Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

MONDAY, FEBRUARY 2, 2026
LOS ANGELES, CALIFORNIA
9:02 A.M.

THE VIDEOGRAPHER: Good morning. We are now on the record. My name is Darnell Brown, and I'm the videographer with Golkow. Today's date is February 2, 2026, and the time is now 9:02 a.m.

This video deposition is being held in Los Angeles, California, in the matter of Camp Lejeune Water Litigation for the United States District Court for the eastern district of North Carolina. The deponent is Dr. Wang Ji.

Counsel will be noted on the stenographic record. The court reporter is Lisa Moskowitz who will now swear in the witness.

THE CERTIFIED STENOGRAPHER: My name is Lisa Moskowitz. I'm a California certified stenographic reporter, and my CSR license number is

10816.

WANG JI, M.D.,
called as a witness,
was examined and testified as follows:

EXAMINATION

BY ATTORNEY MALONE:

Q. Good morning, Dr. Ji.

A. Good morning.

Q. Could you please just state your full name for the record?

A. Yes, I'm Wang Ji.

Q. And we met very briefly before we went on the record, but my name is JT Malone, and I'm an attorney for the plaintiffs' leadership group. We represent the plaintiffs in this litigation.

Do you understand that?

A. I do.

Q. Have you ever been deposed before?

A. I have

Q. How many times have you been deposed?

A. Once.

Q. Just once. We'll go over a couple of ground rules just briefly. So you were just sworn in, and so you understand that you'll be testifying under oath the same way you would if you were in court?

A. I do.

Q. If I ask you any questions that you don't understand, just let me know, and I can try and rephrase it. Okay?

A. Sure. Absolutely.

Q. And if you don't tell me that you don't understand the question, I'm going to assume that you do understand. Okay?

A. Yes.

Q. We can take a break at any time. Just let me know. As long as you answer -- if I have a pending question, just answer my question, and we can take our break.

Is that fair?

A. Yes.

Q. Let's try not to talk over each other. It just makes it easier for the court reporter. Another thing, since we have our court reporter here, keep all your answers verbal. So head nods, say yes, no,

that kind of thing.
A. Okay. Yes.
Q. Got it. So I'm going to hand you this. What we will mark as Exhibit 1.
(Exhibit Number 1 was marked for identification.)
BY ATTORNEY MALONE:
Q. Do you recognize this document?
A. Yes, I do.
Q. Can you tell me what that is?
A. This is a subpoena for the production of documents for the case.
Q. Okay. Does it also appear to be a notice of your deposition?
A. Yes, it does.
Q. If you could direct your attention to the second to last page.
ATTORNEY MALONE: I'm sorry, Counsel. Here's a copy.
ATTORNEY ORTIZ: Thank you.
BY ATTORNEY MALONE:
Q. At the top it says Schedule A and Request for Production.
Do you see that?
A. Yes.

Q. Did you review all these requests and perform a search to make sure you were providing all the responsive documents?

ATTORNEY ORTIZ: Object to form.

You can answer.

THE WITNESS: Yes, I did.

BY ATTORNEY MALONE:

Q. I'll represent to you that last week, there were responsive documents that were produced by your attorneys. Was there anything -- I'm sorry. Strike that.

Last week, your attorneys provided responsive documents. We'll go through them. And it appeared that they contained invoices and contracts regarding your work in this case.

Is that what you provided to your attorneys?

A. Yes, I did.

Q. Okay. Do you recall anything else that you provided to your attorneys that was responsive to these document requests?

A. I provided many documents. I don't recall specifically which were to these requests, but I did provide all the

documents that I had in my possession regarding this case.

Q. Okay. I'm going to hand you what we will mark as Exhibit 2.

(Exhibit Number 2 was marked for identification.)

BY ATTORNEY MALONE:

Q. Do you recognize this document?

A. I do.

Q. Okay. And they appear to be invoices that you have submitted to the Department of Justice; is that right?

A. That's correct.

Q. Okay. And you can go through. I count that there are eight invoices that begin on October 30, 2025, and the last one is December 31, 2025.

Does that appear correct?

A. Yes, it does.

Q. Okay. Are these all the invoices that you've submitted to the Department of Justice to date?

A. I believe there were some more that were submitted after the fact, but they have not been processed yet.

Q. Okay. How many more do you believe you've submitted?

A. To the best of my knowledge, one additional for January.

Q. And do you recall how much that invoice was for?

A. I don't recall. It was -- it was, I believe, less than four hours. There was not that much to do in January, but that's to the best of my knowledge.

Q. Okay. And from the invoices that are in front of you here, it looks like you've billed 286 hours.

Does that sound right?

A. I can't say -- I can't do the math that quickly, but it would be the amount, whatever these documents say.

Q. If I represented to you that adding all of these hours up, you get to 286 hours and give or take a half hour, that sounds about right?

ATTORNEY ORTIZ: Object to form.

THE WITNESS: I would have to do the math on this. I don't have an estimate off the top of my head how

many hours.
BY ATTORNEY MALONE:
Q. Okay.
A. But these documents should be correct.
Q. Okay. You have no reason to dispute the hours that you've billed --
A. No.
Q. -- to the DOJ?
A. No.
Q. Okay. How were you first contacted about being involved in this litigation?
A. I was first contacted by an agency called Vident, which is on these contracts, who put me in touch with the DOJ regarding this case.
Q. Have you ever worked with the DOJ in any litigation before?
A. No, I haven't.
Q. Do you have any personal connections with any other experts that are involved in this case?
ATTORNEY ORTIZ: Object to form.
You can answer.
THE WITNESS: I previously worked

with Dr. Hasan at my previous job at Regal Medical Group.

BY ATTORNEY MALONE:

Q. Besides Dr. Hasan, do you have any personal connections to other experts?

ATTORNEY ORTIZ: Same objection. You can answer.

THE WITNESS: No other connections.

BY ATTORNEY MALONE:

Q. Prior to your retention, did you have any personal relationships with any of the attorneys in this case?

THE WITNESS: No, I haven't.

BY ATTORNEY MALONE:

Q. Turning back to Exhibit 2, the invoices in front of you, if I represented that the sum total of these invoices is $210,489.30, would you have any reason to dispute that?

ATTORNEY ORTIZ: Object to form.

THE WITNESS: Again, I don't have an estimate that I'm aware of, but I have no reason to object to these numbers, whatever's on these

documents.

ATTORNEY ORTIZ: And object to foundation earlier too as well.

BY ATTORNEY MALONE:

Q. Okay. How much do you believe you've been paid so far in this case?

A. I don't have an estimate. In terms of the amount that has entered my bank account, it has been less than a hundred thousand so far.

Q. Okay. So you haven't been compensated for all of these invoices yet?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I don't keep exact track of what I've billed. It's partially through an agency; so I believe that there will be more payments, but I really don't have an estimate off the top of my head.

BY ATTORNEY MALONE:

Q. Do you receive all the compensation personally, or is it through the agency that you mentioned?

A. It's through the agency.

Q. Okay. And that agency, is it

Vident?

A. That's correct.

Q. Okay. Have you ever worked with Vident before?

A. I worked with Vident on one other case in the past.

Q. Okay. Does Vident receive any portion of your fees that you invoice for?

A. Yes, they do.

Q. Okay. Do you know how much they receive?

A. Out of the $735 rate, they -- I receive 550, and they receive the rest.

Q. Okay. I'm going to hand you what we'll mark as Exhibit 3.

(Exhibit Number 3 was marked for identification.)

BY ATTORNEY MALONE:

Q. Do you recognize this document, Dr. Ji?

A. I do.

Q. Okay. And what is this document?

A. This is the agreement -- compensation agreement for work to the DOJ. I believe Vident produced this to the DOJ.

Q. Okay. And you'll see the bullet points there listing the retainer record review, in person, attorney, those bullet points.

Are these bullet points what you understand your rates to be for your work in this litigation?

A. Off the top of my head, these are the numbers produced by Vident. I actually don't recall exactly what portion I receive, but it looks about right for the agreement. This is signed by me in the past.

Q. You can set that aside.

I will now hand you what we will mark as Exhibit 4.

(Exhibit Number 4 was marked for identification.)

BY ATTORNEY MALONE:

Q. Do you recognize this document?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I do not recognize this document.

BY ATTORNEY MALONE:

Q. If I represent that this was produced by your attorney in response to our

document requests for your contracts in this case, do you have any reason to dispute that?

A. I have no knowledge one way or the other.

Q. Okay.

ATTORNEY ORTIZ: Just for the record, this is Bates CLJ-USA-G19 through it looks like 53.

BY ATTORNEY MALONE:

Q. And Dr. Ji, I would ask you to turn to the page Bates-numbered CLJ_USA_G_00044.

A. I'm there.

Q. And do you see Section 3.6 Labor Category on that page?

A. I do.

Q. Okay. And if you look at the middle column where it says Award Rate, it appears to be the hourly billing for record review, in-person consultation, deposition, and trial; is that right?

A. That looks correct.

Q. Okay. And if you'll actually go to the section just above that, 3.5, do you see where it says Funding?

A. I do.
Q. And it states: The contract ceiling/funding is $88,020.
Did I read that right?
A. That looks correct.
Q. Okay. Could you now turn to the page ending in 0052 of this document? Did you get there?
A. Yes.
Q. And if you look at the -- about halfway down on the left-hand side of the page where it says Funding Details, it says: Previous $88,020, change $5,000, current $93,020.
Did I read that right?
A. That looks correct.
Q. Just below that it says: The total invoices shall not exceed the ceiling/funding amount.
Did I read that right?
A. Oh, at the bottom. Yes, you did.
Q. Okay. To the best of your knowledge, has the funding ceiling been raised for your work in this litigation?
ATTORNEY ORTIZ: Object to form

and foundation.

THE WITNESS: I don't know any specific details. Originally, I was retained for nine plaintiff -- sorry, eight plaintiffs. The scope of my work increased to a total of 17 during the course of the trial. So it is possible, but I have no direct knowledge of how much the funding has changed.

BY ATTORNEY MALONE:

Q. Do you recall which nine plaintiffs you were originally retained to perform work on?

A. I do.

Q. Okay. Do you remember their names?

A. I can list you their names. They were the bladder cancer and renal cell carcinoma cases. It would be helpful if I had a copy of my report. But from memory it could be Mr. Cagiano, Criswell, Laramore, Dyer, Mr. and Mrs. It would be Fancher, Howard, Downs. Sorry. It's hard to recall these from memory.

Q. And that's okay. But your

original -- the original nine were the bladder cancer and the kidney cancer plaintiffs; is that right?

A. That's correct.

Q. Okay. When was your scope of work increased to cover 17 plaintiffs?

ATTORNEY ORTIZ: I'm just going to object. You can answer to the extent it doesn't get into privileged communications.

I'm fine with you asking about the scope of the task, but I don't want to get into the substance of communications.

BY ATTORNEY MALONE:

Q. And I just want to say throughout this entire deposition, I am never going to ask or try to get you to tell me anything that was discussed between you and your attorneys.

So without divulging any of those conversations, to the best of your recollection, when was your scope of work increased from 9 plaintiffs to 17 plaintiffs?

ATTORNEY ORTIZ: Are you asking about the date, just to clarify?

ATTORNEY MALONE: Yes.

ATTORNEY ORTIZ: Okay.

You can answer with the same instruction.

THE WITNESS: I really don't recall the exact date.

BY ATTORNEY MALONE:

Q. Okay. If you could turn to the page in the exhibit in front of you ending in 00042, just let me know when you get there.

A. I'm here.

Q. Okay. And the top of the page it says: Attachment number 2. Statement of Work (SOW).

Do you see that?

A. I do.

Q. Okay. Section 2.1 Contractor, it says: The contractor for this contract is Wang Ji; is that correct?

A. That's correct.

Q. Okay. Section 2.2 Scope under A says: Provide expert testimony, exposure

calculations, and reports in the field of toxicology.

Did I read that right?

ATTORNEY ORTIZ: Objection.

You can answer.

THE WITNESS: You read that correctly.

BY ATTORNEY MALONE:

Q. Have you ever been asked by the Department of Justice to provide exposure calculations and reports in the field of toxicology?

ATTORNEY ORTIZ: Objection.

You can answer.

THE WITNESS: My scope of work that I was retained was to provide damage assessment calculations and assessment calculations. The specific field was not stated, but it was for the scope of Camp Lejeune.

BY ATTORNEY MALONE:

Q. Okay. Are you an expert in exposure assessments?

ATTORNEY ORTIZ: Objection.

THE WITNESS: My expertise is in

medical care which includes all manner of medical diseases. I'm not a toxicologist.

BY ATTORNEY MALONE:

Q. Okay. You can put those to the side as well.

Dr. Ji, how many times have you worked as an expert witness in litigation?

A. I have -- in my experience, I've had three total cases prior to this.

Q. And in those three prior cases -- I'm sorry.

Does that include this litigation, or there were three before this litigation?

A. Before this litigation.

Q. Okay. Those three prior cases, do you recall whether you were retained by the plaintiffs or the defendants in those cases?

A. In two of the cases were by the defendants. One was by the plaintiff.

Q. And do you recall for each of those the circumstances of the litigation that you were retained in?

ATTORNEY ORTIZ: Objection. Form and foundation.

THE WITNESS: I recall the circumstances.

BY ATTORNEY MALONE:

Q. Okay. What were those circumstances?

ATTORNEY ORTIZ: Objection. Form and foundation.

THE WITNESS: For two of the cases, they were medical malpractice cases. In one case, it is currently under a confidentiality agreement I have; so I'm unable to provide any specific information.

BY ATTORNEY MALONE:

Q. Okay. In the two medical malpractice cases that you have previously worked as an expert witness, were you testifying for the defendants or for the plaintiffs?

A. I was testifying for the defendants.

Q. Okay. In any of your prior expert witness work, have you provided opinions on the value of past government health benefits?

ATTORNEY ORTIZ: Objection. Form and foundation.

You can answer.

THE WITNESS: Not for government benefits.

BY ATTORNEY MALONE:

Q. Have you ever provided expert opinions related to veteran's benefits?

ATTORNEY ORTIZ: Same objections.

THE WITNESS: Not for veteran's benefits.

BY ATTORNEY MALONE:

Q. Dr. Ji, with the caveat that I'm not asking for the contents of any attorney communications that you've had, what did you do to prepare for this deposition today?

ATTORNEY ORTIZ: You can answer to the extent you don't get into privileged communications.

THE WITNESS: I have reviewed my own report, the reports of the other experts, and the materials included on the materials -- sorry, the materials list.

///

BY ATTORNEY MALONE:
Q. Did you have any meetings prior to this to prepare?
A. I have.
Q. Okay. How many meetings did you have to prepare for the deposition today?
A. I don't recall an exact number but maybe about two meetings.
Q. Who were those meetings with?
ATTORNEY ORTIZ: You can answer to the extent you don't get into the substance of privileged communications.
THE WITNESS: With the DOJ.
BY ATTORNEY MALONE:
Q. Do you recall which DOJ attorneys you met with?
ATTORNEY ORTIZ: Same instruction.
THE WITNESS: The general DOJ team. I'm trying to recall because there's privilege in this case, but including the two attorneys here.
BY ATTORNEY MALONE:
Q. Were there other attorneys from the DOJ present besides the two attorneys who

are present here today?
A. There were.
Q. Do you recall their names?
A. I do.
Q. What are their names?
A. I'm assuming here that I'm allowed to provide names of the DOJ attorneys?
ATTORNEY ORTIZ: You can provide the names, just not the communications.
THE WITNESS: Okay. Joseph Turner and Michael Cromwell.
BY ATTORNEY MALONE:
Q. About how long were those meetings?
A. About an hour.
Q. I am handing you what we are going to mark Exhibit 5.
(Exhibit Number 5 was marked for identification.)
BY ATTORNEY MALONE:
Q. Do you recognize that document?
A. Yes, I do.
Q. Okay. What is it?
A. This is my expert opinion report.
ATTORNEY ORTIZ: Counsel, do you

have other copies? Is it just his report?

ATTORNEY MALONE: This is just his report. Sorry.

ATTORNEY ORTIZ: That's fine.

BY ATTORNEY MALONE:

Q. If you could turn to page 2 of Appendix B -- actually it's page 1 of Appendix B.

A. I'm here.

Q. And this appears -- is this your current CV?

A. Yes, it is.

Q. Okay. And let's turn to page 3 of your CV. Let me know when you're there.

A. I'm here.

Q. Okay. And so you graduated from medical school in 2010; is that right?

A. That's correct.

Q. Okay. And then you completed your residency in internal medicine in 2013; is that right?

A. That's correct.

Q. Okay. Did you complete any other residences or fellowships in any

subspecialties?
A. I did not.
Q. Doctor, you are a urological oncologist?
A. I'm not.
ATTORNEY ORTIZ: Objection.
You can answer.
THE WITNESS: I'm not.
BY ATTORNEY MALONE:
Q. Did you ever train as a nephrologist?
ATTORNEY ORTIZ: Objection.
You can answer.
THE WITNESS: I did not.
BY ATTORNEY MALONE:
Q. Okay. How about endocrinology?
ATTORNEY ORTIZ: Same objection.
You can answer.
THE WITNESS: I did not.
BY ATTORNEY MALONE:
Q. Hematology oncology?
ATTORNEY ORTIZ: Same objection.
THE WITNESS: I did not.
BY ATTORNEY MALONE:
Q. All right. Turn to page 1 of your

CV. Under current employment where it says associate medical director Los Angeles area, Healing Care Hospice, do you see that?

A. I do.

Q. What do you do in that role?

A. For this role, I perform patient visits to hospice patients. Typically home visits.

Q. How many patients do you see in that position?

A. In this position, a few a week. Maybe three or four patients a week.

Q. And the next one here is hospitalist at Verdugo Hills Hospital.

What do you do in that position?

A. In this position, I'm admitting and rounding on patients at the hospital.

Q. And how often are you rounding at Verdugo Hills Hospital?

A. On average about once a week.

Q. So how many patients weekly would that be?

A. It would vary but anywhere between 10 and 20.

Q. Down here it says clinical

physician at L.A. Department of Public Health.

Did I read that right?

A. That's correct.

Q. Okay. What do you do in that role?

A. In this role right now, I am seeing patients at the correctional facility.

Q. Is there a specific correctional facility where you work?

A. The Twin Towers.

Q. How often do you see patients at the Twin Towers Correctional Facility?

A. Also about once a week.

Q. Once a week. Okay.

So how many patients would you estimate you see a week there?

A. It would be about 20 patients.

Q. Okay. The next one on page 1 of your CV for employment says independent clinical reviewer for Commerce.ai and Acentra.

Did I read that right?

A. That's correct.

Q. Are Commerce.ai and Acentra, is that one company?

A. No, they're two separate.
Q. Two. Okay.
A. Two separate companies.
Q. And what is an independent clinical reviewer?
A. For this role, I review clinical documents and make determinations regarding the coding and clinical accuracy.
Q. What is the context of those reviews that you perform? Are they audits of other healthcare facilities?
ATTORNEY ORTIZ: Objection to form and foundation.
You can answer.
THE WITNESS: These are cases where the hospital and the payor are in dispute regarding whether the medical documentation supports the appropriate payment, and they need an expert clinician to review -- expert opinion from a clinician.
BY ATTORNEY MALONE:
Q. So Commerce.ai and Acentra, do they come in as third parties between the two, or are you retained by either the facility or

the payor?
A. They're third parties.
Q. Okay. So between the four -- I guess five positions that we just went through under your current employment, could you give a percentage breakdown of what you spend your time -- how you spend your work time between them?
A. Just as a rough estimate, about 50/50.
Q. So 50/50 between the independent clinical review and then all of your hospitalist clinician roles?
A. Correct. 60/40. 50/50. It varies by week but yes, roughly.
Q. And then what percentage of your time would you say you spend doing legal expert work like this?
A. For a small percentage. I typically only try to take one legal case per year just because it's very difficult schedule-wise, and I would have to clear out some of my other work to do this work. So most months very, very little, little to none legal work. When I'm working on the

legal work, it would be more.
Q. So just to understand your prior testimony, you split your time about 50/50 between independent clinical review and treatment of patients?
A. That's correct.
ATTORNEY ORTIZ: Objection to form.
BY ATTORNEY MALONE:
Q. Dr. Ji, are you a certified professional medical auditor?
A. I don't have that title. I am a medical expert insofact that I provide expert medical opinions as a physician.
Q. Are you a certified professional coder?
A. Again, I do not have that title of a professional coder.
Q. Are you a registered health information administrator?
A. I am not.
Q. Are you a certified fraud examiner?
A. I am not.
Q. Are you certified in healthcare compliance?

A. I am not.
Q. How much of your time do you spend coding?
ATTORNEY ORTIZ: Object to form and foundation.
You can answer.
THE WITNESS: Are you referring to personal coding of patients I've seen, or are you talking about reviewing coding and other coding-related matters?
BY ATTORNEY MALONE:
Q. Thank you for asking me to clarify that.
I'm talking about personal coding of patients you've seen.
A. I spend little to no time personally coding. I have in the past.
Q. Do you have a support staff that assists you in coding?
A. Yes. At my current positions, the support staff provide the coding.
Q. Okay. Do you review the coding that your support staff does on your behalf?
A. At my current position, I do not.

Q. Would you agree that human error can impact coding?

ATTORNEY ORTIZ: Objection to form and foundation.

THE WITNESS: Can you be more specific?

BY ATTORNEY MALONE:

Q. Okay. So when you've performed coding in the past, you have to you manually enter that coding; is that correct?

ATTORNEY ORTIZ: Objection.

THE WITNESS: In the past, yes.

BY ATTORNEY MALONE:

Q. And so it's possible -- is it possible that human error can result in incorrect coding?

ATTORNEY ORTIZ: Objection.

THE WITNESS: Can you be more specific? Are you referring to CPT codes or ICD codes or what?

BY ATTORNEY MALONE:

Q. ICD codes for starters.

A. ICD codes. ICD codes are -- can be affected by human error.

Q. How can they be affected by human

error?

ATTORNEY ORTIZ: Objection.

You can answer.

THE WITNESS: In the sense that the ICD codes should be extracted from a medical document, and it's possible that the wrong ICD code is entered whether by just incorrect data entry.

BY ATTORNEY MALONE:

Q. Are you familiar with the term "miscoding"?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I have -- I am familiar with the term.

BY ATTORNEY MALONE:

Q. Okay. What does it mean?

A. It's a general term for coding incorrectly.

Q. Are you familiar with the term "upcoding"?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I am familiar with the term.

BY ATTORNEY MALONE:

Q. What does that mean?

A. It means coding for more than services that was actually provided.

Q. How much of your time is spent auditing other providers' coding?

A. In regards to a total weekly amount of time?

Q. Yes.

A. It's about 20 percent of the time.

ATTORNEY ORTIZ: Are you about to do another exhibit?

ATTORNEY MALONE: Yes.

ATTORNEY ORTIZ: I just want to note for the record the deposition protocol requires four copies of each exhibit, and there wasn't four copies of the report, but I understand it's a large document. But I just wanted to note that for the record.

ATTORNEY MALONE: Okay. I'll hand you this one first, Doctor, what we'll mark as Exhibit 6.

(Exhibit Number 6 was marked for identification.)

BY ATTORNEY MALONE:

Q. Do you recognize this document?

A. I do.
Q. What is this document?
A. This is a materials considered list.
ATTORNEY ORTIZ: I'm sorry. Do you have a copy for counsel?
ATTORNEY MALONE: Yes.
BY ATTORNEY MALONE:
Q. And then I will also hand you what we'll mark Exhibit 7.
(Exhibit Number 7 was marked for identification.)
BY ATTORNEY MALONE:
Q. Do you recognize this document?
A. I do.
Q. Okay. So Exhibit 6 and Exhibit 7, are these all the materials that you read and reviewed in forming your opinions for your report?
ATTORNEY ORTIZ: Objection to form.
You can answer.
THE WITNESS: It is.
BY ATTORNEY MALONE:
Q. Okay. And you read each of the

documents that are listed in Exhibit 6 and Exhibit 7?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I did.

BY ATTORNEY MALONE:

Q. Dr. Ji, if I represented to you that there are approximately 140 reports, transcripts, and other documents in your materials considered list, do you have any reason to dispute that?

ATTORNEY ORTIZ: Objection to foundation and to form. Objection to foundation for Exhibit 7.

You can answer.

THE WITNESS: I'd have to count the exact number of documents, but I have no reason to dispute.

BY ATTORNEY MALONE:

Q. Okay. Doctor, on Exhibit 6 could you turn to the index there, the Bates ranges of medical records.

ATTORNEY ORTIZ: Is that page 11?

ATTORNEY MALONE: I believe that's where it starts, yes.

THE WITNESS: Yes, I'm here.

BY ATTORNEY MALONE:
Q. Okay. If I represented to you that the sum total of all those page ranges adds up to over 509,000 pages, does that sound about right?
ATTORNEY ORTIZ: Objection to form and foundation.
THE WITNESS: I didn't count the exact number of pages, but that's -- I would have no reason to object to that.
BY ATTORNEY MALONE:
Q. And you testified earlier that you -- you read and reviewed every single page of these materials considered lists?
ATTORNEY ORTIZ: Objection. That misstates the testimony.
THE WITNESS: I reviewed every single document in this list.
BY ATTORNEY MALONE:
Q. Dr. Ji, if you turn to page 3 of your report.
A. I'm sorry is this Exhibit 6 or Exhibit 5, the report?
ATTORNEY ORTIZ: Exhibit 5.

BY ATTORNEY MALONE:

Q. That would be Exhibit 5.

A. I'm sorry. You said page 6?

Q. Page 3.

A. Page 3. I'm sorry. I'm here.

Q. Okay. And do you see the subsection methodology for review of claimed medical expense damages?

A. Yes, I do.

Q. Okay. And here in that second full paragraph of page 3, you state: All charges asserted in Plaintiffs' Amended Damages Forms and supported by plaintiffs' expert Marjorie Hackett-Wallace were reviewed line-by-line for a clinical relationship to the claimed conditions based on the primary medical records.

Did I read that right?

A. That's right.

Q. Okay. So is it fair to say that your methodology for claimed medical expense damages was a review of Ms. Hackett-Wallace's report along with the damage assessment forms and medical billing records to determine the relatedness of

those claims?

ATTORNEY ORTIZ: Objection to form and foundation.

THE WITNESS: My methodology is as stated in my report. I did use Ms. Hackett-Wallace's damage assessment forms to determine which charges were being filed by claimants, by plaintiffs, and from there I reviewed them for relatedness.

BY ATTORNEY MALONE:

Q. Towards the bottom of page 3, I believe it's the second to last sentence, you write: In particular, I have significant clinical experience treating patients with the same conditions as those claimed by the 17 plaintiffs who were the subjects of this report.

Did I read that right?

A. Yes, you did.

Q. I'm not asking for a specific number. Generally, how many bladder cancer patients have you treated in your career?

A. It would be hard to estimate but likely in the hundreds.

Q. How about leukemia patients?
A. Again, very difficult estimate over my whole career but likely also in the hundreds.
Q. Non-Hodgkin's lymphoma?
A. Also likely in the hundreds.
Q. How many kidney cancer patients have you treated?
A. Likely also in the hundreds.
Q. Were you the primary specialist for those patients for their specific illnesses?
ATTORNEY ORTIZ: Objection.
THE WITNESS: When you say specialist, do you refer to the specialist for that specific disease or the -- I apologize. Primary in medicine may mean something different; so I was the primary doctor on many of the cases. But are you referring to am I the oncologist or the urologist in those cases?
BY ATTORNEY MALONE:
Q. That's correct. That's what I'm referring to.
A. I was not the urologist oncologist.

Q. Okay. If you could turn to page 4 of your report, Exhibit 5, and the second -- or the first full paragraph, the second sentence you write: The billed charges are the initial non-negotiated requests for payment, often derived from a hospital chargemaster, which are oftentimes many higher than the actual cost of care delivered.

Did I read that right?

A. That's correct.

Q. Okay.

ATTORNEY ORTIZ: I think you might have said oftentimes, and I think it says often many times higher than.

ATTORNEY MALONE: I apologize. It does say often many times.

BY ATTORNEY MALONE:

Q. Doctor, are non-negotiated requests for payment the actual amount that those without insurance have to pay?

ATTORNEY ORTIZ: Objection.

You can answer.

THE WITNESS: It's more complicated than that. This is the

requested amount for payment. I don't know on average how much the actual uninsured person would have to pay. It would depend on how much money they have, how much negotiation happens afterwards. So I'm unable to answer that question fully, but to the best of my knowledge, it's often not this exact amount.

BY ATTORNEY MALONE:

Q. Have you ever seen a situation where an uninsured patient does have to pay the non-negotiated amount?

A. I am unable to answer that question since I am never been the person to try to bill or collect payments for this. To the best of my knowledge, there's usually a process afterwards, but this is the requested amount of money.

Q. Who would be the person, in your words, that would I believe you said try to collect that amount of money?

A. It would be whichever entity is billing for them, whether it's the hospital or clinic. It would depend on the

situation.

Q. But that's not something you've ever done in your career?

A. No.

Q. Okay. So in that next sentence just after that you say: The actual payment or reimbursement to the provider or hospital is determined by the negotiated contract between the care provider and payor (typically an insurance company).

Did I read that right?

A. That's correct.

Q. Are insurance companies the only payors that you encounter?

A. No.

Q. Who are some other payors?

A. It would be complex, but a payor can be out of pocket. It can be an insurance company. It can be -- those are typically the two main payors contingent.

Q. Is Medicare a payor?

A. Yes, it is.

Q. In your experience, do the negotiated amounts -- strike that.

In your experience, can the

negotiated amount that is ultimately paid by the payor reflect that payor's negotiating power?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I have no opinion on the power or the negotiations. My report simply states the -- simply states that there is a negotiation, and there is a negotiated payment.

BY ATTORNEY MALONE:

Q. In your experience, does Medicare typically negotiate a lower reimbursement than private insurance?

ATTORNEY ORTIZ: Objection. Form and foundation.

THE WITNESS: I have no opinion on whether Medicare pays more or less compared to privates.

BY ATTORNEY MALONE:

Q. The last sentence of that paragraph says: The actual cost to the patient is often even more complex and may be reflected in payments to insurance (premiums), deductible payments, copayments, and any other payments not covered by

insurance.

Did I read that right?

A. That's correct.

Q. So is it your opinion that there are costs to the patient that wouldn't be captured in billing data alone?

ATTORNEY ORTIZ: Objection.

THE WITNESS: It's -- as I stated in my report, the actual amount that a patient has to pay is often different than what is paid through insurance.

BY ATTORNEY MALONE:

Q. If you'll turn your attention to the third full paragraph on page 4 of your report, Exhibit 5, it states: Plaintiffs' expert Marjorie Hackett-Wallace did not provide an opinion regarding the validity of billed charges versus reimbursed payments reflecting the cost of care of medical damages. While asserting no opinion regarding the validity of either approach, in my role assessing the accuracy of claims, I also used billed charges for consistency.

Did I read that correctly?

A. That's correct.

Q. So you're not offering an opinion that billed charges validly reflect the cost of care in medical damages?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I have no opinion on whether payments or bill charges is more accurate.

BY ATTORNEY MALONE:

Q. Okay.

ATTORNEY ORTIZ: JT, I don't know if you're coming up on a good time for a break. We've been going about an hour.

ATTORNEY MALONE: We can take a short break here. Is that's okay?

THE WITNESS: Yeah, sure.

THE VIDEOGRAPHER: The time is 9:59. Going off the record.

(Recess taken from 9:59 a.m. to 10:09 20 a.m.)

THE VIDEOGRAPHER: The time is now 10:09. Back on record.

BY ATTORNEY MALONE:

Q. Dr. Ji, we're back on the record after a short break, and I just had a couple

of follow-up questions about what we discussed earlier.

Have you ever opined in the past on offset damages?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I have not.

BY ATTORNEY MALONE:

Q. Dr. Ji, are you offering an opinion that these offset damages, as you call them -- strike that.

Dr. Ji, are you offering the opinion that these government payor damages are an offset or that they could be an offset?

ATTORNEY ORTIZ: Objection to from and foundation.

You can answer.

THE WITNESS: I am not offering an opinion on what the exact role of the offset. I was retained to provide an opinion on whether the government payments were related to the track 1 diseases in the record.

BY ATTORNEY MALONE:

Q. Is it fair to say that is the scope

of your role for the past medical billing as well, was to determine the relatedness?

ATTORNEY ORTIZ: Objection.

You can answer.

THE WITNESS: When you say "my role," do you mean the entirety or just part of my role?

BY ATTORNEY MALONE:

Q. Your role as we discussed in your methodology for claimed medical expense damages as you write on page 3 of your report.

ATTORNEY ORTIZ: Objection.

THE WITNESS: My role is to determine whether those damages were related to the track 1 diseases.

BY ATTORNEY MALONE:

Q. Dr. Ji, if you'll turn to page 5 of Exhibit 5, which is your report.

A. I am there.

Q. Okay. And the second to last paragraph, first sentence you write: In this review of government payment offsets, the reimbursed medical payments accurately reflect the government's financial payments.

Did I read that right?

A. Yes.

Q. So these amounts were incurred as a result of plaintiffs' alleged Camp Lejeune conditions and subsequent treatment?

ATTORNEY ORTIZ: Objection.

THE WITNESS: The -- I'm not providing an opinion on any relationship to Camp Lejeune or exposures. I am only opining on whether these payments were related to the track 1 diseases.

BY ATTORNEY MALONE:

Q. Okay.

(Clarification by the Certified Stenographer.)

BY ATTORNEY MALONE:

Q. And as part of that review, you are assuming that plaintiffs' phase 2 experts were correct for purposes of your review?

ATTORNEY ORTIZ: Objection to form and foundation.

THE WITNESS: As I stated in the reports for underage plaintiff, I make assumptions on assuming that the

plaintiffs were correct. These would be the related conditions.

BY ATTORNEY MALONE:

Q. So your assumption for purposes of each plaintiff is that the plaintiffs' experts were correct in their determination of primary and secondary conditions allegedly related to their track 1 illness?

ATTORNEY ORTIZ: Objection. Form and foundation.

You can answer.

THE WITNESS: For the purposes of the analysis, I assumed that they are correct and performed the analysis based on that assumption.

BY ATTORNEY MALONE:

Q. Still on page 5 of Exhibit 5 of your report here, methodology for review of claimed veterans benefits.

Do you see that?

A. Yes.

Q. Okay. Have you ever evaluated VA disability ratings in the past?

ATTORNEY ORTIZ: Objection.

THE WITNESS: No, not

specifically.

BY ATTORNEY MALONE:

Q. Have you ever been trained in evaluating VA disability claims?

A. No.

Q. Have you ever worked in any capacity at the VA?

A. I have not.

Q. What's your understanding of what VBA disability ratings percentages represent?

ATTORNEY ORTIZ: Objection. Form and foundation.

THE WITNESS: I have no specific opinion on the VBA percentages.

BY ATTORNEY MALONE:

Q. Okay. So you have no opinion on what disability rating percentages are based upon?

ATTORNEY ORTIZ: Objection.

THE WITNESS: My analysis is as stated in my methodology. It's for the relatedness of the condition. I have no opinion on the percentage itself.

BY ATTORNEY MALONE:

Q. Did you calculate the value of these VBA benefits?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I did not.

BY ATTORNEY MALONE:

Q. Did you calculate the future value of any of these benefits?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I did not.

BY ATTORNEY MALONE:

Q. Dr. Ji, I'm going to hand you what we have marked as Exhibit 8.

(Exhibit Number 8 was marked for identification.)

BY ATTORNEY MALONE:

Q. Do you recognize this document?

A. I do.

Q. Okay. What is it?

A. This is the rebuttal report from Marjorie Hackett-Wallace.

ATTORNEY ORTIZ: Do you have an extra copy, Counsel?

ATTORNEY MALONE: Let me check. I apologize. I don't know if I have one

in here. I do not. I'm sorry about that.

ATTORNEY ORTIZ: That's okay.

BY ATTORNEY MALONE:

Q. So Dr. Ji, if you could turn to page 5 of Marjorie Hackett-Wallace's rebuttal report?

A. I'm here.

Q. And in the first sentence -- this is Marjorie Hackett-Wallace for Mark Cagiano: I quantified $148,971.88 in medical billing expenses all incurred under the Tricare program. Of these expenses, $121,299.81 was confirmed by the defense expert, Wang Ji, MD, leaving a disputed amount of charges totaling $27,672.07.

Do you see that?

A. Yes.

Q. Okay. And I would just ask you to read the -- to yourself, just take a moment to reread the paragraph at the bottom of page 5 into page 6. Could you just read that and let me know when you've read that?

A. Okay.

Q. So having read that, would you

agree that the plaintiffs' expert, Marjorie Hackett-Wallace, agrees with your assessment of a past billed amount of $121,299.81?

ATTORNEY ORTIZ: Object to form and foundation.

You can answer.

THE WITNESS: Based on this, she makes no dispute over my value of the 121,299.81.

BY ATTORNEY MALONE:

Q. And if you will look at the second to last paragraph that says: The government further claimed additional offset damages for Medicare totally $11,941.

Did I read that right?

A. That's correct.

Q. And is that your opinion in this case?

ATTORNEY ORTIZ: Objection.

You can answer.

THE WITNESS: It's -- I will refer to my report. I do believe that number is correct.

BY ATTORNEY MALONE:

Q. And I should have mentioned, we'll

just be flipping between these two as we go through the plaintiffs; so please feel free to --

A. I have read --

Q. -- refer to this the report.

A. -- this report ahead of time. I do think the numbers are correct, but just for completeness, that is correct.

Q. And so that number reflects that Mr. Cagiano incurred at least that much in treatment charges relating to his alleged track 1 conditions, and Medicare would have paid those treatment costs?

ATTORNEY ORTIZ: Objection to form and foundation.

You can answer.

THE WITNESS: This indicates that Medicare did pay $11,941 for his track 1 diseases.

BY ATTORNEY MALONE:

Q. And so would that answer apply to all of the Medicare offsets that you identified?

ATTORNEY ORTIZ: Same objection.

THE WITNESS: Any Medicare offsets

identified does indicate it was payments for track 1 diseases.

BY ATTORNEY MALONE:

Q. And now we'll actually turn to page 8 of Exhibit 5, which is your report. I believe it's 5.

ATTORNEY ORTIZ: It is 5.

BY ATTORNEY MALONE:

Q. This will be page 8. And actually, I'm sorry. Page 9. Let me know when you're there.

A. Okay. I'm here.

Q. Okay. This is the section overall summaries of opinions related to Mr. Cagiano.

Do you see that?

A. Yes.

Q. And the third line from the bottom starts with: Total offsets were $35,447 between CMS (11,941), Tricare Institutional ($12,908), and Tricare Non-Institutional ($10,599).

Do you see that?

A. I do.

Q. With regard to the Tricare

institutional and Tricare non-institutional offsets, do those numbers reflect that Mr. Cagiano incurred that much in treatment charges that were paid for by Tricare?

ATTORNEY ORTIZ: Objection to form and foundation.

THE WITNESS: This indicates that out of the -- out of the Tricare data that I analyzed, those were the amounts that were paid by Tricare for the track 1 disease.

BY ATTORNEY MALONE:

Q. And does that answer apply to all the Tricare offsets that you've identified?

ATTORNEY ORTIZ: Same objection.

THE WITNESS: It just -- the Tricare offsets identified are the amounts paid by Tricare for the track 1 diseases.

BY ATTORNEY MALONE:

Q. To your knowledge, does Tricare -- strike that.

Do you know if Tricare patients pay premiums?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I have no knowledge of that.

BY ATTORNEY MALONE:

Q. What is your understanding of what Tricare is?

A. My understanding is that Tricare is a government agency that -- I'm sorry, government insurance that pays -- that covers the medical expenses of patients as an insurance agency.

Q. So it's a subsidized insurance plan essentially?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I have no knowledge of the specific subsidies.

BY ATTORNEY MALONE:

Q. Turning back to page 9 of your report, that same paragraph, last sentence, you write: Of note, the past paid medical expenses claimed by the plaintiff are billing charges while the government offsets are reimbursement payments.

Did I read that correctly?

A. That's correct.

Q. Were you provided with the billing

charges?

ATTORNEY ORTIZ: Objection.

You can answer.

THE WITNESS: The task I was given was to analyze the government payments. I don't recall if specific billing data was provided, but I did not analyze it specifically.

BY ATTORNEY MALONE:

Q. And you don't recall if you were provided with that data?

ATTORNEY ORTIZ: Objection.

THE WITNESS: To the best of my knowledge, I do recall there were some billing data as well, but I was tasked to analyze payment data.

BY ATTORNEY MALONE:

Q. Did you quantify the patient paid amount of the Tricare charges?

ATTORNEY ORTIZ: Objection to foundation.

THE WITNESS: I was not provided the data for patient payments.

BY ATTORNEY MALONE:

Q. Were you provided with the data to

quantify the patient payments?

ATTORNEY ORTIZ: Objection.

THE WITNESS: To the best of my recollection -- I'm sorry. By patient payments, are you referring to out-of-pocket payments or premiums or . . .

BY ATTORNEY MALONE:

Q. Let's start with premiums.

A. No, I was not provided that information.

Q. Out-of-pocket payments?

A. Not provided that information.

Q. So you didn't have the ability to quantify patient paid in terms of out of pocket or premiums?

ATTORNEY ORTIZ: Objection to form and foundation.

You can answer.

THE WITNESS: No, I did not have that information.

BY ATTORNEY MALONE:

Q. Staying on page 9 of your report, footnote 9, you write: Although my opinion is the plaintiff's prostate cancer and

sciatic peripheral neuropathy are medically unrelated to his UTUC, the plaintiff specifically received VBA benefits for his prostate cancer and sciatic peripheral neuropathy as related to his purported Camp Lejeune exposures.

Did I read that right?

A. That's correct.

Q. You go on to write: I am not offering -- sorry.

I am not offering any opinion that his prostate cancer and sciatic peripheral neuropathy is medically related to or caused by his Camp Lejeune exposures.

Did I read that right?

A. That's correct.

Q. Do you have any opinion on if the VBA was correct or incorrect in relating to Mr. Cagiano's prostate cancer and sciatic peripheral neuropathy to his purported Camp Lejeune exposures?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I have no opinion regarding the exposures at Camp Lejeune.

BY ATTORNEY MALONE:

Q. Do you have any opinion whether the VBA was correct or incorrect in its relatedness determination?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I have no opinion.

BY ATTORNEY MALONE:

Q. Staying in footnote 9, page 9 of your report, you write: However, I am noting these conditions were identified by the VBA as being in connection with Mr. Cagiano's purported Camp Lejeune exposures and would thus presumably be included in any kind of offset calculation as constituting a disability award provided to Mr. Cagiano in connection with his purported Camp Lejeune exposures.

Did I read that right?

A. That's correct.

Q. Why would they presumably be included in any offset calculation?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I have no knowledge of why they would be included.

///

BY ATTORNEY MALONE:
Q. Were you asked to presume they would be included?
ATTORNEY ORTIZ: Objection. Draft reports are privileged.
THE WITNESS: I was not asked. I was only -- I am only giving my own opinions.
BY ATTORNEY MALONE:
Q. Okay. Let's turn back to the Marjorie Hackett-Wallace report, page 6. Let me know when you're there.
A. Okay. We're here.
Q. Number 2 you see it says Criswell, Jefferson near the bottom of the page.
Do you see that?
A. I do.
Q. Okay. And in the first sentence Marjorie Hackett-Wallace writes: For Michael Criswell, I identified $202,674 in medical billing expenses. Of these expenses, all expenses were confirmed to be related by the defense expert, Wang Ji, MD, leaving a disputed amount of zero dollars.
Do you see that?

A. Yes, I do.
Q. Do you agree with that statement?
ATTORNEY ORTIZ: Objection.
You can answer.
THE WITNESS: Again, just for completeness sake I'll refer to my report.
BY ATTORNEY MALONE:
Q. Sure.
A. I do believe that is correct. Yes.
Q. Okay. And then the following sentence: I quantified $40,321.44 in past paid medical and $13,321.05 in patient payments totaling $53,642.49. The paid past medical expenses and patient payment totals were not disputed.
Did I read that right?
A. That's correct.
Q. Are you disputing the paid past medical expenses and patient payment totals with regard to Mr. Criswell?
ATTORNEY ORTIZ: Objection to foundation.
THE WITNESS: I was not tasked to provide analysis on the patient

payments or the total paid amount; so I have no opinion on that matter.

BY ATTORNEY MALONE:

Q. Does that answer apply to all 17 plaintiffs that you evaluated?

ATTORNEY ORTIZ: Same objection.

THE WITNESS: Correct. I was not -- I did not perform analysis on payments or patient private payments.

BY ATTORNEY MALONE:

Q. Turn to page 7 of Marjorie Hackett Wallace's report. And I will direct you down to Section 2(a) of the report.

Do you see that?

A. I do.

Q. Okay. And it states: Dr. Ji alleged that certain charges were unrelated to the claimed conditions related to two dates of service for the plaintiff. 6/27/2014 and 12/2/2015. For the reasons stated below, I disagree with all disputed relatedness determinations made by Dr. Ji.

Do you see that?

A. I do.

Q. And I can just -- I'll just ask

you, could you just please, to yourself, reread 2(a), and just let me know when you've finished reading that.

A. I will.

Q. Okay.

A. Okay.

Q. So having reread that portion of Ms. Hackett-Wallace's report, do you agree with her assessment there?

A. I do not.

ATTORNEY ORTIZ: Objection to form and foundation.

BY ATTORNEY MALONE:

Q. Why do you disagree?

A. My opinion is as stated in my report, which I will refer to on page -- Exhibit 5, page 24. And it is still my opinion that these two charges were not related to the track 1 disease.

Q. Dr. Ji, I'm handing you what we'll mark as Exhibit 9.

(Exhibit Number 9 was marked for identification.)

BY ATTORNEY MALONE:

Q. Which is Bates number

0357_Dyer_0000000029.

Are you familiar with this document?

A. I am.

Q. Okay. What is it?

A. This is the medical documentation from the emergency department regarding the ER visit on June 27, 2014.

Q. Okay. If you would turn to the page ending in 35.

A. I am here.

Q. Do you see up at the top of the page the section titled ED course and medical decision-making?

A. I do.

Q. Okay. And here the provider writes: Patient's well-appearing here in the emergency department. She does have very mild right upper quadrant tenderness. She received ultrasound does show gallstones but no acute chole.

I'm probably mispronouncing it?

A. Chole.

Q. Chole. Thank you, Doctor.

Patient's primary care physician

did call with positive urine culture results. At this point, we will go ahead and treat the urinary tract infection.

Did I read that correctly?

A. That's correct.

ATTORNEY ORTIZ: It says recent ultrasound, not received ultrasound.

ATTORNEY MALONE: I apologize.

That is correct.

BY ATTORNEY MALONE:

Q. Dr. Ji, are UTIs common in bladder cancer patients who have undergone cystectomies?

A. In patients with ileal conduits, they are common.

Q. To your knowledge, did Ms. Dyer have an ileal conduit?

A. She did.

Q. Is it your opinion that treatment of a UTI is unrelated to an ileal conduit?

A. It is -- it depends on the medical circumstance in its entirety.

Q. What medical circumstances does it depend on?

A. I will try to not be overly

technical, but an ileal conduit predisposes to having bacteria in the tract. At times this can be an infection. At times it's what we call colonization where bacteria will live there simply because it's an unusual surface for that area.

And in this case, the treatment for a urinary -- first, one must consider whether this is truly a urinary tract infection, and secondly, whether this was caused by the ileal conduit. So depending on the totality of lab results, cultures, and the entire workup, at times they may be related. At times they may be colonization.

Q. So is it your opinion that for this date of service, the UTI was unrelated to the ileal conduit?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I have no major opinion on whether the UTI was related to the ileal conduit in this case. I am simply stating that the ER course, its entirety, is primarily for reasons other than the UTI.

///

BY ATTORNEY MALONE:

Q. So you have no major opinion about the UTI's relatedness to the ileal conduit.

Do you have any opinion about the UTI's relatedness to the ileal conduit?

ATTORNEY ORTIZ: Objection to form.

You can answer.

THE WITNESS: In most of the cases for Ms. Dyer, the UTI is related to the ileal conduit. And I do believe in this case, the UTI is related to the ileal conduit, but I also believe that this is not the primary reason for this ER visit.

BY ATTORNEY MALONE:

Q. Was Ms. Dyer's UTI one of the reasons for this hospital visit?

A. The primary reason for this hospital visit was she was experiencing pain in her upper abdomen, the RUQ, right upper quadrant pain as stated in page 1 of Exhibit -- I apologize. This is Exhibit 9. The patient stated Dr. William Hope, who is a general surgeon -- Dr. William Hope wants

to be called when I'm here. This is her general surgeon.

She had a urinary tract infection which is accurate, but as stated in the documentation, her primary care doctor had already received a culture, had already placed her on antibiotics, and already had the sensitivities for that culture which would not require a person to go to the ER for a urinary tract infection. The primary reason would then be for the right upper quadrant pain necessitating the general surgeon to evaluate her.

Q. So is it your opinion that for this date of service, Ms. Dyer did not receive any treatment for a UTI?

ATTORNEY ORTIZ: Objection.

THE WITNESS: She did receive treatment, but it did not have to take place in the ER setting.

BY ATTORNEY MALONE:

Q. But it did take place in the ER setting; correct?

A. It did take place in a ER setting because she happened to be in the ER for a

different significant reason.

Q. Okay. You can put that aside, Doctor. Thank you.

Doctor, I'm going to hand you what we'll mark as Exhibit 11. Do you recognize this document as --

ATTORNEY ORTIZ: Should it be Exhibit 10?

ATTORNEY MALONE: I am so sorry. We skipped a sticker.

ATTORNEY ORTIZ: You can make it 11 if you want.

ATTORNEY MALONE: We can make it 11. That's fine.

(Exhibit Number 11 was marked for identification.)

THE WITNESS: I do.

BY ATTORNEY MALONE:

Q. And what is this document?

ATTORNEY ORTIZ: I'm sorry. Do you have a copy for counsel?

ATTORNEY MALONE: I'm so sorry. I believe I don't have an extra copy.

THE WITNESS: This is the discharge summary for a

hospitalization from December 2, 2015, to December 3, 2015.

BY ATTORNEY MALONE:

Q. And on the middle of the first page there with -- where it says Admission Diagnoses.

Do you see that?

A. I do.

Q. And it says: Other chest pain, UTI, lower urinary tract infection, chest pain.

Did I read that correctly?

A. That's correct.

Q. And below that it says: Discharge Diagnoses, atypical chest/flank pain -- chest/flank pain, with low risk stress test, recurrent UTI.

Did I read that right?

A. That's correct.

Q. Okay. And I think we went over this with the prior medical record, but is it your opinion that Ms. Dyer's treatment for UTI on this date of service was related to her ileal conduit?

ATTORNEY ORTIZ: Objection to

form.

You can answer.

THE WITNESS: I believe so.

BY ATTORNEY MALONE:

Q. But it is also still your opinion that this date of service -- the charges for this date of service were not related to her track 1 illness?

A. That is correct.

Q. You can set that to the side.

I'm going to hand you what we're marking as Exhibit 10.

(Exhibit Number 10 was marked for identification.)

BY ATTORNEY MALONE:

Q. Do you recognize this document?

A. I do.

Q. What is it?

A. This is a letter from Dr. Longo regarding Ms. Dyer.

Q. Have you reviewed this letter recently?

A. I have.

Q. Okay. And please take your time if you need to review it again, but I would

just ask, you know, if you have reviewed it, do you disagree with Dr. Longo's assessment here?

A. I disagree with parts of it. Dr. Longo's absolutely correct that Ms. Dyer had -- Mrs. Dyer had a UTI in both cases. However, when we're determining the relatedness of a disease in regards to a hospitalization, the disease must be significantly the reason for the hospitalization. In the same way that if a person happened to have diabetes but went to the hospital for a broken leg, you would not say that the hospitalization was related to the diabetes. It would be for the broken leg.

So in this case -- in both cases, Mrs. Dyer has frequent urinary tract infections very frequently, and while she did go to the hospital having a urinary tract infection, that was not the primary reason that she was in the hospital.

As an internal medicine doctor, I will say that we do see chronic diseases and recurrent diseases all the time in the

hospital. And when we treat the patient in the hospital, we take the totality of their medical conditions, and we have to identify which are the reasons for their hospitalization.

I will also point out that in both cases, a urologist was not consulted for the hospitalization, and she was not specifically managed for the UTI as a primary reason for her hospitalizations.

Q. Okay. So it's your opinion that although she was treated for a UTI during these two hospital visits, because it was not the primary reason for the hospital visit, it's, therefore, unrelated for purposes of your analysis?

ATTORNEY ORTIZ: Objection.

THE WITNESS: When we analyze patients for hospitalizations, the medical condition has to be related to one of the primary reasons for the hospitalization. The hospital will certainly not ignore other conditions the patient is having at the time, but if not for another condition,

Mrs. Dyer would not have to go to the hospital for that condition. In other words, if it were not for her right upper quadrant pain and if it were not for her chest and flank pain, she would not have to be at the hospital if just for the UTI.

BY ATTORNEY MALONE:

Q. But she incurred charges for treatment of the UTI at this visit; is that right?

ATTORNEY ORTIZ: Objection.

THE WITNESS: Treatment of the UTI was a small portion of the total treatment that she had. As I previously stated, this hospital certainly would not ignore her urinary tract infection while she was at the hospital. That would be inappropriate.

But regarding the workup, the UTI constituted a very small amount of her total workup and treatment. Typically, some urine tests and antibiotics. So I did not quantify

the exact amount, but it would be presumably a very small percentage of her treatments.

BY ATTORNEY MALONE:

Q. But it would be some percentage of this treatment?

A. I would classify it as an insubstantial percentage of the treatment.

Q. So if Ms. Dyer did not have the UTI present during these two hospital visits, her charge -- or her medical bills would have been lower for these two visits?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I am unable to quantify that in part because I do not recall off the top of my head how her bills were processed. For example, if it was a bundled payment charge, it may not be different at all.

BY ATTORNEY MALONE:

Q. Turning back to page 8 of the Marjorie Hackett-Wallace report, let me know when you get there.

A. Yes, we're here.

Q. Okay. The heading number 4

Laramore, Jimmy Carroll.

Do you see that?

A. I do.

Q. And in the second sentence it states: Despite no past medical damages being claimed by the plaintiff, the government claimed the following offset damages: VHA indirect and direct costs totaling $670 or VHA direct costs only totaling $304.

Did I read that right?

A. That's correct.

ATTORNEY ORTIZ: Just for the record, that's not the full sentence.

ATTORNEY MALONE: Okay.

BY ATTORNEY MALONE:

Q. Just talking about these VHA costs for a moment, did these amounts reflect that Mr. Laramore incurred charges of at least $304 that you found related to his track 1 disease that were paid for by VHA?

ATTORNEY ORTIZ: Objection form and foundation.

THE WITNESS: I'm just simply stating in that VHA did pay that

amount of dollars for the track 1 disease.

BY ATTORNEY MALONE:

Q. Okay. And is that true for all the VHA costs you identify throughout your report?

ATTORNEY ORTIZ: Same objection.

THE WITNESS: Regarding offset costs. If I identify an offset from VHA, that is -- that is stating that VHA provided that payment for track 1 disease.

BY ATTORNEY MALONE:

Q. What's your understanding of the difference between direct and indirect VHA costs?

A. While I have no specific detailed knowledge, direct costs are typically what we consider variable costs. Indirect costs may include typically fixed costs such as building payments, things that may not be directly related to the care. But I have no specific knowledge of what this entails.

Q. Okay. Do you have any opinion on whether direct or indirect costs more

accurately reflect the cost of Mr. Laramore's treatment?

A. I have no opinion.

ATTORNEY ORTIZ: Objection. Foundation.

BY ATTORNEY MALONE:

Q. And are you offering any opinion on whether VHA direct or indirect costs should be used in determining an offset calculation?

ATTORNEY ORTIZ: Object to foundation.

THE WITNESS: I have no opinion.

BY ATTORNEY MALONE:

Q. Okay. Following a semi column in the sentence we just discussed, it states: TriWest/CCN totaling $31,010 for a total alleged offset of $31,314 (VHA direct costs) or $31,680 (VHA indirect and direct.)

Did I read that right?

A. That's correct.

Q. Okay. So with regards to the $31,010 for TriWest/CCN, is that the amount that you found for Mr. Laramore? And you can refer to your report if you need to.

A. Just for completeness sake, that is correct.

Q. And so what does that amount represent?

A. This again represents the total amount of government payment for the track 1 disease in these specific payors.

Q. And would that be true for all of the TriWest/CCN alleged offsets you identify in your report?

ATTORNEY ORTIZ: Object to form.

THE WITNESS: As I stated previously, the -- these payments are the amounts identified related to the track 1 diseases from each individual payor.

BY ATTORNEY MALONE:

Q. We've been going about an hour. Do you guys want to take a 10-minute break?

ATTORNEY ORTIZ: Sure.

THE VIDEOGRAPHER: The time now is 11:00 a.m. We're going off the record.

(Recess taken from 10:59 a.m. to 11:12 25 a.m.)

THE VIDEOGRAPHER: The time is now 11:12. Back on the record.

BY ATTORNEY MALONE:

Q. Dr. Ji, we're back from a short break, and I just wanted to circle back to Exhibit Number 10.

Could you pull that out?

A. Sorry. Exhibit 10 is?

ATTORNEY ORTIZ: Is 10 Dr. Longo's letter?

BY ATTORNEY MALONE:

Q. It should be the letter from Dr. Longo.

A. Yes, I have it here.

Q. On the first page in the third paragraph, he writes towards the middle here: Patients with an ileal conduit, like Mrs. Dyer, are at a higher risk of bacteria entering the urine and refluxing to the kidneys. When this happens, patients often experience symptoms similar to that of Mrs. Dyer, including fever and chest pain.

Did I read that correctly?

A. You read that correctly.

Q. Do you disagree with Dr. Longo's

statement here?

A. I disagree for the specific instance. In this case -- Dr. Longo is correct that patients with ileal conduit are at a higher risk for urinary tract infections, and urinary tract infections that do -- that can get progressively worse can present with what we call pyelonephritis where the infection gets to the kidneys in which case it can cause fevers and pain all the way up to the side and the flank as we call it.

In this case, however, which I will just refer to the medical records, she had received a CAT scan, CT scan, which showed no infection of the kidneys. The infection was isolated to the bladder, to the urine. And simple -- what we call simple or localized urinary tract infections like this typically almost never present with chest pain or flank pain.

So this would not explain why she had to undergo cardiac testing, including stress tests, which was the majority of her hospitalization.

Q. During your review of Mrs. Dyer's medical records, did you consult with any urologic oncologists?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I did not.

BY ATTORNEY MALONE:

Q. Did you consult with any specialists for any of the plaintiffs' medical records review that you performed?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I did not.

BY ATTORNEY MALONE:

Q. You can put that to the side.

A. Okay.

Q. Doctor, if you could pull out Exhibit 6, your materials considered list.

A. I am ready.

Q. And on page 10 under document productions, let me know when you get there.

A. Yes, I'm here.

Q. Okay. The first one there, the Bates number is CLJ_Tricare_0000000001 through 55.

Do you see that?

A. I do.

Q. Do you recall what that document is?

ATTORNEY ORTIZ: Objection. If you're going to ask him about a specific document, I'd ask that you show it to him.

THE WITNESS: I don't recall the specific contents. As best as I can recall, this is Tricare data. I believe it's an Excel spreadsheet.

BY ATTORNEY MALONE:

Q. Do you recall what was contained within that data?

ATTORNEY ORTIZ: I'm just going to object. If you're going to ask him about a detailed spreadsheet, I'd ask that you show it to him.

THE WITNESS: Yeah, I don't recall the specific spreadsheet.

BY ATTORNEY MALONE:

Q. Okay. You can put that to the side, Doctor.

Turning back to Exhibit 8, which is the rebuttal expert opinion report of Marjorie Hackett-Wallace, go to page 9,

please.

A. I'm here.

Q. Okay. And for heading number 1, Mousser, Frank Wayne, she writes: For Frank Mousser, I quantified zero dollars in medical billing expenses. Despite no past damages being claimed by plaintiff -- by the plaintiff, the government claimed the following offset damages: VHA indirect and direct costs totaling $62,854 or VHA direct costs totaling $43,801 VHA totaling $43,801, for an alleged offset of $43,801 (VHA direct only) or $62,854 (VHA direct and indirect costs).

Did I read that right?

A. That's correct.

Q. Okay. And if you need to, you can refer to your own report. But are those, in fact, the amounts that you found?

A. For completeness, I will just double-check, but that is correct.

Q. What's your understanding of how VHA direct and indirect costs are derived?

ATTORNEY ORTIZ: Objection. Asked and answered.

You can answer.

THE WITNESS: I have no specific knowledge of how they derive these costs.

BY ATTORNEY MALONE:

Q. Continuing on page 9 under Section 2, Howard, Allan W., the second paragraph Ms. Hackett-Wallace writes: After review, I reduced the amount of medical billing expenses to the amount confirmed by the defense expert, Wang Ji, MD, and have amended my totals accordingly to reflect $839,455 in charges verified by the experts for both parties to be related to the conditions claimed.

Did I read that right?

A. That's correct.

Q. Okay. And once again, if you need to refer to your own report, please do so. But is that, in fact, the amount in charges that you verified?

A. That is correct.

Q. Okay.

A. I will just say that I did not quantify the amount of payment data, only

the billed charges for the past medical expenses.

Q. And that's the case for all the plaintiffs; correct?

A. That's correct.

Q. Okay. Turn to page 10 of the same exhibit here, headline section number 3, Fancher, David W.

Do you see that?

A. Yes.

Q. Okay. The second sentence: Of these expenses, $6,475.30 was confirmed by the defense expert, Wang Ji, MD, leaving a disputed amount of charges totaling zero dollars.

Do you see that?

A. I do.

Q. Okay. Is that, in fact, the amount of expenses you confirmed?

A. That is correct.

Q. Okay. Going down to Section 4, Downs, David, second sentence again she writes: Of these expenses, $49,971.61 was confirmed by the defense expert, Wang Ji, M.D., leaving a disputed amount of charges

totaling zero dollars.

Do you see that?

A. I do.

Q. And is that, in fact, the amount that you confirmed for Mr. Downs?

A. That is correct.

Q. Turn to page 11, same exhibit here, Section 5, Tukes, Jacqueline.

Do you see that?

A. I do.

Q. And if you'll actually turn to the next page, second paragraph.

A. Okay. Page 12?

Q. That's right.

A. Yes.

Q. Second paragraph: Further, after review, Plaintiffs agreed to the disputed medical billing expenses identified by Dr. Ji in the amount of 3,478.

Did I read that right?

A. That's correct.

Q. So is it your understanding that following your review, there's no dispute of the past billed medical expenses for Ms. Tukes?

ATTORNEY ORTIZ: Object to form.

THE WITNESS: It appears there's no dispute over the values that I have produced.

BY ATTORNEY MALONE:

Q. If you'll turn to page 13 staying in this exhibit, the section titled: Leukemia Plaintiffs, number 1, Amsler, Karen.

Do you see that?

A. I do.

Q. I would just ask you to review the second paragraph of Section 1 and just let me know when you've had a chance to --

A. Is this where it begins "based upon my review of the amounts"?

Q. That's correct.

A. Okay. I reviewed it.

Q. So after your review, do you still -- sorry. Do you agree with Ms. Hackett-Wallace's assessment regarding those charges?

A. I did review this after receiving this, and I do agree with her that this was a simple accounting error on their part

regarding the -- where it states: The total amount is correctly calculated as follows.

Q. And will you be providing an amendment to your report to reflect that?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I will refer to my counsel.

ATTORNEY ORTIZ: His testimony is the supplement.

BY ATTORNEY MALONE:

Q. Staying on page 13, Section 2, Connard, Stephen.

Do you see that?

A. I do.

Q. And the second paragraph: Dr. Ji disputed $3.97 related to a data entry error. I agree to Dr. Ji's assessment regarding the charge amount for the University of Maryland Medical Center date of service 11/9/2001 wherein the charges were overstated by $3.97.

Do you see that?

A. Yes, I do.

Q. So do you agree there is no dispute here between you and Ms. Hackett-Wallace

regarding these charges now?

A. I agree with the -- I see no contradiction; so I agree.

Q. Turn to page 14 of the report, the next page here. It begins on the prior page, but this is for Joseph Gleesing.

Do you see that?

A. I do.

Q. Okay. And I would just ask you to briefly review Section 1(c) on page 14, and just let me know when you've had a chance to review that.

A. Okay. I've reviewed it.

Q. Okay. Do you agree with Ms. Hackett-Wallace's assessment there?

A. I disagree with her assessment for this date.

Q. And why do you disagree?

A. For the -- I apologize. I'm going to refer to my own report for this particular date which should be -- this is Exhibit 5, page 62. And it would be under 8(b) for the related work, Section 8, for the related charge. In this case, I have reviewed her rebuttal and have reviewed the

source material. And after reviewing all the data, I did not see any issue with the number identified, the $15,560.65 as opposed to 15,800.

Q. Doctor, I'm handing you what we will mark Exhibit 12.

(Exhibit Number 12 was marked for identification.)

BY ATTORNEY MALONE:

Q. Do you recognize this document?

A. I do.

Q. Okay. What is it?

A. This is a list of charges for Karen Amsler.

Q. You know what? I handed you the wrong one.

A. I was going to say.

Q. I'm sorry about that. I just realized that. I got out of order there. You can set that to the side. We don't need it.

Let's try this again. I'm going to hand you what we will mark as Exhibit 13.

(Exhibit Number 13 was marked for identification.)

BY ATTORNEY MALONE:

Q. Do you recognize this document?

A. I do.

Q. Okay. What is it?

A. It's a list of charges for prescription drugs.

Q. Okay.

A. For Mr. Gleesing.

Q. And please feel free to review this, but do you believe that these charges are overstated as they are laid out here?

ATTORNEY ORTIZ: Give him a second to review it, please.

ATTORNEY MALONE: Sure.

ATTORNEY ORTIZ: And are you going to come back to 12, or should we set it aside?

ATTORNEY MALONE: I'm not. You can set it aside.

ATTORNEY ORTIZ: Dr. Ji, when you're done, just let us know.

THE WITNESS: Well, I reviewed this document. This was only a United Healthcare bill for prescription drugs. This did not contain enough

information to determine the relatedness of prescription drugs for the patient. I will have to -- I don't recall off the top of my head which document. It would be in my report. But we -- but this bill alone does not -- of a generic description of prescription drugs, quote/unquote, would not be sufficient to provide relatedness to a track 1 condition.

BY ATTORNEY MALONE:

Q. Okay. So you stand by your opinion disputing the amount between yourself and the amount alleged by plaintiffs' expert?

A. That's correct. I do not believe that this -- that the cited Exhibit 13, which was cited in Ms. Marjorie Hackett-Wallace's report is sufficient to provide any information about relatedness.

Q. Okay. Returning to page 14 of Exhibit 8, Hackett-Wallace's rebuttal report, are you still there?

A. Yes, I am.

Q. Okay. First paragraph, the final sentence: The government claimed the

following additional offset damages: VHA indirect and direct costs totaling $1,743 or VHA direct costs totaling $879; Medicare totaling $16,835; Tricare totaling $115, for an alleged total offset of $17,829 (VHA direct costs only) or $18,693 (VHA direct and indirect costs).

Did I read that correctly?

A. That's correct.

Q. Okay. And is that statement correct with regards to your findings for this plaintiff?

A. Just for completeness, I do believe they are correct, but let me verify. I'm sorry. I was looking at the wrong page. That is correct.

Q. With respect to Tricare, your Tricare offset, you have no reason to disagree with billed amounts or patient pay amounts for Tricare for this plaintiff?

ATTORNEY ORTIZ: Objection.

BY ATTORNEY MALONE:

Q. Is that right?

ATTORNEY ORTIZ: Objection.

THE WITNESS: For Mr. Gleesing, I

did not calculate for the purposes the patient paid amounts. Again, for patient paid amounts, are you referring to hospital paid -- I'm sorry, Tricare paid amounts to the hospital or patient paid amounts?

BY ATTORNEY MALONE:

Q. Patient paid amounts.

A. As in premiums?

Q. Uh-huh.

A. I did not perform any analysis on patient paid amounts.

Q. And billed amounts?

A. And for billed amounts, I did not perform an analysis for that purpose of offsets for billed amounts.

Q. Did you perform that analysis with respect to Tricare for any plaintiff?

ATTORNEY ORTIZ: Objection.

You can answer.

THE WITNESS: For the purposes of offsets, I did not. I did evaluate billed amounts for past medical expenses for Tricare.

///

BY ATTORNEY MALONE:

Q. Okay. Let's turn to page 15 of the same exhibit, Section 4, Hill, Bruce.

Do you see that?

A. I do.

Q. Okay. Second sentence she writes: Despite no medical damages being claimed by the plaintiff, the government claimed the following additional offset damages: VHA indirect and direct costs totaling $244,881 or VHA direct costs totaling $142,727; Medicare totaling $1,777, for a total alleged offset (VHA direct costs only) of $144,504.

Did I read that right?

A. That's correct.

Q. And is that, in fact, your assessment for this plaintiff?

A. That's correct.

Q. Let's turn to page 16 still on Exhibit 8. And Section 1 says: Carter, Ronald Lee.

Do you see that?

A. I do.

Q. Okay. And I would direct you down

to Section 2. If you could just reread that to yourself, and you let me know when you've -- a chance to review that.

A. Okay. I've reviewed it.

Q. And having reviewed Hackett-Wallace's assessment there, do you agree with her assessment?

A. In regards to her assessment that this is related, I disagree, although some of the facts of her statement are correct.

Q. Actually, I'll ask you to first also could you review Section 3 on that same page of 16 on Exhibit 8, please.

A. Okay. Okay. I've reviewed it.

Q. Okay. Do you agree with Hackett-Wallace's conclusions and assessments in that section?

A. I disagree with her conclusion that this appears to be related to the plaintiff's track 1 disease.

Q. And then I'll also ask you now to review Section 4 just below that, and let me know when you've had a chance.

A. I'm done reviewing.

Q. Okay. And do you agree with

Hackett-Wallace, her assessment in that section?

A. Again, I disagree that this is related to her track 1 disease although she did not specifically state that in this case. I do agree that the visit was for an infection.

Q. Okay. So I am going to hand you what we will mark as Exhibit 14.

(Exhibit Number 14 was marked for identification.)

BY ATTORNEY MALONE:

Q. Do you recognize this document?

A. I do.

Q. And you can read -- flip through and review this. What is this document?

A. These are primary care visits for Mr. Ronald Carter.

Q. All right. And if you will turn to page Bates number ending in 5878, and let me know when you're there.

A. Okay. I'm here.

Q. And do you see the encounter date up at the top left of this document?

A. This is for December 15, 2015.

Q. Okay. And it says under history of present illness: 67-year-old gentleman comes in with his wife provider wish and respiratory infection characterized by fever.

Did I read that right?

A. That's correct.

Q. Okay. And then I will direct you to the page number ending in Bates 5880.

A. Okay.

Q. And this is a continuation of the active problems list. For number 27, do you see what problem is listed there?

A. Number 27 is listed as mantle cell lymphoma.

Q. Okay. I would now ask you to go to the page ending in Bates number 5874. Let me know when you're there.

A. Okay. I'm here.

Q. And the third paragraph under history of present illness -- actually, I'm sorry.

Do you see the encounter date up at the top there?

A. Yes.

Q. And what date is that?
A. December 17, 2015.
Q. Okay. Under history of present illness, it states: Patient history is complex with history of coronary artery disease having had a stent January 2014. Long-standing history of lymphoma with chemotherapy, now in remission.
Did I read that correctly?
A. That's correct.
Q. Okay. And now we'll turn to page Bates number ending 5869. I believe it's the first page of the exhibit.
A. Yes.
Q. And do you see what the encounter date is for this record?
A. Yes. It's December 21, 2015.
Q. And then turning to the page number ending 5871, this is also a continuation of active problems.
A. Yes.
Q. Do you see what problem number 27 is identified as?
A. It's identified as mantle cell lymphoma.

Q. Okay. Dr. Ji, do you agree that chemotherapy can suppress the immune system?

ATTORNEY ORTIZ: Object to form.

THE WITNESS: Chemotherapy can suppress the immune system during the time of chemotherapy.

BY ATTORNEY MALONE:

Q. Okay. Do you agree that non-Hodgkin's lymphoma can cause immunosuppression?

ATTORNEY ORTIZ: Object to form.

THE WITNESS: Non-Hodgkin's lymphoma has not classically been associated with significant immunosuppression.

BY ATTORNEY MALONE:

Q. What about mantle cell lymphoma?

ATTORNEY ORTIZ: Same objection.

THE WITNESS: Mantle cell lymphoma is a type of non-Hodgkin's lymphoma and has not been associated with significant immunosuppression.

BY ATTORNEY MALONE:

Q. Are patients you treat who have non-Hodgkin's lymphoma or mantle cell

lymphoma at a higher risk for infections?
A. Not in a significant way. The lymphoma -- it would depend on their totality of circumstances, but for patients who are in remission from lymphoma for years are generally not considered to be a significant increase for infections.
Q. So you stand by your -- all of your opinions with regards to Mr. Carter on the unrelatedness of this -- I believe it's $926.52?
A. That's correct.
Q. Okay. You can put that to the side.
A. Okay.
Q. Let's turn to page 17 of Exhibit 8, section number 2, Davis, Cometto?
A. We're here.
Q. Okay. And the first paragraph reads: For Cometto Davis, I quantified zero dollars in medical billing expenses. Despite no past medical damages being claimed by the plaintiff, the government claimed the following additional offset damages: VHA direct and indirect

costs totaling $3,178 or VHA direct costs totaling $1,614 for a total alleged offset (applying VHA direct costs only) of $1,614.

Did I read that correctly?

A. That's correct.

Q. Okay. And is that, in fact, your opinion with regards to this plaintiff?

A. That's correct.

Q. Okay. You know, I think we can take a break here.

ATTORNEY ORTIZ: Sure.

ATTORNEY MALONE: For about -- we're at the lunch period.

THE VIDEOGRAPHER: The time is now 11:53 15 . Going off the record.

(Recess taken from 11:53 a.m. to 12:43 p.m.)

THE VIDEOGRAPHER: The time is now 12:44. Back on the record.

BY ATTORNEY MALONE:

Q. Dr. Ji, we took a brief lunch break, and now we are back on the record here. I would like to direct you here to page 17 of Exhibit 8, Section 2, Davis, Cometto.

Do you see that?

A. I do.

Q. Okay. And the first paragraph here states for Cometto Davis, I quantified zero dollars in medical billing expenses. Despite no past medical damages being claimed by the plaintiff, the government claimed the following additional offset damages: VHA direct and indirect costs totaling $3,187 or VHA direct costs totaling $1,614, for a total alleged offset (applying VHA direct costs only) of $1,614.

Did I read that right?

A. That's correct.

Q. And is that an accurate summary of your conclusions as well for this plaintiff?

A. It is.

Q. Section 3, still on page 17, for Keller, Scott.

Do you see that?

A. I do.

Q. Okay. And I would ask you to now turn to page 18, still on that section, and if you could just reread Section 1(a).

ATTORNEY ORTIZ: I'm sorry.

Before we do that, some of our folks are listening on Zoom and said there's an audio distortion effect. The audio sounds off.

THE VIDEOGRAPHER: The time is now 12:47. Going off the record.

(Recess taken from 12:46 p.m. to 12:47 p.m.)

THE VIDEOGRAPHER: The time is now . Back on the record.

BY ATTORNEY MALONE:

Q. Dr. Ji, we left off, I was just referring you to page 18 of Exhibit 8, and I would just ask could you please reread Section 1(a) and just let me know when you've had a chance to review that.

A. I did it during the brief intermission we had.

Q. Okay. And do you agree with the assessment of Ms. Hackett-Wallace?

ATTORNEY ORTIZ: Object to form. You can answer.

THE WITNESS: I do not.

BY ATTORNEY MALONE:

Q. Why do you disagree?

A. In this case, referring to 1(a), the office visit on February 21, 2023, this was for a gastroenterology visit which is a gastrointestinal specialist who did order blood work, but this was not for the purposes of chronic kidney disease as Ms. Hackett-Wallace alleges. There was no mention of any concern of kidney-related diseases, and the actual visit itself was identified for gastrointestinal.

Q. Doctor, I'm going to hand you what we're going to mark as Exhibit 15.

(Exhibit Number 15 was marked for identification.)

BY ATTORNEY MALONE:

Q. Do you recognize this document?

A. I do.

Q. What is it?

A. This is a primary care visit from January 4, 2023.

Q. And if you will turn to the page Bates-numbered 1501_Keller_PCC0000000503.

A. I'm here.

Q. Okay. And about halfway down on

the page under -- from -- I believe that means previous notes, it says: Number 1, stage 4 chronic kidney disease (HCC). CBC with differential comprehensive metabolic panel. Troponin 1, magnesium.

Did I read that correctly?

A. That's correct.

Q. Okay. And so given that that is listed in the medical record for this date, referring to the studies -- the last disputed in Section 1(a) that we discussed, do you still -- is it still your opinion that these charges were unrelated to Mr. Keller's chronic kidney disease?

ATTORNEY ORTIZ: Object to form.

You can answer.

THE WITNESS: I still believe these are unrelated. To the best of my recollection and my previous review, the charges for this date were actually for a gastroenterology visit. The document here is a primary care office visit for January 24, 2023. While I do not have the actual bill in front of me, to the best of my

recollection of the review, the bill was actually for a different charge.

BY ATTORNEY MALONE:

Q. So even if the chronic kidney disease was listed among the encounter details, because it was a gastroenterology visit, it's your opinion that it would be, therefore, unrelated to the track 1 illness; right?

A. That's correct.

ATTORNEY ORTIZ: Object to form. You can answer.

THE WITNESS: To the best of my recollection, the gastroenterology visits did not mention any stage 4 chronic kidney disease as one of their primary concerns. And unless it was meaningfully used to change management or manage the actual kidneys themselves, it would not be considered related to the track 1 diseases in this case.

BY ATTORNEY MALONE:

Q. Okay. Dr. Ji, I would like to direct you to Exhibit 5, page number 72.

That would be your report.

A. I'm here.

Q. And if you would then turn to page 74, that same report in this Section 4, Mr. Keller.

A. I'm here.

Q. Footnote 39 reads: Although my opinion is that the plaintiff's diabetes and diabetic nephropathy are medically unrelated to any of the claimed conditions including lymphoma, the patient specifically received VBA benefits for his diabetes and diabetic nephropathy all as associations to lymphoma as related to his purported Camp Lejeune exposures.

Did I read that right?

A. That's correct.

Q. You go on to state: I am not offering any opinion that his diabetes, diabetic nephropathy, and neuropathy are medically related to or caused by his Camp Lejeune exposures.

Did I read that correct?

A. That's correct.

Q. Do you have any reason to dispute

the VBA's findings as referenced in footnote 39?

ATTORNEY ORTIZ: Objection to form and foundation.

THE WITNESS: When you say "their findings," are you regarding the disability reward or what specific findings from the VBA?

BY ATTORNEY MALONE:

Q. I'm referring to the -- their findings of relatedness to his purported Camp Lejeune exposures.

ATTORNEY ORTIZ: Objection.

THE WITNESS: Oh, you -- are you referring to, for example, the diabetes, mellitus type 2 due to non-Hodgkin's lymphoma with anemia, the due to statement?

BY ATTORNEY MALONE:

Q. Let's start with that, yes.

A. I disagree that the -- or I should actually say that I really have no opinion regarding the relatedness of the type 2 diabetes, but I found no evidence that the type 2 diabetes in this case was related to

the non-Hodgkin's lymphoma.

Q. Let's turn to page 19 of Exhibit 8.

A. I'm here.

Q. And the section number reads: Number 4, Kidd, Robert.

Do you see that?

A. I do.

Q. And the first paragraph states: For Robert Kidd, I quantified zero dollars in medical billing expenses. Despite no past medical damages being claimed by the plaintiff, the government claimed the following offset damages: VHA indirect and direct costs totaling $14,082 or VHA direct costs totaling $7,733; TriWest/CCN totaling $15,353, for a total alleged offset (applying VHA direct costs only) of $23,086.

Did I read that correctly?

A. That's correct.

Q. Okay. And is that an accurate summary of your opinions with respect to Mr. Kidd? Please refer to your report if you need to.

A. I will do so for completeness. But this should be correct. That's correct.

Q. Dr. Ji -- and you can set the reports aside for now.

Do you have any training in Medicare claims data systems?

ATTORNEY ORTIZ: Objection.

THE WITNESS: Can you define by Medicare data systems?

BY ATTORNEY MALONE:

Q. Sure. So have you ever been trained by CMS in the use of their billing and payment systems?

A. I have not been trained by CMS. I do encounter Medicare data bills frequently in my line of work.

Q. Okay. How do they come about in your line of work?

A. In my previous jobs as a medical director, we -- my work at Caremore was as a Medicare Advantage company; so we are very familiar with Medicare claims -- Medicare Advantage claims and billing. In addition for my work as -- for independently reviewing and auditing chart reviews, we do encounter Medicare patients.

Q. Okay. And I think you answered

this so forgive me, but you've never worked for CMS before; correct?

A. That's correct.

Q. Have you ever administered or maintained a Medicare claims database?

A. No, I have not.

Q. Okay. We've talked a lot about the offsets that you have calculated. To quantify the amounts that you describe as offsets, you were relying on the government-provided data; is that right?

ATTORNEY ORTIZ: Object to form and foundation.

THE WITNESS: I was relying on the data that the DOJ provided to me which was from -- which is listed in the materials considered.

BY ATTORNEY MALONE:

Q. Okay. You didn't generate that data yourself?

A. That's correct.

Q. I believe it's in your materials considered, and feel free to refer back to it, but you read the deposition testimony of the government's Tricare, VHA, and Medicare

non-retained experts.

Do you recall reading those?

A. I do recall reading those.

ATTORNEY ORTIZ: Object to form. You can answer.

THE WITNESS: Yeah, I do recall reading them.

BY ATTORNEY MALONE:

Q. Do you have any opinion on the reliability of the data that was provided to you by the government?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I don't have an opinion on the reliability.

BY ATTORNEY MALONE:

Q. Okay. And did you personally verify the accuracy of the data that was provided to you?

ATTORNEY ORTIZ: Objection.

THE WITNESS: By accuracy, do you mean whether -- do you mean whether there was correct that we received or do you mean that the filtering or do you have any particular --

///

BY ATTORNEY MALONE:
Q. Yeah. I'm sorry. Please.
A. I was just saying do you have any particular areas that you are referring to?
Q. Specifically -- so you didn't verify the data that you were given against the original Medicare claims; right?
ATTORNEY ORTIZ: Objection.
THE WITNESS: By original Medicare claims, are you referring to paper bills? Are you referring to datasets? Or . . .
BY ATTORNEY MALONE:
Q. Let's start with paper bills.
A. In only one patient -- I believe it was Mr. Gleesing off the top of my head -- there were some paper bills that we were able to verify. In most cases, there were no paper bills. However, to my knowledge, what I received was an unfiltered dataset from CMS; so I have no reason to question their accuracy.
Q. Okay. You have no reason to question their accuracy why?
ATTORNEY ORTIZ: Objection. Asked

and answered.

THE WITNESS: Since CMS is the payor in this case, there's no reason to question why their payments would be incorrect since they are the organization that is providing the payments.

BY ATTORNEY MALONE:

Q. Okay. So did you rely on anyone else to validate that data, or is that just an assumption that you have?

ATTORNEY ORTIZ: Objection to form and foundation.

THE WITNESS: Are you referring to rely on someone else to verify if the data is correct?

BY ATTORNEY MALONE:

Q. Yes.

A. No. There was -- the data came directly from the DOJ which received data from the CMS as far as I'm aware.

Q. Dr. Ji, do you recall earlier when we were discussing Mrs. Dyer and the -- we'll call it the dispute relating to those two emergency department visits?

A. I do recall.

Q. Okay. And it's my understanding that your testimony was that although she -- strike that.

Is it your testimony that Ms. Dyer presented to the emergency department with an unrelated condition and, therefore, that entire treatment is considered to be unrelated?

ATTORNEY ORTIZ: Object to form.

THE WITNESS: I would not quantify it as she came with an unrelated condition; so it was unrelated. As I previously discussed, she came in to the emergency room in those cases with symptoms that were due to other causes which were the primary reason why she would have to go to the emergency room. Although she happened to have a urinary tract infection at that time, had it not been for other conditions, she would not have required an ER visit.

BY ATTORNEY MALONE:

Q. And, therefore, it's your

determination that it was unrelated for purposes of this analysis?

A. That's correct.

Q. I'm just trying to get a better understanding of the basis for that rationale.

Is there a coding or a billing guideline that leads you to that conclusion?

ATTORNEY ORTIZ: Object to form.

Is there a question there?

ATTORNEY MALONE: Sorry. Let me rephrase. That was a bad question.

BY ATTORNEY MALONE:

Q. Are there any guidelines or regulations that you relied upon in reaching that conclusion?

A. In reaching the conclusion that it would be unrelated to the visit?

Q. Correct.

A. When we conduct -- when we determine whether a patient requires hospitalization or admission, we do so as physicians with the understanding that they have to meet certain guidelines to be hospitalized. There are various criteria or

guidelines that you can use to determine the level of illness that you need to be hospitalized for, and there are criteria, for example, the Milliman guidelines. But we are not discussing coding or billing or hospitalizations in this case, but similar principles apply in which case hospitalization is required when the patient cannot be adequately treated outside the hospital.

In other words, if you have a simple urinary tract infection that can be managed with some pills and you're not so sick that you be unwell, you don't need to be in the hospital. You can simply -- just like if I catch a cold, I may not feel well. I may need some medication, some simple pills or other medications to take, but I don't need to go to the hospital. I don't need to be hospitalized for that reason.

In the same vein, if you go to the -- if you have a urinary tract infection but it can simply be treated with a pill as in these cases, the hospitalization is not directly related to the urinary tract

infection. It's instead related to the other conditions that led her to go to the hospital.

Q. Okay. You mentioned the principles between billing, coding, and I guess you call it medical treatment.

Why do those principles apply here?

ATTORNEY ORTIZ: Object to form.

THE WITNESS: In this case we -- when we were determining relatedness for medical charge, billing charge, while I'm not opining on whether the bill was accurate or correct and I'm making no opinion on the bills themselves since the medical charge is to pay for the hospitalization as a whole, we do not split up the hospital bill into individual parts for a urinary tract infection and for a gallbladder and for chest pain. It's one entire hospitalization. And the hospitalization is determined by the reason in its totality for the patient to be hospitalized or in the ER.

///

BY ATTORNEY MALONE:

Q. And this is kind of what I'm getting at. Is that a policy or principle that you use in determining relatedness outside the context of your work in this litigation?

ATTORNEY ORTIZ: Object to form and foundation.

You can answer.

THE WITNESS: As physicians, we don't generally think in terms of relatedness in our day-to-day jobs. We think in terms of treating the patient and managing them, which does include whether they need to be treated in the hospital or not. But when we are managing the patient, if I had this patient in the ER and she had pain in her abdomen, right quadrant pain and urinary tract infection, I would treat both. I don't think in terms of relatedness.

However, when it comes to time to determine whether the patient needed to be in the hospital, we do think in

terms of why does the patient need to be in the hospital right now.

BY ATTORNEY MALONE:

Q. With respect to the two visits that we're discussing for Mrs. Dyer, did you consult with the treating physicians regarding those dates of service?

ATTORNEY ORTIZ: Objection.

THE WITNESS: You're referring to the doctors at the actual hospital at the time?

BY ATTORNEY MALONE:

Q. I am.

A. I did not.

Q. Okay.

ATTORNEY ORTIZ: The doctors from 2014? 2015?

ATTORNEY MALONE: I am referring, yes.

BY ATTORNEY MALONE:

Q. And you didn't consult with any other physicians about these two dates of service, did you?

A. I did not.

Q. Okay. Turning back to page 5 of

your report, Exhibit 5, a little bit about your methodology. Sorry, let me know when you're --

A. I'm here.

Q. Okay. Going back to the second to last paragraph, it's my understanding based on what we've talked about today that you assessed the billed amounts for private paid charges; is that correct?

A. You're talking about the past medical expenses?

Q. Sorry, yes. The past medical expenses.

A. Yes, regarding the past medical expenses, I was requested to analyze the billed amounts.

Q. Okay. And you were requested to analyze the reimbursed or paid amounts for the offsets; is that fair?

ATTORNEY ORTIZ: Objection to foundation.

THE WITNESS: I was tasked to analyze the paid amounts for the offsets. That's correct.

///

BY ATTORNEY MALONE:

Q. Okay. For this I'll direct you to you page 23 of Exhibit 8, Ms. Hackett-Wallace's rebuttal.

A. Sorry. To page 23?

Q. 23. Sorry.

A. Thank you.

Q. Do you see at the bottom of the page under bladder cancer plaintiffs, she offers tables kind of summarizing the past medical and offsets?

Do you see that?

A. I do.

Q. Okay. You were not disputing the final charges on past payments for Tricare; correct?

ATTORNEY ORTIZ: Objection.

THE WITNESS: I was -- I am not -- I don't have any opinion on the total payments from Tricare. I was only tasked to analyze the total billed amounts.

BY ATTORNEY MALONE:

Q. Okay. And I believe earlier you testified that you didn't have access to the

Tricare patient paid and billing information; is that right?

ATTORNEY ORTIZ: Object to form.

You can answer.

THE WITNESS: I don't recall exactly what I said earlier, but in terms of Tricare data, I had access -- I definitely had access to the paid and billed data since for the past medical damages I was assessing the billed amounts. And for the payments, total paid amounts by Tricare, that's the data I used for offsets.

BY ATTORNEY MALONE:

Q. So you were given a dataset from which to derive that quantification?

ATTORNEY ORTIZ: Object to form.

THE WITNESS: That's correct.

BY ATTORNEY MALONE:

Q. Okay. What form was that provided to you in?

A. You are regarding the Tricare dataset I received?

Q. Yes.

A. It was an Excel spreadsheet.

Q. Okay. And so then that data would have shown both the amount Tricare was charged and the amount Tricare ultimately paid?

ATTORNEY ORTIZ: Objection. JT, if you're going to ask him detailed questions about the spreadsheets, I'd ask that you show him the spreadsheets.

ATTORNEY MALONE: Okay.

THE WITNESS: To the best of my knowledge that should be -- both datasets -- both the payments and the billed amounts should be in the Excel spreadsheet.

BY ATTORNEY MALONE:

Q. Okay. Dr. Ji, I know we've spent a lot of time on those points where you were in disagreement with Ms. Hackett-Wallace, but would you agree that by and large with regards to the past medical damages, you verified the amounts that she presented in her report?

ATTORNEY ORTIZ: Object to form. You can answer.

THE WITNESS: My opinions are contained in my report regarding the total amount. I will say that outside of the disagreements that I've labeled in my report, I do agree with the other numbers.

BY ATTORNEY MALONE:

Q. Okay. So if I represented to you that in total you were able to verify about 97 percent of Ms. Hackett-Wallace's past billed amounts, would you have any reason to disagree with that figure?

ATTORNEY ORTIZ: Objection to form and foundation.

THE WITNESS: Without looking through the numbers, I can't give you an accurate assessment. I have no basis to disagree.

BY ATTORNEY MALONE:

Q. Okay. And so we've identified, you know, the agreements that you have, the disagreements that you have with relation to relatedness. But these are disagreements on specific relatedness issues and not Ms. Hackett-Wallace's methodology in coming

to those numbers; correct?

ATTORNEY ORTIZ: Objection to form and foundation and move to strike.

THE WITNESS: I do believe that she -- based on her original report, which I don't have in front of me right now, not her rebuttal report, she primarily started her analysis using ICD and billing code data which I find to be less accurate than line-by-line analysis. However, in terms of the overall numbers, the numbers are what's contained in my report.

BY ATTORNEY MALONE:

Q. Okay. We've spent a lot of time looking through your report and going over things.

Is there anything in your report that you think you need to amend based on this deposition?

ATTORNEY ORTIZ: Objection.

THE WITNESS: Outside of what we've already discussed here, there's

nothing else I would add.
BY ATTORNEY MALONE:
Q. Okay. Does your report that we've just reviewed contain all the extra opinions that you'll be offering in this case?
ATTORNEY ORTIZ: Objection. Form and foundation.
THE WITNESS: I can't predict what will be asked of me as time goes on, but this is -- I have completed what was asked of me so far.
ATTORNEY MALONE: Do you want to take ten minutes and come back and if there's anything else? I just want to go through my notes.
ATTORNEY ORTIZ: That's fine.
THE VIDEOGRAPHER: The time is now 1:21. Going off the record.
(Recess taken from 1:21 p.m. to 1:35 p.m.)
THE VIDEOGRAPHER: The time is now 1:35. Back on the record.
BY ATTORNEY MALONE:
Q. Dr. Ji, we're back from another break. I just have a couple more questions.

We discussed before the break that you did not evaluate the reliability of the Medicare data that was provided to you; correct?

ATTORNEY ORTIZ: Objection.

You can answer.

THE WITNESS: Regarding how accurate the actual data was in the Excel spreadsheet, I cannot verify that number.

BY ATTORNEY MALONE:

Q. Okay. And is that true for the other government data that you were provided?

ATTORNEY ORTIZ: Objection.

THE WITNESS: That's correct. I cannot verify the accuracy of the contents within the document.

BY ATTORNEY MALONE:

Q. You briefly testified about Ms. Hackett-Wallace's methodology. Is it your understanding, as you testified earlier, that she began with data extractions to determine her relatedness determinations?

ATTORNEY ORTIZ: Objection.

THE WITNESS: It is my understanding that she relied on ICD-9 and 10 data as part of her methodology to evaluate the relatedness of the determinations. Whether -- I cannot remember off the best of my recollection whether she started with that or just used it somewhere in her analysis.

BY ATTORNEY MALONE:

Q. Okay. And so just the fact that she used it in her analysis is something that you would take issue with methodologically?

A. I would take issue with it only if she relied primarily on the billing codes as a source of accuracy in terms of relatedness. If she then also reviewed the actual charge in the medical documentation itself, I would have no issue with it.

Q. Okay. Turning to your own methodology, and let's start with the offset data, did you start with claims data first and then verified through medical records,

or did you go line by line through the medical records first?

A. For the offsets, I used the payment data from the various payors and went line by line through those payments. And then through that, I went back to the medical record to confirm whether those were related or not.

Q. Okay. So you didn't presume that the data provided to you in the datasets for the offsets category, Medicare, Tricare, CCN, you didn't presume that those were related? You verified them with medical records?

A. Absolutely.

Q. Okay. Was that the same process you used for private pay?

A. Are you -- private pay regarding offsets or private pay regarding -- which private pay are you referring to?

Q. I'm referring to the past bill that Ms. Hackett-Wallace quantifies in her report.

A. For the past medical damages, I did not have a separate -- I did not have a

separate methodology for private pay versus any of the other payors. I took the charges that were claimed by Ms. Hackett-Wallace, and I either verified or disagreed with the relatedness.

Q. Going back just a moment ago, you said it's problematic to use the ICD-9 and 10 codes for relatedness purposes.

Why is it problematic?

A. When using ICD-9 and 10 codes, it's a coding that you can provide for a service, and the billing or the coding may have inaccuracies both from human error and also because if -- for example, if a patient has a -- let's say, for example, a patient had a gastrointestinal bleed which they thought was typically, a vast majority of the time, unrelated to, say, cancer, but they later found out this was cancer related, then the initial bills from the initial visits prior to the diagnosis of cancer would reflect only a GI bleed and presumably be unrelated. And then later on they would find out that the entire series of workups was related. So there may be a temporal inaccuracy just

because of something that's discovered later on that pertains to the past. So for many reasons, just reviewing the actual medical data is far more accurate.

Q. Dr. Ji, I have nothing else for you. Thanks so much for your time.

ATTORNEY ORTIZ: I don't have any questions for you, Dr. Ji.

I did just want to put on the record there were a couple exhibits -- the deposition protocol in this litigation requires four copies, and there were a couple exhibits where there were not copies for counsel. I think it was Exhibits 5, 8, 9, and 11. I just want to lodge that objection on the record.

But I have no questions for you, Dr. Ji. Thank you very much.

THE VIDEOGRAPHER: The time is now 1:40. This concludes the deposition. Going off the record.

(Whereupon the deposition concluded at 1:40 p.m.)

REPORTER'S CERTIFICATE

The undersigned Certified Shorthand Reporter licensed in the states of California, Nevada, Illinois, and Washington does hereby certify:

That the foregoing deposition was taken before me at the time and place therein set forth, at which time the witness was duly sworn by me;

That the testimony of the witness and all objections made at the time of the examination were recorded stenographically by me and were thereafter transcribed, said transcript being a true copy of my shorthand notes thereof;

That if this is a Federal case, a request [X] was [ ] was not made to read and correct said deposition.

I further declare that I have no interest in the outcome of the action.

In witness whereof, I have subscribed my name this 17th day of February, 2026.

Illinois CSR 084.004982

INSTRUCTIONS TO WITNESS

Please read your deposition over carefully and make necessary corrections. You should state the reason in the appropriate space on the errata sheet for any corrections that are made.

After doing so, please sign the errata sheet and date it.

You are signing same subject to the changes you have noted on the errata sheet, which will be attached to your deposition.

It is imperative that you return the original errata sheet to the deposing attorney within thirty (30) days of receipt of the deposition transcript by you. If you fail to do so, the deposition transcript may be deemed to be accurate and may be used in court.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

THE VIDEOGRAPHER: We are now on the record.

My name is David Lane, videographer for Golkow, a Veritext division.

Today's date is February 24, 2026. Our time on the record is 9:01 AM Eastern Time.

This remote video deposition is being held in the matter of Camp Lejeune Water Litigation.

Our deponent today is Andrew McIlroy.

All parties to this deposition are appearing remotely and have agreed to the witness being sworn in remotely. Due to the nature of remote reporting, please pause briefly before speaking to ensure all parties are heard completely.

Counsel will be noted on the stenographic record.

The court reporter today is

Denise Vickery and will now swear in the witness.

- - -

ANDREW MCILROY

called for examination, and, after having been duly sworn, was examined and testified as follows:

THE VIDEOGRAPHER: Please begin.

- - -

EXAMINATION

- - -

BY MR. VANSLYKE:

Q. Good morning.

A. Good morning.

MR. VANSLYKE: This is Ben VanSlyke from Weitz & Luxenberg on behalf of the Plaintiffs Leadership Group.

Bill, do you want to make an appearance?

MR. KLOTZBUCHER: Right. This is -- my name is William Klotzbucher. I'm with my colleague Michael Cromwell. We're with the U.S. Department of Justice

representing the Defendant.

MR. VANSLYKE: Thank you.

And I see we have Whitney Wallace from Wallace & Graham on behalf of the Plaintiffs as well.

BY MR. VANSLYKE:

Q. Mr. McIlroy, can you please state your full name for the record?

A. Andrew McIlroy.

Q. And have you ever been deposed before?

A. I have not.

Q. Do you understand what a deposition is?

A. I do.

Q. Do you understand that you're under oath today?

A. I do.

Q. As we move through this deposition, I will be asking you a series of questions. If at any point I ask you a question that you do not understand, please let me know and I will rephrase the question. Okay?

A. Very good.

Q. All right. And if at any point today you would like a break, I will ask that you please answer any question that's pending, but other than that, we could take a break at any time. Okay?

A. Understand.

Q. Are you represented by counsel today?

A. DOJ, yes, is here with me.

Q. Do I understand correctly that you do not have a VA counsel with you today?

A. I do not.

Q. And has the DOJ counsel worked with you in coordinating this deposition?

A. They have.

Q. Without telling me anything that was discussed, did you meet with your counsel from DOJ to prepare for this deposition?

MR. KLOTZBUCHER: Answer -- objection. Only you can only answer without discussing the substance of any conversation, but you may continue.

THE WITNESS: He told me the time and kind of the nature of a

deposition.

BY MR. VANSLYKE:

Q. Did you review any documents in preparing for today's deposition?

A. Yes, like the deposition document or something.

Q. Is it fair to say that you reviewed the procedural documents related to this deposition?

A. Yes.

Q. Did you review any other documents in preparing for today's deposition?

A. No.

Q. I'm going to place in chat the notice of deposition.

So, Mr. McIlroy, when I introduce documents today, I'm going to place them in this chat for everybody to have access. That includes the court reporter and your counsel and it also includes you.

Can you please confirm that you can open that document that I just placed in chat?

A. It's file _01?

Q. Correct.

MR. VANSLYKE: And I will mark this document as Exhibit 1.

(Document marked for identification as McIlroy Exhibit 1.)

BY MR. VANSLYKE:

Q. Can you see that document, Mr. McIlroy?

A. One moment.

Yes, I have it in front of me now.

Q. Okay. So throughout the deposition I will also screen share documents for convenience, but I wanted to confirm that you can access it and please at any point feel free to pull up the document yourself and review it as you wish. Okay?

A. Okay.

Q. I am now screen sharing Exhibit 1.

And do you see that this is the Plaintiffs' Notice of Deposition of Andrew McIlroy?

A. I do.

Q. I will scroll so you can briefly review the document.

And, Mr. McIlroy, have you seen this

notice before?

A. Scrolling. Yes, I have.

Q. Did you scroll all the way through the document?

A. You are on what page? Page?

Q. I'm currently on page 2, but I'm trying to make sure I'm keeping up with you.

A. I'm on --

Q. So if we keep scrolling.

A. Okay.

Q. Apologies for speaking over you.

If you keep scrolling, you can see there's a certificate of service followed by the subpoena, and after the subpoena, there is Attachment A. And further down in Attachment A, there is a Requests For Documents. Or Requests For Production.

So, Mr. McIlroy, have you seen this document before?

A. Yes.

Q. Thank you.

And did you review these Requests For Production?

A. Yes.

Q. And did you produce any materials in response to these Requests For Production?
A. A resumé and job description.
Q. I will represent to you that we received those two documents.
Is that the entirety of the documents that you have produced in response to these Requests For Production?
A. Yes.
Q. Thank you.
I'll go ahead and stop sharing.
Are you aware that DOJ provided us with a written response to those Requests For Production?
A. Yes.
Q. Have you reviewed that response?
A. Yes.
MR. VANSLYKE: I will now place that response in the chat, and I will mark as Exhibit 2 the United States' Responses and Objections to Plaintiffs' Notice of Deposition and Subpoena For the Production of Documents to Andrew McIlroy.

(Document marked for identification as McIlroy Exhibit 2.)

BY MR. VANSLYKE:

Q. And I will go ahead and share my screen.

Mr. McIlroy, does this appear to be the response that you indicated you had reviewed?

A. Yes.

Q. Would you like to review this further?

A. I have it on my screen now. I'm reviewing it.

Q. Okay. Please feel free to review and let me know when you finished.

A. (Reviews document.)

Okay.

Q. And now that you finished reviewing, do you still believe this is the response that you indicated you had reviewed?

A. Yes.

MR. VANSLYKE: Thank you.

I will stop sharing.

And I am placing in chat what I will mark as Exhibit 3, which I will

represent to you are the two documents that we discussed being produced to us, your CV and job description.

(Document marked for identification as McIlroy Exhibit 3.)

BY MR. VANSLYKE:

Q. Mr. McIlroy, will you please review that document and confirm that these are the CV and job description that you produced.

A. (Reviews document.)

Yes, that is.

Q. Thank you.

So I'm starting on the first page here and this is your current CV, correct?

A. Yes.

Q. Is there anything within your CV that you believe requires updating?

A. No.

Q. So I'm just going to quickly walk through some of the items on here.

I'm going to scroll down to your education.

So I see that you have a BA in history from St. Olaf College, correct?

A. Correct.
Q. And that was in 1990?
A. Correct.
Q. And then you have a Master of Arts in History from the University of Akron in 1993?
A. Correct.
Q. And you have a Master of Science in Public Policy and Public Management from Carnegie Mellon's Heinz School in 1997, correct?
A. Correct.
Q. So it looks to me like your academic background includes both history and budget or policy training; is that correct?
A. Yes.
Q. And would you say that that gives you a perspective on how federal programs evolve over time?
A. It does. It has, yes.
Q. So you started your career at the Office of Management and Budget in 2001?
A. Correct.
Q. And starting then you were analyzing budget requests and funding recommendations?
A. That is correct.

Q. And this included developing budget plans, correct?
A. Yes.
Q. And then it looks like you worked in that position until July of 2006?
A. Correct.
Q. And from there you moved to a deputy budget officer position at the FBI in July 2006?
A. Yes.
Q. And in this role, you were still working with federal government budgets, correct?
A. Yes.
Q. And in this role, you were supervising staff within the budget office?
A. Yes.
Q. And you were still working on preparing budget options; is that correct?
A. Yes.
Q. And you were also reporting and auditing on budgets?
A. Yes.
Q. I see here in this first bullet point that it says you improved budget justification material; is that correct?

A. Yes.

Q. Can you briefly describe for me what that means?

A. So budgeting is really about describing where you get the money, what you get for the money, and to the extent that you are able to better explain the benefits of spending additional money, that can often lead to an increased budget. So I think that's what's happened there.

At the FBI we demonstrated the value of increased funding for more FBI agents, specifically around counterterrorism, counterintelligence, and financial crimes as well as cyber intrusions.

Q. So am I understanding correctly that the budget justification material is essentially that you have identified a need for funding and you have prepared a justification for why that funding is needed; is that correct?

A. That is correct.

Q. I will keep scrolling up here, and I see that in June 2011 you moved to the role of deputy director of the Office of Budget and

Program Performance with Immigration & Customs Enforcement; is that correct?

A. Yes.

Q. And in this role, you were still leading staff within the budget office; is that correct?

A. Yes.

Q. And I see here it says:

"Served on advisory committee for analysis of alternatives for the selection of a new financial system."

Did I read that correctly?

A. You did.

Q. Could you briefly describe for me the role of serving on an advisory committee?

A. So at that time, ICE had a very old proprietary financial system and it was not in compliance with the then-current requirements for federal -- federal financial management systems. So we looked at a variety of options, and ultimately I think we settled on using a service provided by Department of Transportation at the time.

Q. Do I understand correctly that your

role was essentially to serve as a subject matter expert and provide information to somebody else who was the decision-maker?

A. Yes, that is accurate.

Q. And then in -- excuse me.

In December of 2013, I see you moved to a director role within the Office of Budget at the Office of Energy Efficiency & Renewable Energy within the Department of Energy; is that correct?

A. That is correct.

Q. And in this role, you were still supervising other staff within the budget office?

A. Correct.

Q. And I see in this first line it says that you "directed staff of 20 in budget formulation and execution as budget director"; is that correct?

A. Yes.

Q. So I know in the previous roles we have discussed essentially that you have prepared budget requests.

Is that different in any way from budget formulation?

A. They are essentially the same.

Q. Thank you.
And then in July of 2016, you moved to the budget director role within the Farm Service Agency at the Department of Agriculture?
A. Correct.
Q. And I see again "led staff of 30 to prepare and execute a budget," correct?
A. Yes.
Q. So other than the change in staff, that component of this role is similar to the previous one?
A. Similar --
MR. KLOTZBUCHER: Objection to form.
You may answer. Sorry to talk over you, Mr. McIlroy.
THE WITNESS: You can rephrase or.
BY MR. VANSLYKE:
Q. I see at this role as well you were leading other staff in the budget office, correct?
A. Correct.
Q. And you were still preparing and executing a budget, correct?

A. Correct.

Q. And while the specific programs that are part of the budget have changed, this part of this role where you are leading staff and preparing and executing a budget was a role that you performed in the previous role, correct?

A. Yes.

Q. And is it fair to say that you have performed similar job functions in each of these roles that we have discussed starting at least at the FBI in 2006?

A. Yes, I have long been responsible for preparing and executing budgets.

Q. Okay. So I am back at the first page of this document.

And it looks like in April of 2019 you began working for the Department of Veterans Affairs; is that correct?

A. Actually, in June of 2018, but there are a series of jobs there.

Q. Ah. Thank you for pointing that out.

I see third line down June of 2018 you began working at the Department of Veterans

Affairs, correct?

A. Correct.

Q. And I see it appears to me that you started as associate deputy assistant secretary for budget?

A. Correct.

Q. And then in March -- I'm sorry.

In April of 2019, you transitioned to deputy assistant secretary for budget?

A. Correct.

Q. And from July of 2024 to December of 2024, you were acting deputy assistant secretary for management and deputy CFO?

A. Correct.

Q. Can you briefly explain to me the difference between the associate deputy assistant secretary for budget role versus the deputy assistant secretary for budget role?

A. So the associate deputy assistant secretary for budgets, or the ADAS, is also a senior executive position within the Office of Budget, but it has responsibility for a smaller scope of the budget.

So as ADAS, I had responsibility for

just a couple components of the Department of Veterans Affairs, and as deputy assistant secretary for budget, I have responsibility for all the components of the Department of Veterans Affairs and the entire budget. So it relates to the span and scope of responsibility.

Q. And am I correct that the deputy assistant secretary for budget would oversee the associate deputy assistant secretary for budget?

A. That is correct.

Q. And can you explain to me the difference between the role of deputy assistant secretary for budget versus the role of acting deputy assistant secretary for management and deputy CFO?

A. So within the last administration and transition to the Trump Administration, our politically appointed CFO left and the deputy CFO became the acting CFO. And I then became the acting deputy CFO for the Department of Veterans Affairs, and the deputy CFO has responsibility not only for budget but also accounting and capital assets, as well as actuarial programs and implementation of the new financial system and

management of our entire financial operations.

Q. Could you briefly describe for me what actuarial analysis means?

A. So we use actuaries for kind of two different things in the Department of Veterans Affairs. One, we use actuaries to estimate health care costs.

So the actuaries working on health care estimates look at the veteran population receiving health care and what we know about kind of the average age of death and the average kind of mortality and health care needs of that veteran population, and they extend those costs out into the future.

And then for benefits, the actuaries again look at essentially mortality of the veteran population to estimate how long veterans will live and, thus, how long they will receive veteran -- how long they will receive benefits out into the future.

Q. It sounds like that is a fairly complicated analysis.

Would you agree?

