay. So you're simply restating the amounts that Mr. Fryar is opining are potential options for certain procedures that Mr. Laramore may or may not undergo; is that correct?

A. Yes.

Q. Okay. And you have not done any other calculations or prepared any other opinions with regards to economic damages incurred by Mr. Laramore; is that correct?

A. No, correct.

Q. Okay. Do you understand that Mr. Laramore was retired at the time of his bladder cancer diagnosis?

A. That's my recollection.

Q. And is it your understanding that he had no plans to return to the workforce at the time of his bladder cancer diagnosis?

A. That's my understanding.

Q. Is it your understanding that Mr. Laramore was medically retired before his bladder cancer diagnosis?

A. I don't know what you mean by the term, "medically retired."

Q. I don't know what I mean either, so let's find out. I am going to introduce Exhibit 36. This is one of the damages checklists specifically for Mr. Laramore Bates labeled PLG-EXPERT__STALLER__LARAMORE__1 through 11; is that correct?

A. Yes.

- - - - -

(Damages Checklist Injury/Adult for Laramore Bates 0000000001 to 11 marked Staller Exhibit 36 for identification.)

- - - - -

BY MR. CROMWELL:

Q. And if you would on Exhibit 36, look at the page ending in Bates number 008. And under the -- do you see the section entitled, "Health and Medical"?

A. Yes.

Q. And in bold, and just for context, the language in bold, is that the language provided by the person who filled out this particular checklist?

A. Yes.

Q. It states, "Plaintiff was medically retired before the bladder cancer diagnosis. The injuries contributing to his medical retirement include the following: One, neck injury from loading a flatbed when he was a truck driver; two, PTSD; and three, back injury in 2009 when Plaintiff was working as a government contractor truck driver in Iraq."

First of all, did I read that correctly?

A. Yes.

Q. Is it your understanding that Mr. Laramore was retired for reasons unrelated to his bladder cancer diagnosis?

A. Yes.

Q. If you would, we're going to look at your omnibus report, which we've identified as Exhibit 21. And in your omnibus report, you have identified past and future loss of household services for Keller, Carter, Criswell, and Davis; is that correct?

A. Yes.

Q. And you identified past medical and related care services for Keller, Carter, and Fancher; is that correct?

A. Yes.

Q. Okay. Let's start with Mr. Keller. Mr. Keller was diagnosed with non-Hodgkin's lymphoma in 1998; is that correct?

A. Yes.

Q. And he's currently 59 years old; is that right?

A. He was as of October 29.

Q. Okay. And you calculated household services for, past lost household services for Mr. Keller from February 2, 1998, through December 31, 2025; is that right?

A. Yes.

Q. And you valued future lost household services for Mr. Keller from January 31, 2026, to his healthy life expectancy of 76 years of age in the year 2042; is that correct?

A. Yes.

Q. Okay. If you look at Table 2 on page 14 of this exhibit, this table is entitled, "Keller Value of Future Lost Household Services from January 1, 2026 to age 76.2;" is that correct?

A. Yes.

Q. And if you would look with me between the lines or rows 2033 and 2034, and for 2033, your projected annual loss based off ATUS weekly hour rates was $13,160; is that right?

A. Yes.
Q. And for 2034, your projected annual loss ATUS weekly hour rate is $21,946; is that correct?
A. Yes.
Q. Can you help me understand the difference between these two -- what -- can you help me understand what, different rate, you're using to calculate the annual loss for 2034 through 2042?
A. Retirement age, it goes up from those 13 hours to 22 hours, so that's why you see the jump up.
Q. Okay.
A. Or just to be specific, it goes, it's 22 hours, 21.98 hours.
Q. Okay. Do you have any information that you see reviewed to suggest that any household services needed by Mr. Keller would have changed in 2034?
A. It's more so what we've seen from the dataset that indicates individuals, once they separate from the labor market, their household production

goes up given they've now freed up 40 to 60 hours of time by the time of work, commuting, et cetera, so the switch is given his separation from the labor force.

Q. Got it. It has to do with him being home more, not at work?

A. It's the accruing or now it's the time to pay the honey-do list.

Q. Understood. But you would agree with me that doesn't have anything to do with his particular diagnosis though, correct?

A. No. The switch in 2033 and 2034 for the increased value, increased time from the ATUS hours is his transition from separating from the labor market.

Q. Right. But do you have any evidence that between 2033 and 2034, his diagnosis, the household services he needed because of his diagnosis would have changed?

A. Well, this isn't the household services because his diagnosis more so, this is more so because of his

diagnosis, now he can't perform at the same level of household production, so there's going to be a diminishment in household services. There's a loss in production, not a consequence of his diagnosis that he's going to incur hours, he's going to lose hours.

Q. I thought you were suggesting that when he retires, he will have more time at home to perform those services; is that correct?

A. Holding at bay illness or any events --

Q. Yes.

A. -- that the pattern we see from the American Time Use Survey is working individuals tend to spend, with no dependent kids, tend to spend 13 hours per week in household production. That same individual upon a retirement from the labor force goes up to 22 hours, for a male goes up to 22 hours per week.

Now, he has been diagnosed, now what we're talking about is if his

diagnosis, that's what this column represents, if his diagnosis completely forces his withdraw from household production, he's out 22 hours per week of household production.

Q. Just to be clear, you've used this as the year between 2033 and 2034 -- strike that.

Are you suggesting that he will retire because of his diagnosis in 2033?

A. No, so for Mr. Keller, I don't have a lost earning capacity --

Q. Right.

A. -- but still to get the right hours of household production using the American Time Use Survey, we still need to have a work-life period for him, that his work-life period would have been to his age 67, which creates that transition in household production, so from his medical diagnosis now, if one assumes he can't do any household services, when he turns 67, he would have done more household, in the

pre-diagnosis world, he would have been expected to do 22 hours per week of household services as he retired. When he was working, 13 hours, when he's retired, it moves up to 22. Now, in his diagnosis world, we kind of have to see where the trier of fact lands. If the trier of fact determines because of his diagnosis and his -- the evidence received at trial, he can't do anything, then it would be the $21,000 rounded, because he can't do any of the complement of household services a retiree would be expected to perform.

Q. Got it. As you sit here though, you're not aware of any particular household services Mr. Keller could perform prior to his diagnosis; is that correct?

A. Any specific one that he could perform?

Q. Yes.

A. I don't recall from his deposition.

Q. Okay.

A. So, as I sit here, I don't

recall a specific what he said he used to do, I don't recall.

Q. And you did not evaluate or put in your report anywhere any particular household services that he was unable to perform after his diagnosis, correct?

A. Correct. My recollection, similar to the others, was with Mr. Keller that he talks about fatigue, that would be the big one, lack of energy. Those are the ones I recall, but I don't think there were specific elements that were Q and Aed in his deposition.

Q. Did you review the deposition testimony of Mr. Keller?

A. Yes.

Q. Did you review the testimony of Mrs. Keller?

A. I don't believe so.

Q. Are you familiar or aware that Mrs. Keller works as a caregiver for her sister who lived -- lives with Mr. and Mrs. Keller?

A. I don't know if I knew that.

Q. Okay. Fair to say then that you did not consider any kind of hourly wage rate that Mrs. Keller is paid as a caretaker when you were performing your evaluation of personal care that she has been providing to Mr. Keller; is that correct?

A. Personal care, correct.

Q. Is it fair to say you don't know how many hours Mrs. Keller spent as a personal care aide to her sister; is that correct?

A. Oh, I don't know.

Q. Okay. Converse to that, if you don't know the amount of hours that Mrs. Keller spent as a personal aide to her sister, you would agree with me though that how many hours she spent as a personal aide to her sister would impact the number of hours she would be a personal care aide to her husband, correct?

A. No, for that question to be correct, you're assuming that she would be giving 168 hours of care, some full

capacity level of care to her sister. If her sister getting some care of some increment that's 20 to 30 hours a week, that wouldn't impact the care hours to Mr. Keller.

Q. What information or data do you have to assume that Mrs. Keller has been providing medical or personal care to Mr. Keller each and every year up through 2025?

A. It would have come from -- from my recollection of what was discussed in Mr. Keller's deposition.

Q. Okay. Are you aware of Mr. Keller's -- well, let me back up. Are you aware that Mr. Keller completed his treatment for NHL in June 1998?

A. I believe I recall that.

Q. Oh, that's not it, I'm sorry. This is 37.

- - - - -

(Providence St. Mary Medical Center Record for Keller Bates 01501__KELLER__0000000143 to 152

marked Staller Exhibit 37 for identification.)

- - - - -

BY MR. CROMWELL:

Q. Mr. Staller, I've handed you what we've marked as Exhibit 37. This is a medical record for Mr. Keller Bates labeled 01501__KELLER__143 through 152; is that correct?

A. Yes.

Q. And if you would, we're going to look at the last page, 152, starting there with an entry from St. Mary Regional Cancer Center dated February 17, 1999. It's on the very back page.

A. Oh, the last page?

Q. Yup. The history box notes that he, being Mr. Keller, "is active and feeling well. He is working 70 hours a week. He is traveling mostly when he works."

First off, did I read that correctly?

A. Yes.

Q. Were you aware that by February 1999, Mr. Keller reported to his oncologist that he resumed working 70 hours a week and traveling?

A. No.

Q. If you look at Exhibit 37, Bates number 147, this is an entry from the St. Mary Regional Cancer Center dated April 20, 2001 for Mr. Keller. Under the history, it states, "He is doing great. He is traveling less. The pain in his feet is mostly gone. He walked for hours and hours throughout Amsterdam without any difficulty."

First of all, did I read that correctly?

A. What page are you on, I don't --

Q. I'm sorry, 147.

A. Oh. I see that, yes.

Q. Okay.

A. You read that correctly.

Q. Were you aware prior to today that in April 2001, Mr. Keller reported to

his oncologist that he was able to walk for hours and hours through Amsterdam without any difficulty?

A. No.

Q. If you would look at Bates number 145, there's a medical record entry from St. Mary Regional Cancer Center from July 25, 2003 for Mr. Keller. And there's a box entitled, "Chief Complaint." Do you see where I'm looking?

A. Yes.

Q. There's a highlighted portion that says, "Scott returns to the clinic for follow up following recent travel to Asia and Africa. His activity and energy level are excellent."

First off, did I read that correctly?

A. Yes.

Q. Are you aware that in July 2003, Mr. Keller reported to his oncologist team that his activity and energy level were excellent and had recently traveled to Asia and Africa?

A. I was not aware of that.
Q. What information do you have about whether Mr. Keller's medical condition impaired his ability to engage in household services in the 2000s?
A. It would have been his deposition testimony.
Q. Okay. Does the fact that any of these comments from Mr. Keller himself to his treating oncologist indicate to you that Mr. Keller would not have been in need of household service assistance?
MR. RUZICKA: Objection, form.
THE WITNESS: From his highlighted portions, it would appear that he has general functionality. Again, I haven't seen every medical record, but from the red highlighted portions of these ten pages, it appears that he was able to maintain work and have general functionality.
BY MR. CROMWELL:
Q. Would it be fair to conclude

then that he also would be able to -- if able to perform these functions, he would also be able to perform household services?

MR. RUZICKA: Objection, form.

THE WITNESS: From the highlighted sections, again, I don't have every medical record for Mr. Keller, but from the highlighted section, it sounds like he's working and traveling in the early 2000s.

BY MR. CROMWELL:

Q. Okay. I understand what you're saying, not necessarily my question though, I'm asking based off of his ability to travel and work and his energy level, as noted by himself to his doctors, would you agree that it seems unlikely that he would need household services or personal -- household services?

MR. RUZICKA: Objection, form.

BY MR. CROMWELL:

Q. Or was unable to perform household services?

MR. RUZICKA: Objection, form.
THE WITNESS: From these ten pages, it would suggest that he was working fully, which would allow him to do household services. Again, I haven't seen every medical record, but from these ten pages.
BY MR. CROMWELL:
Q. Understood. I understand. In your report, are you using average hourly wage rates of home health aides for each year up through 2025?
A. In Table B?
Q. Yes.
A. Yes.
Q. Okay. Okay. If we can go back to your omnibus report, I want to look at just for a moment Mr. Carter. Would you agree with me that Mr. Carter was diagnosed with NHL in 2011; is that correct?
A. Yes.
Q. And he was 62 years of age at the time?

A. Yes.
Q. And Mr. Carter passed away in 2022 at 73 years of age; is that right?
A. Yes.
Q. Now, you valued Mr. Carter's past lost household services from November 23, 2011, through December 31, 2025; is that right?
A. Yes.
Q. And, similarly, you valued Mr. Carter's future lost household services from January 1, 2026, to his healthy life expectancy in the year 2030; is that right?
A. Yes.
Q. And consistent with your approach for lost household services for other Plaintiffs, you utilized the average hourly wage for representative occupations; is that correct?
A. Yes.
Q. And you agree with me, you did not evaluate or make any determination as to what, if any, household services Mr. Carter was performing before his

diagnosis in 2011; is that right?

A. Before his diagnosis, not a specific inquiry, true.

Q. Okay. And you did not determine -- or sorry, you did not evaluate or determine what, if any, household services Mr. Carter could not perform after his diagnosis; is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: So for Mr. Carter, unfortunately, he passed in '22, so it would have been what was examined in Mrs. Carter's deposition, I don't recall the specifics, what she described, not off the top of my head.

BY MR. CROMWELL:

Q. Okay. You opine though that Mr. Carter's spouse took care of him from the date of his diagnosis through his passing; is that correct?

A. Yes, for home care, yes.

Q. What information are you

relying upon to conclude that Mr. Carter's spouse took care of him from his diagnosis on November 23, 2011?

A. To my recollection, it would have come from Mrs. Carter's deposition.

Q. And what kind of services do you understand from her deposition that she provided to him?

A. My recollection would have been general home health aide care post-diagnosis, which would be assisting him after therapies and treatments, assisting him as needed as he was fatigued, couldn't perform general household -- generally activities of daily living.

Q. Do you cite specifically in this report what testimony you're relying upon to suggest the specific services that she was providing?

A. No, I don't think I provide a specific summary of those services.

Q. Just to refresh your recollection, do you know if she -- well, I guess, how do you know what services she

was providing to Mr. Carter that she was already not providing to him before his diagnosis?

A. I don't recall her specific testimony, I would have to look at it to see if she -- if that was asked and explained in her testimony, I don't recall.

Q. Let's look at Mr. Criswell. Mr. Criswell was diagnosed with bladder cancer in 1997; is that correct?

A. Yes.

Q. And you did not originally prepare a report for Mr. Criswell in February 2025; is that right?

A. Agreed.

Q. Can you tell me what new information, if any, resulted in you preparing a report for Mr. Criswell aside from conversations you've had with counsel?

A. No.

Q. Okay. You value Mr. Criswell's lost past household services from October 1997 through December 31, 2025; is that right?

A. Yes.
Q. And you value Mr. Criswell's lost future household services from January 1, 2026, to his healthy life expectancy in 2036; is that right?
A. Yes.
Q. Have you made any determination as to what particular services Mr. Criswell was performing prior to his diagnosis in 1997?
A. Prior to specific ones, no.
Q. Did you make any kind of determination as to what specific household services Mr. Criswell was unable to perform after his diagnosis in 1997?
A. It would have been similar to the other Plaintiffs, as described as from his Q and A in his deposition.
Q. Okay. Do you cite anywhere in your report the specific services that he was unable to perform after his diagnosis in 1997?
A. I don't think I enumerate specific items.

Q. Okay. You're aware Mr. Criswell was a PE teacher for middle schoolers through 2004; is that correct?

A. That is my recollection of his occupation at that time.

Q. In particular, for the time period between 1997 and 2004, do you have any idea what kind of household services Mr. Criswell was unable to perform as he worked as a PE teacher?

A. Not off of the top of my head, no.

Q. You value Mr. Criswell's future lost -- well, never mind.

For Mr. Criswell, you -- the statistical data you presented for him and other Plaintiffs has household services for men and you list some hours and just so I can direct you, it's page 3 of your omnibus report. Under Section III, you refer to data from the 2023 American Time Use Survey; is that correct?

A. Yes.

Q. In your footnote, you refer

to the 2021 American Time Use Survey. I'm just trying to understand if the data in Table A is from 2023 or 2021?

A. 2023, the footnote just happened to be updated to say 2023.

Q. Understood. For Mr. Criswell, can you tell me which hours per week rate you're using for your opinions with regards to his household services.

A. So on page 19, it's just one hour per week --

Q. Right.

A. -- so Table A says on page 20, it's going to always be -- well, it changed a little bit, it starts out at 21.98 hours and then it drops down to the 20 hours rounded at 75.

Q. And where does that change, between 2030 and 2031?

A. Yes, you see the drop more precipitously besides just discounting, you see it go down by $2,000.

Q. Did you review -- sorry, in reviewing materials in this case, did you

review the deposition of Mr. Criswell's wife, Deana Criswell?

A. I don't believe I did.

Q. Okay. If Ms. Criswell testified that Mr. Criswell as a form of household services -- well, it's a terrible question.

I'm going to hand you deposition testimony of Ms. Deana Criswell dated August 6, 2024. This is what we've marked as Exhibit 38; is that correct?

A. Yes.

- - - - -

(Deposition Transcript of Deana Criswell taken 8/6/24 marked Staller Exhibit 38 for identification.)

- - - - -

BY MR. CROMWELL:

Q. And it's your testimony you've never seen this testimony before?

A. That's my testimony.

Q. Okay. If you would turn to page 59 which is page 16 of the document,

deposition page 59. And on line 4, there's a question, "Okay. In terms of family household responsibilities, could you describe who contributes to those responsibilities?

"ANSWER: Mike puts up the dishwasher. I do everything else."

Nine, "QUESTION: Okay. And has that always been the case?

"ANSWER: Well, yes. He has never been one to -- I mean, once in a while, he would've helped me cut grass, but he definitely wouldn't have helped me weed or pull the weeds. He just didn't like to do that."

First of all, did I read that testimony correctly?

A. Yes.

Q. You understand that Mr. Criswell -- or according to Mrs. Criswell, Mr. Criswell helped put up the dishes and would once in a while cut the grass, but she did everything else around the house?

MR. RUZICKA: Objection, form.

THE WITNESS: Can I hear the question again, please?

BY MR. CROMWELL:

Q. Sure. Can you repeat the question, please?

- - - - -

(Whereupon, the reporter read back as requested.)

- - - - -

THE WITNESS: That appears to be a summary from what she testified to on page 59.

BY MR. CROMWELL:

Q. Okay. She also testifies that that has always been the case, correct?

MR. RUZICKA: Objection, form.

THE WITNESS: Yes.

BY MR. CROMWELL:

Q. Did you make any kind of evaluation as to what Mr. Criswell could or could not do in 1997 as regards to household services?

A. No.

Q. All right. Let's talk about Mr. Cometto Davis. Mr. Davis was diagnosed with NHL in 2021; is that correct?

A. Yes.

Q. And you valued Mr. Davis's lost past household services from November 17, 2021, through December 31, 2025; is that correct?

A. Yes.

Q. And you valued Mr. Davis's lost future household services from January 1, 2026, to his healthy life expectancy in 2038; is that correct?

A. Yes.

Q. And, again, consistent with your approach in other -- with other Plaintiffs, you utilized the average hourly wage for representative occupations; is that right?

A. Yes.

Q. You would agree that you did not evaluate or determine what, if any, household services Mr. Davis was performing before his NHL diagnosis; is that correct?

A. True.
Q. And, similarly, you did not evaluate or determine what, if any, household services Mr. Davis was unable to perform because of his diagnosis; is that correct?
A. True.
Q. Are you aware that Mr. Davis completed his NHL treatment in June of 2022?
A. I don't know if I knew that.
Q. Okay. Did you see any medical record with regards to Mr. Davis presenting with symptoms of neuropathy as early as 2005?
A. I don't think I saw those medical records.
Q. Okay. Do you know one way or the other whether Mr. Davis tested positive for genetic neuropathy entitled, "hereditary neuropathy with liability to pressure palsy" or HNPP?
A. I'm not aware of that diagnosis.

Q. Okay. Assuming those things were true, would the fact that Mr. Davis had -- having hereditary neuropathy, could that have impacted his ability to perform household services well before his NHL diagnosis?

A. Possibly.

Q. Did you consider the fact that Mr. Davis may have had other medical conditions that impacted his ability to perform household services?

A. Yes.

Q. You did?

A. Yes.

Q. What did you consider when determining whether there were other issues that impacted his ability to perform household services?

A. Partly, one of the very reasons I present my tables on a one hour per week, because that allows the trier of fact to determine how many hours are lost to the medical diagnosis and residual effects of that diagnosis in this case. So

again, for example, a working person is 13 hours per week. If, let's say, the underlying health conditions, this neuropathy, for example, limited him to seven hours, that he could do some, let's say seven hours remaining, but then his NHL took that remaining portion of seven hours and brought it to zero, then he's lost out because of the NHL diagnosis of seven hours per week, which is the tool of the one hour per week. If the court as the trier of fact determines that the NHL limited him to a loss of three hours per week, then they multiply the one hour per week column by three. So the one hour per week is a fantastic tool for the very purpose, which you're suggesting is a marginal loss analysis, because of the specific ailment, so it gives the tool the resources -- the court the resources to do that calculation.

Q. Okay. And that would be true for each of the Plaintiffs you're offering an opinion on; is that correct, for household services?

A. For household services, correct. There's always one hour per week, which allows the court the tool to come to a specific number because of the specific medical issue at issue in this case for the respective Plaintiff that with any underlying health condition, the court has been instructed from my reports, I imagine my testimony, here's the average for this cohort group, working person, retired person, male, female, and then they'll have that as a guidepost of the hours per week collectively and then they're able to start to cut and mend to the right hours because of this specific ailment and residual effects.

Q. Okay. So it's fair to say that you're not offering an opinion about whether there's other medical conditions that are or are not impacting a Plaintiff's ability to perform household services, correct?

MR. RUZICKA: Objection, form.

THE WITNESS: True.

BY MR. CROMWELL:

Q. Okay. All right. I think the last one in this report is Mr. Fancher. Mr. Fancher was diagnosed with kidney cancer in 1997; is that correct?

A. Yes.

Q. And, again, you did not issue a report for Mr. Fancher in February of 2025; is that right?

A. I did not.

Q. Outside of conversations with counsel, what additional information did you receive that led you to preparing a report in October of '25?

A. It would have been conversations with counsel.

Q. All right. Okay. If you look at page 8, do you see your section entitled David Fancher. You state or opine that Mr. Fancher's spouse took care of him from the date of diagnosis on December 12, 1997; is that correct?

A. Yes.

Q. And you valued these services

from the date of diagnosis through December 31, 2025; is that right?

A. Yes.

Q. What are you basing your statement on to say that Mr. Fancher's spouse took care of him since his diagnosis on December 12, 1997?

A. I believe that was coming from representations from counsel.

Q. Did you do anything to verify those representations to you provided by counsel?

A. I don't recall.

Q. Did you make any kind of determination as to what services Mrs. Fancher provided to Mr. Fancher because of his diagnosis?

A. No.

Q. Did you look at any of the available information or testimony to evaluate or determine what services Mr. Fancher required from Mrs. Fancher?

A. No.

Q. Did you review Mr. Fancher's

testimony in this case?

A. I did not.

Q. You have testified and indicated in other places that you have reviewed the Plaintiff's deposition testimony; is that correct?

A. Yes.

Q. Do you recall -- do you know -- can you explain why you did not review Mr. Fancher's testimony in this case?

A. No.

Q. This is going to be 39. Again, my apologies, I have one copy of this.

Mr. Staller, I've handed you what we've marked as Exhibit 39. This is the deposition testimony of David William Fancher dated January 22, 2024; is that correct?

A. Yes.

Q. Okay.

A. January 22?

Q. Yes.

A. Yes.

- - - - -

(Deposition Transcript of David William Fancher dated 1/22/24 marked Staller Exhibit 39 for identification.)

- - - - -

BY MR. CROMWELL:

Q. Okay. And if you would turn to page 108 of the deposition testimony, which is PDF page 28. And if you look at page 108 and we'll read through 109, there's a question on line 20 of 108 and it starts, "Okay. What do you do in your free time? Do you watch TV, read books, go for walks?

"ANSWER: I go for walks when I can, when the weather permits and my physical health is well enough that I can do it. And I do watch YouTube. I'm a YouTube school of college. And I take care of my wife. She's essentially at the point in her life and her physical condition that she can no longer walk. So I'm her

caretaker now.

"QUESTION: What kind of care do you provide your wife?

"ANSWER: Everywhere that she needs to go, every doctor's appointment she needs to go to. I drive her to those. I make meals, do the dishes, you know, make sure the house doesn't get too messy, you know, do laundry which I like to do. Not the laundry part, but the folding part."

First of all, did I read that correctly?

A. Yes.

Q. You would agree that according to Mr. Fancher's own testimony, that he was his wife's caregiver; is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: As of January 2024, yes.

BY MR. CROMWELL:

Q. Okay. Is it reasonable to assume that to the extent he was his wife's caregiver that she in turn was not his

caregiver?

A. That is probably a reasonable assumption as of January 2024.

Q. Okay. And to the extent that he was her caregiver, rather than her being his caregiver, you would agree that you would not have a calculation for a lost household services, whenever that may have occurred?

MR. RUZICKA: Objection, form.

THE WITNESS: From the time he became her caregiver, that's probably within reason.

BY MR. CROMWELL:

Q. Okay. Did you make any kind of determination as to what Mr. Fancher was unable to do for himself after his diagnosis as far as household services?

A. Not specific elements, no.

Q. You understand Mr. Fancher was diagnosed with kidney cancer in 1997; is that right?

A. Yes.

Q. If you would, turn to page 69

of Mr. Fancher's deposition testimony, which is on PDF page 18.

And starting on line 20 of page 69, the question is, "Okay. Were you able to work until retirement, um -- were you able to work until retirement? Were you -- I guess, did you have severe symptoms or impaired from working until your retirement date?

"ANSWER: I could still work, yeah."

If you turn to the next page, "QUESTION: Did you have to reduce your hours prior to retiring.

"ANSWER: No."

First of all, did I read that correctly?

A. Yes.

Q. You understand that, according to Mr. Fancher's own testimony, he did not retire until 2019; is that correct?

A. True.

Q. And would you agree that he

did not have to reduce his hours prior to retiring due to his illness according to his own testimony?

A. True.

Q. Okay. I think we are done with your omnibus report for the moment.

If you would get out Exhibit 14, which we marked as your Gary McElhiney report.

You'd agree, Mr. Staller, Mr. McElhiney was diagnosed with Parkinson's disease in July of 2018 at the age of 63; is that right?

A. Yes.

Q. And you valued his lost earning capacity at $288,000 -- $288,361; is that correct, based off your Table 1 on page 7?

A. Yes.

Q. Okay. And did you start calculating lost earning capacity in 2015; is that right?

A. Yes.

Q. You are aware, because you

noted in your report, that Mr. McElhiney retired in 2016; is that correct?

A. Yes.

Q. And is the basis for including 2015, does this have to do with symptoms Mr. McElhiney was experiencing that you attribute to his Parkinson's disease?

A. That's what he testified to, yes.

Q. Okay. Are you aware in June 2016, Mr. McElhiney applied for Social Security Disability benefits?

A. I don't recall if I knew that.

Q. Okay. This is 39 -- this is 40, I apologize. This is 40. Mr. Staller, what we have handed and marked as Exhibit 40 is a Disability Report Form SSA-3368, Bates labeled 01368__MCELHINEY__SSA__0000000034 through 39; is that correct?

A. Yes.

- - - - -

(Disability Report Form SSA-3368, Bates labeled 01368__MCELHINEY__SSA__0000000034 through 39 marked Staller Exhibit 40 for identification.)

- - - - -

BY MR. CROMWELL:

Q. Have you ever seen this document before?

A. No.

Q. If you would look at the page ending in Bates number 38, please. No, I don't know why I said that, 35. And there's a Section 3 in the middle of the page titled, "Medical Conditions." And it says, "List all the physical or mental conditions (including emotional or learning problems) that limit your ability to work. If you have cancer, please indicate the stage and type. List each condition separately."

First of all, did I read that correctly?

A. Yes.

Q. And you understand that Mr. McElhiney goes on to list paralysis of fifth cranial nerve, eczema, knee condition, tinnitus, paralysis of sciatic nerve right side, paralysis of sciatica nerve left side, and intervertebral disc syndrome.

First of all, did I read that correctly?

A. Yes.

Q. You understand that these are the conditions that Mr. McElhiney listed in his disability form in June 2016?

A. Yes.

Q. You mentioned deposition testimony that you referred to as being symptoms related to his Parkinson's disease. Are these the same conditions that you're referring to that he testified about?

A. I would have to look at his deposition to see if they're the same. I don't recall off the top of my head.

Q. Okay. Either way, would you

agree that Parkinson's disease is not presented or listed on this disability form?

A. Under 3A, there is no mention of Parkinson's.

Q. Okay. And you've concluded though that he was forced to separate due to symptoms related to his Parkinson's disease; is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: I don't know if I made that conclusion or reading that from his deposition testimony on pages 137 and 138.

BY MR. CROMWELL:

Q. What evidence are you relying upon to determine that his particular symptoms that he's identifying here were related to his Parkinson's disease?

A. I don't know if I made any interpretation of the record I was just presented with today. My basis for starting the calculation of lost earnings for Mr. McElhiney is based upon his

deposition on pages 137 and 138.

Q. Did you do anything besides reading his deposition testimony to investigate how long Mr. McElhiney had been suffering from the particular conditions that we listed and identified in Exhibit 40?

A. Forty, no, I wasn't aware of those conditions --

Q. Okay.

A. -- for my report.

Q. Were you aware that Mr. McElhiney was approved for Social Security benefits in September of 2016?

A. I don't know if I knew that at the time of my report.

Q. Okay. Hypothetically, if these conditions are unrelated to his Parkinson's disease, you would agree with me that Mr. McElhiney retired in 2016 prior to his Parkinson's disease diagnosis in 2018?

MR. RUZICKA: Objection, form.

THE WITNESS: So from a

chronology standpoint, right, if he withdrew from the labor market in '16 and then his formal diagnosis of Parkinson's would have been in '18, I agree with that chronology, yes.

BY MR. CROMWELL:

Q. And, again, hypothetically, if that were true, you would not have concluded that he was entitled to lost earning capacity damages; is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: From '16 or from --

BY MR. CROMWELL:

Q. Well, he would have been out of the labor market in 2016, correct, so based off the fact if he had retired in 2016, you would not have concluded that he was entitled to lost earning capacity damages, correct, if, hypothetically, those conditions were unrelated to his Parkinson's disease?

MR. RUZICKA: Objection, form.

THE WITNESS: Right, I think we would have to learn more of that hypothetical or flesh it out that if he's unable to work for conditions unrelated to Parkinson's, and he already withdrew from the labor market, in that hypothetical, that would be true if he has no conditions as set forth in McElhiney starting on Bates 35, but also had Parkinson's and symptoms of Parkinson's, then I think there would be a question for the trier of fact to ascertain what's keeping him out of -- or as of sixteen four, what's keeping him out of the labor market, symptoms associated with Parkinson's or these other symptoms, so that would be a question of fact.

BY MR. CROMWELL:

Q. No, I understand. Just in this hypothetical, if we assume for purposes of this hypothetical that the

medical conditions listed in Exhibit 40 are found to be unrelated to his Parkinson's disease, you would agree with me that you would not have concluded that he was entitled to lost earning capacity damages, correct?

MR. RUZICKA: Form, objection to form.

THE WITNESS: If only these elements from McElhiney 35 existed?

BY MR. CROMWELL:

Q. For purposes of this hypothetical, yes.

A. Sure, that hypothetical, if it's just the elements from question 3A and there's no mention of Parkinson's in '15 or '16 or underlying factors associated with Parkinson's, then yes, correct, then there would be no earning capacity associated with subsequent diagnosis.

Q. Okay.

A. Well, that would depend though, because to the extent that I think, as we saw with Mrs. Amsler, or Social

Security is a moving target meaning, people do recover and they kind of reenter the labor force, so the extent that elements one through seven were mitigated in a sufficient fashion, that would allow him to reenter the labor force and then the Parkinson's, unfortunately, takes him out permanently, that's another scenario that could be played out, and I just don't have enough information to. But these items in 3A, one through seven themselves, do not suggest lifetime loss of earning capacity, just as presented in this document.

Q. No, I understand, but you're presuming that the conditions that he was experiencing in 2016 were related to his Parkinson's disease; is that correct?

MR. RUZICKA: Objection, form.

THE WITNESS: I'm assuming that the symptoms and physical effects were associated with Parkinson's and those physical effects from Parkinson's forced him to stop being a truck driver.

BY MR. CROMWELL:

Q. Okay. Your report for Mr. McElhiney presents a value of loss of household services from July 10, 2018, through December 31, 2025; is that correct?

A. Yes.

Q. And you value Mr. McElhiney's average hourly wage for representative occupations in the state of Tennessee, which you valued at $15.59 in 2024?

A. Yes.

Q. Table B on page 4 of your McElhiney report, this, this includes data from the ATUS, right?

A. Yes.

Q. And, again, this data does not apply exclusively to someone diagnosed, for instance, with Parkinson's disease; is that correct?

A. True.

Q. It applies to all men who were of Mr. McElhiney's age and retired; is that right?

A. Yes.

Q. What, if anything, did you do to evaluate and determine the household services performed by Mr. McElhiney prior to his Parkinson's disease diagnosis?

MR. RUZICKA: Objection, form.

THE WITNESS: I don't know if I had information prior to his Parkinson's diagnosis in '16.

BY MR. CROMWELL:

Q. Given that, would you agree with me that you would not be able to compare what Mr. McElhiney did or did not perform after his diagnosis and compare it to what he did prior to his diagnosis?

MR. RUZICKA: Objection, form.

THE WITNESS: Agreed, and kind of as we've talked about, that's exactly why we do the one hour, because that marginal loss isn't required when you have a one hour, it's learning about his limitations with the Parkinson's and then ascribing an hourly value to that diminished ability because of that

disease.

BY MR. CROMWELL:

Q. Okay. You prepared a value of future medical care for Mr. McElhiney; is that right?

A. Yes.

Q. And you've based this upon the report of Kay Hairston; is that right?

A. Yes.

Q. Okay. And have you evaluated Ms. Hairston's deposition in this case?

A. I don't know, I didn't know it was taken, no.

Q. Okay. I guess the answer to that question is no?

A. Correct.

Q. Okay. Are you aware of Mr. McElhiney receiving deep brain stimulation to treat his Parkinson's disease?

A. No, I wasn't aware of that, no.

Q. Okay. Do you know whether such treatment would change his future care needs?

A. I don't know.
Q. Okay. Hypothetically, if it does, would you agree that you would also need to change the values that you've currently calculated for his future medical care?
A. Yes, I don't know how it changed Table 3, but to the extent it creates changes, adds, subtractions, yes, I would need to see how that plays out with her plan.
Q. All right. Let's look at Mr. Mousser, this is previously marked as Exhibit 15. All right. Mr. Mousser was diagnosed with kidney cancer in September of 2020; is that right?
A. Yes.
Q. And you have under life expectancy -- and this is on -- oh, sorry, on page 3 of your Mousser report, you have a section entitled, "Worklife and Life Expectancy;" is that correct?
A. Yes.
Q. You have offered two

different work-life expectancy estimates for Mr. Mousser; is that correct?

A. Yes.

Q. Would you agree with me that this is the only case in which you have done that in any of the Plaintiffs that you're offering opinions for?

A. Yes.

Q. Okay. Can you tell me which estimate is the accurate estimate or the one that you're relying upon for your calculations?

A. Accurate, accuracy would have to be determined by the trier of fact. The difference between the two I can state and I can explain the differences. The first, 65.6.6 is a statistical work-life expectancy based upon the same tables we've talked about several times from the Journal of Forensic Economics. The one to 67 is Mr. Mousser's Social Security normal retirement age based upon the Social Security Administration.

With regard to the 1.4 year

difference and staying active in the labor force, that would have to be ultimately selected by the trier of fact based upon their court's selection for how long they think Mr. Mousser would have stayed in the labor force.

Q. As you sit here now, you don't have an opinion whether Mr. Mousser would have stayed in the labor force until 67 as opposed to 55.6 years of age?

A. No, because that's ultimately a determination of which data point the court finds to be more appropriate. I would just say the 65.6, again, is statistical data published in the Journal of Forensic Economics used in other cases. 67 does consider his Social Security retirement age, which, again, is 1.4 years additional years, so it just becomes a question then what he wanted, did he have incentive to continue in those working years to get a normal retirement age which increases your normal retirement benefit.

Q. Why the two different

work-life estimates in this case?

A. To my recollection, the other Plaintiffs, one, we did earnings for the two that are deceased, and then I would have to look at the other ages of how they associate with age 67. You know, sometimes if they're well below 67, I'll throw in a second estimate for the trier of fact's consideration. 1.4 years, it's not so much lower. It might have just been that he was slightly younger than some of the other Plaintiffs.

Q. Okay. Any other reasons?

A. For the inclusion that would have probably been the reason for the inclusion of the second work-life estimate.

Q. Did you review Mr. Mousser's testimony in this case?

A. Yes. Mr.'s?

Q. Mister.

A. Mister, yes.

Q. Do you recall Mr. Mousser's testimony that he only planned on working until he was 65 years old?

A. I don't recall that specific testimony.

Q. If he did testify to that, would you not -- would you rely upon that number rather than work-life expectancy calculations that you have in Section IV?

A. If there was his testimony, I think that's a great example of the statistical work-life coinciding with his stated intentions. If he said 65, then statistical work-life of 65.6, so to me, that seems to coincide perfectly. If this was his stated intention, that's a good example of where an intention matches the statistical data.

Q. So is that yes, you would rely upon his testimony or you wouldn't?

A. To me, if that's his testimony, I would just describe to the trier of fact that's a great example of an illustration of where testimony is coinciding with the statistical data, as I just mentioned. That wouldn't cause me to do an earlier calculation of a half year, a

little over a year, I would keep with my statistical work-life table.

Q. So you've got 65.6, but what about compared to him being 67 years old, if he's saying he would retire at 65, would you agree you wouldn't use 67 as the year that his work-life would be over?

MR. RUZICKA: Objection, form.

THE WITNESS: So I would have to get reacquainted with his deposition testimony. Is that him talking in 2024 or is that him through the lens when he's diagnosed in 2020? Because what we're measuring is work-life from 2020, the date of diagnosis, not the date of deposition testimony. So I would have to kind of read and get reoriented with his testimony of the context in which he's talking about 65. Is he talking about it now when he's 61 years of age? Hey, I only wanted to work one or two more years, as he sits

there as a 61-year-old or back when he's diagnosed at 57, was he talking about that lens, which is the whole reason when we're doing these models, we're projecting from date of diagnosis, what the but-for world would have been from his diagnosis, not from another arbitrary date of deposition or Answers to Interrogatories, or some other random date.

BY MR. CROMWELL:

Q. Okay. You have opined that Mr. Mousser's statistical life expectancy is to the age of 85.8 in the year 2049; is that correct?

A. Yes.

Q. And then you've noted that due to Mr. Mousser's current prognosis, he's expected to have a reduced life expectancy; is that correct?

A. Yes.

Q. And you're basing this upon the information you have from Mr. Fryar

regarding Mr. Mousser; is that right?
A. Yes.
Q. And is this the life expectancy that you're using to make your -- to formulate your opinions in this case?
A. The 75.
Q. Okay. In your report, you opine that Mr. Mousser was forced to retire from Mercer Motor Company in October of 2023; is that right?
A. Yes.
Q. What do you mean by, "forced to retire"?
A. That was described by Mr. Mousser in his deposition.
Q. When you say, it was discussed in his deposition, are you referring to footnote -- what footnote are you referring to here?
A. Six.
Q. Page 288? You know what, this is the one that didn't print, this is 287?

A. Darn.
Q. Do you -- I'm going to do something I don't usually endorse is maybe just show you his deposition testimony.
But as you sit here, do you recall what specifically Mr. Mousser testified to -- or strike that.
Is it your understanding that from Mr. Mousser's testimony that he was forced to retire due to his kidney cancer diagnosis?
MR. RUZICKA: Objection, form.
THE WITNESS: Or symptoms associated with it, that's my understanding, yes.
BY MR. CROMWELL:
Q. Okay. It's all right. We'll come back to it. Did you review the deposition testimony of Mr. Mousser's treating physicians in this case?
A. I don't believe I did.
Q. Are you familiar at all with what his treating physicians, the prognosis given for Mr. Mousser was by his treating

physicians?

A. No.

Q. Okay. Would that information be relevant to your determination as to whether Mr. Mousser was forced to retire?

A. I couldn't say one way, without seeing it, one way or the other.

Q. Okay. You would agree that to estimate Mr. Mousser's earning capacity, you utilized -- you utilized his 2023 annualized earnings from Mercer Motor Company; is that right?

A. Yes.

Q. All right. Okay. We may come back to that, but we can move on from Mr. Mousser.

Let's look at Mr. Peterson. This is Exhibit 16. Mr. Staller, Mr. Peterson was diagnosed with Parkinson's disease in May 2001 at the age of 52; is that right?

A. Yes.

Q. And you have provided a value of lost household services for Mr. Peterson

from January 1, 2004, through December 31, 2025; is that correct?

A. Yes.

Q. You've noted that he was diagnosed on -- in May 2001, right?

A. Yes.

Q. Why the difference in this case of identifying January 1, 2004, rather than the date of Mr. Peterson's diagnosis?

A. For earnings and for household services, I believe, it's just when the progression of the disease became debilitating.

Q. Okay. You understand that Mr. Peterson was terminated December 31, 2003, from his job?

A. Yes.

Q. Okay. You value Mr. Peterson's average hourly wage for representative occupations in the state of Tennessee, which was $15.59 in 2024; is that right?

A. Yes.

Q. And would you agree that you

did not perform or you did not evaluate and determine what kind of household services Mr. Peterson performed prior to his Parkinson's disease diagnosis; is that right?

MR. RUZICKA: Objection, form.

THE WITNESS: Correct.

BY MR. CROMWELL:

Q. And you did not evaluate and determine what household services Mr. Peterson did or did not perform after his diagnosis; is that correct?

MR. RUZICKA: I'm sorry, objection, form.

THE WITNESS: Correct.

MR. CROMWELL: All right.

MR. RUZICKA: Can we take a quick five minutes?

MR. CROMWELL: Yeah, of course, of course.

THE VIDEOGRAPHER: We're going to go off the record at 5:26 p.m.

- - - - -

(A recess was taken at this time.)

- - - - -

THE VIDEOGRAPHER: Back on the records, the time is 5:37 p.m.

BY MR. CROMWELL:

Q. All right, Mr. Staller, we're going to look at your Rothchild report, which is Exhibit 17. Ms. Rothchild was diagnosed with Parkinson's disease in approximately 2014; is that right?

A. Yes.

Q. According to you, Ms. Rothchild began experiencing Parkinson's symptoms in 1993 or 21 years prior to her diagnosis; is that correct?

A. That's according to Ms. Rothchild and her deposition.

Q. Okay. And you've opined that Ms. Rothchild's lost earning capacity is $406,660; is that right?

A. Yes.

Q. And this is from 2009 through 2016; is that correct?

A. Yes.

Q. Okay. You wrote that she was

forced to prematurely retire in 2009; is that right?

A. Yes.

Q. And you recall that she was a school teacher; is that correct?

A. Yes.

Q. What is your understanding that she was required or forced to prematurely retire, what's your basis for that opinion?

A. Ms. Rothchild's deposition testimony.

Q. Okay. Do you recall part of the testimony where she indicated that the school itself did not make her quit, they made accommodations for her?

A. I don't recall that portion.

Q. Okay. Do you recall even after quitting that she actually still subbed as a substitute teacher for a few years?

A. She did, I believe, until 2012.

Q. Okay. Did you perform any

analysis to determine if Ms. Rothchild, Ms. Rothchild's transferable skills would have qualified her for employment in other positions at the time of her retirement in 2009?

A. No, transferable skills sounds to me like a vocational assessment. I'm not qualified to perform vocational assessments.

Q. I want to look at Mr. Sparks just for a moment. This is Exhibit 18. Do you have that in front of you, Sparks?

A. So we're done with Rothchild?

Q. Yes.

A. Okay. Sparks, yes.

Q. Okay. Mr. Sparks was diagnosed with Parkinson's disease in December of 2013 at the age of 60; is that right?

A. Yes.

Q. And you calculated Mr. Sparks lost earning capacity to be $414,970; is that right?

A. Yes.

Q. And you calculated a lost earning capacity from 2017 through 2020; is that correct?

A. Yes.

Q. And Mr. Sparks retired from his employment as a Customs and Border Protection officer on April 12, 2017; is that right?

A. True.

Q. And you have indicated that it was a premature retirement; is that right?

A. I indicate that based upon his deposition testimony, yes.

Q. So it is not based upon the DHS document you cite with regards to that statement?

A. It's kind of a string site, so it's both. It's his testimony along with the following document as set forth in footnote 3.

Q. Okay. We're marking Exhibit 41, this is a copy of the DHS document that you cite.

- - - - -

(Notification of Personnel Action Bates 00682__SPARKS__DHS__0000000003 marked Staller Exhibit 41 for identification.)

- - - - -

BY MR. CROMWELL:

Q. This is the same document you referred to in your report; is that correct?

A. Yes.

Q. Okay. And under first action box, 5-B, it says, "Nature of the Action." Do you see that?

A. 5-B.

Q. On the top left-hand side.

A. Yes.

Q. And there it identifies his retirement as voluntary; is that right?

A. Yes.

Q. Is there anything in this document that indicates that his retirement was premature or forced?

A. From this record, there's no notation that says forced retirement.

Q. Okay. And then you said it was a string cite, you said you cited to pages 74 and 75 of Mr. Sparks' deposition; is that correct?

A. Yes.

Q. I'm marking as Exhibit 70 -- I'm sorry, 42, an excerpt of Mr. Sparks' deposition from January 26, 2024. And it's simply the pages you cited. Obviously, we can produce the entire thing if you want to see it. But these are the pages you're referring to for support?

A. Yes.

- - - - -

(Excerpt of Deposition of Richard Douglas Sparks taken 1/26/25 marked Staller Exhibit 42 for identification.)

- - - - -

BY MR. CROMWELL:

Q. If you don't mind looking at the testimony and letting me know where

exactly -- what exactly you're relying upon to reach a conclusion that his retirement was premature due to his diagnosis.

A. It discusses his retirement on pages 74 and 75. I would have to take a look at page 83 of his deposition testimony too.

Q. Okay. Well, to the extent this is the information you've cited and relied upon for this particular statement in your report, you will agree with me that nothing about these particular statements say anything about Mr. Sparks having to retire due to his Parkinson's disease diagnosis; is that correct?

A. Just to be fair, right, the sentence that's cited in footnote 3, it says, "Mr. Sparks was employed by the federal government from approximately 1990 until his premature retirement on April 12, 2017."

Q. Yes.

A. So that cites to pages 74, 75, which is, I think, is an accurate

citation, then it goes on to cite, "Absent the diagnosis, Mr. Sparks had no plans on retirement from employment as he enjoyed his line of work," that's citing to footnote 4, which would be page 83. And then, so it's in conjunction with 74, 75, and 83.

Q. Understood.

A. So I think what I cited there is accurately reflected in my background section.

Q. This is page 83 of the -- his deposition, you said?

A. That talks about his no plans for retirement and that he had enjoyed his line of work with Homeland Security.

Q. Okay. All right. Still on Mr. Sparks, you have a calculation for present value here like a lot of your other reports and it is, you identified two rates, as I think we've talked about before. You have an average yield of high grade municipal bonds as of September 6, 2025, as being 4.88 percent was used to

estimate the return on the principal investment. That's consistent with what you've done in the other reports; is that correct?

A. Yes.

Q. And then you note the average yield on these bonds from 2015 to 2024, 3.36 percent per year was used to estimate the return on the reinvested interest; is that correct?

A. Yes.

Q. And you would agree with me that the percentage used for the average yield is different than what you use in your other reports, am I correct?

A. Yes, that's a 10-year rate compared to the 20-year rate.

Q. Okay. Is there -- sorry, go ahead, I didn't mean to interrupt you.

A. I was going to say, the other ones was using 20-year average rates.

Q. Okay. And what's the reason for the difference, the different uses in rates?

A. Duration, so Mr. Sparks was a little older, so he was 60 when he was diagnosed in 2013. Yes, so as of now, he's 73 this year. So just given the shorter duration of the future calculation, I used the ten-year average rate given he has -- if my calculations tend to be ten years or beyond, I take the 20-year average, if they're ten years or less, I tend to take the ten-year average.

Q. Understood. All right. Looking at Ms. Tukes just briefly, Ms. Tukes was diagnosed -- this is Exhibit 19, Ms. Tukes was diagnosed with kidney cancer in June 2010; is that correct?

A. Yes.

Q. You have prepared calculations with regards to her lost household services; is that correct?

A. Yes.

Q. What -- you would agree with me that you have not evaluated or determined what household services

Ms. Tukes was able to perform prior to her kidney cancer diagnosis in June 2010, am I correct?

MR. RUZICKA: Objection, form.

THE WITNESS: True.

BY MR. CROMWELL:

Q. And you have not evaluated or determined what household services Mrs. Tukes was able to or unable to perform after her kidney cancer diagnosis in June 2010; is that correct?

A. True.

Q. You have opined that Mrs. Tukes' husband has taken care of her since her diagnosis in June 2010; is that correct?

A. Yes.

Q. And is this based, again, off of the deposition testimony that you have been reviewing for Ms. Tukes?

A. Yes.

Q. Okay. All right. All right. Last, but not least, I'm bringing up Mr. Welch, this is Exhibit 20. Mr. Welch

was diagnosed with Parkinson's disease in November of 2021; is that right?

A. Yes.

Q. He was retired at the time?

A. Yes.

Q. And you evaluated Mr. Welch's lost household services from November 16, 2021, through December 31, 2025; is that correct?

A. Yes.

Q. And you agree with me that you did not evaluate or determine what household services Mr. Welch was able to perform prior to his Parkinson's disease diagnosis; is that correct?

MR. RUZICKA: Object to form.

THE WITNESS: True.

BY MR. CROMWELL:

Q. And you would agree that you did not evaluate or determine what household services Mr. Welch was able or unable to perform after his Parkinson's disease diagnosis; is that correct?

A. True.

MR. CROMWELL: Okay. I think I'm at my seven hours.

THE WITNESS: You're at your seven hours, a good place to stop.

MR. CROMWELL: So I will -- well, first thank you for your time, obviously, counsel may have questions for you, but I appreciate your answers and your time today.

THE WITNESS: Absolutely.

BY MR. RUZICKA:

Q. I have a few questions Mr. Staller. Thank you for your time today. I wanted to follow up on some of the questions that counsel asked you today regarding the evaluation or determinations you made regarding household services for these various Plaintiffs.

Do you recall those questions?

A. In general, yes.

Q. And in response to those questions, you were asked if you specifically made any determinations of

what specific services they were able to perform before or after their various diagnoses?

A. Yes.

Q. And, in general, did you review documents and deposition testimony that led you to the foundation of facts that established there was a loss of household services for these Plaintiffs?

A. Yes, that there was a performed household services and then there were limitations from their illnesses.

Q. And that's based, not only on their deposition testimony, but on their medical diagnoses, which in this case are life-threatening cancers and Parkinson's disease; is that true?

A. Correct, yes.

Q. And many of these Plaintiffs testified to limitations that they have as a result of their various illnesses and those limitations are what form your foundation for loss of household services or for past or present?

A. Yes, it's going to be the illness, the medical, physical conditions leading up to the diagnosis of the illness, the treatment of the illness, and then the residual effects of either the illness or the residual effects possibly of the treatment.

Q. And it's your opinion that it's not necessary to specifically determine line by line which exact service or which exact household service was not performed before or after diagnosis, like lawn mowing or doing the dishes or removing the dishes from the dishwasher?

MR. CROMWELL: Object to form.

THE WITNESS: No, that's, as we discussed with the U.S. attorneys or the Department of Justice attorneys, that's why I do the one hour a week. You don't have to do all the A minus the B, the trier of fact can just ascertain or determine what they find to be the lost hours from the

specific illness in question and multiply my one hour per week by that number they determine and that's the loss specific to the illness we're discussing.

BY MR. RUZICKA:

Q. And that's also true because the services that are performed vary at varying stages in life and various stages in the treatment that these Plaintiffs are receiving?

A. Yes, it's going to change as shown by the ATUS hours, it will change from working to retired, so the total hours one performed changes and then it's going to change in the stages of life and the stages of their medical journey.

Q. And that's why you provide your opinions as to the ranges in which those services could be evaluated at, whether it's by an hour or by using the ATUS survey average; is that true?

A. That's true.

Q. And based on your opinions,

you're providing the trier of fact to make those determinations after they hear all the evidence that comes in at trial and evaluating what percentage or what hour of loss of household use there was?

A. Correct.

Q. And is that generally true with your opinions regarding home care, the same analysis applies?

A. Yes, that's why it's one hour a week in the past for the home care for the trier of fact to listen to the evidence of what services a spouse or family member provided to the Plaintiff when they're in convalescent or getting treatment or recovering from treatment. Those will be the factual inquiry of the trier of fact.

Q. But your review of the documents that you have listed in your materials considered and in your reports including, the Plaintiffs' depositions that you did review, led you to a foundation of facts that they did have home health provided provided by spouses or family

members?

A. Services equal to that of a home health aide, yes, so, again, that's the spouse driving them to appointments, that was just discussed on a recent, one of the more recent ones, driving to appointments, caring for them after medical events, helping them recover from medical treatment, yes.

Q. So, like, for instance, do you recall Ms. Dyer's testimony about her husband having to change her stoma bags daily?

A. Generally, yes.

Q. And sometimes that can be five to six bags a day and that he would have to leave work to change those bags?

A. That's my general recollection of what he testified to.

Q. And so based on these general facts, you have a foundation of factual information that led you to the opinion that there was at least some loss of or some home care need that was provided by

other spouses or family members?
A. Some home care need based upon the records I had, yes.
Q. And a lot of these and the same with the home healthcare, a lot of these needs have changed over time depending on the treatment and outcome of the treatment for the various Plaintiffs?
A. Sure. Yeah, I imagine, hopefully, it's -- was more intense around specific treatments and, hopefully, through recovery and rehabilitation, it would taper, but there would be a less frequency, but that's why it's year by year presented for the trier of fact could say for the first five years, here's that annual figure that should be multiplied and then maybe there's nothing in the more recent years.
Q. Or, unfortunately, for the Parkinson's Plaintiffs, it may be the opposite, where it increasingly needs more care, because their tremors and body movements continue progressively to get worse requiring more home care from spouses

or loved ones in the home?

MR. CROMWELL: Object to form.

THE WITNESS: Sure, right, unfortunately, with the progression of Parkinson's, from what I understand, likely to become worse in more recent years, yes.

BY MR. RUZICKA:

Q. Kind of on a different note could home care include CNA care?

A. Yes, so HHAs, CNAs, the types of services that they each respectively, or PCAs, those are the three titles that they -- aides get for helping patients.

Q. Okay. What about RNs?

A. RN would be typically a higher rate of care providing more medical care. My understanding is CNAs, PCAs, and HHAs are technically not medical professionals. They're in the medical community, but they're not licensed as medical professionals.

Q. Okay. And going back to household services, the datasets that you

use were not criticized by the defense experts, were they?

A. No, they were not criticized.

Q. And that's also true with the home care datasets that you used?

A. The hourly rates for the home care was not criticized.

Q. Okay. And so the only criticism was a lack of specific findings of hours that were -- either missing or that were -- strike that. I don't think I have any other questions.

BY MR. CROMWELL:

Q. I just have one follow-up question with regards to household services. Are you offering an opinion to the court as to whether to use the one-hour option that you have opined on versus the ATUS rates that you have opined on or are you leaving that to the court to decide?

A. Leaving that more to the court. I use the ATUS for most of the Plaintiffs truly as guideposts of, to illustrate what the collective average we'd

expect for someone doing household production when they're working or retired, so the court is instructed, hey, we would expect it to be if they're completely disabled or in the death cases, that's the number to be using in a death case, but for these injury cases where they've had treatment and they get better or maybe get worse, use as a guidepost, but then they can work off of that to come to, as a tool to help them form their opinions with the one hour per week metric.

MR. CROMWELL: That's all I have.

MR. RUZICKA: No more. Thank you.

THE VIDEOGRAPHER: This ends today's deposition. We're going to go off the record at 6:03 p.m.

MR. VanSLYKE: Can you just put your copy order on the record?

MR. RUZICKA: A standard order.

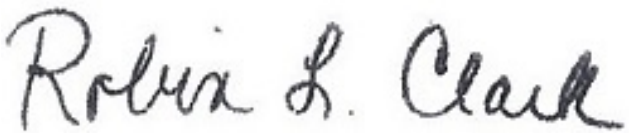
C E R T I F I C A T I O N

I HEREBY CERTIFY that the proceedings and evidence are contained fully and accurately in the stenographic notes taken by me upon the foregoing matter on March 10, 2026, and that this is a correct transcript of same.



_____

Robin L. Clark
Registered Professional Reporter

(The foregoing certification of this transcript does not apply to any reproduction of the same by any means unless under the direct control and/or supervision of the certifying reporter.)

INSTRUCTIONS TO WITNESS

Please read your deposition over carefully and make any necessary corrections. You should state the reason in the appropriate space on the errata sheet for any corrections that are made.

After doing so, please sign the errata sheet and date it.

You are signing same subject to the changes you have noted on the errata sheet, which will be attached to your deposition.

It is imperative that you return the original errata sheet to the deposing attorney within thirty (30) days of receipt of the deposition transcript by you. If you fail to do so, the deposition transcript may be deemed to be accurate and may be used in court.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

Tosic - March 5, 2026

THE VIDEOGRAPHER: We are now on the record. My name is Daniel Ortega. I'm the legal videographer for Golkow Litigation Services.

Today's date is March 5th, 2026, and the time is 9:08 a.m. This video deposition is being held at 810 Seventh Avenue, New York, New York, in the matter of Legeune Water Litigation. The deponent today is Dubravka Tosic.

All counsel will be noted on the stenographic record. The court reporter today is Lorraine Abate, and will now swear in the witness.

D U B R A V K A K. T O S I C,

Having been first duly sworn by a Notary Public of the State of New York, was examined and testified as follows:

MR. VANSLYKE: For appearances, this is Ben VanSlyke from Weitz & Luxenberg on behalf of the Plaintiffs Leadership Group.

MS. VALENTE: This is Gianna Valente on behalf of Weitz & Luxenberg for the Plaintiffs Leadership Group.

MR. KLOTZBUCHER: William Klotzbucher,

Tosic - March 5, 2026

U.S. Department of Justice for the defendant United States.

MR. TUBIN: Marcus Tubin, U.S. Department of Justice for defendant United States.

D U B R A V K A K. T O S I C,

Having been previously duly sworn was examined and testified as follows:

EXAMINATION BY MR. VANSLYKE:

Q. Good morning.

It's Ms. Tosic, correct?

A. Good morning. Yes.

Q. My name is Ben VanSlyke, and you just heard I'm here on behalf of the plaintiffs in the Camp Lejeune litigation.

Could you please state your date of birth.

A. [redacted], 1967.

Q. Thank you. And have you been deposed before?

A. Yes, I have.

Q. Could you give me an estimate of how many times.

A. In total?

Q. Yes.
A. I would say about 25 to 30 times.
Q. So you know the drill a little bit. I'll fast forward.
You understand that you're under oath, correct?
A. Correct.
Q. And you have to answer truthfully today?
A. Yes.
Q. Is there anything that you believe might interfere with your ability to testify truthfully today?
A. No.
Q. It's okay if you don't know every answer, but to the best of your ability, please answer the questions that I ask. Okay?
A. Sure.
Q. And if I ask you a question and you do not understand the question, please ask me and I will rephrase to clarify. Okay?
A. That sounds good.
Q. And we're going to be talking about your reports today, which I'm sure you know better than I do, so if at any point you think I'm misunderstanding

something, please feel free to correct me. Okay?

A. Okay.

Q. If at any point you need a break, please fell free to let me know. We can get water, stretch your legs, whatever.

I will ask that you please finish the question that is pending, but otherwise, we can take a break at any time. Okay?

A. Thank you.

Q. Throughout the deposition, you may hear counsel state objections to my questions. Unless they specifically instruct you not to answer a question, they will state their objection for the record and then you will proceed to answer. Okay?

A. Okay.

Q. How did you first learn that you were going to be deposed today?

A. I believe I received an e-mail that I was going to be deposed on this day.

Q. Have you received a notice of deposition?

A. Yes. I got a copy of it.

MR. VANSLYKE: I will enter the Plaintiffs' Notice of Deposition and Request for

Tosic - March 5, 2026

Production of Documents Dubravka Tosic as Exhibit 1.

(Exhibit 1, Plaintiffs' Notice of Deposition and Request for Production of Documents for Dubravka Tosic, marked for identification, as of this date.)

Q. Ms. Tosic, does this appear to be the notice of deposition that you received?

A. It looks like it is, yes.

Q. And I see that you're reviewing following pages. Are you aware that along with this notice, we requested copies of certain documents?

A. Yes.

Q. And are you aware that in response to those requests, we were provided with a set of invoices from BRG and a set of spreadsheets with your calculations?

A. Correct.

Q. Have you reviewed those invoices?

A. No.

Q. Are you aware that the government also provided a written response to our notice of deposition in the requests that it included?

A. No.

Q. At the back of that document, do you see attachment A?

A. I see Schedule A.

Q. Schedule A. Thank you.

A. Yes.

Q. Are those requests familiar to you?

A. Yes. I believe I reviewed this.

Q. And do you believe that you have produced the materials you have that are responsive to those requests?

A. I believe so.

MR. VANSLYKE: I will enter as Exhibit 2 the United States Responses and Objections to Plaintiffs' Notice of Deposition and Request for the Production of Documents to Dubravka Tosic.

(Exhibit 2, United States Responses and Objections to Plaintiffs' Notice of Deposition and Request for the Production of Documents to Dubravka Tosic, marked for identification, as of this date.)

Q. Feel free to take a moment to review, if you'd like. If I can spare you the remainder pages, my question here is do I understand correctly that you have not seen this document before?

A. That is correct.

Q. And you did not participate in the creation of this document; is that correct?

A. That's correct.

Q. Nothing further on that document. Thank you.

Other than reviewing your notice of deposition and the attached subpoena in Schedule A, did you do anything to prepare for today's deposition?

A. Yes, I did.

Q. Could you describe for me how you prepared for today's deposition.

A. Sure. I reviewed my expert reports and I met with counsel.

Q. And without telling me anything about what was discussed, can you tell me who you met with when you say I met with counsel.

MR. KLOTZBUCHER: I would also like to mark an objection here to reiterate going into the substance without what was discussed.

You may answer.

A. I met with Bill Klotzbucher and Michael Cromwell.

Q. And again, without telling me about anything about what was discussed, how many times did you meet with Bill and/or Michael in preparation for today's deposition?

A. I met twice.

Q. Twice. And how long was each meeting?

A. The first one, I believe was about an hour long, and the second one was about an hour and a half.

Q. And had you ever communicated with Bill or Michael before those meetings?

A. Yes.

Q. How many times?

A. Can you be a little more specific.

Q. We will get into the timeline a bit further; but is it fair to say that you have been in communication with the DOJ's attorneys for more than two years?

A. That's correct.

Q. And in those communications, were those all by e-mail or were some of them by phone or Zoom?

A. All by e-mail, over the phone, and through Teams or Zoom -- excuse me, Teams or Zoom.

Q. So fair to say all of the above?

A. All of the above.

Q. And approximately when was the first time that you recall speaking with DOJ attorneys for this case?

A. I believe it was in early 2023.

Q. In preparation for today's deposition, did you speak with any teammates or supervisors to help you prepare?

A. Yes.

Q. Could you identify who those people were.

A. I spoke with Robin Cantor and Shireen Meer.

Q. In preparation for today's deposition, did you speak with an individual named Dr. Henry Miller?

A. No, I did not.

Q. And in preparation for today's deposition, did you speak with an individual named Gregory Russo?

A. No, I did not.

Q. Do you know who both of those are?

A. Yes, I do.

Q. And when you spoke with Robin and

Shireen, what were the topics?

A. It was a very quick phone call, just about the timing of my deposition.

Q. Is it fair to say that it was more about logistics than substance?

A. Correct.

Q. Other than those two co-workers and counsel, have you spoken with anyone else to prepare for today's deposition?

A. No.

Q. Are you aware that we have deposed Dr. Miller in this litigation?

A. I'm aware that he was going to have a deposition. I don't know whether it already happened or not.

Q. Is the same true for Mr. Russo?

A. Correct.

Q. Is it safe to assume you have not spoken to either of them about their depositions?

A. Correct.

Q. Have you reviewed any other documents to prepare for today's deposition?

A. I reviewed a document online about the Federal Employee Retirement Systems' pension plan.

Q. Do you recall the title of that document?

A. It's the FERS Summary Plan Description.

Q. Are there different versions of that document based on the year?

A. I read whatever is online.

Q. Do you recall what website that was on?

A. No, I don't. I believe it was a website from the federal government. Maybe opm.gov.

Q. Are you aware that we received a Supplemental Materials Considered List on February 23rd, 2026?

A. Yes.

Q. Have any additional materials been supplied to you since that Supplemental Materials Considered List was produced?

A. No --

Q. So --

A. -- not that I'm aware of.

Q. Thank you.

Is there anything else that you've done to prepare for today's deposition?

A. I think that's about it.

Q. Okay. Can you tell me where you live

and work.

A. I live in New Jersey, and I work in New Jersey.

Q. So this is not your typical office, correct?

A. I come here once in a while, but I am aligned with the New Jersey office.

Q. It sounds like you have a preference.

A. It's an easier commute for me.

Q. And can you tell me the company that you work for.

A. Yes. I work for BRG.

Q. And just for the record, what does BRG stand for?

A. It stands for Berkeley Research Group.

Q. Throughout today's deposition, are we in agreement that BRG and Berkeley Research Group are the same thing?

A. Yes.

Q. When you produced your reports, they contained a copy of your CV as Appendix B and your list of recent testimony as Appendix C, correct?

A. Correct.

MR. VANSLYKE: I will enter as Exhibit 3

Tosic - March 5, 2026

Appendix B to Ms. Tosic's reports.

(Exhibit 3, Appendix B to Ms. Tosic's Reports, marked for identification, as of this date.)

Q. Ms. Tosic, does this appear to be the CV that you produced with your reports?

A. It does.

Q. And to the best of your knowledge, is this CV up to date?

A. Yes. The only thing that is -- that needs updating is that under Presentations, the first entry says Upcoming Panelist for Session, and that session already happened. So that's -- it's just the wording that needs to change. Other than that, everything else is the same.

Q. So remove the word upcoming?

A. That's right.

Q. Am I correct that you have not held any teaching positions, presented any lectures, published any articles, or held any positions that are not listed here?

A. Correct.

MR. KLOTZBUCHER: Objection to form.

You may answer. Sorry.

A. Correct.

Q. Thank you.

So I'll just briefly walk through this with you.

I see under Education, you have a BA in economics from the University of Maryland.

A. Correct.

Q. Do you recall what year you completed that degree?

A. Yes.

Q. Can you tell me.

A. 1989.

Q. And I see an MA in economics from Florida State University.

A. Correct.

Q. And what year was that completed?

A. 1991.

Q. And I see a Ph.D. in economics.

Does the parentheses mean a specialty in labor?

A. Correct.

Q. And that was also from Florida State University?

A. Yes.

Q. And what year was that completed?

A. '97.

Q. So looking under your Previous Positions, if I start with the earliest one listed, I see that you were a research assistant at Florida State University from 1989 to 1991.

A. Correct.

Q. And would you have been a student at that time?

A. Yes.

Q. And then I see in 1984, you were an intern/consultant at the World Bank.

A. Correct.

Q. Could you describe for me the work that you were doing in that role.

A. I was doing research and analysis in the department for Central and Eastern Europe, and the research involved reviews of the economies of several countries in Central and Eastern Europe, their labor markets, their pension -- their pensions, and culminating in some written materials, reports.

Q. Were those reports published?

A. Yes, they were.

Q. Were they published under your name or

under the World Bank's name?

A. They were published under the World Bank's name.

Q. And I'll briefly go back to the research assistant position.

Could you describe what your role was there.

A. Sure. I did -- worked on a number of research projects for professors in my department, and I also taught certain classes when professors would ask me to do that. I proctored their exams and I supported professors in, you know, whatever -- whatever they needed from a research assistant.

Q. Am I correct that it sounds like you were not focused on one specific research project?

A. Correct.

Q. Moving forward to the research associate at ERS Group from 1991 to 1996, could you describe what your role was there.

A. Sure. I worked as a research associate at ERS Group focusing on supporting economists who were working on -- as consulting or testifying experts in employment discrimination cases and personal injury wrongful death cases and in

commercial litigation.

Q. Would you say that that role is when you began performing work similar to what you do today?

A. Yes.

Q. And then I see in 1997 to 2001, you were a senior associate at PricewaterhouseCoopers, correct?

A. Correct.

Q. And could you describe that role.

A. Sure. I again worked in the disputes and litigation practice of what was then Pricewaterhouse, and then it became PricewaterhouseCoopers, also supporting economists and other -- economists and financial experts as they were hired to be either consulting or testifying experts. And that work also was more or less focused in the area of labor and employment.

Q. And I see in 2001, you appeared to have received a promotion to manager; and in 2005, a promotion to director, correct?

A. Correct.

Q. Were those performing similar roles with increasing responsibility?

A. I would say so. There were some other

roles that I played in -- as a director.

Q. Could you describe any new roles that you received at the manager or director level.

A. That is around the time when I became a manager. I started authoring my own expert reports and serving as a consulting or testifying expert.

And as a director, I also worked on a number of consulting projects that were outside of the area of labor and employment and involved various international organizations, such as the United Nations.

Q. If the topics were not employment, could you summarize what the topics would be.

A. The topics were mostly in the area of risk; risk management, risk assessments, risk management.

Q. Was there a particular category of risk involved?

A. No. It was all kinds of risk.

Q. And then 2010 to 2015, I see you returned to ERS Group as a principal, correct?

A. Correct.

Q. Could you describe any changes in the roles you were doing.

A. I continued doing my work as a labor economist, working on consulting projects and serving as a consulting or testifying expert in litigation matters.

Q. So I believe you said that the manager role at PricewaterhouseCoopers is when you first began authoring your own reports, correct?

A. Correct.

Q. Do you recall in what role you first began testifying?

A. I'm sorry, can you -- can you rephrase your question.

Q. Do you recall the first time that you ever provided deposition or trial testimony in litigation?

A. I don't recall right now.

Q. Do you recall which role you would have been in at that time?

A. I'm sorry, can you rephrase that. I'm not understanding what you mean by role.

Q. I see the different positions listed here under Previous Positions. By role, I'm referring to position.

So do you recall which position you

would have been in when you first began providing testimony?

A. I don't remember exactly when I first testified as an expert. So I don't know what role I was in, whether I was a manager or a director.

Q. Is it your belief that it would have been one of those two positions, manager or director, at PricewaterhouseCoopers?

A. Yes.

Q. And I see in December 2015, you transitioned to your current role as a director at BRG, correct?

A. Correct.

Q. Were there any changes in your responsibilities upon that transition?

A. The only change was that I came to a firm that is a lot larger than ERS Group, and therefore, had responsibility for working with, you know, a wider group of individuals.

Q. And when I look at the next page under Experience, I see Consulting.

Do I understand correctly that all of your consulting was performed within the employment positions that we just discussed?

A. Correct.

Q. So you do not engage in independent consulting outside of those positions?

A. No, I do not.

Q. And I see in the first bullet that says Economic and statistical analyses performed in connection with matters involving allegations of employment discrimination with respect to various employer actions, correct?

A. Correct.

Q. I know your Ph.D. had a focus in labor. Would you say that the majority of your still -- your work still relates to labor and employment?

A. That is correct.

Q. And the second bullet, it says Extensive experience in the calculation of economic loss involving allegations of discrimination and pay, hiring, promotion, discipline and termination, personal injury, and wrongful death, correct?

A. Correct.

Q. The next sentence says Estimation of economic loss related to all forms of compensation and fringe benefits, including stock options and

stock shares, defined benefit and defined contribution pension plans, analyses of job availability by occupation, and/or industry and calculation of present value of lost household services and life care plans, correct?

A. Correct.

Q. When you calculate damages such as compensation and fringe benefits, do you believe there's any special relation to labor and employment?

A. As compensation is an element of labor and a characteristic of -- of one characteristic, that is taken into account in labor and employment.

Q. Do you believe that the principles that you apply in doing so carry over to other forms of litigation?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. I'm not understanding your question. Can you rephrase, please.

Q. So in the first bullet, it refers to various employer actions, correct?

A. Correct.

Q. Do you understand that those are lawsuits based on employment?

A. Yes.

Q. Do you believe that the principles that you applied to calculate the types of economic loss listed in the second bullet apply equally to litigation that is not employer actions?

A. Yes. So as an example, in personal injury wrongful death cases which don't involve necessarily employer actions, I mean, although sometimes they may have those allegations included; and just to be clear, personal injury and wrongful death calculation of damages in personal injury and wrongful death, I consider those part of the general labor and employment area.

So yes, the principles would, I believe, apply similarly to those types of cases as well.

Q. So in the second sentence of the second bullet, I'm skipping to the fifth line in that paragraph, and it refers to calculation of present value of lost household services and life care plans, correct?

A. Correct.

Q. Do I understand correctly that you are not preparing the life care plans themselves?

A. Correct.

Q. Could you describe for me what calculation of present value means.

A. The calculation of present value is -- involves taking a certain amount that is, for example, identified or given to me and calculating its value through a certain period of time, and then discounting it to present value to assess what the current value is in today's dollars.

Q. So do I understand that that's taking a future value and bringing it to present value?

A. Yes, typically.

Q. Does calculation of present value also include taking a past value and bringing it to present value?

A. It may.

Q. Is there another label that you think is more appropriate for that calculation?

A. No. When one takes a past value and brings it up to the present time, one can say that they're calculating the present value.

Q. I'm looking at the last paragraph after the bullets.

It says Dr. Tosic supervises and coordinates the work of economists and other research

staff, correct?

A. Correct.

Q. In this litigation, are there other economists and research staff that have supported you in your work?

A. Yes.

Q. Could you describe generally for me your role versus the role of the people that you are managing.

A. In terms of what?

Q. I will defer to you in terms of how you think those roles are different.

A. And you're talking about my work, generally speaking?

Q. Your work specific to the Camp Lejeune litigation.

A. So I -- on the work related to this Camp Lejeune litigation, I lead a group of -- of colleagues who support me in my work on the matter. So I delegate work to them. I ask them to perform certain research tasks, perform calculations. That's generally speaking.

Q. When you delegate tasks like that, how do you ensure that they're performed correctly?

A. I review them. I review their work.

Q. Does your level of review vary based on who you've delegated a task to?

A. Usually it doesn't. I mean, sometimes I may vary it, but in this particular litigation, I reviewed everybody's work.

Q. And among the people that you delegate tasks to, do any of those people also have the authority to delegate tasks?

A. They will have the authority, but I would be involved in that decision.

Q. Is it fair to say that if you delegate a task to one person and they delegate a task to another person, you would be aware of that second delegation?

A. Absolutely.

Q. Okay. After going through all of your background, is it fair to say that you're an economist?

A. Yes.

Q. And are you an economist who specializes in labor?

A. That would be correct.

Q. Would you agree that you have no

background in medicine?

A. Correct.

Q. So you have no specialized knowledge about leukemia or non-Hodgkin's lymphoma, correct?

MR. KLOTZBUCHER: Objection to form.

You any answer.

A. Correct.

Q. And in your reports, you do not express any opinions as to what care any of the plaintiffs will need in the future, correct?

A. That's correct.

Q. And you do not express any opinions about the appropriateness of care that they've received in the past?

A. That's correct.

Q. And you are not opining as to whether any particular care will be available to them through government programs in the future?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Can you repeat the question, please.

Q. I understand that your reports include certain projections about the value of government services that will be provided to them in the future,

correct?

A. When you say government services, what exactly do you mean?

Q. I'm referring to the programs identified as potential offsets in your reports.

A. That's correct.

Q. And although you are providing an opinion as to the value, you are not providing an opinion as to whether those programs will continue to provide the same services that they do today, correct?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. That's correct.

Q. And you are not opining as to whether providers who offer care paid for by government programs would be the best care available for any of these plaintiffs, correct?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Correct.

Q. You are not a medical diagnostician, correct?

A. That would be correct.

Q. And still today, you do not prepare life care plans, correct?

A. Correct.

Q. So in this case, you have deferred to the life care plans prepared by others, correct?

A. I'm not sure I understand your question when you say deferred.

Q. In your reports, do you rely on other experts who have prepared life care plans?

A. Yes, I do.

Q. And you are relying on the substance of those life care plans as prepared by those individuals, correct?

A. Correct. I take them as given.

Q. And your work is to value the substance of those life care plans, correct?

A. I wouldn't phrase it that way. I would say that my work involves the calculation of the present value of those life care plans, not necessarily the substance.

Q. When you calculate the present value of the life care plans, am I correct that at no point, you alter the substance of the life care plans?

A. That's correct.

Q. Have you spoken with any of the individuals who prepared life care plans in this case?

A. I have spoken to one individual that prepares life care plans. I'm not sure whether he has prepared life care plans for -- for Camp Lejeune litigation.

Q. Which individual are you referring to?

A. Michael Shahnasarian.

Q. So if you are not aware of whether Mr. Shahnasarian has prepared life care plans in the Camp Lejeune litigation, am I correct that the conversation with Mr. Shahnasarian was not specific to Camp Lejeune?

A. It was specific to Camp Lejeune.

Q. Did you rely on that conversation in conducting the present value analysis of the life care plans that you reviewed?

A. No.

MR. KLOTZBUCHER: Objection.

THE WITNESS: Sorry.

Q. And in your reports, you also did not calculate the cost of the individual medical expenses in a life care plan, correct?

A. That is correct.

Q. But you applied a present value calculation to the costs that you relied upon?

A. That is correct.

Q. Am I correct that in your reports, you do not attempt to value past medical care?

A. No, I do not.

Q. And with VBA disability benefits, the original award that a plaintiff receives, you are relying on the VBA's determinations, correct?

A. Can you clarify what you mean by original award.

Q. Do you understand that there is a defined amount that each plaintiff receives in VBA disability benefits at a point in time?

A. Correct.

Q. The actual amount received represents an award issued by the VBA, correct?

A. Correct.

Q. And that award and the value of that award is determined by the VBA, correct?

A. Correct.

Q. And you are relying on those determinations in your reports?

A. Yes.

Q. Would it be accurate to say that the expertise you provide in your reports is to analyze economic data that is provided to you?

A. That is correct, but it's -- I don't analyze only data that is provided to me.

Q. Could you clarify what else you analyze.

A. In performing my work, I may also do research to gain an understanding of a particular topic, and that understanding could then supplement, add to, the information that I receive.

Q. Would it be fair to say that that research material is to help you analyze the economic data?

A. I think that would be correct.

Q. But your statement is that at times, you still perform additional research; you are not simply analyzing based on your existing knowledge, correct?

A. That's true. Sometimes I -- I find it necessary to do additional research to understand whatever topic I'm -- is in front of me.

Q. And in this case, part of that analysis was to apply the present value to amounts provided to you?

A. Can you be more specific.

Q. Part of your analysis in this case is to take a value that you are relying upon from another source and apply a present value calculation, correct?

A. In some instances.

Q. Is it fair to say that you have quite a bit of experience analyzing wage loss?

A. That would be -- I would agree with that.

Q. Approximately how many years would you say you've been analyzing wage loss?

A. Approximately, I guess, over -- over 25 years.

Q. Could you define wage loss for me.

A. Can you tell me in which context you would like me to define this.

Q. Can you define wage loss as a category of damages in a lawsuit.

A. Yes.

Q. Will you please do so.

A. Wage loss in a litigation matter is typically defined as the difference between what we would refer to as but-for earnings, and potentially,

any mitigating earnings during a specific period of time.

Q. When you say but-for, what do you mean?

A. But for the alleged action.

So in an employment litigation matter, it would be in the context of but for the alleged wrongful termination.

In a personal injury matter, it would be projected earnings but for the alleged personal injury.

Q. And do you understand that that meaning of but for can apply to more than just wage loss?

A. It may.

Q. What types of analysis do you perform when you are analyzing wage loss?

A. It depends on what I am asked to do. Typically, the calculation of wage loss would involve projecting what an individual's wages would have been but for the allegation, projecting them either during a past time period and/or a future time period.

It would also -- if it's -- if there are wage loss projections into the future, typically, the present value calculation would also be involved.

Q. Approximately how many cases have you

provided wage loss analysis in?

A. Hundreds.

Q. Hundreds, not thousands?

A. That would be correct.

Q. Do you analyze loss of earnings and loss of earning capacity?

A. Yes.

Q. Do you view those as two different concepts?

A. Two different concepts, but very much connected.

Q. What is the difference?

A. Earning capacity is what an individual may earn, given their education, experience, occupation, industry; and earnings is typically what they actually earn.

Q. Can those two numbers be different for one individual?

A. They may be.

Q. What would cause those two numbers to be different?

A. If the person that is -- that has earnings is not working up to their earning capacity, for example. So a mother who is home with their

children but has a law degree may have an earning capacity of a lawyer, but their actual earnings may be zero because they're stay at home.

Q. And have you performed wage loss analysis in the Camp Lejeune litigation?

A. Yes.

Q. And was that a loss of earnings analysis or a loss of earning capacity analysis?

A. I mean, it would be -- it would be both for some plaintiffs. It could be the same. It could be different for other plaintiffs.

Q. What would indicate whether an analysis is loss of earnings or loss of earning capacity?

A. If the earnings that are being analyzed, projected, would be considered the same as the earning capacity of the individual, and they would be the same. If -- if the earnings may be different from the individual's earning capacity, then of course, they -- you know, their amounts would be different.

Q. In looking at a report that you have authored, what would indicate that you have analyzed loss of earning capacity?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. I think a review of an individual's past earnings and occupation and an understanding whether all of those earnings were considered in the calculations would be an indication of whether we're talking about earnings or earning capacity.

Q. Am I understanding that if your report considers all of the previous earnings, that that report is an analysis of loss of earnings?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Can you repeat the question.

Q. Do I understand correctly that your previous statement was that if a report includes a review of all previous earnings, that it would be a loss of earnings analysis?

A. It would be a loss of earnings analysis.

Q. So is it fair to say that the review of the earnings history is what would indicate a loss of earnings analysis?

A. Yes.

Q. Is there something else that would indicate a loss of earning capacity analysis?

A. If there are, for example, other

earnings in the record that are not considered in the earnings loss analysis.

Q. Am I understanding correctly that your testimony today is that if your report analyzes all earnings in the record, it is a loss of earnings analysis, but if it only analyzes some of the earnings in the record, it is a loss of earning capacity analysis?

A. No.

Q. Could you clarify what I'm getting wrong.

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Can you repeat the question.

Q. What about that description was incorrect?

A. Earning capacity usually considers an individual's actual earnings and earning potential. So if there is an earning potential that is not reflected in the actual earnings, then that would be just an earnings loss calculation. But if one considers also the earnings potential of the individual, in addition to actual earnings, then that analysis could be viewed as an analysis of earnings

capacity.

Q. So do I understand correctly that the indicator of a loss of earning capacity analysis would be some sort of comparison between the actual earnings and the potential earnings?

A. It may involve that.

Q. If it does not involve that, would it still be a loss of earning capacity analysis?

A. I think to do an earnings capacity loss analysis, you would need to look holistically at the individual's characteristics and their actual earnings and see if there is -- if there are earnings potentials that are not reflected in actual earnings.

Q. Have you served as an expert in both federal and state court?

A. Yes.

Q. Have you testified for both plaintiffs and defendants?

A. Yes, I have.

Q. When you have served as an expert for plaintiffs, have they been individual human plaintiffs?

A. Yes.

Q. So based on your experience, knowledge,

background, training, is your role to analyze information that you obtain from others?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. That would be part of the analysis. As I mentioned previously, part of my work is not only looking at information I receive from others, but also, conducting research myself.

Q. And we agreed that that was research you were conducting to improve your ability to analyze the data provided, correct?

A. Or improve my understanding of the data that is to be analyzed.

Q. But you do obtain the source data from someone else, correct?

MR. KLOTZBUCHER: Objection, form.

You can answer.

A. Typically, that's what research involves, yes.

Q. You are not, for example, collecting documents reflecting earning loss directly from a party, correct?

I'll rephrase that question.

You are not typically collecting the

source data directly from the party that an attorney represents, correct?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Sometimes I may.

Q. Could you give me an example.

A. I may conduct an interview or ask for specific documents from the individual involved in the litigation matter directly.

Q. Is it fair to say that most often, you obtain data provided by others?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. I wouldn't say most. I would say, you know, many times that's what happens, that the information that I review, analyze, collect, comes from others.

Q. Is it fair to say that you did not collect information directly from any of the plaintiffs in this litigation?

A. That would be correct.

Q. So all of the data that you have analyzed in your reports under this litigation have been provided from other sources, correct?

A. From other sources, yes.

Q. Do you hold yourself out as an expert on offsets?

MR. KLOTZBUCHER: Objection, form.

You may answer.

We've also been going a little over an hour now, so if there's a good stopping point, if anybody wants a short break.

MR. KLOTZBUCHER: Sure.

MR. VANSLYKE: Sure.

Q. If you can answer that question, we can take a break.

A. To the extent what you mean by offsets is -- would, for example, involve the calculation of the present value of a particular offset, I would consider myself an expert in that, yes.

MR. VANSLYKE: Okay. Can we go off the record.

THE VIDEOGRAPHER: The time right now is 10:11 a.m. We are off the record.

(There was a recess taken.)

THE VIDEOGRAPHER: The time right now is 10:28 a.m. We are back on the record.

BY MR. VANSLYKE:

Q. Ms. Tosic, I want to back up just one moment.

Do you recall discussing you sometimes conduct research to aid in your analysis of the data?

A. Yes.

Q. In your reports for the Camp Lejeune cases, have you conducted additional research?

A. Yes, I have.

Q. And would all of that research be reflected either in your Materials Considered Lists or cited in the reports themselves?

A. That's correct.

Q. So am I correct that there is no additional research that you are relying on in your reports that is not provided either in the reports themselves or in the Materials Considered List?

A. Correct. They would either be in the footnotes of -- of my reports or in the list of materials considered.

Q. Okay. So before the break, do you recall we had just started discussing offsets?

A. Yes.

Q. And is it correct that you said you do hold yourself out as an expert on offsets in terms of

calculating the present value of offsets; is that correct?

A. If I may be a little more specific, I regard myself as an expert in the calculation of the present value, whether we're talking about offsets or -- or losses. To me, it's not necessarily relevant whether -- what the classification is.

Q. So fair to say that you hold yourself out as an expert on the calculation of present value and that that applies to offsets, among other things?

A. So I -- as part of my expert reports, I calculated the present value of, for example, VBA benefits, which were classified as offsets and potential offsets in my reports.

Q. In the context of damages analysis within litigation, what do you understand the word offset to mean?

MR. KLOTZBUCHER: Objection, foundation. You may answer.

A. In the context of litigation, offsets could mean a number of different things. It could be a -- it could be a legal classification. From an economic point of view, it -- an offset could be something that is considered in the calculation of

economic and non-economic losses.

Q. So it's something that is considered, but what is it that's being considered?

A. I'm sorry?

Q. You said that it is something that is being considered, but what is it that's being considered?

A. It could be a number of things. It could be -- it could be lost compensation, it could be lost benefits, it could be lost household services, it could be -- it could be -- offsets could be considered, you know, in terms of -- of anything that is calculated.

So in this particular case, my understanding is that the word offsets has more of a legal meaning than an economic meaning, that a person like me, an economist, would determine what it is.

Q. So in your answer, one of the examples you gave was lost household services, correct?

A. Correct.

Q. To ensure that I'm understanding correctly, were you describing that the lost household services are the offset or that the lost household services could be applied to the offset?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. It may be or it may be not. Lost household services is part of a wider concept of economic loss.

Q. Is the loss distinct from the offset?

A. It may and may not be.

Q. Could you give me an example where the loss is also the offset.

A. Well, for example, in the calculation of lost earnings, and we talked about that earlier, sometimes what is considered are mitigating earnings, and mitigating earnings are sometimes referred to as offsets.

So in the calculation of earnings losses, you know, one can consider mitigating earnings as offsets to the but-for earnings. So in that case, you have mitigating earnings playing a role as offsets, but also being part of economic loss calculations.

Q. Do I understand correctly that you've identified both the lost earnings and the mitigated earnings as two components of the economic loss analysis?

A. Yes. Both could be considered in the economic loss analysis.

Q. And do I understand correctly that you're describing the mitigated earnings as the offset to the loss earnings; is that correct?

A. No, that's not correct.

Q. Could you explain why that's incorrect.

A. The -- as I mentioned, the mitigating earnings are sometimes referred to as potential offsets to projected but-for earnings. So when you consider the but-for earnings and the mitigating earnings, what you get is the earnings loss.

Q. Understood. So the earnings loss is the output of that calculation, correct?

A. Correct.

Q. So do I understand that the mitigated earnings is the offset to the but-for earnings?

A. Correct.

Q. So you described that you hold yourself out as an expert on applying a present value calculation to offsets, correct?

A. No, that's not entirely I think what I said. What I said was that I regard myself as an expert in the calculation of the present value. In

this particular case, I calculated a present value of VBA benefits which have been classified as potential, potentially offsets.

Q. Do you hold yourself out as an expert in identifying the offsets before present value is applied?

A. Well, in, for example, the calculation of lost earnings, I have extensive experience in the determination of earnings loss, and in the calculation of earnings loss, the consideration of mitigating earnings and the projection of potential mitigating earnings, which are, as I said, sometimes regarded as, or called, offsets.

Q. So your experience working with those types of calculations provides you with expertise on identifying those offsets; is that correct?

A. No, that's not entirely correct. I'm not an expert in identifying what an offset is or isn't.

My experience in the calculation of earnings losses, as I mentioned, sometimes involves the calculation of actual and potential mitigating earnings; and so those are sometimes called offset earnings. And my expertise is specific to that.

Whether or not something is or isn't an offset, I would not regard myself as an expert in that.

Q. Have you ever been retained as an expert in offsets?

A. In which sense?

Q. Have you ever been retained as an expert for a lawsuit for the purpose of identifying offsets?

A. Can you rephrase your question, please.

Q. When you are retained as an expert, do you typically have an understanding of what the work is that you're supposed to perform?

A. At the beginning, sometimes there's a general sense, and as my work progresses, there is a better definition.

Q. Other than the Camp Lejeune litigation, has there been a matter in which you have been retained as an expert where your understanding at the beginning of retention is that your role is to identify offsets?

A. I don't think that I am ever retained as an expert to identify offsets, per se. My work sometimes involves the calculation, as in this case, the present value, of something that may or may not be considered or offset.

Q. So is it fair to say that your opinions in this case do not identify offsets that should be applied; you calculate the present value of offsets that have already been identified?

A. That's correct. My understanding is that part of the litigation in this matter involves the issue of whether -- whether the Camp Lejeune language identifies certain offsets or not. I have been asked to calculate the present value of certain items that are potentially offsets. I don't have an opinion on whether they are or are not offsets.

Q. In the example that you provided of offsets based on mitigating earnings, would you agree that the purpose is to prevent double recovery?

MR. KLOTZBUCHER: Objection.

You may answer.

A. Can you tell me what you mean by double recovery.

Q. I will -- what do you understand double recovery to mean?

A. I don't know. That's why I'm asking you.

Q. When a plaintiff presents their damages claims in a lawsuit, do you understand that they're

seeking to recover for the damages identified?

A. Yes.

Q. Do you understand that at times, those damages may have already been compensated by other means?

A. Yes.

Q. If the plaintiff receives compensation for those damages, again, in a lawsuit, do you understand that that could be referred to as double recovery?

A. They could be.

Q. Does that answer your question of what double recovery refers to?

A. It gives me an idea of what double recovery is.

Q. Do you understand that avoiding double recovery would be why an offset could be applied?

MR. KLOTZBUCHER: Objection.

You may answer.

A. No, I don't have an opinion on that.

Q. When you referred to mitigated earnings, I believe you said that sometimes that's referred to as an offset, correct?

A. Correct.

Q. Are there other ways that that's referred to?

A. Not that I'm aware of. It's mitigating earnings or offsets, earnings offsets.

Q. Would it be fair to say that removing mitigating earnings from the actual loss of earnings represents identifying what the actual loss was?

A. I would not agree with that.

Q. Why not?

A. Because typically, in the calculation of earnings loss, one calculates what the person would have earned but for the allegation, and if the individual has had earnings during the same time period, those are -- those are typically taken into account. And so the review of both the projected but-for earnings and actual and projected mitigating earnings is what is typically considered in the calculation of earnings loss.

So when you're calculating earnings losses, if an individual, if the plaintiff has actual mitigating earnings, typically, one would not ignore them.

Q. I'll try to clarify what I mean.

When you identify damages in a lawsuit,

is the goal to identify the damages that were actually caused by the subject of the lawsuit?

A. I think that's more of a legal question. Typically, economists don't get into what caused or didn't cause the alleged damages. Our role is to calculate the value of these damages, whatever, you know, the alleged cause is. We don't really get into the determination of what the alleged cause is.

Q. I understand that you are not involved in the determination of the cause, but when you focus on but-for damages, isn't that relying on a cause?

A. No, not necessarily.

Q. What is it but for if it's not but for a cause?

A. Well, we typically -- and I'll just follow with this example. We typically calculate but-for earnings, meaning but for the alleged cause, but we don't get into an analysis of whether the alleged cause is determined or not.

Q. So when you remove mitigated earnings from that calculation, is it correct that you are doing so because any mitigated earnings that are not obtained, they were not obtained for some reason other than the alleged cause?

MR. KLOTZBUCHER: Objection.

You may answer.

Q. I'll rephrase my question.

A. Yes, please.

Q. Do you understand if I distinguish between actual mitigated earnings versus potential mitigated earnings?

A. Yes. We deal with that concept.

Q. And is it your opinion that both of those would be removed from the damages calculation?

A. I'm sorry, when would they be removed?

Q. I'm referring to -- I'll rephrase my question.

Should a plaintiff be compensated for their mitigated earnings?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Again, I'm not sure I understand your question.

Q. When you apply mitigated earnings in the way that is sometimes described as an offset, am I correct that you are removing that from the amount that a plaintiff should be compensated under an economic analysis?

A. When you say removed, do you mean that the but-for earnings are reduced by actual or potential mitigating earnings?

Q. Correct.

A. Yes.

Q. And would that apply to both actual and potential mitigated earnings?

A. It may.

Q. Under what circumstances would it not?

A. If, for example, the calculations do not involve the calculation of projected mitigating earnings; if the calculations just deal with actual mitigating earnings.

Q. What would determine whether it includes one or both?

A. It could be a number of different things. It could be the estimated work life expectancy of the individual; it could be the duration of the projected losses; it could be the -- the actual current earning capacity of the individual. It could be a number of different things.

Q. Do I understand correctly that the methodology you've applied to quantifying offsets in

these cases is not to identify that the offsets should be applied, but to simply value offsets that may be applied?

A. I believe that's correct. I don't have an opinion on whether the offsets should or should not be applied. I was asked to calculate their value in case they're applied.

Q. Do you have any particular background, experience, or training related to VBA disability benefits?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. I have quite a lot of experience in the calculation of the present value of VBA benefits.

Q. Is that experience limited to the present value calculations, not calculating anything related to the benefits themselves?

A. The benefit amounts themselves are provided by the VBA, typically, and my role is typically to calculate the present value of such benefits.

Q. Do you have any background, experience, or training specific to Medicare?

MR. KLOTZBUCHER: Objection.

You may answer.

A. My experience with Medicare is just in terms of dollar amounts that I sometimes use in my calculations.

Q. Is it fair to say that you are relying on some other source to identify the appropriate dollar amounts?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. In this particular case, in my expert reports, I rely on another expert for the amounts of Medicare benefits.

Q. Is that typical for when you work on Medicare issues?

A. Sometimes there is an expert report of another expert, and sometimes the numbers come from documentation that is provided to me.

Q. So in either case, you are relying on another source for the root numbers upon which you apply your calculations, correct?

A. That's correct.

Q. Do you have any background, experience, or training specific to VA healthcare?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. In which sense, VA healthcare?

Q. What are the different senses that you understand VA healthcare to refer to?

A. When I deal with VA healthcare benefits, typically I deal with numbers, and my expertise rely -- is based on the analysis of the numbers that are provided to me, and preparing various kind of calculations.

Q. Would the same be true for Tricare?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Yes, that would be the same.

Q. And would the same be true for TriWest?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. That's correct.

Q. Would the same be true for payments or benefits from government programs in general?

MR. KLOTZBUCHER: Objection, form.

A. Not always.

Q. What would be an example where that is not the case?

A. I have a lot of experience in

calculating, for example, the present value of Social Security retirement benefits. Those calculations involve complex formulas, and understanding how the formulas work is important to preparing accurate calculations.

Q. Would it be fair to describe that as an advanced calculation?

A. I don't know if I would call it advanced. There are a lot more advanced calculations than that. It's simply understanding the complex formulas that are involved and the different elements of the calculations.

Q. And in that case, would it still be true that you are applying calculations, the numbers related to Social Security that you are relying on from another source?

A. Can you repeat the question.

Q. In that example, would it still be the case that you are relying on the underlying Social Security numbers from another source such as the Social Security Administration, and then applying calculations upon those numbers?

A. Not always.

Q. What would be a scenario where you

obtained the original number without an outside source?

A. Sometimes I have to calculate what the Social Security benefit is, or would be, based on the -- based on data -- compensation data on personal information on the plaintiff.

The Social Security benefits data is not provided to me. I have to calculate it myself based upon formulas and various kinds of assumptions that are typically used.

Q. Would you say that you have background, experience, or training in the eligibility criteria for government benefit programs?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. No, I don't have that experience or expertise.

Q. And just to be clear, you do not have any past experience specific to the offset provision in the Camp Lejeune Justice Act prior to this litigation, correct?

A. Correct.

Q. Have you read the statute?

A. I have.

Q. What is your understanding of what the statute says about offsets?

MR. KLOTZBUCHER: Objection. Foundation and form.

You may answer.

A. If I recall, the statute lists a number of items that may be considered offsets.

Q. And is your testimony today that you have no opinion as to how the offset provisions in the Camp Lejeune Justice Act should be applied, correct?

A. That is correct.

MR. VANSLYKE: I am marking as Exhibit 4 the list Trial and Deposition Testimony in Past Four Years provided with Ms. Tosic's reports.

(Exhibit 4, Appendix C to Ms. Tosic's Reports, marked for identification, as of this date.)

Q. I should have clarified this with Exhibit 3.

So going back to Exhibit 3, your CV, am I correct that the same CV was attached to each of your reports?

A. That's correct.

Q. And do you recognize this list of trial and deposition testimony in the past four years?

A. I do.

Q. Was the same list attached to each of your reports?

A. I believe so.

Q. Do you believe that this list is up to date?

A. Yes.

Q. Looking at this list, are there any cases in which you represented the plaintiffs?

A. No.

Q. Did any of these cases involve VBA disability benefits?

A. I don't believe so.

Q. To the best of your recollection, did any of them involve VA healthcare?

A. I am not 100 percent sure, and I'm pausing here because of the three cases against the City of Chicago where one of them may have. May have.

Q. To the best of your recollection, did your work in any of these cases involve offsets?

A. Yes. Many of them did.

Q. Do you recall if they were offsets related to mitigation or offsets related to double recovery?

A. Many of these cases involved the calculation of actual or potential mitigating earnings as -- in the context of the calculation of earnings losses, as well as the calculation of mitigated fringe benefits, actual or potential, as -- you know, if you want to consider those as potential offsets as well.

I believe that one of them also involved the calculation of pension offsets. So pension benefits as a potential offset.

Q. Would those be similar in the sense that they would be a mitigation?

A. Correct.

Q. In any case where you've been retained, has your testimony ever been disallowed or stricken?

A. Yes. Once.

Q. Do you recall the subject matter of the testimony that was disallowed or stricken?

A. That was my one and only criminal case that I was retained as an expert, and that involved the calculation of the reasonableness of compensation

compared to the market for the wife of the defendant.

Q. Other than that example, has your testimony ever been limited without being disallowed or stricken?

A. No, I'm not aware of that.

Q. Do you know how DOJ found you for this case?

A. I have a general understanding.

Q. Without telling me anything that you have discussed with your attorneys, can you describe that general understanding.

A. Yes. I believe that the DOJ reached out to one of my colleagues initially, who subsequently involved me.

Q. Do you recall who that colleague was?

A. Yes.

Q. Who was it?

A. Robin Cantor.

Q. Is Robin Cantor a supervisor to you?

A. No, not necessarily.

Q. Before this case, have you ever been retained by the DOJ before?

A. I have worked on projects where BRG was retained by the DOJ.

Q. Do you distinguish between BRG being retained and you being retained individually?

A. Yes.

Q. Are you retained individually on this case?

A. No.

Q. Have you ever been a government contractor before?

A. Again, I have worked on projects where BRG was retained as a government contractor.

Q. What were the subjects of those projects?

A. Well, I'll give you an example of the September 11th Victim Compensation Fund where BRG was retained, and -- by the DOJ, and the subject of that work is assisting the special master's office in the calculation of personal injury and wrongful death claims.

Q. Am I correct that when you describe something as a project, you're referring to something other than being retained for active litigation?

A. Well, the September 11th Fund work is consulting work; it is not litigation. So in that case, that is a project, right? But there are other

matters that BRG has been retained by various Federal government agencies in litigation matters.

Q. Would you refer to that as being retained for purposes of litigation rather than for purposes of a project?

A. I mean, I refer to those as projects as well.

Q. So other than this case and the 9/11 project, have you been a government contractor before?

A. Not me personally.

Q. Am I correct that BRG was a government contractor?

A. Was and has been, and is.

Q. And you were performing work in those matters on behalf of BRG?

A. Yes.

Q. Do you believe that is not serving as a government contractor?

A. I'm not sure what the -- what the legal implications of that are. I'm an employee of BRG, and BRG works on various federal contracts.

Q. You stated that you are aware that Henry Miller and Gregory Russo are involved in this

litigation, correct?

A. Correct.

Q. And they are both BRG employees?

A. Yes.

Q. Other than knowing that he is another BRG employee, have you had interactions with Dr. Miller?

A. Can you rephrase that.

Q. Have you interacted directly with Dr. Henry Miller?

MR. KLOTZBUCHER: And you can answer that question, but I'm going to object to the substance of any conversations you might have had with Dr. Miller.

MR. VANSLYKE: Limited to this litigation, correct?

MR. KLOTZBUCHER: Correct.

A. So your question is limited to this litigation?

Q. Other than for purposes of this litigation, have you interacted directly with Dr. Henry Miller?

A. Yes, I have.

Q. For what purpose?

A. For various purposes.

Q. Were they all work related?

A. Yes.

Q. Other than for purposes of this litigation, have you interacted directly with Gregory Russo?

A. I don't believe so.

Q. Other than Dr. Miller and Mr. Russo, have you worked with any of the other experts in this case before?

A. I may have worked with one additional individual, if he is an expert in this matter, which I don't know.

Q. Is that Mr. Shahnasarian that you were referring to earlier?

A. Correct.

Q. Have you ever encountered any of plaintiffs' experts in another litigation?

A. I have.

Q. Which ones?

A. I don't -- which experts or which matters?

Q. Which experts.

A. Mr. Staller.

Q. And do you recall any matters where you encountered Mr. Staller?

A. I don't recall the exact matters.

Q. Do you recall if you were both serving in an economic role in those litigations?

A. I believe so.

Q. Do you have any opinions about Mr. Staller?

MR. KLOTZBUCHER: Objection.

A. Not really.

Q. So you said that you are not individually retained for this litigation, correct?

A. Correct.

Q. So is it fair to say that BRG was retained, and they assigned you this role?

A. Your first part is correct. BRG was retained, and I was assigned to the role of a testifying expert on it.

Q. Do you know how you were identified to fill that role?

A. Yes.

Q. How were you?

A. There was an internal discussion.

Q. Were you part of that internal

discussion?

A. Yes.

Q. Who else was part of that internal discussion?

A. Robin Cantor and Shireen Meer.

Q. And how was it decided that you would fill this role?

MR. KLOTZBUCHER: Objection.

A. It was decided through our discussion.

Q. Was there a reason that one of the other two were not selected for this role?

MR. KLOTZBUCHER: Objection. The substance is protected communication. Otherwise, you may answer.

MR. VANSLYKE: Counsel, for clarification, are either of them retained experts?

MR. KLOTZBUCHER: It's communications with staff. It's protected under the CMO.

Q. Do you recall when you were assigned to fill this role?

A. I believe it was end of 2023. Maybe December 2023.

Q. Had you performed any work related to

this litigation before you were identified as the individual who would fill this role?

A. Yes.

Q. Do you recall first, when you began working on this litigation?

A. I began working on it as soon as we were retained.

Q. And I believe earlier you testified that that was early 2023, correct?

A. Correct.

Q. When you first began working on this litigation, what did you understand your assignment to be?

A. My understanding then was that we were retained in a consulting role to perform various kinds of tasks requested of us.

Q. Was that assignment provided in writing or verbally?

A. I think mostly -- I think some verbally. Some may have come through e-mails.

Q. Are you aware that the first selection of discovery pool plaintiffs did not occur until December 5th, 2023?

A. I -- I believe I remember that.

Q. So you were working on this litigation before the discovery pool plaintiffs were selected?

A. Correct.

Q. Which would also be before the trial plaintiffs were selected on July 9th of 2024?

A. Correct.

Q. Did you understand your assignment to change after the discovery pool plaintiffs were selected?

A. Yes.

Q. And what did you understand your assignment to be at that point?

MR. KLOTZBUCHER: Objection, form.

A. At the time when the plaintiffs were selected, one of our assignments was to serve as testifying experts and the calculation of potential economic losses of the plaintiffs.

Q. Did you begin those calculations before the trial plaintiffs were selected?

A. When you say the trial plaintiffs, those are the individuals -- the 50-some individuals?

There was a larger pool before that, so I just want to make sure I'm understanding what you mean.

Q. Do you understand that there are currently 22 individuals with cases before the court?

I'll rephrase.

Do you understand that there are 22 individuals with non-stayed cases before the court?

A. No, I wasn't aware of that.

Q. It sounds like you are aware that at some point, the pool of plaintiffs with non-stayed cases was narrowed to a smaller number, correct?

A. Correct.

Q. Did you begin calculating the economic damages and potential offsets before that narrowing occurred?

A. I don't believe so.

Q. And since you began that work, has your understanding of your assignment changed?

A. When you say that work, which work are you referring to?

Q. The work when you began calculating the damages and potential offsets of the identified plaintiffs.

A. No. I think it has remained the same.

Q. And is that still what you understand your assignment to be today?

A. Yes.

Q. Were you provided with any assumptions in this case?

MR. KLOTZBUCHER: Objection, form.

A. To the extent the assumptions -- certain assumptions came from other experts, the answer is yes; but in terms of assumptions provided by someone else, no.

Q. Would you agree that the reports that you've provided to date contain the extent of the opinions that you expect to present in this case?

A. To the extent I'm provided additional information -- my reports were issued December 15th, 2025. So to the extent I'm provided additional information, I will consider it, and may, if I'm requested, to update my reports and expert opinions, I will do so.

Q. But sitting here today, you do not have an intent to express opinions that are not reflected in your report, correct?

A. I have not been asked to consider anything, no.

MR. KLOTZBUCHER: It has been about an hour, counsel. I don't know if anybody would

like a break or if you want to keep going forward.

MR. VANSLYKE: Do we want to --

THE WITNESS: Maybe we can go forward until 12?

MR. VANSLYKE: Sounds good to me.

THE WITNESS: Okay.

Q. In completing your work, have you kept any personal notes or similar?

A. No.

Q. Do you know if anyone on your team has?

A. It's BRG policy not to, so I would hope that nobody did.

Q. Do you know the purpose of that policy?

MR. KLOTZBUCHER: Objection.

You may answer.

A. No. I don't want to speculate at this point.

Q. And I think I can confirm that you have not brought any notes or materials with you today, correct?

A. Correct.

Q. So when you talk about completing additional research, I'd like to know more about what

sources you used.

Did you look at Google?

A. I may have used Google to research a particular topic.

Q. Have you used VA websites?

A. Yes.

Q. Have you used individual ratings decisions?

A. To the extent that those were provided to us by the VBA, yes.

Q. Are there any other sources that you specifically remember using?

A. Yes.

Q. Could you tell me what they are.

A. I used the Bureau of Labor Statistics' website. I used the Social Security Administration website. I used data from the Federal Reserve Bank. I think that's -- that's what I remember at this point.

Q. And in your own words, what is the scope of the opinions that you are providing in this litigation?

A. The scope of my opinions pertain to potential economic losses of each plaintiff, which

may involve earnings losses, fringe benefit losses, lost household services, and the present value of a life care plan.

Q. And how would you describe the work that you completed in order to provide those opinions?

A. I prepared economic loss calculations, and prepared an economic expert report which summarized the assumptions and methodologies that I used.

Q. So you mentioned earlier that you manage other employees that you can delegate tasks to, correct?

A. Correct.

Q. Could you describe for me what tasks you completed yourself versus what tasks you delegated to others.

A. We typically work as a close team, so there may be certain tasks that I assign to a particular individual. It could be conducting research, collecting data; and the process, once the individual performs that task, then I sit down with the individual and review the information and the data provided.

Q. Would you say that you review every

piece of data?

A. I usually do a thorough review, yes.

Q. So you would not say that you spot check?

A. No.

Q. Are there any tasks that you do not delegate?

A. I am very involved in the writing of the expert reports. There may be instances where a particular individual is asked to provide a particular piece of information. For example, deposition testimony, that is usually what I do myself.

Q. Do you ever delegate writing the narrative sections of your report?

A. Sometimes I do.

Q. Are there any tasks that you always delegate?

A. Conducting research on the Bureau of Labor Statistics' website is something that I typically delegate. I give specific instructions on what I need; and typically, that is done by, you know, an associate or research associate. And that data is then provided to me.

Q. Would the same be true for the other examples of outside research?

A. No. Sometimes I conduct the research myself. Sometimes I conduct the research myself, and then am able to delegate certain tasks related to that research to someone else. It all depends.

Q. So at this point in time, you have provided eight expert reports pertaining to eight plaintiffs in this case, correct?

A. Correct.

Q. And I understand that in approximately April of 2025, there was a previous round of reports where you provided ten reports for ten plaintiffs, correct?

A. Correct.

Q. What is your understanding of why those reports were filed again in December?

MR. KLOTZBUCHER: Objection.

You may answer.

A. If -- my understanding is that discovery was perhaps, reopened, and additional information was included in the realm of documents.

Q. Do you still stand by the methodologies applied in the initial reports?

A. I mean, the methodologies that I applied in the first reports are pretty consistent with the methodologies that I applied in the -- first reports are similar or the same as I applied in the second set of reports.

Q. Are there any that you recall being different?

A. I never conducted that analysis to conclude whether any of them were different or not.

Q. So do I understand correctly that you have not compared the reports filed in April against the reports filed in December?

A. I may have done a -- I may have gone back to the original reports as I was preparing the second set of reports. I do recall in the second set of reports, there were additional elements of potentially economic loss that Mr. Staller introduced that were not considered in the first set that, you know, I addressed in the second set.

Q. Are you aware of whether any of the staff members you delegate tasks to have compared those two sets of reports?

A. I think that -- I'm not sure whether they compared the reports, but certainly, the first

set of calculations that were performed were taken into account when we were preparing the second set of calculations.

Q. Would you say that you started from the existing calculations and reviewed them for a need to modify them?

A. I think that would be a fair statement.

Q. Would you say that you did that or your staff did that, or both?

A. Both.

Q. Were there any calculations that were identified as incorrect?

A. I do recall that I made an adjustment to the calculations of lost earnings for Mr. Connard, one of the plaintiffs.

Q. Do you remember what that modification was?

A. I believe it had to do with the personal consumption offset. I do recall that there was an adjustment made to those calculations.

Q. Do you recall why there was an adjustment made?

A. Yes. I know in the first -- I believe in the first expert report, this wasn't considered a

reduction, but an addition; so the sign was wrong.

Q. At any point during your work on this case, are you aware of AI being used in completion of any of the work?

A. No, I'm not aware of that.

Q. Does that apply to your staff as well?

A. That's correct.

Q. Are you aware of whether BRG has any AI services?

MR. KLOTZBUCHER: Objection.

You may answer.

A. What do you mean by AI services?

Q. Are you aware of whether BRG subscribes to any services that provide AI functionality?

MR. KLOTZBUCHER: Same objection.

You may answer.

A. I believe that some parts of BRG do.

Q. Does that mean that you and your team do not have access to those services?

A. I certainly don't. I -- I don't use them. I don't know whether the other team members have the access. I would have to check that.

Q. So is it fair to say that you know that you have not used AI in completion of the work

related to Camp Lejeune, but you cannot say for certain whether any of the staff members have used AI?

A. Certainly, nobody has ever indicated that to me.

Q. All right. I think I can get to a few things before noon.

Ms. Tosic, you are aware that BRG bills clients through invoices, correct?

A. Correct.

Q. And is it your understanding that DOJ has received invoices on behalf of the work that BRG has completed?

A. Yes.

Q. And I believe you testified earlier that you had not reviewed -- you had not reviewed the invoices that were produced to us, correct?

A. Correct.

MR. VANSLYKE: I will mark this as Exhibit 5.

(Exhibit 5, BRG Invoices, marked for identification, as of this date.)

Q. Ms. Tosic, I will represent to you that this is a complete set of the invoices provided to

us, with the exception of two that I will review shortly.

MR. VANSLYKE: I will mark as Exhibit 6 Invoice No. 159421 dated September 11th, 2023.

(Exhibit 6, Invoice No. 159421 dated September 11th, 2023, marked for identification, as of this date.)

Q. Ms. Tosic, the Bates stamps at the bottom of these invoices will be helpful to identify pages.

A. Okay.

Q. They are not in order. I have placed these in chronological order instead of Bates stamp order.

Will you flip through Exhibit 5 until you find an invoice dated September 11th, 2023, and please let me know when you're there.

A. Is that different from Exhibit 6?

Q. Correct. There should be one invoice dated September 11th, 2023 in Exhibit 5. It is approximately this far from the front.

A. Oh. Is it 133, Bates No. -- Bates No.?

Q. It should be Bates No. 70.

MR. KLOTZBUCHER: Page 10. It's the

10th page.

MR. VANSLYKE: Thanks.

A. September 11th, you said?

Q. Correct.

A. Okay. No, that's not the one.

No, it's not my 10th page.

MR. KLOTZBUCHER: You can always look at my exhibit.

THE WITNESS: Okay.

MR. VANSLYKE: Thank you, Counsel.

Q. Okay. Are you looking at the document with Bates No. 70 at the bottom?

A. Correct.

Q. And in the text block near the top under the word Invoice, do you see the original invoice date of September 11th, 2023?

A. Yes.

Q. And do you see the revised date of September 27th, 2023?

A. Yes.

Q. And the invoice number is 159421R?

A. Yes.

Q. And comparing that to Exhibit 6, it says Invoice No. 159421?

A. Yes.

Q. Is it your understanding that Bates page 70 represents the revised version of the invoice at Exhibit 6?

A. Yes.

MR. VANSLYKE: I will mark as Exhibit 7 an invoice dated October 9th, 2024, Invoice No. 10004661.

(Exhibit 7, Invoice No. 10004661 dated October 9th, 2024, marked for identification, as of this date.)

Q. If you can look for an invoice dated October 15th, 2024 within Exhibit 5. It is Bates page 47.

A. 147 or 47?

Q. 47.

A. 47.

Okay. I have 47 here.

Q. Okay. And do you see at the top it's dated October 15th, 2024?

A. Yes.

Q. And it says the invoice number is 10005469, correct?

A. Correct.

Q. And looking at Exhibit 7, it's dated October 29th, 20 -- I'm sorry, October 9th, 2024, correct?

A. Yes.

Q. And the invoice number is 10004661, correct?

A. Correct.

Q. Would you agree that those do not match?

A. The invoice numbers are different; the amounts are different.

Q. If you look under re Blackmer, if you look below that, do you see services rendered through September 30th, 2024?

A. Yes.

Q. Do you see that on both documents?

A. Yes.

Q. And if you look at the following page -- I'm sorry, two pages forward. I meant Bates No. 94 -- apologies. I think I'm looking at the wrong invoice. Okay. I must have marked the wrong invoice, but I will represent to you that Exhibit 7, I have excluded from any invoice tallying under the belief that it is a duplicate. Is that clear?

A. That's clear.

Q. And you understand that in some cases such as Exhibit 6, BRG does revise invoices, correct?

A. Exhibit 6? Yes.

Q. I will set Exhibit 7 aside for now.

Ms. Tosic, do you have a sense of how many hours you have billed in regards to Camp Lejeune?

A. No, I don't.

Q. If I represent that excluding Exhibit 6 and Exhibit 7, I count 918 hours .3, would you have any reason to disagree with that?

A. Is that over the period from February of 2023?

Q. Correct.

A. I mean, I don't have a reason to doubt that.

Q. If I represent to you that the total amount billed for your services is 558,767, would you have any reason to doubt that?

A. I --

MR. KLOTZBUCHER: Objection, form.

A. No.

Q. If I represent to you that the total charges contained in these invoices excluding

Exhibit 6 and Exhibit 7 is $2,545,984.55, would you have any reason to doubt that?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. No, I don't.

Q. And do I understand correctly that the difference between the total charges and the charges in your name would be the people that you've referred to as staff that assists with your work?

MR. KLOTZBUCHER: Objection, form.

A. I would think that these numbers include not only staff, but individuals that are not considered staff. So Robin Cantor, Shireen Meer are not considered staff, so their hours are probably included in that total as well.

Q. To rephrase, the difference between the total charges and your charges would be the charges attributable to other BRG members on these reports, correct?

A. Correct.

Q. If I represent to you that the total amount billed to Robin Cantor is $191,375, would you have any reason to disagree?

MR. KLOTZBUCHER: Objection, form.

A. No, I don't.

Q. And if I represent that the total for Shireen Meer is $283,032, any reason to disagree?

MR. KLOTZBUCHER: Objection, form.

A. No.

Q. Can you explain to me the difference between your role in preparing these reports and the role of Robin Cantor.

A. Robin Cantor, in preparing the expert reports, had a minimal role. She, I believe, reviewed the draft expert reports, and I think that was really the extent of it in terms of the expert reports.

Q. And how would you describe the difference between your role and the role of Shireen Meer?

A. I believe that Shireen's role was similar to -- to Dr. Cantor's role. She, I believe, reviewed several draft expert reports, and that was probably the extent of her involvement in the expert reports.

Q. What was the purpose of having Robin Cantor or Shireen Meer review the reports?

A. That is typically a process that we take

at BRG where others that have knowledge or expertise may review drafts and provide any comments or insight.

Q. And is it your understanding that the 217.4 hours billed for Robin Cantor were for reviewing those reports?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. No.

Q. What is your understanding of the other tasks that would generate those hours?

A. Well, she has an administrative role on the project. She also was involved in the project in the 2023 time period and the 2024 time period that don't necessarily have anything to do with drafting of the expert reports.

Q. And would the same be true of the 402.8 hours -- 402.8 --

MR. KLOTZBUCHER: Objection.

Q. -- attributed --

MR. KLOTZBUCHER: Sorry.

Q. Would the same be true of the 402.8 hours attributed to Shireen Meer?

MR. KLOTZBUCHER: Objection.

Tosic - March 5, 2026

You may answer.

A. I think that for Shireen, she additionally participated in various conference calls that we had with the DOJ. So those hours were reflect -- would reflect, you know, tasks like that.

Q. Are there any other staff members that you recall participating in those conference calls?

A. Yes.

Q. Who?

A. I believe Sydney Fallone occasionally participated in conference calls. Jill Fitzpatrick participated in conference calls. There may be some others also that occasionally, once in a while, would participate in conference calls.

Q. Okay.

MR. VANSLYKE: Can we go off the record.

THE VIDEOGRAPHER: The time right now is a 11:58 a.m. We are off the record.

(There was a luncheon recess taken.)

Tosic - March 5, 2026

A F T E R N O O N S E S S I O N

THE VIDEOGRAPHER: The time right now is 1:03 p.m. We're back on the record.

D U B R A V K A K. T O S I C,

Having been previously duly sworn was examined and testified further as follows:

EXAMINATION BY MR. VANSLYKE: (Continued)

Q. Ms. Tosic, we were speaking about the invoices before launch, correct?

A. Correct.

Q. And I believe you have previously identified Robin Cantor and Shireen Meer as not staff who you would delegate tasks to, correct?

A. Correct.

Q. I see Himadri Palikhe.

Do you know who Himadri is?

A. Yes.

Q. Are they someone you would consider a staff member?

A. Yes.

Q. And if I represent that they have 43.5 hours billed for a total of $25,012.50, do you have any reason to disagree?

MR. KLOTZBUCHER: Object to form.

You may answer.

A. No.

Q. Do you know who Sydney Fallone is?

A. Yes.

Q. I believe you mentioned her earlier as somebody who might sometimes participate in the Zoom calls, correct?

A. Correct.

Q. If I represent that there are 599.8 hours billed for a total of $331,980, do you have any reason to disagree?

MR. KLOTZBUCHER: Object to form.

A. No.

Q. I believe my names are cut off here, but let me find the full names.

I have a Benjamin Mulholland.

Do you know who that is?

A. Yes.

Q. I only have 10.5 hours for a total of $3,622. Do you have any reason to disagree?

MR. KLOTZBUCHER: Objection, form.

A. No.

Q. Do you know who Jill Fitzpatrick is?

A. Yes.

Q. If I represent that these invoices contain 556 hours for 300 -- $31,586.50, do you have any reason to disagree?

MR. KLOTZBUCHER: Objection, form.

A. No.

Q. Do you know who Austin Salley is?

A. Yes.

Q. And if I represent that the invoices show 573.4 hours for a total of $272,546, do you have any reason to disagree?

MR. KLOTZBUCHER: Objection, form.

A. No.

Q. I may be pronouncing this wrong.

Do Elisabeth Thies --

A. Thies.

Q. -- Thies is?

A. Yes, I do.

Q. And if I represent that the invoices contain 368.6 hours, do you have any reason to disagree?

MR. KLOTZBUCHER: Objection, form.

A. No.

Q. And if I say there is a total for Ms. Thies of $92,824, do you have any reason to

disagree?

MR. KLOTZBUCHER: Objection, form.

A. No.

Q. Do you know who Sanskar Bista is?

A. Yes.

Q. If I represent that the invoices contain 399.8 hours for a total $144,365, do you have any reason to disagree?

MR. KLOTZBUCHER: Objection.

A. No.

Q. Do you know who Joshua Hochberg is?

A. Yes.

Q. And if I represent that the invoices contain 72 hours for a total of $29,880, do you have any reason to disagree?

MR. KLOTZBUCHER: Objection.

A. No.

Q. Do you know who Hanna Scofield is?

A. Yes.

Q. If I represent that the invoices contain 272.95 hours for a total of $91,438.25, do you have any reason to disagree?

MR. KLOTZBUCHER: Objection.

A. No.

Q. Do you know who Spencer Smith is?
A. Yes.
Q. If I represent that the invoices contain four hours for a total of $1,040, do you have any reason to disagree?
MR. KLOTZBUCHER: Objection.
A. No.
Q. Do you know who Emaan Siddique is?
A. Yes.
Q. If I represent that the invoices contain 24.8 hours for a total of $10,292, do you have any reason to disagree?
MR. KLOTZBUCHER: Objection.
A. No.
Q. Do you know who Charlotte Brown is?
A. Yes.
Q. If I represent that the invoices contain 15.5 hours for a total of $4,030, do you have any reason to disagree?
MR. KLOTZBUCHER: Objection.
A. No.
Q. Do you know who Mi Young Kim is?
A. Yes.
Q. If I represent that the invoices contain

136.3 hours for a total of $81,780, do you have any reason to disagree?

MR. KLOTZBUCHER: Objection.

A. No.

Q. Do you know who Audry Sun is?

A. Yes.

Q. If I represent that the invoices contain 190.3 hours for a total of $63,750.50, do you have any reason to disagree?

MR. KLOTZBUCHER: Objection.

A. No.

Q. And last but not least, do you know who Jana Hulsey is?

A. Yes.

Q. If I represent that the invoices contain 45.9 hours for a total of $15,376.50, do you have any reason to disagree?

MR. KLOTZBUCHER: Objection.

A. No.

Q. Other than Robin Cantor and Shireen Meer, are all of the people that I have identified here people that you would consider staff?

A. Staff or senior staff, yes.

Q. How do you distinguish between staff and

senior staff?

A. You would distinguish by their title, their experience.

Q. Are there differences in the work they perform?

A. Yes.

Q. Do you delegate tasks to both staff and senior staff?

A. Yes.

Q. Other than Robin Cantor and Shireen Meer, were these staff and senior staff involved in the work on the Camp Lejeune litigation prior to the work on individual damage calculations?

A. Some of them were.

Q. Was Himadri Palikhe?

A. Yes, I believe she was.

Q. Was Sydney Fallone?

A. Yes.

Q. Was Benjamin Mulholland?

A. Possibly.

Q. Was Jill Fitzpatrick?

A. Yes.

Q. Was Austin Salley?

A. Yes.

Q. Was Elisabeth Thies?
A. I believe so.
Q. Was Sanskar Bista?
A. I'm not sure about him.
Q. Was Joshua Hochberg?
A. Yes.
Q. Was Hanna Scofield?
A. I'm not sure about her.
Q. Was Spencer Smith?
A. I'm not sure.
Q. Was Emaan Siddique?
A. I believe so.
Q. Was Charlotte Brown?
A. No.
Q. Was Mi Young Kim?
A. No.
Q. Was Audrey Sun?
A. No.
Q. Was Jana Hulsey?
A. No.
Q. So I'm going to go through these names again, and I'm going to ask what role each of them had in preparing the reports published.

Can you please describe the role in the

reports performed by Himadri Palikhe?

A. I don't believe that she had any role in preparing the expert reports.

Q. Can you please describe the role in the reports of Sydney Fallone.

A. Sydney verified certain numbers and footnotes in the draft reports.

Q. And --

A. Sorry.

Q. Go ahead.

A. She also helped me prepare the list of materials considered.

Q. Do I understand correctly that she was verifying the numbers and footnotes, but she was not somebody who placed them there?

A. That's correct.

Q. What was the role of Benjamin Mulholland in the reports?

A. I believe that he conducted research.

Q. What type of research?

A. I don't recall.

Q. What was the role of Jill Fitzpatrick?

A. Jill Fitzpatrick assisted me in developing the economic loss models. She conducted

research. She verified my calculations.

Did I say she conducted research?

Q. Yes.

A. She also verified not only the calculations, but also the draft reports. She reviewed deposition transcripts. I think -- I think that's probably the bulk of the work that she conducted.

Q. Did you also review deposition transcripts or did your staff complete that for you?

A. Both. I reviewed a number of deposition transcripts, some of them several times, and I also had staff review some of the deposition transcripts; and I also gave them tasks to search for specific information in the deposition transcripts.

Q. When you say that Jill Fitzpatrick conducted research, what type of research was she conducting?

A. For example, she performed research for data on -- from the Bureau of Labor Statistics. I do recall her doing some research on VA disability benefits.

Q. Do you recall what about the VA disability benefits she was researching?

A. I believe the research that she did involved finding historical benefit data by percent disability.

Q. When you say historical benefit data, you're distinguishing from the present rating, correct?

A. I'm distinguishing that from current benefit amounts based on percent disability. That's what's available online, as well as a couple of years back. What you have to dig for is this data going back in the number of years, a couple years.

Q. So do I understand that this was research about the value of certain percentage ratings in general, not specific to one plaintiff?

A. Correct.

Q. When you talk about Jill Fitzpatrick reviewing your calculations, do you recall which calculations that would be?

A. She reviewed calculations regarding earnings and fringe benefit losses. I believe she also reviewed the calculations of pension losses and household services.

Q. And when those calculations are made, are they made within an Excel spreadsheet?

A. Yes.

Q. And there would be formulas applied to the data within the Excel spreadsheet to produce the calculation, correct?

A. Yes.

Q. When you say that Jill Fitzpatrick reviewed your calculations, do I understand correctly that you were the one who entered the data into the spreadsheet?

A. I would have entered some of the data. I may not have entered all of the data into the spreadsheets.

Q. Would you have been the one that entered the formulas being applied to the data within the spreadsheet?

A. Most of the time, yes.

Q. So when you refer to somebody reviewing your calculations, are you specifically referring to calculations where you entered the formula?

A. Either me or somebody else. That was one of her roles.

Q. Do you recall any specific calculations where somebody else entered the formulas?

A. There may have been times where Jill

Fitzpatrick entered formulas, and I was the one, of course, that reviewed them.

Q. Are there any other individuals that you recall entering formulas for the calculations?

A. I believe Austin Salley may have entered some formulas regarding the calculation of the life care plan, present value.

Q. Would you say that it's standard practice at BRG for more than one person to review calculations?

A. That is typically how we would -- how we like to do it, yes.

Q. Are there any calculations within the Camp Lejeune reports that you believe were not reviewed?

A. I don't think so. I hope not.

Q. Is it your understanding that this multiperson review is a quality control practice?

A. I mean, that's part of it; yes, absolutely.

Q. What is the other part of it?

A. Consistency.

Q. Consistency with what?

A. With, for example, what we say in my

expert report, making sure that what their -- what is reflected in the expert report is consistent with the calculations and the assumptions made in the Excel spreadsheets.

Q. Do you believe the reviewing for consistency in that way avoids mistakes?

A. That's the intention, usually.

Q. Do you believe that when BRG is retained as an expert, the expectation is that the work product will be flawless?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. I think the expectation is that we do the best work that we can.

Q. Do you think expert reports are supposed to contain zero errors?

A. Ideally, yes.

Q. What would it mean to you if an expert report contained an error?

MR. KLOTZBUCHER: Objection.

You may answer.

A. I wouldn't be pleased with it.

Q. What would it mean to you if you found an error in an opposing expert's report?

MR. KLOTZBUCHER: Objection.

You may answer.

A. I would note it. I'm not sure that I would feel any way about it.

Q. So you mentioned Austin Salley, correct?

A. Yes.

Q. Other than being another person who might sometimes enter formulas for the calculations, what other roles did he have in the reports?

A. He did research. He did a review of -- of certain calculations. He also reviewed, as I said, the consistency between the assumptions that are listed in the expert reports and the actual calculations. He may have reviewed -- I believe he reviewed certain sections of deposition transcripts. I think that's pretty much the main roles that he played.

Q. Do Austin Salley and Jill Fitzpatrick review each other's calculations?

A. They may.

Q. Can you describe for me the role that Elisabeth Thies had in these reports.

A. Her role was primarily file management. We would receive documents from the DOJ through an

online system, and her responsibility was to download documents, identify what they are, notify me and the rest of the team what the documents contain. That was her primary role. I believe that she may have done a very limited review, also, of one of my draft reports.

Q. Is it fair to say that those roles included document review?

A. Yes. If Elisabeth Thies reviewed a document and determined that it was not relevant to the report, would it be looked at by anybody else?

MR. KLOTZBUCHER: Objection.

You may answer.

A. It may.

Q. Under --

A. Depends on which documents she was reviewing.

Q. Under what circumstances would that document not be reviewed again?

MR. KLOTZBUCHER: Objection, foundation.

You may answer.

A. As an example, if we received copies of medical records of a particular plaintiff, if she went through the documents and determined that all of

them were medical records, there typically wasn't a process before somebody else would then go in and confirm that all of the records were medical records. I may do a spot check, too. On occasion, I would do that.

Q. And for Sanskar Bista, what was their role in the reports?

A. His role was primarily research and document review and review of publications with data that I used as support for some of my assumptions.

Q. Was his role in document review different from Elizabeth Thies?

A. Yes.

Q. How was it different?

A. It was different in the sense that I would give him a specific task to go through a number of documents and look for specific information.

Q. And other than the publications that you mentioned, what other types of research was he doing?

A. He -- he may have conducted research, again, on the Bureau of Labor Statistics' website. He -- I guess I include, in the word research, also researching the documents that we received from the DOJ looking for specific information.

Q. Is it fair to characterize that as targeted doc review?

A. He did targeted document review, yes. I believe also, that he may have spent some time -- if we received a new batch of documents, his role was also to go through those documents and see what they are, what they contained, as a first review process.

Q. And that part would be similar to the document review conducted by Elizabeth Thies, correct?

A. I think that Sanskar's document review was a little bit more in-depth. Her role was primarily just to identify the types of documents that are contained within, you know, a group of documents.

Q. And for Joshua Hochberg, what was his role in the reports?

A. His role was also to identify key pieces of information that I needed from using the documents that we received on -- from the plaintiffs, on the plaintiffs.

Q. And for Hanna Scofield, what did she do in the reports?

A. Hanna, if I recall, did some deposition

transcript reviews. She also reviewed documents that we received. She may have conducted some research of external sources like the Bureau of Labor Statistics. I think that's -- that's about it.

Q. And Spencer Smith only has 4 hours. Was any of that spent working on the reports?

A. No.

Q. For Emaan Siddique, did they play any role in the reports?

A. I don't think so.

Q. Did Charlotte Brown play any role in the reports?

A. No.

Q. Did Mi Young Kim play any role in the reports?

A. Yes. She -- she worked with me on certain calculations. She reviewed the draft expert reports. She -- she also reviewed documents that we received from the DOJ. She -- yes, I think that's pretty much what she did.

Q. So earlier, you referenced people reviewing your calculations or you reviewing other people's calculations.

When you say that Mi Young Kim worked with you on some calculations, how is that different?

A. I think it's very similar. It's the same.

Q. Would you be preparing the initial calculations with Mi Young Kim?

A. Most of the time, I did. Sometimes she did. Her role was limited in the sense that she came on board later, and so her role was specific to kind of the last part of the drafting of the expert reports.

Q. And what was Audrey Sun's role in the expert reports?

A. Conducting research, reviewing documents, again, received from the DOJ. Reviewing -- looking for specific information I would request from the deposition transcript, reviewing the accuracy of footnotes, helping prepare the documents, materials considered.

Q. And when you refer to conducting research, what type of research was Audrey doing?

A. It was looking for specific information that I would request.

Q. And what was Jana Hulsey's role in the

reports?

A. Oh, very limited.

Q. So would you agree that there are several people who have had a role in preparing these reports?

A. Yes. They were part of the team.

Q. And you described conducting reviews to identify any potential mistakes, correct?

A. The purpose of my reviews was to -- to make sure that the calculations are correct; that the assumptions used are what I wanted to use; that there is consistency between the calculations, the assumptions, the results between the spreadsheets and the expert reports.

Q. So in that description, I did not hear you mention reviewing the individual inputs to ensure there are no errors; is that correct?

A. I did that, too. Absolutely.

Q. And in these review processes, have there ever been mistakes that have been caught and fixed?

A. I'm sure there were.

Q. And when you're working with large sets of data like this, mistakes happen sometimes,

correct?

MR. KLOTZBUCHER: Objection, foundation.

You may answer.

A. Sometimes.

Q. And ideally, they will be caught and corrected?

A. Ideally, absolutely.

Q. Would you agree that notwithstanding quality control practices like those, sometimes mistakes do slip through?

A. Yes.

Q. So earlier, you described Robin Cantor and Shireen Meer's role in the reports as primarily reviewers, correct?

A. Correct.

Q. Is their review different than the review that was occurring with all these staff and senior staff members?

A. It was a one set -- you know, an additional set of eyes by senior individuals with significant experience.

Q. All right. Last time I'm going to go through this list.

Do you know the qualifications of Robin

Cantor?

A. Yes.

Q. What are they?

A. She has a Ph.D. in economics. I believe she has over 30 years of experience.

Q. Do you know the qualifications of Shireen Meer?

A. Yes.

Q. And what are they?

A. She has also a Ph.D. in economics. I believe she has about 20 years of experience.

Q. Do you know the qualifications of Himadri Palikhe?

A. Yes.

Q. And what are they?

A. I believe she has a Ph.D. in economics as well.

Q. Do you know the qualifications of Sydney Fallone?

A. I believe so.

Q. What are they?

A. I believe that she either has a master's degree or an MBA.

Q. Do you know the qualifications of

Benjamin Mulholland?

A. Yes.

Q. And what are those?

A. He has a bachelor's degree.

Q. Do you know the qualifications of Jill Fitzpatrick?

A. Yes.

Q. And what are those?

A. She has a Ph.D. in economics.

Q. Do you know how many years of experience Jill Fitzpatrick has?

A. I would say around 20.

Q. Do you know the qualifications of Austin Salley?

A. Yes.

Q. And what are they?

A. I believe that he has a bachelor's degree.

Q. Do you know the qualifications of Elizabeth Thies?

A. Yes.

Q. And what are they?

A. She has a bachelor's degree.

Q. Do you know the qualifications of

Sanskar Bista?

A. Yes.

Q. And what are they?

A. He has a bachelor's degree.

Q. Do you know the qualifications of Joshua Hochberg?

A. Yes. He has a bachelor's degree. He may have a master's degree, but I'm not certain about that.

Q. Do you know the qualifications of Hanna Scofield?

A. Yes.

Q. What are they?

A. She has a bachelor's degree.

Q. Do you know the qualifications of Spencer Smith?

A. No, I don't.

Q. Do you know the qualifications of Emaan Siddique?

A. Yes.

Q. What are they?

A. I believe that she has a bachelor's degree.

Q. Do you know the qualifications of

Charlotte Brown?

A. No.

Q. Do you know the qualifications of Mi Young Kim?

A. Yes.

Q. What are they?

A. I believe that she has an advanced degree, either a master's or a MBA.

Q. Do you know the qualifications of Audrey Sun?

A. Yes.

Q. What are they?

A. She has a bachelor's degree.

Q. And do you know the qualifications of Jana Hulsey?

A. Yes.

Q. What are they?

A. She has a bachelor's degree.

Q. Okay. I'm going to look back at Exhibit 5 for a minute.

Okay. I'm looking at Bates page 5, which is an invoice dated November 27th, 2024.

Could you attempt to find that page.

A. I will try. I found it.

Q. And do you see the total listed here under Current Charges is $34,890.50?

A. Correct.

Q. And if you look at the following page, Bates page 6, do you see the total amount for Robin Cantor is 8,280?

A. Yes.

Q. Do you see the total amount for Shireen Meer is $5,600?

A. Yes.

Q. Do you see the total amount under your name is 2,856?

A. Yes.

Q. Do you see the total for Jill Fitzpatrick is 702?

A. Yes.

Q. Do you see the total for Sydney Fallone is 9,027,50?

A. Yes.

Q. And do you see the total for Austin Salley is 2,500?

A. Yes.

Q. And the total for Elizabeth Thies is 5,925, correct?

A. Correct.

Q. I will represent to you that that does add up to $34,890.50.

If we turn the page, we see the detailed entries of each individual entering their time, correct? I'm looking at --

A. On page 3 of 6?

Q. Yes.

I'm looking at Bates page 7, correct?

A. Yes.

Q. And is that what you see as the individual time entries?

A. Yes.

Q. Is this an accurate portrayal of how BRG typically records time?

A. Yes, it is.

Q. And am I correct that in each of these invoices, I should be able to add up the hours listed under each person's name, and that total should reflect the total on the previous page which indicates each person's total charges?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Yes, they should add up.

Q. Have you ever encountered a scenario where they did not?

A. No.

Q. If you did, would there be any explanation that comes to mind for why they would not add up?

MR. KLOTZBUCHER: Objection.

You may answer.

A. I wouldn't know what a potential explanation would be. There -- obviously, if there's a difference, there would be an explanation for the difference. I just don't know what that difference could be for the -- what the explanation would be.

Q. So when we spoke about all of the staff members contributing to these reports, there were several people in addition to yourself who conducted research, correct?

A. Correct.

Q. And earlier, you told me that all of the research that you conducted would either be included in the Materials Considered List or cited in the report themselves, correct?

A. Yes.

Q. Would the same be true for the research

conducted by your staff?

A. Yes.

Q. So any research that your staff conducted would be included in either the MCL or cited in the report?

A. Yes, it should be.

Q. Okay. I'm going to set aside Exhibit 5 for now.

MR. VANSLYKE: I am entering as Exhibit 8 the Supplemental Materials Considered of Dubravka Tosic dated February 23rd, 2026.

(Exhibit 8, Supplemental Materials Considered of Dubravka Tosic dated February 23rd, 2026, marked for identification, as of this date.)

Q. Ms. Tosic, have you reviewed this Supplemental Materials Considered List?

A. Yes.

Q. And earlier, you stated that you have not been provided with any new materials to review since this list was produced, correct?

A. Correct.

Q. So this list, plus the original materials considered lists, plus materials cited in

the reports, constitutes everything that you relied upon in preparing these reports, correct?

A. I did not rely on any of the materials in this supplemental list in the preparation of my expert reports, because these materials came afterwards.

Q. Thank you for the clarification.

Did you review these materials between the production of your reports and today's deposition?

A. Most of them, I did.

Q. Are there any on here that you have not reviewed?

A. Yes.

Q. Can you tell me which ones.

A. I did not review the Rebuttal Expert Report Opinion Report of Marjorie Hackett-Wallace, nor the Corrected Rebuttal Expert Opinion Report of Marjorie Hackett-Wallace.

I did not review the Expert Report of Anirban Basu, nor did I review the Materials Considered List for Rebuttal Expert Anirban Basu.

Or the Materials Considered List for 1/20/26 Expert -- Expert Rebuttal report of MHW. I

did not review the Supplemental Materials Considered List for 10/29/25 Export Report of MHW. I did not review the last two items -- the last two bullets, PLG Expert Basu, Bates 01 to 16, and PLG Expert Hackett-Wallace, 67 to 112.

Q. Do you know why these items are on here if you have not reviewed them?

A. They were provided to us.

Q. Is it fair to say that these materials are available for your consideration, but sitting here today, you have not considered the materials you just identified?

A. Yes, I did not review them and/or consider them.

Q. Why not?

A. I believe that the expert reports of Marjorie Hackett-Wallace are -- touch on an area that is outside of my area of expertise; and the same thing with Anirban Basu.

Q. And by an area outside of your area of expertise, are you referring to medical expenses?

A. Medical expenses and medical records, yes.

Q. Do you believe it would be within your

area of expertise to rely upon another expert's tabulation of medical expenses to apply present value calculations?

A. Can you repeat the question, please.

Q. If another expert completes a report identifying medical expenses, would it be within your expertise to rely on that report and apply a present value calculation?

A. Sure. I mean, that's what economists do with life care plans, for example.

Q. Do I understand correctly that you were not asked to apply present value calculations to any of these materials?

A. That's correct.

Q. Have you reviewed any materials prepared by Gregory Russo?

A. I don't believe so.

Q. So it's safe to assume you have also not been asked to apply any present value calculations to numbers identified by Gregory Russo?

A. I believe that's correct.

Q. And you stated that this list was provided after your reports were published in December, correct?

A. These documents were provided after, yes, I issued my expert report.

Q. Do you have any opinions that you intend to offer in this litigation based upon any of the items in this Supplemental Materials Considered list?

A. I have not been asked to. If I'm asked to, I may, but I have not been asked to so far.

Q. Have you independently formed any opinions based on these materials?

A. Yes.

Q. What would those be?

A. Regarding the one-page document provided by Mr. Staller, my opinion is that it was a very limited rebuttal expert report that didn't provide very much information on anything.

Q. Have you independently arrived at any other opinions based on these materials?

A. No, not at the moment.

Q. Where did you obtain these supplemental materials considered?

A. They were sent to us.

Q. By who?

A. By the DOJ.

MR. VANSLYKE: I'm introducing as

Tosic - March 5, 2026

Exhibit 9 the Expert Report of Dubravka Tosic Estimated Economic Loss of Ms. Karen Marie Amsler dated December 15th, 2025.

(Exhibit 9, Expert Report of Dubravka Tosic, Estimated Economic Loss of Ms. Karen Marie Amsler dated December 15th, 2025, marked for identification, as of this date.)

MR. KLOTZBUCHER: I should note that it's been about an hour, if anybody would like a break or not like a break and continue.

MR. VANSLYKE: Would you like a short break?

THE WITNESS: No. I mean, do you want to break? I mean, I'm -- I'm fine. We can go forward a little bit longer.

MR. KLOTZBUCHER: No, I'm looking out for you. So...

THE WITNESS: Okay.

MR. KLOTZBUCHER: Yeah.

THE WITNESS: We can go a little bit longer.

MR. KLOTZBUCHER: Okay.

Q. Does this appear to be your report for plaintiff Amsler?

MR. VANSLYKE: I will note for the record that I have removed Appendix B and C, the Resume and Testimony Lists, so I'm not providing multiple copies.

THE WITNESS: And I believe page 1 is missing.

MR. VANSLYKE: Indeed, it is. I apologize for missing that page somewhere. The questions that I have are related to subsequent pages.

THE WITNESS: Okay.

Q. Are you okay with proceeding without page 1?

A. That's fine.

Q. Okay. So I would like to walk through and I'm sure that I am understanding your methodology in these sections.

So I am beginning on page 6. I'm sorry, page 5 is the heading. On page 5, do you see the section is titled Review and Assessment of Plaintiffs Economic Expert Report?

A. Yes.

Q. And then on the next heading, it says Introduction. And the first paragraph of page 6

provides introductory information about plaintiff Amsler, correct?

A. Correct.

Q. And then the following section is Future Lost Earnings and Fringe Benefits, correct?

A. Correct.

Q. Can you summarize in your own words the methodology that you apply here to identify the future lost earnings and fringe benefits of plaintiff Amsler.

A. This section does not pertain to my calculations. This section pertains to Mr. Staller's calculations.

Q. That is my mistake. Thank you.

Can you summarize here the observations that you are making about Mr. Staller's calculations of these damages.

A. Sure. Mr. Staller, for Ms. Amsler, calculates future earnings and pension losses for 2026, '27 and '28, and my critique of those calculations is that these calculations are based on the assumption that Ms. Amsler will have a relapse of her leukemia, and based on Dr. Erba and his opinions. So she has less than a 5 percent likelihood of

remission.

And my opinion here is that even if one calculates future economic losses for Ms. Amsler, which would include the likelihood that she would indeed, have a relapse, and we're already in 2026, those would need to be -- those calculations would need to be adjusted by this probability that she would actually have a relapse, which Mr. Staller has not done.

Q. And just to clarify, you noted that it is now 2026. But at the time this report was finalized, the calculations were 2026, represented as a future projection, correct?

A. Correct.

Q. Do you recall if any of the other plaintiffs for which you provided reports had a similar projection of potential relapse?

A. Not as explicit, as Mr. Staller does not do these kinds of calculations for any of the other plaintiffs that I reviewed, assuming a future relapse.

Q. Thank you.

And on the following page, under the section for Retirement Benefits, can you briefly

describe your assessment of Mr. Staller's calculations here.

A. Yes. Mr. Staller includes in his calculations of loss -- lost estimated retirement benefits, and I did not see anything in the record that Ms. Amsler had access to a defined contribution plan with a match. I believe that I found one document that showed that there is a defined contribution plan of her prior employer, but that that match was zero.

So I believe that Mr. Staller, in his calculations of retirement benefits, are -- did not consider this information.

Q. And is that document the one cited in Footnote 38?

A. Correct.

Additionally, I did not find any information in the record that Ms. Amsler at her prior job had access to a defined benefit pension plan. So I -- I don't think that Mr. Staller had a basis for -- to include losses related to a defined benefit pension plan for Ms. Amsler.

Q. When you say her previous job, are you referring to the one referenced here, St. Joseph's

Hospital?

A. Correct.

MR. VANSLYKE: I will enter as Exhibit 10 the document with the Bates No. 00284_Amsler_SJ_0000000052.

(Exhibit 10, Separation Notice of Karen Amsler, marked for identification, as of this date.)

Q. Does this appear to be the document cited in Footnote 38?

A. Yes.

Q. And I see in about the middle of the page, under No. 6, there is a line for employer's name, correct?

A. Yes.

Q. And that says St. Joseph's/Candler Health System, correct?

Is that what you see there?

A. Yes.

Q. And do you understand this document to refer to the position we were just discussing at St. Joseph's Hospital?

A. Yes.

Q. I'm looking at 4-B. Do you see that

Section 4 indicates the reason for separation?

A. 4-B?

Q. Well, do you see that -- the Section 4 in general --

A. Yes.

Q. -- says Reason for Separation?

And then do you see that B says If for other than lack of work, state fully and clearly the circumstances of separation?

A. Yes.

Q. And it says Voluntary, correct?

A. Correct.

Q. And for No. 3, it says Period of last Employment, from March 30th of 2020 to December 8th of 2020, correct?

A. I'm sorry, where is that?

Q. It's No. 3.

A. Yes.

Q. Is it your understanding that after she's voluntarily separated after working there for less than a year, would she be retiring?

A. I believe that I reviewed that -- Ms. Amsler's deposition testimony, and it wasn't clear whether her plan was to retire at that time. I

think she discussed retiring and then working. Perhaps, working additionally -- additionally in some other jobs, which I believe she did.

Q. In general, would you understand retirement as something different than voluntary separation?

A. Well, based on her deposition testimony, this is around the time when she was diagnosed with leukemia; and so her diagnosis of leukemia coincides with the timing of this separation as well.

So I don't know whether voluntary would be considered or whether retirement at this particular institution would also be classified as voluntary, or voluntary is something different.

Q. So do I understand correctly your opinion is that a voluntary separation may or may not be a retirement?

A. Correct.

Q. And if I look at paragraph No. 5, is this the paragraph that at the bottom, you believe indicates 0 percent contributions?

A. Yes.

Q. Do you see the second line from the bottom of paragraph 5 says If employee retired,

furnish amount of retirement pay and what percentage of contributions were paid by the employer?

A. Yes.

Q. Is it your understanding that if an employee did not retire, that section would not need to be completed?

MR. KLOTZBUCHER: Objection.

You may answer.

A. I don't know. I don't know how -- what their protocols are in filling this out or not.

Q. So is it fair to say that you do not know for sure whether that 0 percent represents an indication of the contribution or just an uncompleted section of the form?

A. No. What this tells me is that the employer -- employer's contribution, or contributions paid by employer, was 0 percent. Now, whether or not this was filled out because Ms. Amsler retired or not, I don't know what their -- what the -- what this institution's protocols are in filling this particular section out.

But this tells me that the employer contributions were 0 percent, whether she retired or she -- whether she left voluntarily, whether she

retired or both.

Q. But you understand that the If Employee Retired language states that this section would not be applicable if the employee did not retire?

A. Not -- I don't know that as a fact.

Q. And do you see that the rest of that sentence says Furnish the amount of retirement pay and what percentage of contributions were paid by the employer?

A. Yes.

Q. And do you see on the line below that there is a blank and then per month?

A. Yes.

Q. And that blank is not filled in, correct?

A. Correct.

Q. Okay. I will set aside Exhibit 10.

So I'm back on Exhibit 9, and I'm looking at Section D on page 7. That says Probability of unemployment adjustment, correct?

A. Correct.

Q. And would you briefly explain your assessment of Mr. Staller's calculations here.

A. He calculates earnings losses for

Ms. Amsler of her past and her future, with the assumption that she would have had 100 percent probability of remaining employed each and every year.

And in labor economics, we know that that is not the -- that is not a fact. Each one of us has a certain probability of becoming unemployed each and every year, for various factors. And so when you're calculating economic losses, that's one of the adjustments that is typically made to account for a probability of unemployment.

Q. When you have been retained as an economist for a plaintiff in a lawsuit, do you always include the probability of unemployment adjustment in your calculations?

A. Yes. I mean, I use the same methodology whether I'm retained by plaintiffs or defendants. If the -- if we're talking about projections, yes. If -- if the individual, for example, has mitigating earnings showing that they actually worked, then this adjustment obviously would not be applied, because the person was employed.

Q. If the person does not have mitigating earnings, would you apply the same adjustment to past

calculations?

A. Most of the time, yes. I think the individual's circumstances, the facts of the case, is something that I would also look at to make that determination.

Q. Would it not be the case that regardless of somebody's employment status in the past, that status would be concrete?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Can you rephrase the question.

Q. Do I understand correctly that this adjustment is based on the likelihood of somebody being unemployed?

A. Yes. It's a probability.

Q. And if we're looking at past calculations, wouldn't it be true that they are either unemployed or not unemployed?

A. Yes.

Q. If it is definitively one or the other, how would the probability apply?

A. Well, for example, in Ms. Amsler's case where we're calculating past losses, right, earnings losses. And during that time, she -- she didn't work

or -- or worked very seldomly. So you could apply this probability to projected past earnings as well.

Q. I understand. Thank you.

I'm moving on to page 8, Section E for Lost Household Services.

And would you briefly explain for me your assessment of Mr. Staller's calculations here.

A. Yes. So Mr. Staller uses one methodology to calculate past lost household services and a slightly different methodology for calculating future lost household services.

And for the past, what he does is he provides a table with estimated hours of household services based on certain categories and types of household services. And it's not clear what the basis for those categories that he chooses to present in his expert report, what those categories are based on.

What he proceeds to do for the calculation of past household services is he states that he uses a number of different occupational groups, pools their wages, and calculates an average wage.

There is -- I did not see the basis for

the occupations that Mr. Staller chooses to calculate this average wage; which then he uses to calculate the value of lost household services, assuming one hour of household services a week. So that's lost -- that's past lost household services.

For future lost household services, he -- he uses ATUS data, which is a great data source. But he, again, calculates lost household services using occupational groups that are not clear what -- what the basis is for choosing those occupational groups in terms of dollar amounts and -- per hour and the number of hours.

And the -- the additional problem is that it's not clear whether Mr. Staller took into account the documents received on Ms. Amsler and her deposition testimony, where there are documents from the Social Security Administration that show that she stated that she doesn't have any problems conducting any household services. And that is -- at that point, she actually stopped receiving Social Security disability benefits.

So it's not -- it's not entirely clear what the bases are for Mr. Staller's calculations of lost household services.

Q. So I have a few clarifying questions.

A. Sure.

Q. Do I understand correctly that you said for past household services, he identifies essentially a one-hour rate, correct?

A. Correct.

Q. And that would be for each year, correct?

A. Correct.

Q. For future household services, I understand that he has an added component of the average number of hours under ATUS, correct?

A. Correct.

Q. Am I correct that for future lost household services, he also includes the one hourly rate like he does for past household services?

A. I believe that's correct.

Q. So for past household services, it's only the hourly rate, and for future household services, it's both the hourly rate and the total average hours, correct?

A. For future, it's the value of one hour, and plus the value of lost household services using a number of different occupations and household --

types of household services to come up with the number of hours and the average wage.

Q. And I understand you take issue with Mr. Staller's calculations because you don't understand the basis for selecting the types of services that he selected, correct?

A. It's not only the types of services. It's also the occupations that he uses to calculate the average wage used in the calculation of household services.

Q. If that basis were available, do you believe that would resolve some of the issues with Mr. Staller's calculations from your perspective?

A. What do you mean by available?

Q. If you were to review Mr. Staller's report and find that that basis was identified, would that resolve that concern?

A. Not necessarily, because Ms. Amsler herself testified about things that she does, right, in her housework. But also, I think, as I mentioned, there is documentation that shows that she indicated to the Social Security Administration that she has no problem conducting any household services.

So I think if additional information was

available on the types of household services that Ms. Amsler is claiming that she has lost, that she is no longer able to perform, I will definitely consider that and review it. And I would have to also review that in connection with these other documents that have been available so far.

Q. Is it your understanding that the ATUS data relies on certain occupations?

A. Yes.

Q. Do you believe those occupations are different than the occupations that Mr. Staller is basing his calculations on?

A. ATUS data provides the number of hours individuals, on average, spend on various kinds of household services. So there are various kinds of categories of household services. There are I can't remember, seven to ten different kinds of household services. And that -- that data is -- is combined with the hourly wages that are representative of the occupations that are similar to the household services that are performed in each one of these categories.

So what Mr. Staller has done is he has included in his calculations, it seems, it appears,

he -- based on my review of the ATUS data, it appears that he has included in his calculations a number of different kinds of household services, and those -- the valuation of those household services for future losses involves various kinds of occupations. Those -- those two need to match.

And it appears although it's not entirely clear, that for Mr. Staller's calculations, they may match. The problem is that he is basing on the selection of the types of household services he uses for the calculations, and the occupations that he uses as the basis for the hourly wages to calculate the loss of household services, I don't see a basis for those selections.

Q. So I understand there is a second issue related to identifying the services that an individual plaintiff performed prior to the incident and the services they're no longer able to perform, correct?

A. Typically, that's where -- yes. Household service losses would be associated with those types of services that were performed before and are no longer able to be performed.

Q. And do I understand correctly that

you're saying for the household services calculations, Mr. Staller should identify the specific services that are no longer able to be performed, and apply his calculations based on the analogous occupation to those services only; correct?

A. Yes, that's typically how it should be done. What he has done is he has chosen a whole number of different types of household services, and he is assuming that Ms. Amsler has not been able to perform any of those household services since her diagnosis.

Q. I understand that issue.

I believe there is another issue that we started talking about where Mr. Staller identifies the occupations that he is using for his calculations, correct?

A. Yes. For his calculations of the average wage.

Q. Am I wrong in understanding Mr. Staller's use of occupations to be the full spectrum of household service occupations that represent the ATUS data?

A. No. There are many more different kinds of -- of time categories that are included in ATUS

data; that it appears that Mr. Staller did not include them. But it appears, again, that he included a number of different types of household services.

Q. Have you encountered in other contexts economists using banded rates from ATUS data?

A. No, I have not.

Q. Do you know what that refers to?

A. Yes.

Q. What do you understand that to refer to?

A. It's categories of rates that could be applied to different kinds of household services.

Q. Would that be analogous to what Mr. Staller has done here?

A. No, I don't think so.

Q. What is the difference, in your view?

A. Mr. Staller includes again -- and it's not even clear whether the whole list of occupations that he includes and in his expert report as the basis for the calculation of the average wage, whether those occupations are even relevant to the household services that Ms. Amsler claims or Ms. Amsler is no longer able to perform.

So for example, one of the household

services is taking care of the household; cooking and cleaning. That -- occupations that are related to cooking and cleaning, such as cooks and cleaners and dishwashers, are included in Mr. Staller's calculations.

We simply don't know whether based on -- or I don't know based on currently available information, whether cooking and cleaning are the types of services, household services, that Ms. Amsler is no longer able to perform.

Those occupations carry with them different wage rates, right? And there are different ways to calculate wage rates for those occupations. So that's -- that's slightly different than what you mentioned.

Q. Is it fair to say that you have very similar criticisms of Mr. Staller's calculations of lost household services for all plaintiffs for which he calculates lost household services?

A. Yes. Because his methodology is relatively cookie cutter across all of the plaintiffs. He uses a very similar methodology. He uses the same occupational groups for all the plaintiffs. He calculates the past losses in one way

and the future losses in, you know, that way plus using ATUS data. And the only adjustments that he makes in considering the characteristics of the plaintiffs is that he applies geographic adjustments to the hourly wages for the different plaintiffs; but other than that, his methodology is the same across most of the plaintiffs, or all of the plaintiffs that I have looked at.

Q. So I'm moving to the next section on page 10 titled Past Medical and Related Care.

Do you see that?

A. Yes.

Q. And for clarity, am I correct in understanding this to refer to essentially medical care provided at home by family members as opposed to medical care provided in a medical facility?

A. That's my understanding of Mr. Staller's calculations, yes.

Q. And could you briefly summarize your assessment of his calculations here.

A. Well, the calculations that he performs for past medical and related care, and again, this is just past -- past losses, are associated with an estimated value of care that Ms. Amsler's husband

provided to her; and her husband is not the plaintiff in this matter.

So I think that, you know, the first thing is to establish whether losses to the plaintiff's husband are recoverable -- are damages in this particular case. Because they're not damages to Ms. Amsler; they're estimated damages to Mr. Wukitsch.

So that said, if these types of damages are accepted by the judges, again, Mr. Staller uses personal care -- the personal care, health care aides, as an occupation and as the basis for the -- for the wage rates. And it is just not clear whether what kind of services Mr. Wukitsch provided to Ms. Amsler and whether those types of personal medical care services are consistent with what personal and health care assistants provide. So that's -- that's, you know, the first item regarding the occupation chosen that are the basis for the wage rates.

But you know, another -- another aspect of this is that one really needs to pay attention, I think I mention that in my report, that there isn't some double counting here between the calculation of

lost household services and the loss of -- the calculation of lost personal care.

Because for example, personal care, healthcare aides perform shopping, right? That's one of their duties. And if you look at the job description provided for a personal and healthcare assistants, shopping, food shopping is one of the tasks.

If Mr. Wukitsch provided shopping as part of his personal care because Ms. Amsler claims that she was no longer able to, then those types of household services are already accounted for in the calculation of lost household services for Ms. Amsler.

So I think we need to be very specific here about what types of services, when -- and when those services are performed to really be at -- able to value those lost personal care services. Right now, I don't see that we have enough information to perform those calculations.

Q. What would be the issue with double counting?

A. What would be the issue?

Q. Yeah.

A. Well, if we double counted, we would count damages associated with personal and related -- in medical care, and we would calculate the same damages as part of Ms. Amsler's house -- lost household services. So we would be, you know, double counting here.

Q. Is that similar to the concept of double recovery that we discussed earlier?

MR. KLOTZBUCHER: Objection to form.

You may answer.

A. It's similar.

Q. And it is your position that it would be inappropriate to award damages based on double counting, correct?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. In this particular -- in this particular category of economic loss that Mr. Staller calculates, again, I -- I don't think that Mr. Staller has enough information or basis for his calculations; and because of that, there is a risk of double counting, which, you know, is again, not -- not very appropriate.

Q. I'm moving on to page 12, and I see here

we transition -- oh, sorry. One thing before I move on.

Your notes on Mr. Staller's methodology for past medical and related care, is it fair to say that you have similar criticisms in every instance where Mr. Staller calculates past medical and related care?

A. That's correct.

MR. VANSLYKE: Can we go off the record.

THE VIDEOGRAPHER: The time right now is 2:40 p.m. We are off the record.

(There was a recess taken.)

THE VIDEOGRAPHER: The time right now is 2:58 p.m. We're back on the record.

BY MR. VANSLYKE:

Q. Ms. Tosic, I would like to go to page 12 of Exhibit 9 and the section titled Calculations of Economic Loss for Plaintiff Ms. Amsler.

Do you see that?

A. Yes, I do.

Q. Do I understand correctly that in this section, you transitioned from assessing Mr. Staller's calculations to performing your own assessment of her damages here, correct?

A. Correct.

Q. And the first section is Calculation of Lost Earnings, correct?

A. Correct.

Q. And can you briefly tell me about your methodology for calculating her lost earnings.

A. I calculate her past economic losses for '21 and '22 based on the same earning spaces that Mr. Staller uses, and I don't include any losses related to retirement benefits, given that I did not find any documentation or support for that.

I adjust the earnings losses by the probability of unemployment, which is based on the average unemployment rate in Savannah, Georgia, in the Savannah, Georgia metropolitan area. I apply the same effective tax rate to the earnings losses that Mr. Staller uses, and I come up with past earnings loss of 107,000, approximately.

Q. And does this calculation include earning capacity or lost earnings?

A. Well, Mr. Staller, in his expert report, states that he calculates her lost earning capacity.

I take a very similar approach in the sense that I use the same earning spaces that he

does; that the calculations that I perform are only for past earnings losses, not future.

So to the extent that Mr. Staller calculates lost earning capacity, it, you know, could be similar to my calculation of lost earnings. They are, you know, one and the same for past losses.

Q. Do I understand correctly that you're saying for past income-related losses, lost earnings and lost earning capacity are one and the same thing?

A. Yes, only because Mr. Staller's calculations are -- he calls them calculations of lost earning capacity, and I use the same earning spaces as he does.

Q. I understand you're using the same basis.

Do you agree with the label that he's using?

A. I would have to go back to Ms. Amsler's historical earnings to be able to answer that question.

Q. Is it fair to say that sitting here today, your opinion is that the lost earnings may or may not be the same as the lost earning capacity?

A. They may or may not, but again,

Mr. Staller calls his calculations calculations of lost earning capacity. I use the same basis for the earnings loss. I call my calculations, calculations of loss of earnings.

So to the extent that we're both using the same earning basis, in that sense, you know, we could be talking about the same thing. But again, I would have to go back to Ms. Amsler's historical earnings to see whether the basis that I used is actually her earning capacity, her estimated earning capacity.

Q. And in terms of past lost earnings, do you use the same methodology for Ms. Amsler as you do for other plaintiffs for which you calculated past lost earnings?

A. Yes and no. For Ms. Amsler, I only consider her but-for earnings for two years.

For certain other individuals, such as Mr. Hill, I take into account also some projected mitigated earnings, which I don't do for Ms. Amsler.

So Ms. Amsler's earnings losses are based on her but-for earnings, right? Didn't use any potential mitigated earnings. For others, such as Mr. Hill, as I said, I do consider potential

mitigating earnings.

Q. Other than Ms. Amsler's calculations, not including mitigated earnings, would you say that it's the same methodology applied to other plaintiffs' lost -- past lost earning calculations?

A. The methodology is the same in the sense that I consider annual growth rates, and I -- in Ms. Amsler's case, I do adjust for the probability of unemployment. If I recall for Mr. Hill, I don't. And so there is a difference there.

So the methodologies are, you know, similar, but not always the same.

Q. Okay. I'm moving forward to page 13. Section B says Lost Household Services, correct?

A. Correct.

Q. And could you briefly summarize for me your opinions on the lost household services calculation here.

A. Yes. I calculate her lost household services for the period from her diagnosis until April 30 of 2022, when she was no longer deemed disabled by the Social Security Administration, and I rely on The Dollar Value of a Day for -- and I consider household services during this time period

that are inside housework; food, cooking, and cleaning, pets, home and vehicles, household management, shopping, obtaining services and travel for household activity.

And I use The Dollar Value of a Day for these types of household services, and I use that same publication also for the hourly wage, adjusted for the particular metropolitan statistical area; and I calculate these losses for, you know, roughly the two years.

And so that the value of past lost household services that I come up with is about 27,000, approximately.

Q. And in your view, does The Dollar Value of a Day publication supplement or replace ATUS in its calculation?

A. This publication is entirely based on ATUS data, and it's based on ATUS data for a number of years. So it's a combination of ATUS data for I would say, a number of years from the current publication date.

Q. So when you reference ATUS data in your calculations, are you referencing the ATUS data that is contained within The Dollar Value of a Day of

publication?

A. Yes, because that's what I rely on.

Q. Is it safe to assume that the ATUS data contained within the publication would be the same as the ATUS data that is published under ATUS directly?

A. Yes.

Q. Am I correct that The Dollar Value of a Day adds more detail to the ATUS data by itself?

A. It adds more information in the sense that, for example, it provides geographic adjustments that one can use, which the ATUS data does not provide.

Q. In making these calculations, do you still rely on the ATUS data even if it's the ATUS data within The Dollar Value of a Day, for identifying the amount of hours?

A. I rely on the publication Dollar Value of a Day for the number of hours, and also, the hourly wage rate for the services that are -- that are considered.

Q. And when you rely on The Dollar Value of a Day for the number of hours, is the material that you're relying on different than the ATUS data itself?

A. It would be different in the sense that in certain circumstances, I apply a geographic adjustment; and so to the extent that the ATUS data does not have a geographic adjustment, that's the difference.

The ATUS data also, by itself, comes out every year, and The Dollar Value of a Day, the numbers that are provided in this publication, are the culmination of a number of years of ATUS data. So it's not only just one year. It's a number of years that are combined together.

Q. Okay. I'll move on to Section C on page 15, and that section is titled Past Medical and Related Care Loss of Mr. Wukitsch, correct?

A. Correct.

Q. And could you briefly summarize for me your analysis here.

A. I don't provide a number for past medical and related care loss of Mr. Wukitsch. I discuss in paragraph 52 some of the deposition testimony of Ms. Amsler and Ms. Wukitsch that, you know, is pretty limited, and provides a little bit of information, but not enough to be able to provide reasonable and reliable calculations.

Q. We'll move on from this exhibit.

MR. VANSLYKE: I will mark as 11 your report for Mr. Carter.

(Exhibit 11, Expert Report of Dubravka Tosic for Mr. Ronald Carter dated December 15, 2025, marked for identification, as of this date.)

MR. VANSLYKE: I will note that we have page 1 this time.

Q. Does this appear to be the report that you provided for plaintiff Carter?

A. It does.

Q. I'm going to turn to page 6. And do you see that this is, again, a section entitled Review and Assessment of Plaintiff's Economic Expert Report?

A. Yes.

Q. And I see that there is another Lost Household Services section here, correct?

A. Correct.

Q. And we discussed that you had similar criticisms for Mr. Staller's calculation of lost household services for all plaintiffs, correct?

A. Correct.

Q. Is there anything unique to Mr. Carter

that you think needs to be understood in this report?

A. Well, I believe what is unique about Mr. Carter is the deposition testimony of Mrs. Carter and Ms. Allen, who provided some insight into what -- what Mr. Carter did previously and what he was able to do during -- after his diagnosis.

Q. Is it fair to say that that pertains to the basis for these calculations more so than the methodology of the calculations?

A. Yes. What is unique also about Mr. Carter is that in the calculation of lost household services, I calculate based on The Dollar Value of a Day, the annual -- I provide annual estimates of -- of the lost household services, and up to -- from his date of diagnoses to his date of death, I also provide an estimate of the household services that are performed by disabled men as a type of estimated mitigating household services, and the difference between the two is used to calculate the estimated loss.

Q. What is the source for the data on disabled men?

A. It's The Dollar Value of a Day --

Q. Is there a --

A. -- publication.

Q. Is there a reason that would not be applicable to other plaintiffs?

A. Each plaintiff for whom I calculated economic losses are unique and have unique characteristics, and the information that I was able to gather from the various documents is also very unique. So based on their characteristics and the documents and the information collected, you know, is used -- I use as the basis for -- for these calculations.

So for some of the other plaintiffs, I don't take this approach. I take -- you know, for example, from Ms. Amsler, I calculate lost household services for two years, but I don't consider any mitigating lost household services, because the two years that I calculate lost household services is the time when she was dealing with her leukemia actively and was in treatment.

Q. And just to note for clarity, what you just described about using The Dollar Value of a Day for mitigation, that would be relevant to Section 6-B on page 11, which are your calculations instead of your assessment of Mr. Staller's calculations,

correct?

A. Yes, correct.

Q. Is there anything else unique to note about either Mr. Staller's or your calculations of past household services?

A. No, I don't believe so.

Q. And back on page 9, I see another section titled Past Medical and Related Care.

A. Yes.

Q. And we noted that you had similar criticisms of Mr. Staller's methodology for all plaintiffs that he calculates this category, correct?

A. Correct.

Q. And do those criticisms carry over here, or is there anything unique that you think we need to know as to Mr. Carter?

A. I think the criticism is applicable to Mr. Staller's calculations for Mr. Carter as well. Again, I don't feel that we have enough information to be able to reliably calculate such losses at the present time.

Q. Okay.

I will move forward to briefly revisit Section 6-B. I know we talked about it a little bit,

but is there anything else about your calculations that you think is unique and needs to be noted for Mr. Carter?

A. I think -- you know, again, it's listed in my report. What is unique about Mr. Carter is that based on the deposition testimony, the Household Services category that I consider in the calculations is called pets, home and vehicle household services. So that is the type of household services that I consider in my calculations.

Q. Okay. I will move forward to page 14 -- I'm sorry, page 15. Do you see at the top, Section 7 is titled Potential Offsets?

A. Yes.

Q. And can you briefly summarize your approach to calculating these offsets.

A. I don't calculate these offsets. These offsets and the amounts are provided in Doctor G's export report, and I simply provide them here in my expert report.

Q. And am I correct that these are offsets for past Medicare payments, not future?

A. That is my understanding, yes.

Q. Are you offering any opinion as to these

offsets or are you merely restating Dr. G's opinion?

A. I'm not providing any opinions about them.

Q. Okay. I'm done with Exhibit 11.

MR. VANSLYKE: I will mark as Exhibit 12 your report for Mr. Connard.

(Exhibit 12, Expert Report of Dubravka Tosic Report for Mr. Stephen Matthew Connard dated December 15, 2025, marked for identification, as of this date.)

Q. Does this appear to be your report for Mr. Connard?

A. Yes, it does.

Q. I'm going to start on page 6.

Do you see Section 5 titled Review and Assessment of Plaintiff's Economic Expert Report?

A. Yes.

Q. And Section B is titled Calculation of the Marginal FERS Pension Benefit Loss, correct?

A. Correct.

Q. So this is a new section that we have not seen in a previous report, correct?

A. Correct.

Q. Can you briefly summarize your

assessment of Mr. Staller's calculations here.

A. Sure. Mr. Staller calculates losses regarding the FERS pension benefits that Mr. Connard was a member of, and his methodology, which he calls the calculation of marginal pension benefit loss, considers two things. It considers Mr. Connard's but-for pension benefits, and it considers Mr. Connard's -- what I understand Mr. Connard's vested pension benefit, had he stopped working on the date of his death.

And my view is that that is -- this approach is incorrect.

Q. Why do you believe it's incorrect?

A. Because the proper way to calculate the pension, the FERS pension benefit losses, is to compare what Mr. Connard's but-for pension benefits would have been had he remained employed and had he not died versus what Ms. Connard has been getting and will continue to get until her life expectancy. And what Ms. Connard -- what Ms. Connard's benefits are, they are based on the vested pension benefits of Mr. Connard.

What Mr. Staller fails to do is he fails to consider the pension benefits that Ms. Connard has

been receiving prior to -- prior to when Mr. Connard would have started receiving his benefits, and also, the time period from the difference between Mr. Connard's expected life expectancy and Ms. Connard's life expectancy.

So those two chunks is what Mr. Staller is missing from his calculations.

Q. Am I correct in observing that what you just described represents part of the methodology laid out for a calculation of FERS pension loss under Section 6, which is your calculation of economic loss for plaintiff, Ms. Connard?

The calculation of FERS Pension Loss section starts on page 13, F-E-R-S, begins on page 13?

A. That's correct.

Q. Okay. And back on page 7, the heading for Mr. Staller -- your assessment or Mr. Staller's calculation of lost household services begins.

Is there anything that you believe is unique to Mr. Connard in this section?

A. The only thing that is unique is that Mr. Connard's lost household services are calculated from the date of his death until his healthy life

expectancy. So Mr. Staller didn't calculate any -- any lost household services prior to his death; and I take the same approach.

And what is also -- what is -- you know, what is consistent here is also that the calculations that I perform were based on the deposition testimony of Ms. Connard; and again, there are adjustments that are made, considering where Mr. Connard lived while he was alive.

Q. I'm looking at page 10, paragraph 31.

Does this paragraph describe what you're referencing about where he lived while he was alive?

A. Yes.

Q. And then I believe we've already discussed Section D about the death benefits received by plaintiff, correct?

A. I don't believe that we discussed them.

Q. Okay. Would you like to briefly summarize your assessment of Mr. Staller's opinion here?

A. The only thing that Mr. Staller considers in terms of death benefits are the expenses for the funeral; and what Mr. Staller does not take into account are the various death benefits that

Ms. Connard received in connection with Mr. Connard's employment by the Congress.

Q. Do you understand that in this litigation, Ms. Connard is the representative rather than the plaintiff herself?

A. Sure. Yes.

Q. Do you recall when we were reviewing Mr. Carter's report, you noted that the plaintiff's spouse was not the plaintiff, correct?

A. Yes.

Q. And you objected to -- I'll rephrase that question.

You expressed uncertainty about whether the spouse could obtain damages if they're not the plaintiff, correct?

A. In relation to personal and medical care. In terms of the FERS pension benefits, it's very well established that Ms. Connard is, in fact, receiving death benefits based on Mr. Connard's participation in the FERS pension plan. And based on his employment, it's also a fact that Ms. Connard, based on his employment with the federal government, has received certain death benefits.

I include those in my expert report for

consideration. I don't have an opinion on whether they should or should not be considered, but I do include them if they are to be considered.

Q. Are you familiar with the Collateral Source Doctrine?

A. A little bit.

Q. Could you describe your understanding of that doctrine.

A. I think I would butcher it. I don't want to attempt to do that.

Q. So I'm going to move forward to page 11. And I see the heading here for Section B, Calculation of Earnings and TSP Employer Contribution Losses, correct?

A. Correct.

Q. And this is another new section, correct?

A. Yes.

Q. Could you briefly describe for me your methodology here.

A. The methodology includes the calculation of Mr. Connard's lost earnings and lost TSP employer contributions based on but for his death.

I use the same earnings basis as

Mr. Staller, and in terms of -- as the basis for the projections. And in terms of the TSP employer contributions, I use a 5 percent employer contribution rate, which is the rate that is -- that Mr. Staller uses; but it's also the rate that is applicable to employees of the Congress.

I deduct from that the FERS employee contributions that Mr. Connard would have made to continue participating in the FERS pension plan. I apply an effective tax rate and a personal consumption adjustment to take into account the amount of consumption that Mr. Connard would have had from his earnings.

And based on those calculations, which are all in past, because his work life expectancy comes up to the past, is estimated to be 989,000, approximately.

Q. I know you mentioned part of how your methodology is different than the methodology of Mr. Staller when it comes to the FERS pension loss when we were discussing Mr. Staller's analysis.

Is there anything else in Section C beginning on page 13 that you don't feel you've already explained?

A. No. I think I've -- I think we covered it.

Q. And I see on page 15 that you did apply a present value calculation to the FERS pension loss, correct?

A. Yes.

Q. And on page 16, I see calculation of lost household services, correct?

A. Correct.

Q. And is there anything unique to Mr. Connard that you feel we need to discuss, or does this apply the same methodology that we've discussed elsewhere?

A. The only thing that is unique here is that the adjustments to the averly -- average hourly wages are done, considering that he lived in the Washington D.C. Metropolitan area. So that adjustment is made to the average hourly wages that are used in the calculation of lost household services.

Q. Did I misunderstand earlier that your methodology in every case where you calculate past lost household services applies the appropriate geographical rates?

A. Yes.

Q. In what cases would you not apply the appropriate geographical rates?

A. Hypothetically speaking, or --

Q. In --

A. -- what exactly are you referring to?

Q. Let me rephrase my question.

Are there some geographical locations that do not have an applicable rate modification?

A. There may be. I'm not sure.

Q. When you calculate the past lost household services for the plaintiffs in this litigation, do you apply the appropriate geographical modification for each plaintiff?

A. Yes, I do.

Q. Is the unique characteristic here just which geographical location it is?

A. That's correct.

Q. I understand. Thank you.

And do you feel that we've fully discussed the relationship between Section E for past non-medical expenses and Section F for death benefits received by Ms. Connard?

A. I think we covered that.

Q. Okay.

I see on page 18, the top heading says The Present Value of Past and/or Future Lost Household Services, correct?

A. Yes.

Q. Do you apply the present value calculation for each plaintiff that you calculate past lost household services?

A. In the sense that the growth rates in the hourly wage are -- are increased.

Q. And do you apply the present value calculation in each case where you calculate future lost household services?

A. Yes.

Q. All right. I think I'm done with Exhibit 12.

MR. VANSLYKE: I will introduce as Exhibit 13 the -- your report for Mr. Davis.

(Exhibit 13, Expert Report of Dubravka Tosic for Mr. Cometto Davis dated December 15, 2025, marked for identification, as of this date.)

Q. I'm beginning on page 6. Do you see again, Section 5, is titled Review and Assessment of

Plaintiff's Economic Expert Report?

A. Yes.

Q. And Section B is titled Lost Household Services?

A. Correct.

Q. Is there anything that you believe is unique about Mr. Davis that needs to be understood, or does this apply your same criticisms of Mr. Staller's methodology?

A. I think the review of Mr. Staller's methodology follows the same criticisms I have in the reports that we already covered.

Q. And if I move forward to page 10, this is your calculation of lost household services, correct?

A. Correct.

Q. And do you apply the same methodology here or is there anything unique that you believe we need to understand about Mr. Davis?

A. Again, Mr. -- Mr. Davis is unique in the sense that the calculations of lost household services, again, are based on my review of the deposition transcripts and what he previously performed and what he is able to perform now; and so

that is reflected in the -- the types of household services that are considered in the calculations.

And so the types of household services are listed in paragraph 36, and given the information that I had available, I also considered the mitigating household services to reflect some of the household services that Mr. Davis still is able to perform.

And the other unique thing, again, is the geographic area that is chosen for him, for the wages that are considered.

Q. And beyond those details, you are applying the same methodology for this calculation, correct?

A. That's correct.

Q. Okay. I'm going to move forward -- I'm going to jump ahead to page 15.

A. Okay.

Q. And I see Section B, Federal Government Offset Payments, correct?

A. Correct.

Q. And I see again, you are citing to the report of Dr. G, correct?

A. Correct.

Q. Is this another instance where you have no opinion on this and you're restating Dr. G's opinion?

A. That's correct.

Q. Okay. I will go backwards to page 13.

And I see this is the U.S. Department of Veterans Affairs VA Disability Benefits, correct?

A. Correct.

Q. And this is a new offset section, correct?

A. Correct.

Q. Could you briefly describe for me your analysis here.

A. Sure. So Mr. Davis has been receiving VA disability benefits based on 100 percent disability rating associated with his non-Hodgkin's lymphoma diagnosis.

And what -- the methodology that I use is I used information on the VA disability benefits that Mr. Davis has received up to whenever the data ended, and I calculate the value of those VA disability benefits; and up to 2025 and going forward, I use COLA increases to estimate the value of future disability benefits that Mr. Davis is

expected to receive until his life expectancy.

The COLA increases are standard increases that VA -- the VA uses to determine the monthly disability benefits for veterans based on their disability percent rating.

Q. Do I understand correctly that you are identifying the difference between the value of his ratings excluding the NHL from the total value of his ratings including the NHL?

A. I consider the VA disability benefits that are related to his NHL diagnosis, and I calculate their value.

So in my calculations, I don't consider the illnesses that are deemed not related to Camp Lejeune.

Q. And I see here that those not related are rated at 90 percent, correct?

A. Correct.

Q. And when you include the NHL, he's rated at 100 percent, correct?

A. Correct.

Q. In addition to the SMC rating?

A. Right.

Q. So is your analysis here that the

potential offset is the total value of the 100 percent plus SMC rating?

A. The value is related -- is only related to the Camp -- the -- those are that allegedly related to Camp Lejeune. I don't consider -- I take out the amounts that are deemed not related to Camp Lejeune.

Q. So you identify the amount of the award that would be received for those not related to injuries, and you take that amount out?

A. That's right.

Q. Is that correct?

A. Exactly.

Q. So is it fair to say that you're identifying the difference between those two ratings?

A. Correct.

Q. Okay. Is there anything else that you think we haven't discussed yet in terms of your analysis of the VA disability benefits?

A. I calculate their present value using a discount rate. That's about it.

Q. Okay. I'm done with Exhibit 13.

MR. VANSLYKE: I will mark as Exhibit 14 your report for Mr. Gleesing.

Tosic - March 5, 2026

(Exhibit 14, Expert Report of Dubravka Tosic for Mr. Joseph M. Gleesing dated December 15, 2025, marked for identification, as of this date.)

Q. I will jump ahead to page 7.

And do you see heading 5, Review and Assessment of Plaintiff's Economic Expert Report?

A. Yes.

Q. And I see heading B, Lost Earnings at Upjohn/Pfizer, correct?

A. Correct.

Q. Are there any differences in your assessment or Mr. Staller's calculation of lost earnings for Mr. Gleesing?

A. I'm sorry, can you repeat the question.

Q. Do you agree that we've looked at other plaintiffs with lost earnings sections?

A. Yes.

Q. Would you agree that there is a different calculation occurring for Mr. Gleesing than for the previous plaintiffs?

A. Slightly different.

Q. Could you explain briefly your assessment of Mr. Staller's calculation for

Mr. Gleesing's lost earnings.

A. Sure. There are two elements to the calculation of lost earnings for Mr. Gleesing conducted by Mr. Staller. The first one is related to lost earnings at what I would call Pfizer.

Based on Mr. Gleesing's testimony, he decided to accept severance. He decided to accept a severance package provided to him by Pfizer, and his testimony -- he testified that had he not been ill, perhaps he would have remained employed one more year; would have taken the severance package one year afterwards.

The severance I think -- believe -- I believe goes on for 18 months. And what Mr. Staller does, without any basis, is he increases the amount of the severance -- the severance amount in the second year; and there -- I did not see a basis for that growth rate for the severance amount in the second year of the severance package. And typically, when individuals get severance pay, they don't get increases to the severance amount that they receive. That's the criticism regarding lost earnings at Pfizer.

I also include here the criticism

related to the probability of unemployment adjustment that Mr. Staller did not apply to the calculation of lost earnings associated with Mr. Gleesing's work, teaching, and I believe that, you know, this is an appropriate adjustment to be made.

Q. And specific to the probability of unemployment adjustment, is the methodology there the same as the previous time that we talked about that adjustment?

A. Yes, correct.

Q. And I see Section D is titled Past and Future Lost Household Services, correct?

A. Correct.

Q. In terms of past lost household services, is there anything unique to Mr. Gleesing, or are you applying the same criticisms of Mr. Staller methodology as you have elsewhere?

A. I'm applying the same criticism.

Q. And do you feel that we've already covered everything related to your criticisms of future household services or is there more that you think needs to be understood?

A. I believe we've covered it.

Q. So I'm going to turn to Section 11 at

the bottom. I see Section B heading Calculation of Earnings Lost, correct?

A. Correct.

Q. And then that continues on page 12.

And I know you explained your unique criticisms of Mr. Staller's calculations here. Is there anything unique about how you calculate Mr. Gleesing's lost earnings?

A. I think -- I believe I follow the same methodology that I do with other plaintiffs where I calculate lost earnings.

Q. Subject to the things we already discussed about the severance pay and the probability of unemployment adjustment, correct?

A. Correct.

Q. I see on page 13, Section 5 discusses Actual/Mitigated Earnings, correct?

A. Yes.

Q. Is this the first plaintiff where we've seen that section?

A. I believe so.

Q. I know it's a short section, but can you just briefly explain your analysis there.

A. So during the loss period, Mr. Gleesing

had actual earnings with Pfizer, and -- as an educator, and those actual earnings are considered in the calculations.

Q. Thank you.

And on page 14, I see Section C for Calculation of Lost Household Services.

Are you applying the same methodology here as you have for other plaintiffs?

A. I do.

Q. I'm moving ahead to page 17. I see Section A, VA Disability Benefits, correct?

A. Correct.

Q. And are you applying the same methodology here as you do for other plaintiffs in calculating their VA disability benefits offsets?

A. That's correct.

Q. And on page 19, under Section E, Federal Government Offsets, it looks like you are, again, restating the opinions of Dr. G, correct?

A. That's correct.

Q. So you are providing no opinions on the offsets based on Medicare payments, correct?

A. Correct.

Q. And no opinions about services provided

through VHA, correct?

A. Correct.

Q. And no opinions about services paid for by Tricare, correct?

A. Correct.

Q. I'm done with Exhibit 14.

MR. VANSLYKE: I will mark as Exhibit 15 your report for Mr. Hill.

(Exhibit 15, Expert Report of Dubravka Tosic for Mr. Bruce Hill dated December 15, 2025, marked for identification, as of this date.)

Q. I will move to page 9, and I see Section 5 says Review and Assessment of Plaintiff's Economic Expert Report, correct?

A. Correct.

Q. And then on page 10, I see Section B for Fringe Benefit Loss, correct?

A. Correct.

Q. I believe that is a new section to be by itself.

Can you please briefly explain to me your analysis in this section.

A. Sure. Mr. Staller calculates Mr. Hill's

fringe benefit losses by assuming that Mr. Hill had access to a defined benefit pension plan and a defined contribution plan with an employer match.

Based on the information available to me that I reviewed, I concluded that there is documentation to support Mr. Hill having had access to a defined benefit pension plan while employed with the Department of Corrections, but I did not see any evidence that he also had a -- access to a defined contribution benefit plan with an employer match.

And so I believe that Mr. Staller's calculations of Mr. Hill's fringe benefit losses are overstated.

Q. Am I correct that for Mr. Hill, your opinion is solely that there is no basis to believe that he had access to the matching, as opposed to for plaintiff Amsler, where you believe a record specifically indicates that she does not have matching?

A. That's correct.

Q. So you did not find any specific indication confirming that Mr. Hill does not have access to matching?

A. That's correct.

Q. Okay. I see Section C is for Lost Household Services. And is there anything unique to understand about Mr. Hill here or do your previous criticisms of Mr. Staller's methodology apply?

A. Well, it is a little bit unique in the sense that we have vocational expert reports here of Mr. Fryar and Ms. Navarro, and it's not entirely clear whether Mr. Staller even considered them in his calculations of past lost household services. So that's, I think, what is unique about my criticism of Mr. Staller's calculations regarding Mr. Hill.

Q. And what is the role that you believe those life care plans would play as to lost household services?

A. Well, in terms of one of the elements that both Mr. Fryar and Ms. Navarro address in their life care plans is that Mr. Hill will need assistance with lawn care; and lawn care is a type of household services. It is included in a life care plan, but it's a type of household services. And so it's not entirely clear whether Mr. Staller, you know, took those elements of the life care plans into account.

Q. Do you understand the life care plans to address any needs in the past or are they only

projecting needs in the future?

A. They typically provide the basis for care in the future, but they often involve a review of items that have been -- may have been needed in the past. And so that's why I think that it's not clear whether Mr. Staller took that into account or not.

Q. Other than that factor, are you applying the same criticisms to Mr. Staller's methodology here?

A. Yes.

Q. Okay. I will move forward to page 14, and I see Section 6 titled Calculations of Economic Lost for Plaintiff Mr. Hill, correct?

A. Correct.

Q. And then I see Section B, Calculation of Earnings Lost, correct?

A. Correct.

Q. Is there anything unique about your calculations here or are you applying the same methodology that you've used for other plaintiffs?

A. What is unique here about Mr. Hill is that Ms. Navarro, one of her opinions is that Mr. Hill has had a residual earning capacity, and

even though he did not work, he could have performed certain services and could have worked in certain occupations. So I use that as the basis -- those occupations that she lists in her expert report, I use that as the basis for the calculation of projected mitigating earnings for Mr. Hill if he worked full-time or if he worked part-time.

So those projected mitigating earnings are considered in the calculation of Mr. Hill's lost earnings. So that's what's unique about him.

Q. When you refer to earning capacity here, do I understand correctly that you are referring to an analysis that Mr. Hill could have earned this money but did not?

A. Correct.

Q. Do you believe that that analysis would be an indicator that lost earning capacity is being analyzed instead of lost earnings?

A. Well, certainly, in terms of mitigated earnings, Ms. Navarro's opinion is that he had a residual earning capacity, and so that is what I consider in my calculations of earning losses.

In terms of but-for earnings, I project his but-for earnings based on his actual earnings.

Q. So in this case, those are presented as two separate concepts, correct?

A. Well, his -- you know, you can think of his projected mitigating earnings as earnings that he could have earned had he worked. So you can also think of both but-for earnings and mitigating earnings as both following the concept of lost earnings or earnings; either but-for earnings or mitigating earnings.

Q. Am I wrong that they are distinguished in this report?

A. Which ones?

Q. The lost earnings versus lost earning capacity.

A. I don't make that distinction in here. I refer to but-for earnings, and I refer in my report to actual and estimated mitigating earnings. So I don't call them mitigating earnings, mitigating earning capacity. I call it mitigating earnings.

Q. But --

A. What I'm saying is that Ms. Navarro -- these calculations are based on Ms. Navarro's assessment that -- that Mr. Hill is -- it's her opinion that Mr. Hill had a residual earning capacity

and could have worked in certain occupations, which I considered.

Q. Is it your opinion that this report, including your reliance on Ms. Navarro's opinion, treats lost earnings and lost earning capacity as one and the same?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Again, the lost -- the estimated mitigating earnings are based on what I believe is Ms. Navarro's opinion that Mr. Hill had residual earning capacity. I -- I call them estimated mitigating earnings.

Q. So you're saying you use the label estimated mitigated earnings for what Ms. Navarro refers to as his earning capacity?

A. I -- I believe so.

Q. Does your report treat estimated mitigated earnings and lost earnings as one and the same?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Can you repeat the question.

Q. Does your report treat estimated

mitigated earnings and lost earnings as one and the same?

MR. KLOTZBUCHER: Same objection.

A. No.

Q. So I see on page 15, Section 3 is titled Actual and Estimated Mitigated Earnings, correct? Mitigating Earnings. Sorry.

A. Correct.

Q. And this is the section discussing Ms. Navarro's report that we just referred to?

A. Correct.

Q. Is there anything further about this section that you feel needs to be explained?

A. No, I don't think so.

Q. And I see Section 4 on page 16 is titled Fringe Benefits, correct?

A. Correct.

Q. Are you applying the same methodology here as we discussed under your criticism of Mr. Staller's calculation of fringe benefits?

A. In my calculation of lost fringe benefits, I take into account the average estimated employer cost of providing the defined benefit pension plans to employees, and that cost is the

basis for my calculations of lost fringe benefits.

Q. On page 17, I see Section 6 for Earnings and Fringe Benefit Lost, correct?

A. Correct.

Q. Is this essentially compiling the sections we already discussed?

A. Correct.

Q. In Section C, I see the title Calculation of Lost Household Services, correct?

A. Correct.

Q. And are you applying the same methodology as you have for other plaintiffs, or are there things you need to understand about Mr. Hill?

A. For Mr. Hill, what is -- what is unique about him here is that the calculations of lost household services is based on the assistance with lawn care that I provide calculations for.

Q. And you rely upon that as the basis for lost household services, correct?

A. Correct.

Q. Are you otherwise applying the same methodology?

A. Yes.

Q. I see Section D on page 18 titled

Calculation of the Present Value of Medical and Related Care, correct?

A. Correct.

Q. Okay. And do I understand correctly that your role here is to provide a present value calculation of the competing life care plans?

A. I provide a present value calculation using Ms. Navarro's life care plan.

Q. I'm looking at page 26, and the table in the section Estimated Offsets.

I see. We have not reached that part yet. I will come back to it.

Okay. So in Section D, you are only applying the present value calculation to Ms. Navarro's life care plan, correct?

A. Correct.

Q. And can you briefly describe your methodology to do so.

A. What I do is I look at the elements of care that Mr. -- Ms. Navarro has identified in her life care plan. I consider the values that she provides for each type of care as well as their frequency, and based on the value and the frequency, I calculate what the present value of those -- of

that life care plan would be; and I do this for all elements that have information on cost and frequency.

So there are a couple of -- a couple of categories for which either the cost or the frequency was not provided, so I've put that aside and I did not include those in my valuations.

Q. And Section 7 on page 20 is titled Potential Offsets, correct?

A. Correct.

Q. And then on page 21, I see Section A, VA Disability Benefits, correct?

A. Correct.

Q. And are you applying the same methodology here to identify the amount of a potential offset for VA disability benefits?

A. Correct.

Q. On page 23, I see Section B, Present Value of Future Medical and Related Care Covered by Federal Government based on VA Rates and Medicare Rates, correct?

A. Correct.

Q. And in this calculation, are you relying on the report of Dr. Miller?

A. Yes, I am.

Q. And what are you relying on that report for?

A. I'm relying on Dr. Miller's report for VA rates and Medicare rates for the elements of the life care plans provided by both Mr. Fryar and Ms. Navarro.

Q. And can you briefly summarize your calculations here.

A. Sure. So for -- starting with Mr. Fryar's export report and the elements contained in it with respect to the life care plan, I take those elements and their frequency, and I apply the VA rates that are provided in Dr. Miller's expert report. And since -- since Mr. Fryar's export report provides a high range and a low range, I provide two alternative calculations; one using his low range and another one using his high range.

I do the same thing for Ms. -- using Ms. Navarro's expert report, where I take the elements that she has identified in her expert report, their frequency, and I apply the VA rates based on Dr. Miller's expert report. And again, since Ms. Navarro also provides a low and a high range in terms of frequency, I have two calculations

here, using -- one using her low range and another one using her high range.

I repeat these calculations considering Medicare rates. So in the first instance, I rely on the VA rates provided by Dr. Miller, and in the second go-round, I rely on the Medicare rates that Dr. Miller provides. And I repeat the same calculations; one using the low and the high estimates from Mr. Fryar's report, and the low and the high estimates from Ms. Navarro's expert report.

Q. When you rely on Dr. Miller's report, is it your understanding that Mr. Hill will receive coverage from both the VA and Medicare?

A. I don't make that determination.

Q. So if I turn back to page 26, in the table section titled Estimated Offsets, am I correct that you have identified the amounts that you were just describing as the high range and low range for both Mr. Fryar and Ms. Navarro?

A. In Section 8?

Q. Yes.

A. Correct.

Q. And I see a line for the VA coverage using Mr. Fryar's life care plan, and the line for VA

coverage using Ms. Navarro's life care plan, correct?

A. Correct.

Q. And then I see a line for Medicare coverage using Mr. Fryar's life care plan, and another line for Medicare coverage using Ms. Navarro's life care plan, correct?

A. Correct.

Q. So in this table of offsets, is it your understanding that these numbers should be added together in any way?

A. I think that they should be considered individually, because they are based on Mr. Fryar's expert report using VA rates; and then Mr. Fryar's expert report using Medicare rates. Two different types of rate bases.

Q. Is it your understanding that the services outlined in Mr. Fryar's life care plan would be covered either by the VA or by Medicare?

A. Again, I don't make that determination.

Q. Are you providing any opinion on the amount of offsets that should be provided based on VA coverage of Mr. Fryar's life care plan?

A. The only opinion I provide is related to the present value of the life care plan using

Mr. Fryar's life care plan expert report, and based on either VA rates or Medicare rates. So I'm providing an opinion on what their present value is, and nothing more than that.

Q. So you have no opinion on whether a service will be covered by the VA as opposed to by Medicare?

A. That's correct.

Q. Are you offering an opinion that the services identified in the life care plans would be covered by either of them?

A. I don't have an opinion on that.

Q. So your opinion is limited to the present value of the coverage, correct?

A. Correct.

Q. So you are not offering an opinion that any coverage will actually be provided, correct?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. Right. I believe that's outside of my area of expertise.

Q. So I'm back on page 23, Section B.

Do you believe we've fully discussed your analysis in this section?

A. I believe so.

Q. And on page 26, I see Section C at the top, Federal Government Offset Payments, correct?

A. Correct.

Q. And is this another section where you are simply restating Dr. G's opinions?

A. That's correct.

Q. So you have no opinion on offsets for medical services paid for by Medicare, correct?

MR. KLOTZBUCHER: Objection, form.

A. That's correct.

Q. I'm sorry, I'll clarify.

You have no opinion on offsets for past medical services paid for by Medicare, correct?

A. That's correct.

Q. And you have no opinion about past medical services provided by the VHA, whether outpatient or inpatient, correct?

A. Correct.

Q. Okay. I'm done with Exhibit 15.

MR. VANSLYKE: I will mark as Exhibit 16 your report for Mr. Keller.

(Exhibit 16, Expert Report of Dubravka Tosic for Mr. Scott Keller dated December 15,

2025, marked for identification, as of this date.)

Q. Turning to page 9, I see Section 5 titled Review and Assessment of Plaintiff's Economic Expert Report, correct?

A. Correct.

Q. And Section B, Lost Household Services, correct?

A. Correct.

Q. Is there anything unique to understand about Mr. Keller or are you applying the same criticisms of Mr. Staller's methodology as you have for other plaintiffs?

A. I think the criticism is pretty consistent with the other plaintiffs.

Q. And on page 12, I see Section C, Past Medical and Related Care.

And I understand this to be another section referring to essentially, home care provided by family members, correct?

A. Correct.

Q. And are you applying the same criticisms here as you have for other plaintiffs?

A. Pretty much so, yes.

Q. Is there anything unique that you feel we need to understand about Mr. Keller?

A. Yes. I think one of the things that is unique is that Mrs. Keller testified in her deposition that she provides caregiving to her sister, and given this information, if I were to calculate losses related to personal care -- personal medical care provided by Ms. Keller to Mr. Keller, I would want to know what her hourly wages for the caregiving that she's provided -- that she has been providing to her sister. That may be a useful data point to consider. I don't know if I would use it, but I would definitely want to look at it.

And it's just not clear whether Mr. Staller at all took that into account in his calculations. Again, he relies on the hourly wage rates for personal care and healthcare assistance, and it would be useful to know what -- Mrs. Keller's actual hourly wages compared to the averages.

Q. Other than that factor, are you applying the same criticisms?

A. Yes.

Q. I'm moving on to page 14 where I see Section 6 titled Calculations of Economic Loss for

Plaintiff Mr. Keller.

And then on page 15, I see Section A, Calculation of Lost Household Services, correct?

A. Correct.

Q. And are you applying the same methodology to calculate those lost household services, or is there anything unique that we need to -- that you need to understand about Mr. Keller?

A. What is unique about Mr. Keller is during the period of loss, he has children in the household. And when selecting data from The Dollar Value of a Day, the age of the youngest child is taken into account to determine the size and character of the household.

Q. Other than that factor, are you applying the same methodology?

A. Yes.

Q. Okay. On page 18, I see Section B, Past Medical and Related Care Loss of Mrs. Keller.

And are you applying any unique analysis here other than wanting to know her existing hourly rate?

A. Well, I think what's also unique about these calculations is that it's again, important to

distinguish between the time Mrs. Keller has been spending taking care of her sister versus taking care of Mr. Keller.

So I think when one would perform some -- such calculations, that kind of information would be useful to have.

Q. Other than that factor, are you applying the same analysis as you have for other plaintiffs that have claimed past medical and related care?

A. I'm not doing an analysis for this type of loss. I'm just providing a criticism of what Mr. Staller did.

Q. Fair enough.

Your criticism is the same otherwise, correct?

A. Correct.

Q. I'm moving forward to page 19. I see Section 7 titled Potential Offsets, and then I see Section A titled U.S. Department of Veterans Affairs VA Disability Benefits, correct?

A. Correct.

Q. I am on page 20, looking at paragraph 55.

A. Okay.

Q. Can you read paragraph 55 in its entirety, and let me know when you're finished.

A. Sure.

Q. Do you understand paragraph 55 to describe identifying the difference between the total amount of benefits that he is receiving versus the amount of benefits that he would be receiving absent his Camp Lejeune injuries?

A. The calculations that are described in paragraph 55 consider Mr. Keller's illnesses, except his heart-related illnesses, and if you take out his heart-related illnesses from the picture, his combined disability percent rating is 90 percent.

So what I do is he received a rating related to his leukemia in 2022. Up until then, it was other illnesses at 90 percent. So I'm sorry, it's the other way around. His heart-related illnesses, he received a rating of around 2022. So up until then, it was -- he had a 90 percent rating. So I'm able to use his actual monthly amounts up until that point.

And afterwards, I refer to VA compensation tables using a 90 percent rating, and I -- considering everything except the heart-related

illnesses. And so the 90 percent ratings and the monthly benefit amounts is what I use in my calculations.

Q. Do I understand correctly that this is essentially presenting two hypotheticals; one where the heart-related illnesses are found to be related to his exposure at Camp Lejeune, and one where his heart-related illnesses are found to be unrelated?

A. Correct.

Q. And is your opinion that in each of those examples, separately, the methodology would still be to identify the difference between benefits received for conditions related -- apologies. Let me rephrase.

Is your understanding that the methodology could still be to identify the difference between the total benefits being received versus the benefits that would be received for unrelated conditions by themselves?

A. So what I do here is when it comes to all illnesses, so taking into account all illnesses including heart-related illnesses, his disability rating is 100 percent. And so there is no difference there to be calculated. I consider the total amount

of his monthly VA disability benefits in my calculations.

In the second scenario where I assume that all of Mr. Keller's illnesses are related to Camp Lejeune except the heart-related illnesses, it's clear that his combined rating in this scenario would be 90 percent. So I don't calculate a difference between 100 percent and 10 percent. I calculate -- I take what the VA compensation figures are using the 90 percent combined rating, and those monthly benefit amounts are the basis for my calculations of the VA disability benefits.

Q. When we discussed the offset calculation related to VBA disability benefits before, do you recall discussing finding the difference between the total award versus the amount that would be received only for those conditions unrelated to Camp Lejeune?

A. Yes.

Q. And the increase from what would be received for the conditions unrelated to Camp Lejeune to the total that's actually being received is the amount that you identified as being received due to the Camp Lejeune-related ratings, correct?

A. Correct.

Q. For Mr. Keller, in the hypothetical where the heart-related illnesses are unrelated, wouldn't that methodology require identifying the value that would be received for the heart-related conditions by themselves and subtracting that from the total that is actually being received?

A. I think that this is a much simpler scenario, given that his disability ratings were 90 percent prior to August 2022, and that his combined disability percent rating without the heart-related is again, 90 percent.

So it's simple just to go to the tables and look up the amounts that are -- that are at 90 percent. I didn't take the next step to calculate the differences, because this is a lot more straightforward than some other ones.

Q. Sticking with the hypothetical where the heart-related illnesses are found unrelated, if the heart-related illnesses were rated at 100 percent by themselves, wouldn't that absorb all of the benefits received for other conditions?

A. I would have to run the VA calculator to see, because he has a number of illnesses, and I would have to see how -- the combined rating

calculations are not straightforward like that. You have to take the individual ratings for every single disease and see what the ratings turn out with or without. So it's not -- it's not a straightforward calculation like you say.

Q. So my understanding of your methodology for this process for other plaintiffs is that you take the total award and subtract the award that would be received if the plaintiff only had their unrelated injuries, and you identify the difference as the increased amount received due to the Camp Lejeune-related injuries, correct?

A. Correct.

Q. In the hypothetical where the heart-related illnesses are found to be unrelated, my understanding of that methodology would be to take the total that's being received and identify the amount that would be received for only the unrelated injuries, i.e., the heart-related illnesses, and the difference would be the increased amount received due to the Camp Lejeune-related illnesses; is that correct?

A. Correct.

But you would need to calculate -- you

would, again, need to go to VA calculator and calculate what the cumulative amount is without the heart-related rating. That's what you would have to do. So it's not -- you would have to enter every single disease that he received a rating for in the calculator with and without the heart-related disease to see what percent. It's not necessarily if he received 100 percent rating for heart-related illnesses that suddenly, all the VA disability benefits that are Camp Lejeune-related would become zero. And the reason for that is because he has a number of illnesses, and every single illness has an associated percent disability rating. So you would have to do that calculation really to see how the numbers pan out.

Q. So my interpretation of these calculations, again, under the hypothetical that the heart-related illnesses are found unrelated, is that you have essentially applied the inverse calculation to what you have applied for other plaintiffs.

Do you disagree with that?

A. I think what I did is I calculated the combined rating by taking out the heart-related illnesses is 90 percent. And so based on the

90 percent rating, I went to the VA -- I looked at his actual VA benefit amounts, and in order to project into the future, I used the 90 percent rating that's available in the tables.

So it's not the inverse. It's actually just a more straightforward calculation for him, for this scenario.

Q. So your opinion today is that you are applying the same methodology to calculate this offset for Mr. Keller as you have for the other plaintiffs?

A. Well, it's the same methodology in the sense that I -- in this particular scenario, I calculate what the cumulative percent disability is for -- for illnesses that are related or allegedly are related to Camp Lejeune. And since that is 90 percent and he had 90 percent before, I'm able to use the monthly amounts straight from the tables.

Q. So if I represent to you that this analysis is the backwards version of the analysis applied to other plaintiffs, you would disagree?

MR. KLOTZBUCHER: Objection, form.

You may answer.

A. I'm not sure that it's backwards. I

think it's just more straightforward.

Q. If I represent to you that the calculations here are incorrect according to the methodology applied to other plaintiffs' VBA offsets, you would disagree?

A. I would have to go back to the calculations and review them --

Q. So you --

A. -- to respond.

Q. So you have no opinion on whether or not you agree with me that these calculations are incorrect?

A. Not at this time.

Q. All right. Moving to page 22.

Paragraph 58 is another example where you are simply restating Dr. G's opinions, correct?

A. Correct.

Q. Okay. I'm done with Exhibit 16.

MR. VANSLYKE: We can go off the record.

THE VIDEOGRAPHER: The time right now is 4:47 p.m. We are off the record.

(There was a recess taken.)

THE VIDEOGRAPHER: The time right now is 5 p.m. We're back on the record.

BY MR. VANSLYKE:

Q. I'm going to introduce as Exhibit 17 your report for Mr. Kidd.

(Exhibit 17, Expert Report of Dubravka Tosic for Mr. Robert A. Kidd dated December 15, 2025, marked for identification, as of this date.)

Q. So Ms. Tosic, in this report, I notice that there is no assessment of Mr. Staller's opinion, correct?

A. That's correct.

Q. Is that because Mr. Staller did not provide any reports related to Mr. Kidd?

A. That's probably true.

Q. Looking through this report, it appears to me that the only section that may be an opinion is Section 3 titled Federal Government Offsets.

Do you agree?

A. That is included in my report, but again, I don't have an opinion on offsets.

Q. So this is another section where you are restating Dr. G's opinion?

A. Correct.

Q. And it appears to me that nowhere else

in this report are you providing an opinion on either damages or offsets for Mr. Kidd; is that correct?

A. Correct.

Q. Okay. Done with Exhibit 17.

After having gone through these reports, are you aware of any other opinions that you intend to offer as to these eight plaintiffs?

A. Not at the moment.

Q. And sitting here today, is there anything about the reports for these eight plaintiffs that you believe needs to be supplemented or amended?

A. I would want to look at the VA disability benefit calculations for Mr. Keller, and at the time I will evaluate whether my calculations stand or whether they need to be supplemented. At this point, I don't know.

Q. Thank you.

I'm going to refer back for a moment to Exhibit 14, which is the report for Mr. Gleesing.

I'm going to refer to Appendix A, Table 2. Please let me know when you're there.

A. Okay.

Q. Looking at this table, I see a column titled Present Value of Earnings Loss Less Taxes,

correct?

A. Correct.

Q. And it appears to me that except for the last number, these values do not change from the previous column Earnings Loss Less Taxes, correct?

A. Correct.

Q. Are you aware of a basis to conduct a present value analysis on past losses?

A. Sometimes you can do that, yes.

Q. And what would be the reason to do so?

A. A reason could be that I'm asked to do it. A reason could be if the opposing expert has done it.

Q. Can I assume you were not asked to do so here?

A. Yes.

Q. So looking at the first row under those two columns, I see that in 2016, the Earnings Loss Less Taxes was 4,853, correct?

A. Correct.

Q. And then in the following column, the 2016 Present Value of Earnings Loss Less Taxes is also listed as 4,853, correct?

A. Correct.

Q. If an individual had $4,853 in 2016, would that be worth $4,853 today?

A. Probably not.

Q. Can you explain why.

A. Because the time value of money.

Q. What does that mean?

A. That means that $4,000 ten years ago is worth less today.

Q. It's worth less today?

A. Yes.

Q. How does it become worth less today?

A. Because there are -- what you were able to buy with $4,000 back in 2016, due to inflationary pressures from year to year, you are able to buy less with $4,000 today. That is the time value of money.

Q. I understand.

So in order to achieve the same value today that $4,853 would have achieved in 2016, it would require a greater amount of money, correct?

A. Today, yes.

Q. Have you ever applied present value calculations to past losses in that way?

A. I believe I have.

Q. And if you had been asked to do so in

this case, you could have?

A. I could have, yes.

Q. I am setting aside Exhibit 14.

Wouldn't the same rationale apply to medical expenses incurred in the past?

MR. KLOTZBUCHER: Sorry. Objection, form.

You may answer.

A. Possibly.

Q. Do you believe that it would be unreasonable to conduct such a past value -- I apologize.

Do you believe it would be unreasonable the conduct such a present value calculation for past medical expenses?

A. I guess I would need a little bit more information about this hypothesis to be able to answer that question.

Q. So sitting here today, you do not hold an opinion that that would be unreasonable?

A. It's -- it's -- it may not be unreasonable. I would need a little bit more information.

Q. And if you had been provided with past

medical expenses and asked to conduct a present value calculation for those expenses, you would have been able to make that determination at that time?

A. Possibly.

Q. Have you ever conducted a present value calculation for past medical expenses?

A. No.

Q. Are you aware of other economists who have?

A. No, I'm not.

Q. And I understand that you have not reviewed the reports of plaintiffs' experts, Marjorie Hackett-Wallace or Anirban Basu, correct?

A. Correct.

Q. And you have not reviewed the reports of the BRG employee, Gregory Russo?

A. Correct.

Q. But you are aware that he is retained in this litigation, correct?

A. Correct.

Q. Have you discussed this litigation with him?

A. No.

Let me stand corrected. I did discuss

this litigation once with him.

Q. When was that conversation?

A. Around the time when he was being considered for retention. So before he conducted any work.

Q. Are you generally aware of the topics that his report addresses?

A. No.

Q. You have not provided any opinion as to past medical expenses as damages in your reports, correct?

A. That's correct.

Q. And to the extent that your reports contain statements about past medical expenses as offsets, you are only restating the opinions of Dr. G, correct?

A. Correct.

Q. In general, would you agree that an expense must first be incurred in order for that expense to be paid?

MR. KLOTZBUCHER: Objection.

A. Generally speaking.

Q. For example, BRG does not get paid for your work as an expert unless you perform such work

resulting in a bill for services, correct?

A. That's usually the case.

The exception is in cases where we ask for a retainer before any work is performed, so BRG is paid in advance of any work being performed.

Q. In that instance, is BRG incurring an obligation to perform that work?

A. The obligation comes from the contract that is signed.

Q. And the contract is the basis for the retainer payment, correct?

A. Usually, yes.

Q. From an economic perspective, would you agree that if the government paid for a past medical expense, there must have been an expense incurred that needed to be paid?

MR. KLOTZBUCHER: Objection.

A. I think this is outside of my area of expertise.

Q. So you have no opinion on that topic?

A. No.

Q. When you analyze VBA disability benefits, do you utilize the same life expectancy as Mr. Staller?

A. I do, with the exception of Mr. Davis, I believe.

Q. And why is that different?

A. Because Mr. Staller did not produce a report back in February 2025 for Mr. Davis, and I did; and in preparing my expert report, I had to consider Mr. Davis' statistical life expectancy. And so in my December report, I used -- continued to use the same methodology.

Q. Do you think there are any issues caused by using different life expectancies to calculate damages than to calculate offsets?

A. Not necessarily.

Q. Why not?

A. If the life expectancy estimates are close, the -- any differences may be relatively small. So it wouldn't matter.

Q. Are you aware that the VA makes its own internal projections about future obligations to disability recipients?

MR. KLOTZBUCHER: Objection.

A. I'm vaguely aware of that, yes.

Q. Are you aware that in doing so, the VA uses specific veterans' life tables?

A. No.

Q. If you had been aware of that, would you have also used veterans' life tables for your VBA offset calculations?

MR. KLOTZBUCHER: Objection.

You may answer.

A. I would consider them. I'm not sure at this point whether I would use them.

Q. Setting aside the issue about your calculations of VBA benefit offsets for Mr. Keller, is it still your opinion that for the other plaintiffs, you identify the offset by subtracting the amount that the plaintiff would receive for the unrelated conditions from the total amount that they receive?

A. Correct.

MR. VANSLYKE: I will introduce as Exhibit 18 -- strike that.

Q. Will you refer back to Exhibit 15, please. And this is the report for Mr. Hill. And I am looking at the very last page of the Materials Considered.

So in that table, do you see where the Bates numbers change from starting with three zeros

to starting with CLJA?

A. Yes.

Q. The second to last Bates range starting with three zeros, I read 00028_HILL_VBA_0000000001; is that correct?

A. Sorry, can you repeat it.

Q. I see 00028_HILL_VBA_ and then nine zeros, and the number 1.

A. Yes.

Q. And then the ending Bates of that range is the same intro, and the ending Bates page ends in 11947, correct?

A. Correct.

Q. And then if you go down to the entries beginning with CLJA, second to last one of those is CLJA_VBA_9 zeroes and 1, correct?

A. Correct.

Q. And the ending Bates page is the same preface, and then ending with the numbers 22, correct?

A. Correct.

Q. Would you agree that CLJA_VBA_00000000, and then 19 falls within that range?

A. Yes.

Q. Can I assume that you have reviewed Bates No. CLJA_VBA_0000000019?

A. I would have to review the document to see if I reviewed it in the past.

Q. I will represent to you that it is a spreadsheet provided by the VBA that includes detailed entries of each plaintiff's individual ratings over time, awards over time, and payments over time.

Does that sound familiar?

A. It does, in the sense that what I referred to was an Excel spreadsheet with that information.

Q. And to clarify, that was an Excel spreadsheet that you could manipulate, not a screenshot of an Excel spreadsheet, correct?

A. It's an Excel spreadsheet.

Q. Okay.

MR. VANSLYKE: Now I will introduce as Exhibit 18 an excerpt from that spreadsheet, and I'll represent that this is the data from the Ratings tab filtered to plaintiff Davis, and sorted in reverse chronological order by the begin date of each rating.

Tosic - March 5, 2026

(Exhibit 18, Excerpt from Bates No. CLJA_VBA_0000000019, marked for identification, as of this date.)

Q. Do you see an entry on August 26, 2014 for left ankle strain with left Achilles tendonitis?

A. Yes.

Q. And do you see the Percent Number column to the left of the Begin Date column?

A. Yes.

Q. Do you understand that that's the rating percentage for this rating?

A. This is the percent rating for this diagnosis.

Q. Correct.

And do you see that it says 20 percent?

A. Yes.

Q. And then if we go up to October 3rd of 2017, do you see that it says Left ankle strain with left Achilles tendonitis rated for 100 percent?

A. Yes.

Q. And then if we go up to January 1st of 2018, it says Left ankle strain with left Achilles tendonitis rated for 20 percent, correct?

A. Correct.

Q. And then on December 24th of 2018, it says Left ankle strain with left Achilles tendonitis rated for 10 percent, correct?

A. Yes.

Q. Would you agree that this is an example of a rating for the same condition fluctuating up and down?

A. Yes.

Q. If we apply the methodology that you described for calculating the VBA offsets where we subtract the amount of benefits received for unrelated conditions from the total amount of benefits received, that difference would change if an unrelated conditions rating changes, correct?

A. It may or may not.

Q. There is at least a potential for that difference to change based on an unrelated conditions rating changing?

A. There's a potential, but we don't know for sure.

Q. And if, for example, Mr. Davis' left ankle strain with left Achilles tendonitis were to some day return to 100 percent disability rating, do you believe that would cause a change in the

difference between those two numbers?

A. I'm sorry, which two numbers?

Q. The difference between the amount received for the unrelated conditions subtracted from the total amount received.

A. It could. It may.

Q. I will set this exhibit aside.

MR. VANSLYKE: I will introduce as Exhibit 19 another excerpt from the same spreadsheet, and I will represent that this one is also from the Ratings tab, this time filtered to plaintiff Hill.

And it appears that I did not sort this one by the begin date, so it is only the Ratings tab filtered to plaintiff Hill.

(Exhibit 19, Excerpt from Bates No. CLJA_VBA_0000000019, marked for identification, as of this date.)

Q. Do you see on the third line Degenerative changes lumbar spine?

A. Yes.

Q. And at that point in time, it appears that this has not received a rating percentage, correct?

A. Correct.

Q. Do you understand generally what a degenerative condition is?

A. Generally.

Q. Can you provide for me, to the best of your knowledge, what a degenerative condition is.

A. A degenerative condition is a condition where something is -- has, I guess, reduced capacity.

Q. Do you understand degenerative to mean that the condition is expected to get worse over time?

A. No. No, I don't have that knowledge.

Q. All right. I will move on from Exhibit 19.

I will represent that this is the same spreadsheet with the Awards tab filtered to plaintiff Hill, and this will be Exhibit 20.

(Exhibit 20, Excerpt from Bates No. CLJA_VBA_0000000019, marked for identification, as of this date.)

Q. So this spreadsheet, based on the number of columns, runs onto the following page.

Do you understand that the amount a veteran receives in VBA disability benefits changes

based on the number of dependents that veteran has?

A. Yes.

Q. Do you understand that for purposes of that modification, a spouse is covered as a dependent?

A. Yes.

Q. And if we look at the second page, do you see the second column is the spouse flag?

A. Yes.

Q. Do you understand that to indicate whether the particular award shown includes a modification for a spouse as a dependent?

A. That's correct.

Q. And do you see that for part of the time, Mr. Hill received the spouse modification?

A. That's correct. And I may have mentioned that in my expert report, too.

Q. So is it your understanding that at some point in time, Mr. Hill no longer received the spouse modification?

A. Correct.

Q. And is it your understanding that that would decrease the amount of his award?

A. Yes.

Tosic - March 5, 2026

MR. KLOTZBUCHER: Can I get a time check.

THE VIDEOGRAPHER: We've been on the record for six hours, 30 minutes.

MR. KLOTZBUCHER: Thank you.

Q. Are you aware that the three other plaintiffs for whom you've calculated VBA offsets, Mr. Davis, Mr. Gleesing and Mr. Keller, all currently are receiving an award based upon having a spouse as a dependent?

A. I believe that I'm aware about Mr. Davis. I don't recall that to be the case for Mr. Keller; and who else did you say?

Q. Mr. Gleesing.

A. Mr. Gleesing.

Q. If I represent to you that that is the case for all three of them, do you have any reason to disagree?

A. No.

Q. You said you recall that for Mr. Davis, correct?

A. Correct.

Q. Would you agree that it's possible that Mr. Davis' spouse could die before he dies?

A. I mean, it's possible.

Q. Would you agree that it's possible that Mr. Davis and his spouse could get divorced?

A. Again, it's possible.

Q. Would you agree that if either of those happened, Mr. Davis' VBA award would decrease due to losing the spouse modification?

A. If that were to happen, his benefits may be reduced, holding everything else constant. So assuming nothing else has changed. He could also get divorced and get remarried, and now that we're speculating, we can, you know, assume that he could also get remarried and continue with the same benefits.

Q. If you believe that's speculation, wouldn't it also be speculation to assume that he will continue to have a spouse for the entire time he receives VBA disability benefits?

A. No. I think it would be speculative not to assume that.

Q. What's the difference?

A. The -- our current knowledge. The information that we have currently available.

Q. If Mr. Davis were to lose the spouse

benefit, wouldn't your VBA offset calculation based on current knowledge be inflated?

A. Not based on current information.

Q. But it would --

A. If the current information was updated, then the calculations could be updated. But the current calculations would not be updated based on some speculations about what could happen in the future.

Q. Are you aware of any opportunity for plaintiffs to have their offsets updated based on change in circumstances after they receive their award?

MR. KLOTZBUCHER: Objection.

A. I think that if I were to receive updated information and that updated information shows a change, that would result in potentially new calculations.

Q. And if the situation remains the same until the award is determined, and then the day after the award is determined and the offset is applied, Mr. Davis gets divorced, there would be no way to update the calculations at that time, correct?

MR. KLOTZBUCHER: Objection.

A. What do you mean by award?

Q. Any determination at trial about the amount of damages owed to the plaintiff and the offsets to be applied.

A. Again, if I'm asked to prepare my calculations the day after trial, I -- I would do that.

Q. Are you aware that the VA offers needs-based pensions?

A. Yes.

Q. Are you aware of military retirement pensions?

A. Yes.

Q. Are you aware of any relationship between these pensions and VBA disability benefits?

A. Yes.

Q. What is that relationship?

A. There is a concept called concurrent VBA and military retirement benefits, and I believe some of the plaintiffs that I have reviewed have concurrent, which allows an individual to receive both military retirement benefits and VBA retirement benefits, in full.

Q. Are you aware of any current policy

proposals to eliminate the concurrent program?

MR. KLOTZBUCHER: Objection.

A. No.

Q. Are you aware that in some circumstances, like a medical malpractice claim against the VA, if the plaintiff is successful and receives a damages award, the government withholds VBA disability benefits until the full damages award has been recouped?

MR. KLOTZBUCHER: Objection.

A. I have heard of such instances, but I'm not sure whether I've heard of them in relation to VA, VBA benefits being withdrawn.

Q. If the VBA offsets that you calculated were applied to a plaintiff in this litigation and then the scenario were to arise for that plaintiff, wouldn't they be losing the value of those benefits twice?

MR. KLOTZBUCHER: Objection.

A. I -- I mean, you -- you're asking me now to speculate. I -- I don't know.

Q. So you have no opinion to the effect that they would not be losing those benefits twice?

A. Again, I would have to have more

information. I would have to have actual data to be able to consider something like that.

Again, I have not heard of such instances.

Q. Is it still the case that you are not offering any opinions as to how the offsets that you've calculated should be applied?

A. That's correct.

Q. Are you rendering an opinion as to what VBA disability offsets should be applied against?

A. No, I'm not.

Q. So you're not holding yourself out as an expert in the application of offsets against a damages award, correct?

A. Again, I have no opinion on -- on whether the offsets can be applied or not.

Q. And your opinion is only as to the amount that you calculated as a potential offset, correct?

A. Correct.

Q. And you performed those calculations based upon what you were asked to do, correct?

A. As far as VBA benefits, that's correct.

Q. Do you have an opinion on whether VBA

disability benefits should be applied as an offset against a plaintiff's out-of-pocket medical expenses?

A. I don't have an opinion on that.

Q. Have you performed any research or analysis regarding solvency of funds from which Medicare is paid?

MR. KLOTZBUCHER: Objection.

A. No.

Q. Do you know where the funds come from to pay for medical care provided by Medicare?

A. Yes.

Q. Have you heard of the Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds?

A. Yes.

Q. Have you reviewed the 2025 annual report from the boards of trustees for either of those trusts?

A. No.

Q. Is it your opinion that the status of those trust funds does not jeopardize the future benefits upon which Medicare offset calculations are based?

MR. KLOTZBUCHER: Objection.

A. I don't have an opinion on that.

Q. Do you have any opinions about the stability of the VA healthcare system?

MR. KLOTZBUCHER: Objection.

A. No, I don't have an opinion on that.

Q. Have you done any research into the solvency or viability of the budgeting for continued payments under Tricare or TriWest?

MR. KLOTZBUCHER: Objection.

A. No.

Q. What about under Community Care Network?

MR. KLOTZBUCHER: Objection.

A. No.

Q. Have you done any research or analysis into the solvency or viability of the veterans' disability system?

MR. KLOTZBUCHER: Objection.

A. I would say no.

Q. Are you aware of the difference between mandatory and discretionary spending in the federal budget?

MR. KLOTZBUCHER: Objection.

A. Yes.

Q. Can you briefly explain the difference.

A. Mandatory spending is regulated by statements, and discretionary is by policy.

Q. Is it your understanding that discretionary spending needs to be appropriated on an annual basis?

A. I don't have that infor- --

MR. KLOTZBUCHER: Objection.

THE WITNESS: Sorry.

A. I don't have that information.

Q. Are you aware that funding for VA benefits specifically requires annual congressional approval?

MR. KLOTZBUCHER: Objection.

A. I don't have knowledge on that.

Q. Do you have an opinion on whether any of these factors jeopardize the future benefits upon which your VBA disability offset calculations are based?

MR. KLOTZBUCHER: Objection.

A. I don't have an opinion on that.

Q. Would you agree that all of your reports in this litigation are premised upon the assumption that the government programs involved in your offset calculations will continue in the same manner as they

are operating at the present time?

MR. KLOTZBUCHER: Objection.

A. Of course, because that is the best information that we currently have available.

Q. Are they also premised upon the assumption that the care and benefits the plaintiffs need will continue to be covered by those programs to the same extent as they are now?

MR. KLOTZBUCHER: Objection.

A. I don't have an opinion on that.

Q. Is it correct that you have no opinions on the reports provided by Marjorie Hackett-Wallace?

A. That's correct.

Q. And you have no opinions on the reports provided by Anirban Basu?

A. Correct.

Q. And you have no opinions on the reports provided by Gregory Russo?

A. Correct.

Q. Your Supplemental Materials Considered List also listed the Plaintiffs' Amended Damage Assessment forms, correct?

A. Yes.

Q. Are you rendering an opinion with

respect to anything in the damage assessment forms?

MR. KLOTZBUCHER: Objection, form.

A. I don't have an opinion about those documents.

Q. Have you read the report of Peter Rybolt?

A. I have.

Q. Do you intend to offer any opinions with respect to the issues addressed in that report?

A. Not at the moment. I haven't been asked.

Q. Have you independently formed any opinions about that report?

A. I have very, very basic general impressions.

Q. Are you distinguishing impressions from opinions?

A. Yes.

Q. Are you aware that there are other plaintiffs with non-stayed cases besides the eight that you've issued reports for?

A. Yes, vaguely.

Q. Are you aware that the government has retained two other economists to prepare similar

reports for those other plaintiffs?

A. Yes, I'm aware.

Q. And I do not see those materials on your Materials Considered list; is that correct?

A. Correct.

Q. So you have not reviewed the reports of Dr. Brod or Dr. Yount -- or Ms. Yount?

A. No, I have not reviewed their reports.

Q. Is it safe to assume you are not offering any opinions on their reports?

A. No, I'm not.

Q. Do you intend to review their reports?

A. If I'm asked to. I haven't been asked to.

Q. Do you intend to review the report of Dr. Russo?

A. I have not been asked to.

Q. Do you intend to review the deposition transcripts of any other experts in this case?

A. Not at the moment. I haven't been asked to.

Q. Other than the VBA offsets calculation for Mr. Keller, sitting here today, do you contemplate making any revisions, updates, or

corrections to your reports?

A. Not at the moment.

Q. And do you anticipate testifying to any opinions we have not discussed today?

A. Not as I sit here today.

MR. VANSLYKE: Okay. I will pass the witness.

MR. KLOTZBUCHER: Thank you for your time. I have nothing further.

THE WITNESS: Okay. Thank you.

THE VIDEOGRAPHER: The time right now a 5:46 p.m. We are off the record.

MR. KLOTZBUCHER: Mr. Ortega, before we go off the record --

THE VIDEOGRAPHER: Oh, I -- do you want me to go back on.

MR. KLOTZBUCHER: Go back on, yes, very briefly.

THE VIDEOGRAPHER: The time right now is 5:46 p.m. We're back on the record.

MR. KLOTZBUCHER: I just wanted to add that the United States reserves the right to review under Rule 30(e).

And with that, you can go off the

Tosic - March 5, 2026

record.

THE VIDEOGRAPHER: The time right now is 5:47 p.m. We are off the record.

(Time noted: 5:47 p.m.)

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

REPORTER'S KEY TO PUNCTUATION:

-- At end of question or answer references interruption.

... References a trail-off by the speaker. No testimony omitted.

"Uh-huh" "Um-hum" References affirmative sound.

"Huh-uh" "Um-um" References negative sound.

CERTIFIED STENOGRAPHER'S NOTE: All quotations from exhibits are reflected in the manner in which they were read into the record and do not necessarily denote an exact quote from the document.

VIDEOGRAPHER: Good morning. We are going on the record at 9:22 a.m. on February 6th, 2026.

Please note that this deposition is being conducted virtually. Quality of recording depends on the quality of camera and internet connection of participants. What is seen from the witness and heard on screen is what will be recorded. Audio and video recording will continue to take place unless all parties agree to go off the record.

This is media unit number one of the video deposition of Larry Young taken in the matter of, In Re, Camp Lejeune Water Litigation, filed in the United States District Court for the Eastern District of North Carolina, Southern Division, Case No. 7:23-CV-897.

I'm the videographer and I represent Golkow Court Reporting. I am not authorized to administer an oath. I'm not related to any party in this action, nor am I financially interested in the outcome. If there are any objections to proceeding, please state them now.

Hearing no objections, all counsel will be

noted on the stenographic record. The court reporter will swear in the witness and we may proceed.

CERTIFIED STENOGRAPHER: Mr. Young, can you hear us?

VIDEOGRAPHER: Mr. Young, we lost your audio.

LARRY YOUNG,

was called as a witness and, having first been duly sworn, was examined and testified as follows.

THE WITNESS: I do.

MS. WALLACE: Good morning, Mr. Young.

THE WITNESS: Good morning.

MS. WALLACE: My name is Whitney Wallace. I'm an attorney for the plaintiff Leadership Group in the Camp LeJeune litigation and I am going to be deposing you today.

THE WITNESS: Great.

MS. WALLACE: Before we start, I was just telling defense counsel that Case Management Order 3 requires he and I to affirm on the record that we verbally agree with the following statement, so I will read it for the record.

"The parties agree that no communication

with the deponent by any means, including but not limited to text messaging will occur out of the view of the other parties while deposition is proceeding on the record."

And I verbally note that I affirm that I will not do that.

MR. ANTONUCCI: As do I.

MS. WALLACE: Great. All right. That is out of the way. And we're going to start.

EXAMINATION

BY MS. WALLACE:

Q Will you please state your full name for the record.

A Larry Young.

Q What is your date of birth?

A [redacted], 1966?

Q Who is your current employer?

A The Centers for Medicare and Medicare services.

Q Will you state your job title, please?

A Yes. I am the deputy chief financial officer and deputy director for the Office of Financial Management.

Q For CMS?

A For CMS.

Q Is there any reason you will not be able to testify fully and truthfully today?
A No. No.
Q For the record, will you tell us where you're physically located?
A Yes. I'm at 7500 Security Boulevard here in Baltimore, Maryland. That's our main office.
Q Is there anyone else in the room with you today?
A No.
Q Do you understand what defense counsel and I just affirmed, that you're not to communicate with anyone via text or other electronic means during the course and scope of the deposition?
A Yes.
Q Do you have any materials there with you available to you today?
A No.
Q Are you familiar, generally, with the Camp Lejeune Water Litigation?
A I'm familiar that -- excuse me. I have a -- I'm familiar with it in a general sense. I'm aware that Congress passed a law that allows individuals to sue the government for the toxic water that apparently existed at some point at Camp

Lejeune. And beyond that, that's -- that's about it.

Q Do you have any understanding of the size of the claimants who have filed claims?

MR. ANTONUCCI: Objection.

You can go ahead.

THE WITNESS: I do not.

BY MS. WALLACE:

Q Do you know anyone personally who's filed a Camp Lejeune Justice Act claim?

A No, I do not.

Q Have you ever given a deposition before?

A No.

Q Have you ever been a party in any civil litigation?

A No.

Q Have you ever been an expert witness before in any sense?

A I would have to say yes. I mean, I've had to fill out signed affidavits on behalf of the government.

Q What were the circumstances of your expert testimony or opinions?

A They were similar to this as far as providing background on the Medicare program, in

general, I would say.

Q And were you testifying before Congress or just some other body or company?

A It was -- I think it was just another court case. It was not before Congress or anything.

Q And so you had to provide an affidavit in a -- in a court case but did not have to provide an expert report or similar testimony other than the affidavit?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct.

BY MS. WALLACE:

Q Do you remember what type of litigation that was?

A I do not.

Q Without telling me the content of any confidential communications with counsel, can you tell me how you were first contacted regarding this litigation?

A I recall I received an email note.

Q From who?

A From some of my colleagues I worked with in the past and in HHS/OGC.

MS. WALLACE: Madam court reporter, did you hear that? It cut out just a touch on my

end.

CERTIFIED STENOGRAPHER: I did hear that, yes.

MS. WALLACE: Thank you.

Can you repeat it for me? I'm sorry.

CERTIFIED STENOGRAPHER: Sure.

(The Court Reporter is directed to read back the previous question and/or answer.)

BY MS. WALLACE:

Q Approximately when was that, Mr. Young?

A I believe it was in the fall of last year, 2025.

Q And after the email, were there phone calls or in-person meetings?

A We had a -- I think we had one -- one or two Zoom calls.

Q And who were those Zoom calls with, please?

A I prob -- I'm sure I can't recall everybody that was on the Zoom calls. Like, I know counsel here, Gio, was on the call, Jill was on the call, Gary was on the call, and I believe Joshua. There may have been others but I don't -- I didn't take an inventory of names.

Q Have you seen your designations in this

case, what you have been designated to testify about in the Camp Lejeune litigation?

A Yes.

Q Were you involved in preparing those designations?

A Yes.

Q What did you do to prepare for today's deposition?

A I simply reread my written designation information as far as what I was going to be speaking to. And I also reviewed the trustees' report which I -- I'd used to prepare some of my designation narrative.

Q The trustees' report is approximately a 300-page document; is that right?

A That sounds about right. I -- I didn't read it all verbatim. I -- I looked at the introduction.

Q Did you meet with anyone outside of counsel to prepare for your deposition today?

A No.

Q Can you tell me how many times you met with counsel to prepare for today's deposition?

A It was twice.

Q Can you tell me how long, approximately,

each meeting was?

A Yes. I believe the first meeting was about an hour and a half and the second meeting was 45 minutes.

Q And if I understand your testimony, it was only with you and counsel, no one else with CMS or any other individuals?

A Yes, that's correct. No one else.

Q Are there any other documents besides the trustees' report that you reviewed to prepare for your testimony today?

A No. There's nothing else I reviewed to prepare for today.

Q All right. I am going to -- when we do depositions via Zoom, we -- the way that I share exhibits with you is, I and counsel and the court reporter, is I upload into the Chat feature. So I'm going to upload five exhibits -- and they're premarked -- into the Chat feature. And I'm going to tell you what they are as I upload them, if that works for you.

A Yes.

Q All right. You should see in the Chat feature, as well as counsel for the defendant and the court reporter, five exhibits that have been

uploaded. And I'm going to verbally describe for the record what each of them are. The document entitled Young Exhibit 1, 2025, December 15, United States damages disclosures. That is the document we're gong to look at shortly. That's your -- what you were designated to be an expert witness in, those disclosures.

(Exhibit 1 was marked.)

MS. WALLACE: Young Exhibit 2 is your notice of deposition issued to Larry Young.

(Exhibit 2 was marked.)

MS. WALLACE: Exhibit 3 is a cover letter -- excuse me, a cover letter issued by counsel for the defendant, dated January 30th, 2026, wherein they provide the document disclosures with reference to your deposition.

(Exhibit 3 was marked.)

MS. WALLACE: Young Exhibit 4 is the -- your response to the notice of deposition and the subpoena responses and objections that was issued by your counsel.