A. You should ask actuaries to

describe. Yes, it is. It appears complicated.

Q. Do I understand correctly then that you would not hold yourself out as an actuary?

A. I am not an actuary.

Q. Are you capable of performing actuarial analysis?

A. I receive actuarial analysis and I use that in the budget process, but I do not do actuarial analysis.

Q. So in this first bullet point, I see it says that you "led VA staff and leaders through 7 years of successful budget formulation," correct?

A. Correct.

Q. Would you say there has been significant overlap in the job duties of these three job titles that you've held since June of 2018?

A. Yes.

Q. And I see here that you reference the "growing VA budget from $201 billion in Fiscal Year 2019 to $441 billion in Fiscal Year 2026"; is that correct?

A. That is correct.

Q. Has the VA budget increased each year in between Fiscal Year 2019 and Fiscal Year 2026?

A. It has.

Q. And I see on the second bullet that you "led consolidation of budget analysts from staff offices to Office of Budget"; is that correct?

A. That is true.

Q. Could you clarify for me? Before they were consolidated, in what way were they separate?

A. So staff offices includes kind of the leadership offices of the Department of Veterans Affairs. So that would be the Office of General Counsel, the Office of Secretary, the Office of Public Affairs, the Office of Congressional Relations and Legislative Affairs, those types of offices, HR as well as OM, Office of Management, which is the CFO.

And prior to consolidation, each of those offices had one or two budget analysts. The contention was that, you know, they were not doing adequate budgetary analysis and not performing the

functions as they should because they were not reporting directly to the CFO.

So we consolidated those functions, and by consolidating we were able to reduce some of the number of staff that had previously been devoted to that work, thereby saving some money and as well as improving the services that those offices received.

Q. Thank you.

I see a bullet a few down from there says:

"Developed compromise proposal to accelerate veteran benefits processing at the Veterans Benefits Administration."

Is that correct?

A. Correct. Yes.

Q. Could you clarify? When you refer to "compromise," between what parties was there a compromise?

A. So at the start of the new administration, we had a new Deputy Secretary Paul Lawrence. He set a goal of reducing the backlog for veteran benefits. So we try to process the claims that veterans file for benefits quickly,

but in some cases we are not able to process them so quickly and they extend beyond 125 days.

We call that a backlog or the claims backlog. And the claims backlog had grown to well above 200,000 at the start of the new administration in January '25, and the goal was to reduce it substantially down to about 100,000 by December.

And so in order to do that, they needed -- VBA, the Veterans Benefits Administration, needed additional funding to work overtime. So more overtime means more claims processed and that goes to reduce the backlog, and so we were able to identify funds within the Office of Information Technology that could be transferred to VBA.

And so we worked with OMB and Congress and got OIT to agree to give up 67 million, and so we worked to transfer that funding to VBA, and they were indeed able to reduce the backlog. And recently they sent out a press release noting that it now had gone below 100,000 in aged claims. So significant and successful.

Q. And just to clarify.

If the parties involved had agreed to that compromise, why did you have to work with OMB and Congress?

A. So there are requirements in the annual preparation law that when we move funds between accounts, we have to notify Congress or in some cases we're not allowed to move funds between accounts, but in this case we were. But it required a notification of Congress and that requires, of course, OMB approval.

Q. Moving down two more bullets, I see that you "formulated and implemented new funding stream, the Toxic Exposures Fund to support implementation of the Honoring our PACT Act of 2022"; is that correct?

A. That is true.

Q. Could you describe for me this new funding stream?

A. So when the PACT Act was in development, it was clear that there would be a surge of new applications for benefits and potentially a surge of veterans seeking new health care or expanded health care that they had not originally sought or had not originally been

eligible for.

So that was clear that it would require additional funding to meet that surge of requests for processing of claims benefits and processing for providing health care.

So Congress in the PACT Act established a new funding stream called the Toxic Exposures Fund, and that is a fund that they have in subsequent years appropriated funds to the TEF that we have used to process claims and to provide for expanded health care benefits.

And often when Congress creates a new thing or a new funding stream, they just provide general outlines and say generally how it is to be used. But to actually execute the funds in practice requires additional clarification and explanation to folks in the field, who actually do the obligating of funds, to explain to them what is an acceptable use of the TEF and what would not be an acceptable use of the TEF and how we would allocate the funds across the VA.

Q. And the second sentence under that bullet says:

"This new funding stream will

provide more than $50 billion in funding to the VA for 2022 through 2025."

Correct?

A. That is true. Yes.

Q. Did it end in 2025?

A. No, it has continued and funds were appropriated in FY26 and will likely -- when the President's budget is released, you will see the request again for FY27.

Q. And the following sentence says:

"Developed new cost accounting strategies to justify the new funding stream, explained complicated methodologies to skeptical audiences, and forged consensus among VA staff, the Office of Management and Budget and congressional staff."

Correct?

A. Correct. Yes.

Q. When you refer to "skeptical audiences," could you explain to me what they were skeptical of?

A. So OMB is full of budgeteers and budgeteers are always skeptical of anything new or anything expensive, and the TEF is both new and

big and expensive. So they are appropriately skeptical, and likewise Congressional staff are also. Certainly appropriations staff are skeptical of new things and big things, and so it requires justification of why that is or why the TEF was a reasonable and sound way to fund these veteran benefits.

Q. What makes the Toxic Exposures Fund different from the rest of the VA's funding?

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: Okay.

Well, so it's -- in some ways it's similar. It's all about dollars, taxpayer dollars, but this is somewhat unique in that it is a mandatory funding stream.

So in the federal budget process, there are two primary funding streams: discretionary and mandatory. Most VA funding is -- most operational funding.

So for VBA or VHA it has

traditionally been a discretionary fund. Whereas, the benefits funding was always a mandatory fund, but the TEF is also classified as a mandatory fund. So that was one of the new things about the TEF.

BY MR. VANSLYKE:

Q. Am I understanding correctly that you said the operational funding was traditionally discretionary, but the benefits funding was traditionally mandatory?

A. That is true. Yes.

Q. And you said the Toxic Exposures Fund is mandatory?

A. Correct.

Q. If both the benefits funding and the Toxic Exposures Fund are mandatory, they are similar in that way, correct?

A. They both come from -- they are both classified as mandatory expenditures.

Q. Is the Toxic Exposures Fund intended to fund something other than what you described as benefits funding?

A. The Toxic Exposures Fund supports delivery of health care for toxic exposed

veterans, it supports delivery of benefits for toxic exposed veterans, and it supports -- supports research for toxically exposed veterans, as well as kind of associated administrative costs, like IT, for toxically exposed veterans.

Q. So is it fair to say that the Toxic Exposures Fund involves mandatory spending for both items that have traditionally been mandatory and items that have traditionally been discretionary?

A. No. It would be fair to say that the Toxic Exposures Fund supports costs that previously were discretionary.

Q. So you do not agree that it supports costs that were previously mandatory?

A. We have not -- well, the VA is complicated. There was the CHOICE Act that created a funding stream that, I believe, was mandatory following -- it was during the Obama Administration.

But, in general, the work of VBA, the work of VHA, the work of OIT, the work of the staff offices has traditionally been funded by

discretionary funds.

Q. Okay. Let me look through this for one moment.

Okay. I think I'm done with this part of the resumé. I'm going to scroll down to the beginning of the job description.

For reference on the record, the resumé is at Bates pages CLJA_USA_MCILRAY -- MCILROY -- sorry -- 0000000001 through 4, and the job description starts on the same Bates stamp page 5.

Mr. McIlroy, do you see the job description on my screen?

A. I do.

Q. And this is for your current job description; is that correct?

A. It is correct. Yes.

Q. And I see it looks like in row B there is a date of October 31, 2012; is that correct?

A. Correct.

Q. And that is the date that the job description was updated, not any date pertinent to your occupancy of this role; is that correct?

A. I don't know what that -- the HR people wrote that date. So if you want to know what that date means, you should go ask them.

Q. You were not in this role in 2012, correct?

A. Correct.

Q. But you believe that as of today this job description accurately represents the role that you occupy?

A. It does, yes.

Q. Thank you.

All right. I'm going to stop sharing this document.

So just to summarize the things that we've been discussing, you have been in your role for -- I'll rephrase.

You have been working in the budget office of the Department of Veterans Affairs for approximately seven years; is that correct?

A. Since 2018, yes.

Q. And as the deputy assistant secretary for budget, you serve as the VA's chief budget advisor; is that correct?

A. Correct.

Q. So your office leads the formulation and execution of the VA's budget, which now exceeds $400 billion annually?

A. Yes.

Q. And in doing so, you coordinate with the Office of Management and Budget and congressional appropriations committees?

A. I do, yes.

Q. And on the other hand, you work with VA program officials to ensure that budget requests are accurate?

A. Yes.

Q. Do you recall being interviewed by the VA Office of Inspector General in 2024?

A. I've been interviewed by the OIG multiple times.

Q. Do you recall an interview related to the $2.9 billion supplemental funds request for Fiscal Year 2024?

A. I do.

Q. Are you aware that statements made by you are quoted in a report by the VA OIG on this topic?

A. Yes.

MR. VANSLYKE: I will go ahead and share that document to chat, and I will mark that document as Exhibit 4.

(Document marked for identification as McIlroy Exhibit 4.)

BY MR. VANSLYKE:

Q. And, Mr. McIlroy, can you see this document that I'm sharing?

A. Yes, I can.

Q. And this appears to be a document from the U.S. Department of Veterans Affairs, Office of Inspector General, Office of Audits and Evaluations, correct?

A. Correct.

Q. And the title of this document appears to be "Review of VA's $2.9 Billion Supplemental Funds Request for Fiscal Year 2024 to Support Veterans' Benefits Payments."

Is that correct?

A. Correct.

Q. So I see on Page v in the Introductory section, Footnote 18 appears to be the first time that you, "Andrew McIlroy, deputy assistant secretary for budget," are cited as your

"interview with the OIG team."

Do you see that on the screen?

A. I do see that.

Q. And is this the interview that you described recalling on this topic?

A. The OIG interviewed me multiple times over the course of their work on this, and they have interviewed me multiple times for many things, but that is an accurate statement.

Q. Sitting here today, are you aware of any statements made to the OIG in these interviews that you would now disagree with?

A. The statements I gave to the OIG were honest and correct.

Q. Thank you. I may come back to this document later.

In your role, do you also sometimes provide statements to the media related to VA budgeting topics?

A. No. I sometimes respond to questions from the press office, and they then take that and respond to the media.

Q. And if you are quoted in a news article, would you assume that that was the

process by which that quote was obtained?
MR. KLOTZBUCHER: Object to form.
You may answer.
THE WITNESS: I don't know.
BY MR. VANSLYKE:
Q. Do you believe that you are a credible source of information regarding VA budgeting?
A. Yes.
MR. KLOTZBUCHER: Objection. Sorry.
BY MR. VANSLYKE:
Q. Would you be surprised if individuals in the media looked to you for information regarding the VA budget?
MR. KLOTZBUCHER: Objection. Form.
You may answer.
THE WITNESS: If you want to -- if you want to know about what the media thinks, you should go ask them.
MR. VANSLYKE: I will go ahead and share an article from Military.com in

the chat, and I will mark that as Exhibit 5.

(Document marked for identification as McIlroy Exhibit 5.)

BY MR. VANSLYKE:

Q. Okay. Can you see my screen shared at this time?

A. Yes.

Q. And do you see at the top of the page there is a logo that indicates this is from Military.com

A. Yes.

Q. And do you see the title of this article is "VA Asks for Historic $4.1 billion for Construction as Agency Weighs Closing Some Aging Medical Facilities"?

A. I do see that.

Q. I will give you a quick moment if you'd like to review this article. Please let me know when you're finished.

A. (Reviews document.)

Okay. I've read through that.

Q. And did you see a quote attributed to you in that article?

A. Can you refer me to the page that you are looking at?

Q. I am on the third page --

A. Okay.

Q. -- and the third to last paragraph. It says:

"'The need for funding and investment in facilities is only going to increase, and this is one of the ways the administration thinks we might be able to get to that issue, starting now,' said Andrew McIlroy, the VA's deputy assistant secretary for budget."

A. I see that, yes.

Q. Could you briefly describe for me the need for funding and investment in facilities within the VA.

A. So the VA has approximately 172 medical centers and 12 to 14 locations of care. The average age of a VA hospital is now reported in the 50- to 60-year-old range. Whereas, the average age of a private sector hospital is maybe in the 10- to 20-year range.

So doctors and care providers often find that VA facilities are not adequate to meet

the care demands of today, and so that's why there is the estimated need for significant replacement or investment in facilities.

Q. Is it fair to say that you're highlighting a gap between what the VA needs for these projects and what has been currently funded?

A. There is a gap, yes, between what is needed and what is funded. That is true.

Q. Thank you.

Mr. McIlroy, we are just about at an hour on the record. Would you like a short break to grab some water, anything like that?

A. Ah, you know, we can keep going. I'm fine. I have some coffee here.

Q. Okay. Are you familiar with the Rand Corporation?

A. In general, yes.

Q. Are you aware that the Rand Corporation reviews budgeting information regarding veterans programs and federal resource allocation?

A. In general, yes.

MR. VANSLYKE: I will share in chat a report from the Rand Corporation.

I will mark that as Exhibit 6.

(Document marked for identification as McIlroy Exhibit 6.)

BY MR. VANSLYKE:

Q. And can you see my screen at the moment?

A. I can.

Q. So at the bottom of the first page, do you see the logo from the Rand Corporation?

A. I do.

Q. And the title appears to be "Volume 6, Planning, Programming, Budgeting, and Execution in Comparative Organizations," correct?

A. Yes.

Q. And the subtitle is "Additional Case Studies of Selected Non-DoD Federal Agencies," correct?

A. It is, yes.

Q. And on the second page, I see this copyright from 2024, correct?

A. I see that as well.

Q. So I have used the Control F feature for the name "McIlroy" and do you see on page 29 as a source they say the "Authors' analysis of

information from McIlroy, 2023"?

A. I see that, yes.

Q. Do you understand what that citation would be to?

A. As I recall, they came to talk to me. We provided them some documents. It's been a while.

Q. So I'm looking at Footnote 54, which says "Fiscal Year 2025 budget and performance guidance was issued on May 2, 2023 (McIlroy, 2023)."

Do you see that?

A. I do.

Q. Could you explain to me what that guidance document is?

A. So I believe they are referencing our annual budgetary guidance. So as you see in the graphic above, there's kind of a process and a timeline for submitting the budget.

So in the early summer, we ask the components of VA to submit their budget requests for the coming budget year. And then in the midsummer, you see there July. We review those generally with the Secretary, and in August we

submit those to OMB.

And so that's OMB's guidance document kicks off the process and says: VA components please submit your budget submissions in this fashion and on this timeline.

Q. And is there subcomponent -- some component of that information that is not available to the public?

A. All that information would be predecisional.

Q. So I'm looking at Footnote 52 now, which says "Andrew McIlroy, Fiscal Year 2025 Internal Budget and Performance Submission Guidance, U.S. Department of Veterans Affairs, May 2, 2023, Not available to the general public."

Do you see that?

A. I do.

Q. Do you understand what that is describing as "not available to the general public"?

A. I do.

Q. Could you explain to me which part of that is not available to the general public?

A. So the budget process is, in

general, considered predecisional and not subject to public release. These would be internal documents directing, like explaining the Secretary's priorities or the President's budgetary priorities, those kind of things. So we do not post those documents to public websites.

Q. Thank you.

I will stop sharing for now.

Is it fair to say that you are recognized in the policy and budget community as an expert on VA funding and appropriations?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: I think I have great expertise.

BY MR. VANSLYKE:

Q. Would you agree that others in the policy and budget community appear to cite to you as an authority?

A. Some have, yes.

Q. And over your 20-plus-year career in federal budget work, you have seen multiple administrations and Congresses, correct?

A. That is true, yes.
Q. And has that included shifts in fiscal and political priorities?
A. Yes.
Q. And your work has included adapting to those shifts, correct?
A. Correct.
Q. And it seems that you have been able to do so successfully, correct?
A. I think so, yes.
Q. You have been able to fulfill your job duties under each fiscal year, correct?
A. Correct.
Q. Are you aware that the United States has identified you as a nonretained expert in the Camp Lejeune Water Litigation?
A. Yes.
MR. VANSLYKE: I will place in chat the United States damages disclosures.
THE WITNESS: That's File 3A?
MR. VANSLYKE: Correct, File 3A, and I will mark that as Exhibit 7.
(Document marked for

identification as McIlroy Exhibit 7.)

BY MR. VANSLYKE:

Q. Can you see that I'm sharing my screen?

A. Yes.

Q. And you can see that this is a document in regard -- In re the camp -- excuse me. Let me rephrase.

This is a document In re Camp Lejeune Water Litigation in the United States District Court for the Eastern District of North Carolina, correct?

A. I see that, yes.

Q. And scrolling down, do you see the title "The United States' Second Disclosure of Expert Testimony for Phase III Pursuant to Federal Rule Civil Procedure 26(a)(2) and D.E. 630," correct?

A. I do see that, yes.

Q. And I have searched for your name, which brings me to page 3.

And do you see your name listed here?

A. I do.

Q. And will you briefly review the first paragraph and let me know when you're finished.

A. (Reviews document.)

I finished.

Q. Does that fairly describe the job history that we have just discussed in detail?

A. It does.

Q. And do you see the following paragraph reads:

"Mr. McIlroy is expected to offer testimony under Federal Rule of Evidence 702, 703, or 705 to include opinions about the sources of funding of benefits programs administered by VBA. In particular, Mr. McIlroy is expected to support his opinions based on the following information: A. VA's disability compensation and pension benefits are funded through annual Congressional appropriations. B. These appropriations are from the general fund, meaning VA benefits are funded through general taxpayer revenues and federal borrowing."

Did I read that correctly?

A. You did.

Q. Were you aware that you were expected to offer this testimony?

A. I am aware, yes.

Q. Does this accurately describe all of the testimony that you are aware of being expected to offer at this time?

A. Yes.

Q. Do you agree that the VA's disability compensation and pension benefits are funded through annual congressional appropriations?

A. Yes.

Q. Could you briefly describe for me what that means?

A. So every year, as you saw previously, we go through a budget process where we estimate the needs for veteran compensation and pension. We work through OMB, and the President makes a request to Congress in the annual President's budget. Congress will hold a series of budget hearings and deliberates and then ultimately appropriates funds for disability compensation and pension.

Q. And would you agree that these

appropriations are from the general fund, meaning VA benefits are funded through general taxpayer revenues and federal borrowing?

A. I agree, yes.

Q. And could you please briefly explain to me what that means?

A. So federal government every year collects money from a variety of sources. Most of the money that funds the federal government comes from general taxes, which is personal taxes and corporate taxes, and that's supplemented by federal borrowing because the income is not sufficient to pay all the expenditures, and all that funding goes into the general fund.

The federal government is big. There are a variety of different funds, but in the case of compensation and pensions, those costs are paid through taxes and borrowing that flow into the general fund.

Q. Do I understand correctly that the general fund encompasses more than benefits programs administered by the VBA?

A. It does, yes.

Q. Are there alternative sources of

funding for federal government programs other than the general fund?

A. It depends. You know, so, for example, you and I all pay Social Security tax, and that goes into the Social Security fund. You pay -- when you buy gasoline, you pay a gas tax, and that goes into the kind of road transportation fund. But, in general, individual and corporate income tax goes into the general fund.

Q. And using your example of the Social Security fund, other than the source of the tax funding, could you explain to me the difference between the general fund and the Social Security fund?

MR. KLOTZBUCHER: Object to form and foundation.

You may answer.

THE WITNESS: They are for different purposes. So the general fund funds, in general, the general operations of the federal government. Social Security trust fund funds Social Security benefits.

BY MR. VANSLYKE:

Q. What does it mean when you refer to it as a "trust fund"?

MR. KLOTZBUCHER: Object to foundation.

THE WITNESS: If you want to know about Social Security, you should go ask people from Social Security.

BY MR. VANSLYKE:

Q. In general, how would you describe a trust fund?

A. So a trust fund has kind of -- it depends. A private trust fund could mean, you know, a corpus of funding supports whatever activity through interest of the trust fund. So it can depend.

Q. Does the general fund operate on interest in the same way?

A. No.

Q. And why not?

A. That's how Congress has established it.

Q. What about the general fund precludes it from operating on interest?

A. The federal government operates at a

deficit. So there, you know, the general fund receives funds from taxpayers and borrowing and then, you know, that money is disbursed through the programs of the federal government.

Q. Are there any VA programs that operate on a trust fund?

A. Like, the definition of trust fund is complicated. VA programs operate in a variety of different ways.

Q. Are there any VA programs that operate on interest accrual rather than annual appropriations?

MR. KLOTZBUCHER: Object to form.

THE WITNESS: Yeah.

BY MR. VANSLYKE:

Q. Is there something that you don't understand about that question?

A. Can you rephrase it?

Q. Are there any VA programs that operate on funds not contained in annual congressional appropriations?

A. Yes.

Q. Could you describe those for me?

A. The VA canteen operation, for example. If you go to a VA hospital, you can have lunch at, you know, the lunch counter. We call it the canteen, or there's probably a convenience store, coffee shop at a VA hospital. All those operate on self-funded basis, for example, in general, except during the pandemic.

The VA operates insurance programs and, in general, those are funded through insurance payments of the beneficiaries or of the program participants, rather.

Q. Is it correct to say that none of the VBA benefits are operated on funds other than annual congressional appropriations?

A. The home loan program, for example, the VA guaranteed loan program, in general, much of that operates without an annual appropriation. That's possible because veterans pay an application fee. When they receive the loan, they pay a reduced rate of interest or they pay -- yeah, in general that operates without an annual appropriation.

Q. When you referred to insurance programs, were those for employees of the VA?

A. No. Those are for veterans or service members.

Q. Could you describe those insurance programs for me?

A. There are a variety of insurance programs. You can have -- look on the VA website for details, but they are, in general, life insurance programs. So if you want to have life insurance, this is -- could be an affordable option for obtaining life insurance.

Q. When you referred to those insurance programs, were you including any medical insurance programs?

A. No.

Q. So looking back at this document, under bullet B it says:

"VA benefits are funded through general taxpayer revenues and federal borrowing."

Given that you just described programs that are not funded through general taxpayer revenues and federal borrowing, could you more clearly define which VA benefits are funded through general taxpayer revenues and federal borrowing?

A. Specifically --

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: So specifically disability compensation and pension benefits are funded through the general fund.

BY MR. VANSLYKE:

Q. And would that include all VBA disability payments?

A. It includes disability compensation and pension payments paid through that fund, yes, or that account, rather.

Q. What would be disability and compensation benefits not paid through that account?

A. Oh. Yeah, I don't think there are any. It's complicated, but I don't think there are any. Yeah. No, there are none.

Q. Does this meaning of VA benefits include all variables to VBA disability payments, such as special monthly compensation rates?

A. Yes.

Q. Do you understand what DIC benefits are?

A. You could explain it.

Q. One moment.

Apologies. I was forgetting the acronym for a moment.

DIC is Dependency and Indemnity Compensation benefits.

Are you aware of those benefits?

A. Do you have a further explanation?

Q. My understanding is that DIC benefits are a tax-free monthly payment for eligible surviving spouses, children, or parents of service members who died in the line of duty or from service-related injuries.

Do you understand that to be correct?

A. That sounds accurate, yes.

Q. Is it fair to say that those benefits are distinct from the VBA disability benefits that veterans receive?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: Can you rephrase?

BY MR. VANSLYKE:

Q. Would you classify VBA disability benefits and the DIC benefits that we just discussed as the same thing?

A. They are provided for different purposes. They are different.

Q. Are DIC benefits included in this meaning of "VA benefits are funded through general taxpayer revenues and federal borrowing"?

A. They are paid through the compensation and pension account.

Q. And you previously stated that, to the best of your knowledge, all benefits through that account are funded through general taxpayer revenues and federal borrowing, correct?

A. Correct.

Q. Are you aware of the VA Community Care Network?

A. I am.

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: Although you can explain it. Go ahead.

BY MR. VANSLYKE:

Q. My understanding of the Community Care Network is that it is more or less analogous to essentially an out-of-network provider on a private insurance program.

Is that accurate?

MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: More or less, you know. Can you give a better description?

BY MR. VANSLYKE:

Q. Apparently my description is inadequate. Could you describe it for me?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: The Community Care Network is how we provide for veteran health care in non-VA facilities.

BY MR. VANSLYKE:

Q. And are those benefits included in

this statement that "VA benefits are funded through general taxpayer revenues and federal borrowing"?

A. So those benefits are paid through a different account. It's paid through the VA health care account, but it is funded through the general fund. That is true, yes.

Q. Are there differences in how the VA budgets for those two accounts?

A. Yes.

Q. Could you briefly describe the differences?

A. Well, they're budgeting for different things. So in the case of the comp and pen account, we are estimating the payments for veterans and their family members for compensation and pension costs, and in community care for medical services, all the VA health care accounts we are estimating the cost of health care.

So they are different.

Q. You described the Community Care Network as how the VA pays for services not at a VA medical facility; is that correct?

A. That is true.

Q. Would it be fair to describe those payments as reimbursements?

MR. KLOTZBUCHER: Objection. Form and foundation.

You may answer.

THE WITNESS: So doctors or hospitals in the community provide services to veterans. Those services are not free. The VA pays for those services.

BY MR. VANSLYKE:

Q. Mr. McIlroy, you have not prepared a written expert report for this litigation, correct?

A. That is correct.

Q. While I understand you are capable of testifying in much greater detail about these topics, are the topics that we have discussed under bullet points A and B an accurate summary of the opinions that you expect to offer in this litigation?

A. Yes.

Q. Have you reviewed any deposition transcripts from this case in preparation for your

testimony today?

A. I have not.

Q. Have you reviewed any of the expert reports that have been issued in this litigation?

A. I have not.

Q. I am moving to page 2 of the same document.

Do you see that this identifies Jadine Piper?

A. I do.

Q. And it says here that "Jadine Piper has served as Acting Assistant Director for Policy at the VBA since March 10, 2025"; is that correct?

A. I do not personally know Jadine but...

Q. Do you agree that that's what it says in the document shared on the screen?

A. That is what it says, yes.

Q. So you said you do not know Jadine personally, but have you worked with Jadine Piper?

A. I don't recall.

Q. Is it safe to assume then that you have not spoken to her about this case?

A. I have not spoken to her about this

case.

Q. Okay. I'm moving back to your section of this document, and you can see on the screen again bullets A and B, correct?

A. I can, yes.

Q. Do I understand correctly that you are not offering any opinion that VA will pay any specific future benefit amount to any individual plaintiff?

A. I have no knowledge of that.

Q. And similarly, you are not offering any opinion that current benefit laws will remain unchanged for the lifetime of any individual plaintiff, correct?

A. I have no ability to predict the future.

Q. And you are not offering any opinion about how damage calculations should be performed in this litigation, correct?

A. I have no opinion on that.

Q. And you are not offering any opinion predicting specific future congressional actions regarding veterans benefits, correct?

A. I cannot predict what Congress will

do in the future.

MR. VANSLYKE: Okay. I will stop sharing my screen.

I would like to take a short break before we continue.

Can we go off the record?

THE VIDEOGRAPHER: All right. We're going to go off the record at 10:30 AM.

(A recess was taken.)

THE VIDEOGRAPHER: Back on the record at 10:44 AM.

BY MR. VANSLYKE:

Q. Mr. McIlroy, if I refer to the VA's annual Budget in Brief, do you know what I'm referring to?

A. Yes.

MR. VANSLYKE: I am placing in chat the Fiscal Year 2026 Budget in Brief, which I will mark as Exhibit 8.

(Document marked for identification as McIlroy Exhibit 8.)

BY MR. VANSLYKE:

Q. And can you see that I'm sharing my

screen?
A. I can, yes.
Q. And this document says "U.S. Department of Veterans Affairs Fiscal Year 2026 Budget Submission," correct?
A. It does, yes.
Q. And at the bottom it says "Budget in Brief May 2025," correct?
A. Correct.
Q. Were you involved in the creation of this document?
A. Yes.
Q. I have scrolled down to page BiB-3. And do you see the title "VA Funding"?
A. I do.
Q. And below that is a table "VA Total Appropriations," correct?
A. Correct.
Q. Or would it be more accurate to call this a graph?
A. It is a graph. It's a bar graph, yes.
Q. And then below that is a table

titled "Funding History," correct?

A. Correct.

Q. In the bar graph section, I see the key at the top for mandatory versus discretionary appropriations, correct?

A. Correct.

Q. I know we have talked a little bit so far about mandatory versus discretionary appropriations, but could you please explain the difference between the two?

A. In general -- excuse me.

So, in general, discretionary appropriations are usually or often described as those appropriations that are subject to the annual appropriation action of Congress, and mandatory appropriations are frequently described as funding which is not subject to the annual appropriation action of Congress. However, in the case of VA, that is not true.

The VA mandatory funding is a part of the annual appropriation, and it describes a different stream of funding but still subject to the annual appropriation process.

Q. Is that true for all VA funding

labeled "mandatory" or is there any that is not subject to the annual appropriation?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: Is -- mandatory funding is -- comes from the annual appropriation process. That is true.

BY MR. VANSLYKE:

Q. Can you explain to me how that's consistent with your previous statement that that is not the case for VA mandatory funding?

MR. KLOTZBUCHER: Objection. Foundation. Form.

THE WITNESS: That was -- that is consistent. I have been consistent.

BY MR. VANSLYKE:

Q. Did I understand correctly that you stated that mandatory funding is typically that which is not subject to the annual congressional appropriation?

A. So that is true of many types of mandatory funding, like food stamps, for example.

The SNAP program is a mandatory program. If you look, that is -- doesn't have an annual appropriation and that is an annual or a mandatory program.

But in the case of VA, Congress can always do what it wants, and Congress chooses to annually appropriate mandatory funding for the VA.

Q. For examples like SNAP benefits that you pointed to, how is that funding provided if not through annual appropriations?

A. Yeah.

MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: Yeah. You can -- you can go talk to somebody from USDA about that, but those appropriations often have the language "such sums as necessary" so there's not a specific number.

BY MR. VANSLYKE:

Q. Would it be fair to say that legislation provides instructions to fund programs as necessary without specifying what those funds would be?

MR. KLOTZBUCHER: Objection. Form.

THE WITNESS: Yeah. I don't understand the question. Can you rephrase?

BY MR. VANSLYKE:

Q. I'm trying to understand what you just described for me.

So you said they often use language like "such funds as necessary," correct?

A. Some mandatory programs do use such language. That is true. Yes.

Q. And if Congress uses that language, what does that mean in terms of funds being allocated?

A. Funds are available as needed. So, you know, if you read in the Constitution, as you no doubt have, you know, "no funds shall be drawn from the Treasury but by action of Congress." So that is an action of Congress, and the phrase "such sums as necessary" allows funds to be drawn from -- from to be spent.

Q. And you've stated that VA funding is not allocated in that way, correct?

MR. KLOTZBUCHER: Objection. Form.

BY MR. VANSLYKE:

Q. I'm sorry. Did you answer? I didn't hear.

A. I did not.

Q. Would you like me to rephrase the question?

A. Yes, please.

Q. Are you aware of any VA programs that are funded through mandatory funds in that way?

A. In what way?

Q. In the way that you have described with language like "such funds as necessary."

A. If you look in the annual appropriations bill, you will see that one of the loan programs has that phrase "such sums as necessary," but the other programs like compensation and pension does include an annual specific appropriation number in the appropriation bill.

Q. And is the same true for VHA funding?

MR. KLOTZBUCHER: Objection to foundation.

THE WITNESS: Yeah. Is what true?

BY MR. VANSLYKE:

Q. What you just described about the compensation and pension fund being specified for annual appropriations, is that also true for VHA?

A. Yes, VHA also receives an annual appropriation.

Q. Can you explain to me how mandatory funds subject to an annual appropriation are different from discretionary funds?

A. So they are different in that they are treated differently in congressional accounting and in congressional budgeting. So often in the congressional budget process, there is focus on the discretionary funding.

Specifically if you read news reports about the annual appropriation process, you will hear people talk about they want to see, you know, growth or no growth in the nondefense discretionary accounts -- so VA would be part of that as well as DOJ and other federal agencies --

as opposed to growth in the defense discretionary accounts. So there's often debate about the level of growth of the discretionary funds for defense and nondefense.

Q. And looking at the graph in this document, I see from Fiscal Year 2022 through 2026, the discretionary funds have varied between 116.3 billion to 140.1 billion; is that correct?

A. 140 billion, yes.

Q. The widest range not chronologically is 116.3 to 140.1, correct?

A. Just doing the math from year to year, that is a jump of -- yes, that would be the biggest jump.

Q. And from Fiscal Year 2022 to Fiscal Year 2026, I see a range of 157.5 billion to 301.2 billion, correct?

A. Correct.

Q. Would you agree that the difference between 301.2 billion versus 157.5 billion is greater than the difference between 140.1 billion versus 116.3 billion?

A. Mathematically, yeah.

Q. So is it fair to say that there has

been more change in the mandatory spending than there has been in the discretionary spending?

A. Yes.

MR. KLOTZBUCHER: Objection. Form.

BY MR. VANSLYKE:

Q. Can you explain to me why there has been such a significant change in the mandatory spending?

A. So the primary driver in the mandatory spending is compensation and pension. There's also education benefits in there, and over time the number of veterans who are receiving compensation and pension benefits has increased as well as the average amount of benefits that those veterans has received.

Also within that, those green bars, the mandatory count starting in 2022, there is also the addition of the TEF funding, the Toxic Exposures Fund.

Q. So you indicated that there has been an increase in the average amounts received under the compensation and pension fund, correct?

A. That is true. Yes.

Q. Are you aware of why that average amount has increased?

A. So if you look over time, the average disability rating for veterans has increased.

Q. And you also stated that there has been an increase in the number of veterans receiving those benefits, correct?

A. That is true.

Q. Are you aware of any reasons why that has increased?

A. The PACT Act is a primary contributor to that.

Q. And if I look down at the Funding History table, I'm looking at the Total VA line. It looks like going back to 2016, the total VA budget was 166.9 billion; is that correct?

A. That is correct.

Q. So between 2016 and 2026, it has increased from 166.9 billion to 441.2 billion?

A. That is correct.

Q. Looking at the 2026 mandatory versus discretionary in the graph, is it fair to say that mandatory spending represents roughly two-thirds

of the VA's total budget?

A. Approximately. You could do the math.

Q. Under VA mandatory spending, does that automatically grow as more people qualify for benefits?

A. As more veterans receive benefits, the budget will grow, yes.

Q. But that is still subject to annual congressional appropriations?

A. That is true.

Q. And you have spoken about the general fund operating at a deficit.

Would that deficit increase as these funds increase unless Congress raises revenues in other ways?

A. So the veteran benefit costs and veteran health care costs contributes to total federal expenditures, and those federal expenditures do exceed, you know, taxpayer revenue and force the federal government to borrow. That is true.

Q. So absent other changes to revenue, if the mandatory spending in Fiscal Year 2027 were

to increase by $100 billion then presumably the deficit would increase by $100 billion?

MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: There are many factors that go into the deficit calculations.

BY MR. VANSLYKE:

Q. You do agree that the VA mandatory spending comes from the general fund, correct?

A. I do.

Q. And you have stated that the general fund operates at a deficit --

A. That is true.

Q. -- correct?

If the other variables remain the same but the VA mandatory spending increased, the deficit would also increase, correct?

A. That seems logical, yes.

Q. Do you know how many individuals receive benefit payments through the compensation and pensions fund?

A. It's under 7 million. It's in the bid.

Q. And I believe you stated that the compensation and pensions fund is the largest component of the VA's mandatory budget, correct?

A. Yes.

Q. Have you heard disability benefits referred to as appropriated entitlements?

A. Yes.

Q. Do you understand what that refers to?

A. You could explain it.

Q. I don't understand. Could you explain it?

A. Yes. So it's called an "entitlement" because the veterans by law if they meet the criteria for the benefits, they are entitled to receive them. But as we have discussed, it is included in the -- or funding for those benefits is included in the annual appropriations act and is appropriated on an annual basis. So they are called "appropriated entitlements."

Q. Is that different than if something were described simply as an entitlement?

A. I don't know. I suppose it depends

on the context.

Q. If I were to describe VA disability benefits as simply entitlement benefits, would you disagree?

MR. KLOTZBUCHER: Objection. Foundation. Hypothetical.

BY MR. VANSLYKE:

Q. You can still answer.

A. Can you repeat the question?

Q. If I were to refer to disability benefits through the VBA as entitlements, would you disagree?

MR. KLOTZBUCHER: Objection. Foundation and form.

BY MR. VANSLYKE:

Q. You can still answer.

A. No.

Q. You would not disagree with that statement?

A. I would not disagree with that statement.

Q. So you do not think it's necessary to distinguish them as appropriated entitlements?

MR. KLOTZBUCHER: Objection.

Form and foundation.

THE WITNESS: Yeah. It depends on the context.

BY MR. VANSLYKE:

Q. In what context would that distinction matter?

A. In the appropriations process. If there was no appropriation, there would be no money.

Q. And what would that mean?

A. There would be no money to pay those benefits without the annual appropriation.

Q. And what would happen to those benefits?

A. So if there was no appropriated funding, then what happens is, we would hold those payments until there was an appropriation and we would make those back payments.

Q. So looking at this graph, the 2026 fiscal year includes $301.2 billion in mandatory spending, correct?

A. Correct.

Q. And you have stated that this includes the compensation and pensions fund,

correct?

A. Compensation and pensions account, yes.

Q. And if at the end of Fiscal Year 2026 there had been 50 billion additional benefits owed, you would not have funding appropriated for those benefits at this time, correct?

A. In the compensation and pension account, if we had more payments due than we had funding, we wouldn't have been able to pay those benefits. That is correct.

Q. And would the outcome be similar to what you're describing, that you would hold those payments until funding was received?

A. Yes.

Q. And earlier you stated that you cannot predict what Congress will do, correct?

A. I cannot predict what Congress will do, yes. True.

Q. Is it possible that Congress would choose not to fund those benefits entirely?

MR. KLOTZBUCHER: Objection. Foundation.

BY MR. VANSLYKE:

Q. You can still answer.
A. Can you restate the question?
Q. Is it within Congress's power to choose not to fund those benefits entirely?
A. Generally, Congress can do whatever it wants. Historically, they have always funded veteran benefits, though.
Q. Understood.
All right. I will stop sharing.
So we have spoken already about the appropriations process, and I would like to just walk through that cycle.
So your office leads the budget formulation for the VA, correct?
A. Correct.
Q. And the VA prepares a budget request and submits it to OMB?
A. Correct.
Q. And you are very involved in that process, yes?
A. I am, yes.
Q. OMB then reviews that budget request, correct?
A. Correct.

Q. And do they have the ability to make adjustments?

A. They do.

Q. And once OMB approves the budget request, they would include it in the President's budget submitted to Congress, correct?

A. That is true. Yes.

Q. And when Congress considers the VA appropriations, it goes through the appropriations committees and subcommittees?

A. That is true. Yes.

Q. And then once Congress passes an appropriations bill or a continuing resolution and the President signs it, the VA receives budget authority, correct?

A. Yes.

Q. And you've stated that even for mandatory programs like compensation and pensions, Congress must enact an appropriation providing that budget authority each year, correct?

A. Correct.

Q. And after appropriations are enacted, OMB apportions the funds to the VA, correct?

A. That is true. Yes.
Q. So this means that OMB sets limits on how much the VA can obligate in a given period, correct?
A. Within certain parameters of law, they cannot impound the funds, but yes, they can place criteria in the apportionment document.
Q. And the VA must comply with the OMB's apportionment, correct?
A. That is true. Yes.
Q. And the VA cannot obligate more than the apportioned amount?
A. That is true. Yes.
Q. To your knowledge, does OMB have any authority to adjust VA's apportionments or allocations in a way that reflects OMB's priorities among different federal departments?
A. So OMB has authority to make adjustments to the apportionments. The basis for their adjustments, you should ask them.
Q. I'm not asking for a basis, but it sounds like you are confirming that they have the ability to make those adjustments?
A. That is true. Yes.

Q. And then within the VA, you or your office would then allocate funds to the various administrations within the VA, correct?

A. Correct.

Q. And within the VA, do you have authority to adjust allocations across these administrations based on priorities within the VA?

A. No. We are bound to follow the appropriations act and the numbers provided in the apportionments.

Q. And earlier you described if you transfer funds from one account to another that you have to go back and seek approval from OMB and Congress, correct?

A. We have to follow the law. That is true.

Q. Did I mischaracterize the law?

A. No.

Q. Okay. So there are multiple layers of approval required for VA spending, correct?

A. That is correct. Yes.

Q. It requires congressional approval, OMB approval, and VA approval?

A. That is correct.

Q. And if Congress fails to pass appropriations and there's a lapse in funding, the VA cannot make payments even for mandatory programs without appropriated funds, correct?

A. That is true, except Congress in the case of compensation and pension and the health care accounts has provided an advance appropriation. So they are providing money a year in advance which enables us to continue making payments even in the case of a government shutdown, which we call a lapse in appropriations.

Q. You said that was for health care spending, correct?

A. As well as for compensation and pension.

Q. So the compensation and pension is funded a year in advance?

A. Correct.

Q. When you say "a year in advance," do you mean a full year in advance or it is paid through the end of the upcoming fiscal year?

A. A full year in advance. So in FY25, if you look at the appropriation act in FY25, they made an appropriation for the entire estimated

amount for FY26.

Likewise in FY26, in that appropriation act, they appropriated funds for the entire estimated amount of payments in FY27. So we have money today in FY26 for the entire estimated amount for FY27 as of the estimates that we released in May of 2025.

Q. And those estimates would be based on the actuarial analysis that we discussed earlier, correct?

A. Yes.

Q. So when you describe these funds being allocated in advance, do you know the end date of the current funding?

A. When the funds are appropriated, they are appropriated to be available until expended. So Congress appropriates funds in a variety of fashions. Sometimes they appropriate single year funds. Sometimes they appropriate funds that are available for an obligation or expenditure over the course of multiyears, or in some cases like compensation and pension, they are appropriated until expended. So they are good until they are completely obligated.

Q. When you talk about the estimates that those one year in advance appropriations are based on, what is the end date of those estimates?

A. So the estimates are based on the expected payments to be made in that fiscal year. So in the FY26 budget, we made estimates for the total sum of payments -- in this case compensation and pension payments -- to be made in FY27, and that's the number that was included in the budget request to be made and appropriated in advance for FY27.

Q. So to clarify, those are through the end of Fiscal Year 2027?

A. Correct.

Q. And do I understand that correctly that you would refer to the end of Fiscal Year 2027 as being in 2028 calendar year?

A. No. 20 -- the end of FY27 will be September 30, 2027.

Q. Thank you.

Are you familiar with the Antideficiency Act?

A. I am.

Q. Could you describe for me in your

own words how that applies to the VA and its appropriations?

A. The Antideficiency Act applies to, in general, all federal agencies and all federal appropriations. It says that you cannot exceed or you cannot obligate or expend greater than the appropriated amount.

Q. Is that the basis for what you stated earlier that if funds were not appropriated, you would pause payments until funds were appropriated?

A. That is true. That is one of the reasons why.

Q. Would you agree that in recent years Congress has sometimes failed to pass a full year appropriations by the start of the fiscal year?

A. That is true.

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

BY MR. VANSLYKE:

Q. And when that happens, Congress sometimes passes a continuing resolution, correct?

A. That is true.

Q. Can you explain to me how a continuing resolution applies to VA's funding?

A. Yes, I can.

Q. Will you please do so?

A. Yes. So essentially when a continuing resolution is passed, that means that agency receives the same level of funding as in the prior year. So yes.

Q. Would you say that a continuing resolution creates any uncertainty for VA budget planning?

A. Yes, it is uncertain.

Q. Can you describe what uncertainties it creates?

A. So when there is a continuing resolution, we do not yet know the full year funding. So that is the degree of uncertainty. We are subject to the prior year funding level.

Q. And are you subject to the entire prior year's funding level or only a portion of it?

A. Depends on from account to account. So in the case of those accounts like compensation and pension where we have advance request or an

advance appropriation, that is the amount of funding that would be available during a CR.

So in those cases, even though there is a CR, for compensation and pension as well as for the medical care accounts, there is no uncertainty because we have the advance appropriation.

Q. We spoke earlier about the mandatory spending can fluctuate based on preexisting legislative instructions, correct?

A. Mandatory spending will vary based on the law. So veterans are entitled to receive benefits. Those benefits are due by the law. So if the law changes, veteran benefits will change.

Q. So if the VA in a given period is subject to a continuing resolution binding them to the prior year's spending, does that allow for increased spending as required by the laws creating mandatory appropriations?

A. So a CR doesn't change the level of benefits to which veterans are entitled.

Q. If the number of veterans entitled to those benefits increases in a period while the VA is subject to a continuing resolution, does the

continuing resolution allow the VA to pay those increased benefits to those additional veterans?

A. So paying benefits requires VBA employees to process the monthly payments. It requires VBA employees to process claims and determine eligibility and, thus, make payments.

But even during the CR, those activities related to the payment of benefits, processing the annual or the monthly payments, receiving claims, reviewing claims, approving claims, all those are considered excepted activities and they continue during a CR.

So a CR doesn't impact veterans receiving benefits.

Q. Would that change after a certain period of time if a full appropriation is not passed?

A. No.

Q. Why not?

A. Because the function in providing claims is considered an excepted function, and it's not related to the duration of the CR. So if the CR was a day or 45 days, those employees in VBA that process claims and provide for the

monthly payments continue to work.

Q. And the payments to the veterans themselves would also continue throughout the CR?

A. Yes, because those payments were -- specifically for compensation and pension were provided in advance. So we have all the funds that we estimated.

So in the case of this year where we had a CR of some 45 days, we had all the advance appropriation for compensation and pension for the estimated amounts of claims in FY26.

Q. If a series of CRs were passed through the end of the advance appropriations, would the CR allow those benefits to continue being paid at the current levels?

A. So historically, yes. So in FY25, for example, there was a full year continuing resolution. So Congress did not enact a normal appropriation. They enacted a full year continuing resolution. And in that bill if you were to look, you would see that Congress appropriated the amount estimated in the President's budget as an advance for FY26.

Q. Do I understand correctly that that

is another instance of specific congressional appropriation for those benefits as opposed to an inherent feature of a CR?

A. If you look in the FY25 appropriations act, which was a full year continuing resolution, you will see that Congress appropriated funds in advance for the compensation and pension account, yes.

Q. If that provision had not been included in the CR, those funds would not have been allocated in advance, correct?

A. Correct.

Q. In addition to appropriations, Congress can also amend statutes governing VA benefits, correct?

A. That is true. Yes.

Q. Are you aware of Congress doing so?

A. Yes.

Q. For example, can Congress change eligibility criteria for VA benefits?

A. They have, yes.

Q. Can Congress change criteria for how ratings are to be applied to disability benefits?

A. They could, yes.

Q. Can Congress change formulas for those benefits?
A. They could, yes.
Q. Can Congress change how cost-of-living adjustments are applied to those benefits?
A. Presumably, yes.
Q. Can Congress change dependency allowances that modify those benefits?
A. They could, yes.
Q. Can Congress change survivor benefits, such as the DIC benefits we discussed earlier?
A. They could, yes.
Q. So all of those potential changes to VA benefits programs are within Congress's power to change, correct?
A. Yes.
Q. And, for example, Congress has previously expanded presumptions related to Agent Orange, correct?
A. That is true. Yes.
Q. Congress has made changes related to the GI Bill and education benefits, yes?

A. Yes.
Q. Have they made changes to housing and readjustment benefits?
A. They have.
Q. So while current law creates an appropriated entitlement structure, future law could reduce or restrict those benefits, correct?
A. The law could change in the future. That is true.
Q. And as you stated previously, you would not be able to predict what Congress would do in this regard, correct?
A. I cannot predict what Congress will do. That is true.
Q. From a budget perspective, a change in eligibility requirements or benefit formulas would directly affect the amount that the VA needed to request in future appropriations, correct?
A. That is true.
Q. Have you made previous adjustments to VA budget requests based on those topics?
A. Yes.
Q. And even if Congress does not change

the underlying benefits themselves, you agree that Congress could fail to appropriate sufficient funds to pay all VA benefits, correct?

A. That is true.

Q. Earlier I referenced Fiscal Year 2024 when the VA made a supplemental appropriations request for 2.9 billion.

Do you recall discussing that?

A. I do.

Q. Would you agree that that supplemental request was made based on a perceived need of concern for inadequate funding?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. Is there something you'd like to clarify about that statement?

A. I think that is an accurate statement. We estimated there was a need for additional funding and we asked for additional funding. Potentially a need for additional funding would be the most correct way to describe

it.

Q. Was it later determined that the VA in fact had sufficient funding?

A. Yes, we did determine that.

Q. But if that had not been the case and the supplemental funding had not been granted, the VA would have faced a shortfall in the compensation and pensions account, correct?

A. That is true. Yes.

Q. Would that have been despite the funds in the compensation and pension account being appropriated a year in advance?

A. Yes.

Q. And that supplemental request had to go the full approval process that we discussed earlier, correct?

A. That is true. We worked with people here at VA and OMB and we made a request through OMB and the President to Congress for additional funds.

Q. So in the event of a shortfall like the one the VA was concerned about in 2024, there is no automatic mechanism to ensure that Congress will always provide supplemental appropriations,

correct?

A. That is true. We have to ask for additional funds.

Q. Would you agree that the VA has no authority to simply create new budget authority on its own?

A. As the law currently reads, we do not have that authority.

Q. And would you agree that the VA cannot spend beyond appropriated amounts?

A. That is true. We cannot spend beyond appropriated funds amounts.

Q. So from a legal and financial control standpoint, the VA's ability to pay benefits is constrained by the amount Congress has appropriated, correct?

A. That is true.

Q. Are you aware generally that external budget analysts often identify veterans benefits as one of several rapidly growing mandatory aid programs?

A. I have --

MR. KLOTZBUCHER: Objection.

You may answer.

Objection.

THE WITNESS: I have heard that, yes.

BY MR. VANSLYKE:

Q. I'm sorry. Can you restate your answer?

A. I have heard that, yes.

Q. If I reference external budget analysts expressing those concerns, you understand what I'm referring to, correct?

A. Generally, yes.

Q. Do you understand that in the broader federal budget debate, mandatory programs are increasingly the focus of deficit reduction discussions?

A. I generally understand there's a lot of talk about that, yes.

Q. Can you explain to me why reducing mandatory spending would be important for deficit reduction?

A. It is a large and fast-growing component of the federal budget.

Q. If I refer to annual caps on discretionary spending, do you know what I'm

referring to?

A. I do.

Q. Could you explain what those annual caps are?

A. Yes. So in the context of the annual federal budget discussion, there are often proclamations or requests or commitments from various people involved in the annual budget process to hold discretionary spending to a certain rate of growth or to hold a component of the discretionary budget, like the nondefense component of the discretionary budget, to a certain rate of growth or to, you know, have a budget at a lower rate of growth or a negative rate of growth. All those are part of the budget discussions.

Q. And is it fair to say that those annual caps are not applied to mandatory spending?

A. You know, Congress can do what it wants, but the discussion is often around discretionary caps.

Q. And even though we have talked about VA benefits requiring annual appropriations, they are still not included within the bucket of funds

that are discussed with these annual caps, correct?

A. Specifically, the compensation and pension account is a mandatory account. So it is not a discretionary account, and the discussion is often about the discretionary accounts or the discretionary budget. That is true.

Q. And to contrast the two, mandatory spending is today a larger and faster-growing share of the federal budget than discretionary spending, correct?

A. That is true. Yes.

Q. Are you familiar with the Congressional Budget Office's periodic publications of budget options?

A. I am.

Q. Do you understand that these are documents that lay out possible ways to reduce federal deficits?

A. I am aware of that, yes.

Q. Are you aware that the Congressional Budget Office has identified options related to veterans benefits?

A. I am aware of that, yes.

Q. I am placing a document in the chat. Can you see that I am sharing my screen?

A. Yes, I can.

Q. And you see at the top it says this is from the Congressional Budget Office, correct?

A. I see that, yes.

Q. And the title says "Options for Reducing the Deficit: 2025 to 2034," correct?

A. Yes.

Q. I'm scrolling down to the Contents and then to the Mandatory Spending list. It's page 4 of the PDF. It does not appear to have a page number.

You can see this Mandatory Spending list, correct?

A. Yes. Agriculture, Housing, Education, Health. Yes.

Q. And do you understand this to be the Congressional Budget Office identifying options to reduce mandatory spending?

A. Yes.

Q. And if I look at Option 23, it says "Introduce Means-Testing for Eligibility for VA's

Disability Compensation," correct?

A. Yes.

Q. Could you describe what that might mean?

A. You want to know what that means, you should go read what CBO says.

Q. I have the document here. Would you like me to scroll down to that section?

A. Sure.

Q. Okay. So we're on -- there's now a page number. It says page 31 for Option 23. It looks like this section is only one page. The next page starts a new section.

So please take a moment to review page 31 and let me know when you've finished.

A. I will review the documents you provided.

(Reviews document.)

All right. I have read what's on page 31.

Q. Could you summarize your understanding of what this option would do?

A. So currently VA disability benefits are paid without regard to the current income of

the veteran. This would propose to reduce those benefits based on income.

So specifically CBO is suggesting that incomes above 135,000, I guess, would be -- those disability benefits would be reduced.

Q. I am scrolling down.

So I'm looking now at Option 27 on page 35.

Do you see that the title says "Use an Alternative Measure of Inflation to Index Social Security and Other Mandatory Programs"?

A. I do.

Q. Would you like to review this section before you tell me what you understand that to mean?

A. Yes.

Q. Okay. I'll give you time. Please let me know when you finished reviewing.

A. (Reviews document.)

Okay.

Q. And can you summarize for me what you understand that option to mean?

A. So Social Security and other benefits, like compensation and pension program

here at VA, grow based on an annual inflation rate. That's called the cost-of-living adjustment, or a COLA. That is tied to a certain way of calculating the annual creation rate done by the Bureau of Labor Statistics.

There are other ways to calculate those estimates or those annual inflation rates. If you used a lower inflation rate, the costs would grow at a lower rate. So they're proposing to use GCPI, which has historically grown at a lower rate, and that would reduce the cost of benefits, like Social Security and compensation and pension at VA.

Q. Okay. I'm scrolling back up to Option 26. This is on page 34.

Do you see the title that says "Narrow Eligibility for VA's Disability Compensation By Excluding Veterans With Low Disability Ratings"? Do you see that?

A. I do, yes.

Q. Okay. Would you like to review before I ask you to describe it?

A. Yes.

Q. I will give you time. Please let me

know when you're finished.

A. (Reviews document.)

I have completed reading.

Q. And would you please describe for me what you understand this option to mean?

A. So currently, as you read there, veteran benefits are -- veteran benefits for service disabilities are paid according to a disability rating. It goes in 10 percent increments from 0 to 100 percent based on an estimate of kind of earning loss.

And what CBO is proposing is currently veterans start to receive benefits at the 10 percent disability rating. VA suggests that we could narrow the eligibility and only provide benefits to those rated 30 percent or higher. So those less than 30 percent would not receive benefits.

Q. Thank you.

I'm scrolling down to Option 55, which begins on page 65.

Would you like a moment to review this section?

A. Yes, please.

Q. Please let me know when you're finished.

A. (Reviews document.)

Okay. So what CBO is describing here in Option 55 is related to increase income or taxable income to the federal government by. Currently veteran benefits are excluded from tax. CBO proposes that disability benefits would be included in taxable income calculations.

Q. And do you understand that to suggest that the benefits themselves should be increased so that the benefits take home the same amount in their pocket?

A. That does not seem to be part of CBO's proposal.

Q. Do you understand instead that it would decrease the amount that the veteran gets to take home?

A. That would be the practical impact of this proposal, yes.

Q. I will go now to Option 40, which is on page 49.

Would you like a moment to review this section?

A. Yes.

Q. Okay. Please let me know when you're finished.

A. (Reviews document.)

Okay.

Q. And would you please describe what you understand this option to mean?

A. So this is related to how VA provides health care to veterans. So veterans when they enroll in the VA health care system, they are placed in a priority group ranging from 1 -- group 1 to group 8. Group 7 and 8 are tied to income or disability level -- disability rating level.

CBO proposes to unenroll or stop enrolling veterans in priority group 7 and 8. That would reduce the number of the veterans cared for by the VHA health care system and would reduce costs. So that is a way to reduce costs by reducing the number of veterans who receive health care services.

Q. Thank you.

I will stop sharing.

Court reporter, I believe I might

have forgotten to mark that as an exhibit. Is that correct?

Okay. I will mark that as Exhibit 9, please. Thank you.

(Document marked for identification as McIlroy Exhibit 9.)

BY MR. VANSLYKE:

Q. And I believe you, Mr. McIlroy, described those options as suggestions by CBO as to ways that Congress may reduce the budget deficit, correct?

A. That is true.

Q. As VA's budget chief, are you aware of any formal proposals within the current administration to adopt any of those options?

A. I am not.

Q. Are you aware of any proposals in recent administrations to adopt any of those options?

A. No. No.

Q. But the fact that these options are being studied and published reflects that veterans benefits are part of the broader conversation about controlling mandatory spending, correct?

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: Certainly benefits are part of the broader conversation about budgets. That's true.

BY MR. VANSLYKE:

Q. And you cannot rule out that future Congresses or administrations might pursue such changes to reduce the deficit, correct?

MR. KLOTZBUCHER: Objection. Foundation. Speculation.

BY MR. VANSLYKE:

Q. You can still answer.

MR. KLOTZBUCHER: You can answer.

THE WITNESS: Congress can do whatever it wants. I cannot rule it in and cannot rule it out.

BY MR. VANSLYKE:

Q. And would be the same be true that you cannot rule in or out whether the Trump Administration might pursue such measures in the future?

A. Hard to --
MR. KLOTZBUCHER: Objection. Foundation.
THE WITNESS: -- President Trump will do.
MR. VANSLYKE: I'm sorry. I couldn't hear you. Did you state an objection?
MR. KLOTZBUCHER: I said: Objection. Foundation.
You may answer.
THE WITNESS: Yes. So my answer is I cannot predict what President Trump will do.
BY MR. VANSLYKE:
Q. And would the same be true that you cannot predict what a future administration might do?
A. That is true. Yes.
Q. Do you know who VA Secretary Doug Collins is?
A. I do know who he is, yes.
Q. Are you aware that Secretary Collins testified before the House Veterans' Affairs

Committee on February 11th of 2026?

A. Yes.

MR. VANSLYKE: I am placing a file in chat. This is the statement published from Secretary Collins in regards to that hearing, and I will mark that as Exhibit 10.

(Document marked for identification as McIlroy Exhibit 10.)

BY MR. VANSLYKE:

Q. Can you see the document shared on my screen?

A. I can.

Q. And you see at the top that says this is the "Statement of the Honorable Douglas A. Collins, Secretary of Veterans Affairs, Department of Veterans Affairs (VA), Before the Committee on Veterans' Affairs, United States House of Representatives on Opportunities with VHA Reorganization, February 11, 2026," correct?

A. I see that, yes.

Q. Would you like a moment to review this document?

A. Do you want me to focus on some

specific part of it?

Q. Sure. Let me scroll down and find the section.

So I'm on page 2 and I'm looking at the first full paragraph, second sentence. Do you see that it says:

"This is the same conclusion we have heard for years from the VA's Office of Inspector General, the Government Accountability Office, and many in Congress - all of whom have repeatedly underscored the need to reorganize VHA."

Correct?

MR. KLOTZBUCHER: I'm going to object to foundation to this question and likely future questions because Mr. McIlroy is testifying to sources of funding of benefits programs administered by VBA, and this refers to the Veterans Health Administration.

So, Mr. McIlroy, you may answer with that caveat.

Objection. Foundation.

MR. VANSLYKE: I will rephrase before I proceed.

THE WITNESS: Okay.

BY MR. VANSLYKE:

Q. Mr. McIlroy, would you agree that in your role you oversee budgetary functions pertaining to VHA?

A. I do.

Q. Do you believe that you are informed as to the budget of the VHA?

A. I am.

Q. Can you speak with knowledge to the budget of the VHA?

A. I can.

Q. Thank you.

And do you see in this paragraph the sentence that I read previously?

A. "This is the same conclusion we have heard for years from VA's OIG, GAO, and many in Congress - all of whom have repeatedly underscored the need to reorganize VHA."

Q. Correct.

A. I see that sentence.

Q. Thank you.

And do you see -- excuse me -- in the first bullet it says:

"In 2016, GAO identified 'deficiencies in VHA's organizational structure and recommended significant restructuring, including eliminating and consolidating program offices and reducing VHA central office staff"?

A. I do see that sentence.

Q. And then the third bullet that says: "In 2019, GAO noted VHA's lack of a comprehensive policy to define Veterans Integrated Service Network roles and responsibilities."

Correct?

A. I see that sentence as well.

Q. Are you familiar with the Veterans Integrated Service Network?

A. Yes, I am generally familiar with VISN.

Q. Could you describe for me what that is?

A. VISN is kind of geographic area responsibility for, you know, providing guidance and oversight to the health care facilities within its geographic regional responsibility.

Q. Does this include both the VA health care system and the Community Care Network?

A. So the Community Care Network is administered through an office called IVC, Integrated Veteran Care, and they have lead responsibility for interacting with the third party administrators who assemble a network of community care providers.

Q. So am I understanding correctly that the VISN pertains to the VA health care directly and that the Community Care Network is not part of this -- part of this network?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: You can -- you got VHA people on your list. You can ask them about these things.

BY MR. VANSLYKE:

Q. Are you telling me that you don't know the answer?

A. What was the question?

Q. Am I understanding correctly that the regions you described under the Veterans Integrated Service Network do not apply to the Community Care Network?

MR. KLOTZBUCHER: Same objections.

BY MR. VANSLYKE:

Q. Go ahead and answer.

A. VISNs are primarily responsible for the VA direct care system.

Q. Thank you.

And the last paragraph on this page says:

"Chairman Moran said last year that, 'The VA needs reform. If the status quo were working, we would not have spent two weeks hearing from VSOs on way the VA needs to improve.'"

Correct?

A. I read that sentence there, yes.

Q. Do you have any understanding of what his statement is referring to?

A. VSOs are Veterans Service Organizations. They have a lot to say about how the VA should operate and about the ways VA can improve, and Chairman Moran appears to have held hearings and the VSOs came to those hearings and told Chairman Moran about ways the VA could improve.

Q. So scrolling back up to the first full paragraph, chairman -- I'm sorry, not chairman -- Secretary Collins' statement says, "You do not have to take my word for it," and then proceeds to list these examples.

And this page ends with the statement from Chairman Moran, correct?

A. All those things are on the page. That is true. Yes.

Q. Would you understand that to mean that Secretary Collins' statement here is endorsing the statement by Chairman Moran?

A. Secretary Collins believes the VHA should reorganize. So does Chairman Moran, I guess.

Q. And on the next page, the second paragraph says:

"So there is widespread agreement that VHA needs reorganization and reform, and that is exactly what we are doing."

Does that reflect the statement that you just gave me?

A. That is the statement of Secretary Collins.

Q. That you believe Secretary Collins believes that the VHA needs reform?

A. He put it in his testimony. Yes, I think he does believe that. That's what he testified to.

Q. Thank you.

I will stop sharing this document.

Are you aware of the VHA being restructured to date?

A. Generally, yes. I've read about VIPER. I've heard the hearings.

Q. Has the VA -- excuse me. Strike that.

Has the VHA already been restructured?

A. The VHA has restructured multiple times over the course of its existence.

Q. Could you describe examples of what you're referring to as a restructuring of the VHA?

MR. KLOTZBUCHER: Objection. Foundation.

BY MR. VANSLYKE:

Q. You can still answer.

A. So previous Under Secretaries have

reorganized. Dr. Stone when he was the Under Secretary reorganized. Yeah. So all variations on, you know, how best to organize lines of reporting and organizational structures.

Q. As far as Secretary Collins' statement that he wishes to reorganize the VHA, do you understand that as a desire to improve efficiency and reduce costs?

MR. KLOTZBUCHER: Objection. Foundation again to line of questioning referring to the VHA.

Mr. McIlroy, you may answer.

THE WITNESS: Yes, I think that's what the Secretary thinks he will do.

BY MR. VANSLYKE:

Q. Are you aware of any similar discussions to restructure VBA benefits?

A. No, but -- no.

Q. Are you aware of any discussions to reduce costs stemming from VBA benefits?

A. All federal leaders should be focused on reducing costs.

Q. And if an agency undertakes an

organization with the goal of cost reduction, that can include examining whether current benefit structures are sustainable, correct?

A. Can you rephrase the question?

Q. If you are looking at a government program in attempts to reduce the cost as you -- I'll rephrase again.

You stated that you believe federal programs should be looking towards reducing costs, correct?

A. Good managers should look at their costs, yes.

Q. And if -- excuse me.

If a manager is undertaking to reduce costs, that could include examining whether the current benefit structures and relevant appropriations are sustainable, correct?

A. A good manager should look at everything. So yes.

Q. From a -- from a budgeting perspective, do you believe that agencies should review whether current benefit structures and appropriations are sustainable?

A. Yes.

Q. Just checking in. I'm in a different time zone at the moment, but I believe it's about noon where you are, correct?

A. 12:09. Yes.

Q. Would you like a short lunch break?

A. I would.

MR. VANSLYKE: All right. Now would be a good time. So we'll go off record.

THE VIDEOGRAPHER: All right. We're going to go off record at 12:09 PM.

(Whereupon, at 12:09 PM, a luncheon recess was taken.)

AFTERNOON SESSION

(1:02 PM)

ANDREW MCILROY

called for continued examination and, having been previously duly sworn, was examined and testified further as follows:

EXAMINATION (CONTINUED).

THE VIDEOGRAPHER: We're back on the record. The time is 1:02 PM.

BY MR. VANSLYKE:

Q. Okay. So, Mr. McIlroy, you have described at points today different accounts within the VBA budget, correct?

A. Correct.

Q. Could you explain to me what is the difference between an account and a benefits program?

A. So an account is how Congress appropriates funding and accounts may contain several programs within it. So, for example, the rehabilitation benefits accounts, the RB account contains a variety of education benefits programs within it.

Q. And I believe you have described

compensation and benefits as one distinct account; is that correct?

A. Compensation and pension is an account. C&P.

Q. Apologies. I misspoke.

To rephrase for clarity.

Compensation and pension is one VA account, correct?

A. That's correct. Yes.

Q. Are those two separate programs, compensation versus pension?

A. Yes.

Q. Could you describe the difference between those two programs?

A. So compensation is -- compensation program is related to the payments to veterans for their service-connected injuries or disabilities, and the pension program is for families for other, you know, additional benefits paid to families or veterans.

Q. Would an example of that be the DIC benefits we discussed earlier?

A. Yes.

Q. Are the pensions paid under this VA

account distinct from military pensions?
A. Yes.
Q. Am I correct that the VA itself does not pay military pensions?
A. That is true. Yes.
Q. Am I correct that VHA services are not funded through the compensation and pension account?
A. That is true. Yes.
Q. What would be the account that governs those services?
A. They are generally --
MR. KLOTZBUCHER: Objection.
You may answer.
THE WITNESS: Generally four accounts that fund VHA operations. Those are the four medical care accounts: Medical Services, Medical Community Care, Medical Facilities, and Medical Support and Compliance.
BY MR. VANSLYKE:
Q. Could you briefly explain the distinction between those accounts?
MR. KLOTZBUCHER: Objection.

Foundation.

You may answer.

THE WITNESS: In general, Medical Services supports the cost of health care providers in VHA, the VHA direct care system. The Medical Community Care account funds the cost of care in the community, so in non-VHA facilities.

Medical Support and Compliance is, in general, the administrative functions that go to run the nation's largest integrated health care system.

And Medical Facilities are the cost of maintaining our facilities across the country. So replacements of chillers and those kind of things, as well as the staff that support the buildings.

BY MR. VANSLYKE:

Q. So I think I'm still unclear on the distinction between the first and third accounts.

Am I correct that you said the first account funds the VHA facilities themselves and the third account also funds the VHA facilities

themselves?

A. So the first account was the Medical Services accounts -- account and that's primarily where we pay for doctors and nurses, pharmaceuticals, contracts that support the running of hospitals, and those kind of things.

And in the Medical Support and Compliance account is where we would fund the headquarters staff here at VACO in the Veterans -- Veterans Health Administration, as well as the VISN staff, the regional management offices -- what we call VISNs -- as well as, like, hospital center directors, as well as the police are paid out of that account at a -- at a hospital.

So all the things that go to support health care delivery but are not actual, say, doctors and nurses and drug benefits and those kind of things.

Q. And all of those medical services costs themselves would be attributed to the first account that you described?

A. That is correct.

Q. Are those services provided at the VA facilities administered under a managerial cost

accounting system?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

BY MR. VANSLYKE:

Q. You can answer.

A. Yes.

Q. Could you explain what that means?

A. So as part of the budget process, we look at the estimated costs for caring for veterans at a relatively detailed level based on the expected health care needs of veterans, and those health care needs are based on full cost accounting.

So if you go to the doctor -- if a veteran goes to the doctor at his or her VA medical center, we would estimate the cost of care based on the full cost of care, which would include, you know, the building, electricity, you know, the guards at the front door of the hospital. All those associated costs.

All those associated costs are collected and processed through the managerial cost accounting system.

Q. You understand what I mean when I describe those two categories as direct and indirect costs?

A. Yes.

Q. Would you agree that those are appropriate labels for the distinction you just described?

A. Yes.

Q. Are the indirect costs also under the same account?

A. So you could find indirect costs in the Medical Services account.

Q. Are there portions of the indirect costs that come from another account?

A. Can you rephrase?

Q. Do I understand correctly that you've described the first account for medical services at VA facilities as including all of the costs for medical services at VA facilities, correct?

A. So we pay for the cost of providing care at VA facilities through three accounts: Medical Services, Medical Support and Compliance, and Medical Facilities. You can't have care

without a building. The Medical Facilities account pays for the building costs.

Q. And would a portion of the building costs be reflected as indirect costs?

A. Some accountants would do that, yes.

Q. Is it fair to assume that direct costs would be attributable to the Medical Services account?

A. In general, yes.

Q. But that the indirect costs may be more broad and may include some expenditures from other accounts, correct?

A. That is true. Yes.

Q. So in the process of administering this managerial cost accounting system, is it fair to say that the VA maintains internal data reflecting the average cost of providing care within its own facilities?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

BY MR. VANSLYKE:

Q. You can answer.

A. That is true. Yes.

Q. And I believe you described the second account as the source of funding for the Community Care Network, correct?

A. That is true. Yes.

Q. Is that administered by something other than a managerial cost accounting system?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: Can you rephrase?

BY MR. VANSLYKE:

Q. Would you say that there are differences in how the VA administers costs under the Community Care Network versus costs under VA Facilities?

MR. KLOTZBUCHER: Same objection.

You may answer.

THE WITNESS: So VA collects costs for care from these two pathways of care -- care provided through the direct care system, care provided through the community -- and VA collects those two

cost streams and analyzes those costs and uses those cost streams -- care provided in the community, care provided in the direct care system -- to project future care costs.

BY MR. VANSLYKE:

Q. What is the purpose of those projections of future costs?

A. They're used for a variety of things, including making budget estimates and also using for estimating demand and helping VA plan how care is provided.

Q. Do those projections have any impact in determining the actual costs of future care?

A. What determines the actual cost of future care is the actual costs.

Q. Is that equally true for care provided at VA facilities and care provided through the Community Care Network?

A. Actual costs, no matter where they are provided, are determined by the actual costs.

Q. Does the VA set the costs at VA facilities?

A. So VA determines how many health

care providers to hire. VA determines, you know, what services it will provide in the direct care system. And those factors go to determine the actual costs. Other factors, such as the cost of electricity, are not set by VA but, you know, VA can decide to turn the lights on and off.

Q. So some of the factors are set by VA and some of them are outside of the VA's control, fair?

A. That's true. Yes.

Q. Would you say that the VA sets the costs for services provided under the Community Care Network?

A. So those costs are negotiated. Many of them -- most costs are paid at Medicare rates for care provided in the community. There are some cases where we pay more.

Q. What would determine whether it's the Medicare rate or not?

A. Depends on the service and the location or the negotiated rate that we set with that provider for that need.

Q. So if I'm understanding correctly, the VA negotiates and sets those rates, but it is

based on the rates that Medicare has negotiated, correct?

A. Medicare rates are the basis for what we pay in general for community care. That is true.

Q. So if those negotiated rates are based on the Medicare rates, they are not based on the VA's internal managerial cost accounting for services provided at VA facilities, correct?

A. Yes, that is true.

Q. And when your office is preparing future budget projections involving the Community Care Network, you would use the projected reimbursement rates that we just described, correct?

A. Yes.

Q. So is it fair to say that your future budget projections related to the Community Care Network are also based on the Medicare payment rates?

A. Yes.

Q. Going back to the VA facilities directly, am I understanding your description correctly that there are essentially fixed costs

based on determinations for how many providers to hire, for example, rather than the costs varying based on the number of services provided?

A. So for VA care provided through the direct care system, there are both fixed and variable costs.

Q. Would the variable costs vary based on, for example, whether one patient or two patients are seen in a given day?

A. It depends based on the nature of services.

Q. Could you give me an example of when that would make a difference versus when it would not?

MR. KLOTZBUCHER: I'm going to object to foundation --

THE WITNESS: Yeah.

MR. KLOTZBUCHER: -- for this question and any one in the future that has to do with VHA-related budgetary issues.

MR. VANSLYKE: I understand your objection, counsel.

MR. KLOTZBUCHER: You may

answer.
BY MR. VANSLYKE:
Q. You can still answer.
A. So what's the question? Can you rephrase?
Q. You said that sometimes there would be variable costs based on the services provided, correct?
A. That is true. Costs vary based on the services provided.
Q. Could you give me an example of a scenario where the amount of services provided would or would not change the costs?
A. So, for example, if you were a veteran and you went to a VA medical center for a flu shot, that is a relatively inexpensive treatment versus if you went for open heart surgery. That's a very expensive treatment. So there you have to have two variable cost scenarios based on the nature of care provided.
Q. So under your example, if there were a vaccination day where the staff were already allocated, the vaccines have already been purchased, it would not change the costs based on

how many veterans showed up, correct?

A. Under that scenario, you could -- you could describe the costs in that way under that scenario.

Q. But if two heart surgeries had to be performed in the same day, there would be more costs involved than if it was only one heart surgery, correct?

A. Essentially because there are additional supplies involved in providing heart surgeries. You know, there are a variety of variables that go into estimating costs.

Q. I know we have discussed the actuarial analysis for VBA benefits.

Am I understanding correctly that there are also actuaries analyzing future costs for VHA?

A. That is true. Yes.

MR. KLOTZBUCHER: Objection. Foundation.

You may answer. Sorry to talk over you.

THE WITNESS: No.

That is true. Yes.

BY MR. VANSLYKE:
Q. Would the same be true for the Community Care Network?
MR. KLOTZBUCHER: Objection. Foundation.
You may answer.
THE WITNESS: Actuaries also analyze costs in the community.
BY MR. VANSLYKE:
Q. And would you agree that other entities, such as GAO, have also analyzed costs under both the VHA and Community Care Network?
A. That is true. Yes.
MR. KLOTZBUCHER: Objection.
BY MR. VANSLYKE:
Q. Would you agree that Community Care Network reimbursement rates would tend to reflect higher per-service costs than the incremental cost of providing that care at VHA facilities?
A. That's a very complicated question.
MR. KLOTZBUCHER: Objection. Foundation.
BY MR. VANSLYKE:
Q. Can you explain to me why that's

complicated?

A. So it depends on how you calculate the cost.

Q. How so?

A. So, for example, you know, we're not always comparing apples to apples. VA provides additional services that are not always provided in the community, and those go to the cost of the total VA direct care system.

So, for example, VA provides certain services to help veterans schedule their appointment. VA provides certain services related to transportation to and from appointments, be they in the community or in the direct care system.

VA provides a variety of benefits that are not always available in the community, and the community provides a variety of benefits that the VA doesn't always provide. For example, maternal care. VA is not in the business of delivering babies. So there's no comparable cost there, for example.

So that's why it's complicated.

Q. So I understand that there are some

medical services provided through the Community Care Network that are not provided through VA facilities, correct?

A. That is true. Yes.

Q. So there would be no way to compare the costs between those two programs if only one of them provides that service, correct?

A. That is true. Yes.

Q. And when you describe things like transportation that the VA provides, that would be the opposite scenario where the VA provides something that the Community Care Network does not, correct?

A. Yes.

Q. So there would be no way of comparing those services for the same reason because they are provided through the VA but not through the Community Care Network?

A. That is true. Yes.

Q. And I understand you're saying, depending how you calculate the cost of services provided at the VA, it might include those additional services that are not provided by the Community Care Network, correct?

A. That is true. Yes.
Q. So if that is true, then there are some things that cannot be apples to apples.
Would it be fair to say that the price for a service under the VA facility may not be a direct comparison to the price for the same service under the Community Care Network?
MR. KLOTZBUCHER: Objection. Foundation.
You may answer.
THE WITNESS: Can you restate the question?
BY MR. VANSLYKE:
Q. If the cost of a heart surgery at the VA includes the cost of transportation to and from the heart surgery, there would be a disconnect between comparing that to the cost of a heart surgery through the Community Care Network, correct?
MR. KLOTZBUCHER: Same objection.
You may answer.
THE WITNESS: Yes. It is -- it is difficult sometimes to

compare costs for apparently like procedures.

BY MR. VANSLYKE:

Q. Would you agree that over the last five years community care spending has grown faster than direct care spending?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: That is true. Yes.

BY MR. VANSLYKE:

Q. And on the note of costs that may be different between the two programs, would you agree that there can be administrative costs for services provided under the Community Care Network that would not be billed in the same way for care through the VA?

A. Yes.

Q. Would it be a closer analogy if you were looking at the indirect cost total rather than the direct cost total?

A. There are many ways to do cost accounting. It would depend on the cost

accounting approach.

Q. Would it be inappropriate to compare the reimbursement rates through Community Care Network to Medicare costs?

A. You know, it depends on what you are doing and the comparison made. I can't say if something is appropriate if I don't know what it is that is being compared for what purpose.

Q. So when you described the managerial cost accounting for the VA facility services, you described that as including the additional costs beyond the medical services themselves, correct?

A. That is true. Yes.

Q. And you said that the Community Care Network services are based on Medicare rates, correct?

A. In general, yes.

Q. Is it fair to say that since the Community Care Network services are based on the Medicare services, they are not based on the VA's accounting for the indirect costs in the way that you do for the VA facilities directly?

A. If you want to know how Medicare determines their rates, you should go talk to

them, but, in general, they are trying to pay reasonable fees for the services provided.

Q. Just to clarify, what you're saying is: Medicare may take those factors into consideration, but the VA does not make those determinations.

The VA pays based on the Medicare negotiated rates, correct?

A. Yes.

Q. Okay. So I'm going to turn back to the VBA disability benefits for now.

We discussed this briefly, but the disability rates are adjusted annually for cost of living, or COLA, correct?

A. That is true. Yes.

Q. And at present, those adjustments are tied to the Consumer Price Index, correct?

A. Tied to Social Security COLA, which is, I believe, tied to the CPI.

Q. Thank you.

There are other measures that could be substituted instead of CPI or instead of the Social Security COLA, correct?

A. Certainly. Anything you want.

Q. And is it fair to say that those annual adjustments are based on statutes that require those adjustments?

A. The COLA is enacted by an annual act of Congress. The COLA happens because of an annual act of Congress.

Q. So each year Congress has to approve the cost-of-living adjustment to VBA disability benefits?

A. Yes.

Q. So presumably it is within Congress's authority to not do so?

A. Presumably, yes.

Q. And in your experience at the VA, have those rates always increased?

A. Yes.

Q. Have they always increased by the Social Security COLA?

A. To my knowledge, yes.

Q. Have those adjustments always been the same or has the Social Security COLA fluctuated over time?

A. Changes over time.

Q. Does inflation play a role in the

Social Security COLA?

A. Yes.

Q. Is it fair to say that in a year with higher inflation the COLA will be higher?

A. Yes.

Q. In general, you are aware that VBA disability benefits are awarded under a rating schedule, correct?

A. I am aware, yes.

Q. And is it your understanding that this rating schedule is essentially the criteria for assigning a disability percentage to a particular veteran?

A. Yes, that's my understanding.

Q. Has the rating schedule ever been revised?

A. Yes.

Q. And when the rating schedule is revised, that can change how the criteria apply to a particular veteran, correct?

A. It's true. Yes.

Q. So if the rating schedule is revised, a veteran's rating could go up or down depending on how the new criteria applies to them,

correct?

A. That would depend on the rating but, theoretically, yes. The rating schedule but, theoretically, yes.

Q. So even for a veteran who is currently rated as 100 percent disabled, there is no guarantee that the rating schedule will not change in a way that reduces their rating, correct?

A. VA would have a variety of ways to implement such a rating change. They might grandfather the veteran but -- so that veterans wouldn't receive a reduction in ratings but, you know, there's a variety of ways to implement such changes if they were to be made.

Q. Am I understanding correctly that you're saying it is possible for a change to have that effect?

A. It is possible, yes.

Q. And that it may be possible for the VA to essentially nullify that effect through other means; is that correct?

A. That is true. Yes.

Q. But there is also no way to

guarantee that the VA would take such an action, correct?

A. There's no way to predict the future. That is true.

Q. And would you agree that it is within the authority of Congress to change the rating schedule such that the VA cannot nullify the effect?

A. Yes.

Q. When we have discussed the actuarial analysis, is that analyzing trends over a population?

A. (Video malfunction).

Q. Can you hear me?

MR. KLOTZBUCHER: I'll object to form. Can you rephrase?

THE VIDEOGRAPHER: I think he's frozen.

MR. VANSLYKE: Can you hear me now?

THE VIDEOGRAPHER: I hear you, but I don't think the witness -- I think the witness is frozen.

MR. VANSLYKE: Ah.

THE VIDEOGRAPHER: Should we go off the record?

THE WITNESS: Mr. McIlroy.

THE VIDEOGRAPHER: Yeah, he jumped off.

All right. We're going to go off the record at 1:40 PM.

(A recess was taken.)

THE VIDEOGRAPHER: Back on the record at 1:40 PM.

BY MR. VANSLYKE:

Q. Okay. I will restate my question. We have discussed the actuarial analysis that the VA uses to project for future budgetary needs, correct?

A. We have, yes.

Q. Is it fair to say that that analysis is conducted on the entire population of recipients?

A. Yes.

Q. As opposed to being calculated for one plaintiff -- one benefit recipient individually, correct?

A. Correct. It looks at the entire

population.

Q. Would you agree that you cannot predict with certainty what any individual veteran will be paid over their remaining lifetime through VBA benefits?

A. So the premise of actuaries is that you can make reasonable estimates over future costs, but of course individual benefits and individual payments will vary.

Q. So you have agreed with me that Congress has the authority to change eligibility rating criteria, benefit formulas, and the cost-of-living adjustment, correct?

A. That is true. Congress can change the law.

Q. And is it fair to say that changes implemented by Congress can be prospective in the sense that they apply to future benefits?

A. That is true. Yes.

Q. Are you aware that the VA at times provides retroactive awards of benefits?

A. I am aware.

Q. Could Congress enact changes to benefits that would otherwise be awarded

retroactively?

A. Yes.

Q. So as an example, if Congress were to enact means testing for disability compensation, as the Congressional Budget Office has studied, that could reduce or eliminate benefits for some veterans that are currently receiving them, correct?

A. It would depend on the law.

Q. But you would agree that that's at least possible?

A. Congress can make whatever law it likes, yes.

Q. And if that means testing were to be applied to retroactive awards, it could also affect benefits that would otherwise be awarded retroactively, correct?

A. Congress can make retroactive changes. That is true. Yes.

Q. And if Congress decided to freeze cost-of-living adjustments for a period of years, they would have the authority to do so, correct?

A. They do, yes.

Q. And from what I understand from your

earlier testimony, they would not even have to affirmatively freeze it. They would just not enact it in a given year.

Correct?

A. Yes, that would be true.

Q. And if Congress froze or reduced a cost-of-living adjustment for a given year, that would effectively reduce the real value of the benefits in present time, correct?

A. Depends on the state of the economy. You know, so if we were in an inflationary period, it would, but if we weren't in an inflationary period, it wouldn't.

Q. So assuming that there is inflation, the real value of a benefit remaining at the same dollar value would reduce absent a cost-of-living adjustment, correct?

A. Buying power would be reduced, yes, in an inflationary period with no COLA.

Q. And if Congress were to narrow the criteria for secondary service condition, that could also reduce the benefits received by a particular veteran, correct?

A. Could you clarify the question?

Q. Do you understand what a secondary service connection rating is?

A. Can you explain it?

Q. My understanding is that the VA will label a condition as a secondary service condition if, for example, the VA determines that a veteran's kidney cancer is service connected, and then subsequently determines that diabetes was developed secondary to the kidney cancer which has been rated as service connected.

Do you understand my description at least?

A. That is my understanding as well, yes.

Q. Okay. So you understand and agree with my description of secondary service connection, correct?

A. I do, yes.

Q. So if Congress were to narrow the criteria for injuries to be rated as a secondary service connection, that could reduce the benefits received by individual veterans, correct?

A. Well, certainly that potential exists.

Q. And you have no role in deciding whether Congress will or will not make those types of changes, correct?

A. We do support the estimates of potential costs when Congress considers legislation, including changes to benefits, but that is the limit of my role in that process.

Q. Am I understanding correctly that if Congress is considering implementing legislation that would affect VA benefits, the VA will provide an estimate of the additional or saved costs that would result from those changes?

A. That is true. We frequently would.

Q. But the VA would not ultimately decide whether or not Congress will implement those changes, correct?

A. Congress decides. VA -- Congress would no doubt ask VA as the implementing agency, you know, what are the pros and cons of the considered legislation, but ultimately Congress decides.

Q. Do you play a role in providing that advice?

A. For things that are financial

related, the Office of Management, including the Office of Budget, does provide analysis of those potential issues.

Q. Am I understanding correctly that your office would provide the cost estimate but not the pros and cons analysis?

A. You know, pros and cons come from a variety of perspectives or a variety of -- I don't know -- viewpoints. We would certainly say, for example, if a legislation was extremely complicated, complicated is bad because it drives costs and we would point that out.

Q. Would your office provide advice as to whether or not it would be good for veterans to make a certain change?

A. So whether it would be good for veterans or not is a matter of a beholder. Right?

Q. Would your office provide its perspective on whether or not it is good for veterans or would it defer to legislators?

A. In a sense, it's the job of the Secretary to provide his perspective. We provide advice to the Secretary. The Secretary asks us what we thought. We tell them what we think, but

ultimately it's the Secretary's job to offer the department's viewpoint on anything related to veterans.

Q. I think I'm understanding that the primary role that your office would play would be the cost analysis; is that correct?

A. Yes.

Q. Okay. Are you familiar with the VA's Financial Policy Documents?

A. I am.

Q. Could you describe what the Financial Policy Documents are?

A. So the Financial Policy Documents for the VA, like all federal agencies, describes how we are to administer the funds that are provided to VA, and they kind of run the full gamut from very high level to very specific, you know, like how to process travel vouchers, for example.

Q. Have you reviewed the VA's Financial Policy Documents?

A. I have.

MR. VANSLYKE: I am placing a file in chat and I will screen share it

in just a moment, and I will mark this as Exhibit Number 11.

(Document marked for identification as McIlroy Exhibit 11.)

BY MR. VANSLYKE:

Q. Okay. Can you see that I'm sharing my screen?

A. I can. Chapter 6.

Q. So this is Volume VI Chapter 6 of the VA Financial Policy Documents, correct?

A. Yes.

Q. I will scroll down. Give me just a moment.

Okay. So I'm starting on page -- the bottom of page 5. You see 0605 Policies?

A. Yes.

Q. So this is describing essentially the requirement to estimate and report on the VA's liability to pay federal employees and veterans benefits, correct?

A. Correct.

Q. And under bullet B I see "OAS."

Do you recall what that acronym stands for?

A. Office of Actuarial Services.
Q. So it says:
"OAS actuaries will calculate the present value of the Veterans Benefits Liabilities using standards established by Actuarial Standards Board and FASAB, for compensation, burial, and education benefits for recordation in VA's accounting system."
Correct?
A. It says that, yes.
Q. And is this referring to the same actuarial analysis that we have discussed previously?
A. This is slightly different.
Q. Could you explain how it's different?
A. So previously we discussed specifically in the case of veterans benefits, primarily talking about compensation benefit -- compensation and pension benefits, the estimates used for preparing the budget request.
This is talking about estimate of liabilities that is reported in the accounting statements and in the annual audit.

Q. Would you say there's a difference in how the analysis is performed or a difference in the purpose for the analysis?

A. The difference is in the purpose for the analysis.

Q. Is it fair to assume that all of the actuarial analysis that we have been discussing would follow the same standards established by Actuarial Standards Board and FASAB?

A. In general, yes.

Q. Do you know what FASAB stands for?

A. Federal Accounting Standards Board or something like that. It's up there. The FASAB. Federal.

Like the FASAB is the GAO, the Treasury or -- no.

Q. If I represent that it's the Federal Accounting Standards Advisory Board --

A. Yes.

Q. -- would you agree with that?

A. Yes. There you go.

Q. Okay. Okay. Give me one moment.

I'll stop sharing instead of making everybody dizzy, and I'll put it back up in a

second.

I can be done with that document, actually. So we'll move on.

Just to confirm, you are familiar with that volume and chapter of the Financial Policy Documents generally, correct?

A. I am.

Q. And you would agree that that addresses the process by which the VA identifies the federal employees' and veterans' benefits liabilities, correct?

A. Yes, it's for different purposes. We previously talked about budgeting. That's for financial reporting, but they are related.

Q. Okay. And you are generally familiar with the actuarial analysis even though you are not yourself an actuary, correct?

A. That is true. Yes.

Q. Do you understand them well enough to understand the actuarial analysis and interpret what it means for the budget?

A. Yes.

Q. Would you agree that actuarial analysis is based on probability models?

A. Yes.
Q. Would you agree that actuarial analysis, in this context at least, is based partially on life expectancy tables?
A. That is true. Yes.
Q. Are you aware that the VA uses veteran-specific life expectancy tools?
A. Yes.
Q. If I refer to the Veteran Eligibility Trends and Statistics sometimes abbreviated as USVETS, do you understand what I'm referring to?
A. USVETS or VetPop?
Q. Yes.
A. Yes.
Q. If I refer to the United States Veterans Life Tables, do you understand what I'm referring to?
A. Generally, but I've never seen them.
Q. But you are aware that they exist, correct?
A. Yes.
Q. And would you agree that this is distinct from general life expectancy tables?

A. The degree to which they differ I don't.

Q. But would you agree that they are not one in the same thing?

A. I understand them to be different because they have different names.

Q. And do you understand that the VA actuaries rely on veteran-specific life expectancy tools such as these?

A. It's my understanding, yes, that the assumptions in the veteran benefits calculations, as well as the veteran health care calculations, rely on the characteristics of veterans including their life expectancy.

Q. And you stated that using this actuarial analysis, the VA is able to reasonably estimate the future benefits to be provided, correct?

A. Yes.

Q. Are actuaries -- I'll rephrase my question.

Would you agree that the role of the actuaries in providing this analysis is to account for variables in the future?

A. Yes, that's part of their job. Yes.
Q. Would you agree that when accounting for variables in the future, there is inherently a degree of uncertainty?
A. Yes.
Q. Would some of those variables include future changes in laws or regulations?
A. Future laws and regulations could change in the future. That is true.
Q. Would those variables include changes in veteran mortality and life expectancy?
A. So the estimates about future mortality and life expectancy are based on historical trends. So they would assume -- it would be unreasonable to assume something anomalous that wasn't supported by the data.
Q. Apologize. Let me rephrase that question.
The variables accounted for by the actuaries would include fluctuations in veteran mortality and life expectancy averaged across the data that they're looking at, correct?
A. That's an inherent part of the job is to use the data to make estimates about future

life expectancy and other characteristics.

Q. Does the actuarial analysis include changes in disability ratings such as reevaluations and appeals?

A. So those things are part of the historical records. So they would be included in estimates going forward.

Q. And would the actuarial analysis also include economic factors affecting cost-of-living adjustments?

A. The actuaries make assumptions about future cost-of-living adjustments, yes.

Q. And is it fair to say that the actuaries are inherently limited by the potential that those assumptions could be incorrect?

MR. KLOTZBUCHER: Objection. Form and foundation.

BY MR. VANSLYKE:

Q. You can still answer.

A. Can you restate the question?

Q. Is it fair to say that actuarial analysis is limited by the assumptions we have discussed, such as cost-of-living adjustment, for example, and that those assumptions may turn out

to be incorrect in the future?

MR. KLOTZBUCHER: Same objection.

You may answer.

THE WITNESS: So actuarial estimates about the future are based on assumptions and assumptions may or may not be correct.

BY MR. VANSLYKE:

Q. Do you believe that the VA's actuarial analysis is of high quality?

MR. KLOTZBUCHER: Objection.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. Do you believe that they meet the standards required?

MR. KLOTZBUCHER: Objection to form.

You may answer.

THE WITNESS: So I know that there are certain standards to be -- to be an actuary, and the actuaries here at the VA meet those standards, which are like accreditation by the Actuarial

Standards Board or something like that. You should ask the actuaries themselves these questions.

BY MR. VANSLYKE:

Q. When providing budgeting information for the VA, would you place greater trust in the actuarial analysis performed by the VA's actuaries than you would in projections from an economist unfamiliar with VA benefits?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: Yeah. I don't know about anonymous economists, but it's certainly logical that the VA actuaries, who deal every day with VA data and have a deep and rich understanding of the programs, can make reasonable estimates based on that deep and rich understanding of the data.

BY MR. VANSLYKE:

Q. Would you agree that VA actuaries developed specialized knowledge of the VA benefits provided?

A. Yes.
Q. Would you agree that that specialized knowledge would enhance their future projections about those benefits?
MR. KLOTZBUCHER: Objection. Foundation.
You may answer.
THE WITNESS: So the quality of estimates is certainly improved by, you know, a better understanding of how the program functions.
BY MR. VANSLYKE:
Q. Is there any other specialized knowledge that you believe would be relevant to those projections?
A. Not currently. I mean -- yeah. So let's say that. The answer is no.
Q. Do you believe that projecting future benefits provided by the VA is a simple process?
A. It is complex.
Q. Do VA actuaries project future benefits to be received by individual plaintiffs?
A. VA actuaries project costs for the

program.

Q. Is it fair to say that that represents an average across all recipients, not one recipient individually?

A. It is the sum of all estimates, yes. So it's for the population as opposed to an individual.

Q. And none of your testimony today seeks to guarantee the scope or duration of any individual plaintiff's benefits, correct?

A. No.

Q. You are also not testifying to the payments that will be received in the future for any individual recipient, correct?

A. That is correct.

Q. If I were to ask you to do so, could you?

A. If you were asking me to do what?

Q. If I were to identify an individual recipient of benefits from the VA and ask you to tell me the value of the benefits they will receive in the future, could you do that?

A. No.

Q. Why not?

A. I don't have the proper data. I don't know anything about the individuals.

Q. And if you were trying to answer that question, that would also be subject to the same sorts of legislative action that we've discussed previously, correct?

A. Can you rephrase the question?

Q. If you were attempting to identify the value of benefits to be received by an individual recipient in the future, any projection could also be altered by the legislative actions we've discussed that could change VA benefits at large, correct?

A. Future benefits means could change as the result of congressional actions. That is true.

Q. Excluding retroactive payments, is it true that disability compensation is paid monthly?

A. That is true. Yes.

Q. And when a veteran dies, do those disability payments stop?

A. Yes.

Q. And any benefits to survivors, such

as the DIC benefits we discussed earlier, you said are separate entitlements, correct?

A. Correct.

Q. Do you know whether those entitlements, DIC specifically, have their own eligibility criteria separate from the now deceased veteran's disability criteria?

A. It is my understanding that they are -- that they have separate criteria.

Q. Do you know whether the payment amounts differ between DIC benefits and veterans disability benefits?

A. They do differ, but I am not intimately familiar with all the details.

Q. Is it fair to say that if a veteran is receiving a certain monthly payment and the veteran were to pass away, you would not assume that any DIC benefits would be in the same amount, correct?

A. That is true. Yes.

Q. Is it fair to say that the total amount of disability compensation a veteran receives will be impacted by how long the veteran lives?

A. Yes.
Q. And if you are looking at the benefits received by an individual veteran, would you be able to predict how long that veteran will live?
A. Would I? I have no basis to make those kind of judgments.
Q. Would you agree that benefits can also be stopped or reduced while the veteran is alive?
A. There are a variety of factors that could change veteran benefits. That's true. Yes.
Q. If the VA reevaluates the veteran's condition and reduces the rating, would that be one way that that could happen?
A. That is possible, yes.
Q. If subsequent medical documentation led the VA to conclude that an injury is not service connected, could that change the benefits being provided?
A. It's my understanding that that is true, yes.
Q. If a veteran's dependency status changes, such as a spouse passing away, could that

change the amount of benefits being provided?

A. To my understanding, yes.

Q. If the veteran becomes incarcerated could that change the amount of benefits being provided?

A. It's my understanding, yes.

Q. So even assuming that the veteran does not pass away, there are multiple ways that a veteran's benefits can change in duration or amount, correct?

A. There are some limited ways that benefits could change. That is true.

Q. And given those potential changes, the actual duration of benefits provided to an individual veteran is uncertain because of the possibility of those changes, correct?

A. It is true that a veteran's benefits may change over time.

Q. And if the duration of benefits changed but the payment amount stayed the same, then the total amount of payment would also change according to the duration, correct?

A. Basic math? Yeah.

Q. If I were to ask you to identify the

total value of disability benefits provided to a veteran from any time in the past, could you identify that number?

A. Could I? No.

MR. KLOTZBUCHER: Objection. Form.

Sorry for talking over you. You may answer.

THE WITNESS: Yeah, I would -- I don't have that data. I mean, like could VA report how much we have paid to a veteran? Yes. Could I? No.

BY MR. VANSLYKE:

Q. You would agree that the VA would have access to a record of payments provided to a veteran, correct?

A. Yes, that is true.

Q. And those payments would be documented, correct?

A. That is my understanding, yes.

Q. And there would be a fixed value attributable to those payments, correct?

A. You could sum up all the payments and, you know, reach a sum.

Q. And that is different than projections for future payments, correct?

A. Yes.

Q. Because the future payments are subject to the uncertainties we've discussed, but the past payments are not, correct?

A. Because the future is the future. That is true.

MR. VANSLYKE: Thank you.

I think I would like to take a short break, and then I think we're getting close to the end.

So can we go off the record?

THE VIDEOGRAPHER: All right. We're going to go off record at 2:20 PM.

(A recess was taken.)

THE VIDEOGRAPHER: Back on the record. Time is 2:30 PM.

BY MR. VANSLYKE:

Q. Mr. McIlroy, I know we've talked about a lot of topics today, and I just want to clarify which things you have stated an opinion on.

So I believe you have provided

testimony based on the VA's budget and appropriation process, correct?

A. Yes.

Q. And the distinction between mandatory and discretionary funding, correct?

A. Correct.

Q. And a sub-distinction where the VA's mandatory funding is still subject to annual appropriations, correct?

A. That is true. Yes.

Q. And the sources of funding of certain VA programs, correct?

A. Correct.

Q. And some details, I'm sure not exhaustive, of how those different funding sources are managed, correct?

A. Yes.

Q. And we've spoken about certain uncertainties within calculations of projected future benefits, correct?

A. That is true. Yes.

Q. And I understand you are not testifying about what offsets should or should not be applied in this litigation, correct?

A. Yes. No -- no -- no knowledge or opinions of that.

Q. And likewise, no knowledge or opinions of the legal standards for damages or offsets in this litigation?

A. Correct.

Q. And are you providing any testimony as to any individual plaintiff in this litigation's medical conditions?

A. I am not.

Q. Any testimony as to any individual plaintiff's life expectancy?

A. No.

Q. Any testimony as to any individual plaintiff's future benefit entitlements?

A. No.

Q. Do you have any opinion on whether any plaintiff's future VA benefits should be used to reduce their damages award in the Camp Lejeune litigation?

A. I have no opinions on that.

Q. If the court or the parties were to decide to use VA benefits to reduce the plaintiffs' damages award, do you have any opinion

on how those benefits should be applied in order to accomplish that reduction?

A. It's a complicated question. That would depend on the nature of whatever the settlements or the agreements and, you know, the bounds of the law and the practicalities of our own financial systems and our capabilities.

Q. Is it safe to say any opinion you provided on that topic would be limited to the value under certain variables?

A. That's infungible, yes.

Q. Are there any other topics that you believe you will express an opinion on in this litigation, other than the things we've just discussed?

A. I'm here at the pleasure of the court on this. So if asked, I will provide my opinion, but I expect to -- I do not expect to be called again.

Q. At this point in time, do you believe that we have covered the full scope of topics upon which you will provide an opinion?

A. To the extent of my knowledge, yes.

Q. Is there anything that we have

discussed today that you believe I am misunderstanding?

A. So you asked me about my ability to estimate future costs for individuals.

I personally cannot do that because I don't have that data but, you know, it's a mathematical calculation. Somebody could if they had the proper data.

Q. Are you referring to identifying the value of an individual recipient's benefits?

A. Yes.

Q. Is it fair to say that if the appropriate person made such a calculation, it would still be subject to the assumptions inherent in a future projection?

A. That is true. Yes.

Q. Is there anything that you would like to clarify or expand on from any of your earlier answers?

A. No.

Q. Have I asked you any questions that at this time you still do not understand?

A. No.

MR. VANSLYKE: Okay. I will

pass the witness.

MR. KLOTZBUCHER: Mr. McIlroy, thank you for your time. I appreciate that you are a very busy man and that you were in the hot seat today. I have nothing further.

MR. VANSLYKE: Likewise, thank you for your time and your expertise.

THE WITNESS: All right.

THE VIDEOGRAPHER: All right. This ends today's deposition. We're going to go off the record at 2:36 PM.

MR. VANSLYKE: Standing order is fine for the transcript.

MR. KLOTZBUCHER: And same for the defense.

(Signature not waived, the deposition concluded at 2:36 PM.)

DECLARATION UNDER PENALTY OF PERJURY

I declare under penalty of perjury that I have read the entire transcript of my Deposition taken in the captioned matter or the same has been read to me, and the same is true and accurate, save and except for changes and/or corrections, if any, as indicated by me on the DEPOSITION ERRATA SHEET hereof, with the understanding that I offer these changes as if still under oath.

Signed on the _____ day of _____, 2026.

_____

ANDREW MCILROY

CERTIFICATE OF REPORTER

DISTRICT OF COLUMBIA)

I, Denise Dobner Vickery, a Registered Court Reporter and Notary Public of the District of Columbia, do hereby certify that the witness was first duly sworn remotely by me.

I do further certify that the foregoing is a verbatim transcript of the testimony as taken stenographically by me at the time, place and on the date herein set forth, to the best of my ability.

I do further certify that I am neither a relative nor employee nor counsel of any of the parties to this action, and that I am neither a relative nor employee of such counsel, and that I am not financially interested in the outcome of this action.

DENISE DOBNER VICKERY, CRR,RMR
Notary Public in and for the
District of Columbia

My Commission expires: March 14, 2028

THE VIDEOGRAPHER: Good morning. We are now on the record. My name is Phillip Todd. I am a videographer for Golkow a Veritext division.

Today's date is February -- today's date is February 20th, 2026, and the time is 8:59 a.m. mountain. This remote video deposition is being held in the matter of Camp Lejeune Water Litigation in the United States District Court for the Eastern District of North Carolina, Southern Division No. 7:23-CV-897.

The deponent today is Dr. Henry Miller. All parties to this deposition are appearing remotely and have agreed to the witness being sworn in remotely.

Due to the nature of remote reporting, please pause briefly before speaking to ensure all parties are heard completely. Counsel will be noted on the stenographic record. The court reporter Kelly Rexroat will now swear in the witness.

HENRY MILLER, Ph.D.

of lawful age, having been first duly sworn to tell the truth, the whole truth, and nothing but the truth, testified as follows:

EXAMINATION

BY MS. WALLACE:

Q. Good morning, Dr. Miller.

A. Good morning.

Q. My name is Whitney Wallace and I represent the Plaintiff Leadership Group in the Camp Lejeune litigation and I will be taking your deposition today.

A. Okay.

MS. WALLACE: Before we get started, there is a Case Management Order 3 that requires both defense counsel and myself to affirm on the record that no communication with the deponent by any means including but not limited to text messaging will occur out of the view of the other parties while the composition is proceeding on the record, and I affirm for the record.

MR. TURNER: I affirm for the record.

Q. (By Ms. Wallace) Dr. Miller, will you please state your full name?

A. Henry Carl Miller.

Q. What is your date of birth?

A. [redacted], 1943.

Q. You have been deposed many times before today; is that true, Doctor?

A. That's true.

Q. You understand the obligation that you are under oath and required to be truthful today?

A. Yes.

Q. Do you have any documents in front of you

today?

A. I do not.

Q. Do you have any documents accessible on the laptop that you are with and open?

A. No documents relating to this case.

Q. And I would ask today not to refer to any documents on your laptop unless I direct you to their attention. Okay?

A. Okay.

Q. Are there any circumstances today that would prevent you from testifying honestly and truthfully?

A. No.

Q. Where do you live and work?

A. Phoenix, Arizona.

Q. Who is your current employer?

A. Berkeley Research Group.

Q. What is your position with Berkeley Research Group?

A. Managing director.

Q. Is that of a certain department?

A. It's within the health analytics practice.

Q. How large is Berkeley Research Group?

A. It's -- Berkeley Research Group is an international firm with about 1600 employees.

Q. Does it have a headquarters?

A. Yes, it does.
Q. Where is that?
A. It was just recently moved. I think will be moved effectively March 1st to Washington D.C.
Q. Are there multiple managing directors in the health analytics department that you're in?
A. Yes.
Q. How many, do you know?
A. Between 15 and 20.
Q. How many persons do you have under you as managing director in the health analytics department at Berkeley Research Group?
A. Berkeley Research Group we refer to it as BRG. BRG doesn't have that kind of structure. So I don't have anybody specifically reporting to me.
We have pools of people who are available to a number of people, and it's all managed by just keeping track of who is working for who at a time.
Q. How many persons are in the Phoenix office that you work in?
A. About a dozen.
Q. Do you know how many offices BRG has throughout the country?
A. Not exactly. Between 40 and 50.
Q. And that's within the country. Do you know

how many are international?

A. I don't know a specific number. At least 15 or so.

Q. I am going to -- the way that I'm going to share documents with you today, Dr. Miller, is I'm going to upload them into the chat feature. Have you done remote depositions before?

A. Yes.

Q. You're comfortable with the chat feature?

A. We'll see.

(Miller Exhibit Nos. 1-4 were marked.)

Q. Please let the record reflect that I have updated four exhibits into the chat feature.

Exhibit 1 is the United States Disclosure of Expert Testimony for Phase 3 dated April 8th, 2025.

Exhibit 2 is the United States Second Disclosure of Expert Testimony for Phase 3 dated December 15, 2025.

The third is PLG's Notice of Deposition and Requests For Documents to Henry Miller dated February 4th, 2026, and the fourth exhibit is the United States Objection and Responses to the Notice of Deposition and Requests for Production of Documents to Henry Miller dated February 13, 2026.

Dr. Miller, you had to produce two rounds of

expert reports in the Camp Lejeune litigation. Do you recall that?

A. Yes.

Q. And the first set you and/or BRG produced in approximately April of 2025?

A. Yes.

Q. And then there was a second production December 15 of 2025?

A. Correct.

Q. Did you have the opportunity to assist in preparing the objections to your notice of deposition in this case?

A. No.

Q. Were you asked to search for any documents related to the -- the notice of deposition that was sent to you?

MR. TURNER: Objection.

A. Well, I did look for documents after that. I'm not sure I understand what you're asking.

Are you asking whether somebody asked me to look for them or I looked for them on my own?

Q. (By Ms. Wallace) Were you asked to respond -- to help respond to the notice that was sent to you by the plaintiffs in response to this deposition today?

MR. TURNER: Same objection.

A. Maybe. I just don't remember. I don't remember whether I was asked, I looked for them or what the specific circumstances were.

Q. (By Ms. Wallace) And were you asked to identify all your billing invoices for -- related to Camp Lejeune?

A. No.

Q. Were you asked to search for the retention letters between you and the government for this case?

A. No.

Q. Were you asked if you have spoken to any of the other retained experts in the Camp Lejeune litigation?

A. I was at some point, yes.

Q. And have you been in contact with other experts in the Camp Lejeune litigation?

MR. TURNER: Objection. Pursuant to Rule 17 substance of communications are privileged. Dr. Miller, to the extent you can answer without discussing the substance of our conversations, you may do so.

A. I had conversations with just one of the other experts Gregory Russo.

Q. (By Ms. Wallace) And Gregory Russo is also

employed with BRG; is that correct?
A. Yes.
Q. He also holds the title of managing director?
A. Yes.
Q. Is that in your same department health analytics?
A. Yes.
Q. Is he at the Phoenix office?
A. No.
Q. Did you consult with any of the economists hired in this case such as anyone by the last name of Tosic, Brod or Younts?
A. Well, in the case of Yount and in the case of Greg Russo, I spoke with them. I would not say that I consulted with them. I never discussed any aspects of the case with them.
Q. And you are referring to Joanna Younts, not a Tricia Yount; is that true?
A. That's true.
Q. You have never spoken to a Tricia Yount who is an economist hired by the DOJ in this case?
A. No.
Q. And Joanna Younts is an individual that also works for BRG?
A. That's correct.

Q. And she is one of the many individuals that assisted you in preparing the reports in the Camp Lejeune litigation?

A. Yes.

Q. Without disclosing the substance of communications with counsel, how did you prepare for the deposition today?

A. I reviewed my reports, reviewed some of the source documentation, and had conversations with the attorneys.

Q. Without disclosing the substance of your communications, can you tell me how many times you met with counsel prior to your deposition today?