(Exhibit 4 was marked.)

MS. WALLACE: And Exhibit 5 is your CV that was provided with Bates numbers CLJA_USA_YOUNG_1 through 6.

(Exhibit 5 was marked.)
BY MS. WALLACE:
Q And we are going to -- before I get into the exhibits, I wanted to first ask you. You testified earlier you're currently employed by CMS; correct?
Can you hear me?
A Oh, can you not hear me?
Q I can hear you now. Sorry. The audio's a little touch and go.
A Yeah. Yeah. The way it cuts out.
VIDEOGRAPHER: Counsel, do you want to go off for a second? I can maybe try to help him make a quick adjustment.
MS. WALLACE: That would be -- yes.
VIDEOGRAPHER: Okay. The time is now 9:38. We're going off the video record.
(Off the record.)
VIDEOGRAPHER: The time is now 9:41. We're back on the video record. You may proceed.
MS. WALLACE: Thank you very much for all the corrections that were made during the break. I really appreciate that.

BY MS. WALLACE:

Q Mr. Young, the last question I asked you and I believe your answer was "yes," is, you are currently employed by CMS?

A Correct.

Q And CMS is an agency of the federal government. Do you agree?

A Yes.

Q Are you aware that the federal government is the defendant in the Camp Lejeune litigation?

A Yes.

Q And as you testify here today, you are a full-time federal employee?

A Yes.

Q Is your salary paid by the federal government?

A Yes.

Q Did you enter into a private retainer agreement to testify in this litigation?

A No.

Q Are you being paid any additional expert fee beyond your federal salary for your testimony in this litigation?

A No.

Q How are you being compensated for your

testimony today?

A I'm not being compensated at all besides my regular federal salary.

Q And you testified earlier your designation as an expert occurred in the fall of 2025?

MR. ANTONUCCI: Objection.

THE WITNESS: I was -- I was approached by counsel, my counsel, asking if I would be able to provide testimony in this case in the fall of 2025. Can't tell you exactly what month or day it was off the top of my head.

BY MS. WALLACE:

Q Is it your understanding that you were a non-retained expert in this case?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know exactly what you mean by non-retained expert, what that definition means.

BY MS. WALLACE:

Q When I use the word "non-retained," it means you didn't sign a retainer agreement specific to this litigation.

MR. ANTONUCCI: Objection.

THE WITNESS: I did not -- I did not sign any retainer agreement with respect to this

specific litigation.

BY MS. WALLACE:

Q Do you have any personal knowledge of the facts or allegations of the bellwether plaintiffs in the Track 1 litigation for Camp Lejeune that's currently before the court in North Carolina?

A No. I don't even know who that is.

Q So none of your testimony today has to do with anything specific related to the individuals who are before the court in North Carolina? It's more generalized Medicare knowledge?

MR. ANTONUCCI: Objection.

THE WITNESS: I simply have no knowledge of that particular case or party that you referenced. That's all I could say.

BY MS. WALLACE:

Q Let's take a look, if you don't mind, at Exhibit 4. And what I'm going to do is -- it's been uploaded but I'm going to put it on the screen for you.

I'm looking for the CV. It actually might be -- it's Exhibit 5.

Mr. Young, can you -- oops -- can you see my screen? Let's see.

A I can see the screen, but it would help my

old eyes if you could make it a little bigger.

Q My pleasure. One moment. How's that look?

A Much better. Thank you.

Q All right. Do you recognize this document?

A Yes.

Q What is it, please?

A It's my -- my resumé.

Q Did you prepare this document?

A Yes.

Q And did you prepare it for this litigation or do you keep your CV updated?

A I keep it updated. I didn't prepare it specifically for this.

Q And so despite working for CMS almost continually since 1988, you keep an updated CV?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I generally update it periodically.

BY MS. WALLACE:

Q All right. And so your resumé highlights an extensive career, for the most part at CMS. Based on my review, it looks look you only did not work for CMS for approximately two years in, I think

it was '97 to '99, but let's look.

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q Yes. Do you see that?

MR. ANTONUCCI: Same objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Is that right?

MR. ANTONUCCI: Same objection.

THE WITNESS: Yes. That's about the time period I worked for Kaiser Permanente.

BY MS. WALLACE:

Q And that was interpreting Medicare policy or how would you describe that position?

A Beyond what I've put on here, I don't know I would elaborate. It's been -- it's been a minute since that role. As far as working as their Medicare compliance officer, I generally -- I helped them with their application for a Medicare Advantage contract. I also help them stay in compliance with the Medicare rules and regulations associated with that contract.

Q Throughout your career at CMS, based on your resumé, it looks like you worked in administering Medicare Fee-For-Service. Do you

agree?

A I spent the majority of my time administering the Medicare Fee-For-Service program, yes.

Q Tell the court what that is, please.

A The Medicare Fee-For-Service program is what probably most people would refer to as the original Medicare program where individuals receive healthcare and they -- their providers submit a claim to a Medicare administrative contractor which processes that claim and provides benefit payments to that provider. Where, in some limited cases, the beneficiary, they've already paid -- paid the provider.

Q And when you use the word "administering that program," what do you mean by that?

A Well, when I say administering the Medicare Fee-For-Service program, we contract with Medicare Administrative Contractors to perform certain functions for us, primarily receiving and processing Medicare claims for payment, adjudicating first-level appeals, doing audits on medical record reviews, accounting, financial management activities, things of that sort.

Q Yes. And so you mentioned auditing

medical record reviews. It also looked like, from your resumé, that many of your positions have been focused on program integrity, including identifying improper payments and vulnerabilities within the Medicare payment systems; is that correct?

A Yes. Some of my time was spent in those capacities.

Q Can you tell me about the process there, please?

MR. ANTONUCCI: Objection.

You can answer.

THE WITNESS: I can speak to my experience in those spaces. When I was working in the Dallas regional office, I partook in what we called program integrity contractor performance reviews.

We would review their medical review activities to see how they're prioritizing their work and making sure they're compliant with our regulations in that space, necessarily.

Since I've been in the chief financial officer's office, one of our groups here is focused on measuring the improper payment rates across the entire spectrum of programs which we

administer, including Medicare Fee-For-Service improper payments.

BY MS. WALLACE:

Q What causes improper payments within the Medicare system, to your knowledge and experience?

MR. ANTONUCCI: Objection.

You can answer.

THE WITNESS: Improper payments can be -- can stem from number of reasons. In some cases, it's fraudulent providers. In other cases, it's mistakes which providers make in how they submit their claims. In other cases, it's providers that do not keep up with the current documentation required in the medical records to support the claim.

BY MS. WALLACE:

Q Throughout your career, have there also been improper payments related to upcoding and miscoding from medical providers?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, in my experience I've seen that.

BY MS. WALLACE:

Q Is that part of what your career that has been focused on program integrity has been meant to

develop solutions to address?

MR. ANTONUCCI: Objection.

THE WITNESS: When I was working in program integrity, it was -- my focus was more in the review and the responsibilities of the contractors. I was not -- I was not intimately involved in developing solutions for upcoding -- the challenge of upcoding, if you will.

BY MS. WALLACE:

Q Do you know when Medicare developed a system that encouraged the review of medical records to identify fraudulent billing practices?

MR. ANTONUCCI: Objection.

THE WITNESS: I cannot -- no. I don't know exactly when that started.

BY MS. WALLACE:

Q Can you describe that requirement or guideline from Medicare with regard to reviewing medical records to identify program integrity and vulnerabilities in Medicare payment systems?

MR. ANTONUCCI: Objection.

THE WITNESS: I can say that the -- one of the compliant part -- compliance parts for the Medicare program is that in submitting a claim

for benefits on behalf of a beneficiary, part of -- part of the calculus in assuming that claim is that you, a provider, are truthfully certifying that everything submitted on that claim is supportable by the medical record.

Part of the medical review process is -- involves actually asking for medical records because we don't -- we don't receive medical records for every claim that we receive. That's not -- that's not practical. We receive over a billion claims. If we identify a suspect claim, then it can be suspended and a request for medical records will go out for that provider to submit those medical records.

And then a review is done by a nurse or physician or both to see if the medical record supports what's submitted on the claim.

BY MS. WALLACE:

Q It's more of an audit process?

MR. ANTONUCCI: Objection.

THE WITNESS: I would -- I would just say it's what I just described. I'm not sure how you would define "audit," per se.

BY MS. WALLACE:

Q Well, you were just testifying that you

don't look at the medical records for every claim submitted. It's more of a -- you check it with an audit or your contractors check it?

MR. ANTONUCCI: Objection.

THE WITNESS: What I alluded to was that there's a process for identifying suspect claims for which we then request the medical records.

BY MS. WALLACE:

Q Do you know this year's approximate estimated improper payment rate --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- in the Medicare Fee-For-Service program?

MR. ANTONUCCI: Same objection.

THE WITNESS: As I recall -- I may be off by a half percent or so -- it's -- it's somewhere a little short of 7 percent. It's like 6.9 percent, I believe, improper -- the most current improper payment rate, I believe, is just under 7 percent, I thought, for the Medicare Fee-For-Service program.

BY MS. WALLACE:

Q Yes. And so according to the CMS

documents that I reviewed, does 6.55 percent, representing $28.83 billion in improper payments, sound approximately accurate?

MR. ANTONUCCI: Objection.

THE WITNESS: That sounds about right.

BY MS. WALLACE:

Q Okay. Is there a program that has been created to address the error rate -- and I'm referring to the Comprehensive Error Rate Testing program known as CERT.

MR. ANTONUCCI: Objection.

THE WITNESS: Oh, the CERT program is the -- is a program on the Fee-For-Service side as well. At least that's what we use to measure the improper payment rates.

BY MS. WALLACE:

Q How large is CERT, that program? How many persons or funding, if you know?

MR. ANTONUCCI: Objection.

THE WITNESS: Off the top of my head, I don't know for certain.

BY MS. WALLACE:

Q Does that fall under -- or has it ever fallen under your purview throughout your career at CMS?

A Yes. It is currently under the umbrella of our work here in the Office of Financial Management.

Q But you don't have an approximate number as to how many persons work in that program?

A I could give you an approximation. I thought you were asking for something precise. I mean, there's approximately, I would say, 40 people within -- within our office which support the improper payment rate measurement program. And that's inclusive of every program, so they're measuring the improper payment rate for not just Medicare Fee-For-Service, but for Managed Care as well as the Marketplace and Medicaid as well. And they also support several contractors which actually do the improper payment rate reviews for us as far as looking at samples of claims and whatnot. So I couldn't tell you. Inclusive of the contractor staff, like, I don't -- off the top of my head, I don't know how many contractors are supporting the 40-odd people we have here.

Q CMS also has a recovery audit contract program which I understand is based on claims that were already paid but may later be found to have been coded incorrectly. Do you have an awareness of

that program?

A Yes. I'm aware of the recovery audit program. We call them the RACs, R-A-C, if you will.

Q And does RACs help to identify incorrectly coded Medicare submissions?

A Well, RACs, they don't fall under my umbrella, first of all, in the Office of Financial Management. Those are run by the Center for Program Integrity here within the agency.

But my -- my general knowledge of them, experience has been that their -- they don't identify -- they don't identify error rates, per se. They identify and try to collect and recover improper payments made on behalf of the program. And they're reimbursed on the contingency as far as the amount that they may collect.

MR. ANTONUCCI: Excuse me. I meant to object to the last question.

MS. WALLACE: No problem. Thank you.

BY MS. WALLACE:

Q So would you agree with me that based on your understanding and career, CMS has long recognized risks involved in program integrity and oversight functions with regard to identifying reducing coding and documentation errors in the

Medicare system?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say that -- that program integrity is and always will be the component function of this agency and organization, trying to stop abusive and fraudulent billers in all of our programs.

BY MS. WALLACE:

Q All right. Let's talk about your role starting in 2014. You -- let's see if -- I'll scroll to it on the screen.

Your resumé indicates that from 2014 to June of 2023, you worked as the SES group director for the Medicare contractor management group. Can you briefly describe that position and your roles?

A Yeah. So in that capacity, I was leading a group of about 110 federal employees. And we were managing the Medicare Administrative Contractors. I'd alluded to them earlier. They're the contractors which basically administer the Fee-For-Service benefit on behalf of -- on behalf of the government.

In that capacity, I spent a large part of my time dealing with -- developing the contracts for competition, helping work on their content, managing

their performance, assessing their performance, and running the day-to-day operations of the Fee-For-Service program and the different functions which they administer for us.

Q And did much of that role involve overseeing Medicare contractor operations and financial management?

A I would say some of that role was involved in overseeing Medicare contractor financial management operations.

Q In that role, did you prepare corrective action plans for your contractors?

A Yes. We would -- we would work with the contractors when we found fault or errors in some of their operations and they weren't meeting our performance metrics. We would work with them to develop corrective action plans.

Q What time of -- what type of fault or errors do you recall finding? Just a couple examples.

A Just as an example, more often than not, it's a function of workload processing. So, for example, a contractor could -- could get hit with more provider enrollment applications in a given period of time that they would necessarily expect,

or they could have staff attrition unexpectedly occur so that they would get behind in processing provider enrollment applications and would not be able to meet our performance-level metrics.

So we would work with them to see what kind of corrective actions they could come with up to either increase their staffing, increase their productivity, develop timelines for when we expected them to get back in -- to come back in compliance with our -- with our requirements.

Q Since 2023, June to be exact, according to your resumé, you have been in the chief financial officer, CFO, and deputy director role that you hold today; correct?

A Yes. It's the deputy chief financial officer and deputy director. Correct.

Q Thank you. Yes. Meaning there is also a CFO above you? Or how does that work? Is it above you or the same level?

A It's -- she's technically my boss, yes. There's a CFO above me.

Q Okay. Tell me about some of the responsibilities you hold in your current role.

A So in my current capacity, we're -- we oversee the groups responsible for remaining --

managing the range of different financial management functions, including the accounting services, accounting for all the benefit payments and administrative dollars which flow in and outside the agency, maintaining the accounting system, HIGLAS, which captures all those accounting functions, collecting overpayments, running the Medicare secondary program, payment program, and measuring the improper payment rates for the three different programs which the agency administers.

Q And all of that financial accounting, who -- how do you report that regularly to -- what do you prepare in order to report your findings regularly and who do you report them to?

MR. ANTONUCCI: Objection.

THE WITNESS: I say the -- the biggest thing which we report is the annual financial statement that the agency provides as part of the department's report. And this year we -- we produced our -- our -- I believe it's our 27th consecutive year without any significant findings or material weaknesses. It's an annual report.

BY MS. WALLACE:

Q And does that -- is that for CMS

internally or is that used by Congress or who views that? Who relies and needs that annual financial statement?

A It's a public report which many people have an interest in and Congress views it, public view it, the department views it.

Q How does your work in the role you have now support Medicare's long-term stability?

A I would say as far as the stability of the program, a lot of what we do is to provide confidence that the benefit dollars and administrative dollars are accurately accounted for and that the integrity of the accounting process is reliable. That helps ensure confidence that -- that this program is running as efficiently as it can, necessarily. To the extent that that provides stability to the program...

Q So it sounds like your -- your focus is to try to ensure to the general public and/or to Congress or policymakers that confidence in the way Medicare is currently running?

MR. ANTONUCCI: Objection. And the witness hadn't finish answering your last question.

BY MS. WALLACE:

Q Oh, I'm sorry. Mr. Young, did you not finish?

A I -- you know, I think I had necessarily kind of left a dangling answer for you.

To the extent that -- that the confidence we provide in the stewardship of this agency's benefit dollars and administrative dollars provides stability of the Medicare program, we're doing that.

Q I'm going to stop sharing your resumé and I'm going to pull up your designations.

THE WITNESS: Would you mind if we took a little break?

MS. WALLACE: Not at all. I was going to do one on the hour but I'm happy to do one now.

VIDEOGRAPHER: The time -- the time's now 10:10. We're going off the video record. This completes media unit number one.

(A brief recess is had from 10:10 a.m. to 10:16 a.m.)

VIDEOGRAPHER: The time is now 10:16. We're back on the video record. This begins media unit number two.

You may proceed.

MS. WALLACE: Thank you.

BY MS. WALLACE:

Q Mr. Young, I'm going to show you what has been uploaded as Young Exhibit 1. It is a copy of the disclosures that we were provided for your testimony by your counsel. Do you recognize this document?

A Can you make it a little bigger for me?

Q Certainly. Do you recognize this document so far?

A I believe so. I've seen it quickly. It's hard to tell from just the title page.

Q No problem.

So I will represent to you this is a 46-page document that is titled the United States Second Disclosure of Expert Testimony for Phase III in the Camp Lejeune Litigation.

And the section having to do with your designation, it repeats for each disease category, but for the first disease category, which is bladder cancer, your disclosures starts on page five.

Do you see that on the screen?

A I do.

Q I believe you testified earlier that you helped to prepare this section?

A Yes.

Q Did you write it or review it?

A I wrote part of it and reviewed all of it.
Q Which part did you write? And I'll scroll down. I'm happy to scroll down. It looks like your designations actually start -- they're identified as A through I on pages six and seven.
MR. ANTONUCCI: I'm going to object.
Mr. Young, please be careful not to divulge confidential communications with attorneys in answering this question.
THE WITNESS: I can't honestly recall exactly which part that I had -- or parts that I had amended from things that -- so it's hard -- it's hard for me to tell you exactly which -- which parts. But I reviewed it and, again, it's all true and correct.
BY MS. WALLACE:
Q Thank you. Does A through I accurately represent the entirety of the scope of your expert testimony in the Camp Lejeune litigation that you would be expected to provide?
A Yes.
Q And you were able to make edits to confirm that all of these, A through I, is within the scope of your knowledge and expertise in this litigation?
A Yes, absolutely.

Q If we walk through several of these designations, many of these are pretty basic background on the Medicare program. Do you agree with me on that?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say they provide a basic background of the Medicare -- the original Medicare program.

BY MS. WALLACE:

Q Yes. And so, for example, A, B, and C states that "Medicare is a federally funded program of health insurance for the aged, the disabled, and persons suffering from end-stage renal disease."

"Medicare parts A and B, (also known as original Medicare) was established under Title 13 [sic] of the Social Security Act in 1965. Medicare" --

A Eighteen.

Q Thank you. I'm sorry.

"Medicare Part A helps pay for inpatient care in hospitals, skilled nursing facilities, hospice, and some outpatient home healthcare."

I do want to clarify. You don't have any role in the healthcare component of Medicare; correct? More finance and administration?

A I would say, yeah. I'm not directly involved in providing healthcare to people. It's the -- in my current capacity is -- it's the financial management component piece.

Q And then you describe that "Part B helps pay for items and services, such as doctor visits, physical, occupational and speech therapy services, home health service, outpatient hospital services, and durable medical equipment, prosthetics, orthotics, and supplies for those who have voluntarily enrolled."

A Correct.

Q And then in C, your designation, you describe the Part D program "Provides subsidized access to prescription drug insurance coverage on a voluntary basis for all enrolled beneficiaries. It also provides premium and cost-sharing subsidies for low-income enrollees."

And then you indicate when it went into effect which was January 1st, 2006.

A Yes.

Q Am I correct that both the Medicares Part B and D are voluntary enrollment programs?

A Yes.

Q And both of those programs are supported

by premiums from the Medicare recipient that opted into those programs?

A Yes. For people which enroll, they have -- they have to pay a premium.

Q And my understanding is that if you have 10 years of earnings, you do not have to pay any type of a premium for Part A? It's a waived premium?

A For Part A of Medicare, if you have earned -- earned 40 quarters of credit under social security, which is 10 years of work, then you are entitled to Medicare Part A premium free.

There are some individuals who have not worked that long and they have to pay a premium for Part A. Everyone pays a premium for Part B.

Q And some of the premiums are scaled based on your earning capacity?

A Yes. Correct.

Q Does that go for Part B, A, and D?

A It goes for Part B, I know for sure. For Part D, I cannot recall off the top of my head.

Q Does Medicare, if you know, does it keep track of how many -- of how much premiums an enrollee has paid over time?

A We -- off the top of my head, we don't --

I don't know. I mean, we keep track of whether or not people pay their premiums, certainly, so there would be a record of -- of them paying their premiums over time.

Q And so premiums paid or patient pay would be documented within the CMS system?

MR. ANTONUCCI: Objection.

THE WITNESS: Exactly how we account for their premiums, I'm -- I can't tell you at this moment.

BY MS. WALLACE:

Q Can you answer yes or no if premiums paid would be in the CMS system?

MR. ANTONUCCI: Objection.

THE WITNESS: The premium collections are, as I recall -- I believe they're captured through social security, primarily, so there's a distinction here. Social security manages the enrollment in Medicare for the agency and the collections of benefit premiums.

BY MS. WALLACE:

Q Would premiums pay be accessible by Medicare?

MR. ANTONUCCI: Objection.

THE WITNESS: I think generally, yes, it

would be, but we'd have to work with social security in some capacity.

BY MS. WALLACE:

Q Which one of these programs has copays for beneficiaries?

MR. ANTONUCCI: Objection.

THE WITNESS: In my experience and recollection, they all have copays. Different benefits have different levels of copays and some of the benefits have no copays so it depends on the type of service that we're speaking to.

BY MS. WALLACE:

Q But all Part A, Part B, Part D, have copays. Yes?

A No. You can't say all because there are some benefits for which there are no copays.

Q But portions of Part A, B, and D are likely to have copays?

A Yes.

Q Would that information be accessible by Medicare --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- the amount of copays paid by any given

beneficiary?

MR. ANTONUCCI: Same objection.

THE WITNESS: I do not know.

BY MS. WALLACE:

Q Is that housed copays in the social security program or would it be housed in Medicare, to your knowledge?

MR. ANTONUCCI: Objection.

THE WITNESS: I cannot say for certain.

BY MS. WALLACE:

Q Your designations in paragraph E describe how these different parts of the Medicare program are funded. And it's very interesting.

So you describe that Part A is funded with a trust called the Hospital Insurance trust. And then you go on to explain that "The HI trust is funded primarily through payroll taxes, but also income taxes, interest earned on trust fund investments, and Medicare Part A premiums collected from those not entitled to premium free"; is that right?

A Yes.

Q And so in common sense, Part A of Medicare is primarily funded by taxpayers who are employed and paying percentages of their payroll taxes to the

government; is that right?

A Just Part A is funded through a payroll tax. It's 1.45 percent of a person's payroll.

Q Did you agree with my statement?

A I said yes. Did you not hear me?

Q Oh, no. I'm sorry. It might have been a delay. Thank you for that.

And I also understand it's a little more for self-employed earners than the 1.45 percent?

A I think it's -- I believe that's correct, that you'll have -- it's a combination of funds, so it's the payroll tax on individuals 1.45 percent, then the employer pays 1.45 percent. If you're self-employed, then you get to pay the full -- full amount, I believe.

Q And my understanding is that this is based on -- it's kind of like a pay-it-forward program. So the workers of today are paying for essentially the retirees of tomorrow for their Medicare coverage, and it's this pay-it-forward kind of taxpayer approach to Medicare funding. Can you explain that better than me?

A Well, I don't know if I would call it a pay-it-forward program. I mean, it's a trust fund and it exists by -- based on historical payroll

taxes which have been collected over time. And then it's offset all the time by benefit payouts which go out all the time, necessarily. To the extent that there's fewer workers paying payroll taxes that, you know, you can consider that perhaps a go-forward funding situation, but it depends on how you want to characterize it.

Q For the most part, the individuals paying payroll taxes are not probably disabled or usually over 65; right?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say people -- it's a matter -- it's function of who's receiving an income through payroll, be it through being self-employed or not.

There are certainly disabled individuals which may have some part-time work. There's certainly aged individuals which continue to work as well.

BY MS. WALLACE:

Q But by -- in large part, Medicare's being funded by the people working today for their retirement later in life or someone else's retirement?

MR. ANTONUCCI: Objection.

THE WITNESS: As a general matter, you could say that.

BY MS. WALLACE:

Q All right. And then Part B is kind of a -- it's a completely different trust fund. It's called the Supplementary Medical Insurance, SMI trust fund. And it is not paid from payroll taxes. It's paid through a combination of premiums from the beneficiary who enrolled in it and a combination of other tax revenues that the government holds in the treasury. Is that fair?

A Generally, yes. It's funded through the general -- it's a combination of both general tax revenues, income taxes, if you will, for example, and premiums. And it's a formula so that the premium is set every year such that it's actuarially comprised, I believe it's 25 percent of the expected benefit payout. And then the trust fund and tax revenues have to make up the other 75 percent.

Q So Part B is being funded by the beneficiary of the Medicare themselves by them paying premiums. That's about 25 percent of the funding generally. And then the other 75 percent is from taxpayer funding flowing through the government. Is that true?

A That's generally correct.

Q All right. And I wanted to ask you about your paragraph D. It says "To be covered under original Medicare, an item or service must be eligible for coverage and reasonable and necessary for the diagnosis of treatment of an injury or illness."

Tell me about the "reasonable and necessary" requirement for eligibility, please.

A The operating principle as outlined in the Social Security Act is that in order to be covered, an item or service has to be medically reasonable and necessary for the diagnosis, treatment of an illness or injury or, I believe it goes on to say, or to correct the function of a malformed body member, something along those lines.

So that's how you end up with coverage for things like prosthetics, for example, as a part of the durable medical equipment benefit.

The test as to whether or not something is medically reasonable and necessary, that's a clinical decision. And beyond that, I can -- I mean, I'm not a clinician so it's hard for me to expound on that beyond that, really.

Q Do you know if Medicare payment can be

denied if an auditor or contractor deems that the service was not reasonable and -- medically reasonable and necessary?

A Yes. I mean, if it doesn't meet that general test, then an item of service can be denied.

Q And do you know if contractors, when they evaluate claims, do they have a physician or a nurse on hand that helps to make that determination in questionable cases?

A Yes. For my -- my experience has been with -- for example, the Medicare administrative contractors, they have -- we require them to employ chief medical officers, chief medical directors, if you will, as well as a number of nurses that are working in concert with the chief medical director performing medical review on specific claims.

Q Do you agree that the reasonable and necessary determination is made at the time the service is provided based on the patient's condition and the applicable coverage rules at that time?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that I would agree with that. At the time the patient's being seen, they're being seen by their provider and their physician. They're making a

medical judgment, not the Medicare program, per se.

BY MS. WALLACE:

Q Your testimony is that it's later -- it later can be subject to review for -- whether -- as to whether it was reasonable or medically necessary?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, the Medicare program's making the decision as to whether or not it's meeting that coverage criteria. That's happening most often after the fact that the service has been provided. So they're not -- they're not -- we're not in the room making a decision with the clinician, is my point.

BY MS. WALLACE:

Q I understand.

It can happen -- that audit or review can happen after the visit, and sometimes treatment can be denied on that basis?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes.

BY MS. WALLACE:

Q Would you agree that whether Medicare will cover a particular service as reasonable and

necessary, that cannot be a decision that's made in advance?

MR. ANTONUCCI: Objection.

THE WITNESS: I won't say that across the board.

There are -- there are a few different programs we have in place that would require providers to receive prior authorization for a service so that they would be actually engaging with our Medicare administrative contractors to receive prior authorization before they receive the service necessarily. Those are kind of targeted programs with specific benefits.

BY MS. WALLACE:

Q Outside of a pre-approval process, would you agree that whether a Medicare service will be deemed reasonably and medically necessary can't be known years or decades in advance?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't feel like I can answer that question because, again, I'm not in the clinician clinical space.

BY MS. WALLACE:

Q All right. Your designation does say that "An item or service must be eligible for coverage

and reasonable and necessary for the diagnosis or treatment of an injury or illness." And I'm trying to understand, are you saying that that can occur limitedly in a pre-approval process and then it can be subsequently reviewed?

MR. ANTONUCCI: Objection.

THE WITNESS: What I'm saying is that if it's -- if it's something as reviewed prior -- prior approval, it's not -- it's not reviewed after the fact. But the things which are reviewed for prior approval are very limited and narrow. We don't do much of that in the Medicare Fee-For-Service program.

BY MS. WALLACE:

Q So pre-approval would be limited. And other than pre-approval, Medicare does not make that determination based on the service needed years in advance. That's not the process?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I can't really speak to your full characterization because I'm not a clinician. It's not my area of expertise, that space.

BY MS. WALLACE:

Q But you -- but you are an administrator of

the Medicare rules that would be responsible for administering the reasonable and necessary component?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm an administrator and I've spoken to the general -- based on my experience how we handle claims, both on a pre-payment basis and a post-payment basis. That's all I can really speak to.

BY MS. WALLACE:

Q If a -- if a plaintiff knew -- okay. When you say, in the next sentence, "The item of service must also not be specifically excluded by the Social Security Act," what do you mean by that sentence?

A So there are specific things that the Social Security Act specifically excludes us from being able to cover or provide services for; routine foot care, for example, dental services, to the extent that they don't require somebody to be hospitalized for those dental services are excluded. Things of that sort, those are specific things which Congress just carved out and said, no, those are not available for -- for any kind of Medicare coverage.

Q And are those the types of carved-out

coverage that are usually picked up by Part C?

A There are some of those services where if an individual enrolls in Medicare Part C, which is a Medicare + Choice plan typically administered by what we would call a health maintenance organization, they can offer additional benefits from what the original Medicare Fee-For-Service program can offer. And many times they do choose to provide some of those supplemental benefits that we do not, are not allowed to provide under the original Fee-For-Service program.

Q How is Part C -- Medicare Part C funded?

A My knowledge and recollection of how Part C is funded is -- is not as deep as it is on the A and B side, or the D side, necessarily. But I think it's probably -- I don't want to speculate. I'm going to have to tell you I can't remember.

Q Do you know if it's funded by the government?

A I would say yes, it's -- I believe it's funded by the government. That part, I do know.

Q Do you know if it's ran through private insurance companies?

A Yes. Those programs are run by private insurance companies, most commonly, as I said,

health maintenance organizations. There are some PPO organizations as well; providers. UnitedHealth, for example, would be one.

Q But you are not designated to talk about how Part C is funded?

MR. ANTONUCCI: Objection.

THE WITNESS: That's not my area of expertise. So beyond saying that it's paid for by the federal government in the -- I can't, off the top of my head, recall if it's subsidized by the A and B trust funds, if you will.

BY MS. WALLACE:

Q All right. And let's look at your last several designations.

Part G, "Medicare Part B is available to individuals who are eligible for Part A at no cost by paying a monthly premium."

Do you mean -- I think you mean Medicare part -- as worded, it's a slight bit confusing. Would you explain it?

A Well, I mean, if you -- if an individual is enrolled in Part A, they're available -- Part B is available to that individual enrolled in part -- Part A.

Q But they are paying a cost, a monthly premium?

A The Part B -- yeah. Maybe -- maybe this sentence is isn't as artfully worded. But, correct. Part B is -- you pay -- everybody's paying a premium for Part B. Unless there are some low-income individuals which get Part B premium-free subsidized through -- there are dual eligibles that are Medicare and Medicaid eligible.

Their premiums get subsidized but there's a -- everyone pays a premium for Part B.

Q All right. And let's look at I. "Since its enactment, Medicare has expanded to include additional benefits, such as Part D." And you testified earlier Part D is the prescription drug plan?

A Yes, correct.

Q And Part D does have beneficiary contribution in the form of a premium; correct?

A Yes.

Q And it's also a voluntary enrollment program?

A Yes.

Q And then you have this last sentence "Generally speaking, since Mr. Young has been

employed at CMS, benefit coverage has expanded, not constricted."

And so when you say "generally speaking," I think that you mean not every benefit coverage has expanded, but for the most part, benefits coverages have expanded, not constricted?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean -- I mean what it says. I mean, in my experience the program has tended to accrue or accrete additional coverage over time. The big one being the addition of the Part D benefit program for the drug benefit in 2006. There's also a tendency to expand eligibility groups. For example, when I first started, we did not have -- we did not have an eligibility opportunity for people with Lou Gehrig's disease.

That got subsequently added. I can't recall which year, but now if somebody develops Lou Gehrig's disease, ALS, you would -- that individual would be entitled to Medicare coverage, even if they weren't age 65. That's just an example of that.

BY MS. WALLACE:

Q Yeah. So Lou Gehrig's, and then end-stage

renal disease are, you know, specified diseases that fall under Part A coverage?

A Correct.

Q So Medicare is governed by federal statutes enacted by Congress; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: It's governed -- Medicare is primarily governed by Title 18 of the Social Security Act.

BY MS. WALLACE:

Q And that's a statute enacted by Congress?

A It's a statute enacted by Congress, signed into law by the President.

Q In your role, you do not get to make Medicare policy decisions. Would you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, generally, I do not get to make policy decisions. That's generally correct.

BY MS. WALLACE:

Q Who makes those, please?

MR. ANTONUCCI: Objection.

THE WITNESS: Overall, the policy decisions, to the extent that they are -- they are -- that the law allows flexibility in

making policy decisions are made by the political leadership of the agency.

BY MS. WALLACE:

Q And who would that be?

A Well, at this very moment, it would be the administrator, Dr. Oz, as well as -- as well as many of the different political appointees that have been appointed to the agency under the new administration. I can't -- I can't name them all.

Q Would you agree with me that Congress has the authority to amend Medicare statutes, including the eligibility rules, the benefits and scope, and the payment methodologies?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I would generally agree with you.

BY MS. WALLACE:

Q Do you agree that Congress can enact changes that affect the future Medicare coverage and reimbursement levels --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- of Medicare beneficiaries?

MR. ANTONUCCI: Same objection.

THE WITNESS: I would say yes, they can.

BY MS. WALLACE:

Q And so future Medicare coverage and payment levels depend on decisions made by Congress and not necessarily CMS. Is that accurate?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say, in my experience, yes, that's generally accurate.

BY MS. WALLACE:

Q All right. And so I took the designations off the screen for a moment. And I just wanted to talk about -- just clear up what you're not designated to offer opinions on and make sure it's really clear for the Camp Lejeune litigation.

So you testified earlier, you don't know anything about the individual plaintiffs who are in litigation currently; correct?

A Yes, correct.

Q And so you are not designated to offer opinions about any individual plaintiff or their damages; correct?

A Yes, that's correct.

Q The plaintiffs have been previously provided CMS documents in this case. Were you involved in preparing any of those documents?

A No.

Q And just for the record, I'm referring to Bates range document CLJA_CMS_1 through 135.

You have not viewed and had no role in preparing those documents; correct?

A I have no idea what that is, what you just read.

Q Okay. Do you know who Kathleen Hunter is?

A No, I do not.

Q Okay. She testified previously in the Camp Lejeune litigation on behalf of CMS; however, she's a contract worker with BRBC. Do you know what BRBC is?

MR. ANTONUCCI: Objection.

THE WITNESS: Off the top of my head, I don't remember what the -- the acronym stands for. We have lots of acronyms, as you can imagine.

BY MS. WALLACE:

Q Absolutely.

Do you recognize that as a contractor of CMS, that -- just that acronym without...

A I actually do not.

Q Do you recognize this name, Benefits Coordination & Recovery Center, BCRC, Medicare contractor that supports the Medicare Secondary

Payer, MSP program?
A Yes.
Q Is that a contractor for CMS?
A Yes.
Q What does that department or program do?
MR. ANTONUCCI: Objection.
THE WITNESS: So the benefit -- the BCRC contractor for us helps us with our benefit coordination recovery work. And I'm not as steeped in that. But the -- it helps us administer the Medicare Secondary Payer program, where Medicare is not the primary payer for benefits.
BY MS. WALLACE:
Q Do they have a role in lien resolution, that entity, if you know?
MR. ANTONUCCI: Objection.
THE WITNESS: Off the top of my head, I can't recall. We have a -- we have a couple of different contractors help -- help us with our MSP space, some of which deal with education-run Medicare Secondary Payer work. Some of -- some of them involve working on subrogation cases. And off the -- again, I wasn't prepared for that, that discussion so I

can't say for certain.
BY MS. WALLACE:
Q You have not been designated to give an opinion on any offsets in this litigation. Is that true?
MR. ANTONUCCI: Objection.
THE WITNESS: I cannot speak to any offsets.
BY MS. WALLACE:
Q And you are not designated to testify that Medicare will pay for any future care for any of the individual plaintiffs?
MR. ANTONUCCI: Objection.
THE WITNESS: I could not speak to that.
BY MS. WALLACE:
Q And you're not offering an opinion predicting any future Medicare reimbursement rates or fee schedules. Is that true?
MR. ANTONUCCI: Objection.
THE WITNESS: I cannot speak to Medicare future payment rates or fee schedules.
BY MS. WALLACE:
Q And you're not designated to testify that Medicare coverage is guaranteed for any future beneficiaries of the program?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I could not speak to that either.

BY MS. WALLACE:

Q None of the opinions you've identified in your disclosures guarantee the scope, duration, or payment level of any future Medicare benefits for any individual. Would you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: I would agree that I cannot speculate on what the future may hold with respect to the Medicare program.

BY MS. WALLACE:

Q And you are not offering any opinions on the accuracy of the Medicare coding or billing data for any of the plaintiffs in the Camp Lejeune litigation; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm not privy to any of that information so I cannot really speak to any of that.

BY MS. WALLACE:

Q And you're not offering any opinions on whether services paid for by Medicare were related to their Camp Lejeune exposure for the bellwether

plaintiffs in the Camp Lejeune litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: I cannot speak to that either.

BY MS. WALLACE:

Q And so the scope of your testimony has to do with -- you've had -- with the history of Medicare, as you've known it, and you're not making speculation about the future -- future of Medicare?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct. I can only speak to my experience and what's -- what's under current law, to my recollection.

MS. WALLACE: All right. We are going to -- let me know if you want a break because we're going to start taking a look at the trustees' report. Would you like a brief break before we do that?

THE WITNESS: Yeah. Let's take a little break. I'm going to have to reconfigure my --

MS. WALLACE: Okay. Sure.

THE WITNESS: -- computer.

MS. WALLACE: Okay. Thank you, Mr. Young.

VIDEOGRAPHER: The time is now 11:00. We're going off the video record. This

completes media unit number two.

(A brief recess is had from 11:00 a.m. to 11:11 a.m.)

VIDEOGRAPHER: The time is now 11:11. We're back on the video record. This beginning media unit number three. You may proceed.

BY MS. WALLACE:

Q Mr. Young, I'm going to upload a document into the Chat feature that has been previously marked as Young Exhibit 6, 2025 Annual Report. And it bears the Bates stamped numbers CLJA_USA_YOUNG_7 through 273.

(Exhibit 6 was marked.)

BY MS. WALLACE:

Q And I'm going to put it on the screen for you as well, sir.

Mr. Young, do you recognize this document?

A Yes.

Q What is it?

A This is the '25 annual report of the board of trustees on the status of the Medicare programs' financial situation.

Q Did you -- well, you produced this document in response to the plaintiff's request for materials you reviewed, considered, or relied upon

in developing your opinions in this case; is that correct?

A Yes.

Q And in paragraph nine of your responses to our notice, you also disclosed this document as one that you reviewed in connection with the Camp Lejeune litigation; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Can you tell me which components of this document that you relied upon related to the Camp Lejeune litigation?

A Just reviewed the -- primarily the introduction component piece. It's a kind of lengthy document. So I focused --

Q And it's your testimony that -- oh, I'm so sorry. Please continue.

A No. I'm sorry.

I focused on the introduction and the Highlights section that gives you kind of an overview of their conclusions and recommendations.

Q So just as background for the court, explain to the court, what is this document? Who prepares it? What's it for? What's it used for?

MR. ANTONUCCI: Objection.

THE WITNESS: So I can speak to generally what it is and who prepares it. I mean, it's prepared by the board of trustees for the Medicare program, if you will. It's a annual report that I believe that's required by Congress. They have to report on the financial stability and actuarial projections for the different trust funds which fund the different parts of Medicare.

BY MS. WALLACE:

Q What does Congress do with this document?

MR. ANTONUCCI: Objection.

THE WITNESS: I have no idea what Congress does with this document. I simply know that it's required by law to be provided to Congress, I believe, on an annual basis.

BY MS. WALLACE:

Q Were you an author in this document?

A No.

Q When you stated earlier that you relied -- you rely upon the introduction or the Highlights section of this document to support your testimony in the Camp Lejeune litigations, which parts, specifically?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know if I can point you to an exact paragraph, per se. I read the entire introduction of it.

BY MS. WALLACE:

Q And that supports your opinions in the Camp Lejeune litigation?

A It supports my -- what I've -- what I have provided as terms of written narrative as well as my oral comments today.

Q The intended recipient of this document is Congress and the policymakers and not CMS. Is that your testimony?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that I would care to speculate on what the intent of this was. I simply know what I believe that's required by law as a report to Congress.

BY MS. WALLACE:

Q And it's prepared for Congress, based on your understanding, not for CMS; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That's my understanding, yes.

BY MS. WALLACE:

Q Would you agree with me that the trustees' report generally discusses Medicare's overall financial condition?

A Generally, yes.

Q All right. And what is -- based on the Highlights and Summary section, can you tell me what the current financial position is of the HI fund?

A Well, from what I recall based on the trustees' report was the, the HI supplement -- the HI trust fund, if you will, it's -- it's facing several headwinds and challenges in terms of its being able to continue to be financially solvent. I believe the report indicated that they would -- the benefits would exceed the collections as early as 2027 and that the fund could be depleted by 2033.

Q And so the trustees' report is a warning of that dire financial position of the HI fund?

MR. ANTONUCCI: Objection.

THE WITNESS: You can characterize it the way you like. It's just -- I think it's a factual portrayal based on actuarial projections of -- and assumptions that they're aware at this moment in time of the financial stability of the Medicare A and B trust funds.

BY MS. WALLACE:

Q Let's take a look at the summary section, page two on the document itself, and Bates number 14.

Oh, first of all, actually, let's look at this page. This is Bates number nine. And it's -- who is -- who are the -- can you tell me what this page tells us about who prepared this document?

A I don't know that -- that you could conclude, necessarily, that this would tell you who prepared the document.

This is simply -- my understanding would be simply who is on the boards responsible for the content and who's submitting it to Congress.

Q So these are the Medicare trustees?

A I believe so.

Q And this is the trustees' report?

A Yes.

Q And these trustees, do you understand that -- are they appointed by federal statute?

A I think some of them are appointed by statute, as far as required to be on the board on different capacities. The administrator, I believe, is required to be the secretary of the board. But then there's two -- two -- you see them on there -- vacancies. Those are -- I believe those are

appointed by the President, the public trustees.

Q Okay. Let's look at page four.

Can you read, on -- and this is page four of the document, Bates number 16. Could you read the first paragraph under Summary of Projections, please?

A Yes. "Current-law projections indicate that Medicare still faces a substantial financial shortfall that needs to be addressed with further legislation. Such legislation should be enacted sooner rather than later to maximize the impact on beneficiaries" -- excuse me -- "minimize the impact on beneficiaries, providers, and taxpayers."

Q Do you agree with that statement?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that it matters if I agree or not but it seems like it would be a good idea.

BY MS. WALLACE:

Q Meaning Congress makes the decision. Is that why you say it doesn't matter if you agree with it or not?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct. It's not my decision to make.

BY MS. WALLACE:

Q Do you -- let's take a look at page three. Do you see the sentence that starts with -- yes. In the third -- let's see. I'm going to highlight it for you on this document so we can follow each along.

Do you see the highlighted text on the screen? Do you want me to zoom in?

A No. I can see it.

Q Okay. Will you read that paragraph for me, please?

A "If the health sector cannot transition to more efficient care delivery and if the provider reimbursement rates paid by commercial insurers continue to be based on the same negotiated process, then the availability, particularly with respect to physician services, and quality of healthcare received by Medicare beneficiaries, will, under current law, fall over time compared to that received by those with private health insurance."

Q Can you explain to me in your own words what that paragraph is intended to convey, to the best of your knowledge?

MR. ANTONUCCI: Objection, foundation.

THE WITNESS: I mean, it says what it

says. I mean, if the -- if the -- if the -- if the Medicare program healthcare providers are unable to become more efficient in delivering the care that they provide, then there will be a growing disparity between what Medicare beneficiaries receive and what commercial private health insurance beneficiaries receive.

BY MS. WALLACE:

Q And the quality of healthcare received by Medicare beneficiaries will, under current law, fall over time compared to that received by those with private health insurance? Meaning it's possible that the quality of healthcare received by Medicare beneficiaries could fall under the current law?

MR. ANTONUCCI: Objection.

THE WITNESS: It's possible.

BY MS. WALLACE:

Q Isn't -- is that -- isn't that one of the warnings being issued in this summary of the report?

A Yes, I would say so.

Q The trust -- the HI trust fund depletion that you talked about earlier on page five, will you read and explain to the best of your knowledge the first paragraph on page five that I just highlighted? And this is Bates number 17.

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. "The expenditure projections reflect the cost-reduction provisions required under current law but not the payment reductions and/or delays that would result from the HI trust fund depletion, which is projected in this report to occur in 2033. At that point, HI revenues are projected to cover 89 percent of incurred program costs."

What exactly did you want me to explain again?

BY MS. WALLACE:

Q Well, let's start with the last sentence. So when it says at the point that the HI trust fund has depleted, which is projected currently to occur in 2033, is it my understanding that at that point only -- the HI revenues are only sufficient to cover 89 percent of the estimated program costs, meaning there's -- there would be an unfunded 11 percent of Part A Medicare costs?

MR. ANTONUCCI: Objection.

THE WITNESS: The language is what it is, but that's the way I would interpret that. It would be a deficit.

BY MS. WALLACE:

Q And so what happens in the event of a deficit? There's -- I understand there's, like, a number of ways that Congress could decide to fix that. Could one of those ways be to decrease eligibility or offerings under the Medicare Part A program?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, it's -- you can speculate on different things that Congress at the time could elect to do. You either increase benefits, lower benefits, increase revenues, lower revenues -- well, you wouldn't lower revenues. You want to increase revenues, certainly. But there's this fixed number of variables with which they have to deal to address the issue.

BY MS. WALLACE:

Q So Congress will have to do something to avoid trust fund depletion of the HI trust fund. And what it does is unknown at this point in time; is that right?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that I would agree with that statement completely. It's -- it's still -- these are projections. And

it's -- it's unknowable what's going to happen with respect to the economy, the practice of medicine, et cetera. I think the language in the report speaks for itself as far as what may or may not happen.

BY MS. WALLACE:

Q But if the current law stays as is, the whole purpose of this report is to warn that HI trust fund depletion will occur if no changes are made to the program or the law.

MR. ANTONUCCI: Objection.

THE WITNESS: I think that's a little bit of an oversimplification. But generally it is -- it is -- it is a bit of a cautionary note to explain that the financial viability of the HI trust fund is in danger under current law, assuming certain assumptions hold true, which are only assumptions. Nobody knows exactly what the future holds.

BY MS. WALLACE:

Q Let's take a look at page six. This is the Highlights section that you indicated you reviewed in preparation for your testimony.

A Yes.

Q All right. And will you read the

highlighted parts that I just highlighted on the screen for you, please, and the title, if you will? I'm sorry.

A Yes. It says "Short-range results. The estimated depletion date for the HI trust fund in 2033 is" --

Q It's "is"; right?

A Excuse me.

Q Of course.

A "The estimated depletion date for the HI trust fund is 2033" -- excuse me -- "three years earlier than projected last year, primarily due to the change in projected expenditures. HI expenditures through the short-range period are projected to be higher than last year's estimates."

Q And so does that mean that compared to last year, they actually moved up the completion date by three years due to increased short-range expenditures in the HI fund in the 2024 time period?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. That's the way I would read that.

BY MS. WALLACE:

Q Meaning the problem is getting worse rather than better from last year's report to this

year's report?
MR. ANTONUCCI: Objection.
THE WITNESS: I mean, it means that they've had to move up the -- the depletion dates by three years. That's what it means.
BY MS. WALLACE:
Q Because the H fund trust deficit has gotten predictably worse over the last fiscal year?
MR. ANTONUCCI: Objection.
BY MS. WALLACE:
Q Worse than anticipated. Is that a better way of saying it?
MR. ANTONUCCI: Same objection.
THE WITNESS: No. Wait. I refrain from -- hesitate to say better, worse, good, or bad. It's simply a matter of fact that the expenditures increased in a short period of time more quickly than they thought and so they had to move up by three years.
BY MS. WALLACE:
Q Do you know, based on your position, why those expenditures increased greater than expected?
MR. ANTONUCCI: Objection.
THE WITNESS: I do not. I'm not intricately involved in the ex rel side of --

of the demographic drivers.

BY MS. WALLACE:

Q All right. We are going to take a look at page 27 of the report, which is Bates stamp number 39.

All right. Have you -- do you see the chart on the screen there? This is Figure II.E1. And it's entitled HI Trust Fund Balance at Beginning of Year as a Percentage of Annual Expenditures.

A Yes, I can see it.

Q Is this the solvency chart for Medicare Part A?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, I don't know if you want to call it the solvency chart. It's just illustrating the trust fund balance as a percentage of expenditures. It is what it is.

BY MS. WALLACE:

Q Okay. And what does that -- what does that line that starts "declining in approximately 2007 all the way down to zero in 2033," what does that line indicate to us?

MR. ANTONUCCI: Objection.

THE WITNESS: So I -- I believe it indicates the balance of the HI trust fund over

time, both historically and where it's currently being projected to end.

BY MS. WALLACE:

Q And does this chart show the trust fund ratio declining to zero around 2033 under intermediate assumptions?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm sorry. Could you repeat the question?

BY MS. WALLACE:

Q Sure. Does this chart show the trust fund ratio declining to zero around 2033 under intermediate assumptions?

MR. ANTONUCCI: Same objection.

THE WITNESS: In my reading, what's in the chart and the narrative below it? I would say yes.

BY MS. WALLACE:

Q All right. And in the narrative below it, can you read the sentence that I highlighted, please?

A Yes. It says "However, under the high-cost assumptions, asset depletion would occur in 2029."

Q And so that depletion down to zero -- to a

zero trust fund balance, under high-cost assumptions could occur as early as 2029, three years from where we are now? Is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: That is what that sentence says. But I will also add that the sentence at the beginning of the paragraph points out "There is substantial uncertainty in the economic, demographic, and healthcare projection factors for the HI trust fund expenditures and revenues."

So it's very difficult to say with a degree of certainty what will or will not happen, necessarily.

BY MS. WALLACE:

Q But these are the best actuarial projections of CMS; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I was not involved in putting this together so I can't speculate as to whether or not it was the best effort or not. I like to hope so.

BY MS. WALLACE:

Q Good. These are the actu -- I'm sorry, that word -- actuarial projections of CMS; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I was not involved in compiling a report so I don't have direct knowledge of the degree to which CMS actuaries put this together versus others that may work as part of the board of trustees.

BY MS. WALLACE:

Q The report states that "After depletion, Medicare can only pay benefits to the extent allowed by ongoing revenues."

Do you agree with that statement?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I have a foundation to either agree or disagree with it.

BY MS. WALLACE:

Q Okay. Based on your understanding, if assets are depleted, one of the possibilities is that the full schedule of benefits would not be able to be paid under the program. Would you agree with that sentence?

MR. ANTONUCCI: Objection.

THE WITNESS: I would have to say I guess that's possible.

BY MS. WALLACE:

Q Let's look at another chart, if you don't

mind. Let's look at page 71, which is also Bates stamp number 83. This is -- I'll highlight it. The figure on the screen is III.B5. And it says -- oops. That's okay. Now, the whole -- the whole page is now highlighted. Figure III.B5, Present Value of Cumulative HI Taxes Less Expenditures through Year Shown, Evaluated Under Current-Law Tax Rates and Legislated Expenditures.

Can you tell me what the line on the screen is depicting in the chart?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I'm not an actuary. But based on, by quickly looking at this, it's indicating the present value of the trust fund taxes, minus expenditures out into the future starts to run into a negative value around 2033, I would say.

BY MS. WALLACE:

Q And if you look down below, the chart reflects -- if you agree with me -- a long-term unfunded obligation of approximately $3.1 trillion. And I'm highlighting that sentence.

A It simply says that, "As noted previously, over the full 75-year period, the fund has a projected present value unfunded obligation of 3.1

trillion." No more, no less.

Q So if no changes are made to the program and the current law is maintained, in the long-term, viewed as the "75 period" that was analyzed by the actuaries, the gap in funding would reach $3.1 trillion. Am I reading that correctly?

MR. ANTONUCCI: Objection.

THE WITNESS: I think that's how I would read it.

BY MS. WALLACE:

Q Would you agree with me that the HI fund potentially has a substantial financial burden facing Congress and the public?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say that the -- the HI trust fund faces several challenges and headwinds with respect to its financial solvency going forward.

BY MS. WALLACE:

Q Let's look at one more chart on page 72. This is Bates number 84. And I'll highlight the title. This is Figure III.B6, Comparison of HI Cost and Income Rate Projections: Current Versus Prior Years.

And below, it states in Figure III.B6

indicate -- "As Figure III.B6 indicates, the intermediate HI cost rate projections in this year's report are higher than in the 2024 report and the projected income rates in this report are fairly similar to those in the 2024 report. The higher cost projections are primarily a result of higher-than-anticipated 2024 expenditures and higher projected spending for inpatient hospital and hospice services. These impacts are partially offset by lower payment updates."

Do you see that? I'll highlight it just because I read it.

Do you see that text?

A Yes. Yes.

Q Would you agree with me that this chart is showing that the HI costs are exceeding the income for the foreseeable future?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes.

BY MS. WALLACE:

Q And what's the concern there, based on your accounting knowledge and background?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I think any time that the income revenues are being outpaced by the

expenditures, it becomes unsustainable for the long term.

BY MS. WALLACE:

Q And unsustainable in the sense that the changes must be made in order to sustain the program?

A I would say yes, in order to maintain the financial -- the financial viability in the long term, correct, something has to change.

MR. ANTONUCCI: Excuse me. I meant to object to the last question.

BY MS. WALLACE:

Q Can you tell me, and it's contained within the document, what a Medicare funding warning is. And I'd be happy to show it to you, if you'd like.

A I think it would be helpful if you refresh my memory. I think I do know what it is, but --

Q Okay. Let's --

A -- it would be helpful if you could go to it.

Q Yeah. Absolutely. There's actually a Definitions section so I will take you right to that. There's a glossary on the document that takes us to the definition of a Medicare funding warning. And I'll let you read it. All right. And I'm going

to -- this is on page 245 of the trustees' report and the Bates number ends with 257. And I will highlight the text on the screen.

Will you read the Medicare funding warning definition, please?

A Yes.

Q I was just going to say, out loud, if you don't mind.

A Yeah. Gotcha. "Medicare funding warning, a warning triggered when a determination of excess general revenue Medicare funding has occurred in two consecutive years. Such a warning requires the President to submit to Congress within 15 days after the date of the budget submission for the succeeding year, proposed legislation to respond to the warning. The law also requires Congress to consider the legislation proposed in response to Medicare Funding Warnings on an expedited basis. See also excess general revenue Medicare funding."

Q Do you know if this report indicates that we are currently in a Medicare funding warning has been issued?

MR. ANTONUCCI: Objection.

THE WITNESS: As I recall, in reviewing the highlights and the conclusory summary, I

believe it did result in a funding -- or I think it may mention that this is -- it's not the first funding warning that's been generated. There's been many funding warnings generated over the last few years.

BY MS. WALLACE:

Q Yes. That's right.

And so I am turning your attention to page seven, which is Bates stamp numbers ending in 19. And I wanted to point your attention to the paragraph I'm highlighting on the screen.

Here we go.

Will you read and/or summarize the text that's highlighted on the screen, please?

MR. ANTONUCCI: Objection.

THE WITNESS: So out loud, it goes, "As required by law, the trustees are issuing a determination of projected excess general revenue Medicare funding in this report because the difference between Medicare's total expenditures and its dedicated financing sources is projected to exceed 45 percent of expenditures within seven years. Since this determination was made last year as well, this year's determination triggers a Medicare

funding warning, which requires the following: The President to submit to Congress proposed legislation to respond to the warning within 15 days after the fiscal year 2027 budget submission; and Congress to consider the legislation on an expedited basis. This is the ninth consecutive year that a determination of excess general revenue Medicare funding has been issued and the eighth consecutive year that a Medicare funding warning has been issued."

BY MS. WALLACE:

Q Based on your understanding of the definition of the Medicare funding warning and also the knowledge that this is the ninth consecutive year that a determination of an excess general revenue Medicare funding has been issued, would you expect that in the near future, Congress will need to make some changes to current law to ensure Medicare sustainability in the future?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, I would agree with that. I think that's what the language here is projecting.

BY MS. WALLACE:

Q Let's take a look at page five. I'm highlighting a sentence on the bottom paragraph. Would you read that out loud, please?

A "Medicare's actual future costs are highly uncertain for reasons apart from the inherent challenges in projecting healthcare cost growth over time."

Q Do you, based on your career and role, would you be able to further explain why Medicare's actual future costs are so highly uncertain?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I could speculate.

BY MS. WALLACE:

Q That's not a part of your role in finance?

A Correct. I don't work in our office of the actuaries, so projecting the demographics and the economic variables involved in making that kind of projection, it's not -- not in my bailiwick.

Q But based on your role, you don't have any reason to disagree with the text that "Medicare's actual future costs are highly uncertain"?

MR. ANTONUCCI: Objection.

THE WITNESS: I have -- I have no reason to doubt the plain language of what's in the

trustees' report here.

BY MS. WALLACE:

Q Okay.

A That's all I can say.

Q Thank you.

We're going to take a look at page 31 of the document. And this is corresponding to Bates number ending in 43. The title of this section is Addressing the Long-Range Financial Imbalance. And it states that "Lawmakers have many options to address the long-range financial imbalance and keep the HI trust fund solvent throughout the 75-year projection period. Two potential approaches, with either immediate or gradual implementation, illustrate the magnitude of the changes needed to eliminate the deficit. One, the standard 2.90 percent payroll tax could be immediately increased by the amount of the actuarial deficit to 3.32 percent, or" -- and this is the part I wanted to highlight -- "expenditures could be reduced immediately by 9 percent."

When they say "reduced expenditures," would -- could that involve paying providers less, nearing eligibility, reducing covered services? What is your understanding, based on your career at

CMS, of what reducing expenditures by 9 percent could include?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, based on my experience, there's the -- you know, the reducing expenditures and benefit payouts is -- I mean, it's -- it's pretty straightforward. It is what it is. I mean, we've been under different scenarios where we've had to apply sequestration, the sequestration of benefit payment dollars, for example, in different periods of time as required by law. I think we're still under a current position where we sequestered 2 percent of benefit payments just because of appropriation law requirements.

So that's the thing I'm most familiar with is where we just simply cut back benefit payments by a fixed percentage as dictated by statute.

BY MS. WALLACE:

Q And -- and I'm not super familiar with -- I'll have to apologize -- with sequestration. Are you saying that would cut it off from paying the provider, that would cut off the access to that benefit? Help me understand that.

A Right. It doesn't cut off access to the benefit. It just simply reduces the amount that's being paid to the provider by a percentage. Like, the current sequestration we're under is a 2 percent sequestration.

Q My understanding of medical provider reimbursement is that Medicare already pays the lowest rates to their providers in the country. Is that also your understanding?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't have a -- I don't think I'm in a position to confirm or deny that we pay the lowest rates across the country. I have heard providers complain that Medicare pays the lowest rates across the country but I don't have any statistical or data to back that up, necessarily. So it's all anecdotal.

BY MS. WALLACE:

Q Yes. Can we agree that provider reimbursement for Medicare is among the lowest in the country?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I don't think I can posit to agree to that or not. I think that would -- the answer to that question is going

to vary by which parts of the country you're in and locality and different circumstances. So it's hard to generalize.

BY MS. WALLACE:

Q Providers accepting Medicare payment is optional. It's not mandatory by statute. Is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. My understanding, a provider does not have to sign up and participate in the Medicare program. It's their choice.

BY MS. WALLACE:

Q And providers can either enroll, partially enroll, or not enroll at all in taking Medicare coverage?

MR. ANTONUCCI: Objection.

THE WITNESS: No. Based on my experience, the provider has a choice to enroll or not enroll. If you agree to participate in the Medicare program, then you agree to accept payment on behalf of the beneficiaries that you choose to provide services to.

BY MS. WALLACE:

Q Is one of the risks of sequestration, that

a provider could stop accepting Medicare rates because they are too low to compensate them for their work?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, I would have to say, I mean, it's one possibility one could think of among many.

BY MS. WALLACE:

Q The sentence on the screen, "Expenditures could be reduced immediately by 9 percent," you testified that you have experience with sequestration, which is, you know, reducing the amount providers are compensated even further under the Medicare program. Could another example of reduced expenditures be narrowing a recipient's eligibility for a Medicare service?

MR. ANTONUCCI: Objection.

THE WITNESS: I'd say, you know, many different things are possible, I guess, based on whatever Congress would like to do, necessarily.

In my experience over these many years, I have not encountered a situation where we actually started to limit eligibility beyond what's in the current statute. As I had said

before, the trend has been to actually increase the scope of eligibility for beneficiaries under different circumstances.

BY MS. WALLACE:

Q And so, based on your experience, you haven't seen a narrowing of eligibility, but that would be a potential reduced expenditure option that would be available to Congress; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I hate to speculate too much on what Congress's options are, necessarily.

BY MS. WALLACE:

Q Would -- I understand.

Would reducing covered services also be a way to reduce expenditures?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, there's many possible variables that Congress could choose to -- choose to elect.

BY MS. WALLACE:

Q And that's one of them?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, it's a possibility.

BY MS. WALLACE:

Q If providers are paid less under Medicare, could that decrease access or quality of care to patients that are in the Medicare system?

MR. ANTONUCCI: Objection.

THE WITNESS: It's hard for me to speculate on what possibly could or could not happen to the quality of care should their reimbursement rates go down.

I'm not privy to any data or analyses or anything that would confirm that trend or not, necessarily.

BY MS. WALLACE:

Q And the sentence that we read earlier in your deposition about "The quality of care received by Medicare beneficiaries will, under current law, fall over time compared to that received by those with private health insurance," would it seem to you that that is a possibility that the trustees are considering in this report?

MR. ANTONUCCI: Objection.

THE WITNESS: I would have to say yes, just based on the plain language that's in the report. That seems to be what they're saying.

BY MS. WALLACE:

Q Is there a possibility, under the HI fund, which is having solvency issues, is there a possibility that costs could be shifted to beneficiaries through premiums under that program?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, that's one of the -- I suppose that's one of the options that Congress could consider. I just don't know.

BY MS. WALLACE:

Q Okay. And so --

MS. WALLACE: Yes? You -- is it time for a break?

MR. ANTONUCCI: We're coming up on -- actually, I think we're over the hour. Do you mind?

MS. WALLACE: I'm sorry. Not at all. Not at all.

MR. ANTONUCCI: Thanks.

VIDEOGRAPHER: The time is now 12:03. We're going off the video record. This completes media unit number three.

(A luncheon recess is had from 12:03 p.m. to 1:05 p.m.)

VIDEOGRAPHER: The time is now 1:05. We're back on the video record. This begins

media unit number four.

You may proceed.

BY MS. WALLACE:

Q All right, Mr. Young. We are back on the record after a lunch break.

Did you talk to any of your counsel over the lunch break?

A No.

Q Okay. Other than when Jill called you and asked if you were coming?

A Correct. Sorry. I mean --

Q No. No. No. It's totally fine.

A Yeah. I didn't -- I didn't talk to anybody over lunch right there. It's deserted here, so...

Q Got it. Okay. Great.

All right. We left off talking about -- we had had some conversations about medical providers and what they're paid under Medicare. Do you remember that conversation between the two of us?

A Yes.

Q All right. And we were looking at the trustee's document and I'm going to share that document again for you.

MS. WALLACE: Please let the record reflect that this is deposition Exhibit 6 that I'm showing the witness, the trustees' report.

BY MS. WALLACE:

Q Mr. Young, I wanted to direct your attention -- there's a section in the back of the report, and it's entitled -- it's on the screen before you, highlighted. It's entitled Illustrative Alternative Projections. Was this section a part of the report that you reviewed?

A No. I didn't look at this.

Q Okay. You didn't get to this section of the report?

A Correct.

Q All right. I am going to -- do you recall the testimony that you gave earlier? Neither you and I -- neither you nor I were quite sure what percentage reimbursement a Medicare provider received comparable to/from an insured reimbursement payer?

A Correct. Yes. Yes.

Q All right. So I'll ask you to read the sentence on the screen there and then I'm going to scroll you to a paragraph that talks about that. So the first paragraph you're reading is, for the

record, on page 194 of the report, Bates number ending with 206.

A Can you make it a little bigger, please?

Q Yes, sir. Oops. That might have been too big. There.

A That's too big. There you go.

Q Is that -- okay.

A So it reads "As discussed in the introduction, there is substantial uncertainty regarding the adequacy of future Medicare payment rates under current law. This section illustrates the higher Medicare expenditures that would result if certain statutory payment provisions were not fully implemented in all future years."

Q All right. And then the report goes on. I'm going to scroll down. Can you read this paragraph, please?

A Yes. "Over time, unless providers could alter their use of inputs to reduce their cost per service correspondingly, Medicare's payments for health services would fall increasingly below providers' costs. Providers could not sustain continuing negative margins and would have to withdraw from serving Medicare beneficiaries or (if total facility margins remained positive) shift

substantial portions of Medicare costs to their non-Medicare, non-Medicaid payers."

Q And so what is this -- based on your read, what is this identifying as a potential issue in the future related to medical Medicare provider rates?

MR. ANTONUCCI: Object to form and foundation.

THE WITNESS: So overall, I would say it's -- I mean, the language just kind of speaks for itself, I think. But the trend is that if Medicare payment rates don't change from their current format, that they're going to be -- fall below the providers' actual cost to provide the care to put negative pressure on their ability to serve Medicare beneficiaries.

BY MS. WALLACE:

Q All right. And let's scroll down one more page. For the record, this is page 196 with Bates number ending in 208.

Will you read the highlighted sections in this section, please?

A Yes. "Absent a change in the delivery system or level of update by subsequent legislation, the trustees expect access to Medicare-participating physicians to become a significant issue in the

long-term.

"A comparison with private rates provides some context. Medicare payment levels for physician services were roughly 82 percent of private health insurance rates in 2011. Medicare payment levels dropped to 71 percent of private rates by 2023 and are estimated to continue to fall to 64 percent of private rates by 2025. If Medicare rates continue to follow the prescribed current-law updates and private rates increase with Medicare economics" -- excuse me -- "with Medicare economic index growth, then the Medicare rates will fall to 23 percent of private rates by the end of the 75-year projection period."

Q And so does that give us a better understanding of how Medicare providers are being compensated compared to private health insurance rates?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say it provided some specific information, yes, with respect to the current level of reimbursement rates.

BY MS. WALLACE:

Q And so from 2023 to 2025, Medicare providers were paid 71 percent of private rates in

2023 and then it dropped to 64 percent just in two years in 2025; is that correct?

A That's what the language says.

Q And unless physicians do something to increase their costs, the projections of the actuaries in this report have indicated that it, in the long term, it could -- their reimbursement rate compared to private payers could fall to just 23 percent; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I just go by the plain language as far as what it says. If they continue to follow prescribed current law updates and private rates increase with Medicare economic index growth, then you're correct, the Medicare rates will fall 23 percent of the private rates by the end of the 75-year period.

BY MS. WALLACE:

Q And it looks like the concern that's being identified here in the plain language is that there's a possibility acknowledged by the trustees that access to Medicare-participating physicians may become a significant issue in the long-term. And one of those reasons has to do with the rates that

they are paid and the projections thereof. Is that a fair conclusion from what you've read?

MR. ANTONUCCI: Objection.

THE WITNESS: I think reading it in a general way, yes, that's a fair conclusion.

BY MS. WALLACE:

Q And we talked earlier. There's nothing that requires these providers to stay in the Medicare system. It's a -- it's voluntary participation; correct?

MR. ANTONUCCI: Object to the form and foundation.

THE WITNESS: Correct, under current law. The united -- we, the federal government, do not require or compel a physician to participate in the program. It's a voluntary choice.

BY MS. WALLACE:

Q And so provider participation can -- and beneficiary access to that care can depend on payment adequacy in its system -- in the current system?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say -- I would say yes. I mean, it can depend upon -- that's one

variable a physician undoubtedly would consider, I would imagine.

BY MS. WALLACE:

Q Okay. Do you recall us talking earlier about deductibles and premiums that may be paid under the Part A, Part B, Part D Medicare programs?

A Yes.

Q I'm going to turn your attention to the report that you provided on page 199. Did you -- I'm showing --

MS. WALLACE: Please let the record reflect I'm showing the witness page 199, Bates number 211.

BY MS. WALLACE:

Q Did you have a chance to -- in the report that you cited -- review this section entitled Average Medicare Expenditures Per Beneficiary?

A No, I did not. As I said before, I did not get past the -- the highlights and introductory section.

Q Okay. I'm going to scroll down two pages to page 201. 201 includes a table that lists the HI Fund and SMI Fund Average Incurred Per Beneficiary Costs.

Do you have any reason -- I understand

that this isn't something that you compiled, but do you have any reason to disagree with the costs that are identified in this section of the report?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say no. I have no -- personally have no reason to doubt the validity of the numbers.

BY MS. WALLACE:

Q And these should be accurate based upon your understanding of who prepared this report and who it was prepared for? This should be well-done CMS documentation of the beneficiary costs. Would you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I did not prepare the report and don't know who did it, necessarily. But I have no reason to doubt that they didn't put forward their best effort and that it's reliable.

BY MS. WALLACE:

Q Okay. And you would make the same assumption -- I'm just going to scroll down two more pages. There's a section Medicare Cost-Sharing and Premium Amounts. And there's another chart that includes the HI Cost-Sharing and Premium Amounts.

Likewise, do you have any reason to doubt or question the reliability of this information on page 203?

MR. ANTONUCCI: Same objection.

THE WITNESS: No.

BY MS. WALLACE:

Q And so those charts indicate that there are deductibles applicable to Part A that have increased over time. There, additionally, are coinsurance amounts over and above the deductible amounts in these -- in the chart that I'm showing on the screen. Would you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q There are also monthly premiums identified. And all of the above continues into the present, 2034 as intermediate estimates. Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Okay. I wanted to finish up a couple questions on the HI fund and then I want to talk briefly about the SMI fund.

I wanted to show you page 26 of this report. And I'm going to ask you to read the bottom highlighted text, if you would.

A It reads "If assets were depleted, Medicare could pay health plans and providers of Part A services only to the extent allowed by ongoing tax revenues - and these revenues would be inadequate to fully cover costs. Beneficiary access to healthcare services could be rapidly reduced. To date, Congress has never allowed the title" -- excuse me -- "allowed the HI trust fund to become depleted."

Q Okay. And my question is: We talked earlier about that 89 percent figure. Do you remember that with respect to the depletion date?

A I do.

Q Is this -- when it says "beneficiary to access healthcare services could become rapidly reduced," is that related to the 89 percent figure?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I -- it's related in the respect that I believe the context was that by 2033, the HI trust fund would only be able to reimburse 89 percent of the expected benefits at the time. So, yes.

BY MS. WALLACE:

Q And it -- thank you.

And it looks like the conclusion in this sentence is that as a result, beneficiary access, meaning patient access to healthcare services could be rapidly reduced.

That's what the trustees are concerned about with respect to the HI trust fund depletion.

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I think so. But they go on to add that Congress has never allowed the HI trust fund to become depleted.

BY MS. WALLACE:

Q Yes. Which means, as we've talked about earlier, something has to be done by Congress to address this depletion deficit and whether -- what we don't know yet is whether that change that is needed will have an effect on beneficiaries paying more premiums, whether it will be a reduction in provider rates, or whether it will be some type of additional taxpayer contribution to help the HI trust fund remain afloat. Is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say it's true that we don't know all the variables that Congress

could play with to try and address the potential deficit.

BY MS. WALLACE:

Q Would you agree with me that addressing that deficit identified in the trustees' report will require congressional action? In other words, it cannot be resolved administratively within CMS without that occurring?

MR. ANTONUCCI: Objection.

THE WITNESS: I couldn't agree with that simply because we don't know what the future holds.

I know that these are projections and some of them are dire, but we don't have a crystal ball with respect to the -- how the economy may perform, how payrolls' tax revenues may change or not, how efficient healthcare providers may or may not become. So, again, it's hard to say conclusive -- with conclusivity what you're asking me to agree to.

BY MS. WALLACE:

Q Yes. I think the point that you're making -- tell me if I understand -- is that we don't -- let me ask it a different way.

If the projections continue as is

indicated in the trustees' report, assuming the economy continues to perform at expected rates, this deficit will not be able to be addressed administratively. It would require congressional action if things remain the same as projected in the trustee report?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, it's -- I mean, generally, I could agree with that statement.

BY MS. WALLACE:

Q Okay. Last question on the HI trust fund. I know you're excited.

Okay. This paragraph here, which I will highlight for you -- and I'll read it for you. "The trustees project that HI tax income and other non-interest income will fall short of HI incurred expenditures beginning in 2027," meaning it will start to be upside down in 2027. "The HI trust fund does not meet either the trustees' test of short-range financial adequacy or their test of long-range close actuarial balance."

What does that sentence mean to you from the trustees' perspective, please?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I really don't know if

I can say conclusively simply because I'm -- again, I'm not in the actuary's office or did not prepare this report. So the definitions of their short-range financial adequacy, and what that means specifically, as well as their long-range -- excuse me -- actuarial balance, I'm not familiar with them enough to be able to conclusively say one way or the other.

BY MS. WALLACE:

Q Okay. Can you tell me the -- your understanding of the first sentence, then?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I read that to mean that the -- in 2027, the expenditures will outpace the income being generated by tax income and non-interest income in the trust fund.

BY MS. WALLACE:

Q Okay. And that's just -- is that -- that's next year?

A That is next year.

Q And so, again, we would expect some type of immediate action to occur from Congress in order to address some of these concerns and deficiencies that have been noted in the trustees' report?

MR. ANTONUCCI: Objection.

THE WITNESS: Were you asking me a question? I'm sorry.

BY MS. WALLACE:

Q Yes, sir. Would you agree with that?

MR. ANTONUCCI: Same objection.

THE WITNESS: I would say that the trustees' report is prompting Congress, putting them on notice that there's an issue to be addressed.

BY MS. WALLACE:

Q In the short-term?

A In the short-term.

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Thank you.

Okay. I want to talk about -- we've talked a lot about the concerns about the HI fund which is connected to Part A Medicare. Let's switch gears and talk about the SMI funding which funds parts of Part B Medicare and Part D Medicare.

And I wanted to first ask you, do you -- in your career at CMS, do you have an understanding on which expenditures are highest for CMS if you had

to rank Part A, Part B, Part D --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- just to give us some scale of the programs?

MR. ANTONUCCI: Same objection.

THE WITNESS: Just giving you a ballpark, I mean, the -- on the Part A and B side, we pay out over -- I think the most current year available is over $450 billion in benefits. But the higher percentage of that would be on the hospital insurance side, the Part A side, than on the Part B side.

BY MS. WALLACE:

Q And Part D would be a much smaller piece?

MR. ANTONUCCI: Objection.

THE WITNESS: That, I can't recall off the top of my head. It's smaller than the Part A side, yes. But I can't recall the exact percentages as a breakout. The Part A side is the bigger driver of the three.

BY MS. WALLACE:

Q I'm going to show you page 22 of the trustees' report. And I think it might give us -- I'm sorry. Excuse me, 10. It's Bates number 22.

This chart here, does this give us the total -- and I'll highlight it for you -- the total expenditures for each program? So Part A, 422.5 billion; Part B, 553.4 billion; Part D, 146.2 billion; for a total of 1.1 trillion?

MR. ANTONUCCI: Objection.

THE WITNESS: Yeah. Just add the 422 and the 563 [sic] and the 146. That aggregates, so you've got -- you also have -- it includes Part C health plans in here as well, so that's a little -- that's distorting a little bit the total expenditure numbers. I wasn't including Part C.

What I had said earlier, that the bulk of the expenditures on the Part A side, relative to Part B, that's still true. But if you -- you have -- you have to parse this out a little bit to get to that.

BY MS. WALLACE:

Q Is it your testimony that Part C is rolled into these numbers, even though it's not on the chart?

A It's on the chart. It says "Private health plans, Part C."

Q Oh, here.

A Right there. See?
Q Yeah.
A Exactly.
Q I do see that. I do see it. I gotcha.
Okay. So -- and that's why the numbers are higher than you stated earlier?
A Correct.
Q Will you say that answer one more time? I'm sorry.
A Yes. Correct.
Q Okay. Thank you.
MR. ANTONUCCI: Can we go off the record, please?
MS. WALLACE: Sure.
VIDEOGRAPHER: The time is now 1:32. We're going off the video record.
(Off the record.)
VIDEOGRAPHER: The time is now 1:38. We're back on the video record.
You may proceed.
BY MS. WALLACE:
Q Mr. Young, we were talking about SMI funding of Parts B and D. And we were looking at the chart on the screen, Table II.B1, which is page 10 of the trustees' document. And we were

confirming that it does appear to include Part C benefits. Do you recall that from before the break?

A Yes.

Q Thank you. Now, I want to talk specifically about -- and I was trying to understand the scale of Part B, and I think we've -- we've concluded that based on how it's categorized in the trustee report, Part B looks -- if you include -- if you include Part C, it looks like it's a little bit larger of a total expenditure than Part A. But I think if you don't include Part C, I think the numbers that you gave me earlier in your testimony are accurate. Part A is a little bit higher. Is that a fair representation?

MR. ANTONUCCI: Objection.

VIDEOGRAPHER: Yeah. Mr. Young -- I don't think we heard a word he just said.

All right. I'm going to go back off. One moment, please.

The time is 1:39. We're going off the video record.

(Off the record.)

VIDEOGRAPHER: The time is now 1:44. We're back on the video record. You may proceed.

BY MS. WALLACE:

Q Mr. Young, before the audio issues, do you recall the question that I asked you or would you like for me to rephrase?

A Please. Please rephrase.

Q Okay. No problem.

We were just trying to -- I was -- for the last several minutes, I've just been trying to get an understanding of the scale of the two different programs, Part A versus Part B. Will you answer that for me with or without the chart?

A Oh. The scale of the Part A versus the Part B program? I mean, the -- the -- again, the -- off the top of my head, we -- more recent benefit payouts were around somewhere over $450 billion. And the larger percentage of that would be on the Part A side than on the Part B side, not including this -- that number does not include the Part C health plan.

Q Understood.

A Yeah.

Q Okay. Thank you.

Now, we talked about, at length, about the funding source of Part A which is the HI trust fund which relies on payroll taxes and/or premiums for

people that didn't pay payroll taxes for the necessary requisite period of time; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q All right. And so we're moving to talk about the SMI trust fund, which sources Part B and Part D. And I believe you testified earlier that approximately 25 percent of that funding is through beneficiary premiums; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. It's my understanding the premium's set so that annually it's expected to cover 25 percent of the annual expenditures.

BY MS. WALLACE:

Q All right. And the SMI fund does not -- is not in the same core financial outlook and position as the HI fund based on the trustee report. Do you agree with that, generally?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say it's generally not in the same position simply because of the formula for the way the SMI trust fund is funded. Specifically, a portion of it's based

on premium receipts with the balance being on general tax revenue receipts. So as the -- whatever delta there is from the premium collections, we simply draw more from the other funding streams needing to make it whole as far as, you know, general income -- income taxes from people.

BY MS. WALLACE:

Q Yes. And that's precisely what the trustee report says. Directing your attention to page 36 of the document, which is also Bates 48, and in the very first paragraph, it states "Financing for the SMI trust fund is adequate because beneficiary premiums and government contributions for both Part B and Part D are established annually to cover the expected costs for the upcoming year."

And the chart on the screen demonstrates that. Do you agree with that -- the statement I just read?

MR. ANTONUCCI: Objection.

THE WITNESS: I agree with what the chart represents and the language in the -- in the trust -- the trust fund summary -- the trustees' report. Excuse me.

BY MS. WALLACE:

Q And so what the chart in front of you shows is that starting since the 1960s, as the expenditures for the SMI fund for Part B and D have increased, so have premiums almost exactly on the same curve to cover increases in expenditures for Part B and Part D. Do you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, again, I didn't make the report. I would -- I will just say, just looking at the graph, it looks -- it looks to be like the -- an ascending line such that the premiums and tax revenues are increasing to cover the increasing benefit costs over time.

BY MS. WALLACE:

Q The report states on page seven that the current Part B premium for 2025 is approximately $185 per month. Do you remember seeing that? Page seven is in the Summary section of the document. I'm happy to take you to it.

A No. I remember that. That's what the premium is.

Q All right. And that would be, in last fiscal year, 2025, that would be about $2,200 per year that each enrollee of Part B was paying for premiums. Is that true?

A You cut out in your question. If you could please ask again, Whitney.

Q No problem.

In 2025, the total amount of premiums paid by someone electing Part B Medicare would be 2,200 per year annually if you extrapolated the 185 per month for a calendar year.

A That sounds about right, but it's not -- it's not completely true because of the IRMAA test --

Q Yes.

A -- which is tied to income. So higher -- higher -- beneficiaries with higher incomes are going to pay higher premiums, if you recall.

Q Yes.

A Right?

Q So that's the base amount that --

A Correct.

Q The very -- the minimum amount someone would pay for premiums. If you made more, you pay more?

A Correct.

Q All right. And then also under that program, the chart we looked at earlier, there are deductibles and co-insurance also applicable to SPI

fund in Part B and D payments?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. There are deductibles and copays on some services on Part B and Part D.

As I had said earlier, not every service -- it depends on the service type -- has a copay.

BY MS. WALLACE:

Q The report reflects that premiums have increased over time and are expected to continue to increase into the future. Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: All I can say is from based on the graph, that seems to be the implication but I didn't -- that's all I could confirm for you, I think.

BY MS. WALLACE:

Q And premiums are -- and growing premiums are a necessary component of what funds Part B and Part D. Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say the premiums are, by law, required because they are -- they are statutorily required to cover a, again,

approximately 25 percent of the expected benefits, I believe.

BY MS. WALLACE:

Q Enrollment in Part B and Part D, you testified earlier, is voluntary; right?

A Yes.

Q And so if a recipient cannot afford to pay the premiums associated with their coverage, they lose coverage. Is that true?

A Yes, it's possible. They cannot -- if they cannot afford to pay their premiums -- as I mentioned earlier, for those people that are financially disadvantaged, and if you may be entitled to both Medicare and Medicaid, then Medicaid will actually help pay your premiums for the Medicare program.

Q For Medicare, there's no guarantee that an individual will remain enrolled in the Part B and D program?

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q Do you agree with that?

MR. ANTONUCCI: Same objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q The other tax contributions that source the SMI fund, the 75 percent of the funding, they -- those funds ultimately come from taxpayers to the government. Is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, they come from general tax revenues' interest.

BY MS. WALLACE:

Q The future Part B premiums that are identified on the chart, those will change, to the best of your knowledge, based on what factors?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, again, I don't work in the actuary's office at CMS so it -- it's -- it's not worth me speculating everything that they -- they -- they fact -- used to factor in what the premiums should be, necessarily.

What I've said before is based on my understanding what's in the statute as far as the requirement that it be able to cover at least 25 percent of the expected benefit payments.

BY MS. WALLACE:

Q Your designation indicates that you are testifying with regard to the SMI fund in

addition -- and also to premiums associated with that fund --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- but not to future premiums? I'm just trying to understand the scope of your testimony.

MR. ANTONUCCI: Same objection.

THE WITNESS: I'm simply saying that I don't -- I don't have firsthand knowledge of the premium calculation. I'm not an actuary, necessarily. I can confirm for you what is in the statute, which I've done, as far as the composition of 75/25 percent.

BY MS. WALLACE:

Q And that's the extent of your knowledge in that area?

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q Basically, like, past premiums, not future premiums?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that I have anything else to add.

BY MS. WALLACE:

Q Okay. The -- your knowledge is how Part B

and D are funded; is that correct? Based on your designation, it's how it's funded but not -- not the future of how it will be funded?

I'm sorry. I'm just trying to understand your designation.

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, what my -- what I've said is focused on what the funding sources are for different -- for Part A and Part B and Part D. I've said they're -- Part B and D come from the SMI fund. The SMI fund is funded through the combination of premiums and non-payroll tax revenues.

How the actuary is -- what they're doing as far as computing the expected benefit payouts for future premiums, I cannot speak to.

BY MS. WALLACE:

Q I wanted to ask you some general questions about the trustees' report. Does it have, to your knowledge, any sections that discuss the Camp Lejeune Justice Act?

A From the portion which I read, which is, again, the introduction and the highlights, I don't recall reading anything related to the Camp Lejeune Justice Act.

Q Do the projections in the trustees' report, do they have anything to do with offsets associated with litigation?

MR. ANTONUCCI: Objection, foundation.

THE WITNESS: I have the same answer. From what I'd read in the introduction and the highlights, I did not read anything with respect to offsets. That's as far as I could go as far as what's contained in the trustees' report.

BY MS. WALLACE:

Q In your career at CMS, have you ever been involved with overseeing or managing offsets for CMS?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say, as part of my work here in the Office of Financial Management, one of the groups underneath my umbrella, they do deal with offsets as a form of collecting overpayments owed by providers to the program.

BY MS. WALLACE:

Q And did you say that was under your direction or you had experience in that?

A I said it was under my direction. I've

had direct experience in working with helping to set up the offsets in some cases.

Q Do you -- you testified earlier -- have you also managed contractors that identified liens for CMS?

A I'm trying -- I directly -- I directly have not. I have a group with -- in the umbrella of our scope of reports, our financial services group. They deal with Medicare Secondary Payer as well as subrogation, collection on different cases. Sometimes that -- sometimes that involves liens, as you might imagine.

Q Based on your 35 years with CMS, do you have an understanding of the difference between liens and offsets and how CMS handles those in different ways?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say I have a cursory knowledge of the -- of offsets. The nuances and distinctions between offsets for overpayments versus a lien against someone or a subrogation case, I'm less familiar with.

BY MS. WALLACE:

Q And in a situation where a lien is recovered, is that the result of money, to your

knowledge, coming back to CMS, whereas an offset, no money actually comes back to CMS? It's withheld? Do you understand my question?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I understand your question. I mean -- and I think you're generally correct in that respect. I mean, an offset is a -- we offset a future payment to a provider to collect on a debt that provider may owe us.

So we're -- we're just capturing money back before it even actually goes out the door.

In a lien situation where there's a settlement and we have a subrogation right to a potential settlement, for example, we're -- we're collecting money back from a portion of a settlement between two parties.

BY MS. WALLACE:

Q Thank you. Would you agree with me that the purpose of an offset, as you are familiar with it, is to prevent the government from paying twice for the same loss?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I would agree with you in the context that I'm familiar with

it.

In our world, we're just simply trying to -- it's a mean by which we recover owed money. We're in -- we're in a situation where we're paying benefits out to providers over projected periods of time. They may develop overpayments. And the fact is we have a potential funding source of income for theirs, and we have direct control over, which we're able to attach, if you will, and recover overpayments owed to us.

We use other means too, in some cases. We don't -- we don't have the ability to an offset. Somebody may have already left the Medicare program and we had to pursue other traditional overpayment collection methods such as sending out overpayment demand letters and things like that.

BY MS. WALLACE:

Q And so your experience with offsets, really, is in the context of overpayment situations where you put a hold on future payments based on the identification of the overpayments so you don't pay that person twice?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes.
BY MS. WALLACE:
Q Have you ever dealt with liens in a -- or been assigned to deal with liens in a -- or account for liens in a litigation context?
MR. ANTONUCCI: Object to form.
THE WITNESS: No, not directly.
BY MS. WALLACE:
Q Do you have indirect knowledge of offsets in a litigation context?
MR. ANTONUCCI: Objection.
I'm sorry. Are you referring to liens or offsets?
MS. WALLACE: Offsets. Did I say it wrong? If I said lien, I meant offset.
THE WITNESS: Could you start from scratch and ask it again?
BY MS. WALLACE:
Q I'd be happy to. Do you have any indirect knowledge of offsets in a litigation context?
MR. ANTONUCCI: Objection.
THE WITNESS: I would have to say no.
BY MS. WALLACE:
Q And so any offsets associated with litigation, such as maybe the 9/11 litigation, that

did not come through you or your department?

A That did not come through me, is my personal experience. I cannot speak to whether or not it came through the department or whatnot. I'm just speaking from my personal experience.

Q Is it true that CMS outsources the handling of liens to a contractor such as -- such as the Benefits Coordination Recovery Center?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I believe we do ask the BCRC to help us with recoveries, in that context.

BY MS. WALLACE:

Q And the offsets that you were speaking of previously related to overpayment compensation, that's handled internally still by CMS as opposed to outsourced to a contract agent?

MR. ANTONUCCI: Objection.

THE WITNESS: The offsets I was speaking to earlier, the way you characterized is generally correct with one proviso being that that's one of the functions that the Medicare administrative contractors help us with, as far as recovery and through offsets of provider payments. So they are involved in that as

well.

MS. WALLACE: Were we an hour -- is it time for an hour break?

MR. ANTONUCCI: Just about.

MS. WALLACE: Do you want to take a brief break? I don't have a ton left for you, Mr. Young.

THE WITNESS: Can we do five minutes?

MS. WALLACE: Yes.

VIDEOGRAPHER: The time is now 2:07. We're going off the video record. This completes media unit number four.

(A brief recess is had from 2:07 p.m. to 2:12 p.m.)

VIDEOGRAPHER: The time is now 2:12. We're back on the video record. This beginning media unit number five.

You may proceed.

BY MS. WALLACE:

Q Mr. Young, when we went over your CV earlier in your testimony this morning, you testified that you do have a background in program integrity, including improper payments and vulnerabilities in the Medicare payment systems; is that right?

A Yes.

Q Would you agree with me that despite the many oversight efforts of CMS, many of which you've undertaken to enforce, CMS does understand that some level of coding error is unavoidable in a system of this size?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that I would agree with that characterization. I mean, there's -- will there -- will coding errors ever be fully eradicated? Probably not. But the -- the -- just using the Fee-For-Service error rate, for example, we talked earlier about it, it's sitting at right around six -- over six and a half percent, I believe is the most recent number.

You know, most of that percentage, about almost two-thirds of that are what we call no-documentation errors, meaning people haven't -- they either didn't provide the medical record fully or they only provided a portion of the medical record to substantiate and support the information that was on the claims.

So it wasn't the point being of the, you

know, the six and a half percent. You know, the bigger part of that is just no -- no documentation errors. It's not the other potential compliance issues of upcoding or miscoding or flatout abuse, for example.

BY MS. WALLACE:

Q Well, we talked earlier about that 6.55 percent represents 28.83 billion in improper payments. And I think you just testified that two-thirds of that requires additional documentation to be uploaded. But I would imagine that a large amount of improper payments do still have to do with upcoding or miscoding. It wouldn't be a small number. Would you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: My characterization was, again, the larger percentage of the improper payment error rate for Fee-For-Service is related to no documentation errors, meaning the medical records did not contain the documentation supporting what was in the medical record, or they were only partially sufficient, or they didn't have the record at all. It wasn't a flatout miscoding issue, per se.

Well, there -- is there a -- you know, in a program which is paying out, you know, over $450 billion in benefits, small percentages do add up to large numbers. I get that point.

BY MS. WALLACE:

Q Catching a no-documentation error is a lot easier and more straightforward than catching a miscoding or an upcoding error. Would you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know. Potentially, it is -- you know, the upcoding part, having actual -- actually having the medical record is what helps you determine whether or not something was upcoded inappropriately or appropriately. Or sometimes they also make errors the other way. They downcode things inappropriately. So it works both ways. And if you don't have the medical record, you couldn't make that decision one way or the other.

BY MS. WALLACE:

Q You testified earlier that you don't have the medical records for corroboration for all of the -- of the data extractions and billing coding

that CMS manages. Is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: That's correct. We do not -- I'm sorry. Did I interrupt?

BY MS. WALLACE:

Q No. No. We didn't catch your first answer. Go ahead.

A That -- I mean, the answer is that's correct. We do not receive medical records for every single claim, all 1.13 billion claims we receive. It's not practical to do that. It's only in situations where we have a reason to review the claim for whatever reason that we go out and we actually ask for the medical records that support what was certified on the claim as being true and accurate and correct.

Q Would you agree with me that you're only able to really catch upcoding or miscoding errors if you do have the medical records for corroboration?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I would say my experience, that's the primary way we do it. For me to say that's the only absolute way to do it, I don't know that I can say that. I mean, there's other opportunities, I think,

through investigation for people to interview providers, beneficiaries, and whatnot that may also help -- help ferret that out.

BY MS. WALLACE:

Q But you agree that the primary way to catch upcoding and miscoding is to have an RN or a physician review the actual medical record associating -- associated with the CPT or HPC codes, or the ICD-9 or the ICD-10 codes?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I would agree with that.

BY MS. WALLACE:

Q And without doing that medical record corroboration, it's very difficult to catch miscoding and upcoding?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say it's harder, yes.

BY MS. WALLACE:

Q CMS policy, would you agree with me, it treats billing codes as information that requires validation --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- as it relates to your program integrity?

MR. ANTONUCCI: Same objection.

THE WITNESS: I may not fully understand your question.

BY MS. WALLACE:

Q Does CMS policy encourage that billing codes require validation in order to ensure program integrity?

MR. ANTONUCCI: Excuse me.

Same objection.

THE WITNESS: I don't think I would characterize it that way. I mean, the -- again, as I'd said earlier, when a provider submits a claim form, they are certifying that what they're submitting on the claim form is a true and accurate representation of the service they provided and is supported by the medical records. That's what we rely on is that certification.

Does it always need to be verified and corroborated by somebody doing medical review? I would say no. That's not practical or feasible from a resource standpoint.

BY MS. WALLACE:

Q Are you aware of the governing bodies that oversee the Medicare system such as the HHS/Office of Inspector General and the OIG?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I'm aware of them.

BY MS. WALLACE:

Q Are you aware that they oversee Medicare?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Have you reviewed the HHS/Office of Inspector General reports that have found widespread coding errors and upcoding errors in Medicare claims?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I have not reviewed them.

BY MS. WALLACE:

Q Are you aware, generally, that they have found widespread coding errors and upcoding in Medicare claims?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I would say I am aware.

BY MS. WALLACE:

Q Are you aware that the OIG conducts

recurring audits of Medicare coding in documentation due to risks of upcoding and miscoding?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Are you aware that the government accountability office has designated Medicare as a high-risk program due to persistent improper payments and billing complexity issues?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Are you aware of CMS's position that the medical record is the primary source for verifying services rendered, medical necessity, and diagnostic support?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, I'm aware of that.

BY MS. WALLACE:

Q If the medical record documentation does not support the codes, does CMS consider that payment improper or flag that as an improper payment?

MR. ANTONUCCI: Objection.

THE WITNESS: I cannot recall off the top of my head. There's nuances to that so I cannot remember.

BY MS. WALLACE:

Q If the documentation does not support the code, it might not be flagged as an improper payment?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, it's -- there's -- there's a level of complexity and nuance to that that I'm not steeped in to say at what point it's going to be called an error or not.

BY MS. WALLACE:

Q Do you consider -- because you -- you testified earlier that a provider signs off on the coding before it's submitted to Medicare. Is it your position that that is sufficient for Medicare to pay that claim or does it require additional review outside of the coding itself?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I can answer that question because it may vary on the different circumstances and the type of claim. And it's been -- it's been a minute since I worked in actual program integrity cases.

BY MS. WALLACE:

Q Is there any instance where CMS protocol would not review claims only based on coding?

MR. ANTONUCCI: Objection.

I also want to note for the record that this questioning is going far beyond the scope of Mr. Young's disclosure as an unretained expert.

THE WITNESS: Could you ask the question again because it's --

BY MS. WALLACE:

Q Yes.

A -- it's been a minute.

Q Yes. Is there -- much of the CMS billing comes in the form of coding. Based on your career at CMS, is that also your understanding?

MR. ANTONUCCI: Same objection.

THE WITNESS: Based on my experience, the -- I mean, we deal with a lot of codes that come in on a claim so we use different codes for procedure codes, diagnosis codes, modifiers in conjunction with the CPT codes.

So, yes, I mean, our claims do involve a lot of different codes.

BY MS. WALLACE:

Q And my understanding of your background and experience is that you understand that there are many different programs that have been established to make sure those codes are accurate. You guys have a RACs program, a Comprehensive Error Rate Testing program, you have a medical record auditing program. So your goal -- my understanding is that the goal of CMS is to make sure those codes are accurate, they're medically necessary, they're reasonable, they're not subject to upcoding or miscoding, and that's part of your efforts on fraud detection under the CMS program.

And so I'm just trying to make sure that I understand correctly that CMS tries really, really hard to double-check these codes to make sure that they're accurate before and after they pay them to ensure the integrity of the program.

MR. ANTONUCCI: Objection.

THE WITNESS: So I would just say, in my experience that -- I mean, the -- we do make an effort to make sure that the -- the information billed on the claim is consistent with the medical record through different means. I mean, through -- again, through different selection of medical review records from

medical review, the experience of the recovery audit contractors, things of that sort.

I mean, it's -- it's been a minute since I worked on that space so it's hard for me to confirm your general -- just general statement.

BY MS. WALLACE:

Q In your experience, in your role, do you know what -- how much money is dedicated to fraud and abuse detection and improper billing detection?

MR. ANTONUCCI: Objection.

THE WITNESS: Off the -- off the top of my head, I don't.

BY MS. WALLACE:

Q Would it be millions?

MR. ANTONUCCI: Objection.

THE WITNESS: It would be in the millions, yes.

BY MS. WALLACE:

Q And so would you agree with me, then, that Medicare does not just take the coding as it comes from the provider; they have programs in place to ensure accuracy, and they do often find errors and improper coding when they perform their audits and apply the programs that they've designed?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say we do have means and measures by which we check to make sure codes that come in are accurate and valid as far as their descriptors. But we don't always catch every one or every thing.

BY MS. WALLACE:

Q Yeah. And that was my next question.

With a program of this scale and magnitude, it would be impossible -- difficult if not impossible to catch all errors in billing coding?

MR. ANTONUCCI: Objection.

THE WITNESS: It would be -- it would be difficult.

BY MS. WALLACE:

Q And the gold standard, if you -- would you agree, would be to confirm the coding with the medical records? If you had the chance to do that for everyone, that would be the gold standard?

MR. ANTONUCCI: Objection.

THE WITNESS: It's -- it's been a minute since I worked in program integrity so I don't really feel like I can speak to what the gold standard is right now.

BY MS. WALLACE:

Q Can you agree that that would be a helpful way to validate the claim coding?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say in my experience, that it's been a helpful way to validate whether or not the coding on a claim is supported by the medical record, yes.

BY MS. WALLACE:

Q And its identified in the program integrity manual for CMS publication 100-08 that the medical staff will review the documentation you submit of the claims to determine if the services billed are reasonable and necessary and meet all other requirements of Medicare coverage. Do you have that knowledge in your role?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not have that knowledge in my role.

BY MS. WALLACE:

Q What about the -- complying with medical record documentation requirements that indicate that "We pay for services when the medical record documentation supports Medicare coverage, coding, and billing requirements"?

Is that within your scope or knowledge?

MR. ANTONUCCI: Objection.

THE WITNESS: That is not within my -- my scope right now, no.

BY MS. WALLACE:

Q Have you ever managed the medical record review program in your roles?

A No. I've -- I've not directly managed the medical record review function, per se.

Q Do you agree or disagree that billing codes alone are insufficient to determine clinical relatedness?

MR. ANTONUCCI: Objection.

THE WITNESS: I would have to say the -- I really can't opine or speculate on the appropriateness of the billing codes. I mean, we don't -- CMS doesn't even really own the CPT codes. That's something that's owned by the American Medical Association, I believe. And as far as the descriptors and their adequacy, that's -- that's something that's in their space, not ours, so I really can't comment on that.

BY MS. WALLACE:

Q And so that will not be a topic that you're opining on in this litigation?

A No. I could not speak to that.
Q As we sit here today, do you have any guarantee that Medicare benefits will remain unchanged in the future?
MR. ANTONUCCI: Objection.
THE WITNESS: I cannot -- I cannot speak to that. I have -- it's not possible for me to project what's going to happen in the future.
BY MS. WALLACE:
Q Do you have any guarantee that the reimbursement levels will remain the same in the future?
MR. ANTONUCCI: Objection.
THE WITNESS: Again, I can't -- there's -- there's the poss -- the possibility of the variables we talked about with respect to what Congress may or may not do with Medicare. I don't know. I can't predict that.
BY MS. WALLACE:
Q Would you agree that Medicare's future depends on legislative and policy decisions that have not yet been made? Is that a fair characterization of your testimony?
MR. ANTONUCCI: Objection.
THE WITNESS: Again, I think I have the

same answer. I mean, it may or may not depend on policy decisions that have yet to be made. I cannot predict the demographics of the country or the practice patterns of medicine and how efficient or inefficient it may be, or the evolution of medicine in terms of the efficacy of the services they provide so it's -- I don't really hazard a guess at what the future's going to bring.

MS. WALLACE: All right. Mr. Young, I don't think I have any further questions for you.

MR. ANTONUCCI: I have a few.

EXAMINATION

BY MR. ANTONUCCI:

Q So, Mr. Young, first of all, good afternoon. Thanks for bearing with us for longer than anticipated. I appreciate your patience and I'm going to try to make this quick.

You previously testified that you cannot guarantee the future of the Medicare program; right?

A Yes.

Q And you previously testified you can't guarantee the future of reimbursement levels within the Medicare program; right?

A Yes.
Q Mr. Young, how long have you worked at CMS?
A Just over 35 years.
Q And in your over 35 years at CMS, how much of that time was spent working on Medicare?
A Oh, all of it was working on Medicare, whether it be Medicare Fee-For-Service or the managed care side. It's always been on Medicare.
Q And if you know, when did the Medicare program begin?
A It was -- I can give you the date. It's 1965. I don't remember the month.
Q Okay. So doing the math, it's fair to say Medicare existed for your entire career at CMS; right?
A Yes.
Q And in your 35 years at CMS, you testified that you've observed Medicare expand benefits in coverage; right?
A Yeah. My experience has been that the propensity is for the program to -- to add benefits. The most -- as, again, the most telling one being the addition of the prescription drug benefit program in 2006.

Q To your knowledge, Mr. Young, has Medicare coverage ever been decreased?

A No, not to my knowledge or recollection.

Q To your knowledge, has the Medicare program ever been eliminated or discontinued?

A No, absolutely not.

Q Okay. So based on your 35 years of experience, is it fair to say that it's reasonably likely that Medicare will continue into the future?

A Yes. Based on my experience, what I've lived through, it's -- it's very reasonable to expect that the program is going to continue into the future.

Q And based on your 35 years of experience with Medicare, is it fair to say that it's reasonably likely that the programs Medicare currently covers will continue to be covered into the future?

MS. WALLACE: Objection, please, for the record. Leading and foundation.

THE WITNESS: Based on my experience, I would say it -- the program will continue into the future. As I've said before, the tendency is for the political leadership to accrue and accrete benefits and/or expand eligibility over

time.

That's -- that's been what I have lived and experienced.

MR. ANTONUCCI: Okay, thank you, Mr. Young. I have no further questions at this time.

MS. WALLACE: Shortly, Mr. Young, on redirect.

FURTHER EXAMINATION

BY MS. WALLACE:

Q You testified earlier that it is not within your scope to -- or your role to predict the future policy decisions of Congress as it relates to the Medicare program; is that right?

MR. ANTONUCCI: Objection.

THE WITNESS: I think I said something along the lines of it's not within my scope to predict what Congress is going to do, which I still believe.

BY MS. WALLACE:

Q And we always talk -- we also talked about the fact that Congress will need to make changes or the current funding of at least the Part A program will be depleted as soon as 2033 and as short as next year. Do you remember that testimony?

MR. ANTONUCCI: Objection.

THE WITNESS: I remember us -- what we reviewed in the trustees' report as far as the vulnerabilities for the trust funds.

BY MS. WALLACE:

Q And so it's not within your purview or scope to speculate as to how Congress might fix that problem. Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: I agree that it's not within my purview to speculate how they may or may not fix the problem.

What I do believe in is based on my experience and what I've seen in terms of the addition of benefits and increasing eligibility requirements for the population that we serve. That tendency could reasonably continue into the future.

BY MS. WALLACE:

Q And it also might not continue into the future. They may also -- Congress may also decide to cut benefits or decrease provider pay as well. We don't know what -- how Congress will fix the problem within the current system. Is that true?

MR. ANTONUCCI: Objection, compound, and

calls for speculation.

THE WITNESS: It is correct that that would be speculative on my part. I do not want to predict what they may or may not do.

BY MS. WALLACE:

Q And so all of your testimony today has to do with the history of Medicare as you've known it in your 35 years at CMS, and you're not making any type of testimony or opinion related to what may or may not happen in the future with regard to the Medicare system; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: All I can say is I represented what I've seen and experienced in my lifetime here. And, again, what Congress may or may not do is unknown but to God, as they would say, I think.

BY MS. WALLACE:

Q Are you -- did you testify that you are aware of all of the policy changes as it relates to coverage eligibility and services covered in the Medicare system? Is that within your expertise?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't -- you're going to have to clarify the question a little bit for

me, Whitney. Because when you say "coverage eligibility decisions," what exactly are you trying to get at?

BY MS. WALLACE:

Q You testified earlier that in your time at CMS, you don't recall any coverage being decreased. But I didn't remember if you actually are -- I didn't think that that fell within your -- quite frankly, within your CV, the coverage, you know, eligibility. Obviously, Part D was -- started in 2006. But the menial details regarding services covered, I just didn't remember that being in your CV.

MR. ANTONUCCI: Objection.

THE WITNESS: Yeah. As far as -- excuse me.

As far as what's covered and what's not covered, I mean, it's -- it's through my 35 years of experience as far as what the program covers and doesn't cover.

BY MS. WALLACE:

Q So are you testifying that -- that all changes to the services provided and coverage, that is within your area of expertise over the course of the 35 years that you've been at CMS?

A No, I don't --

MR. ANTONUCCI: Objection, misstates prior testimony.

THE WITNESS: Yeah.

Yeah. I don't -- I don't think I can speak to that.

BY MS. WALLACE:

Q Okay. So the coverage and services provided is not within your area of expertise?

MR. ANTONUCCI: Same objection.

THE WITNESS: I'll just go back to what I had said earlier about -- and what's in my written narrative as far as the primary coverage principle as far as what's medically reasonable and necessary to treat an illness or injury or correct a malformed body member and the different categories which are excluded, necessarily. That's -- that's the basic outline of -- of the core of my experience.

BY MS. WALLACE:

Q And so there may be somebody more knowledgeable at CMS as it relates to the changes and services covered over the 35 years you've been there other than you?

A There might be.

Q Do you know which department that would fall under at CMS?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know. The place to start would be the Center for Medicare Services.

BY MS. WALLACE:

Q Is that the umbrella branch of CMS?

A Well, there's --

MR. ANTONUCCI: Objection.

THE WITNESS: No. It's one of the centers of the Centers for Medicare and Medicaid Services.

BY MS. WALLACE:

Q You were asked a question in -- by your counsel as to whether, in your experience, you'd ever known of coverage being decreased. Do you remember that question? And you said "No, I'm not aware of that"?

A Yes, I --

Q Who -- who would be the actual expert on that at CMS?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that there would be one singular person.

BY MS. WALLACE:
Q Which department?
MR. ANTONUCCI: Objection.
THE WITNESS: Again, I don't know other than to point you to the Center for Medicare.
BY MS. WALLACE:
Q Can we agree that it would not be the financial management department?
MR. ANTONUCCI: Objection.
THE WITNESS: We can agree it would not be the CFO.
BY MS. WALLACE:
Q Okay. And that's not one of the topics that you were designated to talk about by the government; correct?
MR. ANTONUCCI: Objection.
THE WITNESS: What I was -- what I was asked to talk about was what my experience was with respect to the -- whether or not the benefits tended to expand or contract under the program, in my experience.
BY MS. WALLACE:
Q And are you, as a -- as a financial -- and as a CFO -- deputy CFO, you are looking at that from a macro level as opposed to a micro level of

understanding any changes in services, small changes over time. You're looking at it as a total -- total dollar or big -- or total program?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say I'm looking at that from my personal experience over 35 years working in different positions within the program.

BY MS. WALLACE:

Q And so is that a macro or a micro level?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I have anything else to add.

BY MS. WALLACE:

Q Can you tell me what parameters you're using to make that conclusion? Are you looking at programs? Are you looking at dollars?

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q Or are you looking at policy manuals that talk about services covered?

MR. ANTONUCCI: Same objection.

THE WITNESS: It's -- it's based on my experience and different positions with the organization, dealing with claims over time,

knowing what's -- what's covered and having read through the regulations and the Social Security Act, and experience.

BY MS. WALLACE:

Q So it's not related to -- to your analysis of dollars?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say no.

BY MS. WALLACE:

Q And you testified earlier that it would probably be the CMS division that would be in the best position to assess changes in services provided and benefits; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I said it would be the Center for -- it's called the Center for Medicare, singular, CM.

BY MS. WALLACE:

Q Ahh. And that is a division under the umbrella of CMS?

MR. ANTONUCCI: Asked and answered.

BY MS. WALLACE:

Q Did you answer? Sorry. It might have been a --

A No. It's -- yeah. It's yes. If you

look -- look at the CMS org chart.

Q Okay. But it's -- and if you could just tell me one more question. That's not beneath the CFO department --

A No.

Q -- on the org chart; is that right?

A Correct. Correct.

MR. ANTONUCCI: Objection.

MS. WALLACE: Okay. Great. I don't have any further questions for you, Mr. Young. Thank you for your time today.

MR. ANTONUCCI: I have one more, sorry. A couple more, excuse me.

FURTHER EXAMINATION

BY MR. ANTONUCCI:

Q You testified that someone from the Center for Medicare services, CM -- excuse me if I'm getting the acronym wrong -- would be best positioned to answer Ms. Wallace's question about benefits coverage; right?

A Yes.

Q Can you also answer that question?

A I'm sorry.

MS. WALLACE: Objection.

BY MR. ANTONUCCI:

Q Are you also able to answer that question?
A I'm sorry. What's the question you want me to also answer?
Q Are you able to speak to benefits coverage under Medicare?
A At a high level, I can, as I've already said today. The primary principle for coverage is an item or service has to be medically reasonable or necessary -- and necessary to improve an illness or injury or correct a malformed body member, as I said.
That's under -- it's in the Social Security Act, 1862.
Q Okay, thank you, Mr. Young. I have no further questions.
MS. WALLACE: I don't either, Mr. Young. Thank you.
VIDEOGRAPHER: The time is now 2:53 and this completes media unit number five in this videotaped deposition.
CERTIFIED STENOGRAPHER: Counsel, may I get your transcript orders?
MS. WALLACE: Yes.
MR. ANTONUCCI: Yeah. We have a standing order.

MS. WALLACE: We do. And we -- plaintiff wanted a rough.

CERTIFIED STENOGRAPHER: Okay.

MS. WALLACE: Please.

CERTIFIED STENOGRAPHER: And, Mr. Antonucci, you as well?

MS. WALLACE: Will you make sure there's a condensed? That's my very favorite.

MR. ANTONUCCI: Sorry. Dawn, were you saying something?

CERTIFIED STENOGRAPHER: Yes. Did you want a rough draft?

MR. ANTONUCCI: Yes, please.

CERTIFIED STENOGRAPHER: Okay.

(The reading and signing of the deposition is not waived.)

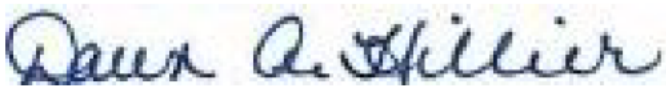
(At 2:53 p.m. the deposition was concluded.)

CERTIFICATE OF OATH

STATE OF FLORIDA)
COUNTY OF PINELLAS)

I, the undersigned authority, certify that LARRY YOUNG appeared before me remotely and was duly sworn.

WITNESS my hand and official seal this 16th day of February 2026.



DAWN A. HILLIER, RMR, CRR, CLR
Notary Public - State of Florida
My Commission No.: HH 300744
Expires: 12-15-2026

CERTIFICATE

STATE OF FLORIDA)
COUNTY OF PINELLAS)

I, DAWN A. HILLIER, RMR, CRR, CLR certify that I was authorized to and did stenographically report the deposition of LARRY YOUNG; that a review of the transcript was requested; and that the transcript is a true and complete record of my stenographic notes.

I further certify that I am not a relative, employee, attorney, or counsel of any of the parties, nor am I a relative or employee of any of the parties' attorney or counsel connected with the action, nor am I financially interested in the action.

DATED this 16th day of February 2026.

DAWN A. HILLIER, RMR, CRR, CLR

February 16, 2026

IN RE: CAMP LEJEUNE WATER LITIGATION

Dear Mr. Young:

Herein, you will find the transcript of your deposition taken on February 6, 2026, and a Errata Sheet for your use in entering any changes to the deposition.

Please do not edit or make marks on the transcript itself. If you desire to make any changes, they should be noted on the Errata Sheet. If no changes are to be noted, please indicate that on the Errata Sheet so counsel are aware that no changes were made.

After reading the transcript, please execute the Errata Sheet, including date and place of signing and return to Golkow, a Veritext Company at the address indicated below.

Thank you for your prompt attention.

Sincerely,

Dawn A. Hillier, RMR, CRR, CLR
GOLKOW, A VERITEXT COMPANY
1650 Market Street, Suite 5150
Philadelphia, PA 19103
877.370.3377

ERRATA SHEET

I, LARRY YOUNG, have read the foregoing pages of my deposition given on February 6, 2026 in the case of IN RE: CAMP LEJEUNE WATER LITIGATION, Case No. 7:34-CV-00897, and wish to make the following additions, deletions or corrections:

PAGE	LINE	CHANGE AND REASON FOR CHANGE

REPORTER'S KEY TO PUNCTUATION:

-- At end of question or answer references interruption.

... References a trail-off by the speaker. No testimony omitted.

"Uh-huh" "Um-hum" References affirmative sound.

"Huh-uh" "Um-um" References negative sound.

CERTIFIED STENOGRAPHER'S NOTE: All quotations from exhibits are reflected in the manner in which they were read into the record and do not necessarily denote an exact quote from the document.

VIDEOGRAPHER: Good morning. We are going on the record at 9:22 a.m. on February 6th, 2026.

Please note that this deposition is being conducted virtually. Quality of recording depends on the quality of camera and internet connection of participants. What is seen from the witness and heard on screen is what will be recorded. Audio and video recording will continue to take place unless all parties agree to go off the record.

This is media unit number one of the video deposition of Larry Young taken in the matter of, In Re, Camp Lejeune Water Litigation, filed in the United States District Court for the Eastern District of North Carolina, Southern Division, Case No. 7:23-CV-897.

I'm the videographer and I represent Golkow Court Reporting. I am not authorized to administer an oath. I'm not related to any party in this action, nor am I financially interested in the outcome. If there are any objections to proceeding, please state them now.

Hearing no objections, all counsel will be

noted on the stenographic record. The court reporter will swear in the witness and we may proceed.

CERTIFIED STENOGRAPHER: Mr. Young, can you hear us?

VIDEOGRAPHER: Mr. Young, we lost your audio.

LARRY YOUNG,

was called as a witness and, having first been duly sworn, was examined and testified as follows.

THE WITNESS: I do.

MS. WALLACE: Good morning, Mr. Young.

THE WITNESS: Good morning.

MS. WALLACE: My name is Whitney Wallace. I'm an attorney for the plaintiff Leadership Group in the Camp LeJeune litigation and I am going to be deposing you today.

THE WITNESS: Great.

MS. WALLACE: Before we start, I was just telling defense counsel that Case Management Order 3 requires he and I to affirm on the record that we verbally agree with the following statement, so I will read it for the record.

"The parties agree that no communication

with the deponent by any means, including but not limited to text messaging will occur out of the view of the other parties while deposition is proceeding on the record."

And I verbally note that I affirm that I will not do that.

MR. ANTONUCCI: As do I.

MS. WALLACE: Great. All right. That is out of the way. And we're going to start.

EXAMINATION

BY MS. WALLACE:

Q Will you please state your full name for the record.

A Larry Young.

Q What is your date of birth?

A [redacted], 1966?

Q Who is your current employer?

A The Centers for Medicare and Medicare services.

Q Will you state your job title, please?

A Yes. I am the deputy chief financial officer and deputy director for the Office of Financial Management.

Q For CMS?

A For CMS.

Q Is there any reason you will not be able to testify fully and truthfully today?
A No. No.
Q For the record, will you tell us where you're physically located?
A Yes. I'm at 7500 Security Boulevard here in Baltimore, Maryland. That's our main office.
Q Is there anyone else in the room with you today?
A No.
Q Do you understand what defense counsel and I just affirmed, that you're not to communicate with anyone via text or other electronic means during the course and scope of the deposition?
A Yes.
Q Do you have any materials there with you available to you today?
A No.
Q Are you familiar, generally, with the Camp Lejeune Water Litigation?
A I'm familiar that -- excuse me. I have a -- I'm familiar with it in a general sense. I'm aware that Congress passed a law that allows individuals to sue the government for the toxic water that apparently existed at some point at Camp

Lejeune. And beyond that, that's -- that's about it.

Q Do you have any understanding of the size of the claimants who have filed claims?

MR. ANTONUCCI: Objection.

You can go ahead.

THE WITNESS: I do not.

BY MS. WALLACE:

Q Do you know anyone personally who's filed a Camp Lejeune Justice Act claim?

A No, I do not.

Q Have you ever given a deposition before?

A No.

Q Have you ever been a party in any civil litigation?

A No.

Q Have you ever been an expert witness before in any sense?

A I would have to say yes. I mean, I've had to fill out signed affidavits on behalf of the government.

Q What were the circumstances of your expert testimony or opinions?

A They were similar to this as far as providing background on the Medicare program, in

general, I would say.

Q And were you testifying before Congress or just some other body or company?

A It was -- I think it was just another court case. It was not before Congress or anything.

Q And so you had to provide an affidavit in a -- in a court case but did not have to provide an expert report or similar testimony other than the affidavit?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct.

BY MS. WALLACE:

Q Do you remember what type of litigation that was?

A I do not.

Q Without telling me the content of any confidential communications with counsel, can you tell me how you were first contacted regarding this litigation?

A I recall I received an email note.

Q From who?

A From some of my colleagues I worked with in the past and in HHS/OGC.

MS. WALLACE: Madam court reporter, did you hear that? It cut out just a touch on my

end.

CERTIFIED STENOGRAPHER: I did hear that, yes.

MS. WALLACE: Thank you.

Can you repeat it for me? I'm sorry.

CERTIFIED STENOGRAPHER: Sure.

(The Court Reporter is directed to read back the previous question and/or answer.)

BY MS. WALLACE:

Q Approximately when was that, Mr. Young?

A I believe it was in the fall of last year, 2025.

Q And after the email, were there phone calls or in-person meetings?

A We had a -- I think we had one -- one or two Zoom calls.

Q And who were those Zoom calls with, please?

A I prob -- I'm sure I can't recall everybody that was on the Zoom calls. Like, I know counsel here, Gio, was on the call, Jill was on the call, Gary was on the call, and I believe Joshua. There may have been others but I don't -- I didn't take an inventory of names.

Q Have you seen your designations in this

case, what you have been designated to testify about in the Camp Lejeune litigation?