A. Three.

Q. Were those remote meetings?

A. Yes.

Q. Can you identify the individuals present?

A. Mr. Turner, Mr. Cromwell were present at all three meetings. There was an additional attorney present at one, but I don't remember her name.

Q. Do you understand that attorney would have been with the DOJ?

A. Yes.

Q. Were any of your colleagues present for those prep meetings?

A. No.
Q. Can you tell me the duration of those meetings to the best of your memory?
A. The first two meetings were about two hours long. The third meeting was about half an hour.
Q. Were there any documents that you reviewed that have not -- and during those meetings or any articles or substances that have not been disclosed on your materials considered list or in response to your notice today?
A. Not to my knowledge, no.
Q. Have you worked with any of the individuals that have helped prep you previously on other cases?
A. Yes.
Q. Which ones?
A. Well, I mentioned Greg Russo and Joanna Younts, and both of them and I have been working together for many years.
In the case of Joanna it's over 30 years, in the case of Greg it's over 20 years that we have worked together and not only at BRG.
Q. Have you worked with any of the individual attorneys before with the DOJ in prior cases?
A. No.
Q. Have you been an expert witness for the

United States prior to the Camp Lejeune litigation?

A. Yes.

Q. How many times do you think you have been an expert witness for the United States?

A. Three. Three that come to mind. I've had a long career, but I can remember three.

Q. Do you recall if the subject matter of your testimony in those cases is similar to the testimony that you are presenting in the Camp Lejeune litigation?

A. I would say that in two of the cases it's similar.

Q. Is it related to offsets in those cases?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Do you know the names of those cases?

A. I can look them up, but I don't know them offhand.

Q. Could you describe what you know about them briefly?

A. Sure. One of the cases involved a large nursing home chain that was alleged to have engaged in fraudulent billing to the Medicaid program, and I was an expert for the nursing home chain.

The other two were personal injury cases where the government was being sued by individuals who were injured in accidents involving a federal agency or a federal agency employee. That's it.

(Miller Exhibit No. 6 was marked.)

Q. Thank you. Dr. Miller, I'm going to upload the CV that you provided to the plaintiffs. And it's marked previously as Exhibit 6. And I'm going to ask you about it. Would you like me to put it up on the screen so you can reference it as needed?

A. Yes.

Q. Dr. Miller, do you recognize this document?

A. It looks like my CV.

Q. And for the record, it's Bates stamped at the bottom Miller_U.S.A._1 through 8. Do you see that?

A. I do.

Q. Your educational background is contained on page --

A. You passed it.

Q. I did. On Bates under score page 5. Can you briefly describe your educational background?

A. I have a bachelor's in business administration with a specialty in accounting. It was awarded by City College of New York, which is now -- the school that I went to is now called Baruch

College, and then have I an MBA also from the Baruch College and was part of City College of New York, and then my doctorate was awarded by the University of Illinois. It's a joint degree in accounting and economics.

Q. What year did you achieve that degree?

A. 1971.

Q. And you have your prior work experience. Prior to joining BRG. It looks like the bulk of your work history involves work at the Center for Health Policy Studies from 1979 to 2002?

A. That's correct.

Q. Tell the Court what you did there please?

A. That was my firm. I started it and managed it for those whatever it is 23 years. It was based in Maryland and was involved in doing various projects on contracts for the federal government also for state governments and many in the private sector.

Q. Would you categorize the nature of that work you were a consultant for the federal government and state governments?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) What types of projects did you do for the federal government and state government

at that time as it may relate to what you've done in this case?

A. A lot of the work that I did was related to the costs and the amounts paid for health services. A good deal of the work that I did was for now the Centers for Medicare and Medicaid Services particularly as it relates to the reimbursement systems, the outpatient perspective payment system and the inpatient perspective payment system as well as others home healthcare systems, lab systems.

I was a consultant to the Medicare and Medicaid programs on how those systems should be designed, and then I did a lot of work for other agencies including the most -- the largest piece of the other work was for the health resources and services administration and had to do with the delivery of health services also with reimbursement issues. I redesigned the community health center through the qualified health center reimbursement system for Medicare, but most of the other work was evaluation work. I directed the evaluation of the healthcare for the homeless program, some AIDS programs, some maternal child health programs.

Q. Thank you. Was some of your work for the federal government was it focused on improving

efficiencies or improving reimbursement mechanisms?
A. I think that's a fair way of putting it.
Q. What made you leave -- now, did you own Center for Health Policy Studies?
A. Yes.
Q. Did that dissolve in 2002?
A. No, it was -- I sold it. It was purchased by Navigant Consulting.
Q. I see. And so you basically continued that work with Navigant Consulting from 2002 to 2008?
A. That's correct.
Q. Did you own Navigant Consulting?
A. Well, I was a very small shareholder. Navigant Consulting is a large firm.
Q. Was part of the deal that you stayed on when they bought out your business?
A. Yes.
Q. Did the nature of your work change significantly once it was bought out by a corporation?
A. I would say a little bit. I did less work for the federal government and more work as an expert than as an expert witness, but generally the nature of the work was the same. The setting was somewhat different.
Q. During your careers at Center For Health

Policy Studies, was being hired to testify for litigation a percentage of what you did?

A. Yes.

Q. What percentage would you say?

A. Probably between -- probably no more than 5 or 6 percent. Around there.

Q. Was that usually on behalf of the federal government?

A. No. No, my clients for expert witness work at that time were entirely in the private sector.

Q. Were you typically hired by defendants or plaintiffs for that testimony?

A. There was no real pattern there. Probably -- probably evenly divided.

Q. And how did that change with Navigant Consulting?

A. I think the Navigant Consulting expert witness work tended more towards the defendant.

Q. Would you be able to say a percentage there?

A. Percentages of work that I did or percentage of --

Q. Both. I'm going to ask you both.

A. I would say it was greater -- the expert witness work was probably about 20 percent of my work at Navigant Consulting.

Q. And what percent, if you had to say, was more defense than plaintiff?

A. I'd say it was about 70 percent defense.

Q. Would you be able to recall what percentage the litigation component of your work made up of your like annual earnings throughout that time?

A. Not really. It wasn't -- it wasn't directly related to my earnings.

Q. It was a bonus, you know, extra?

A. Yeah, but the -- I got a salary and a bonus, and the bonus was based on overall contribution and not on any -- it wasn't based specifically on how much work I did in any particular area.

Q. Throughout your time at Navigant Consulting, you did continue to be a consultant for the federal government?

A. Less so, but yes.

Q. And it looks like you had a brief period after Navigant where you went to LECG, LLC as a managing director.

Why did that -- for just two years. Tell us why that transition happened?

A. When the Center for Health Policies Studies was purchased, I became friendly on a personal basis as well as on a professional basis with the person who

ran the health area at Navigant Consulting, and he left and asked me to join him. He left to go to LECG. He asked me to join him, and I did and then we both left together from LECG to BRG.

Q. Did the two of you start that business, LECG, LLC?

A. No.

Q. You just both left to join it. You both left Navigant to join it?

A. That's correct.

Q. And then how did you come to be hired by BRG?

A. Well, the LECG decision turned out not to be a very good one. We had a lot of problems internally, and the company no longest exists.

So at sometime in 2009 we decided that along with one other person who and actually the three of us decided that we would find another opportunity, and we looked at several, and the -- including starting our own firm, but BRG was just getting going at the time, and the -- there was a relationship between the person who I had been working with and the person who was starting BRG, and so we elected to go to BRG together as a group.

Q. Will you share with us how are you -- how were you compensated when you started with BRG and how

does that compensation work now?

A. Sure. I receive a salary and a bonus. The bonus was determined by the three of us that made the change. We had a formula with the firm BRG -- the firm BRG had a formula for determining how much the bonus would be overall, and then we split it however we decided among the three of us, which we decided was evenly. So we just broke it up evenly.

And we also received stock in BRG which also was divided evenly among the three of us.

Q. Is that the same compensation system that you have today?

A. Generally speaking, yes. Last year I sold -- we all did actually -- sold fairly substantial portion of our stock, although we still own stock in the company, but other than that it's the same.

Q. And the formula that you mentioned earlier the bonus formula, is that related to how much money you guys pull in as it relates to litigation?

A. No.

Q. It's unrelated?

A. Well, it's partly related to that, and it's -- it's a complicated formula that identifies not the amount of money that we -- that we brought in, but the gross profit associated with that money as well as

other contributions compared to other people within the firm. So more amorphic, not easy to define contributions, and it's a very collegial firm, and so there has never been an issue in the distribution of bonuses at least not from my end even as the firm has grown.

Q. How did your work change, if at all, when you became employed at BRG?

A. The amount of work associated with expert witness activities increased.

Q. And what percentage would you say that that has been for you of your work, expert witness related activities?

A. I would say over the course of my time at BRG, which is now 15 years, it's been about 50-50, 50 expert witness, 50 other.

Q. What is the other you mentioned?

A. It's a continuation of work that I've done in the past. Some state contract work. I'm just finishing up a two-year contract with the state of California on evaluating healthcare purchases and their potential effect on the market for healthcare services in the state.

So there is some state contracts.

Q. And federal governments?

A. There have been, but I don't have any currently.

Q. For the 50 percent of your time that is expert witness related, can you tell me what percentage is more defense versus plaintiff?

A. It's primarily defense.

Q. 90 percent?

A. That might be a good number.

Q. And you told us earlier that you've been hired, you recall, as an expert witness three times by the United States directly?

A. Yes.

Q. And that was with BRG; correct?

A. Yes.

Q. Your resume indicates that you've previously testified before Congress and legislative bodies?

A. Yes.

Q. Was that -- is that related to the expertise that you have in this case such as rates, you know, reimbursement rates for Medicare, VHA, and TRICARE, or was it unrelated?

A. I would say barely related. It was certainly not the subject, but it was an underlying issue in some of the testimony.

Q. Did any of that testimony have to do with

these three government payors that we're going to be discussing today in your expert reports?

A. Trying to remember. There was -- I would say no. That certainly was -- it involved some discussion of Medicare reimbursement, but it was not the topic.

Q. Okay. I'm going to stop sharing your CV if that's okay. Tell me if you need it back up for any reason.

I want to briefly talk about for the record and just so we're all clear you are not a medical doctor?

A. That's correct.

Q. You're not trained or educated in life care planning?

A. I'm not educated in life care planning. I have reviewed hundreds of life care plans. So I feel reasonably knowledgeable. I don't know if that counts as training.

Q. You're not a licensed or certified life care planner?

A. I am not.

Q. You -- I don't think you have ever worked in a healthcare setting; is that true?

MR. TURNER: Objection.

A. Not as an employee. I've been on the boards

of healthcare companies or healthcare entities as well as being the chairman of the board of healthcare companies.

Q. (By Ms. Wallace) But you have never worked for a healthcare provider in any capacity?

A. As a contractor, yes. As an employee, no.

Q. Understood. You are actually frequently hired by healthcare providers as a consultant?

A. I wouldn't say frequently, but I am.

Q. You do not hold any certifications in coding such as CPT coding, HCPCS?

A. That's correct.

Q. And you've never worked as a certified medical coder?

A. That's correct.

Q. Can you tell me what training you have in CPT coding guidelines?

A. I'm sorry. What was the last word that you used?

Q. Guidelines.

A. Guidelines. Well, I've done a lot of work on coding specifically as it relates to CPT as opposed to ICD-10. I've done a lot of work on ICD-10.

On CPT I've done a number of contracts for the National Center for Health Statistics, and that

included work in evaluating methods used including coding methods in ambulatory care and statistical data gathering, which is based on CPT coding, and I have used CPT coding through much of my career especially in the last 15 or 20 years in a number of cases.

Q. How much experience do you have setting a CPT code based on a service description?

A. A good bit. I may fall short on some occasions, unfortunately for me. One of the people in the Phoenix office who I work closely with who is a certified coder, and if I have questions or I'm not satisfied with my own determination, I ask her.

Q. What is her name please?

A. Lindsay Knutson.

Q. Can you spell that for our court reporter.

A. Well, Lindsay, L-I-N-D-S-A-Y, and Knutson is K-N-U-T-S-O-N.

Q. Because you're not a certified coder, do you defer to certified coders as it relates to the identification of CPT codes?

MR. TURNER: Form.

A. Well, not usually. There are many CPT codes, but probably about 8,000 different CPT codes, but the vast majority of codes are not used on a frequent basis. A small number of codes are used frequently,

and they are pretty much self-explanatory.

So for example, if you see a physician, and you're an established patient, there are five codes that can be used based on characteristics of the visit, and I don't -- I don't need help either vetting them or identifying them.

There are some codes relating to fairly obscure surgical procedures where I may not have the experience where I've seen them before or seen them enough times before to be certain. So those are the ones that I would seek help on, but on the common ones, I don't need to seek help.

Q. (By Ms. Wallace) Do you consider oncology and some of the complex diagnoses related to Parkinson's to be more on the simple coding or complex?

MR. TURNER: Objection. Form.

A. Well, that's an answer where I have to say it depends.

The oncology codes and the Parkinson's codes for that matter are not a simple code. They are -- those are diseases not procedures. The CPT system identifies procedures, and so there are potentially many different procedures that would relate to a patient who has a cancer or who has Parkinson's.

So it's a hard question to answer.

Q. (By Ms. Wallace) Do you have any experience establishing the CPT codes on behalf of a healthcare provider for a patient?

A. Could you explain it a little further exactly how you mean.

Q. Yes. So let's say a patient is in the hospital. Have you ever been the individual that actually developed that patient's CPT codes for any given service?

A. No.

Q. I understand you have a background in healthcare analytics.

Do you have a background in veteran disability benefits?

A. Yes.

Q. Do you have any opinions in this case that relate to veteran disability benefits?

MR. TURNER: Objection.

A. When you say opinions, I think my opinions are clearly stated in my report. The extent of a veteran's disability is a factor that I considered, but I don't have an opinion on it.

Q. (By Ms. Wallace) The only spot where I could have seen it taken into account potentially had to do

with co-pays associated with the VHA.

Do you agree with that?

A. Yes.

Q. So do you have any other opinions that relate to this litigation that involve veteran disability benefits that you can think of?

MR. TURNER: Objection.

A. No, because as it turned out all of the cases which I presented opinions had 100 percent disability determinations. So they're -- there wasn't a need to investigate any further in terms of differences.

Q. (By Ms. Wallace) Did you seek any additional education as it related to the diseases for the individuals that you evaluated who had kidney cancer, bladder cancer, Parkinson's disease and leukemia?

A. Well, in the case of a couple of them I didn't need to because Mr. Hill, Bruce Hill who has chronic lymphocytic leukemia and so do I.

Q. Oh, my goodness. I'm so sorry.

A. That's all right. I'm managing it well.

Q. Good.

A. I was diagnosed about ten years ago so I've been under treatment for it, so I know a lot about it.

Q. Yes.

A. And along those lines my brother who was a

veteran died last year of Parkinson's, and I was his primary not so much caregiver as helper, and so I was with that and the VA --

Q. Yes.

A. -- for five or six years. So I have personal experience at least with those two.

Q. I'm really sorry to hear that, Dr. Miller.

Did your -- it sounds like your brother had medical treatment through the VA?

A. He did.

Q. You don't --

A. He had his Parkinson's was caused by his service in the Vietnam war, so he had 100 percent disability.

Q. What was if you don't mind me asking what was his -- what exposure caused that?

A. His exposure -- he was stationed in Thailand during the Vietnam war working in the Air Force working as a maintenance specialist on an airfield, and the gases and fumes that were used were determined to be a contributor to his Parkinson's.

Q. So you have a -- has all of his treatment been covered by the VA then related to that exposure?

A. Well, no, his federal was typical of the people in this case that most of it was actually --

was actually paid for by Medicare. So he had VA benefits, but he only used the VA benefits in the instances where Medicare wasn't covering something, which was the case because he spent a lot of time his past couple of years in rehab facilities, and he also had comprehensive home care, and Medicare has limits on that coverage.

Q. Right. And so, as you talked about in this case, the VA actually has better coverage for home care than Medicare?

A. Yes.

Q. You don't have VA insurance I don't believe?

A. No, no.

Q. Well, you certainly have a background in those two diseases.

Were there any other that you feel the need to look anything up related to the life care plans?

A. I did in a couple of instances looked up some information on kidney cancers, but I've got at this point more than 50 years of experience in healthcare, and at one point or another, I either seen enough on the each of the diseases that I had to deal with so that I didn't feel a need to do research on them.

Q. And so my understanding of your expert reports is that you are taking the life care plans to

identified by each a plaintiff expert and a defense expert and you are looking at -- you're basically looking at reimbursement rate at the present time for those life care plans. Your opinion is not offering any additional opinions on what type of care that plaintiff will need?

A. That's correct.

Q. Okay. And you're not offering an opinion about which government payor provides the best care for these diseases to the plaintiff; is that right?

A. That's correct.

Q. You don't have an educational or experience background administering these programs on behalf of one of the government entities; correct?

In other words, you have never worked for CMS, VA, or TRICARE; is that true?

A. It's true. I'm certainly not an employee. I have contracted -- been a consultant to each of them, but not as an employee.

Q. And you have also never been an employee for any of the administrative entities such as TriWest that administer TRICARE or CCN program of VHA; is that right?

A. Yeah, that's true, but I -- I did participate in the creation and the review of proposals prepared

by the entities that currently hold the TRICARE contracts. So I'm very familiar with the program, but I never worked as an employee for them.

Q. You are familiar with the third-party administration of -- that TriWest performs for TRICARE and the Community Care Network program?

A. I would say yes.

Q. And is it your testimony you helped to develop that structure?

A. No. In the case of TriWest and specifically TriWest the way -- let me answer the question more completely.

I oversaw the writing of the proposal which included the development of the structure early on for an entity that was seeking one of these contracts, but I was not the TriWest situation.

In the TriWest situation I was retained to evaluate proposals that had been submitted because of the expectation that once the contract was awarded there would be an appeal by the other entities.

These contracts are so large that appeals are almost certain, and so I had the opportunity to review the structure and to analyze the structure and compare the structure from one bidder to another.

Q. And did you make a recommendation then about

one bidder over another?

A. Well, I was retained by one of the bidders. So it was necessary.

Q. Understood. You do not claim to be an expert in legislative forecasting; is that true?

MR. TURNER: Objection.

A. In the general sense of legislative forecasting, no.

Q. (By Ms. Wallace) Do you claim to be an expert in political risk analysis?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) You discussed earlier 50 percent of your time since 2010, since you joined BRG, has been expert witness related.

Can you think of times where the Court has ever disallowed, limited or stricken your testimony?

A. Yes, I can. There are two instances. One where my testimony was not allowed. That was in the case between Children's Hospital in Central California and Blue Cross of California where I was an expert witness for Blue Cross.

The case involved identifying the rate that was paid by Blue Cross to Children's Hospital across all the services that were provided to Blue Cross

patients.

I had a deposition. I was not allowed to testify in the local court where the case was being tried. The case was appealed and the California Court of Appeals ruled that I should have been allowed to testify, and sent the case back for a retrial and it was settled. So I didn't have to testify again.

Q. What was the reasoning that the lower court wouldn't let you testify about the Blue Cross/Blue Shield rate?

A. California has unique requirements for determining rates in the healthcare environment. There is something called Gould factors, G-O-U-L-D, which identify characteristics of rates that are supposed to be considered. I didn't consider them. Instead I considered what was actually paid for services by each payor group, and the lower court ruled that I needed to refer to the Gould factors and since I didn't, I wasn't allowed to testify.

The Court of Appeals said that was wrong. The Gould factors might be one thing that should be considered, but other things such as the amounts people pay are also relevant. That's why I should have been allowed.

Q. Do you and I know we're going to talk about

the second instance, but let me ask a quick follow-up question.

Do you also consider yourself an expert in establishing paid rates for private insurance?

A. Yes.

Q. That is what you were an expert -- hired as an expert to testify in that case?

A. That's correct.

Q. And you did not do any -- you did not perform any analyses as it relates to private insurance in this case?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) All right. Tell us about the other instance you can think of where a court has disallowed, limited or stricken your testimony?

A. That was a personal injury case also in California. The plaintiff was -- actually a couple named Pebley, P-E-B-L-E-Y. I don't remember the defense -- the name of the defendant which is odd because they were my client, but the case was known as Pebley, and I did testify.

However, in my testimony I was not allowed to refer to Medicare. The judge specifically said that the jury was not to hear about Medicare.

I'd like to be able to tell you why, but I don't know. It was the judge's decision and so I testified in full, but I did not testify as it related to Medicare.

Q. So the Court found that you were not a sufficient expert in order to testify?

A. No, that was not it at all. The Court believed that if the jury understood that the plaintiff had Medicare that that would influence their judgment as to whether or not to make an award.

Q. It was a collateral source issue?

A. Yes, I'm sorry. I should have said that. Yeah, it was a collateral source issue, although since then I've testified on collateral sources and included them and they've all been allowed to be included in every other case I've testified including at least eight to ten in California.

Q. Throughout your career with BRG, would you be able to estimate how many expert reports you have issued? Would it be over 100?

A. Yes.

Q. Over 200?

A. Yes.

Q. Over 300?

A. Probably not.

Q. Thank you. What percentage of those expert reports would you have been doing something similar to what you've done in this case?

MR. TURNER: Objection.

A. I would say a large percentage. More than half certainly.

Q. (By Ms. Wallace) And so in more than half you would have been identifying the current rate by unit of a Medicare service, a track year service or a VHA service; is that right?

A. Yes, and -- yes.

Q. And do you know like what -- you testified you are 90 percent hired by the defendant. Do you -- what -- why were you hired to do that in so many cases, if you know?

A. The cases that I'm talking about are personal injury cases. Until about 12 years ago I never testified in a personal injury case, and I was asked to testify in one, and I became popular among defense attorneys for cases involving personal injury and the kind of work that we're talking about, identifying how much would be paid not so much identifying how much would be paid, but what was the actual market rate for services as opposed to the charge that a provider might identify.

Q. Yes. So when I was preparing for this deposition, I found you have authored white papers and given presentations for defense attorneys on that issue?

A. That's correct.

Q. And so I just want to make sure we're clear. The white papers that you've issued and the presentations typically when you are being hired to come to develop these rates, you are testifying as it relates to the reasonable value of the healthcare costs; is that correct?

A. Yes.

MR. TURNER: Form.

Q. (By Ms. Wallace) And in this case that was not the assignment; is that true?

A. That's true.

Q. In this case you did not -- you don't have an opinion and it's nowhere in your report that the rates that you've identified are the reasonable value of the service?

A. That's correct.

Q. So in that sense your prior testimony is similar to, but distinguished from what you've done in this case. Is that fair?

A. I think that's fair. I think it's important

to consider that the source of information that I use in both types of cases is similar or, in fact, the same, but the use of the information and what the information was actually used for may be different.

Q. When you say sources, you mean the fee schedules that you have referenced and those types of analyses that you've done?

A. Yes.

Q. I wanted to confirm you have never spoken with any of the life care planners who developed the life care plan that you used in this case. That would be Navarro, Fryar, Hairston, Shahnasarian?

A. That's correct.

Q. Your CV does not list any prior testimony or expertise in the field of offsets; is that true?

A. Hard question to answer. The concept of offset is you may be using it in a specific way, but to me it's a general concept.

Q. Explain your understanding of it.

A. Well, what I'm saying is that an offset is an amount that would be deducted from another amount. So you are offsetting -- in this case an offset is a reduction of damages because of another source paying for them, but offsets can be any reduction of an amount, yeah.

Q. You have never been an expert testifier on legal offsets?

MR. TURNER: Objection.

A. Well, I think that I have, not exactly the same type of offsets that we're talking about, but there have been cases that I've been involved in personal injury cases where trusts were established for injured parties to manage the funds that they might have been awarded and amounts being paid by Medicare or Medicaid particularly Medicaid would be -- would reduce the amounts in the trust because the law requires those -- those payments to still be made, and so those are -- in my mind those are offsets, but that would be the only instance I can think of.

Q. (By Ms. Wallace) In this case you did not calculate a total offset amount. You identified the unit cost per service. Is that accurate?

A. Yes.

Q. And so in this case you're not -- your expertise in your expert report does not quantify an offset amount; correct?

A. You are asking about an overall amount?

Q. Yes, sir.

A. That's correct.

MS. WALLACE: We are at an hour.

Throughout this deposition I'm going to try to take breaks every hour. Would you like a break?

THE WITNESS: Sure.

MS. WALLACE: Okay.

THE VIDEOGRAPHER: We're off the record at 10:08 a.m.

(Break taken from 10:08 to 10:16 a.m.)

THE VIDEOGRAPHER: We're back on the record at 10:16 a.m.

Q. (By Ms. Wallace) Dr. Miller, have you read the Camp Lejeune Justice Act Statute?

A. No.

Q. You, if I understand correctly, you were not expressing an opinion for the Court on how offsets are to be applied under the Camp Lejeune Justice Act; is that correct?

A. That's correct.

Q. Are you expressing an opinion on which government payors should be offset under the Camp Lejeune Justice Act?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Can you tell me how it came to be that you were retained in connection with the Camp Lejeune Justice litigation?

A. Before BRG was retained I was contacted by another BRG managing director that was Robin Cantor, and Robin was aware of the work I had been doing on personal injury cases, and she saw the similarity and asked me to participate in the original submission for the Department of Justice of our credentials.

Q. And so are you saying that you submitted your credentials to the United States as opposed to them initially contacting you?

MR. TURNER: Objection.

A. I -- I don't know because I wasn't involved. I submitted my credentials to Robin Cantor, and I don't know whether she was asked to submit them or she submitted them on her own. I have no idea.

Q. (By Ms. Wallace) Can you explain to me one more time who is Robin Cantor?

A. She's another managing director in the firm. She's not in the health analytics practice. She's an economist, and she's --

Q. She's a BRG employee?

A. And she's a BRG employee, yes.

Q. And so you submitted your resume to Robin and then the next thing you knew what happened?

MR. TURNER: Objection. Dr. Miller, to the extent you can answer without discussing any of

the substance of our conversations, you may do so.

THE WITNESS: Sure.

A. Well, absolutely nothing happened for quite a while. And then at some point several months ago -- I don't remember how many -- probably a year, I guess, I was contacted again by Ms. Cantor who wanted me to participate in a discussion with the Department of Justice.

Q. (By Ms. Wallace) The first conversation that you had with the Department of Justice, without telling me any substance of what you talk about, do you remember when that was?

A. I don't. I think it was about a year ago, but I'm not sure.

Q. Was it on a zoom?

A. Yes.

Q. Was it different attorneys than the ones that are involved today?

A. Mostly. I believe that Mr. Cromwell was in that call. Mr. Turner was not and there were other attorneys involved.

Q. Has the scope of what you were asked to do on that call changed over the past year, or is it the same?

MR. TURNER: Objection. Dr. Miller,

again to the extent you can answer without disclosing your conversations, you may do so.

A. I just say the scope is consistent from the beginning.

Q. (By Ms. Wallace) Do you recall if you signed a retainer agreement with the Department of Justice you or BRG?

A. I did not. I assume BRG did.

Q. You have not seen it; is that true?

A. That's true.

Q. Do you know how much BRG has charged the government for the opinions that you hold in this case?

MR. TURNER: Objection.

A. No. Just the way we work, I don't get to see the invoices.

Q. (By Ms. Wallace) In response to your notice of deposition, we the plaintiffs received a number of invoices from BRG that I am going to put in the chat feature.

(Miller Exhibit Nos. 5, 7-10 were marked.)

MS. WALLACE: Please let the record reflect that I have uploaded into the chat feature Exhibits 5, 7, 8, 9 and 10.

Five is the Department of Justice's cover

letter regarding the production of responsive documents for Henry Miller dated February 12th of 2026.

Exhibit 7 are BRG invoices that were provided in response to your deposition notice and they have a Bates stamp number of Miller_U.S.A._9 through 37.

Exhibit 8 is an additional cover letter dated February 17th, 2026, that's this past Tuesday, providing additional responsive documents for Henry Miller.

Exhibit 9 are the additional BRG invoices provided and Exhibit 10 is a summary of the invoices that I have prepared for us to talk about, and I put that up on the screen for you.

Q. (By Ms. Wallace) Actually let's first look at Exhibits 7 and 9, which are the invoices themselves just to confirm that those are your invoices. Okay?

A. Okay.

Q. Do you recognize the invoices in Exhibit 7?

A. Yes.

Q. And I'm going to scroll through those. Do these look like typical invoices that are produced from BRG?

A. Yes, they do.

Q. And as it relates to some of the

descriptions, does BRG typically do such abbreviated descriptions for their expert work?

A. Yes.

MR. TURNER: Objection.

Q. (By Ms. Wallace) Do you know why and let me give you an example. Most of them state, quote, analyze data and reported results, end quote.

A. Yes.

Q. Do you know why that is?

A. Why it's abbreviated?

Q. Yes.

A. I don't. That is the firm policy is done for all invoices. You are not the first to ask questions about it, but it was a corporate decision made quite a while ago.

Q. Does the abbreviated content in the invoices make it difficult for you to know who did what with respect to which reporter?

MR. TURNER: Objection.

A. Not really because I wouldn't rely on the invoices to know that. As you can see from these invoices, the majority of the support was provided by Julian Brock and Ayako Sekiya, and --

Q. (By Ms. Wallace) So do you have some type of internal case files that would tell you the answer to

who did what on which report that is not the invoices?

MR. TURNER: Objection.

A. No, I do not. I -- you know, when the work is being done and reports are being prepared, I'm in contact phone contact with Julian, Julian Brock pretty regularly, and as far as I'm concerned, Julian is the one who is doing the work. Ayako is supporting him, but any information I need as to who is doing what, I can get just by asking.

So the invoices are -- as these descriptions are not really relevant to that question.

Q. (By Ms. Wallace) And so if I asked you which of your colleagues at BRG worked on Bruce Hill's report, would you be able to look up something on your database and tell me that? Would you have to make a phone call? How would you know the answer to that?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Say that again, Doctor.

A. I'd have to call and ask.

Q. Okay. Can I ask you do you know why the Camp Lejeune litigation in the subject heading it says to U.S. DHA in care of U.S. Department of Justice, and then you have the identifier of the case as Blackmer, et al. versus United States of America.

Do you know why it has that title associated

with it?

MR. TURNER: Objection.

A. No, I don't.

Q. (By Ms. Wallace) Did you put that in the invoices or someone else at BRG?

A. It wasn't me.

Q. Do you do your own invoices for your expert work or is that someone else?

A. Well, it depends upon the case. I don't ever do my own invoices, but I review invoices prepared by our billing department for my cases.

When I say "my cases," those are cases where I'm identified as the primary person in charge of the case. I'm not in the case of the Camp Lejeune matter. So I wouldn't -- I literally don't see these invoices.

Q. So you have not reviewed the Camp Lejeune invoices that are on the screen in Exhibit 7?

A. No.

Q. But do you recognize that they are with respect to this case?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) How can you tell that they're for this case?

A. Well, while you may and I for that matter may

know why the case is labeled as Blackmer, that's what we call it.

Q. Internally that's what you call the case this Camp Lejeune litigation is Blackmer?

A. Blackmer, yeah.

Q. And you do not know if that is a Camp Lejeune plaintiff?

A. I assumed it was.

Q. But as we sit here today, you don't know where that name comes from?

MR. TURNER: Objection.

A. That is correct.

Q. (By Ms. Wallace) Can I assume that because you have not seen these invoices, you have not tallied them up?

A. Yes, that's correct.

Q. Okay. Let's look quickly at Exhibit 9, which is an additional set of invoices that we received this week.

Do you recognize these invoices?

A. Well, this invoice, yes.

Q. It looks like it's an invoice from with the date of February 10th, 2026, here?

A. Yes.

Q. Are you aware of any other invoices that BRG

has sent to the government with respect to this case than the ones that you've been shown?

MR. TURNER: Objection.

A. I'm pretty sure that other invoices have been submitted. The invoices you showed me only relate to work that I did, but I know that others are working on the case too.

Q. (By Ms. Wallace) Do you mean so these invoices that I just showed you -- I'm going to put Exhibit 9 back up -- they identify multiple individuals that have been involved in this case.

Do you see that?

A. I do.

Q. Are you saying that there are other invoices as well?

A. I'm saying I don't know. I'm assuming that there are. These invoices relate only to the work that I did for the preparation of my reports and preparation for this deposition.

Q. I see, okay. Let me see if I'm understanding you. Greg Russo also issued an expert report in this litigation.

Is that perhaps what you are talking about these only are invoices related to the expert reports of Henry Miller?

A. That's what I'm saying.
Q. Thank you. I got it now. All right. So for your invoices -- so that would be an entire different set of invoices related to the expert reports of Russo?
A. That's correct.
Q. All right. I'm going to put up on the screen Exhibit 10, which I will represent to you is a summary of the invoices that are contained within Exhibit 7 and 9. Can you see that, Dr. Miller?
A. Not really well.
Q. Let's see if I can zoom on this. Let's zoom in on the big chart. Can you see that?
A. Yes.
Q. Do you recognize and I just counted including yourself 17 individuals have -- and you can see that on the right side of the screen. Let me see if I can scroll over.
These 17 individuals worked on your reports based on your recollection. Is that accurate?
A. No.
MR. TURNER: Objection.
Q. (By Ms. Wallace) No. Which ones do you recognize did not work on your report?
MR. TURNER: Objection.

A. Greg Russo, Natasha Brecht, Andrew Sandler, Jaylen Jordan, Lucas Robertson, Victoria Miller, Noah Spain, JoAnna Younts, Madison Yonash -- Madison might have done some work early on. I'm not sure. Danielle Fazio, Nikisha Small, Ellen Chinn, and Genevieve Aziz.

Q. (By Ms. Wallace) And so that leaves which persons is it your testimony assisted in preparing your reports?

MR. TURNER: Objection.

A. Julian Brock and Ayako -- Ayako Sekiya.

Q. (By Ms. Wallace) And you just the top --

A. And me of course.

Q. -- just the top three persons?

A. Yes.

Q. Do you -- do you know why all these other persons were identified in your billing?

MR. TURNER: Objection.

A. No. That would not be my billing or interpreting that as being billing for the -- for my work on the case. They may have done other things relating to the Camp Lejeune matter, but not my reports.

Q. (By Ms. Wallace) What is your testimony with regard to why the individuals identified in your invoices have been produced to us in connection with

your reports?

MR. TURNER: Objection.

A. I don't know.

Q. (By Ms. Wallace) With regard to the individuals that you testified assisted you Julian Brock and Ayako Sekiya, does the amount of time look accurate that they spent on the Henry Miller reports?

A. Yes.

Q. Does your amount of time look accurate?

A. Yes.

Q. And so Julian Brock is a senior associate with BRG according to the invoices with an hourly rate of $415 and $430 per hour, and she (sic) spent approximately 213.6 hours in connection with your reports. Is that accurate?

A. Not exactly. For part of the time until maybe January, Julian was a senior associate. He was promoted to consultant which is the next level up recently. So the 415 rate is for the rate for a senior associate, and the 430 rate is the rate for as a consultant.

Q. And in Exhibit 10 do you see the chart right beneath the summary chart?

A. Yes.

Q. Does that accurately reflect approximately

when his rate changed? It looks like the first time he had the 430 rate was 12-10, 2025?

A. Yes.

Q. For Julian, do these -- does the quantity of time look consistent with the quantity of time you know him to have put into helping to develop your reports?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And so Julian billed approximately $89,740.50?

A. Yes.

Q. Did you assemble Julian to assist you with your reports or was he assigned to you within BRG?

MR. TURNER: Objection.

A. Could you ask that question again.

Q. (By Ms. Wallace) Did you get to chose Julian to work with you, or did BRG, like, assign you to work with you?

A. No. A good question. Just the way it works. I asked for Julian to work with me. Julian is very sharp, and but I did have to ask and he was then assigned to me.

Q. What is his background educationally and experience wise?

MR. TURNER: Objection.

A. He has a bachelor's degree in economics. I don't remember from where. I'm probably going to lose the opportunity to use him in the not too distant future because he wants to get a master's degree.

Q. (By Ms. Wallace) Because he does have a master's degree?

A. No, because he wants to get one.

Q. I see.

A. That's about all I know about his educational background.

Q. Is he a certified coder?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Can you tell me -- now, it looks like he spent over three times the amount of time on your reports than you did.

Is that a fair assessment from the billing invoices?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) What did he spend his time doing?

MR. TURNER: Objection. Dr. Miller, to the extent you can answer without discussing any

privileged communications or conversations, you may do so.

A. Okay. He and I did the research the looking up of the rates and filling in tables. That's the bulk of the work.

Q. (By Ms. Wallace) Did they do -- you have a number of footnotes in your reports. Did they assist with your source materials in the footnotes?

MR. TURNER: Objection.

A. Yes. Yeah, there certainly were instances where I said to them, I have seen this somewhere. Could you find it. So that would be the nature of the identifying the footnotes.

Q. (By Ms. Wallace) Let's talk briefly about Ayako Sekiya. What is her educational background? Is it a she? I'm sorry.

A. Definitely a she.

Q. Okay.

A. I don't know her educational background. I do know that she has a bachelor's degree. I don't know from what in and where.

Q. Did you recruit her or was she assigned to you?

A. No, Julian recruited her. Once I got Julian to work with me, his immediate response was given the

timeframe that we have I need help, and I said well, who do you want, and he said he wanted Ayako, and I didn't know Ayako before this case, so he obtained her.

Q. Yeah. We're going to talk about the timeframe making a note for myself.

So do you know if Ayako is a certified coder?

MR. TURNER: Objection.

A. She is not, but I want to make something clear that may not have been stated. The three of the four life care planners that submit the life care plans for the -- for the plaintiff that we analyzed included CPT codes in their -- in their life care plans and we used their CPT codes.

Q. (By Ms. Wallace) Yes, sir. And one of the four did not. Which one was that?

A. I think Hairston. It was either Hairston or Navarro.

Q. And so for the life care planners that did not identify CPT codes, would you or Julian or Ayako have been the individuals who had to identify the appropriate CPT code?

MR. TURNER: Objection.

A. Yes, but again there isn't that much variation in the CPT codes used across the plaintiffs.

So the same services would have been identified in other life care plans, and like I said before, they're not he is tier Rick. They're not unusual services. They're services and CPT codes that we see every day. So it wasn't a complex process.

Q. (By Ms. Wallace) Some of the plaintiffs had more complicated life care plans than others more specifically the Parkinson's and leukemia patients?

MR. TURNER: Objection.

A. Correct.

Q. (By Ms. Wallace) Did which of the three of you was responsible for looking up CPT codes that were missing from a life care plan?

MR. TURNER: Objection.

A. The primary responsibility went to Julian Brock, and if he was really unsure -- and that only happened a couple of times -- he would ask me, but him being unsure in this case meant one or another.

You know, the description of the service was not specific enough to be -- to match up to a -- match up to a CPT code. So we had to make some decisions, and those decisions were made jointly, but that only happened once or twice.

Q. (By Ms. Wallace) You -- neither of the three of you consulted with a certified coder or a physician

for choosing those CPT codes?

A. I didn't, but Julian may have. I don't know, but you make it sound as though picking these CPT codes is a really complicated process. It's not. They're pretty straightforward.

Q. We talked earlier about Ayako's educational background and you said you think she has a bachelor's?

A. I know she has a bachelor's degree. I just know where she got it.

Q. You don't what it's in?

A. No.

Q. Do you know how long she's been with BRG?

A. I think two years. Over two years, but not three.

Q. Do you know if she came to BRG with a background relevant to the work that she performed?

MR. TURNER: Objection.

Q. (By Ms. Wallace) I'm sorry. Did you answer, Doctor? I must have missed the answer.

A. I'm sorry. I answered no.

Q. (By Ms. Wallace) Thank you. Do you know how long Julian Brock has been with BRG?

A. I think three years.

Q. Do you know if he came to BRG with a

background relevant to the work that he performed?

MR. TURNER: Objection.

A. I don't know.

Q. (By Ms. Wallace) For Ayako, she spent 169.8 hours at a rate of $415 per hour for a total of $70,467 in connection with your reports; is that true?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And your rate as managing director is $825 an hour; is that correct?

A. Yes.

Q. And you spent approximately 63 hours in preparation for your reports totalling $51,975?

A. That is for preparation of the report and for January and February after which the reports had already been submitted and it doesn't include February.

Q. Understood. So there is a percentage of that time or a number of that time that was actually spent just preparing for deposition as opposed to preparing your report?

A. Yes, that's correct.

Q. And so as it relates to the three of you preparing the reports, are you in more of a oversight and, you know, essentially is like editing role as it

relates to the reports, or help me understand how it works?

MR. TURNER: Objection.

A. Well, it's pretty straightforward for all the work that I do. The objective is to not have me at my high rate doing work that could be done at a lower rate and done effectively, and so what I do is I outline the reports. I write specific sections that can be written particularly as it relates to the methodology and then assign Julian who works with Ayako to find the rates that need to be found and to find other information that will be going into the tables and to prepare the tables, and then I review the tables and I may have discussed items in the tables with them prior to reviewing them and giving direction on that and then in a few instances -- in a few instances Julian prepared drafts of paragraphs as they related to the data and the methodology and then I review the whole thing.

Q. (By Ms. Wallace) Would you say -- oh, I'm sorry.

A. You'll note that the reports are fairly similar.

Q. Yes. Yes.

A. Which means that I don't -- once I prepare

the initial effort the outline basic sections, they don't have to be redone each time. We pretty much adapt what we've written for the first time into the subsequent reports.

Q. There are -- so as far as the manual process of looking up the rates for each of the government payors, that job is more administrative and was assigned to Julian and Ayako as opposed to you as a higher billing rate?

MR. TURNER: Objection.

A. I wouldn't describe it as administrative. It is, but it requires a judgment that you couldn't just have a clerical assistant look up the rates. That person could probably find some of them, but it takes a little bit more understanding to accurately identify the rates, but yes, the answer to your question was yes.

Q. (By Ms. Wallace) The source material that you and your team have cited, can I ask has -- given how often BRG is an expert consultant, does BRG have some type of a program in place where you can look up the CPT -- you can enter the CPT code and it kinds of gives you the rate?

MR. TURNER: Objection.

A. If only. No, we don't have that. I don't

know that such a thing exists because if it did we'd probably want to buy it, but no.

Q. (By Ms. Wallace) So is it all done -- is there a reason a program -- what would be the reason like a program couldn't be established for something like this?

MR. TURNER: Objection.

A. Well, a program is established for each individual payor. The Medicare professional fee schedule, which is what we use for many of the rates in the reports is a -- is an application where you identify the CPT code, identify where the CPT code is being applied the region where they the geographic area, and then you can -- it will just give you the rate. So we don't need to develop our own for that.

It would be nice if there was software that would allow you to have all of the payors in one place and look under the rates that way, but that's what doesn't exist. There is separate software for separate application available for veteran's health, and a separate one for TRICARE.

Q. (By Ms. Wallace) Is that -- so there is software by government payor that you can put in the CPT code in the geographic area and it spits out the rate?

A. Yes.
Q. So it's -- go ahead.
A. But it's more complicated in some ways. For example, in the Medicare fee schedule, it will give you a rate whether the service is being performed in a physician office versus in a hospital, and the rates often are similar. Sometimes they're different. And the rate is the total allowed amount, which is the total amount that is going to be paid.

If it's a Medicare part B service, meaning that it's an ambulatory service, then a co-pay is involved, and so a portion of the rate identified in the Medicare fee schedule has to be reduced to identify the co-pay.

Q. You mean you have to actually subtract out the patient contribution?
A. In this case, yes.
Q. Did you and your team keep any of that math as it relates to the subtraction of patient payments for any of these government payors?

MR. TURNER: Objection.

A. I did not and normally -- well, I don't know that that is normally.

It was not something that I asked to be done. It may have been done, but I don't know. I don't

believe so.

Q. (By Ms. Wallace) As it relates to the selection of rates that occur by Julian Brock and Ayako Sekiya, did you verify the rates that they selected, or was that -- or did you trust them to do that appropriately?

MR. TURNER: Objection.

A. Well, I definitely trusted them to do it appropriately. This is certainly not the first time they've done this. They are very experienced in doing it in this context. I spot check some of the rates. I certainly reviewed all of the rates to make sure they made sense and they did, but in other work where a similar look-up process has taken place, they did not.

So in my experience it's best I may review all of the rates, I didn't need to look most of them because they seem correct.

Q. (By Ms. Wallace) Do you know if any form of artificial intelligence was used preparing your report, sir, looking up the rates?

A. No form of AI was used.

Q. Does BRG have a policy on that?

A. I would say it's under development.

Q. If one of the rates that was selected by

Julian or Ayako was incorrect, that would affect the total analysis once the economists quantified it all. Would you agree with me?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) The fee schedules and rates that were selected, do those represent what the Medicare, VHA and TRICARE rates are at the present time?

MR. TURNER: Objection.

A. Some of them do. We consistently follow the process of identifying the most recent available rate and some of the rates and certainly some of the key rates are our 2026 rates. Some of them are 2025 -- well, some of them are 2025. Probably most 2025. Reports were written in 2025.

There are one set of rates that is -- well, at least one that is earlier than that. The medication rates are 2023 rates because those were the latest available.

Q. (By Ms. Wallace) You and your team did not do any future projections about how those rates might change in the future. Is that accurate?

A. Yes.

Q. Yes, you did not?

A. It is accurate, we did not.
Q. And all of the opinions that you expect to render to the Court in this case are contained within your expert reports; is that true?
MR. TURNER: Objection.
A. All of the opinions as of now as of everything I know are in my report. If I'm asked by DOJ to look at something else, you know, I'll do that, but as of now, my opinions are in my reports.
Q. (By Ms. Wallace) Would you describe in your own words the scope of your assignment in this case as was articulated to you by the DOJ please?
MR. TURNER: Objection. And Dr. Miller, you can answer to the extent you don't discuss any of your communications or our conversations.
A. The scope is to take the life care plans that were prepared for each plaintiff that we received and identify how much a government program in this case it would be Medicare, VHA or TRICARE would pay for those services or products.
We had a plaintiff life care plan and a defense life care plan for each of the -- for each of the plaintiffs that we reviewed, and we did that work for both the plaintiff and defense life care plans.
Q. (By Ms. Wallace) The information that you

received by the government, did they -- are they the ones that told you which government payors applied to which plaintiff?

MR. TURNER: Objection.

A. Yes, we received that information from the government.

Q. (By Ms. Wallace) Did you make any efforts to verify the eligibility of each of the plaintiffs of the government payor that was identified?

MR. TURNER: Objection.

A. We did not because the information as to which payors they used which payors we included I should say, were based on payors that each of the plaintiffs had actually used. So we knew they were eligible.

Q. (By Ms. Wallace) In the case of one of the plaintiffs Welch, do you recall that you had issued a report for Welch when you issued your April reports and then did not issue one for the December reports?

MR. TURNER: Objection.

A. Yes, I recall that.

Q. (By Ms. Wallace) Why is that?

MR. TURNER: Objection. Dr. Miller, to the extent you can answer without discussing your conversations or communications, you may do so.

A. I can only answer by saying that we in the December reports we included all of the plaintiffs that we were asked to review. We were not asked to review Welch.

Q. (By Ms. Wallace) So essentially the assumption that Welch had VHA and Medicare was withdrawn from your -- from the information given to you by the DOJ?

MR. TURNER: Objection.

A. No. I mean, that was not what would happen. We were simply given the life care plans and reviewed with the Department of Justice which ones we should be examining, and Welch was not included. I don't have any idea what the reasons were.

Q. (By Ms. Wallace) I noticed that some of the government payors changed from your first round of reports in April to your second round of reports in December.

Do you recall which ones you added on government added or subtracted government payors for?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Did if -- let's just say there was an addition for Bruce Hill, for example, did you get like a new round of assumptions from the

government to make that change, or how did you get that new information to add a government payor?

MR. TURNER: Objection.

A. It would have been -- we got a new set of assumptions.

Q. (By Ms. Wallace) Have you -- in what form did that come to you in?

MR. TURNER: Objection.

A. I'm trying to remember whether it was written or discussed and I don't remember. Actually I think it was both.

Q. (By Ms. Wallace) Are your assumptions were they included in your reliance materials for each of the plaintiffs?

A. I don't know. I have to look.

Q. We both agree that you are relying on whatever document it is that you are referencing to know which government payor is applicable to which plaintiff; correct?

A. Yes.

Q. And if your reliance materials don't have any reference to that document, they might should. Is that fair?

MR. TURNER: Objection.

A. Not necessarily. I'm having difficulty

remembering whether the information was passed on during the phone call versus a document. So it's quite possible that it was just phone calls, although there may be a document in the materials considered.

Q. (By Ms. Wallace) And if there is not, there should be?

MR. TURNER: Objection.

A. Well, if there was one, there should be.

Q. (By Ms. Wallace) If one exists, then it should be?

A. Yes.

Q. Okay. You state numerous times in your report that the rates that you and your team have developed can all be supported by publically available reimbursement data. Is that accurate?

A. Yes.

Q. There is no secret formula or proprietary BRG formula or proprietary BRG information that you have relied upon to form the rates; is that true?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) When the government gave you the payor -- payor's government related, did they disclose to you whether or not each of the plaintiffs that you evaluated had private insurance as well?

MR. TURNER: Objection.

A. They did not.

Q. (By Ms. Wallace) If one or more of the individuals that you performed reports for had private insurance, would you agree with me that that private insurance could be primary for some of the medical services identified in the life care plans?

MR. TURNER: Objection.

A. There are circumstances where it could be primary.

Q. (By Ms. Wallace) So if the economist had taken your numbers for the rates and developed a full offset value based on the government payor, if there are individuals who also have private insurance, there is a possibility that the private insurance would pay for that future care as opposed to the government payors?

MR. TURNER: Objection.

A. That's a more complicated question than it sounds. It is possible, but as to who is the primary payor and who is the secondary payor it can depend upon the contract that the individual has with their insurance company or the specifics of the service that is provided, but it's possible.

Q. (By Ms. Wallace) That would require another

analysis if there was a private payor paying on future care in the future?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And the same would be true if an individual that you've analyzed later obtains private insurance after the dates of your report, we would have to do a reanalysis as to which payor would be primary and secondary to properly determine what the likely government benefits would be for that life care plan. Do you agree?

MR. TURNER: Objection.

A. Well, we have to be more specific. Most of the plaintiffs that are included in our reports have Medicare, and if they have Medicare, they could not get private insurance. Private insurance companies stop offering their programs after age 65 and you have to enroll in Medicare. So for those plaintiffs that wouldn't be the case.

Any plaintiffs under age 65 could have private insurance until they're 65, but I don't recall if there are any or how many if there are.

Q. (By Ms. Wallace) And so in -- so in the case I'm thinking of my mother specifically. She's 71. She's the managing partner of this law firm. We have

Blue Cross and Blue Shield insurance. She's not allowed to have her own insurance. She would be -- how does that work?

A. That's, you know, I have to say I'm glad that it's so complicated because it's given me a career, but the way it would work is when you are age 65, you get Medicare part A for free and that is everybody gets it at age 65.

So if you have private insurance within the firm, for your mother it does not include hospitalization. If she's hospitalized, then it's covered by Medicare. All other services, however, not inpatient services are covered by the insurance.

If you have Blue Shield, it would be by Blue Shield, and once she stops being a member of the firm because she's a member of a group, and group insurance is different than individual insurance.

Once she's no longer a member of the group, then she has the opportunity to purchase the part B and part D coverage from Medicare.

Q. So your prior testimony about Medicare over age 65 is only in reference to part A Medicare?

MR. TURNER: Objection.

A. No. I treated each of the plaintiffs as individuals and not as members of a group. To the

extent that any of them are working or are members of a group insurance plan, what you said is true, but I didn't have any information on that.

Q. (By Ms. Wallace) So based on the information you have been given on the plaintiffs, you're unaware if any of them would be eligible for private insurance in the future?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) And if they were eligible for private insurance in the future, that would require a relook at who -- at what entity might pay for the future medical treatment identified on the life care plans?

MR. TURNER: Objection.

A. Well, that also is a complicated question. It really it depends on the private insurance, and it depends upon the plaintiff's decision as to how they want to approach it.

If they have alternative coverage like VHA coverage or TRICARE and private insurance, they can elect which one they want to use, and also the provider has a role in it too. So it's a hard question to answer.

Q. (By Ms. Wallace) Do you have any idea how

the plaintiffs that you evaluated might chose to elect their coverage in the future?

MR. TURNER: Objection.

A. Could you repeat that question.

Q. (By Ms. Wallace) Do you have any idea as to how the plaintiffs that you evaluated might chose to elect their coverage in the future?

MR. TURNER: Same objection.

A. No.

Q. (By Ms. Wallace) I understand that there are certain parts of Medicare that are optional such as part B and part D; is that correct?

A. Yes.

Q. Were you given information on whether the plaintiffs have elected to participate in part B and D?

MR. TURNER: Objection.

A. No. I assume that they did or would.

Q. (By Ms. Wallace) So all of your numbers were making the assumption that that Medicare recipient is participating in part As, B and D?

MR. TURNER: Objection.

A. That's correct. But assumption was not that they were participating in that, but that they would make rationale economic decisions, and the rationale

economic decision for each of these plaintiffs given their conditions is that they would chose insurance coverage and that would be the insurance coverage available.

Q. (By Ms. Wallace) One of the reasons that part B and D are optional I believe is because they carry with it premium costs; is that true?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) So sometimes individuals can't afford those premiums; is that true?

MR. TURNER: Objection.

A. That's true. However, if they can't afford the premiums, then given their conditions, they certainly can't afford to pay for the care. The premiums are a lower cost option for them certainly not by definition, but in the greatest likelihood, and if they did not have access to funds to purchase part B and part D, they might be eligible for Medicaid in which case the services would be paid for by a different government program, which was not included in this -- in the analysis I did.

Q. (By Ms. Wallace) Right. So you did no analysis as it relates to Medicaid or Medicare part C; is that correct?

A. That's correct. Didn't -- we did, but it wasn't just something we decided. In the case of Medicaid to the best of my knowledge and the information that we received, none of the plaintiffs that we studied had Medicaid opportunity, and I forgot the second part.

Q. Medicare part C?

A. Oh, Medicare part C. Medicare part C is an alternative to A, B and often D.

You can chose to have coverage from a private contractor, private insurance company that's under contract through Medicare and that would cover -- that would cover all your health insurance needs, and so in order to do an analysis, you have to consider using A, B and D or C, not both.

And since most of the part C plans that exist pay at the Medicare rate or lower, it was more appropriate to use A, B, and D, plus the data for A, B and D. There is no data for C, although my experience, and it's a considerable amount, is that they pay the same rates.

Q. So your plan in your expert reports was limited to an evaluation of Medicare parts, A, B, D for the reasons you just stated?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) You did not do any type of analysis on the life care plans related to whether the treatment was medically necessary or reasonable; true?

MR. TURNER: Objection.

A. That's true. We assumed that if the life care planner had included it, it would be identified as medically necessary.

Q. (By Ms. Wallace) And you have a sentence in each report that states that you do not have an opinion on whether their exposure -- the plaintiff's exposure at Camp Lejeune was causative to their disease. You're not expressing a causation opinion in this case; correct?

A. That's correct.

MS. WALLACE: Are we at an hour. Would you like another break, Dr. Miller?

THE WITNESS: Sure.

MS. WALLACE: Okay. We'll just take maybe -- want to come back at like 1:30?

THE WITNESS: That's fine.

MS. WALLACE: I'm sorry and that's 11:30.

THE WITNESS: 11:30.

MS. WALLACE: Yes.

THE VIDEOGRAPHER: We're off the record at 11:21 a.m.

(Break taken from 11:21 to 11:30 a.m.)

THE VIDEOGRAPHER: We're back on the record at 11:30 a.m.

Q. (By Ms. Wallace) Dr. Miller, for the particular scope of this project, it did not require your expertise in accounting; is that true?

MR. TURNER: Objection.

A. Well, I may have a much broader definition of accounting than you, but if you mean bookkeeping and preparation of financial statements, no.

Q. (By Ms. Wallace) It didn't require your Ph.D. expertise?

A. Oh, I wouldn't say that because my Ph.D. --

Q. In accounting?

A. The accounting part of it, I think it did. I mean, this is a -- to understand the structure of the rates, particularly Medicare rates that are used, you do have to have an understanding of accounting.

In my work for CMS, I played a role in the development of that structure of physician rates as well as some others, and I would say my knowledge of accounting was helpful. I have a much broader understanding -- broader definition of what accounting

is.

Q. And if I'm understanding you correctly, that doesn't have as much to do with the numbers that you produced themselves as much as it does understanding the government plan application?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Or did I misunderstand?

A. No, perhaps. The government Medicare numbers for physician services actually consist of three parts, and the way in which they're structured is definitely -- it definitely helps if you have an accounting background.

The work that I did could be done simply by just taking the number and applying it in reports, but understanding what that number means is to me a part of it and understanding it requires some accounting knowledge.

Q. And when you say understanding what that number means, can you help me understand what you mean?

A. Sure. The physician payment rate includes three components: a work component how much work a physician actually puts into a particular CPT code, and it includes an administrative component one of the other costs associated with the -- with the CPT code.

So for example, if you have a radiologist doing something in their office, the cost of the equipment, the cost of the office, the cost of the auxiliary staff are all included in that second component, and then there is a third component which is just the malpractice insurance component which is different by specialty and therefore by CPT code.

So all of those go together. The administrative component is the methodology. The administrative component is something I designed 20-some years ago 25 years ago -- oh, this is 2026, maybe 30 years ago, and the -- definitely the skills that I have in accounting were critical to that and so I see them as important.

Q. So what you just described, is that relative to identifying the proper CPT code or identifying the proper fee schedule rate? Where does that fall in the mix of the numbers that you came up with?

MR. TURNER: Objection.

A. It certainly has no relationship to the CPT code that would be a given in any of the analyses that I've discussed. The rate, it does have to do with the rate. It doesn't have to do with the amount in the rate the specific numbers, but it has to do with understanding what those numbers represent.

Q. (By Ms. Wallace) Is it important -- so but the final rate that is -- that you guys selected, it's tied to a CPT code. Is it important for the Court to understand what that number represents?

MR. TURNER: Objection.

A. Maybe. I don't know. The Court may say, well, how did they get that number and then I can explain it.

Q. (By Ms. Wallace) But the number itself is pursuant to the fee schedule?

A. Yes.

Q. That has a complicated analysis behind it, but at the end of the day, the number is what the number is?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) Okay. For the scope of this particular project, did you use your economics background?

MR. TURNER: Objection.

A. I would say yes, but I can't give you specific examples. In my doctoral program, I took courses in macroeconomics, and in the macroeconomics courses, we discussed the components of government expenditures and that's part of the report. So I

think and you are asking the questions. I'm responding by defending my accounting and economic background, but to me it's different than what many people may think, but that's what I think.

Q. (By Ms. Wallace) Your fee schedule rates that you developed in this case, you did not do any present value calculations or any type of an economics application to those numbers; is that true?

MR. TURNER: Object to form.

A. That's true.

Q. (By Ms. Wallace) And as it relates to the persons that the economists for the DOJ that took your rates and applied them to the life care plan durations, did you do any -- did you check those economists' math at all? Did you ever see those reports?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Did you -- I think the answer is no, but did you calculate what the same services would cost if purchased privately?

A. No.

Q. Is that because that was not a part of the scope of your assignment?

A. That's correct.

Q. And did you calculate private pay rates or uninsured rates for uncovered services?

MR. TURNER: Objection.

A. Yes. There were very few that applied, but there were certainly -- yeah, there was some services in one of or more of the life care plans that were not covered by somebody that was one of the payors involved in that life care plan, and in that case we used other methods which in effect would be private pay methods.

We calculated them, but they didn't -- I'm sorry. I should have made it clear. I didn't mean to go off on a tangent. If the services weren't covered, then they're not included. There is no rate included for them.

Q. (By Ms. Wallace) There is a zero dollar --

A. Right.

Q. -- entry by your team for that service?

A. Right.

Q. And so in the event that the applicable government payor to that plaintiff doesn't cover a service that is represented in the life care plan, your answer on that is zero; correct?

A. Correct.

Q. But you didn't look into what that might cost

the plaintiff if he or she was -- had no other insurance or was paying out-of-pocket or had a private insurance?

A. No, because all I was calculating was how much the government would pay.

Q. Okay. And so we don't know -- you're not offering any testimony on what the reasonable value of uncovered services would have been; correct?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) For -- I want to talk about the assumptions that might be applicable to your report.

So in order for your numbers to be helpful to the Court, the Court would first need to accept at least one of the life care plans either the plaintiff's life care plan or the defense life care plan; correct?

MR. TURNER: Object.

A. The Court is going to decide however it sees fit. I can't say whether they would look at my numbers without picking one or the other life care plans. I don't know.

Q. (By Ms. Wallace) All of your numbers are based on either the plaintiff or the defendant's life

care plan?
A. That's correct, yes.
Q. And without those plans, your numbers don't mean very much?
MR. TURNER: Objection.
A. Well, that's --
Q. They lost their context.
A. Exactly.
Q. Okay. For your reports, do you assume that each plaintiff is going to remain eligible for the applicable government program for the entire duration of the life care plan?
MR. TURNER: Objection.
A. Well, I didn't have to make that assumption. My assignment was to identify how much the government would be paying for those services. I didn't have to identify how long those services were going to be provided or how long the government payment was going to go.
Q. (By Ms. Wallace) Well, you did review the life care plans which note how long the -- which reflect future care sometimes decades into the future for each of the plaintiffs; correct?
A. Yes.
Q. And so again if someone were to take your

numbers which I do understand are a point in time. They're the point in time that we are right now, but if someone; i.e., the DOJ economist is going to take your numbers and apply them into the future, would you agree with me that that -- the assumption would be that that plaintiff is remaining eligible for those government programs for the duration of the life care plan?

MR. TURNER: Objection.

A. If that person used the numbers throughout the patient's life, the answer would be yes.

Q. (By Ms. Wallace) If that person applied the life care plan using your numbers and the durations identified, the assumption underlying that is that that plaintiff is still receiving that government program into the future?

A. That's not my assumption, but the answer is yes.

Q. Whose assumption is it?

A. It's the person who is making it.

Q. You mean, it's the economist's assumption?

A. Yes.

Q. And so does that mean -- so for each of your expert reports where you have two tables for each of the plaintiffs, you don't have an opinion as to

whether those rates would apply into the future?

MR. TURNER: Objection.

A. No, my opinion is what the rates are and which would be paid for the service. I'm not providing an opinion on how long they'll be provided.

Q. (By Ms. Wallace) And so for tables 1 and 2 for all the plaintiffs, the unit rates identified represent the current applicable rate for that program. They do not reflect whether those unit costs might be subject to change in the future; is that right?

MR. TURNER: Object.

A. That's correct.

Q. (By Ms. Wallace) Do you -- if the economist took your numbers and applied them throughout the plaintiff's life expectancy or for the life of the life care plan, would the economist be assuming that the plaintiff maintains eligibility for those programs?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) The tables that are in your expert reports and I generally want to understand this -- sometimes they have CCN and VHA rate and then in the column right beside it they have a Medicare

rate, and sometimes the amounts are really similar and sometimes they are different.

How if the economist was going to take your rates and apply it for the life of the life care plan, which rates are they supposed to use when there is two columns identified?

MR. TURNER: Objection.

A. That's their decision. Generally --

Q. (By Ms. Wallace) Are they supposed to -- go ahead, sir. I'm sorry.

A. No, I was going to say generally speaking the VHA rates are higher and they cover more services.

The Medicare rates are lower. Most often they're the same, but when there are two different rates, that's the relationship, but as far as what the economist does, I don't know. The economist is going to make their own decision. I'm offering the information, but it's their decision.

Q. Your identification of two different or three different sets of rates, it was not intended to be stacked? For example, does that -- does my question make sense?

MR. TURNER: Objection.

A. By stacked give me a definition of stacked. I think I know.

Q. (By Ms. Wallace) Yes. My understanding is that if you got a life care plan and you got two different columns, one has the VHA rates, one has the Medicare rates.

You're not supposed to add together both -- or you did not -- your analysis didn't tell the economist which to use for which. You are just doing a if only VHA was used to pay for these services, these are the rates, and if only Medicare was used to pay for these same services, these are the rates.

You did not give the economist any instructions specifically as to how those might interplay together or whether they're supposed to be added together. So help make that clear for myself and the Court if you don't mind.

MR. TURNER: Objection.

A. I'm just offering the rate and nothing more than that.

Q. (By Ms. Wallace) So the two different rates, they don't interplay together. You're not -- that's not -- for example, like if you had Mr. McElhiney has all three. There is no instruction that you have given to the economist or to the Court as it relates to the interplay between those three government payors; is that true?

MR. TURNER: Object.

A. Yes.

Q. (By Ms. Wallace) And so quite simply, your expertise is just to identify if the plaintiff choose Medicare to pay for her whole life care plan, these are the rates. If the plaintiff chose VHA to pay for her life care plan, these are the rates; correct?

MR. TURNER: Objection.

A. Sort of. The answer to the question is yes in the context in which it's asked. However, it's important to understand that the plaintiff in all likelihood would not be making that decision.

In most instances when the plaintiff seeks care, they're asked the question of who is -- what is your coverage, you know, what insurance do you have, and if they answer completely and they have Medicare and VHA and TRICARE, the decision on who to bill for the services is really the provider's decision.

Most of the time I think they would bill Medicare simply because it's easier for them, but it's not -- it is as though the plaintiff is going and saying, I have these three coverages, but you bill TRICARE. I suppose that could happen, but that's not the way it usually happens.

Q. (By Ms. Wallace) And as we sit here today,

we don't know the provider's decisions in the future as to which government payor they're going to select; is that correct?

MR. TURNER: Objection.

A. No, it's hard to know the future.

Q. (By Ms. Wallace) But for those plaintiffs that have multiple government payors that you analyzed, we don't know which one will apply to which service; is that true?

MR. TURNER: Objection.

Q. (By Ms. Wallace) We don't know which rate whether it's a Medicare rate or the VHA rate will end up covering that service assuming that they use that insurance?

MR. TURNER: Same objection.

A. Well, I'm assuming everybody is going to behave rationally in an economic sense and they're going to use the rates that they determine are appropriate, but there is -- what I prepared is what is possible and what actually happens is dependent upon the plaintiff and the provider.

Q. (By Ms. Wallace) If the plaintiff choses not to continue with one of their government benefits into the future, then that column of rates wouldn't be applicable; correct?

MR. TURNER: Objection.

A. Well, if we're talking about Part A Medicare benefits, it's not a decision that the plaintiff would make. You don't -- you can't deny them. I suppose you could. You could deny that you have them, but you can't deny them. If you are over age 65 and are -- and meet the other eligibility requirements for Medicare, you've got part A.

If they elect not to enroll in part B in the future, that's true, but we're talking about -- what you said was true, but we're talking about situations that where that just wouldn't make sense. We're talking about people who have serious illnesses and they can't get other insurance. Their option is part B and part D for Medicare if they are eligible for it. You can't get private insurance if you are eligible for Medicare.

So why would they opt to not purchase that. It's going to cost them a lot more if they don't. So yes, I would make the assumption that they are going to continue to purchase it.

Q. (By Ms. Wallace) Well, I guess, my example was more focused on a Medicare versus a VHA. You know, if they declined to continue -- if they have Medicare and they decline to continue with their VHA

coverage, then that column -- that VHA column is no longer applicable?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Is that true?

A. That's true, but it's irrational, but it's true.

Q. Well, only one is going to pay; right? I mean only one of them is going to pay for the service in most cases; correct?

A. Well, yes. Well, there are some services where two may pay, but it will only be the total amount of the bill. You won't get paid -- they won't pay twice.

Q. If a plaintiff obtained other insurance in the future, how would that effect your analysis related to the TRICARE rates?

MR. TURNER: Objection.

A. Well, what other insurance would we be talking about? If -- are you asking me if someone only had TRICARE and was under age 65?

Q. (By Ms. Wallace) Yes.

A. And they decided they didn't want TRICARE. They wanted to get private insurance. Again, most often that would be an irrational decision. You have to end up paying more, and we don't assume that people

normally like to pay more.

So it's very unlike to happen, but if it did happen and they didn't have the TRICARE they only had the other insurance, the other insurance would pay.

Q. And my question was if they had both, you know, you testify in your reports there is certain services that aren't covered by certain insurance programs and so sometimes persons like to seek supplemental care or alternative insurance, and TRICARE is a secondary payor.

So I had assumed you were going to say if a plaintiff is under 65 of and has TRICARE and decides to get other insurance for coverage reasons, the TRICARE numbers will no longer be relevant because it's a secondary payor. That's what I thought you were going to say; is that true?

MR. TURNER: Objection.

A. That's a much more complicated question than I thought you were asking.

Q. (By Ms. Wallace) Do you agree with that or disagree with it?

A. No, I'm just trying to think of circumstances where that would occur, and that's hard to do, but if it occurred the way you describe it, the answer to the question is yes.

Q. Did you do any analysis to ensure that the providers in the plaintiff's geographic area accept payment from those government programs?

A. No.

Q. And so all of your analysis assumes that they can get the outlined care within their geographic area being paid for by one of the applicable government payors; correct?

MR. TURNER: Objection.

A. Well, that's correct, but keep in mind that the vast majority of providers close to 95 percent except Medicare. There may be some specialties where the numbers is not as good. There may be issues as it relates to veterans health benefits with TRICARE, but those are not -- it's not as though they would get no coverage at all. The coverage might be different if under those circumstances you outlined. I don't see that as a major problem either.

Q. (By Ms. Wallace) You don't see what as a major problem?

A. I kind of lost track.

Q. No, it's okay.

A. Ask the question again.

Q. I think that you meant -- well, you've actually distinguished most -- let's just say a

plaintiff is in a rural area. Even in a rural area most providers are paying -- are accepting Medicare. That's not always the case for VHA and TRICARE. I think that was what your testimony was?

A. Yes.

Q. Okay.

A. Again keep in mind that these people the plaintiffs are already receiving services under VHA or TRICARE.

Q. That was an assumption you were given; is that true?

A. Well, they have the opportunity to. I wasn't given the assumption that they were actually receiving those benefits, but they're eligible to receive them, and I don't see how that would change, but what you are saying is if people don't -- if people don't want those benefits, they want something else, sure, it will change.

Q. Well, my question was about provider access, and so I think we agree you didn't do -- you nor your two assistants Julian and Ayako as a part of your analysis you did not do a geographical survey to see if the actual treatment needed by the plaintiffs as outlined in their life care plan existed with government payor accepting providers in their

geographic area; is that true?

MR. TURNER: Objection.

A. Definitely not, yes.

Q. (By Ms. Wallace) For those rates to be used related to future care, we would assume the continued existence of the government payors of Medicare, VHA and TRICARE; is that true?

A. Yes.

Q. And your analysis -- would you agree with me that all of those rates have been throughout your 50-year career subject to change over the years?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And that's why your job is so valuable because you are the person that could come in at any given point in time and tell a Court the current rate associated with those services; correct?

A. Well, that's correct, along with discussions of how the rates have changed in the past and how they may change in the future.

Q. And I did not see you issue an opinion on how the rates in your tables might change in the future in this case; is that right?

A. That's correct.

Q. I wanted to talk to you for a moment about

out-of-pocket costs related to these programs by patients.

Could you have, if you had been asked, could you have had a column that quantified the amount of patient payments associated with these CPT codes and payors?

A. I could have, but it's not what I was asked to do.

Q. Understood.

A. I was asked to calculate how much government agencies would pay.

Q. For part B and D Medicare do you know would you be able to tell me off the top of your head which potential co-pays -- let me not use the word co-pays. I want to use the word patient contributions -- would apply to Medicare's part B and D.

MR. TURNER: Objection.

Q. (By Ms. Wallace) Such as premiums, deductibles, co-pays, co-insurance?

A. I could tell you what they were, yes.

Q. Which ones apply to Medicare part B and D?

A. Well, all three. There are premiums, deductibles and co-pay.

Q. And if you had been asked to quantify the amounts of patient contributions related to the life

care plan, do you have the skills and expertise that you could have done that?

MR. TURNER: Objection.

A. Yes. That is very much the nature of the work that involves the determination of reasonable value that we discussed earlier.

Q. (By Ms. Wallace) And based on my understanding of your analysis, your team tried to exclude those amounts from the amount that the government would pay for the service; is that true?

A. Yes.

Q. Was that done 100 percent for all three payors you were able to quantify the amount of a patient contribution and make sure it was not included in the rates that you identify?

A. To the extent we could.

Q. Where was that a challenge?

MR. TURNER: Objection.

A. It was a challenge -- the biggest challenge was in terms of Medicare and the deductible. We would have no way of knowing what other bills a patient may have, what other services they may have and when, in fact, they received specific services because those are the factors that would affect the deductible.

So it's not -- it's not very easy to

determine the deductible amount and so we did not, but we did address co-pays. Those are straightforward and included in program regulations and premiums as well.

Q. (By Ms. Wallace) So if I have the 2025 annual report from CMS that quantifies the amount of deductibles by year, would that be something that you would utilize if you wanted to know the deductible subtraction to apply to the Medicare eligible plaintiffs?

A. It would give you an average, but it wouldn't give you a really good average because there would be a lot of younger Medicare patients say ages 65 to 75 who have very few bills and they are combined with those patients 75 and older who have lots of bills and whose deductibles would be met earlier. The problem is the deductible is an individual issue and not a general issue. The co-pay -- the co-pay is general. Co-pays apply to all patients. The deductibles are specific to the range of care that a patient gets.

So you could use it, but it seems to me that it wouldn't be very accurate.

Q. If you had been assigned to determine -- if you had been asked to say please make sure you deduct any patient contribution from your Medicare rates or analysis, how would you have gone about doing that?

A. I would have to assume that all of these patients met their deductible. Most efficiently the yellow to make that a reasonable assumption.

Q. And assuming they met the deductible, you know where to find that deductible?

A. Yes.

Q. Where would that be?

A. Well, the deductible is in statutes and Medicare regulations. The deductible for inpatient care for part A is different. That's on a per-visit basis or per-stay basis.

So for those plaintiffs that would have inpatient visits, that would be calculated separately.

Q. So let's -- just so I understand.

So let's say an example of one of our Medicare plaintiffs let's say the economist fully calculated out your rates for the existence of the life care plan and let's say that the economist quantified $500,000 to represent the amount that Medicare would pay for the services identified in the life care plan.

If the Court then wanted to subtract any patient contributions from that total number, how would -- how would we do that?

MR. TURNER: Objection.

A. I assume you are asking that your question is if you have a total amount that Medicare is identifying as its allowed amount which would be the total paid by the patient and the -- and the program the Medicare program, how would I reduce that to address the deductible?

Q. (By Ms. Wallace) Yes.

A. I could take the deductible and amount and simply reduce it each year. It would not be a very substantial portion of the $500,000. It would be a small amount, but that could be done. The problem.

Q. I'm sorry, sir.

A. The problem with it is you don't know which services it would be applied to. There would be a total amount. Yeah, I guess, you could do it.

Q. Okay. So just so we're clear, so the -- and I'm speaking only of Medicare payor.

The Medicare rates identified in tables 1 and 2 for the plaintiffs that you evaluated as stated now they do not include a deduction or removal of any patient contributions?

A. Yeah, it's the rate that is paid for that service, so no, the deductible is not addressed.

Q. And so if we took all of those tables that you created the economists applied it throughout the

lifetime of the life care plan, we're not -- if the Court wanted to just award the amount the government paid as opposed to also awarding the amount the plaintiff contributed, we don't have -- we don't have that number. Your rates bake in potential patient contributions?

MR. TURNER: Objection.

A. Well, I wouldn't put it that way.

Q. (By Ms. Wallace) Maybe they don't subtract for them?

A. Well, they present what they're supposed to present, which is the rate. It does not address the impact that the deductible on that rate, but that wasn't my responsibility.

Q. Well, in some of your other government payors you do provide a removal of certain patient contributions; correct?

A. Well, in Medicare I do as well.

Q. But you don't on the deductible patient contribution?

A. That's correct.

Q. And a deductible it would not be hard to find how the deductibles change over the years based on which plan is paying?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) Can you think of any other -- so we talked about Medicare has part B and D have premiums which you actually quantified in your report. You said the current rate of a Medicare part B premium is $185?

A. Yes.

Q. Which is approximately $2,200 per year?

A. Yes.

Q. Is that -- if we assumed that that premium remained the same, is that also a number that we weren't able to deduct from the Medicare rates?

MR. TURNER: Objection.

A. Well, you wouldn't deduct it from the Medicare rate. You are trying to do something that was outside of the scope of my work. My work was to identify the Medicare rate, not to calculate the patient contribution.

Q. (By Ms. Wallace) But sometimes you are able to subtract for it and sometimes you weren't and I'm just trying to get a clear understanding of what might still be included as far as patient contributions in that number because you have to keep in mind that an economist took your rates and has expounded it for the life of the plaintiff. So at this point some of these

life care plans go over 14 years, and so they're large numbers.

So I'm just trying to understand -- I imagine the Court will want to know what patient contributions might need to be deducted from these amounts?

MR. TURNER: Objection.

A. Well, the answer I gave you just before was related to the premium. The premium is not related specifically to the care that was provided or the service that was provided.

Q. (By Ms. Wallace) Understood.

A. It's a general amount. So there are two different things. So I wouldn't have had any reason to address it.

Q. But the deductible would?

A. That's correct.

Q. Okay. Is there -- oh, I'm so sorry. Please finish.

A. What I have done is the co-pay for each service has been addressed so that the amount shown for Medicare is not the amount in the fee schedule. It's the amount in the fee schedule less the co-pay amount.

Q. Other than Medicare deductibles, can you think of another category that we should be aware of

that could potentially be a patient contribution that's not deducted from your rates?

A. No.

Q. There is a Medicare 20 percent co-insurance that the plaintiff must pay out of pocket unless a secondary payor covers it?

A. Yes, for part B.

Q. Does that have -- is that service -- is that related to services?

A. Yes.

Q. Is that another example?

A. No, that's what I meant before. In the case of co-pay, that 20 percent co-pay whatever the fee schedule showed we reduced by the 20 percent.

So if the fee schedule said the allowed amount by Medicare was $100, we only used 80.

Q. You've already reduced for that in your charts?

A. The co-pay, yes.

Q. All right. So the 20 percent is already reduced, the deductible is not. We don't have a quantification for the Medicare deductible, but one is available if needed; is that right?

A. It's correct. But I'm saying that my understanding that one would be available. I didn't

make an effort to do that.

Q. Understood. As it relates to TRICARE and patient contributions, I understand that TRICARE beneficiaries pay most -- most that are not active service members they pay premiums and their co-pays, deductibles, co-insurance; is that right?

A. Yes.

Q. Were you asked to quantify or deduct any of the patient payments applicable to TRICARE as it relates to your rates identified in tables 1 and 2 of each plaintiff report?

MR. TURNER: Objection.

A. The method used for TRICARE is the same as the method used for Medicare. The charge that we were given was to calculate how much the government would pay for the specific services in the life care plan, and the government would pay the fee schedule amount, less the co-pay requirement and we did that consistently. We didn't consider insurance. Clearly that's a patient contribution and nobody -- I'm certainly not denying it, but that's outside the scope of my report.

Didn't include the deductible because of the variation I felt was -- was too significant to be able to apply it, and more importantly, the amount that is

shown in the report is the amount paid for the service. If there are deductible amounts that are involved, it's outside the scope of my work, but I'm not denying that there are deductibles.

Q. (By Ms. Wallace) And so related to both Medicare and TRICARE we don't know what the deductible patient contributions would be for the services identified on the life care plans; is that right?

A. That's correct.

Q. And because these are life care plans that are forecasted sometimes decades into the future, a deductible could potentially be met throughout that time period on an annual basis; is that true?

A. Yes.

Q. For VHA, I noticed that you have -- you and alluded to this earlier. There are co-pays that veterans are sometimes required to pay under the VHA, but they get waived if a plaintiff is more than 70 percent disabled; is that true?

A. Yes.

Q. And based on the individuals you evaluated who had assumed eligibility for the VHA insurance, you assessed that each of them had service connected disability exceeding the 70 percent meaning they would not have the co-pay; is that true?

A. Correct.

Q. That would not -- that doesn't have to necessarily be the case for other veterans under the VHA health program; right?

A. Right.

Q. Okay. Are there other patient contributions under the VHA that patients pay and I'm including in my question Community Care Network, TriWest, do you know the answer to that question?

MR. TURNER: Objection.

A. I don't know of any others, but that's something that I have recently investigated.

Q. (By Ms. Wallace) You have?

A. I have not.

Q. Do you know if TriWest requires additional patient contributions for care that occurs outside of a VA facility?

A. Typically they do.

Q. And I notice that your rates do not distinguish between whether the care is to be received in a VA hospital versus whether it's to be received under the Community Care Network program and by a provider that is outside of a VA hospital; is that true?

A. That's true.

Q. And so just -- and we're going to talk about that later, but just as it relates to co-pays or patient contributions, we're not able to know what patient pay contributions might be applicable to the VHA services that are identified because we don't actually know whether those services are going to be received at a VA facility or whether those services are going to be received by a provider and paid by the VHA and paid by the Community Network Program; is that true?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And again your report did not perform any analysis to try to quantify future patient payments related to VHA --

MR. TURNER: Objection.

Q. (By Ms. Wallace) -- for the life care plans?

A. Correct.

Q. Okay. Would you agree with me that under your framework identified in tables 1 and 2 your reports do not represent the cost to the plaintiffs of future care?

MR. TURNER: Objection.

A. No, that's not that purpose.

Q. (By Ms. Wallace) Your reports don't

represent the costs of -- that the plaintiffs may pay for the future care outlined in the life care plan?

A. That's correct.

Q. The program that you talked about earlier as it relates to looking at the rates associated with certain CPT codes and you testified that there is a program, but it's by a governmental payor, is that -- is that some type of a proprietary program to BRG or to you, or again is that you and your staff utilizing publicly available look-up?

A. It's publicly available.

Q. Do you get notified by any of the government payors when there are rate changes? How do you and your staff go about knowing if there has been a rate change to a service?

A. Well, we're like everybody else. We will see it in the press that a rate has been changed.

For Medicare they generally occur once a year when the new regulations come out, and well, that's true for all three for TRICARE and VHA. So when a change is announced, which usually is announced as a change in the federal regulation, we would see it in the trade literature.

Sometimes changes are made for individual services at different points in the year, but those

two are announced and there are people who look for them.

Q. Do you keep up with the legislative policy as it relates to sequestrations from Medicare?

MR. TURNER: Objection.

A. In a general sense.

Q. (By Ms. Wallace) Will you describe what sequestration means, if you will?

A. Well, it means that Medicare is going to -- well, I'm talking about Medicare specifically, but it means that the government is going to withhold a small portion of payment.

Q. To the provider?

A. To the provider, yes.

Q. How often have you seen sequestrations throughout your 50-year career?

A. I have no idea. Not often, but certainly they occur. I have no idea how many times.

Q. And so my understanding is what that does is it could sometimes takes rates such as the ones you have identified in tables 1 and 2 it could apply, for example, a percentage reduction to those rates for a period of time?

A. Yeah, and it's a small percentage of 1 or 2 percent reduction.

Q. And you don't -- we don't know when those sequestrations are going to occur. That decision is made by Congress?

A. That's correct.

MS. WALLACE: We're at an hour break. Do you guys want to take 5 or 10 minutes and come back at 2:40?

THE WITNESS: I'd like to take a little bit more because --

MS. WALLACE: Oh, it's lunchtime there.

THE WITNESS: For me it's lunchtime.

MS. WALLACE: Okay.

THE VIDEOGRAPHER: Shall we go off the record first?

MS. WALLACE: Yes.

THE VIDEOGRAPHER: We're off the record at 12:30 p.m.

(Break taken from 12:30 to 12:53 p.m.)

THE VIDEOGRAPHER: We're back on the record at 12:53 p.m.

Q. (By Ms. Wallace) Doctor, your analysis in your expert reports does not measure the cost to deliver the care; is that true?

MR. TURNER: Objection.

A. That's true.

Q. (By Ms. Wallace) As it relates to the Medicare reimbursement structure or system, that reimbursement program is established by statute and regulation; correct?

A. Yes.

Q. And you testified earlier that the reimbursement rates have been revised repeatedly over time?

A. Well, yes, but by repeatedly, I mean, annually.

Q. Yes. They're revised annually?

A. Yes. And some rates may be -- some individual rates may be revised during the course of the year, but the general approach is to revise them annually.

Q. Based on your 50-year career, has Congress altered the payment methodologies in the past?

MR. TURNER: Objection.

A. Not often, but yes.

Q. (By Ms. Wallace) Have payment amounts been reduced through competitive bidding and sequestration over the course of your career?

MR. TURNER: Objection.

A. In some instances.

Q. (By Ms. Wallace) Yes?

A. Yes, for competitive bidding in some instances, and for sequestration when sequestration occurs, that's the purpose of it. It reduces payment rates.

Q. Have conversion factors changed annually?

MR. TURNER: Objection.

A. That's what changes, yes.

Q. (By Ms. Wallace) Have drug reimbursement methodologies changed for Medicare over the course of your career?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Have coverage determination for Medicare changed over the course of your career?

MR. TURNER: Objection.

A. Yes, but not substantially.

Q. (By Ms. Wallace) Have provider participations changed with the Medicare system over the course of your career?

MR. TURNER: Objection.

A. Once the provider community adjusted to the existence of Medicare, the overall participation has not changed very much, but the -- obviously the participation for individual providers may have changed.

Q. (By Ms. Wallace) Are medical providers under the Medicare system are generally paid some of the lowest competitive rates compared to other insurance payors. Do you agree with that?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Your expert reports did not model the possibility of reimbursement restructuring for the government payors; is that correct?

A. Yes.

Q. Do you have an understanding as to how an economist might go about taking your rates, which are the current rates and applying those into the future?

MR. TURNER: Objection.

A. I have a general understanding.

Q. (By Ms. Wallace) Did you -- were you asked to perform that analysis in this case?

A. No.

Q. How might an economist do that and I ask because you are an economist?

A. Thank you. There are a couple of different ways, but the way I would do it would be to look at how the rates have changed from year to year within the program. There are price indices that are available to look at how rates change in general

consumer price indexes, produce price indexes there are different index that are available, but there is also data that is available on how much rates have increased by Medicare from year to year, and I would use that information to show an increase, and the rates -- there is for the past several years the rates have been 2 to 3 percent increases.

Q. Are you referring to Medicare rates?

A. Yes.

Q. And are you referring to rates on a macro scale not on an individual scale; is that right?

A. Yes.

Q. Did you analyze how the rates historically have been set based on the services identified in the plaintiffs' life care plan reports?

MR. TURNER: Objection.

A. Would you ask me that question again. I'm not sure I followed.

Q. (By Ms. Wallace) Did you do a historical analysis on how the rates for the services have changed based on the services in the plaintiffs' life care plan reports?

A. No.

Q. Do you know if the government's economists performed that analysis?

MR. TURNER: Objection.

A. I don't know.

Q. (By Ms. Wallace) Would that inform how or could inform how the rates may change in the future?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) In each of the plaintiff's expert reports, you testified earlier there is a very similar boiler plate paragraph as it relates to Medicare; correct?

A. Yes.

Q. And did you draft that paragraph?

A. Yes.

Q. And it looks like you make a statement in it that funding from Medicare is entrenched in U.S. tax law and support for the program is widespread across the political spectrum.

Do you remember that statement?

A. I do.

Q. And it looks like you rely on a survey to support that, the political spectrum support.

Do you recall the details of that survey?

A. No, not the details.

Q. What do you mean by support for the program is widespread across the political spectrum?

A. Republicans and Democrats.
Q. And are you referring to -- it's members of Congress that control the Medicare program; is that true?
A. At the ultimate level, yes.
Q. And so do you know if your citation has to do with congressional political support or the general public?
MR. TURNER: Objection.
A. I'm sorry. I don't remember.
Q. (By Ms. Wallace) And if it were -- if your report -- if the survey that you cited had to do with the general public, those are not the individuals that get to make decisions on changes or funding to the Medicare program; correct?
MR. TURNER: Objection.
A. They are not, but you would hope that the congressional members who do make those decisions follow the feelings and directions of their -- of the people they represent.
Q. (By Ms. Wallace) Correct. But it's often more complicated than that for Congress men and women related to budgeting issues. Would you agree with me?
A. I do.
Q. You also stated that the federal government

funds Medicare through mandatory or direct spending which does not require annual congressional approval.

Do you remember that statement?

A. Yes.

Q. For Medicare mandatory funding does not mean the program is unchangeable; is that true?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) It means that Congress does not have to pass a new appropriations bill every year for Medicare to operate; correct?

MR. TURNER: Objection.

A. Correct.

Q. (By Ms. Wallace) And we've talked about this, but in any given year when Congress goes to set Medicare rates, they could change the payment formulas; correct?

MR. TURNER: Objection.

A. They could.

Q. (By Ms. Wallace) The reimbursement percentages; correct?

MR. TURNER: Same objection.

A. Yes.

Q. (By Ms. Wallace) The eligibility rules?

MR. TURNER: Same objection.

A. Yes.
Q. (By Ms. Wallace) The benefit structures and design?
MR. TURNER: Same objection.
A. Yes.
Q. (By Ms. Wallace) Conversion factors?
MR. TURNER: Same objection.
A. Yes.
Q. (By Ms. Wallace) The DOG methodology?
MR. TURNER: Same objection.
A. Yes.
Q. (By Ms. Wallace) Productivity adjustments?
MR. TURNER: Same objection.
A. Yes.
Q. (By Ms. Wallace) They could change the payroll tax rates within the funding, the funds; is that correct?
MR. TURNER: Same objection.
A. Yes.
Q. (By Ms. Wallace) And they could control patient payment contributions to that program; is that true?
MR. TURNER: Same objection.
A. Yes.
Q. (By Ms. Wallace) And so you wrote also

Medicare rates which are published by CMS determine how much the Medicare program will reimburse a provider for a specified medical service.

That is done by amending the underlying statute, not through the annual appropriation's bill; is that correct?

MR. TURNER: Objection.

A. I'm sorry. Ask me that question again.

Q. (By Ms. Wallace) The Medicare rates, those are not changed through the annual appropriations bill?

MR. TURNER: Objection.

A. No, they are not.

Q. (By Ms. Wallace) How are they changed?

A. Well, they're changed by recommendations that come up through the process. Congress gets the opportunity to make its evaluation annually based upon information provided to them by CMS as well as by MedPAC, which is the Medicare Payment Advisory Commission, and others who may offer information, and then they make the decision based on that.

Q. Do you recall the Budget Control Act of 2011?

MR. TURNER: Objection.

A. Not much of it.

Q. (By Ms. Wallace) Do you recall that it

imposed across the board sequestration on some of the mandatory programming including Medicare?

MR. TURNER: Objection.

Q. (By Ms. Wallace) What was your answer, sir? I'm sorry.

A. I said yes.

Q. You have a statement in your Medicare paragraph in the plaintiff's expert reports that states CMS updates rates at least annually, and rates can be expected to increase over time even amid limits on Medicare spending such as budget neutrality requirements under the Medicare Access and CHIP Reauthorization Act of 2015, MACRA.

Did you make that statement?

A. Yes, I did.

Q. Is that statement based on historical trend observations?

A. Yes.

Q. And it's more of a general macro level observation of rates over time; is that true?

MR. TURNER: Objection.

A. I assume you mean when you say macro that that's an overall rate of increase as opposed to increases on individual services and that would be correct.

Q. (By Ms. Wallace) Thank you. Have -- in some years have rates been reduced?

A. In a small number of years -- I don't remember exactly how many -- the rates have been reduced, but by small amounts and for different types of services.

Q. You have a statement in your Medicare paragraph that says, In addition to increasing costs leading to high physician payments, congressional action and other policies have historically resulted in physician payment reductions suspensions and/or increases in physician payments.

Can you tell me what you mean by that sentence?

A. Yeah. It sounds worse when read aloud. The budget neutrality requirements that we briefly mentioned before included a formula for changes in physician payment, and in many instances well, for several years that formula resulted in a reduction in payment rates, but when Congress came to making the decision as to what the payment rates would be, they opted in most instances not to apply the formula, but to instead apply a small increases.

Q. And that is a great segue to the current state of the HI funding. Have you been keeping up

with the 2025 annual report of Medicare as it relates to the state of HI funding which is one of the primary funding sources for the Medicare part A system?

MR. TURNER: Objection.

A. Not in detail, but in general.

Q. (By Ms. Wallace) Are you aware that the HI trust fund has been issued a warning?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Tell me what you know of it please.

A. Well, just that they're going to run out of money at the current -- they're going to run out of money given the current circumstances.

Q. Did you read the 2025 annual report that was issued by Medicare as a part of your expertise?

A. I would say I reviewed it. I didn't read the whole thing.

Q. We deposed -- earlier this month we deposed the deputy chief financial officer and deputy director of the office of financial management for CMS whose name is Larry Young.

Are you familiar with Mr. Young?

A. Not personally.

MR. TURNER: Objection.

Q. (By Ms. Wallace) What did you say? I'm sorry.

A. I said not personally.

Q. Are you familiar with his role and job title?

A. Yes.

Q. He testified that the HI trust fund faces, quote, several challenges and headwinds with respect to its financial solvency going forward.

Based on your expertise with Medicare, do you agree with that?

MR. TURNER: Objection.

A. Given current circumstances, I agree.

Q. (By Ms. Wallace) He also acknowledged that under current law the projected 75-year funding gap for Medicare is approximately $3.1 trillion.

Is that also your understanding?

A. I certainly have never attempted to make that calculation. That's his office's calculation. I assume it's correct. I don't know.

Q. He also acknowledged that the present value of trust fund taxes minus expenditures turns negative in the year 2033. Were you aware of that, Dr. Miller?

A. Yes.

Q. Would you agree that based on the projections by the CMS actuaries this reflects a short-term

problem that Congress will need to make amendments to the Medicare system in order to address?

MR. TURNER: Objection.

A. I would say that's likely.

Q. (By Ms. Wallace) Do you agree that the cost of the Medicare system are outpacing income for the foreseeable future?

MR. TURNER: Objection.

A. I don't know. I haven't done that analysis.

Q. (By Ms. Wallace) Mr. Young testified that for Medicare to maintain financial viability -- and I'm speaking of the HI trust fund specifically -- he said, quote, something has to change.

Do you agree with that?

MR. TURNER: Objection.

A. Well, I don't know what he meant by something has to change. There need to be -- there need to be changes.

I guess, the best way to put it would be something has to be done. Congress has to act, but there are so many options that it's hard to know what he means by "something has to change."

Q. (By Ms. Wallace) And some of the options that we talked about during Mr. Young's testimony one of the options is to reduce provider pay.

Would you agree?

MR. TURNER: Objection.

A. That's an option.

Q. (By Ms. Wallace) And if provider pay is reduced, would you agree with me that two things happen. One, your tables would change if it affected those rates; is that true?

MR. TURNER: Objection.

A. What you are asking me is if the rates change, would my tables change, and the answer to that is yes.

Q. (By Ms. Wallace) And the second thing that might happen is that providers might decline participating in the Medicare system in the future.

So there could become an access to care issue for Medicare beneficiaries. Would you agree?

MR. TURNER: Objection.

A. That's clearly that's an issue that Congress is going to have to address and it's the -- it's a key issue in healthcare. You have to have rates that providers will accept. So I guess, the answer is yes, that's among the options that were the result of options that would be considered.

Q. (By Ms. Wallace) And provider participation in the Medicare system is voluntary; correct?

A. Yes.
Q. Are you aware in your field that Medicare is in its 9th consecutive year of a funding warning?
MR. TURNER: Objection.
A. I haven't been counting, but it sounds right.
Q. (By Ms. Wallace) Do you agree with me that the funding issue affecting Medicare is a concern in the short term --
MR. TURNER: Objection.
Q. (By Ms. Wallace) -- meaning within the life expectancy of the plaintiffs in this litigation?
A. Yes.
Q. Another possibility of Congress to respond to the identified funding deficits that were identified by CMS in the annual report could be a reduction in the services offered under Medicare that are compensated; is that true?
MR. TURNER: Objection.
A. That is true.
Q. (By Ms. Wallace) And so if one of the services compensated for in your report is cut on Medicare, that would put a zero by that service as it relates to your chart analysis; is that true?
MR. TURNER: Objection.
A. Well, it would depend. It would depend on

whether or not the plaintiff had other coverage VHA or TRICARE and whether VHA and TRICARE made similar changes. The only reason the zero would be there is if the service was completely uncovered.

Q. (By Ms. Wallace) And so as it -- and I'm talking about Medicare specifically right now.

So if we're looking at the column that has the Medicare numbers in it and one of the changes that Congress decides to do to address the funding shortage is to eliminate that service from its offerings, your chart in column Medicare would have a zero by that service; is that correct?

A. That's correct, but it's also important that that would be an extremely unpopular decision by Congress when easier decisions are available.

Congress can also address the funding problem by increasing the percentage by which people are taxed, which would not have an impact on the senior citizens who are using Medicare services.

Q. I agree. And we don't know which direction Congress might go as we sit here today. Would you agree?

MR. TURNER: Objection.

A. I agree.

Q. (By Ms. Wallace) Would you agree with me

that predicting how Congress may address the funding issues on our part would be speculative?

MR. TURNER: Objection.

A. Well, speculative is a -- is a word that has pretty broad definition. I think that there are people, not me, but people who are experts in political analysis who might say they could assign probabilities to different options that could be available, but as far as I'm concerned, we don't know what Congress is going to do.

Q. (By Ms. Wallace) And you're not one of those experts in political analysis?

A. I am not.

Q. So as it relates to your opinion, it would be speculative?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Is that right?

A. Well, I just would never use the word "speculative," but --

Q. It's a buzz word?

A. Exactly. But we don't know.

Q. Understood. As we sit here today, Medicare's future reimbursement levels or rates depend on legislative and policy decisions that have not yet been made. Do you agree?

MR. TURNER: Objection.

A. To a limited extent. You know, the issue that we're facing now with shortfalls in the Medicare and Medicare funding is not -- it's somewhat unique or different, but it has happened before and in fact, is all during my 50-year year there has been considered about the adequacy of Medicare funding, and in all that time, there have -- the Medicare program has acted consistently.

So certainly we don't know exactly what is going to happen, but based on past history -- and the past history is substantial -- it is likely that the Medicare program will continue to operate at least similarly to what it does now.

Q. Did you, based on your resume, you were in your current role during the DOGE-related press; is that true?

A. Yes.

Q. Among -- and DOGE for the record stands for Department of Government Efficiency; is that right?

That was the program that was led by Elon Musk on behalf of President Trump. Do you recall that program?

A. I do.

Q. Were there concerns amongst healthcare

experts such as yourself that there were going to be DOGE-related cuts to the Medicare program?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And DOGE leaders signaled an ambition to cut $2 trillion from the federal budget which would have put large entitlement programs such as Medicare of concern?

MR. TURNER: Objection.

A. That's true. I never took that $2 trillion number to be serious, but what you said is true.

Q. (By Ms. Wallace) There were broad talks during that time about federal health spending cuts as a part of the DOGE efforts to increase government efficiency; is that right?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And so your report does not conduct an analysis of past or future political risk related to these programs; is that right?

MR. TURNER: Objection.

A. Well, it was not within the scope of what I was asked to do. So no, they're not included.

Q. (By Ms. Wallace) And you weren't asked to develop any type of a contingency analysis as it

relates to these programs; correct?

A. That's correct.

Q. I want to talk about the veteran health administration program. You stated in -- did you prepare the paragraphs in your reports related to VHA?

A. I did.

Q. In each report where VHA applies as a program, you wrote, VHA coverage is expected to -- let me rephrase because I want to quote directly.

VHA coverage are expected to continue for the foreseeable future; is that right?

A. Yes.

Q. Can there be changes to individuals' eligibility to VHA medical benefits over time?

A. Yes.

Q. Did you analyze any of those changes of the plaintiffs as a part of your expert report work?

A. Any of the changes that may have occurred in the past?

Q. Yes.

A. I did not.

Q. I asked you questions about DOGE-related cuts that were considered for Medicare.

Did you keep up with the DOGE-related proposed cuts to the VHA system?

MR. TURNER: Objection.

A. Only in the broadest general way. I didn't think that DOGE was going to be very successful, and I turned out I was right.

Q. (By Ms. Wallace) Do you recall if it was proposed to cancel hundreds of contracts under the VHA as a result of efficiency recommendations by DOGE?

MR. TURNER: Objection.

A. I don't remember that, no.

Q. (By Ms. Wallace) Do you remember if there was a proposal to change staffing funding related to the DOGE analysis?

MR. TURNER: Objection.

A. I don't remember the specific changes for VHA.

Q. (By Ms. Wallace) Do you keep up with the VA secretary Doug Collins' testimony before Congress to the House Veterans Affairs Committee?

MR. TURNER: Objection.

A. In a general way.

Q. (By Ms. Wallace) Are you -- he appears annually before the House Veterans Affairs Committee. Are you aware of that?

A. Yes.

Q. And just as recently as this month,

February 11th, 2026, he appeared before that committee to testify. Did you know that?

A. No.

Q. Are you aware that he is currently advocating for a long awaited reorganization plan of the VA system?

MR. TURNER: Objection.

A. Yes, I was aware of that.

Q. (By Ms. Wallace) Tell us what you know about it, if you will?

A. Not much. Only that there has been a lot of discussion about reorganization of the system. It's a very large system with lots of emphasis on inpatient care, and there is a need to recognize changes to promote more outpatient services. I know that's part of it, but that's all I know.

Q. Are you aware that part of his proposal would shift medical personnel to facilities that have a higher demand and reduce staffing where veteran populations are shrinking?

MR. TURNER: Objection.

A. Yes, I'm aware of that.

Q. (By Ms. Wallace) How might that effect access to care for plaintiffs in lower veteran populations --

MR. TURNER: Objection.

Q. (By Ms. Wallace) -- communities?

A. That's a -- we got a small number of people. That would depend on each person and their reliance on those benefits. So I don't know.

Q. Would it surprise you to know that he testified before Congress on February 11th, 2026, that the VA is not fully staffed and has not been fully staffed in 15 years?

MR. TURNER: Objection.

A. Not a surprise.

Q. (By Ms. Wallace) What are the concerns based on your expertise as it relates to access to providers and care under the VA system?

MR. TURNER: Objection.

A. Well, this is pretty far afield from the work that I've done in this case, but my primary concerns relate to access to services.

The VA is actually a very good healthcare system especially in certain areas, but it's heavily dependent upon the availability of access to hospitals, and that's -- that's an area of concern because the hospitals are not geared to provide a lot of the services that are now being provided on an outpatient basis.

Q. (By Ms. Wallace) So when you list a VHA rate in your tables 1 and 2 for the plaintiffs, you're not giving any opinion that they're going to be able to receive that care at a VA hospital or facility?

MR. TURNER: Objection.

A. Not exactly. Whether or not they can receive it at a VA facility or in the community, that's the rate that would be paid. So if they became part of the CCN, then the rate that is shown there would be the rate that the provider would be paid anyway.

So it wasn't something I was concerned about.

Q. (By Ms. Wallace) Say that one more time.

A. It wasn't something I was particularly concerned with.

Q. You weren't concerned with whether they received that care at a VA facility or paid for by the VA at a facility outside of the VA. Is that what you are testifying?

MR. TURNER: Objection.

A. Yes, I'm testifying about the rate.

Q. (By Ms. Wallace) Exactly. Let's talk about how you set the VA rates.

Would you agree with me that when a patient gets treatment and care inside of a VA facility, bills are not generated internally or for the patient; is

that true?

A. Yes.

Q. No money is changing hands when a patient is receiving care at a VA facility?

A. That's correct.

Q. Yet the rates that you have put in your tables for the VA are reimbursement rates; is that true?

A. Yes.

Q. And so in this case the government provided a managerial accounting method of quantifying past paid medicals of the plaintiff, meaning they had an expert Daniel Clark who you actually cite in your report, and he took the past medical services that were provided and he applied a managerial cost accounting of what that actually cost the government to provide that care inside of a VA facility.

MR. TURNER: Objection.

Q. (By Ms. Wallace) Would that be the most accurate measure or a more accurate measure of accounting for care that occurred inside of a VA facility?

MR. TURNER: Objection.

A. Maybe. The responsibility I had was to identify the payment rate, and I wasn't concerned with

what the cost was, although I'm very familiar with the methods that I use. I did the same study he did to price the Medicare hospital outpatient prospective payment system that 30 years ago, but those are the rates that were put into effect.

And that's the way Medicare does it. Medicare does the same managerial cost accounting to arrive at the rate. Now, the rate may be modified or policy changes may occur as it relates to primary care versus specialty care, but the underlying approach is that managerial cost accounting approach, but in any event it's not relevant to my work because my work deals with how much is actually paid which in the case of a VA is really the Community Care Network rate, which is in a published database.

Q. (By Ms. Wallace) Right. But the problem is you don't know in the future whether the veteran is going to achieve that care inside of a VA where it would be no money that changes hand, no bill or outside of the VA hospital or facility where it would be the reimbursement rates that you have calculated as they relate to the Community Care Network program.

Do you agree with that?

MR. TURNER: Objection.

A. I agree with what you said, but it's

important to keep in mind that the VA has relied on Medicare ratings for the vast majority of its services, and certainly the only time I used VA rates the CCN rates was when a service was not covered by Medicare, but covered by VHA. There is a much smaller universe of services.

Q. (By Ms. Wallace) For each one of these unit rates that you identify for VHA, you are assuming that the care is occurring under the Community Care Network program, meaning not inside of a VA facility; is that true?

MR. TURNER: Objection.

A. That was not the -- so not the operating assumption that I had, but it turns out that way, yes.

Q. (By Ms. Wallace) And so we don't know whether that is the appropriate rate for these plaintiffs because we don't know in the future whether they're going to receive their care inside of a VA system or under the Community Care Network program, which is the rates that you identified; is that right?

MR. TURNER: Objection.

A. We don't, but I wish I could remember the citation, but somewhere within the materials that I've listed is a statement that the VA considers the rates to be CCN versus VA hospital rates.

Q. (By Ms. Wallace) But in this case we're trying to quantify or the government is trying to quantify the amount that the VA may pay out in the future for VA-related care, and the truth about it is that you cannot quantify the future unit rates for care accurately if the care occurs in a VA facility; correct?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Because no money will be paid out. It's just cost to the government. Do you agree?

MR. TURNER: Same objection.

A. Money will be paid out. It will be paid out in terms of salaries and other costs, but any -- there is no way to determine what the costs in a VA facility are from my perspective.

Certainly the VA can determine that if they wanted to go through that process, but I feel comfortable relying on the CCN service -- rates rather.

Q. (By Ms. Wallace) You feel comfortable relying on those for services that occur under the TriWest and CCN program?

A. And also in VA hospitals.

Q. Well, didn't you just testify that there is

no way to reliably discern what the cost to the government will be if the care occurred -- occurs in the VA facility?

MR. TURNER: Objection.

A. I do, but what I'm saying is that I felt it was appropriate to use the CCN rate as equivalent to what it would cost in a VA facility.

Q. (By Ms. Wallace) Do you know how the TriWest and the Community Care Network rates that you used do you know how they compare to the managerial accounting of the VA for those same services?

MR. TURNER: Objection.

A. I do not.

Q. (By Ms. Wallace) And so if we're trying to estimate what the government will pay in the future for care that occurs in a VA facility, you agree with me we don't have a reliable way to assess that future cost?

MR. TURNER: Objection.

A. I think that's true. It could be higher or lower than the CCN rate, but we don't have the ability to determine that.

Q. (By Ms. Wallace) And the only way -- the testimony of Daniel Clark on that tissue is that to do a proper managerial accounting estimate, you have to

look at the geographic area where the care occurs, the actual VA facility. You have to look at how many doctors and nurses were in the facility at that moment. Sometimes they look at landscape costs for that VA.

It's a very -- it's actually a fairly precise analysis as it relates to the actual costs of the government to provide that care in any given month in any given treatment area such as oncology or knee replacement surgeries. Do you -- is that also your understanding?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) He describes it as an activity based cost allocation system that generates the estimates of the cost of individual VA hospital stays and healthcare encounters.

Did you have the materials necessary to perform that type of an accounting as it relates to VA hospital stays and healthcare encounters for the plaintiffs' life care plans?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) And so that's why you use the only resource that you had available to you to try

to estimate what that cost might be, and it is your testimony that that is what the VA would pay out under the Community Care Network for that care; is that correct?

A. That's correct.

Q. But if the Court really wanted to understand the actual cost to the government in the future for VA hospital stays and VA health encounters, we don't have the data to be able to give them that cost to the government --

MR. TURNER: Objection.

Q. (By Ms. Wallace) -- in the future?

A. Well, I would hope that the Court would look at it from the standpoint of each individual plaintiff and the services that they require because the VA rates that we're talking about apply to only a small number of services in my reports, but otherwise the statement that you made is correct.

Q. As it relates to the Community Care Network rate that you identify, that is your analysis is of the current VA rates not projecting into the future; correct?

A. Yeah, that's correct.

MS. WALLACE: We have a break coming up in three minutes. Do you want to take a break? I

hear is that -- is the dog on your end?

THE WITNESS: Yes. She never barks. She decided now is a good time.

MS. WALLACE: No worries. Let's take like a 5- to 10-minute break and you do what you need to do with your animal.

THE WITNESS: If you can tell me what that is I'll be --

THE VIDEOGRAPHER: We're off the record at 1:47 p.m.

(Break taken from 1:47 to 1:59 p.m.)

THE VIDEOGRAPHER: We're back on the record at 1:59 p.m.

Q. (By Ms. Wallace) Doctor, before the break we were talking about VHA, and I was hoping that you could describe for me the methodology that you identify in your report as it relates to VHA please.

A. It's straightforward. And similar to the Medicare methodology. As I indicated, for most services VHA uses the Medicare rate. They tie into the Medicare system, but there are services they provide -- VHA provides that Medicare doesn't and so with some exceptions, they have a rate schedule as well that's available on the VA website, and it's a look up kind of thing where if you know the CPT code,

you can get their rate.