A Yes.

Q Were you involved in preparing those designations?

A Yes.

Q What did you do to prepare for today's deposition?

A I simply reread my written designation information as far as what I was going to be speaking to. And I also reviewed the trustees' report which I -- I'd used to prepare some of my designation narrative.

Q The trustees' report is approximately a 300-page document; is that right?

A That sounds about right. I -- I didn't read it all verbatim. I -- I looked at the introduction.

Q Did you meet with anyone outside of counsel to prepare for your deposition today?

A No.

Q Can you tell me how many times you met with counsel to prepare for today's deposition?

A It was twice.

Q Can you tell me how long, approximately,

each meeting was?

A Yes. I believe the first meeting was about an hour and a half and the second meeting was 45 minutes.

Q And if I understand your testimony, it was only with you and counsel, no one else with CMS or any other individuals?

A Yes, that's correct. No one else.

Q Are there any other documents besides the trustees' report that you reviewed to prepare for your testimony today?

A No. There's nothing else I reviewed to prepare for today.

Q All right. I am going to -- when we do depositions via Zoom, we -- the way that I share exhibits with you is, I and counsel and the court reporter, is I upload into the Chat feature. So I'm going to upload five exhibits -- and they're premarked -- into the Chat feature. And I'm going to tell you what they are as I upload them, if that works for you.

A Yes.

Q All right. You should see in the Chat feature, as well as counsel for the defendant and the court reporter, five exhibits that have been

uploaded. And I'm going to verbally describe for the record what each of them are. The document entitled Young Exhibit 1, 2025, December 15, United States damages disclosures. That is the document we're gong to look at shortly. That's your -- what you were designated to be an expert witness in, those disclosures.

(Exhibit 1 was marked.)

MS. WALLACE: Young Exhibit 2 is your notice of deposition issued to Larry Young.

(Exhibit 2 was marked.)

MS. WALLACE: Exhibit 3 is a cover letter -- excuse me, a cover letter issued by counsel for the defendant, dated January 30th, 2026, wherein they provide the document disclosures with reference to your deposition.

(Exhibit 3 was marked.)

MS. WALLACE: Young Exhibit 4 is the -- your response to the notice of deposition and the subpoena responses and objections that was issued by your counsel.

(Exhibit 4 was marked.)

MS. WALLACE: And Exhibit 5 is your CV that was provided with Bates numbers CLJA_USA_YOUNG_1 through 6.

(Exhibit 5 was marked.)

BY MS. WALLACE:

Q And we are going to -- before I get into the exhibits, I wanted to first ask you. You testified earlier you're currently employed by CMS; correct?

Can you hear me?

A Oh, can you not hear me?

Q I can hear you now. Sorry. The audio's a little touch and go.

A Yeah. Yeah. The way it cuts out.

VIDEOGRAPHER: Counsel, do you want to go off for a second? I can maybe try to help him make a quick adjustment.

MS. WALLACE: That would be -- yes.

VIDEOGRAPHER: Okay. The time is now 9:38. We're going off the video record.

(Off the record.)

VIDEOGRAPHER: The time is now 9:41. We're back on the video record. You may proceed.

MS. WALLACE: Thank you very much for all the corrections that were made during the break. I really appreciate that.

BY MS. WALLACE:

Q Mr. Young, the last question I asked you and I believe your answer was "yes," is, you are currently employed by CMS?

A Correct.

Q And CMS is an agency of the federal government. Do you agree?

A Yes.

Q Are you aware that the federal government is the defendant in the Camp Lejeune litigation?

A Yes.

Q And as you testify here today, you are a full-time federal employee?

A Yes.

Q Is your salary paid by the federal government?

A Yes.

Q Did you enter into a private retainer agreement to testify in this litigation?

A No.

Q Are you being paid any additional expert fee beyond your federal salary for your testimony in this litigation?

A No.

Q How are you being compensated for your

testimony today?

A I'm not being compensated at all besides my regular federal salary.

Q And you testified earlier your designation as an expert occurred in the fall of 2025?

MR. ANTONUCCI: Objection.

THE WITNESS: I was -- I was approached by counsel, my counsel, asking if I would be able to provide testimony in this case in the fall of 2025. Can't tell you exactly what month or day it was off the top of my head.

BY MS. WALLACE:

Q Is it your understanding that you were a non-retained expert in this case?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know exactly what you mean by non-retained expert, what that definition means.

BY MS. WALLACE:

Q When I use the word "non-retained," it means you didn't sign a retainer agreement specific to this litigation.

MR. ANTONUCCI: Objection.

THE WITNESS: I did not -- I did not sign any retainer agreement with respect to this

specific litigation.

BY MS. WALLACE:

Q Do you have any personal knowledge of the facts or allegations of the bellwether plaintiffs in the Track 1 litigation for Camp Lejeune that's currently before the court in North Carolina?

A No. I don't even know who that is.

Q So none of your testimony today has to do with anything specific related to the individuals who are before the court in North Carolina? It's more generalized Medicare knowledge?

MR. ANTONUCCI: Objection.

THE WITNESS: I simply have no knowledge of that particular case or party that you referenced. That's all I could say.

BY MS. WALLACE:

Q Let's take a look, if you don't mind, at Exhibit 4. And what I'm going to do is -- it's been uploaded but I'm going to put it on the screen for you.

I'm looking for the CV. It actually might be -- it's Exhibit 5.

Mr. Young, can you -- oops -- can you see my screen? Let's see.

A I can see the screen, but it would help my

old eyes if you could make it a little bigger.

Q My pleasure. One moment. How's that look?

A Much better. Thank you.

Q All right. Do you recognize this document?

A Yes.

Q What is it, please?

A It's my -- my resumé.

Q Did you prepare this document?

A Yes.

Q And did you prepare it for this litigation or do you keep your CV updated?

A I keep it updated. I didn't prepare it specifically for this.

Q And so despite working for CMS almost continually since 1988, you keep an updated CV?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I generally update it periodically.

BY MS. WALLACE:

Q All right. And so your resumé highlights an extensive career, for the most part at CMS. Based on my review, it looks look you only did not work for CMS for approximately two years in, I think

it was '97 to '99, but let's look.

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q Yes. Do you see that?

MR. ANTONUCCI: Same objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Is that right?

MR. ANTONUCCI: Same objection.

THE WITNESS: Yes. That's about the time period I worked for Kaiser Permanente.

BY MS. WALLACE:

Q And that was interpreting Medicare policy or how would you describe that position?

A Beyond what I've put on here, I don't know I would elaborate. It's been -- it's been a minute since that role. As far as working as their Medicare compliance officer, I generally -- I helped them with their application for a Medicare Advantage contract. I also help them stay in compliance with the Medicare rules and regulations associated with that contract.

Q Throughout your career at CMS, based on your resumé, it looks like you worked in administering Medicare Fee-For-Service. Do you

agree?

A I spent the majority of my time administering the Medicare Fee-For-Service program, yes.

Q Tell the court what that is, please.

A The Medicare Fee-For-Service program is what probably most people would refer to as the original Medicare program where individuals receive healthcare and they -- their providers submit a claim to a Medicare administrative contractor which processes that claim and provides benefit payments to that provider. Where, in some limited cases, the beneficiary, they've already paid -- paid the provider.

Q And when you use the word "administering that program," what do you mean by that?

A Well, when I say administering the Medicare Fee-For-Service program, we contract with Medicare Administrative Contractors to perform certain functions for us, primarily receiving and processing Medicare claims for payment, adjudicating first-level appeals, doing audits on medical record reviews, accounting, financial management activities, things of that sort.

Q Yes. And so you mentioned auditing

medical record reviews. It also looked like, from your resumé, that many of your positions have been focused on program integrity, including identifying improper payments and vulnerabilities within the Medicare payment systems; is that correct?

A Yes. Some of my time was spent in those capacities.

Q Can you tell me about the process there, please?

MR. ANTONUCCI: Objection.

You can answer.

THE WITNESS: I can speak to my experience in those spaces. When I was working in the Dallas regional office, I partook in what we called program integrity contractor performance reviews.

We would review their medical review activities to see how they're prioritizing their work and making sure they're compliant with our regulations in that space, necessarily.

Since I've been in the chief financial officer's office, one of our groups here is focused on measuring the improper payment rates across the entire spectrum of programs which we

administer, including Medicare Fee-For-Service improper payments.

BY MS. WALLACE:

Q What causes improper payments within the Medicare system, to your knowledge and experience?

MR. ANTONUCCI: Objection.

You can answer.

THE WITNESS: Improper payments can be -- can stem from number of reasons. In some cases, it's fraudulent providers. In other cases, it's mistakes which providers make in how they submit their claims. In other cases, it's providers that do not keep up with the current documentation required in the medical records to support the claim.

BY MS. WALLACE:

Q Throughout your career, have there also been improper payments related to upcoding and miscoding from medical providers?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, in my experience I've seen that.

BY MS. WALLACE:

Q Is that part of what your career that has been focused on program integrity has been meant to

develop solutions to address?

MR. ANTONUCCI: Objection.

THE WITNESS: When I was working in program integrity, it was -- my focus was more in the review and the responsibilities of the contractors. I was not -- I was not intimately involved in developing solutions for upcoding -- the challenge of upcoding, if you will.

BY MS. WALLACE:

Q Do you know when Medicare developed a system that encouraged the review of medical records to identify fraudulent billing practices?

MR. ANTONUCCI: Objection.

THE WITNESS: I cannot -- no. I don't know exactly when that started.

BY MS. WALLACE:

Q Can you describe that requirement or guideline from Medicare with regard to reviewing medical records to identify program integrity and vulnerabilities in Medicare payment systems?

MR. ANTONUCCI: Objection.

THE WITNESS: I can say that the -- one of the compliant part -- compliance parts for the Medicare program is that in submitting a claim

for benefits on behalf of a beneficiary, part of -- part of the calculus in assuming that claim is that you, a provider, are truthfully certifying that everything submitted on that claim is supportable by the medical record.

Part of the medical review process is -- involves actually asking for medical records because we don't -- we don't receive medical records for every claim that we receive. That's not -- that's not practical. We receive over a billion claims. If we identify a suspect claim, then it can be suspended and a request for medical records will go out for that provider to submit those medical records.

And then a review is done by a nurse or physician or both to see if the medical record supports what's submitted on the claim.

BY MS. WALLACE:

Q It's more of an audit process?

MR. ANTONUCCI: Objection.

THE WITNESS: I would -- I would just say it's what I just described. I'm not sure how you would define "audit," per se.

BY MS. WALLACE:

Q Well, you were just testifying that you

don't look at the medical records for every claim submitted. It's more of a -- you check it with an audit or your contractors check it?

MR. ANTONUCCI: Objection.

THE WITNESS: What I alluded to was that there's a process for identifying suspect claims for which we then request the medical records.

BY MS. WALLACE:

Q Do you know this year's approximate estimated improper payment rate --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- in the Medicare Fee-For-Service program?

MR. ANTONUCCI: Same objection.

THE WITNESS: As I recall -- I may be off by a half percent or so -- it's -- it's somewhere a little short of 7 percent. It's like 6.9 percent, I believe, improper -- the most current improper payment rate, I believe, is just under 7 percent, I thought, for the Medicare Fee-For-Service program.

BY MS. WALLACE:

Q Yes. And so according to the CMS

documents that I reviewed, does 6.55 percent, representing $28.83 billion in improper payments, sound approximately accurate?

MR. ANTONUCCI: Objection.

THE WITNESS: That sounds about right.

BY MS. WALLACE:

Q Okay. Is there a program that has been created to address the error rate -- and I'm referring to the Comprehensive Error Rate Testing program known as CERT.

MR. ANTONUCCI: Objection.

THE WITNESS: Oh, the CERT program is the -- is a program on the Fee-For-Service side as well. At least that's what we use to measure the improper payment rates.

BY MS. WALLACE:

Q How large is CERT, that program? How many persons or funding, if you know?

MR. ANTONUCCI: Objection.

THE WITNESS: Off the top of my head, I don't know for certain.

BY MS. WALLACE:

Q Does that fall under -- or has it ever fallen under your purview throughout your career at CMS?

A Yes. It is currently under the umbrella of our work here in the Office of Financial Management.

Q But you don't have an approximate number as to how many persons work in that program?

A I could give you an approximation. I thought you were asking for something precise. I mean, there's approximately, I would say, 40 people within -- within our office which support the improper payment rate measurement program. And that's inclusive of every program, so they're measuring the improper payment rate for not just Medicare Fee-For-Service, but for Managed Care as well as the Marketplace and Medicaid as well. And they also support several contractors which actually do the improper payment rate reviews for us as far as looking at samples of claims and whatnot. So I couldn't tell you. Inclusive of the contractor staff, like, I don't -- off the top of my head, I don't know how many contractors are supporting the 40-odd people we have here.

Q CMS also has a recovery audit contract program which I understand is based on claims that were already paid but may later be found to have been coded incorrectly. Do you have an awareness of

that program?

A Yes. I'm aware of the recovery audit program. We call them the RACs, R-A-C, if you will.

Q And does RACs help to identify incorrectly coded Medicare submissions?

A Well, RACs, they don't fall under my umbrella, first of all, in the Office of Financial Management. Those are run by the Center for Program Integrity here within the agency.

But my -- my general knowledge of them, experience has been that their -- they don't identify -- they don't identify error rates, per se. They identify and try to collect and recover improper payments made on behalf of the program. And they're reimbursed on the contingency as far as the amount that they may collect.

MR. ANTONUCCI: Excuse me. I meant to object to the last question.

MS. WALLACE: No problem. Thank you.

BY MS. WALLACE:

Q So would you agree with me that based on your understanding and career, CMS has long recognized risks involved in program integrity and oversight functions with regard to identifying reducing coding and documentation errors in the

Medicare system?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say that -- that program integrity is and always will be the component function of this agency and organization, trying to stop abusive and fraudulent billers in all of our programs.

BY MS. WALLACE:

Q All right. Let's talk about your role starting in 2014. You -- let's see if -- I'll scroll to it on the screen.

Your resumé indicates that from 2014 to June of 2023, you worked as the SES group director for the Medicare contractor management group. Can you briefly describe that position and your roles?

A Yeah. So in that capacity, I was leading a group of about 110 federal employees. And we were managing the Medicare Administrative Contractors. I'd alluded to them earlier. They're the contractors which basically administer the Fee-For-Service benefit on behalf of -- on behalf of the government.

In that capacity, I spent a large part of my time dealing with -- developing the contracts for competition, helping work on their content, managing

their performance, assessing their performance, and running the day-to-day operations of the Fee-For-Service program and the different functions which they administer for us.

Q And did much of that role involve overseeing Medicare contractor operations and financial management?

A I would say some of that role was involved in overseeing Medicare contractor financial management operations.

Q In that role, did you prepare corrective action plans for your contractors?

A Yes. We would -- we would work with the contractors when we found fault or errors in some of their operations and they weren't meeting our performance metrics. We would work with them to develop corrective action plans.

Q What time of -- what type of fault or errors do you recall finding? Just a couple examples.

A Just as an example, more often than not, it's a function of workload processing. So, for example, a contractor could -- could get hit with more provider enrollment applications in a given period of time that they would necessarily expect,

or they could have staff attrition unexpectedly occur so that they would get behind in processing provider enrollment applications and would not be able to meet our performance-level metrics.

So we would work with them to see what kind of corrective actions they could come with up to either increase their staffing, increase their productivity, develop timelines for when we expected them to get back in -- to come back in compliance with our -- with our requirements.

Q Since 2023, June to be exact, according to your resumé, you have been in the chief financial officer, CFO, and deputy director role that you hold today; correct?

A Yes. It's the deputy chief financial officer and deputy director. Correct.

Q Thank you. Yes. Meaning there is also a CFO above you? Or how does that work? Is it above you or the same level?

A It's -- she's technically my boss, yes. There's a CFO above me.

Q Okay. Tell me about some of the responsibilities you hold in your current role.

A So in my current capacity, we're -- we oversee the groups responsible for remaining --

managing the range of different financial management functions, including the accounting services, accounting for all the benefit payments and administrative dollars which flow in and outside the agency, maintaining the accounting system, HIGLAS, which captures all those accounting functions, collecting overpayments, running the Medicare secondary program, payment program, and measuring the improper payment rates for the three different programs which the agency administers.

Q And all of that financial accounting, who -- how do you report that regularly to -- what do you prepare in order to report your findings regularly and who do you report them to?

MR. ANTONUCCI: Objection.

THE WITNESS: I say the -- the biggest thing which we report is the annual financial statement that the agency provides as part of the department's report. And this year we -- we produced our -- our -- I believe it's our 27th consecutive year without any significant findings or material weaknesses. It's an annual report.

BY MS. WALLACE:

Q And does that -- is that for CMS

internally or is that used by Congress or who views that? Who relies and needs that annual financial statement?

A It's a public report which many people have an interest in and Congress views it, public view it, the department views it.

Q How does your work in the role you have now support Medicare's long-term stability?

A I would say as far as the stability of the program, a lot of what we do is to provide confidence that the benefit dollars and administrative dollars are accurately accounted for and that the integrity of the accounting process is reliable. That helps ensure confidence that -- that this program is running as efficiently as it can, necessarily. To the extent that that provides stability to the program...

Q So it sounds like your -- your focus is to try to ensure to the general public and/or to Congress or policymakers that confidence in the way Medicare is currently running?

MR. ANTONUCCI: Objection. And the witness hadn't finish answering your last question.

BY MS. WALLACE:

Q Oh, I'm sorry. Mr. Young, did you not finish?

A I -- you know, I think I had necessarily kind of left a dangling answer for you.

To the extent that -- that the confidence we provide in the stewardship of this agency's benefit dollars and administrative dollars provides stability of the Medicare program, we're doing that.

Q I'm going to stop sharing your resumé and I'm going to pull up your designations.

THE WITNESS: Would you mind if we took a little break?

MS. WALLACE: Not at all. I was going to do one on the hour but I'm happy to do one now.

VIDEOGRAPHER: The time -- the time's now 10:10. We're going off the video record. This completes media unit number one.

(A brief recess is had from 10:10 a.m. to 10:16 a.m.)

VIDEOGRAPHER: The time is now 10:16. We're back on the video record. This begins media unit number two.

You may proceed.

MS. WALLACE: Thank you.

BY MS. WALLACE:

Q Mr. Young, I'm going to show you what has been uploaded as Young Exhibit 1. It is a copy of the disclosures that we were provided for your testimony by your counsel. Do you recognize this document?

A Can you make it a little bigger for me?

Q Certainly. Do you recognize this document so far?

A I believe so. I've seen it quickly. It's hard to tell from just the title page.

Q No problem.

So I will represent to you this is a 46-page document that is titled the United States Second Disclosure of Expert Testimony for Phase III in the Camp Lejeune Litigation.

And the section having to do with your designation, it repeats for each disease category, but for the first disease category, which is bladder cancer, your disclosures starts on page five.

Do you see that on the screen?

A I do.

Q I believe you testified earlier that you helped to prepare this section?

A Yes.

Q Did you write it or review it?

A I wrote part of it and reviewed all of it.
Q Which part did you write? And I'll scroll down. I'm happy to scroll down. It looks like your designations actually start -- they're identified as A through I on pages six and seven.
MR. ANTONUCCI: I'm going to object.
Mr. Young, please be careful not to divulge confidential communications with attorneys in answering this question.
THE WITNESS: I can't honestly recall exactly which part that I had -- or parts that I had amended from things that -- so it's hard -- it's hard for me to tell you exactly which -- which parts. But I reviewed it and, again, it's all true and correct.
BY MS. WALLACE:
Q Thank you. Does A through I accurately represent the entirety of the scope of your expert testimony in the Camp Lejeune litigation that you would be expected to provide?
A Yes.
Q And you were able to make edits to confirm that all of these, A through I, is within the scope of your knowledge and expertise in this litigation?
A Yes, absolutely.

Q If we walk through several of these designations, many of these are pretty basic background on the Medicare program. Do you agree with me on that?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say they provide a basic background of the Medicare -- the original Medicare program.

BY MS. WALLACE:

Q Yes. And so, for example, A, B, and C states that "Medicare is a federally funded program of health insurance for the aged, the disabled, and persons suffering from end-stage renal disease."

"Medicare parts A and B, (also known as original Medicare) was established under Title 13 [sic] of the Social Security Act in 1965. Medicare" --

A Eighteen.

Q Thank you. I'm sorry.

"Medicare Part A helps pay for inpatient care in hospitals, skilled nursing facilities, hospice, and some outpatient home healthcare."

I do want to clarify. You don't have any role in the healthcare component of Medicare; correct? More finance and administration?

A I would say, yeah. I'm not directly involved in providing healthcare to people. It's the -- in my current capacity is -- it's the financial management component piece.

Q And then you describe that "Part B helps pay for items and services, such as doctor visits, physical, occupational and speech therapy services, home health service, outpatient hospital services, and durable medical equipment, prosthetics, orthotics, and supplies for those who have voluntarily enrolled."

A Correct.

Q And then in C, your designation, you describe the Part D program "Provides subsidized access to prescription drug insurance coverage on a voluntary basis for all enrolled beneficiaries. It also provides premium and cost-sharing subsidies for low-income enrollees."

And then you indicate when it went into effect which was January 1st, 2006.

A Yes.

Q Am I correct that both the Medicares Part B and D are voluntary enrollment programs?

A Yes.

Q And both of those programs are supported

by premiums from the Medicare recipient that opted into those programs?

A Yes. For people which enroll, they have -- they have to pay a premium.

Q And my understanding is that if you have 10 years of earnings, you do not have to pay any type of a premium for Part A? It's a waived premium?

A For Part A of Medicare, if you have earned -- earned 40 quarters of credit under social security, which is 10 years of work, then you are entitled to Medicare Part A premium free.

There are some individuals who have not worked that long and they have to pay a premium for Part A. Everyone pays a premium for Part B.

Q And some of the premiums are scaled based on your earning capacity?

A Yes. Correct.

Q Does that go for Part B, A, and D?

A It goes for Part B, I know for sure. For Part D, I cannot recall off the top of my head.

Q Does Medicare, if you know, does it keep track of how many -- of how much premiums an enrollee has paid over time?

A We -- off the top of my head, we don't --

I don't know. I mean, we keep track of whether or not people pay their premiums, certainly, so there would be a record of -- of them paying their premiums over time.

Q And so premiums paid or patient pay would be documented within the CMS system?

MR. ANTONUCCI: Objection.

THE WITNESS: Exactly how we account for their premiums, I'm -- I can't tell you at this moment.

BY MS. WALLACE:

Q Can you answer yes or no if premiums paid would be in the CMS system?

MR. ANTONUCCI: Objection.

THE WITNESS: The premium collections are, as I recall -- I believe they're captured through social security, primarily, so there's a distinction here. Social security manages the enrollment in Medicare for the agency and the collections of benefit premiums.

BY MS. WALLACE:

Q Would premiums pay be accessible by Medicare?

MR. ANTONUCCI: Objection.

THE WITNESS: I think generally, yes, it

would be, but we'd have to work with social security in some capacity.

BY MS. WALLACE:

Q Which one of these programs has copays for beneficiaries?

MR. ANTONUCCI: Objection.

THE WITNESS: In my experience and recollection, they all have copays. Different benefits have different levels of copays and some of the benefits have no copays so it depends on the type of service that we're speaking to.

BY MS. WALLACE:

Q But all Part A, Part B, Part D, have copays. Yes?

A No. You can't say all because there are some benefits for which there are no copays.

Q But portions of Part A, B, and D are likely to have copays?

A Yes.

Q Would that information be accessible by Medicare --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- the amount of copays paid by any given

beneficiary?

MR. ANTONUCCI: Same objection.

THE WITNESS: I do not know.

BY MS. WALLACE:

Q Is that housed copays in the social security program or would it be housed in Medicare, to your knowledge?

MR. ANTONUCCI: Objection.

THE WITNESS: I cannot say for certain.

BY MS. WALLACE:

Q Your designations in paragraph E describe how these different parts of the Medicare program are funded. And it's very interesting.

So you describe that Part A is funded with a trust called the Hospital Insurance trust. And then you go on to explain that "The HI trust is funded primarily through payroll taxes, but also income taxes, interest earned on trust fund investments, and Medicare Part A premiums collected from those not entitled to premium free"; is that right?

A Yes.

Q And so in common sense, Part A of Medicare is primarily funded by taxpayers who are employed and paying percentages of their payroll taxes to the

government; is that right?

A Just Part A is funded through a payroll tax. It's 1.45 percent of a person's payroll.

Q Did you agree with my statement?

A I said yes. Did you not hear me?

Q Oh, no. I'm sorry. It might have been a delay. Thank you for that.

And I also understand it's a little more for self-employed earners than the 1.45 percent?

A I think it's -- I believe that's correct, that you'll have -- it's a combination of funds, so it's the payroll tax on individuals 1.45 percent, then the employer pays 1.45 percent. If you're self-employed, then you get to pay the full -- full amount, I believe.

Q And my understanding is that this is based on -- it's kind of like a pay-it-forward program. So the workers of today are paying for essentially the retirees of tomorrow for their Medicare coverage, and it's this pay-it-forward kind of taxpayer approach to Medicare funding. Can you explain that better than me?

A Well, I don't know if I would call it a pay-it-forward program. I mean, it's a trust fund and it exists by -- based on historical payroll

taxes which have been collected over time. And then it's offset all the time by benefit payouts which go out all the time, necessarily. To the extent that there's fewer workers paying payroll taxes that, you know, you can consider that perhaps a go-forward funding situation, but it depends on how you want to characterize it.

Q For the most part, the individuals paying payroll taxes are not probably disabled or usually over 65; right?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say people -- it's a matter -- it's function of who's receiving an income through payroll, be it through being self-employed or not.

There are certainly disabled individuals which may have some part-time work. There's certainly aged individuals which continue to work as well.

BY MS. WALLACE:

Q But by -- in large part, Medicare's being funded by the people working today for their retirement later in life or someone else's retirement?

MR. ANTONUCCI: Objection.

THE WITNESS: As a general matter, you could say that.

BY MS. WALLACE:

Q All right. And then Part B is kind of a -- it's a completely different trust fund. It's called the Supplementary Medical Insurance, SMI trust fund. And it is not paid from payroll taxes. It's paid through a combination of premiums from the beneficiary who enrolled in it and a combination of other tax revenues that the government holds in the treasury. Is that fair?

A Generally, yes. It's funded through the general -- it's a combination of both general tax revenues, income taxes, if you will, for example, and premiums. And it's a formula so that the premium is set every year such that it's actuarially comprised, I believe it's 25 percent of the expected benefit payout. And then the trust fund and tax revenues have to make up the other 75 percent.

Q So Part B is being funded by the beneficiary of the Medicare themselves by them paying premiums. That's about 25 percent of the funding generally. And then the other 75 percent is from taxpayer funding flowing through the government. Is that true?

A That's generally correct.

Q All right. And I wanted to ask you about your paragraph D. It says "To be covered under original Medicare, an item or service must be eligible for coverage and reasonable and necessary for the diagnosis of treatment of an injury or illness."

Tell me about the "reasonable and necessary" requirement for eligibility, please.

A The operating principle as outlined in the Social Security Act is that in order to be covered, an item or service has to be medically reasonable and necessary for the diagnosis, treatment of an illness or injury or, I believe it goes on to say, or to correct the function of a malformed body member, something along those lines.

So that's how you end up with coverage for things like prosthetics, for example, as a part of the durable medical equipment benefit.

The test as to whether or not something is medically reasonable and necessary, that's a clinical decision. And beyond that, I can -- I mean, I'm not a clinician so it's hard for me to expound on that beyond that, really.

Q Do you know if Medicare payment can be

denied if an auditor or contractor deems that the service was not reasonable and -- medically reasonable and necessary?

A Yes. I mean, if it doesn't meet that general test, then an item of service can be denied.

Q And do you know if contractors, when they evaluate claims, do they have a physician or a nurse on hand that helps to make that determination in questionable cases?

A Yes. For my -- my experience has been with -- for example, the Medicare administrative contractors, they have -- we require them to employ chief medical officers, chief medical directors, if you will, as well as a number of nurses that are working in concert with the chief medical director performing medical review on specific claims.

Q Do you agree that the reasonable and necessary determination is made at the time the service is provided based on the patient's condition and the applicable coverage rules at that time?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that I would agree with that. At the time the patient's being seen, they're being seen by their provider and their physician. They're making a

medical judgment, not the Medicare program, per se.

BY MS. WALLACE:

Q Your testimony is that it's later -- it later can be subject to review for -- whether -- as to whether it was reasonable or medically necessary?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, the Medicare program's making the decision as to whether or not it's meeting that coverage criteria. That's happening most often after the fact that the service has been provided. So they're not -- they're not -- we're not in the room making a decision with the clinician, is my point.

BY MS. WALLACE:

Q I understand.

It can happen -- that audit or review can happen after the visit, and sometimes treatment can be denied on that basis?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes.

BY MS. WALLACE:

Q Would you agree that whether Medicare will cover a particular service as reasonable and

necessary, that cannot be a decision that's made in advance?

MR. ANTONUCCI: Objection.

THE WITNESS: I won't say that across the board.

There are -- there are a few different programs we have in place that would require providers to receive prior authorization for a service so that they would be actually engaging with our Medicare administrative contractors to receive prior authorization before they receive the service necessarily. Those are kind of targeted programs with specific benefits.

BY MS. WALLACE:

Q Outside of a pre-approval process, would you agree that whether a Medicare service will be deemed reasonably and medically necessary can't be known years or decades in advance?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't feel like I can answer that question because, again, I'm not in the clinician clinical space.

BY MS. WALLACE:

Q All right. Your designation does say that "An item or service must be eligible for coverage

and reasonable and necessary for the diagnosis or treatment of an injury or illness." And I'm trying to understand, are you saying that that can occur limitedly in a pre-approval process and then it can be subsequently reviewed?

MR. ANTONUCCI: Objection.

THE WITNESS: What I'm saying is that if it's -- if it's something as reviewed prior -- prior approval, it's not -- it's not reviewed after the fact. But the things which are reviewed for prior approval are very limited and narrow. We don't do much of that in the Medicare Fee-For-Service program.

BY MS. WALLACE:

Q So pre-approval would be limited. And other than pre-approval, Medicare does not make that determination based on the service needed years in advance. That's not the process?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I can't really speak to your full characterization because I'm not a clinician. It's not my area of expertise, that space.

BY MS. WALLACE:

Q But you -- but you are an administrator of

the Medicare rules that would be responsible for administering the reasonable and necessary component?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm an administrator and I've spoken to the general -- based on my experience how we handle claims, both on a pre-payment basis and a post-payment basis. That's all I can really speak to.

BY MS. WALLACE:

Q If a -- if a plaintiff knew -- okay.

When you say, in the next sentence, "The item of service must also not be specifically excluded by the Social Security Act," what do you mean by that sentence?

A So there are specific things that the Social Security Act specifically excludes us from being able to cover or provide services for; routine foot care, for example, dental services, to the extent that they don't require somebody to be hospitalized for those dental services are excluded. Things of that sort, those are specific things which Congress just carved out and said, no, those are not available for -- for any kind of Medicare coverage.

Q And are those the types of carved-out

coverage that are usually picked up by Part C?

A There are some of those services where if an individual enrolls in Medicare Part C, which is a Medicare + Choice plan typically administered by what we would call a health maintenance organization, they can offer additional benefits from what the original Medicare Fee-For-Service program can offer. And many times they do choose to provide some of those supplemental benefits that we do not, are not allowed to provide under the original Fee-For-Service program.

Q How is Part C -- Medicare Part C funded?

A My knowledge and recollection of how Part C is funded is -- is not as deep as it is on the A and B side, or the D side, necessarily. But I think it's probably -- I don't want to speculate. I'm going to have to tell you I can't remember.

Q Do you know if it's funded by the government?

A I would say yes, it's -- I believe it's funded by the government. That part, I do know.

Q Do you know if it's ran through private insurance companies?

A Yes. Those programs are run by private insurance companies, most commonly, as I said,

health maintenance organizations. There are some PPO organizations as well; providers. UnitedHealth, for example, would be one.

Q But you are not designated to talk about how Part C is funded?

MR. ANTONUCCI: Objection.

THE WITNESS: That's not my area of expertise. So beyond saying that it's paid for by the federal government in the -- I can't, off the top of my head, recall if it's subsidized by the A and B trust funds, if you will.

BY MS. WALLACE:

Q All right. And let's look at your last several designations.

Part G, "Medicare Part B is available to individuals who are eligible for Part A at no cost by paying a monthly premium."

Do you mean -- I think you mean Medicare part -- as worded, it's a slight bit confusing. Would you explain it?

A Well, I mean, if you -- if an individual is enrolled in Part A, they're available -- Part B is available to that individual enrolled in part -- Part A.

Q But they are paying a cost, a monthly premium?

A The Part B -- yeah. Maybe -- maybe this sentence is isn't as artfully worded. But, correct. Part B is -- you pay -- everybody's paying a premium for Part B. Unless there are some low-income individuals which get Part B premium-free subsidized through -- there are dual eligibles that are Medicare and Medicaid eligible.

Their premiums get subsidized but there's a -- everyone pays a premium for Part B.

Q All right. And let's look at I. "Since its enactment, Medicare has expanded to include additional benefits, such as Part D." And you testified earlier Part D is the prescription drug plan?

A Yes, correct.

Q And Part D does have beneficiary contribution in the form of a premium; correct?

A Yes.

Q And it's also a voluntary enrollment program?

A Yes.

Q And then you have this last sentence "Generally speaking, since Mr. Young has been

employed at CMS, benefit coverage has expanded, not constricted."

And so when you say "generally speaking," I think that you mean not every benefit coverage has expanded, but for the most part, benefits coverages have expanded, not constricted?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean -- I mean what it says. I mean, in my experience the program has tended to accrue or accrete additional coverage over time. The big one being the addition of the Part D benefit program for the drug benefit in 2006. There's also a tendency to expand eligibility groups. For example, when I first started, we did not have -- we did not have an eligibility opportunity for people with Lou Gehrig's disease.

That got subsequently added. I can't recall which year, but now if somebody develops Lou Gehrig's disease, ALS, you would -- that individual would be entitled to Medicare coverage, even if they weren't age 65. That's just an example of that.

BY MS. WALLACE:

Q Yeah. So Lou Gehrig's, and then end-stage

renal disease are, you know, specified diseases that fall under Part A coverage?

A Correct.

Q So Medicare is governed by federal statutes enacted by Congress; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: It's governed -- Medicare is primarily governed by Title 18 of the Social Security Act.

BY MS. WALLACE:

Q And that's a statute enacted by Congress?

A It's a statute enacted by Congress, signed into law by the President.

Q In your role, you do not get to make Medicare policy decisions. Would you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, generally, I do not get to make policy decisions. That's generally correct.

BY MS. WALLACE:

Q Who makes those, please?

MR. ANTONUCCI: Objection.

THE WITNESS: Overall, the policy decisions, to the extent that they are -- they are -- that the law allows flexibility in

making policy decisions are made by the political leadership of the agency.

BY MS. WALLACE:

Q And who would that be?

A Well, at this very moment, it would be the administrator, Dr. Oz, as well as -- as well as many of the different political appointees that have been appointed to the agency under the new administration. I can't -- I can't name them all.

Q Would you agree with me that Congress has the authority to amend Medicare statutes, including the eligibility rules, the benefits and scope, and the payment methodologies?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I would generally agree with you.

BY MS. WALLACE:

Q Do you agree that Congress can enact changes that affect the future Medicare coverage and reimbursement levels --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- of Medicare beneficiaries?

MR. ANTONUCCI: Same objection.

THE WITNESS: I would say yes, they can.

BY MS. WALLACE:

Q And so future Medicare coverage and payment levels depend on decisions made by Congress and not necessarily CMS. Is that accurate?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say, in my experience, yes, that's generally accurate.

BY MS. WALLACE:

Q All right. And so I took the designations off the screen for a moment. And I just wanted to talk about -- just clear up what you're not designated to offer opinions on and make sure it's really clear for the Camp Lejeune litigation.

So you testified earlier, you don't know anything about the individual plaintiffs who are in litigation currently; correct?

A Yes, correct.

Q And so you are not designated to offer opinions about any individual plaintiff or their damages; correct?

A Yes, that's correct.

Q The plaintiffs have been previously provided CMS documents in this case. Were you involved in preparing any of those documents?

A No.

Q And just for the record, I'm referring to Bates range document CLJA_CMS_1 through 135.

You have not viewed and had no role in preparing those documents; correct?

A I have no idea what that is, what you just read.

Q Okay. Do you know who Kathleen Hunter is?

A No, I do not.

Q Okay. She testified previously in the Camp Lejeune litigation on behalf of CMS; however, she's a contract worker with BRBC. Do you know what BRBC is?

MR. ANTONUCCI: Objection.

THE WITNESS: Off the top of my head, I don't remember what the -- the acronym stands for. We have lots of acronyms, as you can imagine.

BY MS. WALLACE:

Q Absolutely.

Do you recognize that as a contractor of CMS, that -- just that acronym without...

A I actually do not.

Q Do you recognize this name, Benefits Coordination & Recovery Center, BCRC, Medicare contractor that supports the Medicare Secondary

Payer, MSP program?

A Yes.

Q Is that a contractor for CMS?

A Yes.

Q What does that department or program do?

MR. ANTONUCCI: Objection.

THE WITNESS: So the benefit -- the BCRC contractor for us helps us with our benefit coordination recovery work. And I'm not as steeped in that. But the -- it helps us administer the Medicare Secondary Payer program, where Medicare is not the primary payer for benefits.

BY MS. WALLACE:

Q Do they have a role in lien resolution, that entity, if you know?

MR. ANTONUCCI: Objection.

THE WITNESS: Off the top of my head, I can't recall. We have a -- we have a couple of different contractors help -- help us with our MSP space, some of which deal with education-run Medicare Secondary Payer work. Some of -- some of them involve working on subrogation cases. And off the -- again, I wasn't prepared for that, that discussion so I

can't say for certain.
BY MS. WALLACE:
Q You have not been designated to give an opinion on any offsets in this litigation. Is that true?
MR. ANTONUCCI: Objection.
THE WITNESS: I cannot speak to any offsets.
BY MS. WALLACE:
Q And you are not designated to testify that Medicare will pay for any future care for any of the individual plaintiffs?
MR. ANTONUCCI: Objection.
THE WITNESS: I could not speak to that.
BY MS. WALLACE:
Q And you're not offering an opinion predicting any future Medicare reimbursement rates or fee schedules. Is that true?
MR. ANTONUCCI: Objection.
THE WITNESS: I cannot speak to Medicare future payment rates or fee schedules.
BY MS. WALLACE:
Q And you're not designated to testify that Medicare coverage is guaranteed for any future beneficiaries of the program?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I could not speak to that either.

BY MS. WALLACE:

Q None of the opinions you've identified in your disclosures guarantee the scope, duration, or payment level of any future Medicare benefits for any individual. Would you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: I would agree that I cannot speculate on what the future may hold with respect to the Medicare program.

BY MS. WALLACE:

Q And you are not offering any opinions on the accuracy of the Medicare coding or billing data for any of the plaintiffs in the Camp Lejeune litigation; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm not privy to any of that information so I cannot really speak to any of that.

BY MS. WALLACE:

Q And you're not offering any opinions on whether services paid for by Medicare were related to their Camp Lejeune exposure for the bellwether

plaintiffs in the Camp Lejeune litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: I cannot speak to that either.

BY MS. WALLACE:

Q And so the scope of your testimony has to do with -- you've had -- with the history of Medicare, as you've known it, and you're not making speculation about the future -- future of Medicare?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct. I can only speak to my experience and what's -- what's under current law, to my recollection.

MS. WALLACE: All right. We are going to -- let me know if you want a break because we're going to start taking a look at the trustees' report. Would you like a brief break before we do that?

THE WITNESS: Yeah. Let's take a little break. I'm going to have to reconfigure my --

MS. WALLACE: Okay. Sure.

THE WITNESS: -- computer.

MS. WALLACE: Okay. Thank you, Mr. Young.

VIDEOGRAPHER: The time is now 11:00. We're going off the video record. This

completes media unit number two.

(A brief recess is had from 11:00 a.m. to 11:11 a.m.)

VIDEOGRAPHER: The time is now 11:11. We're back on the video record. This beginning media unit number three. You may proceed.

BY MS. WALLACE:

Q Mr. Young, I'm going to upload a document into the Chat feature that has been previously marked as Young Exhibit 6, 2025 Annual Report. And it bears the Bates stamped numbers CLJA_USA_YOUNG_7 through 273.

(Exhibit 6 was marked.)

BY MS. WALLACE:

Q And I'm going to put it on the screen for you as well, sir.

Mr. Young, do you recognize this document?

A Yes.

Q What is it?

A This is the '25 annual report of the board of trustees on the status of the Medicare programs' financial situation.

Q Did you -- well, you produced this document in response to the plaintiff's request for materials you reviewed, considered, or relied upon

in developing your opinions in this case; is that correct?

A Yes.

Q And in paragraph nine of your responses to our notice, you also disclosed this document as one that you reviewed in connection with the Camp Lejeune litigation; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Can you tell me which components of this document that you relied upon related to the Camp Lejeune litigation?

A Just reviewed the -- primarily the introduction component piece. It's a kind of lengthy document. So I focused --

Q And it's your testimony that -- oh, I'm so sorry. Please continue.

A No. I'm sorry.

I focused on the introduction and the Highlights section that gives you kind of an overview of their conclusions and recommendations.

Q So just as background for the court, explain to the court, what is this document? Who prepares it? What's it for? What's it used for?

MR. ANTONUCCI: Objection.

THE WITNESS: So I can speak to generally what it is and who prepares it. I mean, it's prepared by the board of trustees for the Medicare program, if you will. It's a annual report that I believe that's required by Congress. They have to report on the financial stability and actuarial projections for the different trust funds which fund the different parts of Medicare.

BY MS. WALLACE:

Q What does Congress do with this document?

MR. ANTONUCCI: Objection.

THE WITNESS: I have no idea what Congress does with this document. I simply know that it's required by law to be provided to Congress, I believe, on an annual basis.

BY MS. WALLACE:

Q Were you an author in this document?

A No.

Q When you stated earlier that you relied -- you rely upon the introduction or the Highlights section of this document to support your testimony in the Camp Lejeune litigations, which parts, specifically?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know if I can point you to an exact paragraph, per se. I read the entire introduction of it.

BY MS. WALLACE:

Q And that supports your opinions in the Camp Lejeune litigation?

A It supports my -- what I've -- what I have provided as terms of written narrative as well as my oral comments today.

Q The intended recipient of this document is Congress and the policymakers and not CMS. Is that your testimony?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that I would care to speculate on what the intent of this was. I simply know what I believe that's required by law as a report to Congress.

BY MS. WALLACE:

Q And it's prepared for Congress, based on your understanding, not for CMS; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That's my understanding, yes.

BY MS. WALLACE:

Q Would you agree with me that the trustees' report generally discusses Medicare's overall financial condition?

A Generally, yes.

Q All right. And what is -- based on the Highlights and Summary section, can you tell me what the current financial position is of the HI fund?

A Well, from what I recall based on the trustees' report was the, the HI supplement -- the HI trust fund, if you will, it's -- it's facing several headwinds and challenges in terms of its being able to continue to be financially solvent. I believe the report indicated that they would -- the benefits would exceed the collections as early as 2027 and that the fund could be depleted by 2033.

Q And so the trustees' report is a warning of that dire financial position of the HI fund?

MR. ANTONUCCI: Objection.

THE WITNESS: You can characterize it the way you like. It's just -- I think it's a factual portrayal based on actuarial projections of -- and assumptions that they're aware at this moment in time of the financial stability of the Medicare A and B trust funds.

BY MS. WALLACE:

Q Let's take a look at the summary section, page two on the document itself, and Bates number 14.

Oh, first of all, actually, let's look at this page. This is Bates number nine. And it's -- who is -- who are the -- can you tell me what this page tells us about who prepared this document?

A I don't know that -- that you could conclude, necessarily, that this would tell you who prepared the document.

This is simply -- my understanding would be simply who is on the boards responsible for the content and who's submitting it to Congress.

Q So these are the Medicare trustees?

A I believe so.

Q And this is the trustees' report?

A Yes.

Q And these trustees, do you understand that -- are they appointed by federal statute?

A I think some of them are appointed by statute, as far as required to be on the board on different capacities. The administrator, I believe, is required to be the secretary of the board. But then there's two -- two -- you see them on there -- vacancies. Those are -- I believe those are

appointed by the President, the public trustees.

Q Okay. Let's look at page four.

Can you read, on -- and this is page four of the document, Bates number 16. Could you read the first paragraph under Summary of Projections, please?

A Yes. "Current-law projections indicate that Medicare still faces a substantial financial shortfall that needs to be addressed with further legislation. Such legislation should be enacted sooner rather than later to maximize the impact on beneficiaries" -- excuse me -- "minimize the impact on beneficiaries, providers, and taxpayers."

Q Do you agree with that statement?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that it matters if I agree or not but it seems like it would be a good idea.

BY MS. WALLACE:

Q Meaning Congress makes the decision. Is that why you say it doesn't matter if you agree with it or not?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct. It's not my decision to make.

BY MS. WALLACE:

Q Do you -- let's take a look at page three. Do you see the sentence that starts with -- yes. In the third -- let's see. I'm going to highlight it for you on this document so we can follow each along.

Do you see the highlighted text on the screen? Do you want me to zoom in?

A No. I can see it.

Q Okay. Will you read that paragraph for me, please?

A "If the health sector cannot transition to more efficient care delivery and if the provider reimbursement rates paid by commercial insurers continue to be based on the same negotiated process, then the availability, particularly with respect to physician services, and quality of healthcare received by Medicare beneficiaries, will, under current law, fall over time compared to that received by those with private health insurance."

Q Can you explain to me in your own words what that paragraph is intended to convey, to the best of your knowledge?

MR. ANTONUCCI: Objection, foundation.

THE WITNESS: I mean, it says what it

says. I mean, if the -- if the -- if the -- if the Medicare program healthcare providers are unable to become more efficient in delivering the care that they provide, then there will be a growing disparity between what Medicare beneficiaries receive and what commercial private health insurance beneficiaries receive.

BY MS. WALLACE:

Q And the quality of healthcare received by Medicare beneficiaries will, under current law, fall over time compared to that received by those with private health insurance? Meaning it's possible that the quality of healthcare received by Medicare beneficiaries could fall under the current law?

MR. ANTONUCCI: Objection.

THE WITNESS: It's possible.

BY MS. WALLACE:

Q Isn't -- is that -- isn't that one of the warnings being issued in this summary of the report?

A Yes, I would say so.

Q The trust -- the HI trust fund depletion that you talked about earlier on page five, will you read and explain to the best of your knowledge the first paragraph on page five that I just highlighted? And this is Bates number 17.

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. "The expenditure projections reflect the cost-reduction provisions required under current law but not the payment reductions and/or delays that would result from the HI trust fund depletion, which is projected in this report to occur in 2033. At that point, HI revenues are projected to cover 89 percent of incurred program costs."

What exactly did you want me to explain again?

BY MS. WALLACE:

Q Well, let's start with the last sentence. So when it says at the point that the HI trust fund has depleted, which is projected currently to occur in 2033, is it my understanding that at that point only -- the HI revenues are only sufficient to cover 89 percent of the estimated program costs, meaning there's -- there would be an unfunded 11 percent of Part A Medicare costs?

MR. ANTONUCCI: Objection.

THE WITNESS: The language is what it is, but that's the way I would interpret that. It would be a deficit.

BY MS. WALLACE:

Q And so what happens in the event of a deficit? There's -- I understand there's, like, a number of ways that Congress could decide to fix that. Could one of those ways be to decrease eligibility or offerings under the Medicare Part A program?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, it's -- you can speculate on different things that Congress at the time could elect to do. You either increase benefits, lower benefits, increase revenues, lower revenues -- well, you wouldn't lower revenues. You want to increase revenues, certainly. But there's this fixed number of variables with which they have to deal to address the issue.

BY MS. WALLACE:

Q So Congress will have to do something to avoid trust fund depletion of the HI trust fund. And what it does is unknown at this point in time; is that right?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that I would agree with that statement completely. It's -- it's still -- these are projections. And

it's -- it's unknowable what's going to happen with respect to the economy, the practice of medicine, et cetera. I think the language in the report speaks for itself as far as what may or may not happen.

BY MS. WALLACE:

Q But if the current law stays as is, the whole purpose of this report is to warn that HI trust fund depletion will occur if no changes are made to the program or the law.

MR. ANTONUCCI: Objection.

THE WITNESS: I think that's a little bit of an oversimplification. But generally it is -- it is -- it is a bit of a cautionary note to explain that the financial viability of the HI trust fund is in danger under current law, assuming certain assumptions hold true, which are only assumptions. Nobody knows exactly what the future holds.

BY MS. WALLACE:

Q Let's take a look at page six. This is the Highlights section that you indicated you reviewed in preparation for your testimony.

A Yes.

Q All right. And will you read the

highlighted parts that I just highlighted on the screen for you, please, and the title, if you will? I'm sorry.

A Yes. It says "Short-range results. The estimated depletion date for the HI trust fund in 2033 is" --

Q It's "is"; right?

A Excuse me.

Q Of course.

A "The estimated depletion date for the HI trust fund is 2033" -- excuse me -- "three years earlier than projected last year, primarily due to the change in projected expenditures. HI expenditures through the short-range period are projected to be higher than last year's estimates."

Q And so does that mean that compared to last year, they actually moved up the completion date by three years due to increased short-range expenditures in the HI fund in the 2024 time period?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. That's the way I would read that.

BY MS. WALLACE:

Q Meaning the problem is getting worse rather than better from last year's report to this

year's report?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, it means that they've had to move up the -- the depletion dates by three years. That's what it means.

BY MS. WALLACE:

Q Because the H fund trust deficit has gotten predictably worse over the last fiscal year?

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q Worse than anticipated. Is that a better way of saying it?

MR. ANTONUCCI: Same objection.

THE WITNESS: No. Wait. I refrain from -- hesitate to say better, worse, good, or bad. It's simply a matter of fact that the expenditures increased in a short period of time more quickly than they thought and so they had to move up by three years.

BY MS. WALLACE:

Q Do you know, based on your position, why those expenditures increased greater than expected?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not. I'm not intricately involved in the ex rel side of --

of the demographic drivers.

BY MS. WALLACE:

Q All right. We are going to take a look at page 27 of the report, which is Bates stamp number 39.

All right. Have you -- do you see the chart on the screen there? This is Figure II.E1. And it's entitled HI Trust Fund Balance at Beginning of Year as a Percentage of Annual Expenditures.

A Yes, I can see it.

Q Is this the solvency chart for Medicare Part A?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, I don't know if you want to call it the solvency chart. It's just illustrating the trust fund balance as a percentage of expenditures. It is what it is.

BY MS. WALLACE:

Q Okay. And what does that -- what does that line that starts "declining in approximately 2007 all the way down to zero in 2033," what does that line indicate to us?

MR. ANTONUCCI: Objection.

THE WITNESS: So I -- I believe it indicates the balance of the HI trust fund over

time, both historically and where it's currently being projected to end.

BY MS. WALLACE:

Q And does this chart show the trust fund ratio declining to zero around 2033 under intermediate assumptions?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm sorry. Could you repeat the question?

BY MS. WALLACE:

Q Sure. Does this chart show the trust fund ratio declining to zero around 2033 under intermediate assumptions?

MR. ANTONUCCI: Same objection.

THE WITNESS: In my reading, what's in the chart and the narrative below it? I would say yes.

BY MS. WALLACE:

Q All right. And in the narrative below it, can you read the sentence that I highlighted, please?

A Yes. It says "However, under the high-cost assumptions, asset depletion would occur in 2029."

Q And so that depletion down to zero -- to a

zero trust fund balance, under high-cost assumptions could occur as early as 2029, three years from where we are now? Is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: That is what that sentence says. But I will also add that the sentence at the beginning of the paragraph points out "There is substantial uncertainty in the economic, demographic, and healthcare projection factors for the HI trust fund expenditures and revenues."

So it's very difficult to say with a degree of certainty what will or will not happen, necessarily.

BY MS. WALLACE:

Q But these are the best actuarial projections of CMS; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I was not involved in putting this together so I can't speculate as to whether or not it was the best effort or not. I like to hope so.

BY MS. WALLACE:

Q Good. These are the actu -- I'm sorry, that word -- actuarial projections of CMS; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I was not involved in compiling a report so I don't have direct knowledge of the degree to which CMS actuaries put this together versus others that may work as part of the board of trustees.

BY MS. WALLACE:

Q The report states that "After depletion, Medicare can only pay benefits to the extent allowed by ongoing revenues."

Do you agree with that statement?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I have a foundation to either agree or disagree with it.

BY MS. WALLACE:

Q Okay. Based on your understanding, if assets are depleted, one of the possibilities is that the full schedule of benefits would not be able to be paid under the program. Would you agree with that sentence?

MR. ANTONUCCI: Objection.

THE WITNESS: I would have to say I guess that's possible.

BY MS. WALLACE:

Q Let's look at another chart, if you don't

mind. Let's look at page 71, which is also Bates stamp number 83. This is -- I'll highlight it. The figure on the screen is III.B5. And it says -- oops. That's okay. Now, the whole -- the whole page is now highlighted. Figure III.B5, Present Value of Cumulative HI Taxes Less Expenditures through Year Shown, Evaluated Under Current-Law Tax Rates and Legislated Expenditures.

Can you tell me what the line on the screen is depicting in the chart?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I'm not an actuary. But based on, by quickly looking at this, it's indicating the present value of the trust fund taxes, minus expenditures out into the future starts to run into a negative value around 2033, I would say.

BY MS. WALLACE:

Q And if you look down below, the chart reflects -- if you agree with me -- a long-term unfunded obligation of approximately $3.1 trillion. And I'm highlighting that sentence.

A It simply says that, "As noted previously, over the full 75-year period, the fund has a projected present value unfunded obligation of 3.1

trillion." No more, no less.

Q So if no changes are made to the program and the current law is maintained, in the long-term, viewed as the "75 period" that was analyzed by the actuaries, the gap in funding would reach $3.1 trillion. Am I reading that correctly?

MR. ANTONUCCI: Objection.

THE WITNESS: I think that's how I would read it.

BY MS. WALLACE:

Q Would you agree with me that the HI fund potentially has a substantial financial burden facing Congress and the public?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say that the -- the HI trust fund faces several challenges and headwinds with respect to its financial solvency going forward.

BY MS. WALLACE:

Q Let's look at one more chart on page 72. This is Bates number 84. And I'll highlight the title. This is Figure III.B6, Comparison of HI Cost and Income Rate Projections: Current Versus Prior Years.

And below, it states in Figure III.B6

indicate -- "As Figure III.B6 indicates, the intermediate HI cost rate projections in this year's report are higher than in the 2024 report and the projected income rates in this report are fairly similar to those in the 2024 report. The higher cost projections are primarily a result of higher-than-anticipated 2024 expenditures and higher projected spending for inpatient hospital and hospice services. These impacts are partially offset by lower payment updates."

Do you see that? I'll highlight it just because I read it.

Do you see that text?

A Yes. Yes.

Q Would you agree with me that this chart is showing that the HI costs are exceeding the income for the foreseeable future?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes.

BY MS. WALLACE:

Q And what's the concern there, based on your accounting knowledge and background?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I think any time that the income revenues are being outpaced by the

expenditures, it becomes unsustainable for the long term.

BY MS. WALLACE:

Q And unsustainable in the sense that the changes must be made in order to sustain the program?

A I would say yes, in order to maintain the financial -- the financial viability in the long term, correct, something has to change.

MR. ANTONUCCI: Excuse me. I meant to object to the last question.

BY MS. WALLACE:

Q Can you tell me, and it's contained within the document, what a Medicare funding warning is. And I'd be happy to show it to you, if you'd like.

A I think it would be helpful if you refresh my memory. I think I do know what it is, but --

Q Okay. Let's --

A -- it would be helpful if you could go to it.

Q Yeah. Absolutely. There's actually a Definitions section so I will take you right to that. There's a glossary on the document that takes us to the definition of a Medicare funding warning. And I'll let you read it. All right. And I'm going

to -- this is on page 245 of the trustees' report and the Bates number ends with 257. And I will highlight the text on the screen.

Will you read the Medicare funding warning definition, please?

A Yes.

Q I was just going to say, out loud, if you don't mind.

A Yeah. Gotcha. "Medicare funding warning, a warning triggered when a determination of excess general revenue Medicare funding has occurred in two consecutive years. Such a warning requires the President to submit to Congress within 15 days after the date of the budget submission for the succeeding year, proposed legislation to respond to the warning. The law also requires Congress to consider the legislation proposed in response to Medicare Funding Warnings on an expedited basis. See also excess general revenue Medicare funding."

Q Do you know if this report indicates that we are currently in a Medicare funding warning has been issued?

MR. ANTONUCCI: Objection.

THE WITNESS: As I recall, in reviewing the highlights and the conclusory summary, I

believe it did result in a funding -- or I think it may mention that this is -- it's not the first funding warning that's been generated. There's been many funding warnings generated over the last few years.

BY MS. WALLACE:

Q Yes. That's right.

And so I am turning your attention to page seven, which is Bates stamp numbers ending in 19. And I wanted to point your attention to the paragraph I'm highlighting on the screen.

Here we go.

Will you read and/or summarize the text that's highlighted on the screen, please?

MR. ANTONUCCI: Objection.

THE WITNESS: So out loud, it goes, "As required by law, the trustees are issuing a determination of projected excess general revenue Medicare funding in this report because the difference between Medicare's total expenditures and its dedicated financing sources is projected to exceed 45 percent of expenditures within seven years. Since this determination was made last year as well, this year's determination triggers a Medicare

funding warning, which requires the following: The President to submit to Congress proposed legislation to respond to the warning within 15 days after the fiscal year 2027 budget submission; and Congress to consider the legislation on an expedited basis. This is the ninth consecutive year that a determination of excess general revenue Medicare funding has been issued and the eighth consecutive year that a Medicare funding warning has been issued."

BY MS. WALLACE:

Q Based on your understanding of the definition of the Medicare funding warning and also the knowledge that this is the ninth consecutive year that a determination of an excess general revenue Medicare funding has been issued, would you expect that in the near future, Congress will need to make some changes to current law to ensure Medicare sustainability in the future?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, I would agree with that. I think that's what the language here is projecting.

BY MS. WALLACE:

Q Let's take a look at page five. I'm highlighting a sentence on the bottom paragraph. Would you read that out loud, please?

A "Medicare's actual future costs are highly uncertain for reasons apart from the inherent challenges in projecting healthcare cost growth over time."

Q Do you, based on your career and role, would you be able to further explain why Medicare's actual future costs are so highly uncertain?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I could speculate.

BY MS. WALLACE:

Q That's not a part of your role in finance?

A Correct. I don't work in our office of the actuaries, so projecting the demographics and the economic variables involved in making that kind of projection, it's not -- not in my bailiwick.

Q But based on your role, you don't have any reason to disagree with the text that "Medicare's actual future costs are highly uncertain"?

MR. ANTONUCCI: Objection.

THE WITNESS: I have -- I have no reason to doubt the plain language of what's in the

trustees' report here.

BY MS. WALLACE:

Q Okay.

A That's all I can say.

Q Thank you.

We're going to take a look at page 31 of the document. And this is corresponding to Bates number ending in 43. The title of this section is Addressing the Long-Range Financial Imbalance. And it states that "Lawmakers have many options to address the long-range financial imbalance and keep the HI trust fund solvent throughout the 75-year projection period. Two potential approaches, with either immediate or gradual implementation, illustrate the magnitude of the changes needed to eliminate the deficit. One, the standard 2.90 percent payroll tax could be immediately increased by the amount of the actuarial deficit to 3.32 percent, or" -- and this is the part I wanted to highlight -- "expenditures could be reduced immediately by 9 percent."

When they say "reduced expenditures," would -- could that involve paying providers less, nearing eligibility, reducing covered services? What is your understanding, based on your career at

CMS, of what reducing expenditures by 9 percent could include?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, based on my experience, there's the -- you know, the reducing expenditures and benefit payouts is -- I mean, it's -- it's pretty straightforward. It is what it is. I mean, we've been under different scenarios where we've had to apply sequestration, the sequestration of benefit payment dollars, for example, in different periods of time as required by law. I think we're still under a current position where we sequestered 2 percent of benefit payments just because of appropriation law requirements.

So that's the thing I'm most familiar with is where we just simply cut back benefit payments by a fixed percentage as dictated by statute.

BY MS. WALLACE:

Q And -- and I'm not super familiar with -- I'll have to apologize -- with sequestration. Are you saying that would cut it off from paying the provider, that would cut off the access to that benefit? Help me understand that.

A Right. It doesn't cut off access to the benefit. It just simply reduces the amount that's being paid to the provider by a percentage. Like, the current sequestration we're under is a 2 percent sequestration.

Q My understanding of medical provider reimbursement is that Medicare already pays the lowest rates to their providers in the country. Is that also your understanding?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't have a -- I don't think I'm in a position to confirm or deny that we pay the lowest rates across the country. I have heard providers complain that Medicare pays the lowest rates across the country but I don't have any statistical or data to back that up, necessarily. So it's all anecdotal.

BY MS. WALLACE:

Q Yes. Can we agree that provider reimbursement for Medicare is among the lowest in the country?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I don't think I can posit to agree to that or not. I think that would -- the answer to that question is going

to vary by which parts of the country you're in and locality and different circumstances. So it's hard to generalize.

BY MS. WALLACE:

Q Providers accepting Medicare payment is optional. It's not mandatory by statute. Is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. My understanding, a provider does not have to sign up and participate in the Medicare program. It's their choice.

BY MS. WALLACE:

Q And providers can either enroll, partially enroll, or not enroll at all in taking Medicare coverage?

MR. ANTONUCCI: Objection.

THE WITNESS: No. Based on my experience, the provider has a choice to enroll or not enroll. If you agree to participate in the Medicare program, then you agree to accept payment on behalf of the beneficiaries that you choose to provide services to.

BY MS. WALLACE:

Q Is one of the risks of sequestration, that

a provider could stop accepting Medicare rates because they are too low to compensate them for their work?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, I would have to say, I mean, it's one possibility one could think of among many.

BY MS. WALLACE:

Q The sentence on the screen, "Expenditures could be reduced immediately by 9 percent," you testified that you have experience with sequestration, which is, you know, reducing the amount providers are compensated even further under the Medicare program. Could another example of reduced expenditures be narrowing a recipient's eligibility for a Medicare service?

MR. ANTONUCCI: Objection.

THE WITNESS: I'd say, you know, many different things are possible, I guess, based on whatever Congress would like to do, necessarily.

In my experience over these many years, I have not encountered a situation where we actually started to limit eligibility beyond what's in the current statute. As I had said

before, the trend has been to actually increase the scope of eligibility for beneficiaries under different circumstances.

BY MS. WALLACE:

Q And so, based on your experience, you haven't seen a narrowing of eligibility, but that would be a potential reduced expenditure option that would be available to Congress; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I hate to speculate too much on what Congress's options are, necessarily.

BY MS. WALLACE:

Q Would -- I understand.

Would reducing covered services also be a way to reduce expenditures?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, there's many possible variables that Congress could choose to -- choose to elect.

BY MS. WALLACE:

Q And that's one of them?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, it's a possibility.

BY MS. WALLACE:

Q If providers are paid less under Medicare, could that decrease access or quality of care to patients that are in the Medicare system?

MR. ANTONUCCI: Objection.

THE WITNESS: It's hard for me to speculate on what possibly could or could not happen to the quality of care should their reimbursement rates go down.

I'm not privy to any data or analyses or anything that would confirm that trend or not, necessarily.

BY MS. WALLACE:

Q And the sentence that we read earlier in your deposition about "The quality of care received by Medicare beneficiaries will, under current law, fall over time compared to that received by those with private health insurance," would it seem to you that that is a possibility that the trustees are considering in this report?

MR. ANTONUCCI: Objection.

THE WITNESS: I would have to say yes, just based on the plain language that's in the report. That seems to be what they're saying.

BY MS. WALLACE:

Q Is there a possibility, under the HI fund, which is having solvency issues, is there a possibility that costs could be shifted to beneficiaries through premiums under that program?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, that's one of the -- I suppose that's one of the options that Congress could consider. I just don't know.

BY MS. WALLACE:

Q Okay. And so --

MS. WALLACE: Yes? You -- is it time for a break?

MR. ANTONUCCI: We're coming up on -- actually, I think we're over the hour. Do you mind?

MS. WALLACE: I'm sorry. Not at all. Not at all.

MR. ANTONUCCI: Thanks.

VIDEOGRAPHER: The time is now 12:03. We're going off the video record. This completes media unit number three.

(A luncheon recess is had from 12:03 p.m. to 1:05 p.m.)

VIDEOGRAPHER: The time is now 1:05. We're back on the video record. This begins

media unit number four.

You may proceed.

BY MS. WALLACE:

Q All right, Mr. Young. We are back on the record after a lunch break.

Did you talk to any of your counsel over the lunch break?

A No.

Q Okay. Other than when Jill called you and asked if you were coming?

A Correct. Sorry. I mean --

Q No. No. No. It's totally fine.

A Yeah. I didn't -- I didn't talk to anybody over lunch right there. It's deserted here, so...

Q Got it. Okay. Great.

All right. We left off talking about -- we had had some conversations about medical providers and what they're paid under Medicare. Do you remember that conversation between the two of us?

A Yes.

Q All right. And we were looking at the trustee's document and I'm going to share that document again for you.

MS. WALLACE: Please let the record reflect that this is deposition Exhibit 6 that I'm showing the witness, the trustees' report.

BY MS. WALLACE:

Q Mr. Young, I wanted to direct your attention -- there's a section in the back of the report, and it's entitled -- it's on the screen before you, highlighted. It's entitled Illustrative Alternative Projections. Was this section a part of the report that you reviewed?

A No. I didn't look at this.

Q Okay. You didn't get to this section of the report?

A Correct.

Q All right. I am going to -- do you recall the testimony that you gave earlier? Neither you and I -- neither you nor I were quite sure what percentage reimbursement a Medicare provider received comparable to/from an insured reimbursement payer?

A Correct. Yes. Yes.

Q All right. So I'll ask you to read the sentence on the screen there and then I'm going to scroll you to a paragraph that talks about that. So the first paragraph you're reading is, for the

record, on page 194 of the report, Bates number ending with 206.

A Can you make it a little bigger, please?

Q Yes, sir. Oops. That might have been too big. There.

A That's too big. There you go.

Q Is that -- okay.

A So it reads "As discussed in the introduction, there is substantial uncertainty regarding the adequacy of future Medicare payment rates under current law. This section illustrates the higher Medicare expenditures that would result if certain statutory payment provisions were not fully implemented in all future years."

Q All right. And then the report goes on. I'm going to scroll down. Can you read this paragraph, please?

A Yes. "Over time, unless providers could alter their use of inputs to reduce their cost per service correspondingly, Medicare's payments for health services would fall increasingly below providers' costs. Providers could not sustain continuing negative margins and would have to withdraw from serving Medicare beneficiaries or (if total facility margins remained positive) shift

substantial portions of Medicare costs to their non-Medicare, non-Medicaid payers."

Q And so what is this -- based on your read, what is this identifying as a potential issue in the future related to medical Medicare provider rates?

MR. ANTONUCCI: Object to form and foundation.

THE WITNESS: So overall, I would say it's -- I mean, the language just kind of speaks for itself, I think. But the trend is that if Medicare payment rates don't change from their current format, that they're going to be -- fall below the providers' actual cost to provide the care to put negative pressure on their ability to serve Medicare beneficiaries.

BY MS. WALLACE:

Q All right. And let's scroll down one more page. For the record, this is page 196 with Bates number ending in 208.

Will you read the highlighted sections in this section, please?

A Yes. "Absent a change in the delivery system or level of update by subsequent legislation, the trustees expect access to Medicare-participating physicians to become a significant issue in the

long-term.

"A comparison with private rates provides some context. Medicare payment levels for physician services were roughly 82 percent of private health insurance rates in 2011. Medicare payment levels dropped to 71 percent of private rates by 2023 and are estimated to continue to fall to 64 percent of private rates by 2025. If Medicare rates continue to follow the prescribed current-law updates and private rates increase with Medicare economics" -- excuse me -- "with Medicare economic index growth, then the Medicare rates will fall to 23 percent of private rates by the end of the 75-year projection period."

Q And so does that give us a better understanding of how Medicare providers are being compensated compared to private health insurance rates?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say it provided some specific information, yes, with respect to the current level of reimbursement rates.

BY MS. WALLACE:

Q And so from 2023 to 2025, Medicare providers were paid 71 percent of private rates in

2023 and then it dropped to 64 percent just in two years in 2025; is that correct?

A That's what the language says.

Q And unless physicians do something to increase their costs, the projections of the actuaries in this report have indicated that it, in the long term, it could -- their reimbursement rate compared to private payers could fall to just 23 percent; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I just go by the plain language as far as what it says. If they continue to follow prescribed current law updates and private rates increase with Medicare economic index growth, then you're correct, the Medicare rates will fall 23 percent of the private rates by the end of the 75-year period.

BY MS. WALLACE:

Q And it looks like the concern that's being identified here in the plain language is that there's a possibility acknowledged by the trustees that access to Medicare-participating physicians may become a significant issue in the long-term. And one of those reasons has to do with the rates that

they are paid and the projections thereof. Is that a fair conclusion from what you've read?

MR. ANTONUCCI: Objection.

THE WITNESS: I think reading it in a general way, yes, that's a fair conclusion.

BY MS. WALLACE:

Q And we talked earlier. There's nothing that requires these providers to stay in the Medicare system. It's a -- it's voluntary participation; correct?

MR. ANTONUCCI: Object to the form and foundation.

THE WITNESS: Correct, under current law. The united -- we, the federal government, do not require or compel a physician to participate in the program. It's a voluntary choice.

BY MS. WALLACE:

Q And so provider participation can -- and beneficiary access to that care can depend on payment adequacy in its system -- in the current system?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say -- I would say yes. I mean, it can depend upon -- that's one

variable a physician undoubtedly would consider, I would imagine.

BY MS. WALLACE:

Q Okay. Do you recall us talking earlier about deductibles and premiums that may be paid under the Part A, Part B, Part D Medicare programs?

A Yes.

Q I'm going to turn your attention to the report that you provided on page 199. Did you -- I'm showing --

MS. WALLACE: Please let the record reflect I'm showing the witness page 199, Bates number 211.

BY MS. WALLACE:

Q Did you have a chance to -- in the report that you cited -- review this section entitled Average Medicare Expenditures Per Beneficiary?

A No, I did not. As I said before, I did not get past the -- the highlights and introductory section.

Q Okay. I'm going to scroll down two pages to page 201. 201 includes a table that lists the HI Fund and SMI Fund Average Incurred Per Beneficiary Costs.

Do you have any reason -- I understand

that this isn't something that you compiled, but do you have any reason to disagree with the costs that are identified in this section of the report?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say no. I have no -- personally have no reason to doubt the validity of the numbers.

BY MS. WALLACE:

Q And these should be accurate based upon your understanding of who prepared this report and who it was prepared for? This should be well-done CMS documentation of the beneficiary costs. Would you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I did not prepare the report and don't know who did it, necessarily. But I have no reason to doubt that they didn't put forward their best effort and that it's reliable.

BY MS. WALLACE:

Q Okay. And you would make the same assumption -- I'm just going to scroll down two more pages. There's a section Medicare Cost-Sharing and Premium Amounts. And there's another chart that includes the HI Cost-Sharing and Premium Amounts.

Likewise, do you have any reason to doubt or question the reliability of this information on page 203?

MR. ANTONUCCI: Same objection.

THE WITNESS: No.

BY MS. WALLACE:

Q And so those charts indicate that there are deductibles applicable to Part A that have increased over time. There, additionally, are coinsurance amounts over and above the deductible amounts in these -- in the chart that I'm showing on the screen. Would you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q There are also monthly premiums identified. And all of the above continues into the present, 2034 as intermediate estimates. Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Okay. I wanted to finish up a couple questions on the HI fund and then I want to talk briefly about the SMI fund.

I wanted to show you page 26 of this report. And I'm going to ask you to read the bottom highlighted text, if you would.

A It reads "If assets were depleted, Medicare could pay health plans and providers of Part A services only to the extent allowed by ongoing tax revenues - and these revenues would be inadequate to fully cover costs. Beneficiary access to healthcare services could be rapidly reduced. To date, Congress has never allowed the title" -- excuse me -- "allowed the HI trust fund to become depleted."

Q Okay. And my question is: We talked earlier about that 89 percent figure. Do you remember that with respect to the depletion date?

A I do.

Q Is this -- when it says "beneficiary to access healthcare services could become rapidly reduced," is that related to the 89 percent figure?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I -- it's related in the respect that I believe the context was that by 2033, the HI trust fund would only be able to reimburse 89 percent of the expected benefits at the time. So, yes.

BY MS. WALLACE:

Q And it -- thank you.

And it looks like the conclusion in this sentence is that as a result, beneficiary access, meaning patient access to healthcare services could be rapidly reduced.

That's what the trustees are concerned about with respect to the HI trust fund depletion.

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I think so. But they go on to add that Congress has never allowed the HI trust fund to become depleted.

BY MS. WALLACE:

Q Yes. Which means, as we've talked about earlier, something has to be done by Congress to address this depletion deficit and whether -- what we don't know yet is whether that change that is needed will have an effect on beneficiaries paying more premiums, whether it will be a reduction in provider rates, or whether it will be some type of additional taxpayer contribution to help the HI trust fund remain afloat. Is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say it's true that we don't know all the variables that Congress

could play with to try and address the potential deficit.

BY MS. WALLACE:

Q Would you agree with me that addressing that deficit identified in the trustees' report will require congressional action? In other words, it cannot be resolved administratively within CMS without that occurring?

MR. ANTONUCCI: Objection.

THE WITNESS: I couldn't agree with that simply because we don't know what the future holds.

I know that these are projections and some of them are dire, but we don't have a crystal ball with respect to the -- how the economy may perform, how payrolls' tax revenues may change or not, how efficient healthcare providers may or may not become. So, again, it's hard to say conclusive -- with conclusivity what you're asking me to agree to.

BY MS. WALLACE:

Q Yes. I think the point that you're making -- tell me if I understand -- is that we don't -- let me ask it a different way.

If the projections continue as is

indicated in the trustees' report, assuming the economy continues to perform at expected rates, this deficit will not be able to be addressed administratively. It would require congressional action if things remain the same as projected in the trustee report?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, it's -- I mean, generally, I could agree with that statement.

BY MS. WALLACE:

Q Okay. Last question on the HI trust fund. I know you're excited.

Okay. This paragraph here, which I will highlight for you -- and I'll read it for you. "The trustees project that HI tax income and other non-interest income will fall short of HI incurred expenditures beginning in 2027," meaning it will start to be upside down in 2027. "The HI trust fund does not meet either the trustees' test of short-range financial adequacy or their test of long-range close actuarial balance."

What does that sentence mean to you from the trustees' perspective, please?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I really don't know if

I can say conclusively simply because I'm -- again, I'm not in the actuary's office or did not prepare this report. So the definitions of their short-range financial adequacy, and what that means specifically, as well as their long-range -- excuse me -- actuarial balance, I'm not familiar with them enough to be able to conclusively say one way or the other.

BY MS. WALLACE:

Q Okay. Can you tell me the -- your understanding of the first sentence, then?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I read that to mean that the -- in 2027, the expenditures will outpace the income being generated by tax income and non-interest income in the trust fund.

BY MS. WALLACE:

Q Okay. And that's just -- is that -- that's next year?

A That is next year.

Q And so, again, we would expect some type of immediate action to occur from Congress in order to address some of these concerns and deficiencies that have been noted in the trustees' report?

MR. ANTONUCCI: Objection.

THE WITNESS: Were you asking me a question? I'm sorry.

BY MS. WALLACE:

Q Yes, sir. Would you agree with that?

MR. ANTONUCCI: Same objection.

THE WITNESS: I would say that the trustees' report is prompting Congress, putting them on notice that there's an issue to be addressed.

BY MS. WALLACE:

Q In the short-term?

A In the short-term.

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Thank you.

Okay. I want to talk about -- we've talked a lot about the concerns about the HI fund which is connected to Part A Medicare. Let's switch gears and talk about the SMI funding which funds parts of Part B Medicare and Part D Medicare.

And I wanted to first ask you, do you -- in your career at CMS, do you have an understanding on which expenditures are highest for CMS if you had

to rank Part A, Part B, Part D --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- just to give us some scale of the programs?

MR. ANTONUCCI: Same objection.

THE WITNESS: Just giving you a ballpark, I mean, the -- on the Part A and B side, we pay out over -- I think the most current year available is over $450 billion in benefits. But the higher percentage of that would be on the hospital insurance side, the Part A side, than on the Part B side.

BY MS. WALLACE:

Q And Part D would be a much smaller piece?

MR. ANTONUCCI: Objection.

THE WITNESS: That, I can't recall off the top of my head. It's smaller than the Part A side, yes. But I can't recall the exact percentages as a breakout. The Part A side is the bigger driver of the three.

BY MS. WALLACE:

Q I'm going to show you page 22 of the trustees' report. And I think it might give us -- I'm sorry. Excuse me, 10. It's Bates number 22.

This chart here, does this give us the total -- and I'll highlight it for you -- the total expenditures for each program? So Part A, 422.5 billion; Part B, 553.4 billion; Part D, 146.2 billion; for a total of 1.1 trillion?

MR. ANTONUCCI: Objection.

THE WITNESS: Yeah. Just add the 422 and the 563 [sic] and the 146. That aggregates, so you've got -- you also have -- it includes Part C health plans in here as well, so that's a little -- that's distorting a little bit the total expenditure numbers. I wasn't including Part C.

What I had said earlier, that the bulk of the expenditures on the Part A side, relative to Part B, that's still true. But if you -- you have -- you have to parse this out a little bit to get to that.

BY MS. WALLACE:

Q Is it your testimony that Part C is rolled into these numbers, even though it's not on the chart?

A It's on the chart. It says "Private health plans, Part C."

Q Oh, here.

A Right there. See?
Q Yeah.
A Exactly.
Q I do see that. I do see it. I gotcha.
Okay. So -- and that's why the numbers are higher than you stated earlier?
A Correct.
Q Will you say that answer one more time? I'm sorry.
A Yes. Correct.
Q Okay. Thank you.
MR. ANTONUCCI: Can we go off the record, please?
MS. WALLACE: Sure.
VIDEOGRAPHER: The time is now 1:32. We're going off the video record.
(Off the record.)
VIDEOGRAPHER: The time is now 1:38. We're back on the video record.
You may proceed.
BY MS. WALLACE:
Q Mr. Young, we were talking about SMI funding of Parts B and D. And we were looking at the chart on the screen, Table II.B1, which is page 10 of the trustees' document. And we were

confirming that it does appear to include Part C benefits. Do you recall that from before the break?

A Yes.

Q Thank you. Now, I want to talk specifically about -- and I was trying to understand the scale of Part B, and I think we've -- we've concluded that based on how it's categorized in the trustee report, Part B looks -- if you include -- if you include Part C, it looks like it's a little bit larger of a total expenditure than Part A. But I think if you don't include Part C, I think the numbers that you gave me earlier in your testimony are accurate. Part A is a little bit higher. Is that a fair representation?

MR. ANTONUCCI: Objection.

VIDEOGRAPHER: Yeah. Mr. Young -- I don't think we heard a word he just said.

All right. I'm going to go back off. One moment, please.

The time is 1:39. We're going off the video record.

(Off the record.)

VIDEOGRAPHER: The time is now 1:44. We're back on the video record. You may proceed.

BY MS. WALLACE:

Q Mr. Young, before the audio issues, do you recall the question that I asked you or would you like for me to rephrase?

A Please. Please rephrase.

Q Okay. No problem.

We were just trying to -- I was -- for the last several minutes, I've just been trying to get an understanding of the scale of the two different programs, Part A versus Part B. Will you answer that for me with or without the chart?

A Oh. The scale of the Part A versus the Part B program? I mean, the -- the -- again, the -- off the top of my head, we -- more recent benefit payouts were around somewhere over $450 billion. And the larger percentage of that would be on the Part A side than on the Part B side, not including this -- that number does not include the Part C health plan.

Q Understood.

A Yeah.

Q Okay. Thank you.

Now, we talked about, at length, about the funding source of Part A which is the HI trust fund which relies on payroll taxes and/or premiums for

people that didn't pay payroll taxes for the necessary requisite period of time; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q All right. And so we're moving to talk about the SMI trust fund, which sources Part B and Part D. And I believe you testified earlier that approximately 25 percent of that funding is through beneficiary premiums; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. It's my understanding the premium's set so that annually it's expected to cover 25 percent of the annual expenditures.

BY MS. WALLACE:

Q All right. And the SMI fund does not -- is not in the same core financial outlook and position as the HI fund based on the trustee report. Do you agree with that, generally?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say it's generally not in the same position simply because of the formula for the way the SMI trust fund is funded. Specifically, a portion of it's based

on premium receipts with the balance being on general tax revenue receipts. So as the -- whatever delta there is from the premium collections, we simply draw more from the other funding streams needing to make it whole as far as, you know, general income -- income taxes from people.

BY MS. WALLACE:

Q Yes. And that's precisely what the trustee report says. Directing your attention to page 36 of the document, which is also Bates 48, and in the very first paragraph, it states "Financing for the SMI trust fund is adequate because beneficiary premiums and government contributions for both Part B and Part D are established annually to cover the expected costs for the upcoming year."

And the chart on the screen demonstrates that. Do you agree with that -- the statement I just read?

MR. ANTONUCCI: Objection.

THE WITNESS: I agree with what the chart represents and the language in the -- in the trust -- the trust fund summary -- the trustees' report. Excuse me.

BY MS. WALLACE:

Q And so what the chart in front of you shows is that starting since the 1960s, as the expenditures for the SMI fund for Part B and D have increased, so have premiums almost exactly on the same curve to cover increases in expenditures for Part B and Part D. Do you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, again, I didn't make the report. I would -- I will just say, just looking at the graph, it looks -- it looks to be like the -- an ascending line such that the premiums and tax revenues are increasing to cover the increasing benefit costs over time.

BY MS. WALLACE:

Q The report states on page seven that the current Part B premium for 2025 is approximately $185 per month. Do you remember seeing that? Page seven is in the Summary section of the document. I'm happy to take you to it.

A No. I remember that. That's what the premium is.

Q All right. And that would be, in last fiscal year, 2025, that would be about $2,200 per year that each enrollee of Part B was paying for premiums. Is that true?

A You cut out in your question. If you could please ask again, Whitney.

Q No problem.

In 2025, the total amount of premiums paid by someone electing Part B Medicare would be 2,200 per year annually if you extrapolated the 185 per month for a calendar year.

A That sounds about right, but it's not -- it's not completely true because of the IRMAA test --

Q Yes.

A -- which is tied to income. So higher -- higher -- beneficiaries with higher incomes are going to pay higher premiums, if you recall.

Q Yes.

A Right?

Q So that's the base amount that --

A Correct.

Q The very -- the minimum amount someone would pay for premiums. If you made more, you pay more?

A Correct.

Q All right. And then also under that program, the chart we looked at earlier, there are deductibles and co-insurance also applicable to SPI

fund in Part B and D payments?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. There are deductibles and copays on some services on Part B and Part D.

As I had said earlier, not every service -- it depends on the service type -- has a copay.

BY MS. WALLACE:

Q The report reflects that premiums have increased over time and are expected to continue to increase into the future. Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: All I can say is from based on the graph, that seems to be the implication but I didn't -- that's all I could confirm for you, I think.

BY MS. WALLACE:

Q And premiums are -- and growing premiums are a necessary component of what funds Part B and Part D. Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say the premiums are, by law, required because they are -- they are statutorily required to cover a, again,

approximately 25 percent of the expected benefits, I believe.

BY MS. WALLACE:

Q Enrollment in Part B and Part D, you testified earlier, is voluntary; right?

A Yes.

Q And so if a recipient cannot afford to pay the premiums associated with their coverage, they lose coverage. Is that true?

A Yes, it's possible. They cannot -- if they cannot afford to pay their premiums -- as I mentioned earlier, for those people that are financially disadvantaged, and if you may be entitled to both Medicare and Medicaid, then Medicaid will actually help pay your premiums for the Medicare program.

Q For Medicare, there's no guarantee that an individual will remain enrolled in the Part B and D program?

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q Do you agree with that?

MR. ANTONUCCI: Same objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q The other tax contributions that source the SMI fund, the 75 percent of the funding, they -- those funds ultimately come from taxpayers to the government. Is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, they come from general tax revenues' interest.

BY MS. WALLACE:

Q The future Part B premiums that are identified on the chart, those will change, to the best of your knowledge, based on what factors?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, again, I don't work in the actuary's office at CMS so it -- it's -- it's not worth me speculating everything that they -- they -- they fact -- used to factor in what the premiums should be, necessarily.

What I've said before is based on my understanding what's in the statute as far as the requirement that it be able to cover at least 25 percent of the expected benefit payments.

BY MS. WALLACE:

Q Your designation indicates that you are testifying with regard to the SMI fund in

addition -- and also to premiums associated with that fund --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- but not to future premiums? I'm just trying to understand the scope of your testimony.

MR. ANTONUCCI: Same objection.

THE WITNESS: I'm simply saying that I don't -- I don't have firsthand knowledge of the premium calculation. I'm not an actuary, necessarily. I can confirm for you what is in the statute, which I've done, as far as the composition of 75/25 percent.

BY MS. WALLACE:

Q And that's the extent of your knowledge in that area?

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q Basically, like, past premiums, not future premiums?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that I have anything else to add.

BY MS. WALLACE:

Q Okay. The -- your knowledge is how Part B

and D are funded; is that correct? Based on your designation, it's how it's funded but not -- not the future of how it will be funded?

I'm sorry. I'm just trying to understand your designation.

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, what my -- what I've said is focused on what the funding sources are for different -- for Part A and Part B and Part D. I've said they're -- Part B and D come from the SMI fund. The SMI fund is funded through the combination of premiums and non-payroll tax revenues.

How the actuary is -- what they're doing as far as computing the expected benefit payouts for future premiums, I cannot speak to.

BY MS. WALLACE:

Q I wanted to ask you some general questions about the trustees' report. Does it have, to your knowledge, any sections that discuss the Camp Lejeune Justice Act?

A From the portion which I read, which is, again, the introduction and the highlights, I don't recall reading anything related to the Camp Lejeune Justice Act.

Q Do the projections in the trustees' report, do they have anything to do with offsets associated with litigation?

MR. ANTONUCCI: Objection, foundation.

THE WITNESS: I have the same answer. From what I'd read in the introduction and the highlights, I did not read anything with respect to offsets. That's as far as I could go as far as what's contained in the trustees' report.

BY MS. WALLACE:

Q In your career at CMS, have you ever been involved with overseeing or managing offsets for CMS?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say, as part of my work here in the Office of Financial Management, one of the groups underneath my umbrella, they do deal with offsets as a form of collecting overpayments owed by providers to the program.

BY MS. WALLACE:

Q And did you say that was under your direction or you had experience in that?

A I said it was under my direction. I've

had direct experience in working with helping to set up the offsets in some cases.

Q Do you -- you testified earlier -- have you also managed contractors that identified liens for CMS?

A I'm trying -- I directly -- I directly have not. I have a group with -- in the umbrella of our scope of reports, our financial services group. They deal with Medicare Secondary Payer as well as subrogation, collection on different cases. Sometimes that -- sometimes that involves liens, as you might imagine.

Q Based on your 35 years with CMS, do you have an understanding of the difference between liens and offsets and how CMS handles those in different ways?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say I have a cursory knowledge of the -- of offsets. The nuances and distinctions between offsets for overpayments versus a lien against someone or a subrogation case, I'm less familiar with.

BY MS. WALLACE:

Q And in a situation where a lien is recovered, is that the result of money, to your

knowledge, coming back to CMS, whereas an offset, no money actually comes back to CMS? It's withheld? Do you understand my question?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I understand your question. I mean -- and I think you're generally correct in that respect. I mean, an offset is a -- we offset a future payment to a provider to collect on a debt that provider may owe us.

So we're -- we're just capturing money back before it even actually goes out the door.

In a lien situation where there's a settlement and we have a subrogation right to a potential settlement, for example, we're -- we're collecting money back from a portion of a settlement between two parties.

BY MS. WALLACE:

Q Thank you. Would you agree with me that the purpose of an offset, as you are familiar with it, is to prevent the government from paying twice for the same loss?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I would agree with you in the context that I'm familiar with

it.

In our world, we're just simply trying to -- it's a mean by which we recover owed money. We're in -- we're in a situation where we're paying benefits out to providers over projected periods of time. They may develop overpayments. And the fact is we have a potential funding source of income for theirs, and we have direct control over, which we're able to attach, if you will, and recover overpayments owed to us.

We use other means too, in some cases. We don't -- we don't have the ability to an offset. Somebody may have already left the Medicare program and we had to pursue other traditional overpayment collection methods such as sending out overpayment demand letters and things like that.

BY MS. WALLACE:

Q And so your experience with offsets, really, is in the context of overpayment situations where you put a hold on future payments based on the identification of the overpayments so you don't pay that person twice?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes.
BY MS. WALLACE:
Q Have you ever dealt with liens in a -- or been assigned to deal with liens in a -- or account for liens in a litigation context?
MR. ANTONUCCI: Object to form.
THE WITNESS: No, not directly.
BY MS. WALLACE:
Q Do you have indirect knowledge of offsets in a litigation context?
MR. ANTONUCCI: Objection.
I'm sorry. Are you referring to liens or offsets?
MS. WALLACE: Offsets. Did I say it wrong? If I said lien, I meant offset.
THE WITNESS: Could you start from scratch and ask it again?
BY MS. WALLACE:
Q I'd be happy to. Do you have any indirect knowledge of offsets in a litigation context?
MR. ANTONUCCI: Objection.
THE WITNESS: I would have to say no.
BY MS. WALLACE:
Q And so any offsets associated with litigation, such as maybe the 9/11 litigation, that

did not come through you or your department?

A That did not come through me, is my personal experience. I cannot speak to whether or not it came through the department or whatnot. I'm just speaking from my personal experience.

Q Is it true that CMS outsources the handling of liens to a contractor such as -- such as the Benefits Coordination Recovery Center?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I believe we do ask the BCRC to help us with recoveries, in that context.

BY MS. WALLACE:

Q And the offsets that you were speaking of previously related to overpayment compensation, that's handled internally still by CMS as opposed to outsourced to a contract agent?

MR. ANTONUCCI: Objection.

THE WITNESS: The offsets I was speaking to earlier, the way you characterized is generally correct with one proviso being that that's one of the functions that the Medicare administrative contractors help us with, as far as recovery and through offsets of provider payments. So they are involved in that as

well.

MS. WALLACE: Were we an hour -- is it time for an hour break?

MR. ANTONUCCI: Just about.

MS. WALLACE: Do you want to take a brief break? I don't have a ton left for you, Mr. Young.

THE WITNESS: Can we do five minutes?

MS. WALLACE: Yes.

VIDEOGRAPHER: The time is now 2:07. We're going off the video record. This completes media unit number four.

(A brief recess is had from 2:07 p.m. to 2:12 p.m.)

VIDEOGRAPHER: The time is now 2:12. We're back on the video record. This beginning media unit number five.

You may proceed.

BY MS. WALLACE:

Q Mr. Young, when we went over your CV earlier in your testimony this morning, you testified that you do have a background in program integrity, including improper payments and vulnerabilities in the Medicare payment systems; is that right?

A Yes.

Q Would you agree with me that despite the many oversight efforts of CMS, many of which you've undertaken to enforce, CMS does understand that some level of coding error is unavoidable in a system of this size?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that I would agree with that characterization. I mean, there's -- will there -- will coding errors ever be fully eradicated? Probably not. But the -- the -- just using the Fee-For-Service error rate, for example, we talked earlier about it, it's sitting at right around six -- over six and a half percent, I believe is the most recent number.

You know, most of that percentage, about almost two-thirds of that are what we call no-documentation errors, meaning people haven't -- they either didn't provide the medical record fully or they only provided a portion of the medical record to substantiate and support the information that was on the claims.

So it wasn't the point being of the, you

know, the six and a half percent. You know, the bigger part of that is just no -- no documentation errors. It's not the other potential compliance issues of upcoding or miscoding or flatout abuse, for example.

BY MS. WALLACE:

Q Well, we talked earlier about that 6.55 percent represents 28.83 billion in improper payments. And I think you just testified that two-thirds of that requires additional documentation to be uploaded. But I would imagine that a large amount of improper payments do still have to do with upcoding or miscoding. It wouldn't be a small number. Would you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: My characterization was, again, the larger percentage of the improper payment error rate for Fee-For-Service is related to no documentation errors, meaning the medical records did not contain the documentation supporting what was in the medical record, or they were only partially sufficient, or they didn't have the record at all. It wasn't a flatout miscoding issue, per se.

Well, there -- is there a -- you know, in a program which is paying out, you know, over $450 billion in benefits, small percentages do add up to large numbers. I get that point.

BY MS. WALLACE:

Q Catching a no-documentation error is a lot easier and more straightforward than catching a miscoding or an upcoding error. Would you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know. Potentially, it is -- you know, the upcoding part, having actual -- actually having the medical record is what helps you determine whether or not something was upcoded inappropriately or appropriately. Or sometimes they also make errors the other way. They downcode things inappropriately. So it works both ways. And if you don't have the medical record, you couldn't make that decision one way or the other.

BY MS. WALLACE:

Q You testified earlier that you don't have the medical records for corroboration for all of the -- of the data extractions and billing coding

that CMS manages. Is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: That's correct. We do not -- I'm sorry. Did I interrupt?

BY MS. WALLACE:

Q No. No. We didn't catch your first answer. Go ahead.

A That -- I mean, the answer is that's correct. We do not receive medical records for every single claim, all 1.13 billion claims we receive. It's not practical to do that. It's only in situations where we have a reason to review the claim for whatever reason that we go out and we actually ask for the medical records that support what was certified on the claim as being true and accurate and correct.

Q Would you agree with me that you're only able to really catch upcoding or miscoding errors if you do have the medical records for corroboration?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I would say my experience, that's the primary way we do it. For me to say that's the only absolute way to do it, I don't know that I can say that. I mean, there's other opportunities, I think,

through investigation for people to interview providers, beneficiaries, and whatnot that may also help -- help ferret that out.

BY MS. WALLACE:

Q But you agree that the primary way to catch upcoding and miscoding is to have an RN or a physician review the actual medical record associating -- associated with the CPT or HPC codes, or the ICD-9 or the ICD-10 codes?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I would agree with that.

BY MS. WALLACE:

Q And without doing that medical record corroboration, it's very difficult to catch miscoding and upcoding?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say it's harder, yes.

BY MS. WALLACE:

Q CMS policy, would you agree with me, it treats billing codes as information that requires validation --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q -- as it relates to your program integrity?

MR. ANTONUCCI: Same objection.

THE WITNESS: I may not fully understand your question.

BY MS. WALLACE:

Q Does CMS policy encourage that billing codes require validation in order to ensure program integrity?

MR. ANTONUCCI: Excuse me.

Same objection.

THE WITNESS: I don't think I would characterize it that way. I mean, the -- again, as I'd said earlier, when a provider submits a claim form, they are certifying that what they're submitting on the claim form is a true and accurate representation of the service they provided and is supported by the medical records. That's what we rely on is that certification.

Does it always need to be verified and corroborated by somebody doing medical review? I would say no. That's not practical or feasible from a resource standpoint.

BY MS. WALLACE:

Q Are you aware of the governing bodies that oversee the Medicare system such as the HHS/Office of Inspector General and the OIG?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I'm aware of them.

BY MS. WALLACE:

Q Are you aware that they oversee Medicare?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Have you reviewed the HHS/Office of Inspector General reports that have found widespread coding errors and upcoding errors in Medicare claims?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I have not reviewed them.

BY MS. WALLACE:

Q Are you aware, generally, that they have found widespread coding errors and upcoding in Medicare claims?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I would say I am aware.

BY MS. WALLACE:

Q Are you aware that the OIG conducts

recurring audits of Medicare coding in documentation due to risks of upcoding and miscoding?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Are you aware that the government accountability office has designated Medicare as a high-risk program due to persistent improper payments and billing complexity issues?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. WALLACE:

Q Are you aware of CMS's position that the medical record is the primary source for verifying services rendered, medical necessity, and diagnostic support?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say yes, I'm aware of that.

BY MS. WALLACE:

Q If the medical record documentation does not support the codes, does CMS consider that payment improper or flag that as an improper payment?

MR. ANTONUCCI: Objection.

THE WITNESS: I cannot recall off the top of my head. There's nuances to that so I cannot remember.

BY MS. WALLACE:

Q If the documentation does not support the code, it might not be flagged as an improper payment?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, it's -- there's -- there's a level of complexity and nuance to that that I'm not steeped in to say at what point it's going to be called an error or not.

BY MS. WALLACE:

Q Do you consider -- because you -- you testified earlier that a provider signs off on the coding before it's submitted to Medicare. Is it your position that that is sufficient for Medicare to pay that claim or does it require additional review outside of the coding itself?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I can answer that question because it may vary on the different circumstances and the type of claim. And it's been -- it's been a minute since I worked in actual program integrity cases.

BY MS. WALLACE:

Q Is there any instance where CMS protocol would not review claims only based on coding?

MR. ANTONUCCI: Objection.

I also want to note for the record that this questioning is going far beyond the scope of Mr. Young's disclosure as an unretained expert.

THE WITNESS: Could you ask the question again because it's --

BY MS. WALLACE:

Q Yes.

A -- it's been a minute.

Q Yes. Is there -- much of the CMS billing comes in the form of coding. Based on your career at CMS, is that also your understanding?

MR. ANTONUCCI: Same objection.

THE WITNESS: Based on my experience, the -- I mean, we deal with a lot of codes that come in on a claim so we use different codes for procedure codes, diagnosis codes, modifiers in conjunction with the CPT codes.

So, yes, I mean, our claims do involve a lot of different codes.

BY MS. WALLACE:

Q And my understanding of your background and experience is that you understand that there are many different programs that have been established to make sure those codes are accurate. You guys have a RACs program, a Comprehensive Error Rate Testing program, you have a medical record auditing program. So your goal -- my understanding is that the goal of CMS is to make sure those codes are accurate, they're medically necessary, they're reasonable, they're not subject to upcoding or miscoding, and that's part of your efforts on fraud detection under the CMS program.

And so I'm just trying to make sure that I understand correctly that CMS tries really, really hard to double-check these codes to make sure that they're accurate before and after they pay them to ensure the integrity of the program.

MR. ANTONUCCI: Objection.

THE WITNESS: So I would just say, in my experience that -- I mean, the -- we do make an effort to make sure that the -- the information billed on the claim is consistent with the medical record through different means. I mean, through -- again, through different selection of medical review records from

medical review, the experience of the recovery audit contractors, things of that sort.

I mean, it's -- it's been a minute since I worked on that space so it's hard for me to confirm your general -- just general statement.

BY MS. WALLACE:

Q In your experience, in your role, do you know what -- how much money is dedicated to fraud and abuse detection and improper billing detection?

MR. ANTONUCCI: Objection.

THE WITNESS: Off the -- off the top of my head, I don't.

BY MS. WALLACE:

Q Would it be millions?

MR. ANTONUCCI: Objection.

THE WITNESS: It would be in the millions, yes.

BY MS. WALLACE:

Q And so would you agree with me, then, that Medicare does not just take the coding as it comes from the provider; they have programs in place to ensure accuracy, and they do often find errors and improper coding when they perform their audits and apply the programs that they've designed?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say we do have means and measures by which we check to make sure codes that come in are accurate and valid as far as their descriptors. But we don't always catch every one or every thing.

BY MS. WALLACE:

Q Yeah. And that was my next question.

With a program of this scale and magnitude, it would be impossible -- difficult if not impossible to catch all errors in billing coding?

MR. ANTONUCCI: Objection.

THE WITNESS: It would be -- it would be difficult.

BY MS. WALLACE:

Q And the gold standard, if you -- would you agree, would be to confirm the coding with the medical records? If you had the chance to do that for everyone, that would be the gold standard?

MR. ANTONUCCI: Objection.

THE WITNESS: It's -- it's been a minute since I worked in program integrity so I don't really feel like I can speak to what the gold standard is right now.

BY MS. WALLACE:

Q Can you agree that that would be a helpful way to validate the claim coding?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say in my experience, that it's been a helpful way to validate whether or not the coding on a claim is supported by the medical record, yes.

BY MS. WALLACE:

Q And its identified in the program integrity manual for CMS publication 100-08 that the medical staff will review the documentation you submit of the claims to determine if the services billed are reasonable and necessary and meet all other requirements of Medicare coverage. Do you have that knowledge in your role?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not have that knowledge in my role.

BY MS. WALLACE:

Q What about the -- complying with medical record documentation requirements that indicate that "We pay for services when the medical record documentation supports Medicare coverage, coding, and billing requirements"?

Is that within your scope or knowledge?

MR. ANTONUCCI: Objection.

THE WITNESS: That is not within my -- my scope right now, no.

BY MS. WALLACE:

Q Have you ever managed the medical record review program in your roles?

A No. I've -- I've not directly managed the medical record review function, per se.

Q Do you agree or disagree that billing codes alone are insufficient to determine clinical relatedness?

MR. ANTONUCCI: Objection.

THE WITNESS: I would have to say the -- I really can't opine or speculate on the appropriateness of the billing codes. I mean, we don't -- CMS doesn't even really own the CPT codes. That's something that's owned by the American Medical Association, I believe. And as far as the descriptors and their adequacy, that's -- that's something that's in their space, not ours, so I really can't comment on that.

BY MS. WALLACE:

Q And so that will not be a topic that you're opining on in this litigation?

A No. I could not speak to that.
Q As we sit here today, do you have any guarantee that Medicare benefits will remain unchanged in the future?
MR. ANTONUCCI: Objection.
THE WITNESS: I cannot -- I cannot speak to that. I have -- it's not possible for me to project what's going to happen in the future.
BY MS. WALLACE:
Q Do you have any guarantee that the reimbursement levels will remain the same in the future?
MR. ANTONUCCI: Objection.
THE WITNESS: Again, I can't -- there's -- there's the poss -- the possibility of the variables we talked about with respect to what Congress may or may not do with Medicare. I don't know. I can't predict that.
BY MS. WALLACE:
Q Would you agree that Medicare's future depends on legislative and policy decisions that have not yet been made? Is that a fair characterization of your testimony?
MR. ANTONUCCI: Objection.
THE WITNESS: Again, I think I have the

same answer. I mean, it may or may not depend on policy decisions that have yet to be made. I cannot predict the demographics of the country or the practice patterns of medicine and how efficient or inefficient it may be, or the evolution of medicine in terms of the efficacy of the services they provide so it's -- I don't really hazard a guess at what the future's going to bring.

MS. WALLACE: All right. Mr. Young, I don't think I have any further questions for you.

MR. ANTONUCCI: I have a few.

EXAMINATION

BY MR. ANTONUCCI:

Q So, Mr. Young, first of all, good afternoon. Thanks for bearing with us for longer than anticipated. I appreciate your patience and I'm going to try to make this quick.

You previously testified that you cannot guarantee the future of the Medicare program; right?

A Yes.

Q And you previously testified you can't guarantee the future of reimbursement levels within the Medicare program; right?

A Yes.
Q Mr. Young, how long have you worked at CMS?
A Just over 35 years.
Q And in your over 35 years at CMS, how much of that time was spent working on Medicare?
A Oh, all of it was working on Medicare, whether it be Medicare Fee-For-Service or the managed care side. It's always been on Medicare.
Q And if you know, when did the Medicare program begin?
A It was -- I can give you the date. It's 1965. I don't remember the month.
Q Okay. So doing the math, it's fair to say Medicare existed for your entire career at CMS; right?
A Yes.
Q And in your 35 years at CMS, you testified that you've observed Medicare expand benefits in coverage; right?
A Yeah. My experience has been that the propensity is for the program to -- to add benefits. The most -- as, again, the most telling one being the addition of the prescription drug benefit program in 2006.

Q To your knowledge, Mr. Young, has Medicare coverage ever been decreased?

A No, not to my knowledge or recollection.

Q To your knowledge, has the Medicare program ever been eliminated or discontinued?

A No, absolutely not.

Q Okay. So based on your 35 years of experience, is it fair to say that it's reasonably likely that Medicare will continue into the future?

A Yes. Based on my experience, what I've lived through, it's -- it's very reasonable to expect that the program is going to continue into the future.

Q And based on your 35 years of experience with Medicare, is it fair to say that it's reasonably likely that the programs Medicare currently covers will continue to be covered into the future?

MS. WALLACE: Objection, please, for the record. Leading and foundation.

THE WITNESS: Based on my experience, I would say it -- the program will continue into the future. As I've said before, the tendency is for the political leadership to accrue and accrete benefits and/or expand eligibility over

time.

That's -- that's been what I have lived and experienced.

MR. ANTONUCCI: Okay, thank you, Mr. Young. I have no further questions at this time.

MS. WALLACE: Shortly, Mr. Young, on redirect.

FURTHER EXAMINATION

BY MS. WALLACE:

Q You testified earlier that it is not within your scope to -- or your role to predict the future policy decisions of Congress as it relates to the Medicare program; is that right?

MR. ANTONUCCI: Objection.

THE WITNESS: I think I said something along the lines of it's not within my scope to predict what Congress is going to do, which I still believe.

BY MS. WALLACE:

Q And we always talk -- we also talked about the fact that Congress will need to make changes or the current funding of at least the Part A program will be depleted as soon as 2033 and as short as next year. Do you remember that testimony?

MR. ANTONUCCI: Objection.

THE WITNESS: I remember us -- what we reviewed in the trustees' report as far as the vulnerabilities for the trust funds.

BY MS. WALLACE:

Q And so it's not within your purview or scope to speculate as to how Congress might fix that problem. Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: I agree that it's not within my purview to speculate how they may or may not fix the problem.

What I do believe in is based on my experience and what I've seen in terms of the addition of benefits and increasing eligibility requirements for the population that we serve. That tendency could reasonably continue into the future.

BY MS. WALLACE:

Q And it also might not continue into the future. They may also -- Congress may also decide to cut benefits or decrease provider pay as well. We don't know what -- how Congress will fix the problem within the current system. Is that true?

MR. ANTONUCCI: Objection, compound, and

calls for speculation.

THE WITNESS: It is correct that that would be speculative on my part. I do not want to predict what they may or may not do.

BY MS. WALLACE:

Q And so all of your testimony today has to do with the history of Medicare as you've known it in your 35 years at CMS, and you're not making any type of testimony or opinion related to what may or may not happen in the future with regard to the Medicare system; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: All I can say is I represented what I've seen and experienced in my lifetime here. And, again, what Congress may or may not do is unknown but to God, as they would say, I think.

BY MS. WALLACE:

Q Are you -- did you testify that you are aware of all of the policy changes as it relates to coverage eligibility and services covered in the Medicare system? Is that within your expertise?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't -- you're going to have to clarify the question a little bit for

me, Whitney. Because when you say "coverage eligibility decisions," what exactly are you trying to get at?

BY MS. WALLACE:

Q You testified earlier that in your time at CMS, you don't recall any coverage being decreased. But I didn't remember if you actually are -- I didn't think that that fell within your -- quite frankly, within your CV, the coverage, you know, eligibility. Obviously, Part D was -- started in 2006. But the menial details regarding services covered, I just didn't remember that being in your CV.

MR. ANTONUCCI: Objection.

THE WITNESS: Yeah. As far as -- excuse me.

As far as what's covered and what's not covered, I mean, it's -- it's through my 35 years of experience as far as what the program covers and doesn't cover.

BY MS. WALLACE:

Q So are you testifying that -- that all changes to the services provided and coverage, that is within your area of expertise over the course of the 35 years that you've been at CMS?

A No, I don't --

MR. ANTONUCCI: Objection, misstates prior testimony.

THE WITNESS: Yeah.

Yeah. I don't -- I don't think I can speak to that.

BY MS. WALLACE:

Q Okay. So the coverage and services provided is not within your area of expertise?

MR. ANTONUCCI: Same objection.

THE WITNESS: I'll just go back to what I had said earlier about -- and what's in my written narrative as far as the primary coverage principle as far as what's medically reasonable and necessary to treat an illness or injury or correct a malformed body member and the different categories which are excluded, necessarily. That's -- that's the basic outline of -- of the core of my experience.

BY MS. WALLACE:

Q And so there may be somebody more knowledgeable at CMS as it relates to the changes and services covered over the 35 years you've been there other than you?

A There might be.

Q Do you know which department that would fall under at CMS?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know. The place to start would be the Center for Medicare Services.

BY MS. WALLACE:

Q Is that the umbrella branch of CMS?

A Well, there's --

MR. ANTONUCCI: Objection.

THE WITNESS: No. It's one of the centers of the Centers for Medicare and Medicaid Services.

BY MS. WALLACE:

Q You were asked a question in -- by your counsel as to whether, in your experience, you'd ever known of coverage being decreased. Do you remember that question? And you said "No, I'm not aware of that"?

A Yes, I --

Q Who -- who would be the actual expert on that at CMS?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know that there would be one singular person.

BY MS. WALLACE:

Q Which department?

MR. ANTONUCCI: Objection.

THE WITNESS: Again, I don't know other than to point you to the Center for Medicare.

BY MS. WALLACE:

Q Can we agree that it would not be the financial management department?

MR. ANTONUCCI: Objection.

THE WITNESS: We can agree it would not be the CFO.

BY MS. WALLACE:

Q Okay. And that's not one of the topics that you were designated to talk about by the government; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: What I was -- what I was asked to talk about was what my experience was with respect to the -- whether or not the benefits tended to expand or contract under the program, in my experience.

BY MS. WALLACE:

Q And are you, as a -- as a financial -- and as a CFO -- deputy CFO, you are looking at that from a macro level as opposed to a micro level of

understanding any changes in services, small changes over time. You're looking at it as a total -- total dollar or big -- or total program?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say I'm looking at that from my personal experience over 35 years working in different positions within the program.

BY MS. WALLACE:

Q And so is that a macro or a micro level?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I have anything else to add.

BY MS. WALLACE:

Q Can you tell me what parameters you're using to make that conclusion? Are you looking at programs? Are you looking at dollars?

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q Or are you looking at policy manuals that talk about services covered?

MR. ANTONUCCI: Same objection.

THE WITNESS: It's -- it's based on my experience and different positions with the organization, dealing with claims over time,

knowing what's -- what's covered and having read through the regulations and the Social Security Act, and experience.

BY MS. WALLACE:

Q So it's not related to -- to your analysis of dollars?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say no.

BY MS. WALLACE:

Q And you testified earlier that it would probably be the CMS division that would be in the best position to assess changes in services provided and benefits; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I said it would be the Center for -- it's called the Center for Medicare, singular, CM.

BY MS. WALLACE:

Q Ahh. And that is a division under the umbrella of CMS?

MR. ANTONUCCI: Asked and answered.

BY MS. WALLACE:

Q Did you answer? Sorry. It might have been a --

A No. It's -- yeah. It's yes. If you

look -- look at the CMS org chart.

Q Okay. But it's -- and if you could just tell me one more question. That's not beneath the CFO department --

A No.

Q -- on the org chart; is that right?

A Correct. Correct.

MR. ANTONUCCI: Objection.

MS. WALLACE: Okay. Great. I don't have any further questions for you, Mr. Young. Thank you for your time today.

MR. ANTONUCCI: I have one more, sorry. A couple more, excuse me.

FURTHER EXAMINATION

BY MR. ANTONUCCI:

Q You testified that someone from the Center for Medicare services, CM -- excuse me if I'm getting the acronym wrong -- would be best positioned to answer Ms. Wallace's question about benefits coverage; right?

A Yes.

Q Can you also answer that question?

A I'm sorry.

MS. WALLACE: Objection.

BY MR. ANTONUCCI:

Q Are you also able to answer that question?
A I'm sorry. What's the question you want me to also answer?
Q Are you able to speak to benefits coverage under Medicare?
A At a high level, I can, as I've already said today. The primary principle for coverage is an item or service has to be medically reasonable or necessary -- and necessary to improve an illness or injury or correct a malformed body member, as I said.
That's under -- it's in the Social Security Act, 1862.
Q Okay, thank you, Mr. Young. I have no further questions.
MS. WALLACE: I don't either, Mr. Young. Thank you.
VIDEOGRAPHER: The time is now 2:53 and this completes media unit number five in this videotaped deposition.
CERTIFIED STENOGRAPHER: Counsel, may I get your transcript orders?
MS. WALLACE: Yes.
MR. ANTONUCCI: Yeah. We have a standing order.

MS. WALLACE: We do. And we -- plaintiff wanted a rough.

CERTIFIED STENOGRAPHER: Okay.

MS. WALLACE: Please.

CERTIFIED STENOGRAPHER: And, Mr. Antonucci, you as well?

MS. WALLACE: Will you make sure there's a condensed? That's my very favorite.

MR. ANTONUCCI: Sorry. Dawn, were you saying something?

CERTIFIED STENOGRAPHER: Yes. Did you want a rough draft?

MR. ANTONUCCI: Yes, please.

CERTIFIED STENOGRAPHER: Okay.

(The reading and signing of the deposition is not waived.)

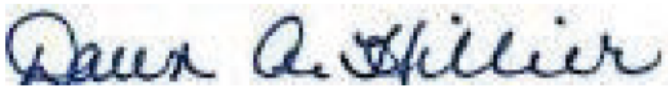
(At 2:53 p.m. the deposition was concluded.)

CERTIFICATE OF OATH

STATE OF FLORIDA)
COUNTY OF PINELLAS)

I, the undersigned authority, certify that LARRY YOUNG appeared before me remotely and was duly sworn.

WITNESS my hand and official seal this 16th day of February 2026.



DAWN A. HILLIER, RMR, CRR, CLR
Notary Public - State of Florida
My Commission No.: HH 300744
Expires: 12-15-2026

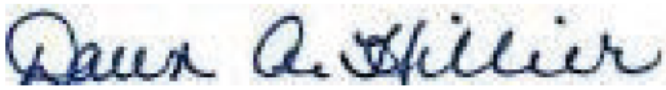
CERTIFICATE

STATE OF FLORIDA)
COUNTY OF PINELLAS)

I, DAWN A. HILLIER, RMR, CRR, CLR certify that I was authorized to and did stenographically report the deposition of LARRY YOUNG; that a review of the transcript was requested; and that the transcript is a true and complete record of my stenographic notes.

I further certify that I am not a relative, employee, attorney, or counsel of any of the parties, nor am I a relative or employee of any of the parties' attorney or counsel connected with the action, nor am I financially interested in the action.

DATED this 16th day of February 2026.



_____

DAWN A. HILLIER, RMR, CRR, CLR

February 16, 2026

IN RE: CAMP LEJEUNE WATER LITIGATION

Dear Mr. Young:

Herein, you will find the transcript of your deposition taken on February 6, 2026, and a Errata Sheet for your use in entering any changes to the deposition.

Please do not edit or make marks on the transcript itself. If you desire to make any changes, they should be noted on the Errata Sheet. If no changes are to be noted, please indicate that on the Errata Sheet so counsel are aware that no changes were made.

After reading the transcript, please execute the Errata Sheet, including date and place of signing and return to Golkow, a Veritext Company at the address indicated below.

Thank you for your prompt attention.

Sincerely,

Dawn A. Hillier, RMR, CRR, CLR
GOLKOW, A VERITEXT COMPANY
1650 Market Street, Suite 5150
Philadelphia, PA 19103
877.370.3377

ERRATA SHEET

I, LARRY YOUNG, have read the foregoing pages of my deposition given on February 6, 2026 in the case of IN RE: CAMP LEJEUNE WATER LITIGATION, Case No. 7:34-CV-00897, and wish to make the following additions, deletions or corrections:

PAGE	LINE	CHANGE AND REASON FOR CHANGE
27	2	The word "assuming" should be changed to "submitting."
80	25	The words "ex rel" should be changed to "actuarial"

In all other respects, the transcript is true and accurate.

LARRY YOUNG

Certificate of Reporter		330

THE VIDEOGRAPHER: We're on the record in the video deposition of Tricia Yount in the matter of Camp Lejeune Water Litigation.

Today's date is February 11th, 2026. We are located at Veritext in Mount Pleasant, South Carolina.

The court reporter is Bethany Morse. My name is Arthur Daugomah, videographer with Golkow Technologies, Inc. The time is now 9:51.

Will counsel please identify themselves for the record.

MS. LAMACCHIA: I'm sorry. Can we go off the record for a second?

THE VIDEOGRAPHER: Time is now 9:51. We are off the record.

(Discussion off the record)

THE VIDEOGRAPHER: Time is now 9:54. We're back on the record, and I believe everybody needs to identify themselves for the record.

MS. BUTLER: I'm Jenna Butler. I'm with Ward and Smith. I'm here on behalf of the Plaintiff Leadership Group.

MS. LAMACCHIA: Leslie LaMacchia with Bell Legal Group on behalf of Plaintiff

Leadership Group.

MR. ORTIZ: David Ortiz and Bill Klotzbucher on behalf of the Department of Justice and the United States.

THE VIDEOGRAPHER: Bethany, can you please swear in the witness.

TRICIA YOUNT, CPA, MAFF,

having been first duly sworn, was examined and testified as follows:

EXAMINATION

BY MS. BUTLER:

Q. Good morning. We met out in the lobby, and I think you said it's Yount; is that correct?

A. Yes.

Q. Okay. Will you please state your full name for the record.

A. Tricia Morris Yount.

Q. Okay. Ms. Yount, as you know, I am here to take your deposition today. I am guessing you've been deposed before; is that correct?

A. Yes.

Q. Okay. And so you know that you're under oath; correct?

A. Yes.

Q. Okay. And you understand that the court

reporter wants to be able to record my question and your answer; so we'll try not to speak over one another.

Do you understand that?

A. Yes.

Q. Okay. And you're doing a really good job of saying "yes" instead of "uh-huh," "huh-uh." That -- can we try to both continue that as well?

A. Yes.

Q. Okay. And if I ask you a question, I am going to assume that you understand the question unless you ask me to rephrase it. Is that fair?

A. Yes.

Q. And are you aware of any reason here today that you cannot -- you could possibly not understand my questions or provide an accurate response?

A. No.

Q. Okay. When were you first hired to work on the Camp Lejeune litigation?

A. I was contacted late 2022, and I believe our contract with my firm at the time was January '23.

Q. And you say your "firm at the time."

What firm was that?

A. Forvis Mazars.

Q. And is that still the entity that you are employed with for purposes of this litigation?

A. Yes.

Q. And, to your knowledge, have there been any other entities or persons employed to work on the report that you've rendered in this case?

A. I am -- I am the expert employed for the case, but there are staff at Forvis Mazars.

Q. But it's all within Forvis Mazars?

A. Yes.

Q. Okay. So there are no other companies that have been hired with other staff who are assisting you; is that correct?

A. Correct.

Q. Okay. Do you know how it came about that Forvis Mazars and/or you in particular were hired to work on this case?

A. The attorney, when he reached out, said I was referred to him.

Q. Okay. What did you understand your assignment to be when you were first contacted back in late 2022?

A. To look at the economic damages for the different plaintiffs from the defense side to review plaintiffs' claims for economic damages and prepare any reports of economic damages as well as review potential offsets for the government.