There are some -- some things that are a little different. For skilled nursing facilities, the Medicare rate only covers the first 100 days. Medicare only covers 100 days a year of skilled nursing facility care. The VHA covers more and it has its own rate per day for each day following that, and since there are a lot of adjustments in the Medicare system for individual characteristics of the patient, there are similar adjustments for the characteristics of veterans in the period behind 100 days and there is a formula to use.

Q. So I'll tell you something I'm fuzzy on. In your reports for plaintiff that have two columns one for the Medicare rate and one for the VHA rate.

Unless it's one of those -- typically the VHA rate, as you calculate it, is the Medicare rate, but I noted a lot -- and let me give you an example. I noticed a lot of discrepancies and I would have thought they would have been more similar based on your methodology.

So here is Bruce Hill PET scan per visit, Medicare rate $1,166.80, VHA rate $1,458.50, and so I know that Medicare has a rate because it's listed there, but yet -- and I would have thought that would

have carried over and been the VHA rate.

So can you help me understand why it was not.

A. No. VHA has decided to calculate its own rate. I'm sure there is some history behind it. I don't know what it is.

We used the most conservative approach each time. So we used the Medicare -- not using it. We're identifying the Medicare rate, but noting that there is also a separate VHA rate, and that's occurred and I don't know -- like I say, I don't know why. I'm sure it has to do with timing as to when the rate was set.

Q. So it's not -- so I just want to make sure I understand. So you're not -- for VHA you're not applying the Medicare rate for anything. You're applying the VHA rate. You are saying usually it follows Medicare, but sometimes it adjusts; is that right?

A. That's correct.

Q. So that's why. So you wouldn't look -- when you're establishing a VHA rate, you are not looking at the Medicare fee schedule. You are looking at some type of a different source that is VHA only?

A. Yeah, the CCN source that I mentioned before.

Q. Okay. And what is that source?

A. It's a VA.govVHAbenefits/CCN. I can get that

to you. It's actually in the materials considered.

Q. Okay. No problem. All right. And explain -- you used the word "conservative" earlier.

You meant -- did you mean that you are assigning a lower rate or you are just assigning the rate exactly as you see it in the VHA source material?

A. No. When there is an option we're always assuming the lower rate.

Q. Okay. And are there typically two options for any given CPT code?

A. Well, no, because the Medicare rate is going to be the rate in the VHA and also as frequently in TRICARE. So there are a lot of instances we're at the same rate. Now, it doesn't appear to be as common as you might see because the volume of the service is not separately indicated. It's identified in the tables, but not separately indicated. So the most common procedures that occur the most often are the ones where the Medicare rate is used.

So the Medicare rate is used much more often than any other rate, but, you know, so the primary service regarding volume is the physician office visit, and that's going to be the Medicare rate across the board, but when it comes to specific surgeries other specific services where coverage is not the same

they'll be more than one rate.

Q. Is that more than one rate within a government payor? Are you saying more than one rate between CMS versus VHA?

A. The latter.

Q. But I guess, I'm still a touch confused because you listed both. You weren't conservative.

You listed both the Medicare rate and you listed the VHA rate; correct?

A. Yes.

Q. And as it relates to plaintiffs who have two or more governmental payors, we have no way of knowing or your expert opinion does not distinguish as to which amount will be paid.

It could be if the plaintiff used her VHA insurance and let's just assume that she got the treatment outside of a VA hospital or he -- she or he -- they might pay $1,458.50 and if Mr. Hill got that same PET scan and had Medicare and Medicare picked it up, it would be $1,166.80; is that right?

MR. TURNER: Objection.

A. Yes. We're providing information as information that is being made available to others particularly the economists to use. So we're providing as much information as we can.

Q. (By Ms. Wallace) Did you dictate or develop a plan as to how the economists were to use your rates?

A. No.

Q. In a situation and I'm going to put -- I'm going to talk about Bruce Hill specifically, but one more question.

Just the next line down on Mr. Hill's table 2, there is a CT scan of the abdomen, and the Medicare rate is lower this time than the VHA rates. It's $103.62 versus a VHA rate of 129.52, and so my question is: There is no -- again there is no way of knowing of taking a blanket conservative approach as it relates to this. The Medicare rate could be higher for some services or lower for some services. There is no way for the Court to really or for the economists to know which one of these rates will be selected and ultimately paid by the government payor. Do you agree?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Okay. Let's talk about the TRICARE methodology. How does the TRICARE methodology work?

A. Similarly to the VHA methodology. TRICARE

relies on Medicare rates for most -- certainly for common services. It has its own rates for specialty services.

Q. Is this -- go ahead.

A. It has its own rates for services that aren't covered by Medicare.

Q. And is this a situation where you look to the Medicare fee schedule to set a TRICARE rate, or does it have its own unique system just like VHA where you are looking it up in a different place?

A. It has its own system.

Q. And so as you state in your report, it's just that the system usually follows Medicare rates?

A. Exactly.

Q. Is that right?

A. Yes.

Q. TRICARE is administered by the Department of Defense; is that right?

A. Yes.

Q. And we talked earlier, TRICARE is always a secondary payor when a beneficiary has other health insurance; correct?

A. Yes.

Q. I noticed for one of the plaintiffs that you combined TRICARE with Medicare. I think it was for

Ms. Tukes or McElhiney.

Do you want me to direct your attention to that before I ask you a question about why you did it that way?

A. Yes.

(Miller Exhibit No. 16 was marked.)

Q. Give me one moment. Yes, it is McElhiney. Okay. I'm going to upload into the chat your report on Mr. McElhiney, which I have previously marked as Exhibit 16, and I'm going to put it on the screen for you. And I'm going to search by -- I really just need to get to table 1, which is on page 14.

Do you see the category there for Mr. McElhiney entitled Medicare rate with TRICARE as secondary coverage?

A. Yes.

Q. Why did you put that together for Mr. McElhiney and the TRICARE doesn't have its own column?

A. Well, because the Medicare rate has a co-pay, and so the Medicare rate doesn't include the co-pay amount, but McElhiney also has TRICARE which functions like a supplemental policy in this case and picks up, I'm pretty sure, all of the co-pay. So government programs Medicare and TRICARE combined are covering

those services.

Q. And but you didn't quantify any co-pays in your reports; correct?

A. No, but in this case a different government program TRICARE is paying the co-pay, so therefore it's included. If the individual is going to pay the co-pay, then it wouldn't be included.

Q. For this -- for this plaintiff TRICARE doesn't have a reimbursement amount that the government paid. It's just Medicare?

A. I believe that's correct.

Q. Because even though the plaintiff Mr. McElhiney has TRICARE, TRICARE is not paying anything on this case on his future service assuming he maintains all of his government payor insurance programs because Medicare would be -- Medicare or VHA would be primary and TRICARE wouldn't pitch in except as it relates to patient contributions?

MR. TURNER: Object.

A. That's my understanding.

Q. (By Ms. Wallace) Is that right?

A. I believe so.

Q. So there wasn't a need to calculate a TRICARE column because you were pretty certain that it wouldn't have paid. Is that why you did it that way?

A. Well, because what it amounts to is this Medicare rate with TRICARE is secondary is the full Medicare rate. So there isn't a need for a second column.

What TRICARE would pay would be 20 percent of that and Medicare pays 80 percent.

Q. And 20 percent would represent if the plaintiff had not had TRICARE what they would have paid inpatient contribution; is that right?

A. That's correct.

Q. And so let me ask you this. For Medicare would I be able to take 20 percent of that rate and calculate patient contributions for your -- using your charts?

A. Yes.

MR. TURNER: Objection.

Q. (By Ms. Wallace) And so for all of your Medicare charts 20 percent of the rate listed would represent a patient payment?

A. No.

Q. No.

A. No, because the amount that would be shown as the Medicare rate would be less 20 percent. So you had to add 20 percent.

Q. Right. So I would take let's just say

116.91, I would do my math like I do for tips. I would come up with $22 and I would add that to -- I would add that -- that would have been the patient contribution; is that right?

A. Yes, that's correct.

MR. TURNER: Objection.

Q. (By Ms. Wallace) Where you had, oh, you had two plaintiffs with TRICARE, Ms. Tukes and Mr. McElhiney, both of which had Medicare as an assumed garner eligibility.

Would the same be true for Ms. Tukes as it relates to what we're looking at in table 1 for Mr. McElhiney?

MR. TURNER: Objection.

A. It should.

(Miller Exhibit No. 15 was marked.)

Q. (By Ms. Wallace) So based on the chart -- let's take a look at it really quick so it's clear for the Court. So it looks like on Ms. Tukes report which I'm about to upload for you we did two separate columns. So let's just take a look and make sure I understand the difference.

I am uploading into the chat what has been previously marked as Plaintiff's Exhibit 15, which is the report of Henry Miller for plaintiff Jacqueline

Tukes, and I'm going to put it on the screen for you.

Do you recognize this report, Dr. Miller?

A. Yes.

Q. Let's scroll down to table 1, which appears on page 13. Actually it starts on page 11.

So do you see that the charts are done a little bit differently for Ms. Tukes?

A. Yes, I see that.

Q. What differences do you want the Court to understand about the two different ways that you analyze the TRICARE plus Medicare for those two plaintiffs?

MR. TURNER: Objection.

A. What I described before is correct. It's true. Here looking at the first item on the physician care, the nephrologist there is a difference in the rate first because it's an average between 99.213, 214 and 215 which are just different codes for office visits.

There is actually a 99.211 and a 99.212, which are simpler visits less resource intensive, and the reason we use 3 here as opposed to 1 in the McElhiney table is because the life care planner used 3, and identified 3. So we just -- and without getting any indication as to which visit would be 213,

214 or 215. So we just averaged them.

And the Medicare payment rate is 80 percent of the 123, 123.82, which is the same concept as in the McElhiney table, and the TRICARE rate is pretty much developed on that assumption that it's going to pick up the deductible -- the co-pay, I'm sorry, which it does here.

So in the end the visits for the nephrologist are priced at 123.82 as opposed to the visit we're look at for McElhiney which was priced at $116. There is no particular reason to show the TRICARE rate separately here. I felt it made things a little clearer.

Hopefully that's true, but the concept methodology is the same. The presentation is a little different.

Q. (By Ms. Wallace) Do I understand correctly that if this plaintiff has both Medicare and TRICARE, there would only be one payor paying and we know that Medicare is primary. So it would really just be the Medicare column?

A. No.

MR. TURNER: Objection.

Q. (By Ms. Wallace) Okay.

A. No. Medicare would pay 80 some dollars --

I'm sorry. 90 some dollars and TRICARE would pay the difference. Medicare's payment rate would be less than -- would not include the co-pay component so that the physician in this case has to bill both Medicare and TRICARE. When they bill Medicare, they're going to get a portion of that 123.82 and TRICARE is going to come up with the difference.

Q. If these were -- so you did not design the chart to demonstrate how the benefits would work together in tandem; is that true?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Because otherwise it would be Medicare $123.82 and then it would be the 20 percent that TRICARE was paying; is that true?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Not true. Okay. Help me understand.

A. The total amount paid by the government is $123.82 per visit. Of that about $99 is going to be paid by Medicare. That's 80 percent of the 123.82 and then about $24, $25 would be paid by TRICARE.

It's what the government is going to pay -- what the table is intended to mean is what the government is going to pay is 123.82 if the primary payor is Medicare and would pay the same amount if the

primary payor was TRICARE.

Q. There are two different departments that control Medicare, which is CMS and TRICARE which is the Department of Defense; correct?

A. Correct.

Q. And so this money will be coming out of two different governmental payor pockets. Is that accurate?

A. Yes.

MR. TURNER: Objection.

Q. (By Ms. Wallace) And so the way that your chart is set up, it's not actually telling me which payor is going to pay which part of that visit. I think the way you have it organized is if it was only TRICARE that this plaintiff had for this nephrologist specialty visit, TRICARE would pay 123.82, and if it was only Medicare that paid for this visit, the Medicare would pay 123.82.

What I don't have or I what I think that you did not calculate was how those two programs, assuming they continue for this plaintiff into the future, how they might work together to make that payment. Is that true?

MR. TURNER: Objection.

A. No, not really. I think it's important to go

through the process of what actually happens.

The plaintiff goes to the doctor the nephrologist, presents their Medicare coverage Medicare ID and their TRICARE ID, and the physician -- the physician's office bills both for the services and identifies the -- identifies the service being provided, but also identifies secondary insurance.

So on the Medicare bill it would indicate that TRICARE was secondary. On the TRICARE bill it would indicate that Medicare was also an insurer, and then between the provider, but mostly through Medicare and TRICARE they would combine as a whole system of payment based on secondary payor that is used, and they would combine -- not literally. Medicare would pay its amount and let TRICARE know how much it had paid and TRICARE would pay the balance.

Q. (By Ms. Wallace) And that analysis is not reflected in this chart?

MR. TURNER: Objection.

A. Well, it wasn't what I wanted to show. I hadn't anticipated the line of questioning you have right now. I just wanted to show how much the total payment would be if Medicare were used or TRICARE were used. That would be the government rate per visit, which is what I was looking to provide.

Given your line of questioning it probably -- I just didn't anticipate it, wasn't thinking about it, but it would be appropriate to provide more detail to answer the questions you are asking me now.

Q. (By Ms. Wallace) Well, the questions I'm asking you now just have to do with how what we can do with your rates.

So I think we are limited based on -- and this is totally fine that we're limited, but we are limited by we don't know what amount, as we sit here today, Medicare might pay for these service lines, and we don't know which amount TRICARE might pay for these service lines.

The way that your chart has it set up it's just either/or -- you calculated a rate for either/or to pay and we don't know whether Medicare is going to pay for the service or TRICARE is going to pay for the service?

MR. TURNER: Objection.

A. That's sort of true, but you are asking a different question than I'm answering. I'm answering the question of how much are government programs going to pay for that service, and for each visit the government programs are going to pay $123.82, and that was the intent of the table.

If you wanted to -- I didn't have a reason in what I was doing to divide it up between how much TRICARE was going to pay and how much Medicare was going to pay. You could calculate it because it's 20 percent of the number up there.

Q. (By Ms. Wallace) But it's not calculated in your current reports?

A. No, no. It wasn't my intent and it's not calculated.

Q. And so when an economist takes a chart like Mrs. Tucks, he or she is only able to calculate the total amount that Medicare would pay for the service or the total amount that TRICARE would pay for the service and he or she would not be able to in a real life application determine if the plaintiff had both insurances how much would pay which and how much would pay the other?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Is that a fair characterization?

MR. TURNER: Objection.

A. I don't know. I don't know what the economist did. My intent was to provide them with information as to how much government would pay and they have that information right there.

Q. (By Ms. Wallace) How much the government would pay if it was all paid under one government payor versus another government payor?

A. Well, it's the same, yeah.

Q. Right?

A. Yes.

Q. And so assuming that the economist is receiving all of her rate information from your charts, she can't make a determination as to how these two programs would work together for the life care plan?

MR. TURNER: Objection.

Q. (By Ms. Wallace) If she projected the numbers for the life of the life care plan?

MR. TURNER: Objection.

A. I don't see why there is a problem. I guess, I'm not following what you are saying.

Q. (By Ms. Wallace) She would have to -- go ahead.

A. The government is paying $123.82. I don't know why the economist would need to know or identify how much TRICARE was paying versus how much Medicare was paying.

Q. Well, because there are -- what we talked about earlier, there is different buckets of payors

for the TRICARE program and the Medicare program, and so if we wanted to actually quantify the projected reimbursement rates of one versus the other, we would have to have a little more detailed information on how the two programs worked together?

MR. TURNER: Objection.

A. I'd say what you are saying is correct, but I would need to know more about exactly what the economists were trying to do and how it all fit together. I don't have that information.

Q. (By Ms. Wallace) Turning back to the TRICARE program, TRICARE does not pay the full billed amount if another insurer is primary. Do you agree?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Does if a primary insurer does not cover a service, TRICARE's own eligibility rules and coverage rules would apply to determine whether that they compensated -- TRICARE compensated for that service?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) In a situation where no government payor covers the service, did you -- do you have any opinion on how that service would be

compensated by the plaintiff?

MR. TURNER: Objection.

A. You are asking me if there is no government payment?

Q. (By Ms. Wallace) Yes, sir.

A. It would be part of the patient's responsibility, and I wouldn't calculate it.

Q. And in a circumstance where the only government -- the only insurance that the plaintiff had is government, does that mean the plaintiff would personally have to cover costs of that care if he or she wanted to receive it?

MR. TURNER: Objection.

A. I'm not clear on what you are asking me.

Q. (By Ms. Wallace) I'm asking if for in the tables 1 and 2 if it's zeros across the board --

A. Okay.

Q. -- is that a situation where the plaintiff is going to have to come up with the money to pay for that care?

MR. TURNER: Same objection.

A. Yes.

Q. (By Ms. Wallace) You have a paragraph for TRICARE in the applicable plaintiffs sections. Did you draft that yourself --

A. Yes.
Q. -- called the TRICARE coverage?
A. Yes.
Q. And in those paragraphs you state that the Department of Defense -- I'm sorry, TRICARE is funded through the annual defense appropriations bill.
Explain to the Court how that differs from the way that Medicare is funded?
A. Well, Medicare is funded independently. TRICARE is funded as part of the DOD budget.
Q. And Medicare is -- do you know if TRICARE requires every year an annual appropriation in order to continue running?
MR. TURNER: Objection.
A. No, I don't know.
Q. (By Ms. Wallace) Of our -- of the three payors, would you say any of the three are more difficult than the other as it relates to determining the applicable fee schedule or is it all the same?
MR. TURNER: Objection.
A. Interesting question. I look at the Medicare fee schedule much more often so that one is really easy for me.
The VHA and the TRICARE I look at less frequently, so it seems to take a little more effort,

but basically they're all the same.

Q. (By Ms. Wallace) I want to ask you about the aggregations that were done by the economists relying on your charts.

You have testified earlier that you have never seen those analyses?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Is that right?

A. Yes.

Q. If there are -- if their charts take the number that you've quantified and project it for the life expectancy articulated in the life care plan and they do that for each governmental payor, can you clarify for the Court that only one of the governmental payors will be paying on that amount as opposed to a stacking it or an adding up of multiple aggregates?

MR. TURNER: Objection.

A. Well, more than one government payor may pay on each amount, but the total amount paid will not allow for any duplication so that what is shown as we were looking at McElhiney or Tukes the total amount shown on a per-visit basis by Medicare is the total amount that is going to be paid. A portion would be paid by Medicare and a portion would be paid by

TRICARE.

So they wouldn't be stacked, but it may be more than one payor contributing to the total payment.

Q. (By Ms. Wallace) So if the economist stacked the numbers that would be improper? That would be an improper use of your chart; is that right?

MR. TURNER: Objection.

A. I have to see how they made their calculation to answer that question.

(Miller Exhibit No. 15B was marked.)

Q. (By Ms. Wallace) Let's take a look at -- I had previously uploaded Jacqueline Tukes's expert report. I'm going to upload what has been previously marked as Exhibit 15B, which is the Yount economist report for Ms. Tukes, and I'm going to share the pertinent chart on the screen for you, Dr. Miller.

Can you see my screen?

A. I can. I mean, it would be nice if it was a little bigger.

Q. I'd be happy to. How is that?

A. Okay.

Q. Please let the record reflect that I'm showing the witness -- oh, they're not numbered. They're not Bates stamped. This is page 9 of 18, table 2 entitled Jacqueline Tukes cost to government

projected medical offsets. Do you see this chart?

A. I do.

Q. And are you able to tell how Ms. Yount calculated the total cost identified?

MR. TURNER: Objection.

Q. (By Ms. Wallace) It appears that it has both columns for annual cost of TRICARE as well as annual cost of Medicare. Do you see that?

A. I do.

Q. Does it appear that she stacked your chart analysis in her numbers?

MR. TURNER: Objection.

A. No, I'm pretty good at doing math in my head, but not this good. It doesn't look like they stacked them.

Q. (By Ms. Wallace) What do you think that she did based on your economics background and review of the chart?

MR. TURNER: Objection.

A. Well, the annual cost of the nephrologist is $239 and it's for 17 years. The total would be 17 times 239, which is about $3,800, but there is a 2.05 percent increase per year. That would give you the 4,793.

If you had stacked them, the number would be

much higher. It would be 239 plus 239, which would be 478 for 17 years, which would be closer to -- well, it would be double the 4,793. So just looking at that one, it doesn't look like it's stacked.

Q. (By Ms. Wallace) What about -- do you know which cost she's using in her report? Do you know if he's using the TRICARE identified costs or the Medicare identified costs?

MR. TURNER: Objection.

A. Well, for the therapeutic needs it doesn't matter. You are using one or the other because they're the same.

Q. (By Ms. Wallace) But some of the numbers are different?

A. Right.

Q. Pretty significantly so?

A. The annual cost for your analysis -- most of them are actually not that different with the exception of a couple. Urinalysis is quite different?

Q. Is the difference between $446 and $38?

A. Yeah.

Q. And this Tacrolimus for the drugs is the difference between $7,643 and $1,591?

A. Yes. On the drugs there is more of a difference.

Q. Do you know which one she used if she's --
MR. TURNER: Objection.
A. I don't.
Q. (By Ms. Wallace) And so let's look at Tacrolimus to see if we can figure it out.
If you take 1,000 -- the Medicare is 1,591 times 17 years, that's an amount of $27,047, which is less than the total present value of that figure.
So can we assume that she's applying the higher reimbursement number?
A. No.
MR. TURNER: Objection.
A. No, because the higher number the 7,643 that would be 129,000. So the higher number is much -- would produce a much higher number than here. I think if you took -- if you take the average of the two, it comes out to 78,000, which is a lot higher.
So I don't know -- I can't tell you what she did here. But she did not use the higher number and she didn't use the lower number.
Q. (By Ms. Wallace) You don't know the methodology by the economist that relied on your charts. Is that accurate?
MR. TURNER: Objection.
A. That's correct.

Q. (By Ms. Wallace) And therefore, you don't have an opinion as to whether the totals or present values are accurate as it relates to the projected medical offsets identified by the economists.

Do you agree with that?

MR. TURNER: Objection.

A. I couldn't tell you whether they're accurate or inaccurate based on the data in front of me.

Q. (By Ms. Wallace) And without more analysis, you can't tell me whether your charts were applied on the aggregate as you intended or whether they have not been?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Is that true?

A. Yes, I can't tell you that.

Q. We do know based on your charts that only one -- we do know that your charts did not analyze how the government benefits would work together to pay for the services identified in the life care plan; correct?

MR. TURNER: Objection.

A. That was outside my scope. Correct.

Q. (By Ms. Wallace) And so as we look at this economist's chart, we're really not reliably able to tell which government payor would cover which service

in the future unfortunately?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Is that true?

A. Other than the chart intending to show that and you certainly couldn't do it.

Q. If the chart is intending to give the Court an offset amount based on your rates in the future, do you have any way of knowing based on this chart whether that's the total offset that would go to Medicare versus TRICARE?

MR. TURNER: Objection.

A. Not from this chart.

Q. (By Ms. Wallace) And the economists wouldn't have had what they needed to be able to make that distinction based on your charts; is that true?

MR. TURNER: Objection.

A. I don't have any idea what the economists knew or didn't know.

Q. (By Ms. Wallace) Assuming the economists only had your chart and they testified that they relied on your charts and your testimony and your expert report, they would not have had what they needed in order to show what Medicare would pay for the services in conjunction with TRICARE?

MR. TURNER: Objection.

A. I think that's -- that's correct. I think they made their own set of assumptions and I don't know what they are.

Q. (By Ms. Wallace) Let me ask you one more question about Exhibit 15B. Table 3 represents the cost according to Ms. Yount the cost to government of Fryar's life care plan.

That is one of the life care plans that you evaluated for Ms. Tukes; correct?

A. Correct.

Q. And we see again that table 3 has inserted your rates under TRICARE. Is that true?

MR. TURNER: Objection.

A. Well, I'd have to go back and check them. They look like that's the case.

Q. (By Ms. Wallace) We have just looked at the nephrologist per visit rate, and it was the $123.82. Do you recall that?

A. Yes.

Q. Is that -- do you see that on here?

A. No.

Q. Do you know how she took your $123.82 and extrapolated it for this chart?

MR. TURNER: Objection.

A. I do not.

Q. (By Ms. Wallace) It looks like it's -- so you don't how the 1,610 was reached?

MR. TURNER: Objection.

A. Not looking at this chart, I do not.

Q. (By Ms. Wallace) The chart that you have for Ms. Tukes indicated under frequency as described in the LCP 13 outpatient clinic visits in total.

Do you have any opinion on how that should have been applied to the unit cost that you identified in your chart?

MR. TURNER: Objection.

A. No, I have not only not read this report, I haven't seen this report. I can't tell you how it relates to my report without doing that.

Q. (By Ms. Wallace) And again in the table 3 we don't know which -- we don't know which payor or the contributions of each would be accurate in the future for Ms. Tukes; is that true?

MR. TURNER: Objection.

A. I wouldn't say we. I don't know. I'm sure that Ms. Yount knows.

Q. (By Ms. Wallace) You are sure she knows what?

A. What the answer to your question, what the accurate amounts are. You are asking me about

something I don't know anything about.

Q. Well, it's like a little bit of a circular argument because we've taken her testimony and she said that all of her opinions regarding this chart are fully reliant on you and your rates, but the two don't seem to be working together.

MR. TURNER: Objection.

Q. (By Ms. Wallace) My question for table 3 is that do you have any professional opinion as to whether the projected medical offsets within Ms. Yount's report for Ms. Tukes are reliable and racket?

MR. TURNER: Objection.

A. I have no opinion on it.

Q. (By Ms. Wallace) And it would require much more time and analysis in order to make the determination as to whether you agree with her charts in whole or in part. Is that fair?

MR. TURNER: Objection.

A. I don't know that it would take much more, but certainly some more.

Q. (By Ms. Wallace) Are your numbers for the unit rates as you've put them on your chart today intended to be averaged together?

MR. TURNER: Objection.

A. They made no assumption one way or the other about that. I just presented the numbers.

Q. (By Ms. Wallace) And the way that you identified your charts is you have put Medicare rates in one bucket and TRICARE rates in another bucket. There wasn't any intent for those costs to be averaged as it relates to your charts?

MR. TURNER: Objection.

A. I didn't have such intent one way or the other whether they be average or not.

Q. (By Ms. Wallace) And you also don't give any direction as to in your charts which rate should apply to which service in whole or in part. That would be an exercise that someone else would have to make or a determination someone else would have to make if they wanted to quantify the future cost for the government. Is that fair?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) So you have not independently verified the -- that your rates were used properly within the DOJ economists' reports; is that true?

MR. TURNER: Objection.

A. That's true.

Q. (By Ms. Wallace) And you haven't performed any economics analysis as it relates to the life expectancy used for the duration in the economists' charts or any of the calculation assumptions that were applied?

MR. TURNER: Objection.

A. That was not within the scope of my work.

Q. (By Ms. Wallace) So you are not offering an opinion that the projected medical offsets in the plaintiffs' report are accurate; is that correct?

MR. TURNER: Objection.

A. I'm not offering any opinions on the economists' report whatsoever.

Q. (By Ms. Wallace) You are offering an opinion that the rates identified in your report are accurate as of the time that you pulled them related to each governmental payor; is that right?

A. Yes, that's correct.

MS. WALLACE: I can't believe we're at an hour again. I'm having so much fun, Dr. Miller. We're going to take a 5- to 10-minute break.

THE WITNESS: Okay.

THE VIDEOGRAPHER: We're off the record at 3 p.m.

(Break taken from 3:00 to 3:14 p.m.)

THE VIDEOGRAPHER: We're back on the record at 3:14 p.m.

Q. (By Ms. Wallace) Before the break, Dr. Miller, we were looking at the economist's report associated with Ms. Tukes. Do you recall that?

A. I do.

Q. And I'm going to share 15B on the screen for you. One more moment and I'm going to read to you her language under the paragraph entitled offsets future medical expense.

Henry Miller, Ph.D. managing director in the health analytics practice of Berkeley Research Group, LLC provided a report dated December 15, 2025, identifying the amount of Mr. Shahnasarian's reports that would be paid by Medicare and TRICARE on behalf of Ms. Tukes.

Utilizing the same growth rates and discount rates described above, the total present value of the cost provided in Dr. Miller's report equals $110,100 (table 2.) This represents the amount of offset to apply to the present value of future medical care as presented in Dr. Shahnasarian's report?

Are we able to glean any additional information from that paragraph to explain how Ms. Yount approached the development of the charts

that we just reviewed?

MR. TURNER: Objection.

A. I don't think so.

Q. (By Ms. Wallace) As it relates to Medicare and TRICARE, does it appear that she has analyzed those payment sources in tandem?

MR. TURNER: Objection.

A. I don't -- I don't know. Her sentence says -- just picking up in the middle of it identifying the amounts in Dr. Shahnasarian's report that would be paid by Medicare and TRICARE on behalf of Ms. Tukes. That doesn't tell me anything about how she did it. Does it appear from that language that she calculated both of those together.

MR. TURNER: Objection.

A. I don't know. Not to me.

Q. (By Ms. Wallace) Do you have an opinion on how she calculated them separately?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Did you answer, Doctor? I'm sorry.

A. I said no.

Q. Oh, okay. Thank you. I thought you were thinking.

A. No, sorry.

Q. No problem. The second paragraph similarly will you read that and let me know if that provides you any additional foundation to understand how the economist utilized your rates?

MR. TURNER: Objection.

A. It does not.

(Miller Exhibit No. 12 was marked.)

Q. (By Ms. Wallace) Thank you. I wanted to take a look at your expert report in the matter of plaintiff Bruce Hill, and I will upload into the chat his report which I have previously identified as Exhibit 12.

Do you recognize this report?

A. Yes.

Q. This is the second report you produced for Mr. Hill; is that right?

A. That's correct.

Q. And if you go to the content section, it appears that this was a -- you were asked to make the assumption that Mr. Hill had both Medicare and VHA as a government payor; is that right?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And the -- we talked earlier about each of your reports contains the same

structure such as an introduction, background of the case, scope of report, and then depending upon the government payor, you have a section that describes that program; is that right?

A. Yes.

Q. And in the case Plaintiff Hill for Medicare I see that you noted in the second paragraph that he has a $2,220 annual premium for part B; is that right?

A. Yes.

Q. And does he have a premium for part D coverage to your knowledge?

A. I imagine he does, but that -- that can vary.

Q. And it doesn't have a standard like the part B one that you've identified?

MR. TURNER: Objection.

A. Not in the same way, no.

Q. (By Ms. Wallace) Not in the same way?

A. Correct.

Q. And then for paragraph 5 you have a summary of the Veteran's Health Administration coverage we've talked about earlier in your testimony?

A. Yes.

Q. And then we go down to your methodology sections, and you have two separate methodologies identified, one for Medicare and one for VHA rate.

Were those used, as you described them earlier in your testimony?

A. Yes.

Q. And finally we get to your tables. Table 1 is the application of Michael Fryar's life care plan to Mr. Hill; is that right?

A. Yes.

Q. And for this particular plaintiff there were a number of uncovered services in his life care plan identified by Mr. Fryar.

Do you agree with me?

MR. TURNER: Objection.

A. I do.

Q. (By Ms. Wallace) So both Medicare and VHA do not cover the housekeeping services or landscaping services identified in Michael Fryar's report?

A. That's correct.

Q. And attendant care services were not covered by Medicare, but are covered by VHA. Is that accurate?

A. Yes, it is.

Q. The rate that you identify there $36, is that per hour? Help me understand that rate.

A. That's an hourly rate.

Q. And is that for a qualified home health aide

or certified nursing assistant, or what rate did you and your team use for VHA on that?

A. Well, as you can see, it's for a home health aide for a certified nursing assistant, and those are credentials and so it's for somebody with that credential.

Q. And Medicare would not cover any of that cost for this plaintiff?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) And there is a distinction between the reimbursement rate for skilled -- is it skilled nursing? What does SNF stand for? I should know that.

A. A skilled nursing facility.

Q. Facility. Thank you. So for skilled nursing facility there is a different rate for Medicare than VHA with VHA being a higher rate for the first 100 days and then the only rate available after 100 days; is that true?

A. Yes.

Q. Do you know how the economists used the numbers that you identified in this chart in order to come up with the projected offset amount?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Do you know if the economist was able to combine the two insurance payors to understand which payor would pay for which services or in what proportions?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) And stated simply in your -- in your summary of opinion section, which is on page 15 of your report.

This report is based on information known to me as of this date. I have analyzed the information provided to me for Mr. Hill and assessed publically available data to arrive at my opinion as to the rates for care covered by Mr. Hill's insurers.

And I wanted to confirm these are the rates for Medicare and VHA at the present time and you did not do any projections of how those rates may change in the future; is that right?

A. Yes. They're they are for the latest available time period, and I did no projections on future rates.

Q. The life care plan identified by Ms. Navarro was a little more detailed in this case according to your chart?

A. Yes.

Q. All of the CPT codes listed, do you know if those were provided by Ms. Navarro or by you and your team?

A. I believe they were provided by Ms. Navarro, but I don't know that I remember specifically, but I think she provided them.

Q. When the two asterisks that you have on your report that states functions denote how rates were included CPT codes should be combined, can you tell me what that means?

A. Yeah, there are certain services -- let's see what we got here. I guess that's on the other page.

Q. It looks like it's at the top of your CPT code.

A. Yes. I guess you can see for the blood analysis there are multiple rates.

Q. What does that mean functions denote? Like is it some kind of a calculation?

A. Right. Well, the functions aren't the purpose of the service or the tests. Those tests are all done together, but they have different CPT codes. So you need to combine them.

Q. You issued in your report a statement that you are not certain whether Mr. Hill elected part D

coverage and yet we have the rates of the drugs analyzed in this report, and I just wanted to confirm that your reports are making the assumption that Mr. Hill is a part D elected beneficiary?

MR. TURNER: Objection.

A. Yes, that's correct.

Q. (By Ms. Wallace) So if he does not elect part D, these reimbursement rates would not apply?

MR. TURNER: Objection.

A. Well, if he doesn't have part D, he would have to pay it himself.

Q. (By Ms. Wallace) Right. For personal care attendant I noticed that the VHA rates states $36 and I wanted to confirm that's per hour; is that right?

A. Yeah, and it says that in the third column.

Q. I see it. Thank you. And the same here then the daily rate is $456.40 for skilled nursing facility for the first 1 to 100 days?

A. Correct.

Q. What happens if the skilled nursing facility has charges in excess of that number?

MR. TURNER: Objection.

A. Within the first 100 days?

Q. (By Ms. Wallace) Yes.

A. Well, it doesn't work like that. Sorry.

Little confused by the question.

Q. Well, and what I'm asking is would somebody else have to pick up the extra --

A. No.

Q. -- cost? No. Let me ask it in the reverse and see if this makes more expense.

What if Medicare paid for the first 1 to 100 days at the skilled nurse facility at a rate of $395.07, would VHA kick in to pay more, or it also does not work that way?

MR. TURNER: Objection.

A. No, it doesn't work that way.

Q. (By Ms. Wallace) Either one or the other pay?

A. Either one or the other, yes.

Q. Okay.

A. And if the amount of the charge is higher, it doesn't matter. That's the rate.

Q. Understood. Thank you. Did you analyze for Mr. Hill how what proportion of Medicare and VHA rates like how they would work in tandem, or do these two payors not work in tandem similar to the TRICARE and Medicare example that we used earlier?

MR. TURNER: Objection.

A. They would work in tandem.

Q. (By Ms. Wallace) Do we or the economists have an understanding based on your charts of how those two programs might work together in reality for this patient?

MR. TURNER: Objection.

A. Well, my report doesn't address that. As far as the economists' reports go, I don't know. Like I said I haven't seen them.

Q. (By Ms. Wallace) And so from your chart we're not able to tell which government payor will pay for which of these services into the future?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Is that right?

A. That's correct.

Q. And you testified earlier you have no knowledge as to how the economists may have used your chart; right?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) The other costs that are identified as zero such as adaptive aids, personal care attendant, lawn maintenance services for Medicare, if -- do you know if Medicare does not cover those and VHA does, would you -- do you make the assumption that the VHA would pay for that or not

necessarily?

A. You are talking specifically about the line miscellaneous adaptive aids?

Q. Let's talk about the line personal care attendant.

A. I'm not -- I don't know what you are referring to.

Q. If Medicare doesn't cover the personal care attendant, can we assume -- can we assume that the VHA would pick that up or that's not exactly how it works?

A. No, I think we can assume that.

Q. Did -- there are certain criteria that come into play based on Medicare reimbursement policy as it relates to home healthcare. Do you agree with me?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Did you do any type of an analysis to discern whether the plaintiff in the future might meet those criteria in order to have that reimbursement covered?

MR. TURNER: Objection.

A. Well, sort of. The analysis wasn't made as to what the patient would need in the future. The analysis was made as to what is included in the life care plan. So I assume, you know, we're talking about

the future, and there is no home care in here. It's all personal care attendant. So there is no home care covered by Medicare. So it would only be covered by VHA.

Q. (By Ms. Wallace) Or let me ask you that question more broadly then. Did you perform an analysis for any of the plaintiffs as to whether they would meet the criteria of for Medicare to cover their home health aide?

MR. TURNER: Objection.

A. The criteria would not -- wouldn't matter. If the service required was a home health aide, it would not be covered. A home health aide is a type of personal care attendant as-is a certified nursing assistant.

In order for it to be covered by Medicare, there has to be a nurse or an LPN that is supervising care, and then there can be an assistant below that, but that assistant wouldn't a personal care attendant.

So to the extent that that information was relevant, it was included.

Q. (By Ms. Wallace) Medicare requires patients to be homebound to qualify for home health services?

MR. TURNER: Objection.

A. Well, yes. But if they're homebound and do

not require the care of a registered nurse or a licensed practical nurse, it doesn't matter that they're homebound. They have to require that care in order to be covered by Medicare.

Q. (By Ms. Wallace) And you don't have any of the details for how -- or if they can meet that criteria in the future; is that true?

MR. TURNER: Objection.

Q. (By Ms. Wallace) I mean, you would assume that they do?

MR. TURNER: Objection.

A. The -- I did have information to support that. If the life care plan identifies a nursing need and identifies a cost of a nurse, then that would be what I'd be looking for.

In this case for Hill it only identifies a personal care attendant and no other home health provider. So I know that that's not covered by Medicare. Once I see an RN or LPN, I know it can be covered by Medicare.

Q. (By Ms. Wallace) So and the difference between the rates that the life care plan identified versus the rates that you've identified is yours is payor specific, and each payor has their own rules and criteria in order to qualify for this service, and so

I'm asking you whether you are able to predict in the future whether the home health rates -- the home healthcare as the plaintiff will receive it is how they might meet the criteria of the government payors?

MR. TURNER: Objection.

A. Well, the life care planners have made that decision. If the life care planners identify home healthcare that includes nursing supervision, that's all I need to know to know whether it is covered.

I'm using whatever is in the life care plan. Life care planner is saying that that's a Medicare covered service, and so I'm picking it up from there.

If they don't have nursing supervision, then they don't qualify for Medicare. There may be some other things involved as well, but that's the key -- the key issue.

Q. (By Ms. Wallace) You so you are assuming base on the life care plan that they meet the criteria to pay for that by the government payor?

MR. TURNER: Objection.

A. I'm not assuming it. I'm picking up on the life care planner's assumption. If they assume it, then I'm assuming it.

Q. (By Ms. Wallace) Okay. But there are different eligibility criteria for getting certain

services paid for by Medicare. You agree with that?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Okay. And you didn't have access to any of the medical records to better understand the need or criteria of the plaintiffs; is that true?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) You did not calculate any patient responsibilities or payments for this plaintiff; correct?

MR. TURNER: Objection.

A. Well, for this plaintiff or any other plaintiff.

Q. (By Ms. Wallace) Right.

A. That's correct.

Q. And the extent of your opinions are contained within this report. You did not do a projected offset related to either of these government payors; correct?

MR. TURNER: Objection.

A. Yes.

(Miller Exhibit No. 12B was marked.)

Q. (By Ms. Wallace) Okay. Let's take a quick look at Exhibit 12B, which I am uploading into the

chat feature.

This is the economist's report associated with your tables, and this is from a different economist. This is actually from an economist with the last name Tosic. You've not had any conversations with this economist?

A. I know who she is because she also works at BRG, but no, I've not had any conversations with her about this work -- actually any work.

Q. Do you have any understanding of how she took your tables and applied them to this estimated present value projection using low quantity range?

A. No.

MR. TURNER: Objection.

Q. (By Ms. Wallace) And so you don't have an opinion on the reliability or accuracy of her totals?

MR. TURNER: Objection.

Q. (By Ms. Wallace) Or offsets?

A. Well, this is the first time I'm seeing it, so no.

Q. And the same would be true for her tables 9, 10, 11, 12, 13, 14, 15, 16?

MR. TURNER: Objection.

A. Well, all I see is 9 and 10, but I'm sure it applies to the other tables as well.

Q. (By Ms. Wallace) Okay. And she did something a little bit different than Yount. She separately calculated VA rates versus Medicare rates, and I can scroll down and show you that and she came up with different totals.

Do you have any idea how she projected VA and Medicare to work in tandem in the future to cover the future medical costs?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Do you know whether both the VA and Medicare would pay on for Mr. Hill in the future or whether it's one or the other?

MR. TURNER: Objection.

A. Generally speaking it's one or the other. There probably are exceptions to that.

Q. (By Ms. Wallace) And to what extent one will pay versus the other in the future that is not a calculation that you performed; correct?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) She calculated a low quantity range and a high quantity range for certain services. Do you have any idea why she did that?

MR. TURNER: Objection.

A. No.
Q. (By Ms. Wallace) All of the VA rates for Bruce Hill as well as all of the other plaintiffs again they -- your analysis made no distinction as to whether that care occurred in a VA facility versus if it occurred outside of a VA facility; correct?
MR. TURNER: Objection.
A. That's correct.
Q. (By Ms. Wallace) And so the VA numbers in your chart are the reimbursement figures associated without of the VA facility care; is that true?
MR. TURNER: Objection.
A. I don't know what you mean.
Q. (By Ms. Wallace) The rates that you used for the VHA, they are the rates that are used if a -- if a patient receives care not in a VA facility?
A. That's correct.
Q. If the DOJ economists used the rates in your charts that just represented a point the current rate for that service, do you have any idea how she adjusted for the unpredictability of rate changes to the Medicare and VA system in the future?
MR. TURNER: Objection.
A. No.
Q. (By Ms. Wallace) Is that the same for all of

the plaintiffs?

MR. TURNER: Objection.

A. Yes.

(Miller Exhibit No. 13 was marked.)

Q. (By Ms. Wallace) Let's look at the expert report for Jimmy Laramore. I'm going to upload into the chat Exhibit 13. Mr. Miller, is this your second expert report for Jimmy Laramore?

A. Yes.

Q. And we found out from the second page that -- I think that might be a typo. It says in 6.1 methodology for services and supplies within Medicare and CCN/VHA rate. But your assumptions for Mr. Laramore are VHA and CCN?

MR. TURNER: Objection.

A. I'm sorry. That is a typo.

Q. (By Ms. Wallace) No worries. And so you analyzed just VHA benefits for Mr. Laramore; correct?

A. Yes.

Q. Do you have any knowledge as to whether Mr. Laramore typically receives his medical treatment within the VA hospitals surrounding him or through the Community Care Network program?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Did you do any type of an assessment for physician availability within his geographic area as it relates to the services on his life care plan?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Is this another example where the costs that you developed for Mr. Laramore follow the Community Care reimbursement rates as opposed to an independent determination on what the costs would be to the government if he received the care inside of a VHA facility?

MR. TURNER: Objection.

A. The answer to that question is yes.

Q. (By Ms. Wallace) And it looks like in Table 1 for Mr. Fryer's life care plan you have identified the Community Care Network rate which would be paid for by the VHA for options 1 and 2; is that right?

A. Yes.

Q. Do you have any knowledge as to how the economists applied your numbers for projections in the future based on his life care plan?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) So you cannot testify or

opine as to the accuracy of what the economists did with your identified rates?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) You can confirm that all of the services identified on the life care plan would be paid for by the VHA in this case?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Do you have any knowledge as to whether Mr. Laramore has access to any other medical insurance?

MR. TURNER: Objection.

A. I don't have any such information.

Q. (By Ms. Wallace) And for table 2 Ms. Navarro's life care plan added two services of cystoscopies and CT urograms; correct?

A. Yes.

Q. Do you know whether these CPT codes were provided by Ms. Navarro or your team assisted in pulling those?

A. I don't remember. I'd have to go back and look.

Q. Do you have any other opinions related to Mr. Laramore that are not contained within your

report?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Are you offering the tables in your report as a measure of damages or merely as information regarding how much the government programs would reimburse?

MR. TURNER: Objection.

A. The latter, how much the government programs would reimburse. It was outside the scope of my work to measure damages.

(Miller Exhibit No. 14 was marked.)

Q. (By Ms. Wallace) Let's look at the expert report for Mr. Mousser, which I'm going to upload in the chat as Exhibit 14.

Do you recognize this document as your second report for Frank Mousser?

A. I do.

Q. And we found out in the second sentence that he has it's just VHA coverage even though the methodology mentions Medicare?

A. Yeah.

Q. And that was an assumption given to you by the DOJ?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) And it looks like you compared or you itemized the reimbursement rates for two life care plan reports for Mr. Michael Fryar and Michael Shahnasarian?

A. Yes.

Q. Do the -- did you apply the same methodology to the VHA rates and Mr. Mousser's report as you've testified to earlier today?

A. Yes.

Q. We are looking now at Table 1 which extends two pages for Mr. Mousser.

The CPT codes, do you know if those were in Mr. Fryar's life care plan for CPT codes you and your team pulled?

A. They were in Mr. Fryar's report.

Q. For Mr. Fryar's life care plan, there is one item of home cleaning service that VHA does not cover.

Was that -- is that accurate based on the read of your chart?

A. Yes.

MR. TURNER: Objection.

A. It is.

Q. (By Ms. Wallace) And so if the plaintiff needs that due to his disability and cancer condition,

it would not be covered under the VHA. He would need to pay for that out of pocket or through another source?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Would you expect the VHA benefit to Mr. Laramore to last for the remainder of his life expectancy?

MR. TURNER: Objection.

Q. (By Ms. Wallace) If you know.

A. I assume it would.

Q. For Table 2, which is much smaller than the Fryar life care plan, you quantified the unit reimbursement rates for a one-time urologist follow-up and a cystoscopy and one-time CT scan of the bladder?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Do your charts differentiate whether the plaintiff will receive the services identified inside a VA facility or outside of a VA facility?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) Like the other plaintiffs that we've discussed, are you able to opine as to the

accuracy of the economist's evaluation of the life care plan and projections based upon your charts?

MR. TURNER: Objection.

A. I cannot.

Q. (By Ms. Wallace) Let's look at -- we already looked at Ms. Tukes. Let me make sure I don't have any other questions for you on that one. Okay.

Ms. Tukes, yes, let's look at Ms. Tukes one more moment. She is I'm going to repull up on the screen for you Exhibit 15. I want to direct your attention to -- I'll show you the paragraph. It starts with -- here it is on page 7.

It says, Ms. Tukes will always have both Medicare and TRICARE coverage that will act as primary or secondary insurance. Ms. Tukes became eligible for Medicare prior to turning 65 due to her diagnosis of end-stage renal disease in June 2023.

Let me ask you a question about that briefly. She since, as you indicated in the next sentence, she received a transplant.

Does she always stay eligible before 65 because she was ever diagnosed with end-stage renal disease or if she gets a transplant and is no longer in end-stage renal disease, does she lose Medicare eligibility for that reason?

MR. TURNER: Objection.

A. I believe she retains eligibility if she's had a kidney transplant.

Q. (By Ms. Wallace) Did you use the word retains or regains?

A. Retains.

Q. Retains. Meaning so just because she got a kidney transplant and is no longer in end-stage renal disease you opine that she'll be able to keep her Medicare despite not yet being 65?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And continuing on in the paragraph you said Medicare is expected to become her primary insurance when she turns 65 on February 2030 and is the assumption there that until that time TRICARE is primary?

A. Yes.

Q. And so interestingly she flops again. Let's keep reading. She's a complicated case.

It says -- in my mind -- rates have been provided in Tables 1 and 2 to identify the difference between what Medicare and TRICARE would pay for each service. The amount that will be paid will be determined based on where Ms. Tukes seeks medical

care. And why is that?

A. Well, it's really the provider. It is certainly possible for a plaintiff to go to a provider and only present Medicare coverage or only present VHA coverage, but that's not the way it usually works.

They'll present both and the provider will actually decide who to bill. The plaintiff doesn't make that decision.

Q. So oh, I'm on sorry. I thought you were finished.

A. So it's wherever she gets her care that is going to be the determinant because that's where the provider is.

Q. The amount that will be paid will be determined based on where Ms. Tukes seeks medical care and which insurance provides primary coverage?

A. That's correct.

Q. And so when we're -- let's assume that an economist is trying to project which entity government payor is going to pay for her treatment in the future TRICARE or Medicare.

Do you have any way of knowing which one will pay for the treatment identified on her life care plan?

MR. TURNER: Objection.

A. I don't.

Q. Which rate will be payable depends on where and when Ms. Tukes will receive the recommended care; is that true?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) And as we sit here today, it's impossible to know at which point she'll need which service and which government payor will be primary at that point in time; is that true?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And in a circumstance such as Ms. Tukes she has both Medicare and TRICARE at the same time, but because of the very interesting interplay between her eligibility for Medicare and TRICARE and which one is primary during which period it's a heightened difficulty making that prediction in this particular case. Would you agree?

A. Yeah, I agree.

Q. I wanted to also ask you this paragraph in Ms. Tukes's report. It's on page 9 and it's under the section methodology for services and supplies with the TRICARE rate.

I determined TRICARE rates for physician

services, radiology services and laboratory services using TRICARE's Champus maximum allowable charges fee schedule which is based on the maximum amount TRICARE is allowed to pay for each procedure and are tied by law to Medicare's allowable charges.

Does the maximum allowable amount is that -- how reasonably do we know if that's the amount that would be paid under TRICARE?

MR. TURNER: Objection.

A. Well, unless there is a mistake, that's the amount that would be paid.

Q. (By Ms. Wallace) Okay. And so they always pay the maximum allowable amount; is that right?

MR. TURNER: Objection.

A. Yeah. It's the maximum amount that TRICARE is allowed to pay. So it is conceivable that TRICARE's -- it's within the realm of possibility that TRICARE's maximum amount is lower than the Medicare fee schedule amount or allowed amount. It's possible, but very unlikely. So for the vast majority of instances, the Medicare rate which would be the allowable charge as described here would be the amount paid.

Q. (By Ms. Wallace) The Medicare rate would be the amount paid because the Medicare rate equals the

maximum amount TRICARE is allowed to pay?

MR. TURNER: Objection.

A. In almost -- well, in most instances. I would say almost all I'd say that's fair.

Q. (By Ms. Wallace) Your next sentence states these rates do not represent coverage policy or payment approval. Rather, they reflect calculated amounts based on Medicare data or TRICARE claims history which is specific to procedure locality and year.

Will you help me understand that sentence please?

A. Well, it's the rate. It does not -- if there are aspects of coverage policy for a specific service or procedure that those would not be considered here. These will be the rates that would be paid under the vast majority of instances, and as far as the payment approval goes, it's, you know, there is the issue of the whether or not the service is approved, and there are other similar distinctions relating to the reasonableness of service being provided in some instances.

So what it says that -- I'm using the full payment rate, although there could be exceptions for coverage policy or payment approvals, but it doesn't

say this. I'm doing it because those would be unusual.

Q. But they do occur?

A. They can occur.

Q. Your rates that you've identified in the plaintiff's tables 1 and 2 you are not guaranteeing payment approval for those rates by the government agencies; correct?

MR. TURNER: Objection.

A. That's correct.

Q. (By Ms. Wallace) And you don't have an opinion about any coverage determinations or exception that may be made; is that correct?

MR. TURNER: Objection.

A. Also correct, yes.

Q. (By Ms. Wallace) And TRICARE has it's own list of medical necessity criteria?

MR. TURNER: Objection.

A. Yes, it does.

Q. (By Ms. Wallace) And you did not perform an individual analysis for these plaintiffs on that -- with regard to that; correct?

MR. TURNER: Objection.

A. I did not. If it was in the life care plan, I assumed it was medically necessary.

Q. (By Ms. Wallace) The bottom paragraph on the page, page 9, and I have not seen this in your other reports, I think. It has to do with your methodology to identify TRICARE rates for medications.

I relied on the Express Scripts TRICARE formulary to identify if a medication was covered. Because the formulary only shows coverage, I assume TRICARE would pay the rates listed in Ms. Tukes' life care plan for medications covered in the formulary.

I don't have an understanding -- and I'm hoping that you do -- as to whether the drug coverage under TRICARE is an opt-in election such as part B for Medicare or whether she is automatically enrolled in the trial coverage?

A. My understanding is that she would be automatically enrolled.

Q. Does it depend on the plan that she has for TRICARE?

MR. TURNER: Objection.

A. That's my understanding, yes.

Q. (By Ms. Wallace) And but your charts assumes that she is enrolled in a plan that covers drug care; is that correct?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Is -- when you say because the formulary only shows coverage, what does that mean?

A. It's -- it shows whether a drug is covered as opposed to what its price might be.

Q. And then you had to go somewhere else to look up the price?

A. Yes.

Q. And that place was the where?

A. Well, it says right there. Using information specified in the life care plans including drug dosage and beneficiary information and then the drug prices are on the Medicare pharmacy.

Q. So you are using Medicare pricing for the drugs not a unique TRICARE fee schedule?

A. Well, I'm using the TRICARE to determine whether or not the drug is covered, but I'm using Medicare as the source for the rate for the fee information.

Q. And didn't you testify earlier that TRICARE has its own rate system it's based on Medicare, but they actually have their own fee schedule?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) So is that different for

drugs?

A. Yes.

Q. That's an exception to that general methodology you gave earlier?

A. Yes.

MR. TURNER: Objection.

Q. (By Ms. Wallace) Are there any other exceptions that we have not talked about as far as that TRICARE methodology?

MR. TURNER: Objection.

A. Well, there is certain services covered by Medicare, and I mean not covered by Medicare.

So therefore there is no Medicare rate, but there may be a TRICARE rate if TRICARE covers it, but that's not a systematic difference. That's just occurs from time to time.

MS. WALLACE: Okay. I think we have to take another break. But I'm very close to being finished if you -- if you guys want to take 5 minutes and then we will push through?

THE VIDEOGRAPHER: We're off the record at 4:15 p.m.

(Break taken from 4:15 to 4:21 p.m.)

THE VIDEOGRAPHER: We're back on the record at 4:21 p.m.

(Miller Exhibit Nos. 16, 16B-19 were marked.)

Q. (By Ms. Wallace) Dr. Miller, for efficiency sake, I am uploading into the chat the last four expert reports for the plaintiffs that we're going to be discussing in this last segment.

That would be the -- your expert reports for Gary McElhiney, Edgar Peterson, Diane Rothchild, Richard Sparks, and I also uploaded as Exhibit -- and those are Exhibits 16, 17, 18 and 19 respectively, and I also uploaded what has been previously marked as Exhibit 16B, which is the economics report for Mr. McElhiney.

And I'm going to put Mr. McElhiney's expert report on the screen for you. Do you recognize this report as your second report for Mr. McElhiney?

A. I do.

Q. And if you recall, Mr. McElhiney is the only plaintiff that had all three government payors. Is that your recollection and also be on the screen on page 2?

A. Yes.

Q. Are you able to tell us which government payor will pay in the future for the life care plans of that were identified for him?

MR. TURNER: Objection.

A. No, as we've discussed that decision is going to happen on the spot at the provider's office.

Q. (By Ms. Wallace) It will happen in present time at the date of the visits; correct?

A. Yes.

Q. And that applies to all of the services in the life care plans that determination will be made contemporaneously on the date and location where and provider location where the services are received; is that right?

MR. TURNER: Objection.

A. In a broad sense. I'm trying to remember McElhiney's plan. If there is a service in there that is not covered, then the determination would be made that there was no coverage and that he paid for it himself, but other than that what you said is correct.

Q. (By Ms. Wallace) And if you recall, Mr. McElhiney's life care plan span over 14 years, and they're related to his Parkinson's disease diagnosis and include ongoing neurology management, medication adjustments, monitoring for syncope therapy services, potential need for advanced Parkinson's intervention such as a deep brain stimulator or an infusion pump therapy.

Based on the provider that provides these services and the date they are received, that's the point in time where we will know which of the three payors will pay on his plans?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And that's the point in time we'll know which rate applies to which services; correct?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And again that's the same for all of the plaintiffs in this litigation?

MR. TURNER: Objection.

A. Yes, that's correct.

Q. (By Ms. Wallace) This we talked earlier was the chart that included TRICARE along with Medicare and that's in table 1 on page 14 of your report?

A. Yes.

Q. I want to make sure I understood your prior testimony. Is the TRICARE rate if you had done a separate column for it, is it the same exact rate as is identified in this combo column?

MR. TURNER: Objection.

A. Yes, it is.

Q. (By Ms. Wallace) And so this column does not represent how the two government payors would work together to pay for the future care; correct?

MR. TURNER: Objection.

A. Well, I think as I said earlier, if the case is handled correctly, then Medicare would pay 80 percent and TRICARE would pay 20 percent.

Q. (By Ms. Wallace) But those differences are not itemized in your chart. They're contained within your opinions; is that right?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) The -- these units unit rates reflect the most recent applicable unit rates for the services in the life care plans, and they're not a projection as to any changes that may occur in the rates in the future; is that true?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) For places in your charts where zero is identified, that means that service identified in the life care plans is not covered by that governmental payor, not that there is no cost associated with that service; correct?

MR. TURNER: Objection.

A. Yes.
Q. (By Ms. Wallace) I noted that neither Medicare nor TRICARE compensate for CNA care?
MR. TURNER: Objection.
A. That's correct.
Q. (By Ms. Wallace) And you identified the VHA rate of $1,897.77. Will you explain to me what your unit definition means?
A. It's a monthly rate.
Q. So is that total per month of eight hours per day, seven days per week?
A. No. It's 30 days 28 hours a week.
Q. And that's the maximum total that the VHA will pay?
A. Yes.
Q. Do you know what that hourly rate is for a CNA?
MR. TURNER: Objection.
A. It should be $36, but I'm not sure of that.
Q. (By Ms. Wallace) It looks a little low.
A. Yeah.
Q. Would you agree?
MR. TURNER: Objection.
A. Would I agree as to what?
Q. (By Ms. Wallace) Does it -- do you think

that rate is correct so that's totally fine. I just thought it looked a little low.

A. I agree that it looks a little low, but I would have to go back and correct my calculation to tell you whether it is or isn't.

Q. Do you know if the VA covers CNA care like is that home care or is that inside of a VA facility or is it?

A. No, that would be home care.

Q. Okay. I want to show you it looks like you have a similar rate identified for personal care attendant CNA. That's the same right, right, as before?

A. Yes.

Q. Let me ask you about the calculations, if you don't mind, made by the economist related to Mr. McElhiney's charts.

I'm going to show you on the screen Exhibit 16B. I'm going to show you the conclusion section.

Do you see bottom of page 8, top of page 9 in Exhibit 16B?

A. I do.

Q. The testimony from the economist Brod is that the present value of the Shahnasarian life care plan

is between 1.7 and 2.6 million rounded, and the present value of the future medical offsets is between -- and this is the part that has to be with your charts -- is between $206,210 and $273,874 for Medicare/TRICARE coverage in between $532,501 and $600,401 for CCN and VHA coverage.

And then the economist goes on in G to state, If the Court adopts the plaintiff's life care plan, the present value of future medical offsets to that LCP is between $178,440 and $243,674 for Medicare/TRICARE coverage and between $1,290,196 and $1,372,014 for CCN and VHA coverage.

Do you have any idea how those numbers were reached by the economist as they relied upon your chart?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) If the Court adopts plaintiff's life care plan and the government economist has identified two different very different numbers for a Medicare TRICARE reimbursement cost versus a CCN/VHA reimbursement cost, in your opinion do we have any idea as we stand here today which government payor is going to pay for that care?

MR. TURNER: Objection.

A. Well, I don't know. I mean, I have only seen the parts of the report that you have shown to me. I don't know if it's -- if what you are asking isn't in the other part of the report.

Q. (By Ms. Wallace) If this economist is relying on your charts, would this economist have any way of knowing which payor is going to pay for the future treatment?

MR. TURNER: Objection.

A. No.

Q. (By Ms. Wallace) And if you were the Court trying to understand which of the amounts to apply if the Court adopted the plaintiff's life care plan, what advice would you have for the Court on how to use these numbers given that they are -- that all three payors are quantified on your charts how should they -- what should they -- how do these numbers work together to create an offset, do you have any idea?

MR. TURNER: Objection.

A. I think that's a question for the economist and not for me, and the economist may have some specific ideas. I don't.

Q. (By Ms. Wallace) Can you tell the Court would you agree that not -- let's just say the Court takes the highest two numbers the 243,674 from

Medicare, TRICARE and 1,372,014 or CCN and VHA coverage, would those quantified rates represent the same services meaning they've duplicated the same rates within the final numbers?

MR. TURNER: Objection.

A. I mean, if the Court added both numbers together is that what you are asking?

Q. (By Ms. Wallace) Correct. That wouldn't be the right thing to do. Can we agree on that?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) Because your charts provide the total amount that each payor would pay independently for the same services; correct?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And so your charts, as they are today, were never meant to be added together to create a total offset?

MR. TURNER: Objection.

A. Yeah, that's correct.

Q. (By Ms. Wallace) Okay. Let's quickly move on to the last couple reports. I'm going to put on the screen the Peterson report.

Do you recognize this report as your second

report for Mr. Peterson?

A. Yes.

Q. And we find out that Mr. Peterson has both Medicare and VHA coverage according to the DOJ; correct?

A. Yes.

Q. Do the same assumptions and methodology that we've discussed earlier in your deposition apply to this report with respect to those government programs?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) In your charts for Mr. Peterson, which are in tables 1 and 2, similar to the other charts, you did not make any type -- you don't have any opinions as to how these two government payors would work together to compensate for the services provided. The rates are independently issues as if that government payor was the only payor; correct?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And for all of the services identified under Medicare and/or VHA that state zero, it does not mean that those items don't have a cost. It means that that government payor does not cover the

cost of that service; correct?

A. Yes.

Q. Did you -- do you have any opinions on the reliability or accurateness of the economists who aggregated your charts to quantify the projections for Mr. Peterson?

MR. TURNER: Objection.

A. No, I don't.

Q. (By Ms. Wallace) I am going to show you our second to last report, which is the report of Diane Rothchild.

Do you recognize this report as the second report for Ms. Rothchild?

A. I do.

Q. We see in the second page that she has only Medicare coverage; right?

A. That's correct.

Q. Do you -- her particular services have DME reimbursement, neurology reimbursement codes and therapy. Let's pull that up. Do you see that?

A. Yes.

Q. Have those particular services been subject to rate changes over the years?

MR. TURNER: Objection.

Q. (By Ms. Wallace) If you know?

A. Yes.

Q. And your report only quantifies the rate on the date that you looked at the fee schedule, which is the most current fee schedule in effect right now for Medicare; correct?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) You did not do any projections to try to model how these rates may change in the future?

A. No, I did not.

Q. And we are assuming if the economist took your rates and applied them over the life care plan, he or she would be assuming that these same services would be -- continue to be covered under Medicare in the future; right?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) For any zeros identified under Medicare, that does not mean they don't have a cost. It means Medicare doesn't cover the cost; correct?

A. Yes, that's correct.

Q. Medicare seems to not cover a good bit of costs under the durable medical equipment including

some of the more home care sensitive items such as adult diapers, absorbitant bed pads, automatic pill dispensers, digital blood pressure cuff, queen size sleep number bed with movable base, hand-held shower.

So these are some of the types of services that are very end stage for a disabled person --

MR. TURNER: Objection.

Q. (By Ms. Wallace) -- is that fair?

A. I don't know. If a person is disabled, it doesn't have to be end stage, but it's definitely these are products that a disabled person would use, and they're primarily supply type products which Medicare does not cover as opposed to equipment which it does.

Q. I see. So it's the consistency there is Medicare doesn't cover certain supplies like home supplies for plaintiffs or help me understand that if you don't mind?

A. Well, like diapers and I'm not sure -- this is the first time in this life care plan was the first time I had seen the term "bed cane." I don't know what that is, but like hand-held shower. These are with the exception of the bed fairly low cost items and they're -- I think of them as supplies as opposed to equipment like a wheelchair, but it's just the

Medicare policy to cover supplies -- to not cover supplies and to cover equipment.

Q. And for someone who is no longer able to care for themselves and needs some of these more significant home care and support services such as housekeeping services, bookkeeping, accounting help, financial planner, Parkinson's support group, attendant home care services, none of that is covered by Medicare, meaning that cost will need to be borne elsewhere if the plaintiff is to receive it in the future; correct?

MR. TURNER: Objection.

A. Yes.

Q. (By Ms. Wallace) And the same goes for Medicare doesn't cover home modifications?

MR. TURNER: Objection.

A. No, Medicare does not.

Q. (By Ms. Wallace) Do you have an opinion as to the reliability or accuracy of how the economists took your charts and created projections into the future based on the life care plan?

MR. TURNER: Objection.

A. I have no such opinions.

Q. (By Ms. Wallace) Let's look at the last report. This is Exhibit 19.

Do you recognize this as the your expert report for Richard Sparks?

A. Yes.

Q. Mr. Sparks has VHA insurance only; is that correct?

A. I believe so, yes.

Q. Does the same methodology involving how you came up with his rates apply to this case as it has the previous cases?

A. Yes.

Q. We will look at table 1. For any VHA rates that have been identified as zero, that does not mean those don't have a cost. It means the cost is not covered under the VHA health insurance?

A. That's correct.

Q. Does VHA unlike the other two -- unlike the other entity that we discussed, does it always include medication coverage?

MR. TURNER: Objection.

Q. (By Ms. Wallace) It's not like an opt-in to receive that?

A. Okay. Yeah, I didn't understand what you meant. That's my understanding, yes. It's not an opt-in.

Q. Right. Is -- are you missing a rate on

skilled nurse care?

A. I guess so. I can't tell you how many times this was proofed, but that's true.

Q. No problem. If we look at table 2, Medicare does not cover a power wheelchair maintenance just the wheelchair itself?

A. Where is that?

Q. Here.

A. Trying to remember the maintenance cost may have been included in the price of the wheelchair. This is for Medicare. This is for VHA. It wouldn't -- they're not covering it. I'm sorry. I got a little confused there for a minute.

Q. The zeros reflected in table 2, do they -- they do not reflect that those service items don't have a cost. It's just that it's not covered under VHA coverage rules; correct?

A. Yes.

Q. Do you have an opinion as it relates to Mr. Sparks's claim as to the accuracy and reliability of the economists projected future offset numbers?

MR. TURNER: Objection.

A. No, I do not.

MS. WALLACE: All right. I think for the moment I have no further questions. I know Joey

is just very excited to get started.

MR. TURNER: Can we go off the record for one minute.

THE VIDEOGRAPHER: We're off the record at 4:49 p.m.

(Discussion off the record.)

THE VIDEOGRAPHER: We're back on the record at 4:50 p.m.

EXAMINATION

BY MR. TURNER:

Q. Dr. Miller, earlier you were asked about whether Congress could change different aspects in the future to better fund Medicare, and plaintiff's counsel listed a bunch of options. Are you giving an opinion as to which options Congress will pick or should pick?

A. No.

Q. However, do you have an opinion based on your own experience with Medicare whether it is likely that Medicare will continue to cover healthcare for those 65 and older?

A. I do have such an opinion and I believe that it will.

Q. And in your experience have Medicare reimbursement rates generally increased or decreased

over time?

A. Without question they've increased. The decreases would be -- occurred, but they'd be rare.

Q. And based on your own experience, do you think it is more likely or less likely that Medicare reimbursement rates will increase into the future?

A. Based on my experience, they will definitely increase.

Q. And Dr. Miller, I want to switch gears for a moment. You were asked about your use of Community Care Network rates for evaluating future costs associated with plaintiff's life care plans as covered by the VA. Do you recall that?

A. I do.

Q. You were asked questions about care provided at a VA hospital versus the community.

Do you recall those questions?

A. I do.

Q. And you testified that CCN rates and Medicare rates utilize managerial accounting to determine rates. Can you explain that?

A. Well, sure. The best example I can give is the physician rates I identified as consisting of three parts a work component, a administrative component and a malpractice insurance component.

The work component is based upon industrial engineering studies which I would classify as managerial cost accounting studies of exactly what effort by which people is put into a specific procedure through observation by qualified observers.

The administrative costs component includes all of -- actually it includes the items that Ms. Whitney identifies for the VA hospital study that was done: lawn maintenance. I would just say it doesn't include lawn maintenance, fair, but it includes rent, nursing staff, equipment, and it's just the costs of those items are identified on a per-use basis and calculated just as you would in a managerial accounting context.

So that's how they did it. That's how the rates are established. I actually played a key role on the administrative cost component for CMS, so I know exactly how it was done.

There are certain rate components like drugs and durable medical equipment that are calculated based on rates that are collected. For example, a determination was made by Medicare that the rates made by private sector payors on lab services were equivalent to what would normally be paid, but were equivalent -- I'm sorry. Were equivalent to cost if

you measured it in a managerial cost accounting way, and so that's what they use.

So they may not have done a separate study as they did in the case of physician services, but the same concept is used throughout.

Q. And earlier you also indicated that you thought it was appropriate to use CCN rates for medical care taking place in the future even if you don't know whether an individual will obtain the care at a VA hospital or in the community.

Can you explain what you thought -- why you thought that was appropriate or reliable?

A. Well, the most important reason is we don't know what the costs are in VA hospitals. They vary substantially. We know what they should be, which is what the study that was done identified, but the actual costs in VA hospitals most often are higher than the CCN rates. So I felt we were conservative in using the CCN rates, but in fact, there is just no other option.

Q. Well, Dr. Miller, you were also advised as to what a Mr. Daniel Clark testified about as to how the VA calculated the past costs of healthcare provided to a given plaintiff. Do you recall that?

A. I do.

Q. Okay. What Mr. Clark performed, as you were informed, and what you performed both result in appropriate values to associate costs with the plaintiff's medical care even if not identical?

A. I would say appropriate costs, but then the issue is how are those costs used, and the work that I did I measured hospital outpatient and ambulatory surgery center costs, and they were used to inform the rates that Medicare set.

In the case of Mr. Clark's work, now VA knows what the standard costs are, but they're not actually being used in rates because there are no rates charged.

MR. TURNER: Thank you, Dr. Miller. I don't have any additional questions.

MS. WALLACE: I have just a couple, Dr. Miller.

FURTHER EXAMINATION

BY MS. WALLACE:

Q. You testified just a moment ago that managerial accounting is involved in the setting of VA fee schedule, right, was that your testimony?

A. No. No, I said managerial accounting was used in the setting of Medicare outpatient hospital rates.

I don't think that -- well, managerial cost accounting was done to understand the costs in VA hospitals, but not converted into rates.

Q. And so the VA fee schedule and input that -- managerial accounting was not an input that determined the VA fee schedule?

MR. TURNER: Objection.

A. I don't know that from 100 percent standpoint. The Medicare -- the VA, VHA, CCN fee schedule is primarily drawn from Medicare, so it is based on managerial cost accounting concepts, but for the services that are not covered by Medicare, it's perfectly possible that some effort was made to take advantage of the managerial cost accounting study. I just don't know.

Q. (By Ms. Wallace) And that's actually what I was going to ask you.

VA must reimburse community providers using a statutory hierarchy with the Medicare rates being the first, if the Medicare rate is not available, then it goes to the VA fee schedule, and if neither applies it's a negotiated rate.

So Medicare is the pricing methodology that is the primary anchor for the CCN reimbursement rates. Do you agree with me?

MR. TURNER: Objection.

A. I do.

Q. (By Ms. Wallace) And so when we were talking earlier about Daniel Clark performing a managerial accounting to quantify the cost to the VA of the past medical services of the plaintiff, that truly is a separate analysis then the setting of the VA rates that you performed which primarily fall into the Medicare methodology?

MR. TURNER: Objection.

A. Well, I didn't set the VA rates. I assisted in setting the Medicare hospital outpatient rates. So that's just a correction in how you phrased it.

Q. (By Ms. Wallace) But otherwise you agree?

A. Yes.

Q. Okay. And you testified again that there are no rates charged to the plaintiff when they receive care at a VA facility no reimbursement that occurs; correct?

A. That's my understanding.

MS. WALLACE: That's all the questions I have for you and also wanted to thank you very much for your patience with me today, Dr. Miller.

THE WITNESS: You are welcome.

MR. TURNER: Nothing else from us.

THE VIDEOGRAPHER: The time is now 5 p.m. And this concludes today's testimony from Dr. Henry Miller. We are now off the record.

MS. WALLACE: Yes, I'd like to order according to the standing ordering in the instructions, but also we've been requesting a rough draft, if you don't mind and please make sure I get a condensed version because I can't read all of those pages like individually like all of that.

MR. TURNER: The United States is also good with a standing order, but we do want a rough draft as well.

(Deposition proceedings concluded at 5:00 p.m.)

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

THE VIDEOGRAPHER: We are now on the record. My name is David Lane, videographer for Golkow, Veritext division. Today's date is February 26, 2026. Our time is 9:00 a.m. Eastern Time.

This remote video deposition being held in the matter of Camp Lejeune Water Litigation.

Our deponent today is Jadine Piper.

All parties to this deposition are appearing remotely and have agreed to the witness being sworn in remotely. Due to the nature of remote reporting, please pause briefly before speaking to ensure all parties are heard completely. Counsel will be noted on the stenographic record.

Court reporter today is Christine Taylor and will now swear in our witness.

* * *

JADINE PIPER,

having first been duly sworn, was examined and testified as follows:

* * *

THE VIDEOGRAPHER: Please begin.

MR. VANSLYKE: Good morning. This is Ben VanSlyke from Weitz and Luxenberg on behalf of the Plaintiffs Leadership Group.

THE WITNESS: Good morning.

MR. KLOTZBUCHER: And my name is William Klotzbucher from U.S. Department of Justice. I am joined by my colleagues, Joseph Turner and Michael Cromwell, also from the Department of Justice. We're representing the defendant in this action.

MR. VANSLYKE: And I'll note that we have Whitney Wallace from Wallace and Graham also on behalf of Plaintiffs Leadership Group on the Zoom with us as well.

EXAMINATION

BY MR. VANSLYKE:

Q. Good morning, Ms. Piper.

A. Good morning.

Q. My name is Ben VanSlyke. And as you just heard, I'll be conducting this deposition today on behalf of the Plaintiffs Leadership Group. Could you please state your name on the record?

A. My name is Jadine Piper.
Q. And your date of birth?
A. [redacted], 1985.
Q. Have you ever been deposed before?
A. No, I have not.
Q. You understand that you're under oath today?
A. Yes, I do.
Q. And that you are to answer the questions truthfully?
A. Yes.
Q. It's okay if you do not know every answer, but if you do not, please answer to the best of your ability. Okay?
A. Okay. Thank you.
Q. Throughout the deposition you may hear the government attorney object to some of my questions. Unless they specifically instruct you not to answer something, he will say his objection to get it on the record, and then you'll still answer the question to the best of your ability. Does that make sense?
A. Yes, it does.
Q. Just to make sure, is there anything that would get in the way of you being able to

testify fully and truthfully today?

A. No, there is not.

Q. To make things easier for the court reporter, I'm going to ask that you always answer verbally, like saying "yes" instead of nodding your head or saying "uh-huh," okay.

A. Okay.

Q. And, like he said, since we are remote, it will be extra easy for us to talk over each other which also makes it harder on the court reporter. So let's please try to wait until each other are finished talking and allow a second or two pause between speaking. Okay?

A. Okay.

Q. If I ask a question that you think is confusing, please feel free to tell me and I will try to rephrase the question. Okay?

A. Okay.

Q. If you answer a question, I will assume that you believe you understand it. Fair?

A. Sure. Yes.

Q. I'm sure you know these topics better than I do. So if at any point, you think I'm misunderstanding what you're trying to tell me, feel free to correct me. Okay?

A. Okay.

Q. If I accidentally misrepresent something about the data we're going to be looking at, feel free to correct me on that too. Okay?

A. Okay.

Q. If I'm showing you a document, I may draw your attention to a specific part of the document. But if you feel the need to review other parts of the document, please feel free to say so, and I can give you time for that. Okay?

A. Okay.

Q. And, last, if at any point today you need a break to stretch your legs, get some water, anything like that, feel free to let me know. I will ask that you finish answering the last question that I asked, but, otherwise, we can take a break at any time. Okay?

A. Okay.

Q. So I know we're all on Zoom today, but where are you physically located?

A. I am in Upper Marlboro, Maryland.

Q. And is that -- are you at home?

A. My -- yeah, my residence.

Q. Is anybody else there with you?

A. No.
Q. So I'm going to ask that you not communicate with anybody else while we're on the record today. Okay?
A. Okay.
Q. I know that you need your computer on since we're on Zoom, but do you also have a cell phone with you?
A. No.
Q. Okay. Do you have any other materials with you today?
A. No.
Q. I will ask that you please not open any other materials or programs on your computer while we're on Zoom today. Okay?
A. Okay.
Q. How did you first learn that you were going to be deposed today?
A. I received correspondence from my supervisor informing me that I would be deposed.
Q. Did you receive a notice of deposition, the document where the plaintiffs requested to speak to you?
A. I'm not sure, but I just received an email. I can't remember the contents, but

basically it was just asking for an SME that was available to answer certain questions involving the litigation.

Q. And do I understand correctly that you were identified as that SME?

A. Yes.

Q. And can you tell me what SME stands for?

A. Subject matter expert.

Q. Thank you.

I will place a document into the chat. So, Ms. Piper, I will pull the document up on my screen in just a moment. But can you go ahead and open that document and confirm that you can access it?

A. Yes, I can access it.

Q. Okay. Let me share my screen. I have to request permission to share.

THE VIDEOGRAPHER: Okay. You should have it now. Sorry about that.

MR. VANSLYKE: Thank you. That's okay.

BY MR. VANSLYKE:

Q. Okay. And, Ms. Piper, can you see the document on my screen as well?

A. Now I can.
Q. Okay. So throughout the deposition today, I will show documents on my screen, but I will also place them in the chat. I will use the screen sharing to direct you to the parts that I'm looking at, but you are also welcome to look at the copy that I sent in the chat if that's easier for you. Okay?
A. Okay.
Q. Okay. And do you see the title here, it says "Plaintiffs' Notice of Deposition of Jadine Piper"?
A. Yes.
Q. Have you received this document before?
A. I believe I have.
MR. VANSLYKE: Okay. I will mark this as Exhibit 1.
(Exhibit 1 marked for identification.)
BY MR. VANSLYKE:
Q. And you can see this is In Re: Camp Lejeune Water Litigation; correct?
A. Yes.
Q. Okay. I'm scrolling down. Do you

see that this is a subpoena to test -- to testify at a deposition in a civil action --

A. Yes.

Q. -- to Jadine Piper?

A. Yes.

Q. Thank you.

Have you received this document before?

A. Yes, I believe I have.

Q. And if I continue scrolling down, there is Attachment A, and it says that the respondent is required to produce, by the date stated on the deposition notice and subpoena, the documents requested herein.

Do you see that on this document?

A. Yes.

Q. Do you recall reviewing this document before?

A. Not in this level of detail.

Q. If I scroll down further, there is a section labeled "Requests for Production." And you see the first one here is your current curriculum vitae and bibliography; correct?

A. Yes.

Q. Do you recall reviewing this request

before?

A. Yes. And I submitted it.

Q. Have you reviewed the rest of the requests in this document?

A. If I did, I don't remember. But we can look at it now.

Q. I will give you a few moments if you'd like to review this entire request for production section. Would that be easier?

A. Sure.

Q. Okay. Go ahead and open that document. It begins on page 11. Feel free to read that section and let me know when you're finished. Okay?

A. Okay.

Okay. Yes, I remember reviewing this document.

Q. And I will represent that we received two copies of your curriculum vitae and one job description. Does that match what you believe to have been produced?

A. Yes.

Q. I was unable to find any difference between the two copies of the curriculum vitae. Are you aware of a difference between them?

A. No, there were no changes.
Q. Okay. So I will only be using one copy today.
A. Okay.
Q. So I will -- I will stop sharing for now.
Do you recall receiving an amended notice of deposition to reflect that you would be in Maryland and not in DC?
A. No, I don't remember reviewing that document. I know the request was, but I don't remember seeing the actual request.
Q. Okay. Well, I will give you a copy so that you have one. I will place this document in the chat. I'll just briefly open it here.
Do you see the title here says "Plaintiffs' Amended Notice of Deposition of Jadine Piper"?
A. Yes.
Q. And in the second paragraph here, you see today's date, Thursday, February 26, 2026; correct?
A. Correct.
Q. Thank you. I'm now placing in chat a copy of your CV that we received. And I will

open that document on my screen. Does this appear to be the CV that you provided?

A. Yes, this is correct.

Q. And do you believe this to be an accurate and up-to-date version of your CV?

A. Yes.

Q. Thank you. We'll come back to this shortly. Apologies, Court Reporter, I will mark the amended notice as Exhibit 2 and the CV as Exhibit 3.

(Exhibits 2 and 3 marked for identification.)

BY MR. VANSLYKE:

Q. And I have now placed in chat the job description. And can you now see the job description on my screen?

A. Yes.

Q. And does this appear to be the job description that you produced?

A. Yes.

Q. And do you believe this to be an accurate and up-to-date version of your job description?

A. Yes.

Q. Are you aware that we noticed your

deposition because the government identified you as an expert in this litigation?

A. Yes.

Q. Court reporter, I will mark the job description as Exhibit 4.

(Exhibit 4 marked for identification.)

BY MR. VANSLYKE:

Q. I'm placing a file in chat. Do you see that I'm sharing my screen?

A. Yes.

Q. And at the top here, you see this is a document in the United States District Court for the Eastern District of North Carolina; correct?

A. Correct.

Q. And to the left, it says In Re: Camp Lejeune Water Litigation; correct?

A. Correct.

Q. And then do you see this list of case names underneath this document relates to?

A. Yes.

Q. Do you understand from this document that those are the plaintiffs whose cases are currently before the court in regard to the Camp

Lejeune Water Litigation case?

A. Yes.

Q. Throughout the deposition today, if I say Lejeune plaintiffs or bellwether plaintiffs, I am referring to this group of plaintiffs. Okay?

A. Okay.

Q. And at the bottom it says the United States second disclosure of expert testimony for phase 3 pursuant to Federal Rule of Civil Procedure 26(a)(2) and D.E. 630; correct?

A. Correct.

Q. So I'm scrolling down, and I'm now on -- you can see page 2 at the bottom; correct?

A. Correct.

Q. And you see your name listed here on page 2?

A. Yes.

Q. Can you take a moment and read the section and let me know when you've finished and I'll -- let me know when you need me to scroll down to the last line or two.

A. You can scroll down. I am -- yeah. Okay.

Q. I'm sorry, do you see this one

bullet?

A. Yeah, and the E. Uh-huh.

Q. Have you finished reading the section under your name?

A. Yes, I have.

Q. Do you believe that the list here encapsulates everything you expect to provide opinions about in this litigation?

A. Yes.

Q. Generally speaking, do you believe you have an understanding of each of the topics listed here?

A. Yes.

Q. Are you aware of any other topics upon which you expect to provide opinions?

A. No.

Q. So you have no opinion on the legal tests for damages or offsets at trial; correct?

A. Correct.

Q. And you have no opinion on whether VBA disability benefits should be applied as offsets against the Lejeune plaintiffs' damages awards; correct?

A. Correct.

Q. And if the court did choose to apply

them, you have no opinion on the details of how they should be applied; correct?

A. Correct.

Q. Have you reviewed any of the expert reports issued in this litigation either by plaintiffs or by the United States?

A. No, I have not.

Q. Is it true then that you do not expect to provide any opinions in support of or in opposition to any of those reports?

A. Correct. Yes.

Q. Have you reviewed the transcripts of any other depositions taken in this litigation?

A. No.

Q. Is it true then that you do not expect to provide any opinions agreeing or disagreeing with any of the testimony in those depositions?

A. Yes, that's correct.

Q. Thank you. Are you aware that the government provided a written request to our notice of deposition and the requests for production that it included?

A. Say that -- I would say no, but I'm not --

Q. So I'll -- I will go back to Exhibit 1. And Court Reporter, I will mark the U.S. disclosures as Exhibit 5.

(Exhibit 5 marked for identification.)

BY MR. VANSLYKE:

Q. Do you recall a few minutes ago we were looking at this document with the requests for production?

A. Yes.

Q. Are you aware that the government has provided a written response to these requests?

A. Yes.

Q. I am placing a document in chat. And I will mark this document as exhibit 6.

(Exhibit 6 marked for identification.)

BY MR. VANSLYKE:

Q. And can you see the document on my screen now?

A. Yes.

Q. Do you see this is another document in the United States District Court for the Eastern District of North Carolina In Re: Camp Lejeune Water Litigation; correct?

A. Yes.

Q. And do you see the title block to the right, it says "United States Responses and Objections to Plaintiffs' Notice of Deposition and Subpoena for the Production of Documents to Jadine Piper; correct?

A. Correct.

Q. Have you seen this document before?

A. No, I don't recall seeing this document.

Q. So you recalled reviewing the requests for production themselves. Is it fair to say that you reviewed them and somebody else prepared this document; is that correct?

A. That's correct.

Q. I'm going to scroll down. Okay. So I'm at Number 13 beginning on page 9. And I read here that it says, "All emails, letters, correspondence, text messages, conversations, chats, voicemails, data, technical files, or other communications in which you have been a party pertaining to (1) the Camp Lejeune litigation (2) the topics of the below individuals' opinions in this litigation and/or (3) any other topics upon which you intend to

render an opinion in this litigation, including but not limited to, those with, to, or from any of the following."

Did I read that paragraph correctly?

A. Yes.

Q. And then the list says, "Any other expert designated by a party in this case. Dr. Richard Ruck, Andrew McIlroy, Heather Ford, Larry Young, Nicholas Tackaberry, Carla Ryan, Ty Collier, Wang Ji, Syed Hasan, Henry Miller, Deborah Navarro, Michael Shahnasarian, Gregory Russo, Dubravka Tosic, Tricia Yount, or Andrew Broad, any other person previously or currently employed by or working with the VA or the VBA"; correct.

A. Correct.

Q. Do you know Andrew McIlroy?

A. No.

Q. Do you know Nicholas Tackaberry?

A. I know of him. He works in the same division I do, but that's about the extent.

Q. Do you know Carla Ryan?

A. Yes.

Q. So this first section of request 13, all emails through other communications, I am

going to refer to that as the communications.

Do I understand correctly that you have never had communications with Nicholas Tackaberry regarding the Camp Lejeune litigation?

A. That's correct.

Q. And is it also true that you have never had communications with Carla Ryan regarding the Camp Lejeune litigation?

A. Yes, that's correct.

Q. Other than coordinating for today's deposition, is it also true that you have never had communications with any person previously or currently employed by or working with the VA or VBA about the Camp Lejeune litigation?

A. Yes, that's correct.

Q. Thank you. Other than reviewing the notice of deposition, subpoena, and request for production, have you done anything to prepare for today's deposition?

A. No, I have not.

Q. Without telling me anything that you might have talked about with them, did you meet with any of your attorneys to prepare for today's deposition?

MR. KLOTZBUCHER: I'd also like to

object and reiterate to keep the answer to avoid substance of communications between attorneys and clients in your answer. But to that extent you may answer.

You may answer, Ms. Piper. Just keep the substantive communications out of the answer.

THE WITNESS: Yes, I did meet with attorneys.

BY MR. VANSLYKE:

Q. Can you tell me who you met with?

A. Yes. I met with Bill. I met with Michael and Ty.

Q. Who is Ty?

A. He works for VBA Office of General Counsel. Ty Collier. He's on the line.

Q. Thank you. How many times did you meet with your attorneys?

A. Three times.

Q. Three times?

A. (Witness nodded head.)

Q. How long was each meeting?

A. Between like an hour and a half, no more than two hours.

Q. Per meeting?

A. Uh-huh.
Q. Had you ever communicated with Bill before that?
A. No.
Q. Had you ever communicated with Michael before that?
A. No.
Q. Had you ever communicated with Ty before that?
A. Yes.
Q. Were those communications unrelated to this deposition?
A. Yes.
Q. And when you met with the attorneys, was that in person or over Zoom or on the phone?
A. Through Microsoft Teams.
Q. Thank you. Approximately when was the first time you recall meeting with those --
A. The beginning of this month.
Q. The beginning of February; correct?
A. February. Yes, February 2026.
Q. Other than those three, did you speak with any teammates or supervisors to help you prepare for this deposition?
A. No, I did not.

Q. Did you speak with anyone else to prepare for today's deposition?

A. No, I did not.

Q. Are you aware that we have deposed Mr. Tackaberry, Ms. Ryan, and Mr. McIlroy?

A. Based off the document that you shared that I saw before, yes.

Q. So you were not aware of it other than via these documents; correct?

A. That's correct.

Q. Is it correct that you have not spoken to any of them about their depositions?

A. Yes, that's correct.

Q. Have you reviewed any other documents to prepare for today's deposition?

A. No, I have not.

Q. I believe we received an amended response to the requests for production indicating that you had reviewed the M21-1; is that correct?

A. No. I requested it, but due to work constraints, we have a lot going on, I was unable to. But I did request, but I did -- time did not permit for me to review anything.

Q. Thank you for clarifying.

I understand that that is a large catalog of information, more so than an individual PDF document; is that correct?

A. That's correct.

Q. Is it fair to say that in general you are familiar with the M21-1?

A. Yes. It's our procedures manual.

Q. I understand that due to the size of that document, it would be unmanageable and probably unhelpful for me to place a PDF of that document as an exhibit?

A. Yes.

Q. If I -- if I ask you questions today that would implicate the contents of that document, please answer to the best of your ability based on your familiarity. Understood?

A. Understood.

Q. Okay. Is there anything else that you've done to prepare for today's deposition?

A. No, I have not.

Q. Okay. And you work for the VBA; correct?

A. That's correct.

Q. What does VBA stand for?

A. Veterans Benefits Administration.

Q. Can you describe generally what VBA does?

A. Yes. So, generally, VBA offers benefits for veterans in service. So we have various programs, education, loan guarantee. But all of it is just benefits and services for veterans. And they are -- each division manages how they provide those benefits to veterans and their beneficiaries.

Q. Do you work with all of those benefits or are there specific benefits related to your work?

A. Yeah. So I'm just focused on disability compensation. However, from time to time, due to changes with disability compensation, we may have to interact with other business lines because what changes are sometimes -- what changes with disability compensation, disability compensation infringes upon another business line where then they may have to change or update their procedures.

Q. Are all of the VA's disability benefits facilitated by VBA?

A. Say that again.

Q. Are all --

A. Are all?
Q. -- disability benefits that the VA provides to veterans administered through VBA as opposed to other components?
A. I would say the national cemetery, so that's a benefit for veterans. That's not only solely VBA, but it's a benefit to veterans through our national cemetery. So NCA.
Q. Would that -- I'm sorry, go ahead.
A. No, go ahead.
So I just want to make sure I'm answering. Like, you're saying, like, are there other business lines other than VBA that provide benefits to veterans. Is that the question?
Q. Do I understand correctly that those benefits would be related to burial or similar expenses?
A. Yes.
Q. So those would be for something other than disability; correct?
A. That's correct.
Q. So would all benefits, specifically for disability that the VA provides to veterans, be administered through the VBA?
A. Yes.

Q. Okay. What is your understanding of what this deposition is about today?

A. My understanding is that the deposition is just about the Camp Lejeune water litigation. That's basically as much as I know. I don't know, like, the ins and outs of it.

Q. Are you familiar with the Camp Lejeune Justice Act?

A. Vaguely, not fully. Just when I got the request, I just went on the website. So I just know, like, what's publicly available. But it was just, like, okay what is this. And so that was it.

Q. So you understand that that is the act under which this litigation is being pursued; correct?

A. That's correct.

Q. I will place a document in chat. And at the top here you see that this is an excerpt from the Public Law; correct?

A. Correct.

Q. And you understand that these are publicly available statutes, such as the one that you indicated you reviewed; correct?

A. Correct.

Q. I will represent that this excerpt includes the entirety of the Camp Lejeune Justice Act beginning at Section 804 on the first page and continuing until Section 805 begins on page 3. I will mark this document as Exhibit 7.

(Exhibit 7 marked for identification.)

BY MR. VANSLYKE:

Q. And is this the statute that you understand this litigation to be brought under?

A. Let me -- I wasn't familiar that it was in statute. I haven't, like, researched it to that point. But based off what you're showing me now, I can confirm that, yes, it's in statute.

Q. And do you understand that as part of this litigation, we have requested VBA data about disability payments received by our plaintiffs?

A. So you're asking me am I aware that you-all requested data?

Q. Correct.

A. I mean, now that you tell me, but I'm not familiar with the ins and outs of how much you-all are -- or what you-all are researching or what you-all are trying to obtain.

Q. Do I understand correctly that before

today you were not aware that the plaintiffs had requested their information from the VBA?

A. Yes. I'm not familiar with what the plaintiffs have requested from VBA in support of this litigation.

Q. So I assume you were also not aware that the government has produced VBA data to us in this regard; correct?

A. Correct.

Q. Apologies. I don't think my file sent last time. So I just sent that one.

I will place another file in chat. Court reporter, I will mark the VBA data that I just sent as Exhibit 8.

(Exhibit 8 marked for identification.)

BY MR. VANSLYKE:

Q. Ms. Piper, would you like a moment to briefly click through that file and get a general sense of what it contains before I ask you questions about it?

A. Yeah. I'm trying to download it because it's small on the screen, so I can't see.

Q. Sure. Go ahead and take a moment and let me know when you have reviewed the general

contents, not necessarily every single piece of information.

A. Okay. Okay, I've looked at the general contents.

Q. Thank you. Apologies if you hear a dog barking.

Ms. Piper, are you generally familiar with this type of information?

A. Yes.

Q. Have you seen this spreadsheet before?

A. No. I have not seen this particular spreadsheet before.

Q. So you were not involved in the production of this spreadsheet; correct?

A. Correct. I was not involved in the production of this spreadsheet.

Q. Were you involved in any of the decisions about how to produce this data?

A. No. I am not aware of the data, how it was produced, or anything pertaining to this dataset.

Q. So if I click to the rating data tab, you have not reviewed this particular collection of data, but you are very familiar with

understanding rating data such as this; correct?
A. Correct.
Q. If I click to the award line data, the same is true for award data such as this?
A. Yes.
Q. And if I click to payment data, the same is true for payment data such as this?
A. Yes, that's correct.
Q. I will stop sharing for now.
Is it correct that you have not been involved in the preparation of any other documents related to the Camp Lejeune plaintiffs?
A. Yes, that's correct.
Q. I'm going to go back to your CV for now. So this is Exhibit 3. And you can see this on my screen; correct?
A. I think I might have did something.
Okay. Yes, I am looking.
Q. And what is your current job title at the VBA?
A. So my current job title is acting assistant director of the compensation service policy staff.
Q. And can you briefly explain to me what it means to be in an acting role?

A. Yeah. So acting role means that I have not been permanently awarded the position, but I am acting in the capacity due to having a vacancy.

Q. While you are in the acting role, do you still have any responsibilities under your permanent role?

A. Yes. Yeah. So it's basically more. So it's basically I'm still the chief of program implementation, but my roles for the acting director position has increased my responsibilities.

Q. And it looks to me like you started your permanent role in September of 2021; correct?

A. That's correct.

Q. And you started in the acting role in March of 2025?

A. That's correct.

Q. And is it fair to say that you presently still hold both roles?

A. Yes.

Q. And I see at the top here that you have a high school diploma in 2003?

A. That's correct.

Q. And you received a Bachelor of Science in Experimental Psychology from the University of South Carolina in May of 2007; correct?

A. That's correct.

Q. And a Master of Social Work from the University of South Carolina; correct?

A. Oh, yes. Typo. Yes.

Q. And that's in 2014?

A. Correct.

Q. Okay. So I'm going to scroll down to the earliest position listed. And I believe the earliest one would be this legal administrative specialist in 2008; correct?

A. Correct.

Q. And in this role as the legal administrative specialist, were you doing work related to VA disability compensation benefits?

A. Yes.

Q. Can you briefly summarize for me what you did in this role?

A. Yeah. So in this role it was basically a part of VBA's national contact center. So that's when VA had just transitioned to having a national call center. Prior to that,

VA just had like if I lived in South Carolina, so I was a veteran, I lived in South Carolina, I was able to talk to someone that lived in South Carolina.

But starting in October 2007 VA expanded into what was called national call center, so the wait time wouldn't be so long. So if a veteran in South Carolina could speak to someone in Montana if they were available.

During these calls, veterans would just ask about the status of their claims or their appeals. So we had to look in our systems just to see, like, hey, what's the status of the claim. Sometimes if the claim was pending too long, we could send the request on the veteran's behalf. We would process first notice of death. So basically, like, if the spouse is, like, hey, my husband passed away, we would process that, ensure that the veteran's spouse received that last check. Sent information for them to apply for death benefits. Also, process the presidential memorial certificate and things like that.

So that's basically was, like, VA's one stop shop for veterans to get access --

instead of coming into the regional offices, they were able to get that same service over the telephone.

Q. Thank you.

A. You're welcome.

MR. VANSLYKE: Counsel, could we go off for just one moment.

MR. KLOTZBUCHER: Okay.

THE VIDEOGRAPHER: We're going to go off the record at 9:48 a.m.

(Recess taken from 9:48 a.m. until 9:54 a.m.)

THE VIDEOGRAPHER: We're back on the record at 9:54 a.m.

BY MR. VANSLYKE:

Q. Okay. So I am still looking at your CV, Ms. Piper?

A. Okay.

Q. I'm scrolling up to the next position, which I see is the senior certified veteran service representative from June of 2010 through April of 2015; correct?

A. Correct.

Q. And in this role, were you still working with VA disability compensation benefits?

A. Yes, I was.

Q. Can you briefly describe for me what you did in this role?

A. Yes. The role as a veteran service representative, the majority of my time was spent as an appeal veteran service center representative. So basically we worked in appeals division, basically means the veteran had filed a claim, it was denied. And now we are looking at it a second time.

During this time, we had to basically do the same thing as if the veteran had filed a claim, but it's just kind of giving that veteran a second chance. So just reviewing the claims folder for any missed evidence, developing the claim. Sometimes we had to do, like, care to discharge the termination. So, basically, a veteran could not receive benefits, so we are looking to see if we could write the veteran in based off that information.

Also, we would process the rating decision. So, basically, once the veteran receives a rating decision, we would be responsible for processing for that disability payment. Also, in that role, sometimes we would have to still do rotations in our public contact

center. So, basically, helping veterans in person with their claims. So, basically, that's just the development. We're trying to make sure we get the case together. Because we were in appeals, sometimes we had to do the after action. So we, basically, before the rating decision and after the rating decision actions, development for those is the best way I can describe it in a nutshell.

Q. Would you say that the process of reviewing claims on appeal is any more or less detailed than the initial claims?

A. I would say with the initial stage. I think it's just like a clean slate. So when they first filed the claim, it's you -- it's just you. So now you're reviewing someone else's work to make sure it's not -- like, there were no errors. So because, basically, the veteran is filing an appeal because it was, like, hey, I disagree with your decision.

So now we are just trying to get that veteran that extra chance to see if we can basically assist in the development and possibly get the decision review officer to kind of overturn that decision. So I feel like it is a

little bit more detailed because it's basically a second claim.

So you're looking at the first claim, trying to get the information for the second claim. So I feel like it's -- I would say just say it's just more information. So if you want to say detailed, but I think the biggest thing is just more information because it's just like a second claim.

Q. And I see in this first bullet here it says that you reviewed, interpreted, and applied VA laws, regulations, and procedures for board of veterans appeals, court of appeals for veteran claims and federal circuit court; correct?

A. Correct.

Q. And I see that you authorized or reviewed disability benefit awards even though they were generated by another individual; correct?

A. Correct.

Q. And then the third bullet, I believe you're saying that you are a productive data technician who accurately reviewed VA rating decisions and claims folders to generate and

process compensation and pension benefit payments totaling over a million dollars; correct?

A. Correct.

Q. So on page 7, the second bullet, I see this inquiry routing and information system IRIS. Could you describe for me what that system is?

A. Yeah. So IRIS was basically like our online tool that veterans would file kind of complaints to. So that's what I was saying, when they come into public contact, we would assist them with completing those requests.

So, basically, during that time frame, IRIS is no longer into play. But that was just our routing tune to receive information. So, basically, we would be that intermediate between either the rater or someone that was actually working on the veterans claim, we would submit that on the veterans behalf when they would come in to -- in person.

So sometimes, like I said, veterans would call, but when they would come in, we couldn't just stop the RVSR, the VSR, whoever was either developing or reviewing that claim. But this was our mechanism to get that information to

them about the veteran's claim.

Q. Okay. I will scroll up to the next position, which appears to be journey-level rating veterans service representative from April of 2015 to January of 2018; correct?

A. Correct.

Q. And would you briefly describe this role and how it differs from the previous one?

A. Yes. So this role is where we actually made decisions on veterans' claims. So, basically, the first role was basically we got the claim ready. So basically we would develop the claim. So, say, the veterans submitted a claim on the VA Form 526, so this is the first job, the first position. Basically, we would develop those claims. We would look and see what conditions are the veterans claiming. We would input that information to the system.

So, basically, the first position is getting it ready for the rating specialist, developing for any information, making sure the veteran submitted the claim properly. If not, we would send the veterans letters. We were the ones responsible for getting the medical evidence if it wasn't there. Going into our VHA system,

CAPRI during that time to download all the medical records.

So, basically, before a claim can be decided by the rating specialist, it has to be developed to ensure they have everything they need before they make a decision. So that was the first job.

The second job was, like, okay, we believe that this case is ready, now we're about to make a decision. So we are looking at the medical evidence, trying to determine.

So one of the differences with the rating specialist, the rating specialist could not do complex medical examinations. So sometimes as a rating specialist, the claim wasn't ready for a decision. We were the ones responsible for inputting those complex medical opinions during that time frame. So, usually, the veteran service representative could do things like hearing loss, tinnitus, claims that weren't -- exams that weren't complex. But anything that required, like, an extensive medical opinion would be done by the rating specialist.

Also, with the rating specialist, I

think the biggest thing is just reviewing it a second time to make sure that no development actions were needed. If it was determined that development actions were needed, you would submit what was called a deferral back to the VSR to further develop the claim prior to submitting it for a rating decision.

And then the once the rating decision was completed, the first job, which was the veteran service representative, then now had to do the post-award action meaning to look at the rating decision to ensure that it was accurate, the effective dates and all of that line up, and then get the award ready for processing for the disability payment, reaching out to the veteran if the veteran did not provide direct deposit. So, basically, the first job was doing information on the front end and the back end of the veteran, and the second job was anything as it pertains to trying to make a decision on the veteran's claim.

Q. And I see in this first bullet it says, "Adjudicator who exhibited sound judgment when rendering VA compensation and pension rating decisions, utilizing VA's schedule for rating

disabilities, 38 Code of Federal Regulations, CFR, VA regulations and procedures outlined in M21-1 Compensation Manual as support of references"; correct?

A. Correct.

Q. And is it fair to say that that is a more specific articulation of the first bullet in the previous jobs language saying reviewed, interpreted, and applied VA laws, regulations, and procedures?

A. Correct. And I would say that the biggest difference is that it was more extensively heavily using the VA schedule of rating disabilities. So you would use the same information, but I would say with the rating specialist, she relied a lot on the VA schedule of rating disabilities, more so in that job than the first one.

Q. And this M21-1, is that voluminous guidance quote/unquote --

A. Yes.

Q. -- document that we referred to earlier; correct?

A. Yes.

Q. Okay. And in the third bullet, it

says, "Administered organizational support by serving as a reviewing official, second signature reviews, on complex rating decisions to rating specialist trainees to ensure quality and accuracy were obtained"; correct?

A. Correct.

Q. And I think you sort of already said this, but that is recognizing that at this stage you are engaging in more complex analysis than you were in the previous -- in previous role; correct?

A. Right. But, actually, you're a mentor. So, basically, when you just become a rater, I would say like maybe your first 18 months, you really can't release a rating decision without someone reviewing it. So at that point I was a mentor to junior raters who just started. And so we had to do what was called second signature review. So, basically, looking at their work and making sure that it was correct. Especially complex. At certain sometimes, and it still may be, I haven't been a rating specialist since 2018, but during that time frame certain conditions like TBI, they couldn't be released without someone looking at

it again.

Q. Okay. I'll scroll to the next role.

So from January of 2018 to September of 2021, you were a management analyst/veterans claims examiner; correct?

A. Correct.

Q. And go ahead and summarize that one for me and how this changes from the previous role.

A. Yeah. So starting like 2016, VA started to have their own contract exams. So VHA in the past, they also contracted out, but VBA at that time they expanded to kind of take over contract examinations.

So during that time, we were kind of standing up the team. So basically my role was to assist at that time the contract examiner QTC, but during that time we had LHI, which is Logistics Health, and VES, Veterans Evaluation Services. Those contract vendors, we were assisting them ensuring that they met VA's contract obligations. We would do site visits just to ensure. Sometimes we would get complaints from veterans like, hey, my exam wasn't satisfactory. I had an exam at a nail

parlor or something like that.

And so we would have to do investigations with those contract examiners. Also, during that time VBA was expanding our veterans benefits management system. And that is our system that we use for claims, but we were now doing exam management.

So during that time, we would only schedule VHA exams, but now because the contract examiners needed an avenue to receive information from our VSRs or RVSRs or rating specialists or veteran specialist. We were testing that system, what's called EMS, or exam management system, which is still in existence. And that was a way to ensure that the veterans exams were getting at the right place.

So we were responsible for looking at the levels. Sometimes VHA did not have the capacity to have an exam. So we would kind of turn off the system where the exams had to be routed to one of the three contract vendors. So I had to ensure that the -- it was leveled out. So basically due to contract obligations, each contract examiner had to receive a certain amount of exams. So that was basically the role of the

management analyst in that position was just to ensure VA's contract exams were properly handled for veterans.

Q. And all of these medical exams would have been related to VBA disability benefits; correct?

A. Yes.

Q. And in this role, is there any aspect that you would still describe as reviewing, interpreting, and applying VA laws, regulations, and procedures?

A. Yes. So sometimes we would get, like I said, complaints from veterans. So we actually had to go in the system and look at their exams depending on their complaints. So as part of that job for management analyst, we receive inquiries from actual veterans or VSOs. And they were all about the exams.

So we would have to go in the system, look up the veteran's rating decision, kind of ensure that everything was the way it was supposed to be. Depending on what we found, it was our job to liaison between our VA regional offices for them to handle the claim depending on what we found in our investigations.

Q. I'm going to scroll down to the next page but under the same role.

A. Okay.

Q. So I see a bullet if you can see my highlighting here.

A. Yes.

Q. It says proficient technical expert on the veterans benefits management system and other VA computer programs to provide an accurate analysis of claims or appeals statuses; correct?

A. Correct.

Q. Could you describe what the veterans benefits management system is?

A. Yeah. So that is the hub for VA claims processing. That's where the ratings specialist, so the two previous positions would develop the claims. So everything's housed. But VBMSA is VBMS award. So that's for the post-determination VSR or the VSR who completes the claim actions after the rating decisions. That's the system that processes awards.

Then we have VBMSR, which stands for VBMS rating. That's where all the information is contained for a VA rating decision. So that's how you input the information, you know if it's

claim for increase, a claim -- you know, so that's basically how the rating decision is processed in that system.

So veterans benefits management has multiple systems. So that's the overarching. And then depending on what action is happening would determine which one you would use.

Q. Are those completely distinct systems or is it --

A. Yeah.

Q. -- something like different drives within the same system?

A. I would say different drives in the same system because they're all in VBMS. It's just certain -- like, if I am not a rater, I don't have access to VBMSR. Because I'm not a rating specialist, I don't need that function. If I'm a post-determination VSR meaning I'm processing the money, I need access to VBMSA. But I'm a rating specialist, so I don't need access. So depending on what function you serve for VBA determines which access you receive.

Q. And if there was a rule that had appropriate access to both, would they be able to access it in the same system?

A. So VBMS during the time frame -- and I haven't researched that. But there was a time where it was limited. So -- and we've even experienced that as we've been processing or working with VHA on processing clothing allowance. But one of the things that we know is that, say, I want to use VBMSA, if I -- I can't have access to both systems because it's kind of like to prevent fraud.

So depending on what functions you have, the system may not allow you to use another one. I don't know all the nuances. But there should be some type of restriction where depending on what function you serve, you can't have access to both systems because there's a potential for fraud. Especially like if you make a decision on the claim, you shouldn't have access on how to process the claim. Maybe in supervisory status, but they may have taken that away, as we have had in the past some fraudulent actions with the VBA.

But I'll say for the majority, and I'm not 100 percent certain, but there was a time where depending on what function you had, you couldn't have access to both systems due to some

kind of potential fraudulent actions that may or may not occur.

Q. And when you talk about fraud, could you give me a brief description of what type of fraud you're referring to that has occurred in the past?

A. Yeah. It would be more like financial. There may be something publicly known, but usually when something happens, we get restrictions. So there was a time where there was kind of like a conspiracy. I can't remember which regional office, you would have to look it up. But it was a -- I can't remember which regional office. But it had to have been like sometime like between 2010, 2015, don't quote me on that. But it was where the VSR and RVSR was basically had like dummy -- dummy veterans claims or whatever. And they were basically taking the money. So because of that -- like, just basically I'm working with my person. So basically I make the decision on the claim. Now I have a friend who knows how to process the awards. We're putting it in an account that's not a real person. So because that has happened before, that's what causes certain restrictions

on certain accounts due to -- to stop fraud in VA against employees.

Q. Is it your understanding that that fraud has been ended by those measures?

A. Yeah. From my understanding, that's why it was put into place due to previous actions.

Q. I'm scrolling down further. And in this paragraph, I see, "Operated as an incarcerated veteran subject matter expert, SME, by reviewing and analyzing policies and/or procedures, evaluate and develop best practices, and implement continuous process improvement techniques by formulating and recommending instructions and procedures to deviate field personnel to ensure MDEs are conducted for this vulnerable population of veterans"; correct?

A. Correct.

Q. What does MDE stand for?

A. Medical disability exams.

Q. Could you summarize, based on this expertise, what you think is unique to the population of incarcerated veterans in this context?

A. So I would say the biggest thing in

that role was a lot of incarcerated veterans were not receiving exams. During that time frame, it was just basically because there was not a lot of Internet access in some of those facilities. There was, like, no one boots on the ground so veterans could file a claim. But when it was time for them to get their exams, their address -- their address of record could be their home.

And so because it's an actual place where they live, it wasn't like we would know that their -- that this veteran was incarcerated. It was that basically the veteran filed a claim, they put their address at their home of record, and then we would send the exam for the home of record and it would never happen. But that's because some veterans weren't getting mail.

So, basically, we had to work to ensure that there was a mechanism for incarcerated veterans to receive their exams. So even though if a veteran was in the federal facility, they could only get 10 percent of their VA disability, but they're entitled to that 10 percent. So we had to find a way for incarcerated veterans to receive exams.

So the unique thing was basically taking a -- a job, you know, just trying to work with incarcerated veterans. So we basically had to basically go through all of the United States and meet with veteran service officers, different state and federal correctional facilities, those wardens, and try to increase access for incarcerated veterans to receive examinations. So it's a -- like a two-year effort to try to expand benefits to incarcerated veterans.

Q. So you mentioned that 10 percent amount?

A. Yeah.

Q. Could you tell me more about that?

A. Yeah. So if a veteran is incarcerated federally, their benefits are reduced, and they are only entitled to 10 percent.

Q. And is that only if they are incarcerated in a federal prison, not a state facility?

A. As far as I know. It's been a minute since I looked at it. But from what I can recall, it was due to the federal, and they were only entitled to receive 10 percent.

Q. So I'm looking at the last bullet here running on to page 6. I see "Maintained close working relationships, customer service, and coordination with other elements within VA to include the Disability Evaluation Management Office, DEMO; Office of Disability and Medical Assessment, DMA; Veterans Health Administration, VHA; Veterans Experience Office, Office of Field Operations, OFO; district area offices, ROs; strategic acquisition center, and other VA entities"; correct?

A. Yes.

Q. Could you tell me what the disability evaluation management office is?

A. Yes. During that time, I believe DEMO was an office within VHA, and they were working -- as I can recall, and it's been such a while, but they were responsible for managing the disability evaluation system.

Q. And would that be related to the medical exams that we were talking about previously?

A. Yes. All of that is inclusive to the medical exams.

Q. So that's -- by all of that, you're

including the office of disability and medical assessment.

A. Yes.

Q. Do you think that your ability to maintain close relationships and coordinate with these other elements was improved by your prior experience with the ratings roles?

A. I would say yes, because I feel like you had to have a foundation to kind of understand how to improve the process. So you had to know kind of the process before you improve it. So I would say yes.

Q. Okay. I'm going to move on to your next role, which I believe brings us to your current permanent role; correct?

A. Correct.

Q. So am I reading correctly that the bullets listed here, and I'll scroll briefly from where this job begins on page 1 through page 2 through page 3 until page 4 is the previous role?

A. Yes.

Q. These bullets include both your current permanent role and your current acting role; correct?

A. Correct.

Q. So as I talk about these bullets, please feel free to clarify if any of the content applies exclusively to one of those roles. Okay?

A. Okay.

Q. So I see -- I believe this is explicitly under the assumed acting assistant director role --

A. I would say yes.

Q. -- that you ensure policy-related and personnel deliverables are maintained; correct?

A. Correct.

Q. How are you distinguishing between policy-related deliverables and personnel deliverables?

A. So policies are the things we do for work. Personnel would be the things doing for the employees, like their -- their assisting them with their -- you know, like updating their performance standards. Assisting them with their issues. You know, employees, they have suicidal things going on. So sometimes you have to call the employee assistance program. Sometimes you have to do welfare checks.

So anything that's pertaining to the employee, I would say personnel. Anything

related to work because it's the policy staff. So it could be taskers. It could be regulations. It can be -- it can be implementation plans. So anything related to work, I would call it the policy-related deliverables. Anything related to ensuring that the employees have what they need, it would be a personnel deliverable.

Q. Just for the record, can you describe for me what a tasker is?

A. Yes. Taskers are -- we get things that's either internal. So this is something, like, hey, I need this. So Jadine -- so for an example, Jadine, we received this from Congressman blah, blah, blah, blah, can you review this and have it completed in the next 24 hours.

So we get multiple taskers from anything related to disability compensation that would fall in the realm of the -- for the policy staff to review. That's what a tasker is. So it's basically an inquiry, usually a highly visible inquiry, usually from Congress, veterans service officers, our -- under secretary for benefits.

So usually anything that's highly

visible that needs to be reviewed, that's considered a tasker. And this can be internal or external. So someone in another division can be, like, hey, we need you to review our manual edits. Hey, we need you to look at this quality review to see if there is any impact to the policy staff. So something like that is what you would call a tasker or just basically someone asking you to look at something.

Q. Is it fair to say that those topics are policy tasks?

A. Yes.

Q. And then the second bullet, it says oversees and provides guidance to analysts that aids in the development and implementation of policies and programs that support the veterans benefits administration's mission; correct?

A. Correct.

Q. And what do you mean when you say you are overseeing and providing guidance to analysts who are aiding in the development and implementation of policies?

A. So, basically, we have what's called integrated project teams. So say a law pass. We have to perform the work groups. So, usually,

it's the responsibility of the program implementation staff to either implement something that has passed in law or in regulation. So we assemble those work groups. It could just be internal. So internal for compensation service means we have to work together with the procedure staff. Those are the people who do the M21 adjudication manual.

If we make changes to the M21 adjudication manual, now we may have to update our training or create new training for our claims processors. So these are work groups where we're like, hey, this law happened, so the policy staff lets them know the impacts. From there, how does this law change or this new law changes your policy. How will now that impact the quality.

So, basically, it's just overseeing the analyst and it's the responsibility of one analyst usually, sometimes two, to have a backup to basically assemble those work groups that can expand from 60 days sometimes to, like, two or three years. But their job is to implement the policies which is usually something that's in law or regulation and just trying to look at the

project milestones. It's their job to write options paper. So sometimes we get these laws, now it's our job to try to interpret these laws. And so we may have to do options depending on our system. Sometimes I think that's the longest thing to come into play due to -- you know, just due to the nature of prioritizing systems and all of VBA.

So, basically, it's just the job of the policy staff, mainly the program implementation team, to assemble these work groups to ensure that all the deliverables are met and maintained. So they do all the slide decks. They do all the briefing materials. They create the guidance, all of that to implement a change in law or regulation.

Q. So is it fair to say that the work group as a whole is reviewing, interpreting, and applying new VA laws and regulations and procedures?

A. Yes. But it's the job of the policy staff to interpret it for them to ensure that they have an understanding. And then from there, once they have an understanding, then they apply that to their work products. So training needs

to see what impacts the change has on to them, if that makes sense.

Q. And I'm understanding this bullet to say that you are overseeing and providing guidance to that work group; is that correct?

A. Right. Or to the analyst who facilitates the workgroup, but sometimes I lead workgroups myself. So, yes, I would say both. So I either lead the workgroup or I train the employees to lead the workgroup.

Q. And do you include yourself as policy staff?

A. Yes.

Q. I'm going to scroll down to the next page. And in this paragraph, it says actively assists with organizing integrated project teams, IPTs, by creating a cadence consisting of ready-to-use materials to foster implementation consistency, email solicitation notice, presentation materials, and it calls for script outline.

Does this relate to the process that you were just describing?

A. That's correct.

Q. And in the next bullet, it says that

you ensure the successful implementation of 14 IPTs; correct?

A. Right.

Q. So are these IPTs that you may be involved in or overseeing but not involved in correctly -- directly? My apologies.

A. Yes.

Q. And in the next bullet where it says monitors and participates in five IPTs or work groups, are those the ones that you are involved in directly?

A. I would say yes. I -- I mean, I'm trying to answer your question. But, basically, when we -- I would say that I oversee all of them. The difference is those are completed. So those are -- the first one ensures the successful implementation. So I'm responsible for all of them. All of them are managed by my team. But when we monitor and participate, that's because they're still ongoing or during the time frame in which we did this. It was still ongoing. They were not resolved.

So the difference in the first bullet is that they were done, implementation was completed. The other ones is that we're

monitoring and participating, but they all are a part of the policy staff, and I have some type of involvement, whether it's leading -- leading it or helping the staff work through whatever issues they have with those.

Q. Understood. Thank you for clarifying. In the next bullet at the top of page 3, it says, "Maintains oversight of six standing projects."

What is the difference between a standing project versus an IPT or work group?

A. So standing -- so we -- I guess the IPTs, they're going to end, right. So they're like -- I would say they're temporary in nature. So, basically, you're just trying to implement the law or change as soon as possible. But the standing projects, they never end or at least right now they're still ongoing. So these are things that we have to continue to do. So if they're standing projects meaning that they still exist, the IPTs, they exist until everything is done and then it's the end of it. And now you probably have another work group to work on. So I would say that's the difference. The standing projects continue, they're ongoing, whereas the

IPTs, they're for a certain duration.

Q. And I see one of the standing projects is this advisory committee on disability compensation for ACDC; correct?

A. Yes.

Q. Okay. I'll come back to that one in a little more detail later on. About halfway through that paragraph I see coordinated 16 letter of modifications to assist field personnel in the processing of veterans claims in physical year 2023; correct?

A. That's correct.

Q. Could you explain to me what those letter modifications are?

A. Yeah. So, basically, entities rather they're internal to compensation service, that's my division, or we have other members of like pension and fiduciary, that's another division in VBA, or our -- what's the other staff? -- office of administrative review, OAR.

So, basically, you're looking at the letter, but, however, due to some change in law you now have to modify the letter. So veterans receive different letters, development letters. We look at those and depending on the change in

law or if there are new laws, we now have to update those letters based off those changes.

They have a board where they kind of look at every letter. And depending on the change, they have to vote to ensure that it's into compliance. So because of that during that time frame, we had 16 different changes and we orchestrated that.

But that's basically what it is, is just due to a change in law or sometimes they create new letters. But most of the time it's just updating our letters and our letters have to be updated. Like anytime there's a change in law, we have to look at the letters to ensure the letters are still in compliance.

Usually, there's some kind of tweak where we have to change where you may see something called a fragment. That just means the letter language. We're updating the letter language to ensure that it's in compliance with the law.

Q. If a letter is not in compliance with the law because of a recent change, would that mean that the change affected the way that those benefits are provided or would it only be a

change to the administrative procedure?

A. I would say not how it's provided. I would just basically say we may have to clarify something. But usually they are able -- in the field they are able to do like until -- but most of the time we're able to do it, but it's our job -- and I'm trying to find the best way to say it, but -- so basically we send -- I'm trying to find an example of a letter modification.

But, say, we granted -- like with the packet, we now have new conditions that may be presumptive. Depending on the letter that comes out, we need to ensure that now veterans know that, hey, XYZ is now into law, so now we update it, too. We've updated that letter language to incorporate those new conditions or something like that.

So it's usually just ensuring that the letter is still in compliance. If it's not in compliance, it's our job to modify it. But it does not change the administrating of -- the administration of the benefit. It is usually just tweaking the language to ensure that we're now incorporating new information. And sometimes depending on it, we may have to take something

out.

So we just have to look at it on a case-by-case basis to ensure, but that's why we have people from, like, the office of administrative reviews. That's the division that handles a lot of the appeals stuff.

Then we have pension and fiduciary. They're usually responsible for veterans who need a fiduciary or pension, you know, for veterans who, you know, are on the income-based benefit. And then also pension and fiduciary kind of works on that survivor language. So we have an all-inclusive board to ensure depending on what law change and the impacts on what division. They all work together and ensure that it's in compliance.

Q. So looking at the example you gave of the PACT Act where certain conditions were identified as presumptive, would you agree that that changed to the benefit being recognized -- I'm sorry, to the condition being recognized as presumptive is a change to how those benefits are administered?

A. Yeah. Because now we're recognizing a new condition that may have not been eligible

prior to that change in law.

Q. So would it be fair to say that some of the letter modifications are related to how benefits administered and others are not?

A. I would say it's possible. Yes, it's possible.

Q. Okay. In this bullet, I see "Aids in the development and/or implementation of program changes that closed out the following, GAO or OIG audit items, OIG status update requests, VBA inadequately supported P&T disability, oversaw the LCCB letter change and worked with manual to complete request changes. OIG status update request, clothing allowance, oversaw the development of a white paper to assist VHA with the implementation of clothing allowance recommendation. VHA was able to provide an interim response. However, this issue is not fully resolved." Correct?

A. Correct.

Q. Can you tell me what is referred to when this says "VBA inadequately supported P&T disability"?

A. I would -- I would -- it's been a minute since I looked at that. So I would have

to refresh my memory. It's been quite a while. So I can't remember the actual OIG audit. So I apologize for that.

Q. Do you know what P&T disability stands for?

A. Yes. Permanent and total disability.

Q. Do you have any recollection of issues with permanent and total disability being inadequately supported?

A. Not at this time. I can't recall what that was about.

Q. Okay. And in this bullet, it says, "Oversaw the revision of VA form, VAF, 21-0781. Statement in support of claimed mental health disorders due to in-service traumatic events that resulted into a single form titled statement in support of claimed mental health disorders due to an in-service traumatic events released June 29, 2024. Combining the forms allowed VA to reduce the burden for the veteran who completes the form by 50 percent. Additionally, VA further reduced the burden by improving trauma sensitivity, decreasing the potential for respondents to provide information that is not needed and allowing for other mental health conditions other

than PTSD to be submitted on the form"; correct?

A. Correct.

Q. And when it references other mental health conditions?

A. Yeah. So other than PTSD, mental health can be depression. So basically at that time we were just only allowing PTSD to be claimed, but now veterans can claim other conditions that's mentally health related usually in that diagnostic number 9,000 or whatever. If you look at VA schedule or rating disability, it will be something like that, depression, bipolar, anything in that mental health sphere is what it's talking about.

Q. So I -- I think you answered my question but just to confirm, this reflected a change in which mental health conditions were permissible for a claim, not just which ones were listed on the form; is that correct?

A. Right. Because, like, previously, we could only accept PTSD on that form. But now we're able to allow other mental health conditions to be submitted on the form.

Q. So would those additions have been a result of a change to the manual?

A. No. We had a public law 117-303. So that was in support of -- what was it called? But it was a change in public law, not a change in the manual. Yeah.

Q. So does the law -- apologies. Go ahead.

A. No. Go ahead.

Q. So is the law what granted the ability for claims to be provided for those other mental health conditions?

A. Yes.

Q. Okay. All right. I think I'm finally going to put this document away for now.

So would you agree that you have had a long career at the VA?

A. I would say yes. I didn't realize how long until today, but yes.

Q. And has the entirety of your time at the VA involved working with VBA disability benefits?

A. Yes.

Q. So I want to go back to your role on the ACDC and the -- you were a designated federal officer; correct?

A. Right.

Q. What does that mean?

A. So, basically, the advisory committee on disability compensation, they're one of the secretary of VA's advisory committee. So the role -- and this happened to be on the policy staff. But the role is to assist members on that committee. They're usually doctors, lawyers, or whatever, but they're working on behalf of the secretary to provide recommendations to VBA, usually about the VA schedule of rating disabilities. But they also -- also look at different areas in the disability compensation program trying to provide recommendations.

So every two years they submit this biannual report to the secretary with their list of recommendations on how VBA can change it. So our job is not to persuade them in any way, but it's just to ensure the committee has what they need to provide those recommendations.

So we're responsible for hosting the conferences, ensuring the logistics, booking their travel, anything they need. But our job is not to do anything on behalf of them, but it's just to support the committee to ensure that they're able to execute on behalf of the

secretary of VA.

Q. And am I understanding that the committee members themselves are not part of the VA?

A. That's correct.

Q. Can you recall an example of a recommendation from a CDC that has been implemented as a change?

A. Yes. Let's see, the most recent one.

MR. KLOTZBUCHER: I'm going to object to form.

But, Ms. Piper, you can still answer the question.

THE WITNESS: Okay.

MR. KLOTZBUCHER: A form objection on the record.

THE WITNESS: Okay. Okay.

Yeah, it's available. I can't recall right offhand, but there has been some times because every now and then we have to go through the recommendations. So there have been some recommendations that they have been implemented. But at this time I can't recall exactly which ones they were.

BY MR. VANSLYKE:

Q. Okay. Have you participated in reviewing regulations, policy changes, or federal register notices relating to disability compensation?

A. You said have I participated?

Q. Participated in reviewing, yes.

A. Oh, yes.

Q. Have you participated in drafting regulations, policy changes, or federal registered notices relating to disability compensation?

A. Yes.

Q. You are aware of the PACT Act; correct?

A. Yes.

Q. Are you aware that it passed in 2022?

A. Yes.

Q. And you would have been in the supervisory veterans claims examiner role at that time; correct?

A. Correct.

Q. Was any of your work in that role related to the PACT Act?

A. Was any of the work related --

implementing, not in the regulation space. Implementing.

Q. And was any of that work related to Camp Lejeune?

A. No, not for me. I didn't do anything with Camp Lejeune. That section was not owned by the policy staff.

Q. I'm going to just briefly look back at Exhibit 4 which is the job description. Scrolling down to the second page. I'm starting about the middle of this paragraph. It says, "This staff is charged with implementing changes in Title 38 of the United States Code and the Code of Federal Regulations. It renders guidance primarily through the procedurals -- procedures manual, i.e., M21-1 adjudications procedures manual and policy letters; correct?

A. Correct.

Q. And do you agree that you are charged with those tasks in your role?

A. Yes, I agree.

Q. Do you agree that you have to interpret the U.S. Code and CFR in order to implement them?

A. Yes.

Q. And once you do implement them, you participate in issuing guidance for others to use when they are implementing them; correct?

A. Correct.

Q. Okay. With all of your background, is it fair to say that you are familiar with the statutes applicable to VBA disability benefits?

A. Yes.

Q. What about the regulations?

A. Yes.

Q. I understand that you are not a lawyer; correct?

A. Correct.

Q. But would you agree that in the roles we've just discussed going as far back as 2010, you were interpreting and applying the laws and regulations applicable to VBA benefits?

A. Correct.

MR. KLOTZBUCHER: Objection. Form. You may answer.

BY MR. VANSLYKE:

Q. Would you agree that doing so has been part of your job duties in every role you've held since then?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. New statutes have been passed which are applicable to VBA benefits or existing statutes received new amendments, you have participated in interpreting and applying them; correct?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. So in total, you have more than 15 years of experience interpreting and applying the laws and regulations applicable to VBA benefits?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. Is it fair to say that despite not being an attorney, you have subject matter expertise on interpreting and applying the laws and regulations applicable to VBA benefits?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. Do you understand that expertise to be why you were identified to be deposed today?

A. Yes.

Q. Before I start a new section, I just want to check in, does anybody need a break?

A. Yes.

MR. VANSLYKE: Yes, okay. Let's go off the record.

THE VIDEOGRAPHER: All right. We're going to go off the record at 10:53 a.m.

(Recess taken from 10:53 a.m. until 11:01 a.m.)

THE VIDEOGRAPHER: Back on the record at 11:01 a.m.

BY MR. VANSLYKE:

Q. Ms. Piper, are you familiar with 38 USC Section 1155 which directs the secretary of the VA to adopt a disability rating schedule?

A. I'm not familiar, but if I had to look it up, I could. So, I mean, I'm sure it's in there, but I'm not familiar with the ins and outs of it.

Q. Do you understand that the secretary

of the VA is charged with adopting and applying a disability rating schedule?

A. Yes.

Q. I'm placing a file in the chat which I will mark as Exhibit 9. And I will share my screen.

(Exhibit 9 marked for identification.)

BY MR. VANSLYKE:

Q. Okay. Ms. Piper, at the top of this document, do you see the GPO stamp?

I can zoom in, if that's helpful. Top left corner.

A. Yes.

Q. Are you familiar with GPO?

A. Not that I can recall at this moment.

Q. If I say government publication office, is that familiar to you?

A. Yes.

Q. And the stamp says "Authenticated U.S. Government Information"; correct?

A. Yes.

Q. And do you understand that Title 38 is the title governing veterans' benefits?

A. Yes.

Q. And if I scroll down here to Section 1155, do you see that it says "Authority for schedule for rating disabilities"?

A. Yes.

Q. If you were asked in your role to interpret and apply a statute, such as this, do you believe you could do so?

A. Can you repeat the question?

Q. So we spoke previously about one of the responsibilities in your job role as being to interpret and apply statutes and regulations governing VBA benefits; correct?

A. Yes.

Q. If as part of that responsibility you were asked to interpret and apply this statute, do you believe you could?

A. Yes.

Q. And if I read the first two sentences under the section, it says, "The secretary shall adopt and apply a schedule of ratings of reductions in earning capacity from specific injuries or combination of injuries. The rating shall be based, as far as practicable, upon the average impairments of earning capacity resulting from such injuries in civil occupations";

correct?

A. Correct.

Q. Do you believe this to refer to the VA rating schedule that you are familiar with?

MR. KLOTZBUCHER: Objection.

Foundation. You may answer.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. And based on what I just read, is it your understanding that VBA disability benefits awarded, according to the schedule, are based on impairments of earning capacity?

MR. KLOTZBUCHER: Objection.

Foundation. You may answer.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. I will continue reading from here. It says, "The schedule shall be constructed so as to provide ten grades of disability and no more upon which payments of compensation shall be based, namely, 10 percent, 20 percent, 30 percent, 40 percent, 50 percent, 60 percent, 70 percent, 80 percent, 90 percent, and total 100 percent."

Did I read that correctly?

A. Yes.

Q. In your experience, is it possible for one veteran to have a 100 percent rating for one injury and a 50 percent for another at the same time?

A. Yes.

Q. And if dependents and other variables are equal, would their award value based on those ratings be greater than that of somebody with only one -- 100 percent rating?

A. It's just 100. So I think you're saying, like, if someone had 100 and -- had one disability that's rated at 100, another one rated at 50, and then someone else just has 100, will their money differ, is that the question?

Q. Assuming other variables to be the same just based on those ratings percentages; correct.

A. Yes, just the rating percentages. Not considering any special monthly compensation. But if we're just talking about both people being at 100 percent, the rate that they're paid would be the same no matter how many disabilities they have.

Q. I will continue reading from here.

It says, "The secretary shall from time to time readjust this schedule of ratings in accordance with experience"; correct?

A. Correct.

Q. Is it your understanding that the secretary of the VA has the authority to alter the rating schedule discussed here?

A. Like make changes?

Q. Correct.

A. Like updates? Yes.

Q. And I believe you've stated that you are familiar with this schedule; correct?

A. Correct.

Q. I will stop sharing. I will place another file in chat and mark this as Exhibit 10.

(Exhibit 10 marked for identification.)

BY MR. VANSLYKE:

Q. And can you see that I'm sharing my screen?

A. Yes.

Q. And do you see at the top left that same GPO stamp?

A. Yes.

Q. And do you see the title here says

"Part 4 Schedule for Rating Disabilities"?

A. Yes.

Q. Is this what you were referring to as the rating schedule that you're familiar with?

A. Yes.

Q. Has the rating schedule changed at all in your tenure at the VBA?

A. Yes. They are working updates. It was last fully updated, I think, in 1945 up in the 1940s. And they're close to having a full comprehensive update. So, yes, they've been making updates.

Q. Can you explain for me the distinction that you're drawing between a full comprehensive update versus other updates?

A. Yes. That's meaning like the whole -- like they have went through and updated the entire -- not just certain body systems. They're in the process of making sure that all of the updates have been completed one time. Like, so one iteration would involve all of the disability benefits that has not happened yet. The last time that has occurred was in 1945 or that's the first -- it has never happened. We're close to completing it.

So right now we have updated it, but it's not been a full comprehensive where everybody's system has been accounted for since 1945 that had updates. I can't tell you which ones because that's not in my realm of responsibility. But I do know that that staff is close to completing that first iteration of the entire update of all body systems.

Q. And when you say that hasn't been done since 1945, do I understand correctly that 1945 was when the complete schedule was initially published?

A. Right.

Q. So all of the updates until now have been more limited updates; correct?

A. Yeah. It's been like targeted, but it hasn't been, like, a full comprehensive that every single system has been updated at least one time. It's close to completion, but last time I checked it's not been a full comprehensive update, but it's close to being fully updated.

Q. So referring to the more targeted updates, do you have any recollection of how many times it has been updated since you began working at the VBA?

A. No, I can't recall at this time.
Q. Would you say there have been more than five updates?
A. I would say yes, there's been more than five updates.
Q. Would you say there have been more than ten updates?
A. I know there have been updates, but I have not sat down to quantify how many.
Q. Can you recall any examples of how it has been updated?
A. Off the top of my head. I'm drawing a blank on an example. Again, that's not in my day-to-day area anymore to look at updates. I haven't been a rating specialist since 2018. So I don't monitor the updates frequently, so I apologize, I'm unable to answer that.
Q. That's okay.
Is it your understanding that when the schedule is updated, that may cause changes to individual veterans' ratings?
A. It's possible, like depending on what the update is. You're saying like depending on the update, it could change a veteran's evaluation.

Q. Yes.
A. It's possible.
Q. I'm going to scroll down in this document to the first subpart here, Section 4.1. Do you see the title "Essentials of evaluative rating"?
A. Yes.
Q. And, again, we have spoken about your job roles including interpreting and applying the statutes and regulations governing VBA benefits. In that capacity, if you were asked to interpret and apply this regulation, do you believe you could do so?
A. Yes, but not today. I would have to read it, because, again, I'm not day to day in the four-part. Most of the time we're in the three-part regulation. But I'm sure what time I would be able to interpret it.
Q. I understand correctly that you're saying this is not something you deal with in your day-to-day job?
A. Right.
Q. But you are capable of understanding this section; correct?
A. Right.

Q. So I'm going to read from the beginning. It says, "This rating schedule is primarily a guide in the evaluation of disability resulting from all types of diseases and injuries encountered as a result of or incident to military service. The percentage ratings represent as far as can practicably be determined the average impairment and earning capacity resulting from such diseases and injuries and their residual conditions in civil occupations. Generally, the degrees of disability specified are considered adequate to compensate for considerable loss of working time from exacerbations or illnesses proportionate to the severity of the several grades of disability."

Did I read that correctly?

A. Yes.

Q. And based on that regulation language, do you understand that to mean that VBA disability benefits awarded, according to this schedule, are based on impairments of earning capacity?

MR. KLOTZBUCHER: Objection. Foundation. You may answer.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. I will continue reading from here. "For the application of this schedule, accurate and fully descriptive medical examinations are required with emphasis upon the limitation of activity imposed by the disabling condition."

Did I read that correctly?

A. Yes. Yes.

Q. And based on that language in the regulation, is it your understanding that the limitation of activity is important because those limitations are what lead to the impairment of earning capacity discussed above?

MR. KLOTZBUCHER: Objection. Foundation. You may answer.

THE WITNESS: I mean, yes.

BY MR. VANSLYKE:

Q. And is that consistent with your experience working with the medical examination process?

A. In the medical examination process, I'm not familiar with utilizing earning capacity. Even though it states it here, I'm not familiar with the earning capacity piece.

Q. Are you familiar with the limitation

of activity piece?

A. Yes.

Q. Could you tell me more about the importance of the limitation of activity and the medical examination process?

A. I would say --

MR. KLOTZBUCHER: Objection. Form.

You may answer, Ms. Piper. I'm sorry for interrupting.

THE WITNESS: Yeah. So, I mean, I guess based off the examination, if it talks about, like, limitation of activities, if that's what you're asking. But, again, I'm not familiar -- like, my day to day is not in this four-part regulation. So I feel like I would just be in here just trying to assist you. But I'm not -- my day to day is not in the four-part regulation. Not that I can't figure it out. But I feel like in the time frame in which we have today I wouldn't be able to accurately assist you in interpreting this.

BY MR. VANSLYKE:

Q. I'll stop sharing for a moment. At

this point, I am not asking about the regulation. I'm asking about your prior role focused on medical examinations.

A. Okay.

Q. Do you recall which role I'm talking about?

A. The rating decision -- the rating specialist.

Q. I believe I'm referring to the management analyst/veterans claims examiner?

A. Okay.

Q. Did that role involve medical examinations?

A. Yes, but we were overseeing the examiners who did the contract exam. So it wasn't like I'm sitting there looking at an exam. We are ensuring that the contractors are meeting their obligations to get veterans exams. But we had a different division who did the quality reviews that would be able to answer your questions. But that wasn't my role as an operations specialist. Our job was to ensure that the systems worked. Our job was to ensure that veterans are getting their examinations, but the extent of reviewing the examinations to

review all that part, they had a quality review team that would probably be able to answer your question.

So in the medical disability exam, they had quality reviewers who actually reviewed those exams. And I feel like that would be the position that would be able to assist you. But not to the point where I am looking at exams. That wasn't my role in that position.

Q. Understood. Do I understand correctly that you're saying you did review the medical exam records when you were a claims examiner?

A. Yes. That was the job of the ratings specialist to look at the exams and apply the rating schedule. But that was the job of the rating specialist. But what I'm saying is the management analyst position, we didn't look up exams to review it. It was just basically to ensure that they had the exams. So it was like facilitating a program to ensure that, hey, these veterans are getting the exams that they need, like keeping the program moving.

Q. Okay. Thank you for clarifying.

So I will shift the perspective of

this question to when you were a claims examiner reviewing the medical examinations. Is that clear?

A. Okay.

Q. Okay. So in that role, when you were reviewing the medical examinations, do you recall the limitation of activity being significant?

MR. KLOTZBUCHER: Objection. Form. You may answer.

THE WITNESS: Yes. Especially, I would say more so in the musculoskeletal examinations, if I can recall correctly.

BY MR. VANSLYKE:

Q. Could you tell me more about why the limitation of activity was significant?

MR. KLOTZBUCHER: Objection to form. You may answer.

THE WITNESS: Yeah, I just can't remember at this time. I feel like it was part of the evaluation. But, again, I'm not -- it's been so long. I apologize, but I would have to review and get back to you. Like I would be able to answer these questions, but it would take me a little bit of time to research that and

not answer on the spot.

BY MR. VANSLYKE:

Q. Okay. So I will put this document back up for just a moment. And I'm picking back up here. It says, "Over a period of many years, a veteran's disability claim may require reratings in accordance with changes in laws, medical knowledge, and his or her physical or mental condition.

Did I read that correctly?

A. Yes.

Q. And based on that language, is it your understanding that a veteran's disability rating may change based on changes in law?

MR. KLOTZBUCHER: Objection. Foundation. You may answer.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. And in your time at VBA, can you recall any changes in law that would have resulted in a change in the ratings of veterans?

A. Not right off the -- it's not -- I'm sure it has happened. But at this time I can't give you a specific example.

Q. If we refer back to your prior

example of the PACT Act and the presumptive injuries, do you believe that would be an example of this?

A. (Reading document.)

So I feel like this is saying and, again, it's been a minute. So but -- so I feel like with PACT Act, like they expanded new. So I mean it's -- I think I would just have to ensure that I am interpreting this correctly. So, again, like I said, I'm not looking at this all the time. So -- would require re-ratings -- because it's saying that the disability claim -- yeah, I would have to sit down and analyze the interpretation of it. Because I read this and, like I said, I'm not looking at this all the time. But with PACT Act, I don't know if that would be a rerating because, like, hey, we're granting -- some of them were new conditions. But this is how I read it. Again, like I said, I'm not looking at this all the time. But, to me, this would be, like, maybe a change in law requires us to look at something that's already service connected again.

So because I'm not -- I haven't sat here to analyze it, I can't tell you if this is

saying without getting further interpretation, if this is saying like, hey, someone's already service connected, we're rerating them, or because of the change in law we are now granting something new. So I can't fully assess that without taking some time to really assess the section.

So, again, like I said, I do not work in this section all the time. So I apologize that I'm not able to give you that -- the response that you need for this.

Q. So I just want to clarify. When you're saying you don't work in this section all the time --

A. Right.

Q. -- I understand that you're saying you are a bit rusty on this section --

A. Right.

Q. -- but that the rating schedule is still within the topics you are familiar with, in general; correct?

A. Right. But, in general, when we talk about, like, evaluation and stuff like that. But when it comes to interpreting this section, I feel like I would need to have to -- to look at,

like, what is this saying. Like, it's just been so -- like, I've never sat here to look at this to be, like, hey, this means rerating something new. To me, it could be two different answers, and I'm not fully confident on which way to go with that one word, it's kind of throwing me off.

Q. Are you familiar with conditions being rated as secondary service connected?

A. Yes. So that's basically saying, like, hey, I'm service connected for X, but because of X, now I have a condition. So, basically, I'm service connected for my knee. My knee is bad and now it's causing my hip to be bad. Now my hip can be secondary due to the issues I have with my primary condition of my knee that's service connected.

Q. Do you believe it's possible that any of the presumptive injuries under the PACT Act could have been rated as secondary service connected prior to the PACT Act?

A. Without, like, looking at each disability right now, I can't say off top, but it's possible. I mean, anything is possible. But I would have to look at -- look at the information to see like -- because, basically,

what you're saying like, hey, this person could have received this secondary. So PACT Act allowed us to do this presumptive, but what you're saying is that potentially prior to PACT Act something could have been secondary service connected is what you're saying?

Q. Correct.

A. Yeah, but I wouldn't know that without looking at it to say yes or no. But I understand what you're saying, but I feel like I would have to look at the information without making a generalization of yes.

Q. So I understand you cannot say yes to a specific example without reviewing that file, but that in general you believe that would be possible; correct?

A. Yeah. It's possible, but I wouldn't know until I would really, like, look at it to see, like, the evidence prior to PACT Act. Because that's basically what you're saying. But without looking at the case and making a full assessment, I wouldn't be able to 100 percent say yes without looking at it.

Q. And if there were an example of that, that would be an example of a rerating in

accordance with changes in law; correct?

A. If that's what this is saying. Again, like I said, I would have to really look and see what this rerating is because it's not saying -- that's what I'm saying. I would have to take a minute to sit down to actually understand what the term "reratings" mean in this context. Again, I don't work in this area, but I feel like if I would have a little bit of time, I would be able to fully answer your question.

Q. Are you generally familiar with a veteran having a rating for a condition and later receiving a different rating for the same condition?

A. So like a claim for increase, is that what you're saying?

Q. Correct.

A. Yeah. That's normal. So that's basically what happens with most people over time due to age like things get worse. You know, sometimes they usually don't get better, they get worse. So what you're saying is that we are basically looking at something and now it has gotten worse. So, basically, a claim for increase. So usually veterans come in when they

feel that a condition that's currently service connected, has gotten worse. We'll look at it and evaluate it to see if that indeed did occur.

Q. And would you understand a successful claim for increase to be a rerating?

MR. KLOTZBUCHER: Objection. Form. You may answer.

THE WITNESS: Yes. If this term -- and, like I said, I do apologize, but if this terms means to rerate again or look again, yes, but I'm not 100 percent well versed on the term "rerating."

BY MR. VANSLYKE:

Q. So that would be my understanding of that word by itself?

A. Okay.

Q. Is there some other interpretation that you are imagining might be possible?

A. Well, because this is not just saying rerating. But this says over a period of time many veterans disability claims may require reratings in accordance to law. But then you're saying that rerating in a different context. You're just saying the term "rerating" without even applying law, is that --

Q. Do you agree that it says "over a period of many years a veteran's disability claim may require rerating" --

A. Right.

Q. -- "in accordance with changes in law, medical knowledge, and his or her physical or mental condition"; correct?

A. Yes.

Q. So would the claim for increase be a rerating based on his or her physical or mental condition?

A. I would say yes.

Q. Okay. I will stop sharing that. In your understanding, can VBA tell the difference between payments issued to a veteran versus payments anticipated to be made to a veteran in the future?

A. I'm not familiar with that. So you're saying can VBA -- like, do we have some kind of mechanism to assess that? Like payments now and future payments, is that what you're asking?

Q. In your role at the VA or at the VBA, do you understand the difference between those two things?

A. Can you say it again? Can you say it again?

Q. Do you understand the difference between a payment issued to a veteran in the past versus a payment anticipated to be issued in the future?

A. So basically like in our system, like if we show, like, okay, this payment that he has now, does it change -- I guess I'm just trying to answer -- assess like what are you -- like should I know, like, okay, what they received, I mean, like, am I looking at a system or am I just saying, like, hey, this person has this payment -- in the future, they should have this payment. I guess I'm trying to put together what you're saying.

Q. I think my question is a bit simpler than it seems.

A. Okay.

Q. Is there a difference between yesterday and tomorrow?

A. A difference between yesterday and tomorrow. Like, okay, so you're saying blurring -- no changes should the payment that comes out today the same tomorrow?

Q. No.
A. Maybe I'm reading too much into your question.
Q. Today is February 26, 2026; correct?
A. Okay. Right. So you're saying -- okay. X -- person X on today gets $1,000; right? The next part of you are saying -- you asked about the future. Is there a way for me, Jadine, to know if this person will still get $1,000?
Q. So let me open up the spreadsheet again.
A. Okay. So you -- let's go to that.
Q. So --
A. So this is this person --
Q. So at the outset I'll note that the very first tab here says that the data was retrieved on April 30th, 2025; correct?
A. Okay.
Q. So there's a period of months of data between this date and today that would need to be supplemented for this to be a complete record; correct?
A. Correct.
Q. Assuming that later in this case this data is supplemented to be present. If we look

at this payment data tab, this will show the list of past payments made to a particular recipient; correct?

A. Correct.

Q. And somewhere in VBA's system, there is also a schedule of payments to be issued in the future; correct?

A. Correct.

Q. My question is simply you understand the difference between those two lists of past payments and scheduled payments; correct?

A. Correct. Because, basically, it stays the same for the majority of these people. And then every December, it increases due to the COLA. So if we look at Keller -- Scott Keller, so we go down if we're going to do the past two years, if we look at 12/1/2022, the rate between November and December changed.

So they continue to receive the same payment. However, there was something that occurred October that dropped him down. I would have to look. But then it resumed back. And I think -- let's see -- so it had to change. So I would have to look in and out. But for the most part, what you're saying it is yes, but, however,

it seems like there was something that happened that caused a break, but then it went back to the normal cadence of what was going on. But for some reason between -- yeah, I would just have to look at it. I kind of understand what you're saying. But I just don't know what happened without looking at the inside of the award -- it might be on another dataset, another tab, to show what happened in with the change in percentages probably.

Q. So we'll look at some examples of that soon.

A. Okay.

Q. But for right now --

A. Okay.

Q. -- I understand you're saying there is a cadence where veterans typically receive the same benefit for 12 months; correct?

A. Uh-huh.

Q. But that there are certain things that can cause changes in that and we don't know exactly what caused the change here; correct?

A. Correct.

Q. If a veteran receives an increased award, would that cause a change?

A. Yes. An increased award would cause a change.

Q. Would the COLA adjustment cause a change?

A. Yes. COLA, yes, if it was more than a percent, yes.

Q. Would a --

A. So if it was granted -- go ahead.

Q. Sorry. Go ahead.

A. No, go ahead.

Q. Would a change in dependent status cause a change?

A. Yes. Like, if we are -- depending on -- I mean, I don't know if you want to talk about the types of changes. So, like, if you're adding a dependent, removing a dependent. But, yes, we would -- our award lines would change for anything that happened, it would cause a change whether positive or negative. But, yes, a change would occur.

Q. If the veteran passes away, would that cause a change?

A. Yes. Usually if the veteran passes away, the benefit stops. It usually is terminated once the veteran passes away.

However, if there is a surviving spouse, depending on the criteria, they may or may be awarded that benefit. It wouldn't be the same amount that a veteran receives.

Q. Are those referred to as DCI benefits?

A. DIC. Dependents indemnity compensation. And then, yeah, so I would say -- yes, DIC benefits is one type of death benefit.

Q. Thank you for the correction.

Are there other types of death benefits that it can transition to?

A. I would have to look up right quick. But I believe they have a pension that's a dollar for dollar, but I would have to look. It's administered by our pension and fiduciary service. But it would be a quick search. But I believe there should be two -- should be a pension and a DIC, but I'm not 100 percent sure right at the moment. But I do know DIC, I feel like there's a pension, but I would just have to double check.

Q. And do I understand correctly that the veteran can receive the pension while they're alive, but not the DIC benefits; correct?

A. DIC is for survivors. If a veteran has the income criteria and it is more than the disability percentage, then, yes, they can receive pension. They can't receive pension and compensation. So, usually, depending on the veteran's income, so that -- it's just income-based.

So, basically, you would want to, you know, get the disability if it's more. But sometimes in rare instances, the pension is more advantageous. So the veteran could possibly be entitled to both compensation and pension, pension just based off income and the veteran will have to elect which one, getting the higher -- you know, which one is the higher benefit.

Q. So when you say pension is based off income, do you mean that it's means-based?

A. Yes. It's an income-based benefit for veterans who have wartime service.

Q. And is that completely separate from the disability benefits?

A. It's separate from compensation. So, like I said, some veterans, in some instances, are entitled -- or they meet the criteria for

both. And at that time they would have to elect to either receive the pension or the compensation. Usually getting whichever one is most advantageous.

Q. And the compensation benefits are the ones that are based on disability ratings; correct?

A. Correct.

Q. And SMC rates also fall under compensation; correct?

A. Correct.

Q. So there's essentially two distinct categories compensation versus pension?

A. Right.

Q. And I understand they can overlap and can potentially impact each other, but they are two distinct programs; correct?

A. Correct.

Q. And the DIC benefits are also a separate benefit provided to survivors, you said?

A. Yeah, survivor's spouse. So it was a death benefit.

Q. Those are not benefits provided to the veteran directly?

A. No. So DIC -- the criteria should

be -- it's been a minute since I looked at it. But it is basically for veterans who either died in service, so sometimes before they even -- they were in the military and they passed away, someone can receive that benefit, or if they pass away from a service-connected disability.

There were some talks, I would have to look at it, but I believe that they have to at least have it for eight years, basically had that 100 percent rating for eight years. Don't quote me on it. But that should be one of the criteria. There was three criteria. But I would just have to look to refresh my memory. But basically it is only for a surviving spouse or for a veteran's spouse if the veteran was in the military and died in service.

Q. So when you referenced the criteria for duration of benefits, you started that same with there were some talks?

A. Yeah.

Q. Do you mean to --

A. I'm just trying -- yeah.

Q. Go ahead.

A. I'm just trying to think, like, I mean, it's not nothing that's public, you know.

So I'm just trying to think, like, in my mind. So I'm talking to you, I probably should have -- but I'm just thinking, like, trying to ensure that there weren't any changes. So when I say some talks, I mean I'm working through, like might have been working on something and saw something.

So in my mind, that's why I said I would have to look at it, you know, a quick snap if I had my work computer to be, like, hey, this is what it is, if that makes sense, just to make sure what I'm telling you is factual. Because it's not, like, the death benefit is administered by my staff, so it's not something that I look at all the time. So that's what I said, like, I feel like there might have been something that might have occurred and I would want to make sure before I tell you, like, hey, this is what it is.

Q. So do I understand correctly that when you say there were some talks, you're referring to previous discussions about potential changes to that requirement and that you do not recall sitting here today what the current version of the requirement is?

A. Yeah. Like, I feel like I'm

80 percent sure, but because this is not something I look up every day, I would just want to do a quick check to be, like, hey, this is the criteria.

Q. So based on the things we just talked about, you would agree that there are certain things that could cause a change in the anticipated cadence of payments; correct?

A. Like basically -- like potentially, like -- like if something were to happen with the case, so, basically, if the veteran files a claim, it may or may not change the current benefit. I think that's what you're kind of alluding to. Not that it just changes on its own, but it has to be something that happens to cause it to change. Is that what you're alluding to?

Q. Correct. I understand there would need to be a cause.

A. Okay.

Q. But there can be changes when there are causes; correct?

A. Can be changes if there are causes. Potentially, depending on what that change is.

Q. Would you agree that the pattern of

the cadence is not set in stone for future payments indefinitely into the future?

MR. KLOTZBUCHER: Objection. Form and foundation. You may answer.

THE WITNESS: Can you repeat the question?

BY MR. VANSLYKE:

Q. So you've identified that there is a cadence to the changes over time; correct?

A. Right.

Q. And that cadence is not set in stone and required to continue into the rest of the future indefinitely?

MR. KLOTZBUCHER: Objection. Foundation. You may answer.

THE WITNESS: Yeah. Without looking, like I -- like I said, like, everyone has a case by case basis. So without looking to see is I feel like -- well, I know you can't just make a generalization without knowing. I mean -- I'm trying to find the best way to put this.

But, I mean, without knowing what the changes or the cause, like, I mean, there's potentially that this benefit they

have is going to increase every 12 months. But without looking at their case, I can't tell you that. Like, to make a general blanket statement for all of them, it's just without looking at each individual case, I can't make that assessment.

BY MR. VANSLYKE:

Q. December 1st is when the annual changes occurred; correct?

A. The COLA, yes, the annual cost of living adjustment. It's effective 12/1 and --

Q. So if I --

A. Go ahead.

Q. Go ahead.

A. No, you go ahead.

Q. So if I look at Mr. Keller here at the top, if I assume that his rating stayed the same, I see the most recent payment is in April, but the cadence would suggest that his payments would continue and there would be a COLA adjustment in December 1st of 2025; correct?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer, Ms. Piper.

THE WITNESS: Right. Based off that

without knowing, you know, what is going on, you know, but potentially, it should be -- yeah, like, if it's nothing that happened, like there's nothing in the record to indicate that something was going to happen in the future, we would say that this would continue to increase every 12 months.

But who's to say that Mr. Keller didn't file something in June of 2025. Like without taking a -- like, I feel like -- well, I know that I can't just say a blanketed statement because we don't know what will occur in the future.

BY MR. VANSLYKE:

Q. So that's -- I'm just going to acknowledge that we're on the same page. That is in the future from the perspective of this dataset being produced in April of 2025, but it is in the past as of today, February 26, 2026; correct?

A. Can you repeat that?

Q. I just -- I'm trying to avoid confusion on the record. Sorry, excuse me. One second.

Okay. I'll try again. So I'm just trying to avoid confusion on the record that when we're referring to that potential cost of living adjustment in December 1st of 2025, the only reason that that is hypothetical is because we do not have the rest of this data from April of last year until today; correct?

MR. KLOTZBUCHER: Objection. Foundation. You may answer.

THE WITNESS: Yes, I would say barring no changes in what he has going on based off this small dataset, if -- you know, if there's nothing in the file that indicate a change, if it's continuing the same cadence with no changes, it's possible that in December of 2025 he should have received the cost of living adjustment.

BY MR. VANSLYKE:

Q. I think I'm --

A. To increase the benefit, yes.

Q. Go ahead. I think I'm overcomplicating my question again. My point is only that today, February 26 of 2026, if asked to, the VBA could identify whether Mr. Keller

did, in fact, receive a cost of living adjustment in December of 2025; correct?

A. Yes. There will be a way for us to look and see that.

Q. But then if we look ahead to December 1st of 2026, that is actually in the future and has not occurred yet; correct?

A. Right. So basically this -- on the award letter, basically, if there was a proposed future action, it would have been in the veterans' last letter that -- the correspondence that they received from VA. So if that letter did not indicate some kind of term date, then we would assume, only assume because we don't know what has happened or transpired without looking at it that it should have followed the same cadence unless indicated on that letter some future date. But the veteran should know at the time of decision or at the time of whatever happens whether or not there will be some form of change in the future besides submitting a claim and getting a new letter indicating that.

But if we were to look, like, based off this, the veteran's last letter showed that maybe effective April -- like, I don't even know

how long this award line goes, but if there was nothing indicating a future date of change in benefits, then we would assume that it would continue, in every December there should be a cost of living adjustment increasing the payment.

Q. So what I hear you saying is that that is the general expectation, but sitting here today, you would not promise me that that's what will happen in December of 2026; correct?

A. Without knowing what's going on, I wouldn't -- to me, I wouldn't think that would be fair to make that assessment without knowing what's going on.

Q. And by what's going on, are you including you would need to know what happens between today and December of 2026?

A. No. I would say whatever that last rating decision indicated. Like I don't know what is in the veteran's file to indicate if there's some -- if something in the file indicated that there were -- that there is a potential future change. But the veteran will always know unless it's something that's outside of that. But if it's just pertaining to the current rating status, we notify the veteran in

that rating if there's going to be some type of future action. If that's not indicated, there's a highly probable chance that it will stay the same, but without knowing or looking at that at least that last rating decision. I don't know -- or I wouldn't -- it wouldn't be fair to make an assessment to say, yes, this will always stay the same. But that last rating decision, if it did not indicate any future actions, it's very -- it's highly probable that it should stay the same with no increase unless the veteran comes in and requests something.

Q. So what I hear is that, not counting the COLA adjustment, it will stay the same unless something changes, like, for example, the veteran coming in and filing another claim; correct?

A. Right. Which could potentially change what the current state is.

Q. And you would agree that if the veteran passes away, that would also change the current state?

A. Yes, because once that veteran passes away that benefit terminates.

Q. So is it fair to say that we do not know whether there will be a COLA adjustment in

December until we know whether or not the veteran lives to December?

A. Well, we put it in there -- like, I don't think we -- it's just -- so the -- every year, the -- it has to be passed in law, the COLA. So right now, every year, we would have to notify the veteran because it's not like a standard thing. It usually happens, but we still have to notify the veteran because it's not -- because the law has to pass every year. It's not like a standing COLA that has to happen. It has to pass in law every year. But barring that -- and I almost have to go back to your original question again.

But, basically, barring us not notifying the veteran, that benefit will still stay the same. So say the veteran does not get COLA for 2026, if there's been no change in future action, we know continual will still be $4,044 until we notify the veteran again.

So if there's no future action --

Q. And --

A. Yeah. If there's no future action, no new claim and there was no law that passed COLA, we can say it's highly likely that it will

still be $4,044.91 until we notify the veteran again.

Q. And that would not continue beyond the veteran's death, you said; correct?

A. Right. When the veteran passes away, that benefit terminates. So we're not paying -- like who would we be paying if the veteran passes away. So this is due to the veteran's service-connected disability. So that's the intent of the benefit is for the veteran as a result of service-connected benefits.

So the veteran passes away, then that entitlement goes away because that benefit was intended for the veteran. Now, if the spouse meets whatever -- the criteria that we have set, then the spouse can possibly obtain it, but it's not the same amount in which the veteran receives.

Q. And as you said earlier, it is not the same benefit being provided; correct?

A. Right.

Q. Okay. So when you refer to needing to see the latest rating decision, are you referring to the correspondence provided with the latest rating decision or do you believe that

information would be in another tab here on this spreadsheet?

A. Yeah, I would -- I mean me -- I would look at the correspondence. But it could be in here. But I don't look at this all the time. I think if I would have time to sit here and look at it, I'm sure I would be able to figure it out. But the easiest thing in what we would normally do in these cases, if someone would have come and asked for this inquiry, we wouldn't be looking at this spreadsheet. We'd be actually be looking in the record because that way you can get a full assessment of everything that's in the veteran's record, not a snapshot of what's in this. Because this is only -- this is only as good as the last person that put this information in there. However, sometimes when you look at the file, you're able to find more information. So this spreadsheet is not -- it's not the best way to assess what you're asking. Yes, it may help, but this spreadsheet I would -- I feel like you can potentially miss things when you don't look at the whole file. And so we were always taught in VA to every time you look at the claim, you start from the bottom up, so you can get the full

snapshot of everything that's occurred, not just bits and pieces because you could miss something.

Q. And is that partially due to retroactive changes?

A. No. I guess I wouldn't think that has anything to do with retroactive changes. We were just always told before you make an assessment in VA and in our training is that you should always look at the entire C file, the veteran file -- or C file mean claim file, is because you can miss something just by looking at one thing, taking it for face value.

So we were always taught, like, if you want to answer an inquiry, then you need to look in the file so you can make a determination for yourself. So, normally, what you're asking is like a form of inquiry. It's not proper to just look at the snapshot in time to give a full assessment without taking time to look in the claim file.

Q. So do I understand correctly you are saying that if I wanted an assessment of what will happen with a particular veteran's benefits in the future, the correct way to do that is to have the VA conduct an inquiry?

A. Well, what I'm saying is, I mean, these are rare questions that people would ask. But what I'm saying is if someone were to ask me that, like what you're saying, I know that I can look at least at the current claim file to get a snapshot to give you -- or advise you in the best thing. So, usually, like, veterans would come in, we had to be careful because you can't just say all blanketed yes or no or maybe so. But we would be able to at least take a full assessment to advise you on what is proper or what the next steps are. And I just know that it's not proper just to look at a spreadsheet or just to look at a hypothetical situation and to make an assumption for everything.

So what I am saying -- or the best way for me to say it is that until I know what is going on with each and every case, I just feel like it's just improper just to make a full blanket assessment.

Q. When you refer to looking at the entire claim file, are you referring to the current status of data entered in VBMS or are you referring to the total history of correspondence documents?

A. The total history of correspondence documents, which is found in VBMS. But it's in a document tab, not like the award tab. Because I think because this is like award lines. But this is -- I'm just talking about me because what you're asking is about information that should be found -- like, to me it would be more medical, not payment.

Q. So you're distinguishing between data entered directly in VBMS versus documents uploaded to VBMS; correct?

A. Yeah. Because I guess I got to understand your take on data. Are you just talking about award lines, like, when we want to look at payments. I am talking about documents, like, the veteran filed the claim. Like, I should be able to look at the claim, the 526, all the veterans VA exams. But I wouldn't have to go that far. I can at least look at the last one.

What I'm saying is normally the last rating decision, the last notification letter, the last bit of evidence is what we are going on because we're looking at the current history. Like, if we're just talking about future, we're looking at the veterans current rating decision,

what it says. And from there, that will make me know if I need to go even further to look at the beginning. But what I'm saying is just the last rating decision, it would indicate if there are future actions that may or may not change that information is all I'm trying to say or the best way I'm trying to say it.

Q. So if you look at a particular veteran in VBMS, am I correct that without opening a separate document that is contained within VBMS, there is somewhere within the VBMS platform itself where you can see, for example, what that veteran's current combined rating is?

A. Yes. But that's -- yes.

Q. So that's an example of what I'm referring to as --

A. The data.

Q. -- data in VBMS as opposed to in a document uploaded into VBMS, is that distinction clear?

A. Yes. I understand what you're saying.

Q. And I just want to clarify that you're saying you would look at the most recent correspondence document, not the current data

that should reflect the most recent decision made; correct?

A. Yeah. Because that's how we know if something's wrong too. Because sometimes we have what's called clear unmistakable error. So if someone's telling me to look at it for a fresh lens, a fresh lens is not looking at what's in the data because that's not telling me anything. That's what someone else did.

But if you want me to make an assessment with a fresh lens, then I need to see the documents, because if I come up with something different, then there could be a potential -- something what we call a clear and unmistakable error. So that's why if you're -- so it depends on what you want to know. If what you're saying is we're just looking at the veteran's current state. But if you're saying, like, hey, something could have been wrong, then that's where my interpretation comes in looking at the entire file for a new look. So it depends on what you're requesting.

So if we're just requesting what's the best for its current state, what you said first, the data, that's fine. But if you're

asking for, like, a separate analysis or a new look, then that's where what I was talking about, like a fresh lens or a clean file review or something like that would be more feasible.

Q. And am I understanding you are testifying that if you could look at that claim file, you believe you would be able to give a more clear answer on whether there would be changes to a veteran's benefits in the future; correct?

A. Correct.

MR. KLOTZBUCHER: Objection. Foundation.

BY MR. VANSLYKE:

Q. And I think one example that you gave is that you would be able to see whether a particular rating had a scheduled end date; correct?

A. Correct.

Q. Are there other examples of features you would look for that would impact those future projections?

A. No, I think that would be enough.

Q. And you stated that if the veteran filed a new claim, that could be another thing

that could cause a change; correct?
A. Potentially.
Q. And that if there was a change like that, it could change the amount that is provided to the veteran in the future; correct?
A. Potentially, depending on what it what it showed. Like, that's what I'm saying. Like it's no blanket statement. So usually -- like, so -- and this it's kind of you're asking, like, is it a positive change or negative change. So what type of change do you want -- do you want to talk about?
Q. I think either are possible; correct?
A. Right. It's possible.
Q. So I am including both in my questions that it can increase or it can decrease based on changes, such as new applications; correct?
A. Potentially, yes.
Q. And in contrast to the past payments reflected here, those future projected payments have not yet been provided to the plaintiff; correct?
MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: Right because future changes, like I said, like if there -- they just keep the same rate. So the veteran -- like, in this instance, like, if there's no future proposed action, we can only go to 12/1. And that is just because COLA has to pass in law every year. But if there's been no rating decisions, no indication of future actions, nothing else that comes in, it is likely that it will increase. But if there's been no change in COLA, you -- at a minimum, we know this veteran will get $4,044.91.

BY MR. VANSLYKE:

Q. So you're saying it's likely that those amounts would be provided to the veteran, but they have not yet been; correct?

MR. KLOTZBUCHER: Objection. I'm going to put a continuing objection on the record based on the spreadsheet. She doesn't have foundation to answer these questions. So objection, foundation.

You may answer, Ms. Piper.

THE WITNESS: Can you restate --

restate the question?

BY MR. VANSLYKE:

Q. So just to recap, I believe you agreed that you recognized that the payments here have already been paid to the plaintiff in the past; correct?

A. Correct.

Q. And we recognize that there is an inherent distinction between a payment already provided to the plaintiff and payments in 2027 that have not yet been provided to the plaintiff; correct?

A. We wouldn't -- like, based off this person, if I were to look at when you received the dataset, we would have -- the last award line would have had a 12/1/2024. And that is because COLA for the 12/1/2025, we did not input that into the system until December of 2025 or the 2026 year.

So what I'm saying is because every year for COLA to occur, it has to happen in law. We're not going to go that far. So what you're saying, 2027, I know that's not feasible is because every year we have to do it. So you're -- what you're saying is we wouldn't go

that far. So based on -- yeah.

Q. Go ahead.

A. So if I were to look at this data subset for 4/30/2025, what I know is if there were nothing that occurred, I know that the last letter that the veteran received had to be sometime in December of 2024 to discuss what will occur in 2025. What I'm saying is we're not going to go too far in the future is because COLA at a minimum, if there were no -- ever no more rating decisions, never any more claims, every year we have to notify the veteran because it's not -- because a law has to pass for it to occur.

So what I'm saying is, say, COLA did not take place for 2026 year, we know the last thing we should see is in December of 2024. We notified the veteran that they were entitled to receive $4,044.91. So, hypothetically, if nothing ever were to occur, we know that that last letter the veteran should have should be December 1 of 2024, and it will not -- unless COLA passes again, that letter would have stayed the same. That's what I do know barring there were no more rating decisions, no more changes, or anything like that. So that's what I'm

saying.

But you give the example of 2027 and what I'm saying is we would never -- until -- unless there's a change where COLA doesn't have to be in law, but right now COLA has to be in law. So what I'm telling you is we would never project that far out, and that's just because we have to see what happens every year. So COLA is only good for that particular year.

Q. Okay. Thank you. I will stop sharing.

All right. I'm going to go back to Exhibit 7. This is the Camp Lejeune Justice Act. You can see it runs for about a page and a half.

Would you like a moment to briefly review this before I ask you anything about it?

A. Sure.

Q. Let me know when you would like me to scroll.

A. Okay. Okay. Okay.

Q. And the last section here.

A. Okay.

Q. Okay. So you have just read the Camp Lejeune Justice Act; correct?

A. Correct.

Q. And do you see in this section it refers to health and disability benefits relating to water exposure?

A. Yes, I see that.

Q. Do you see in Section B here it says in connection with health care or a disability relating to exposure to the water at Camp Lejeune?

A. Correct.

Q. Do you understand that some veterans receive VBA disability benefits related to Camp Lejeune?

A. Yes.

Q. And do you understand that this language here is distinguishing between benefits related to Camp Lejeune and benefits not related to Camp Lejeune?

A. Okay. Restate your question. Can I --

Q. Just in general, you understand that this is referring to two separate categories, one category being health care or disability relating to exposure to the water at Camp Lejeune, and the other category would be anything that is not relating to the exposure to the water at Camp

Lejeune; correct?

A. Where is it not -- maybe I'm missing something.

Q. If I understand -- if I make a statement that I will go to the store and I will buy apples but only green apples, do you understand that that excludes apples that are not green?

A. I might need a -- five minutes.

Q. Of a break? Is that what you mean?

A. Yeah, I need a break. Yeah.

Q. Okay. Let's go off the record.

A. Thank you.

THE VIDEOGRAPHER: We're going to go off the record at 12:20 p.m.

(Recess taken from 12:20 p.m. until 12:26 p.m.)

THE VIDEOGRAPHER: We're back on the record at 12:26 p.m.

BY MR. VANSLYKE:

Q. Okay. I'll put the document back up. So we were looking at this language here; correct?

A. Uh-huh.

Q. And do you understand that this language is referring specifically to health care

for a disability relating to exposure to the water at Camp Lejeune?

A. Yes.

Q. And do you understand that to be different than health care or a disability not relating to exposure to the water at Camp Lejeune?

A. Yes. That's two different things it's saying related to exposure.

Q. Okay. That's all. I will stop sharing that one. I am placing another document in chat that I will mark as Exhibit 11.

(Exhibit 11 marked for identification.)

BY MR. VANSLYKE:

Q. Okay. I am sharing my screen. Ms. Piper, can you see here that this says expert report of Tricia M. Yount, CPA, MAFF, economic damages; correct?

A. Yes.

Q. And below that you can see this refers to David Downs; correct?

A. Correct.

Q. At the bottom you see that it's dated December 15, 2025; correct?

A. Correct.

Q. And earlier you stated you had not reviewed any of the expert reports produced in this litigation. So I'm assuming you have not reviewed this particular report; correct?

A. Right.

Q. So I'm going to scroll down. And on page 2 here, you see there's a section referring to Veterans Benefits Administration compensation; correct?

A. Right.

Q. And if I start reading in that section, it says, "Mr. Downs is currently receiving disability compensation benefits through the U.S. Department of Veterans Affairs, Veterans Benefits Administration, VBA. He began receiving benefits related to Camp Lejeune on April 1, 2017. VBA benefits are based on Mr. Downs combined disability rating assigned by the VBA for various diagnoses. Using VBA's disability ratings tables, I have calculated Mr. Downs' benefits due to increased disability ratings related to Camp Lejeune compared to what he would have received without these ratings. Mr. Downs calculated additional benefits through

December 31st, 2025, are $89,449," and it cites to Table 1; correct?

A. That's what it says, yes.

Q. And I'll note that there's a footnote here after disability ratings related to Camp Lejeune. And if I come down here, it says, "VBA disability ratings related to Camp Lejeune are based on an expert opinion report prepared by Wang Ji, M.D., dated December 15, 2025. For Mr. Downs, those conditions are 7500, renal cell carcinoma." Is that correct?

A. That's what -- correct.

Q. Do you understand this footnote as saying that for purposes of this report, the only rating that is being treated as related to Camp Lejeune is this rating, 7500, renal cell carcinoma?

MR. KLOTZBUCHER: Objection. Form. Foundation. You may answer.

THE WITNESS: From there, that's what it appears to be saying.

BY MR. VANSLYKE:

Q. Okay. I'll come back up here. So we have this citation to Table 1. If I scroll down, we see Table 1 here; correct?

A. Yes, that's Table 1.
Q. And you see this appears to be referring to veterans benefits administration payments from government; correct?
A. Yes.
Q. And you see that it says, "VA benefits with CLJA and VA benefits without CLJA"; correct?
A. Correct.
Q. And the next column says, "Excess benefits for CLJA"; correct?
A. Correct.
Q. Okay. So I'll scroll back up. And the following paragraph after where I stopped reading says, "Mr. Downs current benefit is $1,759.19 per month due to his current disability rating which includes Camp Lejeune related diagnoses. Had Mr. Downs not received Camp Lejeune related disability ratings, he would currently be receiving monthly benefits of $774.16. The variance of $985.03 reflects the disability benefit received relating to Camp Lejeune and is the monthly offset amount. Mr. Downs' total additional benefits related to Camp Lejeune for 2025 are expected to be

$11,820," and a citation to Table 2; correct?

A. Correct.

Q. When you read this description describing the current benefit and the benefit that he would receive if he had not received the Camp Lejeune related disability ratings and then the variance between the two, do you understand the math that she's applying here?

A. Yeah. So basically she's saying the VA disability is the $774 per month. And then he's getting an additional benefits of $985.03, and they combined those to $1,759.19.

Q. And this variance that reflects the disability benefit received relating to Camp Lejeune, do you understand that to be referring to this same rating that we looked at in footnote 2, the 7500 renal cell carcinoma?

MR. KLOTZBUCHER: Objection. Foundation. Form.

You may answer.

THE WITNESS: Yeah. But I would have to just confirm it with the current VA rate table. Like, what did they say his total disability percentage was? They just gave the monthly amount.

BY MR. VANSLYKE:

Q. I believe that's in Table 2. So let me scroll down there so you can look at it.

A. Yeah, I don't have -- I'm not on my -- I'm on my personal laptop. I don't have any VA information to check it with. Okay. So they say --

Q. So if we assume that the data she entered here is correct, do you understand the calculation that she's applying?

MR. KLOTZBUCHER: Objection. Form and foundation. Presumably these are questions for the author of the report.

THE WITNESS: Yeah, I don't -- I mean, I would have to look at it. Like, I mean, I don't know without the rate tables. I mean, I can see the math or whatever like that. But I'm not sure what table do I need to answer in regards to this.

BY MR. VANSLYKE:

Q. I will ask you to only try to answer the question that I am presenting.

A. Okay. Just based off looking at the information from this document?

Q. If you look at this table -- go ahead.

A. Right. So basically you want me to do -- like, I mean, I don't have anything. So I don't know if I need to verify the math. Like, I -- that's what I'm saying. I'm not trying to be funny, but I'm just trying to get at, like, am I just making the sure the math was right that they did? Like, I'm not sure what you're asking me to do with this.

Q. I'm -- I'm not asking you to verify the math. I'm only asking if you understand the logic of the calculation that she's applying?

A. I mean, it would just take --

MR. KLOTZBUCHER: Objection. Form.

THE WITNESS: Yeah, I just feel like the amount of time -- what you're asking, I would have to sit down. I'm sure I'd be able to figure it out. But when you're just scrolling and going through this, I'm just trying to put it all together in the time frame in which I have to look at these materials. So it's not like I had these materials ahead of time. So I'm just trying to put it all together. So

I'm not trying to be difficult.

I'm really trying to figure out what am I supposed to do. Should I do a separate screen and put the math -- like, I'm just trying to figure out. Am I just saying, yes, like, hey, this says Table 2, yes, this says Table 2. Like, I'm just trying to understand what do you want me to do with this information in this short period of time, and I haven't had it.

BY MR. VANSLYKE:

Q. And I'm happy to clarify my questions as needed. So I will go back to the text of the report. And this paragraph explaining the current benefit, the benefit that would be received -- or, I'm sorry, the benefit that would not be received from the Camp Lejeune related disability ratings -- I'm sorry, let me rephrase.

We looked at this paragraph earlier and you indicated that you understood what this paragraph was saying; correct?

A. Right.

Q. And it indicates that his current benefit is $1,759.19; correct?

A. Correct.

Q. And it indicates that if he did not receive the Camp Lejeune related disability ratings, he would currently be receiving $774.16; correct?

A. Correct.

Q. And it says the difference between those two numbers or the variants is $985.03; correct?

A. Right.

Q. And here where it refers to the Camp Lejeune related disability ratings, we looked at footnote 2. And it appears that footnote 2 indicates that the VBA disability ratings related to Camp Lejeune are -- I'm skipping the rest of that sentence to "are 7500 renal cell carcinoma"; correct?

MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: Yes, that's what it says.

BY MR. VANSLYKE:

Q. So if this renal cell carcinoma is what is being identified as related to Camp Lejeune and then we look back at this second paragraph when it says "Camp Lejeune related

disability ratings," do you understand those to be referring to the same thing?

MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: So they're saying that Camp Lejeune disability ratings is for his -- and go back down to the document. This is just trying to put it all together.

Okay. So they're saying his Camp Lejeune disability rating. And they've said -- okay. So saying that it's renal cell carcinoma. Okay. Yes, I understand that those two words mean the same thing.

BY MR. VANSLYKE:

Q. So with that understanding, if we read this sentence, "Had Mr. Downs not received Camp Lejeune disability ratings, he would be currently be receiving monthly benefits of $774.16," do you understand that to say that if he had not received disability ratings for his renal cell carcinoma, he would be receiving monthly benefits of $774.16; correct?

MR. KLOTZBUCHER: Objection. Foundation and form.

THE WITNESS: Yeah. I guess based off that not seeing the rate tables to verify, like I'm just not -- I don't have anything to bounce it off. So if we're just looking at this and I'm just going with this hypothetical with no checks and balance, yes. But I just -- it just makes sense for me to have the full picture without this document. But if we're just going with this scenario barring they don't have anything that I can't see, the answer is yes.

BY MR. VANSLYKE:

Q. Well, like you said, I don't think we have time today for me to ask you to recalculate all of this math, and I am not asking you to validate the dollar values here. I'm just confirming that that is your understanding of what's being stated in this report; correct?

MR. KLOTZBUCHER: Objection. Form and foundation. You may answer.

THE WITNESS: Yes.

BY MR. VANSLYKE:

Q. Okay. So if I scroll back down here to Table 2, this no CLJA column under the

Row 2025, do you see the $774.16?

A. Yes, I see that number.

Q. And that's the same number referenced here as what he would be receiving if he had not received the Camp Lejeune related disability ratings; correct?

MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: That's what it appears to show.

BY MR. VANSLYKE:

Q. And if I look at this table, do you understand that what this expert is doing is taking the total benefit received, subtracting the amount that he would receive without the Camp Lejeune disability rating to identify the difference between those two numbers; correct?

MR. KLOTZBUCHER: Objection to foundation.

THE WITNESS: Okay. So they're saying the both benefits is 1,759, the offset amount and then they're just saying $985 per month is the difference, and then they multiply it by 12.

BY MR. VANSLYKE:

Q. Is that what you see here?
A. Without having a pen, paper, calculator, time to do math --
Q. Sure.
A. -- it's close, you know. Yeah.
Q. And, again, I'm not asking you to check the math. I'm only asking if that's what you understand to be represented here?
A. Yes. I'm just a person that likes to confirm things. So it's just kind of like --
Q. Sure.
A. I'm just -- just going with the flow here.
Q. So I will stop sharing this for now and I will go back to the offset -- I'm sorry, excuse me, to the CLJA language. And earlier we looked at this language and recognized that there is a distinction between disability relating to exposure to the water at Camp Lejeune and a disability that is not relating to exposure to the water at Camp Lejeune; correct?
A. Correct.
Q. In general, without validating any of the numbers themselves, do you believe that the approach taken by Ms. Yount in that report where

she identifies the total value received, the value that would be received absent the Camp Lejeune related disability and identifying the difference between those two numbers, do you agree that finding that difference is a reasonable way to identify the amount related to the disability relating to the exposure to the water at the Camp Lejeune?

MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: I mean is -- so did -- is there a consistent way of doing this or is everyone doing it different for each claimant trying to come up with the -- are we just looking at her one interpretation or are there multiple interpretations on how to do this offset piece? Because it was just referring to one of the claimants, but what I'm saying is this is their consistent way or they -- everyone doing the same thing. So you have like different diagrams or the same diagram for each of the veterans that you have?

BY MR. VANSLYKE:

Q. So I cannot testify to the

consistency across reports. I am only providing you with one example and my question is whether you agree with the general process being applied assuming the numbers are correct or whether you would approach this a different way?

A. I'm not --

MR. KLOTZBUCHER: Objection. Form and foundation.

You may answer. Sorry to talk over you.

THE WITNESS: Yeah, I mean, I see what they're doing, but I don't feel like I'm the best person to discuss the whole offset portion without knowing, like, the criteria that's set and if it's consistent. Like, I mean, I don't even -- I'm just looking at the document. So I'm just trying to see what am I supposed to say about it.

Like -- because, I mean, I just feel like it -- whatever is decided, it should be the same for everybody, to have one consistent practice. But what I'm saying is what is needed from me to know like, okay, I know how to do math. I understand

what the person did. But are we trying to apply something just for one of the claimants or everybody, and why do I need to weigh in on this piece here. Like, what does that have to do with -- why do I need to weigh in on this.

BY MR. VANSLYKE:

Q. Give me one moment. Okay. I'm going to share Exhibit 5. So this is the disclosure that identifies you as an expert on behalf of the United States; correct?

A. Yes.

Q. And in this disclosure, I see bullet B states that disability compensation benefits are made to veterans with service-connected conditions. Service-connected conditions are those illnesses or injuries VA has determined were caused or exacerbated by active military service; correct?

A. Correct.

Q. For some conditions, VA is directed by law or regulation to presume that military service caused the conditions without the need for the veteran to prove that his or her service caused the condition; correct?

A. Right. Not to interrupt you, but my question wasn't that I'm asking what am I weighing in on. The math -- is the math done right? Like, what am I weighing on? Like, okay, are they doing this formula right? Are they applying it properly?

So it's not that I'm not able to weigh in. I'm just trying to figure out what the whole portion of this diagram, what are you trying to ask me to weigh in on? Whether or not it's consistent? I feel like if you -- if you had shown me all of the documents for all of the veterans doing the same thing, but you're asking me about one veteran, one person who did this offset math.

So I am just Jadine asking, not -- you don't have to go through that. I'm just asking what question or what are you asking for me just to get a consensus that, hey, what she did seems logically sound or is there another way to do it. Like, I guess I'm just trying to ask as it pertains to the other diagram, not this, what do you want me to weigh in on because, to me, I should be able to look at multiple documents for the same person saying the same

thing had been like, okay, I assume like this is consistent, all this something seems reasonable to apply, but you just asked me about one person with no -- in my mind. So I'm just going back -- I want to go back to the document just to see what am I weighing in on when it's not something that I can see for everybody.

So I just felt like it wasn't a consistent practice. If we're talking about something that we're looking at all claimants, I think we should have had that same diagram and went through it to discuss. So that's all I was saying. Not like, okay -- because I feel like I'm able to -- if I understand what the question is asking, I'm just trying to figure out what am I supposed to be doing with this document?

Is it just something where I'm saying, like, oh it seems like this person did math, but I put it in my head, it seems like 1,700 something dollars adds up okay. So I guess that's what I'm just trying to put in, like, what am I supposed to do with the document and is it something that I'm supposed to be weighing in on for everybody or just this one particular example.

Q. I understand. I will reiterate that I'm not asking you to validate math or particular values. I am also not asking you to validate consistency.

To help illustrate what I am asking, I will go back to Exhibit 8, the spreadsheet of VBA data. So if I look at the payment data and I see April 21st, 2025, Mr. Keller received a payment in the amount of $4,044.91; correct?

A. That's what it says.

Q. And in the award line data tab, if I look at the award authorization date of November 30, 2024, from Mr. Keller, I see an award for a monthly amount of $4,044.91; correct?

A. That's what it says.

Q. And I can scroll down to Mr. Downs, who we were looking at the report for. So I see January 22nd, 2025, he receives an award for a monthly gross amount of $1,759.19; correct?

A. That's what it says.

Q. And in the payment data, I will filter this to Mr. Downs because there's many entries. So if I look at Mr. Downs, on April 21st, 2025, there was a payment transferred in the amount of $1,759.19; correct?

A. That's what it says.

Q. Am I correct that none of these numbers distinguish between how much of those amounts are related to Camp Lejeune versus what portion of the amount is not related to Camp Lejeune; correct?

MR. KLOTZBUCHER: Objection. Form and foundation. You may answer.

THE WITNESS: Yeah. Like I don't -- I don't know the back end. I mean, I just see the amounts. I saw the document. But I'm not an administer of the program, so I don't know how it's paid. So on the spreadsheet, I just don't have an entire picture. And not saying I can't figure it out. I just feel like I don't have all the pieces in the puzzle to give you the analysis that you're asking for as it pertains to whether it's related to Camp Lejeune.

I would have to go back to the words in the law in that section that you showed me, either health care or disability, I can't remember off the top of my head. I am trying to -- in this small snapshot of

time, trying to put everything together not knowing, like, okay, I saw what they said is that his rating was 700 and something dollars. I don't know what his percentages -- like, I'm really just trying to put it all together. But I'm not fully following what am I validating or just saying yes to. Like, I see these numbers, yes, yes, yes. But I'm just trying to put it together -- like, I just feel like I'm just missing a few pieces to the puzzle, sir. As it pertains to this -- I'm just trying to make sure I'm giving you what you need.

But I just feel like I'm just blind to some things that's missing. And maybe, like I said, it's just a time frame in which we have where I'm not able to make a full assessment of everything not knowing every single document. I'm not sure if it's uncommon or common for me not to have gotten these materials in enough time to validate to assess.

I mean, I guess this may be normal, but I'm just not fully understanding if

I'm -- you're saying I'm not doing the math, I'm not doing any validation, I'm just saying this seems logical, but I don't have the full pieces to the puzzle to know if it's fully logical. So that's what -- I'm just really trying to be helpful, but I just feel like I'm missing some things.

BY MR. VANSLYKE:

Q. I understand. And I think in trying to be helpful, you are trying to answer more than I'm asking. I'm going to ask you to please focus on the questions I'm presenting you with and only answer those if you can. And if I want to know more about it, I will ask you more about it. Okay? Do you understand?

A. I understand. I hear you.

Q. So do you agree that looking at this amount shown in the table right now, it does not identify how much of that $1,759.19 was provided to Mr. Downs related to Camp Lejeune versus how much was provided on other bases; correct?

MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: I don't see -- if I'm

just saying yes, I don't see a separate award line. So I show in the previous diagram it was broken down with the 700, the 900, the difference. But this is just a total amount with no distinction of 1 and 2.

So are you saying, like, yes, there's no distinction that there should be a separate award line or that's not for me to know. I'm just seeing what I see here which is just one total with no description of what it's for.

BY MR. VANSLYKE:

Q. I am not asking you whether you believe there should be a separate award line. But it sounds like you agree that as presented here, there is only one total without the distinction between benefits related to Camp Lejeune and benefits not related to Camp Lejeune; right?

MR. KLOTZBUCHER: Objection. Foundation. You may answer.

THE WITNESS: Yeah, what I see is just the award type, and it just shows compensation and it just has one amount.

Without seeing the document you had previous, I would have just said this veteran receives 1,759.19 per year without knowing why. I just know it's for compensation and pension and he's alive.

BY MR. VANSLYKE:

Q. Do you understand that to be per year or per month?

A. This is per month.

Q. Okay.

A. This is one month.

Q. And then on the award line data for Mr. Downs here, do you agree that you see the same thing, there is a gross amount and there is no distinction between an amount related to Camp Lejeune versus amounts not related to Camp Lejeune; correct?

MR. KLOTZBUCHER: Objection. Foundation. You may answer.

THE WITNESS: Yeah, I mean, it's just the same thing. Just the one amount with no -- it just does not give descriptions of what it's for.

BY MR. VANSLYKE:

Q. And if I go back to Exhibit 11, the

report from Ms. Yount, in this paragraph, she identifies that same amount, $1,759.19; correct?

MR. KLOTZBUCHER: Objection to foundation.

THE WITNESS: That's what this document says. I have a question separate to this. Do you know -- because, I mean, I'm not familiar with how this is paid or anything like that. But do you know when the veteran receives the information from VA, is it just the total $1,759 or is there a document that the veteran receives that tells what she had or this is why you did it because he didn't have this information?

BY MR. VANSLYKE:

Q. Are you indicating that VA correspondence would sometimes delineate --

A. No. Okay. So this -- I thought you were showing me this because when we look at the information or the data provided by VA, it did not show a distinction. So I thought the whole purpose of Exhibit 11 was to show how she broke it down for us to maybe do some type of process improvement for these veterans where they know

where they received their money from. But what I'm asking is, is there an avenue outside of VA, like, I don't even know the administration of the program. Like, that's what I'm saying, I don't -- I'm not -- I'm not knowledgeable on how this Camp Lejeune Justice Act is paid. I just read what you provided and I see the offsets.

So, me, Jadine, I'm trying to do this quick analysis. But what I'm saying is, is there a separate place where the veteran receives correspondence separate from VA that tells them where they receive this money or is it all from VA, and what you're saying is that there needs to be some form or some type of mechanism to tell the difference from the two benefits?

Q. I don't think I can offer testimony to answer your questions. But --

A. Okay.

Q. -- I will ask in this paragraph, do you agree that there is no indication that there is an external source confirming the dollar amount attributed to the Camp Lejeune related disability ratings versus the other disability ratings?

MR. KLOTZBUCHER: Objection to

foundation. You may answer.

THE WITNESS: From what I could see -- but, again, I just have the small snapshot, not the full details. So just based off this spreadsheet that I have and this document you have, that's all I can go by. And I don't have much to go by. And I don't have any answers to my questions.

So from what you said and what you show is just -- just $1,759 total for the current benefit is what it shows.

BY MR. VANSLYKE:

Q. So I'm going to hold on to this number, the current benefit of 1,759.19, and then if I come back to this language that identifies disability rating or I'm sorry -- disability relating to exposure to the water at Camp Lejeune, if I were to ask you how much of that total award that we were looking at is relating to exposure to the water at Camp Lejeune, could you answer that question?

MR. KLOTZBUCHER: Objection. Foundation. You may answer.

THE WITNESS: No. No, I don't have

all the information to answer the question.

BY MR. VANSLYKE:

Q. What information would you need to answer that question?

A. Like, I would need to see what's -- like the entire file -- like, I don't know what those numbers are, like, how it adds up or -- I just have -- what this -- these words say, I just don't have a full case to just be, like, yes. It's just, like -- it's just a few pieces missing that would help me give you what you need. But I just feel like I don't have what I need. I'm just putting small pieces of what you show me, your snapshots, and you're just want me to say yes without having a full scope of what's going on.

So I see the numbers correspond. I just don't have any descriptions and I don't have anything to bounce the descriptions off to say yes. So I -- I guess I'm just -- like you said, I don't -- I'm not -- you just want me to answer what you want me to answer. But I just feel like there's some things missing to put it all together.

Q. So I'm back on Exhibit 11 and I'm scrolling down to Table 3. Does this look like it would help you answer that question?

A. Right. It's no disabilities. It's just award lines. So this is kind of what we were talking about earlier. So this -- it just shows that he's been receiving these payments, he's at 70 percent in that there are no changes. So if there were no changes, then every year you'll get a COLA at 70 percent, but it still is not like -- it just says combined rating. So I don't know if he only has one thing he's service connected for.

Q. I can help answer that question for you. So we'll come back to this spreadsheet from the VBA. I will go to the ratings data tab and I will filter to Mr. Downs. Do you see the 7500 under diagnostic type code for renal cancer status post right kidney removal in Column H?

A. Yes.

Q. Do you see that information?

A. Yeah. So it's saying that's 60 percent and then all the rest of them combined up and he has overall of 70.

Q. And do you understand this 7500 for

renal cancer to be the same 7500 for renal cancer that was referenced in footnote 2 of the report?

MR. KLOTZBUCHER: Objection. Form and foundation.

THE WITNESS: Yeah, I would have to, you know, bounce it off again. Like I said, I don't work in the area all the time, but if I were to validate and it all lines up, I can understand what you're saying.

So now that we see that he's 60 percent for the renal kidney cancer, are you-all saying -- I guess, it's not for me to put together. I guess, that's what I'm saying, like, what am I supposed to be answering? Just saying yes, yes, I see what you're saying. But I don't need to form any conclusion. That's your job, I think, to form the conclusions based off my responses.

BY MR. VANSLYKE:

Q. Let's start there. I'll start by asking you if you agree that information is there and then I will let you know if I'm asking for your opinion. Okay?

A. Okay.

Q. Okay. So we see here the 7500 for renal cancer status post right kidney removal; correct?

A. Right. That's what it shows.

Q. Okay. And then if I go back to the report and I go back to footnote 2 that we were looking at earlier, it says, "VBA disability ratings related to Camp Lejeune are based on an expert opinion report prepared by Wang Ji, M.D., dated December 15, 2025. For Mr. Downs, those conditions are 7500 renal cell carcinoma"; correct?

A. That's what it says.

Q. And is that -- I'll rephrase.

Does that appear to be this 7500 renal cancer?

MR. KLOTZBUCHER: Object to the form and foundation. Again, this is a spreadsheet she's not familiar with, with individual specific plaintiff, and that she's not agreed to testify to. In her report, she's not familiar with as well. So my objection stands to form and foundation.

With that, Ms. Piper, you can answer.

THE WITNESS: So it appears that that's what it is talking about.

BY MR. VANSLYKE:

Q. Okay. And you recognize that this particular rating is for 60 percent; correct?

A. Yes. It shows the percentage number and this is 60 percent. It's been 60 percent since March 14th of 2017.

Q. And there's no end date; correct?

A. Right. There's no end date.

Q. And do you see that there is another rating for 20 percent?

A. Yeah. I see his total service connected disabilities.

Q. And by total service connected disabilities, you mean --

A. Yes.

Q. -- including more than just the renal cancer; correct?

A. Yeah. Uh-huh.

Q. So if, according to this report, only this individual rating is determined to be related to Camp Lejeune, then the other ratings listed on that spreadsheet would presumably be

not related to Camp Lejeune; correct?

MR. KLOTZBUCHER: Objection to foundation.

THE WITNESS: Yeah, I mean, he's -- only according to this, yes.

BY MR. VANSLYKE:

Q. And if we assume that to be true, do you understand in this paragraph that what Mrs. Yount is doing is identifying the value received if he were to not have the Camp Lejeune related rating as $774.16?

MR. KLOTZBUCHER: Objection. Foundation and form. You may answer.

THE WITNESS: But that's what it shows. And let me see -- okay. That's what it shows.

BY MR. VANSLYKE:

Q. And you agree that the next step that Ms. Yount is performing here is to identify the difference between that number and the total award that he is receiving; correct?

MR. KLOTZBUCHER: Object to the foundation and form.

You may answer.

THE WITNESS: Yeah. Based off my

math in my mind, I could see that $7,159.19 minus the 774 is that 985.03.

BY MR. VANSLYKE:

Q. And based on that calculation, Ms. Yount is indicating here that that $985.03 reflects the disability benefit received relating to Camp Lejeune; correct?

MR. KLOTZBUCHER: Objection to form and foundation.

You may answer.

THE WITNESS: Yes, that's what she said.

BY MR. VANSLYKE:

Q. Okay. Thank you. All right. Would now be a good time for a lunch break?

A. I guess. Whatever you-all want to do. I'm flexible.

THE VIDEOGRAPHER: All right. We're going to go off the record at 1:14 p.m.

(Recess taken from 1:14 p.m. until 2:00 p.m.)

THE VIDEOGRAPHER: We're back on the record at 2:00 p.m.

BY MR. VANSLYKE:

Q. All right. Ms. Piper, I would like to zoom out a little bit and see if you could

help me understand some information generally about VBA disability benefits.

I believe you have testified that you are generally familiar with the process by which veterans would file a claim to receive benefits and that claim would be evaluated; correct?

A. That's correct.

Q. And you're aware of the different variables that can change the way that those awards are provided; correct?

A. Correct.

Q. So I'm going to look back at the spreadsheet. And at this time I'm not going to look at any particular data entry so much as I'm looking at the title row at the top here. Do you see where I'm indicating?

A. Yes.

Q. Okay. So if I look at Column C, it appears to me that that's indicating latest rating date. Do you agree?

A. Yes. Yes.

Q. I will remove the filter from before. So now all plaintiffs are visible. I'll scroll back up to the top.

And plaintiffs can receive multiple

ratings over time; correct?

A. Correct.

Q. If there is a rating decision that is more recent than another rating decision on the same injury, is it safe to assume that the later one supersedes the prior one?

A. Unless it's something where -- so most of the time. But sometimes it can be a latest rating, but the condition may change. It might be like a stage rating. So sometimes you'll see something like that. But usually more times than not, the latest rating date should be what you use unless you see something that indicates otherwise.

Q. Okay. And in Column D, I understand this title to mean diagnostic type code. Is that how you interpret it?

A. Yes.

Q. And is that referring to codes identified in the VA schedule?

A. Yes.

Q. And then Column E is "percent number"; correct?

A. Correct.

Q. And I understand that to be referring

to the percentage rating awarded to the individual rating on each row; correct?

A. Correct.

Q. And Column F, I read the title as "begin date," do you agree?

A. Yes.

Q. Can you tell me what "begin date" means, if it's different than the latest reading date?

A. So, I mean, based off what I'm seeing there, there -- for, like, if we look at Scott Keller, the begin date, it shows that -- and the only thing is I feel, like, that the 8526 series, most of those are things where they can be service connected, yeah, on the right and left side. So it looks like those started or they've been service connected for the right lower extremity neuropathy, left lower, all of those -- those four conditions, 8/10/2017. And then it looks like starting August 16, 2022, it picked up with the additional disabilities with the scar, the diabetes, the diabetic neuropathy.

But then also -- it looks like it's going in order not by the begin date for some of them, but it's basically the diagnostic codes are

in the correct order. So you'll see, depending on the condition, the begin date just depends on where it is.

So, basically, if we look at 8/10/2017, the veteran with service connected for when I was talking about the right left lower extremity, the neuropathies on all quadrants of the body, and then the diabetes and the diabetic neuropathy. And then it looks like there was an increase in the diabetic neuropathy starting 8/16/2022 and then a new service connected condition of the coronary artery disease starting 8/16/2022.

Q. I think I understand what you're saying about the different injuries beginning on different dates, and I understand what you're saying about the diabetic neuropathy receiving a new rating modifying the previous rating for diabetic neuropathy; is that correct?

A. Correct. It looks like it got increased.

Q. So I'm trying to understand and if I look just as one example at the -- under the current view, it's Row 3, this is for diabetic -- I'm sorry, nephropathy --

A. Uh-huh.
Q. And I see the begin date of August 16th of 2022 --
A. Uh-huh.
Q. -- and the latest decision date is November 18th of 2022.
A. Uh-huh.
Q. Can you clarify for me why there is a difference between the date of the rating versus the begin date?
A. So --
MR. KLOTZBUCHER: Objection, form and foundation. Just to the extent that this is individual plaintiffs' specific information. And, again, the database that she hasn't prepared.
But you can answer the question generally.
THE WITNESS: Yeah. If it's -- what I show, it looks like the rating was completed on 11/18/2022, but the effective date was 8/16/2022. So basically the decision was after, but the medical evidence shows that effective 8/16/2022. I'm not sure if that's when the claim was

submitted or if that's when the medical evidence showed that there should be an increase. But that's the difference where the begin date is usually the effective date. And then the latest rating date is when the actual decision was completed by a rating specialist.

BY MR. VANSLYKE:

Q. Thank you. And if I look at Column L, I read the title as "military service period type"; is that correct?

A. Correct.

Q. And if I look at the options here, it's either blank or Gulf War, peacetime, or Vietnam era; correct?

A. Correct.

Q. Could you explain to me the difference -- I'll rephrase.

Could you explain to me the effect that it could have for a rating to be labeled as peacetime in this column as opposed to being labeled, for example, Vietnam era?

A. If they do not have war service -- so, basically, peacetime means they don't have any war service. So depending on the conditions,

sometimes even though you don't have war service, but you want to ensure if there was some type of condition where they have to have military service. I can't think right offhand. But sometimes you want to ensure that their -- that it's notated what period of service it is accurate.

So you're saying what's the impact if it's not labeled correctly, like if the person were to have Vietnam service, like, I want to make sure I'm answering the question.

Q. I think you answered it. I wasn't asking --

A. Okay.

Q. -- about it being labeled incorrectly.

A. Okay.

Q. I was only asking assuming --

A. Yeah.

Q. -- it's labeled correctly, what are the --

A. Yeah.

Q. -- results of those differences. And do you feel that you've explained that?

A. Well, I mean, I think this is the

biggest thing, like, if someone was in Vietnam and we're looking at Vietnam with Agent Orange exposure. But you just want to make sure that it's labeled correctly where we're able to show, like, hey, this person had this particular period of service during the time of war, blah, blah, blah, blah.

So it could have some implications if it's -- if it's not labeled correctly depending on what the condition it is that you're trying to service connect.

Q. Thank you. I will move to the award line data tab. Scroll back up to the top here.

So if I look at Column D, it says "award type"; correct?

A. Correct.

Q. And if I look at the filter options, it looks like the only options are blank or compensation/pension live; correct?

A. Correct.

Q. And earlier we discussed those two types, compensation versus pension being two distinct benefits; correct?

A. Correct.

Q. And if I look at Column E, award line

type, and I look at the filter options, it appears the options are blank or compensation; correct?

A. Correct.

Q. If an award were granted as a pension, is it your understanding that Column E would instead say pension instead of compensation?

A. Yes.

Q. So given that, if I apply the filter, there is no option for pension, is it fair to assume that none of the entries on this tab are indicated as award line type pension?

MR. KLOTZBUCHER: Objection to foundation.

You may answer.

THE WITNESS: Yes. Based off what I see, if there's nothing indicated that there's pension, then everyone on that list is in receipt of compensation. If they were receiving pension, the award line should show pension.

BY MR. VANSLYKE:

Q. Thank you. I see Column G, I read as "gross amount." Do you agree?

A. Yes.
Q. Column H, I read as "net amount." Do you agree?
A. Yes.
Q. Are you aware of any examples in which the net amount would be different than the gross amount for a compensation award?
A. Not right offhand without seeing. It's been a minute. I have seen, but I just can't remember why. But it should be something on the letter that indicate like why we withhold. Usually, there's some type of withholding where the gross amount and net amount may differ, but it's been a minute. But I believe it should be some type of withholding.
Q. So am I understanding correctly that you're saying there are some circumstances where there may be a withholding applied to the gross amount of a compensation award?
A. Yes.
Q. And that if that were the case, there would be some indication in the veterans file that there is a withholding and what the withholding is for; correct?
A. Yes.

Q. Okay. I read the title for Column J as "children number." Do you agree?

A. Yes.

Q. I read K as "dependent number." Do you agree?

A. Yes.

Q. Do you understand what the title for Column L is intended to represent?

A. That's a -- seems like a veteran has a helpless child dependent. That's usually a child that was assumed to be helpless before the age of 18. So they would be always on the veterans award, like, a spouse if they had that.

Q. Can you explain to me what helpless means in this context?

A. Yeah. Helpless child is a child that has the inability to care for themselves. So usually a child that may have some form of special needs. The medical evidence had to show that they were deemed helpless prior to the age of 18.

Q. And I read the title for Column L as "minor children number"?

A. Yes.

Q. Am I correct in assuming that a minor

child who is not deemed helpless does not remain a dependent beyond 18?

A. Unless they fall in that school child category.

Q. And what is that category?

A. Between, I believe, 18 to 23. It might be 26. I know there was some change. But, anyway, it's while they're in school. So they would have to submit a VA Form 674 to indicate that they're still enrolled in school.

Q. And am I understanding correctly that you're stating there has been a change at some point in the --

A. Yeah.

Q. -- age limit for --

A. Yeah, I believe so. I used to think it used to be 23 and now it should be 26 -- 18 to 26.

Q. And I read Column N, the title as "parent number." Do you agree?

A. Yes.

Q. Under what circumstances would a veteran's parent qualify as a dependent?

A. I would have to look that up, but I -- I would have to look it up. I can't

remember if it's -- yeah, I would just have to look it up. On the dependent qualifications for a parent. I'm not remembering off -- offhand.

Q. Do you remember -- apologies. Go ahead.

A. No, go ahead. Do I remember?

Q. Do you remember generally that there are some circumstances where a parent can qualify as a dependent?

A. Yes. Parents can qualify as a dependent. I just can't remember the criteria right offhand.

Q. Is it safe to assume that if the number of dependents a veteran has increases that the benefits they receive will increase?

A. Yes. They get dependent's allowance depending on the amount of dependents.

Q. And I read the title for Column P as "spouse flag"; correct?

A. Yes.

Q. Is that essentially a yes or no indication of whether they have a spouse?

A. Yes.

Q. And it's presented as a flag instead of a number like the previous columns because

presumably somebody can't have more than one spouse as a dependent?

A. I'm assuming so. But I don't know the method behind this dataset. But I would assume it's something similar, but I can't be 100 percent sure why the distinction not using number and flag.

Q. So if I am -- I'm sorry, let me rephrase.

A. I mean, I haven't seen an instance where a person was -- had more than one spouse. I know sometimes spouses pass away and then you get a new one. But I haven't seen where there's two living spouses getting a dependent at the same time. Basically --

Q. Am I correct -- go ahead.

A. Go ahead.

I mean, because we have to apply, you know, laws. So I don't -- I mean, I can't recall offhand if there's any state in the United States that would recognize a veteran being married to two people at the same time. But what I'm saying is I have not seen two veteran being paid for two spouses at the same time. Maybe two separate spouses at different forms of life, like, if

someone were to pass away, they get remarried. But I haven't seen two living -- you know, a veteran being married to two people getting a dependent -- spousal dependent pay for two people at the same time.

Q. Am I correct that in your knowledge the word "flag" does not indicate anything different in this context than just indicating that there is one spouse?

A. Yeah, without confirming, I would assume, you know, that it just means one spouse. Like, it doesn't mean anything. But I would clarify, like, if it was helpful, we have a data team, you just clarify the fields just to ensure there's nothing. But, I mean, just me looking at it, I would just say they just, for some reason, used that word "interchangeably." But I never went and asked them, like, hey, why are you using number all this time and now you use flag. But I think it would be a quick clarifying question that we could ask them.

Q. If I were to ask the data team this question and they told me that they were unsure, is there another source you would look to?

A. No. I feel like they would have to

find out. I mean, sometimes we ask them questions and they say no. But we have to get an answer. So it's their job to figure it out. So we just don't take no for an answer. But they don't know that they need to go to some other source until we get an answer.

Q. In Column S, I see award line reasons. Do you agree?

A. Yes.

Q. And do you understand that as indicating why a new award has been issued?

A. Yes. So like, for example, when we look at line 11, we show that the veteran received their original award at 90 percent and they continued on at 90 percent receiving their annual cost of living adjustment. And then on line 4, the same person received a compensation rating which went from 90 to 100. And then they can continue receiving 100 percent disability pay in their annual cost of living adjustment.

Q. Thank you. And under Column R, I see "SMC type"; correct?

A. Correct.

Q. Can you summarize generally for me what an SMC type is?

A. Yes. Special monthly compensation for additional compensation for certain things. One, online, it shows special monthly compensation K meaning this person is getting an additional benefit for loss of use of something.

Q. So if I open the filter options here, I see K, L, and S are the only rates here, not counting combinations of those three. Do you agree?

A. I agree.

Q. Do you know what SMC rate L is for?

A. Yes. SMCL, I believe, should be aid and attendance. So I would, you know, always verify. And then SMCS, I believe, is for a statutory housebound. But we have a chart with the correspondence, but I believe L should be aid and attendance with loss of use. So this person is getting L plus K meaning SMC for loss of use and SMC for aid and attendance.

And then the other person is getting statutory housebound, which usually means that they have 100 percent rate and a 60 percent rate. And then SMCK, but I can verify that quickly, but that's what -- based on my quick review, I believe that's what it is.

Q. And am I correct that SMC rates are awarded separately and in addition to the underlying disability rating?

A. Correct. It's an additional.

Q. And each SMC rate would have its own dollar value attached to the award; correct?

A. Correct.

Q. Would those values change based on dependents or only the underlying disability rate?

A. I would have to look at the rate chart. But I believe you would go to -- I wish you just had the rate chart. It would be easier to figure it out. But I believe that we would look at, like, the 100 percent, and then you should be able -- it's just easier for me to look at a rate chart. It's just been so long because I don't do any of this anymore. But in the rate chart, I believe that you should be able to go to 100 percent with the dependent amount and then look at the SMC rate with the dependent amount to get the values. But if I had a quick chart, if you have it, I can probably kind of walk you through it.

Q. I do not have a chart as an exhibit,

but I understand that you are giving me your best understanding without referencing the chart.

A. Okay.

Q. Do you know if the values attached to SMC rates are also typically adjusted on COLA, cost of living adjustment?

A. Yes.

Q. And would it be the same --

A. The only one --

Q. Go ahead.

A. The only one that does not go up is the medal of honor. That rate stays the same. But other than that, they go up -- we provide the calculation. So they are adjusted each year as well. So on the VA.gov site, you can kind of do a comparison because we kind of put the historical rate, so, like, maybe like the last three years so you can see how they go up and they include the SMC rates.

Q. Would it be the same COLA percentage that applies to the SMC rates as applies to the underlying disability rates?

A. Yes, it's the standard percentage for all rates.

Q. And when you reference the medal of

honor award, is that an SMC rate or is that something separate?

A. It's just -- yeah, it's something separate. But you'll see it on the same chart. So sometimes people ask for it. But it's not like SMC. It's just a separate rate. But that's the only one where COLA doesn't apply. So if you look -- I was referencing that because if you were ever to go to the rate chart, you'll be, like, hey, why this number never stayed the same or why this never changed.

Q. Understood. So I'll close that. I'm going to go to the last tab here, the payment data. I think the only question I have here is I see in Column C, I read that as "payee type CD." Is that what you see?

A. That's what I see.

Q. Do you know what that refers to?

A. Yes. It's a chart that I don't have, but I believe the payee codes are different. So the I think the veteran's code is 00. So all of these should be veterans. So if you go down, they all should be 00. Do you see anything other than a 00 when we go to the filter.

Q. Well, let me -- I just realized I'm

still filtered to Downs on this tab. So I will unfilter there. And I think an easier way to see that is if I look at the filter options under Column C, I see 00, 10, and 80.

A. So 10 I believe is spousal. Let's click on that person.

Q. Okay. I'm filtering to 10 in Column C.

A. Let's see what it shows. Yeah, so they're receiving looks like compensation pension death. So she got a retroactive pay. So it's a spouse code, but the 10 means spouse.

80, I believe is parent. Let's go to the 80 one that you had and let's see what it says.

Q. Before we do that, I would like to clarify this one.

A. Okay.

Q. So I -- under Column J, I see compensation listed as the program type; correct?

A. Correct.

Q. And, earlier, I think we talked about compensation benefits would not go directly to anybody other than the veteran; correct?

A. I believe, and I would have to go

back and look, but I believe DIC, they still put it as a part of disability compensation because it's service connected, but I would have to double-check the fields. But I believe that's what it is, but it's been so long. But I feel like it's just a quick clarification but it may be because it's dependency, indemnity, death compensation. So I think it still falls under that program type, even though they're administered by our pension and fiduciary. But I think overall is still compensation, but we just have to quickly clarify because it's been a minute.

Q. So if I look at Column L, I see retroactive C and P?

A. Uh-huh.

Q. Does that mean retroactive compensation and pension?

A. Yes. I believe it's a retroactive compensation and pension payment. I would have to look at it, but I'm not not -- the number is high. I'm not sure if the veteran passed away during a certain time frame. But I would have to look and see why that rate is $4,837. But it is some form of retroactive payment.

Q. In general, do you know if there is any process available to the surviving spouse to submit medical documentation attempting to obtain a retroactive adjustment for their spouse, the veteran who passed away?

A. They do -- they can receive -- I'm not sure if this is a one-time payment. Like I don't know if the veteran passed away, we'd have to look at that. But, usually, when the veteran pass away, the spouse can apply for what's called the month of death check. So, usually, if the veteran, say, passes away February 27th, that payment usually is already going out for March 1st. But because the veteran passed away, they could have tooken -- taken that payment out of the veteran's account. And what happens if there's a spouse that's still living, they can submit a request for the month of death check. So that could be why that's only, like, one month long and just one line. But I'm not sure without looking at the full scope. But it could have been something like that where they requested that month of death check.

Q. Understood.

A. It's usually a one-time payment.

Q. Okay. So I will change the filter on Column C from 10 to 80. I see this is --

A. Burial. Okay. Is this the same person?

Q. Yes.

A. Okay.

Q. I have added 10 back to the filter in Column C. So it now shows both 80 and 10.

A. Okay. So they seem to maybe pass away between 2023 -- yeah, 2023, and then they seemed to file like a claim for burial benefits.

Q. Understood. Thank you very much. I will stop sharing that exhibit.

Do you recall earlier we talked about the distinction I was drawing between documents uploaded to VBMS versus data held directly within VBMS?

A. Yes. I remember you trying to make the distinction.

Q. Do you understand the distinction I'm drawing?

A. I believe I do. I believe that you're saying that the document is -- like, if someone were to upload documents into VBMS, I'm not sure if you're talking about, like, sometimes

our system, if we were to make a decision, we put those same documents in the system, so sometimes it can be manually uploaded or they can also be, like, generated by the system. But I believe you're talking about, like, in the document field. And then I -- I could spend a few hours. I can't remember what you said about the embedded data.

But I think we talked about something like what the rating percentage was, like, we went through and it showed -- like -- I don't think we showed it, but I remember -- or I could visualize what you were saying, where you were talking about, like, the different -- like, the veteran is rated for this and their combined evaluation, that's like the data that's in the system versus the actual document. So I think that's the distinction you were trying to make.

Q. If a veteran has two ratings at the same time, each one for 50 percent, is it correct to assume that their combined rating is 100 percent?

A. No.

Q. Can you give me an overview of how you would calculate the combined rating?

A. It's been a minute. But if there are just two people with 50 -- oh, God -- we have like a combinator, but I have done what we call VA map in a long time. So it would have probably took me 2 minutes to -- but, basically, we take a percentage of the person.

So they start off 50 -- likely at 100 percent. So they are first 50 percent, now makes them now 50 percent of the veteran left. However, we're not going to subtract another 50 percent, it's going to be a percentage, and I cannot remember -- I can't remember -- remember it fully. But it's not going to give a full 50 percent. I'm trying to think in my mind how much it would give. 50 -- yeah, it's not going to -- you can't do 50 plus 50. It's called VA math. I'm sorry, I didn't prepare for that, but it's not going to give you a total 50. We also have like a VA combinator that's embedded in our systems where we would normally put that in there. But it wouldn't come up to 50 plus 50 equals 100.

Q. Can you describe the combinator for me?

A. Yeah. It's just like a VA calculator

in a sense where you put in the veteran's service connected disabilities in the system, and then it gives out what the veterans current combined evaluation should be.

Q. So when you just described inputting the individual ratings or the combinator to use to calculate the combined rating, can you describe for me how someone would input the data relevant to the individual rating?

A. Yes. Not knowing if it has changed; right, but if I can remember or recall correctly, we would have to put the veterans percentages in order of what's the highest. So if the person is 60, you put in the 60 first. If the person is 40 or have a 40 percent rating, now you put in the 40. If they are 20 percent, say it's left and right, they have something called a bilateral factor you have to apply. I can't remember the full term. But there are different things that we have to check off in the list. It's a little complicated, not too much, but I'm not prepared to do a full long tutorial today.

Q. So the data that you just described needing to input --

A. Right, it would be on the

veteran's --

Q. Am I --

A. -- code sheet. So are you familiar with the rating code sheet?

Q. No. Can you describe it?

A. So if you ever had a veteran's rating decision, I'm not sure the veterans you have in question. If you ever looked at their VA rating decision, accompanying the rating decision on the back of the rating decision will be the code sheet. The code is basically everything the veteran has ever been service connected for, anything they've been denied for and has the date and how long the effective date. So it's basically a sheet that goes with the veteran. And we keep adding to it depending on how many claims they had. But it's called a rating code sheet. And it's just an outline of the veteran's disability percentages, if there are any future exams. So it's just basically like the veterans historical rating data.

Q. So to input the individual rating data or -- would you be manually entering that data or would you upload a document and the system reads it from the document and inputs it

automatically?

A. The last time I've done it is 2018. So if there have been developments, I don't know. So back in 2018, there was a manual process. If that process has changed, I have not heard of it, but it is possible as VA has been making strides towards automation, so there's a chance that now this process is automated, but I am not familiar if it is automated. So the last time I've heard, it was manual.

Q. Okay. So I would like to use this example to clarify my distinction between data entered into the system versus documents uploaded to the system. You told me that uploading the document did not lead to that information being entered into the system automatically when you last did it; correct?

A. We're talking about, I think, two separate processes. So when we put information into VBMSR, say, I was making a decision for the rating purposes, that information is -- once it's in VBMS, it puts it into the system. So I don't have to upload it because that's part of the process.

What I was talking about is, say, the

veteran called or I am explaining your combined evaluation because we were talking about the overall percentages and VA math. What I'm saying to help verify that information, that was a manual process. So these are two different -- I think we were talking about two different things.

Since, I want to say, 2013, the process for rating decisions, that information was automatically put in the system in our veterans benefits management system, so that data was automatically in there and you have to upload it. Once you finalize the draft rating decision, that's automatically in there and then any accompany information is automatically inputted in the system.

What I was talking about a manual process was just trying to for illustrative purposes, say someone we get -- because that's one of the most -- I wouldn't say controversial things, but it's the confusing thing of why isn't 50 plus 50 a hundred. So to verify that information for someone outside of the VA, for me, like, if I were teaching a VSO. So during that time we had, like, strong building relationships with the veteran service

organization for people that would be in the office.

So say they had a question or they wanted you to verify, like, hey, are you sure this is correct, that would be a manual process where I am just assisting you with ensuring the information in the computer, what the computer showed as the combined evaluation is the same. So it was just more of an illustrative thing. And the only way to help us teach people was to do it manually. So what I'm saying is that I am unsure if the process to teach VA math is still manual or if it's not automated.

Q. Would you agree that at some point in the process, it will be necessary for somebody to input the individual rating amounts?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: Yeah, I mean, that's what's already happening now. Like, when we input, as a rating specialist, that's one of the things that we're doing when a veteran files a claim, what we talked about earlier, when you went through my CV

or my resume to go through the different things, one of the things you asked is, like, hey, tell me the difference about the development.