Q. What kind of potential offsets did you understand you would be looking at?

MR. ORTIZ: Object to form.

You can answer.

A. Any payments made by the government that were related to Camp Lejeune, any payments made to the plaintiffs, or any disability awards is my understanding.

(By Ms. Butler)

Q. And did you have an understanding as to what you were supposed to do with respect to potential offsets? In other words, was there a scope of work with respect to offsets that you were informed of?

MR. ORTIZ: Object to form.

You can answer.

A. Just to calculate those payments and offsets.

(By Ms. Butler)

Q. And so you understood that you were to make calculations; is that correct?
A. Yes.
Q. Did you understand your scope of work to involve any opinions regarding how those calculations were to be applied in the litigation?
A. No.
MR. ORTIZ: Objection.
MS. BUTLER: Did you get that?
(By Ms. Butler)
Q. So we've discussed what you understood your work was to be when you were first, I guess, engaged in discussions back in 2022.
Has that changed over time?
MR. ORTIZ: Object to form.
You can answer.
A. No.
(By Ms. Butler)
Q. Okay. And so what you just testified as to what you understood your job was essentially for this case has stayed the same; is that correct?
A. Yes.
Q. Okay. As far as your assignment for

this case, was that relayed to you verbally or in writing?

A. Verbally.

Q. Okay. And I am not asking you to disclose communications that were had solely with your counsel or with the Department of Justice. Is that how it was relayed to you?

MR. ORTIZ: I -- just to be clear, you're asking if counsel for the Department of Justice limited --

MS. BUTLER: I'm trying to understand -- so I don't want her to relay discussions; so if -- with counsel -- but if it was relayed to her by someone else, then I can ask about that.

(By Ms. Butler)

Q. So was there anybody other than a lawyer with the Department of Justice who relayed that assignment to you?

MR. ORTIZ: And -- and I just want to instruct that you can answer to the extent that it would not involve the disclosure of communications with counsel.

A. No. I've only spoken with counsel.

(By Ms. Butler)

Q. Okay. I'm going to mark as Exhibit 1 --
MS. BUTLER: Here's a copy for you.
(By Ms. Butler)
Q. Here's your copy.
MS. BUTLER: Here's your copy. I guess I have four -- I have four of all of these. So let me keep this one.
(Exhibit Number 1 was marked.)
(By Ms. Butler)
Q. I'm handing you a document, and I apologize. It does not have Bates labels on it because this was provided to us right before your deposition, and I was unable to obtain a Bates labeled version before I left.
But do you see at the top, it says U.S. Department of Justice Request, Authorization, and Contract for Services of Expert Witness?
A. Yes.
Q. Are you familiar with this type of document?
A. I mean, vaguely familiar, yes.
Q. Okay. Have you seen one of these before?
A. Yes. It's been a while.
Q. Okay. Have you seen one of these with

respect to your work in the Camp Lejeune litigation?

A. A few years ago when they first sent me the first one, I did see it.

Q. Okay. And do you see at the top, it says "The contractor" under this attachment to Statement of Work is BKD, LLP?

A. Yes.

Q. Who is BKD, LLP?

A. BKD is Forvis Mazars. There were some mergers and for -- with some different firms over the years. And I would say it was a merger, but perhaps it was like an acquisition because we ended up -- Forvis ended up using BKD's tax ID number. So when we use the tax ID number for Forvis to set up the contract, they're saying, "Oh, it's under BKD," and I said, "Oh, we're in the middle of the name change. Go with that." And I believe subsequent contracts should have been updated with Forvis Mazars's name.

Q. Okay. And looking at the top of this document, do you see under where it says "Statement of Work, SOW" on the far right, the last four numbers are 0165?

A. Yes.

Q. Okay. Do you understand that to maybe be a contractor purchase order number, the last four digits?

MR. ORTIZ: Object to form.

You can answer.

A. I don't know what that is.

(By Ms. Butler)

Q. Okay. Do you see down under "Scope" under 2.2 in that document?

A. Yes.

Q. Okay. And under A, it says -- well, first of all, under "Scope" it says "The contractor shall provide the government expert witness services in support of the case" and then it has Camp Lejeune and a file number.

Do you see that?

A. Yes.

Q. And it says "The services include the following as required by the Department of Justice."

Do you see that?

A. Yes.

Q. And under A, do you see where it says "will provide testimony in the field of forensic accounting and valuation of damages"?

A. Yes.
Q. Okay. Is that consistent with your understanding of the scope of work that was requested for the Camp Lejeune litigation?
A. Yes.
Q. And is that consistent with the scope of work that you testified remained through the current time period?
A. Yes.
Q. Do you have any understanding as to whether the scope of work will change?
MR. ORTIZ: Objection.
You can answer.
A. I don't believe so.
(By Ms. Butler)
Q. Have you been given any assumptions to rely on in this case?
MR. ORTIZ: Objection.
You can answer.
A. No.
(By Ms. Butler)
Q. We'll look at your reports later, but you have made some assumptions in this case; is that correct?
A. Yes.

Q. And so you determined what assumptions to make; is that correct?
A. Yes.
Q. Okay. You have provided nine reports in this case; correct?
A. Yes.
Q. And those nine plaintiffs have either kidney cancer or bladder cancer; is that correct?
A. Yes.
Q. Do you have any particular expertise in the areas of bladder cancer or kidney cancer?
A. No.
MR. ORTIZ: Objection to form and foundation.
You can answer.
A. Sorry. No.
(By Ms. Butler)
Q. Do you understand that there are other diseases involved in these Track 1 bellwether trials?
A. Yes.
Q. Okay. And do you know what those other diseases are?
A. I've heard a couple of them, but I do not know what they all are.

Q. Do you know why you were retained -- or Forvis Mazars was retained only for bladder cancer and kidney cancer cases?

MR. ORTIZ: Objection.

And you can answer to the extent it does not involve disclosure or substantive communications with counsel.

A. No.

(By Ms. Butler)

Q. Okay. During the course of your work, did you review any cases other than the bladder cancer and kidney cancer cases for which you've provided reports?

A. No.

Q. Okay.

A. I -- sorry. There originally were, I guess, 20 plaintiffs before it got down to the five; so nine at where we are now. So there were additional plaintiffs for bladder and kidney cancer until, I guess, a legal decision or court decision to only do a certain number. So there were originally a lot more and -- before I narrowed down to the nine that I issued reports for.

Does that make sense?

Q. Do you recall when it was narrowed down to the nine?

A. I -- I believe sometime in 2024 it was narrowed down. There were originally, like I said, 20 plaintiffs for each disease, and then it got down to five each.

Q. 20 plaintiffs for bladder cancer and 20 plaintiffs for kidney cancer?

A. Yes.

Q. Before it was narrowed down to the nine, for which you've provided reports, do you recall how many hours approximately you had spent working on the case?

A. No.

Q. But you think that was sometime in 2024?

A. Yes.

Q. Do you recall whether it was spring? Fall? Winter? Summer?

A. I don't.

Q. Okay. At this point in time, we have nine reports that have been filed -- or served in this case; correct?

A. Yes.

Q. Okay. Do you -- are the opinions expressed in those reports the extent of the

opinions you intend to testify on in this case?

MR. ORTIZ: Objection.

You can answer.

A. Yes.

(By Ms. Butler)

Q. What did you do to prepare for today?

A. I had a -- a couple of calls with counsel and reviewed the -- my reports.

Q. When you were on the calls with counsel, was there anyone else on those calls other than the lawyers for the Department of Justice?

A. No.

Q. Have you spoken with any other experts in this case?

A. No.

Q. Have you spoken with -- other than other Forvis Mazars individuals, have you spoken with anyone else about this case?

A. Apologize. I did speak -- I met Dr. Ji on a phone call -- I'm now recalling -- and it was a meeting of, "Hello, nice to meet you." And it was maybe five minutes.

MR. ORTIZ: And I'm just going to object to anything further under the CMO as both the retained experts and that's privileged.

(By Ms. Butler)
Q. And Dr. Ji -- and that's spelled J-i; correct?
A. Yes.
Q. And it -- we'll get into your report, but you rely on some of his numbers -- is that correct? -- some calculations he made?
A. Yes.
Q. Okay. And other than Dr. Ji and the Department of Justice attorneys and other people at Forvis Mazars who worked on this matter, have you spoken to anyone else about your work?
A. No.
Q. Were any materials supplied to you since you produced your supplemental Materials Considered List on February 5, 2026?
A. No.
Q. Have you looked up anything on the Internet with respect to this case?
MR. ORTIZ: Objection.
You can answer.
A. What -- what do you mean by -- just Camp Lejeune?
(By Ms. Butler)
Q. Well, for example, your reports do

contain some citations. And so I would understand that there might be some footnotes in your reports of things that you pulled up on the internet. Would that be accurate?

A. Yes.

Q. Okay. Other than anything referred to in your reports, have you done any just general Googling or, you know, research for purposes of this case?

A. Yes.

Q. Okay. What types of things were you looking for?

A. It would have been, you know, VBA benefits, understanding some of that.

Q. And tell me what types of materials did you review on VBA benefits?

A. I don't know. It would be over the last few years when -- while conducting my analysis and research. I know that I've researched the VBA or the VA website when calculating the offsets.

Q. Were your searches focused on the calculations that you made in your reports?

MR. ORTIZ: Objection to form.

You can answer.

A. Yeah, I guess so. Yes.
(By Ms. Butler)
Q. And the reason I ask -- so, for example, I have in front of me -- and I'm not going to mark it as an exhibit, but it's a 2025 annual report of the boards of trustees of the Federal Hospital Insurance and Federal Supplementary Medical Insurance trust funds. This pertains to Medicare. Okay?
A. Okay.
Q. It's a big old document. Were you looking for things just to get a general background on things like VBA disability, Medicare, government payor programs? Or were you trying to find out -- were you trying to find resources to help with your calculations?
MR. ORTIZ: Objection to form and foundation.
A. It would be resources for my calculations.
(By Ms. Butler)
Q. Okay. And what I'm trying to understand is, do you believe that you have sufficient background, training, or experience to testify about VBA in general?

MR. ORTIZ: Objection.
You can answer.
A. No, not VBA in general.
(By Ms. Butler)
Q. Okay. So, as far as veterans disability benefits and how ratings are decided and how the Veterans Benefit Administration [sic] determines the ratings they assign, do you feel that you have any expertise in that area?
MR. ORTIZ: Objection.
A. No.
(By Ms. Butler)
Q. And was your research, when you were looking on the Internet, geared at understanding that aspect of VBA disability benefits?
A. No.
Q. And you're a forensic accountant; correct?
A. Yes.
Q. Okay. And can you just give me a general description of what a forensic accountant does.
A. Well, what I do is I assist attorneys with their financial aspects of their cases.
Q. Okay. And so do you create queries to

pull data, or do you use data that other people supply to you to analyze it?

MR. ORTIZ: Object to form.

A. A little bit of both.

(By Ms. Butler)

Q. Okay. In this case, did you create queries to pull the VBA disability data that you analyzed?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. And so in this case, with respect to VBA disability benefits in particular, were you supplied the data that you analyzed?

A. It was provided -- yes, documents were provided.

Q. Okay. And did -- did you do anything to go back and validate the information that was provided to you?

MR. ORTIZ: Objection.

A. No. It was a -- a veteran's document.

(By Ms. Butler)

Q. Okay. So, for example, you might have received a ratings decision for a particular plaintiff; is that correct?

A. Yes.
Q. And then you took that ratings decision and you made calculations as evidenced in your report. Is that accurate?
A. Yes.
Q. Okay. But you did not go back to understand how the ratings decision had been determined; is that correct?
MR. ORTIZ: Objection.
A. Correct.
(By Ms. Butler)
Q. Okay. I'm just trying to understand the extent of your research on the Internet. So you -- you indicated that you did some Internet research on VBA disability benefits for the purpose of your calculations. We've established that; correct?
A. Yes.
Q. Did you do any other Internet research?
A. It would've been for retirement -- the concurrent retirement and disability pay. I would've -- I researched that.
Q. And, again, was that to understand how to do your calculations?
A. Yes.

Q. But not to, I guess, validate the information that had been given to you; correct?

MR. ORTIZ: Objection.

You can answer.

A. Correct.

(By Ms. Butler)

Q. Did you do any other Internet research?

MR. ORTIZ: Object to form.

A. I don't believe anything else that was not already in my reports.

(By Ms. Butler)

Q. Okay. So, for example, did you do any searches to look into the viability of the Medicare system in the future?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Did you do any research to look into the solvency of the Veterans Benefit Disability Program?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Okay. So would it be accurate to say that the Internet research you did was in order

to make the calculations that are in your reports?

A. Correct.

Q. Okay. And are there any assumptions in your reports that are based on any Internet research you did?

A. No.

Q. When you did this Internet research, did you print anything that is not identified in your reports?

A. No.

Q. So any of the Internet research you did to support the conclusions in your reports, is it footnoted or noted in your reports?

A. I believe so.

Q. Okay. Have you kept any personal notes or records relating to this matter?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Do you know if anyone else on your team at Forvis Mazars has kept any notes related to this matter?

A. I don't.

MR. ORTIZ: Objection.

A. I don't.

(By Ms. Butler)

Q. You don't know one way or another?

A. I don't.

Q. What kind of time records do you generally keep at Forvis Mazars? Do you -- for example, attorneys will enter the date, what was worked on, and the amount of time worked on. Is that similar to the type of record you generally keep?

A. Yes.

Q. Okay. And do you know what the requirements were for keeping time records in this case?

A. No. I mean, I don't understand your question.

Q. Let me ask it a better way.

To the best of your knowledge, did you and the other individuals at Forvis Mazars keep time entries in the manner that I just noted? For example, on a -- the date, what was worked on, and the amount of time worked on, and then it would indicate who worked on that activity?

A. Yes. That's how it's input into the system.

Q. Okay. And is -- is that consistent with how you generally bill for Forvis Mazars's work?

A. Well, when I was with Forvis Mazars full time and did billing, it was summarized. So you would see an employee's name and the total hours worked over a time frame.

I believe recently for the billing, they asked for it broken out.

Q. Okay. Do you know how the Department of Justice found Forvis Mazars for this case?

MR. ORTIZ: Objection.

A. Just what I --

MR. ORTIZ: Sorry. Objection.

Go ahead.

A. Just what I said earlier. The attorney called me, and said he was -- my name was referred to him.

(By Ms. Butler)

Q. Have you ever worked with the Department of Justice before this case?

A. Yes.

Q. Okay. How many times?

A. I'll estimate five or six.

Q. Can you tell me, generally, for each of those five or six times the type of work you were

doing for the Department of Justice.

A. It would -- defense work, clearly. I believe they were personal injury cases.

Q. Were any of those cases also situations where you were calculating veterans disability benefits?

MR. ORTIZ: Objection.

A. No, I don't think so.

(By Ms. Butler)

Q. Have you ever before calculated veterans disability benefits in the manner you calculated them for this case?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. And so given that you had not performed that scope of work before, was that Internet research we discussed earlier in order to inform you how to make those calculations?

A. No.

Q. What was it for, then?

A. It was for the numbers that went into my calculations.

Q. Okay. So how did you -- since you had not performed these calculations before with

respect to veterans -- veterans disability benefits, how did you educate yourself as to how to make those calculations?

A. The -- well, it's the -- it's a very similar calculation that you would do for any other economic damages such as lost wages, or benefits, those sort of things. You've got a but-for situation.

So I was -- you know, went through the documents and understood to look at what was -- kind of what would have been without the injuries or without the Camp Lejeune related conditions compared to, you know, with them and without them.

Q. Did you speak with anyone with the Veterans Benefit Administration regarding your calculations for this case?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Did you speak with anyone who had background, experience, or training in doing the types of calculations you were doing in this case?

MR. ORTIZ: Objection to form.

You can answer.

A. No.

(By Ms. Butler)

Q. So is it accurate to say that you determined how to make the calculations in this case based on how you just described and that there weren't outside resources that you relied upon?

MR. ORTIZ: Object to form.

You can answer.

A. There -- I guess, no. I'm trying to understand your question. Can you ask that again, please?

(By Ms. Butler)

Q. So I'm trying to understand. I just want to make sure -- you made calculations in this case with respect to veteran disability benefits; correct?

A. Yes.

Q. And as you described, and as in your reports that we'll review, you made determinations about Camp Lejeune related benefits and benefits that would have been, I guess, going to the veteran regardless of the Camp Lejeune litigation; is that correct?

A. I made calculations, not the determination. So I used the data provided by the VBA to calculate the but-for calculations.

Q. And by "but for," you mean but for Camp Lejeune?

A. Correct.

Q. Okay.

A. Sorry. Yes. With the Camp Lejeune conditions and without. I compared what their disability benefits would have been either way.

Q. So what I'm trying to understand is if you did any research before you made those calculations. That's what I'm trying to get at. And I know I'm not asking the best questions.

So I asked if you had talked to anybody at the VBA and you said, "No." I'm trying to understand if you did any other research before you made those calculations.

MR. ORTIZ: Objection.

A. No. No, the only research was -- and it's footnoted in the report of the websites used to show me how to get the ratings and what the dollar figures were that go along with those ratings.

(By Ms. Butler)

Q. And do you know how the information was compiled that you were provided to make those calculations?

MR. ORTIZ: Objection.

A. How -- how I received the -- there were a lot of documents, and I don't know how they were received by the DOJ, but they were uploaded to a system that we sifted through.

(By Ms. Butler)

Q. And those documents are referenced at the end of your report or in your Materials Considered List; correct?

A. Correct.

Q. Okay. And there are Bates numbered documents that are, for example, ratings decisions. Is that accurate?

A. Yes.

Q. And maybe some Excel spreadsheets; is that correct?

A. Yes.

Q. And you did not compile those documents. You received them and reviewed them; is that correct?

A. Yes.

Q. And then made your calculations from

them?

A. Yes.

Q. Okay. Do you have any personal or professional connections with any other experts in this case?

A. I just met one of them. We're both on the board of a forensic economists group. And I just met her.

Q. Who is that? Sorry to put you on the spot.

A. Dubravka? Is that -- I don't know if I said that right. It's the other female --

Q. Tosic?

A. Yes. Her last name -- sorry. I just met her. I didn't know that she was involved in the case.

Q. How recently was that that you met her?

A. In January.

Q. Okay. Of this year?

A. Yes.

Q. Okay. And I don't want to know the subject -- or the substance, but did you discuss the case with her? Just a yes or a no?

MR. ORTIZ: You can answer to the extent it doesn't involve disclosure of

substantive discussions between retained experts.
A. Nothing past, "Oh, we're both involved," and that was it.
(By Ms. Butler)
Q. Have you reviewed any of her reports in this case?
A. No.
Q. Have you reviewed any reports of an individual -- I forget his first name, but his last name is Brod, B-r-o-d?
A. I have not reviewed his.
Q. Okay. And you have not spoken to any of the plaintiffs -- plaintiffs in this case; correct?
A. Correct.
Q. Are you familiar with any of the other experts in this case?
MR. ORTIZ: Object to form.
A. I have seen Dr. Brod's name in a prior case. I cannot tell you what it was, but I've seen him before.
(By Ms. Butler)
Q. Have you formed an opinion about Dr. Brod?
MR. ORTIZ: Objection.

A. I -- I don't recall if I had a -- a report or not, but I was an opposing expert to him in a case some years back.
(By Ms. Butler)
Q. Do you remember what the name of that case was or where it was?
A. No.
Q. Was it in South Carolina? North Carolina? Do you recall?
A. I don't recall at all.
Q. Okay.
A. I'm sorry.
Q. And do you recall whose opinion prevailed?
A. I don't --
Q. Okay.
A. -- recall.
Q. Are you familiar with any of the other experts in this case other than Dr. Brod -- and you just met Dr. Tosic?
A. For plaintiff or defense?
Q. Both.
A. Yes. Plaintiffs' experts, I'm familiar with.
Q. And let's take them one by one. Tell

me, first -- the first one you're familiar with?
A. Fryar.
Q. Fryar. Michael Fryar?
A. Yes.
Q. Okay. And how are you familiar with him?
A. With all -- all my work. I do a lot of work with -- with him as -- as an expert on some of my cases.
Q. Okay. And he's a life care planner; is that correct?
A. I think he does vocational and life care planning.
Q. Okay. And you've been on the same side of cases with him?
A. Yes. I've been on both sides with him.
Q. And have you generally found him to be knowledgeable and experienced in the areas in which he renders opinions?
MR. ORTIZ: Objection.
A. Yes.
(By Ms. Butler)
Q. Who is the next expert that you're familiar with?
A. That might be it. Or you may need to

list them.

Q. Okay. And I'm going to go through your Materials Considered List later --

A. Yes.

Q. -- and we can look at -- at the individual experts at that time. But no others come to your mind? Mr. Staller -- had you worked with him or in cases involved?

A. I -- I think it was just Fryar.

Q. Okay. Have you worked with any of the attorneys in this case before on either side of the case?

A. I -- I don't know who all the plaintiffs' attorneys are. There are lots of them, but I -- in this room, no.

Q. Okay. I don't want to hear about the substance of any conversations you've had with the Department of Justice attorneys, but can you give me an approximate number of times you have met with them either via telephone or in person or on a Zoom call?

MR. ORTIZ: And you can answer but just instruct you not to disclose any communications with DOJ counsel.

A. It's a pure guess, ten to 15 times over

the last about four years or so.
(By Ms. Butler)
Q. And have there been the same attorneys, or have you dealt with a number of attorneys on the -- at the Department of Justice?
A. There have been a number of attorneys. I think the original attorney is -- is no longer there.
Q. And who was that?
A. Dan Eagles.
Q. Okay. Do you recall any of the other attorneys that you've worked with in those ten to 15 times that you've had meetings or calls?
A. The two here. There's Michael, there's --
Q. Mr. Cromwell?
A. Yes. That's -- that's who I can think of right here on the spot.
Q. And during any of those calls or meetings or communications, were -- was anyone present other than Department of Justice attorneys?
A. Just that one time when I met Dr. Ji.
Q. Okay. I forgot to ask you in the beginning. Can you give us your date of birth?

A. [redacted]/77.

Q. Okay. And do you live and work in the Mount Pleasant area?

A. Yes.

Q. How long have you lived here?

A. I've lived in Mount Pleasant for 16 years.

Q. And I believe you went to Clemson; is that correct?

A. Yes.

Q. Okay. And you have been employed with Forvis Mazars since 2024; is that correct?

A. Yes. There were some name changes but same company.

Q. And I think it was just called Forvis from 2022 to 2024; is that correct?

A. Yes.

Q. Okay. And before that who were you employed with?

A. So like I said, it was the same company, just name changes, but it was Dixon Hughes Goodman. Before that it was Dixon Hughes. I think before that, it was Pratt-Thomas Gumb. I was -- in 2004, I was hired by Pratt-Thomas Gumb; and through mergers and so forth, it ended up

Forvis Mazars.

Q. So even though your resume, which we'll -- I will look at in a minute -- reflects all these different employers, you've been with basically the same entity since 2004; is that correct?

A. Yes.

Q. And is that employment in your position as a forensic accountant?

A. Yes.

Q. Okay. And do you hold yourself out as an economist?

A. I would say I'm a forensic economist/accountant.

Q. And what is your background, training, and experience in the forensic economic area?

A. I have been working in this field for 22 years under other forensic economists and trained -- trained and worked under him and have -- go to annual conferences for forensic economics, and I'm on the board of two of those organizations and work with them and review the -- the journals and been training and studying with those economists for all these years.

Q. And any of the opinions that you are rendering in this case with respect to the area of forensic economics, are they expressed in the nine reports that you've provided?

MR. ORTIZ: Objection.

You can answer.

A. Yes.

(By Ms. Butler)

Q. Okay. And so whether it's because of your forensic accounting background or under the area of forensic economics, the opinions are all in your reports. Is that accurate?

A. Yes --

MR. ORTIZ: Same objection.

You can answer.

A. Yes.

(By Ms. Butler)

Q. Is there a way you would divide your opinions in this case as falling under the category of forensic accounting in this area or forensic economics in this area, or is it kind of a combination?

A. It is all the same. I was telling you, I am a forensic -- I am a forensic economist. I have -- with a CPA license. So I -- I am a

forensic economist is what I would say. But there is no distinction between the opinions in the report. It is all the same.

Q. Okay. Now, you also have a separate consulting LLC titled, Yount Forensic Consulting, LLC; is that correct?

A. Yes.

Q. What do you do under that LLC versus your role at Forvis Mazars? Is it different?

A. So I left Forvis -- Forvis Mazars a year and a half ago to start my own company, and I've contracted back. So I'm an independent contractor with Forvis Mazars, finishing up cases that I was already involved in. So I do the exact same thing, just self-employed.

Q. So with respect to your work on this case since you left Forvis Mazars, how are you compensated?

A. They pay me an hourly rate for the work I do.

Q. Forvis Mazars does?

A. Yes.

Q. And what is your hourly rate?

A. I believe that they pay me 350 an hour.

Q. And to the best of your knowledge, have

you received 350 per hour for your work on this case since the beginning of your work on this case?

A. No.

Q. Okay. Can you walk me through the progression since 2024 forward and how that has changed?

A. It would have been September 2024 when I left -- September 11th, 2024. And since that date, I would be an independent contractor and was paid for hourly work. Before that I was a salaried employee.

Q. So before you left Forvis Mazars, while you may have had an hourly rate that you billed out to clients, you were on a salary at Forvis Mazars?

A. Yes.

Q. Okay. But since you left Forvis Mazars, you receive 350 an hour for your work on this case?

A. Yes.

Q. Okay. And that goes through Yount Forensic Consulting, LLC?

A. Yes.

Q. Now, do you have any employees or other

individuals, whether they're independent contractors or whatever their relationship is, that work with you at Yount Forensic Consulting, LLC?

A. No.

Q. I'm going to mark as Exhibit 2 your CV that's been provided in this case.

(Exhibit Number 2 was marked.)

(By Ms. Butler)

Q. Do you recognize this document?

A. Yes.

Q. Is there anything on this document that would need to be updated?

A. No.

Q. So we've already gone through some of this, but it looks like you graduated from Clemson in December 2000; is that correct?

A. Yes.

Q. And then you were employed with Bank Of America until you joined Dixon Hughes Goodman LLP; is that correct?

A. Yes.

Q. And as you've explained, I believe Dixon Hughes is now what is Forvis Mazars; is that correct?

A. Yes.

Q. Okay. And it looked like based on your certifications, licenses, and associations that you obtained your CPA license in 2013; is that correct?

A. Yes.

Q. Okay. And you received a master analyst in financial forensics in March 2008?

A. Yes.

Q. Is -- what is the master analyst in financial forensics?

A. It is a certification that is through one of those associations below, the National Association of Certified Valuators and Analysts, and it's a -- it's a course in -- regarding financial calculations and damages for litigation matters.

Q. Okay. And is -- is that a course that takes a number of hours or a number of weeks or a number of months? Which is it?

A. It was a full week, like, I guess, 40-plus hours --

Q. Okay.

A. -- of a class and then an exam at the end.

Q. Okay. And have you held any teaching positions, presented any lectures, published articles, or held positions that are not on your resume?

A. No.

Q. Okay. And your CV shows no background in medicine; is that correct?

A. Correct.

Q. And so you have no training, knowledge, or experience with respect to the Track 1 diseases at issue in the Camp Lejeune litigation; correct?

MR. ORTIZ: Object to form.

You can answer.

A. Correct.

(By Ms. Butler)

Q. And in particular, you don't have any specialized training or knowledge about kidney cancer or bladder cancer; correct?

MR. ORTIZ: Object to form.

A. Correct.

(By Ms. Butler)

Q. And so am I correct that you are not opining in this case as to what care any of the plaintiffs might need in the future?

A. Correct.

Q. Are you relying on life care plans prepared by other individuals for the calculation of the amounts associated with that type of care?

A. For the -- the actual needs and the current cost of that care, I am relying on other medical experts.

Q. Okay. And am I correct that you're not opining as to whether the care a plaintiff might need will be available through government programs such as Medicare, Tricare, in the future?

MR. ORTIZ: Objection.

You can answer.

A. I am not.

(By Ms. Butler)

Q. Okay. And so that is outside the scope of your expertise to opine as to whether the care they need will actually be available through the programs that are offered currently; is that correct?

MR. ORTIZ: Same objection.

You can answer.

A. Correct.

(By Ms. Butler)

Q. And you -- am I correct that you are not opining as to whether the providers who offer care provided for by government programs -- whether those would be the best care for any of the plaintiffs in this litigation?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. You are not offering that opinion; correct?

A. I am not.

Q. Okay. And your CV shows no background in veteran disability benefits or government provided healthcare and that's accurate?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. Okay. And so other than the Internet research we discussed earlier to make your calculations in this case, you don't have any training, knowledge, or experience in the Veterans disability system?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Okay. And you don't have any background in Medicare, do you?

A. No.

Q. Okay. And you don't have any background or experience with other government payor programs like TriWest or Community Care Network or Tricare; correct?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. And so you are not offering any opinions in this case as to the availability of that care in the future; correct?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. And do you do life care plans?

A. No. That would be the medical expert. I calculate the present value of life care plans.

Q. Okay. And did you speak with any of the persons who prepared life care plans in this case?

A. No.

Q. And in your reports, you also deferred, for example, to Dr. Ji on the calculation of

medical expenses; is that correct?
A. Yes.
Q. Okay. And you deferred to the Veterans Benefit Administration as to the amounts of disability benefits provided to the plaintiff; correct? You just divided them between Camp Lejeune related and not Camp Lejeune related?
MR. ORTIZ: Object to form.
A. Yes, that would be the -- I guess, the -- the research that says what the monthly payments are based on their disability.
(By Ms. Butler)
Q. And you didn't determine the monthly payments -- let me back up. Let me rephrase that.
You didn't calculate the monthly payments for the VBA; correct?
A. No. I took their data, and I did calculate future benefits based on their data.
Q. Okay. So would it be accurate to say that your expertise in this case, that you're relying on, is to forensically analyze economic data that was provided to you by others?
MR. ORTIZ: Object to form.
A. No.

(By Ms. Butler)
Q. What would you say your expertise in this case is?
A. Is to provide the present value of the economic damages and then provide the -- a calculation of potential offsets.
Q. And with respect to potential offsets, is that your calculation of the but-for Veterans disability benefit -- benefits -- sorry -- that were provided to the plaintiffs?
A. That would be the but-for calculation. Sorry. Ask that one more time. I got --
MR. ORTIZ: Yeah, sorry. It was --
(By Ms. Butler)
Q. Sorry. Sorry. We were -- let me -- let me back up.
You applied present value to certain amounts -- is that correct? -- in this litigation?
A. Yes.
Q. Okay. And -- and you applied those present values to amounts that others had calculated; correct?
A. The data provided, I calculated present value amounts to.

Q. And then the second thing you did in this case -- I'm just trying to make sure I understand -- is the but-for calculation we talked about with respect to disability; correct?

A. Yes. The -- the offsets calculations. I did a present value for that as well.

Q. Okay. Let me ask you what your understanding is of an offset. You've used that word a couple of times.

MR. ORTIZ: Object to form.

A. As part of my scope, I was asked to calculate the potential offsets, and I was explained that there's a statute that says the government gets an offset, and that's the extent of that word. But it's basically any payments that they had made and any disability awarded to the plaintiffs. I was asked to add them together.

(By Ms. Butler)

Q. Okay. Have you looked at that statute?

A. I have seen it.

Q. Okay. Are you rendering any opinions as to how that statute should be interpreted?

A. No.

Q. Okay. And so are you just calculating

the figures that the government is going to present to the Court as an offset?

MR. ORTIZ: Object to form and foundation.

A. Yes.

(By Ms. Butler)

Q. And do you have any opinion as to how those offsets should be applied?

A. No.

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Okay. And so you do not intend to render an opinion as to how your figures should be applied. You've just calculated the numbers; correct?

MR. ORTIZ: Objection.

You can answer.

A. Correct.

(By Ms. Butler)

Q. And have you been involved in other cases where you have presented figures for offsets?

A. One case, many, many years ago for a DOJ case, there was a lawyer who had asked us to look

at potential offsets in a different manner. I'm vaguely recalling that. That would be the only extent that I recall ever doing that.

Q. Did that case involve VBA disability benefits?

A. I don't believe so. I believe it was a life care plan -- plan the plaintiffs were calculating and the defense attorney, I guess similar to here -- the offsets for what they -- the government would pay for that medical care.

Q. Have you ever considered the use of an offset as a credit against a damage award?

MR. ORTIZ: Objection to form and foundation.

A. I guess it would be similar to what I just explained. It was just whatever the payments -- the government was going to pay on behalf of the plaintiff. That's it.

(By Ms. Butler)

Q. And do you recall in that case -- did you actually testify as to an offset number in that case?

A. No.

Q. Okay. And so you -- you never rendered an opinion in that case on the offsets. Is that

accurate?
A. That's --
MR. ORTIZ: Objection.
(By Ms. Butler)
Q. To the best of your recollection?
A. That's accurate. To the best of my recollection, we reviewed the data and then I believe the case settled and didn't go any further.
Q. And so I just want to make sure I'm clear. In this case, you're not rendering an opinion as to how these figures you calculated should be applied under the Camp Lejeune Justice Act; is that correct?
MR. ORTIZ: Objection. Asked and answered.
(By Ms. Butler)
Q. Is that correct?
A. Correct.
Q. Okay. Going -- returning back to Exhibit 1 -- sorry -- Exhibit 2, which is your CV, down in the "Consulting Experience" -- do you see that paragraph?
A. Yes.
Q. It says in the third sentence that

"Tricia has experience with engagements involving the analysis of wage loss."

Do you see that?

A. Yes.

Q. What is wage loss?

A. When someone's claiming a loss of earnings.

Q. And do you typically provide wage loss analysis in cases? Is that something you do regularly?

A. Yes.

Q. Okay. And when you are deciding a loss of -- I guess, calculating loss of earnings in a case, do you distinguish between loss of earnings and loss of earning capacity?

A. Yes.

Q. What is the difference in your view?

A. The loss of earnings is what's expected based on what the person was doing at the time is my understanding. And the loss of earning capacity would be the loss of ability to use, you know, to your full potential of earnings based on the person's, you know, education and background.

Q. And what do you base that understanding on?

A. I'm sorry. The -- the --
Q. The --
A. My knowledge of this?
Q. Yes.
A. My experience and training in this field and my knowledge.
Q. Do you calculate both loss of earnings and loss of earning capacity in cases?
A. Yes.
Q. Okay. And are those different calculations?
A. Not really.
Q. Okay. Do you use the same information for both calculations?
A. Typically when you're looking at earning capacity, you could look at market data to determine what someone's potential earnings could have been.
Q. And that's different from loss of earnings where you look at past employment; is that correct?
A. That's -- one of the sources is looking at what they were doing at the time, actual pay stubs, that kind of thing.
Q. What are other sources for determining

loss of earnings?

A. You could also look at market data as well. I was saying that you didn't have to only look at tax returns and pay stubs.

Q. Do you have any understanding as to what veterans disability benefits are intended to compensate a veteran for?

MR. ORTIZ: Objection.

A. For their disability, for living with a disability.

(By Ms. Butler)

Q. And where did you gain that understanding?

A. That would have been on the VA website.

Q. Do you have any understanding as to whether veterans disability benefits are intended to compensate a veteran for loss of earning capacity?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. So you don't intend to render any opinions as to what veterans disability benefits are intended to compensate a veteran for; is that correct?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. Okay. That's outside the scope of your expertise?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. Your consulting experience in your CV goes on to say in the next sentence that "Tricia has been qualified as an expert in the field of economic and financial damages in federal and state courts and has testified in various venues"; is that correct?

A. Yes.

Q. And I believe you said this earlier. Are you often retained in personal injury cases?

A. Yes.

Q. Okay. And are you retained by both plaintiffs' counsel and defense counsel?

A. Yes.

Q. And so you've testified in both types of cases?

A. Yes.

Q. And would you say that you have kind of

a -- a typical case that you get involved in, or are they all different?

A. I mean, they're all different. Personal -- any kind of injury, wrongful death, wrongful termination cases.

Q. So I understand the facts are different, but is your analysis generally the same type of methodology and the same type of opinion that you're being asked to render?

MR. ORTIZ: Object to form.

You can answer.

A. Yes, calculation of present value calculations.

(By Ms. Butler)

Q. Okay. Present value calculations for damages?

A. Yes.

Q. And would that encompass various categories such as medical expenses?

A. Future medical care, yes.

Q. Would it also encompass other categories like household services?

A. Yes.

Q. And do you look at both past and future damages in those cases?

A. Yes.
Q. Attached to your CV is deposition and trial testimony over the last four years.
Did any of these cases involve -- or, well, let me ask: Did any of these cases involve veterans disability benefits?
MR. ORTIZ: Object to form.
You can answer.
A. I don't think so.
(By Ms. Butler)
Q. Okay. And did any of these cases involve testimony regarding offsets?
A. No.
MR. ORTIZ: Object to form. You can answer.
A. Sorry. No.
(By Ms. Butler)
Q. And are there any cases not identified on here that you can recall that involve testimony on your part involving disability benefits or government payor offsets?
MR. ORTIZ: Object to form.
A. No.
MR. ORTIZ: Jenna, we've been going about an hour, a little over an hour. Maybe now

is a good time --

MS. BUTLER: Yes. I meant to state this, and I'll state it on the record now that you are welcome to take a break at any time, and now is a good time. I do ask if I have a question pending that you answer it, but other than that, just let me know whenever you need a break. And we'll take a break right now for about five minutes if that's good for everybody.

MR. ORTIZ: That's fine.

THE DEPONENT: Okay.

MS. BUTLER: Okay. Great.

THE VIDEOGRAPHER: All right. Time is now 10:57. We're off the record.

(A recess was taken.)

THE VIDEOGRAPHER: Time is now 11:06. We're back on the record.

(By Ms. Butler)

Q. Ms. Yount, we were looking at your CV which is Exhibit 2. Do you still have that in front of you?

A. Yes.

Q. Now, you earlier indicated that you had actually had a case in which one of the other experts in this case, Dr. Brod, was involved.

Do you recall that testimony?
A. Yes.
Q. And I believe you said you were opposing experts. Is that accurate?
A. Yes.
Q. Do you recall if that case is one of those that is listed on the back of your resume?
A. I do not.
Q. Okay. And do you recall what your criticisms were of Dr. Brod in that case?
MR. ORTIZ: Object to form and foundation.
A. I do not.
(By Ms. Butler)
Q. Okay. Do you recall what his criticisms of you were in that case?
MR. ORTIZ: Same objection.
A. Again, I don't -- if I didn't issue a report, he may not have known I was involved. I could have been a consultant for the defense. I -- I don't recall.
(By Ms. Butler)
Q. Okay. You just recall that he was involved and that you had differing opinions?
MR. ORTIZ: Object to form and

foundation.

A. I did not say "differing opinions." I said I reviewed his expert report. I do not recall what my faults were on it, at that time.

(By Ms. Butler)

Q. Okay. All right. I am going to mark as Exhibit 3 --

MS. BUTLER: Do you have her notice of deposition?

I'm going to mark, as Exhibit 3, Plaintiffs' Notice of Deposition and Request for Production of Documents.

MR. ORTIZ: Is this the original notice?

MS. BUTLER: This is the original notice. This is Exhibit 3.

(Exhibit Number 3 was marked.)

MS. BUTLER: And then I'm going to mark, as Exhibit 4, Plaintiffs' Amended Notice.

(Exhibit Number 4 was marked.)

(By Ms. Butler)

Q. I'm going to hand you Exhibit 4. Do you recall that the date of your deposition was changed?

A. Yes.

Q. Okay. And I will represent to you that, other than the date of the deposition, I don't think there are any changes between the Exhibit 3 and Exhibit 4.

MS. BUTLER: Would you agree with that, Mr. Ortiz?

MR. ORTIZ: I think it purported to change the date of compliance, a day earlier.

MS. BUTLER: Okay.

MR. ORTIZ: But other than that, I believe that's accurate.

MS. BUTLER: Okay.

(By Ms. Butler)

Q. So looking at Exhibit 4 -- we'll just use Exhibit 4 for today -- did you -- do you recall seeing this before?

A. Again, assuming it's the same as 3 without the 11, I have peeked at it, yes.

Q. Okay. And do you recall when you received this?

A. In the last couple of weeks.

Q. And if you look at Exhibit 4, behind the notice of deposition, there's a subpoena.

Do you see that?

A. Yes.

Q. And then behind the subpoena, do you see that there's a schedule A?

A. Yes.

Q. Okay. And if you go to page 3 of the schedule A, do you see that there's a request for production?

A. Yes.

Q. Okay. And do you recall reviewing those requests for production?

A. Yes.

Q. And did you produce documents in response to that request for production to the Department of Justice?

MR. ORTIZ: Object to form and foundation.

And -- and instruction not to answer to the extent it would involve any communications between the expert and counsel.

A. Well, I spoke to counsel about it and --

MR. ORTIZ: And I'm going to instruct you not to disclose the substance of -- of communications with counsel.

(By Ms. Butler)

Q. I'll -- I'll ask you this: Regardless of what was discussed, which I don't want to know

about or I can't know about, did you produce documents to the Department of Justice in response to this request for production?

MR. ORTIZ: Objection.

A. No. They provided the documents on my behalf.

(By Ms. Butler)

Q. Okay. So am I correct to state that the Department of Justice already had any of the documents that were produced in response to this request for production?

A. Yes.

MR. ORTIZ: Object to form and foundation.

A. Yes.

(By Ms. Butler)

Q. And so do you know what the Department of Justice produced to us in response to this request for production?

A. I have not seen the actual documents, but I saw the response.

Q. Okay. And I will mark that as our next exhibit, which will be Exhibit 5. I'm marking the United States' Objections and Responses to Plaintiffs' Amended Notice of Deposition and

Requests for the Production of Documents to Tricia Yount.

(Exhibit Number 5 was marked.)

(By Ms. Butler)

Q. I'm going to hand you what has been marked as Exhibit 5. Is this what you just indicated you had seen?

A. Yes.

Q. Did you review Exhibit 5 before it was sent to us?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Okay. Going through Exhibit 5, if you go back to page 2, Number 1 requested your current CV and bibliography. And we just looked at that; is that correct?

A. Yes.

Q. Okay. So that was attached to your reports. Is that accurate?

A. Yes.

Q. And then Number 2 -- it's fairly lengthy, and if you want to read the whole thing, I welcome -- I will let you do that, but it asks for billing invoices or records. And then if you

go down, it says "This includes all time sheets, time records, billing records, and documents reflecting the time you and/or anyone employed by you or on your behalf spent in connection with your work and any aspect of the Camp Lejeune water contamination litigation."

Do you know if all of that information had been provided to the Department of Justice?

MR. ORTIZ: Objection. Form and foundation.

A. I do not know what the invoices looked like that were sent to them. But I do know that they include -- would include staff and hours and billing amounts.

(By Ms. Butler)

Q. And should they include an entry for each date with a description of the activity, the person who worked on it, and the amount of time spent?

MR. ORTIZ: Objection.

A. I don't know what detail was provided.

(By Ms. Butler)

Q. But that's the typical format that Forvis Mazars uses. Is that accurate?

MR. ORTIZ: Objection.

A. No. What I'd said before was that I -- when I did billing for them two years ago, I would summarize the staff with the hours and that's how the billing was done. I believe recently I was told they had to split out in more detail, but I have not seen their invoices.
(By Ms. Butler)
Q. Okay. So I guess I misunderstood. I thought you said that you typically kept your time on a date -- with a date entry, a description of services, and the amount of time spent.
Did I misunderstand that?
A. No. Time is input into a system that way, correct.
Q. Okay. Okay. And that's a system that Forvis Mazars uses?
A. Yes.
Q. What is it called? Do you know?
A. STAR, I believe. I'm sure there's a formal name. That's all I'm -- I know it as.
Q. Okay. So we have received documents in response to the responses and objections. But it's my understanding you don't know what we've received; is that correct?

MR. ORTIZ: Objection.

You can answer.

A. No.

(By Ms. Butler)

Q. Okay. We previously looked at, I think, Exhibit 1, which was a statement of work. Do you have that in front of you?

A. Yes.

Q. I will represent to you that that was one of the documents that was produced to us in response. And I am going to have marked as -- this is our next Exhibit -- 6 -- Exhibit 6. It is a Statement of Work, Attachment #2, and the last four numbers of the contract purchase order number are 0155.

Again, these do not have Bates numbers because they were produced to me without Bates numbers.

(Exhibit Number 6 was marked.)

(By Ms. Butler)

Q. I'm going to hand you Exhibit 6. Can you take a look at that document?

A. Yes.

Q. Okay. And as with the Exhibit 1, do you see any date anywhere on either of those

documents?

A. No.

Q. Okay. And they both say "Attachment #2, Statement of Work, SOW."

Do you see that?

A. Yes.

Q. Okay. And the Exhibit 1 was ending in 0165; is that correct?

A. Correct.

Q. And this one ends in -- and this Exhibit 6 ends in 0155; is that correct?

A. Yes.

Q. Okay. And do you see -- we looked previously under the scope, which is Section 2.2 in Exhibit 1. Do you see that same section in Exhibit 6?

A. Yes.

Q. And do you see under 2.2A, it again says that -- "will provide expert testimony in the field of forensic accounting and valuation of damages."

Do you see that?

A. Yes.

Q. And that's consistent with what you testified as to the scope of work for this case;

is that correct?

A. Yes.

Q. Okay. I'm going to have marked as Exhibit Number 7. I will represent to you this is another document that was produced to us in response to our request for production.

Have you seen that document before?

(Exhibit Number 7 was marked.)

A. I don't know.

(By Ms. Butler)

Q. Okay. And, again, can you find a date on that document?

A. I don't, but just from my knowledge, I'll point out that you can -- this is '23, this is '24 and '25 based on the contract number.

Q. And how do you tell that?

A. I -- I'm aware of that, that each year they'll -- they updated their contracts because it was only, say, December of each year. And so because of my knowledge of that, I can tell because of the V23 and the V24 and the V25 that these appear to be the updated statement of work for their contract that kept the case going, I guess, in their management.

Q. So Exhibit 1 has the V23 and then it

ends in 0165; correct?
A. Yes.
Q. And then Exhibit 6 has V24 and ends in 0155?
A. Yes.
Q. And Exhibit 7 has V25 and ends in 0162?
A. Correct.
Q. Okay. So it's your understanding that these are statements of work for 2023, 2024, and 2025; is that correct?
A. Correct.
Q. And if you look at the last one, Exhibit 7, is the scope in 2.2A the same as in the other two?
A. Yes.
Q. So consistent with your testimony, the scope of work, which is to provide expert witness services in the field of forensic accounting and valuation of damages. That did not change; correct?
A. Correct.
Q. Do you know if there's been a new statement of work for 2026?
A. I do not know.
Q. And would you expect that scope of work

to stay the same?

A. Yes.

Q. Now, we also were provided a number of contracts. And I've had to piece these together because, again, they were produced a little bit piecemeal to us and some have -- I believe, the copies we now have all have Bates numbers, but I am going to try to present these to you in the order that I have pieced them together.

So let me make sure -- okay. I am going to have marked as Exhibit 8 --

MS. BUTLER: Can we go off the record for a minute? I'm sorry.

THE VIDEOGRAPHER: Time is now 11:21. We're off the record.

(Discussion off the record)

THE VIDEOGRAPHER: Time is now 11:23. We're back on the record.

MS. BUTLER: Sorry. We're back on the record; so what I'm going to do is -- I'm just going to go ahead and have all of these marked, and then that way we can talk about them all.

So Exhibit 8, at the bottom right, says "1/17/23." I'm going to do it face down. There

we go. This will be --

MR. ORTIZ: And for the record these are Bates stamped.

MS. LAMACCHIA: Yes.

MS. BUTLER: Oh, yes, okay. Sorry. I'm not used to working with the Bates stamps because --

MR. ORTIZ: That's fine.

MS. BUTLER: -- I didn't get them that way.

Okay. Exhibit 9 is going to be the one starting with Bates 100, and we'll go through all this, but that's mine. Let's just give the court reporter these, and I'm going to let you mark these. And then I'll go through and identify them.

(By Ms. Butler)

Q. Okay. So what I have marked -- and I'll go through for the record -- is that we have a number of contracts that were produced to us by the Department of Justice.

Exhibit 8 at the top says "Solicitation/Contract/Order for Commercial Items." The contract number ends in 0165. It says "Award/Effective Date 1/17/23."

Do you see that?

(Exhibit Number 8 was marked.)

A. Yes.

(By Ms. Butler)

Q. Okay. Exhibit 9 is also a Solicitation/Contract/Order for Commercial Products. And it has a contract number ending in 0155. The award/effective date -- it says "See Block 31C," and it says "2/21/23."

Do you see that? Exhibit 9?

(Exhibit Number 9 was marked.)

A. Yes.

(By Ms. Butler)

Q. And then Exhibit 10 is another Solicitation/Contract/Order for Commercial Products. The contract number ends in 0162, and the award/effective date is 12/26/24.

(Exhibit Number 10 was marked.)

A. Yes.

(By Ms. Butler)

Q. Do you see that?

MR. ORTIZ: That was 12? Sorry.

THE DEPONENT: 10.

MR. ORTIZ: That was 10.

MS. BUTLER: That's 10. Sorry.

MR. ORTIZ: That's fine. My bad.
(By Ms. Butler)
Q. And then 11 is an Amendment of Solicitation/Modification of Contract.
Do you see that?
(Exhibit Number 11 was marked.)
A. Yes.
(By Ms. Butler)
Q. And the contract ID code ends in 0162.
Do you see that?
A. Yes.
Q. And then down on the bottom right it says "Date signed 8/27/25"?
A. Yes.
Q. Okay. That's 11.
And then 12 is Amendment of Solicitation/Modification of Contract. The contract ID code is 0162.
Do you see that?
(Exhibit Number 12 was marked.)
A. Yes.
(By Ms. Butler)
Q. And it says "Date signed 12/4/2025." Do you see that at the bottom right -- date signed?
A. Yes, I do.

Q. Okay. So that's Number 12. And then did we mark a 13?

A. No.

MR. ORTIZ: I don't think so.

MS. BUTLER: Okay.

A. Yes, sorry.

MS. BUTLER: We did? Is 13, though -- is 13 the same as 12, though?

MR. ORTIZ: I don't --

THE DEPONENT: It appears to be.

MS. BUTLER: But not signed. That's -- that's what it is.

MR. ORTIZ: I don't think I have a 13. Oh, wait. Maybe I do. Is that Bates 25?

MS. LAMACCHIA: Correct.

MS. BUTLER: Yes.

MR. ORTIZ: Okay. Thank you.

(Exhibit Number 13 was marked.)

(By Ms. Butler)

Q. And it's an unsigned version of 12; is that correct?

A. Yes.

Q. Okay. Okay. So looking at Exhibit 8, to the best of your knowledge, is this the first engagement agreement or contract that the

Department of Justice entered into with what is now Forvis Mazars for the Camp Lejeune work that we've been discussing?

A. Yes.

Q. Okay. And if you -- we discussed who BKD, LLP is; correct? Do you see in -- in Box 17A it says that the contractor is BKD, LLP?

A. Yes.

Q. And that's the predecessor to Forvis Mazars; is that correct?

A. Yes.

Q. Okay. And if you go down into kind of the grayed area where it has a Column 20, "Schedule of Supplies/Services."

Do you see that?

A. Yes.

Q. It just says "Period of Performance 1/17/23 to 12/31/23."

Do you see that?

A. Yes.

Q. And then in Box 26, it says "Total Award Amount of 150,000."

Do you see that?

A. Yes.

Q. Is that -- do you -- were you involved

in the negotiation of these contracts?

MR. ORTIZ: Object to foundation.

A. I would not say "negotiations." They asked what our hourly rate was, and they provided this contract.

(By Ms. Butler)

Q. And so is it your understanding that for the work that BKD, LLP, which was now Forvis Mazars, was to perform for the period of performance in Exhibit 8 -- that Forvis Mazars could bill up to $150,000?

MR. ORTIZ: Object to form and foundation.

You can answer.

A. That was the maximum that we were allotted for that time frame.

(By Ms. Butler)

Q. Okay. And if you go back in that document behind the table of contents to the next page where it says "Schedule of Supplies/Services."

Do you see that?

A. Yes.

Q. And, again, does it say "Obligated Amount $150,000"?

A. Yes.
Q. And below that does it say "The total invoices shall not exceed the ceiling/funding amount of 150,000"?
A. Yes.
Q. Okay. And so for that one-year period from January 17, 2023, through December 31, 2023, what is your recollection as to what Forvis Mazars was doing in the Camp Lejeune litigation?
MR. ORTIZ: Object to form and foundation.
A. That first year, I believe we were sifting through a lot of documents.
(By Ms. Butler)
Q. And would those be the documents that are referred to in your Materials Considered List and your reports?
A. Yes. They -- I believe they are. They had a document system that they asked us to go look through to see what documents they had. So half of that was probably trying to understand their system.
But, yes, anything that we looked at -- it was my understanding -- is based in our materials considered.

Q. Okay. I want to back up and make sure I understand.

The Department of Justice asked Forvis Mazars to go through its document system and pick out what it -- what Forvis Mazars wanted to perform its work?

MR. ORTIZ: Objection.

A. When we talked about documents needed, they said, "We have this file system with these documents." And whatever documents they put on that system for our review, we looked at.

(By Ms. Butler)

Q. But the only documents that have been referenced in your reports or on your Materials Considered List are the documents you used to create your reports; is that correct?

MR. ORTIZ: Objection to form and foundation.

A. Not necessarily. Any document that we've looked at, whether or not it's the basis for our opinions, is listed.

(By Ms. Butler)

Q. Okay. So the extent of this document system that you looked through is identified either in your reports or in the Materials

Considered List that have been produced to us.
Is that your testimony?
MR. ORTIZ: Object to form.
A. They should be.
(By Ms. Butler)
Q. Okay. So turning, then, to Exhibit 9. If you look down under the contractor in this exhibit, which is now contract number ending in 0155, do you see that it's Forvis now?
A. Yes.
Q. Okay. And if you look in the period of performance in Column 20, do you see that it's for 12/21/23 through 12/31/24?
A. Yes.
Q. And is that consistent -- when we were looking at those other scope of work documents you indicated that there were different contracts for each year. Is that what you were referring to?
A. Yes. That's what these are.
Q. Okay. And so each year did Forvis Mazars or its predecessors have to enter into a new contract with the Department of Justice?
A. Yes. Whenever it was -- before it would end, we would need to increase the dates and

update the contract.

Q. So looking at this Exhibit 9, which appears to be for the year 2024, do you see that the total award in Block 26 is now 250,000?

A. Yes.

Q. Okay. And what do you recall about the increase of another $100,000 for work to be performed by Forvis for the Department of Justice? What did that involve?

MR. ORTIZ: Objection to form and foundation.

And I assume you're not trying to get any kind of privileged communications --

MS. BUTLER: I'm not asking --

MR. ORTIZ: -- or anything like that.

MS. BUTLER: -- for discussions with the government, but --

MR. ORTIZ: And that's generally true for this line of questions?

MS. BUTLER: Yes.

MR. ORTIZ: Correct.

MS. BUTLER: Absolutely. I -- I am not asking you to disclose attorney-client communications. And if I ask a question that

would elicit that response, just tell me so. But if there's a response you can give that doesn't involve communications with the Department of Justice, that's what I'm trying to look for.

Thank you for that clarification.

(By Ms. Butler)

Q. So let me -- let me ask the question again.

Looking at Exhibit 9, it appears that the total award amount for Forvis's work with the Department of Justice was increased by $100,000 for the year 2024; is that correct?

A. Yes.

Q. Do you know why there was $100,000 increase for the year 2024?

MR. ORTIZ: Objection to form and foundation.

And same instruction we just talked about to the extent you can answer without disclosing privileged communications.

A. It's my understanding that once you -- with contracts with the government, once you hit their maximum amount, if you go over and try to bill for it, there would be a whole big mess and you would have to stop work and it would delay

things.

So they were always ahead of the game and making sure there was plenty of money in their award available to pay any invoices as needed.

(By Ms. Butler)

Q. Do you know if, at the end of 2023, Forvis had billed close to the prior contract amount of 150,000?

A. I don't.

Q. And do you know if, at the end of the 2025, Forvis had billed close to this contract amount of 250,000?

A. I do not.

Q. Do you know the total billings that Forvis Mazars or its predecessors have submitted to the Department of Justice for the work in this litigation?

A. No.

Q. Okay. I'm going to turn to Exhibit 9.

MR. ORTIZ: Exhibit 10.

MS. BUTLER: Oh, sorry. Exhibit 10. Thank you.

(By Ms. Butler)

Q. Which is it starts with Bates number 1.

Do you see that on the bottom right?
A. Yes.
Q. Okay. And if you look at the contract number, we're now in the contract 0162.
Do you see that?
A. Yes.
Q. I'm on Exhibit 10. Okay. Good.
And do you see now in the contractor name it says Forvis Mazars?
A. Yes.
Q. Okay. And the date signed and the award/effective date are both 12/26/24.
Do you see that?
A. Yes.
Q. And the period of performance under Column 20 is for basically the calendar year 2025.
Do you see that?
A. Yes.
Q. And do you see that the total award amount is now $249,850?
A. I see that.
Q. Okay. Do you know why this Exhibit 10, which is the contract for the period covering calendar year 2025, is for an award amount of

249,850 when the prior contract we looked at, which was Exhibit 9, was for 250,000?

MR. ORTIZ: And same instruction about privileged communications that we discussed earlier.

But you can answer.

A. No.

(By Ms. Butler)

Q. Who -- do you know who at Forvis Mazars, I guess, dealt with these contracts with the Department of Justice?

A. There's -- there's no dealing with the contracts. They just send them to us and if we don't sign them, then we don't get paid for any work we -- we do. So they would have -- if they emailed them to me, I would have forwarded them on to, I guess, either partner or Jennifer Walton, who I believed signed one back here, to sign off on.

Q. And so is it to the -- is it your understanding that there's really no negotiation? It's just a matter of signing?

A. Yes.

Q. Okay. And do you have any knowledge as to what the billings were that Forvis Mazars had

submitted to the Department of Justice through the end of 2025 for the Camp Lejeune litigation?

A. No.

Q. So I'm going to turn to Exhibit 11 now. This is another one of those amendments.

Do you see that at the top?

A. Yes.

Q. And it references contract ID code ending in 0162.

Do you see that?

A. Yes.

Q. Do you see in the block for eight where it says "Forvis Mazars, LLP"?

Do you see that?

A. Yes.

Q. Do you see those black lines, which means something was redacted?

A. Yes.

Q. Did you redact that?

A. No.

Q. Do you have any idea why that was redacted?

A. No.

Q. When you go down to the "Description of Amendment Modification," which is down in Block

14 -- do you see that?
A. Yes.
Q. It says "The purpose of this modification is to increase the contract ceiling."
Do you see that?
A. Yes.
Q. Do you know what the contract ceiling -- well, let me back up.
Do you know why the contract ceiling needed to be increased?
MR. ORTIZ: Same instruction about privileged communications earlier, but to the extent it doesn't involve disclosure of privileged communications, you can answer.
A. This -- I -- I don't know exactly. I know there was a time period where there was a change in hourly rates since this started in 2022. And there was a request, I believe, from Forvis Mazars to update their contract with our updated billing rates, and this could be what that is for.
(By Ms. Butler)
Q. I think you went back to the page I was going to direct you to, which is -- it has Bates

number 42 on the bottom.

Do you see that?

A. Yes.

Q. And it's the Schedule of Supplies/Services. Is that what you were looking at?

A. Yes.

Q. Okay. And do you see under there where it -- over -- under the "Schedule of Supplies/Services," it says "Previous total 249,850."

Do you see that?

A. Yes.

Q. And then it says "Change 100,000. Current total 349,850."

Do you see that?

A. Yes.

Q. Does it appear that this amendment was to increase the ceiling funding amount to $349,850?

A. Yes.

Q. Okay. Do you know why that ceiling or funding amount needed to be increased?

MR. ORTIZ: Same instruction about privilege earlier.

But you can answer to the extent it doesn't involve disclosure of privileged communications.

A. I'm assuming it's same as before. I wanted to make sure there was enough in the contract to pay for any invoices over the time period.

(By Ms. Butler)

Q. Okay. I'm going to turn to Exhibit 12, which appears to be another Amendment of Solicitation/Modification of Contract.

Do you see that?

A. Yes.

Q. And if you look at the date signed, which is in the bottom right, 16C Block, it says "December 4, 2025."

Do you see that?

A. Yes.

Q. And do you see the name and title of the signer as Jennifer Walton, on the left?

A. Yes.

Q. And is -- who is Jennifer Walton?

A. She is a director at Forvis Mazars.

Q. And I think you had noted she had signed another document; is that correct? Or were you

referring to this one?
A. This one.
Q. Okay. And if you look at this document -- if you go down to 14, it says "Description of Amendment: The purpose of this modification is to extend the period of performance through January 2, 2027."
Do you see that?
A. Sorry. Which block?
Q. Sorry. 14. It's above the signatures.
A. Thank you.
Q. I know.
A. Yes, I do see that.
Q. Okay. Did I read that accurately? The purpose?
A. Yes, it looks like they extended it through the end of this year, correct. Well, January 2nd, 2027.
Q. And do you see where it says "The SOW and all other terms and conditions remain unchanged"?
A. Yes.
Q. Do you know what "SOW" is referring to?
A. Those would be the exhibits we looked at earlier called "Statement of Work."

Q. Okay. And -- and those were the statements that we've already gone through; correct?

A. Correct.

Q. And, again, if you go back to the Schedule of Supplies/Services -- do you see it shows previous total, 349,850; change zero; and then current total, 349,850? Is that accurate?

A. Yes.

Q. Okay. And so would it appear that this was just to extend the contract through, as you said, the end of 2026?

A. Yes.

MR. ORTIZ: Well, through -- through the dates stated on the contract.

MS. BUTLER: Through the date stated -- well, yeah, you can testify that.

Did we mark a 13? Okay.

(By Ms. Butler)

Q. And does 13 appear to be the same as 12 -- just it doesn't have Jennifer Walton's signature? And take your time if you need to review.

A. Yes.

Q. Are you aware of any other contracts

that have been signed by Forvis Mazars or any individuals working with Forvis Mazars with respect to the Camp Lejeune litigation other than those we've looked at?

MR. ORTIZ: Object to form and foundation.

A. No. These appear to be -- cover the entire time period.

(By Ms. Butler)

Q. Okay. I'm going to have marked as -- I think we're on 14; is that correct? I'm handing you Exhibit 14, and this is taken out of order chronologically; so I apologize.

(Exhibit Number 14 was marked.)

(By Ms. Butler)

Q. Does this appear to be another Amendment of Solicitation/Modification of Contract?

A. Yes.

Q. And do you see this contract ID code ends in 0155?

A. Yes.

Q. And so does that appear to be with respect to the contract that was for 2024?

A. Yes.

Q. Okay. And do you see now at the bottom

left that you actually signed this contract?
A. Yes.
Q. And do you see in the description of amendment modification, "The purpose of this modification is to update the vendors rate"?
Do you see that?
A. Yes.
Q. Okay. And is that what you were recalling earlier when you referenced that billing rates needed to be updated?
A. Yes. This was back at this time period. I -- I believe that there's been a -- the other one we were talking about I thought was a more current one.
Q. Okay. And we can't tell from this document what -- what the rates were that were changed; correct?
MR. ORTIZ: Objection to form and foundation.
A. Correct. I think in each one they just give a total amount.
(By Ms. Butler)
Q. Okay. But Exhibit -- Exhibit 14 is a one-page document; correct?
A. Correct.

Q. And we don't have anything attached to give us any more context, do we?

MR. ORTIZ: Objection to foundation.

A. I do not see anything.

(By Ms. Butler)

Q. And I'll represent to you this was how it was produced to us. So I'm not trying to withhold anything from you.

Okay. Does that now constitute the contracts that you're aware of with respect to Forvis Mazars's work on this case?

MR. ORTIZ: Objection to foundation.

You can answer.

A. I believe so unless you hand me another one.

(By Ms. Butler)

Q. That would only be if they were produced to us. I am going to have marked as Exhibit 15, a document bearing Bates number 89, which I will represent to you also was produced to us as a single-page document.

(Exhibit Number 15 was marked.)

(By Ms. Butler)

Q. Do you see in the top of this document that it refers to "V25," which you've indicated would refer to the contract for the year 2025, and then it also has 0162?

Do you see that at the top?

A. Yes.

Q. Okay. And then down under "Labor Category," do you see where it says "Principal Award Rate 575" and "Staff 370"?

A. Yes.

Q. Okay. Given that this appears to be for the 2025-year, do you know what the principal and staff rates were for the other years?

A. No.

Q. And you indicated that either once or perhaps more times, the principal and staff rates changed; is that correct?

MR. ORTIZ: Objection.

A. Well, yeah, definitely. From Number 14 we see that it changed.

(By Ms. Butler)

Q. But you don't recall whether it changed to increase to 575 or beyond 57- -- do you have any recollection of the rates that would have been applied over the course of the time that

Forvis Mazars has worked with the Department of Justice?

MR. ORTIZ: Objection to form.

A. I don't know the actual rates, but they were smaller at the beginning. And as -- I believe these are the current rates now.

(By Ms. Butler)

Q. I'm going to mark as Exhibit 16, another document that was produced to us as a single page.

(Exhibit Number 16 was marked.)

(By Ms. Butler)

Q. That appears to have "V23" in front of the contract and the last four of 0165.

Do you see that?

A. Yes.

Q. Would that appear to be pertaining to the contract for 2023?

A. Yes.

Q. And do you see that the principal rate in that document is 500?

A. Yes.

Q. Okay. And do you see a staff rate in there?

A. No.

Q. Do you know if the principal rate was anything other than 500 or 575 during the course of the time that Forvis Mazars has worked on this case?

A. I don't believe so.

Q. I'm going to mark as Exhibit 17, another document that was produced to us as a single page, which appears to be another schedule rate and cost document.

Do you see that at the top?

(Exhibit Number 17 was marked.)

A. Yes.

(By Ms. Butler)

Q. And do you see that it has "V24" and then the last four 0155?

A. Yes.

Q. Would that appear to pertain to the 2024 contract?

A. Yes.

Q. Okay. And do you see the principal rate went from current rate of 500 to a new rate of 560?

A. Yes.

Q. And then do you see "staff member"? There was nothing, but it went to a new rate of

370?

A. Yes.

Q. So we have three different rates for principals now, and we have one rate for staff. Are you aware of any other rates charged by Forvis Mazars for principals or staff with respect to the work on the Camp Lejeune litigation?

A. I -- I think this will be the same as the contract. I'll say "no" unless you hand me another rate. I don't know.

Q. And I apologize. We received these as individual pages. They were not attached to contracts. So we've had to piece this together. And so I'm not trying to confuse you, I promise.

A. That's okay. I -- I don't know of any other rates. But it should be in a contract if there's a different rate.

Q. Okay. I think -- let me just look.

Are these rates set by Forvis, or are they rates set by the Department of Justice?

A. Forvis.

Q. Okay. Now we're going to get back to Exhibit 5, which was the Request for Production of Documents, which is what led us to all those

contracts.

Okay. Going back to page 2 of Exhibit 5, we had discussed how we had requested all billing invoices, time sheets, time records, et cetera.

Do you see that in Request Number 2?

A. Yes.

Q. And then if you look at the Request Number 3, which is on the next page, do you see that we requested it in another way: "All bills, invoices, or other documents reflecting compensation paid to you related to the Camp Lejeune litigation"?

A. Yes.

MR. ORTIZ: Object to form.

You can answer.

A. Yes.

(By Ms. Butler)

Q. Okay. Now, I am going to mark as the next exhibits, which will be -- what are we on?

MS. LAMACCHIA: 18.

MS. BUTLER: 18.

MR. ORTIZ: Yes.

MS. BUTLER: Do you have the time records? Okay.

Can we go off the record for a minute? I apologize.

THE VIDEOGRAPHER: Time is now 11:56. We're off the record.

(A recess was taken.)

THE VIDEOGRAPHER: Time is now 12:07. We're back on the record.

MS. BUTLER: I am going to hand the court reporter what I will ask her to mark as Exhibit 18. And I'm also going to go ahead and have her mark Exhibit 19.

(Exhibit Number 18 was marked.)

(Exhibit Number 19 was marked.)

(By Ms. Butler)

Q. Okay. I'm going to hand you, Ms. Yount, Exhibits 18 and 19 and ask if you have seen these before.

A. It's been a long time, but I have seen 18 before and a portion of 19.

Q. With respect to Exhibits 18 and 19, did you provide these to the Department of Justice to produce to us?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. And so as with the other documents we previously looked at, which were all of those contracts, the Department of Justice already had the documents. Is that accurate?

A. Yes.

Q. And so in respect to the Request for Production of Documents, am I understanding correctly that you didn't provide any additional documents to the Department of Justice. You relied on them to produce what they already had?

MR. ORTIZ: Object to form.

A. We had a discussion.

MR. ORTIZ: And -- and I don't want you to disclose the substance of any privileged communications with counsel.

A. They -- I did not provide additional documents.

(By Ms. Butler)

Q. Okay. So let's look at Exhibit 18. And I will tell you that -- that the reason these are compiled a little bit different -- and between 18 and 19 -- is because at first we received Exhibit 19, the documents that are in there. And then right before the deposition, we received the documents in Exhibit 18. So I just already had

them compiled separately.

But looking at Exhibit 18, do you see this where it says "Expert Witness Services from February 1, 2023, through May 3, 2023" -- do you see that?

A. Yes.

Q. Okay. And what -- what this Exhibit 18, these expert witness services run from, on the first page, February 1, 2023, and then on the last page, it goes up through November 30, 2024.

Do you see that?

A. Yes.

Q. Okay. So would these appear to be invoices for Forvis Mazars and their predecessors for the work performed in this Camp Lejeune litigation for 2023 and 2024?

A. That's what it appears to be.

Q. Let's look at the first invoice on the top of Exhibit 18.

Do you see that?

A. Yes.

Q. Who is Roy Strickland?

A. He is the managing partner of the forensics department at Forvis Mazars.

Q. So do you work under him?

A. Yes.
Q. And it appears that your rate and his rate are the same; is that correct?
A. Yes, this -- they're the principal rates in the contract.
Q. And it shows that you have 1.4 hours for that time period.
Do you see that?
A. Yes.
Q. Now, when you would have entered that 1.4 hours at Forvis Mazars, would you have put a description of the services rendered?
MR. ORTIZ: Objection to foundation.
A. Sometimes.
(By Ms. Butler)
Q. Is it common for you to just input time as an amount of hours without a description of services?
MR. ORTIZ: Objection.
You can answer.
A. There -- there's a description code. So it may say "communication" or "analysis" and then there's also a notes section. And there is a main time code. So it could have -- yes, there

is -- in my -- my -- your first question I was thinking of the detailed -- that -- that's usually nothing there. But there is a selection of time; so it could have -- like a code. I'm answering poorly, but it's either, like, communication or analysis or meeting.

(By Ms. Butler)

Q. And -- and we don't see that in this time -- in this invoice, do we?

A. No.

Q. And are you aware of there being any instructions within the contracts that we looked at earlier about the manner in which a government contractor is supposed to keep their time?

MR. ORTIZ: Objection to foundation.

A. I believe there was a -- if I'm recalling from some years prior -- this is 2023 -- that they needed their bills in a certain manner with this contract information and the hours per staff member. So yes.

(By Ms. Butler)

Q. Do you know if there's any requirement that a description of what was done for that time period be included?

MR. ORTIZ: Objection to foundation.

You can answer.

A. I don't.

(By Ms. Butler)

Q. And so looking at this first invoice, it looks like you and Mr. Shahnasarian were the only two involved. Is that consistent with your recollection of who was involved with the Camp Lejeune litigation on behalf of the Forvis Mazars at the inception of the engagement?

MR. ORTIZ: Objection to form.

You can answer.

A. Yes. At the beginning. And just to note, it does describe the description of services provided in the sentence at the top.

(By Ms. Butler)

Q. And what does it state?

A. Includes case review and attorney communications.

Q. Okay. And so is it -- is it your contention that that is the description that covers all of the hours below?

MR. ORTIZ: Objection to form.

A. Yes.

(By Ms. Butler)

Q. And there's no indication on how many dates those hours were worked; is that correct?

A. It's just between the time frame listed.

Q. Okay. Going to the next page of Exhibit 18, this appears to be for services from August 16, 2023, to December 21 -- sorry -- December 31, 2023.

Do you see that?

A. Yes.

Q. Okay. Are you aware of there being any work on the Camp Lejeune litigation between May 3rd, 2023, and August 15, 2023?

A. I don't, but I would assume not if there's no billings for it.

Q. And if you look at the second page of Exhibit 18, which goes through the end of 2023, do you see there's the name Jordan Kingston?

A. Yes.

Q. Who is Jordan Kingston?

A. She is a senior consultant at Forvis Mazars.

Q. And what was her role on the Camp Lejeune project?

A. She assisted with documents

accumulation, and management.

Q. And then there's the name Laura Mason. Do you see that?

A. Yes.

Q. And who is Laura Mason?

A. She -- she was a manager. She is no longer there.

Q. So was she on the same level as you and Mr. Strickland?

A. No.

Q. Can you explain the hierarchy for me of the individuals on these two invoices we've looked at so far.

MR. ORTIZ: Object to form.

You can answer.

A. Roy Strickland is managing partner. At the time I was managing director. Below me would be Laura Mason, as a manager. And below her would be Jordan Kingston, as a senior -- senior consultant.

(By Ms. Butler)

Q. And looking at the second page of Exhibit 18, we don't see what the hourly rates are that are being charged, do we?

A. $500.

Q. So everyone on that invoice charged $500?

A. Yes.

Q. Okay. And we don't see how many dates were worked, do we?

A. It was between the dates on the invoice.

Q. But, for example, it shows that you worked 14.5 hours.

Do you see that?

A. Yes.

Q. We don't have an indication as to the -- whether that was all in one day or on multiple days, do we?

A. No.

Q. And we have no indication other than the general description above as to what you did for each of those days or time periods that you worked; correct?

MR. ORTIZ: Objection.

You can answer.

A. Yes. It's just a mix of all of those things put together.

(By Ms. Butler)

Q. Okay. And it's the summary up there above Jordan Kingston's name?

A. Yes.
Q. Okay. Going to the next page of Exhibit 18, now we see Benjamin Wallace. Who is Benjamin Wallace?
A. Ben Wallace was a consultant. He's no longer there.
Q. So where does he fall in that hierarchy you previously explained to me?
A. He would be at the bottom.
Q. Below Laura Mason?
A. Below Jordan. So Laura --
Q. Okay.
A. -- was the manager. Jordan was a senior consultant. And then Ben was a consultant.
Q. Now, Jordan Kingston and Ben Wallace charged the same hourly rate; is that correct?
A. And Laura.
Q. And Laura Mason. They all charged 370 an hour; is that correct?
A. Yes.
Q. And on this third page, which is for the period January 1, 2024, through February 26, 2024, your rate has increased to 560; is that correct?
A. Yes.

Q. And, again, we don't have any individual time entries by day for any of these persons, do we?

A. No.

Q. And when you enter your time at Forvis Mazars, would you just enter, say, "Ben Wallace, 65.25 hours for Camp Lejeune litigation"?

MR. ORTIZ: Objection to form and foundation.

You can answer.

A. No.

(By Ms. Butler)

Q. So he would actually enter, say, "February 11, 2026, 1 hour," and what he did, and he would do that day by day. Is that accurate?

MR. ORTIZ: Objection to form and foundation.

A. Yes.

(By Ms. Butler)

Q. But we don't see any of that on this invoice, do we?

A. No.

Q. And do you know why?

A. That wasn't required for billing.

Q. It wasn't required by Forvis Mazars or

by the Department of Justice?

A. The Department of Justice is -- my understanding that this is how they receive their -- they needed their bills, with the dates of service and the people and the hours a day and the hourly rate. And that's how it was provided to them.

Q. So the Department of Justice will pay $61,024 of taxpayer dollars to Forvis Mazars without any further breakdown than we see on this page 3 of Exhibit 18?

Is that your understanding?

MR. ORTIZ: Objection and motion to strike.

You can answer.

A. Yes.

(By Ms. Butler)

Q. Let me back up. Am I correct that the invoice total for this page 3 is $61,024?

A. Yes.

Q. Okay. And is it your understanding this is the invoice that was submitted to the Department of Justice for the payment of that amount of money?

A. Yes.

Q. And do you see any further breakdown as far as Benjamin Wallace's 65.25 hours?

A. No. It's just right there at the 65 hours.

Q. Okay. And there's just a general description for all four individuals on this invoice of -- to include document management and review of Track 1 plaintiffs; is that correct?

A. Correct.

Q. And is it your understanding that the Department of Justice paid Forvis Mazars the $61,024 based on this invoice?

A. Yes.

Q. And do you see that approved for services stamp in red on the left with a date of March 1, 2024?

A. Yes.

Q. Okay. And to you -- to the best of your understanding, would Forvis Mazars submit any further documentation for this invoice to the Department of Justice that is not reflected on this page?

MR. ORTIZ: Objection to form and foundation.

A. I don't think so.

(By Ms. Butler)

Q. Going to the next page of Exhibit 17, this is for expert witness services from February 27, 2024, through April 11, 2024.

Do you see that?

A. Yes.

Q. And do you see that the invoice total is 69,118.50?

A. Yes.

Q. And, again, we just have the number of hours worked for that time period for each individual; correct?

A. Yes.

Q. We have no individual time entries by date with a description of what was done on that date; correct?

A. Yes, they are all the exact same.

Q. And, again, we just have the general description to include document management and review of Track 1 plaintiffs.

Do you see that?

A. Yes.

Q. Okay. And we have four individuals, who we've already spoken about; correct?

A. Correct.

Q. Okay. And going to the next page, do you see this says for "Expert Witness Services from April 12, 2024, through May 4, 2024"?

A. Yes.

Q. And do you see that the amount is 31,982.50?

A. Yes.

Q. And then there's a balance forward for a total due of 70,978.50?

A. Yes.

Q. And, again, we just have total hours for that time period with no day-by-day description and just a general description of services to include document management and review of Track 1 plaintiffs; is that correct?

A. Correct.

Q. Okay. And am I correct, though, that in those 14 hours of your time reflected on that invoice, you would have entered more specific information into the Forvis Mazars, I guess, time management system?

MR. ORTIZ: Objection to form and foundation.

A. It would just have the -- the date performed -- services performed.

(By Ms. Butler)
Q. And you would describe what you did or not?
MR. ORTIZ: Objection -- objection to foundation.
A. No. It would have -- it would have one -- there is a code but no detail. So there might be a code to say "analysis" or "data management."
(By Ms. Butler)
Q. But there would be some sort of explanation?
MR. ORTIZ: Objection.
A. Yes -- yes.
(By Ms. Butler)
Q. Okay. More explanation than we see on this piece of paper in front of us --
MR. ORTIZ: Same objection.
(By Ms. Butler)
Q. -- is that correct?
A. No. This -- these invoices give more detail than what the time records would show. The time records would just give you the individual days and hours worked that you're asking about. But the document management and

review of Track 1 plaintiffs information would likely not be in any detail put into the time records.

Q. But it would say, for example, "February 11, 2026, 1 hour, analysis."

MR. ORTIZ: Objection.

(By Ms. Butler)

Q. Is that accurate?

A. Yes.

Q. Okay. And so if -- if you were doing review versus document management, I would be able to tell that, whereas on this invoice, I can't.

MR. ORTIZ: Objection.

(By Ms. Butler)

Q. Is that accurate?

A. No, not necessarily. Most of my time, whenever I put it in, I use the same code no matter what. So it doesn't -- it's not -- it would not reflect the exact -- it would only reflect the hours and the date that you would get information out of that -- is what I'm saying.

Q. So regardless of what you're doing that day, you just put the same code in?

A. Typically.

Q. Okay. Let's go to the next page. This appears to be for "Expert Witness Services from May 5, 2024, through June 13, 2024."

Do you see that?

A. Yes.

Q. And the total amount is 28,035.

Do you see that?

A. Yes.

Q. And we've discussed all four of those individuals; correct?

A. Correct.

Q. And how are -- it appears that -- would you -- would you call this a team who was working on the Camp Lejeune litigation with you?

A. Yeah.

Q. Okay. Who compiles those teams?

A. I did.

Q. Okay. And so are these individuals that you regularly work with?

A. They -- they were, yes.

Q. Okay. And going to the next page, there's a new individual on here India Bratrud, and I'm sorry if I butchered that.

Do you see her name on there?

A. I do.

Q. And can you explain to me her role on your team.

A. She was an intern at that time and assisted with one of the consultants with the document, you know, management and review.

Q. Okay. And she spent seven hours during that time period?

A. It looks like it.

Q. And they charged her out at 370 an hour?

A. Yes.

Q. And then going to the next page, we have a Jennifer Walton. Can you explain her role on your team within the hierarchy that we've previously discussed.

A. Yeah. She's director with Forvis Mazars. And I believe at this time is when I was leaving Forvis and Laura was leaving, and we were bringing in another manager-type person at the firm.

Q. Now, Jennifer billed at 370 an hour on this invoice.

Do you see that?

A. Yes.

Q. Okay. And -- and is that consistent with her role as a director?

MR. ORTIZ: Object to form.

A. It's based on the contract for -- that we looked at earlier. All the staff was billed out at 370, and I am billed out at 560 at this time.

(By Ms. Butler)

Q. And you indicated Laura Mason left at the same time you did; is that correct or?

A. Sometime after.

Q. Okay. Okay.

Let's turn to Exhibit 19, which is just a continuation of these invoices.

Do you see that the first page of Exhibit 19, which has Bates number 33 on it, is from January 1, 2025, through February 28, 2025?

A. Yes.

Q. And consistent with the prior invoices we looked at, there's no individual time detail. We just have Benjamin Wallace, 17 hours; Jennifer Walton, 26.5 hours; Jordan Kingston, 21 hours; and Patricia Yount, 31 hours.

Do you see that?

MR. ORTIZ: Object to form.

You can answer.

A. Yes.

(By Ms. Butler)
Q. Okay. And do you have any recollection of what you were doing in those 31 hours?
MR. ORTIZ: Objection.
A. As I sit here today, I can't -- I don't know exactly.
(By Ms. Butler)
Q. And this invoice would not tell us other than to include document review analysis and various communications of Track 1 plaintiffs; correct?
A. Yes, that's what I was doing.
Q. Okay. And your rate is 575?
A. That's what they charged, yes.
Q. And at that point, Jennifer Walton has gone up to 575; is that correct?
A. It looks like it, yes.
Q. Okay. And I believe Jordan Kingston is -- was she still senior consultant at that time?
A. I -- I believe so.
Q. And Ben Wallace, a consultant?
A. I believe so.
Q. Okay. Turning to the next page of Exhibit 19, we have a number of new individuals.

I'm going to ask you about each one.

Who is Alexander Rey?

A. He's a partner at Forvis Mazars.

Q. So where does he fall in line in the hierarchy?

A. He would be between Roy and me.

Q. And what is his expertise?

A. I mean, he's a partner in the forensics and valuation department at our firm.

Q. Let me back up. All of the individuals we've looked at so far -- and if you need to review the invoices again to recall -- are they all within the forensic accounting department at Forvis Mazars?

A. Yes.

Q. Okay. Do any of the individuals we've looked at so far have any particular expertise that would be, I guess, relevant to this litigation?

MR. ORTIZ: Object to form.

A. I mean, no, they're consultants working under -- you know, managers and consultants working under my direction and -- and, you know, we're working in forensics and valuation services.

(By Ms. Butler)
Q. Did anyone on your team, whether we've gone through their name now or they appear on a later invoice, have any particular expertise in veterans disability benefits?
MR. ORTIZ: Objection to form and foundation.
A. Not that I know of.
(By Ms. Butler)
Q. So going back to page 2 of Exhibit 19, who is Erik Lioy?
A. Erik Lioy is a partner with Forvis Mazars as well.
Q. So he's on the same, I guess, plane as Alexander Rey?
A. Yes.
Q. Okay. And Harley Hager?
A. Harley is -- I think she's a manager there.
Q. And Katharine Markow?
A. She -- she's no longer there. She was a consultant.
Q. And Richard Brockman?
A. And he was a consultant.
Q. Okay. And all of these individuals

spent time working on the Camp Lejeune litigation?

A. Correct.

Q. Did -- did all of these people have specific, I guess, assignments or tasks that they were completing?

A. Yes.

Q. Explain to me the -- I mean, to the best of your recollection, and -- and if you can refer to names, what were the various roles of these individuals?

A. Well, we've already been through Ben, Jennifer, Jordan, myself, Laura -- I guess that was before she left. Those were, I guess, my main team that would help with reviewing all of the, you know, document system that was provided to us and document management and reviewing everything, you know, helping me, data input, those sort of things.

The invoice with all these people -- this appears to be when we issued maybe an initial preliminary report. And there would have been these -- the other people -- let's see -- Harley and Katherine -- they would have done a -- Forvis requires a math check and a partner review

before anything goes out the door. So they would have just looked at everything generally to see if they spotted anything. And then Alex and Eric would have done a read-through and said, "Okay. You can put this on our letterhead" kind of thing.

Q. So looking at this invoice which has Bates number 38 on it, do you see that it's -- it's in the amount of $126,653.25?

A. Yes.

Q. And, again, it has, for example, that you worked 79.5 hours.

Do you see that?

A. Yes.

Q. And so I guess I am to assume that that 79.5 hours included document review, analysis, various communications, and report preparation of Track 1 plaintiffs; is that correct?

MR. ORTIZ: Object to form.

A. Yes.

(By Ms. Butler)

Q. And there was no further detail or breakdown of your 79.5 hours that you provided to Forvis Mazars or the Department of Justice?

MR. ORTIZ: Object to form and

foundation.

You can answer.

A. My -- Forvis has all the detailed time by date, and I believe that this is what was sent. These invoices that you have here are the only thing that was sent to the Department of Justice for payment.

(By Ms. Butler)

Q. But Forvis Mazars might have further detail; is that correct?

A. Yes.

Q. Okay. And so, for example, this invoice total of 126,653.25 -- it's your understanding that this page that we're looking at is all that was submitted to the Department of Justice for the payment of that amount?

A. I believe so.

Q. And you worked 79.5 hours; Jennifer Walton, 54.25; Benjamin Wallace, 48; and the only further breakdown would be within the files of Forvis Mazars; is that correct?

MR. ORTIZ: Objection.

You can answer.

A. Yes.

(By Ms. Butler)

Q. Going through the rest of this Exhibit 19, these appear to be additional invoices similar to those we've looked at where there is just a number of hours for the time period and a general description of the services rendered by anybody on the invoice -- is that accurate? -- until we get to the May 22 invoice, which is the Bates number 032 on the bottom?

A. Yes.

Q. So starting with that invoice, which has Bates number 032 for May 22, 2025, through May 31, 2025, we start to see some -- at least a date even though we don't have a description of the services other than the general description above; is that correct?

A. Yes.

Q. Do you know why there was that change to the date format --

A. No.

Q. -- for the invoices?

A. No.

Q. Okay. And continuing forward chronologically as we look through these invoices, it looks like, then, these invoices continue with the date format but no description

by date; is that correct?

MR. ORTIZ: Object to form and foundation.

A. These are all the same date. I guess these are the most recent billings perhaps. Sorry. I'm just seeing -- I've never seen these before. So -- oh, I see a 2026 one.

(By Ms. Butler)

Q. Wait. What do you mean by "same date" because -- I'm sorry. I want to make sure we have the same document in front of us. We started with Bates number 032.

A. They're all dated December 1st, 2025. So...

Q. Oh, sorry. I was looking at the expert witness services line.

A. Yeah. I'm not sure how it was compiled. I -- I'm not there so I -- I don't have access to their billing system. But, yes, it appears you've got some -- all the dates and hours specifically worked with a general summary at the top.

Q. Now, I didn't see any new names until we got to the November 1. And, again, I'm looking at the line that says "Expert Witness Services

from," as opposed to the date at the top, which you pointed out, they all say December 1, 2025. But if you look at the line I'm looking at -- can you get to the November 1?

A. What's the Bates?

Q. 36.

A. Thank you. Okay.

Q. There's a Jordan Husko. Where does she fall in the --

A. She got married.

Q. Okay.

A. That's Jordan Kingston.

Q. Okay.

A. It's now Jordan Husko.

Q. And then if you go to the next invoice, which was December 1, there is a Sarah Cloud?

A. Yes. This looks like -- because I see the partner's name on there -- we issued our report. So Sarah would have done math check.

Q. Okay.

A. She's a consultant.

Q. So by my count, there are -- there are 13 different people that worked on the nine reports that were rendered in this case.

Is that consistent with your

understanding?

MR. ORTIZ: Objection to form.

You can answer.

A. It would've been a lot more than that because in the beginning -- remember there were 40 cases we initially were reviewing until it cut down. So there was more work. So in the end, there were nine reports.

But from the beginning, I don't know how many people were the first year or so before it got cut down until it got to the second half. But, yes, it appears there were that many staff members associated with this case.

(By Ms. Butler)

Q. And please correct me if I'm wrong, but my recollection is you thought that it got cut down to the nine reports sometime in 2024; is that correct?

A. I think so.

Q. And so looking at Exhibit 18, which goes through the end of 2024, it looks like there are seven different names up through the end of 2024?

A. Okay.

Q. Is that correct?

A. If that's what you counted.

Q. Okay. And then another six additional new names after that period of time?

A. That sounds about right.

Q. Okay. So what I'm trying to understand is -- is we have the nine reports that we'll go through probably after lunch at this point. How many of these individuals contributed to the -- the final written product that we received?

A. All were a part of getting there, but they're all my reports and so they're under my direction, would help with any data input, general, you know -- you know, wording of the reports maybe, like, the first paragraph or something and getting the first page put together.

So for the end product I would say all of them started, you know, came from document management all the way until I finished the reports.

Q. Now, going back to Exhibit 18, do you have any understanding as to what the total of all of those invoices are, which would be the total for work for 2023 and 2024?

A. I don't. I'd have to add them all up.

Q. Would it sound about right if I told you

that we calculate 289,857.16?

MR. ORTIZ: Objection to form.

A. Say that number again.

(By Ms. Butler)

Q. 289,857.16.

A. I just did a rough look and got about 220 and just making sure you're not double counting the balance forwards instead of -- so just the total, do --

Q. I gotcha. And if we did that -- that would be --

A. -- two of them, yeah.

Q. -- that would be around 250,000 then?

A. Take off about 17,000 and additional 39,000, then that seems about right.

Q. Okay. And looking at Exhibit 19, which would appear to be 2025 through -- well, January 1, 2025, through December 31, 2025, I'll tell you that our calculations show a total of 292,569.50. Does that sound about right to you?

MR. ORTIZ: Objection to form.

A. It -- it could be. These look like a lot of invoices that might account to that, but I have not counted them.

(By Ms. Butler)

Q. Okay. And so if our totals are correct, do you have any understanding as to the total amount Forvis Mazars has billed to the Department of Justice for the Camp Lejeune work to date?

A. Not until just now. It sounds like you've got the numbers there.

Q. Would about 500,000 or more sound correct to you?

MR. ORTIZ: Objection to form examine foundation.

You can answer.

A. I guess I -- based on these invoices.

(By Ms. Butler)

Q. Does that surprise you?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Are any of the individuals on these invoices -- would you consider them to be coauthors of your reports?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Is it typical for a project at Forvis Mazars to have so many people involved?

A. A project that -- of this magnitude, yes.

Q. And, to your knowledge, do you know if Forvis Mazars was ever asked to look at preparing reports for plaintiffs with conditions other than bladder cancer or kidney cancer?

A. No.

Q. When these invoices that we've looked at in Exhibit 18 and 19 were sent to the Department of Justice, does somebody approve them before they go to the Department of Justice?

A. Yes. I think a partner or someone has to approve it to be submitted.

Q. Okay. And -- and I'm taking it that person is not you?

A. No, I'm no longer there.

Q. Okay. So given the number of cooks in the kitchen here, just to use an expression, what did you do as the author of these reports to validate or confirm the accuracy of the work that others were doing?

MR. ORTIZ: Objection to form and foundation.

You can answer.

A. All of their work was done under my

direction, and I reviewed the documents and everything that was put into each analysis. And I authored each of the reports.

(By Ms. Butler)

Q. And so by authoring the reports, are you therefore validating the reliability of the information contained in the reports?

MR. ORTIZ: Objection.

A. I'm -- I'm assuming that it is correct based on the documents that we were provided.

(By Ms. Butler)

Q. And are you assuming it's correct based on the work that others provided you that you then put into your reports?

MR. ORTIZ: Objection.

A. Other experts' reports. The -- any staff member that helped me with my work, I reviewed myself and would call it my work. But I'm assuming any other work as an expert reports provided to me, I'm assuming that those are accurate.

(By Ms. Butler)

Q. And so let's take, for example, Dr. Ji who we mentioned earlier. You include some of the figures that appear in his reports -- you

include those in your reports; correct?
A. Yes.
Q. And so did you undertake to do anything to confirm the validity of Dr. Ji's information?
MR. ORTIZ: Objection.
A. No.
(By Ms. Butler)
Q. And the same with respect to -- you refer to two life care planners, Shahnasarian and Navarro, and you incorporate information from their reports into yours; is that correct?
A. Yes.
Q. And did you do anything to validate the information that you put in your reports that came from Shahnasarian and Navarro?
MR. ORTIZ: Same objection.
A. No.
(By Ms. Butler)
Q. And the same with Dr. Henry Miller. You incorporate information that is contained in reports of Dr. Henry Miller; correct?
MR. ORTIZ: Same objection.
A. Yes.
(By Ms. Butler)
Q. And did you do anything to independently

validate or verify the information that you put in your reports that came from Dr. Henry Miller?

MR. ORTIZ: Same objection.

You can answer.

A. No.

(By Ms. Butler)

Q. And so if other experts made assumptions that are contained in their reports, did you do anything to assess the reasonableness of those assumptions?

MR. ORTIZ: Object to form.

A. No. It goes back to the prior questions. I assumed that their reports are all accurate, and I have done nothing to verify their reports. Excuse me.

MS. BUTLER: I don't know where we are on time. Is there a clock right there? But now might be a good time to break for lunch.

MR. ORTIZ: I was -- I was going to suggest the same.

MS. BUTLER: If that's okay. My voice is kind of fading.

MR. ORTIZ: That's fine.

MS. BUTLER: Okay.

THE VIDEOGRAPHER: All right. Time

is now 12:47. We're off the record.

(A lunch recess was taken.)

THE VIDEOGRAPHER: Time is now 1:23. We're back on the record.

(By Ms. Butler)

Q. Ms. Yount, I hope you had a good lunch.

A. Yes. Thank you.

Q. I wanted to revisit just two things and then I'm going to move into your reports. First of all, can you pull out that very first exhibit, Exhibit 1. This was the first Attachment #2, Statement of Work that we looked at. Do you recall we looked at a few others as well?

A. Yes.

Q. Okay. If you look at the second page of Exhibit 1, do you see a Section 2.7 Billing Submittal?

A. Yes.

Q. Can you read that first sentence to me just up to the comma.

A. "The contractor shall submit a monthly detailed invoice by the 10th of each month following the month in which the services were rendered."

Q. Okay. And to the best of your

knowledge, were the invoices that Forvis Mazars or its predecessors submitted to the Department of Justice those that we looked at in Exhibits 18 and 19?

MR. ORTIZ: Object to form.

You can answer.

A. To the best of my knowledge, those were the invoices submitted.

(By Ms. Butler)

Q. But there is more detail within the Fortis Mazars system; correct?

MR. ORTIZ: Object to form and foundation.

A. Yes.

(By Ms. Butler)

Q. And so if those had been requested by the Department of Justice, those could have been produced; correct?

MR. ORTIZ: Objection.

A. Yes.

(By Ms. Butler)

Q. Okay. And going down to Section 2.8, do you see where it says "Monthly Projections of Rendered Services"?

A. Yes.

Q. Do you see that it says "The contractor shall provide monthly detailed projection of services and other direct costs to include projected travel for each month the contract is in effect"?

A. Yes.

Q. Do you know if Forvis Mazars submitted those to the Department of Justice?

A. Yes. There were a couple when I was there that were submitted.

Q. And did you submit those?

A. Yes. I emailed it. There's -- it wasn't a -- a -- it was more of a how much -- when you -- because once you got to maybe 70 percent of the contract award amount, you had to submit that you were close to that amount and submit how many -- how much you think you needed to work additional.

So there was something along those lines which, I think, this is what that means. And those were submitted. I know I submitted at least a couple when I was employed there.

Q. Other than the projections that you just explained about the 70 percent situation, were there any other projections or, I guess, other

invoice or services rendered type of documents submitted to the Department of Justice that we haven't looked at today?

MR. ORTIZ: Object to form and foundation.

You can answer.

A. Not that I recall.

(By Ms. Butler)

Q. So I also wanted to go back to Exhibit 5, which were the Responses and Objections to the Requests for Production, which is how we got into all that other stuff.

So going to page 2 again, and we're looking at paragraph 2. And I've alluded to this before, but do you see where Request 22 included all time sheets?

Do you see that?

A. It says "All billing invoices or records between you --" Second sentence: "This includes all time sheets, time records, billing records, documents reflecting the time --" yes, I see that.

Q. And based on your testimony, it's my understanding that there would be some time sheets that Forvis Mazars has that have not been

produced; is that correct?

MR. ORTIZ: Objection to form and foundation and to the extent it misstates prior testimony.

A. Yes. There are some -- all the time has been submitted to you guys, but there are some additional details, if you will.

(By Ms. Butler)

Q. Okay. And going, then, to page 5 -- sorry. Go to page 4. And you'll see there's a paragraph 4 in the middle of the page.

A. Yes.

Q. This was a request for consulting contracts or retention letters.

Do you see that?

A. Yes.

Q. Okay. And if you go to -- down there's a response and there are a bunch of legal objections, but if you go to the next page on page 5, you'll see a paragraph that starts "Subject to and without waiving."

Do you see that?

A. Yes.

Q. It says "Subject to and without waiving the foregoing objections, the United States will

produce certain contracting documents related to Ms. Yount's work as a retained expert."

Do you see that?

A. I do.

Q. Do you know if there are contracting documents related to your work as a retained expert in this case that we have not looked at today?

MR. ORTIZ: Objection to form.

A. Not that I know of.

(By Ms. Butler)

Q. Okay. And if you look at the next paragraph it asks for "all retainer agreements or contracts executed by you regarding your work as an expert in the CLJA litigation."

And again, if you go to the next page, it says "Subject to and without waiving the foregoing objections, the United States will produce certain contracting documents relating to your work."

Do you see that?

A. I do that.

Q. Again, are you aware of any contracting documents relating to your work that have not been produced?

MR. ORTIZ: Object to form.

A. I don't believe so.

(By Ms. Butler)

Q. Okay. Then if you go down to page 7, paragraph 7 -- if you look at both paragraph 7 and 8 on that page before you get to where -- do you see where there's a response afterwards?

A. Yes.

Q. It asks for a lot of materials, and you can feel free to read both of those requests.

A. Okay.

Q. If you look in the response, there's an objection. And then it says in -- in both "Subject to and without waiving the foregoing objection, the United States refers plaintiffs to documents that may contain information responsive to this request," and it refers to, one, your reports dated December 15, 2025, and attached reference list; second of all, your Materials Considered List dated December 22, 2025; and third, a supplemental Materials Considered List that will be served before Ms. Yount's deposition, which I will tell you we have received.

Are you aware of anything responsive to

either Request 7 or 8 that would not be contained within your reports dated December 15, 2025, and the attached reference list or your Materials Considered List?

MR. ORTIZ: Objection to form and foundation.

A. No, I don't think so.

(By Ms. Butler)

Q. Okay. And I'm going to ask you that same question for Request Number 9, which is on page 8.

A. Do you want me to answer it? The same question, are you going to ask?

Q. I'm going to ask you the same -- you know, they refer to -- in the response, they refer to those same three groups of materials, which is your reports; the exhibits to your reports; the Materials Considered List, both the ones that were produced back in December and the ones that were produced before your deposition.

And I'm just going to ask if there's anything else responsive to Request Number 9 that would not be contained in what's identified.

MR. ORTIZ: Objection to form and foundation.

You can answer.

A. No, I don't believe so.

(By Ms. Butler)

Q. Okay. Okay. I am going to now turn to the reports in this case. And we went ahead during the break and marked these. So I am going to hand you Exhibit 20, which is the Expert Report of Tricia M. Yount for Mark Anthony Cagiano.

(Exhibit Number 20 was marked.)

(By Ms. Butler)

Q. And I am going to hand you Exhibit 21, which is the Materials Considered List for Mark Anthony Cagiano.

(Exhibit Number 21 was marked.)

(By Ms. Butler)

Q. So if you look at the first page after the front page but -- page 2 of your report, at the top it says "Assignment."

Do you see that?

A. Yes.

Q. And would you agree that each of your reports for the nine plaintiffs has the same sentence under the assignment heading?

A. Yes.

Q. Okay. And for each one, it says "To perform professional consulting services in connection with the above referenced matter."

Do you see that?

A. Yes.

Q. And so we previously looked at the scope of work documents which explained that you are providing -- and I'm going to get it -- forensic accounting and valuation of damages. Is that the assignment that you're referring to in your reports for these nine plaintiffs?

A. Yes. That would encompass professional consulting services.

Q. Okay. And so while professional consulting services can be pretty broad, it's more narrowly focused on what's stated in the Statement of Work that we looked at previously?

A. Yes.

Q. Okay. And consistent with your testimony; correct?

A. Correct.

Q. Okay. If you go down, then, to the introduction for Mr. Cagiano, the first paragraph -- is -- is that just a summary of information that you were provided?

A. It is a summary of information based on facts and his life expectancy that is from a source.

Q. Okay. And so other than the life expectancy, which is from a source, was the other information -- information that you did not independently verify?

A. Correct.

MR. ORTIZ: Object to form.

Just give me a minute.

THE DEPONENT: Sorry.

A. Correct.

MR. ORTIZ: That's fine.

(By Ms. Butler)

Q. And then in the next paragraph under "Introduction," you say "The purpose of this analysis is to evaluate alleged damages as presented by plaintiffs and to provide an expert opinion as to the value of any offsets to a potential award"; correct?

A. Correct.

Q. And then it says -- excuse me -- "All calculations are calculated to present value as of the date of this report"; is that correct?

A. Yes.

Q. Okay. So is it accurate that for these nine reports that you provided in this case, that generally speaking, you are providing an expert opinion as to the value of purported offsets?

A. Yes. It is the present value of offsets.

Q. Okay. And then I was going to say in the other stuff that -- that you are providing, as your expert opinion in this matter, is -- you are providing present values for various numbers; is that correct?

A. That -- yeah, that is my opinion as to the value is all present value.

Q. And so those -- those two items -- is that pretty much what your expertise is limited to in these cases?

MR. ORTIZ: Object to form.

A. Reviewing and calculating economic damages and calculating offsets. That's what my scope is and...

(By Ms. Butler)

Q. Okay. Now you state in the introduction for Mr. Cagiano, "Plaintiffs have not presented an economic damage report" -- sorry -- "economic damage expert report regarding Mr. Cagiano. I

will therefore only provide an opinion regarding offsets in this matter."

Is that still the case with respect to Mr. Cagiano?

A. Yes.

Q. Okay. And so going down, then, to your "Opinions & Basis," your first heading is "Offsets" and underneath that you have "Past Medical Expense."

Do you see that?

A. Yes.

Q. In that paragraph, under "Past Medical Expenses," are you providing any opinion with respect to the benefits that Mr. Cagiano received from government agencies?

MR. ORTIZ: Object to form.

You can answer.

A. Regarding Dr. Ji's report and the amount listed, I have no opinions about that amount.

(By Ms. Butler)

Q. So are you basically just stating what Dr. Ji is going to opine on? Is that an accurate, I guess, representation of what you're doing in that paragraph?

MR. ORTIZ: Object to form.

A. Yes.
(By Ms. Butler)
Q. Going to the next heading, which is "Veterans Benefits Administration Compensation" -- actually, let me -- let me go back to the past medical expenses. I'm sorry.
As far as the amount that you've identified, are you relying on Dr. Ji for the calculation of that amount?
A. Yes.
Q. And are you relying on Dr. Ji for the basis for his calculation of that amount?
A. Yes.
Q. Now we'll go to the "Veterans Benefits Administration Compensation" heading. Sorry.
You note in there that Mr. Cagiano began receiving benefits related to Camp Lejeune on March 1, 2018. What did you rely on to determine that -- excuse me -- that date?
A. That is the date based on the VBA documents provided with the disability ratings combined with Dr. Ji's report, telling me which conditions were related to Camp Lejeune.
Q. And so on the first part of that, as far as the date he began receiving -- sorry --

Mr. Cagiano began receiving benefits, did you rely on information provided to you by the Department of Justice for that?

MR. ORTIZ: Objection to form. You can answer.

A. They provided the documents from the VBA that had that data, yes.

(By Ms. Butler)

Q. Okay. And then you said secondly -- and I believe this is covered by your footnote too, but correct me if I'm wrong -- that you relied on Dr. Ji for the disability ratings for the conditions that those disability ratings applied to; is that correct?

A. He opined which of those disability ratings were related to the Camp Lejeune exposure.

Q. And so you note -- made no independent determination about the relatedness of those conditions to the Camp Lejeune exposure; is that correct?

A. Correct.

Q. And so, for example, if you look at your Footnote 2 -- if Dr. Ji -- if he determined that prostate cancer was related to Mr. Cagiano's

Track 1 illness -- his Camp Lejeune Track 1 illness, you relied on Dr. Ji for that determination; is that correct?

A. Yes.

MR. ORTIZ: Objection to form and foundation.

A. Yes.

(By Ms. Butler)

Q. And so if Dr. Ji related prostate cancer to Mr. Cagiano's Track 1 illness, then you related prostate cancer to his Track 1 illness; is that correct?

MR. ORTIZ: Objection to form and foundation.

A. Yes.

(By Ms. Butler)

Q. Okay. And so if Dr. Ji were wrong in that determination, then the premise for your determinations would be wrong; is that correct?

A. Correct. If that one needed to be changed, then the calculations would be changed.

Q. Okay. Now, the next -- I'm still on page 2 under "Veterans Benefits Administration Compensation." The next sentence after the date that you note as being the date that Mr. Cagiano

started receiving benefits, the next sentence states "VBA benefits are based on Mr. Cagiano's combined disability rating, assigned by the VBA for various diagnoses."

Do you see that?

A. Yes.

Q. What do you understand about a combined disability rating? What does that mean?

A. When a person has more than one disability, the -- well, the VBA assigns a disability rating for the different conditions that they have. And when there's more than one, they combine them in a special way. It is -- they don't just add them together. They have a chart and that's how they figure out what the actual disability rating is that would then turn into their monthly benefit.

Q. Okay. And what chart are you referring to there? Is that a publically available chart?

A. Yes.

Q. Okay.

A. It's on my references.

Q. And that's why I handed you Exhibit 21. Is it on Exhibit 21? And it could also be attached to the back of your report. There are

other references there.

A. It's the one that starts "National."

Q. Okay.

A. Fourth line from the bottom.

Q. Okay. And so that is -- that National Archives and Records and Administration CFR combined ratings -- I'm guessing that should be "table" -- is that what you were relying on?

A. Yes.

Q. Okay. And so if an individual has different disabilities, is it your understanding that they necessarily have to add up to 100 percent, or can they add up to more than 100 percent?

MR. ORTIZ: Objection to form and foundation.

A. Once it's 100 percent, it's 100 percent. There's no more than 100 percent is my understanding. There are some other special monthly compensations that if they were awarded that would give a little bit of extra compensation.

(By Ms. Butler)

Q. So I'm going to give you a general example. If, let's say, if I -- this is just an

example. Let's say Mr. Cagiano had 100 percent disability rating, and he had various conditions, and his Track 1 bellwether illness was rated at 60 percent.

Would you assume that the other conditions are the remaining 40 percent?

MR. ORTIZ: Objection to form.

A. That's -- that's not really how it works. Each condition is assigned a different rating. And depending on how they are, they -- they get organized in highest to lowest. And if he was at 100 percent, then it doesn't necessarily mean 60/40. It would -- you'd have to take out the amount -- the rating for the related illness for Camp Lejeune and see what ratings were left and then follow the special chart in here.

(By Ms. Butler)

Q. And is that the methodology you used for these reports to determine the but-for calculation that we discussed at the beginning of your deposition?

A. Yes.

Q. Okay. That's what I was trying to get at is -- I wanted to understand the methodology

that you used to calculate -- and we'll get into some of the tables -- but the amounts that you allocated to the Track 1 Camp Lejeune illness versus other conditions.

Is there anything more to your methodology other than what you just explained?

MR. ORTIZ: Object to form.

You can answer.

A. Well, I don't know that that explained the full methodology, but it was -- all ratings together are what the Camp Lejeune ratings are -- or what they have with the Camp Lejeune disabilities -- or conditions.

And then I -- I guess this is what we said is -- you take those conditions out that are listed from Dr. Ji's report and then what are those ratings that are left and those are the non-Camp Lejeune ratings; so that's how we determine the disability rating from the chart.

(By Ms. Butler)

Q. That methodology you just described -- did you do that for each of these nine plaintiffs?

A. Yes.

Q. Okay. Did you personally do it?

A. Yes.

Q. Okay. So in the next sentence, where it says "Using VBA's disability ratings tables, I have calculated Mr. Cagiano's benefits due to increased disability ratings related to Camp Lejeune compared to what he would have received without these ratings," is that what you just described to me?

A. Yes.

Q. And that table that we looked at, the National Archives and Records Administration -- that's the table that you used -- that you refer to in the report?

A. Correct.

Q. Okay. In the next page of your report, which is page 3, you go on to state that "Mr. Cagiano's additional benefits received through December 31, 2025, due to increased disability ratings related to Camp Lejeune total 199,685," and you refer to Table 1.

Do you see that?

A. Yes.

Q. Is there anything more than that you did to get to that total other than what we just discussed?

MR. ORTIZ: Object to form.

A. No.

(By Ms. Butler)

Q. Okay. Going -- skipping the next paragraph, which is where you go through his current benefit and then you give a number stating what Mr. Cagiano would have received if he hadn't received Camp Lejeune -- skipping that paragraph, which refers to Table 2 -- do you see that?

A. Yes.

Q. Okay. Let's go to the next paragraph. Okay. Do you see where you say "assuming no other changes to his disability ratings"?

A. Yes.

Q. So is that an assumption that there would be no other changes to Mr. Cagiano's disability ratings -- is that an assumption that you made for each of these nine plaintiffs that there would be no changes to his disability ratings?

MR. ORTIZ: Object to foundation.

You can answer.

A. Yes.

(By Ms. Butler)

Q. And upon what do you base that assumption?

A. That there's no -- based on the information we have right now, I have no reason to assume that it would change.

Q. Now, in fact, when you were reviewing Mr. Cagiano's disability ratings, they had changed in the past; correct?

A. I believe so.

Q. And with respect to most of these plaintiffs, had their disability ratings changed over the time that you reviewed?

MR. ORTIZ: Objection to form and foundation.

A. I'd -- I'd have to look at each one. I don't know if they each changed or not.

(By Ms. Butler)

Q. And we can -- we can look at each one. Is it your testimony that it is reasonable to assume that there would be no changes to an individual's disability rating over time?

MR. ORTIZ: Object to form and foundation.

A. Yes.

(By Ms. Butler)

Q. And upon what do you base that testimony?

MR. ORTIZ: Objection.

A. That that is -- I have no reason to assume that it would change, and it's based on the facts that we sit here today.

(By Ms. Butler)

Q. Including the facts involving changes to ratings for a number of these plaintiffs?

MR. ORTIZ: Objection.

A. Yes.

(By Ms. Butler)

Q. So is it your opinion that no further changes will ever occur to these plaintiffs' disability ratings?

MR. ORTIZ: Objection.

A. No. That's an assumption made and if changes were made then -- then the changes will be made. But as we sit here today, we have no reason to assume they would go up or down, and it's based on what we know today.

(By Ms. Butler)

Q. So are all of your reports in this litigation premised upon the assumption that the government programs involved in your calculations

will continue in the exact same manner as they're operating at the present time including veterans disability benefits?

MR. ORTIZ: Objection to foundation.

A. Yes.

(By Ms. Butler)

Q. And are all of your reports in this matter premised upon the assumption that the care the plaintiffs need will continue to be covered by the government programs involved in your reports?

MR. ORTIZ: Same objection.

A. You're asking if the government will continue to pay for their medical needs? Is that what you're asking me?

(By Ms. Butler)

Q. So, for example, if you have calculated a future offset for Tricare medical expenses, are you assuming that Tricare will continue to provide for the plaintiffs' needs in the future exactly as they are now?

MR. ORTIZ: Same objection.

A. I think my answer is yes. I was confused because I think we changed topics. That

would be, like, for the life care plans and for Miller's analysis. Yes, it assumes that all the programs that were -- that are continuing -- that are paying for them now will continue in the future.

(By Ms. Butler)

Q. And with regard to veteran disability benefits -- and we'll -- we'll stick with that since that's where we are in the report, are you also making assumptions that the Veterans disability program will continue to pay at the same rates it's paying now?

MR. ORTIZ: Object for foundation.

A. Yes. And they'll actually increase each year for cost of living adjustments.

(By Ms. Butler)

Q. Okay. And so that was going to be my next question is you have made cost of living adjustments; correct?

A. Yes.

Q. Other than cost of living adjustments, is it correct to say that you have accounted for no other variables that could change with respect to a veteran's disability payments over time?

MR. ORTIZ: Objection.

A. Correct. The -- the -- the payments in this calculation are based on what they currently are receiving now.

(By Ms. Butler)

Q. So, for example, if the day after trial if a -- one of the Camp Lejeune plaintiffs were to develop a new illness that is not related to Camp Lejeune that caused a disability rating change, you have not accounted for that; correct?

A. Correct. That's -- we don't know that that would happen.

Q. And so if one of these plaintiffs were to -- if one of these plaintiffs were to develop an illness that was another Camp Lejeune related illness, you have not accounted for that either; correct?

MR. ORTIZ: Objection to form and foundation.

A. I have assumed no other changes. And if they received additional ratings, you know, their benefit may not change. It may stay where it is. If they get reduced, it could change. We don't know, as we sit here today; so we base it off what we know today and that's what the calculations are.

(By Ms. Butler)
Q. And, for example, are some of the calculations based on the veteran having a spouse who's living?
MR. ORTIZ: Objection.
A. Yes. Some of them have a spouse.
(By Ms. Butler)
Q. And so you haven't made any accommodation for the possibility that a spouse might pass; is that correct?
MR. ORTIZ: Object to foundation.
A. I'm -- I recall reviewing the life expectancies of the spouse and made sure that the plaintiffs were -- had a longer life expectancy. But if they were to pass away before them then it would reduce their benefit.
(By Ms. Butler)
Q. Okay. And that analysis of the spouses is not set forth in your report; is that correct?
A. No. It was a review.
Q. Okay. Going in that same paragraph where it says "Assuming no other changes to his disability ratings" -- do you see that paragraph I'm talking about?
A. Yes.

Q. Okay. Now, the next assumption is an assumption of an -- a life expectancy.

Do you see that?

A. Yes.

Q. You say Mr. -- "Assuming no other changes to his disability ratings, Mr. Cagiano will continue to receive these additional benefits through his life expectancy."

Do you see that?

A. Yes.

Q. Okay. That's what I was referring to. And so for each of these plaintiffs, have you calculated a life expectancy?

A. Yes.

Q. And that is an assumption that you have made as well; correct? That they will live until their life expectancy or longer?

A. Yes, and I -- I did not calculate it. I used it from the national statistics report.

Q. And so, for example, if one of the plaintiffs were to pass before their life expectancy they would not receive the benefits that you have calculated into the future; correct?

MR. ORTIZ: Object to form.

A. Correct. But again if they live longer than their average life expectancy, it could be higher.

(By Ms. Butler)

Q. And, in fact, given the tables you've used, half of the people would probably die before and half later; correct?

MR. ORTIZ: Objection.

A. It is an average life expectancy that does consider diseases in all people; so it's an average life expectancy.

(By Ms. Butler)

Q. And are there any other assumptions that you have made with respect to your calculations other than what we've just gone over?

A. The -- the cost of living adjustments --

Q. Okay.

A. -- as well.

Q. Okay. And going further down in Mr. Cagiano's report, you next have a summary paragraph.

Do you see that?

A. Yes.

Q. Okay. And if you look at that summary where you have your table -- you know what I'm

referring to in that table?
A. Yes.
Q. Okay. And you have offsets and then you have past medical care, and you have a number of 35,447.
Do you see that?
A. Yes.
Q. Now, you didn't calculate that number; correct?
A. No.
Q. You got that from Dr. Ji; correct?
A. Correct.
Q. And so by putting it in your report, you're just repeating what you're relying on Dr. Ji to have calculated correctly?
MR. ORTIZ: Objection.
A. I'm relying on him to provide me the past medical care offset number.
(By Ms. Butler)
Q. Okay. And are you taking an opinion with respect to how that offset should be applied?
MR. ORTIZ: Objection.
A. No.
(By Ms. Butler)

Q. Okay. And by putting it in the same table with VBA disability benefits, are you taking a position that the VBA disability benefits should in any way be applied against medical care?

MR. ORTIZ: Objection.

A. No. Again, I have no opinion about how they are applied.

(By Ms. Butler)

Q. Okay. And looking further at that chart, you have the past VBA disability benefits. Would it be accurate to say that those are the disability benefits that you have attributed to Mr. Cagiano's Track 1 Camp Lejeune illness?

A. Yes.

Q. And then as far as the future, that is the number that you have projected out that he would receive assuming his -- the life expectancy and assuming no other changes to his disability ratings based on his Camp Lejeune Track 1 illness?

A. Correct.

Q. Okay. And other than your calculation of those VBA disability benefits, is the rest of that table just math?

MR. ORTIZ: Objection.
(By Ms. Butler)
Q. I mean, you -- you've just added the total to get --
A. Yes.
Q. -- 618,951; correct?
A. Yes.
Q. Okay. There's nothing special that I'm missing there?
A. Correct.
Q. Okay. I just wanted to make sure.
Okay. So, again, you've assumed that Mr. Cagiano would remain eligible to the same extent he is now for veterans disability benefits; correct?
A. This calculation assumes that, yes.
Q. Okay. And are you aware that a sustained improvement of a disability can cause a reduction in the amount of a disability benefit?
MR. ORTIZ: Object to form and foundation.
A. I do not -- I'm not aware of how they are -- provided the ratings, the VBA.
(By Ms. Butler)
Q. Did you note that reduction of

disability benefit for a sustained improvement of a disability during your review of any of the plaintiffs' disability ratings?

MR. ORTIZ: Objection to form and foundation.

A. Did I note that -- I don't -- I don't know where they were in their care for the illnesses, if that's what you're asking.

(By Ms. Butler)

Q. Well, did you see any examples of where, say, for example, a veteran was assigned a 100 percent disability rating for his Camp Lejeune illness and then after some time it's reduced to less than 100 percent?

A. Yes, I have seen that.

Q. Did you make note of what caused that reduction in percentage disability rating?

A. No.

Q. Okay. And did you make note of how other illnesses impacted any reductions in those disability ratings?

MR. ORTIZ: Object to form.