When I was saying with the -- we get a claim on the VA Form 526, that starts the data portion that veteran service representative is inputting that information. Those same issues, once is ready for decision for the rating, that same information is now pulled into the system to make a rating. So the entire time that data is going from the veteran service representative is being verified again from the rating specialist. So it's always in the system. So we're taking the information that came in the system.

So I guess I'm just trying to clarify that -- that I wasn't saying like that process was totally manual. I guess I'm just trying to find the best way to give that distinction of what you -- what you're saying.

BY MR. VANSLYKE:

Q. Do I understand correctly that when

the VSO processes the claim, they have to insert the rating percentage for each individual rating?

A. When I was -- now the process could have changed. Maybe you would want to verify with someone who's currently rating, like I said, they've been making strides. So what I'm saying -- I'm telling you something from 2018. You may want to verify someone who does it in 20 -- 2016.

But what I'm saying is the -- I'm just explaining the process based off how I know. But there's a chance that it could change. So I feel like you may want to verify what the VA rating specialist on how is information or data inputted in the system to date. Because I'm not -- that's not my area of expertise anymore.

Q. Would you agree that it is not the case that any individual rating percentage populates randomly?

A. Yeah. Like the issue is, like, while I'm rating, so it's not randomly. It's usually I'm making a decision on that issue when I assign the evaluation that travels with the veteran. And from there, when I was talking about the code sheet, you'll see when I did it. So the day that

I input the rating, you should be able to see all that information on that veteran's code sheet anytime it changes, anytime it's denied. But it was manually during that time inputted by me, but it was in the system, but I did it because I have to verify that it was correct. So it was not just arbitrarily assigned, it was assigned by me if I was making a decision on a particular claim.

Q. Understood. Thank you.

So when an individual makes that decision and assigns the relevant rating percentage, then that piece of information exists within the system and can be carried forward and used in things like the combinator; correct?

A. Correct.

Q. Okay. So the combinator is applying the VA math formula essentially to the rating percentages that have been decided at some point earlier?

A. So it's already in the system, but we had access -- so say -- so these are two different things. But the reason why I brought it up is because sometimes we get inquiries to verify a rating before it even exists. So the combinator is not required, but it's helpful for

someone like you so I don't have to spend time inputting fictitious information in the system. So these are two separate things.

But when I assign a rating, that combinator is already embedded in our veterans benefits management system. The reason why we would have a separate -- or access to a combinator where we can do things on our own is for us to know, like, hey, if I do this -- do this, this is what I'm going to get.

So it was like us -- like sometimes we have to train people. So you don't want to put that information in the system because you can mess up or skew data. So this was our own separate way to provide tutorials for inquiries for people who are just asking for information.

So this is the veterans benefits management system can calculate that stuff. So the combinator during that time was not required. This was a separate tool that we had access to where we can know VA disability percentages without putting it in the veterans benefits management system, or we had something called our VA 2000. But, basically, we did not have to utilize our VA system to get that same

information.

Does that make sense?

Q. Yes. So if I understand correctly, the VBMS system has an embedded feature --

A. Right.

Q. -- to apply the VA math formula --

A. Uh-huh.

Q. -- to identify the combined rating percentage; correct?

A. Right. Uh-huh. But during that time frame, we just had access to our own combinator where we could just do things for tutorial purposes. A lot of us, like I said, when we talk about second signature reviews, we were checking other people's work. So instead of going in the system, you can just do something quick just to see if it was right.

Q. Does the system -- go ahead.

A. So I would call it something -- when you say for illustrative purposes only, that's where we would use that for.

Q. Does the system also have an embedded formula to identify the award value based on the combined percentage?

A. If I understand correctly, basically,

like, if the veteran is 100 percent, you're saying that it should automatically be in the system. So it should be programmed from what I understand, like I said, it's been a minute. But I should be able to look on the VA rate table to see that same information immediately. I think that's what you're saying. Like, I don't have to manually now go and input whatever that award information is. So if I say this veteran is 100 percent from 2013, the system is automatically able to populate that 100 percent rate with dependents automatically from 2013 to present.

Q. And you're saying that is the case, to your understanding?

A. Yes. Yes. Since -- at least since 2018. I feel like it would be -- it would be even better. I don't think it would go backwards. So, yes, since 2018, it was -- anything else, I think it would just enhance. It should have been more of an enhanced process.

Q. So the embedded features identify, not just the base value of the rating -- the combined rating percentage, but also other variables like dependence and how that might

affect the value; correct?

A. I think we're saying the same thing. But VBMS has separate systems. So I think we were kind of talking about earlier, like the distinctions, like with VBMSR, those for people who input the rating. Once the rating is done, someone would have access to what's called VBMSA, which is VBMS awards, and that is pulling the information from the rating, which would be those -- that veteran's percentage, and then that system is what feeds into how much money the veteran receives, if that makes sense.

Because it's all VBMS, but it's designed for certain features. So like me as a rating specialist, I wouldn't have access to the awards. But the person who was processing awards has access to the data that I input it to process the award.

Q. I think we're saying the same thing as well.

A. Yeah, I think so.

Q. So I appreciate the distinction you're drawing about different levels of visibility. But just to confirm I'm understanding correctly, you're saying that the

embedded features of the system do calculate how variables like dependents would alter the value based on the tables that we've discussed; correct?

A. Right.

Q. Would the same be true for the value of SMC rates?

A. Right. Like the SMC, it's done by the rater. So once the rater codes certain SMCs, that information automatically populates to VBMSA when they process those awards. One of the things that the veteran service representative would have to do is ensure on that rating code sheet it's not populating something weird. But that's why you have that rating code sheet because that's the snapshot for everything you need to know. So that was one of the ways or that is a way how we were able to check to ensure the awards was processing correctly if the code sheet didn't match up. That's why sometimes we would have to return things back to the rating specialist to ensure that they line up.

Q. So it sounds to me like both things are true that the embedded features automatically calculate the total award amount based on all of

the variables. And, also, it's possible to check the accuracy of each individual variable and the corresponding amount; is that correct?

A. Yes.

Q. Okay. And just to confirm one detail on the spreadsheet, and back on Exhibit 8, so Column R here for SMC type, many of them are blank; correct?

A. Correct.

Q. And then, for example, there is a cluster here that are marked with K; correct?

A. Correct.

Q. And that application of SMC type K would have an effect to change the total award value; correct?

A. Correct.

Q. But the dollar amount of that change as a result of SMC type K would be reflected in the tables that you've referenced; correct?

A. Correct.

Q. And that value is not reflected here; correct? I can scroll if you would like to look at other parts of the spreadsheet.

MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: I mean, I would have to just bounce it off a rate table. So if you scroll over, it should already be added in that award value number. So I think the best way you can know if it's correct, if you see a veteran who has the same percentage. So I think that person had 20 in the K, you would want to find somebody who had 20 without, and then you should be able to tell their rate shouldn't be the same. I think that's the best way to look at it with just a spreadsheet.

To look at two veterans that have the same disability percentage who has a K and who doesn't, the person who has a K should have the higher amount. So if we're just using the spreadsheet, that's the best way for me to know if it's valid.

BY MR. VANSLYKE:

Q. And I assume those would have to be compared within the same year; correct?

A. Right.

Q. And if one of them had a dependent that year and the other did not, that would be

another way that those would be different; correct?

A. Right.

Q. Are you familiar with the appeals process for VBA disability ratings?

A. No more so. VA appeal process totally changed. So I used to be familiar. With the new process, I am not familiar. So VA changed their appeal process, so it's totally different from when I learned the appeal process. I may be able to assist you with some general questions. But the specific nuances, I'm sure I'm not the best person for that anymore.

Q. Is it fair to say that you may not be knowledgeable about specific procedures for the appeal process, but you are generally familiar with the veteran's right to appeal their claims?

A. Correct.

Q. What would be the purpose of appealing a claim?

A. If a veteran disagrees with the decision. So that's why we tell the veteran, like, it's under the header, like, if you disagree. So basically if the veteran disagrees with the decision, they can file an appeal. So

they can disagree with the effective date. They can disagree with the percentage. They can disagree with the evidence so we don't limit to what they disagree with. We allow the veteran to determine what they disagree with.

Q. Fair to say there's a wide range of issues that could be appealed?

A. It would have to be on the decision that's in play.

Q. And if a veteran is successful in an appeal, that could change their ratings; correct?

A. Yes. It could potentially change their ratings.

Q. It could also change the effective date you said; correct?

A. Yes.

Q. Are you aware of whether the VBA tracks pending appeals?

A. Yes.

Q. If an appeal is successful, could that lead to a retroactive award?

A. Yes, potentially.

Q. Are there other ways that a veteran could receive a retroactive award?

A. I mean, not just claims. So are you

saying, like, if they're -- if it's -- the retroactive is not just for an appeal, sometimes they didn't have their dependents on the original claim and they filed a claim for dependency. Then that can lead to a retroactive award.

But, basically, the retroactive award comes from some form of claim or appeal. So, yeah, I guess that's the best way to answer what you're saying. So it doesn't just have to -- like, they don't have to just receive a retroactive award because it was an appeal. Some claims constitute a retroactive award.

Q. So if, for an example, a veteran files their initial claim and documents that they have suffered from the injury for the previous ten years, it's possible that they could receive a retroactive award covering that time period?

A. I mean, if there's some date limitations. So there's -- so you're saying, like, today, like, hey, I had this condition for ten years, are you going to go back for ten years. There are limitations. So I'm trying to see when -- it's been a minute, but it's rare. Even though they had that -- unless there was, like, an error on VA part for us to go back those

ten years, it usually would be from the date of claim even if they filed it. But I would have to look at it. But, usually, this day and time, just on a normal case basis, like, today I filed this claim, February 26th of 2026. I've been suffering from this condition for the past ten years. It's rare that we're going to go back those ten years unless there's a reason why, like, maybe there was some kind of evidence that showed that this person really did file a claim and we never adjudicated. Like, those are rare instances.

Usually, but not saying that all the time, but usually we would go back from the date of the claim unless there's a reason to constitute that we were able to go back. If I just got out of the service, so I'm a veteran that just got out of the military, I have a year. So say I got out February 26th of 2025 and I just hit my year mark, then there's a potential I can go back that year because you can't go back to the day after discharged from the service.

But I'm just trying to think of -- from what I can think about it is some form of administrative error or something, reason why the

claim was not processed those ten years ago. But just under normal circumstances, it would go by the date of claim unless there's some type of thing that we can apply, usually some kind of law or something that may give us some -- some reason to go that far back.

But I would say under normal circumstances, it would just be the date of claim or if the veteran was on active duty. But if there's some reason for them to go back those ten years, it has to be some kind of triggering reason why we would just take a person who's never filed a claim and they said I had this for ten years. Because they should have filed that claim when they were experiencing those conditions, unless there's some reason where they filed a claim and we never adjudicated it for reasons that I don't know.

Q. Earlier, I believe you referenced scenarios where a veteran may have to choose between the disability compensation and the pension; correct?

A. Correct.

Q. When you're referring to pension, I understand that you are referring to the

income-based pension provided through the VA; correct?

A. Correct.

Q. Is there any conflict between VA disability compensation and a military retiree's pension?

A. Is it a conflict? I wouldn't say a conflict. And I'm not sure if it's changed. But I would say depending on the veteran's disability percentage, their retirement pay -- I'm going to say retirement pay, not pension, I know people outside of VA use the word "pension," but we just use "military retirement pay."

Usually, depending on the veteran's percentage, it may or may not be offsetted by their VA disability benefits. So there are times where we have to offset their VA disability benefits or their retirement pay. DFAS would notify them that it has to be offset due to them receiving VA disability. I haven't processed that in a while. But it usually was for veterans who were not 100 percent. But if that's changed, it's been a minute. But once they received 100 percent during that time frame, they were entitled to -- they were entitled to receive both

benefits with no offset.

Q. When you say offset in that context, what do you mean?

A. That means it would reduce. So at some -- at one time if the veteran was not 100 percent, there was a chance that their military retirement paid, depending on how much they received, could have been offset by their VA disability if they were not 100 percent.

Q. Do you know what concurrent retirement and disability pay means?

A. I know of it, but I'm not familiar with the program anymore. But that's kind of what I was talking about where veterans who were 100 percent, they were able to receive both benefits. And anyone who was under that amount, their benefit was reduced by their VA benefits or had to depend on their -- how much they received from the military retirement. But it's been so long, so I'm probably not the best person to go into the nuances of that.

Q. Again, I understand you're doing the best you can based on your recollection. I'm going to look back at Exhibit 8 for just a moment. I'm on the award line tab. I'm looking

at Column S under award line reasons.

A. Uh-huh.

Q. And I see concurrent retired and disability pay, two lines here; right?

A. Uh-huh.

Q. So I'm going to unfilter and just look at those two. Okay. So it looks like the ones that have a second entry, it's just the cost of living adjustment; correct?

A. Correct. Can you scroll -- are they all the same person?

Q. No.

A. Okay.

Q. So do you agree that this entry under Column S reflects the scenario that we were just talking about?

A. Yeah. I mean they -- it shows that they received -- that's their current retired and disability pay amount.

Q. Okay. I will unselect those. Do you see these boxes that say "COMV retire pay (SPEC law 06)" continues beyond that?

A. Yeah. Is it an old award? Like, does convert usually -- used to be people who may have been on the old system and we try to convert

it. Are they recent?

Q. I can open them up and we'll see. So if I scroll over, it does look like they are all from before 2010, would you agree?

A. Yeah.

Q. So I understand that's how you interpret the CONV as converted?

A. Like they were converted. Uh-huh.

Q. Do you understand what retired pay (SPEC law 06) on AWD line, do you know what that means?

A. No. It's saying some kind of special law 06 or something. I would have to look at it. It's probably something in the system. But I don't -- I can't remember anymore. But it's probably something that we -- yeah. No, I'm not -- I can't recall at this time.

Q. So sitting here today, you cannot tell me how this might have affected their award amount and you would have to look in the system to figure that out; correct?

A. Right.

MR. KLOTZBUCHER: Object to foundation.

THE WITNESS: Yeah. Because we would

have to do a lot of research, especially because they're like old awards like 2004, so I'm definitely --

BY MR. VANSLYKE:

Q. I'm going to look at one more. This one says "retired pay adjustment." Do you understand what that would refer to?

A. Well, I mean, just -- it just says that they adjusted the award due to retirement pay.

Q. So is that essentially the opposite of the scenario you described before where they have 100 percent rating and --

A. That's what I'm saying, the law changed. So without looking at it, so concurrent retirement, CRDP is what it's called, it wasn't there are all the time. So that's what I'm saying, if you even look at the dates of the awards to get a full assessment, you're going to have to look because depending on when they received this benefit, there were certain laws that were in the place. So I -- I can't tell you fully, but this is a newer award versus the other ones you had.

So to get a full assessment, you just

have to see what law was in play during that time frame in which they received that benefit. So I can't 100 percent say because all retirement pay laws was not the same. It changed.

Q. Okay. Do you have any recollection of when that changed?

A. I feel like around 20 -- you want to look it up, but when I was on the phone -- it had to have been around 2010. I don't -- but it had to have been around that time frame. I had just kind of started. So if you want to start, I would start around 2010.

Q. Do you know generally whether it is common practice for the VBA to revisit prior ratings to investigate whether the plaintiff is still similarly -- I apologize, the veteran is still similarly disabled?

A. No, I'm not familiar with us just reviewing ratings just -- just because. Like, what would be a reason?

Q. I think that's what I'm asking --

A. Asking me?

Q. -- you is if there's a reason why the VA would revisit the medical exam, for example?

A. The medical exam or the disability?

Like, for us to revisit a medical exam means something might have been wrong with the exam, because usually if the exam was less than a year old, there's no need to reexamine unless there's something wrong with the exam, we deem it to be insufficient.

So I want to ensure I'm answering. But if you're saying why we would just do another exam, usually that means something was wrong with the first exam. That's usually the only reason why we would just do another exam in less than a year. Usually the exam is good for a year.

Q. So after a year?

A. Right, because it's considered outdated. So, usually, if you have medical evidence that's sufficient to make a decision on or if you have an exam or it was called a disability benefits questionnaire, if it's within a year and we determine that it's sufficient, then we would take that. But if it's the medical evidence is older than a year, then we would schedule a new exam to get the most current evaluation.

Q. So just to confirm I'm being clear, I am not trying to frame a question around the

medical exam being faulty or inadequate in any way.

A. No. But your question was about medical examinations. Like, is there a reason why VA would just basically do a new exam. You used the term "exam." But, no, it's not that you were saying that it's being faulty, but that -- that's a reason why we would -- if this -- why we wouldn't take it for face value is what I'm saying.

What I'm saying is the reason why if it's been a year, so say you submit something six months ago, the only reason why we would schedule it again is because we felt like something was wrong with that exam or the evidence indicated that this person should be better by this time frame. So what I'm saying is we would not just go around scheduling exams just because, because you try to be good fiscal stewards. But if the exam is determined to be insufficient, like, say, I'm trying to make a decision on it, but the information that came from the exam that you provided six months ago didn't obtain everything for me to make the most accurate assessment, I have to then schedule a

new exam. So that would be a reason why.

Q. I believe you mentioned in there the possibility that the plaintiff was expected to improve on a certain time frame; correct?

A. Right. And it's usually indicated by the examiner.

Q. If the examiner in the initial rating indicates that the condition should improve within a certain period of time, after that period of time has elapsed, would the VA revisit to investigate whether the condition has improved?

A. Yeah. We would schedule what's called a routine future exam. But you would know when we give you that rating decision, we would indicate, like, you're going to be scheduled for a routine future exam to look up the likelihood for improvement.

Q. So if that is not indicated, would you assume that all ratings are indefinite?

A. Wouldn't say indefinite, but it's likely that it will stay the same unless the veteran or someone comes in for another exam. Because sometimes we could make a decision on the exam -- I mean, on a condition and we don't want

to look at it. However, the veteran may feel like, hey, I want to file a claim. We're looking at it, but we're looking at it because it's properly triggered by the veteran requesting for us to do so.

Q. If the veteran filed a claim for a new condition, might that trigger recognizing that the previous condition has improved?

A. So the veteran filed a claim for a new condition, but it's separate from the old condition?

Q. Correct.

A. So we're not looking at the old condition because they didn't request for us to. So the new condition, depending on what it is, we may possibly, once we service connected, look at it, but it's only if the evidence is showing that we need to look at it again. Or if it's something deemed temporary in nature, you know, sometimes we may service the service connected veteran for a knee condition, the veteran might have just had knee surgery maybe six months ago. So we know that when you have surgery, sometimes things get better. So it just really just depends on the condition. But, again, the

veteran will know once we make a decision on whether or not we're going to look at it again.

Q. Is there ever a point at which a veteran is no longer able to file a claim for a new disability rating?

A. We don't limit the veteran, the amount of times that they can file a claim. So if the veteran wants to keep filing a claim, we can't tell them to stop.

MR. VANSLYKE: Okay. Could we go off the record for a moment.

THE VIDEOGRAPHER: We're going to go off the record. The time is 3:20 p.m.

(Recess taken from 3:20 p.m. until 3:28 p.m.)

THE VIDEOGRAPHER: Back on the record at 3:28 p.m.

BY MR. VANSLYKE:

Q. Okay. Ms. Piper, I'm going to share my screen for just a moment. I'm looking back at -- I believe this is Exhibit 9, which is 38 USC Section 1155. And I believe you testified that you understood this section to relate to the rating schedule that we looked at from the VA; correct?

A. Correct.

Q. Just to confirm, you are familiar with that rating schedule, but did you have any role in identifying the award amounts that should accompany each percentage?

A. Do I have -- like, do I know where to find it or like --

Q. I'm not asking if you know where to find it. I'm asking if you had a role in setting that value?

A. No.

Q. So when a veteran receives a combined rating and that rating yields a certain award amount, you do not have a role in determining how much of that amount should accompany each percentage level; correct?

A. I mean, it's a set rate, so it's not like -- I guess I'm trying to make sure you're not saying that I'm setting the rate. Like, do I know how to find it?

Like, I guess I'm just trying to find the best way to apply what you're saying. So, basically, if a veteran is 10 percent, they receive whatever amount that the rate table says, I mean, I guess I'm just trying to find the next step. Like, I guess I'm just trying to

understand what you're asking.

Q. Correct. You do not determine the amount that goes into the rate table; correct?

A. Correct.

Q. Have you at any point played a role in that?

A. Like the staff, but it's just like calculating the COLA. So I guess, like, the origin, I feel, like, what you're asking is set prior to what we do, which is just apply the year -- the yearly increase. So I feel like the answer is no because that has been set before I even started working at the VA. So I would say no.

The only thing we're responsible for is not the actual percentages, just applying that small COLA increase each year, but not the actual foundational rate, if that makes sense. Because I feel like that has been set how -- each rate, like you get 10 percent for such and such. There was a foundation that was established to determine those intervals. And I don't have any involvement in that.

Q. Is it -- I'll go ahead and stop sharing. Is it correct that a veteran can

receive VBA disability payments while also earning income?

A. Yes.

Q. Is it correct that earned income is not a factor in determining their VBA rating?

A. I'm not familiar with the earned income piece with VA rating.

Q. So to the best of your knowledge, that does not play a role in determining their rating; correct?

A. Yes, to the best of my knowledge.

Q. I understand that certain SMC rates can be related to aid and attendance; correct?

A. Yes.

Q. And is that intended for certain extra degrees of care required by those veterans?

A. Yes. Basically, the veteran requires assistance with their daily living activities. So VA, based on the criteria, we'll pay the veteran a benefit amount that's determined by that rate to -- just because a veteran is unable to do their activities of daily living, we will provide that benefit amount.

Q. So do I understand correctly that that's intended for daily living care or

assistance, not medical care or assistance?

A. Well, we just give the rate amount. So that's the criteria. But we don't oversee, like, hey, can you tell me did you spend this money on X, Y, Z. So it's basically like, hey, the veteran meets the certain criterion, we pay the money, but then there's no oversight of how they actually apply that. Like, did they actually get that. Like, we don't get that far into that.

Q. When there is a medical exam conducted, is that medical exam provided by VBA or VHA?

A. So it depends on the exam. It depends on where it is. So VHA can do some of the exams, but we don't know. It just depends on the address. VBA has contract exams. So you don't know depending on the exam, but our exam management center, again, that's now offered by a medical disability exam office, they control whether or not the exams will occur at VHA, VBA. Back in 2018, not sure if the same thing, VHA exams received priority. And then if VHA could not -- or did not have the capacity to complete an exam, then those exams were split among our

contract vendors. Whether or not that's still the same, I'm not sure.

But that's how it used to go where they would be split, but it would be based off VA -- VHA's capacity to handle exams. And if VHA didn't have the capacity depending on the veteran zip code, where they are, then those VA contract examiners will handle those exams. But whether or not that's still the case, I'm unsure.

Q. So other than potentially those medical exams that are part of the benefit rating process, does the VBA provide any medical care to veterans?

A. VBA is not responsible for medical care. The only thing we do is provide exams. And those are completed by either contract vendors or VHA, the exam piece. So, basically, the VHA or our contract vendors provide that medical evidence to VBA. But we don't do any kind of medical care. So it's no one in the Veterans Benefits Administration who completes the examination, but we oversee. So VBA does have a piece of the medical exam part. It's called our medical disability examination office and they work with our contract vendors. But

it's not anyone in VBA doing the exam. It's by vendors like QTC, VHA -- I mean VH -- VES, LHI. So those are the contract vendors who are providing those medical examinations for VBA to make rating decisions.

Q. So am I correct that you are not offering any opinion on past or future medical care that would be appropriate for any plaintiff?

A. Yeah. VBA is not responsible for medical care.

Q. And you are also not providing an opinion on any past or future medical care that would be made available to any plaintiff?

A. That I'm aware of, VBA is not offering medical care in the past or the future, you know. But as far as I'm concerned -- I mean, as far as I know, VBA is not responsible for medical care for veterans.

Q. And is it also correct that you are not offering any opinion on the value of any medical care that may be offered to veterans?

A. Can you repeat the question? Not just Jadine, you're just saying, like, VBA in general?

Q. Correct.

A. Okay. Repeat it. I'm sorry.
Q. Am I correct that you are not offering an opinion on the value of any medical services that may be provided to any plaintiff?
A. Yes, not that I'm aware of.
Q. So I want to go back to our earlier discussion about the embedded features of the VBMS system that automatically apply the VA math; correct?
A. Correct.
Q. Are you aware of any instances where those embedded calculations were incorrect?
A. Not that I'm aware of.
Q. I'm introducing one more file in chat. I will mark this as Exhibit 12. And I'll go ahead and share my screen.
(Exhibit 12 marked for identification.)
BY MR. VANSLYKE:
Q. Can you see the document that I'm sharing?
A. Yes, it's coming up.
Q. And at the top it says "U.S. Department of Veterans Affairs Office of Inspector General"; correct?

A. Correct.

Q. And the title says "VBA's special monthly compensation calculator in the veterans benefits management system for rating did not always produce accurate results"; correct?

A. That's what it says.

Q. Are you aware of this report prior to today?

A. No, sir, I'm unaware.

Q. Were you aware of any of these issues prior to today?

A. Not this issue, sir.

Q. Are there other issues with the calculations in the veterans benefit management system that you are aware of?

A. No, sir. Not that I am aware of. We have a system support staff, so I'm not on that staff, so I'm not knowledgeable of what's going on with that.

Q. Understood. I will stop sharing. And I thank you for your time and I will pass the witness.

EXAMINATION

BY MR. KLOTZBUCHER:

Q. Thank you, Ben. How are you doing,

Ms. Piper?

A. I'm doing good.

Q. Good. I have a few short questions for you. But, first, I want to thank you on the record, I know you testified to working in an acting capacity as well as having responsibilities of your previous position. That sounds like at least one and a half to two jobs to me. And, yet, you found time to sit for this deposition. I truly do appreciate your time.

A. You're welcome.

Q. I just have about a handful of short questions to ask you. You said earlier, am I correct, that you have some experience with VA disability rating assessments?

A. Yes.

Q. And so it's safe to say you're familiar with how those determinations get made?

A. Yes.

Q. In your past experience, have you made disability rating determinations?

A. Yes.

Q. In your prior experience, how common was it for a veterans disability rating to change going into the future? Would you say it's common

or uncommon?

A. I would say it's uncommon.

Q. You did testify before that they can change; is that correct?

A. Yes, they can change.

Q. Okay. But that it is uncommon for it to change?

A. Yes.

Q. You were asked previously about costs of living adjustments or COLAs?

A. Yes.

Q. In your prior experiences, were COLAs more likely or less likely to be applied annually?

A. More likely to be applied annually.

Q. And so given your previous experience and your current knowledge, is it reasonable to assume that it's more likely than not to be continually applied annually?

A. Yes. I would say yes.

Q. You discussed earlier about the VA reevaluations of disability benefits. Are there situations where the VA would not look to reevaluate their disability ratings?

A. Yes. If a veteran is, for instance,

55 or older, unless they have a condition in which the medical evidence shows that it's temporary in nature, we would not request a routine future examination to look at the current state given the veteran's age.

Q. So you're saying if there was a veteran over the age of 55 and there was nothing in their ratings decision regarding needing a future evaluation, would you anticipate that the ratings of that veteran would change?

A. It could change, but it's highly unlikely that it would change.

Q. How would you know if a veteran is required to be reevaluated?

A. It just depends on the disability. Just looking at the medical evidence. Usually that's found on the medical disability benefits questionnaire. For instance, if the veteran has active cancer, we know that we need to reevaluate to, number 1, assess the residuals. Sometimes those treatments can make it worse for the veteran. So even if the veteran is in remission due to the treatment that they receive for those conditions, it can bring about severe residuals.

So that's why something like active

cancer is -- we know that we have to automatically schedule some type of routine future examination depending on what that disability benefits questionnaire shows as the date or when that treatment end, like six months later, we want to assess the veteran's current state.

Q. And so if the veterans rating decision is silent or the medical evidence through the DBQ does not show that there is a need to do a reevaluation, what is the likelihood of a reevaluation for that veteran?

A. It's unlikely unless the veteran is requesting for us to actually look at that condition.

Q. In your experience, has the veteran ever requested a decrease in his or her rating?

A. I have never seen a veteran request a decrease.

Q. If the veteran's disability rating stays the same, would the amounts that the veteran receives stay the same as well, excluding cost of living adjustments?

A. Yes. So the veteran's disability evaluation, so you're saying if the veteran is at

70 percent, would the -- and they file a rating decision and we keep them at 70 percent, would that change or -- I guess I want to make sure I understand.

Q. I'll rephrase. I'm sorry.

If the disability was at 70 percent, so does the amount the veteran receives change annually?

A. No. Unless there's a COLA applied. A cost of living adjustment applied.

Q. Going back to the possibility of a decreased disability rating, if the VA reevaluates a veteran and determines that disability rating should be decreased, can you explain briefly the process for how that works?

A. Yes. So, say, the veteran files a claim for increase, we look at the exam, we see that the veteran actually got better. The first time, we actually would do what's called a C&C, which we would confirm and continue the evaluation. However, if the veteran comes in again, we have two exams showing improvement. That's when we would submit what's called a proposal to reduce. We would send a veteran a letter to let them know, hey, we propose to

reduce your disability X to percentage Y due to this.

During that time frame, the veteran has 30 days to request a hearing. The veteran also was able to submit medical evidence. Sometimes in that process, we can see that, hey, maybe the veteran was having a good day doing those exams. But, now, we have current medical evidence warranting either of us to keep the evaluation the same and no longer reduce or actually get -- got severe. So that's usually the process. But, again, it usually takes two examination of improvement before we would even propose to reduce an evaluation.

Q. And so throughout that process, VA can choose to decrease the rating or keep the rating the same?

A. Correct.

Q. Once again, I want to thank you for your time. That's all that I have.

A. You're welcome.

MR. VANSLYKE: I do have a few redirect questions then.

FURTHER EXAMINATION

BY MR. VANSLYKE:

Q. Ms. Piper, you testified that it is uncommon for a veterans disability rating to change; correct?

A. Correct.

Q. And to clarify, when you testify to that, are you referring to their combined disability rating or the individual disability ratings?

A. So we -- I guess we would be talking about -- depending on the instance. So if this is the original claim and the veteran is over 55, there's nothing to show for us to do an examination again, and they are service connected for multiple conditions, at that time will be multiple things. It would be their combined evaluation staying the same.

If we're talking about granting a new condition and it didn't show a need for us to schedule an exam again, that time, it would just be one individual condition. So I think it just depends on the instance. But if the veteran is over 55, 55 and older, and there's no indication for us to schedule an exam again, then unless the veteran is requesting for us to look at that condition, there's no need for us to request any

reevaluations.

Q. So, to be specific, do you believe it is uncommon for a veterans combined disability rating to change?

A. It's a potential depending on what's going on if the veteran is requesting individual exam. So it just depends on the nature. So if it's just us looking at individual exams, I mean, individual disabilities, then it's a potential. But sometimes even if we look at the individual disability, sometimes they don't change the overall combined evaluation. It just depends on the condition.

Q. I appreciate the context. I will ask that you answer my question as presented.

Is it your testimony that it is uncommon for a veterans combined disability rating to change?

A. Yes, it's uncommon.

Q. Is it also your testimony that it is uncommon for the rating percentage for a particular injury to change?

A. Yes, unless the medical evidence shows that it's temporary.

Q. Are you aware that VA regulations

expressly authorize reexaminations when a disability may improve?

A. Yes.

Q. Are you aware that VA regulations provide for routine future examinations?

A. Yes.

Q. And are those routine future examinations typically scheduled within a few years of the initial rating when improvement is possible?

A. Yes.

Q. So for conditions that are not considered static, reevaluation is expected, not rare; correct?

A. Yes.

Q. Are you aware that the VA office of inspector general has studied the VA's reexamination practices?

A. I've heard -- I'm vaguely familiar with it.

Q. Are you aware that the OIG found that veterans were being scheduled for medical reexaminations in significant numbers?

A. No, I'm not aware.

Q. Are you aware that OIG criticized the

VA for conducting unwarranted reexaminations?

A. Can you repeat that?

Q. Are you aware that the OIG criticized the VA for conducting unwarranted reexaminations?

A. No.

Q. If I represent to you that the OIG did make that criticism, does that seem that the concern from the OIG was that the reexaminations were happening too often in some cases?

A. If you -- can you repeat that?

Q. If I tell you that the OIG criticized the VA for conducting unwarranted reexaminations, do you understand that to mean that the OIG is concerned that reexaminations were happening too often in some cases?

MR. KLOTZBUCHER: Objection. Form and foundation.

THE WITNESS: Yeah, I would have to review it.

BY MR. VANSLYKE:

Q. Is it true that a reexamination is conducted to determine whether a rating should change?

MR. KLOTZBUCHER: Objection. Form.

BY MR. VANSLYKE:

Q. You can answer.
A. Can you repeat. Excuse me.
Q. Is it true that a reexamination is conducted to determine whether a rating should change?
MR. KLOTZBUCHER: Same objection.
THE WITNESS: I think it is conducted. It's just to look at the current state of the disability. So it's not --
BY MR. VANSLYKE:
Q. Go ahead.
A. Not saying that it changes, just looking at the current state of the disability. So that could be that it changes, yes, or it got severe. So we don't know what the change is, but it's just to look at the current state.
Q. And is it looking at the current state to determine whether or not the current rating remains appropriate?
A. Yes, it's just looking at the current state. And from there, we have to determine whether or not it changes.
Q. And if the evidence shows the condition worsening, the VA may increase that

rating; correct?

A. Yes, if the condition is worsened, yes, it could warrant an increase.

Q. So whenever the VA schedules a reexamination, there is a possibility that it could result in a rating change; correct?

A. Yes. It could possibly result in a rating change.

Q. Is it fair to say that ratings for nonstatic conditions are periodically reevaluated as part of VA's normal process?

A. Yes.

Q. And your testimony about these practices is premised upon law and regulation as it exists today; correct?

A. Yes.

Q. Is it possible that Congress could amend some of those laws?

A. Yes, it's possible.

Q. And is it possible that amendments, such as those, might change some of these practices you've been describing?

A. Yes, it's possible.

Q. I'm going to look briefly back at Exhibit 8. I'll try to remove the filters. One

moment.

Do you recall testifying earlier today that as people age, their conditions typically worsen?

MR. KLOTZBUCHER: Objection to form.

BY MR. VANSLYKE:

Q. You can answer.

A. Yes.

Q. Could you describe for me what you were referring to?

A. It's just -- I was just saying usually when people get older, it's just normal for our bodies to get worse. So it's just a normal part of aging where it's uncommon for you to revert back to full strength as you get older. Usually things get worse, not better.

Q. And are you referring to existing conditions getting worse or are you referring to new conditions developing?

A. So are we talking about general or are we talking about specific individual cases.

Q. In general, right now, I'm asking which of those two scenarios you're referring to?

A. So I thought we was just talking -- I think you was just asking about in general in

life. But if we're talking about these cases, then can you rephrase.

Q. So I'll stop sharing to avoid confusion.

So when you testified that things generally get worse as we age, are you referring to new conditions developing as we age or are you referring to existing conditions worsening as we age?

MR. KLOTZBUCHER: Objection to form.

THE WITNESS: Yeah, I mean -- yeah, I just think -- can you repeat the question?

BY MR. VANSLYKE:

Q. When you refer to our health worsening as we age, are you referring to new conditions developing as we age or existing conditions worsening as we age?

MR. KLOTZBUCHER: Same objection.

THE WITNESS: Yeah, I mean it could possibly be both. I mean, just in life.

BY MR. VANSLYKE:

Q. So your testimony is that both of those can occur?

A. Yes, both can occur.

Q. And you stated that typically things

get worse as we age; correct?
A. Yes.
Q. Would it be fair to state that commonly things get worse as we age?
MR. KLOTZBUCHER: Objection. Form and foundation.
BY MR. VANSLYKE:
Q. You can answer.
A. I'm thinking.
Can you repeat the question?
Q. Instead of saying that typically things get worse as we age, would it be fair to say that commonly things get worse as we age?
MR. KLOTZBUCHER: Same objection.
THE WITNESS: I would say commonly.
BY MR. VANSLYKE:
Q. Can you repeat your answer?
A. I would say commonly.
Q. Ms. Piper, do you understand what a degenerative condition is?
A. Yes.
Q. Could you describe for me your understanding?
A. A degenerative disease would be something like Parkinson's. It's -- Parkinson's

is considered a neurodegenerative condition. Those are usually conditions that your body deteriorates. It starts one way and it progresses worsening. It doesn't progress better. Usually, people who have Parkinson's, they're unable to talk, they're unable to move, they have uncontrollable movements. So it's a neurodegenerative disease where your body is basically breaking down. That's how I would describe degenerative.

Q. So if somebody has a degenerative condition, would you expect that condition to worsen over time?

A. Yes, I would.

Q. Would you say that it is uncommon for a veteran with a disability rating to obtain an additional disability rating at a later date?

A. Can you repeat the question?

Q. Would you say that it is uncommon for a veteran with one disability rating to receive an additional disability rating at a later date?

A. I wouldn't say it's uncommon. I mean, I feel like if someone files a claim, there's a potential for it to -- for them to get service connected again.

I'm not sure what the question is asking. But, basically, it's not uncommon, like if someone files a new claim, depending on what the new condition is, say there's a new law and now they have a condition that's now recognized, they're service-connected for A, now they can be service-connected for B, should VA expand benefits and they meet the criteria. So I don't think it's uncommon depending on what the condition is and who the person is.

Q. Is it also true that they could develop a new condition and obtain an additional rating for that?

A. I mean, yeah, it's possible.

Q. Would you say it's common for a veteran to receive a second rating after receiving their first?

MR. KLOTZBUCHER: Objection. Foundation.

THE WITNESS: I mean, if they file a claim, and they get service connected for it. So, I mean, it's possible.

BY MR. VANSLYKE:

Q. Would you say it's common for that to occur?

MR. KLOTZBUCHER: Same objection. Foundation.

THE WITNESS: I mean, people -- I mean, I haven't studied, like, the patterns or the trends of veterans coming in getting additional service connection, but I'm saying it's possible. But to know if it's common, I would have to look at the data and analyze the numbers and then come back to you.

BY MR. VANSLYKE:

Q. When you have completed claims on behalf of veterans, have you ever completed a claim for a rating on behalf of a veteran who already had a preexisting rating?

A. Yes. Claims for increase. I've completed several claims for increase.

Q. Did that ever strike you as uncommon to encounter that scenario?

A. I mean, I never really just sat and thought about it if it's common. I mean, it's just someone wants to file a new claim, they feel like, hey, I have a condition that warrants service connection. So they're filing a claim. But I never sat there and be, like, hey, a lot of

people are doing it. I never just sat and look at the trends.

Q. Have you ever completed a claim on behalf of a veteran who received an increased rating for a rating we already had?

A. Yeah. So you're saying the veteran just came in to say, hey, my condition is worse, let me file a claim.

Q. Correct.

A. Yes, I have.

Q. Did that ever strike you as uncommon?

A. I mean, I never really thought about it. Again, I feel like if we want to talk about the trends for claims for increase, but I've never -- I'm just -- my job was just to process the claims, but not look at the trends to see if it's common, uncommon, or not.

Q. If I understand correctly, you're saying that you have not studied the data, but you have no particular recollection of that striking as you as uncommon; is that correct?

MR. KLOTZBUCHER: Objection. Form. You may answer.

THE WITNESS: Yeah, I mean, like I said, I've seen it before. I've rated a

good bit of claims for increase, but I've never studied the trends of them.

BY MR. VANSLYKE:

Q. So do I understand correctly that sitting here today, you cannot tell me whether it is common or uncommon for a particular rating to be increased at a later date?

MR. KLOTZBUCHER: Objection. Form.

THE WITNESS: Without analyzing, like, the entire population. But I'm saying it's not -- I mean, I've seen it occur before. But if you want me to use the word common or uncommon, I've seen it before. So we can say common if that helps.

BY MR. VANSLYKE:

Q. And would you say that it is common or uncommon for a veteran to receive an additional rating after already having a preexisting rating?

A. So, I mean, it's possible. I mean, I've seen it before. So we want to use the word common. I think it's fine.

MR. VANSLYKE: Okay. I have no further questions. Thank you again for

your time.

MR. KLOTZBUCHER: Thank you, Ms. Piper. Nothing further.

THE VIDEOGRAPHER: This ends today's deposition. We're going to go off the record at 4:08 p.m.

JADINE PIPER

CERTIFICATE

I, CHRISTINE A. TAYLOR, Registered Professional Reporter, Certified Court Reporter, do hereby certify:

That JADINE PIPER, the witness whose deposition is hereinbefore set forth, was duly sworn by me, and that such deposition is a true record of the testimony given by such witness taken stenographically by me to the best of my ability.

I further certify that I am not financially interested in the outcome of this action, a relative, employee, attorney or counsel of any of the parties, nor am I a relative or employee of such attorney or counsel.

IN WITNESS WHEREOF, I have hereunto set my hand this 14th day of March, 2026.

CHRISTINE A. TAYLOR
Registered Professional Reporter
Certified Court Reporter #4736

THE VIDEOGRAPHER: My name is David Lane, the videographer for Golkow, a Veritext division. Today's date is February 11, 2026. The time is 8:54 a.m. Eastern Time.

This remote video deposition is being held In Re: Camp Lejeune Water Litigation.

Our deponent today is Dr. Richard Ruck.

All parties are appearing remotely and have agreed to the witness being sworn in remotely.

Due to the nature of remote reporting, please pause briefly before speaking to ensure you are heard completely.

Counsel, please introduce yourselves and state whom you represent.

MS. WALLACE: Good morning. Whitney Wallace for the plaintiff leadership group in the Camp Lejeune litigation.

MR. ANTONUCCI: Good morning. Giovanni Antonucci for the United States.

I'm joined by my colleague, Joseph Turner. Weston Bokrenhagen from the Defense Health Agency is also here.

THE VIDEOGRAPHER: The court reporter is Christine Taylor and she will now swear in our witness.

* * *

RICHARD RUCK, M.D.,

having first been duly sworn, was examined and testified as follows:

* * *

THE VIDEOGRAPHER: Please begin.

EXAMINATION

BY MS. WALLACE:

Q. Good morning, Dr. Ruck.

A. Good morning.

Q. Thank you for being here today. Before we get started on your questioning, I'm going to be taking your deposition today. I am required by a case management order number 3 to state this sentence on the record and affirm as -- and both parties have to affirm as counsel that they agree with this statement. I've done this in every deposition. And I will read it.

"The parties agree that no

communication with the deponent by any means, including but not limited to text messaging will occur out of the view of the other parties while the deposition is proceeding on the record."

And I affirm that for the record.

MR. ANTONUCCI: As do I.

BY MS. WALLACE:

Q. Okay.

A. And there's nobody else in the room with me here. So --

Q. Okay. Great. That's one of my questions. You're ahead of me.

Will you please state your full name for the record.

A. Dr. Richard Ruck.

Q. What's your date of birth, sir?

A. My date of birth is [redacted], 1969.

Q. Who is your current employer?

A. My current employer is the Defense Health Agency.

Q. And your current job title, please.

A. My job title is -- I am the chief medical officer for the TRICARE health plan.

Q. Do you understand that all of your testimony is under oath today?

A. I do.
Q. Is there any reason that you're not capable of testifying fully and truthfully today?
A. No. I can do that.
Q. Where are you physically located?
A. I am here at -- in my office at the Gatehouse facility here in Falls Church, Virginia.
Q. That's your typical office that you work out of, Doctor?
A. Yes.
Q. Is that a TRICARE type facility or does the -- does the building heed on more than that?
A. This is a -- the Defense Health Agency has a few rented facilities across the country. This is one of those. The headquarters building is right across the beltway for me. They own that building. But work in a building that we rent two floors of, and I think other folks rent other parts of it.
Q. So you're joined there in your work environment with other DHA administrators?
A. Yes. We -- it's -- most of the TRICARE health plan is in this building. They

have personnel. But there are DHA entities here as well.

Q. Such -- what are examples of those?

A. There is a -- part of a -- the contracting group. I'm not sure exactly which part that they work with. The -- let's see. Upstairs used to have some individuals that worked with medical affairs, but I think most of those have been relocated over to the headquarters building. Those are some examples.

Q. And when you said "contractor," do you mean such as TriWest or --

A. I think most of the -- of the TRICARE contractors are actually out in Aurora. I think these contractors manage other contracts like the pharmaceutical contract and other things. But I don't really interact all that much with them. They're on the other side of the building.

Q. And you stated earlier before I asked, but just to confirm, there's no one in the room with you this morning?

A. No, there is not. And the door is closed.

Q. I'm sorry, excuse me.

A. I said and the door is closed, so --

Q. Great. Are you in your actual office?

A. Yes.

Q. Do you have any materials in front of you this morning?

MR. ANTONUCCI: Objection.

THE WITNESS: Go ahead.

MR. ANTONUCCI: You can go ahead and answer, Dr. Ruck.

MS. WALLACE: Yeah. So he's going to make -- just so you understand, he will make a number of objections today. And unless he says "do not answer that question," he's stating his objection for the record, and then your answer follows right behind it.

THE WITNESS: Okay. So the only piece of information I have in front of me is what I provided you already in case you asked me questions about the cost and fee schedule.

BY MS. WALLACE:

Q. Thank you. And I'll ask you today if you don't mind, unless I direct your attention to an exhibit or a document, don't refer to any

materials you may have with you today or on your computer.

A. Understood.

Q. Are you familiar with the Camp Lejeune litigation?

A. Yes, I -- I am familiar with it as far as what I, you know, heard in the newspapers and, you know, et cetera. And -- and then, you know, what we've discussed. So...

Q. Have you ever read the Camp Lejeune Justice Act?

A. No. Actually, I don't think I actually have read that.

Q. Do you know anyone who has -- who has served at Camp Lejeune personally?

A. Are you referring to the period in question or more recently?

Q. Let's say the period in question.

A. No, I do not.

Q. Do you know of anyone personally who has filed a claim for the Camp Lejeune litigation?

A. No. I am not familiar with anyone who has filed a claim.

Q. Do you understand that you have been

named as an expert witness in the Camp Lejeune litigation?

A. Yes, I -- I understand that, yes.

Q. Do you know on what topic you've been asked to testify about as an expert?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I'm here to answer any questions that you may have regarding the TRICARE, you know, the medical benefit established by Congress, managed by TRICARE.

BY MS. WALLACE:

Q. Are you -- do you know anything about the bellwether plaintiff cases in the Camp Lejeune litigation that are pending before the Eastern District of North Carolina?

A. Other than the name, no.

Q. Which name?

A. The bellwether.

Q. Okay. You just know that there are bellwether plaintiffs in the Camp Lejeune litigation before the Court currently?

A. That's correct. That's all I know about it.

Q. Were you asked to prepare an expert

report for your testimony in Camp Lejeune?

MR. ANTONUCCI: Objection.

THE WITNESS: Just the -- what I was submitted, you know, as part of -- I guess the deposition or the RD.

BY MS. WALLACE:

Q. Do you mean --

A. Disclosure.

Q. Yes. The designations is the word maybe you're looking for?

A. Yeah. What we submitted to the Court regarding my CV and my -- and the history that I submitted.

Q. Have you ever prepared an expert report before, to be distinguished from designations?

A. No, I have not prepared a report other than -- like I said, other than the type that you already have.

Q. Before the Camp Lejeune litigation, did you ever prepare designations in another matter?

A. Yes, I have.

Q. What matter was that, please?

A. I have prepared -- those designations

for a case in Hawaii, a case -- these are all TRICARE related cases, and they are very similar to the one today, to answer questions about TRICARE. One in South Carolina and one in South Dakota.

Q. And that has all been since you became the CMO of TRICARE in approximately September of 2022?

A. That is correct.

Q. Can you tell me what this -- if you know, what the subject matter of those cases was, for the Hawaii one, for example?

MR. ANTONUCCI: Objection.

THE WITNESS: The Hawaii was the Red Hill case.

BY MS. WALLACE:

Q. Is that a jet fuel spill?

A. What?

Q. A jet fuel spill?

A. That is correct.

Q. And the government was the defendant in that case?

A. Yes.

Q. Did you prepare a declaration in that case?

A. I prepared, you know, essentially the same documents as we prepared this -- for this case.

Q. Did you testify before the Court in that case?

A. Yes, I did.

Q. And where was that testimony?

A. That was at the courthouse in Honolulu.

Q. Did you have -- were there any other TRICARE representatives that testified in that case?

A. I was told that there were. I didn't actually meet any of them. We were all brought in separately.

Q. Are you familiar with a TRICARE employee, Carmen DeLeon?

A. Only the name.

Q. Are you aware if she testified in that case?

A. I would have to review, you know, the documents to find out if she was listed as a witness. If you tell me that she was, then I will believe you.

Q. Okay. If I told you that she was a

witness in that case, you believe me?

A. Yes.

Q. Do you have any knowledge as to whether Carmen DeLeon is still an employee of TRICARE?

A. Actually, I do not.

Q. Can you tell me what you know about the South Carolina case that you testified -- or that you prepared designations for?

A. I believe that was an individual case of -- that was brought, you know, the government was the defendant and they were the plaintiff. I would have to review my -- that was a few years ago, I would have to review my records to find out exactly what the subject matter was for that.

Same with the South Carolina case. Again, I know that that one was also individual, but -- and I'm not sure how much I can disclose about protected health information anyway.

Q. And so I believe you just testified this -- both the South Carolina and the South Dakota cases were on behalf of a single plaintiff?

A. That is my recollection, yes.

Q. Do you know who the defendant was in

that case -- both cases?

A. The South Carolina case, I would have to review. The name is not coming to mind. I do know the last name of the individual who was in the South Dakota case. Am I allowed to share that since that is an individual?

Q. Yes. It would have been public if it was the plaintiff.

A. Okay. Ten Eyck was the last name.

Q. Of the plaintiff?

A. Of the plaintiff, yes, sir. T-E-N space E-C-K [sic]. Ten Eyck.

Q. Thank you for spelling that. I had it wrong.

Who was the defendant?

A. The -- they were -- they had filed a case against the government, but I would have again -- I would have to review the specifics to find out -- to remember exactly what it was that they were -- you know, was the issue.

Q. In the cases that you have testified in, did you give any expert testimony regarding the topic of an offset?

MR. ANTONUCCI: Objection.

THE WITNESS: The -- are you

referring to, you know, like financial offsets?

BY MS. WALLACE:

Q. Yes.

MR. ANTONUCCI: Same objection.

THE WITNESS: The -- that is -- was outside of my area of expertise, as far as financial, you know, any type of financial matters. I believe that they have discussed that as part of the case, but it wasn't what I was there to talk about.

BY MS. WALLACE:

Q. Do you know what the result of your testimony was in the Red Hill case?

A. No. Actually, I -- I try not to follow these in case I have to, you know, go back for anything. So I try to not pay attention to anything that I've been involved in so I can -- don't have any coloring to my perspective.

Q. You never ask?

A. No.

Q. Can you tell me what you did to prepare for your deposition today, please?

A. I submitted some information for the -- you know, the declaration documents that

you had. I met with counsel, Mr. Antonucci, Mr. Ortiz, Mr. Borkenhagen, and reviewed the final product prior to submission. Provided my CV. That was -- that's essentially it.

Q. You stated you met with three individuals. One is defense counsel Giovanni Antonucci who's on our deposition today?

A. Correct.

Q. And another is Ortiz. Did you mean David Ortiz, also an attorney with the DOJ?

A. Yes.

Q. And can you name and spell the third name that you mentioned whom you met with, please?

A. Mr. Wes Borkenhagen. B-O-R-C-K-E-N-H-A-G-E-N [sic].

Q. Who is that, if you know, please?

A. He is a Defense Health Agency counsel.

Q. So he's general counsel for the Defense Health Agency?

A. I believe that is correct.

THE WITNESS: Is that correct, Mr. Antonucci?

BY MS. WALLACE:

Q. You can't -- I'm sorry, you can't ask him questions during the deposition. It's deposition rules. I know that's -- it's kind of natural inclination to do that.

But it's your understanding that he is general counsel for DHA?

A. Yes.

Q. Is he on our Zoom today?

A. I -- I believe he was introduced at the beginning.

Q. Okay. I see. Yes, I see him there. Okay. Thank you.

And is it your understanding you're represented by both the DHA general counsel and counsel for DOJ today during your testimony?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. Although, Mr. Antonucci is the primary one that I'm working with today.

BY MS. WALLACE:

Q. We talked about the three cases that you have given expert opinions in. Have you ever been involved in any other civil litigation?

A. I -- when I was a general pediatrician, I was asked to speak as an expert

witness in two child abuse cases for the plaintiffs.

Q. That's terrible. Can you think of any other litigation that you've been a part of either as an expert witness or as a party?

A. I think I had a traffic citation I had to appear for at one point.

Q. And that's all you can think of?

A. Correct.

Q. Have you ever given a deposition before?

A. If you're referring to what we're doing today, just -- yes, in those three cases -- or actually, the five cases, since we're talking about the child abuse one as well.

Q. And of the five cases -- I know you testified that you actually appeared before the court and testified in the Red Hill case. Have you appeared before the Court and testified in any other of the cases?

A. The other two were remote.

Q. But it was before the Court?

A. Yes, definitely for the South Dakota case, and I believe it was also -- I think the judge was also present for the South Carolina

case.

Q. Thank you.

So we are going to take some time and look at your designations. But I want to see if I understand what you're not giving an opinion about today as well, if you don't mind.

It sounds like you are not designated to offer any opinions about individual Camp Lejeune plaintiffs?

A. No, I am not.

Q. And have you prepared any documents on behalf of TRICARE specific to the bellwether plaintiffs in this litigation?

A. No, I have not.

Q. Any TRICARE data or data extractions that I have received or the plaintiffs have received from TRICARE, you were not involved in preparing those; correct?

A. No, I have not prepared any documents that you may have received, other than what I submitted personally.

Q. And you also haven't reviewed any TRICARE data extractions for the Camp Lejeune litigation?

A. That is correct. I have not.

Q. You are a doctor, but you are not offering any opinions on medical causation in this case or medical relatedness or clinical determinations as it relates to any bellwether plaintiff; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, that is correct. I am not here to offer any -- I am not a subject matter expert in, for instance, toxicology.

BY MS. WALLACE:

Q. What was that last phrase you used? I'm sorry.

A. Toxicology or -- yeah.

Q. Did you say forensic toxicology?

A. No, I just said toxicology.

Q. Oh, okay. Thank you.

You are not offering any opinions on the accuracy of the TRICARE coda -- coding or billing data that the plaintiffs have received in this litigation; is that right?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I am not a coding subject matter expert either.

BY MS. WALLACE:

Q. You are not designated to have -- to opine on the calculation of alleged offsets in this case, past or future; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: No.

BY MS. WALLACE:

Q. You have not reviewed any of the plaintiff life care plans in this case; is that correct?

A. No, I have not.

Q. And you are not testifying that TRICARE will pay for any of the future medical care identified by the plaintiffs in those life care plans; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I am here to discuss how TRICARE can be utilized and what circumstances and to provide some general information about how the TRICARE health benefit works. But, you know, the individual life decisions are not something I have reviewed.

BY MS. WALLACE:

Q. You are not offering any opinion predicting the future TRICARE reimbursement rates

or fee schedules for any of the plaintiffs; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I did submit a -- the current chart of cost fees and et cetera that -- and that's on the tricare.mil website, if you wanted to pull it up yourself, the -- that discuss how, you know, the fees are currently structured as mandated by Congress.

BY MS. WALLACE:

Q. But you're not offering any opinion predicting future TRICARE reimbursement rates or fee schedules for the plaintiffs as it is outlined in their life care plan; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Could you be more specific as to how, you know -- how that would be, you know, what you're asking about? I'm not sure that I understand. The --

BY MS. WALLACE:

Q. Sure. You -- you included, as a reliance material, a 2026 costs and fees schedule. You're not testifying as to any

changes that may occur to the cost and fee schedule in the future, as might be reflected in a life care plan of the plaintiff; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: The cost fee schedules are determined by Congress. They're up through 2027. They are there -- they have been published. As far as what they will be after that, you know, Congress will -- will set them based upon -- you know, they will either issue, you know, a new ten-year plan or they will put out the yearly -- any yearly changes to that fee structure based upon health care costs across the country, et cetera.

BY MS. WALLACE:

Q. And you don't know what those yearly costs and fees will be until Congress establishes them?

MR. ANTONUCCI: Objection.

THE WITNESS: Not after 2027, currently, we do not have a fee structure for that.

BY MS. WALLACE:

Q. And as it relates to the plaintiffs,

you're not able to say with any certainty which one of these costs and fees for 2026-2027 might apply to them because you haven't -- you don't know anything specific about the plaintiffs?

MR. ANTONUCCI: Objection.

THE WITNESS: The -- I do not know individually which plan they would apply for. However, I can give you examples of how -- you know, for instance, if they were a Select patient, a TRICARE For Life patient, et cetera, how the TRICARE health benefit would -- you know, would affect them and -- you know, the fee structures, et cetera.

But I -- since I have not reviewed them individually, I can't tell you this person, this person, this person would be -- you know, would receive -- have these copays or enrollment fees.

BY MS. WALLACE:

Q. Are you -- in your designations, are you able to guarantee the scope, duration, or payment level of future TRICARE benefits for any individual plaintiff?

MR. ANTONUCCI: Objection.

THE WITNESS: Can you rephrase that question?

BY MS. WALLACE:

Q. Why? Do you not understand it?

A. Well, no -- so the -- I'm not sure what you're asking, you know, what specific that was -- there was a broad number of topics in that question. So what specifically are you asking me to comment on? You know --

Q. Well, let me break it down and see if that helps.

Can you guarantee the scope of future TRICARE benefits for any individual plaintiff -- and I mean the scope beyond what you just testified to, the 2026-2027 time frame that's already established by statute?

MR. ANTONUCCI: Objection.

THE WITNESS: The -- we do not anticipate that any -- any benefits to any specific group will be decreasing. The -- we -- you know, as far -- you know, that at this point, we have a -- we just started an eight-year contract with -- you know, under T5 and are already preparing for the next contract which will be

awarded after that, T6.

And -- and at this point we are anticipating that it will continue on as currently structured.

BY MS. WALLACE:

Q. But the ultimate decisionmaker is Congress; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: This is a health benefit that's encoded under Title 10 U.S. Code in the 1070 series.

So, yes, Congress is the one who -- who enshrined it into law, and they are the ones who decide which benefits to add or to continue. However, off of past history, we've never seen a decrease in benefits, only increases in -- in what is allowed.

BY MS. WALLACE:

Q. Yes. And that's why my question, when I phrased it both times, uses the word "guarantee."

So you cannot guarantee the scope, duration, or payment level of future TRICARE benefits. That is up to Congress on an annual

basis. Do you agree with that?

MR. ANTONUCCI: Same objection.

THE WITNESS: It is -- so the fee structure is established by Congress, and so we take our direction from them when it comes to that, yes.

BY MS. WALLACE:

Q. And so we can look at the history of what's been authorized and what changes have been made under TRICARE, but we can't guarantee what will -- what Congress will do in the future?

MR. ANTONUCCI: Objection.

THE WITNESS: All I can tell you is that -- that from, you know -- that the -- you know, that the Defense Health Agency anticipates that -- that TRICARE will continue. The -- there has been no political appetite to remove any benefits from the -- you know, from the population.

BY MS. WALLACE:

Q. And that's been since you started working at TRICARE in 2022?

A. Actually, you know, the -- TRICARE goes all the way back, as history goes all the way back to the CHAMPUS program, which was

started in the 1960s. The TRICARE was reformed into -- or renamed, reorganized under the -- in TRICARE, under the 1994 National Defense Authorization Act established in 1997. And since then, we've only seen additional groups be added to the benefit and none removed.

Q. Are you aware of Congress's consideration to eliminate the TRICARE program?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I have not been told that they wish to eliminate the TRICARE program. Congress is always looking for ways to make TRICARE more efficient, but there has been no discussion on removing the TRICARE benefit.

BY MS. WALLACE:

Q. So if another expert of the government in this case has stated that approximately ten years ago lawmakers promoted eliminating TRICARE, you are unaware of that; is that right?

MR. ANTONUCCI: Objection.

THE WITNESS: Are -- I would need to review any such testimony to find out what

they were, you know, referring to. I am aware of discussions on how the TRICARE benefit might be more economically administered and there -- but there has never been a discussion on the removal of the TRICARE benefit.

BY MS. WALLACE:

Q. And that's to your knowledge?

A. Yes, to my knowledge. And I've read multiple reports, you know, that -- discussing that. But, you know, there -- so -- so, you know, possibly the name might change, as simply as it went from CHAMPUS to TRICARE, but the benefit itself I doubt would change.

Q. You're not aware of Congress ever considering an elimination of a TRICARE program in its entirety?

MR. ANTONUCCI: Objection.

THE WITNESS: No. Actually, I am not aware of any discussion to eliminate it in its entirety.

BY MS. WALLACE:

Q. You stated that you are aware of more recent discussions that have raised concern about overpayments, waste, and fraud in the TRICARE

system?

MR. ANTONUCCI: Objection.

THE WITNESS: What specifically are you referring to as far as, you know -- are the -- the TRICARE -- you know, the Defense Health Agency is always looking to minimize fraud, waste, and abuse, and we have a robust system that looks for that to include oversight by the general accounting office, the inspector general office, all of which helped to look for any instances of fraud, waste, and abuse so we can make corrections and seek any type of recoupment that's necessary.

BY MS. WALLACE:

Q. Yes. I'm actually asking you about your knowledge of what current lawmakers and policymakers have stated as to some of their more recent concerns in the TRICARE system.

Can you tell me what you are aware of --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q. -- as hot topics with lawmakers concerning TRICARE?

MR. ANTONUCCI: Same objection.

THE WITNESS: There's been multiple discussions within Congress and, you know, there's always questions from things related to, you know, how should the autism care demonstration be administered to the -- you know, to make it the best program possible, to -- you know, to questions regarding reimbursements of providers when the contract changed over, et cetera, et cetera.

So I guess if you have a specific one that you would like me to comment on, I'd be happy to do so.

BY MS. WALLACE:

Q. Are you aware of concerns regarding billing overpayments, waste, and fraud in the TRICARE system that have been being addressed among Congress men and women?

MR. ANTONUCCI: Objection.

THE WITNESS: A specific document, no. I -- or -- but the -- the issue of fraud, waste, and abuse, as I said, you know, we are always looking to find if there have been any cases of overpayment,

fraud, you know, waste, abuse, that -- and we work very closely with the managed care support contractors to do, you know, audit records, et cetera, to look for those, you know, those instances.

I would imagine that Congress would be interested in pursuing any of those, and we agree with them, and -- and look for ways to -- to minimize the ability of that to happen.

BY MS. WALLACE:

Q. So you are aware of concerns raised by lawmakers about fraud, waste, and abuse of the TRICARE system?

MR. ANTONUCCI: Objection.

THE WITNESS: As I said, you know, Congress is always concerned, you know, about any -- any ways that that could occur, and have directed us to help minimize that, which we do.

BY MS. WALLACE:

Q. Is that a yes?

MR. ANTONUCCI: Objection.

THE WITNESS: That they are concerned, yes.

MS. WALLACE: Okay. I am going to -- so the way that we share exhibits in a Zoom deposition is I upload them into the chat feature and I spend a moment identifying them verbally for the record so that the court reporter can take down what I'm putting in the chat.

So I am going to upload a number of exhibits for you and describe them as I upload them.

Is that background noise coming from the witness or --

MR. ANTONUCCI: No.

THE WITNESS: No.

MS. WALLACE: What is that?

MR. ANTONUCCI: Can we go off the record?

THE VIDEOGRAPHER: Yeah. Go off the record, 9:34 a.m.

(Recess taken from 9:34 a.m. until 9:34 a.m.)

THE VIDEOGRAPHER: Back on the record, 9:34 a.m.

MS. WALLACE: Dr. Ruck, I am going to upload six exhibits into the chat feature. And I am going to describe them verbally

and then upload them.

Exhibit Number 1 is the United States Second Disclosure of Expert Testimony for Phase 3, dated December 15, 2025. This is the document that contains your disclosures.

Exhibit 2 is your deposition notice and subpoena dated January 27, 2026.

Exhibit Number 3 is the United States Response and Objections to Plaintiff's Notice of Deposition and Subpoena for the Production of Documents to Richard Ruck, dated February 4, 2026.

Exhibit 4 is a DOJ cover letter dated February 5, 2026, regarding the production of documents for Richard Ruck.

Exhibit 5 is the TRICARE 2026 costs and fees that bears the Bates Number Ruck_USA_5.

Exhibit 6 is the CV of Richard Ruck which bears the Bates Number Ruck_USA_5 through 8.

(Exhibits 1 - 6 marked for identification.)

BY MS. WALLACE:

Q. Dr. Ruck, can you confirm that I have uploaded those six exhibits?

A. No, I -- nothing has come across my screen. So I know the ones that you're talking to -- about. So I will, I guess, believe you on that one and -- but I cannot see anything coming across my screen at this point.

Q. Okay. No problem. I will share the first exhibit with you that I uploaded. It's in the chat feature is where it --

A. Oh, I'm not sure I have a chat feature on -- this is through the web browser version because this is a government computer. So we don't really use Zoom over at the Defense Health Agency. So it's not allowed to be on our computer. So this is a stripped down model that they gave me that has no security on it. So ...

Q. No worries. I'm going to share it on the screen for you.

Okay. I am showing you what's been marked and added into the chat feature for the court reporter and defense counsel.

Do you recognize this document?

A. Just a second. I've got to lean close in here. I have seen that, yes.

Q. And if you scroll to page 7, you see paragraph 5, "Dr. Richard Ruck"?
A. Yes.
Q. Does this text under your name look familiar to you?
A. Yes.
Q. What is this?
A. This is a description of my past history that, you know, what I'm going to be here to offer testimony on. And a basic description of what TRICARE is.
Q. Did you prepare or assist in preparing this content?
A. Yes.
Q. Were you able to -- so based on your opinion today, you've identified A through K as topics that you are -- believe that you are an expert witness in as it relates to TRICARE?
A. Correct.
Q. And you prepared or -- and/or edited or contributed to this content; is that correct?
MR. ANTONUCCI: Objection.
THE WITNESS: Yes, that is correct.
BY MS. WALLACE:
Q. Did you use some of your past

designations or declarations in order to prepare your testimony topics in this litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: The -- most of my past declarations have used similar wording to this. I prepared this. So, you know, to assist in any of, you know, future declarations. So I didn't use one specifically. It's more I used this information to make all others sort of thing.

BY MS. WALLACE:

Q. The subject of your testimony in this case is similar to the subject of your testimony in the other litigations that we discussed earlier; the Hawaii, South Carolina, and South Dakota?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct.

BY MS. WALLACE:

Q. All right. I am going to put on the screen for you your CV, which is marked as Exhibit 6.

Is this your CV, Dr. Ruck?

A. Yes.

Q. Did you prepare this CV?
A. Yes. This is totally my creation.
Q. Can you walk us through your career, if you don't mind?
MR. ANTONUCCI: Objection.
THE WITNESS: Sure. The -- I went to medical school at Northwestern University in -- in 1991 through 1995. I did a pediatric internship at William Beaumont Army Medical Center in '95-'96. I was undersea medical officer for the Navy for the next four years after that. The -- went back to complete my pediatric residency at Walter Reed Army Medical Center and Bethesda Naval Medical Center in 2000 to 2003.
I was stationed at Fort Benning as a general pediatrician and later as the department chief until 2007. Became an Army -- at that point, became an Army flight surgeon, stationed in Germany, was deployed to Afghanistan. Came back, did a pediatric infectious disease fellowship, was stationed at Walter Reed Army Institute of Research as a clinical

researcher for several years.

Then became the DCCS, which is the deputy commander for clinical services, at -- out in Hawaii at Schofield Army Health Clinic.

And then did a -- and I was there for three years. Then I did another four years as the deputy commander of clinical service -- deputy commander for clinical services and chief medical officer at Evans Army Community Hospital at Fort Carson, Colorado.

I then retired with my -- my 30 years of service. And was retired for six months and went back to work for the Defense Health Agency. And I've been in that position since.

BY MS. WALLACE:

Q. Thank you.

When did you know that you wanted to be a doctor for the military?

A. I decided I wanted to become a doctor in -- eliminating other potential career choices in 1990 and decided in 1990, also, that it would -- that I was interested in doing it

through the military.

Q. Did the military pay for your schooling?

A. I was in the health profession scholarship program, yes.

Q. And does that mean -- did they pay for undergrad and medical school and fellowships and residency?

A. No. They only pay for the -- the medical school. The -- I personally paid for my undergraduate. And then there is a year-for-year payback based upon the -- commitment payback based upon your -- the number of years that you're in the health professions scholarship program which, for me, was four years.

Internship and residency are not -- they're not paid for. We -- you know, that's simply our jobs.

Q. Right. You earn money --

A. Yes.

Q. -- when you do -- okay.

A. We do it within the military health system, in their hospitals, not -- you know, not in private hospitals.

Q. And you're -- my understanding is you

are board-certified in general pediatrics -- general pediatrics and pediatric infectious diseases; is that correct?

A. That is correct.

Q. Based on those credentials, has your career primarily been spent clinically treating children and dependents of service members?

MR. ANTONUCCI: Objection.

THE WITNESS: My career has been a wide variety of things, ranging from operational medicine to clinical medicine to clinical research to -- to administration.

So I have spent, you know, a minimum of five years in each of those fields. So it's -- it's fairly broad. Not often intentionally, but that's how things just worked out.

BY MS. WALLACE:

Q. So approximately five years in treating children or dependents of service members, approximately five years in administrative roles prior to TRICARE. Is that what you mean?

A. No.

MR. ANTONUCCI: Objection.

THE WITNESS: Actually, some of them overlapped. I did five years in operational -- actually, it's seven years in operational medicine. But during that time, I was also treating children one day a week. The -- I spent -- see, one -- four -- eight -- 12, 13 -- 13 in direct, you know, clinical care of children, plus another -- you know, again, I still do pediatric clinic in my role here. So I've never stopped treating pediatric patients clinically.

The -- you know, some years it was -- that was all I did and, others, it was mixed in with other things. And I would -- and I spent ten years now in administrative roles.

BY MS. WALLACE:

Q. Did you testify that even now in your TRICARE role you continue to treat children?

A. Yes, I am -- I hold credentials at Walter Reed National Military Medical Center in the pediatric clinic.

Q. How often are you doing that

currently?

A. Right now, about once or twice a month.

Q. And can you tell me when your career shifted into the administrative role and how much -- and just quantify how much -- how many years of administrative role experience that you have?

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q. Or to TRICARE, if you don't mind.

MR. ANTONUCCI: Same objection.

THE WITNESS: So you know, TRICARE and the direct care system are not, you know, completely separate entities. In the direct care system, we work directly with -- TRICARE health benefit is what manages the care that is received outside. It's a supplement to the direct care system.

So what can't be provided at a particular Navy or Army post and needs to be referred out to the community is -- falls under the TRICARE benefit. So, you know, people go in and out of that benefit

all the time. So we never really stop working with TRICARE.

As far as my role in administration, I was asked to be the DCCS in 2015 and -- out in Hawaii and then have maintained primarily an administrative position and work closely for the first seven years with TRICARE while stationed at a military treatment facility. So, you know, in the direct care system.

And then for the last -- you know, since 2022, I have been working on the other side under the Defense Health Agency. But I still continue to work with the direct care system. So it's all integrated.

BY MS. WALLACE:

Q. The TRICARE position that you obtained in September of 2022, after a six-month retirement break --

A. Correct.

Q. -- did you apply for that position or were you recruited? Tell me how that happened.

A. I applied for the position.

Q. Was that a process, like, interview

and --

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. Yes.

BY MS. WALLACE:

Q. Okay. Can you tell me once you obtained the position, does -- who -- how did it change who paid you before versus who pays you now or --

A. I mean, you know, funding for the military health program is something that's established through Congress. So same as, you know, active duty soldiers are paid through designations by Congress. Congress also pays me now as a GS civilian.

Q. Your -- you work for the DHA now in the Department of Defense?

A. Yes. I mean, the DHA is part of the Department of Defense. You know, same as the Army and the Navy are part of Department of Defense.

Q. So as far as your paycheck, was it coming from -- did it have a different source?

A. It all comes from DFAS.

Q. So not much changed there, just the amounts?

A. Yeah. So -- and not an awful lot there either.

Q. So was it a large pay bump for you, the CMO position?

MR. ANTONUCCI: Objection.

THE WITNESS: No. Actually, I mean, you know, when you count military benefits and pay and things like that, it really amounts to the same amount. I now get my retirement on top of that. So it's a little bit more.

BY MS. WALLACE:

Q. TRICARE is administered by the Department of Defense, which is now subject to the executive order, and is sometimes referred to as the Department of War now; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That is what the department has renamed itself.

BY MS. WALLACE:

Q. And for our purposes today, it's the same thing; Department of Defense, Department of War?

MR. ANTONUCCI: Same objection.

THE WITNESS: Yeah, my understanding

is Congress never officially changed it outside as to the Department of Defense. Confusing.

BY MS. WALLACE:

Q. TRICARE is -- do you agree with me TRICARE is not administered by the Department of Veterans Affairs?

A. That is correct. We are separate from the Department of Veterans Affairs.

Q. And the TRICARE is not administered by the Center for Medicaid and Medicare Services?

A. That is correct. We are separate. All under different secretaries in the government.

Q. Okay. Last question before our one-hour break.

Can you tell me how you are being compensated for your time today for this deposition?

A. This is just a regular duty day for me.

Q. Meaning your federal salary, which you receive from the Department of Defense, is compensating you for your time, not any separate monetary amount?

A. Correct. Yes. I'm not receiving any financial incentive to testify here today. This is -- this is all part of the job.

Q. Part of your regular duties with the federal government?

A. Correct.

Q. All right. And I'm going to stop every hour so that you can keep a clear head and give you a break. So I think we're right at the hour since we started a touch early.

How much of a break would you like, Dr. Ruck? Five or ten minutes?

A. I'm good with five. But if anybody else needs more, I'm happy with that too.

THE VIDEOGRAPHER: All right. We're going to go off the record at 9:55 a.m.

(Recess taken from 9:55 a.m. until 10:01 a.m.)

THE VIDEOGRAPHER: We're back on the record at 10:01 a.m.

BY MS. WALLACE:

Q. Thank you.

Dr. Ruck, we are going to start talking about the TRICARE policy. Can you tell me what statute governs TRICARE policy?

A. So can you hear me?

Q. Yes, sir.

A. Okay. So TRICARE policy -- well, it was established through the National Defense Authorization Acts. It is coded under Title 10 U.S. Code at, I believe, 1072 through 1076.

Q. You testified earlier Congress created the TRICARE program?

A. Yes, Congress established it.

Q. You do not have the authority to change Title 10 independently; is that correct?

A. That is correct. That is under the purview of Congress.

Q. TRICARE eligibility. Will you explain to us what type of persons are eligible for TRICARE, please?

A. Yeah -- so, yeah. So TRICARE eligibility, obviously, the active duty service members, their family members, the -- and so it's automatic for service members and -- and it is also automatic for the TRICARE For Life population. There's no opt in or opt out. You are simply covered by that. The other ones, you can opt in or opt out.

So family members, retirees, certain reserve categories, National Guard categories.

The TRICARE Young Adult Program for those between 23 and 26 who are not yet married and don't have their own health insurance. So those are the basic groups.

Q. If you are not active duty and not a family member of active duty, how else would you qualify for TRICARE?

A. If you're a retiree, you are eligible.

Q. And define a retiree.

A. And retiree family members, by the way.

The -- so retiree is someone who has either completed 20 years of service honorably or has -- or not dishonorably -- and has -- or has been medically retired.

Q. So in order to qualify for TRICARE, you either have to be active duty or have achieved 20 or more years of service or be a family member of either?

A. Or have been medically retired for medical reasons.

Q. Or have been medically retired for medical reasons?

A. Right.

Q. Would you agree with me that it is harder to qualify for TRICARE than it is the VHA program?

MR. ANTONUCCI: Objection.

THE WITNESS: It's a different category. If you are a veteran, you are eligible to be taken care of, regardless of the terms, you know, the length of your service.

However, the VA system does not automatically treat everyone who is a veteran. If you are a -- you know, relatively young, healthy person who did one tour of service and has no medical issues, you are -- they categorize them into different categories based upon the amount of the -- based upon their service history, their medical conditions, et cetera. And depending upon the VA in that area, you may or may not get care within the VA.

The -- for -- for TRICARE, you have to meet one of those enrollment categories, you know, enrollee categories, to be eligible for TRICARE.

BY MS. WALLACE:

Q. For retirees that are eligible for TRICARE, their eligibility reflects decades of service to the United States, not short-term or provisional status. Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: Unless medically retired.

BY MS. WALLACE:

Q. Yes. Unless they qualify under medically retired?

MR. ANTONUCCI: Objection.

THE WITNESS: Right. So if you completed one or two tours as an enlisted person and decided to get out and, you know, before your -- the 20 years was up and were not medically retired, then you would not be eligible for TRICARE.

BY MS. WALLACE:

Q. Do you have to -- for the medical retirement eligibility, can you give me an example of somebody that that would apply to, just so I understand what it means to be medically retired?

MR. ANTONUCCI: Objection.

THE WITNESS: Yeah. So the -- if you are -- if you have a condition which precludes your continued service in the military, you develop a medical condition that you are unable to, you know, perform your duties as -- as required in the military and cannot be reasonably accommodated through profiles, et cetera, then you would -- and are not expected to improve, then the military would go through a -- a process by which they evaluate you, determine if you are expected to get better or to the point where you can complete your duties; or if not, then they help you transition out of the military with retirement status.

BY MS. WALLACE:

Q. So for that category of eligibility, they start -- they're active military and then some type of medical condition, whether it happened in service or out of service, makes them not able to continue in their contract with the military?

A. If they -- right, if they are active duty. If they -- they can also receive medical

retirement if you are a reservist who is activated during that time frame and then, you know, sustained an injury or developed an illness that precluded you from continued service, you would still eligible to go through that process and receive medical retirement.

Q. Are you qualified to tell me approximately how many people have TRICARE?

MR. ANTONUCCI: Objection.

THE WITNESS: We serve about 9.2 million beneficiaries.

BY MS. WALLACE:

Q. And are you -- do you know the breakdown of qualifying individuals as related to the three categories that we've just discussed, active -- active duty, they're in the reserves or, otherwise, retiree with 20 or more years of service and medically -- medically discharged?

MR. ANTONUCCI: Objection.

THE WITNESS: I would have to -- off the top of my head, I would not be able to give you exact numbers. So I would -- I could find that information if the Court wanted me to look that up.

BY MS. WALLACE:

Q. Do you know if one category is the largest majority?

MR. ANTONUCCI: Objection.

THE WITNESS: The -- the -- typically, the active duty -- active duty family member group is the largest. However, we also have approximately equal size of retirees and those who still qualify for the TRICARE For Life.

BY MS. WALLACE:

Q. Based on your 20 or more years of service with the federal government, are you an individual who would be eligible for TRICARE, you and your family?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. We have TRICARE.

BY MS. WALLACE:

Q. And your family -- do you have a spouse?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. She is also retired military. And she would qualify, even if she wasn't.

BY MS. WALLACE:

Q. Understood. So for individuals like

you and your family, TRICARE functions like a health coverage benefit earned through long-term federal service; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Right. We -- we receive the -- we are eligible for the medical benefit, yes.

BY MS. WALLACE:

Q. As a result of your long-term service with the federal government. It -- it's an earned coverage.

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. It is -- we qualify based upon our -- our length of service.

BY MS. WALLACE:

Q. And that's a benefit incentive to achieve -- one of the many benefit incentives to achieve 20 or more years of service with the military?

MR. ANTONUCCI: Objection.

THE WITNESS: It -- yes, it is a -- it is a benefit and one of many towards getting retirement status. But, yes, it's, I guess, an important one.

BY MS. WALLACE:

Q. TRICARE eligibility is not contingent on suffering an injury; is that correct?

A. No. TRICARE is -- unless -- unless the injury was what caused you to be medically retired. So if you had a -- you know, a significant amputation or something like that where you are unable to perform your duties. Although, we do have many people who are amputees who remain on active duty these days with the advances in medical science.

But the -- you know, if it was significant to the point where you were unable to, then, yes, that would be a reason -- that would be considered an injury to be medically retired, and so that injury would then be your primary cause for receiving medical -- you know, medical benefits. However, you are not required to have any injuries when you retire to be eligible.

Q. Once a service member earns retiree status, TRICARE eligibility is not contingent on suffering an injury; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct.

BY MS. WALLACE:

Q. TRICARE eligibility is also not dependent upon whether an injury is service connected; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: No, it is not dependent upon whether or not it is service connected. You may get some disability attached to -- usually to the VA, for those service-related injuries. But that is a different process and it's not -- it's not -- it does not determine your eligibility to enroll in TRICARE.

BY MS. WALLACE:

Q. Right. So that qualification distinguishes TRICARE from the Veterans Health Administration?

MR. ANTONUCCI: Objection.

THE WITNESS: TRICARE is not dependent upon that. And the VA, as I said, the -- they use a calculus to determine, you know, which -- you know, based upon level of disability, length of time in service, et cetera, to determine who is going to receive care in and for

what conditions.

You may receive it for all conditions. You may only receive it for things that are service related or simply not be eligible based upon your time in service or -- and/or availability to receive care at that -- in that particular area.

So there's a different calculus. You don't have to have an injury to be enrolled in the Veterans Health Administration care either. But, you know, it does move you up in the calculus.

BY MS. WALLACE:

Q. Right. They have calculus dependent upon sometimes disability status, sometimes on earning capacity. They have an entirely different formula?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct.

BY MS. WALLACE:

Q. You testified earlier that -- is it only active duty service members are automatically enrolled in TRICARE Prime? Is that a correct statement?

A. Yes. Those are the ones who are only automatically enrolled in TRICARE Prime because it is mandated by Congress.

Q. All other beneficiaries or potential beneficiaries of TRICARE, they must affirmatively elect to enroll in the program; correct?

A. Yes, that is correct. They must enroll. There is -- and then they can choose, depending on where they live, if they wish to be in the Prime or in the Select categories.

Q. Can -- does Prime attach to nonactive duty service members?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. You can be -- you can be a family member enrolled in Prime. You can be a retiree enrolled in Prime.

BY MS. WALLACE:

Q. The -- other than active duty automatic enrollment, all other recipients select to enroll. Was that your testimony?

A. That is correct -- you know, the -- for family members, it's -- it's often done, you know, for them as they in process a unit. So it's very easy for them.

Retirees must go online or call up

and enroll initially. And then provided they don't disenroll, they can -- you know, they'll remain on.

Q. Do you agree that failure to enroll or re-enroll when required can result in a loss of TRICARE coverage?

MR. ANTONUCCI: Objection.

THE WITNESS: If a -- we have people that go in and out of TRICARE periodically. They may get other health insurance and decide not to have TRICARE and then come back in later on. It isn't a "once you leave, you can never come back to it" situation.

BY MS. WALLACE:

Q. Do you agree that failure to enroll or re-enroll when required can result in a loss of TRICARE coverage?

MS. WALLACE: Objection.

THE WITNESS: So re-enrollment is the -- you would have to disenroll or decide to stop payment in order to be disenrolled, in order to be disenrolled. The -- you don't have to call in every year to re-enroll. You have to do it once

and then provide -- and then make sure your payment method stays up to date.

But other than that, the -- you know, you would remain then on, you know -- within either TRICARE Prime or TRICARE Select, depending upon where you elected to be.

For family members, when they move from -- you know, one place to another, they continue. But then they're allowed, again, to choose if they wish to be in Select or Prime.

BY MS. WALLACE:

Q. Is it your testimony that --

A. If they elect not to enroll, then, of course, they are not enrolled.

Q. Is it your testimony that there is an automatic re-enrollment and that you would actually have to actively disenroll once you've enrolled initially?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. The -- you -- or you decide to stop payment, in which case the managed care support contractor would contact you to try to determine if that

was an error or if it was intentional.

BY MS. WALLACE:

Q. When you say "payment," you're referring to premiums, copayments, coinsurance, patient -- any type of patient payment that may be due and owed?

MR. ANTONUCCI: Objection.

THE WITNESS: Yeah. So enrollment fees are primarily the issue there. The coinsurance is not a requirement. The -- and copays would depend upon which plan you were in and where you were seen.

BY MS. WALLACE:

Q. How many of the TRICARE plans require enrollment fees?

A. So that would -- you know, the best way to demonstrate that is on that sheet that I gave you. That goes through all the different -- that table. That goes through the different fee structures as to which groups require enrollment fees.

So, for instance, active duty family members and active duty do not have enrollment fees. TRICARE For Life does not have an enrollment fee. Reserve and reserve family

members do. Reserve -- you know, retiree and retiree family members do. TRICARE young adult does. I think I covered the major categories there.

Q. Do every program -- every TRICARE plan except for Prime and TRICARE For Life has an enrollment fee?

MR. ANTONUCCI: Objection.

THE WITNESS: Yeah, the -- yes, the -- there are fees as established by Congress for enrollment and for those other groups. But, again, the active duty Prime and active duty family members who are enrolled in Prime, not -- not, you know, not for the --

BY MS. WALLACE:

Q. And the -- I'm sorry?

A. Not for the retiree Prime. They do have enrollment fees too.

Q. Just to be clear, every plan but TRICARE Prime and TRICARE For Life has an enrollment fee; yes?

MR. ANTONUCCI: Objection.

THE WITNESS: As I said, you know, if you are a retiree in Prime, you do have an

enrollment fee, but -- also.

BY MS. WALLACE:

Q. Okay. So the only individuals that do not have an enrollment fee are active duty?

MR. ANTONUCCI: Objection.

THE WITNESS: And active duty family members.

BY MS. WALLACE:

Q. Understood.

A. Yeah. I believe that states right there on the -- on that sheet that I gave you.

Q. Thank you.

Is the same true for premium payments? Every program but TRICARE Prime, and even within TRICARE Prime, it's only active duty members and their families that are not subject to copays and coinsurance?

MR. ANTONUCCI: Objection.

THE WITNESS: The copay structure is also listed on that sheet there that I gave you. The -- there -- again, it depends upon the plan you're in as to what the copays are.

And then to put it in perspective, you know, the enrollment premium, you

know, that's the enrollment fee is about one-tenth or one-twelfth of what you would, you know, be able to purchase it in, you know, if you were to purchase your own independent one.

So -- and the same, you know, with copays, that they are -- they -- they exist if you receive care in the -- you know, through -- you know, in the civilian network, you do not have copays if you are seen within the military treatment facility.

BY MS. WALLACE:

Q. All beneficiaries of TRICARE programs, with the exception of active duty members and their family, can be subject to copays, premiums, and coinsurance?

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q. As well as enrollment fees. Is that a true statement?

MR. ANTONUCCI: Objection.

THE WITNESS: The -- not regarding other health insurance. The -- if you have other health insurance, they are

typically the first billed. TRICARE is always second payor in those cases. But you are not required to have other health insurance.

BY MS. WALLACE:

Q. Yes, and I don't think that was my question. I'm talking about if they're using the TRICARE program.

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q. Not if they're using other health insurance.

A. It would --

MR. ANTONUCCI: Same objection.

THE WITNESS: -- it would depend on where they're being seen. If they're seen in the MTF, the military treatment facility, then there is no copay, regardless of which. If you're seen out in the civilian network, then, yes, there are typically copays associated with that.

And the amount is dependent on whether you are a Prime enrollee or a Select enrollee. Select enrollees typically have something higher copays,

but lower premiums for enrollment, and -- versus the Prime category.

BY MS. WALLACE:

Q. And I think you're giving me more information than I'm asking for in my questions. So I'm going to ask -- which is probably because you're so knowledgeable, but let me ask my question one more time. Okay?

Is it true that all beneficiaries of TRICARE, when they are receiving benefits under the TRICARE plans, all beneficiaries can be subject to deductibles, copayments, premiums, enrollment fees, and coinsurance?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, depending upon the -- on which, you know, they are Prime or Select, then, yes. You know, the amount would change, but, yes, they do have those.

BY MS. WALLACE:

Q. Okay. So the only TRICARE recipients that are not subject to patient payments of any kind are active duty members and their families, or are those beneficiaries also sometimes subject to those patient payments, depending upon the

circumstances?

MR. ANTONUCCI: Objection.

THE WITNESS: The family members, if they are seen in the community, while they don't have enrollment fees, they sometimes will have copays. The active duty never have copays or premiums.

BY MS. WALLACE:

Q. Okay. So just active duty members are the ones that are not subject to copayments or patient payments of any kind?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct. The -- and then TRICARE For Life is -- is a -- that is a different structured program. The copays set there -- we do not establish copays for that group.

You know, your primary coverage is typically Medicare, you know, in that group and we are the second payor for that. So we are wraparound insurance. We don't require copays on that. We pick up the charges that Medicare doesn't.

BY MS. WALLACE:

Q. But what TRICARE does require, as it

relates to TRICARE For Life, is you require the TRICARE beneficiary to opt in to Plan B coverage, which has a premium associated with it; is that true?

MR. ANTONUCCI: Objection.

THE WITNESS: If they are eligible, they have to enroll in Plan B.

BY MS. WALLACE:

Q. And they are eligible to be eligible for TRICARE For Life, they're always eligible?

MR. ANTONUCCI: Objection.

THE WITNESS: Yeah. I can't -- off the top of my head, I can't think of a situation where they would not -- well, no, I think -- I think -- yes, I can't think of a reason why they would not be eligible for Plan B, off the top of my head.

BY MS. WALLACE:

Q. So for TRICARE For Life to receive -- to receive it, you have to pay a premium due to a required enrollment in Part B. Meaning everyone that's on TRICARE For Life is paying a premium, period; is that right?

MR. ANTONUCCI: Objection.

THE WITNESS: It's not our requirement. That's -- you know, that's the Medicare's requirement.

BY MS. WALLACE:

Q. Yes. Exactly.

Do you have an understanding on how TRICARE eligibility can change based on life -- life events affecting the beneficiary status?

MR. ANTONUCCI: Objection.

THE WITNESS: Could you be more specific as to --

BY MS. WALLACE:

Q. Yes, I can.

So, for example, does a spouse's TRICARE coverage, can it end at midnight on the date of a divorce from the qualifying military recipient?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. And the -- this -- you can find this in Title 10 U.S. Code as, you know, in the 1070s series. So it lists out all -- all those conditions.

But the -- it would depend upon the length of time that they were married to

the spouse, the spouse's service period, you know, how -- the -- whether they were married to them for the entire time that they were in the service, et cetera, et cetera.

So there's different scenarios for -- for that. It's a rather complicated calculus.

BY MS. WALLACE:

Q. But a life event such as a divorce, can end an individual's access to TRICARE coverage?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, in some circumstances it can or if they remarry.

BY MS. WALLACE:

Q. That was my next question.

If a -- let's say a qualifying military individual passes away and the surviving spouse remarries, can TRICARE eligibility be terminated under the plan rules?

MR. ANTONUCCI: Objection.

THE WITNESS: The --

BY MS. WALLACE:

Q. And my question is can?

A. Can --

MR. ANTONUCCI: Same objection.

THE WITNESS: Yes, it can.

BY MS. WALLACE:

Q. Can children's eligibility for TRICARE be terminated?

A. When they reach certain ages.

Q. Do you know those ages?

A. Yes. It's 21, unless you are in a -- you know, in an institute of higher learning, in which case you can continue to age 23. Between 23 and 26, they are, in most cases, eligible for the TRICARE Young Adult Program. And they can also be eligible if they are declared -- if they are a dependent adult, who -- you know, relies on their parents who have the benefit and they can then remain eligible for their entire life.

Q. Under the plain language of the TRICARE plan in regulations, continued TRICARE coverage for spouses, children, and other dependents can be conditional.

Would you agree with me?

MR. ANTONUCCI: Objection.

THE WITNESS: Typically, even if the spouse remarries, the children remain

eligible for TRICARE, provided the service member, you know, sponsor is still eligible, and they meet the age requirements.

BY MS. WALLACE:

Q. Their eligibility can be conditional under the TRICARE statute?

MR. ANTONUCCI: Objection.

THE WITNESS: I -- as I said, as long as they meet -- as long as the sponsor is still eligible for the TRICARE benefit, meaning they're still in service or they're a retiree and they were within the proper age, their -- the children -- the dependent, you know, because they are still considered the dependents of that individual or that sponsor, they even -- even if the spouse remarries someone else, they are still eligible for coverage under the sponsor's benefit.

BY MS. WALLACE:

Q. And I think you're answering with respect to what? Children under the age of 18?

A. 21.

Q. Under the age of 21.

Spouse's coverage can be conditional. Do you agree with that statement?

MR. ANTONUCCI: Objection.

THE WITNESS: Spouse's coverage would be -- could be conditional based upon marital status.

BY MS. WALLACE:

Q. Is the continued health care benefit program one that must be enrolled, opted in?

A. I'm sorry. Could you repeat that question?

Q. The continued health care benefit program, is that one that you must actively enroll in?

A. The continued health care program. I mean, are you referring to TRICARE or --

Q. Yes.

A. Well, as I said, you know, for active duty, you're automatically enrolled. For TRICARE For Life, you're automatically enrolled. For the other ones, you are enrolled and then you continue until you're disenrolled or -- and then you can't disenroll and come back into it. But, yes, you would need to have been enrolled at some point.

Q. And the same for the TRICARE Young Adult Program, you have to enroll?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, that is correct.

BY MS. WALLACE:

Q. And there are deductibles and applicable copayments and cost shares associated with that program?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, there are enrollment fees and copays associated with that.

BY MS. WALLACE:

Q. Your designations discuss that TRICARE is typically the secondary payor. Will you explain that for the Court?

A. So if you -- let's say you are a retiree, but -- and then you have a second job and you're -- and your job offers health insurance through Blue Cross. Blue Cross would the primary payor and TRICARE would be the secondary payor.

So they would pick up whatever fees that, for instance, you know, copays that -- that the primary insurer might require, TRICARE can

step in and cover those for you. So, basically, you owe nothing.

Q. And your designation states, quote, "TRICARE benefits are also secondary to medical insurance." Is that right?

A. That is correct. The -- to other health insurance, you know, OHI, other health insurance, they are primary. Same thing with Medicare, they are primary, Medicare, and then TRICARE is secondary.

Q. What about VHA benefits?

MR. ANTONUCCI: Objection.

THE WITNESS: No, actually those two are not exclusive. You can have both for that and you can use either/or.

BY MS. WALLACE:

Q. Meaning TRICARE is not secondary?

MR. ANTONUCCI: Objection.

THE WITNESS: Yeah, that is correct.

BY MS. WALLACE:

Q. If TRICARE receives a claim before the other insurer processes it, TRICARE is permitted to deny the claim; is that correct?

A. It wouldn't necessarily be a denial. It would be a return to -- to the person who

filed it, stating that they need to refile it under their primary insurance first and then list TRICARE as secondary. And they can either do that themselves and file it themselves or most -- in most cases, the -- the -- the provider will simply do that for them.

Q. Does the care under TRICARE program have to be determined to be medically reasonable and necessary in order to be covered?

A. So we do have a requirement, as stipulated by Congress, that the -- that the care that is rendered through the TRICARE health benefit must be, you know, safe and effective.

Q. You don't have a reasonable and necessary requirement?

A. And have -- and there must be a medical necessity for that. For instance, we would not be able to cover cosmetic surgery, if there was no medical necessity for it.

Q. So TRICARE does have a medical necessity requirement to -- prior to authorizing the coverage for that particular service?

A. Yes. If there was -- for instance, if there was car accident trauma, then cosmetic surgery would be authorized because there's a

medical necessity for it.

Q. There are a number of reasons that TRICARE may deny coverage. One is medical necessity that we just talked about. One is if other -- other insurance could pay on the claim.

Are there other instances of coverage denial under the TRICARE system?

MR. ANTONUCCI: Objection.

THE WITNESS: You know, for the case of other health insurance, I said it's not really a denial, it's a -- you know, they need to go through the proper filing in order to be coverable. You know, they have to file it correctly through the other health insurance first and them second.

The -- and, you know, so the -- the -- if Congress has specifically excluded a -- a -- a medical benefit, then we can't cover that. Otherwise, it just has to meet medical necessity.

BY MS. WALLACE:

Q. So approval of services is subject to the strict policy that Congress has set out as to which services are covered; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: So Congress has the ability to place restrictions on certain things. For instance -- I can give you an example.

TRICARE For Life individuals, we're not allowed to pay for, at this point, GLP-1s for obesity management because it was specifically excluded by Congress.

BY MS. WALLACE:

Q. And Congress can, at any point in time, make changes to the TRICARE services covered; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: We -- we can sometimes see them make -- make changes to the health benefit -- mostly to add benefits through the National Defense Authorization Act each year.

BY MS. WALLACE:

Q. At any point in time, Congress can make changes to the services that TRICARE covers; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Congress can decide

to -- to -- to add benefits or change eligibility -- eligibility based upon status of the medical -- you know, of medical science, medical benefit determinations, et cetera. Yes. So they can make changes through law.

BY MS. WALLACE:

Q. They can also make changes to limit coverage; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: It is -- it is possible they could do so. I said most of the time when they make a change is to add a benefit.

BY MS. WALLACE:

Q. But sometimes they limit benefits and that's within their capacity to do; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: It is possible that they could do so.

BY MS. WALLACE:

Q. Would you agree with me that change is something that occurs within the TRICARE system?

MR. ANTONUCCI: Objection.

THE WITNESS: TRICARE is always looking for ways to improve the benefit.

BY MS. WALLACE:

Q. Are you able to answer my question?

A. Well, I mean -- I would --

MR. ANTONUCCI: Same objection.

THE WITNESS: -- I would imagine those are --

BY MS. WALLACE:

Q. I'm sorry. What was that, Dr. Ruck?

A. Those are -- as we make changes to -- you know, to make improvements, those would be considered changes.

Q. Right. Changes of any kind occur within the TRICARE system; changes to copayments, increasing those copayments. Would you agree with me?

MR. ANTONUCCI: Objection.

THE WITNESS: We have no ability to change that. We can only make recommendations on medical benefit determinations to change it or change how, you know -- how certain processes are performed in the management of the contract. But we do not -- we do not --

we are not allowed to make any changes regarding -- within the DHA regarding payments.

BY MS. WALLACE:

Q. And my question was about Congress.

A. Oh, I'm sorry. I thought you were talking about DHA.

Q. No, that's okay.

Congress can make changes -- increases to copayments. Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, they have the ability to do so.

BY MS. WALLACE:

Q. Congress can also make changes to cover services, either improving covered services or making certain services not available to claimants. Do you agree with that statement?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, they can -- they can change, you know, through legal -- they can update the -- the legal code.

BY MS. WALLACE:

Q. TRICARE policy manuals have been amended many times over the life of the program.

Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. Every time we make, you know, a change in how the -- the contract is administered or a benefit is -- medical benefit determination is made, is considered a manual change.

BY MS. WALLACE:

Q. Do you know how many times that Congress has changed, modified, the TRICARE policy manual?

MR. ANTONUCCI: Objection.

THE WITNESS: The TRICARE policy manuals are updated through the Defense Health Agency. We sometimes receive direction from Congress to -- you know, as to what they want to have done. But we actually have to be the ones that go in and update the policy to meet the law.

So it's not so much Congress who changes the policy manual, as it is we update it to be in sync with what is the medical benefit.

BY MS. WALLACE:

Q. Thank you.

Do you know how many times the DHA has modified policy to be consistent with Congress's statute changes?

MR. ANTONUCCI: Objection.

THE WITNESS: Off the top of my head, because it isn't just Congress that -- that requires updates. Like I said, if we do a medical benefit determination, if we -- and decide to add, you know, that a benefit now meets, you know, safe and effective criteria, that requires a -- an update, you know. But, again, those were -- are not something that Congress would direct. They -- you know, that sort of blanket oversight that we are supposed to do those things. So we update those.

So however many times -- we do it based on Congress. I would have to go and research that.

BY MS. WALLACE:

Q. Do you know if online your program redlines the number of changes that have occurred to the TRICARE policy manual?

MR. ANTONUCCI: Objection.

THE WITNESS: Any time there's a

change, we update either the operations manual, the policy manual, the reimbursement manual, et cetera. Those always involve redline changes because we change wording within it.

I could not tell you the number of times that that has occurred. But any time that something is updated, it's considered a redline change.

BY MS. WALLACE:

Q. Do you -- if your colleague, Carmen DeLeon, testified in the Red Hill litigation that there were over 125 changes to the TRICARE policy manual, the 2015 manual, do you have any reason to disagree with her testimony under oath in that litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: I -- that is entirely possible. I would have to go look up the exact number of times that it was -- but that is a reasonable number.

BY MS. WALLACE:

Q. There is now a TRICARE policy manual, April 2021 edition, T5, that was last updated on September 12, 2025. And according to your online

website, it states the most recent change number was 42.

Do you have any reason to disagree with that change number on the current policy manual?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I have no reason to disagree with that.

BY MS. WALLACE:

Q. The -- TRICARE -- are you aware that TRICARE Select replaced the TRICARE Standard plan under TRICARE?

A. Yes. I mean, it was -- there was originally three plans: TRICARE Prime, TRICARE Extra, and TRICARE Standard. Congress decided to remove the Extra and Standard and replace that with TRICARE Select.

Q. Are you aware that when Congress replaced Standard with Select, it changed the enrollment requirement?

MR. ANTONUCCI: Objection.

THE WITNESS: I am not aware personally of a change in enrollment requirement for that. The -- I would have to go research that.

The TRICARE Select has been, you know, since I've been in leadership position, has been the -- the plan that's been in place. I would have to go back and research that to determine if that did occur.

BY MS. WALLACE:

Q. Are you aware that when Congress replaced TRICARE Standard with TRICARE Select, they authorized greater cost sharing for the patients under Select for many beneficiary categories?

MS. WALLACE: Objection.

THE WITNESS: I would not be surprised if they restructured the fee structure when they did that. The -- again, I would have to go and look at the exact numbers to be able to tell you to what degree it changed.

BY MS. WALLACE:

Q. Are you generally aware that beneficiaries have to pay more out of pocket to access the same or similar care under the TRICARE Select program, which replaced the prior TRICARE Standard plan?

MR. ANTONUCCI: Objection.

THE WITNESS: I would have to check which -- what were the copays required under Standard to be able to answer that question truthfully.

The -- you know, the -- for the current structure, you know, Prime versus Select, the enrollment fees are typically lower for Select, but the copays are slightly more, but it also gives you greater choice. So you can choose your own provider.

Whereas, Prime, you know, there is slightly higher enrollment fees, but lower copays, but it's also you have to receive an authorization through your -- through your, you know, primary care manager to be referred to specialty care. Those are the differences in why the fee structures are different.

MS. WALLACE: I'm going to upload into the chat feature what's been previously marked as Exhibit 10 and I'm going to share it on the screen for you.

(Exhibit 10 marked for

identification.)

BY MS. WALLACE:

Q. Do you recognize this document?

A. Federal Register? No, I do not recognize this document. I would have to read it.

Q. Do you recognize the Department of Defense Office of the Secretary 32 CFR part 199, Establishment of TRICARE Select and other TRICARE Reforms?

A. 32, I -- I believe that I am aware of the general gist, but I have not read this specific document to determine if it's the -- you know, the specifics of what it says here. I would have to take a minute to read it.

Q. Sure. Take a moment and see if you can familiarize yourself with it.

It looks like it states, "For further information, contact Mark Ellis, Defense Health Agency, TRICARE health plan."

A. Okay. I can go on to the next page.

Q. And if it helps, I'm going to ask you about the part highlighted at the top of 437 -- I'm sorry, 4327.

A. Sorry, taking a little bit. This is

very small on my screen.

Q. Let me know if I need to increase it for you. How's that?

A. There we go. Now it's changed.

Q. So I will represent to you that the document we're looking at is the Federal Register, which is the federal government's official daily publication where agencies publicly announce new roles, proposed changes, and legal notices so that the public can see what the government is doing.

A. Yes. I just haven't read this specific edition here. So just --

Q. And the public comments that you're reading, they state, "Establishment of the TRICARE Select," and the date on this is February 15, 2019.

Do you see that?

A. Yes.

Q. And I was going to ask you --

MR. ANTONUCCI: I'm sorry. Dr. Ruck, were you finished reading the document?

THE WITNESS: I'm not quite finished reading the document yet.

BY MS. WALLACE:

Q. Okay. Go ahead. You take your time. Can you see the whole document now?

A. I can see most of it now.

Okay. I can see it now, yes.

Q. Tell me when you're ready for the question. Take your time.

A. Okay.

Q. Would you agree with me after reading the document that TRICARE Select did increase out-of-pocket costs for certain TRICARE beneficiaries under the new plan?

A. So it looks like what they're talking about here is that they went from being a percentage to a fixed amount. So that the -- if you went to a specialist who had a much higher fee, that you wouldn't be paying on a percentage, you would be paying on a straight fee for that. This would apply mostly to folks who started their service after 2018. So that would be Group B.

And so they had slightly higher fee structures compared to Group A, which is those who had first period of enlistment 4/20/18, which, I believe, would be the case for all the people who we're considering here in this case.

Q. Would you agree with me that TRICARE Select increased beneficiary total out-of-pocket costs for certain TRICARE beneficiaries?

MR. ANTONUCCI: Objection.

THE WITNESS: The -- the --

BY MS. WALLACE:

Q. If you can say --

A. -- there are likely some areas where they paid more than they may have in the past and other areas where they probably paid less.

Q. So, yes, for some it increased out-of-pocket costs?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, in certain cases, there probably were a few areas where those costs increased based upon the new structure that they introduced.

BY MS. WALLACE:

Q. And it looks like --

A. Congressionally mandated.

Q. -- in the public comment section, which is highlighted on your screen, it looks like one of the complaints of the public was -- and I'll read this for you.

"The department received multiple

comments expressing dissatisfaction with the TRICARE Select cost sharing, grandfathering, higher catastrophic caps, and how the increased fees were calculated. Many comments generally noted that fixed rates create a barrier to health care. It was expressed that service members and their families were promised free health care and that promise has been broken."

Do you read that?

MR. ANTONUCCI: Objection.

THE WITNESS: I -- yeah, I can see where it says that there, yes.

BY MS. WALLACE:

Q. You weren't involved in this process back when TRICARE Select replaced TRICARE Standard?

A. No. No, I was not involved in any of the decision-making that went into this. And this was -- this at the direction of Congress. So, really, nobody was involved in the decision-making except for them.

Q. Yes, exactly. And that's actually what the response says, if you read the very next section.

It says, "Response: We recognize the

TRICARE Select cost shares and enrollment fees are higher than many expected. First, for Group B beneficiaries, the newly enacted out-of-pocket expenses are fixed by law" -- and then they quote 10 U.S.C. 1075 -- "and the department has implemented them without any modification."

I read that to mean, yes, we realize that those costs are higher, but we are doing exactly what we have been told to do by Congress.

Do you agree with that recap?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I mean that -- I agree with the response that they implemented them as directed by Congress, yes.

BY MS. WALLACE:

Q. And so I had asked you a question earlier as to whether you were aware of increase in out-of-pocket costs and cost sharing on behalf of the beneficiaries of TRICARE.

Can we agree that this is an example where Congress has made a change that increased costs for beneficiaries over their objections?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, that there was a change in the fee structure here, particularly for those who started their service after 2018. The -- and, yes, there, you know -- there were increases for certain categories.

BY MS. WALLACE:

Q. And those categories was the higher catastrophic caps, increased cost sharing for some, would you agree?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. They are still much lower than what you would find in most commercial health plans, if you were to try to get your own health insurance.

But, yes, they are increased from what they were previous.

MS. WALLACE: All right. And my paralegal has told me we are at an hour.

Would you like to take a 5- to 10-minute break.

MR. ANTONUCCI: I would.

THE WITNESS: Yes.

THE VIDEOGRAPHER: We're going to go off the record. 11:06 a.m.

(Recess taken from 11:06 a.m. until 11:16 a.m.)

THE VIDEOGRAPHER: Back on the record. Time is 11:16 a.m.

BY MS. WALLACE:

Q. Dr. Ruck, before the break we were talking about changes to the TRICARE program, such as changing TRICARE Standard to TRICARE Select and how that affected cost sharing.

You produced, in this case, a reliance document that we've mentioned several times today. It's entitled the "TRICARE 2026 Cost and Fees," with the Bates Stamp Number Ruck_USA_1 through 4.

Based upon that document that you just closed, does it also reflect a change for 2026 and TRICARE pharmacy copayments to increase those changes -- those payments effective January 1, 2026?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, there -- the pharmacy copays have been adjusted. This goes along with that fee structure from Congress. This is predecided. We just implement their -- the fee structure as they require per year.

BY MS. WALLACE:

Q. Correct. So effective January 1st, 2026, TRICARE beneficiaries are subjected to an increase in their copayments, as it relates to pharmacy copayments, which is consistent with the document that you produced; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, there's a slight increase for home delivery and retail network pharmacy drugs. The MTF is still free.

BY MS. WALLACE:

Q. Were there other increases for the 2026 reflected on the document that you rely upon?

MR. ANTONUCCI: Objection.

THE WITNESS: I would have to pull up 2025 to see if there was any changes to the other fee structures to compare them.

BY MS. WALLACE:

Q. Are families -- how are families informed of these changes to their out-of-pocket fees?

A. They are -- these are posted on the tricare.mil website, which are available to

anyone who wants to pull up -- you don't have to have any special CAC card or anything else like that, access so you can pull these up to see them.

And then the pharmacy costs, I believe that there was a -- an email that went out to -- I think I remember getting one of those that said this is the new fee structure for the pharmacy.

Q. And do they have any say in these copayment increases?

MR. ANTONUCCI: Objection.

THE WITNESS: By "they," who are you referring to?

BY MS. WALLACE:

Q. The beneficiaries.

MR. ANTONUCCI: Same objection.

THE WITNESS: No, this is -- this is established by Congress.

BY MS. WALLACE:

Q. The old -- before TRICARE was enacted in the '90s, this program used to be called CHAMPUS; is that correct?

A. That is correct. Yeah. This is the -- yeah, how it was reorganized, yes.

Q. TRICARE is how CHAMPUS was reorganized?

A. Correct.

Q. And are you aware that the original CHAMPUS program did not have premium and enrollment fees, like traditional insurance?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I am aware that -- of how -- the basics of how CHAMPUS was operated. But, yes, it was simply, you know, basically the providers would send in their -- their -- the fees for the service and the MTF would then pay it.

BY MS. WALLACE:

Q. And as your designations reflect now, the amount of beneficiary contribution can change based upon whether the beneficiary receives care -- direct care through a military treatment facility, network/participating providers, or nonparticipating providers; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. Yes. The -- the fee structure is different, particularly between the MTF, which is basically free, and the -- and then the -- if you were

sent to a civilian provider. The -- if you go to a nonnetwork provider without a referral, meaning -- so if the managed care support contractor sends you to them, then the fee structure is the same.

If you -- if you go to that because you elect to -- like, under the Select plan, you can choose to go to out-of-network, then you have -- then your fee structure is higher.

BY MS. WALLACE:

Q. So under the TRICARE program, you can see a doctor that you want to see, but you're going to pay more for it. Is that a fair and accurate representation?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, that is correct. You can choose to go and see a provider who is not a network provider, but you will end up paying more as far as copays or point-of-service charges.

BY MS. WALLACE:

Q. Tell the Court who administers the TRICARE program.

A. So the Defense Health Agency and,

specifically, the TRICARE health plan portion of the Defense Health Agency, provides oversight for the contract for the TRICARE health benefit.

Q. Contractors administer the TRICARE program?

A. We contract out, you know, for -- to Human and TriWest, International SOS, to administer the TRICARE program, the TRICARE overseas program are -- you know, and then we provide oversight to them to make sure that they are performing as required and meeting contract requirements.

Q. And so the Department of Defense and the department -- I'm sorry. The Defense Health Agency, they hire a third-party administrator to administer the TRICARE program?

A. Correct.

Q. And is that similar to how it's done with a regular insurance policy, to your knowledge?

MR. ANTONUCCI: Objection.

THE WITNESS: No. There's some differences between a -- you know, a commercial health plan and -- and the health benefit program as set up by

Congress.

So we provide a lot more oversight. We have a lot more requirements for things like population health, case management, disease management, audits, then a traditional, you know, commercial health plan one would have.

The -- we also establish the fee structures, not the commercial health plan. We are the folks who have the ultimate authority for appeals for pharmacy and -- and medical benefit cases, so on and so forth.

BY MS. WALLACE:

Q. And is it Congress that establishes the fee schedules?

MR. ANTONUCCI: Objection.

THE WITNESS: Congress will -- has established the fee structure with how it relates to enrollment fees, copays, the catastrophic cap, et cetera. They are the ones who set those numbers.

BY MS. WALLACE:

Q. As far as funding for TRICARE, would you agree with me that it is funded by both

patient contribution, which are the enrollment Ps, premiums, deductibles, copayments, coinsurance, out-of-pockets that we've talked about today, as well as a Congressional appropriation?

MR. ANTONUCCI: Objection.

THE WITNESS: The -- the amount that is contributed by the individuals is fairly small compared to what is given by the -- you know, through the -- appropriated by Congress.

BY MS. WALLACE:

Q. I didn't ask about the proportionate difference. I asked if it was funded by both patient out of pockets, as well as Congressional appropriations.

MR. ANTONUCCI: Objection. Please be respectful to the witness.

THE WITNESS: So the -- the -- those -- those fees that the -- that are provided by the -- there are some contributions by the patient, and they go to the managed care support contractor as, you know -- you know, for to -- you know, I'm not sure it's used -- I'm not sure the

term "to help to support" is correct.

But they do go to the managed care support contractor, as allowable by Congress as part of the funding for that. They don't go to the -- like, for instance, to the Defense Health Agency.

MS. WALLACE: I'm going to upload a document for you, sir.

(Exhibit 12 marked for identification.)

MS. WALLACE: Please let the record reflect that I've uploaded Exhibit 12 for the witness, and I am going to show it to him and counsel on the screen.

THE WITNESS: It's not here yet.

MS. WALLACE: One moment. Trying to get it ready for you.

BY MS. WALLACE:

Q. In your role as the CMO of TRICARE, are you familiar with the Department of Defense Agency Financial Report?

A. I am aware that there is one. I do not contribute to the making of it.

Q. Do you know who at TRICARE does?

A. No. I would have to ask my boss if

there are any ones -- any folks who -- from our area or if this is strictly someone in -- from, like, the sixth section of the Defense Health Agency who puts this together.

The -- so -- yeah, more than likely, the -- the financial folks are the ones who do this, and they are not part of the TRICARE health plan.

Q. Do you know, is this document prepared by the Department of Defense?

A. It appears to be so. It's got the Department of Defense logo on it there.

Q. And you are an employee of the Department of Defense?

A. That is correct.

Q. And so based upon your knowledge, the Department of Defense is responsible for the accuracy of the statements in this report; correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That would be my understanding.

BY MS. WALLACE:

Q. And do you know if this document, the Agency Financial Report is prepared for Congress

and the public?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not know if the public is -- is -- has access to this or not.

BY MS. WALLACE:

Q. If it's on the web, would you assume that the public has access to it?

MR. ANTONUCCI: Objection.

THE WITNESS: That is a very distinct possibility. I would have to go and pull it up -- try and see if I can pull it up myself outside of the Department of Defense to see if it's something that requires any special login key to receive it. But if it's out on the general web, then I would guess it is probably available to anyone.

BY MS. WALLACE:

Q. And on -- I'm scrolling through the document. And I was going to show you, on page 4, there's a message from the Secretary of War, who is currently Pete Hegseth.

A. Yes.

Q. All right. I want to draw your

attention to page 157 of this document.

Can you see this screen?

A. Yes. Let me -- I can see it now, yes.

Q. Can you read for me the title of this section in the report.

A. "Other Military Insurance Programs."

Q. And can you please read for me how the Department of Defense classifies TRICARE in the first highlighted section?

A. Okay. So these are referring to the Premium Base Health Benefit plans, consist of several programs, offered active duty, active duty family members, retirees, reserve members. The TRICARE insurance portfolio includes the TRICARE Prime, TRICARE Select, and Continued Health Benefits Programs (CHCBP) -- the TRICARE Young Adult Program, TRICARE Reserve Select, TRICARE Retired Reserve. The majority of these programs are intended to be budget neutral, meaning that the premiums should match the outlays. Premiums are adjusted either upward or downward for each calendar year to maintain this neutrality.

Q. So my first question about the

document is would you agree with me that this document, which was prepared by the Department of Defense, explicitly labels TRICARE as an insurance portfolio?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I would not categorize this as a health insurance portfolio. It's a -- these are health benefit plans.

BY MS. WALLACE:

Q. Would you agree with me that the plain language of this document states, and I quote, "The TRICARE insurance portfolio includes TRICARE Prime, TRICARE Select," et cetera.

Do you agree with me that those words exist on the page?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, those words exist on the page. I would -- they -- whoever put this together, apparently, is not familiar with Congressional terminology.

BY MS. WALLACE:

Q. So you disagree with how the TRICARE program has been verbalized by your own department?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say that the -- since we are a Congressionally-defined program, that the -- that the Congressional language would take precedence over, you know, what was included here by the Secretary of Defense.

So it's -- so I'd say that's how Congress defines it and that's how we have to operate. So I would say that that was an error that was put on the page and not caught.

BY MS. WALLACE:

Q. And it's not just at that component of the page, it's in the title, "Other Military Insurance Programs."

Do you agree with me?

MR. ANTONUCCI: Objection.

THE WITNESS: I agree that those words are on the page, yes.

BY MS. WALLACE:

Q. Do you agree with me it also states, "The total amount of insurance premium collections were $1.0 billion in fiscal year 2025."

Do you see that language?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I can see that.

MR. ANTONUCCI: I'd like to note for the record, this is a 262-page document the witness testified he's never seen before.

BY MS. WALLACE:

Q. Do you also agree with me that the report discusses, on page 157, which is where TRICARE appears, do you agree with me that it says, "The benefit cost for fiscal year 2025 correlates to the premium collections reported"?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm sorry. I'm trying to find that again. Where?

BY MS. WALLACE:

Q. My pleasure. It's right here.

A. Okay. Are you implying that the -- that the amount spent on the TRICARE health plan was 1 billion and that correlates to the 1 billion collected in premiums?

Q. No. I'm actually just asking you to confirm that that sentence is on the page.

A. Yes, that sentence is on the page.

Q. Can you explain the sentence that we read earlier. It says, "The TRICARE insurance portfolio" -- and then it names the different types of plans under the TRICARE program.

And then the next two sentences have to do with how the premiums are set. It states, "The majority of these programs are intended to be budget neutral, meaning that the premiums should match the outlays. Premiums are adjusted either upward or downward for each calendar year to maintain this neutrality."

Do you see that language?

A. Yes. But by "budget neutral" there, they're referring to previous years budgets. They're not referring to the outlay of premiums collected by beneficiaries.

They're -- the actual costs, which are a matter of public record, are -- we have spent approximately $9 billion each year on just the TRICARE portion of the -- of the -- you know, of the military health system.

So, you know, the majority of this, you know, is -- comes from Congress. They are intending the contributions, I believe, to be budget neutral, is what they're referring to

here.

Q. Meaning Congress can increase or decrease the amount of the premiums in any given fiscal year to ensure that the programs remain budget neutral?

MR. ANTONUCCI: Objection.

THE WITNESS: That is the intent behind it. But they are also cognizant of the -- so, for instance, as health care costs rise across the country, per member, per month costs rise. The amount of funding that they put into it has to match that, as well as they -- any premiums contributions made by the enrollees.

BY MS. WALLACE:

Q. Would you agree with me that TRICARE can be both statutorily authorized and also function like an insurance program, as it indicates in the Department of Defense document we're looking at right now?

MR. ANTONUCCI: Objection.

THE WITNESS: There are some similarities between a -- a health insurance plan -- plan and a health -- our health benefits program. They both, you

know, process referrals. They both, you know, receive claims and process claims for reimbursement to the providers. They -- they both have enrollment fees.

The scope is what's different there. They have copays in some conditions. But for us -- you know, for them, they have copays all the time; for us, we have copays some of the time.

And then there -- how the pharmacy benefit is managed is quite different compared to how they typically manage theirs -- their program. So there are lots of differences, but there are some similarities.

BY MS. WALLACE:

Q. And one of those similarities is that the TRICARE program collects insurance premiums, calls them insurance premiums, and tracks them as insurance revenue?

MR. ANTONUCCI: Objection.

THE WITNESS: Inside the DHA, we do not refer to them as insurance premiums. They are enrollment fees and enrollment premiums.

BY MS. WALLACE:

Q. And a premium is a premium. Do we agree on that point?

And a deductible is a deductible. The words mean the same thing, whether it's TRICARE or it's a regular insurance policy.

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, they are -- they are both premiums and they are both copays or, you know, deductions.

BY MS. WALLACE:

Q. And so premiums, deductibles, plans, copays, coinsurance, all of that is consistent with insurance plans. Do we agree on that?

MR. ANTONUCCI: Objection.

THE WITNESS: They -- they all -- they both have them, yes. The scope of what is paid is what is different. And who sets the -- the -- you know, the copay, the premiums, et cetera. One is set by Congress, the other is set by a corporation.

BY MS. WALLACE:

Q. And would you agree that the fact that TRICARE is statutory in origin does not

eliminate the fact that it does have insurance characteristics?

MR. ANTONUCCI: Objection.

THE WITNESS: As I said, there are some similarities.

BY MS. WALLACE:

Q. The bottom sentence on the page, will you read that verbatim into the record, please.

If -- and I'll be happy to zoom in on it so you can see it clearly.

A. Now I can see it, yes. Okay.

"Unfunded actuary liabilities" in parentheses "4.23.3 [sic] billion for fiscal year 2025 related to MHS are reported in Table 13A where it is referred to as Military Pre Medicare-Eligible Retiree Health Benefits. The estimated MHS liability for incurred-but-not-reported" in parentheses -- actually, that's beyond what you wanted me to.

Q. It is, but I didn't mind.

A. Okay.

Q. My question has to do with the phrase at the very beginning of the sentence, "Unfunded actuarial liabilities." And my question for you is Congress must vote every year to fund TRICARE;

is that right?

A. It is part of the defense health -- of the defense budget, yes.

Q. And so to keep the TRICARE program operating, Congress has to agree to fund it on an annual basis?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, they -- they have to approve a budget every year.

BY MS. WALLACE:

Q. Is there any text that you can point me to today that states that future TRICARE programming and/or funding is guaranteed indefinitely?

MR. ANTONUCCI: Objection.

THE WITNESS: I can only look to the past to state and what we -- and the direction that we've been given by folks higher than us in the Department of Defense, that -- that TRICARE has always been funded -- TRICARE has only received -- while sometimes it is -- you know, the attempt to keep it budget neutral, it -- it -- we -- we have always received funding for the TRICARE programs

and CHAMPUS since their inception.

And we -- and our direction by, you know, our higher-ups within the Department of War, are that to continue to operate with the, you know, assumption that the -- that funding will continue to be provided.

BY MS. WALLACE:

Q. Is there any text that you can point me to today that says that TRICARE funding is guaranteed indefinitely or the program itself?

MR. ANTONUCCI: Objection.

THE WITNESS: In this report, no.

BY MS. WALLACE:

Q. Is there any text anywhere?

MR. ANTONUCCI: Same objection.

THE WITNESS: I would have to look into Congressional law to find out if there is any mandatory place where it says that TRICARE funding must continue, period.

But I cannot, off the top of my head, point you to any text that says that.

BY MS. WALLACE:

Q. As we sit here today, you're not aware of any text that says that?

MR. ANTONUCCI: Objection.

THE WITNESS: No. Just -- just directives from higher-ups. But, you know, those are from Department of War.

BY MS. WALLACE:

Q. Directives? Are you talking about oral directives? I'm not clear.

A. So, as I said, you know, our -- those higher-up -- you know, within Department of Health Affairs within the Department of Defense, those -- that's who we work for, fall under, you know, what their guidance is regarding the preparation for T6 and what we anticipate it will cost, et cetera. Those are all written directives and so those are all written with anticipation that we will continue to have funding.

Q. Understood. So you're writing the next year's program with anticipation that it continue to be funded, but there's no text you can point me to that says it's going to be funded?

MR. ANTONUCCI: Objection.

THE WITNESS: I -- I cannot point to a -- a text because, you know, Congress

is, you know -- you know, they -- they are the ones who write that law.

MS. WALLACE: Okay. I am uploading into the chat feature -- I wish I hadn't labeled it.

We're going to call it Exhibit 13, if that's okay with everybody. I'm going to put it on the screen for you.

BY MS. WALLACE:

Q. Earlier in the morning we were talking about whether you were aware or not that approximately ten years ago lawmakers were considering eliminating the TRICARE program.

Do you remember that testimony?

MR. ANTONUCCI: Objection.

THE WITNESS: I remember you mentioning it earlier, yes.

BY MS. WALLACE:

Q. And so I've put on the screen for you -- it is -- I'll represent to you it is a news article by The Hill, which states in the first -- in the title "Lawmakers Debate Scrapping TRICARE."

Do you see that?

A. I see the title, yes.

Q. And do you -- is this jogging your memory at all on what occurred in approximately 2015 on Capitol Hill?

MR. ANTONUCCI: Objection. Foundation.

THE WITNESS: So I would have to read this article to -- these headlines are sometimes designed to catch people's eyes and not necessarily what is stated within the system as to what -- what they mean by changes to TRICARE. So --

BY MS. WALLACE:

Q. Why don't you read the first three paragraphs into the record for me.

A. The future of the program became a hot topic on Capitol Hill after a blue-ribbon panel released a series of recommendations for changing the way that military compensates service members." Then in parentheses, "mosads."

"One of the recommendation was replacing Tricare with a new system that allows members of the military to choose a private insurance plan, with the cost of premiums shouldered by the government.

"While lawmakers have in the past --

have in the past shied away from major changes to pay and compensation for troops, lawmakers say the idea deserves serious consideration."

Q. And so based on the first three paragraphs of this news article, does it sound like lawmakers, in the past, have considered a total elimination of the TRICARE program?

MR. ANTONUCCI: Objection.

THE WITNESS: So I have -- you know, we've heard talk about, you know, in the past about how TRICARE might be made more efficient. You know, as I -- you know, as I recall from earlier, you know, we had a program called CHAMPUS, which they decided was largely inefficient. And they reorganized it to be TRICARE.

The benefit itself, you know, was still essentially the same. We were paying for care that was received in the community that couldn't be provided in the military treatment facilities. But how it was organized was different. It was going to be we were going to start using managed care support contractors to assist us in the processing of claims so they could be

paid faster, and provide some, you know, consistency as to how the program was being administered to hopefully make it more efficient.

The benefit, you know, which is that, you know, we will help -- you know, we will -- we will provide the ability of our active duty service members, family members, retirees, TRICARE -- you know, and then they agreed to something called TRICARE For Life to differentiate those who are Medicare eligible, that, you know, they would still be -- you know, they were still -- had that health benefit available to them that they had had previously.

So what I believe that they are referring to here, without having read the entire article, is that -- on how that benefit is being administered, not the removal of the benefit itself.

MR. ANTONUCCI: Whitney, before you ask your next question, do you intend to allow the witness read the article, like he asked?

MS. WALLACE: Oh, I didn't know he

had asked to read. Would you like to --

THE WITNESS: I said if I was going to go and talk more about the article, I would need to review it.

Could you go up a little bit? There.

Okay. There we go. Okay.

Okay. You can go to the next page.

Okay. Go ahead.

Are we missing a sentence there? It says "a piecemeal approach." Is there something -- another sentence we're missing there somewhere?

MS. WALLACE: I don't think so. I also have the Internet version of this document. Let's take a look really quick.

Can you see my screen, Doctor?

THE WITNESS: Yeah. I read that part.

BY MS. WALLACE:

Q. I'm looking for piecemeal.

Did you see it?

A. Let's see here.

Q. Here it is, "taking a piecemeal approach."

A. Yeah. So it looks like the two

paragraphs above it may have been removed somehow in that.

Q. Okay. And if I can figure out a way to re-PDF this version, I will replace the exhibit to make sure it's accurate. I just did a print PDF on the page.

Doctor, will you let the record reflect that you can see the entire article?

A. Yes, I can see the entire article now.

Okay. Got it.

Q. All right. And so from your review of this article, would you agree with me that Congress was taking a very serious look at some substantive changes to the TRICARE program in -- approximately ten years ago, including potentially completely replacing the program with more of a private insurance plan?

MR. ANTONUCCI: Objection.

THE WITNESS: I agree that they discussed that, as what is placed on here. And these are, you know, what you have said here, you know, this article says would meet with what we remember hearing around that time.

As you can see, they also discussed in here, you know, ways to improve the current plan, which is what they actually opted to do in this particular case by reorganizing it under the Defense Health Agency, to try that approach first, as well as, you know, they also discussed, you know, use of pilot programs to see if there was any interest.

And they also mentioned what we typically hear from beneficiaries is -- is that they are very cautious about going to a new program. It's, you know, the -- you know, based on, you know, what they have. That's one of the -- you know -- you know, it speaks to the popularity of the plan by how many people choose to retain TRICARE as opposed to going to find their own health plan.

BY MS. WALLACE:

Q. Do you remember what my question was, Dr. Ruck?

A. About did they discuss making substantive changes. Yes, they did discuss in this article making some substantive changes.

They were considering a multitude of them by -- by what's reported here.

Q. And one of those options that was being seriously considered is eliminating the TRICARE program.

Do you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say that they were discussing eliminating the TRICARE program as it is currently administered, not the benefit, which is, you know -- and that's the difference between it.

The benefit would still be there. It would be how it would be administered to the people, you know, under what -- you know, under what umbrella.

BY MS. WALLACE:

Q. Yeah. And let's look at this paragraph that I've highlighted on the screen.

"The TRICARE overhaul, combined with several other healthcare changes suggested by the commission could save the Defense Department about 26.5 billion from fiscal 2016 to fiscal 2020 and generate 6.7 billion per year in savings by 2053, according to a panel spokes --

spokesman."

So would you agree with me that they were considering a potential overhaul of the TRICARE system, based on that language?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, they were considering an overhaul to, you know, how the -- like I said, how the program was being administered.

BY MS. WALLACE:

Q. And some of which would have saved the government billions of dollars?

MR. ANTONUCCI: Objection.

THE WITNESS: I also remember from that time period that there was a discussion that that -- those numbers may not have been accurately drawn. So there was disagreement with how much would actually be saved or potentially cost more by doing that.

BY MS. WALLACE:

Q. And my question was --

A. And I think that they even said so lower in the document there, that they weren't sure about the numbers generated by the

commission.

Q. But it looks like it could be up to 26.5 billion. So we're -- we're looking at billions.

MR. ANTONUCCI: Objection.

THE WITNESS: That was what the -- that particular commission reported.

MR. ANTONUCCI: For the record, I would like to lodge an objection to the authenticity and admissibility of Exhibit 13.

MS. WALLACE: Doctor, I'm going to upload another exhibit for you. I always forget I have to put it in the chat feature before I can open it.

Doctor, I've uploaded into the chat feature what I had premarked as Exhibit 13, and I think I recognize that I had named The Hill article 13.

So if it's okay with defense counsel, I'm going to -- if it's okay with you guys, produce a full and complete copy of The Hill article as the prior exhibit and we can name it an Exhibit Number 7, if that's okay with you, Defense Counsel.

MR. ANTONUCCI: Just so I understand, the article that you were previously questioning Dr. Ruck on, which was previously as Exhibit 13, will now be referred to as Exhibit 7; is that right?

MS. WALLACE: Exactly. And you and I, after the deposition, if we could just -- I want to make sure that that PDF has the full text for the -- for accuracy purposes. So I'm going to resubmit Exhibit 7 to you and the court reporter.

MR. ANTONUCCI: That works for me.

MS. WALLACE: Okay. Great.

(Exhibit 13 marked for identification.)

BY MS. WALLACE:

Q. So, Doctor, the document we are looking at is your Deposition Exhibit Number 13.

Are you familiar with -- do you see there on the screen that this looks like it's an expert report submitted by Dr. Henry Miller in the Camp Lejeune Water Litigation on behalf of a plaintiff Gary McElhiney on December 15, 2025?

A. Yes, I can see that on the screen here.

Q. And I will represent to you that Dr. Henry Miller is an expert witness for the Department of Justice in the United States government in this case.

Are you familiar with him?

A. No, I am not.

Q. All right. I am going to go down in this document to Dr. Miller's paragraph where he describes in paragraph 7 on page 7 "TRICARE Coverage."

Do you see that on the screen there?

A. I can see it, yes.

Q. All right.

A. I would need to have a second to read it, though.

Q. Oh, sure. My pleasure.

Let me know when you want me to scroll down.

A. Okay. I'm down to the last paragraph. You can scroll up there, if you want.

Okay. Got it.

Q. Is there anything based on the paragraphs that you have just read under "TRICARE Coverage" in Dr. Miller's report, that you disagree with Dr. Miller on?

MR. ANTONUCCI: Objection.

THE WITNESS: Reading this -- these two pages here, you know, this is -- this seems factually accurate.

The -- that, yes, CHAMPUS did originate in the 1960s. It was reorganized in the 1990s under TRICARE. And, you know, those are approximately numbers that we serve. And that's approximately the defense -- the percentage of the defense budget.

And as you -- you know -- as your article previously mentioned, there was some talk among the lawmakers in around 2015. It did not -- ended up, you know, they did not elect to do so.

And that it says that may -- the benefit, you know -- you know, the benefit was widely supported and that the talk had been mostly about, you know, the coverage may take different forms in the future, but the benefit would remain.

BY MS. WALLACE:

Q. Do you see the sentence -- the second-to-last sentence of Dr. Miller that

states, "Approximately ten years ago, some lawmakers promoted eliminating TRICARE and instead the funding the purchase of private health insurance by TRICARE enrollees"?

A. Yes, I see that sentence.

Q. Do you see footnote 39 beside that sentence?

A. Yes.

Q. And if we scroll down to footnote 39, it states Martin Matishak as the author of an article from The Hill dated February 11, 2015, that's entitled "Lawmakers Debate Scrapping TRICARE."

Do you see that?

A. Yes, I see that. Yes.

Q. And does that appear to be the exact article that we just reviewed that your counsel objected to the authenticity of?

MR. ANTONUCCI: Objection.

THE WITNESS: I see that it is referred in here the -- and I would need to double-check on the author to make sure it's the same article. But it's from the same year and month.

BY MS. WALLACE:

Q. Now, do you have any reason to disagree with any of the statements that are in Dr. Henry Miller's TRICARE coverage section?

A. I -- I have -- I cannot find anything that would -- that in here that it would be factually incorrect.

Q. And so he also states that the TRICARE program may change over time.

Do you also agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: The TRICARE -- each contract with TRICARE plan coverage changes slightly. We typically add more benefits -- you know, telehealth is now part of the -- of the contract, more robust disease management programs, more of a focus on alternate payment methods, bundlings, a greater focus on quality of care and outcomes versus fee for service.

So every TRICARE contract is different from the last contract. So TRICARE continually changes, as we attempt to make the benefit better and -- and more economically feasible. And -- but -- you know, but better for the beneficiaries.

BY MS. WALLACE:

Q. And sometimes better can result in increased patient payments?

MR. ANTONUCCI: Objection.

THE WITNESS: That is -- you know, again, those are established by Congress, not by the Defense Health Agency. So -- so whether or not you would consider those a benefit or not, I guess would be -- would be up to interpretation.

But our focus is on the actual management of the TRICARE benefit or the -- you know, the health -- you know, the health benefit established by Congress.

BY MS. WALLACE:

Q. And just to refresh your memory of the author, I'm going to show you again The Hill article.

Can you see my screen, Doctor?

A. Yep, that's the same article.

Q. Okay.

MR. ANTONUCCI: For the record, this is the PDF version of Exhibit 7.

MS. WALLACE: Yes, and I'm going to

re-PDF to make sure it includes the entire -- I don't know why it didn't include that one paragraph. That got tripped up. But I'm going to re-PDF it right after this break, if that's okay with you, and mark it as Exhibit 7.

We are coming up on a break. Do you guys want to take a lunch break?

MR. ANTONUCCI: Yes, please.

MS. WALLACE: Can we go off record.

THE VIDEOGRAPHER: We're going to go off the record at 12:11 p.m.

(Lunch recess taken from 12:11 p.m. until 12:59 p.m.)

THE VIDEOGRAPHER: Back on the record at 12:59 p.m.

MS. WALLACE: Can we go back off the record one more second?

THE VIDEOGRAPHER: Yeah. We're going to go off the record at 1:00 p.m.

(Recess taken from 1:00 p.m. until 1:04 p.m.)

THE VIDEOGRAPHER: Back on the record at 1:04 p.m.

MS. WALLACE: Before we went back on the record, I conferred with defense

counsel and we have agreed to mark as Exhibit 7 The Hill article in both corrected and its original form.

So those documents are going to be Exhibit 7, The Hill article, with -- and then also 7A, which was the PDF of that article in the original version that it was shown.

Is that right, Giovanni?

MR. ANTONUCCI: Yes.

MS. WALLACE: Okay.

(Exhibits 7 and 7A marked for identification.)

BY MS. WALLACE:

Q. All right. Dr. Ruck, thank you for letting me clear up that administrative matter.

We are going to move on to talk about our additional questions regarding TRICARE. Are you generally aware that last year -- as recently as last year, TRICARE beneficiaries have complained regarding administrative issues with the new administrator party, TriWest?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I am aware that there -- that there have been some

complaints.

BY MS. WALLACE:

Q. Would you agree with me that some of those complaints have included beneficiaries potentially losing coverage?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, there was a problem with the -- with the -- essentially the autopay method that TriWest had set up. We directed them to fix that and make sure that people who were accidentally dropped received full coverage.

BY MS. WALLACE:

Q. Are you aware that there were also issues with TriWest regarding access to their customer service department?

MR. ANTONUCCI: Objection.

THE WITNESS: I am aware there have been some complaints.

BY MS. WALLACE:

Q. Regarding being able to get in touch with TriWest by beneficiaries?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. There were

initially some -- some issues, difficulties with patients getting in contact with them at the start of health care delivery last year. Those have been since corrected.

BY MS. WALLACE:

Q. Are you aware of issues that beneficiaries had last year regarding services being missed, including surgeries, as a result of these issues?

MR. ANTONUCCI: Objection.

THE WITNESS: I am not aware of surgeries that were missed. There -- you know, I'm not aware of every single case. However, I had not heard of any surgeries that had been missed because of this.

BY MS. WALLACE:

Q. What about are you aware of complaints that under the TRICARE program, there was an incomplete network of providers being provided by the TriWest administrator?

MR. ANTONUCCI: Objection.

THE WITNESS: It was not a matter of the -- of the network size. It was -- it was some difficulties with processing the

referrals to get them to the network providers.

BY MS. WALLACE:

Q. Were you involved, as the CMO, with trying to correct some of the deficiencies and concerns that were identified --

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q. -- last year?

A. Yes, I was -- as part of the team, I was involved in pursuing corrective actions.

Q. Did beneficiaries lose coverage last year as a result of some of these issues?

MR. ANTONUCCI: Objection.

THE WITNESS: There was some temporary loss, but we directed them to reinstate every one and cover them until such point as they were able to determine that they had corrected the problem with their payment system. So it was very brief.

BY MS. WALLACE:

Q. Were you involved -- would you have been a recipient of letters from Congress regarding outlining some of these concerns if she

had sent that to the Department of Health?

MR. ANTONUCCI: Objection.

THE WITNESS: No, they would not have come straight to me. No.

BY MS. WALLACE:

Q. If they were sent to Lieutenant General Telita Crosland, director of the Defense Health Agency, and David -- Dr. David J. Smith, acting principal deputy for the Defense Health Agency, would those letters have also reached you in your role as the CMO?

MR. ANTONUCCI: Objection.

THE WITNESS: No. Only the ones where I was -- I would have been asked to comment on within my area of expertise. Most of them would not have come to me.

BY MS. WALLACE:

Q. But, in your role, would you have been part of the team that fixed the complaints?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. The -- as areas were identified that had failed to -- where they failed to meet contractual requirements in the management of it, we were involved. I was involved as part of

the team in -- in working to ensure that they did institute corrective actions on that.

MS. WALLACE: Okay. I'm going to upload into the chat feature what's been previously marked as Exhibit 8. And I'm going to share it on the screen for you.

(Exhibit 8 marked for identification.)

BY MS. WALLACE:

Q. Can you see this document, Doctor?

A. Yes.

Q. Do you recognize it?

A. Not this particular document. If you give me a second, I will read it though.

Okay. Move to the next page.

Okay.

Q. Would you agree with me that this letter from Marilyn Strickland, member of Congress, to leaders in the Defense Health Agency, expresses concerns regarding TriWest as the third-party administrator of the TRICARE program?

MR. ANTONUCCI: Objection.

THE WITNESS: I agree that this is a

letter of concern from a member of Congress addressing the issues you mentioned.

BY MS. WALLACE:

Q. And do you see that the Congresswoman opines in the second paragraph that "The combined effect of this mismanagement has led to cancelled referrals, appointments, and even surgeries"?

A. I would agree that there were some cancelled referrals and appointments. I do not know about the surgeries. I said I would have to go back and check.

I -- I did not -- I did not hear about missed surgeries. The -- that would have been something that we would have, you know, gone to great lengths to make sure did not happen.

The -- but, yes, there were some -- as it states there, there was some concern about cancelled appointments and referrals.

Q. Do you see that Congresswoman also notes that she is deeply concerned about press reports that the network of health providers covered by TriWest is significantly smaller than what is offered under Health Net Federal Services?

A. I see where it states that in the letter. The -- as I said before, that was not the underlying cause when we looked into it. It was a matter -- it was not that the network was smaller, it was the getting them to the providers through the authorization process.

Q. So there was some denied authorizations that affected patient's access to care?

MR. ANTONUCCI: Objection.

THE WITNESS: It -- it was -- there was delay in processing them. They weren't necessarily denied. In fact, most of them, almost all of them, were not denied.

But the -- there were technical issues that they had not foreseen that prevented them from processing the referrals in a timely manner.

BY MS. WALLACE:

Q. So you disagree with the statement here that "The network of healthcare providers covered by TriWest is significantly smaller than what was offered under the Health Net Federal Services"?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. Although, I am not the SME for the network size. The reports that we were given by those who are was that the network size is, if anything, was larger. It was a matter of them being able to utilize that network that was the issue.

BY MS. WALLACE:

Q. And so where she writes "there was an incomplete network of providers," you disagree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: I would -- I would dis -- I would disagree that that was the root cause of this, and that it -- that was -- is -- was factually incorrect after further analysis. Although, I can understand how she would perceive that as the cause.

BY MS. WALLACE:

Q. Do you see the sentence in the third paragraph, "Despite the extensive difficulties documented by beneficiaries in contacting TriWest customer service and website problems, the

current plan to disenroll beneficiaries who cannot establish a recurring payment is untenable. I strongly urge the Defense Health Agency (DHA) to extend the deadline to allow all eligible beneficiaries to establish recurring payments until a time when TriWest can adequately manage its customer contact inquiries."

A. I see that, yes.

Q. Do you know how many beneficiaries lost coverage as a result of these transition issues with TriWest?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not know the direct number; however, the -- that -- that was the date that TriWest had set originally. We directed them to push it out much further and make sure that they resolved their issues before this requirement went into effect.

BY MS. WALLACE:

Q. Will you say that answer one more time, if you don't mind?

A. So since we have oversight over that process, although, you know, a direction had been given via TriWest to disenroll people who -- you

know, because they didn't have their payment information, because we recognize that it wasn't the beneficiary's fault, we directed them to extend their deadline to a much further date --

Q. So --

A. -- to avoid them losing coverage.

Q. Your testimony is that you took these concerns of Congresswoman Strickland and you extended the deadline as she requested so that no one lost access based on the issues identified in the letter?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I mean, we were aware of the issue and we -- I believe -- you know, it wasn't just Congresswoman Strickland that, you know -- but, you know, our analysis as well. But we agreed with her assessment there and we were already taking steps to make sure that that did not happen.

BY MS. WALLACE:

Q. Is it your testimony no one -- like, no persons lost coverage based on this issue?

MR. ANTONUCCI: Objection.

THE WITNESS: I cannot say for

certainty if anyone did or not as -- as this transition was taking effect. We did direct TriWest to reach out to all involved to make sure that they had a chance -- so that they -- each and every individual could make a decision if they wished to stay with TriWest or not, and --

Q. Where would --

A. -- a bit of information.

BY MS. WALLACE:

Q. Did they have an option to go to a different third-party administrator other than TriWest if they were in the West region?

MR. ANTONUCCI: Objection.

THE WITNESS: No, but some people just choose not to participate in TRICARE, period.

BY MS. WALLACE:

Q. So their option is to stay with TriWest or disenroll -- isn't that word you used earlier? -- disenroll from TRICARE entirely?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. In this particular case, they -- you know, they could choose not to -- and they had other

health insurance, for instance, they could elect to take a pass on TRICARE.

They are still eligible to re-enroll at a later date, if they wish to do so. That benefit is always available to them provided they meet the enrollment criteria as far as the different groups we discussed earlier.

BY MS. WALLACE:

Q. So if a beneficiary of TRICARE was trying to get a surgery or an appointment authorized during this time, and they couldn't get it done because of the issues identified in this letter, their option to get timely medical treatment would have been to disenroll in TRICARE and seek where you use other health insurance in order to get that treatment?

A. The -- through our direction, we directed them to ensure that -- that no one would be missing appointments or surgeries due to either a -- you know, the payment issue or the referral issue. So, essentially, we -- we authorized TriWest to institute a broad waiver process during this time to make sure that all beneficiaries could get the care that they

needed.

Q. And if one of those beneficiaries was concerned about coverage and had experienced the delays identified here, they would have had to disenroll from TRICARE to get the treatment timely, could that have been the case?

MR. ANTONUCCI: Objection.

THE WITNESS: No. If they were -- because of what we directed TriWest to do, if they had been a -- if they had had coverage, they would have, you know, still been allowed to -- you know, we essentially had them print out letters that people could take in guaranteeing coverage and payment. They could just download those and take them in and say, you know, I had an appointment, here is my coverage letter.

So that people -- that were caught up by this -- you know, this payment issue or, you know, had not received an authorization yet because of the delays in referrals would be eligible to get that without having to wait for it further. And they can get it -- they can continue

with their appointments and surgeries.

BY MS. WALLACE:

Q. Do you know how long the period was where these concerns were happening with delays and authorizations until you gave that broad authority to TriWest?

MR. ANTONUCCI: Objection.

THE WITNESS: We directed them to do so before the end of January. I don't remember the exact date, but it was sometime between the 17th and the 30th.

BY MS. WALLACE:

Q. So it could have been three or four weeks?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, the payment issue wasn't due to take effect until the 31st. So nobody should have been caught up by that. The -- and then the referral issue, yes, there was a significant delay in referrals in that first couple of weeks.

But after we directed them to take the broad corrective actions that we had -- you know, that we instituted, then that resolved that issue as well.

BY MS. WALLACE:

Q. And you authorized them to take the broad corrective actions end of January, you stated?

MR. ANTONUCCI: Objection.

THE WITNESS: The Defense Health Agency did, not me. But the Defense Health Agency, through -- you know, through the TRICARE health plan, directed them to do so.

BY MS. WALLACE:

Q. How many states are served in the West under TriWest's umbrella of third-party administration for TRICARE?

A. I'd have to count them, but it's everything west of the Mississippi, also including Illinois, Wisconsin, and Louisiana and Missouri. No -- yeah. No, Missouri's on the other side.

So, yeah, so everything to include Wisconsin, Illinois, and Louisiana.

Q. And so all of those beneficiaries in those states, which I imagine would be in the millions, could have been affected by this difficult transition?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. There -- as we stated before, there was some -- there were problems with their rollout. We -- we acknowledged that.

BY MS. WALLACE:

Q. What is the Government Accountability Office, GAO, and what does that entity do with respect to TRICARE, if you know?

MR. ANTONUCCI: Objection.

THE WITNESS: So the GAO is a -- is an oversight agency that looks at not just the Department of Defense, but all, you know, departments to help provide, you know, help do deep dives into -- into practices and reports to see if we are administering our departments with the best or the -- in the most efficient ways possible --

BY MS. WALLACE:

Q. There are --

A. -- and by recommendations.

Q. Would it be fair to characterize GAO as an oversight entity?

MR. ANTONUCCI: Objection.

THE WITNESS: That is how I would view them, yes.

BY MS. WALLACE:

Q. Are you -- in your role as the CMO, are you made aware of GAO recommendations for the Department of Defense in Defense Health Agency as it relates to TRICARE?

MR. ANTONUCCI: Objection.

THE WITNESS: I am aware of the ones that they, you know, of -- they have -- I have seen certain GAO reports when they pertain to clinical issues within the TRICARE health plan.

BY MS. WALLACE:

Q. You're generally made aware of GAO reports?

A. I'm made aware of the ones that pertain to the areas that I am considered an SME in, a subject matter expert in. I don't receive all GAO reports.

Q. Do -- under your subject matter expertise, are you part of the team that assesses whether TRICARE is making integrity analyses and improper payment measurements?

A. I am a -- I am not one of the people

who does those audits, but I am -- I am aware that we -- that we do them to -- we direct the managed support contractors to perform audits and then we review those audits and sometimes do our own audits, if we have concerns.

Q. So that -- is that a GAO report that you would see if it had to do with improper payment measurements?

A. I would see some of those if they had to do with, you know, clinical areas. If they were -- if there were nonclinical conditions, you know, the -- then that would -- might go to a different TRICARE division, or, yeah -- yeah, TRICARE health plan division.

Q. If it relates to medical record reviews, would that come to you?

A. I would be involved in it, yes. One of several people.

Q. Are you aware of --

MR. ANTONUCCI: I apologize, I got disconnected for about a minute.

Would it be possible to have a readback of the questions from the last two minutes, please.

MS. WALLACE: Yeah. Let's go to have

record.

THE VIDEOGRAPHER: We're going to go off the record. Time is 1:29 p.m.

(Recess taken from 1:29 p.m. until 1:31 p.m.)

THE VIDEOGRAPHER: Back on the record at 1:31 p.m.

MR. ANTONUCCI: For the record, my Internet connection was disconnected after Ms. Wallace asked the witness what the GAO is. I just heard a readback of the questions during a break and the questioning, and I object to every question after what is GAO.

BY MS. WALLACE:

Q. All right. Dr. Ruck, are you generally aware that the GAO, in February of 2015, has encouraged the Department of Defense to adopt medical record review of its payments in order to verify coding accuracy and claims for reimbursement?

MR. ANTONUCCI: Objection.

THE WITNESS: I am not aware of that specific report. But as a general practice, we do make an effort to ensure that we -- that claims are being processed

properly.

BY MS. WALLACE:

Q. Based on your knowledge of TRICARE as the CMO, does TRICARE perform a medical record review of claims submitted for reimbursement?

MR. ANTONUCCI: Objection.

THE WITNESS: Most of the medical record reviews are done at the level of the managed care support contractor as part of their requirements to ensure that no fraud, waste, or abuse is being performed. And we review those, you know, those reports, hear any concerns or findings that they -- that they have found and assist in the resolution of any that are -- that are found to be improper.

Does that answer your question?

BY MS. WALLACE:

Q. Do you know when, based on your understanding, your MCOs began reviewing medical records to corroborate claims for reimbursement?

MR. ANTONUCCI: Objection.

THE WITNESS: I am personally not aware of that. I was not with the TRICARE health plan before 2022. They have been

doing it since that time. And I'm sure they were probably doing it before then too. But I cannot confirm with any accuracy as to the date that they started doing such.

BY MS. WALLACE:

Q. Do you think it is important to verify claims submitted for reimbursement with verification of medical record review as the CMO of TRICARE?

MR. ANTONUCCI: Objection.

THE WITNESS: I agree that there -- that there needs to be an audit process to -- to help ensure that these are being performed. The -- you know, are being submitted and reimbursed properly. The -- an audit process is typically a selection of those claims for review to verify and to -- and then to make sure that the documentation comes over with the billing for each of them is appropriate for the procedure that they were authorized for.

BY MS. WALLACE:

Q. Is that a yes?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I agree that it is important to do so.

BY MS. WALLACE:

Q. And I asked earlier if you know when medical record review began at TRICARE.

Do you know when?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I could not give you a date as to when it started.

BY MS. WALLACE:

Q. If I told you that it was not implemented in March 22nd of 2024, do you have any reason to disagree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: I know that we were reviewing medical records. As I said, there is an audit process. The audit process does not mean that 100 percent of records are reviewed. It means that the medical records are reviewed during the audit process and that they -- and that documentation for claims is being properly submitted and checked against what was authorized for those -- those services, you know, when the authorization was --

was administered.

BY MS. WALLACE:

Q. What is your testimony regarding when TRICARE began an audit process that involved the use of confirming claims submitted for reimbursement with an evaluation of medical records?

MR. ANTONUCCI: Objection.

THE WITNESS: As I said, I know that we've been -- we've been performing audits since at least 2022, for -- looking for fraud, waste, and abuse. That's been part of the -- of the -- you know, of the contractual responsibilities of a managed care support contractor.

MR. ANTONUCCI: Excuse me.

MS. WALLACE: Yes.

MR. ANTONUCCI: Can you articulate how this is connected to Dr. Ruck's disclosure as a nonretained expert witness?

MS. WALLACE: Yes. We're talking about the reimbursement of TRICARE, which I understand that he's an expert in.

MR. ANTONUCCI: You're asking him

about the audit process, not reimbursement.

MS. WALLACE: Well, the audits are related to reimbursement.

MR. ANTONUCCI: I mean, they're technically related to the entire program, aren't they? I don't think that's within the scope of his -- his disclosure.

MS. WALLACE: I think that it is.

MR. ANTONUCCI: All right. Well, I object on the basis that this line of questioning is beyond the scope of Dr. Ruck's disclosure as an expert witness.

MS. WALLACE: Okay.

BY MS. WALLACE:

Q. All right. Doctor, I have a couple of more questions about medical record review.

Are you aware that in your role as CMO that Congress, the ranking member committee on the budget, has recommended to the Department of Defense that it should implement a more comprehensive TRICARE and proper payment measurement methodology that includes medical records review?

MR. ANTONUCCI: Objection.

THE WITNESS: I am not aware specifically of that -- of that recommendation.

BY MS. WALLACE:

Q. And so that is not something that you personally as a CMO have been working on TRICARE?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I -- we have -- I am not involved in the -- in individual medical record reviews in response to claims processing.

Again, that is a responsibility of the managed care support contractor, and then a -- we have other subject matter experts who review the findings of those audits.

BY MS. WALLACE:

Q. Is it your testimony that the process of medical record review would fall on an administrator or MCO and not on TRICARE itself for those reviews or audits?

MR. ANTONUCCI: Objection.

THE WITNESS: So, yes, the -- contractually, the managed care support

contractor is required to have a program that looks for fraud, waste, and abuse to include audits and medical record reviews as necessary to ensure that they are -- this is being accomplished.

You know, as the -- the TRICARE health plan has individuals other than myself -- I do not review that particular report -- who look at those results and to ensure that they are meeting their contractual requirements.

BY MS. WALLACE:

Q. And that's not under your purview, if I'm understanding your testimony correctly?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct.

BY MS. WALLACE:

Q. Okay. Can you tell me how TRICARE assists beneficiaries residing in rural areas?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. So I can describe that. It's a broad area.

Do you want to, you know, to limit the -- or redefine the question? Or do you want me to just launch into a

30-minute talk about how we -- how we help rural areas?

BY MS. WALLACE:

Q. Let me narrow.

If there are TRICARE beneficiaries in rural areas that, due to access to care, have to use nonparticipating providers, is that the type of beneficiary that can sometimes be subject to increased fees for that reason, out-of-pocket pays?

MR. ANTONUCCI: Objection.

THE WITNESS: So if you are a beneficiary who resides in an area that -- and in those areas, you know, it depends if you're at a Prime network -- you know, in a Prime service area or if you live outside a Prime service area. So we have many bases that are in rural areas. But those are -- those are closer to Prime service areas if they are surrounding a military treatment facility and base.

The -- if you -- but they live outside and are not within the -- a required radius of the -- of a Prime service area, the -- then you are a

TRICARE Select member.

So, in those areas, if there are network providers within the area that you are -- you know, that are available to you, you are required to use those. If there are non -- if there are no network providers within a radius, then the direction from -- you know, to the managed care support contractors are to essentially utilize them as network providers to reimburse them.

You know, that the -- because they are nonnetwork providers, that usually means there's a higher cost to the government, but we want to minimize the -- you know, the cost to the individuals themselves.

If -- but if a person chooses to go to a nonnetwork provider when there are alternatives, then, yes, there would higher point of service charges and out-of-network charges.

BY MS. WALLACE:

Q. Thank you.

A. And if we need to send them to, you

know, to a place -- you know, that's also -- again, we -- those are -- those are other considerations to make sure that they -- that they get the proper care, you know, regardless of where they live.

We've also increased our telehealth programs to help with some of that to make up the difference for primary care and some specialties, like dermatology, for instance, to allow them, you know, greater access where they might -- they don't have to drive as far to get care if they live in what's considered a health desert.

Q. One of your designations in this case is TRICARE's funding sources.

TRICARE does not operate from a trust fund, like the Medicare system; is that accurate?

MR. ANTONUCCI: Objection.

THE WITNESS: We receive our funding each year through the Department of Defense budget.

BY MS. WALLACE:

Q. And it's not from a trust fund within the Department of Defense budget. Is that your understanding?

A. That is my understanding.

Q. And so there's no -- if TRICARE pays a medical claim, a submitted claim, do you know if there are funds set aside to be recovered later?

A. The -- the TRICARE contract is already funded because it's a contract. It's -- the -- although our operating costs come from the department, you know, through the Department of Defense, you know, for instance, if we go on furlough, they're still covered, they're still paid because it's a contract. So they're not subject to those government shutdowns and et cetera.

Q. Does TRICARE do subrogation liens, do you know?

MR. ANTONUCCI: Objection.

THE WITNESS: I am not familiar with that term.

BY MS. WALLACE:

Q. So -- and you're not aware on whether TRICARE seeks to recover payments that have been made on behalf of a beneficiary who's received payment from a third party? It's called a lien.

MR. ANTONUCCI: Objection.

THE WITNESS: Oh, yes, I -- we do

recover things through -- from other health insurance, if they -- you know, even within our MTFs, if they come in and they have other health insurance, we will submit a claim to other health insurance to -- for that.

BY MS. WALLACE:

Q. Is there a department that manages liens at TRICARE?

MR. ANTONUCCI: Objection.

THE WITNESS: There are -- not within TRICARE. There are within the Defense Health Agency, but that's not within us.

BY MS. WALLACE:

Q. Is that an outsourced component of TRICARE or is it in-house?

MR. ANTONUCCI: Objection.

BY MS. WALLACE:

Q. If you know.

MR. ANTONUCCI: Objection.

THE WITNESS: I am not an expert on the financial recovery steps that go -- you know, there's steps we go through to accomplish that. I know that some of that is accomplished through the managed

support contractors. Some of that is done through the MTFs and their patient administration divisions.

So we would probably need to consult somebody else to get a more detailed answer.

BY MS. WALLACE:

Q. Because of the interplay between TRICARE For Life and Medicare, do you know how TRICARE For Life might be affected if Medicare's funding or structure was altered in the future?

MR. ANTONUCCI: Objection.

THE WITNESS: We are not dependent upon Medicare for the operation of the TRICARE For Life program. We are simply the -- its called wraparound insurance -- you know, coverage. The -- so what Medicare doesn't pick up, we do.

And there are a small number of instances where we can even cover things that Medicare doesn't and then we would pick up that bill for them.

BY MS. WALLACE:

Q. And so if Medicare were to cease being a party of the TRICARE For Life, it's your

testimony that nothing would change for TRICARE absorbing those additional costs?

MR. ANTONUCCI: Objection.

THE WITNESS: I am not an expert on the financial aspects of this program. I would imagine that there would be an increase in costs. How they would be paid for or funded, I do not know.

But, as I said, you know, we do not -- our TRICARE For Life program would not shut down if Medicare were to cease to exist.

BY MS. WALLACE:

Q. Could Congress make changes to the TRICARE For Life, if that occurred, if it wanted to?

MR. ANTONUCCI: Objection.

THE WITNESS: You know, Congress can always choose to make changes. The question would be is would there be a political appetite to do so.

BY MS. WALLACE:

Q. Do you have any knowledge, as we sit here today, as to whether the TRICARE plans that currently exist will be -- will exist in the

future?

MR. ANTONUCCI: Objection.

THE WITNESS: As far as I understand things, the -- the -- you know -- since we are -- have just initiated and started a new eight-year contract, all of those programs will continue in their entirety at a minimum through the end of that contract.

And -- and, as I said, we are already planning the next contract to simply build upon, not to -- not to change the existing contract.

MS. WALLACE: All right. Let's take a break.

THE VIDEOGRAPHER: We're going to go off the record at 1:52 p.m.

(Recess taken from 1:52 p.m. until 2:02 p.m.)

THE VIDEOGRAPHER: We're back on the record at 2:02 p.m.

BY MS. WALLACE:

Q. Dr. Ruck, thank you for your patience today. I just have a couple of more questions, then I'm going to turn it over to defense counsel.

We talked earlier about the many changes that have been made to the TRICARE policy manuals over the life of the program.

Do you remember that testimony?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I recall us talking about that.

BY MS. WALLACE:

Q. Would you agree with me that there is no guarantee that the program will continue to exist in its current form as it relates to the remainder of the plaintiffs, the bellwether plaintiffs' life expectancies in this case?

Do you agree with that?

A. As much as anyone can point to at the moment -- looking at the past history of the health benefit, there does not seem to be any political appetite to remove the benefit, even if they decided to restructure how it was administered.

Can I absolutely say that it will remain in this -- in its current form? No.

Q. And to the extent that a plaintiff has access to other health care in the future, TRICARE is always, as you state in your

declarations, always the secondary payor, according to the policy and statutes that control it; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, it is -- that is correct that we are -- if they have other health insurance, which they are not required to have, then we would be second payor. If not, we're primary payor.

BY MS. WALLACE:

Q. And the nonprovider, non -- I think you word it in your designation as the nonparticipating providers, that is controlled that -- even the nonparticipating providers is controlled by TRICARE policy and MCOs?

MR. ANTONUCCI: Objection.

THE WITNESS: Nonparticipating providers are not -- are providers who have not agreed to join the network and have not agreed to accept TRICARE reimbursement as payment in full.

So they can -- so there's a difference between a nonnetwork participating provider and a nonparticipating nonnetwork provider.

A nonparticipating network provider is -- is subject to payment -- sorry, participating nonnetwork provider is subject to -- to TRICARE payment issues. They -- but they will -- you know, they have not agreed to, like, for instance, any discounts.

The -- a nonnetwork, nonparticipating provider may not accept TRICARE as their -- as a method of reimbursement in which case, you know, the patient may be required to pay additional. They can submit bills, you know, to the -- for reimbursement to the managed care support contractor, but they will not get back the entire amount that they may get billed.

BY MS. WALLACE:

Q. A non -- there are a number of nonnetwork, nonparticipating providers that don't take TRICARE insurance?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. Similar to, you know, there are providers that don't take United Health or Aetna or other -- you know, from other entities.

BY MS. WALLACE:

Q. Right. And so there's a large number of providers that if you have TRICARE you still can't see, just like with any other insurance plan?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct. You know, you can see them, but the -- but your payment would be significantly more than it would be if you saw a network provider.

BY MS. WALLACE:

Q. And you may not be compensated through TRICARE insurance?

MR. ANTONUCCI: Objection.

THE WITNESS: Certainly not fully.

BY MS. WALLACE:

Q. And can you tell me, do -- could you confirm for me that TRICARE rates typically follow in line with Medicare rates, which are some of the lower reimbursement rates for providers in the country?

MR. ANTONUCCI: Objection.

THE WITNESS: We are required by law to pay like Medicare. We're applicable.

BY MS. WALLACE:

Q. And do you agree with me that Medicare rates are among the lowest reimbursement provider rates in the country?

MR. ANTONUCCI: Objection.

THE WITNESS: I am not a financial expert. But I have -- I have heard that mentioned.

BY MS. WALLACE:

Q. And would you agree that reimbursement rates for providers will need to stay competitive so that providers will continue to treat the beneficiaries?

MR. ANTONUCCI: Objection.

THE WITNESS: That would be outside the scope of my duty performance to make that determination.

BY MS. WALLACE:

Q. If Congress were to decide to fund less than the expenses of the TRICARE program, do you have any idea how they might try to make up that difference in appropriation, for example, paying providers less or charging beneficiaries more?

MR. ANTONUCCI: Objection.

THE WITNESS: That is not -- those

are not mechanisms that are allowable within -- or that are in the current contract. The -- it would require changes to U.S. Code from my understanding.

BY MS. WALLACE:

Q. And so as we sit here today, if -- if Congress were to make the determination that they're not willing to fully fund the expenditures associated with TRICARE, you aren't certain how that would affect the TRICARE program?

MR. ANTONUCCI: Objection.

THE WITNESS: I could not comment upon that.

MS. WALLACE: Okay. Thank you so much, Dr. Ruck. No further questions.

MR. ANTONUCCI: Okay. Really quick.

EXAMINATION

BY MR. ANTONUCCI:

Q. Thanks for your patience, Dr. Ruck.

Based on your experience with TRICARE, is it fair to say it's reasonably likely the TRICARE program will continue into the future?

A. Yes, within the realm of my

expertise, that is -- we anticipate it extending into the future -- into the foreseeable future.

MR. ANTONUCCI: Thanks. That's all for me.

MS. WALLACE: No further, Dr. Ruck. Thank you for being here today.

THE WITNESS: Thank you.

THE VIDEOGRAPHER: This ends today's deposition. We're going to go off the record at 2:11 p.m.

CERTIFICATE

I, CHRISTINE A. TAYLOR, Registered Professional Reporter, Certified Court Reporter, do hereby certify:

That RICHARD RUCK, M.D., the witness whose deposition is hereinbefore set forth, was duly sworn by me, and that such deposition is a true record of the testimony given by such witness taken stenographically by me to the best of my ability.

I further certify that I am not financially interested in the outcome of this action, a relative, employee, attorney or counsel of any of the parties, nor am I a relative or employee of such attorney or counsel.

IN WITNESS WHEREOF, I have hereunto set my hand this 17th day of February, 2026.

CHRISTINE A. TAYLOR
Registered Professional Reporter
Certified Court Reporter #4736

P R O C E E D I N G S

- - -

THE VIDEOGRAPHER: We are now on the record.

My name is Ryan Heathcock. I am the videographer for Golkow, a Veritext division. Today's date is Friday, February 27, 2016 and the time is 9:05 AM Eastern.

This deposition is being held at 1101 L Street Northwest in Washington, DC. This deposition is being taken in the matter of Camp Lejeune Water Litigation versus USA, Case Number 7:23-CV-897. This case is being heard in the United States District Court for the Eastern District of North Carolina Southern Division.

Today's deponent is Mr. Gregory Russo.

At this time, counsel, would you please identify yourselves, starting with the noticing attorney.

MS. BUTLER: Good morning.

I'm Jenna Butler. I'm with the Plaintiffs Leadership Group.

MR. ANTONUCCI: Giovanni Antonucci for United States.

THE VIDEOGRAPHER: Thank you very much.

At this time will our -- actually, for those joining us on Zoom, would they please identify themselves at this time.

MR. VANSLYKE: Ben VanSlyke also on behalf of the Plaintiffs Leadership Group.

MR. TURNER: Joseph Turner for United States.

THE VIDEOGRAPHER: Thank you very much.

At this time, will our court reporter please swear in the witness.

- - -

GREGORY S. RUSSO

called for examination, and, after having been duly sworn, was examined and testified as follows:

THE VIDEOGRAPHER: Counsel, you may proceed.

MS. BUTLER: Thank you.

- - -

EXAMINATION

- - -

BY MS. BUTLER:

Q. Good morning. We met right before the deposition started and I'm Jenna Butler. I'll be taking your deposition today and I'm here on behalf of the plaintiffs.

Can you please state your full name for the record?

A. Yes. Good morning. My name is Gregory Russo. My middle name is Severin, S-e-v-e-r-i-n.

Q. You've been deposed before, correct?

A. That is correct.

Q. Okay. So just to remind you, the court reporter is going to be taking down the testimony. So I will try to not speak over you, and will you try to not speak over me?

A. Yes, I will do my best.

Q. Thank you.

And if I ask you a question, I am going to assume that you understand the question, unless you ask me to rephrase it or tell me that you don't understand the question.

Is that fair?

A. Yes.

Q. Okay. Now, you understand you're under oath, correct?

A. Yes.

Q. Okay. And if you can also -- please you're doing a great job now -- answer verbally yes or no instead of uh-huh or huh-uh. It's a lot easier for the court reporter.

Is that fair?

A. Yes.

Q. Okay. Thank you.

And if you need to take a break, we can take a break. I just ask that you answer any question that's pending at the time.

Is that fair?

A. Yes.

Q. And typically in these depositions -- we've taken a lot in this case at this point. We typically take a break around an hour. I am

not super good about keeping track of time while I'm taking the deposition if, you know, I'm glad, Mr. Giovanni, if you want to let me know if you think it's time for a break, as long as a question that I've asked is answered, I'm fine with that.

Is that okay?

A. Yes.

Q. Okay. Are you aware of any circumstances here today that might prevent you from understanding my questions or answering them truthfully and honestly?

A. No.

Q. Okay. What do you know about the Camp Lejeune Justice Act?

MR. ANTONUCCI: Objection. To the extent that this question calls for the contents of privileged communications, please do not divulge those.

BY MS. BUTLER:

Q. Beyond what your attorneys may have told you about the Camp Lejeune Justice Act, do you have any independent understanding of the Camp Lejeune Justice Act?

A. No, I do not.
Q. Were you familiar with the Camp Lejeune Water Litigation before you were retained in this matter?
A. I don't believe so. I may have seen a commercial at some point on television, but it wasn't something that was at the top of my mind.
Q. So you didn't see a commercial like do an internet search or anything like that to --
A. No.
Q. Okay. Okay. So is it accurate to state that your understanding of the Camp Lejeune Justice Act is based on anything that your attorney has told you?
A. Yes.
Q. Without divulging what your counsel has told you, what is your current understanding of your role in this litigation?
A. My understanding of my role is to calculate the reasonable value of past medical expenses that have been identified by some of the plaintiffs.
Q. And by identified through some of the plaintiffs, are you referring to the

identification through the expert report of Marjorie Hackett-Wallace?

A. Yes.

Q. Okay. Do you have any friends or family members that you know of who have filed a claim under the Camp Lejeune Justice Act?

A. Not of which I'm aware.

Q. Okay. Do you have any friends or family members who have served or are currently serving in the military?

A. Yes.

Q. Can you explain a little bit more?

A. Yes.

Q. Okay. Who? Is it like a father who has served or a brother who is serving? I'm asking for a little more detail.

MR. ANTONUCCI: Objection.

THE WITNESS: My father served in the military. My father-in-law also served in the military.

BY MS. BUTLER:

Q. Thank you or thanks to them for their service.

Are they out of the military now?

A. Yes.
Q. Do you know what branch of the military they served in?
A. Yes.
MR. ANTONUCCI: Objection.
BY MS. BUTLER:
Q. What branch?
A. My father was in the Army. My father-in-law was in the Air Force. My grandfather served. I mean, you didn't put any limit on this. So --
Q. I'm trying to understand?
A. -- you're going back.
Q. I'm trying to understand if you have any Marines, for example, in your family or amongst your friends who may have served.
MR. ANTONUCCI: Objection.
THE WITNESS: And so now you have expanded it to friends as well.
BY MS. BUTLER:
Q. I thought I had included that previously, but if I hadn't, I was asking if you had any friends or family who have served in the military and now I've asked about the Marine

Corps.

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, and in your initial question, you asked family. So now you've expanded it to friends.

I do believe that there is a spouse of a colleague that I would consider as a friend that has served in the Marines. Otherwise, I don't know of anyone who has served in the Marines.

BY MS. BUTLER:

Q. Do you know if that spouse was ever located at Camp Lejeune?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I don't.

BY MS. BUTLER:

Q. Okay. When were you -- and I'm going to distinguish here in this question between you and Berkeley Research Group.

When do you recall first getting involved in this litigation?

A. I believe that it was last summer.

Q. So summer of 2025?

A. Best of my recollection.

Q. Okay. And what did you understand your role in the litigation to be when you were first involved in the summer of 2025?

A. As I've indicated before in the question that you asked, my role was to calculate the reasonable value of past medical expenses identified by the plaintiffs.

Q. And so has your role in this litigation, as you just defined it, ever changed during the course of the litigation?

A. No.

Q. So your role back in the summer of 2025 up through the current day is to calculate the reasonable value of past medical expenses; is that correct?

A. Correct.

Q. Okay. Do you understand that role to -- sorry. Let me rephrase that.

Do you have any understanding as to whether that role might expand?

A. I do not.

MR. ANTONUCCI: Objection.

THE WITNESS: Sorry.

I do not.

BY MS. BUTLER:

Q. So you do not have an understanding as to your role expanding; is that correct?

I'm just making sure.

MR. ANTONUCCI: Objection.

THE WITNESS: I do not have an understanding as to my role expanding.

BY MS. BUTLER:

Q. Okay. And we will get into in this in more detail, but I do know since you produced your report since December -- on December 15, 2025, I know that you have reviewed some additional materials.

Do you understand that whether you will be asked to testify about those additional materials you have reviewed?

MR. ANTONUCCI: Objection.

THE WITNESS: The additional materials that I have reviewed would not change my opinions. They were duplicative bills or bills that were not relevant.

BY MS. BUTLER:

Q. Do you know how it came about that

you and/or Berkeley Research Group -- because I understand you work for Berkeley Research Group; is that correct?

A. Yes, I do work for Berkeley Research Group.

Q. Okay. Do you understand how Berkeley Research Group or you in particular came to be retained in this litigation?

A. No.

Q. Okay. Were you involved in Berkeley Research Group's retention in this matter?

A. No.

Q. So, for example, you didn't sign any engagement agreements or anything related to Berkeley Research Group's engagement in this matter?

A. No.

Q. Have you ever seen any retention agreements or contracts involving the retention of the Berkeley Research Group for this matter?

A. No.

Q. Are there any separate retention agreements or engagement agreements with respect to your involvement in this matter?

A. No, I don't believe so.
Q. Okay. So, so you haven't seen any, for example, contract engaging you for this matter; is that correct?
A. That is correct.
Q. You just indicated that you first became involved in this matter around the summer of 2025.
Do you know if Berkeley Research Group was involved in this matter prior to that time?
MR. ANTONUCCI: Objection.
THE WITNESS: I believe that they were.
BY MS. BUTLER:
Q. Okay. Do you know how Berkeley Research Group was involved prior to your involvement in the summer of 2025?
MR. ANTONUCCI: Objection.
THE WITNESS: I understood that there were some colleagues that were working on this matter, but I didn't understand the details of what everyone was doing.

BY MS. BUTLER:

Q. What colleagues are you referring to?

A. I had an understanding that Dubravka Tosic was working on the matter and I believe Robin Cantor.

Q. So who is Robin Cantor?

A. She is a managing director of Berkeley Research Group.

Q. Was she involved -- let me -- let me back up.

So I know that with respect to your involvement in this matter, you had some other individuals at -- can I call it BRG?

A. Yes.

Q. Okay. So for purposes of today, if I say "BRG," do you understand I'm referring to Berkeley Research Group?

A. Yes.

Q. Okay.

A. And I'll do the same thing.

Q. Okay. It will save the court reporter a lot of time too.

I understand from your work on this

matter that there are other individuals at BRG working with you; is that correct?

A. That is correct. I had a team that worked at my direction.

Q. Okay. Did -- did -- was Robin Cantor on a team?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know.

BY MS. BUTLER:

Q. Okay. Do you know what -- what her role was with respect to the litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not.

BY MS. BUTLER:

Q. You just -- what did you understand she was doing?

MR. ANTONUCCI: Objection.

THE WITNESS: I didn't have any understanding of what her scope was, if she was even doing anything.

I understood that there was a conversation that -- that I had had at some point where she briefly discussed this litigation.

BY MS. BUTLER:

Q. Do you recall any more about that discussion, other than what you've just described?

A. I do not remember any of the details of it. I remember her referencing Camp Lejeune, which was not a word that I had really heard before, and that's about the extent of what I remember.

Q. Do you remember what she said she was doing for the Camp Lejeune litigation?

A. So --

MR. ANTONUCCI: Objection.

THE WITNESS: -- as I indicated before, I did not.

BY MS. BUTLER:

Q. Okay. And did you also talk to Dubravka Tosic?

MR. ANTONUCCI: Objection.

THE WITNESS: I have spoken with Dubravka before, yes.

MR. ANTONUCCI: I'm going to -- excuse me -- add to my objection to the extent that you're asking about conversations between retained experts,

those are protected by CMO 17.

MS. BUTLER: Okay. And it's my understanding that Ms. Tosic is retained but not Ms. Cantor. Is that correct?

MR. ANTONUCCI: Ms. Cantor is retained as well.

BY MS. BUTLER:

Q. Okay. With respect to Ms. Tosic, what is your understanding of her role in this litigation? Not based on conversations with her, but just what is your general understanding?

A. I don't have an understanding of what her role is.

Q. Have you reviewed any reports that she has prepared?

A. No.

Q. So you previously indicated that before you actually started your work in this litigation, that you had an understanding that colleagues at BRG were working on the matter. We've mentioned Ms. Tosic and I assume Robin Cantor is Ms. Cantor.

Are there any others that you recall

hearing were working on this matter?
A. Yes. Dr. Henry Miller.
Q. And what was your understanding of what Dr. Henry Miller was working on for this matter?
A. My understanding was that Dr. Miller was analyzing services in life care plans to identify what reimbursement government sources would provide with those services.
Q. And do you understand that he has prepared a report along those lines?
A. My understanding is that he has prepared reports --
Q. Okay.
A. -- along those lines.
Q. And do you intend to offer any of the opinions that Dr. Henry Miller has expressed in this case?
MR. ANTONUCCI: Objection.
THE WITNESS: I do not intend to offer opinions on the subject matter that -- I'm sorry, not the subject matter.
I do not intend to offer any

opinions on what Henry Miller has offered as opinions.

BY MS. BUTLER:

Q. Now, Dr. Miller also is with BRG; is that correct?

A. That is correct.

Q. So would it be accurate to state that with respect to your opinions and Dr. Miller's opinions, each of you plan to stay within the scope of your individual report?

MR. ANTONUCCI: Objection.

THE WITNESS: I can't speak for Dr. Miller. I can speak for myself.

Yes, I intend to provide opinions that are solely within the scope of my report -- reports.

BY MS. BUTLER:

Q. You mentioned that you are calculating a reasonable value of past medical expenses.

Did I remember that correctly?

A. You did, yes.

Q. Okay. When you use the term "reasonable value," is that any different from

market value?

A. No, I think they would be synonymous.

Q. When is a reasonable value calculation utilized?

A. It's utilized every day in the healthcare marketplace. When we as healthcare researchers and individuals that are -- that have a responsibility for operating the healthcare markets in the United States, we are concerned with what the reasonable value of services is, and so it's something that I and my team go through on a daily basis and have gone through in the more than 20 years of my career.

Q. In the litigation context, when are you aware of reasonable value calculations being used?

MR. ANTONUCCI: Objection.

THE WITNESS: I am aware that they have been used in a number of different cases. Cases that involve the disagreement as to what has been reimbursed for services between payors and providers.

I understand that they have been used as it relates to the potential injuries that an individual has incurred.

I understand that reasonable value calculations have also been used in a number of other contexts, like context relating to the Anti-Kickback Statute as well.

BY MS. BUTLER:

Q. And have you been involved in testifying in the litigation context in all of those areas?

MR. ANTONUCCI: Objection.

THE WITNESS: I have offered testimony in matters that relate to those areas, yes.

BY MS. BUTLER:

Q. With respect to the area of potential injuries in litigation, can you expand a little bit upon your experience with the use of the reasonable value calculation?

MR. ANTONUCCI: Objection.

THE WITNESS: I have offered testimony in matters where there are

alleged injuries and, as part of those alleged injuries, a plaintiff is offering or seeking compensation for past medical bills, past medical services that have been rendered. And in that context, I have calculated a reasonable value of what those services are.

BY MS. BUTLER:

Q. How many times have you done that for a piece of litigation?

A. I have done that in, at this point, probably hundreds of cases in which I have offered a report. I have offered deposition or trial testimony in maybe about 40 cases of that sort.

Q. In those cases, have you ever brought your reasonable value calculations to current dollars?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I've never done that.

BY MS. BUTLER:

Q. In those cases, has there been an economist who has done that?

MR. ANTONUCCI: Objection.

THE WITNESS: In some of those cases, that has -- there has been an individual -- I don't know what their qualifications were -- who has calculated a net present value.

BY MS. BUTLER:

Q. And is that because calculating the net present value was beyond the scope of the opinions you were expressing?

MR. ANTONUCCI: Objection.

THE WITNESS: In what context?

BY MS. BUTLER:

Q. You said that there were some cases where another individual calculated a net present value, and I'm asking why it was that you didn't do that calculation versus that person.

MR. ANTONUCCI: Objection.

THE WITNESS: It's not something on which I feel prepared to opine.

BY MS. BUTLER:

Q. Okay. Is that because you don't recall or understand why that individual brought

those values to current value?

MR. ANTONUCCI: Objection.

THE WITNESS: No, it's because in those cases, there were both past medical services as well as future medical services, and the calculation of a net present value was a more complex analysis.

One was both -- one was needing to discount and deal with different types of services, and it's just not something that was within my scope.

BY MS. BUTLER:

Q. Is calculating a present value for past medical expenses not within your scope in this litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct. I was not asked to do so.

BY MS. BUTLER:

Q. If you were asked to do so, could you?

MR. ANTONUCCI: Objection.

THE WITNESS: I would need to study the issue and determine whether or not it is something that I felt I could accomplish.

BY MS. BUTLER:

Q. Have you in either litigation or outside of litigation brought past medical expenses to a present or current value?

MR. ANTONUCCI: Objection.

THE WITNESS: I have applied an inflation rate at times. I have not gone through a calculation of net present value in terms of discounting what may be future services that are then compensated in the current dollars.

BY MS. BUTLER:

Q. When you say you have applied an inflation rate, why have you applied an inflation rate?

A. I don't recollect the context in which I have, but I know that I've dealt with applying an inflation rate. I don't recollect having done so in litigation testimony that I've offered. I recollect having done so in some

consulting matters that I've had that are not litigation.

Q. Why would an inflation rate be applied?

MR. ANTONUCCI: Objection.

THE WITNESS: There can be lots of reasons and it depends on the situation.

BY MS. BUTLER:

Q. Is it correct that if I paid $10,000 10 years ago that that $10,000 I paid 10 years ago would likely be worth more now today?

MR. ANTONUCCI: Objection.

THE WITNESS: Not necessarily.

BY MS. BUTLER:

Q. You understand the concept of the time value of money, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. BUTLER:

Q. Is that one of the reasons that inflation rates are sometimes applied?

A. I don't know about that.

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. I think I asked you this, but let me make sure.

Do you intend to update, supplement, amend, or correct any of your reports or tables --

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. -- before trial?

MR. ANTONUCCI: Same objection.

THE WITNESS: At this time, I do not intend on updating my reports.

However, I have -- I reserve the right to update them to the extent that additional information is provided by the plaintiffs, which my understanding since I have filed the reports there has been additional information.

BY MS. BUTLER:

Q. But at this time I think you already testified, you do not intend to update in spite of that additional information; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Based on the additional information that I have reviewed since my report was -- my reports were produced, I do not intend on updating with that additional information.

However, I do reserve the right, to the extent that the plaintiffs continue to produce additional materials, that my reports may need to be updated if those additional materials would have an impact on the opinions I'm offering.

BY MS. BUTLER:

Q. So just to make sure I understand.

Based on the materials you've reviewed, as we're sitting here today, you do not intend to correct, amend, update your report, but you're reserving the right to do so should additional materials be made available to you after today; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That's correct.

BY MS. BUTLER:

Q. Okay. Do you know if Berkeley

Research Group usually requires an engagement agreement before contracting for work?

MR. ANTONUCCI: Objection.

THE WITNESS: My understanding is that we -- we BRG -- typically enter into an engagement letter with a client.

BY MS. BUTLER:

Q. But you're not aware of one existing for this engagement; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I have not asked and I do not have information on whether an engagement letter specifically exists for this work yet.

I would think that our general counsel would have contacted me if I was working on a case for which there was no contract, no agreement.

BY MS. BUTLER:

Q. We previously mentioned Dr. Henry Miller, who you are aware of has provided reports in this case, correct?

A. Yes.

Q. Okay. Have you worked with him on other matters?

A. Yes.

Q. So what is your professional relationship with Dr. Henry Miller?

A. He is a colleague of mine.

Q. And do you two do the same thing or do you complement one another?

I'm trying to understand in what context you might work together.

MR. ANTONUCCI: Objection.

THE WITNESS: Henry and I have very similar skill sets. He has many more years of experience than I do given his age, but we have very similar skill sets and have had a similar scope of work for many years.

BY MS. BUTLER:

Q. Now, Dr. Miller holds a PhD in accounting and economics, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I know that he holds a PhD. I don't know what it's in.

BY MS. BUTLER:

Q. Okay. Do you hold a PhD in accounting and economics?

A. No, I do not.

Q. Okay. Do you hold yourself out as an economist?

A. No, I do not.

Q. And do you -- are you aware that Dr. Miller has an MBA?

A. No, I was not aware of that.

Q. Okay. You do not have an MBA, correct?

A. No. I have a Master's of Health Science.

Q. Did you work with Dr. Miller on his reports in this case?

A. Yes.

Q. What was your role with respect to Dr. Miller's reports in this case?

A. I assisted in coordinating what some of the team was doing and taking direction from Dr. Miller with respect to the analyses that he wanted done.

Q. Did you provide any of the substance of his reports?

MR. ANTONUCCI: Objection.
I'm going to instruct you not to answer as this is protected by CMO 17.

BY MS. BUTLER:

Q. You've already testified that you don't plan to provide testimony in this case with respect to Dr. Miller's reports, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct.

BY MS. BUTLER:

Q. When Dr. Miller was working on his reports and there was, I believe you said, a team that was working with him; is that correct?

A. Yes, that's correct.

Q. I believe you said that you were working at Dr. Miller's direction; is that correct?

A. That is correct.

Q. Okay. Was there a particular aspect of his report that you were working at his direction on?

MR. ANTONUCCI: Objection.

THE WITNESS: No.

BY MS. BUTLER:

Q. And I believe you said that you were coordinating a team who was helping Dr. Miller; is that correct?

A. I was assisting in the coordination of the team.

Q. Was that more of an oversight or supervisory role than an actual, I guess, substantive involvement?

MR. ANTONUCCI: Objection.

THE WITNESS: I assisted in coordinating to ensure that the staff had an understanding of the tasks and that there were enough staff that were assisting, but I also did at times have a substantive role.

BY MS. BUTLER:

Q. What was that substantive role?

MR. ANTONUCCI: Objection.

I'm going to instruct you not to answer.

BY MS. BUTLER:

Q. Is it your position that any of the opinions expressed by Henry Miller relied on your

expertise?

A. No, they do not.

Q. Will you be expressing opinions on any of the offsets addressed by Henry Miller?

MR. ANTONUCCI: Objection.

THE WITNESS: No.

BY MS. BUTLER:

Q. Do you have any understanding of any agreement about the cost of work for BRG's role in this litigation?

A. No.

Q. Do you know how much has been billed by BRG for their work in this litigation?

A. No.

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Do you review any of the invoices that BRG submits for this litigation?

A. I have in the past reviewed an invoice. I am not on the critical path with respect to getting those invoices out. So I don't review every one, but I recollect having seen one of them. I don't remember any of the details on it, though.

Q. Do you have any understanding as to how much BRG has billed to date for this litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: No.

BY MS. BUTLER:

Q. Do you have any understanding as to how much BRG has billed to date for your reports in this litigation?

A. No.

Q. Would you be surprised if I told you that almost 500,000 has been billed to date for your reports in this litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: No.

BY MS. BUTLER:

Q. Do you know if BRG or any members of the BRG team working on this litigation have provided anything, such as updates or projections, with respect to the litigation? And by "provided" I mean to DOJ.

MR. ANTONUCCI: Objection.

THE WITNESS: I don't understand your question.

BY MS. BUTLER:

Q. Okay. Has BRG been providing, say, monthly, quarterly, or some type of update or projection to DOJ with respect to its work on this litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: Not of which I'm aware.

BY MS. BUTLER:

Q. You have not been involved in drafting anything like that?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I have not.

BY MS. BUTLER:

Q. Okay. We will look at your specific reports, and if you need to refer one, please let me know. I have them all here.

Am I correct that you are not going to be testifying as to any reasonable values for future healthcare in this litigation?

A. That is correct. As I have indicated, the scope of my work was to provide the reasonable value of past medical services.

Q. And at the current time, that is

with respect to 16 plaintiffs; is that correct?

A. That is correct. I have provided reports for 16 plaintiffs.

Q. And am I correct that you are not, for example, providing opinions with respect to any future healthcare that, say, a life care planner may have included in a life care plan report in this litigation?

A. That is not something that is within the scope of the reports that I have offered.

Q. And so you're not planning to offer those opinions in this case, correct?

A. I am only planning to offer the opinions as to the reasonable value of past medical services.

Q. On other occasions, have you offered opinions with respect to reasonable values of future medical care?

A. I have, yes.

Q. It's just not in the scope of what you're doing for this litigation; is that correct?

A. That is correct.

Q. When you have offered opinions with respect to the reasonable value of medical care

for future medical care, have you done any type of present value calculation in those cases?

A. No.

Q. Okay. And, again, is that because others have taken on that role, or is it because you couldn't do the calculation or you weren't asked to do the calculation?

I'm trying to understand the reason.

MR. ANTONUCCI: Objection.

THE WITNESS: It's not something that has ever been within my scope. There have been situations where others have provided that calculation. It's not something that I do or that I offer to my clients in those matters.

BY MS. BUTLER:

Q. Were you provided any assumptions for your work in this case?

A. No, not that I recollect.

Q. It's my understanding that you reviewed the reports of Marjorie Hackett-Wallace in this case; is that correct?

A. Yes, I did.

Q. And those reports that you refer to

in your reports for this case are dated October 29, 2025; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't recollect the date of when Marjorie Hackett-Wallace submitted her reports. It was sometime in the fall and before my reports were submitted in December.

BY MS. BUTLER:

Q. When you reviewed Marjorie Hackett-Wallace's reports, did you go back to see if she had missed any relevant medical billing pertaining to the injuries in this case?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't understand what you mean by "relevant medical billing."

BY MS. BUTLER:

Q. So let's say Marjorie Hackett-Wallace's report identified $50,000 worth of charges for a bladder cancer patient for billing related to care for that bladder cancer.

Are you with me?

A. Yes.

Q. Okay. And it's my understanding that you reviewed Marjorie Hackett-Wallace's reports; is that correct?

A. I did, yes.

Q. And then that you validated the medical billing amounts; is that accurate?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I went through to ensure that Marjorie Hackett-Wallace had identified the accurate billed charges that were on each of the bills that she had included within her analyses, and I found that she did not.

BY MS. BUTLER:

Q. How often did you find that she did not?

A. I don't recollect the number of times. There were several instances. And when Marjorie Hackett-Wallace subsequently submitted her rebuttal reports, she agreed with almost all of the instances that I found where she had made an error.

Q. And were those errors generally

maybe a transcription error or a duplication?

MR. ANTONUCCI: Objection.

THE WITNESS: I mean, it seemed like sloppy work that she did where she just didn't check. I don't know why, how she made them or why she made them.

BY MS. BUTLER:

Q. Do you have an understanding as to the percentage of the billing charges that Marjorie Hackett-Wallace identified that you did not find an error with?

A. No.

Q. Would you agree that it was at least over 50 percent of them?

MR. ANTONUCCI: Objection.

THE WITNESS: I would agree that it was over 50 percent, yeah.

BY MS. BUTLER:

Q. Would you agree that it was over 75 percent?

MR. ANTONUCCI: Objection.

THE WITNESS: Over 75 percent. Past that point I'd be

speculating.
BY MS. BUTLER:
Q. Okay. But you'd agree that at least, at least, 75 percent of the billing charges that Marjorie Hackett-Wallace identified you agreed with; is that correct?
MR. ANTONUCCI: Objection.
THE WITNESS: Yeah, I think that's reasonable. I would have expected her to have been complete and accurate in her report.
BY MS. BUTLER:
Q. So it's your position she was not?
A. I don't think it's only -- it's not only my position. It's her position as well that in her initial reports that she was wrong, and then in her rebuttal reports she agreed with the places where I had identified that she had made errors.
Q. If you identified that she made an error, would that be a discrepancy noted on your Table 1 in the total amount versus her original report and appendices? Is that how it would be identified?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I believe it would be identified there. It would also be identified in the packet of materials that I have provided. Appendix C to my report.

BY MS. BUTLER:

Q. Okay. And are you aware that on some occasions the difference between Marjorie Hackett-Wallace's number and your number is less than $2,000?

MR. ANTONUCCI: Objection.

THE WITNESS: In some cases, yes, it is small.

BY MS. BUTLER:

Q. Okay. Did you assume for purposes of your report that the medical billings you reviewed were related to the plaintiff's actionable illness in this case?

MR. ANTONUCCI: Objection.

THE WITNESS: I did not make an assumption I have on that. I have no opinion on whether these bills that were identified by Marjorie Hackett-Wallace

relate to the at-issue conditions.

BY MS. BUTLER:

Q. So along those lines, you took Marjorie Hackett-Wallace's numbers and then either Dr. Ji or Dr. Hasan's numbers and calculated reasonable value based on their determinations?

MR. ANTONUCCI: Objection.

THE WITNESS: I calculated the reasonable value of each of the past medical services that were identified by Marjorie Hackett-Wallace.

I then limited that list of services based on those that Dr. Ji or Dr. Hasan had and identified were related to the condition.

BY MS. BUTLER:

Q. So you were relying on Dr. Ji, Dr. Hasan, and Marjorie Hackett-Wallace for the relatedness determinations in their reports.

You didn't go back and validate any of that; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct. I'm not a clinician. So I'm

not able to opine on whether a medical service relates to a certain condition.

BY MS. BUTLER:

Q. Did you do any analysis to see if there were relevant medical billings that were missed by either Marjorie Hackett-Wallace or Dr. Ji or Hasan?

MR. ANTONUCCI: Objection.

THE WITNESS: I did not do analysis. As I'm not a clinician, I wouldn't have the ability to determine whether past medical services that had been incurred were related to a specific condition or not.

BY MS. BUTLER:

Q. So am I correct that you're not rendering opinions in this case about the accuracy of the medical billing data that you reviewed?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't necessarily agree with that.

As I indicated, Marjorie Hackett-Wallace provided inaccurate information in her initial

reports -- initial report -- sorry -- and I opined on the accuracy of that. I made corrections.

Marjorie Hackett-Wallace in her rebuttal report agreed with those corrections, and so to that extent, I am offering an opinion as to the accuracy.

BY MS. BUTLER:

Q. Is that more the accuracy of Marjorie Hackett-Wallace's work versus the accuracy of the actual medical billing data, the data that you reviewed that you say you validated the expenses from?

MR. ANTONUCCI: Objection.

THE WITNESS: I am offering no opinion as to the medical coding that is included on the medical bills which were provided related to past medical services.

BY MS. BUTLER:

Q. So I understand your background is in data analytics, correct?

A. I have a background in healthcare finance. That includes a significant

concentration in data analytics.

Q. And it looked from your CV -- and we'll look at it in more detail down the road -- that sometimes you get involved in fraud investigations; is that correct?

A. Yes, I have been.

Q. Okay. But that was not your job in this case, correct?

A. The scope of work in this case was to analyze the reasonable value of the past medical services.

Q. So you weren't analyzing the medical billing data for, like, upbilling, upcoding, miscoding, fraud, things like that; is that correct?

A. That is correct. I did not do that. I assumed that the providers that had submitted the past medical bills had done so accurately and completely.

Q. And you're not offering opinions regarding the reasonableness of the medical care provided, correct?

A. I'm not a clinician. I don't have any opinions on the medical care that has been

rendered.

Q. And you're not offering opinions regarding the amounts paid on those medical bills, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I'm not offering an opinion on the amounts that were or were not paid.

What I'm offering is an opinion on the reasonable value of the past medical services.

BY MS. BUTLER:

Q. And you're not rendering any type of opinion regarding out-of-pocket expenses, premiums, copays, things like that; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I am not offering opinions on premiums or copays.

The opinions that I'm offering in this case are with respect to the reasonable value of past medical expenses.

BY MS. BUTLER:

Q. And your opinions are limited to past medical expenses, correct? They don't include things like veteran disability payments or awards of benefits?

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Is that correct?

MR. ANTONUCCI: Same objection.

THE WITNESS: My opinions relate to the reasonable value of past medical services and do not include the things that you mentioned.

BY MS. BUTLER:

Q. Did you perform a cost-effectiveness analysis in this case?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know what you mean by "cost-effectiveness."

BY MS. BUTLER:

Q. Did you analyze the effectiveness of any of the medical care or medical billing in this case?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't understand what you mean by "effectiveness" of medical care.

BY MS. BUTLER:

Q. So I take it that means you didn't do that analysis if you don't understand the question; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I wouldn't agree with that. I don't understand the term that you're using.

BY MS. BUTLER:

Q. Did you in any way evaluate effectiveness in this case?

MR. ANTONUCCI: Objection.

THE WITNESS: How would you define effectiveness in your question?

BY MS. BUTLER:

Q. How would you define effectiveness?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I don't understand your question, so I can't answer it.

BY MS. BUTLER:

Q. You calculated a reasonable value from the medical billing information you were provided; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I have calculated the reasonable value of past medical services.

BY MS. BUTLER:

Q. And what was that based on? The medical billing information you were provided or something else?

MR. ANTONUCCI: Objection.

THE WITNESS: It was based on the medical bills that have been provided in this matter.

BY MS. BUTLER:

Q. What did you do to prepare for today?

A. I reviewed the reports that I've submitted in this case and the materials upon which I relied. I had a conversation with my team and -- and a conversation with attorneys at the Department of Justice.

Q. Was anyone involved in these

meetings or conversations, other than your BRG team or counsel at the Department of Justice?

A. No.

Q. Was Dr. Henry Miller involved in those meetings or conversations?

A. No.

Q. Were any materials supplied to you that are not referred to in your Materials Considered List, or lists?

A. Yes.

Q. What?

MR. ANTONUCCI: Objection.

THE WITNESS: The rebuttal reports of -- or rebuttal report of Marjorie Hackett-Wallace, which was provided after my reports were submitted, and also the report of Dr. Basu, which was provided after my reports were submitted.

BY MS. BUTLER:

Q. Is there anything that you recall disagreeing with when you reviewed the rebuttal report and related documents of Marjorie Hackett-Wallace?

MR. ANTONUCCI: Objection.

THE WITNESS: Without having that report in front of me, I recollect that there were times when I think she mischaracterized some of the work that I had done as being done by Dr. Ji or Dr. Hasan.

BY MS. BUTLER:

Q. What work are you referring to there that you contend Ms. Hackett-Wallace mischaracterized?

MR. ANTONUCCI: Objection.

THE WITNESS: The reasonable value of past medical expenses.

MR. ANTONUCCI: We're at about an hour, Jenna.

MS. BUTLER: Okay. I'm fine taking a break.

THE VIDEOGRAPHER: The time is 9:59. We're going off the record.

(A recess was taken.)

THE VIDEOGRAPHER: This is the beginning of media unit number 2 of the video-recorded deposition of Mr. Gregory

Russo. The time is 10:10 AM Eastern. We are now back on the record.

Counsel, you may proceed.

MR. ANTONUCCI: Quickly for the record, we are now joined by my colleague Melanie Konstantopoulos for the United States.

THE VIDEOGRAPHER: Thank you.

MS. BUTLER: Thank you.

BY MS. BUTLER:

Q. Mr. Russo, during the break, did you have any conversations about the litigation or this deposition with your attorney?

A. No, no substantive conversations.

Q. Thank you.

I wanted to clarify something that we touched on before the break, and it was with respect to the calculation of present value as it pertains to this case.

Do you recall us discussing that?

A. I recall us having mentioned that in our conversation.

Q. My recollection is you said something to the effect that you would have

to -- if you were asked to apply a present value in this case, you'd have to take a look at the situation and see if it's something you're able to do.

Is that accurate, or did you say something else?

MR. ANTONUCCI: Objection.

THE WITNESS: I think that's roughly accurate. I would need to consider what I was being asked to do and analyze and determine whether that is something I could do.

BY MS. BUTLER:

Q. And so you have not done that analysis; is that correct?

A. I have not calculated the present value, and it's not been something I've been asked to do.

Q. And so you also haven't analyzed whether you would be able to do that in this case; is that correct?

A. That's correct. I have not analyzed whether that would be something I could do.

Q. Okay. We were talking about whether

you had reviewed any materials in preparation for today, and I think you mentioned the rebuttal reports and updated appendices of Marjorie Hackett-Wallace; is that correct?

A. Yes, I had mentioned that.

Q. Did you look at anything on your own, meaning anything that wasn't given to you by counsel in this case, since your report?

MR. ANTONUCCI: Objection.

THE WITNESS: Not related to this case, no.

BY MS. BUTLER:

Q. Would it be accurate to say that any of the analysis you performed with respect to the scope of your opinions in this case is reflected in your report -- reports?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, the analyses that I conducted and the opinions that I am offering in this case are contained within the reports and its accompanying appendices.

BY MS. BUTLER:

Q. Okay. Have you kept any personal

notes, logs, or records relating to this matter?

MR. ANTONUCCI: Objection.

THE WITNESS: I have not.

BY MS. BUTLER:

Q. Do you know if anyone on your team has kept such notes?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not.

BY MS. BUTLER:

Q. We've discussed Dr. Henry Miller, Dubravka Tosic, and Robin Cantor as being other individuals involved in providing expert testimony in this case with whom you are familiar.

Do you recall discussing those three individuals?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I do, and to be clear, I'm not certain if all of them are providing expert testimony in this case.

BY MS. BUTLER:

Q. Are you familiar with any of the other experts either that you understand are offering testimony in this case or whose reports

you have reviewed for this case?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I'm not personally familiar with any of them.

BY MS. BUTLER:

Q. Are you professionally familiar with any of them?

MR. ANTONUCCI: Objection.

THE WITNESS: I am not. I would not say I'm professionally familiar. I reviewed reports from Dr. Ji and Dr. Hasan, but I'm not professionally familiar with them.

BY MS. BUTLER:

Q. And I think we already discussed that you have not reviewed any reports prepared by Dubravka Tosic; is that correct?

A. Correct.

Q. Okay. And likewise have you reviewed any reports prepared by a Patricia or Tricia Younts or an Andrew -- I forget his first name -- maybe Andrew Brod, B-r-o-d?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know who

those individuals are.

BY MS. BUTLER:

Q. And you don't recall seeing any reports prepared by those individuals?

A. Not of which I recollect.

Q. Have you worked with the Department of Justice before?

A. Yes, I have.

Q. Can you tell me a little bit about the other matters you've worked with them on?

A. I worked with the Department of Justice in a matter that involved a alleged injury and a question as to the reasonable value of I believe in that case it was future medical services.

Q. Do you remember where that case was pending?

A. I do not.

Q. And were you working with the Department of Justice in the defense of that action?

A. Yes.

Q. Did you render an expert report in that case?

A. I don't believe that I did. I don't believe. I believe it settled before my report was needed.

Q. And so were you also not deposed and did not testify?

A. Correct.

Q. Okay. And did that case involve any reasonable values as to past medical expenses?

A. I don't recollect it involving past medical expenses. I believe it was just future.

Q. And is that a case where there had been a life care planner involved?

A. I believe there was a life care planner.

Q. And so in cases such as that, is it your experience that there might be a life care planner or a vocational rehab specialist, then you take that information and you do your calculations from that information?

A. Yes, in some cases, I use information that a life care planner has provided to determine the reasonable value of future medical services.

Q. Have you ever prepared a life care

plan report or vocational -- vocational rehabilitation report?

A. No, I have not. I'm not a life care planner.

Q. Okay. Other than the other persons who are involved in this case at BRG, have you spoken with any of the other experts in this case whether retained or nonretained?

MR. ANTONUCCI: Objection.

THE WITNESS: I believe I had a brief telephone call with Dr. Ji or Dr. Hasan. I don't recollect which one, but I think I only spoke with one of the two of them.

BY MS. BUTLER:

Q. Any other experts that you've spoken with?

A. Not of which I'm aware.

Q. Okay. And was that just one call with Dr. Ji or Hasan?

A. Yes.

Q. And is the information gained as a result of that call contained within your reports in this matter?

MR. ANTONUCCI: Objection.

THE WITNESS: I didn't gain any information within that call. I identified what I would need to be able to do, the work that I was being provided, and Dr. Ji and Dr. Hasan provided that work then in their reports.

BY MS. BUTLER:

Q. So the information you needed is contained within Dr. Ji and Dr. Hasan's reports?

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Is that correct?

MR. ANTONUCCI: Same objection.

THE WITNESS: Yes, I believe so. I needed them to identify for each service whether they determined that it was relevant to the at-issue condition.

BY MS. BUTLER:

Q. And is that because you were not making those determinations, correct?

A. Correct. I was not making determinations as to the clinical relevance of

services, as I'm not a clinician.

Q. Okay. What is your date of birth?

MR. ANTONUCCI: Objection.

THE WITNESS: I was born on [redacted], 1981.

BY MS. BUTLER:

Q. And where do you live and work?

MR. ANTONUCCI: Objection.

THE WITNESS: I live in Arlington, Virginia and I work at BRG.

BY MS. BUTLER:

Q. BRG has offices all over the United States; is that correct?

A. We have a number of offices spread throughout the U.S.

Q. Do you work in a particular office?

A. Yes.

Q. Which one?

A. The Washington, DC office.

Q. And you've worked for BRG since 2010; is that correct?

A. Correct.

Q. Okay. And you graduated from William and Mary in 2003; is that correct?

A. That is correct.
Q. And what was your undergraduate degree?
A. Bachelor of Arts.
Q. And then you went to Johns Hopkins and graduated in 2005 with a Master's of Health Science; is that correct?
A. That is correct. I went to the Johns Hopkins Bloomberg School of Public Health.
Q. And since you graduated in 2005 from the school you just mentioned, have you been a consultant ever since?
A. I have worked as a consultant since my time in graduate school until the present.
Q. Have you ever held a position in the healthcare industry other than as a consultant?
A. Yes.
Q. Tell me about that.
A. As is indicated on my CV, I worked for Jersey Shore University Medical Center. I served as both a patient care associate as well as an administrative intern.
Q. And was that while you were in graduate school?

A. Both undergraduate as well as graduate school.

Q. And what were your job duties at Jersey Shore?

A. As a patient care associate, I worked in the emergency room assisting doctors and nurses in the rendering of care to the patients that presented. As the administrative intern, I was supporting the Center for Bloodless Surgery.

Q. Let me go back to when you were in the emergency room as a patient care associate.

You mentioned something about rendering care.

Were you actually rendering care?

A. I was not rendering clinical care, but I would say that I was still caring for patients, in that when doctors ordered certain radiological examinations, I would ensure that the patient got from their room to the CAT scan, to the MRI, that they got back.

I was in the room and handing doctors and nurses supplies when they were then performing procedures on patients, and so while I wouldn't say I was a clinician, I would say that I

was part of the care that was being rendered.

Q. You were part of the care team, correct?

A. I was part of the care team, yes.

Q. And then you mentioned that you had another role and, I'm sorry, I didn't get it written down.

What was that role again?

A. I was an administrative intern in the Center for Bloodless Surgery.

Q. Okay. What were you doing as an administrative intern?

A. I was supporting that center in conducting some financial analyses and ensuring that the department -- that that center was operating as -- as the managers of it had -- had wanted it to operate.

Q. Is it your position that any of the experience you gained in those positions with Jersey Shore provide requisite background or training for your opinions in this case?

MR. ANTONUCCI: Objection.

THE WITNESS: While I don't believe that they provide specific

experience that I'm relying upon, they do contribute to my overall understanding of the healthcare marketplace and the manner in which it operates, which is something that is useful in this case.

BY MS. BUTLER:

Q. I may have asked this already, and I apologize if I did, but you are not a CPA or an accountant, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not have CPA, no.

BY MS. BUTLER:

Q. Are you an accountant without a CPA?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I am not an accountant.

BY MS. BUTLER:

Q. And you are not a lawyer and don't have legal training, correct?

A. I am not an attorney.

Q. Do you have legal training?

A. I do not have legal training.

Q. What is LECG where you worked from

2009 to 2010?

A. A consulting firm.

Q. Is it the predecessor to BRG or separate?

A. It was a completely separate operating entity.

Q. And what was your role at LECG?

A. Very much the same role that I have currently. I was assisting healthcare clients.

Q. And you also worked at Navigant Consulting; is that correct?

A. That is correct.

Q. What was your role at Navigant Consulting?

A. Very much the same role that I have now in supporting healthcare clients.

MS. BUTLER: I am going to hand you what has been marked as Exhibit 1.

(Document marked for identification as Russo Exhibit 1.)

BY MS. BUTLER:

Q. Do you recognize this document?

A. (Reviews document.)

Q. And I -- for the record, I will note that it was -- the cover page bears Bates numbers CLJA_USA_RUSSO_ a bunch of 0s and a 19. And then the second page starts with the top says "BRG Berkeley Research Group, Curriculum Vitae."

Is that correct?

A. That is correct.

Q. Is this your current CV?

A. It appears to be my current CV.

Q. Okay. And have you held any teaching positions, presented any lectures, published any articles, or held any positions that are not listed on your resumé?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I have not.

BY MS. BUTLER:

Q. And your resumé generally describes your background as being in health analytics; is that correct?

A. And I'm sorry. Let me clarify.

Yes, I have held previous positions. I worked in high school. I -- I worked in two jobs when I was in high school.

Q. Okay.

A. And they're not on my CV.
Q. Okay. Thank you for that clarification. I appreciate it.
So I was asking if it's correct that generally your background is in health analytics; is that accurate?
A. Yes, I think that's fair.
Q. What exactly is health analytics?
A. Health analytics is the study and research of the healthcare marketplace from a data-informed standpoint.
Q. Going through your resumé, it states in the first paragraph that:
"Mr. Russo primarily focuses on harnessing the wealth of information available in large, multipart data sets to bring results and insights to clients with complex, unstructured issues."
Do you see that?
A. Yes, I do.
Q. Does that still accurately describe your primary focus?
A. I think that's fair. That's something that is a focus that I bring to most of

the engagements on which I work.

Q. And is it accurate that most of the engagements in which you work have a lot of data that needs to be analyzed?

MR. ANTONUCCI: Objection.

THE WITNESS: Most of them involve a lot of data. Not all of them but most do.

BY MS. BUTLER:

Q. Going down -- going down to your Professional Experience, do you see the Litigation Support section?

A. Yes.

Q. And if you go through those bullet points, the first one you assisted a large health insurer. The next one you assisted a large insurer. The next one you assisted several health insurers. The next one you assisted health insurers.

Is a large part of your work with health insurers?

MR. ANTONUCCI: Objection.

THE WITNESS: About -- of my work, I think a good way to look at it is

the testimony that I've offered, and about half of the testimony I've offered is for health insurers and half of the testimony I've offered is for provider organizations.

BY MS. BUTLER:

Q. So that was going to be my next question. Because if you start with the next bullet points, it kind of goes down with care providers, hospital chains, skilled nursing facilities, more hospitals, providers.

So that makes sense that you're about half and half between those type of larger groupings, as you just explained; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I think that's fair. In terms of the testimony that I've offered, it's about half providers and half insurers.

BY MS. BUTLER:

Q. You're very last bullet point says: "Assisted in the calculation of reasonable value of healthcare services in personal injury cases. Analyzed data to determine

the reasonable value of future services included in life care plan as well as past services."

Do you see that?

A. I do.

Q. What percentage would you say that bullet point represents of your overall work?

MR. ANTONUCCI: Objection.

THE WITNESS: Of my billable hours in a year -- I'd say let's be clear first that you have an understanding that I'm taking any administrative work that I'm doing for the firm and putting that to the side.

Of my billable work for the year, that sort of work where I am calculating the reasonable value of healthcare services and personal injuries is maybe about 10 percent.

BY MS. BUTLER:

Q. And would you group this case within that 10 percent?

A. Yes.

Q. There's also a section on Internal Investigations.

Do you see that?

A. Yes, I do.

Q. And on Strategic Support.

Do you see that?

A. Yes.

Q. And, again, is that largely with either the provider side or the insurance side?

MR. ANTONUCCI: Objection.

THE WITNESS: I think that it is accurate to say that it is largely with payors or providers, but there are other entities that I have worked for over the course of my career. Those have included the federal government.

As you see here on page 3, I worked for the California Department of Corrections on the healthcare that they were rendering to inmates. I've worked for New York State. I've worked for the National Rural/Frontier Women's Health Coordinating Centers for the Office of Women's Health.

So I've done a number of things for entities that you would not

consider are insurers or providers.
BY MS. BUTLER:
Q. And that's reflected in your CV, correct?
A. That is correct, yes. I have included here examples of work that I've done over the years.
Q. And your CV shows no background, training, or experience in veteran disability benefits, correct?
MR. ANTONUCCI: Objection.
THE WITNESS: That is correct.
BY MS. BUTLER:
Q. And going down to the Publications, it looks like you and Mr. Miller -- sorry -- Dr. Miller have authored some publications together; is that correct?
A. Yes, that is correct.
Q. And one of those on page 5 is titled "Measuring the Value of Medical Services in Personal Injury Suits."
Do you see that?
A. Yes, I do.

Q. Can you tell me a little bit about that white paper?
A. Yes, I can.
Q. Can you please do so?
MR. ANTONUCCI: Objection.
BY MS. BUTLER:
Q. What was the gist of that white paper?
MR. ANTONUCCI: Objection.
THE WITNESS: As I recollect, that white paper talks about the approach to measuring reasonable value in the healthcare context and how it's inappropriate to rely on or use for the purposes of value the charge that is submitted.
And instead, one should look to the economic concept of the willing buyer/willing seller to determine the reasonable value.
BY MS. BUTLER:
Q. And along those lines in determining reasonable value, is it appropriate to just look at one provider or do you look at multi-providers?

A. In analyzing reasonable value, it is important to analyze the marketplace and that marketplace includes many providers for services.

Q. Would it be inappropriate to analyze just one provider?

MR. ANTONUCCI: Objection.

THE WITNESS: In what context?

BY MS. BUTLER:

Q. If you were calculating a reasonable value.

MR. ANTONUCCI: Same objection.

THE WITNESS: It would be inappropriate to identify a reasonable value that is based on only one data point.

BY MS. BUTLER:

Q. On page 6 of your CV, third up from the bottom, there's reference to an article titled "Navigating the Future of American Healthcare: What Litigators Should Know about Value-Based Reimbursement."

What was the gist of that article?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't believe that was an article. I believe it was a presentation.

BY MS. BUTLER:

Q. Okay.

A. As is indicated on page 5 of my CV. I don't have a good recollection of the specific points in that presentation.

I was presenting with attorneys and we were talking about a value-based -- reimbursement of value-based care.

Q. What is value-based care?

A. Value-based care is where a payor attempts to reimburse based on a definition of a value.

Q. Does that have any bearing on the calculation of a reasonable value in a case such as this one?

MR. ANTONUCCI: Objection.

THE WITNESS: Not exactly. To the extent that those transactions happened in the marketplace and were willing buyer/willing seller, then that

would be included within the analysis that I conducted.

BY MS. BUTLER:

Q. Have you testified in any North Carolina courts?

A. Yes.

Q. There's one identified on page 7 number 7.

Do you see that case?

A. Yes.

Q. Is that the only North Carolina case you have testified in?

A. No.

Q. What other North Carolina cases have you testified in?

A. There are several on here that you did not identify.

Q. Can you tell me the numbers?

A. Yes. Let me just go through it in detail.

Number 15 on page 8. Number 25 on page 8.

I believe that is all that is listed on this CV, which includes my past four years of

testimony history. There may be other cases that are older than four years old.

Q. In any of those cases you just identified as being in the North Carolina court system, were you testifying as to the reasonable value of past medical care?

A. Yes.

Q. Which ones?

A. Case number 7. Oh, sorry.

Would you restate your question for me or read it back?

Q. In any of those cases you identified as ones in which you testified in the North Carolina courts, did they involve calculating the reasonable value of past medical care?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't recollect whether they included the calculation of the reasonable value of past medical care.

They involved my determination of the reasonable value of services, but I don't recollect if it was past and/or future.

BY MS. BUTLER:

Q. Have you ever been excluded as a witness or had part of your testimony or report stricken?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, there were two cases in which the judge determined that the opinions I offered were irrelevant to the trier of fact.

BY MS. BUTLER:

Q. Are those cases on your resumé?

A. One of them is not because it was older than four years old. The other one is case number 20 on page 8.

Q. What can you recall about the case that is not on the CV?

A. It was in the State of Illinois in a county court.

Q. Do you remember the case name?

A. It involved Silver Cross Hospital.

Q. In those cases, were you working with the defendant or the plaintiff?

A. I was working with the defendants.

Q. Do you typically work with the

defense?

MR. ANTONUCCI: Objection.

THE WITNESS: I -- the manner in which I approach my practice is to serve as an independent expert for any party that seeks to hire me.

If you look at my testimony history -- history, I have more often testified for defendants, but I have also testified for plaintiffs.

BY MS. BUTLER:

Q. Would you say that generally in the litigation context when you are testifying as to reasonable value, it has to do with a personal injury?

A. Not always.

Q. What other contexts have you testified about reasonable value in a litigation context?

A. Disputes between payors and providers with respect to the reimbursement for services.

Q. Do you also assist with internal investigations such as fraud investigations?

A. Yes, I have assisted clients on internal investigations.

Q. What is nominal value versus real value?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't have an answer to that.

BY MS. BUTLER:

Q. And is that because you don't know the difference?

A. I don't know what you mean by nominal value nor do I know what you mean by real value.

Q. Are those -- are neither of those terms, terms that you regularly use?

A. No.

Q. Okay. Meaning, just to be clear, those are terms you don't regularly use, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Correct.

BY MS. BUTLER:

Q. Okay. In the testimony you've discussed where you have been involved in making a reasonable value calculation for past medical

losses, are you taking the position that it's inappropriate to express those calculations in current dollars or just that you don't do that?

MR. ANTONUCCI: Objection.

THE WITNESS: Let's be clear first. The cases in which I've offered testimony relates to the reasonable value of past medical services, and you said past medical losses.

BY MS. BUTLER:

Q. Okay. Sorry.

A. I'm not sure --

Q. Okay.

A. -- what past medical losses is.

So I have offered an opinion as to the reasonable value of past medical services, which in those cases was what I was asked to do, and here in this case also what I was asked to do.

Q. Is it your opinion that it's inappropriate to apply a current value calculation to a reasonable value calculation for past medical losses? No. What did you say? Past medical services?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know if it would be appropriate or inappropriate. It would all depend on what you're -- what you're doing and what you're being asked to do.

I was asked to provide the reasonable value of past medical services, and I did so based on the date on which they were rendered.

BY MS. BUTLER:

Q. And so are you taking a position in this case that it would be inappropriate to bring your calculations to current dollars?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm not offering an opinion as to whether it's appropriate nor inappropriate on -- on bringing a reasonable value calculation to present dollars. It would depend on what was being asked.

BY MS. BUTLER:

Q. And here you were not asked to do it, correct?

A. Correct. I was not asked to apply

any inflation to my reasonable value of past medical services.

Q. And your calculations of reasonable value for past medical services in this case are based on the date service was rendered; is that correct?

A. It's based on the date of service that the service or supply was rendered.

Q. I want to ask you a little bit about your methodology in this case.

Is your methodology as to what you've looked at and the formulas you used all set out in your reports?