A. No. I do not know how any change in illness affects the disability ratings.

(By Ms. Butler)

Q. Okay. And so those were not things you took into consideration in making your projections for future disability payments; correct?

MR. ORTIZ: Object to form.

A. Correct. It was based on his actual disability ratings at the time of this report.

(By Ms. Butler)

Q. Okay. So I want to turn now to your tables, just to make sure -- and as you've probably noted, I'm using Mr. Cagiano to try to understand your methodology for the plaintiffs as a whole.

So turning to your tables, can you explain to us what Table 1 represents.

A. Table 1 represents the total VBA benefits received and projected to receive, both with the Camp Lejeune related conditions and without the Camp Lejeune related conditions and the differential of those calculated to present day value.

Q. So I think this is clear but just to make sure I'm understanding correctly, if you look at Table 1 and you see the column that says "VA benefits with CLJA" -- do you see that?

A. Yes.

Q. Is that intended to represent the VA benefits, the veterans disability benefits that Mr. Cagiano is receiving for his Track 1 bellwether illness in the Camp Lejeune litigation?

A. It is what he's totally receiving now with -- that includes those ratings.

Q. That includes those ratings. And then the next column which is "VA Benefits Without CLJA," is that the but-for analysis?

A. Correct. Had he not had those conditions that Dr. Ji noted, I calculated what his benefits would have been anyway.

Q. And what did you use to calculate those? Is that the chart that we referred to earlier, the table?

A. Yes. The chart -- the chart we referred to earlier provides the ratings, and then there's an additional chart. They have every monthly historical compensation amount based on ratings published and that's where the numbers came from.

Q. And is that -- where is that chart referred to?

A. It is right there in --

Q. Is it the next chart?
A. -- ratings and -- yeah, right. Compensation rates -- rate tables.
Q. So we're looking at Exhibit 21. It's the US Department of Veterans Affairs compensation and rate tables?
A. Correct.
Q. Okay. So that chart is what you used to calculate the numbers on Table 1; is that correct?
A. Yes.
Q. Okay. And then you have a column that says "Excess Benefits for CLJA."
Do you see that?
A. Yes.
Q. How did you calculate that column?
A. That is the first column minus the second column.
Q. Okay. And then the "Present Value" column -- is that the present value of the number reflected in the excess benefits for CLJA?
A. Yes. And that only applies to future calculations discounted back to today.
Q. And so are there any other tables or charts, other than the two we've referred to on

Exhibit 21, that you used to calculate the numbers on your Table 1?

A. I don't think so.

Q. Okay. And, again, the information that you obtained -- those numbers came from the disability ratings that you were provided by the Department of Justice?

MR. ORTIZ: Object to form.

A. They provided the documents from the VBA that provided those ratings, but, yes, the documents came from the DOJ.

(By Ms. Butler)

Q. Okay. I want to turn to Table 2, just to understand how you compiled Table 2.

Can you explain to us what Table 2 is intended to represent.

A. These show you what the ratings are for each year and the effective date with and without the Camp Lejeune rating related conditions. So you would take -- you could look at these percentages and go to the compensation tables and get the monthly amount.

Q. So looking at this, you have "CLJA rate."

Do you see that?

A. Yes.
Q. And then you have "No CLJA rate" and then you have "Variance."
Do you see that?
A. Yes.
Q. So what does the variance represent?
A. It's the differential. The CLJA rate which includes all ratings minus the no CLJA rate.
Q. So I guess what's confusing me is -- is the first rate where it says "CLJA rate" -- actually CLJA and not CLJA?
MR. ORTIZ: Object to form.
A. It -- it's really should say maybe "with CLJA." So...
(By Ms. Butler)
Q. Yeah.
A. It's because it's all -- it's total.
Q. Yeah.
A. Okay. That's what I was trying to get at.
Q. So -- so the "CLJA Rate" column is really the total of all the disability benefits that the individual is receiving?
A. At that date, yes.

Q. Okay. And then the "No CLJA" is what you're subtracting out to get the variance; is that correct?

A. Yes.

Q. And the variance -- is that what you attribute to the CLJA --

A. Yes.

Q. -- illness? Okay.

And then "Annual" -- is that just times 12?

A. Yes.

Q. Okay. Can you tell me -- you have an asterisk for the SMC 48 S and K-1, which are special monthly compensation rates. What is your understanding of those rates and what they are for?

A. Sorry. That -- that annual number is not times 12. When I was looking at that, I -- I just said that because it's -- it's for the rest of that -- that time period. So if you look at the effective dates -- I apologize -- do you see, like, March 1 to --

Q. Yes.

A. -- July 1?

Q. Yes.

A. Then that would account for just that time period.
Q. For the four months?
A. Yeah.
Q. Okay. Okay. So from March 1st, 2018, to 7/1 --
A. Would be that.
Q. -- 2018?
A. Yeah.
Q. Okay.
A. So if you look lower, you'll see one's -- like, $500. That one's a little bit easier to follow. It's just times three kind of.
Q. Okay.
A. The $1600. Sorry.
Q. No. Thank you for --
A. -- questioning as I was --
Q. -- correcting me. Yes.
A. -- looking at that.
THE STENOGRAPHER: One at a time, please.
THE DEPONENT: Thank you.
(By Ms. Butler)
Q. So I had asked about the SMC 48 S and K-1 asterisk. Can you tell me what you

understand those special monthly compensation rates to be for?

A. Yes, the S -- the 48 S that is when you have 100 percent disability rating plus an additional -- I believe, it was over 60 percent if there's a second disability rating above 100 percent. I think you mentioned that earlier today.

The K-1 is when you -- is an additional monthly compensation for losing an organ or losing the use of a certain organ.

Q. And how did you account for those special monthly compensation rates in your Table 2?

A. They're from the rating tables.

Q. So again --

A. There's --

Q. Sorry. Referring to Exhibit 21, they're from the tables we looked at?

A. Yes.

Q. Okay. And so as far as your treatment of the special monthly compensation rates, you treated them however the two tables that we referred to on your Exhibit 21 indicate?

A. Correct.

Q. And is that math indicated on this Table 2?

A. It's -- it's in there. If you go to the rating tables, you'll -- you'll take the 100 percent plus the S plus the K-1 and add the three together in there.

Q. And how did you determine if the S and the K-1 were Camp Lejeune related or not?

A. I don't know. That might be if it were -- it must have had to code -- the code that Dr. Ji had supplied.

Q. Okay. So turning now to Table 3 -- and Table 3 covers two pages -- can you tell me what Table 3 is intended to represent.

A. This is a summary of the VBA documents that provide the different diagnosis codes and descriptions and ratings that they were given.

Q. So when you have referred to previously in your deposition about the -- I forget how you put it -- the documents in the system that you were looking at, is this a summary of those documents?

A. Documents from the VBA that we obtained, yes.

Q. Okay. So looking at Mr. Cagiano, if you

look at Table 3, page 1, and you start down at the bottom, which is March 1 -- sorry. Are you with me?

A. Yes.

Q. And if you want to take those apart, feel free.

A. I don't want to mess with your official exhibit.

Q. Okay.

A. It's fine. It's good. I'm just looking at a few pages at once.

Q. So I'm looking at Table 3 and -- and at the bottom it shows "Original Award, March 1, 2018"; right?

A. Yes.

Q. And that's consistent with the date you put in your report as the date that you indicate he first started receiving benefits from his Track 1 Camp Lejeune injury; correct?

A. Correct.

Q. Okay. And you look at original award and it says "100 percent."

Do you see that?

A. Yes.

Q. Okay. And then if you go up and you see

on 5/1/2019 it says "Compensation Rating Adjustment."

Do you see that?

A. Yes.

Q. And he fluctuates down to 40 percent?

A. Correct.

Q. And is that a fluctuation for the same disease that he was awarded the 100 percent for?

MR. ORTIZ: Objection to foundation.

A. It does appear that way, yes.

(By Ms. Butler)

Q. Okay. And then you go to 8/1/2019 and you see an 80 percent.

Do you see that?

A. Yes.

Q. And is that for the same disease for which the original award was made on 3/1/2018?

MR. ORTIZ: Same -- same objection.

A. These are the combined ratings; so it's not that simple. But there was a change in that diagnoses code related to it -- the same Camp Lejeune related diagnoses.

(By Ms. Butler)

Q. So for Mr. Cagiano, within just that one

year and five-month period, he went from 100 percent to 40 percent to 80 percent; correct?

MR. ORTIZ: Objection.

A. For all his diagnosis codes, it appears that way, yes.

(By Ms. Butler)

Q. Were those all of his diagnosis codes that you related to his Camp Lejeune Track 1 injury?

MR. ORTIZ: Objection.

A. No. I did not relate them. Dr. Ji said which ones were related. But it's -- remember it's a combined rating table. So the -- it's based on a few different ratings from different items that were not all Camp Lejeune related.

(By Ms. Butler)

Q. Okay. So let's look at the second table on -- for Table 3, which is on page 2 of 2.

Do you see that table?

A. Yes.

Q. Okay. So if you -- if you go down to -- I'm starting from the bottom -- and you see on 2/23/2018 there's a diagnostic code of 7500 for papillary urothelial carcinoma.

Do you see that?

A. Yes.
Q. Okay. Do you understand that to be his bladder cancer?
A. I -- I don't know exactly what that is. But I assume that's what that is. I just know that that's a related condition.
Q. Okay. But the diagnostic code is 7500; correct?
A. Yes.
Q. Okay. And it says papillary urothelial carcinoma with some other language; correct?
A. Yes.
MR. ORTIZ: Object to form.
(By Ms. Butler)
Q. And it has a percentage of 100 percent.
Do you see that?
A. Yes.
Q. Then if you go up and you look for that same diagnostic code, you see it again on 5/1/2019.
Do you see that?
A. Yes.
Q. Okay. And it has the same diagnostic code of 7500; correct?
A. Correct.

Q. And it has the same language, papillary urothelial carcinoma with the rest of the language; correct?

A. Correct.

Q. And do you see that it has a percentage of 30 percent?

A. Yes.

Q. And then if you go up and you look for that diagnostic code again, and you see it again, 7500 on 7/19/2019.

Do you see that?

A. Yes.

Q. And it has the same papillary urothelial carcinoma; correct?

A. Correct.

Q. And it has the percentage at 60 percent?

A. Correct.

Q. So am I not correct that Mr. Cagiano, in about a year and a half time frame, went from 100 percent to 30 percent to 60 percent for the same diagnostic code?

MR. ORTIZ: Object to form.

A. Yes. And as you can see from the table before the different ratings than the other one. That's why this one explains that one specific

code a little bit better but, yes, they did fluctuate.

(By Ms. Butler)

Q. Yet your projections into the future for Mr. Cagiano assume that no such change in his percentage will ever occur again; correct?

MR. ORTIZ: Objection.

You can answer.

A. Based on this it assumes it would be at that, I guess, 60 percent, yes.

(By Ms. Butler)

Q. And so, again, to ask: You're assuming that there will be absolutely no changing -- no changes ever again with respect to his disability ratings in the future --

MR. ORTIZ: Object to form and asked and answered.

(By Ms. Butler)

Q. -- is that correct?

A. Yes, my calculations --

Q. Okay.

A. -- are based on what we have today. I cannot assume a change in the future unless there's a specific medical -- someone to tell me that it's going to change.

Q. And looking again at that second page of Table 3. If you go up to the top of that chart, in fact, the last entry in your table is for a diagnostic code 7528; correct?

A. Yes.

Q. And so that diagnostic -- diagnosis description is prostate cancer; correct?

A. Yes.

Q. And he -- under the percentage it says 100 percent; is that correct?

A. Yes.

Q. And that occurred with an effective date according to your chart of August 10, 2022; correct?

A. Correct.

Q. And so whereas on 2/23/2018 Mr. Cagiano had a 100 percent percentage rating for papillary urothelial carcinoma. By 8/10/2022 he had a 100 percent disability rating for prostate cancer; correct?

A. Correct.

Q. And is it your understanding that prostate cancer is a Track 1 illness for which Mr. Cagiano is seeking recovery in this litigation?

MR. ORTIZ: Objection.

A. I believe according to Dr. Ji's report, it is related.

(By Ms. Butler)

Q. And so just, for example, I'm going to ask you to make an assumption. Let's assume that prostate cancer was not a Track 1 illness for which Mr. Cagiano was seeking recovery. If that were the case, then it would be -- would it be your determination that none of his future disability benefits would be for his Camp Lejeune Track 1 illness?

MR. ORTIZ: Objection to form and foundation.

A. No. There are a few different codes that are considered related. So you would take out that 100 percent and still recalculate his combined disability rating based on what was left.

(By Ms. Butler)

Q. And do you know how that would impact your analysis if you did that?

A. It would change.

Q. Okay.

A. I don't know what it would be, as I sit

here right now.

Q. So if a veteran that you have calculated future disability benefits for were to contract an illness that is service related but not the illness for which they're seeking recovery in the Camp Lejeune litigation, it would change your future calculation; correct?

MR. ORTIZ: Object to form and foundation.

A. Yes.

(By Ms. Butler)

Q. Okay. So one of the other things I'm going to ask you to explain -- and, again, I'm trying to use Mr. Cagiano as exemplary for some of the other reports -- is if we look at the second page of Table 3, and then I'm going to ask you to go back to Table 2. I'm trying to understand how these are -- these changes in Table 3 are reflected in Table 2.

So, for example, if you start on Table 2 and you start with 3/1/2018 and you have 100 percent, which I understand is the total disability rating; correct?

A. Yes.

Q. Okay. And we look back at Table 3, the

second page -- in fact, are you referring to the 100 percent disability rating on 2/23/2018 for the papillary urothelial carcinoma or something else?

A. Yes, that's correct.

Q. Okay. Did you just round up to the next month?

A. No. VBA benefits are effective the first of the month --

Q. Okay.

A. -- following their effective date.

Q. Okay. So that 100 percent that we start with in Table 2 is reflected by that entry on 2/23/2018 in your Table 3; correct?

A. Correct.

Q. Okay. Then we go up and if you -- we looked at this -- and the next entry for the diagnostic code 7500, the papillary urothelial carcinoma is reduced to 30 percent.

Do you see that?

A. Yes.

Q. And, in the meantime, it looked like right below it, there was another condition for which Mr. Cagiano received disability; is that correct?

A. Yes.
Q. And that's the tinnitus?
A. Yes.
Q. At 10 percent?
A. Yes.
Q. Can you show me how those are reflected in your Table 2.
A. Yes. So you should really look at the first page of Table 3, and that shows you the combined ratings of each one. So if you look at May 1, 2019, you'll see that it's at 40 percent. So what you would do is his -- so at that date, he had two ratings of 30 percent and a 10 percent and when you look at that combined -- in this situation, it looks like you just add them together, but that's not really what you do.
You look at this combined ratings table and you go down one side of it and you go over to the other. You go down the 30 percent and you go over to 10 and you grab that number. And it was -- I'm going to guess, it was probably like 38 percent and it rounds; so it would be 40.
Q. Okay. And then if you look at Table 2, again that heading really should be total -- right? -- at 40 percent?

A. It -- yes. This should be what he's actually receiving compared to the but-for. Had it not occurred, what he would have received.

Q. Because the CLJA rate would actually be 30 percent, not 40 percent; is that correct?

A. Correct. So this is calculating all what he's actually totally getting versus what he would have gotten without those ratings.

Q. So in all of your Table 2s, would it be more accurate to label that where it says "CLJA rate total" --

A. Sure.

Q. -- to avoid confusion?

A. Sure.

Q. Okay. I just wanted to make sure I was reading that correctly.

And then, again, just to make sure I'm understanding your tables correctly, we looked at the diagnostic code 7500, which changed to 60 percent on 7/19/2019. Can you show me where that is reflected in Table 2?

A. That would -- when it goes up to 80 percent on August 1 because it's the first of the month of the following month.

Q. And, again, that's his total combined

rate?

A. It is combined; so it would be the 60 and the 30 and the 10 based on the -- the combined rate in the table.

Q. And that's the 60 for the papillary urothelial carcinoma, the 30 for the total right knee replacement, and the 10 for the left knee arthritis?

A. Yes. And there -- it looks like there's also -- did you say tinnitus?

Q. The -- I don't know if I'm pronouncing that correctly, but...

And so those are reflected in your Table 2 under the column that would be more accurately stated as the total combined rate?

A. It would be the total with the CLJA --

Q. Okay.

A. -- rates.

Q. Okay.

MR. ORTIZ: Is now a good time for a break?

MS. BUTLER: Yeah.

MR. ORTIZ: We've been going for about an hour.

MS. BUTLER: Yes, that's fine.

THE VIDEOGRAPHER: All right. Time is now 2:24. We're off the record.

(A recess was taken.)

THE VIDEOGRAPHER: Time is now 2:35. We're back on the record.

(By Ms. Butler)

Q. We just went through the report of Mr. Cagiano, which is Exhibit 20. Do you intend to render any opinions with respect to Mr. Cagiano beyond what is set out in your report?

MR. ORTIZ: Object to form.

A. No. Not at this time.

(By Ms. Butler)

Q. Now, you previously provided a report on Mr. Cagiano back in, I think it was April of 2025. Do you recall providing a prior report?

A. Yes.

Q. And do you recall that at that time, Dr. Ji was not involved in the litigation or at least had not provided a written report?

A. Correct. Yes.

Q. And so for the pieces that we went over in Mr. Cagiano's report that you relied on Mr. -- Dr. Ji for, do you recall what you relied on in

your last report?

A. There were some documents provided, but I don't know exactly, as we sit here.

Q. Are those documents identified either in the attachment to your Exhibit 20 or in Exhibit 21?

MR. ORTIZ: Object to foundation. You can answer.

A. Yes, I'm pretty sure -- I can't look at this and tell you which documents, but I believe they're encompassed in the Bates documents.

(By Ms. Butler)

Q. And so, for example, for the relatedness determinations that you indicate in your Footnote 2 that you relied on Dr. Ji for, how did you make those determinations before you had Dr. Ji to rely upon?

A. In the preliminary report, counsel told us which rates -- which codes to use.

Q. Is there a written document that provided those assumptions for you?

A. No, I don't think so.

Q. So how did you remember as you were going through all of these reports what assumptions you were to make on relatedness?

MR. ORTIZ: Objection.

A. I -- it was probably part of the -- when we did the calculations. I -- I can't tell you as I sit here.

(By Ms. Butler)

Q. Okay. But you relied on assumptions provided by counsel in your earlier report, and you have replaced those assumptions with Dr. Ji's relatedness determinations in the current report; is that correct?

A. Yes.

Q. And I'm sorry. I have no further question on that.

Okay. I am going to move to Mr. Criswell.

MR. ORTIZ: We're done with Cagiano?

MS. BUTLER: Yes.

(By Ms. Butler)

Q. And so I am going to hand you what we marked as Exhibit 22, which is your expert report for Mr. Criswell and Exhibit 23, which is your Materials Considered List for Mr. Criswell.

(Exhibit Number 22 was marked.)

(Exhibit Number 23 was marked.)

(By Ms. Butler)

Q. Now, turning to page 2, we discussed the assignment provision under the Cagiano report and discussed that the professional consulting services were the services referred to in the scope of work exhibits. Is that again consistent for all of these reports?

A. Yes.

Q. Okay. I'm not going to ask you that again unless there's any report that that would change for.

A. Okay.

Q. Is -- is there any report that your scope of work was different than as we've already discussed?

A. They should all have that same sentence.

Q. Okay. And I noted, in comparing these nine reports, that they are all organized in a -- the same manner; is that correct?

A. Yes.

Q. And so did you have kind of a form that you used for these nine reports and that you followed for each of them?

A. Yes.

Q. And we noted previously that there were

a lot of people involved in Forvis Mazars's work on these reports. So looking at Mr. Criswell's report here as Exhibit 22, are there any parts of this report that you relied on others to prepare?

MR. ORTIZ: Objection to form and foundation.

A. I had some of the staff members input the early, like, maybe the first two or three paragraphs and, like, the final compensation and restrictions and any generic information.

(By Ms. Butler)

Q. Is there anything else in the reports that you did not personally prepare?

A. No.

Q. So looking at Mr. Criswell specifically, which is Exhibit 22, we go down to the "Introduction," and it says "The purpose of this analysis is the following" -- do you see where I am?

A. Yes.

Q. It says, first bullet point: "Evaluate alleged damages as presented in Plaintiffs' expert report prepared by Chad Staller, J.D."

Do you see that?

A. Yes.

Q. And then second bullet point: "Determine the present value of any offsets to a potential award."

Do you see that?

A. Yes.

Q. Is that the scope or the extent of the analysis you prepared for Mr. Criswell?

MR. ORTIZ: Object to form.

A. Yes.

(By Ms. Butler)

Q. Okay. Now, going down to the next heading, it says "Staller Report."

Do you see that?

A. Yes.

Q. And it refers to household services.

Do you see that?

A. Yes.

Q. And you refer to a report by Chad Staller; is that correct?

A. Yes.

Q. Okay. And going to the next page, the top sentence on page 3 says "While I do not take issue with the sources used in Staller report, the illustrative calculations provided are unsupported and misleading."

Do you see that?

A. Yes.

Q. Okay. So I want to understand that sentence better.

Am I understanding correctly that you don't take issue with the method Mr. Staller used to calculate the one hour of lost household services; is that correct?

MR. ORTIZ: Object to form.

A. Correct.

(By Ms. Butler)

Q. Okay. What I understand you take issue with is the fact that he did not apply that one hour and calculate it out to make a final calculation as to the number of household services that should be considered in the case; is that correct?

MR. ORTIZ: Object to form.

A. Partly, yes. He -- he's assumed at least one hour a week or all hours per week.

(By Ms. Butler)

Q. Okay. So you said "partly." Can you explain better than I did what your criticism of Mr. Staller is.

A. It was just because you said that he

didn't multiply one hour by something, well, it could have been subtracting it. I meant to say that he assumes that he had one hour a week of losses from 1997 through 2025. So there was at least one hour per week. There could have been times where there were zero hours per week or, again, there could have been more hours per week.

I'm stating he didn't provide an opinion on that, and he didn't have a basis for providing an -- any of this, if there's a loss at all. And in the second scenario, he provided statistical data on the average person and Mr. Criswell's situation, I guess, age and retirement, that sort of thing -- again, I don't take any issues with the sources. I use similar sources. But Scenario 2 assumes that he can't do anything into the future. And I don't see his basis for that calculation.

Q. Have you been involved in cases where either you or other experts have testified as to lost household services?

A. Yes.

Q. And in your experience, is there usually testimony at trial upon which a fact finder makes a determination about the loss of household

services?

MR. ORTIZ: Object to foundation.

A. My experience is that me or other experts -- excuse me -- other experts or I will provide an opinion and the trier of fact hears that opinion and whether they agree with me or the other expert, those are the opinions.

(By Ms. Butler)

Q. And so is it your testimony that you, as an expert, opine as to the household services that someone could or could not have performed as opposed to a fact witness such as the plaintiff or the plaintiff's spouse?

MR. ORTIZ: Object to form.

A. I -- I do not judge them or look at -- evaluate what they can and can't do based on the statistics similar to here but make it personalized for the actual plaintiff. I calculate a damage amount for that.

(By Ms. Butler)

Q. So you calculate a damage amount, but, in fact, isn't it dependent upon what evidence is allowed at trial as to how many hours might be determined to have been lost or not lost for household services?

MR. ORTIZ: Object to foundation.

A. I don't know what's admitted in trial, legally or whatnot, but as part of my file, I include loss of household services. And I don't put a blanket number. I actually calculate in the loss based on interviewing the -- the plaintiff and in -- as well as look at the statistics.

(By Ms. Butler)

Q. Okay. Do you understand your role as an expert witness in a case, either in this case or other cases, to be serving as the role of a fact finder?

MR. ORTIZ: Objection.

A. I am providing an opinion based on facts.

(By Ms. Butler)

Q. And are those facts determined at the trial based on your opinion or based on the testimony that fact witnesses give at the trial?

MR. ORTIZ: Objection.

A. Again, I -- I -- I guess it's based on the fact witnesses. But I prepare my report based on the fact witnesses, and my opinion here as you asked, is that he didn't do that. He just

provided a generic number and didn't apply it to, specifically, the plaintiff in his report.
(By Ms. Butler)
Q. Okay. And so, again, your criticism is that he didn't try to serve as fact finder and determine the number of hours to be applied to the calculation, and it's the calculation you have no problem with; it's him not taking the role of fact finder; is that correct?
MR. ORTIZ: Objection.
A. No.
(By Ms. Butler)
Q. Okay. Can you explain it to me.
A. He didn't -- he provided a random number in his report.
Q. How is it random when you say that you don't have a problem with the statistical data?
A. He provided the same number in every report, and it's not specialized to each specific plaintiff. The only thing he did was make it local to each area that they lived in.
So he has provided a scenario where there's one hour per week -- let's -- let me make sure I said that correct -- per week lost over a 28-year period, when I don't have -- I don't see

where he's provided a basis for even saying that there's a one hour per week loss there. That's what I'm saying.

And then he's providing a scenario where he can't do anything for the rest of his life. And when I think there -- I didn't see anything that stated that where he got that opinion from -- that he couldn't do anything. And I believe we see in his deposition that he wasn't claiming lost household services.

Q. So let me ask it this way: If at the end of a -- the trial, the Court or jury were to determine a number of hours that Mr. Criswell was unable to perform household services, am I correct that you don't take issue with the calculation that Mr. Staller provided to apply to that determination?

MR. ORTIZ: Object to form.

A. Correct.

(By Ms. Butler)

Q. Okay. I'm going to move now down to your "Opinions & Basis," and under "Offsets," again, you have "Past Medical Expense." And we went through this with Mr. Cagiano, and I just want to make sure that, again, and for all of

these reports in this past medical expense paragraph, you're relying on the report of Dr. Ji for all of that information; is that correct?

MR. ORTIZ: Object to form and asked and answered.

A. Yes.

(By Ms. Butler)

Q. And so in this instance, Dr. Ji, you state, determined that there were no government agencies that had provided healthcare benefits. And so you are just -- I guess, didn't go back to make sure that determination was correct. You're relying on Dr. Ji for that information?

MR. ORTIZ: Same objection.

A. Correct.

(By Ms. Butler)

Q. Okay. Now, going down to VBA, is the methodology and the manner in which you made your calculations similar to what we just went through with Mr. Cagiano?

A. Yes.

Q. Okay. And so the information, for example, about when Mr. Criswell began receiving benefits came from the documents that you were provided that are VBA documents?

A. Yes.

Q. Okay. And then as far as how you made your calculations that are reflected in this section, we went through the different tables in Mr. Cagiano's report, and you did the same thing here applying Mr. Criswell's information. Is that accurate?

A. Yes.

Q. And is that true for all of these nine plaintiffs so I don't have to go through in painstaking detail?

A. Yes.

Q. Okay. And just as we referred to those two statistical items, the National Archives and the US Department of Veterans Affairs compensation and pension rate tables, which you relied on for Mr. Cagiano -- if you look at Exhibit 23, which is your Materials Considered List for Mr. Criswell, you have those same two resources noted there as well; correct?

A. Correct.

Q. Are there any other additional tables that you relied on for Mr. Criswell that we didn't discuss with Mr. Cagiano?

A. No.

Q. Okay. So going through, again, the Veterans Benefits Administration compensation and turning to page 4, the first full paragraph, again, says "assuming no other changes to his disability ratings."

Do you see that?

A. Yes.

Q. So we went through with Mr. Cagiano that you made various assumptions including that Mr. Criswell's disability ratings will not change ever again in the future and that's an assumption you made here as well; correct?

MR. ORTIZ: Object to form.

A. Yes.

(By Ms. Butler)

Q. Okay. And you also assumed the annual cost of living adjustment; correct?

A. Yes.

Q. And you applied a life expectancy; is that correct?

A. Yes.

Q. And so other than the cost of living adjustment, you are assuming that nothing will change with respect to Mr. Criswell's conditions, his ratings, the amounts to be paid for those

ratings, or other criteria pertaining to his veterans disability benefits will change in the future; is that correct?

MR. ORTIZ: Object to form.

A. Correct. These are based on today's rates -- ratings.

(By Ms. Butler)

Q. Okay. And going to your summary for Mr. Criswell, it says "Based on the scope of work performed in connection with this matter as well as my professional experience and education, it is my opinion that the present value of potential offsets to any award in this matter is $1,106,904."

Do you see that?

A. Yes.

Q. And, in fact, for Mr. Criswell that is the total of the past and future VBA compensation benefits that you calculated in Table 1; is that correct?

A. Yes.

Q. Okay. And, again, it's my understanding you're not opining as to how those offsets should or should not be applied. You're just calculating the amount; is that correct?

A. Correct.

Q. Okay. And so if we go down to the tables, and you look at -- sorry. I think it's probably easier to look at Table 3.

So if you look at Table 3, and you start at the bottom, which is 1/11/2012 and you see a diagnostic code of 7528 for bladder cancer with residuals at 20 percent.

Do you see that?

A. Yes.

Q. And then would you agree that Mr. Criswell's percentages during the nine-year period that's reflected in that table on page 2 of 2 at the -- the Table 3, the second -- that bottom table down there -- I don't know how to describe it. It's on page 2 of 2. It's the second table on there?

A. Yes, these are his actual rating decisions.

Q. Okay. So the nine-year period that's reflected there, he went from 20 percent for bladder cancer with residuals and then 30 percent to unspecified depressive disorder with anxious distress and then, again, that tinnitus for 10 percent like Mr. Cagiano had.

Do you see that?

A. I do see that.

Q. Okay. And then do you see on 8/21/2017, there's an increase to 100 percent for unspecified depressive disorder with anxious stress?

A. Yes.

Q. And then on 11/1/2021, there's bladder cancer with residuals at 20 percent?

A. Yes.

Q. Okay. So looking at that chart, if you look at just the dates 1/11/2012, he has 20 percent for bladder cancer, 10 percent for tinnitus, and another 10 percent entry for tinnitus. Can you show me how all of that is reflected on your Table 3.

A. So that would be January 11th, 2012 --

Q. I'm sorry. On your Table 2. I'm sorry.

A. Uh-huh. So that -- that combined rating -- let's see here -- it would be starting February 1, 2012. So you've got a 20 percent and a -- and two 10 percents. That equals 30 percent.

Like I said, it's not straight math. It's based on off of the -- the rating tables; so

you -- what you would do is you take the highest percentage first, which is the 20 percent; and you'd go down the left side of that combined rating table; you'd go over to 10 percent, you'd grab whatever rate that was, say it's 22, and then you would take 22 from that left side of the table and go over 10 percent again. And I'm going to guess it's like 28, 29 percent and that rounds up to 30.

Q. Okay. And, again, that "CLJA Rate" column should be total combined --

A. All --

Q. -- rate?

A. -- rates, yes.

Q. And so then Mr. Cagiano, if you look at your Table 2, you see that in 2014, on 4/1/2014 -- sorry. This is Mr. Criswell. Did I say Mr. Cagiano?

MR. ORTIZ: Yes.

(By Ms. Butler)

Q. Mr. Criswell, on 4/1/2014, you have the total rate column, which is labeled "CLJA Rate," but it's total rate. You -- you have it going up to 100 percent; correct?

A. Yes.

Q. Okay. Can you show me where that is reflected on this table we were looking at, at Table 3?

A. This unfortunately -- when I went to review this I saw that these were missing. There was a -- in that time frame, it would have been -- there was a -- we have the 11/2012 and then -- yeah, April 1st, 2014, there was 100 percent rating given that is not listed on here.

Q. And do you know what that diagnostic code was or what the diagnosis description is?

A. I did not note it -- I -- when I reviewed it. I know it's one of the related Camp Lejeune diagnosis conditions, but as I sit here right now, I cannot tell you. I can provide an updated Table 3 for you after the deposition to show that amount.

Q. And your Table 2 also shows an 8/1/2014 and a 12/1/2014. Are those all missing as well?

A. There's the 8/1/2014 was just a change because there was no child, I guess. And then 12/1/14 -- let's see here -- it could. Like I said, when I looked at this I was -- I saw that as well and was, like, why aren't they matching

up? And it was a -- some hidden cells on Excel when this got printed.

Q. Okay. So is it your intention to update these tables for Mr. Criswell's report to reflect missing information?

MR. ORTIZ: Object to form.

You can answer.

A. I can. The information is provided in the actual documents, and this was just a summary of them. But, yes, I can update the table and provide the -- a summary of the ratings that he received.

(By Ms. Butler)

Q. Okay.

MS. BUTLER: I think it would be best if she does that, Mr. Ortiz.

MR. ORTIZ: Okay. We can talk about it after the deposition.

MS. BUTLER: Yeah.

(By Ms. Butler)

Q. When you were reviewing this, did you note any other information that was missing?

A. I believe that was -- that's all I recall seeing.

Q. Okay. Now, looking at that Table 3, we

do see on 11/1/2021 that the bladder cancer is residual. The percentage is 20 percent; correct?

A. Correct.

Q. But when you look on Table 2 at 11/1/2021, under the total rate which is titled "CLJA Rate," you have 100 percent plus K-1.

Can you explain what that's reflecting there.

A. He still had 100 percent disability, and he has the K-1 because, I believe, he has lost the use of an organ.

Q. Do you know what organ he has lost the use of?

A. I can only speculate that it is on the list of erectile dysfunction, but I cannot confirm.

Q. And so for purposes of the K-1, did you attribute that to Camp Lejeune?

A. Yes, it appears so.

Q. Okay. And did you also attribute the SMC 48 S to Camp Lejeune?

A. That was during that time period where he had two diagnoses, 100 percent and greater, yes.

Q. And how did you make those

determinations about whether to attribute the SMC 48 S and the K-1s to Camp Lejeune or not?

A. It -- I would have used Dr. Ji's report and his guidance benefits and if it's -- if it's not attributed to that, then it would change.

Q. So if -- if Dr. Ji's report did not support the allocation of those and SMC 48 S's and K-1's to Camp Lejeune, then your analysis would change?

MR. ORTIZ: Object to form and foundation.

A. Yes.

(By Ms. Butler)

Q. Now, we just looked at Mr. Cagiano who went from 100 percent for bladder cancer to 100 percent for prostate cancer; correct?

A. I believe so, yes.

Q. And so it's possible that something similar could happen to Mr. Criswell; correct?

MR. ORTIZ: Objection to form and foundation.

A. I don't know what he could get or could not get. He could have another diagnosis.

(By Ms. Butler)

Q. Okay. So it's possible, isn't it, that

Mr. Criswell could have another diagnosis over the course of his lifetime; correct?

A. Sure.

MR. ORTIZ: Same objection.

A. Sure.

(By Ms. Butler)

Q. Okay. And that diagnosis could change his disability ratings; correct?

A. If it -- yes, depending on whether it was related or not related.

Q. Right. And, in fact, Mr. Criswell like Mr. Cagiano had a number of fluctuations in his disability ratings even in the chart as reflected here, which is missing some information; correct?

MR. ORTIZ: Object to form.

A. I think in the -- the last one we were looking at a specific code and in this one it looks like it's the same -- the same code is the same percentage. He has some different diagnoses in there regarding depressive order. You were correct. The 30 percent went up to 100 percent.

(By Ms. Butler)

Q. So, again, my question is that Mr. Criswell, even in the time period reflected in your Table 3, shows that over the course of

time he had various fluctuations in his disability percentages and the different diagnoses related to those; correct?

MR. ORTIZ: Object to form.

A. He -- he has some different diagnoses over that time period, yes.

(By Ms. Butler)

Q. And different percentages; correct?

MR. ORTIZ: Same objection.

A. Yes. But he had different diagnoses.

(By Ms. Butler)

Q. Okay. And would that not lend some credence to the fact that he might have some more different diagnoses in the future?

MR. ORTIZ: Objection.

A. I could never speculate what he could or couldn't have in the future. This is based on what he actually has now.

(By Ms. Butler)

Q. Okay. So I was curious with respect to your Materials Considered List -- I think it was Mr. Criswell. Sorry. Maybe it's the supplemental Materials Considered List. I will -- so there was a -- I'll -- I'll get to that later. There was a supplemental Materials

Considered List that I think I have a question based on. So we can -- we can move on from Mr. Criswell's report.

So I'm going to turn to Mr. Laramore. I am going to hand you -- sorry -- this is Exhibit 24, which is Mr. Laramore's report and Exhibit 25, which is your Materials Considered List for Mr. Laramore.

(Exhibit Number 24 was marked.)

(Exhibit Number 25 was marked.)

(By Ms. Butler)

Q. And I am going to ask you just -- we've gone over two of the reports so far. Is there anything in particular -- and we can look at his report specifically -- but is there anything in particular that you recall being different about Mr. Laramore's report from the other two that we looked at previously?

A. This one has a life care plan.

Q. Okay. All right. We'll get into the life care plan. So with respect to Mr. Laramore, the assignment, the expert qualifications -- those are the same as we've previously gone over; correct?

A. Yes.

Q. Okay. And then in the introduction, you actually have three bullet points here, and you say you're going to "evaluate alleged damages as presented in Plaintiffs' expert report prepared by Chad Staller"; and then, next, "determine the present value of future medical care costs as specified in a life care plan report prepared by Deborah Navarro"; and, then, finally to "determine the present value of any offsets to a potential award."

Is that the scope of your report for Mr. Laramore?

A. Yes.

Q. Okay. And so going down to the next heading, it says -- it says "Staller report," "Medical Care Expenses." And, again -- well, this one's a little different. You say that "The Staller report reviewed the cost analysis tables prepared by Michael Fryar dated February 6th, 2025, in which Mr. Fryer provides the cost of bladder removal surgery either with a neo bladder or without a neo bladder"; is that correct?

A. Yes.

Q. And then you provide the figures that Mr. Staller applied to Mr. Fryar's life care

plan; is that correct?
A. Yes, I think it was just Fryar's numbers. I don't think there were any calculations in this situation.
Q. Okay. And so in that paragraph, are you just repeating what is stated in other people's reports?
A. Yes. I'm summarizing Staller's report there.
Q. Okay. And so there's no testimony or opinion analysis in that paragraph that you're rendering; is that correct?
A. No. He -- Staller didn't provide a real opinion. He just restated Fryar's number.
Q. And you're just restating those numbers as well; correct?
A. Yeah.
Q. Okay. And then going to "Opinions & Basis." We start with "Future Medical Care."
With respect to future medical care, you say that your "opinion regarding the present value of the cost of future medical care needed by Mr. Laramore is based upon a life care plan report prepared by Deborah Navarro dated April 8, 2025; is that correct?

A. Yes.
Q. And so you did not prepare the life care plan report. You relied on Ms. Navarro's report; correct?
A. Correct.
Q. Okay. And she provides -- Ms. Navarro -- the current costs and specific needs in her report; correct?
A. Correct.
Q. And Mr. Fryar, who also prepared a life care plan, he's the plaintiffs' life care plan person; correct?
A. Yes.
Q. And Ms. Navarro is the defendant's life care plan person; correct?
A. Yes.
Q. And so you relied on the defendant's life care plan rather than the plaintiffs' life care plan, correct?
A. Correct.
Q. Okay. And so your numbers are based on the DOJ expert, Ms. Navarro -- her life care plan?
A. Correct.
Q. And there's also a Mr. Shahnasarian who

provided a life care plan for the defendant for some of the plaintiffs, but you relied on either Mr. Shahnasarian or Ms. Navarro for the life care plans that you evaluated; correct?

A. Yes.

Q. Okay. So going next to page 3 of Exhibit 23 [sic], you discuss Ms. Navarro's report, and then you apply a present value to her figures; is that correct?

A. Yes.

Q. So with respect to the life care -- that -- this heading which is "Future Medical Care," your -- I guess, your part in this analysis is just to present value Ms. Navarro's numbers; is that correct?

A. There's a two step process: The first step is my job is to forecast the increase in the cost of the different items each year out in the future; so I calculate that out, and I get that total. And then I discount that back to present value.

Q. Okay.

A. So it's inflation adjusted into the future and then discounted --

Q. And then discounted back? Okay. So two

steps, but that's the extent of your involvement in the figures that are presented for Ms. Navarro's life care plan?

A. Yes.

Q. Okay. You didn't go back and reevaluate her life care plan; is that correct?

MR. ORTIZ: Object to form.

A. Correct.

(By Ms. Butler)

Q. Okay. So now going to offsets and, again, we're looking at future medical expenses. Now, we have a little bit of a different situation here because you're referring now to Dr. Henry Miller. And he's a new expert that we haven't talked about in Mr. Cagiano or Mr. Criswell's report; correct?

A. Yes. But I think this is Dr. Ji for past medical expense.

Q. I'm under "Offsets" where --

A. Sorry.

Q. -- it says "Future Medical Expense." That page --

A. Thank you.

Q. -- right there.

A. Sorry. I jumped ahead.

Q. Sorry. I was in that first paragraph where it refers to Henry Miller?

A. Got it.

Q. Okay. Now, we had not -- in discussing Mr. Criswell or Mr. Cagiano discussed Henry Miller yet. Why are you referring to Henry Miller in Mr. Laramore's report?

MR. ORTIZ: Object to form.

A. He is another expert for the defense, who is providing what the government would pay for the same services in either Navarro's report or Fryar's report to calculate an offset.

(By Ms. Butler)

Q. So Henry Miller is a defense expert that provided a report that calculates the cost of future medical care based on Ms. Navarro's report but using TriWest, which is under the Department of Veterans Affairs Community Care Network; is that correct?

MR. ORTIZ: Object to form.

A. Yes.

(By Ms. Butler)

Q. Are you familiar with TriWest?

A. No.

Q. Have you done any investigation or

analysis about TriWest?

MR. ORTIZ: Object to form.

A. No.

MR. ORTIZ: And foundation.

(By Ms. Butler)

Q. And you're not rendering any opinions as to the viability of TriWest in the future; is that correct?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. And you are not rendering any opinions as to whether TriWest will be able to care the -- provide the care that Ms. Navarro or Mr. Fryar predict Mr. Laramore will need in the future; is that correct?

A. Correct.

MR. ORTIZ: Object to form.

A. Correct.

(By Ms. Butler)

Q. Okay. So with respect to this part of your report where you're relying on Henry Miller, are you assuming for purposes of this report that TriWest will continue in the exact same manner as it continues now to provide the same type of care

with the same eligibility requirements and the same type of reimbursements, et cetera?

MR. ORTIZ: Objection.

A. I am -- I will say, yes, that the assumption is it will be able to continue to pay for the items that Dr. Miller states that they are currently able to pay.

(By Ms. Butler)

Q. And that Mr. Laramore will be eligible to receive payment from TriWest for those items; correct?

MR. ORTIZ: Same objection.

A. Sure.

(By Ms. Butler)

Q. Now, Mr. Laramore -- his future medical expenses are projected by Henry Miller based on TriWest. But do you recall that there are some other plaintiffs who might have, like, Tricare or Medicare or other government payors that Henry Miller utilizes in his reports?

MR. ORTIZ: Object to foundation.

A. I -- I'd have to look at the reports, but I do recall there are some other government agencies that -- that he's talked about.

(By Ms. Butler)

Q. Okay. And is it accurate that you're not rendering an opinion as to the viability of those government agencies to continue to pay for the care that they're currently paying for?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. And you're assuming that any of the government programs involved in your opinions will continue with no reduction of services; is that correct?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. And with no reduction of payments to cover services?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. And with no reduction of coverage or eligibility?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. Okay. And so here, for example, you're

relying on Dr. Henry Miller to provide a value that he contends the cost provided in Ms. Navarro's -- is the cost for what Ms. Navarro's report contends would be required under the TriWest system; is that correct?

A. Yes.

Q. Well, you state "This represents the amount of offset to apply to the present value of future medical care as presented in Ms. Navarro's report"; correct?

A. Correct.

Q. And you're relying on Dr. Henry Miller's report; correct?

A. Correct.

Q. Okay. So that number -- that number right there that is in that first paragraph -- that all comes from Dr. Miller; correct?

A. Correct.

Q. Okay. And then you go down and he -- Dr. Miller did the same thing he did with Ms. Navarro's report for Mr. Fryar's report; correct?

A. Correct.

Q. And so in the table beneath that you have a Scenario 1 and a Scenario 2.

Do you see that?

A. Yes.

Q. Okay. And the future medical care -- where did you get the 120,078 and the 117,830?

A. Those are Staller report.

Q. Okay. So those came from Mr. Staller. You didn't calculate those?

A. No.

Q. Okay. And then you have offset and you have 15,664, 15,326. Where did you get those numbers?

A. Those are from Dr. Miller's analysis.

Q. So the only, I guess, thing you did with respect to Scenario 1 and Scenario 2 is to subtract and provide a total?

MR. ORTIZ: Object -- objection.

A. I have, yes, I have calculated the -- what the cost -- out-of-pocket cost for the plaintiff would be if you apply the offsets from Dr. Miller to Fryar's numbers.

(By Ms. Butler)

Q. But, again, those are Fryar's numbers, Staller's numbers, and Miller's numbers; correct?

A. Fryar's and Miller's.

Q. And then you just provided the total?

A. Correct. I calculated the --
Q. Okay.
A. -- total.
Q. So are you really offering an opinion there other than how to do the math?
A. I have no --
MR. ORTIZ: Object to form.
A. There's no opinion here. I state here that -- well, it says "Should the trier of fact determine that Fryar's tables are related and necessary applying the offsets determined from Dr. Miller," this is what the number would be.
(By Ms. Butler)
Q. Okay. So, again, you're just doing the math; correct?
MR. ORTIZ: Object to form.
A. In -- in this situation, I am providing the math numbers.
(By Ms. Butler)
Q. Okay. Now we go to the past medical expenses. I think that's where you were earlier. And, again, you rely on Dr. Ji for those numbers; correct?
A. Yes.
Q. Do you know what he means -- you provide

two numbers, you say, when accounting for total cost and then one accounting for only direct cost payments. Do you know what the difference is there?

MR. ORTIZ: Objection to form.

A. It -- I believe that there -- one of them includes some sort of overhead amount, but I can't tell you exactly what that is.

(By Ms. Butler)

Q. So, again, you're -- you're just relying on Dr. Ji for all of that?

A. Correct.

Q. Okay. So going to the next section of your report, this pertains to the VBA compensation; is that correct?

A. Yes.

Q. Okay. And I believe -- is there anything different in your methodology or analysis or assumptions in this section of Mr. Laramore's report from the other two reports we looked at?

A. No.

Q. Okay. So you -- you did the same calculation. We've already gone through just with different numbers that pertain to

Mr. Laramore; correct?

A. Correct.

Q. Okay. And your tables, which are attached and which -- which we can go through -- they reflect Mr. Laramore's ratings and -- and his adjustments, et cetera; correct?

A. Correct.

Q. Okay. But the methodology and the manner in which you went about this section of your report didn't change?

A. Correct.

Q. Okay. So I'm going to go down to the summary, then.

So on the summary, you say "Based on the scope of work performed as well as my professional experience, it is my opinion --" and you -- you express some numbers. So I'm going to look at that chart. You say, "See table below."

Where it says "Future Medical Care Expense," do you see that number?

A. Yes.

Q. Now, that 15,805 -- is that the present value of the care based on the Navarro report?

A. Yes.

Q. And that's what we -- we looked at

previously -- correct? -- that you relied on Navarro for all of that? You just brought it to present value?

A. I calculated the total amount and discounted the present value, yes.

Q. Okay. Then if we go below that and you see where it says "Past Medical Care"?

A. Yes.

Q. And you have the 31,680 and the 31,314 -- those numbers came from Dr. Ji; correct?

A. Correct.

Q. So you didn't calculate those numbers; correct?

A. Correct.

Q. And then where it says "Future Medical Care," and you have 4,168 in both columns; correct?

A. Correct.

Q. And that came from Henry Miller and Ms. Navarro; is that correct? And then you applied a present value?

A. This -- same methodology as the life care plan, future medical care expense, I calculated they -- that out to life expectancy

and discounted back to present value.

Q. And those were based on Dr. Miller and Ms. Navarro's reports; correct?

A. Yes.

Q. And then the VBA disability benefits -- that was pursuant to -- that's the past and future and the analysis that is up above the summary that is similar to the analysis and methodology we went through with Criswell and Cagiano; correct?

A. Correct.

Q. And so other than the present value figures that you calculated and the disability benefit calculations you made, the rest of the numbers in there, you relied on others for; correct?

MR. ORTIZ: Object to form.

A. The past medical care item costs are -- relied on Dr. Ji. The others were my calculations with inflation adjustments and discount rates.

(By Ms. Butler)

Q. Based on reports from Ms. Navarro and Dr. Miller?

A. Correct.

Q. Okay. So going to the tables in Mr. Laramore, we have just a couple of different tables. So I just want to make sure. Table 1, because we had the life care plan, this is all based on Ms. Navarro's report; correct?

A. The annual cost and the projected care is based on her report.

Q. And then you have the total cost and the total present value?

A. Correct.

Q. Okay. And then, again, Table 2, this is all premised upon the life care plan prepared by Ms. Navarro; correct?

A. And these are the offsets from Henry Miller. These are the --

Q. These are the --

A. Would pay for Table 2.

Q. Okay. And so these are the Tricare costs that Henry Miller included in his report?

A. It would -- yeah, whatever --

Q. Sorry. TriWest.

A. -- whatever costs are in his report, that's what these are.

Q. So you didn't independently calculate them? You relied on Henry Miller for those

calculations?
A. For the annual cost amounts.
Q. Okay. And then you have the total and the present value; is that correct?
A. Correct.
Q. Okay. And then Table 3 looks similar to the tables we looked at for Mr. Cagiano and Mr. Criswell. Is there anything different in your tables three, four, or five for Mr. Laramore than what we looked at previously from Mr. Cagiano and Mr. Criswell?
A. No.
Q. Okay. And so those were the same methodology that you already described and the same method of calculating?
A. Yes.
Q. And if we look at your Materials Considered List for Mr. Laramore, which is Exhibit 24, you have those same two tables noted in there that we previously looked at, the National Archives and the US Department of Veterans Affairs; correct?
A. Yes.
Q. Okay. Is there anything else about Mr. Laramore's report other than what we've

discussed, which is the involvement of a life care plan and also Dr. Henry Miller, that is different from what we discussed with Mr. Criswell and Mr. Cagiano?

MR. ORTIZ: Object to form.

A. No.

(By Ms. Butler)

Q. And are all of the opinions you intend to present with respect to Mr. Laramore contained within your report for him?

MR. ORTIZ: Objection.

A. Yes.

(By Ms. Butler)

Q. Okay. I might have -- I need to clear something up for the record quickly.

MS. BUTLER: Mr. Laramore's report -- is that Exhibit 20- --

MS. LAMACCHIA: 4.

MR. ORTIZ: 24.

MS. BUTLER: 4 and then his Materials Considered List is 25.

MR. ORTIZ: Correct.

MS. BUTLER: Okay. I think I referred to those incorrectly. So Mr. Laramore's report is 24 and his Materials Considered List is

25, but you have them marked correctly. I have them wrong. Okay. I don't know how long we've been going. Do you want to take a break or keep going?

MR. ORTIZ: It's been about 55 minutes.

MS. BUTLER: Do you want to take a minute?

THE DEPONENT: You can keep -- I can keep going.

MS. BUTLER: Okay.

THE DEPONENT: Another report.

MS. BUTLER: Yeah. That's fine.

THE DEPONENT: Some water. If someone -- can you grab me a bottle of water, please.

MS. BUTLER: We can move on.

MS. LAMACCHIA: In the kitchen.

THE DEPONENT: Can I -- actually one -- one, literally 60 seconds --

MS. BUTLER: Yes. Absolutely. Let's go off the record for a minute.

THE VIDEOGRAPHER: Time is now 3:28. We're off the record.

(A recess was taken.)

THE VIDEOGRAPHER: Time is now 3:29. We're back on the record.

(By Ms. Butler)

Q. Ms. Yount, I'm going to move -- let me get my microphone on; is that okay?

THE VIDEOGRAPHER: Yeah.

(By Ms. Butler)

Q. To the expert report of Terry Dyer. I'm handing you what has been marked as Exhibit 26, which is Ms. Dyer's report and then 27, which is your Materials Considered List for Ms. Dyer.

(Exhibit Number 26 was marked.)

(Exhibit Number 27 was marked.)

(By Ms. Butler)

Q. Turning to Ms. Dyer's report, the assignment and expert qualifications are the same as the other reports. I'm going to move to the introduction. Do you see where I am?

A. Yes.

Q. Okay. The introduction here has three bullet points. It says "The purpose of this analysis is to, one, evaluate alleged damages as presented in Plaintiffs' expert report prepared by Chad Staller; two, determine the present value of future medical care costs as specified in the

life care plan report prepared by Deborah Navarro; and then, finally, to determine the present value of any offsets to a potential award," but you have a footnote.

And in that footnote on the third bullet point, it says "According to an expert opinion report of Wang Ji, M.D., dated December 15th, 2025, no government offsets were identified for Ms. Dyer related to her alleged injury due to exposure at Camp Lejeune"; is that correct?

A. Yes.

Q. So with respect to your third bullet point, in fact, did you not determine the present value of any offsets to a potential award for Ms. Dyer?

A. I determined that there were none.

Q. Okay. So we're left with the other two bullet points; is that correct?

A. Correct.

Q. Okay. And then with respect to future medical care expenses, which is down below that. Again, in that paragraph as we looked at with Mr. Laramore, are you just summarizing what Mr. Staller's report provided?

A. Yes.

Q. And you state "I take no issue with methodologies used in the Staller report regarding future medical care"; is that correct?

A. Correct.

Q. And so you are not rendering any opinions adverse to Mr. Staller's report on Ms. Dyer with respect to the future medical care; is that correct?

A. Correct. We just have different medical experts we're relying on.

Q. You said it better than I did. So you're relying on Ms. Navarro and Mr. Shahnasarian, and he's relying on Mr. Fryar; is that correct?

A. Correct.

Q. Okay. So when we get down to past medical and related care, we went through this -- I think it was Mr. Criswell -- about your sentence that says "While I do not take issue with the sources used in Staller report, they provide no support or opinion for the illustrative calculations."

Do you see that?

A. Yes.

Q. Are your same, I guess, criticisms of

Mr. Staller with respect to Ms. Dyer in this portion of your report the same that we discussed with respect to Mr. Criswell in that report?

A. Yes.

Q. Is there anything additional that we need to discuss that we haven't already gone over with respect to Mr. Criswell that is different in Ms. Dyer in that past medical and related care section?

A. No.

Q. Okay. Moving to "Past Household Services. The first two paragraphs summarize Mr. Staller's report; is that correct?

A. Yes.

Q. Okay. And then you say "While I do not take issue with the sources used in Staller report, they provide no support or opinion for the illustrations calculations."

Do you see that?

A. Correct.

Q. And, again, is your criticism that he did not apply his calculation not with the calculation itself?

A. I feel like that's a hard -- will -- will you restate that again?

Q. Yes. So I'm trying to understand that sentence, "While I do not take issue with the sources used in Staller report, they provide no support or opinion for the illustrative calculations."

And it's my understanding that your other criticism that we've discussed with Mr. Staller is that he did not apply facts to the calculations. Is that the same criticism here?

A. Yes.

Q. Okay. Are there any other criticisms with respect to the past household services category?

A. No.

MR. ORTIZ: Object to form.

(By Ms. Butler)

Q. Okay. And so going, then, down to "Future Medical Care." As you previously expressed, you're relying on Ms. Navarro -- correct? -- for the life care plan?

A. Correct.

Q. And Mr. Staller relies on Mr. Fryar; correct?

A. Correct.

Q. And so you determined a present value of the calculations based on Ms. Navarro's report; is that correct?

A. Correct.

Q. Okay. And in the summary, you state that "Based on the scope of work performed in connection with this matter as well as my professional experience and education, it is my opinion that the present value of the cost of future medical care needed, as of December 31, 2025, is 22,328."

Do you see that?

A. Yes.

Q. So is that the extent of the opinion you will be rendering with respect to Ms. Dyer?

MR. ORTIZ: Objection.

A. Yes.

(By Ms. Butler)

Q. And so -- and, again, that 22,328 is based on the life care plan of Deborah Navarro; is that correct?

A. Yes.

Q. And then a present value calculation?

A. Yes.

Q. Okay. And so, again, just as we -- we

reviewed in Mr. Laramore and his tables with respect to your Table 1, you're relying on the life care plan prepared by Deborah Navarro, as noted in the little A beneath that table; is that correct?

A. Yes.

Q. Is there anything with respect to the report of Terry Dyer that is different from the reports we've reviewed previously?

A. I don't think so.

Q. Okay. And are all of the opinions that you intend to present with respect to Terry Dyer included in your report for Terry Dyer?

MR. ORTIZ: Object to form.

A. Yes.

(By Ms. Butler)

Q. Okay. And then Exhibit 27, which I handed you -- this is your Materials Considered List for Ms. Dyer; is that correct?

A. Yes.

Q. And we don't have those two sources because you did not compute any past or future disability benefits for Ms. Dyer; is that correct?

A. Correct.

Q. Okay. I am going to turn now to Mr. Mousser. I am going to hand you what has been marked as Exhibit 28, which is your expert report for Mr. Mousser, and to Exhibit 29, which is your Materials Considered List for Mr. Mousser.

(Exhibit Number 28 was marked.)

(Exhibit Number 29 was marked.)

(By Ms. Butler)

Q. Now, are you aware that the four reports we've reviewed previously -- Mr. Cagiano, Mr. Criswell, Mr. Laramore, and Ms. Dyer are all bladder cancer Track 1 plaintiffs?

A. I -- I don't know for sure, but --

Q. Okay. Is -- is that not something that you have had to concern yourself with? I'm just -- I'm just trying to understand. Do --

A. No.

Q. Okay. So you're not familiar with what Track 1 illness each of the plaintiffs that you rendered reports for has; is that correct?

MR. ORTIZ: Objection.

A. I was made aware at one point, but it's not a concern of mine, and I didn't put it in the report because of that.

(By Ms. Butler)

Q. Okay. So we are turning to plaintiffs Exhibit 28 and 29, which is the expert report for Frank Mousser and the Materials Considered List for Frank Mousser.

Now, going into the "Assignment" and "Expert Qualifications," those are the same; correct?

A. Yes.

Q. And if we go to the introduction, there are three bullet points; correct?

A. Yes.

Q. And the first bullet point is to "evaluate alleged damages as presented in Plaintiffs' expert report prepared by Chad Staller"; is that correct?

A. Yes.

Q. And then to "determine the present value of future medical care costs as specified in a life care plan report prepared by Michael Shahnasarian"; is that correct?

A. Yes.

Q. And then to "determine the present value of any offsets to a potential award"; is that correct?

A. Yes.
Q. And so that's the extent of your analysis for Mr. Mousser; is that correct?
MR. ORTIZ: Objection.
A. Yes.
(By Ms. Butler)
Q. And looking at Mr. Mousser, in the "Future Medical Care Expenses" section, similar to one of the other reports we reviewed, is this a summary of Mr. Staller's report that was based on Mr. Fryar's life care plan?
A. Yes.
Q. And, again, on page 3, you state "I take no issue with methodologies used in Staller report regarding future medical care"; is that still correct?
A. Correct.
Q. And so you are not expressing any criticisms of Mr. Staller in that portion of your report; correct?
A. Correct.
Q. Okay. Now, the next section of your report is titled "Earnings." We haven't seen that before, have we?
A. No.

Q. Okay. So in this section, you summarize Mr. Staller's report with respect to calculations pertaining to Mr. Mousser under your heading "Earnings"; is that correct?

A. Yes.

Q. And at the end you say "I take no issue with assumptions and methodologies used in Staller report to calculate lost earnings."

Do you see that?

A. Yes.

Q. And, in fact, I think we discussed you sometimes calculate lost earnings for cases; is that correct?

A. Yes.

Q. And so you reviewed what Mr. Staller did to calculate the lost earnings and you're taking no issue with that; is that correct?

A. Correct.

Q. Is that still true today?

A. Correct.

Q. And you used the word "lost earnings." Do you see that? "I take no issue with assumptions and methodologies used in Staller report to calculate lost earnings."

A. Correct.

Q. Are you intending to differentiate there between lost earnings and earning capacity?
A. No.
Q. Were you just using it as a kind of a catch-all terminology?
A. Sure.
Q. Okay. And are you taking a position in this case as to whether what Mr. Staller did was to calculate lost earnings versus lost earning capacity?
A. No.
MR. ORTIZ: Objection.
A. No.
(By Ms. Butler)
Q. Okay. And so you're not expressing an opinion as to what Mr. Staller did and how it should be labeled; is that correct?
MR. ORTIZ: Objection.
A. Correct.
(By Ms. Butler)
Q. Okay. In fact, you take no issue with his assumptions and methodologies; correct?
MR. ORTIZ: Same objection. Asked and answered.
(By Ms. Butler)

Q. Okay. I withdraw that question.

We can move to "Past Household Services." Under the "Past Household Services" section, you, again, describe Mr. Staller's report as we've seen in some prior reports and then you say "While I do not take issue with the sources used in Staller report, they provide no support or opinion."

Is that the same criticism we've already discussed with respect to the household services section in other reports?

A. Yes.

Q. Okay. Is there anything further that you would need to add to what we've already discussed in that household services section?

A. No.

Q. Okay. Going to your "Opinions & Basis." Your first heading is "Future Medical Care."

Do you see that?

A. Yes.

Q. And in that section consistent with other sections, you're relying on the life care plan report of the defense expert; is that correct?

A. Yes.

Q. In this case it's an updated life care plan report prepared by Mr. Shahnasarian; correct?

A. Correct.

Q. And so you use those numbers, and you -- as you indicate, that you determine the amount of money to fund or provide for the yearly future costs, assuming an investment of a lump sum and then you present value that number; is that correct?

A. Correct.

Q. Okay. And is there anything different that you did in that section with respect to the future medical care that -- as what we have discussed with other reports?

A. No.

Q. So going to future earnings -- if you look at the last section of that paragraph, you say "For purposes of this analysis, no loss of earning capacity has been considered."

Do you see that?

A. Yes.

Q. And why has no loss of earning capacity been considered there?

A. Because of Michael Shahnasarian's

opinion.

Q. Okay. And so you're relying on Mr. Shahnasarian for -- as the basis for you not considering loss of earning capacity; is that correct?

A. Correct. According to Shahnasarian, there is no -- he was able to work and there's no loss of earning cap- -- loss of earnings.

Q. Okay. And so there's no loss of earnings based on Mr. Shahnasarian's opinion, but you are not rendering your own opinion in that respect; is that correct?

A. Correct.

Q. Going to "Offsets." Again, you mentioned Henry Miller, Ph.D.

Do you see that?

A. Yes.

Q. And in this case, he utilized Dr. Shahnasarian's report but projected the amount to be paid -- that he contends would be paid by the Department of Veterans Affairs on behalf of Mr. Mousser; is that correct?

A. Correct.

Q. Did you do any independent analysis of the viability of the Department of Veterans

Affairs to continue paying for medical care on behalf of Mr. Mousser?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. And are you rendering any opinions as to whether Mr. Mousser can or would continue to receive the same care he's receiving now from the Department of Veterans Affairs in the future?

MR. ORTIZ: Same objection.

A. Sorry. Am I -- sorry. Ask the question -- if you can say the first few words.

(By Ms. Butler)

Q. Yes. Are you rendering an opinion --

A. No.

Q. -- with respect to whether Mr. Mousser will continue to be eligible for the same care, will be able to continue to receive the same care, or all of those other criteria that we went through previously with other government payors with respect to the Department of Veterans Affairs?

A. No.

MR. ORTIZ: Same objection.

A. No.

(By Ms. Butler)
Q. And so what you did is you took Mr. Miller's number and you applied a present value; is that correct?
A. I did the same methodology. I inflation-adjusted it into the future and calculated present value.
Q. Okay. And -- and your -- your calculations there are assuming that the Department of Veterans Affairs will continue to offer the exact same care to Mr. Mousser that they're offering currently and that that is the type of care he would need; is that correct?
MR. ORTIZ: Objection.
A. I have no opinions about the medical care he needs. I am solely basing -- assuming that it will continue to pay the amounts as supplied in Miller's report, if that's what you mean.
(By Ms. Butler)
Q. Yep. Thank you.
Going to the next page of your report, which is page 5, I was a little confused. At the top of that chart, it says "Past Medical Care." Should that be "Future Medical Care"?

A. Yes.
Q. And that, in fact, is reflecting that Mr. Mousser -- if he were to need a kidney transplant or dialysis; correct?
A. Correct. From Staller's report.
Q. Okay. And so that should really say "Future Medical Care," and where did you get those two numbers?
A. Those are Staller's --
Q. Okay.
A. -- numbers.
Q. And then you -- the next line is "Offset," and where did you get those numbers?
A. Just like the prior report, those are Dr. Miller's opinions that the VA would pay those items on his behalf.
Q. And so are you intending to indicate in this chart that the amounts that Dr. Miller opines would be paid by the VA should be subtracted from the future medical care that Mr. Mousser would need to receive?
MR. ORTIZ: Objection to form.
A. I am calculating what the offsets would be according to Dr. Miller and if those are indeed the offsets that would be applied to each

of these scenarios in this report -- in Staller's report.

(By Ms. Butler)

Q. And so it's my understanding that you are not expressing opinions on how offsets should be applied. Is that still correct in this report for Mr. Mousser?

MR. ORTIZ: Objection.

A. Correct. But this specific item was -- Dr. Miller was calculating the offset specifically to the actual items in this life care plan. So the life care plan is a little bit different in that if these are the actual medical care items needed, then he's saying that this is what the offsets would be.

(By Ms. Butler)

Q. And -- and so in that context, are you trying to show in this chart that basically this offset would be a credit against the cost -- the cost of future care because it would be provided by the government?

MR. ORTIZ: Objection.

A. I think that sounds about right. Just like the other one we said is Dr. Miller's report if -- excuse me -- yes, if the items -- if the

trier of fact deems that the items in Staller's report or Fryar's report are accurate, the government's future offsets are calculated to be that.

(By Ms. Butler)

Q. And, again, you're not trying to tell the trier of fact how to apply the offset. You're just calculating it; is that correct?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. Okay. Going to past medical expenses, I -- I think this is the same as what we've discussed with other reports. You are just repeating what Dr. Ji has in his report; is that correct?

A. Correct.

Q. And you're not expressing any kind of independent opinion; correct?

A. Correct.

Q. So going down to the Veterans Benefits Administration section, again, we -- I know we've discussed this with a lot of the plaintiffs, but I wanted to look at the Footnote 4. In Footnote 4, you state that "VBA disability ratings related

to Camp Lejeune are based on an expert opinion report prepared by Wang Ji, M.D., dated December 15, 2025," and then you list what those conditions are for Mr. Mousser; is that correct?

A. Yes.

Q. And so, again, just to make sure I'm clear, that, in these reports that you have provided dated December 15, 2025, you are relying on Dr. Ji with respect to the VBA disability ratings being related to Camp Lejeune; is that correct?

A. Yes.

Q. Okay. And so when -- when these ratings are listed down here, you have drawn no independent conclusion about whether they are related to the Track 1 bellwether illness for which the plaintiff is seeking damages. You are relying on Dr. Ji for that determination?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. Okay. And so looking down at the summary of Mr. Mousser's, you -- you provide a summary that reflects future medical care expense of 4,631 and, again, what is that based upon?

A. That is based on Dr. Shahnasarian's life care plan.

Q. Okay. And then down in the "Past Medical Care," are you relying on Dr. Ji for those numbers?

A. Yes.

Q. And then for the future medical care, who are you relying on for those numbers?

A. I made those calculations based off of the opinions of Henry Miller and Michael Shahnasarian.

Q. And then as to the VBA disability benefits, you made those calculations based on the same methodology and process that we've discussed for the other plaintiffs who had VBA disability benefits?

A. Correct.

Q. Okay. Is there anything about the determination of VBA disability benefits for Mr. Mousser that is different from any of the other plaintiffs?

A. I don't believe so.

Q. And so, again, in making those determinations, you assume that Mousser's ratings won't change; correct?

MR. ORTIZ: Objection.
A. Correct.
(By Ms. Butler)
Q. And that he will live until his life expectancy as you've indicated in your report?
MR. ORTIZ: Objection.
A. It's -- there's a reduced life expectancy based on Staller's report and Fryar's report and that's the calculation is calculated to that reduced life expectancy.
(By Ms. Butler)
Q. And -- and so the assumption is that he will live to that reduced life expectancy; correct?
A. Correct.
Q. And you're assuming that the VBA won't make changes to its ratings schedule; is that correct?
MR. ORTIZ: Objection.
A. Correct. Besides COLA adjustments.
(By Ms. Butler)
Q. Right. And then he will remain -- Mr. Mousser will remain exactly as he is now with no new conditions, no progression of conditions, no additional diagnoses; is that correct?

MR. ORTIZ: Objection.

A. Correct. I am not able to make those determinations.

(By Ms. Butler)

Q. Okay. Looking back at the tables -- Table 1, again, is based on Mr. Shahnasarian; correct?

A. Yes.

Q. And Table 2 is based on the life planning prepared by Mr. Shahnasarian and the government costs provided by Henry Miller; correct?

A. Correct.

Q. And then Table 3 is the cost analysis -- based on the cost analysis tables prepared by Michael Fryar with the government costs projected per the report of Henry Miller; is that correct?

A. Correct.

Q. So I wanted to go back to Table 6. And, again, I was trying to make sure I could find some of these things in his Table 5.

If you look at Table 6, the bottom part of that on 9/22/2020, he's 100 percent rated for diagnostic code 7528, which is neoplasm of kidney urothelial cancer with some other language; is

that correct?
A. Yes.
Q. And then it looks like two months later, on 11/5/2020, under diagnostic code 9435, he's 70 percent rated for insomnia with depressive disorder and chronic ongoing.
Do you see that?
A. Yes.
Q. Can you show me where that is indicated on Table 2.
MR. ORTIZ: Table 5?
MS. BUTLER: Sorry. Table 5.
(By Ms. Butler)
Q. Table 5.
A. Let's see. December 1st, 2020.
Q. It's actually -- okay. December 1st, 2020.
A. Where he gets the additional SMC -- it's because he's got an additional rating. So he got a special monthly compensation.
Q. And did you --
A. So he got a little bump there.
Q. And so did you attribute that to his Camp Lejeune Track 1 injury?
A. Yes.

Q. Okay. And then on 11/10/2021, we again see 100 percent for neoplasm of kidney urothelial cancer, but it has a different diagnostic code as previously indicated.

Do you know why that is?

A. I do not.

Q. Okay. Do you know if that's an error?

MR. ORTIZ: Objection.

A. I don't.

(By Ms. Butler)

Q. Okay. And then if you go up to the top, he has neoplasm of kidney with the same diagnostic code of 7500, but it's reduced to 30 percent; is that correct?

A. Yes.

Q. Where is this reflected on Table 5?

MR. ORTIZ: Object to form.

A. 2024. It looks like according to this there are no changes in the combined ratings. So he continued to receive the same.

(By Ms. Butler)

Q. And how would you have made that determination?

A. The VBA payment amounts provided when we calculate -- when I calculated these disability

ratings, I could compare it to what he was actually receiving to check it and that's what it appeared.

Q. And do you have working papers or anything that show those types of analyses other than what we've been looking at with respect to your reports?

A. No. I -- for these ratings here, I actually went to the -- the website for the combined ratings and these -- these percentages are in there.

Q. Okay. So you don't have any separate, like, worksheets or working papers that you used to prepare these tables? All of your work is shown in here?

MR. ORTIZ: Object to form.

A. Yes. No, there are -- there's a spreadsheet for these.

(By Ms. Butler)

Q. And is that a spreadsheet that you -- is that spreadsheet reflected in these reports?

A. These are the -- they're printed out -- these summaries are printed out here for the approximate tables here for our final product.

Q. Okay. I'm -- I'm confused; so I need

you to back up. Are you saying that there's a spreadsheet that you used to create these tables that we don't have a copy of?

A. These are all spreadsheets, yes.

Q. Okay. So I'm just making sure. All of your spreadsheets that you used to compute the calculations that you're testifying to in this litigation are included in the tables attached to your reports?

A. Yes. My final opinions for the Excel spreadsheets are printed here and are attached as tables.

Q. Okay. Are there Excel spreadsheets that are not -- you know, we only have PDFs. Are there Excel spreadsheets with, like, notes and -- I'm not great at Excel, but I know you can hide/fit columns, and you can include formulas and things like that.

Are there Excel spreadsheets that have information that we're not privy to because we have the PDF?

A. Correct. All of these are -- are formulas to get to these amounts.

Q. And so you have spreadsheets that are in Excel format that have formulas that would help

us understand how you got this hardcopy table?
MR. ORTIZ: Object to form.
A. Well, all the information is -- there are -- there are Excels with this in here. But yes, any other expert can recreate this.
(By Ms. Butler)
Q. Okay. But if -- you have Excels in your possession that have formulas in them that were used to render these tables. Is that accurate?
MR. ORTIZ: Objection to form.
A. Yes.
(By Ms. Butler)
Q. Okay. Have you ever been asked to provide those to the government?
A. Yes.
Q. Have you provided those to the government?
A. Yes.
Q. Okay. But, to your knowledge, do you know if they have been produced in this litigation?
MR. ORTIZ: Objection.
A. No.
(By Ms. Butler)
Q. You don't know one way or the other?

A. I do not know.
Q. Okay. Okay.
MR. ORTIZ: Is this a good time for a break?
MS. BUTLER: Sure. Let me ask one more time question --
MR. ORTIZ: That's fine.
MS. BUTLER: -- about Mr. Mousser.
MR. ORTIZ: That's fine.
(By Ms. Butler)
Q. Are there any opinions you intend to render with respect to Mr. Mousser that are not stated in your expert report?
A. No.
MR. ORTIZ: And object to form to the last one, but --
MS. BUTLER: That's it.
MR. ORTIZ: -- that's fine.
MS. BUTLER: Then we can go off the record.
MR. ORTIZ: That's fine.
MS. BUTLER: Okay.
THE VIDEOGRAPHER: All right. Time is now 4:02 and we're off the record.
(A recess was taken.)

THE VIDEOGRAPHER: Time is now 4:12. We're back on the record.

(By Ms. Butler)

Q. Ms. Yount, I am going to hand you what has been marked as Exhibit 31 and -- sorry. 30 and 31, which is your expert report for Ms. Tukes and your Materials Considered List for your report of Ms. Tukes.

(Exhibit Number 30 was marked.)

(Exhibit Number 31 was marked.)

(By Ms. Butler)

Q. Going to the first page, which is page 2, going down to the introduction, it says "The purpose of this analysis is the following," and you have three bullet points.

Do you see those three bullet points?

A. Yes.

Q. And those are similar bullet points that we've reviewed for other plaintiffs; is that correct?

A. Correct.

Q. And are those bullet points the extent of the analysis that you're going to be rendering with respect to Ms. Tukes?

MR. ORTIZ: Object to form.

You can answer.

A. Yes.

(By Ms. Butler)

Q. Okay. Going down to "Staller report" -- is this -- with respect to past medical and related care, you first summarize what Mr. Staller's report does; is that correct?

A. Yes.

Q. And he provides an illustrative calculation to value the services that Ms. Tukes's husband provided for her -- to help care for her for a period of time; is that correct?

A. Yes.

Q. And you state underneath that summary that "While I do not take issue with the sources used in Staller report, they provide no support or opinion for the illustrative calculations."

Do you see that?

A. Yes.

Q. Is your statement there and the criticism that you're intending to render with respect to Mr. Staller's report the same that we have discussed when you have made similar statements for other reports?

A. Yes.

Q. Okay. Is there any additional criticism that you intend to make other than what we've already discussed here today?

A. No.

Q. Okay. And going down to the next page, which is page 3, the last sentence right before "Past Household Services" -- do you see that?

A. Yes.

Q. Again, you state "There is no support of any opinion as to how many hours of home health, personal care aid Ms. Tukes required due to her alleged injuries."

Do you see that?

A. Yes.

Q. And is that criticism the same with respect to what we've discussed with other reports?

A. Yes.

Q. Okay. Is there anything additional that you intend to testify on that subject with respect to Ms. Tukes?

A. No.

MR. ORTIZ: Object to form.

(By Ms. Butler)

Q. Okay. Going to "Past Household

Services." Again, you summarize Mr. Staller's report, and then you state "While I do not take issue with the sources used in Staller report, they provide no support or opinion for the illustrative calculations."

Do you see that?

A. Yes.

Q. And, again, we've discussed similar statements for other plaintiffs with respect to past household services. Is your criticism of Mr. Staller the same as we've discussed with respect to those other reports?

A. Yes.

Q. Is there any additional testimony, other than what we've already discussed here today, with respect to the past household services portion of the report for Ms. Tukes?

MR. ORTIZ: Object to form.

A. No.

(By Ms. Butler)

Q. Okay. Going to "Medical Care Expenses." In this section, you, again, refer to Mr. Staller's report, and you discuss that he calculates the present value of future medical care based on cost analysis tables prepared by

Michael Fryar.

Do you see that?

A. Yes.

Q. Okay. And then you -- you provide a summary of Mr. Staller's report; is that correct?

A. Correct.

Q. And you say at the bottom of page 3 in this section "I take no issue with methodologies used in Staller report regarding future medical care."

Do you see that?

A. Yes.

Q. And is that consistent with your continued opinion with respect to the medical care expenses in the Staller report?

A. Yes.

Q. And that is that you don't intend to render an opinion taking issue with his methodologies used regarding future medical care?

A. Correct.

Q. Okay. Going to "Opinions & Basis." In future medical care, you discussed that your current opinion regarding the present value of the cost of future medical care needed by Ms. Tukes is based upon a life care plan prepared

by Michael Shahnasarian; is that correct?
A. Correct.
Q. And so consistent with other plaintiffs where you have relied on Ms. Navarro or Mr. Shahnasarian, are you relying on the life care plan and not rendering your own opinion as to the life care plan part of your report?
A. Yes.
Q. Okay. And so are you taking the costs and projecting them to a reduced life expectancy for Ms. Tukes as stated in your report?
A. Yes.
Q. And then bringing it to present value?
A. Yes.
Q. And so is that the extent of the opinion you intend to render as far as this section of your report under "Future Medical Care"? Is that all contained in that section of your report?
A. Yes.
Q. Okay. Going to "Offsets," we, again, have "Future Medical Expenses" and the involvement of Henry Miller.
Do you see that?
A. Yes.
Q. And it states that he "utilized the

amounts in Dr. Shahnasarian's report and projected the amounts that he contends would be paid by Medicare and Tricare."

Do you see that?

A. Yes.

Q. Have you done anything to assess the likelihood that Medicare or Tricare will continue to provide the same benefits in the future as they provide now?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Okay. And so consistent with our discussions of these sections of reports where Mr. Miller is involved with respect to other plaintiffs, you are not opining as to the viability of these government agencies to provide the same care in the future or pay for the same care in the future; is that correct?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. Okay. And you are just assuming that the type of care and the eligibility for care and the availability of care will continue in the

future; is that correct?

MR. ORTIZ: Objection.

A. Correct. As you said the type of care assuming he still -- he needs the medical care needed as presented in the report initially.

(By Ms. Butler)

Q. Okay. And his eligibility for that care to be provided by Medicare and Tricare and their ability to provide that care and to pay for it -- you're making those assumptions; correct?

MR. ORTIZ: Objection.

A. Correct.

(By Ms. Butler)

Q. And going down to your table in that "Offset" section -- once again, I -- I can't remember where -- which report it was, but it needed to say "Future Medical Care"?

A. Yes.

Q. So once again in that section, at the bottom of page 4 where you are summarizing the Option 1 and Option 2, should that say "Future Medical Care"?

A. Yes.

Q. Okay. And where did those numbers under Option 1 and Option 2 come from?

A. Those are Staller's opinions.
Q. Okay. And so you did not calculate those numbers; correct?
A. Correct.
Q. And then as to the offsets -- where did -- that number is the same in each column. Did you calculate that number?
A. Yes.
Q. And how did you calculate that number?
A. That is Dr. Miller's opinions of doctor -- or Mr. Fryer's life care plan on what Medicare and Tricare would pay on behalf of Ms. Tukes and that is the present value calculation of those.
Q. And so any assumptions that Mr. Miller is making with respect to his analysis are also assumptions that you are making and the only, I guess, thing you are doing to Mr. Miller's numbers is bringing them to present value; is that correct?
MR. ORTIZ: Objection.
A. Again, same as the past reports. Inflation-adjusted to life -- reduced life expectancy and present value.
(By Ms. Butler)
Q. But you're relying on Mr. Miller as to

his projections about Medicare and Tricare; correct?

A. Correct.

Q. And you've done no independent research or analysis as to Medicare and Tricare and any issues they might be having with solvency or ability to provide the same care in the future; correct?

MR. ORTIZ: Objection to form and foundation.

A. Correct.

(By Ms. Butler)

Q. Going to the next page of Ms. Tukes report, we have the past medical expenses at the top.

Do you see that?

A. Yes.

Q. And, again, are you just repeating what Mr. -- sorry -- Dr. Ji had in his reports?

MR. ORTIZ: Object to form.

A. Yes.

(By Ms. Butler)

Q. And down in the summary -- if we look at this summary table as far as the future medical care expense, that 206,280 -- that is based on

the Shahnasarian life care plan; is that correct?
A. Yes.
Q. And then the past medical expense that you have in there of 165,493 -- that's based on Dr. Ji; correct?
A. Correct.
Q. And then the future medical care -- is that based on Henry Miller, who is basing it on the Shahnasarian life care plan?
A. Yes.
Q. And so inputting all of those figures from all of those other experts, your addition to all of their information is totaling the column at the far right to get 275,593; is that correct?
A. Well, based on their opinions, I've calculated the $110,000. But, yes, there -- the total offsets is $275,593.
Q. And you got that by adding the two numbers in that column; correct?
A. Correct.
Q. And those numbers were from Dr. Ji and from Henry Miller; correct?
A. Henry Miller did not provide the future medical care offset number. He provided what items would go into it, and I calculated that

number.

Q. Okay. Going to the tables -- if you look at Table 1 from Ms. Tukes, you have -- again, this -- this is based on the life care plan prepared by Mr. Shahnasarian; correct?

A. Yes.

Q. And you have items marked as TBD and say they have "an unknown frequency and or duration and have not been included in the total"; is that correct?

A. Correct.

Q. And where did you pull that TBD? Did that carry over from Mr. Shahnasarian's life care report?

A. Yes.

Q. Okay. So they're not TBD pursuant to your analysis? They're TBD pursuant to Mr. Shahnasarian's analysis?

A. Yes.

Q. Okay. And then Table 2 is also based on Mr. Shahnasarian's life care plan and government costs provided by Henry Miller; is that correct?

A. Yes.

Q. And then Table 3 is the cost analysis tables prepared by Michael Fryar -- is that

correct? -- with -- with the government costs projected by Henry Miller; is that correct?

A. Yes.

Q. Okay. Is there anything with respect to your expert report for Ms. Tukes that is different as far as the methodology and the bases for your opinions than we've discussed here with respect to her report or other reports?

A. No.

Q. And are all of your opinions that you expect to express with respect to Ms. Tukes stated in your expert report?

MR. ORTIZ: Objection.

A. Yes.

(By Ms. Butler)

Q. And Exhibit 31 -- that's your Materials Considered List for Ms. Tukes; is that correct?

A. Yes.

Q. Okay. I'm going to hand you what has been marked as Exhibit 32 and what has been marked as Exhibit 33.

(Exhibit Number 32 was marked.)

(Exhibit Number 33 was marked.)

(By Ms. Butler)

Q. This is your expert report with respect

to Allen Wayne Howard and your Materials Considered List.

Do you see that?

A. Yes.

Q. Going to the first page, looking at the introduction, you have two bullet points.

Do you see that?

A. Yes.

Q. And it says the purpose of your analysis is the following: To "evaluate alleged damages as presented in plaintiffs' expert report prepared by Chad Staller"; is that correct?

A. Yes.

Q. And to "determine the present value of any offsets to a potential award"; is that correct?

A. Yes.

Q. And is that the extent of your analysis with respect to Mr. Howard?

A. Yes.

Q. Going down to the Staller report, do you see your title "Earning Capacity"?

A. Yes.

Q. Now, are you intending to label what Mr. Staller has done as earning capacity versus

lost earnings, or are you using those interchangeably?

MR. ORTIZ: Objection to form.

A. It should be whatever Staller used in his report.

(By Ms. Butler)

Q. And so are you just reflecting what Mr. Staller titled his analysis, or are you trying to label what he did?

A. I -- my goal here was to summarize what he did only.

Q. Okay. Now, with respect to your analysis of Mr. Staller's report with respect to Mr. Howard in this section, you have a number of paragraphs from page 2 to 3. And if you need to review them, please let me know.

But I wanted to understand: Do you have a problem with the calculations that Mr. Staller made or just with the premise that Mr. Howard retired early?

MR. ORTIZ: Object to form.

You can answer.

A. There -- it's twofold. You've got -- he -- the very last paragraph of the section, it said he failed to reduce his mitigating -- his

mitigating earnings by the last two years, 2016 and 2017. So otherwise, I don't have any issues with his methodology and how he calculated his numbers here.

However, I say that there are no factual basis that Mr. Howard retired prematurely due to his injuries, and that I don't see any facts here that show that he did.

(By Ms. Butler)

Q. So other than, as you noted in that last paragraph, your statement that Mr. Staller failed to consider that Mr. Howard worked into 2017 -- other than that issue that you just noted, is it correct that it's not the methodology; it's the facts that you disagree with?

MR. ORTIZ: Objection.

A. It's the lack of facts that I -- that I disagree with.

(By Ms. Butler)

Q. But you don't have a problem with the methodology that Mr. Staller used other than the one note you make in that last paragraph; correct?

MR. ORTIZ: Objection.

A. Correct. The methodologies and

calculations performed are -- I have no issue with.

(By Ms. Butler)

Q. Going down to the next section is titled "DROP Accumulation." This is something we haven't seen in any other reports. Is that your recollection as well?

A. Yes.

Q. Now, you state at the -- in the last paragraph on page 3 under that heading "DROP Accumulation," "As stated above, according to Mr. Howard's deposition testimony, he did not plan to remain employed with the police department which was a requirement to participate in DROP. Staller report is not based on reliable facts."

Do you see that?

A. Yes.

Q. The last sentence where you say "Staller report is not based on reliable facts," is that based on the sentence that precedes it?

A. Yes. He -- he has -- there's been no documents or facts showing that he joined DROP or planned to retire early.

Q. So similar to your criticism of

Mr. Staller in the section above, is your criticism with respect to the factual application and not the calculations that were made?

MR. ORTIZ: Objection.

You can answer.

A. Yes.

(By Ms. Butler)

Q. Going to the next section which is "Opinions & Basis," the first section is, again, "Past Medical Expenses." And as with the other reports, are you just repeating what Dr. Ji provided in his report here?

A. Yes.

Q. Going down to the "Veterans Benefits Administration Compensation" section, is -- is your methodology and analysis the same for this section of your report with respect to Mr. Howard the same as we've discussed with respect to those sections of other reports?

A. Yes.

Q. Okay. Would you agree with me that a new diagnosis for any of these plaintiffs could change the but-for Lejeune proportion of his benefits?

A. It could.

MR. ORTIZ: Object to the form.
You can answer.
A. It could.
(By Ms. Butler)
Q. And you did not take that into consideration in your projections of future benefits; correct?
MR. ORTIZ: Objection.
A. Correct.
(By Ms. Butler)
Q. And as we've discussed with other similar sections in other reports, the assumptions that are made in this section are the same as we've already discussed; correct?
A. Correct.
Q. Looking at Footnote 3 at the bottom of page 4 of your report, similar to your other reports, are you relying on Dr. Ji with respect to the conditions that you identify in that footnote as being related to Camp Lejeune?
A. Yes.
Q. And so were your opinions rendered in this report based upon Dr. Ji's opinions with respect to what conditions and disability ratings were related to Mr. Howard's Camp Lejeune

illness?

A. Yes.

Q. And your calculations are based on both, in this instance, the non-Hodgkin's lymphoma and the renal cell carcinoma on being related to his Camp Lejeune Track 1 illness; is that correct?

A. Yes.

Q. And so if Dr. Ji's determinations in that regard were wrong, then your analysis would be wrong as well; correct?

A. Correct. If he needs to change those, then I would update my analysis.

Q. Okay. Going to the next page of your report, there's a table and, again, it's -- it's setting out offsets. Under the "Past Medical Care," are those two numbers numbers that you obtained from Dr. Ji?

A. Yes.

Q. And so you didn't perform any independent evaluation or analysis of those numbers; correct?

A. Correct.

Q. And so in that chart, the numbers that reflect your testimony in this case are the VBA disability benefit numbers?

MR. ORTIZ: Objection -- objection.
(By Ms. Butler)
Q. Is that correct?
A. Yes.
Q. Okay. Looking at Mr. Howard's tables, Table 1 appears to be similar to tables we've seen in other reports; would you agree?
A. Yes.
Q. Okay. Obviously with his information?
A. Correct.
Q. Okay. Then we go to Table 2. And there are no more tables for Mr. Howard. Are we missing the next tables?
A. Yes.
Q. Okay.
A. You're missing your -- your favorite tables with the two different charts.
Q. That's what I was looking for. So it's Table 3 and, like, Mr. Cagiano is Table 6 and Mr. Mousser -- so we're missing my tables where I get to ask you all the questions about how you --
A. Correct.
Q. Okay.
A. Changes in the disability ratings over the time period.

Q. Okay. So could we add -- would you be able to add those tables?

A. Yes.

Q. Okay. And do you think your report would be more complete if you did add those tables?

MR. ORTIZ: Objection.

A. No. It is complete and the source documents that are listed have the data in there. It's really a summary to assist reviewing it, but I'll add the table and send it back.

(By Ms. Butler)

Q. Okay. With respect to Plaintiff Allan Wayne Howard, are there any opinions that you intend to express other than those contained within your report?

MR. ORTIZ: Objection.

You can answer.

A. No.

(By Ms. Butler)

Q. And is Exhibit 33, your List of Materials Considered, for that report?

A. Yes.

Q. Okay. I noted on Mr. Howard's Materials Considered List that you had reviewed the

depositions of a number of individuals: Westerlind, Clarke, Hunter, Hartwell, Ryan, Rivas, Tackaberry, and Zakaryan.

Do you see those?

A. Yes.

Q. Did you review all of those depositions?

A. No.

Q. Okay. Do you know why they're on your Materials Considered List?

A. They were provided.

Q. Okay. But they were not reviewed?

A. Correct.

Q. Do you plan to review them?

A. At this time probably not but maybe.

Q. Do you plan to render any opinions that you have not already expressed today?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. Okay. We have --

MR. ORTIZ: Are we done with Howard?

MS. BUTLER: Yes, we have two more reports.

MR. ORTIZ: Great.

MS. BUTLER: Getting down there.
(By Ms. Butler)
Q. I'm going to hand you what has been marked as Exhibit 34, which is the report for David Downs, and Exhibit 35, which is the Materials Considered List for David Downs.
And while I'm at it, I'm going to go ahead and give you Exhibit 36, which is for Mr. Fancher. That's his -- your report. And Exhibit 37, which is your Materials Considered List for Mr. Fancher?
(Exhibit Number 34 was marked.)
(Exhibit Number 35 was marked.)
(Exhibit Number 36 was marked.)
(Exhibit Number 37 was marked.)
MR. ORTIZ: Do you have a copy of Mr. Fancher's report?
MS. LAMACCHIA: Huh-uh.
MS. BUTLER: Yes. I'm sorry.
MR. ORTIZ: No, you're fine.
MS. BUTLER: Did I not hand it to you?
MR. ORTIZ: You're fine.
MS. BUTLER: I apologize.
MR. ORTIZ: That's fine.

MS. BUTLER: Yes, I do, David. Sorry.

MR. ORTIZ: Thank you.

(By Ms. Butler)

Q. Okay. So let's look at Mr. Downs first. Turning to Mr. Downs, the assignment and expert qualifications are the same as the other reports. Let's go to the introduction. There are no bullet points in this report.

Would you agree with me?

A. Yes.

Q. Okay. So the first paragraph appears to be the summary that we've seen similar to other reports; is that correct?

A. Yes.

Q. And then the next paragraph says "The purpose of this analysis is to evaluate alleged damages as presented by plaintiffs and to provide an expert opinion as to the value of any offsets to a potential award. All calculations are calculated to present value as of the date of this report"; is that correct?

A. Yes.

Q. And then you say "Plaintiffs have not presented an economic damage report" -- sorry --

"Plaintiffs have not presented an economic damage expert report regarding Mr. Downs. I will therefore only provide an opinion regarding offsets in this manner." Is that accurate?

A. Yes.

Q. And is that still true?

A. Yes.

Q. So the extent of your analysis for Mr. Downs is to provide an opinion regarding offsets; is that correct?

A. Correct.

Q. Okay. Going down below to your opinion on offsets, the past medical expenses paragraph appears to be the same except for the numbers as in other reports. And did you obtain those numbers and the information from Dr. Ji?

A. Yes.

Q. Okay. Going down to the "Veterans Benefits Administration Compensation" section, was your methodology and analysis and assumptions -- were they all the same as we've discussed for similar provisions in other plaintiffs' expert reports?

A. Yes.

MR. ORTIZ: Object to form.

You can answer.

A. Yes.

(By Ms. Butler)

Q. Is there anything that you did differently with respect to Mr. Downs in calculating his Veterans Benefits Administration compensation both past and future than you did for other plaintiffs in this case?

A. No.

Q. You indicate, after noting that you assume no other changes to his disability ratings and that you assumed a life expectancy with cost of living adjustments, that the total past and future VBA compensation benefits is calculated to be 132,569.

Do you see that?

A. Yes.

Q. And so is that the extent of the opinion that you are rendering with respect to Mr. Downs?

MR. ORTIZ: Object to form.

A. Yes.

(By Ms. Butler)

Q. Okay. And so in the summary, basically that number is in there along with some other numbers, but the extent of your opinion is really

limited to the total and past future VBA compensation benefits of 132,569; correct?

MR. ORTIZ: Objection. Asked and answered.

A. Yes, the 58,000 is from Dr. Ji and I calculated the 132-.

(By Ms. Butler)

Q. Okay. And what is the purpose of providing the chart in the summary?

A. For a total list of offsets to provide everyone a summary.

Q. And it's a summary that includes opinions rendered by other experts; is that correct?

MR. ORTIZ: Objection.

A. The 58,000 is provided by Dr. Wii [sic] --

(By Ms. Butler)

Q. Okay.

A. -- Ji.

Q. Going to the tables that are behind your report for Mr. Downs. Table 1 are his -- it's your table for VBA payments from the government; is that correct? That's your --

A. Yeah.

Q. -- calculation that we just discussed in the prior section?
A. Yes.
Q. The 132,569?
A. Yes.
Q. Okay. And then Table 2 is similar to tables we've looked at for other plaintiffs; correct?
A. Yes.
Q. Okay. And then Table 3 is similar to what we've looked at for other plaintiffs; correct?
A. Correct.
Q. So with respect to Mr. Downs, I have a question with respect to Table 3, and that's the last page 2 of 2. At the top, you see that there's a diagnostic code of 7500 for "renal cancer, status post right kidney removal, percentage 60 percent, effective date March 14, 2017."
Do you see that?
A. Yes.
Q. Where is that reflected in Table 2?
A. At the very beginning, that 70 percent is his combined rating which includes that and

that's when the losses start because that's when -- or the offsets would start because that's when he became -- had a -- a condition related to Camp Lejeune.

Q. And so once again that CLJA rate should be total combined rate?

MR. ORTIZ: Objection.

A. It is. On Table 1 it says "VA Benefits with CLJA," and then without; so it would probably be better if those same headings were over there to help.

(By Ms. Butler)

Q. Okay. And so as reflected in Table 2, you were showing that his combined rate is 70 percent as of 4/1/2017; is that correct?

A. Yes.

Q. And that his non-CLJA is 40 percent?

A. Yes.

Q. And you made those determinations using the -- the -- I'm trying to find his Materials Considered List -- using the tables that we've referred to in other reports; is that correct?

A. Yes.

Q. And is that the -- which table is that on Mr. Downs's Materials Considered List?

A. I don't see our table, the websites listed that are from the VBA. Let's see if it's in the references. There should be those two same websites for the compensation benefits. And the combined ratings should be added here.

Q. So those are the National Archives and Records Administration CFR Combined Ratings table and the US Department of Veterans Affairs Compensation and Pension Rate tables?

A. Yes.

Q. Okay. So those should be added to Mr. Downs Materials Considered List?

A. Correct.

Q. And that's how you equate the 60 percent service connected injury for renal cancer on 3/14/2017 to your Table 2?

A. That's how I connected. I get his combined rating from the sites that you just mentioned, and it turns into Table 2.

Q. Okay. So these need to be added. Is there anything else that you know that needs to be added to Exhibit 35, which is the Materials Considered List for Mr. Downs?

MR. ORTIZ: Object to foundation.

A. Not that I know of.

(By Ms. Butler)
Q. And are all of the opinions that you expect to render with respect to Mr. Downs contained within your expert report?
MR. ORTIZ: Objection.
You can answer.
A. Yes.
(By Ms. Butler)
Q. Okay. We are going to move to Ms. Fancher, which is -- your report is Exhibit 36, and your Materials Considered List is 37. Turning to Ms. Fancher --
MR. ORTIZ: Mr. Fancher.
MS. BUTLER: Sorry. Mr. Fancher.
MR. ORTIZ: It's all right.
MS. BUTLER: I'm sorry.
MR. ORTIZ: It's late in the day.
MS. BUTLER: Yes, late in the day.
(By Ms. Butler)
Q. With respect to Mr. Fancher -- sorry. I was looking at the next page where we talk about his wife, and so I apologize.
On page 2 of your report for Mr. Fancher the assignment and expert qualifications are the same as we've reviewed in other reports; correct?

A. Correct.

Q. Going to the introduction we have two bullet points that summarize your analysis; is that correct?

MR. ORTIZ: Objection.

(By Ms. Butler)

Q. Okay. Let me ask another question: Under the "Introduction" section of Mr. Fancher's report, it says "The purpose of this analysis" -- is the -- "if the following," but it should be "is the following"; correct?

A. Correct.

Q. And there are two bullet points there; correct?

A. Correct.

Q. First, to "evaluate alleged damages as presented in Plaintiffs' expert report prepared by Chad Staller"; is that correct?

A. Yes.

Q. And then to "determine the present value of any offsets to a potential award"; is that correct?

A. Yes.

Q. Turning to the next section of your report, it's titled "Staller Report."

Do you see that?

A. Yes.

Q. And you describe how the "Staller report includes an illustrative calculation to value the services of Mr. Fancher's wife that she provided for him, to help care for him for a period of time."

Do you see that?

A. Yes.

Q. And you state under that summary of Mr. Staller's report "While I do not take issue with the sources used in Staller report the illustrative calculations provided are unsupported."

Do you see that?

A. Yes.

Q. Is that -- did I read that correctly?

A. Yes.

Q. Okay. And we have discussed a similar provision in other reports. And is your criticism of Mr. Staller, with respect to what he did for the past medical and related care for Mr. Fancher -- is your criticism the same as we've discussed with other reports?

A. Yes.

Q. And you go on to state that the "Staller report makes no effort to determine what Mr. Fancher's wife actually provided and arrive at an expert opinion regarding the amount of care provided"; correct?

A. Yes.

Q. And so that's your criticism of Mr. Staller, not the calculations and the basis for the calculations; correct?

MR. ORTIZ: Objection.

A. The methodology and the sources used, I have no issues with.

(By Ms. Butler)

Q. And at the end of that section of your report, which is on page 3 at the top, you state that "Staller report is not based on reliable facts and data and provides no support of any opinion of the amount of medical care provided by Mr. Fancher's wife."

Do you see that?

A. Yes.

Q. And you -- you quote some deposition testimony before that; is that correct?

A. Correct.

Q. And so, again, is your criticism of

Mr. Staller the fact that he is letting a factfinder decide the facts as opposed to determining them himself?

MR. ORTIZ: Objection to form and foundation.

A. He didn't -- he -- in my opinion, he's not providing an opinion he's providing a -- a number. And he didn't do anything to determine if she spent one hour per day, in this calculation, for the past 28 years.

(By Ms. Butler)

Q. If there were to be testimony at trial and the factfinder were to determine that based on that testimony that there was support for applying a one hour per day calculation, do you take issue with the calculation that Mr. Staller did under those circumstances?

MR. ORTIZ: Objection to foundation.

A. No.

(By Ms. Butler)

Q. Okay. Moving to the next part of your report, which is "Opinions & Basis." Again, you start off with past medical expenses, and you refer to the report of Dr. Ji and provide some

numbers that are based on Dr. Ji's report; is that correct?

A. Yes.

Q. And Dr. Ji's report, you indicate, refers to benefits received from the VHA; correct?

A. Ask that again, please.

Q. In your summary of Dr. Ji's report, do you refer to payments from the VHA?

A. Yes.

Q. And, again, have you done any independent analysis of the VHA's ability to make those same payments in the future?

MR. ORTIZ: Objection.

A. Those are past medical expenses.

(By Ms. Butler)

Q. Right. I'm just asking if you've done any analysis of VHA into the future. I'm not sure I've asked that before.

MR. ORTIZ: Same objection.

A. No.

(By Ms. Butler)

Q. Okay. I've asked it with respect to Medicare, Tricare, TriWest and others, I just want to make sure I cover -- going down to

"Veterans Benefits Administration Compensation," is there anything in your analysis of the VBA benefits administration compensation for Mr. Fancher that is different than the methodology and analysis that you've described for other plaintiffs?

A. No.

Q. And, again, you are relying on Dr. Ji with respect to the VBA disability ratings that are related to his Camp Lejeune conditions; is that correct?

A. Yes.

Q. And so going to the top of page 4, you state total past and future VBA compensation benefits is calculated to be 368,399; is that correct?

A. Yes.

Q. And so is that the extent of your calculation with respect to this plaintiff, Mr. Fancher?

MR. ORTIZ: Objection.

A. Regarding the VBA disability benefits.

(By Ms. Butler)

Q. Well, did you do any other calculations for Mr. Fancher?

A. No.
Q. Okay. So that's the extent of your opinion with respect to Mr. Fancher; correct?
A. That's my opinion for these. I've added -- I've been asked to give the total offset number, and I needed to include Dr. Ji's total to arrive at total offset amount.
Q. Okay. And so, again, you're adding what you determined in VBA disability benefits to figures that were determined by Dr. Ji; correct?
A. Yes.
Q. And in so doing you're not intending to imply how any of those offsets should be applied in this case; correct?
MR. ORTIZ: Objection.
A. Correct.
(By Ms. Butler)
Q. And with respect to your report for Mr. Fancher and including the tables, which I'm not going to go through because we've gone through a lot of tables already, but is there anything different with respect to your methodology or your opinions regarding Mr. Fancher other than what we have discussed with respect to other plaintiffs?

A. No.
Q. Are all of the opinions you intend to render with respect to Mr. Fancher included in your expert report?
MR. ORTIZ: Objection.
You can answer.
A. Yes.
(By Ms. Butler)
Q. Okay. I have a few more questions, but I can probably wrap up. Do you want to keep going, or do you want to take a quick break?
MR. ORTIZ: How long do you think you have? 15 minutes or less?
MS. BUTLER: Hopefully.
MR. ORTIZ: Then I -- I think we can just press on.
(By Ms. Butler)
Q. Okay. I am going to -- I'm going to hand you what has been marked as Exhibit 38, which is a Supplemental Materials Considered List.
(Exhibit Number 38 was marked.)
MR. ORTIZ: Are we -- that was the next Exhibit Number? I just want to be sure.
MS. PRUIETT: Correct. 38.

MR. ORTIZ: Thank you.

MS. BUTLER: I need a copy. I don't know where mine went. Oh, here it is. Never mind. I got it. Okay.

(By Ms. Butler)

Q. Have you seen this document before today?

A. Yes.

Q. Did you prepare this document?

A. No.

Q. Okay. Are you aware of anything else that you have reviewed with respect to any of the reports that you intend to testify about in this litigation that have not been indicated on the materials considered lists that we already looked at, your reports that we already looked at, or this Supplemental Materials Considered List?

A. No.

Q. So I note that you reviewed a number of the Track 1 trial plaintiff damage assessment forms. Do you see those bullet points on there?

A. Yes.

Q. Do you intend to render any opinions with respect to the damage assessment forms of any of the plaintiffs in this case?

MR. ORTIZ: Objection.
You can answer.
A. No.
(By Ms. Butler)
Q. Okay. You reviewed the rebuttal expert opinion report of Marjorie Hackett-Wallace and the corrected rebuttal expert opinion report of Marjorie Hackett-Wallace; is that correct?
A. No. These were provided to me. I have not reviewed all of these.
Q. Do you expect to render an opinion with respect to the expert reports of Marjorie Hackett-Wallace?
A. No.
Q. Okay. And, in fact, you haven't reviewed them to date; correct?
A. Correct.
Q. Do you intend to review them?
MR. ORTIZ: Objection.
And "them" being the reports of Ms. Wallace.
MS. BUTLER: The -- Ms. Hackett-Wallace's reports.
A. I don't know.
(By Ms. Butler)

Q. It indicates you reviewed the rebuttal expert report of Chad Staller.

Do you see that?

A. Yes.

Q. Do you intend to express any opinions not already discussed here today with respect to the opinions of Mr. Staller?

MR. ORTIZ: Objection.

A. No.

(By Ms. Butler)

Q. It says you reviewed the expert report and expert testimony of Peter Rybolt. Did you, in fact, review that report?

A. Yes.

Q. Do you expect to render any opinions with respect to the expert report and expert testimony of Peter Rybolt?

MR. ORTIZ: Objection.

You can answer.

A. Not at this time.

(By Ms. Butler)

Q. You say "not at this time." Do you expect to be asked to render such opinions?

MR. ORTIZ: Objection.

You can answer.

A. I don't know. If I were asked to, I could.
(By Ms. Butler)
Q. Okay. But to date, you haven't been asked to?
A. Correct.
MR. ORTIZ: Objection.
(By Ms. Butler)
Q. It says you reviewed the expert report of Anirban Basu and a number of amended appendices.
Do you see that?
A. I see that and these are -- these are as materials considered. They were provided. I have not reviewed them.
Q. Do you plan to review Mr. -- Dr. Basu's report and appendices?
MR. ORTIZ: Objection.
You can answer.
A. I don't think so.
(By Ms. Butler)
Q. You also apparently were given materials considered lists for three experts. Do you see those bullet points on there?
A. Yes.

Q. Based on -- did you, in fact, review those materials considered lists?

A. I may have opened up Chad Staller's, but I don't recall.

Q. Did you review any of the materials on those lists?

A. I can't tell you what's -- can you show me the list?

Q. Well, let me ask you: When you reviewed those materials considered lists that are identified on Exhibit 38, did you go to any of the materials that were on there?

A. Not at that January 27th -- as of that date, no.

Q. Okay. This next item is a series of Bates numbers for Mr. Criswell. And I have a copy here, and I'm glad to hand it to you. I don't necessarily need to mark it as an exhibit unless we need to talk about it, but I was curious why you reviewed Bates numbers 5428 through 5450 for Mr. Criswell.

A. I saw they were provided, and I reviewed them and did nothing with them.

Q. Okay. And so those Bates numbers 5428 through 5450 that are on your materials

considered lists -- do they have any impact on your opinions with respect to Mr. Criswell in this case?

A. I don't think so. They appeared to be medical records that I don't usually look at. So I did not give it attention.

Q. Okay. Is there anything else that you have reviewed in this case that you -- could change any of your opinions in this matter?

MR. ORTIZ: Objection to form and foundation.

You can answer.

A. I don't think so.

(By Ms. Butler)

Q. Now, I did not see on your materials considered lists any of the other defense economic reports such as Dr. Brod and Dr. Tosic. I think we already went over this, but you did not review their reports; is that correct?

A. Correct.

Q. And same question as to the defense expert, Gregory Russo. Have you reviewed his report?

A. No.

MS. BUTLER: If I could take a few

minutes I think I can wrap up this really quickly.

MR. ORTIZ: Yep.

THE VIDEOGRAPHER: Time is now 5:01. We're off the record.

(A recess was taken.)

THE VIDEOGRAPHER: Time is now 5:08 and we're back on the record.

(By Ms. Butler)

Q. Ms. Yount, it's been a day of looking at numerous reports. I think that they are Exhibits 20, 22, 24, 26, 28, 30, 32, 34, and 36 in case you need to go back to them.

Which sections in your reports rely on your calculations and expertise as opposed to other experts' calculations and expertise?

MR. ORTIZ: Objection.

(By Ms. Butler)

Q. And if you want to use one as exemplary, if you want to go through each one individually, it's up to you.

A. In every report that I used Dr. Ji's opinion for past medical care offsets, that is his opinion that I've used to calculate total offsets. And I have -- I think that's it.

Q. Now, you have used Ms. Navarro's reports; correct?

A. Correct. I've used their reports to calculate my opinion of the present day value of those.

Q. And Mr. Shahnasarian as well; correct?

A. Correct.

Q. And you've used Dr. Henry Miller's reports; correct?

A. Correct.

Q. And when you are using these reports of other individuals, for example, Dr. Ji, you're not expressing any opinion, you're just providing a summary of their report; correct?

MR. ORTIZ: Objection.

A. He's the only one that I've done that.

(By Ms. Butler)

Q. With respect to Henry Miller, you've taken his numbers and you've applied some calculations; correct?

A. I've done just what Staller's done with Fryar's report. I've calculated the present day value based on a set of current day medical care expenses.

Q. And so other than taking Dr. Miller's

numbers and applying the calculations you just indicated, would it be accurate to say the other portions of these reports that are your analysis are the VBA disability benefits portions of these reports?

MR. ORTIZ: Objection.

A. The -- no, everything in here are my opinions and calculated except for Dr. Ji's number. I've done an analysis and calculation on everything else.

(By Ms. Butler)

Q. I've asked you a lot of questions today about whether you have independently analyzed or validated other experts' reports, and you've repeatedly stated "no."

Are you now changing your testimony?

MR. ORTIZ: Objection. Misstates prior testimony.

A. No. You've asked me if I have independently verified their reports. My role is to take their opinions and to come up with a present day value. You can't get to my number without their report.

(By Ms. Butler)

Q. Okay.

A. So I am relying on their report just as Staller did with Michael Fryar's report, to give a base amount and we calculate it out to present or to life expectancy and discounted to present value.

I'm not giving any validity to their report. I'm taking what their report is and saying, assuming it's accurate, and then I've prepared an opinion based off of that.

Q. Okay. Thank you for that explanation.

We looked at, in a number of these reports, some of the headings that perhaps could have been better descriptive. You know what I'm referring to?

A. I do. I understood what it is, but I need to make it better so everyone can understand it, yes.

Q. Who created those headings?

MR. ORTIZ: Objection.

A. I -- I did.

(By Ms. Butler)

Q. So with respect to all of the tables attached to your reports, is it your testimony that you created all of those tables including the headings and the information in there?

A. Yes. I have -- some of the staff would help with data inputs, and I have finalized everything in every one of these reports.

Q. Okay. I have noted that we've been here all day, and you have a folder with you there today. Is there any material in that folder? Okay. That's what --

A. It's for me to --

Q. I wanted to make sure there wasn't anything that you brought here today that you were referring to. I appreciate that.

MS. BUTLER: I have no further questions, but I do want to hold the deposition open. I want to note a few things with respect to Mr. Criswell. I understand that Ms. Yount will be updating the table and provide the summary of ratings. There was some missing information that's Exhibit 22.

In the Mousser report the tables for -- we learned that the tables for all of the plaintiffs' reports are Excel spreadsheets that have formulas that were not provided to us.

And with respect to Mr. Howard, there are tables that are missing. That's Exhibit 32.

With respect to Downs, there's cites

missing from the Materials Considered List and that -- I think that's Exhibit 35 that she intends to add.

And we understand that there are time sheets and monthly projections that would be responsive to our request for production and that were not provided.

So I wanted to note that for the record.

MR. ORTIZ: And we can deal with that after the deposition?

MS. BUTLER: Yes. But I -- I want to hold it open at this time while those things are being updated and produced, and then make a determination about whether we need to gather back.

MR. ORTIZ: Yeah, we -- we can discuss that after the deposition. Are you passing the witness?

MS. BUTLER: Yes. I have no further questions.

Thank you very much for your time and patience today.

MR. ORTIZ: I have no questions.

Thank you very much, ma'am.

THE VIDEOGRAPHER: This concludes

the video deposition of Tricia Yount. Time is now 5:15, and we're off the record.

THE STENOGRAPHER: Any transcript orders?

MR. ORTIZ: I think we have a standard.

MS. BUTLER: We have a standard -- we all have standard orders.

(The deposition was concluded at 5:15 P.M.)

CERTIFICATE OF REPORTER
STATE OF SOUTH CAROLINA
COUNTY OF CHARLESTON

I, Bethany Morse, Registered Professional Reporter and Notary Public for the State of South Carolina at Large, do hereby certify that the witness in the foregoing deposition was by me duly sworn to testify to the truth, the whole truth and nothing but the truth in the within-entitled cause; that said deposition was taken at the time and location therein stated; that the testimony of the witness and all objections made at the time of the examination were recorded stenographically by me and were thereafter transcribed by computer-aided transcription; that the foregoing is a full, complete and true record of the testimony of the witness and of all objections made at the time of the examination; and that the witness was given an opportunity to read and correct said deposition and to subscribe the same.

Should the signature of the witness not be affixed to the deposition, the witness shall not have availed himself/herself of the opportunity to sign or the signature has been waived.

I further certify that I am neither related to nor counsel for any party to the cause pending or interested in the events thereof.

Witness my hand, I have hereunto affixed my official seal on 25th day of February, 2026, in North Charleston, Charleston County, South Carolina.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

THE VIDEOGRAPHER: We are now on the record. My name is David Lane, videographer for Golkow, Veritext division.

Today's date is March 13, 2026. Our time on the record is 9:00 a.m. Pacific Time.

This remote video deposition is taking place in the matter of Camp Lejeune Water Litigation.

Our deponent today is Peter Rybolt.

All parties to this deposition are appearing remotely and have agreed to the witness being sworn in remotely. Due to the nature of remote reporting, please pause briefly before speaking so that all parties are heard completely.

All counsel will be noted on the stenographic record.

The court reporter today is Christine Taylor and will now swear in the witness.

* * *

PETER RYBOLT,

having first been duly sworn, was examined and testified as follows:

* * *

THE VIDEOGRAPHER: Please begin.

EXAMINATION

BY MR. CROMWELL:

Q. Good morning, Mr. Rybolt. How are you today?

A. I'm good. How are you?

Q. I'm doing well.

Will you, just for the record, please state your full name?

A. Peter Rybolt.

Q. And, Mr. Rybolt, as indicated before, my name is Michael Cromwell. And I am an attorney with the U.S. Department of Justice, and I am representing United States in the Camp Lejeune Water Litigation in which you are testifying today. You understand that?

A. Yes.

Q. Okay. And, Mr. Rybolt, you have been deposed before; is that correct?

A. Yes.

Q. And are you familiar with the general rules and the procedures of depositions?

A. I am.

Q. Okay. You have done very well so far. I'll be asking questions. You'll be answering them. Obviously, the court reporter will be taking answers down. Please wait for me to finish my question, and I will do the same and let you finish your answer.

Obviously, doing this remotely, giving just a little bit of time because of any kind of delays just being done in a remote fashion; is that fair?

A. Sure.

Q. Counsel may object on your behalf. But unless otherwise specifically instructed, you may answer the question; is that fair?

A. That's my understanding, yes.

Q. Okay. And if you would, and you've done well so far, answer verbally, right. If you can answer questions yes or no, you may do so. Transcripts don't pick up head nods and so forth. Exactly. So I appreciate verbal answers only.

A. Of course.

Q. If you don't understand a question, which I undoubtedly will ask some poor ones, please, you know, let me know, and I will do my

best to rephrase the question. Is that okay?

A. Sure.

Q. If you do answer the question, I will assume you understood the question and you answered accordingly; is that fair?

A. I think that's reasonable.

Q. If you need a break for any reason today, just let me know. The only request is that if I have a question pending, I request that you answer the question and then we can take a break. Is that okay?

A. Yes.

Q. All right. Mr. Rybolt, any reason, medical or otherwise, that you cannot hear, understand, or respond to my questions to the best of your ability today?

A. No.

Q. Okay. And as previously noted, your deposition is occurring remotely. Where are you presently located for your deposition?

A. In Los Angeles, California.

Q. And are you in your house or at an office?

A. I'm in my house today.

Q. Okay. Is anyone in the room or in

your house with you today?
A. No.
Q. Okay. Besides your computer that you're obviously using to take the deposition, do you have any kind of electronic communication devices with you or near you?
A. Well, my phone, but it's over there on the table.
Q. Okay. Understand. Just we simply ask that during the course of the deposition that you refrain from using electronic devices, obviously except for your laptop that you'll be using to communicate and access any exhibits that we use; is that fair?
A. Of course. Yes.
Q. Okay. Because this deposition is occurring remotely, I will be uploading any exhibits that we use into the chat. You can download those exhibits from the chat. So I would just ask that you have that function open so that you're able to access the exhibits.
A. I have it now.
Q. Okay. And, Mr. Rybolt, you understand that you're testifying under oath as if you would be testifying in front of a judge in

a court of law; is that correct?

A. Yes.

Q. And you have given not only deposition testimony before but trial testimony as well; is that correct?

A. Depositions, trial, other hearings, arbitrations, yes.

Q. Understood. And I'm going go ahead and enter into the chat what we've marked as Exhibit 1. And if you would, just let me know when you receive that.

A. I have. Let me open it up. Okay. And it's open.

(Exhibit 1 marked for identification.)

Q. So Exhibit 1 is simply a list of expert testimony from you that was produced to the United States dated 2022 to the present; is that correct?

A. That's correct.

Q. And according to your testimony list, you last gave deposition testimony in 2025; is that right?

A. I believe -- yes, I believe that's correct.

Q. Okay. Is that current? Have you given any sort of deposition testimony since then?

A. No, I don't believe so.

Q. Okay.

A. And the answer to the first part of your question is, yes, I believe it's current.

Q. Okay. Thank you.

Just to complete that out, you have not given any sort of trial or arbitration testimony in addition to what's listed in Exhibit 1; is that correct?

A. Since 2022, that's correct. Yes, several things -- everything keeps getting pushed this year. I don't know why, but yes.

Q. Understood. Exhibit 1 indicates that you have testified approximately eight times either in deposition or in trial or in an arbitration since 2022; is that fair?

A. That sounds right.

Q. You have listed three arbitration matters that you've identified as confidential, and I understand the basis for that. Can you, generally speaking, give me the subject matter in which you were testifying about in those three

arbitrations?

A. Let me remind myself what they were.

Q. Sure. We can start with the first one.

A. Sure.

Q. At the top is listed confidential from the year 2025, and this has took place in the DGA arbitration. What does DGA, first, stand for?

A. The Directors Guild of America.

Q. Understood. Do you recall the subject matter in which you were offering a declaration or report in that case?

A. There was -- I think I can tell you generally that it was a dispute regarding residuals that producers pay.

Q. Understood. Okay. And the second one listed has confidential again from 2025 and is JAMS, obviously a common arbitration site. Can you recall what sort of opinions or, generally speaking, the type of testimony you were offering in those -- that case?

A. Trying to recall. I should remember this. It was just last year. Oh, yes, it was a case involving the film industry involving

violations of a development contract. Things of breach of contract, I guess.

Q. I was going to say were you offering opinions with regards to damages from a breach of contract, generally speaking?

A. Generally speaking, I think that's fair.

Q. Okay. And then the third one listed on Exhibit 1 listed as confidential is from the years 2023 until 2024, and taking place at the American Arbitration Association; is that correct?

A. That's correct.

Q. And do you recall generally the subject matter in which you were offering testimony or opinions about?

A. Broadly, I would say it was the claims related to copyright trademark and breach of contract.

Q. Gotcha. Understood. Okay.

You have also listed on Exhibit 1 testimony from a case entitled SMC Specialty Finance, LLC, versus on Han Samping, et al., dated 2025; is that correct?

A. That's correct.

Q. And this was a -- is this contractual fraud lawsuit? Is that what this is about?

A. Yeah. That would be a fair characterization, yes.

Q. And what kind of testimony were you offering in that case?

A. It was generally related to amounts due to the various parties in -- related to the contracts between them.

Q. Okay.

A. The breach of contract.

Q. So that case involves you offering testimony with regards to damages stemming from a breach of contract?

A. Broadly speaking, yes.

Q. Okay. The next case was Summerton v. Goldco Direct, LLC. Do you see that?

A. Yes.

Q. And is this case about the Telephone Consumer Protection Act?

A. Yes, it was.

Q. Okay. And what kind of testimony were you offering in this case?

A. We were attempting to help define the class and class damages.

Q. What kind of damages were you opining on in that case?

A. Damages related to -- well, that's an interesting question. But violations of the telephone -- TPA, which was kind of an interesting concept. But, yes, you know, what are damages if you are -- if there are -- for the sake of violations of the TPA. Does that make sense?

Q. It does. It does. Okay.

The next case you gave deposition testimony was with regards to the In Re: Trust B of the Hooten Family Trust dated 2024. Do you see that?

A. Yes.

Q. What kind of opinions or testimony were you offering in that case?

A. This was a dispute between relatives regarding the disposition of assets in a family trust, and I worked on determining what was owed to whom.

Q. And this had to deal with trust litigation; is that right?

A. Correct.

Q. Okay. And then the last one is --

and forgive me if I'm pronouncing this incorrectly. Jaeschke v. Bella and Canvas, LLC, et al., dated 2023 and 2024; is that right?

A. Correct.

Q. And my understanding, this case was about dispute involving intellectual property, media, and entertainment; is that right?

A. True. It was an individual who had claims against -- for violations or unauthorized use of his image.

Q. Gotcha. And what kind of opinions or testimony were you offering in that case?

A. It was quite limited and it related to examining sale records for certain categories of products.

Q. Gotcha. Okay.

Mr. Rybolt, have you ever testified in a wrongful death case before?

A. I've testified in cases in which there were personal injuries or wrongful death, usually in the construct of a product defect case.

Q. Gotcha. How many times have you testified in such a case?

A. I don't recall if I've testified in

such a case. I've worked on many where I would have managed the case. I don't believe I ever testified a case on that particular topic.

Q. Okay. So as you sit here today, you've never testified in a wrongful death case?

A. To the best of recollection, no.

Q. Okay. And the same would be true, you've never testified in a personal injury case?

A. Well, it really depends on how you define that. If you're talking about an individual claiming some sort of bodily harm, no. But there are, of course, other forms of injury.

Q. Sure. Yeah. So if we're confining personal injury to somebody alleging, you know, bodily harm to themselves, have you ever testified in such a personal injury case before?

A. Under that specific definition of a single individual claiming bodily harm, no. But in other cases, there were many individuals involved in which bodily harm or wrongful death were at issue. Or for that matter, other matters in which there is a loss of earnings, that comes up quite frequently, whether it's individuals or, you know, corporate entities, business entities.

Q. What -- when is the last time you

testified about an individual incurring lost earnings?

A. I don't recall the exact date, but I've testified in multiple cases involving loss of earnings related to wrongful termination or breach of contract.

Q. Have you ever been asked to testify about veterans benefits in any way?

A. I think there that there have been matters that I have worked on in which veterans benefits were an element of the analysis. But not -- I have not testified on that specific topic.

Q. Okay. Have you ever been asked to calculate a veterans disability benefits before?

A. As I said, I believe veterans benefits have been part of other calculations about lost earnings or compensation, that has come up before.

Did you ask if I have testified on that subject? Or did you just ask --

Q. I have asked, did you testify -- have you ever testified in that --

A. No, I have not testified on that, on a case that involved that particular calculation.

Q. So when you say there were cases you have been involved in, what exactly -- what kind of case were you involved in where you were offered or you were working on issues involving veterans disability benefits?

A. It would have been claims perhaps or related to broader injuries where veterans benefits were some element of the calculation or similar mentioned benefits, disability benefits of other kinds, things like that. That comes up from time to time.

Q. What kind of cases does it come up in if not a personal injury or wrongful death kind of case?

A. Where perhaps someone has claims for, you know, where there's other -- some other interruption of income that could come up. Perhaps we're looking at how it would have affected some other asset, like a trust, for example. You know, whether those benefits stream into another vehicle. It comes up.

Q. Are you aware of any court ever excluding or limiting your opinions or testimony in a case?

A. No.

Q. Okay. Mr. Rybolt, you are testifying today as a result of a notice of deposition and subpoena that you received; is that correct?

A. Yes.

Q. Okay. And I'm going to go ahead and introduce Exhibits 2, 3, and 4.

(Exhibits 2, 3, and 4 marked for identification.)

BY MR. CROMWELL:

Q. Bear with me.

A. Which one do you want me to look at?

Q. Sure. So, Mr. Rybolt, just for the record, Exhibit 2 is the notice and deposition sent to you on February 20, 2026.

Exhibit 3 is the amended notice dated March 4, 2026.

And Exhibit 4 is plaintiff's responses and objections to Exhibit 3.

Just for clarity, if you would, open Exhibit 3.

A. Okay.

Q. And I can share my screen as well here.

A. I have Exhibit 3 open if that's what you're going to share.

Q. I worry sometimes that it slows down the broadband. So I'll share it just for the moment.

A. Okay.

Q. Mr. Rybolt, what we're looking at is Exhibit 3. This is the subpoena and notice of deposition you received and is dated March 4, 2026; is that right?

A. Correct.

Q. Okay. And if we scroll to the bottom of Exhibit 3, there is a section entitled "Attachment A"?

A. Uh-huh. Yes.

Q. And it lists a set of -- of requests for documents that were sent to you. Have you ever reviewed these requests before?

A. Yes, I did.

Q. Okay. And are you aware of counsel providing responses and objections to these requests?

A. I am aware of that.

Q. Okay. And if we pull up Exhibit 4, and these are plaintiffs' objections and responses to defendant's notice of deposition and of request for production of documents to Peter

Rybolt; is that correct?

A. Yes.

Q. Did you have any role in formulating the responses and objections in here?

A. I discussed Appendix A with counsel, and he sent me a draft which I reviewed.

Q. You reviewed these responses?

A. Yes.

Q. Okay. And did you also provide documents that were responsive to the document requests as well?

A. There was nothing responsive to your requests other than our engagement letter and invoices, I think, which I believe counsel provided to you.

Q. Okay. Just for clarity you understand that counsel did provide your retention or engagement letter as well as the invoices that you have submitted for working on this case; is that right?

A. That's my understanding.

Q. Okay. Are you aware of any other documents that are responsive to these requests that were not produced aside from those we just discussed?

A. I am not aware of any.
Q. Okay. Go ahead and stop sharing that.
All right. Mr. Rybolt, what, if anything, did you do to prepare for today's deposition?
A. Well, reviewed my report, reviewed back up, and discussed with counsel.
Q. When you say --
A. Excuse me. Let me amend that. Counsel and members of my team.
Q. Okay. Sorry, did not mean to interrupt you.
When you say you reviewed backup, what are you referring to?
A. I looked at the documents that are cited in my report.
Q. Okay. Did you review all of the documents you recited or just a select few?
A. I would think that I reviewed most of them. There might have been some, like my CV or something, that I didn't feel a need to review or something like that.
Q. Understood. Did you -- did you meet with any attorneys in preparation for your

deposition today?

A. Yes.

Q. And without telling me the substance of those meetings, can you tell me how many times you met with these attorneys and for how long?

A. That's probably not a precise response. I've talked to Ben several times since the report was filed. But I think we did two specific sessions where we talked about preparing for deposition.

Q. Okay. And how long were those sessions?

A. I think the first one was roughly an hour, and the second one was roughly two hours.

Q. Okay. Were members of your team involved in those deposition prep sessions?

A. One member.

Q. Okay. Can you tell me who that was?

A. His name is Josh Brown.

Do you need me to spell that for Christine.

Q. No. Thank you.

Have you had any communications with anyone other than an attorney or members of your team about your deposition today?

A. No.

Q. Have you ever had any communications with any of the individual plaintiffs in this litigation?

A. No.

Q. Have you had any communications with any of the plaintiffs' treating physicians in this case?

A. No.

Q. Okay. Have you had any communications with any other experts who have been disclosed in this case?

A. No. Let me -- just to be absolutely clear, certainly not in connection with this case. It's possible that I've had some interaction with one or more of the experts in the past, but nothing that comes to mind.

Q. Okay. Have you ever had any interactions with Mr. Chad Staller before?

A. Not that I recall.

Q. When did you first become aware of Camp Lejeune litigation?

MR. VANSLYKE: Objection.

THE WITNESS: Well, under the CLJA or more broadly?

BY MR. CROMWELL:

Q. Well, let's start with were you familiar with any Camp Lejeune litigation prior to being engaged as an expert?

A. I think I was generally aware that there were claims of water contamination. I don't -- I don't have much more of a memory than that. But I think I was generally aware of it.

Q. Okay. Prior to being engaged in this case, these particular cases, were you ever sought out as an expert for prior litigation involving Camp Lejeune water?

A. No.

Q. Okay. You understand you have been hired as an expert witness offering a report and testimony in Camp Lejeune litigation; is that correct?

A. In this matter, yes.

Q. And you understand that you are named by plaintiffs as a rebuttal expert witness; is that right?

A. That's my -- I guess that's my general understanding.

Q. Okay. Going to go ahead and introduce Exhibit 5.

(Exhibit 5 marked for identification.)

BY MR. CROMWELL:

Q. And, Mr. Rybolt, this is what we've marked as Exhibit 5 is "Plaintiffs' Designation and Disclosure of Phase III Damages and Offset Rebuttal Expert Witnesses" dated January 20, 2026; is that correct?

A. If you say so. I have not seen the date yet.

Q. Sorry. I can share my screen just for a moment.

A. Okay.

Q. If you look here, these are "Plaintiffs' Designations and Disclosures of Phase III Damages and Offsets Rebuttal Expert Witnesses," and it has listed you, Mr. Peter Rybolt, under each of the respective diseases: Kidney cancer, leukemia, non-Hodgkin's lymphoma, bladder cancer, and Parkinson's disease; is that correct?

A. I'm just reading the document along with you. I haven't seen this document before, I don't believe.

Q. Okay. Are you -- and I'll stop

sharing this.

Are you familiar with each of the 22 current plaintiffs in the Camp Lejeune litigation?

A. Define familiar.

Q. Well, let me put it a different way. You are not offering expert opinions specific to each plaintiff; correct?

Your opinions apply equally to each case in which a plaintiff has received or will receive VBA disability benefits and the U.S. is seeking an offset; is that correct?

MR. VANSLYKE: Objection.

THE WITNESS: I am responding -- I don't know if I think that the characterization that I'm responding to each plaintiff in which that is true, but broadly or in general to the plaintiffs for which that is true. Does that make sense?

BY MR. CROMWELL:

Q. I think we're probably saying the same thing. I'm just trying to make sure that we are.

You would agree with me you're not

offering any kind of specific case-specific opinions that only apply to a individual plaintiff; correct?

MR. VANSLYKE: Objection.

THE WITNESS: I think we're saying the same thing. But, again, just to be clear, I'm offering opinions about instances in general in which the government is claiming offsets based on VBA disability benefits. That could be said to affect plaintiffs individually. That's just the little part that I'm struggling with. But I am not responding or calculating damages with respect, I guess, to individual plaintiffs, if that's what you mean.

BY MR. CROMWELL:

Q. Understood. And the difficulty trying to parse it apart. It seems like your opinions apply equally across to each of the plaintiffs that you've identified as a VBA bellwether plaintiff; correct?

MR. VANSLYKE: Objection.

THE WITNESS: Sorry, Ben.

I don't know about equally. But,

yes, I think they apply to the plaintiffs that are identified in my report.

BY MR. CROMWELL:

Q. Okay. And in your report you refer to plaintiffs as VBA bellwether plaintiffs; is that right?

A. Yes.

Q. Okay. And just for simplicity's sake, if I use the term "VBA bellwether plaintiffs," can we agree it's the same way in which you've used that term in your report just so we have a common understanding?

A. I think that's fair.

Q. Okay. And based your usage of that term, the term specifically refers to 14 of the 22 plaintiffs; is that correct?

A. Just to -- yes, that is correct with respect to my report. I think it is -- or could be a little bit of a moving target. I'm not trying to make that definitional with respect to the claims in the case if that makes sense. But those our -- I am referring to 14 specific plaintiffs generally in my report.

Q. Well, the opinions that you're offering in this case are specifically with

regards to the following cases: Mr. Mark Cagiano, Jefferson Criswell, Cometto Davis, David Downs, David Fancher, Joseph Gleesing, Bruce Hill, Allan Howard, Scott Keller, Jerry Laramore, Gary McElhiney, Frank Mousser, and Edgar Peterson and Richard Sparks; is that correct?

A. Well, I don't have my report in front of me, and I didn't memorize all of the names. If you're reading that from my report, from the footnote where I identified those plaintiffs, then I'm willing to accept that that's the correct list.

Q. Okay. Well, just for completeness, I will go ahead and enter your report, which we've marked as Exhibit 6.

(Exhibit 6 marked for identification.)

A. Okay. I have it open.

Q. Okay. And if you would do -- look at what's marked as page 1, it's PDF page 3, at the bottom you have a footnote number 4; is that correct?

A. Yes.

Q. And the individual plaintiffs I just named are the plaintiffs you have identified as

the VBA bellwether plaintiffs; is that right?

MR. VANSLYKE: Objection.

THE WITNESS: If you give me -- sorry, Ben, did you object?

MR. VANSLYKE: Yes, but you can proceed.

THE WITNESS: Okay.

Mr. Cagiano, Mr. Criswell, Mr. Davis, Mr. Downs, Mr. Fancher, and Mr. Gleesing, Mr. Hill, Mr. Howard, Mr. Keller, Mr. Laramore, Mr. McElhiney, Mr. Mousser, Mr. Peterson, and Mr. Sparks. So I think we agreed.

BY MR. CROMWELL:

Q. Okay. As far as you know, as you sit here today, you are not offering expert opinions relevant to any other bellwether plaintiffs in these cases; is that correct?

MR. VANSLYKE: Objection.

THE WITNESS: I think we get into a little bit of a legal conclusion. I don't want to foreclose the possibility that other plaintiffs could emerge with the same issues, but to my knowledge, sitting here today, those are the 14.

BY MR. CROMWELL:

Q. Understood. Have you seen any kind of information, deposition testimony, or expert opinions with regards to any of the other bellwether plaintiffs?

MR. VANSLYKE: Objection.

THE WITNESS: I don't believe so.

BY MR. CROMWELL:

Q. Okay.

A. I don't recall looking at other expert -- or expert reports regarding other plaintiffs. Although, I believe there was one that was initially identified and then settled or withdrew. So that might be an exception.

Q. Understood. The report that you have produced that we've marked as Exhibit 6, this is the only report you have created in these cases; is that correct.

A. In the Camp Lejeune cases?

Q. Yes.

A. Yes, this is -- this is it.

Q. As you sit here today, do you have any intention of offering any other reports in these Camp Lejeune cases?

A. Well, it's not up to me. But I have

not been asked to do so at this point.

Q. Is it fair to say that this report sets out the totality of and the scope of the opinions you plan to offer in these cases?

A. At least at this point, that's my understanding.

Q. Okay. To put it differently, at this point, you are not planning or offer or form any additional opinions; is that correct?

A. I haven't been asked to go beyond what's here, but that could happen obviously.

Q. Okay. But as you sit here, you have not been asked to do that; correct?

A. Correct.

Q. Okay. Looking at Exhibit 6, your report, you provided a materials considered list which you attached as Appendix B to your report; is that correct?

A. Yes.

Q. And this is the list that begins on page -- PDF page 37 of Exhibit 6; is that correct?

A. That appears to be correct, yes.

Q. Okay. You have also provided what we've entitled "First Supplemental Materials

Considered List," and this is what we have marked as Exhibit 7. I'll go ahead and enter that as well as Exhibit 8.

(Exhibits 7 and 8 marked for identification.)

BY MR. CROMWELL:

Q. If you look at Exhibit 7, Mr. Rybolt, this is entitled "First Supplemental Materials Considered" dated March 9, 2026; is that correct?

A. Yes.

Q. And this identifies the depositions of Andrew Brod, Andrew McIlroy, and Tricia Yount; is that correct?

A. That's correct.

Q. Did your review of these depositions affect the opinions you're offering in this case?

A. Not in any meaningful way.

Q. Did they affect your opinions in any kind of way?

A. I don't believe so. There was very little discussion or response to what I said, so I don't believe that they were terribly informative.

Q. Okay. Exhibit 8 is entitled "Second Supplemental Materials Considered" dated

March 10, 2026; is that correct?

A. Correct.

Q. And in this, you have cited to two documents. One is CLJA_USA_Yount_139 and this is a table for Plaintiff Howard. You've also cited to CLJA_USA_Yount_140 through 141, and it's a table for Plaintiff Criswell; is that correct?

A. Again, I'm reading the document along with you. But, yes, actually, I mean, this is my document. I'm sorry. Yes, I agree with you, that's what this says.

Q. Okay. Did your review of these tables affect your opinions in this case or alter them?

A. No.

Q. Okay. Did you review the testimony of the United States expert, our nonretained expert, Jadine Piper, in this case?

A. I don't recall having done so.

Q. Okay.

A. No, I don't recall.

MR. VANSLYKE: Counsel, I will represent to you that we do not yet have a copy of that transcript to have been provided to him.

MR. CROMWELL: Understood. All right. Fair to say you have not read it then.

THE WITNESS: I think that's fair.

BY MR. CROMWELL:

Q. Okay. You have in your report, going back to Exhibit 6.

A. Okay.

Q. And just generally speaking, you have cited to a number of legal cases both in your report as well as in your materials considered list; is that correct?

A. That's correct.

Q. You've also cited to a number of federal statutes, both in your materials considered list and in your report; is that correct?

A. That's correct.

Q. Do you normally cite to federal statutes or state statutes as well as case law in your -- in the reports you prepare?

A. Yes.

Q. Okay. Do you, yourself, research these cases or someone on your team research these cases?

A. Yes.
Q. Is the answer -- I guess it was compound. So do you research these cases that you use in your reports?
A. I have -- yes, I do that research, members of my team might do that research. We might be pointed to some things by counsel in some cases. But, yes, I do that research.
Q. Are there any cases or statutes that you cite and rely upon in your report that were pointed to you by counsel?
MR. VANSLYKE: Objection.
THE WITNESS: Not that I recall.
BY MR. CROMWELL:
Q. Okay. Mr. Rybolt, did you attend law school?
A. No.
Q. You are not an attorney; is that correct?
A. I am not an attorney.
Q. And, therefore, you have not passed the bar in any kind of jurisdiction; is that correct?
A. I have never passed the bar.
Q. Did you ever obtain a degree in legal

studies?

A. Legal studies were a part of my MBA, but I do not have a degree in that field.

Q. Okay. You have a number of footnotes in your report that cite to various publications by the Congressional Budget Office; is that fair?

A. I think there are citations to that, yes.

Q. You also have a number of citations to federal regulations, or CFRs, that are related to VA disability; is that right?

A. Correct.

Q. Prior to preparing your opinions in this case, when -- have you ever relied upon reports by the Congressional Budget Office before?

A. Yes.

Q. And what kind of context or opinions that you've offered before?

A. I'm not sure that I recall a specific instance, but it's something that I've certainly researched before.

Q. Okay. Same thing. When -- have you used and relied upon federal regulations that have to deal with VA disability benefits before?

A. Specifically, with respect to VA disability, I don't recall any examples of that, but it's certainly possible.

Q. Okay. But as you sit here, you don't recall any?

A. Nothing comes to mind.

Q. Okay. We discussed before in response to the subpoena that you received, you provided a retention or engagement letter; is that right?

A. Yes.

Q. As well as a compilation of invoices; is that right?

A. That's my understanding.

Q. Okay. I'm going to go ahead and enter into the record what we've marked as Exhibit 9 as well as Exhibit 10.

(Exhibits 9 and 10 marked for identification.)

THE WITNESS: I just want to, while we're pausing here, clarify a point. I think I cite CFR -- two different CFRs and one source from the Congressional Budget Office. So there might be multiple cites to the same source.

BY MR. CROMWELL:

Q. Understood.

A. I think your question was you've cited the Congressional Budget Office several times. And I just wanted to clarify that point.

Q. Gotcha.

A. I'm sorry. What are -- what am I supposed to be looking at?

Q. So we're just looking at what we've marked as Exhibit 9.

A. Okay.

Q. And I'll go ahead and share my screen. Exhibit 9 is dated August 6, 2025, and this is essentially an engagement letter that you have sent to plaintiffs' counsel; is that correct?

A. That's correct.

Q. And you're familiar with this letter?

A. I am.

Q. You signed it?

A. I did, I believe. If you can show me the signature, I think I did.

Q. Absolutely. Is that your signature below?

A. Yes, it is.

Q. Okay. I'm just looking at the engagement letter, second paragraph. It indicates that you will lead the engagement and the subject of our work is expected to include damage assessment and economic analysis; is that correct?

A. That's correct.

Q. Were you always engaged to offer opinions about benefits offered by the Department of Veterans Affairs?

A. I'm not sure I understand your question.

Q. Sure. At the time you sent this engagement letter, was it your expectation that you would be offering opinions with regard to disability compensation or disability benefits that are offered by the Department of Veterans Affairs as part of your expert opinions?

A. I don't believe that we had gotten that specific. I think we probably talked generally about veterans benefits and what they were, you know, asking me to be engaged on. But I don't think we had gotten into very specific discussions of the case, if that's your question.

Q. Okay. Well, you were engaged in

August of 2025; is that right?

A. Correct.

Q. Are you aware or do you know whether you were disclosed as an affirmative expert on behalf of plaintiffs?

A. I don't know one way or the other.

Q. Okay. Let me shop sharing this and bring up what we've marked as Exhibit 10.

All right. Mr. Rybolt, Exhibit 10 is a compilation of invoices produced to the United States. They are Bates numbered PLG-EXPERT_RYBOLT_3 through 17; is that correct?

A. I don't see the 17, but I see the 3.

Q. This is the last page, 17.

A. Sure.

Q. Okay. Are you familiar with these invoices?

A. Yes.

Q. Are you the one who prepares these invoices?

A. No. Those are prepared by another member of the staff.

Q. Okay. Who prepares them?

A. Josh usually -- Josh Brown usually does a pass, and then we have a research

assistant, I think is her title, Von Pinckney. I think it's P-I-N-C-K-E-Y.

Q. Okay. Do you have any reason to disagree with the information contained in the invoices that have been submitted by you in this case?

A. I have no reason to -- it depends on what you're talking about. I suppose, although, you're making a pretty general statement. But, yes, I think they're presented fairly.

Q. Are you aware of anything incorrect in these invoices that you submitted?

A. I'm not aware of anything. But if you have a particular question, I'm happy to respond to it.

Q. Do you have any reason to disagree with the time entries or descriptions that have been submitted in this case?

A. Disagree? I have no reason sitting here to think anything was incorrect.

Q. Your bills -- your first bills were from August 2025; is that correct?

A. Correct.

Q. And you've mentioned one, but you have three -- two other -- you have two team

members that you indicate in your invoices, is that correct? Mr. Josh Brown, Ms. Aurora Massari; is that right?

A. I'm only looking at one, but I think they're the only ones that had time on this case. There could be some other incidental time --

Q. Okay.

A. -- from other people.

Q. If there was time from other people, who would that be? Because I'm only aware of these two other individuals based off your invoices?

MR. VANSLYKE: Objection.

THE WITNESS: Well, to -- sorry.

If you scroll through, I can see if there are other names attached.

BY MR. CROMWELL:

Q. Mr. Brown, Ms. Massari.

A. Yeah, I think that's it.

Q. These are from January. Are you aware of anybody else besides Josh Brown or Aurora Massari working with you on your reports in these cases?

A. No.

Q. Again, Mr. Brown -- his original

title is manager and it looks like he's eventually a director. What was his role in assisting you with the preparation of your reports?

A. He generally managed the research and analysis or at least elements of the research and analysis working with Aurora that we did for the report. He assisted, to a limited degree, with drafting maybe write-ups of some of that research or analysis. But, generally, that's about it.

Q. Okay. And what role did Aurora Massari have in assisting you in the preparation of your reports?

A. Mostly, she worked at Josh's direction implementing the, perhaps, research or analysis.

Q. And you indicated that Mr. Brown may have helped write part of your report in this case; is that correct?

A. He did some initial drafts of some limited sections, I think. Mostly just write-ups of, perhaps, a particular area of research or something like that.

Q. Okay. We're going to look at Exhibit 10 and Bates Number ending in 13.

Do you see this page with title "Time Detail for In Re: Camp Lejeune Water Litigation"; is that correct?

A. Uh-huh.

Q. And for Mr. Brown, it indicates various entries where he has included the description "draft report"; is that right?

A. Uh-huh.

Q. Can you tell me what portions of your report that you submitted that he drafted?

A. Well, let me be clear. I mean, I've already given you some sort of general description. I don't recall specifically what he might have worked on. But let me be clear that whatever he drafted -- I draft my reports myself. I typically rewrite or rework extensively whatever he's given me.

And that's not an insult to Josh. It's just that I prefer to put things in my own voice, validate things in my own way.

So, yes, he does assist, just as I think people do at firms like mine all over the country in helping to draft certain limited sections, but it's my report.

Q. So just to clarify, it's not abnormal

in your experience that you would have other team members that assist in drafting your report?

A. It's not at all unusual.

Q. Okay. Back to my question before, though, even though you might have rewritten them, do you recall what sections of your report he initially drafted?

A. I don't recall right now.

Q. Okay. Same question. It indicates that Massari had certain tables that she was responsible -- or was preparing. Do you know what tables those are referring to?

A. I don't recall specifically. I didn't work directly with Aurora very much. It was Josh.

Q. Okay. Does the fact that you had team members help you in drafting your reports mean that these are not your opinions that you hold?

A. No.

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. So these are all your opinions; is that correct?

A. I signed my name to it.

Q. Okay.
A. It's my report.
Q. Understood. Based off the invoices that you have submitted, I did not see any invoices for September or October; is that correct?
A. It's correct that you didn't see them. I didn't see them either.
Q. Okay. Do you know, as you sit here, whether there were invoices for September or October 2025?
A. I assume the answer to that is no or we would have produced them.
Q. Okay. Look at page -- a Bates Number ending in 6 of Exhibit 10. And this is page 1 of 3 for your November 30, 2025, invoice; is that right?
A. Yes.
Q. And under the description of work, you've indicated develop draft report outline and arguments; is that correct?
A. That's what that says.
Q. Okay. You would agree with me at this point, November 2025, you did not have any of the United States experts' reports; is that

correct?

A. I don't recall the exact timing. I recall that there were two sets of reports that we received.

Q. When you say "two sets of reports," do you know what reports you're referring to?

A. Your economists' reports, I think.

Q. Okay. So did you have and use reports that were produced by the United States experts in April or May of 2025?

A. Sitting here without --

MR. VANSLYKE: Objection.

THE WITNESS: -- looking at docs considered, I don't recall that specifically.

BY MR. CROMWELL:

Q. Okay. In your materials considered list -- well, let me -- let's go back to Exhibit 6. And we're going to look at your materials considered list, which is Appendix B; is that correct?

A. Yes, that is correct.

Q. Okay. And you have various categories. First is legal materials. Second is damages assessment forms. And then you have a

section entitled "Expert Reports"; is that right?

A. Yes.

Q. Okay. And I'm scrolling down, and it looks like you have listed all the reports -- not all the reports -- many of the reports from Ms. Yount, Mr. Brod, and Ms. Tosic from December 15 -- dated December 15, 2025; is that correct?

A. There are -- yes, many reports from December 15, 2025.

Q. You would agree with me there aren't any reports from those experts from April or May of 2025; is that correct?

A. I don't see anything listed here, that's correct.

Q. Okay. As you sit here, though, did you have access to their reports from April or May of 2025?

A. I don't have a specific -- excuse me, a specific recollection. But just based on this list I would say that, no, we did not receive those and we did not review them.

Q. Okay. If you were preparing draft report outlined in November of 2025 and the United States experts reports weren't produced

until December of 2025, can you tell me what portions of your opinions you had already reached at that point?

MR. VANSLYKE: Objection. And I'm going to instruct you not to answer to the extent that it implicates conversations with counsel.

THE WITNESS: Your question assumes that I had reached opinions at that point. There's a lot to drafting a report that doesn't go into actually what the opinions are.

BY MR. CROMWELL:

Q. Okay. Had you reached any opinions as of November of 2025?

A. I don't recall specifically. I would note for the record, though, that there are -- looks like there are reports from earlier periods, the October dates, at the top of the list.

Q. You're referring to plaintiffs' expert Chad Staller?

A. Yes. I apologize. Yes, that's correct.

Q. Okay. Are there any other expert

reports that you're referring to?

A. Not that --

MR. VANSLYKE: Objection.

And, again, I will instruct you not to discuss conversations with counsel. But to the extent you can answer otherwise, please go ahead.

THE WITNESS: I see that the reports that we received from defendant's experts were in December.

BY MR. CROMWELL:

Q. Right. Did you review any other experts besides those or Mr. Staller's reports from October of 2025?

A. Not -- not that I recall.

Q. Okay. Do you have any kind of estimate, as you sit here, as to how much you have billed for your work in these cases?

A. I don't recall. But I can sum them up quickly, if you like.

Q. That's okay. You don't have any reason to disagree with the amounts that have been billed in these invoices?

A. No. I don't think February has been prepared yet or if it has, it hasn't been sent to

counsel.

Q. Okay. Do you have any kind of estimate as to what amount of time and/or charges you incurred for February 2026?

A. I don't recall. I don't believe I've seen that yet. It would not have been massive. It would have been a little bit of prep and review.

Q. Okay. All right. Let's look at -- sticking with your report, we're going to look at Appendix A, which is a copy of your CV; is that correct?

A. Sure.

Q. So just for completeness of the record, this is Exhibit 6, your report, Exhibit A -- or Appendix A. My apologies.

A. Sure.

Q. Okay. And this is the resume and CV you submitted with your report; is that correct?

A. It appears to be.

Q. Has your CV or resume been updated since January 20, 2026?

A. It's possible. I don't -- I don't specifically recall. I update it periodically.

Q. As you sit here, you don't recall

updating it since it's been produced in January 2026?

A. I don't believe so.

Q. Okay. If we scroll down, we're looking at -- there's a section entitled "Your Education"; is that right?

A. Yes.

Q. And it indicates you have a bachelor's of fine arts from Webster College Conservatory of Theater Art; is that correct?

A. That's correct.

Q. You received that in 1982?

A. I did.

Q. Just curious, is that Webster like St. Louis, Missouri, Webster, is that --

A. Yes, it's now known as Webster University, but it was Webster College when I went there.

Q. Understood. Are you from St. Louis?

A. I'm originally from Missouri. I think we moved to St. Louis when I was about one or something like that.

Q. Got it. I was just curious. I lived there for a while, not that it relates to the deposition. I'm just curious.

A. Yeah. No, I grew up in U City and then we moved to Arizona.

Q. All right. You have, after obtaining your bachelor's in 1982, you worked as a freelance producer, director, and actor; is that right?

A. Yes.

Q. And you also founded what's known as the Edgar Road Theatre Company; is that right?

A. I did.

Q. Is that in Chicago?

A. It was.

Q. You also were the director of development of the Organic Theater; is that right?

A. Yes.

Q. And you were the managing director of The Next Theatre; is that right?

A. I was.

Q. And you are also the director of development at the Nightlight Theatre; is that right?

A. It's Northlight. One word.

Q. I apologize.

A. That's okay.

Q. Director of development at the Northlight Theater; is that right?

A. Yes.

Q. After about -- it looks about 30 years of working in performing arts, you went and obtained your MBA at the University of Southern Cal; is that right?

A. Probably 25 years, but roughly, yes.

Q. Okay. And you graduated with your MBA in 2006; is that right?

A. I finished -- I actually walked in 2007, but I finished in 2006.

Q. Thank you. Just curious, what led you to seeking and obtaining your MBA after working in performing arts for 25 years?

A. I think that's between me and my therapist. I was anxious for a change. I was -- it's difficult to make a living in the arts. And I am a very curious person and I had long been thinking about it, an advanced degree. And my ex-wife dragged me out to Los Angeles against my will, and I decided the time was right to go to grad school.

Q. Okay. Obviously, you have a particular career now. Do you still do any work

in the performing arts at all?

A. I have some loose affiliations. I do some freelance consulting a little bit with some arts organizations. I was on the board of the LA Master Chorale for a time. So I have some affiliation. But I'm not actively pursuing employment in the arts, if that's your question.

Q. It isn't. I was just curious if you had involvement still.

It looks like after you obtained your MBA you worked for a group called Analysis Group, Inc.; is that right?

A. Correct.

Q. Can you generally tell me what your role was while you were there?

A. I generally worked -- actually started as an associate and supported work of various teams and experts in various litigation matters, in all, probably something like three to four hundred matters over the course of -- what was it? -- 16 plus years that I was there, and generally advanced.

So there's not a whole lot of distinction between the roles of an associate or manager or vice president. You tend to manage

more cases and leverage yourself in different ways. But the work stays essentially the same.

Q. Did you have an area -- so let me step back.

Was your work while at Analysis Group, Inc., generally working as or in assisting someone who was involved in litigation?

A. Yes. I started managing cases early on. Generally, that's the role that conducts all of the day-to-day work or manages all of the day-to-day work. Generally, on behalf of a testifying expert. Sometimes that's an internal person. Sometimes that's an external expert, an academic expert, or professional expert, things like that. And then, eventually, I started testifying on my own.

Q. Okay. When did you start testifying on your own, if you recall?

A. I think -- I think the first time was in 2013.

Q. Okay. Did you have any particular subject matter or area of focus while working at Analysis Group, Inc.?

A. My work was quite broad and covered a lot of ground. I will say that I was generally

known as the entertainment guy, and I did a lot of work in entertainment litigation. But that's certainly not -- not by any means is that all that I did.

I worked in bankruptcy, divorce cases, class action cases, antitrust from time to time, and, of course, lots of intellectual property and breach of contract tort and so on.

Q. Okay. Did you ever do any work on behalf of a U.S. government?

A. I think Analysis Group certainly did work. I'm trying to recall if I was involved in any of those cases. I don't -- nothing is coming to mind, but I would say I probably did at some point, but Analysis Group as a firm certainly did at that time.

Q. Okay. Did you have any involvement in working on cases that involved the U.S. Department of Veterans Affairs?

A. Again, I would say that there are -- Analysis Group worked on cases. I would be almost certain that they worked on cases involving Veterans Affairs, but I don't recall specifically working on those.

Q. Okay. Do you recall ever working on

cases that involved veterans disability compensation or disability awards?

A. Well, again, I think pensions, disability awards, and similar kinds of construct including probably VA benefits have been part of other cases. I'll stop there.

Q. When you say "part of other cases," I'm trying to understand how were those cases involving disability awards? I'm not referring to pensions, but disability awards or compensation.

A. Well, how does a pension differ from a disability award or disability payment.

Q. I'll put it a different way. Do you treat disability -- or VA pensions as the same as VA disability awards?

A. I -- there may be a distinction. I'm not sure exactly how you're using those terms in terms of different programs or benefit streams. But mechanically, mathematically, there's not much difference, if any.

Q. Okay. I didn't have a definition in mind. You had mentioned pensions and or -- and disability. So I didn't know if you a had distinction in mind.

A. Well, that's why I'm grouping them together because I think the analysis is the same, whether you're talking about a pension, whether you're talking about a disability, benefit, whether you're talking about some sort of insurance or annuity. Fundamentally, at a fundamental level, those are all sort of treated the same, mathematically, quantitatively, in terms of how they work and how they function.

Q. When you say the analysis is the same, what kind of analysis are you referring to?

A. Well, for example, if you were trying to understand income to a marital estate in a divorce case, those would be something that you would want to consider if you were going to divide the assets.

There could be other cases involving trusts, for example, in which pension benefits are an element of the trust or an asset of the trust. Things like that.

Q. Got it. Those are the kind of cases you've been involved in?

A. I've been involved in those kinds of cases, sure.

Q. Okay. After Analysis Group, you

became VP of Cirque Analytics in 2023; is that correct?

A. That's correct.

Q. And you're still there?

A. I am.

Q. The same thing?

A. Yes.

Q. Has your work at Cirque Analytics generally been the same as it was as a VP at Analysis?

A. At Analysis Group?

Q. Group. Yeah, sorry.

A. Yeah, they're generally the same. We're in the same industry. We do many of the same types of things.

Q. Okay. Do you do any kind of consulting or nontestifying work as part of your job?

A. That comes up, sure.

Q. What would you say the percentage of testifying to nontestifying work is for your position?

A. It depends on what you are -- are you talking about billable work, the percentage between testifying and nontestifying? Or, I

mean, I do other things for the company that aren't billable that would certainly take up some of my time.

Q. Sure. And I'm referring to, like, admin, like, stuff, work for clients, so billable work for clients. What kind of percentage would you say you allocate to nontestifying work versus testifying work?

A. Nontestifying would probably be -- it would certainly vary, but maybe 10 percent.

Q. Got it. So the vast majority of your work, it involves testifying work; is that correct?

A. That's correct.

Q. Okay. Looking at your CV again within Exhibit 6, under your past positions, you have a section entitled "Representative Expert Engagements." Do you see that?

A. Yes.

Q. And I'm paraphrasing it, but it indicates you have been engaged in breach of basic agreements, misappropriation of trade secrets, copyright infringement, trademark infringement. Is that a fair generalization of this category?

A. Well, there are others, but yes.
Q. Okay. That would also include fraud, defamation, royalty accounting as well?
A. That -- yes, those are included as well.
Q. Okay. You also have a section entitled "Selected Professional Experience"?
A. Yes.
Q. What is the difference from representative expert engagements and selective professional experience? What distinction are you drawing there?
A. So I think, as I mentioned earlier, I've been doing this for almost 20 years. I've worked on literally hundreds of engagement. The majority of those, I'm not necessarily the testifying expert, but I have worked in all of these other areas. And so that's representative of those kinds of engagements.
Q. So representative expert engagements is where you've been working on cases, but you're not necessarily the testifying expert, is that what you're referring to?
A. The other way around.
Q. Okay. Just --

MS. BUTLER: Hey, guys, I'm sorry to interrupt, but I think Ben got disconnected.

THE VIDEOGRAPHER: All right. We're going to go off the record 10:13.

(Recess taken from 10:13 a.m. until 10:21 a.m.)

THE VIDEOGRAPHER: We're back on the record at 10:21 a.m.

BY MR. CROMWELL:

Q. Mr. Rybolt, just before we broke, we had discussed the concept of a VA pension. Can you tell me, in your own words, what a VA pension is?

MR. VANSLYKE: Objection.

THE WITNESS: I'm not sure that I can distinguish that necessarily from VA benefits generally. They're, I believe, retirement benefits and disability benefits and other benefits that would fall into that category.

BY MR. CROMWELL:

Q. Okay. But as you sit here, you can't distinguish for me what a VA pension is versus VA disability benefits are?

A. I'm not --

MR. VANSLYKE: Objection.

THE WITNESS: Sorry. I'm not specifically aware of what those distinctions might be.

BY MR. CROMWELL:

Q. Okay. You indicated that you have used VA pension or VA disability benefits as treating them as income in certain expert engagements; is that correct?

A. They would have been, sure, elements of income or revenue in certain contexts.

Q. Okay. Other than working on cases where VA disability compensation is treated as income or revenue, can you tell me what other expert engagements you had in which VA disability compensation was involved?

A. Can you repeat that?

Q. Sure. I'll do my best.

Other than working on cases where VA disability compensation is treated as income or revenue, can you tell me what other expert engagements you've had in which VA disability compensation was involved?

A. I don't think I'm aware of -- I mean, VA disability compensation would be income or

revenue in any case. I'm not aware of any exceptions to that.

And maybe I need to clarify how I am using the word "income" or "revenue." It is a positive stream, a benefit to the recipient of some amount of money.

Q. Have you ever -- let me piece this apart a little bit. In any of the cases that you have worked on as an expert, have you ever been asked to calculate a veterans disability rating?

A. The disability rating, no.

Q. Have you ever been asked -- in any of your expert engagements, have you ever been engaged to determine what kind of compensation a veteran would receive due to their disability ratings?

A. Are you asking me if I was asked to make the calculation based on a disability rating --

Q. Yes.

A. -- or if I was asked to simply observe?

Q. The first.

A. I have not been asked to make a calculation of a benefit based on a disability

rating.

Q. We were talking about your CV a little bit. And I think -- and just -- we're going to cover just -- I don't want to be redundant, but I think Ben dropped off, so I want to make sure that I'm not, like, prejudicing anything here.

You had indicated to me that there is a difference between the section entitled "representative expert engagements" and "selected professional experience" in your CV. Can you describe for me the difference between those two categories in your resume?

A. In the first, I was engaged for the purpose of providing expert testimony. Although, it does necessarily mean that I gave expert testimony since, you know, sometimes cases settle or get thrown out or whatever, right.

Q. Sure.

A. In the other -- in the second category, it's more broadly expert -- or excuse me, consulting work that I've done in litigation.

Q. Okay. I was sharing it. I'll share it again. Just looking at Exhibit 6, which is your report and your appendices, and this is your

CV, and looking at your representative expert engagements here -- do you see where I'm looking?

A. Yes.

Q. You have been engaged as an expert to offer testimony in breach of basic agreement cases; is that correct?

A. Yes.

Q. You have been engaged to offer testimony in misappropriation of trade secrets and breach of contract cases; is that correct?

A. Yes.

Q. You've been offered -- asked to offer testimony or opinions in breach of contract, trade infringement, and copyright infringement cases; is that right?

A. Yes.

Q. You have been asked to offer testimony in breach of contract, fraud, and defamation cases; is that correct?

A. Yes.

Q. You have been asked to offer testimony in royalty accounting cases; is that correct?

A. Yes.

Q. And you have been asked to offer

opinions and testimony in copyright infringement cases; is that correct?

A. Yes. Yes.

Q. And you've been asked to offer opinions or testimony in trademark infringement cases; is that correct?

A. Yes.

Q. Any general topics that I'm missing from your section on representative expert engagements?

A. Well, you listed everything that I listed there. It's not intended as an exhaustive list. There are probably other areas, if I sit here for a minute and think about them.

Q. Sure. But you would agree that these are the primary areas in which you have offered testimony in the past?

A. Those -- those are the areas that I've chosen to put on my CV, so I think that's a fair characterization.

Q. Okay. With regard to your selected professional experience, and you indicated this is more in a consulting fashion versus the testifying expert; is that right?

A. Typically in most, if not all, of

those cases, I would have been managing the case on behalf of the expert.

Q. Gotcha.

A. But it would have been, you know, obviously, very similar work.

Q. Okay. And you provided work in general commercial litigation where you applied financial accounting and statistical concepts and methods in a broad range of commercial litigation; is that right?

A. Yes.

Q. In this section, do any of these engagements involve you performing work on behalf of the Department of Veterans Affairs?

A. Not that I recall.

Q. Okay. Have you personally ever performed work on behalf of the Department of Veterans Affairs?

MR. VANSLYKE: Objection.

THE WITNESS: I think I have the same answer to that question.

BY MR. CROMWELL:

Q. Okay.

A. I haven't been engaged by the Department of Veterans Affairs outside of my

consulting work, if that's maybe your question.

Q. Well, I guess we should step back. Have you ever been engaged to perform work on behalf of the Department of Veterans Affairs regardless of whether it's in consulting or testifying fashion?

A. Nothing comes to mind.

Q. Okay. Have you ever performed or been engaged to perform work against the Department of Veterans Affairs?

A. Nothing comes to mind.

Q. Okay. You have a few other sections in here. One is "Other Intellectual Property." And it says you have evaluated damages and related claims in copyright, trademark, trade dress, and patent infringement litigation, as well as misappropriation of trade secrets, false designation, and false advertising disputes. Is that correct?

A. That's what my -- the document says, yes.

Q. Okay. Generally speaking, you seem to have a lot of experience in testifying about, like, lost profits and commercial cases. Is that a fair assessment?

A. Yes, that's -- that's reasonable.
Q. I also notice you have a lot of experience in testifying about disgorgement of profits in commercial cases; is that correct?
A. That's correct.
Q. Last section -- or not the last, but the next section is entitled "Media and Entertainment." And it says you have experience in media and entertainment matters; is that correct?
A. Yes, I do.
Q. And then your -- I think it's the last section, you have a section entitled "Securities" and you have experience in commercial litigation involving various securities related actions; is that right?
A. I do.
Q. And you've listed things, such as mortgage-backed securities, shareholder actions, ERISA litigation, litigation for purchasing securities and securities lending; is that right?
A. Yes, that's correct.
Q. Okay. In your resume, you do not specifically list an experience section entitled personal injury or wrongful death; is that right?

A. I don't have that section, no.
Q. In your resume, you do not have an experience section related to veterans disability determinations; is that correct?
A. I do not have that section, no.
Q. Okay. The last part of your CV is entitled "Publications and Presentations." Do you see that?
A. Yes.
Q. And it appears to list approximately ten publications and presentations; is that right?
A. That's roughly correct.
Q. Do you know if any of the publications you have on here are peer-reviewed publications?
A. Yes. The publication in Landslide was reviewed. "Lost Profits Damages: Principles" is a book which was edited by Mr. Boyles and Mr. Kinrich. In that sense, it is peer reviewed because they certainly read and reviewed and commented on my work. And they are professionals in the business.
I believe causation in the role of the damages expert for the ABA would have been

reviewed. Although, it might have been a limited review.

Q. Sure. I understand.

A. Les Nouvelles certainly does a review and passes back comments, so that's the "More Blurred Lines."

I think the others would -- there may have been commentary from other professionals on some of the others but probably on a more limited level.

Q. Understood. Okay.

Do any of your publications or presentations have to do with veterans disability awards or compensation and how they operate?

A. I have not written on that subject, no.

Q. Do any of your publications or presentations have to do with offsets at all?

A. Well, offsets are a common concept that appear in almost every case or at least are to be considered in any case where you're looking at damages. It's a common English term.

If you're speaking specifically about the way that you've used offsets, I guess, or your economists have, and in the context of

veterans' disability payments, you know, perhaps not that narrow. But offsets have come up in many cases.

Q. In what kind of cases -- well, let me step back. How do you -- how do you use the term "offsets" when you're saying that many cases involve offsets?

A. Well, an offset is just, you know, an amount of money that equates to another to ensure that we are not double counting. So, for example, in disgorgement cases, very often we're trying to understand what were the sales, the -- perhaps, I'll assume that we're talking about infringement, infringing sales of the defendant. The plaintiff may be entitled to some of the profits or all of the profits on those infringing sales. Plaintiff might also be entitled to their own losses, but not if it's the same sale.

Very often with a direct competitor relationship, the sales by some or all of the sales made by the defendant would have been sales that the plaintiff would have made in the absence of the wrongful conduct. So those two things offset. That's -- that's an example of an offset.

Q. Understood. I appreciate that.

In the context of benefits provided by a state or federal government using that term in that context, do any of your publications or presentations have anything to do with offsets as I just defined it?

A. I'm sorry. It was in the context of disability payment?

Q. Of benefits offered by a federal or state government.

MR. VANSLYKE: Objection.

THE WITNESS: Let me just check. I think that would be a stretch at best. I don't think any of these directly deal with that topic.

BY MR. CROMWELL:

Q. Okay. Do any of your publications or presentations have to do with the appropriateness of offsets as we've -- as I'm using it and just defined it, and when they may or may not be applied in a given case?

MR. VANSLYKE: Object.

THE WITNESS: Sorry, Ben, you objected?

MR. VANSLYKE: Yes, but you can

proceed.

THE WITNESS: I would say to some degree "More Blurred Lines, the Downstream Infringement and Disgorgement of Profits" in Les Nouvelles, it deals directly with the issue of disgorgement and how disgorgement is determined, which, you know, we're doing a comparison and a contrast between three similar cases in which the results were very different.

To some extent, that deals with offsets or how disgorgement is determined. I'm thinking -- let me look at the others.

BY MR. CROMWELL:

Q. Did that article or presentation involve anything with regards to benefits offered or provided by a state or federal government?

A. No.

Q. Okay. Do any of your publications or presentations have to do with calculating lost earning capacity?

A. Probably all of them.

Q. All of them do?

A. Well, earning capacity, expected earnings, actual earnings, they're all part of

the same calculation. They apply in almost every case. You're trying to understand what earnings would have been and the absence of some wrongful conduct. That includes effects -- possible effects on actual earnings, earnings capacity, expected earnings.

Q. Just to make sure I'm clear, do any of your publications or presentations have to do with how you calculate lost earning capacity?

A. As in a mechanistic way, is that your question?

Q. What -- as far as what inputs go into determining lost earning capacity?

A. I don't think I talk about a methodology of determining lost earnings in that -- in the way that you've just defined it. Although, it's at least indirectly implicated in almost all of these.

Q. That's what I was -- I'm trying to figure out if you're ever published on the methods for determining lost earning capacity because these are one of the topics you're testifying about.

A. Again, I think lost earnings capacity goes hand in hand with lost earnings. In any

instance, in where you're looking at lost earnings, you're going to be looking at lost earnings capacity. Now, you may not need or want to do a calculation or it might not be available to you. In some cases, it just depends on the facts of the case.

Q. Understood. When you say lost earnings and lost earning capacity go hand in hand, what do you mean?

A. Well, they're all part of lost earnings.

Q. Okay. Do any of your publications have -- or presentations have to do with comparing or defining lost earnings versus lost earning capacity?

A. It's such a basic concept, I don't think I specifically called that out.

Q. Okay. So is the response no, you don't -- none of your publications involve that topic?

A. Well, my response was it's such a basic concept that I don't think I would have called that out. If you'd like, I can look back at these and see if I might have done that.

Q. Well, this is my time to ask; right?

A. Sure.

Q. So I'm just asking if any of your publications have to do with comparing or even defining lost earnings with lost earning capacity?

A. I don't think any of these articles or presentations specifically address -- perhaps proving lost causation, there would be some discussion of the distinction between them. But I wouldn't -- I don't recall writing an article in which I was -- you know, the focus of the article was trying to parse these things. Does that make sense?

Q. Sure. That makes sense.

Do any of your publications or presentations have to do with or involve the use of life expectancy in calculating damages and personal injury or wrongful death cases?

A. I have used life expectancy data in various contexts. Now, earlier we defined a personal injury as a single plaintiff with bodily harm. That's not the only application of life expectancy tables.

Q. Okay. But do any of your publications or presentations have to do with the

use of life expectancy?

A. That might be -- that might be an element of ERISA litigation involving welfare plans. Although, I don't think so. I don't -- to the best of my recollection, none of these specifically bring up the use of life expectancy tables.

Q. Okay.

A. Except possibly the ERISA article.

Q. All right. Share this. All right. Mr. Rybolt, you were asked to review and respond to issues specifically with regards to the use of Veterans Benefits Administration offsets to reduce the recoveries available to plaintiffs; is that correct?

MR. VANSLYKE: Objection.

THE WITNESS: I don't have the exact language in front of me.

BY MR. CROMWELL:

Q. Okay. Well, that's fine. We will -- we'll use the owner's manual.

A. That sounds right. You omitted something.

Q. Go to page 3. We're back on Exhibit 6. This is your report. And I'm simply

looking at paragraph 1 --

A. Right.

Q. -- of your report and specifically asking -- having you confirm that you were asked to review and, where appropriate, respond to issues raised by experts for the United States in the reports dated December 15, 2025, specifically with regard to the use of Veterans Benefits Administration, or VBA, offsets to reduce the recoveries available to plaintiffs.

First of all, did I read that correctly?

A. You read that correctly.

Q. And you would agree with me that's what you were asked to review and, when appropriate, respond to?

A. Yes. I would say I was asked to review and respond to your experts' use of offsets in the context of Veterans Benefits Association benefits.

Q. Okay. Have you ever been asked to testify or offer expert opinions on this very same topic before?

A. Well, again, offsets come up quite a bit in any sort of damages analysis. If your

question is specifically with respect to VBA disability benefits, I don't recall having done that, but I'm not saying it wasn't an element.

Q. As you sit here, you don't recall having offered testimony or opinions in other cases specifically with regards to the use of VBA offsets to reduce the recoveries available to plaintiffs; is that correct?

A. It is an unusual use. So, no, I have not.

Q. Okay. Just stepping back, Mr. Rybolt, are you a veteran?

A. I am not.

Q. Before -- before being engaged in this case, have you ever looked at or relied upon VA disability statutes or regulations in offering expert opinions?

MR. VANSLYKE: Objection.

THE WITNESS: Oh, gosh, I mean it's probably come up, especially, you know, I think I mentioned some divorce and trust cases where the disability benefits were an element. I probably looked at some VA regulations or something similar to that.

BY MR. CROMWELL:

Q. Sorry, I didn't mean to cut you off. Go ahead.

A. I guess I can stop there.

Q. Do you recall the cases in which you have done that before?

A. Well, I'm thinking specifically of a divorce case and at least one trust case where that was an element.

Q. Where what was an element?

A. Disability benefits.

Q. Did offering opinions with regards to disability benefits require you to look at VA disability statutes of regulations?

A. I would assume that I probably did, but I don't have a specific recollection.

Q. Okay. Before being engaged in this case, have you ever looked at VA policy manuals that dictate how disability determinations get made?

A. Policy manuals, I don't know if I would have had access to those. So, no, I don't recall having done that.

Q. Okay. Have you ever been asked to opine on or testify about the unreliability of life expectancy tables before?

MR. VANSLYKE: Objection.

THE WITNESS: I've certainly talked about and used life expectancy tables. I think I probably rebutted that as well. Or worked on cases in which that was an element and we probably talked about whether they were an appropriate tool under the context.

BY MR. CROMWELL:

Q. You agree with me you've used life expectancy tables to calculate damages in different cases before?

A. Yes.

Q. Have you ever been asked to opine on or testify about the longevity of government programs before?

MR. VANSLYKE: Objection.

THE WITNESS: Do you mean expected longevity or -- what do you mean?

BY MR. CROMWELL:

Q. Sure. We'll start with that. Have you ever been asked to opine on the expected longevity of government programs before?

A. Not that I recall.

Q. Have you ever been asked to opine on

or testify about the likelihood of what decisions government programs, like the VBA, may or may not do in the future?

MR. VANSLYKE: Objection.

THE WITNESS: I'm trying to decipher your question a bit. There are many cases in which one would look at evidence from the data that are available to predict or analyze the likelihood of a given event. Comes up quite a bit. I think that's what I've talked about here in my rebuttal here to your experts. In the narrow context that you defined, I don't recall having done so. But, again, this is a pretty standard analysis.

BY MR. CROMWELL:

Q. Well, just to be clear, because I understand that you may discuss the likelihood of certain things in the future, but my question is a little bit more specific. Have you ever been asked to opine or testify on the likelihood of what decisions government programs like the VBA may or may not do in the future?

MR. VANSLYKE: Objection.

THE WITNESS: I don't recall having

testified on that specific subject.

BY MR. CROMWELL:

Q. Okay. Do you know what a disability benefits questionnaire is or a DBQ is?

A. Do I know what it is?

Q. Yes.

A. I think we might have taken a look at one of those, but I wouldn't say that I'm -- I couldn't tell you, you know, lots of details.

Q. Who is "we" when you're saying that?

A. My crew.

Q. Okay. And your group in formulating your opinions in this case?

A. I don't recall specifically. But it seems like something that we might have taken a look at. So I'm speculating a little bit and maybe I should just stop.

Q. Okay. I guess to clarify, as you sit here, do you recall one way or the other whether you or your team looked at disability benefits questionnaires in formulating your opinions in this case?

A. I think I'll have to answer no given that I don't have that specific recollection.

Q. Okay. Can you tell me what a

disability benefits questionnaire is?

A. I don't -- I don't think I can define that for you.

Q. Do you know what manual the VBA uses for processing and adjudicating claims for disability compensation benefits for veterans?

MR. VANSLYKE: Objection.

THE WITNESS: Your question is am I familiar with it or am I aware of it?

BY MR. CROMWELL:

Q. Do you know what manual the VBA uses for processing and adjudicating claims for compensation related to benefits to veterans?

MR. VANSLYKE: Objection.

THE WITNESS: I don't believe I can tell you what the answer to that is sitting here today.

BY MR. CROMWELL:

Q. Okay. Are you familiar with what the -- I'm sorry.

Are you familiar with the M21-1 adjudication procedures manual is?

A. Sitting here today, I can't tell you an answer to that. I'm not saying I have never looked at one, but I couldn't -- I couldn't tell

you that sitting right here.

Q. Okay. I didn't mean to keep sharing that the entire time.

A. That's okay.

Q. Let me -- I will go ahead and enter what we've marked as Exhibit 11 and drop it into the chat.

(Exhibit 11 marked for identification.)

BY MR. CROMWELL:

Q. Let me know once you receive that.

A. I have it.

Q. Okay. Mr. Rybolt, what I've introduced as Exhibit 11 is the prologue to the M21-1 adjudication procedures manual. Have you ever seen this before?

A. If I have, I don't recall it sitting here today.

Q. Okay. Do you know one way or the other whether this is available online?

A. I couldn't tell you that sitting here today.

Q. Okay. If you look at the introduction here, which is on PDF page 1, and it indicates that "M21-1 adjudication procedures

manual, M21-1, serves as a general guide for processing and adjudicating claims for compensation, pension, and related benefits for veterans and their dependents. It is based on the statutes and regulations set forth in Title 38 of the United States Code, U.S.C., and Title 38 of the Code of Federal Regulations, CFR, the legal authority governing Department of Veterans Affairs benefits."

First of all, did I read that correctly?

A. I believe you did.

Q. Okay. Have you ever looked at or used M21-1 adjudication procedures manual before?

A. Sitting here today, I don't recall having done so.

Q. Okay. Do you know what factors or inputs go into making a VA disability -- disability ratings determination?

A. I think at a high level. I understand that it is based on population statistics related to specific diagnoses. I think a number of dependents is a factor. But beyond that, I don't think I can be more specific.

Q. Okay. Do you know whether a veterans earnings, past earnings, or even their earning capacity is an input or factor in making a VA disability ratings determination?

A. My understanding is those things are not factors.

Q. Okay.

A. And I'll back up. I think a number of dependents, but I think that might going to the benefit itself rather than the rating --

Q. Understood.

A. -- just to correct myself.

Q. Understood. Are you familiar with the process for obtaining VA disability ratings?

A. No.

Q. Are you familiar with the process for altering a veterans disability rating?

A. I believe we have the understanding generally that those can be revisited and reevaluated. But more specifically than that, no.

Q. So putting aside that a veterans rating can be reevaluated, are you familiar with the process for altering a veterans disability rating?

A. I am not.
Q. Okay. Have you ever been asked to opine on what damages are or are not permitted under a particular law before?
MR. VANSLYKE: Objection.
THE WITNESS: I think what you're asking me is if I've drawn a legal conclusion as to what remedies are available. I would say, absolutely, as a damages expert that I have an understanding of what remedies are available under specific laws, but I'm not opining to that point.
BY MR. CROMWELL:
Q. Understood. I appreciate the distinction you're drawing. I get that.
You are familiar with the Camp Lejeune Justice Act of 2022; correct?
A. Yes. Yes, I am.
Q. You have read it, you've cited and relied upon it in your expert report?
A. I think we do cite it and, yes, I have read it.
Q. Okay. Are you familiar with those -- section that regards to offsets,

Section 804(e)(2)?

A. Yes.

Q. As you sit here, are you offering any opinion regarding whether offsets are permitted under the Camp Lejeune Justice Act?

MR. VANSLYKE: Objection.

THE WITNESS: I think you're calling for a legal conclusion. I'm not offering any legal -- excuse me -- conclusions or opinions. What I'm offering is my understanding as a damages expert as to the consequences of calculations and assumptions made by your experts.

BY MR. CROMWELL:

Q. Understood. But I just to understand the confines. You agree with me you're not offering an opinion regarding whether offsets are permitted by themselves under the Camp Lejeune Justice Act; correct?

A. Yes. To the extent you're defining a legal conclusion, that's not my role.

Q. If they are permitted under the Camp Lejeune Justice Act, would you agree that you're not offering any opinion regarding the amounts that should be offset in any given case?

MR. VANSLYKE: Objection.

THE WITNESS: Assuming they are permitted -- your question is assuming they are permitted, I am not opining as to the amount that is permitted, is that your question?

BY MR. CROMWELL:

Q. Correct.

A. Again, I think that sounds like a legal conclusion. I'm trying to offer my perspective as a damages expert on the consequences of various assumptions.

Q. Okay. If we can go back to Exhibit 6, which is your -- your expert report.

A. Yes.

Q. And I'll share my screen just to make things easier. And, here, I'm looking at page 10, which is PDF page 12 of Exhibit 6. And if you look at Footnote 21, you have a paragraph here that says, "Throughout this report, I assume as given the values of VBA disability payments. In other words, the government has determined the value of lost earning capacity in its own policy decisions. I do not offer an opinion about how those values are determined or how those values

are calculated."

First of all, did I read that correctly?

A. I believe you did.

Q. Okay. You agree with me you're not offering an opinion about how the values of the VBA disability payments were determined or how those were calculated; is that correct?

A. That's correct. In the context of those footnote, that's correct.

Q. Okay. As you sit here, are you planning to offer any kind of opinion as to the amounts that each individual bellwether plaintiff should be able to offset?

MR. VANSLYKE: Objection.

THE WITNESS: I don't understand your question.

BY MR. CROMWELL:

Q. Okay. Have you calculated any numbers with regards to what you think is the appropriate level of offset -- an individual bellwether plaintiff should be able to offset with regard to VBA disability benefits, or are you not offering that opinion?

A. I don't believe VBA bellwether

plaintiffs are offsetting anything. So I'm not -- I don't understand your question.

Q. So let me just -- if I'm understanding you correctly, is it your opinion that the amount of VBA disability benefits that each bellwether plaintiff is entitled to is zero dollars; is that correct?

MR. VANSLYKE: Objection.

THE WITNESS: I'm sorry. Can you repeat that?

BY MR. CROMWELL:

Q. Sure. Let me take a step back.

You -- well, actually, we'll get to that -- we'll get to it, and I'll try to clarify in just a moment.

A. Okay.

Q. In your report, you do not note or identify anywhere whether you are holding the opinions that you're offering to a reasonable degree of economic certainty; is that correct?

A. No, I don't include that attestation.

Q. Okay. What does the term "reasonable degree of economic certainty" mean as a forensic economist?

A. Well, let me back up. I think that

was something that we used to include in expert reports de facto. I think it may have been required by Rule 26 or something similar. I think that was dropped and people -- I don't see it nearly as often as I used to.

But the question that I have in -- I'm going to answer your question with a question, I'm sorry, and I will get to an answer.

But your question assumes that there is more than one degree of certainty or something or professional attestation. That's the part that I quibble about. I do every report to the same way same level of certainty, same level of professionalism. It's something that I would present to my colleagues or to my peers for review and comment. It is my best work in every case. There is no other degree.

Q. Okay. What -- do you have any particular -- as you sit here, do you have any particular standard for which you're holding the opinions that you're offering in this case?

A. The one that I just described.

Q. Okay. So you -- do you -- do you or do you not hold the opinions that you're offering here to a reasonable degree of economic

certainty?

MR. VANSLYKE: Objection.

THE WITNESS: Well, I think -- I think that's what I just said. If that's not what I just said, then, yes, absolutely, this is my best work.

BY MR. CROMWELL:

Q. Just so I'm clear, you are holding the opinions that you're offering here to a reasonable degree of economic certainty?

A. As I just said, yes. Absolutely.

Q. Okay. What does -- so going back to the question before. What does reasonable degree of economic certainty mean to you as a forensic economist though?

MR. VANSLYKE: Objection.

THE WITNESS: I just defined that.

BY MR. CROMWELL:

Q. Could you give me your answer again then?

A. It is my best work. It is work that I would happily submit to my colleagues or my peers in the industry for their review and comment.

Q. Okay.

A. It is what I believe is the appropriate response to the questions or the assignment.

Q. Have you offered -- sorry, didn't mean to cut you off. Sorry.

A. Sorry. I just said "if you will."

Q. You have prepared other expert reports before; is that correct?

A. Quite a few.

Q. And have you included in those reports before whether you are holding the opinions being offered in those cases to a reasonable degree of economic certainty?

A. As I said, there are -- that used to be pretty standard language that was included in my experience. That's not usually included anymore. It's not my practice to include an attestation to that degree. Because, frankly, I feel like it's unreasonable -- well, not unreasonable, but sort of redundant or unnecessary.

Q. Okay. Do you ever offer expert opinions to an absolute certainty?

A. I don't know that there is such a thing.

Q. There's not such a thing as an absolute certainty. Why not?

A. I don't know. I've studied philosophy.

Q. So there's no absolute certainty because you've studied philosophy, is that --

A. I think we can -- I think we can say pretty clearly and absolutely that, you know, certain mathematical equations come out with an answer. I can say that I'm absolutely certain about that. But, you know, beyond that, you know, there's always some little level of uncertainties, right, isn't there?

Q. Yeah. I think I get what you're saying. I mean, when you're making or creating your opinions as an expert, you would agree that there's some level of uncertainty about what may or may not happen in the future; correct?

MR. VANSLYKE: Objection.

THE WITNESS: Yes. Trying to anticipate future events is usually accompanied by some degree of uncertainty.

BY MR. CROMWELL:

Q. In other words, you can't ever be 100 percent certain about what's going to happen

in the future, you don't have a crystal ball, so to speak?

A. I think that's fair. Sure.

Q. And I think you would agree with me, but would you agree that holding opinions to a reasonable degree of economic certainty does not require absolute certainty?

A. I think that's what the sentence means, if that's your question, yes.

Q. Okay. Let's look at the various opinions you're offering. We're going to go back to Exhibit 6, your report. And you have a section entitled "Summary of Opinions" which is Section 2; is that correct?

A. Yes.

Q. Okay. And the first opinion -- your first opinion is that because "None of the VBA bellwether plaintiffs' expert reports assert damages claims for lost earning capacity, thus the use of a benefit intended to compensate plaintiffs for a loss of earning capacity as an offset is inapt."

First of all, did I read that correctly?

A. You added the word "because," but I

don't object. Yes, you read it correctly other than that.

Q. My apologies. I'm not sure where I got that.

A. It's okay.

Q. Okay. And then your second opinion, which is the second bullet point, indicates that even if VBA disability benefit offsets are appropriate, the United States analyses are, in your words, fundamentally speculative; is that right?

A. Yes. Comma.

Q. And you note that in many cases the government's experts analysis includes material omissions that render their methodology and conclusions unreliable; is that right?

MR. VANSLYKE: Objection.

THE WITNESS: That wasn't exact, but I think you captured the essence of it.

BY MR. CROMWELL:

Q. Yeah. I guess I wasn't trying to quote them verbatim in this part. But I was just asking if my understanding is the same as what you've written here.

So -- and the basis for this second

opinion, in your view, is that those experts in part failed to consider fluctuations and ratings for injuries attributed to Camp Lejeune exposure; is that right?

A. That's one of the omissions, yes.

Q. Another one of those is those experts have failed to consider fluctuations in ratings for injuries unrelated to Camp Lejeune exposure; is that correct?

A. That's also correct.

Q. Another one of those is the expert's failure to consider fluctuations in life expectancy; is that correct?

A. That's correct.

Q. Another one is the expert's failure to consider amounts withheld from VBA benefits as a result of military pensions; is that correct?

A. Or vice versa, yes, that's correct.

Q. Okay. And then the last point you say, the experts failed to consider the inherent uncertainties of future VBA disability benefits; is that correct?

A. That is also correct.

Q. And this is the list of factors that you are relying upon for your second opinion; is

that correct?

MR. VANSLYKE: Objection.

THE WITNESS: The omissions that I've identified that -- yes, that lead to my opinion.

BY MR. CROMWELL:

Q. You have further opined that if an offset based on VBA disability benefits were applied to damages other than loss of earning capacity, the plaintiff would be left -- less than fully compensated for their losses; is that correct?

A. That's what I've written there, yes.

Q. So, generally speaking, these three bullet points contain the scope of the opinions that you're offering in this case; is that right?

A. Well, I think there are many more details that are discussed in the remainder of the report.

Q. Sure.

A. This is intended as a summary, obviously. But I think it's a reasonable summary, if that's your question.

Q. Okay. If we look at page 8 or PDF page 10 of Exhibit 6, first point opinion is that

the government offset arguments lack economic foundation; is that right?

A. Yes.

Q. Immediately under there, you note that the government's proposed offsets do not tie to a specific claim?

A. That's right.

Q. Okay. What literature are you relying upon and have you cited in your report for your opinion that an offset must tie to a specific claim of damages?

A. My 20 years of experience in this business, the research I've done, the training I've done, all contribute to that, in addition to the -- whatever articles and chapters that I've cited that I think are in support.

Q. Putting aside your experience and training, I'm trying to understand specifically what citations or literature you're relying upon for your opinion then offset must tie to a specific claim of damages?

A. Well, I don't need any other support. I'm allowed to rely on my experience and training and understanding damages analysis. I am a damages expert. And an offset is a common word.

And it's used in all kinds of contexts and litigation, as I've said earlier. And I have not -- as a colleague of mine said, I think it's such a basic concept that it probably has never been written down.

Q. Right. Just so I'm clear, there isn't any particular scientific or economic article or literature that you're relying upon for your opinion that an offset must tie to a specific claim of damages; is that correct?

MR. VANSLYKE: Objection.

THE WITNESS: I have not cited an article for that specific statement, although, I believe the literature is generally consistent with that that I've read as well as my training and experience.

BY MR. CROMWELL:

Q. You -- we previously talked about your familiarity with the Camp Lejeune Justice Act; correct?

A. Generally speaking, yes.

Q. Can you tell me where in that act you have reviewed -- where it says that offsets are tied to a specific claim of damages?

MR. VANSLYKE: Objection.

THE WITNESS: I don't believe it appears in that act.

BY MR. CROMWELL:

Q. Okay. Your second point in this particular topic is that the loss of earning capacity is not equivalent to lost earnings. I apologize, I was trying to get there as I was reading. This is on page 10, PDF page 12.

A. That's correct.

Q. And you note here that the VBA disability benefits are intended to compensate the beneficiary for a loss of earning capacity, not lost earnings.

First of all, did I read that correctly?

A. You did.

Q. And for this, you cite to 38 U.S.C. Section 1155; is that correct?

A. That is -- yes, that's -- that's what's in that footnote.

Q. As you sit here, are you planning to offer opinions on how to interpret federal statutes regarding VA disability compensation?

A. To the extent you're asking about a

legal opinion, of course, I'm not doing that.

Q. Okay. Prior to your involvement in this case, have you ever been asked to interpret or rely upon 38 U.S.C. Section 1155 before?

MR. VANSLYKE: Objection.

THE WITNESS: Again, I would not have been asked. And if I had been asked, I wouldn't -- I would refuse to interpret statutes. I do cite them when they are consistent with my understanding or inform my understanding of how economic and financial concepts are applied in the context of damages analysis.

BY MR. CROMWELL:

Q. Okay. When you say "VBA disability benefits are intended to compensate the beneficiary for a loss of earning capacity, not lost earnings," are you saying that VBA disability benefits are intended to compensate the beneficiary only for a loss of earning capacity?

MR. VANSLYKE: Objection.

THE WITNESS: That's my understanding based on the information that I've cited.

BY MR. CROMWELL:

Q. Okay. In other words, it's your opinion that VBA disability benefits are not meant to compensate a beneficiary for anything other than their lost earning capacity; is that right?

MR. VANSLYKE: Objection.

THE WITNESS: That's my understanding as I approached this paragraph, yes, that's my understanding and that's what's consistent with what's said in the footnote that I've cited.

BY MR. CROMWELL:

Q. Okay. Are there any publications or economic principles you're relying upon to support your conclusion that VBA disability benefits are only intended to compensate for the loss of earning capacity?

A. Well, a distinction I'm making --

MR. VANSLYKE: Objection.

THE WITNESS: -- is between lost earning capacity and lost earnings. And it's clear from -- you know, even if you and I disagree and even if the court comes in and says, okay, it's for some other things, the fact remains that the

government treats them separately. The VBA disability benefit as a means tested, it isn't based on your actual earnings and it isn't affected by your actual earnings. You can be making 400,000 as a tenured professor at some private university, you still get the same VBA disability benefit. By the same token, it follows that they are not the same thing.

BY MR. CROMWELL:

Q. Well, let me -- I understand your point. I want to discuss that topic in just a moment. But I want to make sure I'm getting an answer to my question, which is, is there a publication or economic principle you're relying upon to support the conclusion that we just talked about that VBA disability benefits are only intended to compensate for loss of earning capacity?

MR. VANSLYKE: Objection.

THE WITNESS: Well, I cited 38 U.S.C. 1155 in support of that point. And I have demonstrated that the government treats them separately.

Are you asking hypothetically could

there be some other element that's intended to compensate? Certainly, someone could draw that legal conclusion and distinction. But from what I've seen, I don't have any evidence of that.

BY MR. CROMWELL:

Q. Okay. So aside from the language in 38 U.S.C. 1155, you can't point me to anything you're relying upon to support the conclusion that VBA disability benefits are only intended to compensate for the loss of earning capacity?

MR. VANSLYKE: Objection.

THE WITNESS: Yeah, just to clarify, you're inserting the word "only" and that doesn't appear in my first sentence. But that is, in fact, what the statute says. So ...

BY MR. CROMWELL:

Q. Okay. Let's discuss earning capacity then. Generally speaking, you defined lost earning capacity as the hypothetical measure of a person's ability to compete in the labor market; is that right?

A. Well, the full sentence is it's a generally forward looking hypothetical measure of

a person's ability to compete in the labor market. Its earning potential as the -- as I said, I think, elsewhere in that paragraph.

Q. Okay. Right. Let's go on -- so you go on to say a reduction in earning capacity measures how much an injury or illness reduces a claims earning potential; correct?

A. That's the next sentence, correct, you read that correctly.

Q. And you go on to define lost wages or lost earnings as a measure of actual loss due to an interruption or reduction in earnings that is directly attributable to the injury or illness at issue; correct?

MR. VANSLYKE: Objection.

THE WITNESS: Yes. In this specific context, yes, that's how I would distinguish them.

BY MR. CROMWELL:

Q. Okay. What factors do you consider when determining someone's lost earning capacity?

A. Well, are you talking about hypothetically? In what context are you asking me that question?

Q. Well, I mean we're discussing lost

earning capacity in these cases. But I guess, broadly speaking, when you are determining or calculating someone's lost earning capacity, are there certain factors that you include to make that determination?

For instance, a person's education, their age, occupation, where they live, trying then to get a sense for how you make the calculation or determination as to someone's lost earning capacity?

A. Well, for example, if you were, let's say, trying to assess the earning capacity for somebody who just completed their residency in brain surgery at Johns Hopkins, I think there would be available data on that and one could calculate lost earning capacity on the basis of that available data.

So, yes, I think you mentioned some factors that would be useful in making that calculation, age, education, location, and so on.

Q. Okay. Do you ever consider the person's historical earnings or wages when determining lost earning capacity?

A. I think it can be a factor. But it isn't necessarily determinative by itself.

Q. Okay. But you would agree it's a factor?

A. It could be a factor. It really depends on context.

Q. Okay. It's your opinion, though, that there is a distinction between lost earnings and lost earning capacity; correct?

A. Well, as I think we testified earlier, we would divide it into potentially three separate sections, which is historical loss of earnings or actual loss of earnings, expected loss of earnings, which might be a projection into the future based on past earnings. And then if more hypothetical construct of what is their earning potential, what have they lost, what opportunities do they not have as a result of whatever the injury is.

Q. Okay. Well, just to make sure I understand, even if, for instance, lost earning capacity, past lost earnings, and future lost earnings may be different economic concepts, you would agree that a person's historical lost earnings does play a role in calculating a person's lost earning capacity?

A. Again, it depends on the context.

MR. VANSLYKE: Objection.
BY MR. CROMWELL:
Q. Okay.
A. It depends on context.
Q. In this context, with these VBA bellwether plaintiffs that you're offering opinions on.
A. Well, for example, I mean --
MR. VANSLYKE: Objection.
THE WITNESS: -- a person could decide -- sorry -- for a person -- a person could decide that they don't want to be a neurosurgeon and they just go out and get a job as a -- I don't know, you know, they're working at Starbucks. I think that that earnings history isn't necessarily reflective of or a factor in determining what they could be earning as a trained neurosurgeon. Right. I mean they are separate.
I'm not saying that one isn't potentially a factor in some cases. It just depends on the facts of the case.
BY MR. CROMWELL:
Q. Okay. If we look at page 12 to your

report, Exhibit 6, PDF page 14, you have a footnote -- I'll scroll back up. Footnote 27. And in that footnote, you have noted there is -- "This is also consistent with a large body of economic literature describing these concepts and the differences between them."

And when you're referring to "these concepts," you're referring to the concepts we've been talking about; right? The concepts of lost earning capacity versus lost earnings?

A. That's correct.

Q. So the first article you cite here is by Stephen Horner and Frank Slesnick entitled, "The Valuation of Earning Capacity Definition, Measurement and Evidence," in the Journal of Forensic Economics; correct?

A. That's correct.

Q. Okay. I'm going to introduce what we've marked as Exhibit 13.

(Exhibit 13 marked for identification.)

BY MR. CROMWELL:

Q. Going out of order.

MR. VANSLYKE: Counsel, I think this might be -- I understand. You're marking

it as Exhibit 13 instead of 12.

MR. CROMWELL: Yes. Just consistent with what the parties have done in the past to the extent that exhibits --

MR. VANSLYKE: I understand. Thank you.

BY MR. CROMWELL:

Q. Mr. Rybolt, do you have the ability to pull up Exhibit 13. I will share my screen with you as well.

Mr. Rybolt, what we've marked as Exhibit 13 is the same article you cited and relied upon entitled "The Valuation of Earning Capacity Definition, Measurement and Evidence," by authors Stephen M. Horner and Frank Slesnick; is that correct?

A. That's correct.

Q. Okay. And you have reviewed and relied upon this article for the opinions you're offering in this case; is that correct?

A. Yes. As cited and in support of the statement in my report.

Q. Fair to say you're familiar with the article?

A. Broadly. It's been a while since I

reviewed it.

Q. Okay. If we can, we're going to look at Exhibit 13 and it's page 16, but it's PDF page 4. There's a section entitled "The Legal Environment." Do you see that?

A. Yes.

Q. And halfway down the page, there's a section entitled "Definition"; is that right?

A. Yes.

Q. And essentially it says, "The law generally defines earning capacity to be, quote, the ability to earn money, and impairment of earning capacity means the diminution of loss of the ability to earn money"; is that correct?

A. Correct. That's what it says.

Q. You generally agree with that definition?

A. I think -- I think that's a fair definition.

Q. All right. Under Section C, which is entitled "Evidence for Impairment of Earning Capacity," the authors note -- missed something here. I apologize. I think I've missed my place somewhere.

A. Do you want to try it conceptually?

I'm okay with that.

Q. Well, let me -- let me ask you this. The authors note that often the most reliable evidence of earning capacity will be past earnings and is the most common basis for estimated expected earnings. Would you agree with that?

MR. VANSLYKE: Objection.

THE WITNESS: I'm sorry, can you repeat how you worded that?

BY MR. CROMWELL:

Q. Sure.

A. Just want to make sure I'm understanding.

Q. I'll break it apart because I think I made it compound.

Would you agree that often the most reliable evidence of earning capacity will be a person's past earnings?

A. Again, it really depends on context, you know, for the example I gave. I don't think past earnings would be, you know, indicative at all or informative at all. If you had somebody who had a 20-year history working at, you know, IBM as a midlevel management employee, maybe it's

a little bit more informative. In fact, probably a lot more informative. It really just depends on context.

Q. Okay. I think I'm looking at the wrong thing. Can we go off the record for one minute, please.

A. Want to take a break? I could use a little bit.

MR. CROMWELL: Yeah. Oh, sorry, I just realized it's 2:30 here, which is --

THE WITNESS: 11:30.

MR. CROMWELL: Do you need a lunch break? I don't know if you need it or not.

THE VIDEOGRAPHER: Want to go off the record real quick?

MR. CROMWELL: Yes, please.

THE VIDEOGRAPHER: Going to go off the record at 11:30 a.m.

(Recess taken from 11:30 a.m. until 11:39 a.m.)

THE VIDEOGRAPHER: Back on the record at 11:39 a.m.

BY MR. CROMWELL:

Q. Mr. Rybolt, before we broke, we were discussing Exhibit 13. This is an article you've

cited and have relied upon for some of your opinions in this case. I wanted to follow up and just kind of take a step back. If I can, I'm going to reshare Exhibit 13 with you.

And I'm still looking at -- this is the first page, title page. And there is a section entitled definitions, actual earnings, expected earnings, and earning capacity. Do you see that section?

A. Yes.

Q. This identifies essentially the three categories of earnings that you were referring to previously; is that correct?

A. I think that it does a pretty good job actually.

Q. Okay. And there is a section on actual earnings, expected earnings, and then another section on earning capacity on page 15 or PDF page 3; is that correct?

A. Yes.

Q. Okay. And under this particular section, the authors note here often the most reliable evidence will be past earnings, which is also the most common basis for estimating expected earnings. In other words, the legal

standard of loss in personal injury cases is usually earning capacity, but the evidentiary requirements of the legal process often lead to an estimation of earning capacity that is identical to an estimation of expected earnings.

First of all, did I read that correctly?

A. I believe you did, yes.

Q. Generally speaking, do you agree that -- first of all, do you agree with that statement?

A. Well, I think they've accurately characterized the situation. But, again, it depends on context. I've given you examples of that. Sometimes the most reliable evidence is not past earnings. But, yes, sometimes the legal standard in personal injury cases is usually earning capacity, but they're right. Sometimes the evidentiary requirements might be limiting.

So -- but what my point is, is that they are distinguished and can be distinguished and, in fact, the government through its actions is distinguishing them. So ...

Q. Well, you are familiar with Mr. Chad Staller's reports in these cases, are you not?

A. Broadly, yes.
Q. They were listed on your materials considered list; is that correct?
A. Yes, they were.
Q. And are you familiar with the manner in which Mr. Staller calculated lost earning capacity in each of the cases in which he's offering an opinion?
A. Well, as I noted in my report, I think he's called it lost earning capacity. But I would characterize what he's done as lost earnings.
Q. Okay. Well, I'm just asking if you're familiar with the manner in which he's calculated lost earning capacity?
MR. VANSLYKE: Objection.
THE WITNESS: I'm broadly familiar. I didn't, you know, inspect each and every calculation. That wasn't my assignment.
BY MR. CROMWELL:
Q. Okay. Well, just while we're on the topic, you would agree that Mr. Staller is using historical earnings to calculate lost earning capacity in each of the individual plaintiffs he's offering an opinion on?

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. Are you not?

A. I would not characterize it that way. I think he did. But that's not how I would characterize it.

Q. Would you -- so do you disagree with Mr. Staller's own characterization of his opinions?

A. I think his use of language was just inconsistent with mine.

Q. Okay.

A. I think it's more a question of semantics than methodology.

Q. Well, we were talking about whether lost earnings are a factor in determining lost earning capacity. So I don't know that it would be necessarily semantics. What I'm trying to figure out is whether lost earnings in the context of these cases is appropriately used to determine lost earning capacity.

Do you agree in the context of these cases that it is an appropriate to use historical lost earnings to determine lost earning capacity for these plaintiffs?

MR. VANSLYKE: Objection.

THE WITNESS: In these cases, no, because we already have a calculation of lost earnings capacity. And as I've already said, I don't think Mr. Staller has actually calculated lost earning capacity. I think I would put his calculations into the first two categories, which is actual lost earnings and expected lost earnings.

BY MR. CROMWELL:

Q. Okay. If we can look at -- still on Exhibit 13, we're going to look at page 18, which is PDF page 6. The very first full paragraph that starts with "for the average injured worker." Do you see that?

A. Yes.

Q. In that second line, it starts with "Although, past earnings do not necessarily dictate earning capacity, there may not be a legal requirement to do so, such information is likely to be presented to the trier of fact by one party or the other. This earnings data is likely to have an impact on the eventual compensation award. This is true because past

behavior is, after all, strong evidence of what a person was capable of doing in the past and, absent identifiable changes, strong evidence of what they would be capable of doing in the future. Actual earnings data is often the starting point for measuring capacity."

First off, did I read that correctly?

A. I think you did.

Q. You agree if there is no information to the contrary, it is usually assumed that actual earnings demonstrate earning capacity, at least according to these authors?

A. I think that's what they say. And in this case, we don't need to do that. We have a calculation of earning capacity. It's the disability benefit, which is treated as a separate compensation mechanism for veterans who have been disabled as separate and apart of from their earnings. As a matter of fact, their earnings, their actual earnings aren't a factor in determining the VA disability benefit.

Q. I understand, but I'm -- my question is pretty narrow. You agree that the authors here are saying that if there is no information to the contrary, it is usually assumed that

actual earnings demonstrate earning capacity?

A. Well, yeah, sure. I mean, you know, given context, if you don't have any other information, that would tend to dispute that point. And as -- in the example that I gave, you've got a long earning capacity for -- you know, in a particular field at a particular level, then that's probably -- I agree, that's probably a pretty good indication. And in many cases, that would be your best available evidence. But there are exceptions to that and based --

Q. Understood --

A. -- and it's not really even relevant in my opinion.

MR. VANSLYKE: Counsel, I'm going to ask that you let the witness finish his answer.

THE WITNESS: Well, I did.

BY MR. CROMWELL:

Q. You would agree that according to these authors in personal injury cases, it is usually assumed that actual earnings demonstrates earnings capacity, at least according to these authors?

MR. VANSLYKE: Objection.

THE WITNESS: I think what they are saying that it is often the only evidence available. But that's not always the case, as I've said, and I think they have acknowledged that there are exceptions. And, by the way, they also distinguish the two. So I think that's important to recognize.

BY MR. CROMWELL:

Q. All right. Well, it's your opinion that because none of the VBA bellwether plaintiffs' expert reports asserts damages claims for lost earning capacity, the use of a benefit intended to compensate plaintiffs for a loss of earning capacity as an offset is inapt, right? That's your first kind of general opinion?

A. I think that's accurate.

Q. And I think we talked about this before. You reviewed each of the applicable reports from Mr. Chad Staller; is that correct?

A. I probably reviewed one or two and then glanced at the others.

Q. Okay. But you have listed each of them in your materials considered list; is that

correct?

A. Yes.

Q. And from your review, you understand that Mr. Staller has offered opinions asserting lost earning capacity for numerous individual plaintiffs; correct?

MR. VANSLYKE: Objection.

THE WITNESS: Those were his words. And in my report, as I noted, I disagree with his use of that terminology because I don't think that's what he's calculated.

BY MR. CROMWELL:

Q. Okay. I'm going to just as an example introduce what we're going to mark as Exhibit 14.

(Exhibit 14 marked for identification.)

BY MR. CROMWELL:

Q. Are you able to access Exhibit 14, Mr. Rybolt?

A. I'm sorry, you've been pulling them all up, so I didn't --

Q. I'm going to -- I'm going to. I just wanted to make sure you have access to them. That's all.

A. I do, yes.
Q. All right. So I will share my screen. And just for the record, this is Mr. Chad Staller's expert report in the Howard case; is that correct?
A. It appears to be, yes.
Q. This is one of the same reports you had access to and reviewed; is that correct?
A. I did.
Q. If we look at page 3 of Mr. Staller's report, there is a Section 5 entitled "Lost Earning Capacity"; is that right?
A. There is.
Q. And his first line there, it says, "To estimate Mr. Howard's earning capacity absent the diagnosis, we utilized Mr. Howard's annualized regular earnings at the time of his 2008 retirement," and he totals it at $65,873.60 as our base.
First off, did I read that correctly?
A. I believe you did.
Q. Okay. Based on Mr. Staller's own language, you understand that what he's doing is utilizing Mr. Howard's historical earnings to calculate earning capacity; correct?

MR. VANSLYKE: Objection.

THE WITNESS: As I've said a few times now, I disagree with his use of the earning capacity -- earning capacity. I think he's calculated lost earnings.

BY MR. CROMWELL:

Q. Well, just to be clear, I'm asking a different question. I understand you disagree with Mr. Staller. I'm asking that you -- if it's your understanding that Mr. Staller is utilizing Mr. Howard's historical earnings to calculate Mr. Howard's earning capacity?

A. Well --

MR. VANSLYKE: Objection.

THE WITNESS: I'm having trouble with how you're characterizing that because I don't believe he is calculating lost earning capacity. So that's what he said he's done. I agree with you there. That's what he said he's done. But I don't agree that he is using that term as I have used that term in my report and as that term is used in those articles that I cited. Fair enough?

BY MR. CROMWELL:

Q. Okay. But you would agree with me that's what he does for each of the plaintiffs in which he's offering an opinion; correct?

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. Of lost earning capacity?

A. He states that it is lost earning capacity. I disagree with his use of that term, period. We'll stop.

Q. Understand. But for each report in which he opines on lost earning capacity, you understand, whether you agree with what he did or not, his calculations are based upon the individual plaintiffs' historical lost earnings; correct?

A. He begins -- to the best of my recollection in each case and certainly in this case, he is beginning with some record of past earnings to begin his calculation.

Q. Okay. To estimate a plaintiffs' earning capacity -- well, strike that. Understood. You have disagreed with Mr. Staller's use of the phrase "earning capacity," and what you think -- believe it means is actual loss, not a loss of potential; is that

accurate?

A. I think that's fair, yes.

Q. Okay. Do you know -- well, I think I asked this before, you've never spoken or corresponded with Mr. Staller before?

A. No, I haven't.

Q. Okay.

A. Not to the best of my knowledge. It's possible that our paths have crossed in the past, but not that I recall.

Q. Okay. So given that, fair to say you do not know whether he agrees with your assessment of whether he used the term earning capacity loosely or inexactly; correct?

A. I don't know. I have no idea.

Q. I just want to be clear, though, you agree that you are not offering any opinions regarding what lost earning capacity these plaintiffs may have incurred due to their injuries; correct?

A. No, I disagree. I think the government has already done that for us. That's the value of the disability benefit.

Q. So your opinion is that in a case in which a plaintiff has or is seeking a disability

benefit offset, that automatically equals the amount of lost earning capacity for that same plaintiff?

MR. VANSLYKE: Objection.

THE WITNESS: I don't think that's what I'm saying. That sounds overly broad.

BY MR. CROMWELL:

Q. Okay. Do you agree that your -- well, hold on.

Then let's clarify what your opinion is with regards to the role of a plaintiff's disability awards with regards to their lost earning capacity.

Are you going to be offering -- are you planning to offer an opinion as to the specific amounts of lost earning capacity each plaintiff -- each VBA bellwether plaintiff has incurred?

MR. VANSLYKE: Objection.

THE WITNESS: I think that's what I just answered, which is I think the VBA disability benefit serves that purpose. So I don't think we need to calculate.

BY MR. CROMWELL:

Q. Okay. So you have not done your own separate calculations to determine that amount?

A. I was not asked to do that level of calculation, no.

Q. Okay. So your opinion as to the lost earning capacity for each VBA bellwether plaintiff is simply the same amount as those offered by the U.S. economists; is that correct?

A. I think --

MR. VANSLYKE: Objection.

THE WITNESS: Sorry, Ben.

I think my -- I think I even say this in the report. I have not been asked to evaluate whether the disability benefits or their calculation were reasonable or to assess them. I'm accepting them as reasonable compensation for lost earning capacity.

But I have -- just to be clear, I have no opinion as to whether that's a factual statement or a reasonable statement. I'm accepting them.

BY MR. CROMWELL:

Q. Okay. But are you offering any kind of opinion regarding the amounts then that these

individual plaintiffs -- that lost earning capacity, these individual plaintiffs may have incurred, are you simply relying upon the United States experts for those numbers?

MR. VANSLYKE: Objection.

THE WITNESS: Well, to be clear, I haven't performed any calculations. What I'm talking about are damages concepts, right. And these appear to be wholly separate revenue streams, right. I can give you a hypothetical based on Mr. Howard, if you like, that explains my point.

BY MR. CROMWELL:

Q. This wasn't my question. I'll move to strike.

Are you offering any opinion as to the amounts of lost earning capacity these individual plaintiffs have incurred?

A. I am not separately evaluating lost earning capacity for any of these individual plaintiffs. I am accepting the VBA's calculation based on the disability benefit.

Q. Understood. Okay.

A. Fair enough?

Q. Thank you. Yes, thank you.
Have you -- strike that.
In your review of Mr. Staller's reports, you understand that he is offering in part opinions regarding individual plaintiffs future potential earnings; is that correct?
A. In some cases, I think that's correct.
Q. And to do so, that would be based in part on the person's work-life expectancy; correct?
A. Yes, I believe that's correct. Yes.
Q. In offering such an opinion, doesn't that presume that the individual plaintiff will, for instance, not change careers?
A. Well, I think it assumes more specifically that their income will be consistent, and I don't recall any adjustments Mr. Staller might have made, but -- with their past earnings.
Q. If they change careers and have much lower income, you would agree that the projection of future earnings would be wrong in that instance; right?
MR. VANSLYKE: Objection.

THE WITNESS: There are factors that could affect whether or not, you know, the calculation of expected earnings is incorrect, yes.

BY MR. CROMWELL:

Q. Does the fact that they could be incorrect render his opinions unreasonable or speculative, in your words?

A. Well --

MR. VANSLYKE: Objection.

THE WITNESS: From a plaintiff's perspective, it's probably the best estimate of expected earnings. So, yes, is it possible that his actual earnings could divert from that. Yes, and I would assume based on his history of actual earnings that the best estimate of his future earnings -- excuse me -- expected earnings, I think, would be based on that fact right. Could it divert that from that? Sure. Does that make it unreliable, you're getting into an interpretative area, you know, not prepared to go there.

BY MR. CROMWELL:

Q. Well, I'm asking -- your a forensic economist; correct?

A. Yes.

Q. So does the fact that a person may or may not -- well, does the fact that a person may work less or more than their work-life expectancy render opinions based upon that work-life expectancy unreliable?

A. I don't believe so.

Q. Okay. Does the fact that someone may work more or less than their work life expectancy render opinions that rely upon that work-life expectancy speculative?

A. So for both this and the prior answer, my answer is that these are the best estimates the plaintiff typically has available to them. So the reliance on the best available data is done with the understanding that, yes, these may not be 100 percent perfect predictions of what that plaintiff earns, but they're based on the best available evidence. And that's usually the acceptable standard in my understanding.

Q. So, in your experience as a forensic economist, is it reasonable to reliable upon

work-life expectancy tables?

A. In the absence of other evidence, that's a pretty good place to start.

Q. Okay. Same would be true for general life expectancy tables, I would assume; is that correct?

A. Again, in the absence of other available evidence, that would be a pretty good place to start.

Q. Okay. Let me stop sharing Exhibit 14. And we'll go back to your report, Exhibit 6. And we touched on this before, right, you note that VBA disability benefits are intended to compensate the beneficiary for a loss of earning capacity, not lost earnings; right?

A. Start of paragraph 30, is that where you are?

Q. Yes.

A. Yes.

Q. You are familiar with 38 CFR part 4, correct, you cite and rely upon it in your report?

A. If you're asking me if I can recite it, no. But if I cited it, yes, I'm familiar with it.

Q. So -- sorry, didn't mean to interrupt you.

A. Sorry.

Q. If we're looking at Footnote 22 of your report, you agree you cited to 38 CFR Section 4.1; is that right?

A. Yes.

Q. Okay. Did you look at other sections of 38 CFR part 4?

A. I would think that I did. I don't recall them specifically sitting here.

Q. Okay. Go ahead and enter Exhibit 15.

(Exhibit 15 marked for identification.)

BY MR. CROMWELL:

Q. Please let me know once you've gotten -- received that.

A. It's in the window. Yes, I have it.

Q. Okay. And what I've shared you and marked as Exhibit 15 is 38 CFR Section 4.10 entitled "Functional Impairment"; is that correct?

A. Yes.

Q. Have you seen this section before?

A. I'm sure that I looked at it.

Q. Okay. And it starts off with "The basis of disability evaluations is the ability of the body as a whole or of the psyche or of a system or organ of the body to function under the ordinary conditions of daily life including employment."

First off, did I read that correctly?

A. I believe you did.

Q. Would you agree with me that a person's ability to function in employment is simply one piece of information considered when making a disability determination?

MR. VANSLYKE: Objection.

THE WITNESS: I have no basis for answering that question.

BY MR. CROMWELL:

Q. Okay. So you don't know one way or the other as you sit here?

A. I believe I cited what they -- what is described as a basis for making that determination which is population averages. But I'm not obviously sitting in the chair making that calculation.

Q. Well, do you know whether, you know, a person's ability to function in employment is

considered at all in making a veteran's disability determination?

MR. VANSLYKE: Objection.

THE WITNESS: Again, I'm not the person who makes those determinations. I can tell you what is described in the 38 CFR in terms of how that's calculated, which is based on average, averages -- average earnings for a population or the average impact of a disease on a given population. Beyond that, are there other factors that are considered, I'm not sitting in that chair.

BY MR. CROMWELL:

Q. Okay. You indicated before, and correct me if I'm wrong, that when disability determinations are being made, a person's employment and the amount they make has no role in making a disability determination; correct?

A. My understanding is that past earnings and actual earnings are -- do not affect the disability payment except perhaps with limited exceptions.

Q. Do you know what those exceptions are?

A. I don't know all of them. I think I recall that if you have 100 percent disability and you have some actual earnings, that that might affect your determination. But the specifics of that, I don't recall.

Q. Understood. Have you ever heard of -- well, that's okay. Never mind.

Is it your understanding that disability -- VA disability evaluations looks at a person's ability to function under ordinary conditions and of daily life?

MR. VANSLYKE: Objection.

THE WITNESS: Again, repeating what I've said, I'm not sitting in that chair. I can tell you that they are looking at data that are consistent with the average effect of certain conditions on a general population.

BY MR. CROMWELL:

Q. You're saying the average effects on a given population is one of the factors they use to determine whether a person is disabled or not?

A. Excuse me for interrupting.

That is my understanding. The earnings or the impairment on a given population

is used to determine the VBA benefit. Excuse me.

Q. Do you know -- well, let me step back. Are you familiar with how VA disability evaluations are performed?

A. Are you talking about medically? No.

Q. I'm not talking about medically. I'm just asking are you familiar with what disability examinations are? We'll start there.

MR. VANSLYKE: Objection.

THE WITNESS: The specifics of that process, no, I'm not familiar.

BY MR. CROMWELL:

Q. Okay. Do you know what a veterans service representative is?

A. Specifically what their function and role is, I don't know. I'm not familiar with that.

Q. Okay. Same question, do you know what a rating veterans service representative is?

A. I'm sorry, can you -- I didn't understand.

Q. Sure. Do you know what a rating veterans service representative is?

A. I think my answer is the same. I don't have a specific familiarity with that role.

Q. Okay. Do you know what kind of questions are asked during a disability examination?

A. Well, I think I've answered that. But I'm not familiar with that process, no.

Q. Do you know what kind of information a veteran needs to provide during a disability examination?

A. I think my answer, again, has to be the same. I'm not familiar with the specifics of that process.

Q. Okay. Have you ever seen a disability benefits questionnaire?

A. I think you asked me that earlier.

Q. Have you ever seen one?

A. To my -- best of my recollection, I don't recall having seen one.

Q. All right. When applying for VA disability, you agree that veterans are not required to provide proof of employment; correct?

A. That would be my understanding.

Q. For instance, they're not required to produce salary information or information from their employer?

MR. VANSLYKE: Objection.

THE WITNESS: Well, I'm not sure what they're required to produce. As I've said, I'm not familiar with the very specifics of the process. But my understanding is that the benefit is not dependent upon a salary history or even actual employment.

BY MR. CROMWELL:

Q. I was going to say break that apart. You agree it's not dependent upon whether a veteran is actually employed or not; correct?

A. That's my understanding.

Q. Okay. You gave an example earlier, and I meant to ask about it at the time. You would agree that a VBA disability benefit for a given injury or condition is the same whether the claimant has a high earning capacity or a low earning capacity; correct?

A. I think --

MR. VANSLYKE: Objection.

THE WITNESS: -- my understanding -- sorry. My understanding is that the VBA disability benefit is not contingent upon or based on earnings.

BY MR. CROMWELL:

Q. You would agree that the VBA disability benefit for a given injury or condition is the same whether the claimant has a below average earnings history or above average earnings history?

A. Earnings history or earnings capacity?

Q. This question is about earnings history.

A. My understanding is that it is an attempt to understand the average impairment based on population statistics for a given injury or illness. So in that sense, it is related to earnings capacity based on averages for the population. But it is not based -- my understanding is that it's not based on actual earnings.

Q. Okay. So you'd agree that the VBA disability benefit for a given injury or condition is the same, whether the claimant has a below average earning history or above average history?

A. My understanding is that actual earnings history or actual earnings is not a factor in that determination.

Q. I think you said -- testified about this before, you understand that a veteran can obtain VA disability benefits even though they are working?

A. That's my understanding.

Q. You have opined that reducing a plaintiff's overall damages award on the basis of a unrelated VBA disability benefit would leave the plaintiff less than financially whole; is that generally accurate?

MR. VANSLYKE: Objection.

THE WITNESS: I -- sorry. I think that's a fair characterization.

BY MR. CROMWELL:

Q. And you understand these VBA bellwether plaintiffs are receiving disability compensation payments; correct?

A. That's my understanding, yes.

Q. And you understand that some, if not all, depending on the plaintiff, of those payments are related or presumed to be related to conditions they obtained from being at Camp Lejeune; is that correct?

A. I think you -- yes. I think my understanding is that the disability benefits are

based in part on disability injuries or diseases related to their exposure at Camp Lejeune. Did I express that?

Q. Yeah, I think we agree.

A. Yeah.

Q. You'd agree with me that if not for their time at Camp Lejeune they would not these plaintiffs would not be receiving disability compensation for service-connected conditions they claim are from Camp Lejeune?

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. Follow?

A. Not really.

Q. If -- if they were never at Camp Lejeune, you'd agree with me that they won't -- they would not be receiving disability compensation for the same injuries they claim are from Camp Lejeune?

MR. VANSLYKE: Objection.

THE WITNESS: I think that involves conclusions as to facts that I wasn't asked to opine on. If they were never at Camp Lejeune then I would assume they wouldn't have Camp Lejeune related claims

if that's your question.

BY MR. CROMWELL:

Q. It is my question.

A. Okay.

Q. Yeah. You understand that in these cases, plaintiffs are separately seeking various forms of economic damages stemming from the presence of injuries they assert come from their time at Camp Lejeune; correct?

A. Let me see if I can turn that around. I understand that these plaintiffs were unable to pursue claims against the government for all of their losses and that's what this litigation is intended to determine.

Does that answer your question?

Q. I think it answers a different question.

My question is: Is it your understanding that plaintiffs are seeking various forms of economic damages that they allege stem from injuries that they presume came from their time at Camp Lejeune?

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. That's all I'm asking.

A. I think that there are damages, yes, or losses, additional losses related to their injuries and illnesses sustained at Camp Lejeune.

Q. It is your opinion that VBA disability benefits may only offset damages claims for lost earning capacity; correct?

A. You keep inserting the word "only." I don't know that I can state unequivocally that it's only. But just taking the words of the documents on their faces as I've decided them, that's what it's stated. And it's clearly separate from actual earnings.

Q. I guess I'm asking you are there other categories of damages in which you think in your opinion VBA benefits may offset against?

A. That's not my initial assumptions based on the statements and behavior of the government. I do understand that there are special monthly compensations that might be for other purposes. But I have not been asked to look into that or opine on that point.

Q. Okay. It's your opinion that none of the VBA bellwether plaintiffs are asserting a claim for lost earning capacity; is that correct?

MR. VANSLYKE: Objection.

THE WITNESS: Well, I think that misstates the documents. But I think initially they were not submitting claims related to sort of -- let's say, for example, nonpayment of their disability payments or reconsideration reevaluation of their VA disability payments. That might be a separate category. But broadly -- and then I think subsequent to or later they submitted amended claims in which they've made a conditional claim related to VA disability claims -- payments. Excuse me.

BY MR. CROMWELL:

Q. All right. I'm going to share your report again. Real simple question, Mr. Rybolt. It's your position that none of the VBA bellwether plaintiffs expert reports assert damage claims for lost earning capacity; correct?

A. Can you read the rest of the sentence in the footnote?

Q. Well, I'm going to start with that's the first part of my question; right?

A. I agree that's the first part of that sentence.

Q. Okay. If none of the VBA bellwether plaintiffs in your view are asserting claims for lost earning capacity and VBA disability payments in your view may only offset against claims for lost earning capacity, then is the natural conclusion of those two things that the offset for any benefits paid from the VA for disability is zero dollars?

MR. VANSLYKE: Objection.

THE WITNESS: That was a long hypothetical. Can you try it again?

MR. CROMWELL: Madam Court Reporter, can you repeat the question, please.

(The reporter read back the last question.)

MR. VANSLYKE: Same objection.

THE WITNESS: So a couple of things. Again, you inserted the word "only." But I would say that the VBA disability payments have not been an element of plaintiffs's claims as far as I understand and, therefore, can use them to offset other claims in claims related to other losses would be inappropriate. The claimants aren't at issue. I do understand that subsequent to -- well, I

think it was before I filed my report, but that to the plaintiffs have more recently filed an amended damages claim form in which they assert contingent claims. So stop.

BY MR. CROMWELL:

Q. Is the question answer to my question, yes, it's zero dollars or, no, it's not zero dollars?

MR. VANSLYKE: Objection.

THE WITNESS: I think I just answered that.

BY MR. CROMWELL:

Q. Okay. In your view, should any amount of disability benefits be permitted to be offset in these cases?

MR. VANSLYKE: Objection.

THE WITNESS: I think that would be subject to items of proof. I think that the -- to the extent that you can, in your filings, establish that the VA disability benefit was for purposes other than earnings capacity, then that could conceivably lead to an offset against some forms of claims. But I don't believe

you've established that at this point.

BY MR. CROMWELL:

Q. So without that being established, is it your view that you wouldn't be able to use any of the benefits paid by the VBA to these plaintiffs to offset any damages award?

MR. VANSLYKE: Objection.

THE WITNESS: My assumption and my understanding is that the VA disability benefit is for lost earnings capacity and is considered independent of actual earnings. So, yes, I do think those things are disconnected and there would be no offset.

BY MR. CROMWELL:

Q. Okay. Thank you. All right. You are offering the disability ratings --

A. I want to add something to that prior answer just to be absolutely clear.

I'm not trying to assert a legal opinion in saying so, but as a damages expert and approaching this from a damages perspective, I believe that to be an accurate characterization. Is that fair?

Q. That's fine.

You are familiar with the disability ratings for some of these individual plaintiffs; is that correct?

A. Broadly speaking.

Q. Would you agree with me that simply because a plaintiff's disability rating may change does not mean that it is likely that it will change?

MR. VANSLYKE: Objection.

THE WITNESS: Well, I mean, there is some likelihood that it could change, right. I don't know specifically what that likelihood is.

BY MR. CROMWELL:

Q. That's the answer to my follow-up. Have you attempted to measure the likelihood that any plaintiffs' individual disability ratings may change in the future?

MR. VANSLYKE: Objection.

THE WITNESS: I think we cited examples, several examples from among the plaintiffs, and also we also cited, I believe, a national statistic about ratings changes or -- I think it was just ratings increases, so not even decreases.

So I do think we have some estimates of what that probability is.

BY MR. CROMWELL:

Q. Okay. Have you -- have you, as you're sitting here today, prepared an estimate of a likelihood that any of these individual VBA bellwether plaintiffs' disability ratings will change in the future?

A. I don't think that's a relevant question. The question is that the observation can change.

Q. Mr. Rybolt, that's simply not a response to my question, and I'll move to strike.

A. I think it is a response. I get to respond as I choose, just as you get to ask questions as you choose.

Q. That's not entirely accurate. But you may answer the question. I will ask the question again. Go ahead.

MR. VANSLYKE: Objection.

THE WITNESS: I've forgotten what the question was. You asked me something about probability.

BY MR. CROMWELL:

Q. For any of these VBA bellwether

plaintiffs, have you calculated the likelihood in which their individual disability ratings will change in the future?

MR. VANSLYKE: Objection.

THE WITNESS: So in order to make that calculation -- and the answer is no, but let me explain. In order to make that calculation, I would need to have data from the VA on some reasonable sample of likely -- or similarly situated individuals in order to make that estimate. So, no, I have not been asked to do that analysis.

BY MR. CROMWELL:

Q. Okay. Are you familiar with how VA disability ratings decisions are changed?

MR. VANSLYKE: Objection.

THE WITNESS: Are you asking about a process at the VA?

BY MR. CROMWELL:

Q. Yes.

A. I am not familiar with the specific workings of those processes at the VA.

Q. Okay. Do you know one way or the other whether for a person's disability rating or

particular injury to change, they need to undergo a routine future examination?

MR. VANSLYKE: Objection.

THE WITNESS: That's my understanding that they would need to be reevaluated at some level.

BY MR. CROMWELL:

Q. And even if there is an examination, you understand that a recommendation would need to be made to change that disability rating; correct?

A. I think that's -- I don't know the answer to that one way or the other.

Q. Okay. Do you know once -- or if a recommendation is made to change someone's disability rating, whether it is automatically changed?

A. I don't know the answer to that.

Q. Okay. We just mentioned a moment ago the idea of routine future examinations. Do you understand what those are?

A. Routine future examinations?

Q. Uh-huh.

A. I don't -- I don't have an understanding of what that is other than common

English interpretation of that.

Q. Well, I think maybe we touched on it before, but I just want to make sure I understand. Do you understand that a routine future examination must be performed before a veteran's disability rating can be changed?

MR. VANSLYKE: Objection.

THE WITNESS: I have the general understanding that every examination occurs that can lead to a ratings change. Beyond that, I don't have much knowledge of the specifics of that process.

BY MR. CROMWELL:

Q. All right. Are you familiar with VA policy letters?

A. That's a term of art that I am -- you know, I may have seen them in the course of this case. But it's a term of art that I'm not terribly familiar with.

Q. Okay. I'll go ahead and introduce what we've marked as Exhibit 17.

(Exhibit 17 marked for identification.)

BY MR. CROMWELL:

Q. I'll give you a moment.

A. I see it. Okay.
Q. I'll share my screen.
A. Okay.
Q. Maybe. Maybe I will. Maybe I won't. There we are.
Okay. Just for completeness, Mr. Rybolt, what we've identified as Exhibit 17 is a VA policy letter 21-01 and is dated as of October 7, 2021; is that correct?
A. That's what I see, yes.
Q. Okay. Have you ever seen this before?
A. I don't specifically recall.
Q. Okay. Under the purpose section on this letter, it states, "This letter provides instruction to regional office claims processors regarding scheduling of routine future examinations or RFEs"; is that correct?
A. That's what the sentence reads, yes.
Q. Okay. Are you familiar with what was the impetus for this particular policy letter?
MR. VANSLYKE: Objection.
THE WITNESS: No.
BY MR. CROMWELL:
Q. Under "background," if you would,

read with me. "Generally, examinations will be required if it is likely that a disability has improved or if evidence indicates there has been a material change in a disability or that the future rating may be incorrect."

First off, did I read that correctly?

A. Not quite. You said future instead of current in that sentence.

Q. Okay. With that change, did I read that correctly?

A. Yes.

Q. Under analysis and conclusion, which is just the next section, it states that the "Compensation service analyzed data on all veterans who had an RFE conducted in fiscal years 2018, 2019, and 2020. The analysis revealed that the majority, 77 percent, of conditions reviewed were confirmed and conditioned. Only about 10 percent of conditions were reduced and the remaining 13 percent of conditions were increased."

First of all, did I read that correctly?

A. I believe you did.

Q. Would you agree with me that at least

according to this VA policy letter, the VA compensation service in analyzing data on all veterans who had RFEs conducted in fiscal years 2018, 2019, and 2020, that the majority, or 77 percent, had their conditions confirmed and continued?

MR. VANSLYKE: Objection.

THE WITNESS: I agree that that's what this paragraph, says.

BY MR. CROMWELL:

Q. Meaning they stayed the same; correct?

MR. VANSLYKE: Objection.

THE WITNESS: Again, I believe that's what this paragraph says.

BY MR. CROMWELL:

Q. Do you have any reason, as you sit here today, to disagree with that?

A. I do not.

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. Have you seen these numbers before?

A. I -- I believe that I have, actually.

Q. Okay. Do they play any role in the particular opinions you're offering today?

A. No.

Q. Okay. Based off these numbers hypothetically if they are true, would you agree that any plaintiff that went for a routine future examination would more likely than not have their condition confirmed and continued?

MR. VANSLYKE: Objection.

THE WITNESS: I would agree that that's what this paragraph states. But I don't think that's the point of my observation about the possibility of ratings changes.

BY MR. CROMWELL:

Q. Okay. You agree that one can reasonably conclude that each plaintiff is willing to accept continuing benefits from the VBA disability program; correct?

MR. VANSLYKE: Objection.

THE WITNESS: I think that statement is consistent with the observations that they haven't made any claims regarding their VA disability benefits. So assuming that that's true, and it may not be, but assuming that that's true, then I would assume, yeah, that it's a reasonable

assumption that the plaintiffs aren't contesting their VBA disability benefits.

BY MR. CROMWELL:

Q. Would you agree that it would be rational behavior for a plaintiff to continue to receive or seek to receive their VBA disability benefits?

MR. VANSLYKE: Objection.

THE WITNESS: Can you -- what? Would it be irrational for them to want to continue?

BY MR. CROMWELL:

Q. Would it rational? Do you agree -- as an economist, do you agree it's rationale behavior for a plaintiff to be willing to accept continuing benefits from the VBA disability program?

MR. VANSLYKE: Objection.

THE WITNESS: Is it -- I'm sorry rational -- I want to make sure I understood your question correctly. Is it rational behavior for them to want to continue to receive their VA disability benefits?

BY MR. CROMWELL:

Q. Yes.
A. All else being equal, yes, I think that's rational.
Q. I mean, conversely, you wouldn't expect, right, a veteran to seek to stop receiving their VA disability benefits?
MR. VANSLYKE: Objection.
THE WITNESS: I have no idea.
BY MR. CROMWELL:
Q. Would you agree consider that rational or irrational behavior?
MR. VANSLYKE: Objection.
THE WITNESS: All else being equal to decline a benefit or an income stream to which you're entitled, yes, that would be irrational behavior.
BY MR. CROMWELL:
Q. We previously discussed the M21-1 adjudication procedures manual. Do you recall that?
A. I recall it generally, yes.
Q. Okay. Going to go ahead and enter what I'm marking as Exhibit 18.
(Exhibit 18 marked for identification.)

A. Excuse me, just to clarify, was this the same as Exhibit 11?

Q. It is not. I'll explain. This is a another part of the same manual.

A. Okay. And you're pulling it up?

Q. I am pulling it up, yes.

A. Okay.

Q. Just for the record, this is M21-1 adjudication procedures manual part 4, subpart 2, Chapter 1, Section A entitled "Determining the need for review examinations."

Do you see that in front of you, Mr. Rybolt?

A. Yes, I see the top of the page.

Q. Okay. And it indicates an overview, right, this section contains the topic determining the need for review examinations which we've been discussing in some detail?

A. Right.

Q. If we look at PDF page 2, there is a section, we've -- this is for 4, 2, 1, A, that's where we are. This is 1B. You see where I'm looking?

A. Yes.

Q. And it's entitled "Scheduling Future

Review Examinations and Compensation Cases." And it states, "Exercise prudent judgment and refer to 38 CFR 3.321(b) in determining the need for review examination. It is the policy of the Veterans Benefits Administration to request future examinations only when absolutely necessary, and every effort should be made to limit cases where future examinations are requested."

First off, did I read that correctly?

A. I believe you did.

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. Do you understand -- or is it your understanding that it is VBA policy to request future examinations only when absolutely necessary?

MR. VANSLYKE: Objection.

THE WITNESS: Well, I can see in this document that's an -- to the extent that that's an expression of policy that your characterization is accurate.

BY MR. CROMWELL:

Q. Do you have any independent knowledge one way or the other?

A. Of what VBA policy is?
Q. On this topic.
A. I do not.
Q. Okay. Would you also agree that at least according to VBA policy that every effort should be made to limit cases where future examinations are requested?
MR. VANSLYKE: Objection.
THE WITNESS: I think that's what the document says.
BY MR. CROMWELL:
Q. Do you have an opinion one way or the other whether these VBA bellwether plaintiffs will need to undergo a future reevaluation?
MR. VANSLYKE: Objection.
THE WITNESS: I think it's likely based on the statistics that you've shown me that their diseases -- that their diseases will progress one way or another, either getting worse or by improving. I think that's a reasonable assumption.
You cited a statistic that I think was 13 percent in a given year, right. Over the course of a few years that could be a pretty substantial number of cases.

And in each case, if those benefits would have gone down, then your statement, your request for an offset is overstated and those plaintiffs would be undercompensated.

So these probability questions that you're asking really don't enter into it. Depending on what the policy it is --

BY MR. CROMWELL:

Q. They don't enter into what -- oh, sorry. They don't enter into what?

A. Depending on what the policy is, if the Court's intent is to ensure that each plaintiff is adequately compensated for their losses and the fact that even one of them might experience a loss of benefits in the future making -- meaning that your offset is overstated, the Court might choose to disagree with that. I'm not saying that they should. I'm not saying that that's what the law requires. I'm just making that observation as a damages expert.

Q. Based upon what though?

A. My 20 years of experience. My training. My background. The numerous cases that I've worked on.

Q. Okay. I'm going to enter into evidence what we've marked as Exhibit 19 and I will share that.

(Exhibit 19 marked for identification.)

THE WITNESS: I have it.

BY MR. CROMWELL:

Q. All right. This is 38 CFR Section 3.327 entitled "Reexamination"; is that correct?

A. That's what the document says.

Q. Have you ever seen this particular CFR before?

A. I think I've probably glanced at it, yes.

Q. Okay. This states, "Reexaminations, including periods of hospital observation, will be requested whenever VA determines there is a need to verify either the continued existence or the current severity of a disability. Generally, reexaminations will be required if it is likely that a disability has improved or if evidence indicates that there has been a material change in a disability or that the current rating may be incorrect. Individuals for whom reexaminations

have been authorized and scheduled are required to report for such reexaminations."

First of all, did I read that correctly?

A. I believe you did.

Q. Given your analysis in this case, do you know whether any of the VBA bellwether plaintiffs in these cases have had reexaminations that have been authorized and scheduled?

MR. VANSLYKE: Objection.

THE WITNESS: I don't believe I have information to that effect, although, I can see in the data that their ratings have changed. So I think I can make the reasonable inference that there was some reexamination.

BY MR. CROMWELL:

Q. Mr. Rybolt, I apologize, that's not what I asked. I asked simply, do you know whether any of the plaintiffs in these cases have had reexaminations that have been authorized or scheduled?

MR. VANSLYKE: Objection.

THE WITNESS: I'll give you the same answer.

BY MR. CROMWELL:

Q. I don't know the answer to the question. Do you know whether they've been scheduled or not?

A. I think --

MR. VANSLYKE: Objection.

THE WITNESS: -- it's a reasonable inference given the data, but I have not -- I don't have separate information on them seeking the reexamination that you're describing.

BY MR. CROMWELL:

Q. So your assumption is that they -- it's reasonable to assume that they have been, but you don't know that they are. Is that a fair characterization of what you just said?

A. I am not sure. What do you mean by "are." Are intending to? Is that --

Q. Now that they've been authorized and scheduled?

A. I don't have separate information on that point, no.

Q. So as you sit here, you don't know whether any of these VBA bellwether plaintiffs have had a reexamination authorized or scheduled?

MR. VANSLYKE: Objection.

THE WITNESS: Again, I think that's a reasonable inference from the fact that their disability ratings have changed over time which we can see in the data. But I don't have some sort of document that establishes, you know, that a reexamination was, as you said, requested and approved, I think was your language.

BY MR. CROMWELL:

Q. Okay. Were you given access to any of the plaintiffs' VBA records to review in this case?

A. That's a pretty broad category. Are you referring to records of their disability benefits, for example, or their disability ratings. Yes, we've seen those.

Q. You've seen all the VBA documents that have been produced by the VBA for each of the individual plaintiffs?

MR. VANSLYKE: Objection.

THE WITNESS: I don't -- I don't know that that's true one way or the other.

BY MR. CROMWELL:

Q. Well, I'm asking. They're not listed

on your materials considered list. I'm curious whether you had access and reviewed them at all?

MR. VANSLYKE: Objection.

THE WITNESS: Well, so I gave you an example of data that was produced. And I'm not aware of anything besides that. But you asked whether I had seen all of the materials produced, and I have no way of knowing that.

BY MR. CROMWELL:

Q. Okay. Have you seen any disability benefits questionnaires, ratings decision sheets for any of the individual plaintiffs?

A. I don't recall that.

Q. Okay. If you don't recall seeing them, is it fair to say you haven't reviewed such records in this case for the individual plaintiffs?

A. No, I don't think that's fair. I mean, if they're listed, then I probably did look at them at some point, but it's not a memory test and I don't specifically recall what you are asking.

Q. If they are not listed on your materials considered list, is it a fair

interpretation that you have not reviewed those records?

A. I think that's reasonable because I made every effort to list everything we received.

Q. All right. Continuing to look at Exhibit 19, this is 28 CFR Section 3.327. If you look at Section B, it's entitled "Compensation Cases." Do you see that?

A. I see that.

Q. Have you ever seen this particular section of the CFR?

A. I'm sure I've probably looked at it, as I've mentioned before, but I didn't memorize it.

Q. Okay. If you look at B(2), it says, "No periodic future examinations will be requested. In service connected cases, no periodic reexamination will be scheduled."

And then it lists a number of items; correct?

A. Yes.

Q. For instance, under B(2)(i), it says, "No periodic reexamination will be scheduled when the disability is established as static"; is that correct?

A. That's what the sentence says.
Q. Do you know whether any of the VBA bellwether plaintiffs have had any of their disability conditions considered static?
MR. VANSLYKE: Objection.
THE WITNESS: Again, I wasn't asked to review any data relevant to that question.
BY MR. CROMWELL:
Q. Okay. Moving on, looking at 3.327(B)(2)(2) states that "No periodic reexamination will be scheduled when the findings and symptoms are shown by examinations scheduled in paragraph 2(B)(1) of the section or other examinations and hospital reports to have persisted without material improvement for a period of five years or more."
First off, did I read that correctly?
A. I believe you did.
Q. Did you evaluate any of the VBA bellwether plaintiffs in these cases to determine if they have had disability conditions that have persisted without material improvement for a period of five years?
MR. VANSLYKE: Objection.

THE WITNESS: I think we have data with which we could calculate that, at least within the limited range of data that we have. But we were not specifically asked to make that calculation.

BY MR. CROMWELL:

Q. So as you sit here today, you're not -- you have not made those calculations or offering opinions on that topic?

A. I am not offering opinions on that point, that's correct.

Q. Okay. Same question, a little bit different though. Did you evaluate any of the plaintiffs in these cases to determine if they have had a service-connected condition that has been in effect for ten years or more?

A. Specifically within the time frame ten years or more?

Q. Uh-huh.

A. I don't believe we looked at that specific question, no.

Q. Okay. Are you aware that service connection for any disability which has been in effect for ten years or more will not be severed

except when it's showing that the original grant was based on fraud or is clearly shown in their records that the person concerned did not have a requisite service or character of discharge?

MR. VANSLYKE: Objection.

THE WITNESS: Yes, I'm not aware of that specific requirement or condition.

BY MR. CROMWELL:

Q. Okay.

A. And, I'm sorry, was that your question? Was I aware of that?

Q. Yeah.

A. I'm not aware of that specific question.

Q. All right. I'll go ahead and enter into evidence what we previously marked as Exhibit 25.

(Exhibit 25 marked for identification.)

BY MR. CROMWELL:

Q. I will share my screen with you.

Again, this is from 38 CFR and this is Section 3.957 entitled "Service Connection." Do you see that?

A. I'm sorry, we're back on Exhibit 25?

Q. We are on Exhibit 25, yes.
A. Yes, I see the document.
Q. Have you ever seen or read --
MR. VANSLYKE: Counsel, I just want to note before we jump into this that at some point soon I think we're due for a lunch break if you've got a spot for a break coming up.
MR. CROMWELL: I do. I've got, like, maybe three minutes hopefully, then I agree.
BY MR. CROMWELL:
Q. Sorry. My question is are you familiar or have you ever seen 38 CFR Section 3.957?
A. Well, I'll just state, you know, because you've asked me now several of these, my recollection is that I did review the relevant sections. I don't -- I did not memorize them and, you know, I have no specific recollection as to this particular, you know, section of that -- of that CFR. That said, I'm happy to answer your questions.
Q. Okay. But did you review this one in preparation for your report or your testimony

today?

MR. VANSLYKE: Objection.

THE WITNESS: To my recollection, as I just said, is that I looked at all of the relevant sections including this one, but you know --

BY MR. CROMWELL:

Q. Understood.

A. I don't have a strong recollection of the document months later, is that clearer?

Q. No, I understand. It's not meant to be a memory test, but there's some familiarity with it, it's easier to ask you questions.

A. Okay.

Q. Okay. Under this section, it starts off by saying, "Service connection for any disability or death granted or continued under Title 38 USC, which has been in effect for ten or more years will not be severed except upon a showing that the original grant was based on fraud or it is clearly shown from military records the person concerned did not have the requisite service or character of discharge."

First off, did I read that correctly?

A. I believe you did.

Q. Okay. Would you agree that according to at least federal regulations that any service-connected condition a VBA bellwether plaintiff has had for more than ten years will not be severed absent showing fraud or clear records showing the plaintiff did not have the requisite service or type of discharge?

A. I agree that that's what this document says.

Q. Have you made any attempt or are you planning to offer any opinion as to whether any of the VBA bellwether plaintiffs have any service-connected conditions that they have had for more than ten years?

MR. VANSLYKE: Objection.

THE WITNESS: I would have to check. I don't -- well, no, I'll just answer more simply that, no, I have no intention of offering that specific opinion at this time.

BY MR. CROMWELL:

Q. Okay. I wanted to go back to Exhibit 19. Sorry. And Exhibit 19 is 38 CFR 3.327 and looking at B(2) and then (4). And this portion of the regulation states that "No

periodic reexamination will be scheduled in cases of veterans over 55 years of age except under unusual circumstances."

First off, did I read that correctly?

A. I believe you did.

Q. Did you make any determination as to the current ages of the VBA bellwether plaintiffs in these cases?

A. I believe we have that information.

Q. And based off the information that you have, is it your understanding that each of the VBA bellwether plaintiffs is over the age of 55?

A. I don't specifically recall that, but I'll accept your, you know, premise that it is.

Q. No reason to dispute it as we sit here?

A. I have no reason to dispute that.

Q. Okay. If each of the VBA bellwether plaintiffs is over the age of 55, would you agree that they would not -- they would not need a periodic reexamination except under unusual circumstances?

MR. VANSLYKE: Objection.

THE WITNESS: That's what the

document says, but I'll go back and say that we can see that ratings have changed over time. I think we can make the reasonable inference based on the data and statistics that you, in fact, have cited here today that ratings do change and can change. Even if they're in unusual circumstances, it's important to recognize that.

BY MR. CROMWELL:

Q. Do you know what constitutes unusual circumstances under this provision?

MR. VANSLYKE: Objection.

THE WITNESS: I do not.

BY MR. CROMWELL:

Q. Did you evaluate whether there were any unusual circumstances for these plaintiffs?

MR. VANSLYKE: Objection.

THE WITNESS: Since I don't understand what unusual circumstances are, it would be difficult for me to do that.

BY MR. CROMWELL:

Q. Okay. Back to Exhibit 18, and this is M21-1 adjudication procedures manual for the VA. And looking at 4.2.1.A.1.E, do you see that?

And it says, "Considering a veteran's age in connection with review examinations."

Do you see where I am?

A. Yes, I see that.

Q. If we start at the top, it notes that as is discussed in M21-1 part 4 subpart 2.1.A.1.D and with only rare exceptions, veterans over the age of 55 must not be routinely recalled for reexamination."

First off, did I read that correctly?

A. I believe you did.

Q. Would you agree at least based off VA adjudication manual that veterans over the age of 55 must not be routinely recalled for reexamination with only rare exceptions?

MR. VANSLYKE: Objection.

THE WITNESS: Well, I agree that that's what the document says. What the document doesn't say is whether the veteran themselves can, in some circumstances, request reexamination or reconsideration of their disabilities. Clearly, diseases can progress past the age of 55. And while this particular subset of plaintiffs, and I don't know

this for sure, are all over the age of 55, assuming that's true, I don't know that that's true for the entire potential list of plaintiffs. There could be many that are under 55.

So I'm straining to answer your questions. But, again, I think the question that I raise in my report is whether any of them might be reevaluated. And I think that's a definite possibility. I see that in the data.

BY MR. CROMWELL:

Q. Okay. Would you agree with me that based upon this VA policy and based upon the fact that presumably hypothetically each VBA bellwether plaintiff is over the age of 55, that it would be a rare exception for these plaintiffs to be recalled for a future reexamination?

MR. VANSLYKE: Objection.

THE WITNESS: I don't know how they define rare, but that is what the document says. I agree with that.

MR. CROMWELL: Okay. We can take a break. I know -- sorry, that went longer than 3 minutes, so I apologize. But it's

4:00 here, so it's 1:00 there. How long would you like for a lunch break, Mr. Rybolt?

THE WITNESS: I don't know. What do you guys need? I would be fine with 20 or 30 minutes, you know, something like that.

MR. CROMWELL: 30 minutes is fine with me. Sorry, Ben, I didn't mean to talk over you.

MR. VANSLYKE: I was going to say I think at least 30.

THE VIDEOGRAPHER: All right. We're going to go off the record at 1:00 p.m.

(Recess taken from 1:00 p.m. until 1:39 p.m.)

THE VIDEOGRAPHER: Back on the record at 1:39 p.m.

BY MR. CROMWELL:

Q. All right. Mr. Rybolt, we were talking about future evaluations for individual bellwether plaintiffs. And I meant to ask before, did you look at the VBA disability ratings that each plaintiff has for each of their service-connected conditions in this case?

A. We have data on their ratings.

Q. You have data. I'm curious, do

you -- did you use those disability ratings to formulate your opinions in this case at all?

A. I know we looked at it. If we relied on some analysis, it would be included in my report. We looked, for example, at, you know, instances in which ratings varied over time.

Q. Okay. Do you know what a total combined disability rating is under the VA's ratings schedule?

A. I do have an understanding of that.

Q. And what is your understanding of that?

A. That there is a formula for determining how ratings for different diagnoses interact. Now, I can't cite you the formula. But that's what I understand it is.

Q. Understood. Did you attempt to determine the current total combined disability rating for any of the VBA bellwether plaintiffs?

MR. VANSLYKE: Objection.

THE WITNESS: I don't recall having done so. I don't recall having been asked to do that.

BY MR. CROMWELL:

Q. Okay. Did you determine how long

each plaintiff has had a given service-connected condition?

A. I don't think we looked specifically at that question. We might have -- you know, if we looked at a particular -- how a particular plaintiff's ratings changed over time, we might, in fact, have been looking at that question. But we weren't stressing that point, if that answers your question.

Q. Okay. Did you make any determinations as to whether a given VBA bellwether plaintiff's service-connected condition will increase or decrease in the future?

MR. VANSLYKE: Objection.

THE WITNESS: I did not look at probabilities in that sense other than what's described in my report.

BY MR. CROMWELL:

Q. Okay. Is that true regardless of whether a service condition was -- is considered related or unrelated to Camp Lejeune?

MR. VANSLYKE: Objection.

THE WITNESS: I'm sorry, what is the nature of your question here?

BY MR. CROMWELL:

Q. So same question as before is whether, you know, did you make any determination as to whether a plaintiff's service-connected condition will increase or decrease in the future. I understand your answer.

My follow-up question, though, is that true regardless of whether a given service-connected condition is or is not related to Camp Lejeune water?

A. And, again, this goes to probability in the future.

Q. Yes. Yeah.

A. I did not look specifically at that question or attempt to measure that.

Q. Did you review -- well, I'll step back. In your materials considered list, you do not include reference to any of the plaintiffs' life care planners; is that correct?

A. Is there a reference? There may be a reference, but I don't think that we were asked to look specifically at life care plans.

Q. If we can take a look at it. I'm not familiar with any reference in there. But if -- we can pull up your Exhibit 6, which is your

report and materials considered. And these are the expert reports that you considered?

A. Uh-huh.

Q. And the only expert I understand that you looked at from plaintiffs was Chad Staller; is that correct?

A. That's correct.

Q. Okay. So fair to conclude then that you did not review any of the plaintiffs' expert reports for any of their life care planners; is that correct?

A. I believe that's correct.

Q. And you would not have seen their testimony; is that correct?

A. I don't believe that was shared with us.

Q. Okay. Did you review any of the expert reports for the United States life care planners?

A. I don't recall having done so, no.

Q. I guess -- and then the same would be true, you did not review any of the life care planner's testimony; is that correct?

A. That would have been outside the scope of my assignment.

Q. Okay. Did you review any of the expert reports of plaintiffs' specific causation experts?

A. Are you talking about medical experts?

Q. Yes.

A. I don't -- I do not recall having reviewed any of their medical expert reports.

Q. Okay. Similarly, is it fair to say you did not review any of the United States specific causation experts?

A. I do not recall having reviewed any of the medical expert reports.

Q. Okay. As we're sitting here today, you do not know what these experts are opining on as far as their conclusions with regards to the health prognosis for these VBA bellwether plaintiffs; is that correct?

A. I was not asked to review that information.

Q. Okay. So it's fair to say you don't know what their opinions are with regards to these VBA bellwether plaintiffs health prognosis?

A. Not in -- not in any specific level of detail for sure.

Q. Okay. As part of your opinions on this topic, you cited a study by the Congressional Budget Office from 2013. Do you recall that?

A. Yes.

Q. I'll look at pages 17 through 18 of your report, or PDF pages 19 through 20, and this is really paragraph 52. Do you see where I'm looking?

A. Yes.

Q. You write, "It stands to reason therefore that for any plaintiff who's non-Camp Lejeune related diagnoses develop or increase over time the corresponding offset for Camp Lejeune related diagnoses would potentially decrease. Indeed, such ratings increases are not uncommon. The Congressional Budget Office reported that in 2013, for example, disability ratings were increased for a total of 230,000 veterans out of approximately 3.5 million who were then receiving benefits, or roughly 1 in 15 that year alone."

First of all, did I read that correctly?

A. I believe you did.

Q. So 1 in 15, that's roughly 6 percent of the veterans who were receiving benefits that year; is that correct?

A. I think it's a little bit more than that, but sure.

Q. Okay. Do you know which of the VBA bellwether plaintiffs currently have a 100 percent disability rating?

A. I don't recall off the top of my head.

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. Okay. It's not an opinion you're offering in this case?

A. I wasn't asked to assess or evaluate actual disability rating.

Q. Okay.

A. I have -- I have the data and we did look at the data, but that wasn't an opinion I was asked to offer.

Q. Would you agree that if a plaintiff has a 100 percent disability rating, it is not -- they are not likely to seek a routine future examination?

A. I don't have any basis to opine on

that one way or the other.

Q. Okay. Well, if a plaintiff has a 100 percent disability rating, do you know what an increased disability rating for a given condition will do to their monthly compensation?

A. Are you talking about their monthly compensation as the VA -- VBA would determine it or would you say that -- or are you asking me about your economist's opinions.

Q. No. I'm simply based off how the VBA would determine it. What would -- if a plaintiff has a 100 percent disability rating, do you know what an increased disability rating for any given condition will do to the amount of monthly compensation that that plaintiff would receive from the VBA?

MR. VANSLYKE: Objection.

THE WITNESS: Well, my understanding and expectation would be that their disability rating would probably stay at 100, although their compensation could change.

BY MR. CROMWELL:

Q. If --

A. Theoretically.

Q. When you say it could change, what do you mean by that?

A. I recall an instance that may be similar to that in which somebody was either given or denied a special monthly compensation. But that could be unrelated. I am speculating a little bit about that.

Q. Okay. Putting -- I understand what you're suggesting. Putting monthly compensation aside, is it your understanding that once a plaintiff already has 100 percent disability rating, they would not be receiving an increased amount of monthly compensation even if one of their conditions received an increased disability rating?

A. I'm not sure I know the answer to that. My understanding would be that the rating would still be 100 percent. My assumption would be that their monthly benefit would be unchanged.

Q. Okay. But as you sit here, you don't know one way or the other?

A. I don't think I know that for, you know, beyond just my inference from what I understand about the case.

Q. Okay. If a plaintiff has 100 percent

disability rating, do you know what a decrease in a disability rating for a given condition will do to their monthly compensation?

MR. VANSLYKE: Objection.

THE WITNESS: Well, again, it depends on a lot of facts you haven't specified. It's possible that if someone is at 100 percent, depending on how the combined disability rating is exactly calculated and what the other diagnoses are, yes, it could result in a reduction in the rating, and I would assume a reduction in benefits.

BY MR. CROMWELL:

Q. I think you hit on my next question, which is just because a plaintiff who's at 100 percent disability may have a disability rating for a condition that decreases, it doesn't mean necessarily that their monthly compensation is going to change, that depends on other factors; correct?

MR. VANSLYKE: Objection.

THE WITNESS: I think you would have -- yes, sorry.

I think you would have to look at the

specifics of the case. I would assume that it is possible that that could happen.

BY MR. CROMWELL:

Q. You have opined that the United States experts erred by assuming that the actual duration of each plaintiff's life will be approximately equal to the average life expectancy; is that correct?

MR. VANSLYKE: Objection.

THE WITNESS: Yes.

BY MR. CROMWELL:

Q. You are familiar with the life expectancy tables provided by the National Center for Health Statistics; is that correct?

A. Broadly, yes.

Q. Have you used them as part of your expert opinions in other cases?

A. Yes.

Q. Would you agree with me that those particular life expectancy tables are empirically tested?

A. Well, I think they're empirically derived, if that's what you mean.

Q. Sure. We'll go with that. You would

agree with me that the tables from the National Center of Health Statistics are empirically derived?

A. My understanding is it would be based on a statistical analysis of the sample of the population with -- you know, under specific demographic characteristics. Is that fair?

Q. Understood. I get that.

Is offering an opinion regarding life expectancy part of standard methodology when evaluating economic damages in personal injury cases?

A. I can say that they apply as a standard methodology in many cases, not just personal injury.

Q. Okay. In determining life expectancy, if you take the meaning for a given demographic dependent upon age, race, gender, you understand that roughly half of the people in that population group will die before the life expectancy and the other half will live beyond that life expectancy?

A. If you're taking the median, yes.

Q. So in offering opinions for these plaintiffs, you are aware that a plaintiff could

die sooner than their life expectancy; correct?

A. Of course.

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. And they could live beyond their life expectancy; correct?

A. Yes.

Q. Now, if I'm understanding your opinions correctly, the fact that these plaintiffs may die before or after, I guess, their life expectancy, does that render opinions based upon those life expectancy calculations unreasonable?

MR. VANSLYKE: Objection.

THE WITNESS: It depends on context.

BY MR. CROMWELL:

Q. The context here with regard to these VBA bellwether plaintiffs?

MR. VANSLYKE: Objection.

THE WITNESS: From which perspective? What else? What about the context?

BY MR. CROMWELL:

Q. You have offered an opinion that plaintiff -- or the United States experts' opinions are unreasonable and speculative because

they rely on the life expectancy of these VBA plaintiffs to calculate future disability payments; correct?

MR. VANSLYKE: Objection.

THE WITNESS: Well, I think at the beginning of that section, I think it's the cumulative effect of the life expectancy used as well as the other criticisms that I offer there. The interplay of disability ratings with retirement benefits, for example. The interplay of disability ratings for both Camp Lejeune related illnesses and non-Camp Lejeune related illnesses, that the combined effect of this is to render their opinions unreliable, yes.

BY MR. CROMWELL:

Q. Well, I'm -- just to be clear, I'm focusing on the section of your report that specifically is suggesting that the government experts failure to acknowledge and account for variability and life expectancy renders their opinions unreasonable.

A. Yes.

Q. And so in that context, is it -- is

it your opinion that because they are relying upon life expectancy to calculate future disability benefits or compensation that their opinions are unreasonable?

MR. VANSLYKE: Objection.

THE WITNESS: Yes.

BY MR. CROMWELL:

Q. Okay. And is it because -- if I'm looking at your report correctly, is it because a plaintiff, like their given health conditions could, in fact, die before they're given life expectancy that renders it unreasonable?

MR. VANSLYKE: Objection.

THE WITNESS: Well, that's certainly a factor that should be considered. But that's not the only factor.

BY MR. CROMWELL:

Q. Can you tell me what the other factors are in this portion of your report?

A. Sure. It's my experience for having done this for, you know, close to 20 years now that the court is interested in ensuring the plaintiffs are adequately compensated. If half of your plaintiffs are going to be undercompensated because of the use of the median

or the mean of life expectancy, then I would think that the Court would want to be aware of that as an implication or result of the methodology you've chosen. So I pointed that out.

Q. So the use of empirically derived life expectancy tables by the United States experts, in calculating future disability payments, renders their opinions unreasonable or speculative in your view?

MR. VANSLYKE: Objection.

THE WITNESS: Excuse me, I'm sorry. Yes, given that assumption. If your assumption is -- and, again, I'm not offering this as an opinion, but it is my experience that our intent here is to ensure that plaintiffs are adequately compensated or fully compensated for their losses. If you're using the mean of a life expectancy ratio or the median, you're leaving about half of them out.

BY MR. CROMWELL:

Q. You would agree with me that the other half is being overcompensated in that scenario you're presenting; right?

A. Sure.

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. Okay. Are you -- well, one of the things you just mentioned before was the other items you indicate are -- make the United States experts' opinions unreasonable. One of them had to do with, you said, the interplay of veterans retirement. Can you explain what you mean by that?

A. Sure. I think I explained this in the report. But disability benefits can be affected one way or the other by, you know, any retirement benefits that are received.

Q. And you have indicated that the government's experts failed to control for the interplay of the veterans retirement and disability benefits when they calculated their offsets. Is that your opinion?

A. That's correct. It could affect the amount of the disability or the benefits that are ultimately received.

Q. How do you know that the government's experts failed to control for the interplay between those two benefits?

MR. VANSLYKE: Objection.

THE WITNESS: Well, I see no discussion of that, and I see no evidence of that in their analyses. I could be mistaken. Maybe I've overlooked something. But I don't recall anywhere where they considered that.

BY MR. CROMWELL:

Q. Did you make any effort to determine what plaintiffs' disability benefits should be in light of their entitlement to military -- or entitlement to military retirement?

MR. VANSLYKE: Objection.

THE WITNESS: No, I wasn't asked to do that.

BY MR. CROMWELL:

Q. Okay. You noted in your report. I'm looking at -- sorry, I should still be sharing. I apologize. Exhibit 6 on page 22, PDF page 24, you have noted that if for a given retiree his or her cumulative disability rating is less than 50 percent, the total payment to the veteran is the greater of the applicable VBA disability benefit and the applicable retirement benefit.

Did I read that correctly?

A. You did.

Q. And you cite to Footnote 54. And this is a article or something from the military wallet; is that correct?

A. That's what that -- that's what that says, yes.

Q. Do you know whether this website has any connection to the Department of Veterans Affairs?

A. I have -- I do not know.

Q. Did you do anything to vet or confirm the information that's contained on this website?

A. I would have asked my associate to do that. And I don't -- I would assume that he did that, but I don't know that he did.

Q. Okay. Did you look to see what the specific veterans affairs policies and procedures say regarding receiving VA disability compensation and military retirement pay?

MR. VANSLYKE: Objection.

THE WITNESS: Can you be more specific?

BY MR. CROMWELL:

Q. Did you look at any VA policies or guidelines as to how a veterans disability

compensation and military retirement pay interact?

MR. VANSLYKE: Objection.

THE WITNESS: I don't believe I had access to VA guidelines on that point.

BY MR. CROMWELL:

Q. Okay. If they were publicly available, would you rely on those policies rather than those set forth in the website you're referring to?

MR. VANSLYKE: Objection.

THE WITNESS: I think that would probably be preferred, but practitioners evidence can also be useful.

BY MR. CROMWELL:

Q. Okay. Well, let's look at it. I'm going to enter this as Exhibit 21. Stop sharing. All right.

(Exhibit 21 marked for identification.)

BY MR. CROMWELL:

Q. Mr. Rybolt, what we have marked as Exhibit 21 is article from Military Wallet entitled "How VA Disability Compensation Affects Military Retirement Pay"; is that correct?

A. Yes.
Q. This is the same citation that you were relying upon in your report; is that correct?
A. I believe that's correct.
Q. Okay.
A. Let me actually look and make sure.
Q. That's fine. Feel free to confirm.
A. Can you --
Q. Yes, I have control. Yeah.
A. Can you, I'm sorry, switch to my report so I can see what it's actually --
Q. Yes. So this is the citation we were referring to. Footnote 54.
A. I think the dates are different. Did I misread that?
Q. I think the date you're referring to is the updated version.
A. Okay. It appears to be the same.
Q. If I represent that the length that's provided is a link -- we lost Ben. So I will hold off on anything. We should go off the record.
A. Okay.
THE VIDEOGRAPHER: Did you say you

want to go off the record?

MR. CROMWELL: Yeah. Ben dropped.

THE WITNESS: We're going off the record, 2:05 p.m.

(Recess taken from 2:05 p.m. until 2:13 p.m.)

THE VIDEOGRAPHER: Back on the record. Time is 2:13 p.m.

BY MR. CROMWELL:

Q. Mr. Rybolt, we had just introduced Exhibit 21. And this is article from Military Wallet entitled "How VA Disability Compensation Affects Military Retirement Pay." Is that correct?

A. That's correct. It's no longer up.

Q. I'll share it. This is the same document that we noticed cited in your report; is that correct?

A. I believe that's correct.

Q. Okay. Looking at PDF page 4 of this exhibit. And, specifically, here it states the question: "Can you receive 100 percent VA disability and military retirement pay?"

And answer is: "Yes, if your disability rating is 100 percent, you can receive VA disability compensation, and your full amount

of military retirement pay. But you don't have to have a rating of 100 percent to qualify for concurrent receipt."

First of all, did I read that correctly?

A. I believe you did.

Q. Is it your understanding if you have a disability rating of 100 percent, you can receive a VA disability compensation and your full amount of military retirement pay?

MR. VANSLYKE: Objection.

THE WITNESS: That's what this article says or appears to say.

BY MR. CROMWELL:

Q. Are you familiar with concurrent receipt disability pay program?

A. If you're referring to the -- where you're pointing now in the following paragraph, I don't have specific knowledge of that program.

Q. Okay. I'm going to look here. It states that if you are a military retiree with a service connected or combat related VA disability rating of 50 percent or higher, you are eligible for CRDP, which stands for concurrent receipt disability pay; is that correct?

A. That's what that sentence says.
Q. Okay. And is that your understanding of the program?
A. Well, I'm just reading the document along with you.
Q. Okay. If I look back at Exhibit 6, which is your report --
A. Yes.
Q. -- you've written this sentence, "If for a given retiree, his or her cumulative disability rating is less than 50 percent, the total payment to the veteran is the greater of the applicable VBA disability benefit and the applicable retirement benefit; is that correct?
A. That's my understanding.
Q. Do you know where in this particular article that comes from?
MR. VANSLYKE: Objection.
THE WITNESS: Well, the passage that you just read refers to a disability rating of 50 percent or higher, not lower. My point was that if it's lower.
BY MR. CROMWELL:
Q. Understood. Understood. That was really going to be my question. Is your opinion

based off the inverse of the statement I just read essentially?

A. Well, I think that's logical.

Q. Okay.

A. I don't recall the article in its entirety, but that's my understanding.

Q. Okay. I'm going to scroll down and look at two programs. One is CRDP. The other one is entitled "CRSC" which is defined here as combat related special compensation.

Are you offering any opinions in this relate that combat related special compensation?

MR. VANSLYKE: Objection.

THE WITNESS: I haven't been asked to review those specific programs.

BY MR. CROMWELL:

Q. Okay. Under -- back on page 5, for the CRDP, it defines eligibility for military retirees who have a VA disability rating of 50 percent or more from a combat related or service connected injury, and parenthetical on the next page, "injury does not have to be sustained in combat."

First of all, did I read that correctly?

A. I believe you did.

Q. Is it essentially your understanding that this particular program that if a veteran has a disability rating of 50 percent or more, they're eligible for the CRDP?

A. That's what this article says.

Q. Okay. And if you scroll down and it identifies the effect to military retirement and for the CRDP, the veteran is to receive full retirement pay and VA disability pay without a reduction in either.

First of all, did I read that correctly?

A. I believe you did.

Q. Okay. Again, is that your understanding of this program as well? Any -- well, strike that.

Is it your understanding that under the CRDP that any veteran with a 50 percent or more disability rating is able to receive their full military retirement pay and disability pay without reduction in either?

A. Well, I can see that that's what the document says.

Q. Okay. Do you agree with that

statement though?

A. I don't have an independent understanding of what these different programs are or how they work, what the exceptions are, if there are any, or all of the ins and outs and specifics of these specific programs. I wasn't asked to opine on that.

Q. Well, understood. This is an article that you are relying upon, though, in your report; correct?

A. Correct.

Q. You have noted that -- and, sorry, we'll go back to your Exhibit 6, which is your report. You have noted that this retirement issue that we've been discussing may apply to at least VBA bellwether plaintiffs, Cagiano, Downs, Gleesing, Hill, and McElhiney, who each served long enough to qualify for retirement benefits; is that correct?

A. That's what this sentence says.

Q. Well, that's your opinion; right?

A. No, it's my understanding.

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. Okay. Well, how did you determine

that these individual plaintiffs were entitled to military retirement?

A. I think you can -- we can look at the footnote, Footnote 55.

Q. Sure. Yeah. It's right here.

A. I think I asked counsel. Honestly, I don't remember. But we may just have asked counsel which of these were open to retirement benefits.

Q. Okay.

A. Let me finish reading the -- Cagiano, Davis, and Hill have awarded -- have award line reasons of current retired and disability pay amount. So we have that evidenced as well.

Mr. Downs with an award line reason of retired pay adjustment and Mr. McElhiney and Mr. Welch with CONV-retire pay (spec law), I think that's how we derived that information.

Q. You derived the information above based off the VBA data that was produced to you?

A. I think we used that VBA data and those comments that are included in that footnote to infer that they are -- you know, that they are -- have retirement benefits available.

Q. Understood. For purposes of this

question, let's presume that each of these individual plaintiffs that I just discussed have 100 percent disability rating. If that's true, you would agree that these veterans are able to receive their full military retirement pay and VBA -- or VA disability pay without a deduction in neither?

MR. VANSLYKE: Objection.

THE WITNESS: Again, I'm not an expert. I believe that's what the article indicates. I'm not an expert with respect to these particular programs of the VBA or the VA. But that is what the article seems to suggest.

BY MR. CROMWELL:

Q. Okay. Just to be clear, when you say you're not an expert, you're referring to you're not an expert in the -- been talking about a few different programs. You agree with me you're not an expert in the VA's concurrent receipt disability pay program?

A. I am not specifically familiar with that program other than what's included in this article.

Q. And the same is true for the combat

related special compensation program?

A. I'm sure that there are many other programs that you can point to. But, no, I'm not familiar with that one either.

Q. Okay. Well, but you would understand that based off this article that the effect of our military retirement pay or given veteran is impacted by the total disability rating for a given veteran?

A. It is my understanding that those two can interact, yes.

MR. CROMWELL: Sorry, we're getting background from someone.

MR. VANSLYKE: Hey, David --

MR. CROMWELL: David, you're not muted.

MR. VANSLYKE: Thank you.

BY MR. CROMWELL:

Q. All right. I'll stop sharing that. Okay. You also -- I'm going to pull back up Exhibit 6, which is your report. All right. Point number 5, and this is your -- inside your second opinion. "The government's experts ignore additional factors and uncertainties that may affect VBA disability benefits in the future."

Is that correct?

A. That's what that says.

Q. Okay. And just, first, are you aware of any changes as of today that would change the disability ratings for any of the VBA bellwether plaintiffs --

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. -- that you have identified?

A. Over what period of time?

Q. From today moving forward.

MR. VANSLYKE: Objection.

THE WITNESS: Well, how would I know that?

BY MR. CROMWELL:

Q. I guess the answer is you don't -- you're not aware of any -- I mean, are there any changes that have taken place at the VA that will change the disability ratings for any of these VBA bellwether plaintiffs?

MR. VANSLYKE: Objection.

THE WITNESS: I'm not aware of anything currently.

BY MR. CROMWELL:

Q. Are you aware -- I apologize --

A. If what you're referring to is changes in the law or changes in allocations from Congress, I'm not aware of anything that would impact the VA's benefits in that way at this time.

Q. For these VBA bellwether plaintiffs?

MR. VANSLYKE: Objection.

THE WITNESS: Well, for any of the -- for any VA benefit -- beneficiaries, I'm not aware of there being legislation over the effect of their benefits at this time.

BY MR. CROMWELL:

Q. Okay. I think I know the answer, but are you aware of any changes as of today that will change the compensation rates for these VBA bellwether plaintiffs?

MR. VANSLYKE: Objection.

THE WITNESS: Again, I don't -- I am not aware of any. I wasn't asked to investigate to what Congress is considering.

BY MR. CROMWELL:

Q. In this point, our opinion number 5, to support your opinion, you list certain proposed, I guess, uncertainties; is that

correct?

A. Yes.

Q. And that includes changes and VA policy that may make it easier or more difficult for veterans to claim VBA disability benefits. Is that one of them?

A. That's the sentence as I read it, yes.

Q. And another one is changes in the VA's process for identifying service-connected disabilities; correct?

A. I've lost track of where you're reading. Oh, changes, yes, I see. Okay.

Yes, that's included in that list.

Q. And then you've also included changes in payment rates; is that right?

A. Correct.

Q. As well as coordination with other federal benefits?

A. Correct.

Q. As well as changes in the tax treatment of VBA disability benefits; is that correct?

A. That is also correct.

Q. For this particular opinion, you've

cited Footnote 56, and you have stated, "I understand the PACT Act listed new conditions that are presumptive that were previously denied as not being service connected. Such changes could also occur in the future impacting plaintiffs in the future and their VBA disability benefits"; is that correct?

A. That is -- you read that correctly.

Q. Well, do you understand or agree that in passing the PACT Act, Congress expanded the number of conditions that were compensated by the VBA?

A. That's my general understanding.

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. You've then wrote in your opinions -- oh, sorry, I already read that part.

The last sentence of this says such changes could occur -- also occur in the future impacting plaintiffs in the future and their VBA disability benefits. You agree that Congress could expand the list of conditions which are compensable by the VBA in the future; correct?

A. Certainly.

Q. You have further noted in your

opinions that advances in medical treatments for technology may improve outcomes and thereby disability ratings for some conditions; is that right?

A. You read that correctly.

Q. All right. You've noted that each of these six factors that you discuss or cited in your report come from a Congressional budget office report in 2014; is that right?

A. I'm not looking at the footnote, but I think that's right.

Q. The footnote is Footnote 57, and you cite to the Congressional Budget Office, "Veterans' disability compensation trends and policy options," dated August 2014; is that right?

A. Correct.

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. Okay. So I'm going to stop sharing that. All right. Mr. Rybolt, I am introducing what we've marked as Exhibit 22, which is that Congressional Budget Office report. And I will share my screen as well.

(Exhibit 22 marked for

identification.)

BY MR. CROMWELL:

Q. Is this the same report that you have cited and relied upon in your report?

A. I believe that's correct, yes.

Q. And just for the record, this is publication by the Congressional Budget Office entitled "Veterans' disability compensation, trends and policy options," dated August 14, 2014; is that correct?

A. Yes. You read that correctly.

Q. All right. And I'm going to turn on Exhibit 22 to page 10, which is PDF page 14th -- 14. And there is a section or a paragraph on the right entitled "Growth in VA's Disability Payments Since 2010"; is that right?

A. That's what that says, yes.

Q. Okay. And in this article you've relied upon states federal spending for VA's disability compensation program has almost tripled since 2000 rising from 20 billion that year to 54 billion in 2013, despite a shrinking population of veterans that is expected to decline further over the next decade.

First of all, did I read that

correctly?

A. I believe you did.

Q. You agree that based on this report by the CBO, it shows that VBA -- or VA disability compensation program has almost tripled since 2000; is that correct?

A. That's what the document says.

Q. Do you have any reason to disagree with that?

MR. VANSLYKE: Objection.

THE WITNESS: I don't.

BY MR. CROMWELL:

Q. The same paragraph further states, "Like Social Security and Medicare benefits, VA disability benefits represent mandatory spending. The amounts that individual beneficiaries are entitled to receive are not limited by annual appropriations."

First off, did I read that portion correctly?

A. I believe you did.

Q. Okay. Is it your understanding that VA disability benefits are funded by mandatory spending?

MR. VANSLYKE: Objection.

THE WITNESS: Well, you didn't finish reading the sentence. But that -- of the part that you read, that's what that says.

BY MR. CROMWELL:

Q. Okay. Does the remainder sentence of that impact whether VA disability benefits are part of mandatory spending?

MR. VANSLYKE: Objection.

THE WITNESS: Well, yes, they do fall into the category of mandatory spending, if that's your point.

BY MR. CROMWELL:

Q. Okay. Looking at further down there's a section entitled, "The rising number of veterans receiving disability compensation"; is that correct?

A. Yes.

Q. Starts with "From 2000 to 2013, the number of veterans who began to receive disability compensation jumped from about 85,000 to 290,000 annually. Over the same period, the total number of recipients increased by nearly 55 percent from 2.3 million to 3.5 million. See Figure 1 on page 2. Veterans from two eras, the Vietnam War and the Gulf War accounted for most

of the growth. See Figure 3. Combined, these two groups constitute almost three quarters of all recipients of VA's disability benefits in 2013."

First of all, did I read that correctly?

A. I believe you did.

Q. Is it your understanding that based off this report that the number of veterans who receive disability compensation increased from 85,000 individuals to 290,000 individuals?

MR. VANSLYKE: Objection.

THE WITNESS: That's what the document says.

BY MR. CROMWELL:

Q. Any reason to disagree with that?

A. No.

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. Okay. Looking at what's page 13 or PDF page 17 of Exhibit 22, there is a section entitled "Factors contributing to increases." And then there's a subheading entitled "Policy changes." Do you see that?

A. Yes.

Q. And if you look at the top, the second column, it starts with "One important set of policy changes affects Vietnam era specifically. VA has designated additional conditions that have been linked to exposure to Agent Orange as presumptive for veterans who served in Vietnam."

Did I read that correctly?

A. Yes, you did.

Q. Would you agree that based on this report, which you cited the general trend since at least 2000 is with the number of veterans receiving disability benefits to increase?

MR. VANSLYKE: Objection.

THE WITNESS: I think we saw that earlier that the number of beneficiaries did increase over this period.

BY MR. CROMWELL:

Q. And you'd agree that based on this report, the general trend since at least 2000 is for the amounts of disability benefits received by those veterans to increase as well?

MR. VANSLYKE: Objection.

THE WITNESS: In the aggregate, I believe that's correct. We saw that

earlier.

BY MR. CROMWELL:

Q. Okay. If we look at page 15, this is PDF page 19, there's a section entitled "Options for changing VA's disability compensation program." Do you see that?

A. Yes.

Q. Can you confirm for me that this is where you sourced your list of potential factors that may affect VBA disability benefits in the future?

A. This article, I believe is the source of that.

Q. Well, this portion of this article is what I'm asking about.

A. Specifically, I mean, I can't see the whole article. There may be other sections. There may be this section. But, yes, I believe this is the relevant section.

Q. Okay. As you sit here, are you aware of any of the options or uncertainties that you listed in your report or that come from this CBO report have ever been implemented by Congress?

MR. VANSLYKE: Objection.

THE WITNESS: I am not aware of any

changes. I didn't -- wasn't asked to track that. I didn't actually look into it.

BY MR. CROMWELL:

Q. Okay. Going back to your report as Exhibit 6. You also opine that uncertainties of future VBA disability benefits arise with proposed cost saving changes to the VBA disability rating system; is that correct?

A. That's what that says.

Q. What -- what cost saving changes are you referring to here?

A. I think it would be shown in the footnote which I can't see.

Q. You're referring to Footnote 58; is that correct?

A. I believe that's correct.

Q. And this is referring to a press release from the U.S. Senate Committee on veterans affairs entitled "Blumenthal and veterans service organizations slam dangerous narrative that VA's disability compensation process is too generous at hearing" dated October 29, 2025; is that right?

A. That's what that says.

Q. Does that particular press release speak to the cost saving changes you're referring to?

A. Well, if you read the rest of the footnote, you can see the headline, "a second Trump term would decimate veterans health care and benefits."

Q. That's the second cite you sort -- source you cite to for that statement?

A. I'm sorry, you're right. That's the second source.

Q. Do you know which if either of these cites that you have in Footnote 58 identify cost saving changes that are being proposed?

A. Well, if you give me time to review those articles, I can give you a more firm answer. I think we produced those to you. Certainly identified them. They're publicly available.

Q. Okay. Well, you've read the press release by U.S. Senate Committee on Veterans Affairs?

A. Yes, at some point I did.

Q. Let me introduce what we've marked as Exhibit 23.

(Exhibit 23 marked for identification.)

BY MR. CROMWELL:

Q. Mr. Rybolt, this is a press release entitled "Blumenthal and Veterans Service Organizations Slam Dangerous Narrative that VA's Disability Compensation Process is Too Generous at Hearing" dated October 29, 2025; is that correct?

A. Yes.

Q. This is the same press release you're citing in Footnote 58 of your report?

A. To the best of my recollection, yes.

Q. In here, do you understand that Senator Blumenthal is speaking out against a particular news article that criticized the scope of veterans benefits. Is that a fair generalization?

A. I think that's what the headline says, in fact.

Q. Do you understand that Senator Blumenthal wasn't debating an actual bill that would reduce the scope of veterans benefits?

A. I don't recall specifically --

MR. VANSLYKE: Objection.

THE WITNESS: -- one way or another.
BY MR. CROMWELL:
Q. Regardless, he was commenting on reports that had said VA's disability compensation was too generous; right?
A. Sure. He's responding to evidence from, you know -- from wherever. I actually would have to reread the article. But, yes, there was pressure being placed on the Veterans Administration to reduce benefits.
Q. Are you aware of any pending bills that --
A. I have not been asked to look into that.
Q. Okay. The second cite in Footnote 58 is to an article you cited which was a second Trump term would decimate veterans healthcare and benefits dated August 13, 2014; is that right?
A. You're moving around, sorry.
Q. I'm sorry.
A. That's correct. That's what that says.
Q. I will go ahead and enter Exhibit 24.
(Exhibit 24 marked for identification.)

A. I see it. Okay.
Q. All right. Okay. Just for the record, Exhibit 24 is a publication by the Veterans Healthcare Policy Institute entitled, "A Second Trump Term Would Decimate Veterans' Healthcare and Benefits"; is that correct?
A. That's what that says.
Q. And this is the same article or publication you're relying upon in your report; is that right?
A. To the best of my recollection, yes.
Q. Okay. Which veteran benefits have been changed or I guess to use the title decimated as a result of the President's second term as you sit here right now?
MR. VANSLYKE: Objection.
THE WITNESS: I don't think that's the point. But I don't know that they happen or not. I wasn't asked to track that.
BY MR. CROMWELL:
Q. Okay. So as you sit here, you're not aware one way or other of any changes?
A. I was not asked to track that.
Q. Okay. If you weren't asked to track

that, then is it fair to say you don't know whether any of the 14 VBA bellwether plaintiffs benefits have decreased --

MR. VANSLYKE: Objection.

BY MR. CROMWELL:

Q. -- since the current administration took office?

A. Well, to be clear, my point is not that they have decreased. The point is that there are many pressures under which they could decrease or be changed and your economists have not taken that into account. They're asking for a reduction in the claims against the government based on speculative analyses in which they don't consider these possibilities.

Q. Have you -- I'm sorry.

A. Sorry, let me just finish the thought.

And could on the basis of their assumptions in their analysis undercompensate many of the plaintiffs. Now I'm done.

Q. Sorry, did not mean to interrupt there.

Have you determined the likelihood of any of these changes occurring in the future?

MR. VANSLYKE: Objection.

THE WITNESS: I don't think that's relevant. But, no, I have not attempted to try to estimate the likelihood of these things occurring.

BY MR. CROMWELL:

Q. But you're suggesting that they could occur?

A. Certainly.

Q. Okay. I apologize, I didn't mean to stop sharing.

You have further noted in your fifth opinion here that reported workforce reductions at the VA may reduce the capacity to assess and reassess veterans health conditions; is that right?

A. That's what that says.

Q. And you are relying upon cites in Footnote 59, this is an article from NPR as well as The American Federation of Government Employees in support of that statement; is that right?

A. That's what that says.

Q. Do you know whether the VA has, in fact, implemented workforce reductions?

A. I wasn't asked to track that.

Q. Okay. So if you haven't tracked that, you're not aware of any of the track 1 VBA bellwether plaintiffs disability benefits decreasing because of any such reductions?

MR. VANSLYKE: Objection.

THE WITNESS: Again, that's not the point of the paragraph, but that's also correct, I don't -- am not aware of any actual decreases.

BY MR. CROMWELL:

Q. Okay. I'm just looking for my notes. Can we take five and I'm just going to look through my notes and see if I've got any kind of last minute things.

THE VIDEOGRAPHER: All right. We're going to go off the record at 2:47 p.m.

(Recess taken from 2:47 p.m. until 2:53 p.m.)

THE VIDEOGRAPHER: Back on the record. Time is 2:53 p.m.

MR. CROMWELL: Mr. Rybolt, I appreciate your time. That's all the questions I have for you. I will tender the witness.

MR. VANSLYKE: All right, Mr. Rybolt,

I have just a couple of questions. Give me one moment here.

EXAMINATION

BY MR. VANSLYKE:

Q. Okay. I am -- can you see that I'm sharing my screen?

A. Yes.

Q. Okay. And this is Exhibit 6 which is your report. And I'm on PDF page 6, which is page 4 of the document. Can you see that?

A. Yes.

Q. So I'm looking at your summary of opinions here. And I see it says that none of the VBA bellwether plaintiff expert reports assert damages claims for lost earning capacity, thus the use of a benefit intended to compensate plaintiffs for a loss of earning capacity as an offset is inapt; correct?

A. That's what that says.

Q. And it says, "As I discuss below, lost wages and a loss of earning capacity are separate economic concepts, thus no double recovery is threatened"; correct?

A. That's correct.

Q. In this report, are you attempting to

opine that the Court must apply these offsets as you have delineated?

A. No, I don't believe I am opining to that. I think that's ultimately up to the Court. I'm trying to articulate the implications of the application of these VBA benefits on damages or on claims against the -- against the government.

Q. And in your role as an expert economist, do you understand that your opinions are to assist the court in understanding how these categories should apply?

A. That's consistent with my understanding, yes.

Q. And in paragraph 2 -- or I'm sorry, bullet 2, I see even assuming the VBA disability benefit offsets proposed by the government where appropriate, the government's analyses are fundamentally speculative and in many cases include material omissions that collectively render the government's methodology and conclusions unreliable; correct?

A. That's correct. You read that correctly.

Q. And in your report, did you attempt to apply any sort of methodology to identify the

value of the appropriate offsets?

A. I was not asked to calculate the actual expected value of offsets, no.

Q. So your opinions do not include a particular amount that the offset should be; correct?

A. I was not asked to evaluate that.

Q. But am I correct that you are not opining that there cannot possibly be an offset; correct?

MR. CROMWELL: Object to form.

THE WITNESS: No, I don't believe I'm opining to that. I think -- I think I made it clear how I distinguish these things.

BY MR. VANSLYKE:

Q. So in the sections of your report summarized by this bullet, is it fair to say that your opinions are limited to a review of the offset calculations set forth by the DOJ's economists?

A. That's what I'm responding, to, yes.

Q. And is it your opinion here that upon review of those offset calculations, you find that they are fundamentally speculative and in

many cases include material omissions that collectively render the government's methodology and conclusions unreliable; correct?

A. That is my opinion, yes.

Q. And in the rest of this paragraph I see that it says these include the failure to consider fluctuations in ratings for injuries attributed to Camp Lejeune exposure, fluctuations and ratings for injuries unrelated to Camp Lejeune exposure, fluctuations, and life expectancy fluctuations and amounts withheld from VBA benefits as a result of military pensions or vice versa. And the inherent uncertainties of future VBA disability benefits themselves; correct?

A. You read that correctly, yes.

Q. And looking back to the previous sentence, it is your opinion that those factors collectively render the government's methodology and conclusions unreliable; correct?

A. Yes, I think taken as a whole. These weaknesses and their analyses have that effect.

Q. Are you opining that any of those factors by themselves would necessarily render the government's methodology and conclusions

unreliable?

A. I think that's a bit speculative. I think I would have to understand more about the what the context was and how we were applying them. It's possible. But I think really here in this instance I'm applying -- you know, referring to sort of the combined effect of all of these.

Q. Do you recall earlier today being asked questions, for example, about life expectancies creating a degree of uncertainty in calculations?

A. Yes.

Q. And do you recall testifying that when life expectancy tables are used, there is a degree of uncertainty involved in those calculations; correct?

A. Well, certainly. It's predictive of the future. We're trying to come up with the best estimate that we can. But context matters and how they're being applied does matter.

Q. Would you agree that the degree of uncertainty can be increased by adding other variables in addition to life expectancy?

MR. CROMWELL: Object to form.

THE WITNESS: Are you asking if, for

example, if, for example, disease or injury conditions would affect that result or could be used in conjunction with a life expectancy table to estimate a revised or adjusted life expectancy. Is that your question?

BY MR. VANSLYKE:

Q. I'll rephrase. So specific to this context, I see the fluctuations in life expectancy are one of the factors listed here; correct?

A. Sure.

Q. And I see that there are, for example, fluctuations in ratings for injuries unrelated to Camp Lejeune exposure as another factor listed here; correct?

A. That's correct.

Q. And would you agree that combining both of those factors leads to greater uncertainty than simply the uncertainty of fluctuations and life expectancy alone?

A. Sure. Those work in conjunction with another -- with one another, right. So each of these plaintiffs, as I understand it, have injuries or illnesses that could affect their

life expectancy. And so when -- especially when you put those together, you would -- you would compound that effect.

Q. And I see -- excuse me -- in the last bullet of the section running onto page 5 of the report, you opine that if an offset based on VBA disability benefits were applied for a given plaintiff and if that offset were applied against damages other than damages awarded to the plaintiff for loss of earning capacity, that plaintiff would be left less than fully compensated for their losses while granting the government a substantial windfall; correct?

A. Yes, that's what that says.

Q. So I want to be sure that I understand correctly. As an example, if a plaintiff has damages attributed to out-of-pocket medical costs and those were offset on the basis of VBA disability benefits, is that an example of what you're referring to?

MR. CROMWELL: Object to form.

THE WITNESS: That would be an example, yes.

BY MR. VANSLYKE:

Q. And is your opinion here that that

would leave them less than fully compensated for those out-of-pocket medical costs?

A. Certainly, that would have to be have a consideration in the analysis. And I don't see that happening.

Q. And I understand these three bullets to represent a summary of your opinions; correct?

A. That's correct.

Q. Does this fairly represent the scope of the opinions that you present in this report?

A. I think Mr. Cromwell asked me a very similar question. It is a summary. There are, you know, sort of sub opinions and elaborations that I can -- but I do think that this fairly summarizes my opinion.

MR. VANSLYKE: Thank you. I have nothing further.

MR. CROMWELL: Nothing further from me. Mr. Rybolt, thank you very much for your time.

THE WITNESS: Thank you, Mr. Cromwell. Appreciate it.

THE VIDEOGRAPHER: This ends today's deposition. We're going to go off the record at 3:04 p.m.

CERTIFICATE

I, CHRISTINE A. TAYLOR, Registered Professional Reporter, Certified Court Reporter, do hereby certify:

That PETER RYBOLT, the witness whose deposition is hereinbefore set forth, was duly sworn by me, and that such deposition is a true record of the testimony given by such witness taken stenographically by me to the best of my ability.

I further certify that I am not financially interested in the outcome of this action, a relative, employee, attorney or counsel of any of the parties, nor am I a relative or employee of such attorney or counsel.

IN WITNESS WHEREOF, I have hereunto set my hand this 28th day of March, 2026.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

Exhibit 793

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF NORTH CAROLINA

IN RE:	)	
	)	
CAMP LEJEUNE WATER LITIGATION	)	7:23-CV-00897
	)	

RICHARD L. BARBANO, MD, PhD
Wednesday, March 18, 2026

Remote videoconference videotaped deposition taken in the above matter commencing at 10:04 a.m. Eastern Time with the witness participating via videoconference while physically located in Rochester, New York.

Stenographically recorded and transcribed by Lisa Taylor, Registered Professional Reporter, Pennsylvania Notary Public, Pennsylvania eNotary, and North Carolina Notary Public (participating via videoconference).

(Remote videotaped videoconference deposition commences, 10:04 a.m. Eastern Time.)

– – –

(The witness will read and sign the deposition transcript.)

– – –

VIDEOGRAPHER: We are now on the record. My name is Judy Diaz. I'm a videographer for Golkow Litigation Services.

Today's date is March 18, 2026, and the time is 10:04 a.m.

This remote video deposition is being held in the matter of Camp Lejeune Water Litigation versus United States of America.

The deponent is Dr. Richard Barbano.

All parties to this deposition are appearing remotely and have agreed to the witness being sworn in remotely.

Due to the nature of remote reporting, please pause briefly before speaking to ensure all parties are heard completely.

Will counsel please identify themselves for the record.

MS. LAMACCHIA: Leslie LaMacchia with

Bell Legal Group on behalf of the plaintiff's leadership group.

MR. TELAN: Good morning. This is Pat Telan from Bell Legal Group also on behalf of the plaintiff's leadership group.

MS. PLATT: Elizabeth Platt on behalf of the United States.

MR. TURNER: Joseph Turner for the United States.

MS. ANS: Jessica Ans for the United States.

VIDEOGRAPHER: The court reporter is Lisa Taylor, who will now swear in the witness.

_ _ _

(RICHARD L. BARBANO, MD, PHD, having been duly sworn, testified as follows:)

_ _ _

EXAMINATION

BY MS. PLATT:

Q. Good morning, Dr. Barbano. I know we've met before, but just to introduce myself again, I'm Elizabeth Platt. I represent the United States in this matter.

A. Good morning.

Q. Thank you so much for being here this morning. I'm hoping it does not take too long, but there are a few questions we want to ask you.

You understand that you are under oath; correct?

A. Correct.

Q. And would you please state your full name for the record.

A. Richard L. Barbano MD, PhD.

Q. And what is your current address?

A. 370 Westminster Road -- that's all in one -- one word, Westminster Road, Rochester, New York 14607.

Q. Thank you.

And you understand that this is a court proceeding? Even though we're not a courtroom, you are obligated to tell the truth?

A. I understand.

Q. I know we've gone over this in the last deposition, but just for the record, I'm going to go over some instructions just to be clear.

A court reporter is taking down everything we say. It is important that you answer all questions verbally, for example, saying yes or no, rather than shaking your head.

Do you understand?

A. Yes.

Q. Please talk at a reasonable pace, and I will try not to interrupt you, and please try not to interrupt me.

A. Understood.

Q. Once the deposition is complete, you'll be given the opportunity to read a transcript of your testimony and make any corrections and then you'll be able to sign it. Is that understood?

A. Understood.

Q. Because this is a remote deposition, I'll be sharing my screen to show you the exhibits. I'm happy to navigate within that exhibit if you would like to see another portion of it. Please just let me know.

A. Yes.

Q. And so you'll see on the screen there's another "Elizabeth Platt (Computer)." That's what will be showing my exhibits.

A. Understood.

Q. If you do not understand a question, please let me know, and I will try to clarify. If you do not ask for clarification, I will under- -- I will assume that you understood the question. Is

that fair?

A. Fair.

Q. During the deposition, you may hear your attorney say "objection." Unless that attorney instructs you not to answer the question, please answer the question after that objection has been made.

A. Understood.

Q. Is there any reason why you are unable to give the most truthful and accurate testimony today?

A. No.

Q. Is there any reason your memory might be impaired today?

A. No.

Q. Are you taking any medication that might impair you?

A. No.

Q. You may ask for breaks at any time. Please just answer the question if there is a question pending, and then we can take a break.

A. Understood.

Q. And then before we get started, I want to get some abbreviations on the record to make sure that we're on the same page.

For tetrachloroethylene, I'll be referring to that as TCE.

A. Understood.

Q. For perchloroethylene, I'll refer to it as PCE.

A. Understood.

Q. And from time to time, I may refer to Parkinson's disease as PD.

A. Understood.

Q. Great. Do you have any materials in front of you today?

A. No.

Q. Do you have any documents or PDFs open on your screen?

A. No.

MS. PLATT: Okay. So we can get started. I'm going to mark the first exhibit. I will share my screen.

(Whereupon, Exhibit 1 marked for identification.)

BY MS. PLATT:

Q. Can you see my screen, Dr. Barbano?

A. Yes.

Q. And let me scroll through this. Do you recognize this document?

A. Yes.
Q. And do you recognize this as the amended subpoena for your deposition?
A. Yes.
Q. And let me scroll through. You can see this is the subpoena as well as the requests for documents.
If you need me to slow down or anything, please let me know.
A. I will let you know.
MS. LAMACCHIA: Counsel, are you making this as Exhibit 1 and then subsequently will put it in the chat and name it as Exhibit 1?
MS. PLATT: Yes, I will.
MS. LAMACCHIA: Okay.
BY MS. PLATT:
Q. Okay. So, Dr. Barbano, this is Exhibit 1. Have you reviewed this request before today?
A. Yes.
Q. And do you have any responsive materials to produce for the requests for production?
A. No.

Q. Are you withholding any materials that would be responsive?

A. No.

MS. PLATT: Okay. And then I'm going to go ahead and share Exhibit Number 2.

(Whereupon, Exhibit 2 marked for identification.)

BY MS. PLATT:

Q. And can you see this document, Dr. Barbano?

A. Yes.

Q. I'm going to mark this as Exhibit 2. Do you recognize this?

A. Yes.

Q. And in your words, what is this document?

A. In my words, this is the response to the request to produce materials as requested in the first document in Exhibit 1.

Q. Okay. And I'm going to scroll through just so you can see that this is the complete document.

Okay. Dr. Barbano, I'm going to scroll up to page 7 and direct your attention to request number 7. Do you see that on the screen?

A. Yes.
Q. And this request is requesting all bills, invoices, and other documents reflecting compensation paid to you related to the CLJ litigation; correct?
A. Correct.
Q. And do you have any materials responsive to that request?
A. No.
Q. You have not submitted an invoice since your last production?
A. Correct.
Q. You have not been paid for your expert report that was submitted earlier this year?
A. Correct.
Q. Do you intend to submit an invoice for that report?
A. Yes.
Q. Ands when do you intend to submit that invoice?
A. Probably March 31st. I've agreed to -- so I generally do my invoices quarterly, but it may be before then, but -- depending on whether there's anything else, but at the latest, March 31st.

Q. Okay. And you -- did you have any invoices for the previous quarter?

A. No.

Q. Do you have an estimate of what your March 31, 2026, invoice will have as the amount?

A. Including or excluding this deposition?

Q. Let's start with including.

A. Well, the -- the -- depending how long the deposition goes, my estimate would be somewhere between 3- and $5,000.

I apologize. I'm thinking actually it wasn't that much. Probably 2 and 4.

MS. PLATT: Okay. And, Counsel, we request that once that invoice is submitted it be produced to us.

BY MS. PLATT:

Q. And the previous exhibit, Exhibit Number 2, was your objections and responses to the requests for production. Did you review that prior to today?

A. Briefly, yes.

Q. And did you review it prior to it being sent to us?

A. No.

Q. When was the first time you reviewed that document?
A. Two days ago.
Q. When was the first time you reviewed the request for production of documents?
A. That, I had seen sometime after it came. I'm not sure. Perhaps a month ago, maybe, perhaps, plus or minus.
Q. It was more than two days ago?
A. More than two days ago, yes.
Q. Okay. Dr. Barbano, you prepared a report dated January 12, 2026; correct?
A. Correct.
Q. And that report is related to Mr. Edgar Peterson; correct?
A. Correct.
Q. Did anyone assist you in writing this report?
A. No.
Q. Do you have any staff supporting you in your work in this matter?
A. No.
Q. It's just you writing the report yourself?
A. Correct.

Q. Just so we have a clear record, you previously wrote a report on Dr. -- I'm sorry -- on Mr. Peterson; correct?

A. Correct.

Q. And that report -- the previous report on Mr. Peterson was dated February 7, 2025; correct?

A. Yes.

Q. And that was submitted in phase 3 of this litigation; correct?

A. I'll take your word for that. I'm not sure of the phase nomenclature, what phase 3 is. It doesn't mean anything to me.

Q. That's okay. That's fair.

And you previously prepared a report on Mr. Gary McElhiney; correct?

A. Correct.

Q. And that was submitted on February 7th- -- or that was dated February 7, 2025, as well; correct?

A. Correct.

COURT REPORTER: I'm sorry. Counsel, may we go off the record for a second?

MS. PLATT: Yes.

VIDEOGRAPHER: The time right now is 10:18 a.m. We're off the record.

(Recess taken.)

VIDEOGRAPHER: The time right now is 10:19 a.m. We're back on the record.

BY MS. PLATT:

Q. Okay. Dr. Barbano, we were talking about your previous reports in this litigation, and just so that we have a clear record, you have two reports on Mr. Peterson, one dated February 7, 2025, and one dated January 12, 2026; correct?

A. Correct.

Q. Have you prepared any other reports on Mr. Peterson in this litigation?

A. No.

Q. Other than these reports and the report on Mr. McElhiney, have you prepared any other reports in this litigation?

A. No.

MS. PLATT: Let me go ahead and share Exhibit Number 3.

(Whereupon, Exhibit 3 marked for identification.)

BY MS. PLATT:

Q. Can you see my screen, Dr. Barbano?

A. Yes.

Q. And do you recognize this document?

A. Yes.
Q. What is this?
A. This is the report I prepared regarding the relatedness of three medical records that I was given to give an opinion on as to their relatedness as to Parkinson's disease.
Q. And this is your complete report; correct?
A. Yes.
Q. It is just this one page?
A. Correct.
Q. Great. And that's your signature at the bottom of the document; correct?
A. Yep. Yes. I'm sorry.
Q. And between this report, Exhibit Number 3, and your previous report on Mr. Peterson that was dated February 7, 2025, did these two reports contain all the opinions you have formed to date on this case regarding Mr. Peterson?
MS. LAMACCHIA: Objection. Form.
THE WITNESS: Yes, yes.
BY MS. PLATT:
Q. Are you planning to form any additional opinions regarding Mr. Peterson?
MS. LAMACCHIA: Objection. Form.

THE WITNESS: I have no plans at this moment.

BY MS. PLATT:

Q. Your CV was previously produced in this litigation; correct?

A. Correct.

Q. And I believe it is dated July 2025. Does that sound right?

A. That sounds about right, yes.

Q. Do you have any updates to your CV since July 2025?

A. I do.

Q. And what kind of updates would you have added?

A. I've added publications and presentations. I believe there was -- between July and November, I think I added one publication and one presentation.

Q. And what is the title of the publication?

A. Oh, that's a tough one. I don't know if I can give you the exact title, but it was related to cervical dystonia and dystonia.

Q. That's fine.

A. And the presentation was titled

"Long-Term" -- "Long-Term Utilization of Botulinum Toxins and Cervical Dystonia."

Q. Any other updates to your CV since July of 2025?

A. Not that I recall.

Q. Would you be able to produce a copy of your updated CV?

A. Yes.

MS. PLATT: And, Counsel, we request that CV be produced after this deposition.

BY MS. PLATT:

Q. Dr. Barbano, you hold yourself out as an expert in Parkinson's disease; correct?

A. Correct.

Q. And what is the basis of your expertise in Parkinson's disease?

A. I've been a neurologist for onever 30 years, the director of the movement disorders division at the University of Rochester for 15 years. I've treated well over 100 -- well over 100 patients with Parkinson's disease; and based on training, experience, including research in Parkinson's disease; and my position at the university.

Q. Thank you.

You are not a life care planning expert; correct?

A. Correct.

Q. And you are not a vascular surgeon; correct?

A. Correct.

Q. You are not a vein specialist; correct?

A. Correct.

Q. You are not an economist; correct?

A. Correct.

Q. Did you compile a list of materials considered for this report?

A. No.

Q. What materials did you consider for this report?

A. The three medical records that I was presented and then my general experience and knowledge of the disorders that were related in this -- in this event.

Q. Did you re-review any records from your previous report?

A. Yes.

Q. What records did you review?

A. I actually reviewed overall just

briefly looking over Mr. Peterson's medical history.

Q. That would be quite a few documents. Is there a way you can identify which specific documents you looked at?

A. Not at this moment. It was an overall general review.

Q. How did you conduct that review?

THE WITNESS: Just going through his medical records. Just briefly looking over the time -- the arc of illness, if I can put it in that sense. Just where he was at certain times over the years in regards to his Parkinson's disease.

BY MS. PLATT:

Q. And if you went back to your files or wherever those records are saved, would you be able to identify which particular records you looked at?

A. That's difficult for me to answer, I think partly -- partly because of it was a general overview as to his -- as I say, his arc of his illness.

I'm sure there are some -- obviously, if I'm looking through records, there's some dates that are in there and I could -- I'm sure I could figure out and pull out which ones I thought were

pertinent, but as I sit here today, it was more of a general review of his records as opposed to a specific -- any specific date.

Q. And all of the records would have been included in the materials considered list submitted with your previous report; correct?

A. That's correct.

Q. So is it fair to say that the materials considered list for your previous reports carry over to this current report?

A. Not in entirety.

MS. LAMACCHIA: Objection. Form.

THE WITNESS: Not in their entirety. So in other words, his medical records would have been in the prior materials considered list, but they would not -- but this report would not include the entirety of that. So in part, but not in total.

Does that -- does that -- do you understand what I'm trying to say?

MS. PLATT: I do. Thank you.

THE WITNESS: Okay.

BY MS. PLATT:

Q. But as you sit here today, you can't tell me off the top of your head which specific

records you looked at; correct?

A. That's correct.

Q. Did you consider creating a materials considered list for this report?

A. No.

Q. Why not?

A. In -- in my opinion, the -- the request was fairly straightforward, and there was really not a material-considered list to be made.

Q. And what was the request?

A. The request was to render an opinion as to whether the three medical records that I was presented were or were not related to Mr. Peterson's Parkinson's disease.

Q. But you felt that you needed to go outside of those three medical records?

A. Just --

MS. LAMACCHIA: Object to form.

THE WITNESS: Just to refresh my memory of the -- of the -- where in the course of Mr. Peterson's illness those three records fell --

MS. PLATT: I see.

THE WITNESS: -- time-wise. And that's -- when I say I reviewed his records

in general, that's what I mean, to just -- to put those three requested medical records into context.

BY MS. PLATT:

Q. I see. And you said you were -- you were asked to render an opinion on three medical records. Were those medical records given to you?

A. Yes.

Q. Did you ask for any other medical records?

A. No.

Q. Did you wonder why it was these three medical records?

A. No.

Q. You didn't think, "Maybe there's more medical records I should be looking at"?

MS. LAMACCHIA: Objection. Form.

THE WITNESS: No. The -- the question was in my -- in my opinion was -- it was fairly straightforward, so I did not think I needed any additional medical records to answer the question I was asked.

MS. PLATT: Okay. I'm going to go ahead and share my screen for Exhibit Number 4.

(Whereupon, Exhibit 4 marked for identification.)

BY MS. PLATT:

Q. Dr. Barbano, can you see my screen?

A. Yes, as long as I put on my glasses.

Q. So I'm going to scroll through this document. This is Exhibit Number 4, for the record, and I'm going to scroll through this document, and then I'm going to tell you my question is do you recognize this document, and so once we scroll through it, you can answer that.

If you need me to slow down or speed up at any time, please let me know.

A. Yep, you're doing fine.

Q. Do you recognize this document, Dr. Barbano?

A. No.

Q. You don't think you've ever seen it before?

A. No.

Q. Okay. So I'm going to scroll up in the document to page 5 and part of page 6. Do you see that?

A. Yes.

Q. And if we scroll up to the top of page

5, you can see the heading says Parkinson's Disease; correct?

A. Correct.

Q. And then at last paragraph of page 5, I'm going to read into the record, and please confirm that I'm reading this correctly.

"Track 1 trial plaintiff for Parkinson's disease, namely Edgar Peterson, also designates the following expert who may be called upon to offer rebuttal testimony on the subject of relatedness of the medical visits of August 31, 2017," and then in parentheses there's a Bates number that ends in 3911; "September 12, 2017," and in parentheses there's a Bates number range ending in 3902 through 3906; "and September 15, 20,217," which I think is supposed to be 2017, and then in parentheses a Bates number ending in 3901, "for his Parkinson's disease and subsequent conditions."

Correct?

A. Yes, correct.

Q. And then your name is listed underneath that; correct?

A. Correct.

Q. And then if we scroll down to the middle of page 6, there's a sentence in the middle

of the paragraph that starts "With respect..." Do you see that, Dr. Barbano?

A. Can you put your cursor on it?

Q. Yes.

A. Yes, I see it now.

Q. Okay. "With respect to Drs. Longo, Schwarz, and Barbano, the expert qualifications, opinions, fee schedule, and a list of all other cases in which during the previous four years the witness testified as an expert as required by Federal Rule of Civil Procedure 26(a)(2)(B) was previously set forth in their expert reports produced February 7, 2025.

"Any facts and data considered by the above-named experts not already produced in this action and/or not readily available to the public has already been produced pursuant to the stipulated order regarding expert discovery (Case Management Order Number 17) (D.E.305)."

Correct?

A. You've read that correctly.

Q. And so, Dr. Barbano, these portions are about you; correct?

A. Correct.

Q. And you did not review this language

before today; correct?
A. Correct.
Q. And so if we look at the bottom of page 5 onto page 6, there are dates listed; correct?
A. Correct.
Q. It's August 31, 2017; September 12, 2017; and September 15, 2017. Correct?
A. Correct.
Q. And those are the dates of the medical events you reviewed; correct?
A. Correct.
Q. And do you know, are those Bates numbers following the dates the records you reviewed?
A. I have no idea.
Q. If you went back to those records, would you be able to confirm that information?
A. I think so.
Q. Okay. I'm not asking you to do it right now --
A. Okay.
Q. -- but just in general.
A. Okay. No, I think so. I would -- I don't have the Bates numbers memorized.
Q. Of course.

A. But I would say I could probably find them.

Q. That -- that would be pretty impressive if you could memorize Bates numbers, but I don't think any of us are able to do that.

And so this -- this sentence indicates that your attorneys are saying these are the records you reviewed; correct?

A. That's my understanding of what it says.

Q. And your understanding is that you did not consider any other medical records beyond those listed on this document; correct?

A. For this request, correct.

Q. And you -- and we already talked a little bit about your -- your review of the timeline of Mr. Peterson's disease.

Did you review any articles related to this report?

A. No.

Q. You didn't perform any literature review for this report?

A. Not to any specific extent. I mean, I would say no.

Q. So you were -- you were really basing

this report solely on your experience and the three sets of records you reviewed; correct?

MS. LAMACCHIA: Objection. Form.

THE WITNESS: As well as my general medical knowledge.

BY MS. PLATT:

Q. Okay. Anything else that you -- you base this re- -- this report on?

A. No.

Q. Without discussing specific details of any conversations, have you spoken to any other experts in this litigation?

A. No.

Q. Have you spoken with Marjorie Hackett-Wallace?

A. No.

Q. Do you know who she is?

A. No.

Q. So I guess it's fair to assume you did not review her report in this litigation?

A. Correct.

Q. And did you not review her rebuttal report in this litigation?

A. Correct.

Q. And you did not review her deposition

transcript in this litigation?
A. Correct.
Q. Do you know who Dr. Syed Hassan is?
A. No.
Q. So I guess it's fair to say you did not review Dr. Hassan's report; correct?
A. Correct.
Q. And you did not review Dr. Hassan's deposition transcript?
A. Correct.
Q. Were you -- were you aware that Dr. Hassan has a spreadsheet related to Mr. Peterson's damages in this litigation?
A. No.
MS. LAMACCHIA: Objection. Form.
BY MS. PLATT:
Q. And so you did not review Dr. Hassan's spreadsheet related to Mr. Peterson; correct?
MS. LAMACCHIA: Objection. Form.
THE WITNESS: Correct.
BY MS. PLATT:
Q. Were you aware that the United States disclosed an expert report regarding the medical records that you opined here in this report?
A. Before I answer no, can you repeat

that, what it is that I'm aware of or not?

Q. Yes. Were you aware that the United States disclosed an expert report regarding the medical records you opined on?

A. Are you -- you're talking about those last three ones that --

Q. Yes.

A. No, I'm not aware of that.

Q. Do you think it would have been helpful for you to review that report?

MS. LAMACCHIA: Objection. Form.

THE WITNESS: Not particularly.

BY MS. PLATT:

Q. Why not?

A. Again, to me, the -- the request was fairly straightforward and I was rendering an opinion, and I think it was -- would be very unlikely that someone else's opinion would sway me on that.

Q. Were you aware that you were named as an expert in the damages phase of this litigation?

A. No.

Q. Okay. So I am going to turn to some questions about your expert report.

Are you doing okay or do you need a

break?

A. I'm fine. Thank you for asking.

Q. So I want to turn back to Exhibit Number 3, which is your expert report.

What was your method in writing this report?

A. I reviewed the three medical records, the dates of those three medical records, as you had pointed out, and then again did an overview of where Mr. Peterson was in the course of his illness at the time. Again, as I said, just a general review to -- to put that date into some sort of context because I thought that would be important.

And then wrote an opinion the way I -- I -- I'm not sure what you mean by "method," to be very honest. I just put -- typed out my opinion on my computer.

Q. Did you conduct an independent medical exam for this report?

A. No.

Q. Mr. Peterson has a deep brain stimulator; correct?

A. Correct.

Q. And he had -- if I refer to it as DBS, do you know what I'm referring to?

A. Yes.
Q. And he had DBS implanted in 2004; correct?
A. Correct.
Q. Can you describe how Mr. Peterson's DBS works?
MS. LAMACCHIA: Objection. Form.
THE WITNESS: Sure. In -- in general, DBS stimulates the -- the tract or pathway in the brain that is no longer functional because of the degeneration of nerve cells that form its tract.
So there is a -- the deep brain stimulation is able to bypass to some extent the pathway that no longer functionally exists because of his Parkinson's disease.
MS. LAMACCHIA: Counsel, I'm going to ask that these types of questions be limited to the scope of Dr. Barbano's report that he issued on January --
MS. PLATT: I'm sorry, Leslie. I'm having a really hard time hearing you. I don't mean to interrupt. Just I can't hear.
MS. LAMACCHIA: Can you hear me?
MS. PLATT: Yes.

MS. LAMACCHIA: I'm -- I'm going to object to that question. I'm also going to ask that these questions be limited to the scope of Dr. Barbano's report that he issued on January 12th of 2026. That is what this deposition is about and -- and nothing as it relates to anything outside of that.

MS. PLATT: Your objection is noted for the record, Leslie.

BY MS. PLATT:

Q. Dr. Barbano, where is the placement of the DBS itself in the body?

MS. LAMACCHIA: Objection. Form.

MS. PLATT: It can be placed in -- in basically two areas, both in the brain.

BY MS. PLATT:

Q. I'm sorry. Did you say "both in the brain"?

A. Yes. Both -- both areas that it would be placed for Parkinson's would be in the brain, correct.

Q. And is there -- is there like a battery pack in the chest?

A. Yes.

Q. Is there any other hardware related to

DBS?

A. Yes.

Q. And what is that?

A. There's wires that are tunneled under the skin from the battery pack up over the -- basically the nape of the neck and up into the skull where it then connects into the probe that is placed into the brain.

Q. Thank you.

A. So there's the battery pack and the wires.

Q. Thank you. I'm going to go ahead and share my screen again to show Exhibit Number 3, which is your expert report.

Can you see Exhibit Number 3, Dr. Barbano?

A. Yes.

Q. Okay. And then I'm looking at the first sentence of the text of this report. It states "I was asked to review several of Edgar Peterson's medical visit to assess relatedness to his Parkinson's diagnosis"; correct?

A. Correct.

Q. And you have listed here -- you have written here that it was several of Edgar Peterson's

medical visits; correct?
A. Correct.
Q. And you previously said that those visits were identified to you through counsel; correct?
A. Correct.
Q. You did not identify these on your own; correct?
A. Correct.
Q. And in the following paragraph, it states "I was asked to review Edgar Peterson's visits to the Sanders Clinic on 8/31/17 and 9/15/17 as well as his emergency room visit to Methodist Hospital on 9/12/17"; correct?
A. Correct.
Q. And you concluded that each of these visits were related to his development and treatment of superficial venous thrombophlebitis; correct?
A. Correct.
Q. I apologize if I'm mispronouncing that term.
A. It was perfect.
Q. Good. I did practice ahead of time.
A. Okay. It paid off.
Q. And how did you reach this conclusion?

A. That they were -- that the records were related to the treatment of his superficial venous thrombophlebitis. It's essentially there in the medical records; it says that's what he was there for.

Q. And you did not discuss superficial venous thrombophlebitis in your previous report dated February 17, 2025; correct?

A. Correct.

Q. And you did discuss Mr. Peterson's mobility issues in your previous report dated February 7, 2025; correct?

A. Correct.

Q. And in 2021, Mr. Peterson's mobility was so limited, he began using a wheelchair; correct?

A. Correct.

Q. Turning back to Exhibit Number 3, the third paragraph, the first sentence states "Immobility is a significant risk factor for the development of this condition"; correct?

A. Correct.

Q. Add the term "this condition" in that sentence is referring to superficial venous thrombophlebitis; correct?

A. Correct.
Q. And is this different from superficial saphenous thrombophlebitis?
A. Is -- is which different from that?
Q. The superficial venous thrombophlebitis.
A. Yes. Is it different from...? I'm sorry.
Q. Is it different from superficial saphenous thrombophlebitis?
A. I'm -- I'm not sure whether the second -- I'm not sure what the second thing you're saying is referring to. I'm sorry.
COURT REPORTER: Can you spell it for me?
MS. PLATT: Yeah.
THE WITNESS: Go ahead.
MS. PLATT: It is S-A-P-H-E-N-O --
THE WITNESS: Oh --
MS. PLATT: -- -U-S.
THE WITNESS: -- thank you very much. I'm sorry. I couldn't hear what you were say.
Saphenous. That just names the specific vein.

I -- I apologize. I didn't quite catch what you were saying. So --

MS. PLATT: No, that's also on me. Sorry.

THE WITNESS: So to answer your question, no. Essentially those are the same thing.

BY MS. PLATT:

Q. Okay. And saphenous, you said, is referring to the vein?

A. Saphenous is a specific vein.

So superficial venous thrombophlebitis is the overarching term for a condition of any vein, and if it -- if someone wanted to be more specific, they could name which veins it was involving, and in this case, it would be the saphenous vein.

Q. Okay. And is there a difference between superficial venous thrombophlebitis and deep vein thrombosis?

A. Yes.

Q. What is the difference?

A. Well, even in the -- in using the different terms, sup- -- one is superficial. That means one of the vessels near the surface of the skin.

Deep vein thrombosis, or DVT, if we can say that, refers to the deeper veins in, in this case the leg, but it could be in any limb.

And phleb- -- thrombophlebitis is inflammation of the vein. Or so -- it's thrombo. It would be in this case the vascular surface. Phlebitis would be the inflammation of it.

Whereas deep vein thrombosis is clotting in that deep vein. So it differs both in location as well as pathology.

Q. Thank you.

Are the same tests used to diagnose both?

A. To some extent, yes.

Q. Could you elaborate on that?

A. Sure. A superficial venous thrombophlebitis, as the name implies, is near the surface and can be seen on physical examination.

Deep vein thrombosis is -- occurs in the deeper veins. It's not readily visible nor necessarily readily palpable on a physical exam.

So then one does other testing to see whether deep vein thrombosis exists and is there, because there is a frequent co-occurrence of superficial venous thrombophlebitis and deep vein

thrombosis.

Q. Okay. Thank you.

I'm going back to your report. In the third paragraph, do you see the sentence that begins "By..."?

A. Yes.

Q. "By the time of these visits, Mr. Peterson's Parkinson's disease, he was having significant mobility issues."

A. Yes. And I apologize. In -- in reading this in retrospect, that's missing a word or a clause, which means Peterson's disease progressed to the point he was having -- or maybe I meant when I wrote it by the time of these visits, it -- Mr. Peterson's Parkinson's disease was resulting in having significant mobility issues.

That -- that's the meaning of that sentence, but my apologies. I left out a -- a word there.

Q. That's okay.

And the final sentence of that paragraph states "Given the lack of other reasonable causes for his immobility, it is my opinion that his development of his thrombophlebitis is a direct result of his immobility causally related to his

Parkinson's disease."

Did I read that correctly?

A. You did.

Q. It is your opinion that Mr. Peterson's Parkinson's disease caused immobility; correct?

A. Correct.

Q. And it is that immobility that caused Mr. Peterson's thrombophlebitis; correct?

A. Correct.

MS. LAMACCHIA: Objection. Form.

BY MS. PLATT:

Q. What are the causes of blood clots, Dr. Barbano?

A. Blood clots?

Q. Um-hum.

A. Well, there's many causes of blood clots, including immobility is -- is often the number one cause. Occult or even overt cancers can result in blood clots. Blood clots can form from a person's hypercoagulability, or that is a tendency to cause -- to form blood clots which can be genetic. For example, dehydration, which causes a concentration of the blood, can be -- can cause blood clots as well. And direct trauma can cause blood clots sometimes.

Q. When you say direct trauma, are you referring to injuries?

A. Yes.

Q. Would it be an injury specifically to a vein?

A. So in -- in -- in certain cases, if someone gets a direct -- for example, direct blow trauma -- let's say someone gets hit in the -- in the -- in the calf with a baseball bat during a game. Occasionally that can cause blood clots in that vein due to, yeah, injury, internal injury.

Q. Do you know if Mr. Peterson had any injuries to his vein prior to 2017?

A. Yeah, no, I did -- let me answer that. Do I -- I do not think that he had any injuries to his vein prior to 2017.

Q. Did you confirm this in the medical records?

A. I did not look specifically for an injury, but in -- again, my general review of the records did not -- nothing stood out to me as a particularly -- a particular injury that could potentially be causative of a condition like this.

Q. Do you know if Mr. Peterson has a genetic predisposition to blood clots?

A. I would have no suspicion for him to have those, again, but it -- to be clear, you -- are you still talking about DVTs or are you talking about the superficial thrombophlebitis?

Because those are two different entities, and when -- and when you and I were talking before, we were talking about blood clots specifically related to DVTs, and my opinion was regarding his superficial venous thrombophlebitis. So just -- I just want to clarify that.

Q. I was asking about blood clots.

A. Okay. Yes. No, I -- I -- I have -- I do -- I would have no suspicion that he has a genetic cause for developing blood clots particularly at his age. Those usually you would suspect in someone decades younger.

Q. Did you review any medical records to confirm this?

A. I do not think those records exist nor would they exist. He would have no suspicion of having had a genetic tendency to develop blood clots, so there would be no records regarding that one way or the other.

Q. Turning back to superficial venous thrombophlebitis, what are the causes of it?

A. Again, the most common cause is immobility. It can occur sometimes with superficial skin injuries. It can sometimes occur in the area where people get IVs put in. So that would, I guess, include some sort of superficial injury. The majority of the time it's due to immobility.

Q. Are there any other causes of superficial venous thrombophlebitis?

A. Infections can cause -- can cause that problem.

Q. Can they be genetic?

A. Not that I'm aware of.

Q. Are there any risk factors for superficial venous thrombophlebitis?

A. Yes.

Q. What are the risk factors?

A. Immobility and infection, local, local infection.

Q. What about age? Is that a risk factor?

A. I think it is a relative risk factor. I'm not -- I don't know the data specifically on that off the top of my head, but I -- I do think it probably is a relative risk factor.

Q. Is cancer a risk factor?

A. For superficial venous thrombosis -- thrombophlebitis? Not that I'm aware of.
Q. What about being overweight or obese?
A. Yes, that can be a risk factor.
Q. Do you know if Mr. Peterson had an infection, a local infection, prior to August 31, 2017?
A. I don't believe so, no.
Q. Did you confirm that in the medical records?
A. I did not.
Q. And at the time, Mr. Peterson was about 68 years old; correct?
A. Correct.
Q. Sorry. And just so we're clear, at the time of the August 31, 2017, visit, he was about 68 years old?
A. Yes, correct.
Q. And do you know if Mr. Peterson was overweight at the time of the August 31, 2017, visit?
A. Yes, I believe he was.
Q. And did you include any of those -- you did not include any of these risk factors in your report; correct?

A. Correct. In -- in words, no. They were taken into overall the opinion.

Q. But they were not in the text of your report; correct?

A. That's correct.

MS. LAMACCHIA: Objection. Form.

BY MS. PLATT:

Q. Okay. Let's go back to your expert report, Exhibit Number 3, and if you look at the first sentence of the last paragraph, it begins "I reached..." Do you see that?

A. Yes.

Q. It states "I reached these conclusions within a reasonable degree of medical certainty."

Did I read that correctly?

A. Yes.

Q. What does a reasonable degree of medical certainty mean?

A. Over 50 percent likelihood, or more likely than not.

Q. And why did you choose this standard?

A. That would be the standard I would use for relatedness in this case.

Q. And what do you mean by "relatedness"?

A. Relatedness? Is there a relationship

between one condition and another condition in this case. So is there a relation -- is there a relation -- relationship or is it related -- the Parkinson's -- the superficial venous thrombosis -- thrombophlebitis and Mr. Peterson's Parkinson's disease.

Q. And have you used this standard before?

A. Yes.

Q. Where have you used this standard before?

A. In -- in the majority of the legal work -- medicolegal work that I do usually involving personal injuries, that is the standard that is requested that I give my opinion to.

Q. And in those reports, are you opining on whether one condition is related to another condition?

A. Yes, sure, yes. The answer is yes.

Q. Are you opining on anything else?

A. In the other reports? And there are -- there are many, so it's difficult to answer that because they all can be quite different. They can be related to motor vehicle accidents, medical malpractice suits, but the majority of them involve

relatedness to -- from one thing to another.
So I don't know if that answers your question.
Q. Is this the standard you used in your previous report on Mr. Peterson dated February 7, 2025?
A. No.
Q. And what standard did you use in that report?
A. At least as likely.
Q. And why did you decide to change standards here?
MS. LAMACCHIA: Objection. Form.
THE WITNESS: This is an entirely different question, an entirely different issue.
BY MS. PLATT:
Q. And how is a reasonable degree of medical certainty different from at least as likely?
MS. LAMACCHIA: Objection. Form.
THE WITNESS: Well, I mean, if I were to put it in just kind of nonlegal, let's say, terms, from what I understand, "at least as likely" is 50 percent or more and "more likely than not" is over 50 percent.

MS. PLATT: Okay. I think this is a good stopping place for us to take a break.

THE WITNESS: Okay.

VIDEOGRAPHER: The time right now is 11:10 a.m. We're off the record.

(Recess taken.)

VIDEOGRAPHER: The time right now is 11:21 a.m. We're back on the record.

BY MS. PLATT:

Q. Okay. Dr. Barbano, I want to go through some of the medical records -- medical records that are referenced as the records you reviewed.

So let me show you Exhibit 4 again. Can you see Exhibit 4?

A. Yes.

Q. And at the bottom of page 5, it lists the medical visits of August 31, 2017; September 12, 2017; and September 15, 2017, with the last two on the next page; correct?

A. Correct.

Q. And those correspond with the dates listed in your expert report; correct?

A. Correct.

Q. So I want to first look at that first

appointment, August 31, 2017. Can you see on this document the medical record listed is a Bates stamp 01576_Peterson_0000003911; correct?

A. Correct.

MS. PLATT: And so I'm going to introduce Exhibit Number 5.

(Whereupon, Exhibit 5 marked for identification.)

BY MS. PLATT:

Q. Can you see my screen, Dr. Barbano?

A. Yes.

Q. And do you see at the bottom it has the same number that I just read to you?

A. Yes.

Q. And so this is Exhibit Number 5. Do you recognize this record?

A. Yes.

Q. You reviewed this record?

A. Yes.

Q. And you reviewed this record for your report; correct?

A. Correct.

Q. And so if we look at the top left of this document, it has the name Allen; correct?

A. Correct.

Q. And this would indicate -- it's a medical record from Mr. Peterson's visit with Dr. Allen; correct?

A. Correct.

Q. And slightly underneath that, it has the date 08/31/2017; correct?

A. Correct.

Q. And this would indicate that it is Mr. Peterson's visit with Dr. Allen on August 31, 2017; correct?

A. Correct.

Q. And if we look at the very first line that appears after that date, it states "Edgar Peterson - 124844 - patient with Parkinson's disease of marked severity"; correct?

A. Correct.

Q. And then at the bottom of the first paragraph, it states "Parkinson's symptoms and most everything else remains" -- sorry. "Parkinson's symptoms and most everything else are the same as usual"; correct?

A. Correct.

Q. And those are the references to Parkinson's disease in this note; correct?

A. Correct.

Q. And if we look at the beginning of that first paragraph, it states "GERD esophagitis, chronic leg edema, chronic insomnia, hyperlipodemia, vitamin D deficiency, and other issues. Returns because of something new"; correct?

A. Correct.

Q. It goes on to say "For the last several days, he developed right lower thigh and upper calf posteromedial redness, warmth, swelling, pain, and tenderness"; correct?

A. Correct.

Q. And that would indicate that's the something new that Mr. Peterson is at this appointment for; correct?

A. Yes.

Q. And if we look at the middle left of the page, it states "con't"; correct?

A. Correct.

Q. And that would typically stand for "continued"; correct?

A. Typically, yes.

Q. And so that would indicate there are other pages that are part of this record; correct?

A. A part of this record. That would be the way I would interpret that.

Q. And so it's possible that those other pages are from the same visit; correct?

A. It would be possible, yes.

Q. Did you request to review other pages related to this visit?

A. No.

Q. Why not?

A. Because I think this had enough information with it. Again, viewing not this in isolation but the other three records in total, it was pretty clear to me that this is a person who developed superficial venous thrombophlebitis as a result of immobility related to his Parkinson's disease. I mean immobility here is his biggest risk factor.

He has chronic leg edema also, you know, likely related -- not -- you know, more likely than not related to his immobility.

So these all go together and the three visits holistically fit together, so I did not think I needed any further records to formulate an opinion.

Q. But you do not know what the remainder of the note on this particular record states; correct?

A. Correct.
Q. Let's go back to Exhibit Number 4. This is the expert disclosure. On Exhibit Number 4, at the top of page 6, there's a range of Bates numbers. Do you see that --
A. Yes.
Q. -- Dr. Barbano?
A. Yes.
Q. And for simplicity, I'm just going to review the last four digits. Is that okay with you?
A. Yes.
Q. And so the Bates number range ends in 3902 through 3906; correct?
A. Correct.
Q. And then the document we just looked at ended in 3911; correct?
A. Yes, correct.
Q. And the pages in between 3906 and 3901 were not provided to you; correct?
MS. LAMACCHIA: Counsel, the --
COURT REPORTER: I can't hear you.
MS. LAMACCHIA: I'm sorry.
THE WITNESS: Yeah.
MS. LAMACCHIA: Objection. Form.

Can you hear me?

COURT REPORTER: I can't hear you.

MS. LAMACCHIA: I'm not sure why I'm having --

COURT REPORTER: There you go.

MS. LAMACCHIA: -- audio issues. I'm not sure why I'm having audio issues. I'm sorry.

Object to the form.

Counsel, witness has no idea how -- how documents are Bates numbered in this litigation.

MS. PLATT: Thank you. Your objection is noted, and I'll remind you that per this litigation, your objections are limited to form and foundation.

BY MS. PLATT:

Q. And I think I may have already asked this question, but just so we have it on the record, you did not receive the records in between 3906 and 390- -- sorry -- 3911; correct?

MS. LAMACCHIA: Objection. Form.

THE WITNESS: Not for this report.

MS. PLATT: Okay. And I'm going to go ahead and share Exhibit Number 6.

(Whereupon, Exhibit 6 marked for identification.)

BY MS. PLATT:

Q. Can you see my screen, Dr. Barbano?

A. Yes.

Q. I'm going to scroll through this exhibit, and then I'm going to ask you if you recognize this document.

Do you recognize this document, Dr. Barbano?

A. Yes.

Q. And what is this?

A. It's the results of the Doppler examination and the visit of that -- or the notes related to it on that day.

Q. Did you review this record for your report?

A. Yes.

Q. But it is not listed as a record that you reviewed for your report; correct?

A. No, I think this is listed in -- as one of the three records that came to me.

Q. Would you like to look back to Exhibit 4?

A. Sure. Or -- or Exhibit 3, even, if

that's okay.

Q. Yes. Exhibit 3 is your report and Exhibit 4 is the disclosure. Which one would you like to see first?

A. 3.

Q. 3. Okay. One second.

Okay. This is Exhibit 3.

A. All right. I just want to write down the dates. 8/31, 9/15, and 9/12. Okay.

And now Exhibit 4, please.

Q. Yes, I have it on pages 5 and 6, but please let me know if you would like to scroll.

A. No, no, it's okay. I'm just -- I just want to double-check the dates because I'm a little confused because it seems to include the report that you just showed me, so that's -- I do think that's included in my report.

Q. You think that the documents shown in Exhibit 6 are included in these ranges of pages on Exhibit 4?

A. Yes. Can I see document 6 -- Exhibit 6 again, please?

Q. Yes.

A. I mean, I definitely recall reviewing the Doppler findings in -- in that, so that's why --

and, yeah, its end date -- yeah, isn't this the 8/31/2017? Isn't this the -- aren't we talking about the same record?

Q. Dr. Barbano, I'll direct your attention to the Bates stamp at the bottom of the first page of Exhibit 6. It ends in 3907. Do you see that?

A. Yes, I do see that.

Q. And if we scroll to the last page of Exhibit 6, the Bates number ends in 3910; is that correct?

A. Yes, that's correct.

Q. And I'm going to go back to Exhibit 4 --

A. Okay.

Q. -- for a moment. And do you see a page ending in 3907 in Exhibit 4?

A. Nope, not on this.

Q. And that would include documents through 3910; correct?

A. 3910. On -- which are you talking about?

Q. That was the ending of Exhibit 6; correct?

A. Okay. Yes. So I -- maybe this will

help clarify it. I don't use Bates numbers, so -- but I can tell you that that what you showed me, Exhibit 6, I've seen, and that is what I'm referring to in my report.

So -- but -- but, you know, personally, I don't use Bates numbers. So what you showed me is what I reviewed in formulating my opinion.

Q. But you would agree that those pages are not listed on this disclosure, Exhibit 4; correct?

A. Yeah, I would -- I don't see them there, correct.

Q. And so you would agree that Exhibit 4 includes an incomplete list of the records that you reviewed for your report; correct?

MS. LAMACCHIA: Objection. Form.

THE WITNESS: By Bates numbers, correct. Again, I don't -- I don't use Bates numbers, so I wouldn't really -- it wouldn't be something I would be double-checking.

BY MS. PLATT:

Q. And how do you keep track of the records you review, Dr. Barbano?

A. I generally just keep them by source

and date, is my general method. So I might have records that might say Dr. X, you know, 2001 through 2010. So I -- I -- I don't use Bates numbers. Just not my practice.

Q. I understand. Bates numbers are typically something lawyers create.

So you previously testified that the specific medical records to review for this report were given to you by counsel; correct?

A. Correct.

Q. So this Bates range of documents 3907 through 3910, were they ones given to you by counsel?

A. Yes, I have seen those. Those were -- those were the -- what I reviewed for my opinion.

Q. They were not (dropped audio) --

COURT REPORTER: I'm sorry. Say it again.

MS. PLATT: -- your independent review?

COURT REPORTER: Say it again.

MS. PLATT: I'm so sorry. I'm sorry. The whole question?

COURT REPORTER: I'm sorry. I think -- I think I froze because I did not --

the last thing I heard you say was "I'm so sorry."

MS. PLATT: Do you have -- what was the last thing that you wrote?

(Off record due to dropped videoconference connection for the court reporter.)

VIDEOGRAPHER: The time right now is 11:39 a.m. We're back on the record.

BY MS. PLATT:

Q. Dr. Barbano, those records were not part of your independent review of Mr. Peterson's trajectory of Parkinson's disease; correct?

MS. LAMACCHIA: Objection. Form.

THE WITNESS: I'm not -- I'm not understanding. I'm sorry.

BY MS. PLATT:

Q. That's okay. Let me rephrase.

Let's take a step back. You said that in -- in creating in -- sorry. In writing this report, you also looked to previous medical records on Mr. Peterson to get a sense of the trajectory of Mr. Peterson's Parkinson's disease; correct?

A. Correct.

Q. And so was this range of documents,

3907 through 3910, part of that review of the trajectory of Mr. Peterson's Parkinson's disease?

A. No. Those were -- those I was provided with, so there would be no reason to look at those again.

Q. Okay. So it is your -- as you sit here today, you believe these records were provided to you by counsel for this report; correct?

A. Correct.

Q. Okay. Let's go back to Exhibit 6, which is that range of documents we've been talking about.

Go to that first page here. Can you see Exhibit 6, Dr. Barbano?

A. Yes.

MS. LAMACCHIA: Counsel, can you drop Exhibits 5 and 6 into the chat, please.

MS. PLATT: Yeah, I can do that on the next break.

MS. LAMACCHIA: If we were sitting with each other at the deposition, you would have to hand me a copy. So I'm asking if you put those in the chat now for me to download.

MS. PLATT: Yes, I can do that. That is fine. If you give me one moment, I will

do that.

MS. LAMACCHIA: Thank you.

BY MS. PLATT:

Q. Okay. Dr. Barbano, can you see Exhibit 6?

A. Yes.

Q. And I'm looking at the first page of Exhibit 6. About the middle of the page states "Exam date and time." Do you see where I'm looking?

A. Yes.

Q. And do you see it states "08/31/2017, 3:34 p.m.;" correct?

A. Correct.

Q. And so this appears to be part of Mr. Peterson's medical appointment on August 31, 2017; correct?

A. Correct.

Q. And that is one of the medical events you opined on; correct?

A. Correct.

Q. And let's go to the last page. Well, let's go to the second to last page ending in 09. Do you see that?

A. Yes.

Q. And you can see that the date at the

top is 8/31/17; correct?
A. Correct.
Q. And this is from the Sanders Clinic; correct?
A. It appears so.
Q. If we scroll to the final page, do you see this final page ends in 3910?
A. You would have to move it up a little bit --
Q. Sorry about that.
A. -- on my screen.
Q. Can you see that now?
A. No, the bottom -- now I can. 3910, yes, I see it.
Q. Okay. And the top of the page is dated 8/31/17; correct?
A. Correct.
Q. And after "8/31/17" is in parentheses "con't"; correct?
A. Correct.
Q. And that likely means "continued"; correct?
A. Correct.
Q. And can you see the text on this page, Dr. Barbano?

A. Yes.

Q. So reading the first sentence of that paragraph, "Venous ultrasound of the right leg showed no deep vein thrombosis and nothing suspicious. I think that means the leg signs and symptoms are due to cellulitis again."

Did I read that correctly?

A. That that's the way I would interpret it, yes.

Q. Okay. Let's go back to Exhibit 4. And so on the bottom of page 5, beginning of page 6, it states that -- it states "September 12, 2017"; correct?

A. Yes.

Q. And then the Bates range is ending 3902 through 3906; correct?

A. That's what it says, correct.

Q. And September 12, 2017, is another medical event of Mr. Peterson's you opined on in this report; correct?

A. Correct.

MS. PLATT: I'm going to go ahead and then share Exhibit Number 7.

(Whereupon, Exhibit 7 marked for identification.)

BY MS. PLATT:

Q. Can you see Exhibit Number 7, Dr. Barbano?

A. Yes.

Q. And let me scroll through these pages so you can see the complete exhibit.

Do you recognize this document?

A. Yes.

Q. And what is this?

A. This is the document that I reviewed in formulating my opinion that we're speaking with -- speaking about today.

Q. And if I can direct your attention to the first page, the Bates number ends in 3902; correct?

A. Correct.

Q. And the last page, the Bates number ends in 3906; correct?

A. Correct.

Q. And that corresponds with the range of documents listed in Exhibit 4; correct?

A. Correct.

Q. If we go to the first page of this exhibit, do you see about the middle there's a section titled Findings?

A. Yes.
Q. And the first sentence of that section states "Realtime ultrasound with the assistance of color and spectral Doppler demonstrates normal deep veins of the right lower extremity from the common femoral vein, through the femoral vein, and popliteal vein."
Did I read that correctly?
A. Yes.
Q. And then the next section states Impression. Do you see that?
A. Yes.
Q. And that section states "No sign of deep vein thrombosis involving the right leg"; correct?
A. Correct. I don't think there was any evidence of him having a -- what we would call a DVT. What he had was the superficial vein thrombophlebitis.
Q. Um-hum. Let's go to the third page of -- I'm sorry. One -- the fourth page of this document, it ends in 3905. Do you see that, Dr. Barbano?
A. Yes.
Q. I know that text is pretty small. Can

you read that?

A. No. Can you enlarge it more?

Q. Yes.

Is that better?

A. That's better, yeah. I can see that, honing in.

Q. And do you see at the top right of the document it's dated 9/12/2017?

A. Yes.

Q. And about the middle of the document is a section called History of Present Illness. Do you see that?

A. Yes.

Q. I want to direct your attention to the last two sentences of that section. Do you see the last two sentences?

A. Yes.

Q. "Bedside exam notable for palpable cord centrally to erythema from medial calf to thigh. Bedside US notable for superficial saphenous thrombophlebitis."

Did I read that correctly?

A. Yes.

Q. And the abbreviation US in that last sentence, what does that stand for?

A. Ultrasound.
Q. Thank you.
And so this note indicates that the treating physician felt a cord-like blood vessel in Mr. Peterson's vein; correct?
A. Correct.
Q. Let's go back to Exhibit 6.
I'm sorry. Let's go back to Exhibit 4.
I'm actually going to go back to our Exhibit Number 6.
Sorry I keep switching it up on you, Dr. Barbano, but I'll give you a second to -- to look at this.
Okay. This is Exhibit 7. This is what we were just looking at, and I -- I apologize for going back and forth. This is one of the -- the problems with so many files open for a Zoom deposition.
But this is Exhibit 6 -- this is Exhibit 7 that we were just talking about. Do you recognize this, Dr. Barbano?
A. Yes.
Q. Okay. And so I want to scroll to the final page of that exhibit that ends in 3906. Do

you see that?
A. Yes.
Q. Okay. And if we look at the description of -- underneath the word Pharmacy at the top of that page -- do you see that?
A. Yes.
Q. Do you see what Mr. Peterson was prescribed?
A. Yes.
Q. What was he prescribed?
A. Enoxaparin and indomethacin.
Q. And that first one is a blood thinner; correct?
A. Correct.
Q. And the second one is an anti-inflammatory; is that correct?
A. Correct.
Q. And those are both related to the treatment that they're prescribing for the superficial venous thrombophlebitis; correct?
A. Correct.
Q. They're not medications for Parkinson's disease; correct?
A. Correct.
Q. Okay. Now we can go to Exhibit Number

7. Sorry. Exhibit Number 4. I'm all confused.
Okay. So on Exhibit Number 4 -- this is the disclosure. If you look at page 6 of this document, the last date listed is September 15, 2017; correct?
A. Correct.
Q. And that's for -- and then after that is a medical record Bates range ending in 3901; correct?
A. That's what it says, yes.
Q. And this September 15, 2017, is the final visit you opined on in your report; correct?
A. Correct.
MS. PLATT: I'm going to go ahead and share Exhibit Number 8.
(Whereupon, Exhibit 8 marked for identification.)
BY MS. PLATT:
Q. Can you see this document, Dr. Barbano?
A. Yes.
Q. And the Bates number in the bottom right ends in 3901; correct?
A. Correct.
Q. And that corresponds with what we just

read on Exhibit 4; correct?
A. Correct.
Q. And do you see at the top of this document is Dr. Allen's name?
A. Yes.
Q. And the date below that is 9/15/2017?
A. Yes.
Q. And so this would indicate that it is Mr. Peterson's visit with Dr. Allen at the Sanders Clinic on 9/15/2017; correct?
A. Correct.
Q. And the first sentence states "Patient with severe Parkinson's disease is mostly following up problems related to his right leg"; correct?
A. Yes.
Q. And it goes on to say "He went to the hospital emergency room a few days ago because of persistent problems with his right leg"; correct?
A. Correct.
Q. "They were previously diagnosed (by me) as being 'cellulitis'"; correct?
A. Correct.
Q. "Previous ultrasound of that leg had failed to reveal signs of deep vein thrombosis or even superficial vein thrombosis"; correct?

A. Correct.
Q. "He has been given three courses of oral antibiotics of various kinds"; correct?
A. Correct.
Q. And if we look at the middle of that page, it states "con't"; correct?
A. Correct.
Q. And as we previously discussed, that typically stands for "continued;" correct?
A. Correct.
Q. And this likely indicates that the note is continued on another page; correct?
A. Yes, correct.
Q. Did you review the other pages associated with this note?
A. No.
MS. PLATT: I'm going to go ahead and share Exhibit Number 8. I'm sorry. Exhibit Number 9.
(Whereupon, Exhibit 9 marked for identification.)
BY MS. PLATT:
Q. Do you see my screen, Dr. Barbano?
A. Yes.
Q. This is Exhibit Number 9, and if you

look at the bottom right, the Bates number ends in 3899; correct?

A. Correct.

MS. LAMACCHIA: Counsel, can you please put Exhibits 7, 8, and 9 into the chat?

MS. PLATT: Yes. One moment.

MS. LAMACCHIA: Thank you.

BY MS. PLATT:

Q. Okay. Can you see Exhibit Number 9 on the screen, Dr. Barbano?

A. Yes.

Q. And it ends in -- the first page ends in 3899; correct?

A. Correct.

Q. And the second page ends in 3900; correct?

A. Correct.

Q. And those are the numbers immediately preceding the pages we saw in Exhibit 8; correct?

A. By Bates number, yes.

Q. Do you need to see Exhibit 8?

A. No.

Q. And let's look at the first page of Exhibit 9. If you look at the top right, it's dated

9/15/2017; correct?

A. Correct.

Q. And the second page in the top left is dated 9/15/17; correct?

A. Correct.

Q. And those are the same dates of medical appointments from that we saw in Exhibit 8; correct?

A. Yes.

Q. And on the second page after 9/15/17 appears "con't"; correct?

A. Correct.

Q. And as we previously said, that likely stands for "continued"; correct?

A. Correct.

Q. Do you recognize these records?

MS. LAMACCHIA: Objection. Form.

THE WITNESS: Not offhand, no.

MS. PLATT: Okay. Let's take a five-minute break. I'm almost done.

VIDEOGRAPHER: The time right now is 12:00 p.m. We're off the record.

(Recess taken.)

VIDEOGRAPHER: The time right now is 12:06 p.m. We're back on the record.

BY MS. PLATT:

Q. Dr. Barbano, I just have a few remaining questions for you.

Are you receiving compensation for your work in this case?

A. Yes.

Q. And what is your hourly rate?

A. I'd have to go back and review. I believe it's $580, but I could be wrong about that. I'd have to look at it.

Q. Have you changed that since your last deposition?

A. No.

Q. Have you testified in any cases as an expert since your last deposition?

A. Yes.

Q. What have you testified in?

A. It was in Queens, New York. It was a medical malpractice case, and it was last month.

Q. Do you remember the parties' names in that case?

A. Yes. It was Trinh, T-R-I-N-H, versus -- I think the last name is Kalika, K-A-L-I-K-A. Again, it was a Queens State Supreme Court.

It's on my computer if you need that

exactly. I could certainly pull it up on another screen.

Q. We request that after this deposition you provide that to counsel, and counsel can provide that information to us.

A. Perfect.

Q. And if possible, we request the case number as well.

A. Okay. If I have it.

Q. Thank you.

Any other testimony since your last deposition?

A. No, I don't think so. Not that I'm aware of. Not that I can recall.

Q. And this case in Queens, New York, what was the -- sorry. Let's start -- was it a deposition?

A. It was testimony in front of a jury.

Q. And what was the topic of that case?

A. Iatro- -- iatrogenically or medically induced oral mandibular dystonia.

Q. And which party were you representing?

A. The plaintiff.

Q. Did you do anything to prepare for today's deposition?

A. No, no more than just review my report.
Q. Did you meet with counsel?
A. Yes.
Q. Who did you meet with?
A. Ms. LaMacchia.
Q. Anyone else?
A. No.
Q. How many times did you meet with Ms. LaMacchia?
A. Once.
Q. And for how long?
A. In -- in total? Less than half an hour.
Q. Why do you say "in total"?
A. Well, for the first few minutes of that half hour, if not up to 10 minutes, it was more personal discussion because I'm wearing a brace and --
Q. Yeah.
A. -- had surgery.
Q. You don't need to go into specifics of your conversation, Dr. Barbano. I appreciate you elaborating.
Other than your report dated

January 2026, did you review any other documents prior to this deposition in preparation?

A. As I said, I -- I -- I just rereviewed a quick over- -- just a quick overview of Mr. Peterson's records. I hadn't looked at his records for months. It was just kind of refreshing my memory of the time course of his illness, like when he was diagnosed, etc.

Q. And do you know which specific records you reviewed?

A. No. Just general.

Q. Did you review your previous report on Mr. Peterson?

A. No.

MS. PLATT: Dr. Barbano, thank you so much for your time. I have no further questions.

I'll turn it over to Ms. LaMacchia.

MS. LAMACCHIA: Thanks.

EXAMINATION

BY MS. LAMACCHIA:

Q. I just have a couple clarifying questions for you, Doctor.

I might have misheard you earlier. It was before one of our breaks.

COURT REPORTER: Hold on. Can you just -- I can't hear you really well.

THE WITNESS: I can't either.

MS. LAMACCHIA: I'm sorry.

THE WITNESS: I'm sorry.

MS. LAMACCHIA: I don't know what's happening with my audio.

Can you hear me?

COURT REPORTER: Yes.

MS. LAMACCHIA: Okay. Thank you.

BY MS. PLATT:

Q. I just have a couple clarifying questions.

You were asked some questions about legal standards earlier; do you recall that?

A. Yes.

Q. Okay. And I might have misheard you when you were asked about the standard of "at least as likely as not." Can you please explain that again, what that standard means to you?

MS. PLATT: Objection. Form.

THE WITNESS: "At least as likely as not" would be 50 percent or greater.

BY MS. LAMACCHIA:

Q. Okay. And then this opinion you gave

for your report dated January 12th of '26 had to do with a reasonable degree of medical certainty; correct?

MS. PLATT: Objection. Form.

THE WITNESS: Correct.

BY MS. LAMACCHIA:

Q. Okay. And what does that mean?

A. Greater -- to me, greater than 50 percent.

Q. Okay. And you're not an expert in -- in legal standards or conclusions; right?

MS. PLATT: Objection. Form.

THE WITNESS: Correct.

BY MS. LAMACCHIA:

Q. Okay. And the opinion you gave in your specific causation report was an at least as likely as not opinion; right?

MS. PLATT: Objection. Form.

THE WITNESS: Correct.

MS. LAMACCHIA: And that -- that was a standard published by the Camp Lejeune Justice Act; right?

MS. PLATT: Objection. Form.

THE WITNESS: Correct.

BY MS. LAMACCHIA:

Q. Okay. And here your January 12, 2026, report is based on your experience, general medical knowledge, and the three medical records you reviewed? That's what you testified to; right?

A. Correct.

Q. Okay. And counsel continued to bring up Exhibit 4 and Bates numbers during this deposition, and you had never seen those disclosures before today; right?

MS. PLATT: Objection to form.

THE WITNESS: Correct.

BY MS. LAMACCHIA:

Q. Okay. So if there were Bates numbers that were not included in the disclosures, it does not mean that you did not review the medical records; correct?

MS. PLATT: Objection. Form.

THE WITNESS: Correct.

BY MS. LAMACCHIA:

Q. Okay. So you would leave it up to me, as the attorney in this litigation, to correct the disclosures that you had no benefit of seeing before this deposition and you didn't rely on -- rely on them in -- in issuing your report; right?

MS. PLATT: Objection to form.

THE WITNESS: Correct.

BY MS. LAMACCHIA:

Q. Okay. And as you sit here today, it's your opinion that -- and your conclusion that Mr. Peterson's thrombophlebitis was related to his Parkinson's disease; right?

A. Correct.

MS. LAMACCHIA: Okay. I have no further questions. Thank you, Doctor.

MS. PLATT: I -- I just wanted to put on the record that we would like to leave this deposition open given that there is incomplete production of the materials considered list for Dr. Barbano's January 12, 2026, report.

VIDEOGRAPHER: The time right now is 12:15 p.m. We're off the record.

MS. LAMACCHIA: I'm sorry. I think I had an audio issue again. I apologize. Are we still on the record?

COURT REPORTER: No.

MS. LAMACCHIA: Can we go back on for a second?

VIDEOGRAPHER: The time right now is

12:16 p.m. We're back on record.

MS. LAMACCHIA: I apologize. Before we went off -- I'm sorry -- I think I had an audio issue again, and I'm sorry it has plagued me today.

Can you repeat what you had said, Elizabeth?

MS. PLATT: Yes. The United States requests that this deposition be kept open given that there is an incomplete production of the materials considered for Dr. Barbano's January 12, 2026, report.

MS. LAMACCHIA: I'm going to object to keeping the -- the deposition open because the materials considered is -- is not incomplete.

Counsel will amend the disclosures to include the Bates numbers.

Additionally, any medical records that Dr. Barbano has reviewed in this litigation have been previously produced on his materials considered list, so PLG objects to this deposition being kept open.

MS. PLATT: Your objection is noted.

Can we go off the record now or

anything else?

MS. LAMACCHIA: That's it. Thank you, yes.

MS. PLATT: Thank you.

VIDEOGRAPHER: The time right now is 12:17 p.m. We're off the record.

COURT REPORTER: And then your orders, please.

MS. PLATT: We would like a rough draft.

MS. LAMACCHIA: PLG does not need a rough draft, but Dr. Barbano will read and sign his deposition.

COURT REPORTER: Okay. Thank you.

Leslie, you are ordering a copy, though?

MS. LAMACCHIA: Yeah, I'll order a copy, but not on rush and I don't need a rough.

_ _ _

(Remote videotaped videoconference deposition concludes, 12:18 p.m. Eastern Time.)

C E R T I F I C A T E

I, Lisa Taylor, Registered Professional Reporter and notary public certify:

That the foregoing deposition of Richard L. Barbano, MD, PhD was taken before me at the time and place therein set forth at which time the witness personally appeared before me via videoconferencing and was duly remotely sworn or affirmed;

That the testimony of the witness and all objections made at the time of the deposition were recorded stenographically by me and thereafter transcribed;

That the foregoing deposition is a true record of the testimony and of all objections made at the time of the deposition.

I further certify that I am neither counsel for nor related to any party to said action, nor in any way interested in the outcome thereof.

My certification as to the accuracy of this transcript, if it has been reformatted or altered from its original form in any manner, is null and void.

In witness whereof, I have subscribed my name this 21st dav of March 2026.

ERRATA SHEET

Deponent: Richard L. Barbano, MD, PhD
Date of Deposition: Wednesday, March 18, 2026
In Re: Camp Lejeune Water Litigation
INSTRUCTIONS TO THE DEPONENT:
In compliance with the Rules of Civil Procedure, a copy of your deposition is provided for your review and signature. Any corrections/changes to the deposition that you care to make are to be made on this sheet.

PAGE	LINE	CORRECTION/CHANGE & REASON FOR CORRECTION/CHANGE

DEPONENT CERTIFICATE

I have read the foregoing transcript of my oral deposition taken on the date and at the location indicated on the title page of the deposition transcript and I certify that the said transcript is true and correct, with the provision that any corrections and changes appearing therein have been corrected/changed personally by myself by listing them on a separate sheet indicating the page number, line number, and content of correction or change.

I further understand that upon completion of the reading and correcting/changing of the deposition transcript that I am to sign this deponent's certificate in the presence of a notary public and then return this original deponent's certificate with my list of corrections/changes and the deposition transcript to the person so indicated to me by my counsel or the court reporter.

I further understand that if I do not carry out all of the above-mentioned instructions within thirty (30) days from receipt, I automatically waive my right to read and sign the deposition transcript and, thereupon, the original transcript can be filed accordingly.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

DECLARATION UNDER PENALTY OF PERJURY

I declare under penalty of perjury that I have read the entire transcript of my Deposition taken in the captioned matter or the same has been read to me, and the same is true and accurate, save and except for changes and/or corrections, if any, as indicated by me on the DEPOSITION ERRATA SHEET hereof, with the understanding that I offer these changes as if still under oath.

Signed on the 30th day of March, 2026.

GREGORY S. RUSSO