A. Yes, it's contained within the reports and the accompanying appendices.

Q. Okay. And so any materials you rely upon are either within your report or in your Materials Considered List, correct?

A. That is correct.

Q. And if you could not find a CPT code, am I correct that you used the bill charge?

A. That is correct. When there was not a CPT code, which stands for Current Procedural Terminology, to the extent that that was not

present on one of the past medical bills, I defaulted to using the bill charges that were present and did not calculate any other reasonable value for that service.

Q. If the actual amount actually paid for past healthcare services is greater than the reasonable value you calculated, should the actual paid amount be utilized or the reasonable value calculation?

MR. ANTONUCCI: Objection.

THE WITNESS: I did not consider the paid amounts in my analysis as paid amounts may be greater as well as less than the reasonable value.

Instead, my analysis is based on the services that were rendered and the methodology that I used to identify the reasonable value of those services, which as Dr. Basu says is appropriate and credible.

BY MS. BUTLER:

Q. So do you have an opinion, though, as to if the amount actually paid for past healthcare services is greater than the reasonable

value whether the reasonable value should be used or the amount actually paid?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know what you say by -- what you mean by "used."

BY MS. BUTLER:

Q. As the calculation of damages in this case.

MR. ANTONUCCI: Same objection.

THE WITNESS: That would require someone offering clear guidance on how to calculate damages. I have not seen that articulated.

I don't recollect seeing in Marjorie Hackett-Wallace's report a clear articulation of damages. Neither did I see that in Dr. Basu's report.

I have been asked to calculate the reasonable value of past medical services, which is what I did.

BY MS. BUTLER:

Q. What do you understand to be the

purpose of your calculations in this litigation?
MR. ANTONUCCI: Objection.
To the extent that question calls for attorney-client communications, don't answer it.
BY MS. BUTLER:
Q. Can you not answer that without referring to attorney-client communications?
MR. ANTONUCCI: Objection.
THE WITNESS: I don't believe so.
BY MS. BUTLER:
Q. How have your reasonable value calculations of past medical services in other cases been used?
MR. ANTONUCCI: Objection.
THE WITNESS: I don't know. That's a question for the attorneys.
I -- I'm an independent health expert. I provide the opinion that I'm asked to provide, and then the attorneys use that opinion in whatever way they see fit for the purposes of the litigation in which the opinion is offered.

BY MS. BUTLER:

Q. So you have no idea how your expert opinions in this case will be used?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know the -- I don't have an understanding of that.

BY MS. BUTLER:

Q. Okay. Now, you presented with Mr. Miller or prepared an article. Let me see.

It's under publications titled "Measuring the Value of Medical Services in Personal Injury Suits."

Do you recall that?

A. Yes.

Q. Did you discuss in that paper the use of the reasonable value calculations within a litigation context?

MR. ANTONUCCI: Objection.

Do you need a copy of the paper, Jenna?

MS. BUTLER: I have a copy of the paper. I'm just asking Mr. Russo what his understanding was of the purpose

of that publication.
BY MS. BUTLER:
Q. What use was to be made of the measures you were articulating in that paper?
A. The purpose of writing that paper was to identify that using charges as a measure of value for medical services in any context is inappropriate, and in personal injury suits the measurement of value based on charges was not appropriate and should instead rely on the willing buyer/willing seller concept.
Q. When in personal injury suits do you need to measure the value of past medical services rendered?
MR. ANTONUCCI: Objection.
THE WITNESS: That's a question for an attorney.
BY MS. BUTLER:
Q. So you're just trying to present a measure without understanding the context within which it might be made.
Is that what you're testifying to?
MR. ANTONUCCI: Objection.
THE WITNESS: No, I think

that's mischaracterizing what I'm saying.

What I'm saying is that in personal injury suits, there are life care planners that present value based on charges, and I think that's an inappropriate way to measure value.

Instead, one should look to the willing buyer/willing seller concept, which is agreed upon in the industry. It's something Dr. Basu, for instance, agrees to as well.

BY MS. BUTLER:

Q. And that applies not just to future medical care, but also to past medical care, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Dr. Basu's opinion on using willing buyer/willing seller, he only indicated that it was appropriate for past medical services. I don't recollect him saying anything about future.

BY MS. BUTLER:

Q. What is your opinion about utilizing

that concept for past medical expenses?

MR. ANTONUCCI: Objection.

THE WITNESS: Using the willing buyer/willing seller concept is the appropriate approach to determining the reasonable value of past medical services.

BY MS. BUTLER:

Q. So you agree with Dr. Basu on that, correct?

A. Dr. Basu and I agree that it is appropriate to use a willing buyer/willing seller concept in determining reasonable value for past medical services.

Q. And do you have an understanding in the litigation concept of when that would be used?

MR. ANTONUCCI: Objection. Foundation.

THE WITNESS: I don't know what you mean by "litigation concept" as you say.

BY MS. BUTLER:

Q. Okay. Context. Let's say in the litigation context.

MR. ANTONUCCI: Same objection.

THE WITNESS: My understanding is that it's been used in many personal injury suits.

BY MS. BUTLER:

Q. For what purpose?

MR. ANTONUCCI: Objection. Foundation.

THE WITNESS: That's a question for the attorneys.

BY MS. BUTLER:

Q. You have no idea what purpose it's used for in litigation involving past medical services?

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Is that what you're saying?

A. I am saying that I have presented my opinions in those cases with respect to the reasonable value of past medical services, and in those cases in which I have provided deposition testimony or trial testimony, I have not sat in the remainder of the litigation and so don't have

an understanding as to how those opinions and those numbers may be used in a damage calculation.

Q. So even outside of those specific instances, you don't have any understanding of how your calculations for reasonable value of past medical services might be used in the litigation context; is that what you're saying?

MR. ANTONUCCI: Objection.

THE WITNESS: What I'm saying is that I don't have a specific understanding as to how they're used in the litigation context.

That's a question, I think, for an attorney who has an understanding of how damages -- alleged damages may be calculated and presented.

My understanding is that my work may inform the attorneys as they present the case to the trier of fact.

BY MS. BUTLER:

Q. You may be aware that after we received your report, which is, they were produced December 15, 2025, we asked for an Appendix C that had Excel formulas.

Are you aware of that?

A. Yes, I am.

Q. Okay. And we did receive an Excel with formulas.

Are you aware of that as well?

A. I understand that you received 16 Excel files.

Q. Yes. Okay. Sorry. 16 Excel files.

One for each of the plaintiffs for whom you prepared a report and they contained formulas; is that correct?

A. Yes, that is correct.

Q. Are there any formulas you utilized for this litigation that were not made available to us in those Excel documents?

A. I don't believe so.

Q. Now, you have indicated that you reviewed Dr. Basu's rebuttal report, correct?

A. Yes.

Q. Okay. Do you disagree with anything that you recall reviewing in that report?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I do.

BY MS. BUTLER:

Q. What do you disagree with?

A. As I sit here today, my disagreement with him concerned the use of GoodRx and his characterization of it as, I think, a paid discount program.

GoodRx does have an option that one could pay to join the discount program, but GoodRx also provides information to individuals who do not pay and how those individuals can access discounts. Those discounts are not as good as if one joined the paid discount program, but there's no requirement that one has to join the discount program.

Q. Other than your disagreement with Dr. Basu about his characterization of GoodRx as a paid discount program, are there other areas of his report that you recall disagreeing with?

MR. ANTONUCCI: Objection.

THE WITNESS: I recollect there being disagreement with respect to the Plaintiff Peterson and the identification of past medical bills.

I don't recollect it being a large differential, but I think Dr. Basu

had some comments about what he perceived as my incorrect attribution of some past medical bills in the analysis, and I disagreed with what Dr. Basu had indicated.

BY MS. BUTLER:

Q. So after you read Dr. Basu's report, did you go back and look at your Peterson reports and appendices to confirm that you continue to disagree with him?

A. Yes.

Q. Okay. Other than the GoodRx characterization as a paid discount program and the situation you just referenced with respect to Plaintiff Peterson, do you recall any other aspect -- aspects of Dr. Basu's report that you disagreed with?

MR. ANTONUCCI: Objection.

THE WITNESS: As I sit here today, no.

MS. BUTLER: I am going to mark a copy of Dr. Basu's report as Exhibit 2 and hand you that.

(Document marked for

identification as Russo Exhibit 2.)

BY MS. BUTLER:

Q. And, please, if you want to go off the record for a minute and take some time to look at it, I'm glad to do that.

Would you like me to do that?

A. No, thank you.

Q. Okay. What I was going to ask is that: You said, as you sit here today, you couldn't recall any other aspects of the report that you disagreed with, other than what we've already gone over.

And I just want to make sure that you had a copy of his report so that you could make sure there aren't any other areas of disagreement. So please take your time.

MR. ANTONUCCI: Sorry, Jenna. For the record, does this copy of the report include Dr. Basu's amended appendices?

MS. BUTLER: I have those and was going to use those as separate exhibits.

BY MS. BUTLER:

Q. If you would like me to give you those at this time, I do have them.

A. I don't need them.

My -- my answer still stands, which is at this time, as I sit here, I don't have other areas of disagreement. However, what I will say is that there are many numbers within -- within this -- within these 16 plaintiffs' past medical bills, and I don't recollect, as I sit here today, whether I had disagreements with any of the other numbers than what I have noted thus far.

Q. Okay. And you're referring to Peterson, correct? And you're saying that you don't know if there are any other disagreements about the numbers.

Is that what you're saying?

I'm trying to understand what you just referred to.

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct. I referred to Peterson -- the Plaintiff Peterson, which is where Dr. Basu and I had, I think, the most disagreement between the numbers and even

that I don't think there was a significant disagreement.

I don't recollect, though, as I sit here today, whether there were additional plaintiffs for which there were some discrepancies between what Dr. Basu and Dr. -- and what I had.

BY MS. BUTLER:

Q. And with respect to Mr. Peterson, if you look at Footnote 7 on page 8 of Dr. Basu's report, is that the discrepancy you're referring to with respect to Mr. Peterson?

A. Yes, it involves the Sanders Clinic --

Q. Okay.

A. -- invoices.

Q. I just wanted to make sure we were clear on that.

A. Yes.

Q. And with respect to any other discrepancies in numbers, whether it is between your numbers and Dr. Basu's numbers or your numbers and Marjorie Hackett-Wallace's numbers, is it correct that those numbers don't impact the

underlying methodology. They just impact the calculation according to that methodology?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm sorry. I don't think I understand your question.

BY MS. BUTLER:

Q. So what I'm trying to get at is: For example, in Footnote 7, there's a discrepancy noted between your numbers and Dr. Basu's numbers with respect to Mr. Peterson, correct?

A. Yes.

Q. Now, any discrepancy such as that with respect to the numbers that are being fed into the calculations don't impact the validity of the calculation formula, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct. Generally, they do not.

Dr. Basu and I agree, as Dr. Basu has had the opportunity to review the 16 reports, the methodology that I outlined, which he summarized throughout his report and, as he describes it, appropriate and reliable.

BY MS. BUTLER:

Q. And what I'm just trying to get at is: If at trial the fact-finder were to find, for example, that Dr. Basu's number was correct versus yours or yours was correct versus his, that's a correction that can be made and applied within the formula that your report and Dr. Basu's report set forth, correct?

MR. ANTONUCCI: Objection to form and foundation.

THE WITNESS: Dr. Basu doesn't present any methodology other than agreeing with the methodology that I have outlined.

The methodology requires the identification of past medical bills that are at issue. To the extent that there are past medical bills that have not been included in that methodology, then they could be included in that methodology, or to the extent that there were some that were included that should not have been, those could also be added.

The methodology would still

hold, though.

BY MS. BUTLER:

Q. Okay. And that's what I was getting at.

So, for example, if somebody had a hospital event tomorrow and we don't try this case for another year, that could be added and the methodology stays the same, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: To the extent that Marjorie Hackett-Wallace identifies that hospitalization as being at issue, to the extent that I am directed to include that within my report, then, yes, the methodology would hold and I would apply that same methodology to that medical bill.

MR. ANTONUCCI: We're coming up on another hour.

MS. BUTLER: Sure. I'm fine taking a break.

BY MS. BUTLER:

Q. Are you -- is this a good time for you to take a quick break?

A. It is. I can keep going, though, if you want.

MS. BUTLER: It's up to you.

MR. ANTONUCCI: No.

BY MS. BUTLER:

Q. Okay. Why don't we keep going then. I don't even know what time it is.

A. For another 15 minutes of coming up on an hour?

Q. Sure.

A. That way it's not too long.

Q. That sounds good.

A. Okay.

Q. Going back to Dr. Anirban's report, do you take issue with any of his background, training, or education with respect to his ability to render the opinions he has rendered?

MR. ANTONUCCI: Objection.

THE WITNESS: And I'm sorry. You said Dr. Anirban?

BY MS. BUTLER:

Q. Dr. Basu. Sorry.

MR. ANTONUCCI: Same objection.

THE WITNESS: I have not evaluated Dr. Basu's qualifications. I did nothing to independently verify whether he has the degrees that he identifies nor works at the places that he has indicated.

BY MS. BUTLER:

Q. If everything he has indicated as far as the degrees he has and the places he has worked were to be accurate, do you take issue with his ability to render the opinions he has rendered?

MR. ANTONUCCI: Objection.

THE WITNESS: I think what you're asking is for a legal determination as to whether or not he should be admitted as an expert, and I think that's a question for a judge, not for me as a -- as an independent non-attorney.

BY MS. BUTLER:

Q. Let me ask you this.

Is it correct that you have rendered opinions in other litigation cases where you have

challenged the expert reports of other opposing experts?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I have.

BY MS. BUTLER:

Q. Okay. And what bases have you offered in those opinions for challenging those other experts?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't recollect, as I sit here.

BY MS. BUTLER:

Q. Do you plan to express any opinions with respect to reasons that Dr. Basu's opinion in this case should be challenged, other than what we've mentioned with respect to the disagreements you have concerning his report?

MR. ANTONUCCI: Objection.

THE WITNESS: As I sit here today, I have noted the disagreements that I have. I do reserve the right, though, to the extent I find additional disagreements to note them.

BY MS. BUTLER:

Q. With respect to his opinions, you've noted the GoodRx issue and the Peterson issue, correct?

A. Those are the two that I recollect, as I sit here today.

Q. Okay. And you have his report in front of you, and you have indicated that it doesn't refresh your recollection as to any other disagreements, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: No specific points of which I disagree, but I did note there are a number of numbers within Dr. Basu's report and the 16 reports that I've offered and there -- I have a vague recollection that there are some -- there is an additional number or two of which I disagree.

BY MS. BUTLER:

Q. Okay. Similar to the Peterson disagreement that we looked at, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, similar to the Peterson disagreement.

BY MS. BUTLER:

Q. So what I'm trying to get at is: Other than what we've already discussed as far as your disagreements with Dr. Basu, do you have any disagreements with his qualifications to express his opinions, assuming the qualifications he has set forth are correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I have not analyzed his qualifications.

BY MS. BUTLER:

Q. And so you do not have an opinion on that; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not have an opinion on his qualifications.

BY MS. BUTLER:

Q. Do you agree that the healthcare market is highly concentrated?

MR. ANTONUCCI: Objection.

THE WITNESS: I think that portions of the healthcare market are highly concentrated. The healthcare market is, as you say without offering

any additional clarity, is a broad international market.

BY MS. BUTLER:

Q. Let's focus on United States market. Would you agree that the United States healthcare market is highly concentrated?

MR. ANTONUCCI: Objection.

THE WITNESS: I think there are elements of the U.S. healthcare market that are highly concentrated. For instance, if you look at insurance in some geographic areas, the Herfindahl–Hirschman Index, or HHI, is high, which would be indicative of high concentration.

BY MS. BUTLER:

Q. Is it also true that the average commercial market is also generally highly concentrated --

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. -- in the U.S.?

MR. ANTONUCCI: Same objection.

THE WITNESS: I don't know what you mean by "average commercial market." For what service?

BY MS. BUTLER:

Q. You referred to the HHI, correct?

A. I did just mention the HHI in my answer.

Q. And what was your reference to the HHI for?

A. Because you had a question about concentration.

Q. Right.

What kind of market were you referring to in your answer to my question in that instance?

A. Health insurance.

Q. Okay. And so it's your position that only certain markets in that context are highly concentrated?

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Is that what I'm understanding you to be saying?

MR. ANTONUCCI: Same

objection.

THE WITNESS: Yes, that's correct. So the insurance in the United States is regulated at the state level, and the sale of insurance is done based on not only state, but then even smaller than that geographies.

And so the broadest study on market concentration is done by I think it's the American Medical Association that looks at the concentration of health insurance, and I think they do it at the metropolitan statistical area level.

BY MS. BUTLER:

Q. So would you agree that relying on transactional prices from any one private payor would not appropriately represent the reasonable value of services provided in the U.S. healthcare market?

MR. ANTONUCCI: Objection.

THE WITNESS: You'd have to define transactional prices.

BY MS. BUTLER:

Q. How do you define transactional

prices?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't. It's not a phrase that's used in the healthcare marketplace.

BY MS. BUTLER:

Q. Okay. Would it be appropriate in determining the reasonable value of services provided in the healthcare market to rely on one private payor?

MR. ANTONUCCI: Objection.

THE WITNESS: No, it would not.

As I indicated in my response earlier when you asked about relying on one provider, it's not appropriate to rely on a single data point.

One should rely upon the information that's available in the marketplace, which is inclusive of multiple providers and multiple payors, which is what I did in my analysis.

BY MS. BUTLER:

Q. Is it accurate that your general

framework was to start by identifying the services through CPT codes?

A. Not quite.

Q. Okay. Tell me where I'm wrong.

A. So first I used HCPC codes, which are healthcare common procedure coding system codes which are broader than CPT codes. There are Level 1 and Level 2 HCPC codes. The Level 1 HCPC codes are CPT codes or Current Procedural Terminology codes. Level 2 codes are codes that are defined by CMS.

Those are useful -- HCPC codes are useful for identifying outpatient services and professional services.

For services that are rendered in an inpatient setting, one needs to look at the revenue codes, which is also what I've done.

Q. And then did you convert those to Medicare payments?

A. You don't convert procedure codes to Medicare payments.

Q. So what did you do once you got those codes?

A. So what the HCPC code does is the

HCPC code identifies the service or supply that has been rendered, and that has been provided by the provider on the past medical bill.

Once I had the HCPC code, I then went and identified what the relative value units were for that HCPC code. Converted those using the congressionally mandated conversion factor. Geographically adjusted that using the Geographic Practice Cost Index and then inflated that for the geography in which the service was rendered to get what is the willing buyer/willing seller rate based on the data that I have defined in my report.

Q. And that result, the rate that you ultimately determined, is based on the date that the service was rendered?

MR. ANTONUCCI: Objection.

THE WITNESS: The date of service is informative for the purposes of that calculation because the relative value unit and the conversion factor and the Geographic Practice Cost Index are based on the date of service.

BY MS. BUTLER:

Q. And so the ultimate number that you get is also based on the date of service?

MR. ANTONUCCI: Objection.

THE WITNESS: The calculation is based -- the values that are identified in the calculation are based on the past medical services date of service.

BY MS. BUTLER:

Q. Are you disagreeing then that the result of your calculations is also based on the date of service?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I'm not disagreeing. I just wouldn't say that my -- that the result is based on the date of service.

I would say that elements of the calculation are dependent upon the date of service.

MS. BUTLER: I am going to -- or do we want to take a break at this point?

MR. ANTONUCCI: I would like

one.

MS. BUTLER: I was getting ready to mark another exhibit. We'll take a break.

THE WITNESS: Okay.

THE VIDEOGRAPHER: The time is 11:19 AM. We're now off the record.

(A recess was taken.)

THE VIDEOGRAPHER: This is the beginning of media unit number 3 of the video-recorded deposition of Mr. Gregory Russo. The time is 11:32 AM Eastern. We are now back on the record.

Counsel, you may proceed.

MS. BUTLER: Thank you.

BY MS. BUTLER:

Q. Mr. Russo, during the break, did you have any conversations with your attorney?

A. Yes.

Q. Was it with respect to this deposition?

A. No, it was not.

Q. Okay. Thank you.

MS. BUTLER: I'm going to hand

you what I have been -- what I have marked as Exhibit Number 3.

(Document marked for identification as Russo Exhibit 3.)

BY MS. BUTLER:

Q. I know this is kind of an odd large-looking sheet, but I can't read these Excel files printed in other than large print.

So I will represent to you that this is a portion of your Appendix C for Plaintiff Amsler.

Are you able to verify that that's what this look like?

A. I agree that it looks like that, yes.

Q. Okay.

A. I don't -- as you will hopefully agree as well, there are 16 plaintiffs with lots of Excel documents and tabs in them. So I don't -- I haven't memorized every one of them.

Q. Well, and to avoid us being here for days and days on end and going through all of those Excels, I have printed this one page.

And what I was hoping to ask you to

do, just to make sure we understand, is to kind of go through, say, the first line and just explain what everything represents so that we can make sure we're understanding your work in the same manner that you did it.

A. Sure.

Q. Thank you.

MR. ANTONUCCI: Sorry. Before you do that, do you have Bates for this document?

MS. BUTLER: I do not. I can represent to you that it is part of the Appendix C for Amsler, and that perhaps during a break I can find the Bates. But when I printed it, it did not have the Bates on it. It's probably from the one that has the cells in it.

MR. ANTONUCCI: Was this from the production with formulas or the production from December 15th?

MS. BUTLER: I believe it was from the December 15th, actually.

MR. ANTONUCCI: Okay.

MS. BUTLER: I believe it was

the Appendix C attached with or produced with the reports at the time and not from the subsequent Excel.

MR. ANTONUCCI: Got it.

MS. BUTLER: Okay.

BY MS. BUTLER:

Q. So just going, first starting on the far left, you see a number of X's there?

A. I do yes.

Q. What do those X's represent?

A. Those X's represent where the specific line has been included in Marjorie Hackett-Wallace's work, and what is important -- what is important to note is that the absence of an X indicates that it was included within Marjorie Hackett-Wallace's work.

Q. Okay. So if you -- if you look at the first lines on Exhibit 3 going down to 8, there's an X on the left.

So does that mean that it was not included in Marjorie Hackett-Wallace's calculations?

A. That is correct, and therefore for purposes of my work, I did not analyze it.

Q. Okay.
A. And also excluded it then from the totals that I provided in the report for Plaintiff Amsler.
Q. And then starting with line 9, there is the absence of an X, which you noted is important, correct?
A. That is correct. Yes. This indicates that line 9, so having Row ID 9 with no X, is a line that was included within Marjorie Hackett-Wallace's work.
Q. So let's then continue across line 9 if we can, and if you need me to give you a file folder to -- oh, you're doing it.
A. Yeah.
Q. Okay. To keep it straight.
The next is just the Row ID, correct?
A. That is correct. That's the Row ID just so that, as we're sitting here today, we know what row we're all looking at. There was nothing more to that than just sequentially identifying the rows.
Q. Okay. And then there's a page

number.

What is that page number reference to?

A. The page number references the page within the document -- the PDF document that I was provided with those bills.

Q. And is that PDF document on the very far right side of this Exhibit 3 under Bates number?

A. Yes, it is.

Q. Okay. So within, for example, if we're still on row 9, within the Amsler Bates ending in 14106, this is found on page 8?

A. That is correct.

Q. Okay. Then the next column is a Date column; is that correct?

A. Yes, that is indicative of the date of service.

Q. And just take us -- continue to take us across.

A. The next field is indicative of CPT Code and Modifier, which is 62328, which given the first digit of that is, I believe, a surgery code. One unit was billed at both CPT Code and Modifier

and Units all come from the medical bill.

Q. And let me stop you for a minute. In the CPT Code and Modifier column --

A. Uh-huh.

Q. -- is that a CPT code that is found in anyplace within the billing record or in the first place? Is that making sense?

MR. ANTONUCCI: Objection.

THE WITNESS: No.

BY MS. BUTLER:

Q. Okay. Are there sometimes more than one CPT code on a medical bill?

A. On a single claim, there can be more than one CPT code.

Q. And so does this indicate that that CPT code was one of what could be many CPT codes, or is it the first CPT code listed?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know if it's the first one or not. Whether it's first or not doesn't matter. The ordering of CPT codes is not something that has an effect on reimbursement.

BY MS. BUTLER:

Q. So if there is a CPT code on the medical bill and it is irregardless of order, it will be paid?

A. No. There's -- there's a sophisticated adjudication cascade that a payor goes through to determine whether it is appropriate to pay each line of a bill.

Q. Did you do any sort of that analysis in this case?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I did. As indicated in my reports, when reimbursing -- when -- sorry -- when determining the reasonable value of outpatient services, to the extent that a specific code has a status indicator, that indicates it is bundled with other services that are also being reimbursed.

Then I have determined the reasonable value of the other services that are being reimbursed and included within that the procedure code that is being bundled.

BY MS. BUTLER:

Q. Okay. Okay. So there's the CPT Code and Modifier and then the Units.

We're still on line 9 correct? Row 9, correct?

A. Correct.

Q. And then there's a Charges column, correct?

A. That is correct. Yes.

Q. Where did you get the Charges column figure from?

A. From page 8 of that Bates stamp document.

Q. And then the next column is RV.

Is that your reasonable value calculation?

A. That is correct. Yes.

Q. And that calculation was performed pursuant to the methodology set out in your report, correct?

A. That is correct.

Q. Okay. And then explain the next column, which is titled "Lesser of RV and Charges."

A. That column is such that it evaluates the charges and the reasonable value and returns whatever is less, whatever of those two numbers is -- is smaller.

And so in this case, the charges were $315 and the reasonable value 427, and so the lesser of those two numbers are the charges at $315.

Q. And in performing that calculation, am I correct in my understanding that no consideration is given to any amount that was actually paid?

MR. ANTONUCCI: Objection.

THE WITNESS: The analysis that I have done is to determine the reasonable value of past medical services, and that considers the services that were delivered. It does not consider whether payment was made for those services.

BY MS. BUTLER:

Q. Okay. And going to the next column, there are some X's again and the title is "Clinically-Related to Condition"; is that

correct?

A. That is correct.

Q. Tell me what those indicate -- those X's indicate.

A. Those indicate that Dr. Ji or Dr. Hasan have determined that that line was relevant to the condition that this patient may have.

Q. And then there's a column for Unrelated Medical Service.

Do you see that?

A. Yes.

Q. And there is nothing in there, correct?

A. That is correct.

Q. And why is that?

A. Because on this page of what Dr. Ji and Dr. Hasan -- or Dr. Hasan evaluated, all of the lines were clinically related to the condition.

Q. And, again, you did not make those relatedness determinations, correct? You relied on Dr. Ji and Dr. Hasan?

A. Dr. Ji and Dr. Hasan were the

individuals that I understand determined whether a line was clinically related to the condition.

Q. And then going to the next column, it's titled "Related Charges."

Can you please explain that column?

A. The Related Charge column is populated when the line is identified as being clinically related to the condition, and then the charges are the same as what appears to the left of the Charges column.

And similarly, the Lesser of Related RVs/Related Charges is populated when the line is identified as being clinically related to the condition, and that column of Lesser of Related RVs/Related Charges would match the column that says "Lesser of RV and Charges."

Q. So in the Amsler example, this limited Exhibit 3 -- and I understand you have lines and lines of Excel documents.

But on this limited example, the second from the far right Lesser of Related RVs/Related Charges column and then the middle Lesser of RVs/Charges column, those are all the same, correct?

A. They are all the same here for the rows, which were identified by Dr. Ji or Dr. Hasan as being clinically related to the condition.

Q. And so in some reports they are not the same, correct?

A. In some of the reports, they are not the same where Dr. Ji or Dr. Hasan has not identified that that line was clinically related to the condition.

Q. And in those cases then, the second from the right Lesser of Related RVs/Related Charges would be different from the middle column Lesser of RV and Charges, correct?

A. That is correct. It would be different in that it would be 0 if Dr. Ji and Dr. Hasan did not identify that line as being clinically related to the condition.

Q. And am I correct that those are the numbers you then brought into your tables 1 and 2 of your reports?

A. Yes, this information was used in Table 1 and Table 2 of each of the 16 reports that I filed.

Q. Thank you. I just wanted to make

sure we were understanding your work correctly.

Now, you already indicated that you -- one of the disagreements that you have indicated between you and Dr. Basu is with respect to GoodRx and his characterization of GoodRx as a paid program; is that correct?

A. Yes, I disagree with him with respect to it being a paid program. I also disagree with him as to my use of that program.

Q. Can you use GoodRx with Medicare?

A. (Pause). So yes, you can because you don't necessarily need to use your Medicare insurance when filling a prescription.

Q. If you fill a prescription without using your Medicare insurance, then it does not count toward your deductible or your threshold spending correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That's correct.

BY MS. BUTLER:

Q. And the same is true if you use GoodRx and you have private insurance, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: If you use a

discount available through GoodRx and you do not use your insurance, then what you've paid for that prescription would not count towards a deductible for your insurance.

BY MS. BUTLER:

Q. Do you know, for example, if TRICARE allows a person to use GoodRx?

MR. ANTONUCCI: Objection.

THE WITNESS: So let's be clear that any individual can use GoodRx and not use whatever insurance they may or may not have.

BY MS. BUTLER:

Q. What is Express Scripts?

MR. ANTONUCCI: Objection.

THE WITNESS: My understanding of Express Scripts is that it's a pharmacy benefit manager.

BY MS. BUTLER:

Q. Are you familiar with whether TRICARE uses the Express Scripts program?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know

what you mean by the "Express Scripts program." They're a pharmacy benefit manager. They aren't a program.

BY MS. BUTLER:

Q. Does TRICARE use Express Scripts as a PBM?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know what their current contract is for -- for PBM services.

BY MS. BUTLER:

Q. Are you aware of whether they have in the past?

MR. ANTONUCCI: Objection.

THE WITNESS: No.

BY MS. BUTLER:

Q. Is it correct that GoodRx often offers the lowest discounted price for a pharmaceutical product as opposed to the average?

MR. ANTONUCCI: Objection.

THE WITNESS: GoodRx offers multiple discounts. When you look at the results, you see multiple prices. Multiple discounts are available

throughout a range of different pharmacies in that geographic market.

BY MS. BUTLER:

Q. In using GoodRx for your pharmaceutical calculations, you relied on GoodRx only, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I relied upon GoodRx only when using GoodRx to identify the reasonable value of medications, which in terms of the total reasonable values that I've offered, GoodRx was used in less than 0.2 percent of the reasonable values.

BY MS. BUTLER:

Q. In the rest of your reasonable calculation -- reasonable value calculations not having to do with pharmaceutical prescriptions, you used an average, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: So there are analyses -- there are methodologies that involve medications that did not use GoodRx.

So when -- when inpatient services are -- are included in past medical bills, there are medications that are delivered there. There are medications that are delivered in the outpatient setting. And those methodologies don't include GoodRx.

BY MS. BUTLER:

Q. So to the extent you incorporated those methodologies, you did not use GoodRx.

Is that what you're saying?

MR. ANTONUCCI: Objection.

THE WITNESS: That's correct. Because those services are paid using the methodology or -- sorry.

Those services rely upon the methodologies that I've outlined where I look at the cost of rendering the care and then the willing buyer/willing seller rate.

It is just the in-store pharmacy, so retail pharmacy prescriptions, for which I've used the GoodRx methodology and, again, that's

less than .2 percent of the total reasonable values that I've offered that use the GoodRx methodology.

BY MS. BUTLER:

Q. Is it your contention that using the GoodRx methodology in that instance that you just outlined evidences or reflects the willing buyer/willing seller notion, as you've expressed it here today, for the rest of your calculations?

A. Yes, it does. What I have done is, I have looked at within the plaintiff's geographic market what the rates are for each of the medications that are available that are included within the past medical bills, and then I have identified which of the pharmacies in the plaintiff's geographic market would offer the lowest cost for all of the medications as a group.

And so that may mean that one of the medications may have -- may not have the lowest of the available prices, and so that would indicate that a plaintiff would not have to drive around to get different medications at different pharmacies. They would be able to service just a single pharmacy.

Q. Are retail costs for pharmaceuticals readily available?

MR. ANTONUCCI: Objection.

THE WITNESS: Depends what you mean by "retail costs."

BY MS. BUTLER:

Q. What -- what do you consider to be retail costs?

A. Well, it really depends on what -- on how you define it because there are many different types of costs that are available in the healthcare marketplace, and retail is not one that there's clear determination on.

Q. So what type of information is available with respect to the costs for pharmaceuticals?

A. There are average wholesale prices. There are average sales prices. There's WAC.

Q. What is WAC?

A. Wholesale Acquisition Cost.

Q. What else?

A. That's generally it.

Q. Okay. And you didn't use any of that information, correct?

A. I did not because those data sets often involve a number of rebates and such, and those are the identification of costs that are available to providers in the marketplace or PBMs, not to the individual patients or plaintiffs in this matter.

Q. And that in those instances, would the price or the cost to the individual patient likely be higher than what would be reflected as far as the provider or PBM cost?

A. I don't know.

Q. You don't have any understanding that the PBMs or the providers take a percentage before they -- I mean, before the -- so they take a percentage which would be added then to the cost that is passed on to the individual patient?

You don't have any understanding about that?

MR. ANTONUCCI: Objection.

THE WITNESS: But what you're missing is that there are large rebates in the pharmaceutical marketplace that are then paid back to PBMs.

I mean, the Federal Trade

Commission has many studies on this that there's -- there's not good price transparency with respect to a number of -- of data sets in pharmaceutical marketplace.

I don't think you can just necessarily make that determination without doing a study.

BY MS. BUTLER:

Q. And so is that why you just chose to use GoodRx?

A. Well, I didn't just use GoodRx. I selected GoodRx because it is the broadest database of information available on the cost of services -- sorry -- the cost of medications and the discounts that are available to an individual that is operating in the geographic market where the plaintiffs reside.

Q. Does GoodRx generally offer the lowest discounted price as opposed to the average?

MR. ANTONUCCI: Objection.

THE WITNESS: So, look, there are a few things to remember. One, the GoodRx methodology relates to only 0. --

less than 0.2 percent of my reasonable value. So this is a significant amount of focus on what is a very small amount of the reasonable values that I've offered.

What GoodRx does is GoodRx offers an array of discounts that are available to an individual in a given geographic market for that medication. It doesn't just offer the lowest. It offers an array of them.

BY MS. BUTLER:

Q. Do you understand that in the litigation context, damages for medical expenses are meant to restore the injured person to financial position they would have been absent the harm?

MR. ANTONUCCI: Object to foundation and form.

THE WITNESS: No, I don't have an understanding of that. That's asking for a legal determination, and I'm not an attorney.

BY MS. BUTLER:

Q. So do you have any opinion whether in the litigation context compensation should reflect the lost use and purchasing power of money over time when paid today?

MR. ANTONUCCI: Object to form and foundation.

THE WITNESS: I don't have an opinion on that. That's asking for a legal conclusion.

MS. BUTLER: I am going to hand you what has been marked as Exhibit 4 and ask you if you recognize this.

(Document marked for identification as Russo Exhibit 4.)

MS. BUTLER: Oh, can I have one of those back? Sorry. Thank you.

BY MS. BUTLER:

Q. Do you recognize this document?

A. (Reviews document.)

Yes.

Q. Is this the notice of deposition, request for production of documents and subpoena that was issued to you in this case?

A. It appears to be.
Q. And did you review it when it -- at some point before your deposition?
A. Yes, I did.
MS. BUTLER: I'm going to hand you what has been marked as Exhibit 5.
(Document marked for identification as Russo Exhibit 5.)
BY MS. BUTLER:
Q. Do you recognize this document?
A. No.
Q. So you've never seen this document before?
A. No, I have not.
Q. So do you have a general understanding that after the notice of deposition, subpoena and request for documents were issued, that within that Exhibit 4 were some requests for information from you?
A. Yes, I do understand that.
Q. And do you understand that some information was provided in response to that request for information?
MR. ANTONUCCI: Object to

foundation.

THE WITNESS: I don't know if information was provided or not.

BY MS. BUTLER:

Q. So is it correct then that you didn't provide any information to your attorneys in response to the request for production of documents that is Exhibit Number 4?

MR. ANTONUCCI: Object to form and foundation.

THE WITNESS: I did provide information. I don't know if they provided the information to you.

BY MS. BUTLER:

Q. Looking at Exhibit 5, you'll see that it's titled "Responses and Objections to Plaintiffs' Notice of Deposition and Requests For the Production of Documents to Gregory Russo."

Do you see that?

A. Yes, I do.

Q. And do you see it, starting on page 1 there's some general objections, and then if you go to page 2, there start to be numbered requests and then a response? Do you see that?

A. Yes.
Q. Okay. And the first was for your current curriculum vitae and bibliography.
Do you see that?
A. Yes, I do.
Q. And I believe we already have established that the CV, which was Exhibit 1, is that current CV and bibliography; is that correct?
A. Yes, it appears to be.
Q. And then do you see that request number 2 requests -- and I'm going to summarize, but please feel free to read it in its entirety -- billing invoices or records, time sheets, time records, billing records and documents reflecting the time you and/or anyone employed by you and/or on your behalf spent in connection with your work and any aspect of the Camp Lejeune water contamination litigation.
Do you see that request?
A. I do.
Q. Okay. And do you have -- let me ask.
Were you asked for that information?
A. I was sent this subpoena. I was not

personally asked for that, though. That's not information that I have.

Q. Do you understand that information was produced in response to that request?

MR. ANTONUCCI: Objection. Foundation.

THE WITNESS: I do not know what was given or not given to you.

BY MS. BUTLER:

Q. I'm going to turn to request 4, which starts on page 4.

Do you see that all consulting contracts and/or retention letters between you and any person or entity on behalf of the Defendant United States concerning your involvement in any aspect of the Camp Lejeune water contamination litigation was requested?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I see that.

BY MS. BUTLER:

Q. Okay. And I will represent to you that no documents reflecting consulting contracts or retention letters or engagement agreements have been produced to us.

Do you have any understanding of any responsive documents being in existence that have not been produced to us?

A. No, I don't have any understanding that responsive documents exist with respect to that.

Q. Okay. I'm going to ask you to look at page 6, request number 6.

Do you see that that request asks for all documents reflecting all expert or other person -- experts or other persons you've spoken with or reviewed materials reflecting the opinions of with respect to any of the plaintiffs, the issues in this litigation, and/or the opinions you have rendered to the extent are not already reflected in your Materials Considered List?

A. Yes.

Q. Okay. And if you look at the response, the first paragraph, there's some objections asserted, but if you look at the second paragraph, do you see that it says:

"Subject to and without waiving the foregoing objections, the United States refers Plaintiffs to Mr. Russo's Materials Considered

List served on December 22, 2025, which contains information that may be responsive to this Request, and a Supplemental Materials Considered List served on February 24, 2026."

Do you see that?

A. Yes, I do.

Q. Are you aware -- and if you want to take a look at those Materials Considered Lists, I do have them all here and I will be using them as an exhibit.

But are you aware of anything that would be responsive to this request that would not be reflected on your Materials Considered Lists?

A. No, I am not, except for, as I had indicated, I received Dr. Basu's report and Dr. or -- sorry -- and Dr. Marjorie Hackett-Wallace's rebuttal report.

Q. Okay.

A. I don't believe those are on my Materials Considered List, but those are the only documents.

Q. Okay. Going to the next page, request number 7. If you could read that request.

A. (Reviews document.)

Q. Tell me when you've finished.
A. Yes, I have read it.
Q. And if you look down in the response, the response, again, refers to your original Materials Considered List and your Supplemental Materials Considered List.
Are you aware of any responsive documents that would not be reflected on those lists?
A. No. Those lists contain the materials upon which I've relied for the opinions that I'm offering.
Q. And then going to request number 8, if you could read that request, please, and tell me when you're finished.
A. (Reviews document.)
Yes.
Q. Okay. Going to the next page, you'll see that it says -- do you see the paragraph that starts "Subject to and without waiving"?
A. Yes.
Q. And then it says:
"The United States refers Plaintiffs

to the following information: Mr. Russo's Reports dated December 15, 2025, and appendices thereto, his Materials Considered List served on December 22, 25; his Supplemental Materials Considered List served on February 24, 2026; and the documents produced by the United States with the Bates range 1-16."

Do you see that?

A. Yes, I do.

Q. Okay. And I will represent to you that the Bates range CLJA 1-16 that is referred to there, those are those Excels with the formulas in them.

Are you aware of anything responsive to that request that is not referenced in that response we just read?

A. No, I'm not.

Q. Okay. And turning to the next page on page 9, if you'll read request 10, please.

A. (Reviews document.)

Q. Just let me know when you've finished reading the request.

A. I'm done.

Q. Okay. And if you will go down to

the bottom of page 9 where it starts with "Subject to and without waiving."

Do you see that?

A. Yeah.

Q. And then the United States refers us again to the same materials which we just listed, which are your reports and appendices, your Materials Considered Lists, and those Bates range documents that go 1-16.

Are you aware of anything else that would be responsive to that request?

A. No, I'm not.

Q. And then if you will go to the bottom of page 10, if you'll read request number 12, please.

A. (Reviews document.)

Okay.

Q. And if you will look down below that where it says "Subject to and without waiving."

Do you see that?

A. Yes.

Q. And the same materials are referenced, meaning your reports and appendices, and your Materials Considered List and that Bates

range 1-16.

Are you aware of any materials that would be responsive to that request, other than those identified?

A. No, I'm not aware of any other responsive documents.

Q. Thank you.

MR. ANTONUCCI: I will note for the record the Supplemental Materials Considered List, there's a typo there. It says it was served February 24, 2026. It was actually served February 20, 2026. That's my fault and I apologize.

MS. BUTLER: Thank you.

I am going to hand you what has been marked as Exhibit 6.

(Document marked for identification as Russo Exhibit 6.)

MS. BUTLER: Oh, sorry. I gave you all copies. I'm going to give you Exhibit 6 and give you the copies.

And I'm going to go ahead and give you Exhibit 7, which you can place right behind there.

(Document marked for identification as Russo Exhibit 7.)

MS. BUTLER: And 8 which you can place behind 7.

(Document marked for identification as Russo Exhibit 8.)

MS. BUTLER: And 9. (Laugh). He does a lot of work.

(Document marked for identification as Russo Exhibit 9.)

THE WITNESS: Spam e-mail or something.

MS. BUTLER: And 10.

(Document marked for identification as Russo Exhibit 10.)

MS. BUTLER: And 11.

(Document marked for identification as Russo Exhibit 11.)

BY MS. BUTLER:

Q. Okay. This will help us. (Laugh). Okay. Looking first at -- oh, gosh, I didn't label mine.

Exhibit 6 was the first one, right?

A. Yes.

Q. Okay. And I apologize if your Bates numbers are cut off on the bottom, but for purposes of identification, this document is it -- has a cover page that says "Document Produced Natively" and it has at the bottom the CLJA_USA_RUSSO_ a bunch of 0s and it starts with 20.

And then Exhibit 7 has the cover page with Bates number 21, 8 has the cover page with Bates number 23, 9 has the cover page with Bates number 22, 10 has the cover page with Bates number 18, and 11 has the cover page with Bates number 17.

So that way we just we have it.

A. You gave me an extra 23.

Q. Aha. Okay.

A. I have 23 which is --

Q. Okay.

A. -- Exhibit --

MS. BUTLER: Do you need 23?

MR. ANTONUCCI: I have 23.

Thank you.

THE WITNESS: Exhibit 8.

BY MS. BUTLER:

Q. Okay. I think we just have extra copies. I think.

So let's take a look starting with Exhibit 6 then.

A. I have Exhibit 6 through 11, right?

Q. Yes.

A. Okay.

Q. So starting with Exhibit 6, and you can ignore these front pages. That is just something that has to do with the litigation.

But starting with the page behind it, do you recognize this document?

A. I recognize the format of the document in that it is an invoice submitted by BRG. I don't recognize this specific document, though.

Q. Okay. And so turning to the next page of this document -- first of all, let me identify.

Do you see on the -- sorry -- on the first page that it says "Services Rendered Through August 31, 2025."

Do you see that?

A. I do.

Q. Okay. Going to the next page, it identifies three individuals: you, Julian Brock, and I apologize for my pronunciations but Ayako Sekiya. I-y -- sorry. A-y-a-k-o. S-e-k-i-y-a.

Do you see that?

A. Yes.

Q. Okay. And it has Rate, Hours, and Amount.

Do you have any reason to dispute that information?

A. No.

Q. Okay. Do you have any personal knowledge as to whether that's accurate?

A. I --

MR. ANTONUCCI: Objection.

THE WITNESS: I do not. I have not verified these amounts. I've never seen this document.

BY MS. BUTLER:

Q. Do you have any reason to dispute the information on that page?

A. I do not.

Q. Okay. Can you -- I am going to ask you. There are a lot of individuals who assisted

you with your reports.

Would you agree with that?

MR. ANTONUCCI: Objection.

THE WITNESS: There are a number. I don't know what you define as a lot.

BY MS. BUTLER:

Q. If I counted 14 people who assisted you with your reports, would you have any reason to dispute that number?

A. No.

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Okay. So what I would like to understand as we go through these invoices is kind of hierarchy of the team and what the roles are that these people serve.

A. Okay.

Q. Do you understand what I'm asking?

A. I think I do.

Q. Okay. Well, let me back up.

Did you form the team who helped you prepare these reports for this case?

A. The individuals that worked on this

case worked at my direction, and I identified that they were an individual that's going to assist me in preparing the reports that contain my opinions.

Q. Okay. And so, for example, looking at this -- this page on Exhibit 6, it has three individuals including yourself.

What was Julian Brock's role?

A. He worked at my direction to conduct analyses to determine the reasonable value of past medical services.

Q. Would that include the review of the medical billings?

A. Yes, it did.

Q. And what was the role of Ayako Sekiya?

A. She worked at my direction to analyze the reasonable value of past medical services.

Q. So how was her role different than that of Mr. Brock?

A. They're two different people and so they were doing different tasks different points in time. Sometimes reviewing tasks that the other one had done.

Q. And the next page of this Exhibit 6 contains a Date, a Name, a Description, and Hours.

Do you see that?

A. Yes, I do.

Q. Is that generally how you keep your time at BRG for various jobs that you're working on?

A. Yes, it is.

Q. Okay. So on a daily basis, do you have a timekeeping system that you enter your time into?

A. Yes.

Q. And do you have any reason to think that this information is incorrect that we're looking at on this page?

A. No, I don't.

Q. Okay. And so based on this invoice, it would appear that you started working on your reports for this case on August 19, 2025.

Is that consistent with your recollection?

A. That is consistent with my recollection and my testimony earlier that I started in the summer of 2025.

Q. Okay. And so do you have any recollection of working on the Camp Lejeune litigation prior to this first time entry of August 19, 2025?

A. I may have done some work earlier than that to assist Dr. Miller in preparing his report.

Q. And we went through this earlier, but you're not rendering any opinions with respect to that work; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: By "that work" you mean Dr. Miller's opinions? No, I'm not offering an opinion on Dr. Miller's opinions.

BY MS. BUTLER:

Q. So the work with respect to the opinions you are offering in this case, would it be accurate to say it started on August 19, 2025?

A. Yes, I do believe that it is based on what you have shown me here. I don't recollect it having started earlier, but to the extent that there's a bill with July time, then I would agree that the work started earlier.

Q. And do you review any of these -- I think you've answered this. I apologize. Let me back up and ask this question again.

Am I correct that you do not review these invoices before they are sent to the Department of Justice?

A. That is correct. I do not. I have at times looked at invoices and I sometimes get asked by accounting, but I -- I don't believe that I'm on the critical path for these invoices getting sent to the Department of Justice.

Q. Turning to Exhibit 7. Again, if you'll look at not the cover page but the page behind it.

Do you recognize this as an invoice from BRG with respect to this litigation for Services Rendered Through September 30, 2025?

A. Yes.

Q. Turning to the next page, we have some additional individuals.

Do you see some additional individuals identified there?

A. Yes.

Q. As you did with Mr. Brock and

Ms. Ayako previously, can you explain Ethan Hesse's role in this litigation?

A. I can explain Ethan Hesse as well as Victoria Miller and Noah Spain, which is that all three of them were working at my direction to analyze the reasonable value of past medical services.

Q. And, again, would that include the analysis of the medical bills that are reflected in the report of Marjorie Hackett-Wallace?

A. That would involve the analysis of the reasonable value of the past medical services. I didn't evaluate or analyze, as you say, medical bills. I -- I'm offering an opinion as to the reasonable value of past medical services.

Q. So were these individuals -- Mr. Brock, Mr. Hesse, Ms. Miller, Ms. Sekiya, Mr. Spain -- were they involved in helping you calculate the reasonable values based on the reports of Marjorie Hackett-Wallace and then the reports of Dr. Ji and Dr. Hasan?

A. These individuals were working at my direction to complete the methodology that I had outlined. That methodology incorporated the -- or

used information from Marjorie Hackett-Wallace's reports as well as the reports of Dr. Ji and Dr. Hasan.

Q. I'm going to now look at Exhibit 8. Do you see that this is a BRG invoice for Services Rendered Through October 31, 2025?

A. Yes.

Q. And turning to the next page, do you see that we have some additional new people: Mr. Fazio and Mr. Diamond?

A. I see Ms. Fazio.

Q. Sorry. Ms. Fazio and Mr. Diamond?

A. Yes.

Q. Okay. And were their roles any different than you've described for the other individuals who are working at your direction?

A. No, they were not. The entire team, as you had indicated you counted 14 individuals, were working on my direction to analyze the reasonable value of past medical services.

Q. And so far we've looked at three invoices: Exhibits 6, 7, and 8. Do you have any reason to dispute

the amounts that are indicated on those invoices?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not have reason to dispute the amounts, but I did not and have not independently verified those amounts.

BY MS. BUTLER:

Q. Looking at Exhibit 9, do you see that this is another BRG invoice for time rendered through November 30, 2025?

A. Yes, I do.

Q. Do you see that amount of 173,761.50?

A. Yes, I do.

Q. Let me ask you.

If, for example, one of these prior invoices had not been paid, would that generally be indicated on this front page?

MR. ANTONUCCI: Objection.

THE WITNESS: Generally, yes. As you see here on the second page of Exhibit 9, it says "Other Outstanding Invoices As of Today."

BY MS. BUTLER:

Q. Okay. And so as you noted, it says "Other Outstanding Invoice As of Today" and it shows that there is an invoice in the amount of 58,102.50 that's due.

Do you see that?

A. Yes, I do.

Q. Okay. And is that -- that amount is not included in the current charges of 173,761.50, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct. It is not included within the amount that's current invoice.

BY MS. BUTLER:

Q. Okay. Going to the next page, do you see that we have some additional new members to your team?

A. Yes, I do.

Q. Okay. There's a Lucas Robertson, Eli Friedman, Genevieve Aziz, and Jessica Serrano.

Do you see those individuals?

A. Yes, I do.

Q. Okay. Did they have any roles that are different than what you've described for the

other teammates we've gone through?

A. No, they did not. They were working at my direction to calculate the reasonable value of past medical services.

Q. And then your reports were produced on December 15, 2025; is that correct?

A. That sounds about right.

I don't remember the exact. I don't remember the date.

Q. I will represent to you for purposes of my next question that your reports are dated December 15, 2025.

Looking at Exhibit 10, do you see that this is an invoice from BRG for Services Rendered Through December 31, 2025? Do you see that?

A. Yes, I do.

Q. With current charges of 177,486.

Do you see that?

A. Yes, I do.

Q. And then there's also the past due amount from the prior invoice that we just looked at.

Do you see that?

A. Yes, I do.
Q. Okay. And, again, the current charges do not include the outstanding invoices, correct?
A. Correct.
Q. Okay. So going to the next page, do you see that we have some additional new members to your team? We have Ms. Moody and Mr. Hassan?
A. Yes.
Q. Were they performing any services other than what has been described with respect to the other teammates?
A. No, they do not. They did not perform services that were unique from the other teammates. Ms. Moody and Mr. Hassan were working at my direction to calculate the reasonable value of past medical services.
Q. Now, with the understanding that your reports are dated December 15, 2025, if you will look back at the individual time entries, do you see that there are continuing to be time entries after December 15, 2025?
A. Yes.
Q. And why is that?

A. We were working to produce the Materials Considered List, which the Materials Considered List was produced on December 22, 2025, and we continue to work to prepare those.

Q. Was there any other work being done other than the preparation of the Materials Considered List?

A. Yes, there was a little work. As you see that Mr. Brock charged .2 hours on December 30th. I don't recollect what he was doing at that point.

Q. Okay. Let's look at Exhibit 11.

Do you see that this is a BRG invoice for Services Rendered Through January 31, 2026?

A. Yes, I do.

Q. And do you see that there are current charges of $9,001.50?

A. Yes, I do.

Q. And do you see that you spent an hour and 10 minutes, Ms. Brock spent 5 hours -- 5.7 hours, Ms. Sekiya spent 6 hours, and Mr. Diamond spent 8.9 hours.

Do you see that?

A. Yes, I do.

Q. Okay. And so since the Materials Considered List had already been produced, what were these individuals doing at this time?

A. At this time, they were likely ensuring that the -- that the materials were all in -- in the order that was necessary to easily review.

I had asked that the files be reordered on our system because we had previously had a single file folder for each of the plaintiffs, and I found that that was challenging.

As I was reviewing materials and preparing for my deposition. I needed a single folder that contained -- contained all of my reports or all of the appendices. So they were working to reorganize things so it expedited my preparation for the deposition.

Q. This -- I will represent to you that this Exhibit 11 is the last invoice we were provided.

I'm assuming there will be another invoice generated when February concludes; is that correct?

A. Yes.

Q. Okay. And would the time reflected on that be similar to what you just noted with respect to this time after the Materials Considered List was produced?

A. I don't know what you mean by "similar."

Q. Organizing the files and helping you get prepared for the deposition?

A. Yes, it would relate to my preparation for the deposition.

I -- I don't recollect when the Appendix Cs with formulas were produced, but that also would be reflected in the time that occurred after December 15th.

Q. All of these individuals that we've looked at who are identified on these invoices, are any of them considered coauthors of your report?

A. No, they are not. The reports contain my opinions. The individuals worked at my direction. I reviewed all of the reports and the language that's contained in the reports to ensure that the opinions that are being offered are my

opinions.

Q. And I believe you've testified to this, but you supervised all of those individuals; is that correct?

A. That is correct. The individuals worked at my direction.

Q. And are there any portions of your written reports that those individuals prepared?

MR. ANTONUCCI: Objection.

THE WITNESS: Those individuals that worked at my direction may have assisted in drafting portions of the report, but the final report was prepared by me in that I reviewed all of the language, edited the language, and ensured that the opinions that are being offered are my opinions.

BY MS. BUTLER:

Q. What did you do to make sure that the reliability and validity of the data that they were involved in and that you used in your analysis was accurate?

MR. ANTONUCCI: Objection.

THE WITNESS: I include

within all of the work that I do a robust quality control process where individuals on the team are reviewing others' work and in some cases independently verifying it.

I was then an extra level of review. I went into all of the analysis files that you see as Appendix C to review them, and also reviewed all of the reports.

MS. BUTLER: You can set those aside. I'm not going to be referring to those anymore.

I'm going to hand you -- and I apologize that it's clipped, but it is all Exhibit 12. I just didn't have access to a stapler.

(Document marked for identification as Russo Exhibit 12.)

BY MS. BUTLER:

Q. For purposes of identification and because I do think these Bates numbers might be cut off on the bottom, which I apologize, what I'm handing you are documents that have been

Bates-labeled as MILLER_USA_ a number of 0s and then it goes 16 through 20, and then 31 through 37, and then 12 through 15, and then 9 through 12, and then 25 through 30, and then 21 through 24.

And then there is a document at the back that does not have a Bates number, and I don't know if I just printed it without the Bates number, and we will identify that by the date.

And I will represent to you that these are invoices that were produced in response to Mr. Miller's deposition subpoena with respect to his reports.

So with that understanding, I would like to take a look at the first page of Exhibit 12.

Does this appear to be a BRG invoice similar to those we looked at with respect to your work?

A. Yes.

Q. And do you see that it says for Services Rendered Through March 31, 2025?

A. Yes.

Q. And if you go to the next page, do you see that rather than having you in the top

position as managing director, it has Henry Miller?

A. Yes.

Q. Is that because he was essentially directing the work for these invoices whereas you were directing the work for the other invoices?

A. No, it's because his name comes first alphabetically.

Q. Okay. So were you and Mr. Miller and Ms. JoAnna Younts equals with respect to what's being done on this invoice?

MR. ANTONUCCI: Objection.

THE WITNESS: I think it's unclear how you're defining equals there. We are all managing directors at Berkeley Research Group. The work that was being done in -- that is reflected in this invoice was to prepare Dr. Miller's opinions, and so the work was being done at his direction.

BY MS. BUTLER:

Q. So were you working under Mr. Miller's direction then for purposes of these invoices?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct. As I indicated before, when assisting Dr. Miller in preparing his reports, I was working at his direction.

BY MS. BUTLER:

Q. If you look at the next page which has a Bates label 18 on it, do you see that there is a date of March 10, 2025?

A. Yes, I do.

Q. And it has your name next to it?

A. Yes.

Q. And it says "Developed analysis plan."

Do you see that?

A. Yes.

Q. Was that -- were you working at Mr. Miller's direction starting in May or -- sorry -- March 10, 2025?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I was.

BY MS. BUTLER:

Q. Okay. And do you see that the next entry is also "Prepared analysis plan"?

A. Yes.
Q. Okay. So did you have a supervisory role with respect to Mr. Miller's reports?
MR. ANTONUCCI: Objection.
THE WITNESS: I was working at Dr. Miller's direction. I was coordinating some of the work that was occurring.
BY MS. BUTLER:
Q. If you go down then to an entry 3/18/25, it has your name and it says "Analyzed life care plans. Analyzed life care plans. Meeting or call - internal."
Do you see that?
A. Yes, I do.
Q. And so were you analyzing life care plans for purposes of the Camp Lejeune litigation?
MR. ANTONUCCI: Objection.
THE WITNESS: Yes, I was. This, the billings on this matter relate to the Camp Lejeune litigation.
BY MS. BUTLER:
Q. And are you offering any opinions with respect to the life care plans involved in

this Camp Lejeune litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I am not.

BY MS. BUTLER:

Q. And if you continue to look at this invoice, do you see down on 3/28/25 it says "Gregory Russo - Conducted research. Prepared report"?

A. Yes, I do.

Q. Is that referring to Mr. Miller's report?

A. That is correct. I assisted in preparing his report at his direction.

Q. But am I correct that you are not rendering any opinions that are contained in Mr. Miller's report for purposes of this litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct. Dr. Miller reviewed all final drafts of that report to ensure that the opinions that were contained within the report are his opinions, not my opinions.

BY MS. BUTLER:

Q. And going to the next page, which has the last Bates number of 31, do you see this is a BRG invoice for Services Rendered Through April 30, 2025?

A. I do see that, but I will note I cannot decipher what the Bates number is.

Q. Okay. And I apologize that it's cut off. I will tell you that it is the last two are 31.

Do you see on the next page that you are, again, listed as a managing director with Mr. Miller and Ms. JoAnna Younts?

A. Yes, I do see that.

Q. Does Ms. Younts have any special expertise that differs from either the expertise you've discussed about Mr. Miller or your expertise?

MR. ANTONUCCI: Objection.

THE WITNESS: Ms. Younts, Dr. Miller, and I all have very similar experiences and expertise. We have had different experiences in our careers, but it's largely very similar.

BY MS. BUTLER:

Q. And is it your understanding that Ms. Younts also helped prepare Mr. Miller's reports?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, that is correct.

BY MS. BUTLER:

Q. And do you have any understanding as to whether she intends to testify in this case? Again, referring to JoAnna Younts who is listed on this invoice.

MR. ANTONUCCI: Objection.

THE WITNESS: I am not aware that she intends to testify in this case. My understanding is she was working at Dr. Miller's direction in the preparation of his report, and the opinions that he is offering are his opinions.

BY MS. BUTLER:

Q. Now, were you involved in budgeting for BRG's work in this case?

A. No.

Q. If you would look down on -- we're still -- this is on the time entry for 4/11/25.

It says "Gregory Russo - Budget call."

Do you see that?

A. Yes, I do.

Q. And so did that budget call have nothing to do with BRG's work on this litigation?

A. I don't recollect what that budget call was about.

Q. Okay. Do you have any understanding as to the amount of time you billed for Mr. Miller's reports?

A. No, I don't.

Q. And did you assist in Mr. Miller's deposition preparation for this case?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I did not. Sorry. Let me revise that. I was involved in one meeting that happened a number of months ago. I believe it was last summer.

BY MS. BUTLER:

Q. And that's reflected on that invoice, correct?

A. It would be reflected in the invoices.

Q. Okay.

MR. ANTONUCCI: I'm not sure if you're done with the invoices, but we've been going over an hour now.

MS. BUTLER: Yes, I am done with the invoices, and I don't know what time it is. It is 12:41. Do we want to go off the record for a minute and discuss lunch?

THE VIDEOGRAPHER: The time is 12:41. We are now off the record.

(Whereupon, at 12:41 PM, a luncheon recess was taken.)

AFTERNOON SESSION

(1:42 PM)

GREGORY S. RUSSO

called for continued examination and, having been previously duly sworn, was examined and testified further as follows:

EXAMINATION (CONTINUED).

(Melanie Konstantopoulos no longer present.)

THE VIDEOGRAPHER this is the beginning of media unit number 4 of the video-recorded deposition of Mr. Gregory Russo. The time is 1:42 PM Eastern. We are now back on the record.

Counsel, you may proceed.

MS. BUTLER: Thank you.

BY MS. BUTLER:

Q. Mr. Russo, during the lunch break, did you discuss anything about your deposition or the litigation with anyone?

A. Not in a substantive way.

Q. Okay. In a nonsubstantive way, did you discuss the litigation?

A. Not the litigation, but the

deposition. Gio said, "Are you ready to go back upstairs for the deposition?" I said, "Yes." So there was discussion of the deposition but not in any substantive way.

MS. BUTLER: Okay. Thank you for that.

I am going to hand you what has been marked as Exhibit 13.

(Document marked for identification as Russo Exhibit 13.)

MS. BUTLER: This is titled "Supplemental Materials Considered of Gregory Russo February 20, 2026."

BY MS. BUTLER:

Q. Have you seen this before?

A. Yes, I have.

Q. And we have referred throughout the course of this deposition to your Supplemental Materials Considered List.

Is that -- is this, in fact, that list that we have been referring to?

A. I believe that it is.

Q. Okay. And so is this a full and complete list of the additional materials you've

reviewed after your report was provided and your original Materials Considered List was provided to us?

A. I believe so.

Q. And I believe you've testified that there are no additional materials you've considered since February 20, 2026 that are not identified on this list; is that correct?

A. Not of which I can recollect, as I sit here.

Q. And so if you look at the first -- most of the bullet points on the first page of Exhibit 13, those have to do with Plaintiff Damages Assessment forms.

Do you see that?

A. Yes, I do.

Q. Did you, in fact, review those?

A. Yes, I have reviewed the damage assessment forms.

Q. Are they in any manner relied upon in your report?

A. They are relied upon in that they point to Marjorie Hackett-Wallace's report, which is then something upon which I rely.

Q. And so beyond that reference to Marjorie Hackett-Wallace's report, your opinions in this case are not relying on those damage assessment forms; is that correct?

A. I don't believe so.

Q. And then going to the last two bullets on the first page of Exhibit 13, it says "Rebuttal Expert Opinion Report, Margaret Hackett-Wallace, January 20, 2026" and "Corrected Rebuttal Expert Opinion Report, January 27, 2026."

Is that correct?

A. That is what it says.

Q. Okay. And so when you reviewed those two items, does that change any of your opinions in this case?

A. No, it doesn't change the opinions that I've offered with respect to the reasonable value of past medical services.

Q. And is there anything that you recall reviewing in those reports that you disagree with?

MR. ANTONUCCI: Objection.

THE WITNESS: I believe that Marjorie Hackett-Wallace referenced work

that I had done but attributed it to Dr. Ji or Dr. Hasan. And in reference you asked me about this before you may remember, and I answered in the same way. So I think my testimony now is consistent with what you asked me earlier.

BY MS. BUTLER:

Q. And so as I understand it, other than her perhaps referring to something you had done and attributing it to Dr. Ji or Hasan, there's nothing else that you can recall that you disagreed with in her original report or the two reports identified on your Supplemental Materials Considered List; is that correct?

A. No, that's not correct.

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Okay.

A. I did disagree with information in her original report. You remember I testified earlier today, she had errors in her initial report, sloppy workmanship. And she went about -- I went about correcting those errors and noting them in my reports.

She subsequently then agreed with the errors that she had -- that I had identified in her work, and she then corrected those errors through the process of submitting her rebuttal report.

Q. Do you remember the dollar value that you and Marjorie Hackett-Wallace disagreed over with respect to what you call sloppy workmanship?

A. I don't. It was small. Probably just as small as like the GoodRx numbers, which you discussed quite at length before.

Q. And is it your recollection that she agreed with all of these alleged errors that you found with her initial reports?

MR. ANTONUCCI: Objection.

THE WITNESS: I recollect her agreement with the places that I had identified the errors.

I don't recollect, as I sit here now, whether she agreed with every single one of them or not.

BY MS. BUTLER:

Q. Would you agree that at this point

with the original Marjorie Hackett-Wallace report and the two reports identified on your Supplemental Materials Considered List that the disagreement with respect to you and Marjorie Hackett-Wallace is fairly small in dollar value?

MR. ANTONUCCI: Objection.

THE WITNESS: So the difference in the charges is small in dollar value.

It's Marjorie Hackett-Wallace does nothing to determine the reasonable value of past medical services, which is what I have done in my report, and so the dollar amount between charges and reasonable value I would say is not small.

BY MS. BUTLER:

Q. But that's not something that Marjorie Hackett-Wallace opined on, the reasonable value, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: She doesn't indicate whether she's considering charges to be reasonable value or not.

BY MS. BUTLER:

Q. Okay. Marjorie Hackett-Wallace did not conduct, for example, a different type of reasonable value analysis to what you conducted; is that correct?

A. That's a question --

MR. ANTONUCCI: Objection.

THE WITNESS: -- for Marjorie Hackett-Wallace.

BY MS. BUTLER:

Q. Okay. So Marjorie Hackett-Wallace presented billed charges and paid charges; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That's my understanding of what she attempted to do.

As we indicated in her original report, she didn't do that, though, because she made errors.

BY MS. BUTLER:

Q. Okay. But you've admitted that those errors are small in monetary amount, correct?

A. They're still errors.

Q. Okay. With respect to all of the charges that she evaluated, other than the errors that you're noting, do you have a problem with the methodology she used?

MR. ANTONUCCI: Objection.

THE WITNESS: I did not evaluate the methodology that she used to assign or to determine whether past medical bills were at issue in the case.

BY MS. BUTLER:

Q. So you're not expressing an opinion as to the methodology that Marjorie Hackett-Wallace utilized in her report; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm not expressing any opinions with respect to a methodology to determine whether the bills that she has identified as being at issue are at issue or not.

To the extent that Marjorie Hackett-Wallace is offering an opinion as to what is the reasonable value of the

services, if it is charges, as she has identified, then I would disagree with that.

BY MS. BUTLER:

Q. But that's the extent of the disagreement you would offer with Marjorie Hackett-Wallace, other than the small number of errors that you have indicated; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: As I sit here today, I believe that is how I would disagree with Marjorie Hackett-Wallace.

BY MS. BUTLER:

Q. Okay. Turning to the next page of Exhibit 13, it says that you reviewed the Rebuttal Expert Report of Chad L. Staller, January 20, 2026, and the Expert Report and Expert Testimony of Peter Rybolt, January 20, 2026.

Did you, in fact, review those reports?

A. I recollect opening them, but I don't recollect the substance of them.

Q. And so am I correct to understand that you will not be rendering opinions with

respect to those reports?
A. I don't believe so.
Q. And then the next bullet is Dr. Basu's report, correct?
A. That is correct.
Q. And the amended appendices; is that correct?
A. Yes.
Q. And there are seven amended appendices, correct?
A. Yes.
MS. BUTLER: And I do have those available if you would like to look at them. You previously indicated you did not need to look at them, but I will hand them to you and I apologize for going out of order, but they are marked as Exhibit 47.
(Document marked for identification as Russo Exhibit 47.)
BY MS. BUTLER:
Q. Do you recall when you reviewed these having any issues with these amended appendices?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. As you asked earlier today and I provided the testimony, I have disagreement with Dr. Basu's opinions with respect to the Sanders Clinic for the Plaintiff Peterson.

And I recollect there being another instance in here where there was an issue that I had with Dr. Basu's appendices, but I don't recollect which one that was.

BY MS. BUTLER:

Q. And I believe we discussed those kind of, I guess, the discrepancies with respect to the Sanders Clinic that was noted in a footnote of Dr. Basu's report, correct?

A. I think we've already discussed it --

Q. Okay.

A. -- but you're asking about it again.

Q. That's what --

A. So please ask away.

Q. I'm asking if that's what you're

referring back to?

A. If what is what I'm referring back to?

Q. So I asked you if you had any issues with Exhibit 47, which are the amended appendices, and you referred to the Sanders Clinic Peterson issue.

And I'm just asking: Are you referring to the same issue we already discussed previously in your deposition?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. So let's take a look at the exhibit.

BY MS. BUTLER:

Q. I believe Dr. Basu's report is Number 2 and I believe that the Peterson clinic issue is on page 8 of Footnote 7.

A. That's right. And this is page 8 of Exhibit 2 is Dr. Basu's indication that he had took -- taken some issue with my identification of charges related to services rendered by the Sanders Clinic, and I disagree with how Dr. Basu has approached identifying those charges.

And as I indicated earlier in my

testimony, I still disagree with Dr. Basu.

Q. With respect to the Sanders Clinic and Mr. Peterson, correct?

A. Yes, that is correct.

Q. Okay. And you're -- we're focusing now on these amended appendices, and as I understand your testimony, that -- that disagreement carries over to the amended appendices.

Is that what you were expressing?

A. Yes.

Q. Okay. And other than that type of disagreement, which we covered previously when we were talking about Mr. Basu's report, is there anything that you disagree with with respect to Exhibit 47, which are the amended appendices A1, A6, A7, A10, A11, A13, and A14?

MR. ANTONUCCI: Objection.

THE WITNESS: As I indicated a moment ago and indicated this morning when you asked the question, I -- Dr. Basu's appendices include many different numbers for many different medical providers.

And I recollect there being another provider in here for which I disagreed with Dr. Basu's numbers. I don't recollect which one that is.

And I think this morning when we spoke about it, I don't recollect it being a large difference.

BY MS. BUTLER:

Q. So would it be correct to say that based on your review of Dr. Basu's report and his amended appendices that any disagreement between the two of you is relatively small in dollar value?

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. As far as -- let me -- let me back up.

As far as we talked about the GoodRx and then these, like, Peterson Sanders Clinic type of disagreements.

A. I think the differences are relatively small. Dr. Basu has taken issue with my reliance on GoodRx, which as I indicated through my testimony earlier accounts for 0.2

percent of the reasonable value that I've identified.

There are a few instances then where Dr. Basu and I don't align on the billed amounts, and I think that those would be small. So I would say that Dr. Basu agrees with my reports that I have offered.

I wouldn't say that I agree with Dr. Basu's reports because I have done nothing to evaluate the inflation that Dr. Basu has applied.

Q. And so with respect to that inflation or present value, whatever terminology you want to use for that calculation, as I understand it, your opinion is not that it's wrong. Just that you didn't analyze it at all, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I did not evaluate Dr. Basu's calculation to determine whether it is appropriate or inappropriate or correct or incorrect.

BY MS. BUTLER:

Q. With respect to the amended appendices in Exhibit 47, is there anything else

that we haven't already discussed that you recall disagreeing with?

MR. ANTONUCCI: Objection.

THE WITNESS: Not as I sit here today.

BY MS. BUTLER:

Q. Going back to Exhibit 13, which is your Supplemental Materials Considered dated February 20, 2026, you also reviewed the Materials Considered List for Expert Anirban Basu, Expert Report of Chad Staller, Expert Rebuttal Report of Marjorie Hackett-Wallace, and the Supplemental Materials Considered List for Expert Report of Marjorie Hackett-Wallace.

Are you based on that review -- or let me ask you.

Did you review those materials?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. BUTLER:

Q. Okay. Based on that review, is there anything -- any additional opinion you intend to express that we haven't already discussed here today?

A. No.

Q. Okay. And then going to the next bullets, we have 1, 2, 3, 4, 5, 6 bullets indicating various Bates ranges.

Are those additional billing records you reviewed?

A. I believe they are additional billing records.

Q. And were those additional billing records reviewed because they were referred to in one of the other materials you looked at that's indicated on this list?

A. I don't recollect why they were reviewed.

Q. But I believe you've already testified that nothing in this Materials Considered List changes the opinions expressed in your report, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct. The opinions that I offered in my December 15th report are not affected by these additional billing records. The additional billing records were either

duplicative or not at issue.

BY MS. BUTLER:

Q. Okay. And the last three bullet points are also Bates ranges.

And would that same testimony apply that nothing in those bullet points change the opinions that are expressed in your written reports?

MR. ANTONUCCI: Objection.

THE WITNESS: That is correct.

MS. BUTLER: I'm going to hand you what has been marked as Exhibit 14.

(Document marked for identification as Russo Exhibit 14.)

BY MS. BUTLER:

Q. Do you recognize this document?

A. Yes, I do.

Q. Is this the article we were referring to earlier in your deposition that was identified on your CV?

A. This is an article that we spoke about and that is on my CV.

Q. Okay. And were there bullets -- was

there a PowerPoint -- sorry, not a bullet point -- a PowerPoint presentation also prepared with respect to this article?

MR. ANTONUCCI: Objection.

THE WITNESS: There was a corresponding PowerPoint that was used at some point. I think on a webinar.

BY MS. BUTLER:

Q. And are you one of the presenters on this document?

MR. ANTONUCCI: Objection.

THE WITNESS: I am one of the authors on this document.

BY MS. BUTLER:

Q. And were you also one of the presenters when the PowerPoint was presented?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I believe I was.

BY MS. BUTLER:

Q. In what context was this presented, this Exhibit 14? In what context was it presented with the PowerPoint slides?

MR. ANTONUCCI: Objection.

THE WITNESS: It was a webinar.

BY MS. BUTLER:

Q. Who was -- who sponsored the webinar?

A. I think it was jointly sponsored by BRG and a legal association.

Q. What was that legal association?

A. I don't know. I don't remember.

Q. Do you recall if it was a defense- or plaintiff-oriented organization?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't remember.

BY MS. BUTLER:

Q. And who was the audience for that presentation?

A. Attorneys.

Q. Do you know if it was all defense attorneys, plaintiffs attorneys, or a mixed bag?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know. I don't recollect.

BY MS. BUTLER:

Q. Turning to this article on page 1, the first sentence says:

"Personal injury suits typically include costs for a plaintiff's future medical bills."

Do you see that?

A. Yes.

Q. Can that also be true with respect to plaintiff's past medical bills?

MR. ANTONUCCI: Objection.

THE WITNESS: I have seen personal injury suits include past medical bills as well.

BY MS. BUTLER:

Q. And why are past medical bills, in your experience, addressed in personal injury suits?

A. I don't know why they're addressed.

Q. Going down to the I guess it would be the fourth paragraph. It's the one that starts "However, a study."

Do you see that?

A. Yes, I do.

Q. And there's reference to the

Medicare Payment Advisory Commission, or MedPAC.
Do you see that?
A. Yes.
Q. And what is MedPAC?
A. It is an independent federal agency that advises Congress on healthcare in the Medicare program.
Q. Are there other agencies like that that serve the same purpose as MedPAC?
MR. ANTONUCCI: Objection.
THE WITNESS: Well, your question is confusing because you said other agencies like MedPAC that serve the same purpose.
There are other agencies like MedPAC. They do not, say, serve the exact same purpose as MedPAC, though.
BY MS. BUTLER:
Q. What other agencies are there like MedPAC?
A. There's MACPAC.
Q. What is RAND, R-A-N-D?
A. RAND is an independent not-for-profit think tank that was created shortly

after World War II. The United States Department of Defense had amassed an incredible amount of brain power to succeed in winning World War II. And after the end of World War II, the brain power, the incredibly intelligent individuals were beginning to leave the federal government service.

And as those individuals were going to a number of different organizations, there were a few folks that recognized the benefit -- the societal benefit if an independent organization was created where those individuals could study different aspects of national defense and produce independent studies, and so RAND was created at that point.

Since its founding, it has expanded to study other elements of healthcare -- sorry -- other elements of national policy including healthcare. The Rand Corporation has continued to expand over the years and now runs a graduate program that's a highly respected graduate program, as well as conducting independent studies, as I indicated, national security and healthcare as well as other policy-related concerns.

Q. In the article that is at Exhibit 14, MedPAC is cited for purposes of indicating that a study that was conducted by the Lewin Group for MedPAC found that less than 15 percent of hospitals ensure that their charge masters are updated according to a specific schedule and reflect current costs and market conditions.

And then there are other things noted about that study; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: There are other comments about that study.

BY MS. BUTLER:

Q. Now, does RAND have a similar type of study or a similar type of function as MedPAC to refer to in your article?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't understand your question.

BY MS. BUTLER:

Q. Does RAND conduct similar studies to try to figure out, for example, the -- if you look at the next page of your article, which is page 2,

and there are the average percentage of charges paid to hospitals.

Do you see that?

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Paid by Medicaid, paid by Medicare, paid by private sector.

Do you see those percentages?

MR. ANTONUCCI: Same objection.

THE WITNESS: Yes, I do see those.

BY MS. BUTLER:

Q. Okay. Does -- does RAND serve a purpose in accumulating similar type of data as is indicated in that chart?

MR. ANTONUCCI: Objection.

THE WITNESS: So I'm a little confused because you started this by referencing MedPAC.

BY MS. BUTLER:

Q. I did. I jumped.

A. Okay.

Q. I'm just asking if RAND provides

this type of information.

MR. ANTONUCCI: Greg, were you finished answering her question?

THE WITNESS: I -- I think I'm confused as to what the question is.

BY MS. BUTLER:

Q. Okay. So in this article, there is discussion -- for example, I'm on page 2 now -- to the left of the chart that I was pointing you to where it talks about some data where U.S. hospitals were paid 26.7 percent of their billed charges by Medicare, 27.2 percent of their billed charges by Medicaid, and 43.4 percent of their charges by private sector payors.

Do you see that?

A. Yes, I do.

Q. Okay. Does MedPAC have any studies that accumulate that type of data?

MR. ANTONUCCI: Objection.

THE WITNESS: They may. I don't know if they do or they don't but...

BY MS. BUTLER:

Q. So you don't rely on MedPAC for that

type of data?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I don't.

And let's be clear. I'm not relying upon this data either.

Charges, as is indicated in this article, are not something that is a useful measure of value. And the analyses -- sorry -- the data points that you're pointing out here are payments as a percent of charges, and so half of that equation is not a reasonable benchmark.

BY MS. BUTLER:

Q. Do you rely on RAND in your expert reports for this case?

A. Yes, I did.

Q. Could you also rely on MedPAC for your expert reports in this case?

MR. ANTONUCCI: Objection.

THE WITNESS: To the extent that it had data that was available and that provided a current understanding of how willing buyer/willing seller rates are set, then, yes.

But typically MedPAC does not analyze that, the willing buyer/willing seller rate, because MedPAC is the Medicare Payment Advisory Commission, which is focused on the Medicare program. The Medicare program isn't a willing buyer/willing seller transaction.

MS. BUTLER: I'm going to move now to your reports. What I'm going to do is to for each report, I'm going to hand you -- I'm going -- I'm trying to do these in alphabetical order.

And I am going to first hand you -- of course, I said that and then this is not in alphabetical order. I apologize.

Let me see how this happened.

Okay. Sorry. These are going to be a little out of order.

Okay. I am going to start with Amsler and since I pre-marked these, I apologize. The report for Ms. Amsler is Exhibit 43.

(Document marked for

identification as Russo Exhibit 43.)

MS. BUTLER: And her materials considered your original materials considered is Exhibit 44.

(Document marked for identification as Russo Exhibit 44.)

BY MS. BUTLER:

Q. Do you recognize Exhibit 43?

A. (Reviews document.)

Yes, I do.

Q. And what is Exhibit 43?

A. It appears to be my report related to the Plaintiff Karen Amsler, A-m-s-l-e-r.

Q. And previously we were discussing the dates of your report.

Do you see that it's dated December 15, 2025?

A. Yes, I do see that.

Q. Okay. Turning to the first page after the Table of Contents, which is page 3, would you agree that, generally speaking, your 16 reports in this case are all organized in the same manner?

A. What do you mean by "organized"?

Q. Well, there's a Table of Contents, correct?

A. Yes, each of the 16 reports that I've offered does include a Table of Contents.

Q. And the Table of Contents goes through the headings: Introduction, Background of the Case, Scope of Report, etc., correct?

A. Yes, there are elements to the Table of Contents for each of the 16 reports.

Q. Would you agree that the elements to the Table of Contents are the same for each of your 16 reports?

MR. ANTONUCCI: Objection.

THE WITNESS: No.

BY MS. BUTLER:

Q. So your Introduction is different for each report?

Other than with respect to the name of the plaintiff and the disease, is your Introduction any different for any 16 of these reports?

MR. ANTONUCCI: Objection.

THE WITNESS: No, it's not.

I thought you were asking

about the Table of Contents. You said was the Table of Contents the same.

BY MS. BUTLER:

Q. I was asking you about the general content of your reports, and you said you didn't understand what I was asking. So I was referring you to the Table of Contents to indicate that what I'm asking is:

Obviously, we have 16 different plaintiffs. They have 16 different diseases and they have different medical billing amounts, right?

MR. ANTONUCCI: Objection.

THE WITNESS: They have different medical billing amounts. They have different medical bills. They have different medical services.

BY MS. BUTLER:

Q. Other than the plaintiff-specific pieces of information, like their name, their illness, and the amounts and the billing record-type information, is your organization generally the same for each of your 16 reports?

MR. ANTONUCCI: Objection.

THE WITNESS: Well, I want to make sure that it's clear that the sections that are listed as 1, 2, 3, 4, 5, 6, 7, 8 at a high level are the same. But within Section 5, I provide the methodologies that I rely upon to analyze that plaintiff's past medical services, and so those methodologies may differ to the extent that there are different services that are included within a specific plaintiff's at-issue past medical bills.

BY MS. BUTLER:

Q. They also might differ because of their location or dates of service, right?

MR. ANTONUCCI: Objection.

THE WITNESS: What might differ?

BY MS. BUTLER:

Q. Those sections that you just referred to.

A. The methodology -- well, the section is included or not depending on whether the service is included or not.

The methodological section is included or not based on I think you said geography or date. That's not what drives the inclusion.

Q. Okay. That -- that was not what I was asking, but we'll get into the detail of your report.

So let's -- let's go to page 3.

This is your Introduction section and this appears -- you have an Introduction section in each of your 16 reports, correct?

A. Yes, I do.

Q. Okay. And the Introduction section introduces you, your job at Berkeley Research Group, and your experience; is that correct?

A. It briefly does.

MR. ANTONUCCI: Objection.

THE WITNESS: It briefly provides that information to the reader.

BY MS. BUTLER:

Q. Okay. Are you aware of any difference in this Introduction section between this in your 16 reports?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I am not aware of any difference.

BY MS. BUTLER:

Q. Okay. Now, the Background of the Case is where you introduce the plaintiff; is that correct?

A. Yes, that is correct.

Q. And in this case, which is Exhibit 43, you're introducing Ms. Amsler, correct?

A. That is correct.

Q. And you're introducing her name and the condition she suffers from; is that correct?

A. That is correct.

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Okay. And then in each of your reports you state:

"I offer no opinion on whether water at Camp Lejeune may have led to" that plaintiff's "development of any disease."

Is that correct?

A. Yes, that is correct.

Q. And you are still not rendering that

opinion, correct?

A. I am not rendering an opinion as to whether the water at Camp Lejeune may have led to any individual plaintiffs developing a certain disease.

Q. Then Section 3 is the scope of your report; is that correct?

A. That is correct. That is Section 3.

Q. Okay. And with respect to each of your 16 reports in this case, you have three bullet points in the scope of your report; is that correct?

A. Yes, I believe so.

Q. Okay. And with respect to the first bullet point, you indicate that you are reviewing and validating the amounts billed for past medical services for the plaintiff; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I am reviewing and validating the amounts billed for the plaintiff based on the report of the plaintiff's expert Marjorie Hackett-Wallace.

BY MS. BUTLER:

Q. And in each of your reports, you drop a footnote in that sentence and you indicate the expert opinion report you are relying on, and in particular the Bates-labeled appendix that you're relying on that goes with that report; is that correct?

A. Yes, I believe that's correct.

Q. And so in this instance, for example, in this report for Ms. Amsler, you indicate that you review and validate -- that you were asked to review and validate the amounts billed for past medical services claimed by Ms. Amsler in the October 29, 2025 report of Marjorie Hackett-Wallace, and also making reference to her first amended appendix for Ms. Amsler, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I am referencing Marjorie Hackett-Wallace's report. I don't know if that's the first amended appendix or not.

MS. BUTLER: Again, I apologize because I'm going to have to go out of order, but this is gong to be

Exhibit 48 that I will hand to you.

(Document marked for identification as Russo Exhibit 48.)

BY MS. BUTLER:

Q. And I apologize for the small type. This did not get on the big paper. Here's another one.

Do you recognize this document?

A. (Reviews document.)

Yes, I do.

Q. And do you see the Bates numbers at the bottom? They say PLG-EXPERT_HACKETT-WALLACE_ and then a bunch of 0s and it has 60, and then the next page has 61, and the next page has 62?

A. I do, and in my reference I reference to page 63, and I didn't see you gave me 63.

Q. I do not have a copy, but I will represent to you and you can -- you can understand for purposes of this question that 63 is the first amended Materials Considered List, the Excel of Marjorie Hackett-Wallace.

Do you recall getting the Excels, the Excel spreadsheets with Marjorie

Hackett-Wallace's Materials Considered?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't remember if they came in Excel or not.

BY MS. BUTLER:

Q. Okay. So going back to Ms. Amsler's report, the first bullet says that you were asked by the Department of Justice specifically to address the following issues, and number 1 is:

"Review and validate the amounts billed for past medical services claimed by Ms. Amsler in the report of Ms. Amsler's expert Ms. Marjorie Hackett-Wallace."

Correct?

A. Yes, that is correct.

Q. Okay. What did you do to validate the amounts billed?

A. I went to the billing documents, the billing records that were produced and identified for a specific date of service and a specific service what the charges were that were on that bill.

You'd see in Ms. Amsler's case that Marjorie Hackett-Wallace indicates that there were

billed charges of $831,000 -- sorry -- $831,690.04 whereas I found errors in her work here and identified that the charges should be $830,976.93.

Q. And so that difference is less than $900, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: That's correct. Yes. Those are -- Marjorie Hackett-Wallace's errors were less than $900 here.

BY MS. BUTLER:

Q. And when you were previously referring to Marjorie Hackett-Wallace's errors and the allegedly sloppy nature of her work, you were referring to issues like that less than $900 discrepancy that you found with respect to Ms. Amsler?

MR. ANTONUCCI: Objection.

THE WITNESS: That's right. Yeah. I expect that when an expert does their work, they do so without error. That's what I think we owe to the trier of fact.

And Marjorie Hackett-Wallace

when she did her work, she contained errors in her analysis, which she then admitted she had done wrong.

BY MS. BUTLER:

Q. And so in conducting all of your expert work, you have never been found to have included an error in your calculations? Is that what you're testifying to?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't recollect in my work where I have identified -- where another expert has identified an error.

I have in a case or two submitted an amended report after I identified that there was an issue but did so prior to any other expert identifying it.

BY MS. BUTLER:

Q. And, of course, you have at least 13 other people on your team checking and double-checking and triple-checking your work; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I created a team of individuals to ensure that the work we did was accurate and correct. That team included, as you counted, 14 individuals.

BY MS. BUTLER:

Q. Your second bullet point in the Scope of Report states that you were specifically asked to "Determine the reasonable value of past medical services rendered to Ms. Amsler and past medical services included in the report of Marjorie Hackett-Wallace."

Did I read that correctly?

A. Yes.

Q. So with the "and" in the middle there, did you do two things within that bullet point?

MR. ANTONUCCI: Objection.

THE WITNESS: No, I did not.

BY MS. BUTLER:

Q. So what exactly did you do as is described in that bullet?

A. I determined the reasonable value of past medical services that were rendered

Ms. Amsler and past medical services that were included in the report of Marjorie Hackett-Wallace.

Q. So would it be correct to read that that you determined the reasonable value of past medical services rendered Ms. Amsler that were identified in the report of Marjorie Hackett-Wallace?

A. I think that's another way of saying it, yes.

Q. With respect to the third bullet point, it says that you were specifically asked to "Determine the reasonable value of past medical services rendered to Ms. Amsler that are both included in the report of Marjorie Hackett-Wallace and identified as related to Ms. Amsler's condition by Dr. Wang Ji."

Did I read that correctly?

A. Yes.

Q. Okay. And so is that what is reflected then in your second table, your Table 2 of each report?

A. Yes.

Q. Okay.

A. Sorry. It's not in each report, though. Dr. Ji did not review --

Q. Sorry.

A. Sorry. Let me finish my answer.

Q. Yeah.

A. Dr. Ji did not review the past medical services for all of the 16 plaintiffs. They were reviewed by either Dr. Ji or Dr. Hasan, and the work that I did in each of the 16 reports indicates the clinician that reviewed those past medical bills and whether or not they were related to the condition of the plaintiff.

My analysis of past medical -- my analysis of reasonable value with respect to the review by Dr. Ji or Dr. Hasan is included in Table 2 of each of the reports.

Q. With respect to the first bullet point in your scope of work, for each of the plaintiffs, if the number in your Table 1 and the number in Marjorie Hackett-Wallace's report is the same, then you did not invalidate any of the amounts billed for past medical services; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I would say it differently.

I would say that I looked at the work that Marjorie Hackett-Wallace had done to identify the charges for those past medical services, and I validated that she had done her work for that plaintiff correctly.

We know that doesn't happen, though, for each of the plaintiffs.

BY MS. BUTLER:

Q. Well, so, for example, with respect to Ms. Amsler, if you look at Exhibit 48, Marjorie Hackett-Wallace on her first amended appendix for Karen Amsler identified total charges of 831,690.04, correct?

It's -- it's on the first.

A. Yes, that's correct.

Q. Okay. And if you look in your report for Ms. Amsler, which is Exhibit 43, in your Table 1 you identified billed charges as 830,976.93, correct?

A. Yes, that is correct.

Q. So is it accurate to state that you

validated $830,976.93 of the charges that Marjorie Hackett-Wallace had identified in her report?

MR. ANTONUCCI: Objection.

THE WITNESS:

(Reviews document.)

To some extent, yes, but to some extent, no.

What I did was I went through and for each and every past medical bill that was identified by Marjorie Hackett-Wallace, I identified the charges that were included on the billing document. Then I considered whether that was -- with that matched what Marjorie Hackett-Wallace had.

And so there were some of the bills, for instance, the bill for -- the bill for Sound Physicians, Marjorie Hackett-Wallace indicates that it has charges of $15,543.01 and I identified that it has charges of $14,801.91.

So I don't know if you would consider that Marjorie Hackett-Wallace's entire number was wrong and it should

have just been 14,801.91 or whether I validated $14,801 of what she had previously shown.

BY MS. BUTLER:

Q. Well, you state, don't you, that you reviewed and validated amounts; isn't that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I did and I did so, which is you see the CVS number of $19,063.02 matches all but 10 cents of due Marjorie Hackett-Wallace.

BY MS. BUTLER:

Q. So wait. Let me ask you --

A. Then 6,000 -- sorry. I'm still answering.

Q. -- real quickly on that.

A. I'm still answering.

Q. On that, yeah.

A. I'm still answering.

Q. Okay.

A. The $6,627.63 on the CVS bill is also one that I looked at and validated, and the Georgia Eye Institute of $840 is one that I looked

at and agreed with what Marjorie Hackett-Wallace had identified.

I could continue on for the other providers as well.

Q. That's what I was trying to circumvent to ask.

So if, if, on Table 1 of a plaintiff's report your billed charge is different than what is in Marjorie Hackett-Wallace's original report and appendices, then you validated the amount indicated in your Table 1, correct?

A. Correct.

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Okay. So, for example, as noted with that CVS charge, you validated $19,063.02 in charges, correct?

A. I found that the past medical bills that Marjorie Hackett-Wallace has included within her analyses had charges of $19,063.02.

Q. And similarly, in your Table 1, for all of the billed charges in that column including the total, those are the amounts that you validated, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Those are the amounts that I went to the past medical bills and identified that those -- those are the amounts that were included within the past medical bills that Marjorie Hackett-Wallace has included within her analyses.

BY MS. BUTLER:

Q. Well, if you won't agree with me that you validated those amounts, then what did you validate in this first bullet point?

MR. ANTONUCCI: Objection.

THE WITNESS: I did validate those amounts.

BY MS. BUTLER:

Q. Okay. That's all I was asking. Thank you.

Now, with respect to the amounts, again, on that Table 1 -- and we're in Ms. Amsler's report and the total -- am I correct that as to those amounts in your table, you are not disputing that the plaintiff incurred those expenses, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I do not have an opinion on whether the plaintiff incurred those expenses, made any payment with respect to those expenses.

I have relied upon Marjorie Hackett-Wallace to identify what are the at-issue past medical bills.

BY MS. BUTLER:

Q. And you reviewed the past medical bills that were identified by Marjorie Hackett-Wallace, correct?

A. That is correct.

Q. And so you validated that those expenses identified on your Table 1 were, in fact, billed to the plaintiff, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I identified that those services included the plaintiff's information. I don't know if they were actually billed and sent to the plaintiff.

BY MS. BUTLER:

Q. Do you have any reason to believe

they weren't?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't have any information on that.

BY MS. BUTLER:

Q. If this total number on your Table 1 for Ms. Amsler, the 830,976.93, were determined to be inaccurate, is it correct that that would not invalidate your methodology, though?

MR. ANTONUCCI: Objection.

THE WITNESS: No, it would not invalidate the methodology.

The methodology, as is described in this report and in all 16 of my reports, is a methodology that is applied to whatever the services are that are being analyzed, and so whether one includes additional services or excludes services that are here included within Table 1, the methodology would still stand.

It's just that the bills that would be analyzed would be greater in number or less in number.

BY MS. BUTLER:

Q. Now, with respect to Ms. Amsler, your Table 1 and your Table 2 are exactly the same; is that correct?

A. Yes, that is correct.

Q. And why are those numbers the same?

A. As is described in the report, the numbers in Table 2 relate to those past medical services that were identified by Ms. Hackett-Wallace and also determined by Dr. Ji to be related to Ms. Amsler's condition.

Q. And there were occasions where those were the same, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm sorry. I don't understand the question.

BY MS. BUTLER:

Q. There were occasions where Dr. Ji or Dr. Hasan's analysis aligned with Marjorie Hackett-Wallace's analysis, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know how their analyses aligned.

What I know that at the end

of -- the outcome of them was that they -- Dr. Ji and Dr. Hasan identified that all of the past medical services that Marjorie Hackett-Wallace had identified were considered to be related to the condition.

BY MS. BUTLER:

Q. And in those instances, your Table 1 and Table 2 were the same, correct?

A. I believe so.

Q. With respect to the 16 plaintiffs, was your Scope of Report any different with respect to the three bullet points identified in Ms. Amsler's report?

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Other than Dr. Hasan being switched for Dr. Ji with respect to certain plaintiffs?

MR. ANTONUCCI: Same objection.

THE WITNESS: The scope of work for all 16 plaintiffs was the same. With the caveat that the work was focused on an individual plaintiff and that I was

relying upon information that either Dr. Ji or Dr. Hasan provided.

BY MS. BUTLER:

Q. Turning to the next page of your report, this is titled Section 4 "Measurement of the Reasonable Value of Health Care Services and Products."

Is this section of your report the same for each plaintiff, other than the section, for example, with Ms. Amsler on page 5 where you talk about specific charges to that plaintiff and the locale that those charges were incurred in?

MR. ANTONUCCI: Objection.

THE WITNESS: I think that your question is slightly incorrect.

On page 5 of my report, I am not indicating that these are charges that were incurred by the plaintiff.

What I'm identifying is that these are charges that are the average charges in the area where Ms. Amsler resides for an inpatient stay treating septicemia or severe sepsis without mechanical ventilation for more than 96

hours.
BY MS. BUTLER:
Q. And so with respect to the Section 4 of your reports for all of the 16 plaintiffs, is that the only paragraph that differs?
MR. ANTONUCCI: Objection.
THE WITNESS: That is the only paragraph that has a substantive difference.
BY MS. BUTLER:
Q. What about a nonsubstantive difference?
MR. ANTONUCCI: Objection.
THE WITNESS: There are other paragraphs with differences.
BY MS. BUTLER:
Q. Which ones in paragraph 4? I mean -- sorry -- Section 4?
A. If you see on page 6 of the Amsler report, it says:
"In this matter, Ms. Amsler would be the willing buyer of services" and the plaintiff name would change in each of the 16 reports and so that would be a nonsubstantive change that you

asked about.

Q. So other than that one nonsubstantive change and then the substantive difference in the paragraph we discussed where South Carolina is referenced, is it correct that the Section 4 of your report for each plaintiff is the same?

MR. ANTONUCCI: Objection.

THE WITNESS: I believe so.

BY MS. BUTLER:

Q. Then going to Section 5, which is titled "Methods for Calculation of Reasonable Values for Past Medical Services."

Do you see that?

A. Yes, I do.

Q. Going to Section 5.1, are there any differences in this Section 5.1 between your 16 reports?

MR. ANTONUCCI: Objection.

THE WITNESS:

(Reviews document.)

Yes, there are.

BY MS. BUTLER:

Q. Okay. Where?

And sorry. I'm just talking about 5.1, which is pages 6, 7, and the -- sorry. Just leading up to the first paragraph of page 7.

A. The report that I have, Section 5.1 goes to page 9.

Q. And you're counting all of the subsections like 5.1.1, right?

A. They are inclusive of Section 5.1, yes.

Q. Okay. If you just take 5.1 up through the top of 7 before you get to 5.1.1, are there any differences in the 16 reports?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't believe that there are.

BY MS. BUTLER:

Q. Okay. Staying on page 6, which is the start of 5.1.

A. And I'm sorry. I need to add to that.

Each of the 16 reports contains the methodological section or sections upon which I rely to calculate the reasonable value of past medical expenses, and not each of the sections

that you see in Ms. Amsler's report are going to be included in each of the 16 reports.

And so to the extent that what we're looking at here at 5.1 appears in the other reports, then it would be the same. I don't recollect if this section is in each of the 16 reports.

Q. Thank you for that clarification.

Turning to page 6, 5.1, you indicate in the second sentence:

"To determine this, I identified the Current Procedural Terminology (CPT) code on each claim within a medical bill."

Do you see that?

A. Yes, I do.

Q. Now, you previously mentioned HCPC codes.

Where are HCPC codes mentioned in this section?

MR. ANTONUCCI: Objection.

THE WITNESS: They are not because CPT codes are related to physician services.

BY MS. BUTLER:

Q. Was there any other part of the HCPC code that you relied on with respect to your reports, other than the part that included the CPT code?

MR. ANTONUCCI: Objection.

THE WITNESS: I believe that there were home health services in one of the plaintiff's past medical bills and I believe that they would have been -- I recollect they may have billed using a HCPC.

Additionally, some of the outpatient hospital services may have -- may have used the HCPCs.

BY MS. BUTLER:

Q. Going to your second paragraph on page 6 under Section 5.1, the second sentence says:

"As is detailed further below, market rates are calculated by applying a two-step process."

When you've referred to "market rates," are you talking about -- what are you referring to there?

A. The willing buyer/willing seller or the reasonable value. All of those are synonymous.

Q. And then you say:

Number "(1) first, I identify what costs a physician or other ancillary clinician would incur when rendering the specific service defined by the CPT code."

Do you see that?

A. Yes, I do.

Q. And is that based on the year the service was received?

MR. ANTONUCCI: Objection.

THE WITNESS: That is based on the date of service that is on the past medical bill, as well as the geographic location of the provider.

BY MS. BUTLER:

Q. And then you state second:

"Then I apply an adjustment factor to the costs to account for the market rate."

Do you see that?

A. Yes, I do.

Q. And, again, is that adjustment

factor based on the date of service?

MR. ANTONUCCI: Objection.

THE WITNESS: That adjustment factor is based on data from the RAND study. The costs in the first step are what is based on the date of service.

BY MS. BUTLER:

Q. Okay.

MR. ANTONUCCI: We're at an hour time.

BY MS. BUTLER:

Q. Okay. You want to take a five-minute break?

A. Probably, yeah.

MR. ANTONUCCI: 10?

MS. BUTLER: I'm -- okay.

THE VIDEOGRAPHER: The time is 2:49. We're now off the record.

(A recess was taken.)

THE VIDEOGRAPHER: This is the beginning of media unit number 5 of the video-recorded deposition of Mr. Gregory Russo. The time is 2:59 PM Eastern. We are now back on the record.

Counsel, you may proceed.

MS. BUTLER: Thank you.

BY MS. BUTLER:

Q. Mr. Russo, before we took a break, we were looking at the report that is marked as Exhibit 43, which is your report for Ms. Amsler.

Do you recall that?

A. Yes, I do.

Q. Okay. And I think we had made it through to Section 5.1 and I was moving to page 7 at the top.

Do you see in the sentence that says:

"In this process, I am not rendering an opinion on the CPT code that should have been included on a claim."

Do you see that?

A. Yes, I do.

Q. And is that statement accurate for all of your 16 reports?

A. Yes, it is.

Q. Okay. And then there's another sentence at the end that says:

"If a physician's or other ancillary

clinician's claim does not have a CPT code, then I did not determine a reasonable value for the service. Instead, I accepted the billed charges as the reasonable value for the service."

Do you see that?

A. Yes, I do.

Q. I believe we've confirmed this before, but is that true for all 16 of the reports?

A. Yes, it is.

Q. Okay. Then we go to Section 5.1.1, correct?

A. Yes.

Q. Okay. And this is your Step 1 how you determined the costs through the CPT codes for Ms. Amsler's claims; is that correct?

A. That is correct. I use this methodology to determine the cost both for Ms. Amsler's physician claims as well as the physician claims that are included in any of the other 15 plaintiffs.

Q. Thank you. That's what I was going to ask.

Is your methodology for determining

the cost the same in each of your 16 reports?

A. The methodology is the same. The specific elements of the calculation differ because there are geographic adjustment factors which depend on where the provider is located. There are relative value units that relate to whatever the specific service is. There -- there may be date of service differences.

So those are differences between each of the calculations, but the methodological approach is the same.

Q. And at the end of that section before you get to 5.1.2, you state:

"Completing these sub-steps allows me to identify the cost incurred by a physician or other ancillary clinician for delivering the services, as defined by CPT codes analyzed by Ms. Hackett-Wallace."

Is that correct? Did I read that correctly?

A. Yes.

Q. Okay. And that applies to each of the 16 reports, correct?

A. It applies to each of the 16 reports

to the extent that the 16 reports each contain physician services in them.

As I indicated, my Section 5 of my report is the methods for calculating the reasonable value of past medical services, and these methodologies that are included therein are specific to that plaintiff.

And so if a plaintiff didn't have physician services, then this section wouldn't be included. To the extent that they had physician services, this section would be included and the methodology would be the same as what's described in Ms. Amsler's report.

Q. Okay. Going to Section 5.1.2, this is titled "Step 2: Adjusting Costs to Market Rates."

Do you see that?

A. Yes, I do.

Q. And, again, are market rates the reasonable value?

A. Yes.

Q. Okay. And you -- this is where there is a reference right at the end of the first paragraph as it is contained on page 8 to RAND

Corporation.

Do you see that?

A. Yes.

Q. And a RAND Report?

A. Yes.

Q. Okay. Are there other sources that you could have used there instead of the RAND Report?

MR. ANTONUCCI: Objection.

THE WITNESS: There may have been. However, the RAND Report is the most comprehensive and most up-to-date data set. It is used by researchers throughout the federal government.

I've seen articles that are published by the American Journal of Medicine. I've seen individuals at Harvard Medical School that have referenced it. So it is well-regarded in the industry as the gold standard.

BY MS. BUTLER:

Q. You then state:

"The RAND Report indicates that, on average, private sector professional fees in South

Carolina are paid" out -- and then you identify a rate.

Did you include South Carolina there because that is the location of Ms. Amsler?

A. No. I included South Carolina because that is the location of some of the providers that rendered services.

As the sentence continues, I also provide that same statistic for Georgia because some of the providers are located in Georgia.

And the methodology that I apply and the appropriate methodology to apply in the healthcare marketplace is to identify a reasonable value for services based on the provider's location, not on the plaintiff's residence.

Q. Then the last sentence of that section underneath your, I guess, visual is:

"The result is the value for which services in the healthcare marketplace would be paid by a willing buyer and accepted by a willing seller."

Is that correct?

A. That is correct.

Q. And is that the result that you are

obtaining for each of the 16 plaintiffs in that section of your report?

A. To the extent that this section is included in each of the 16 plaintiffs, then, yes.

Q. And is the result that you are obtaining a value as of the time that the service was rendered?

A. It is a value as of the date of service that is -- that is present on the medical bill.

Q. Going to Section 5.2, this is titled "Methods Used to Calculate the Reasonable Value of Laboratory Services."

Did I read that correctly?

A. Yes, you did.

Q. And at the end of that paragraph you state:

"Therefore, the reasonable values of laboratory services are calculated at 100 percent of market rates."

Do you see that?

A. Yes, I do.

Q. And is that the same in all of your 16 reports?

A. To the extent that laboratory services are included in all 16 reports, then, yes, it would be the same.

Q. Okay. And the next section is 5.3 "Methods Used to Calculate the Reasonable Value of Medications"; is that correct?

A. Yes.

Q. And we've already gone through and discussed that you utilized GoodRx; is that correct?

A. It is correct that I used GoodRx and it is also correct that we discussed it.

Q. Okay. And do GoodRx rates fluctuate?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, they would fluctuate over time as well as by geography.

BY MS. BUTLER:

Q. Can they fluctuate, say, within the same month?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know the answer to that.

BY MS. BUTLER:

Q. For example, if I go to a pharmacy and I have a prescription, isn't it true that that rate could fluctuate from that time until the time I go to pick it up, say, three months later?

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. That those rates could be different?

A. What rates?

Q. The GoodRx. The amount that GoodRx -- that I can get that prescription drug for through GoodRx.

MR. ANTONUCCI: Objection.

THE WITNESS: You don't get the prescription drugs through GoodRx. GoodRx is not a pharmacy.

BY MS. BUTLER:

Q. Okay. If I go to CVS and I use GoodRx and I obtain it from CVS utilizing GoodRx, isn't it true that those rates can fluctuate even within the same month?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't know if they can fluctuate within the same month.

BY MS. BUTLER:

Q. Have you ever used GoodRx?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. BUTLER:

Q. Going to the next section of your report, it's titled 5.4 "Methods Used to Calculate the Reasonable Value of Physician Administered Drugs."

Do you see that?

A. Yes, I do.

Q. To the extent this section is included in the 16 reports, is the section the same?

A. Yes, it is.

Q. Okay. Going to 5.5, this is titled "Methods Used to Calculate the Reasonable Value of Inpatient Hospital Services in Medical Bills."

Do you see that?

A. Yes, I do.

Q. Okay. And to the extent that applies to the 16 plaintiffs, is that section the same?

A. The methodological approach is the

same. As is noted in Section 5.5 on page 11, there are specific percentages that relate to the Plaintiff Amsler, and so those percentages would differ for the 16 plaintiffs to the extent inpatient services are included.

Q. But the same method -- the same methodology is applied; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, the same methodology is applied.

BY MS. BUTLER:

Q. And that pertains to Section 5.5.1 and 5.5.2; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, it does. As you see, 5.5.2 is a reference back to Section 5.1.

BY MS. BUTLER:

Q. And that's the same in all 16 reports, correct?

A. What's the same in all 16 reports?

Q. That if that 5.5.2 section is included, that it refers back to Section 5.1?

A. I don't know that it always refers

back to Section 5.1. It would always refer back to the methodology section for physicians, but I don't know that that's always Section 5.1.

Q. And turning to 5.6, which is inclusive of my question of 5.6.1 and 5.6.2, are those sections the same for each of the 16 plaintiffs with application to the place that the service was rendered?

MR. ANTONUCCI: Objection.

THE WITNESS: The methodology is the same across the 16 patients to the extent that outpatient hospital services are included for that plaintiff, but the specific percentages differ based on where the plaintiff received services.

BY MS. BUTLER:

Q. And also for 5.7, which is titled "Methods Used to Calculate the Reasonable Value of Home Health Services" -- I think you may have referred to this previously -- but did you refer to specific national base payment rates with respect to the state of residence for that plaintiff?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I believe that I did, but I believe the Plaintiff Amsler is the only patient that has home health services.

BY MS. BUTLER:

Q. Okay. Now, turning to Section 6, which is titled "Reasonable Value For Past Medical Services Identified By Ms. Hackett-Wallace."

Do you see that?

A. Yes, I do.

Q. The first sentence says:

"I reviewed bills from all 14 providers identified by Ms. Hackett-Wallace in Ms. Amsler's damage assessment form."

Do you see that?

A. Yes, I do.

Q. Okay. And I believe we already clarified that there are actually no bills identified by Ms. Hackett-Wallace in the damage assessment form. I think you are referring to the fact that the damage assessment forms refer to Ms. Hackett-Wallace's report.

Is that -- have I stated that accurately?

MR. ANTONUCCI: Objection.
THE WITNESS: Yes, I believe you have.
BY MS. BUTLER:
Q. Okay. So there's not really any information you actually got from the damage assessment form for your reports, correct?
MR. ANTONUCCI: Objection.
BY MS. BUTLER:
Q. Other than the reference to Ms. Wallace's reports?
MR. ANTONUCCI: Same objection.
THE WITNESS: The information from the damage assessment form was that I -- well, I should look at Ms. Hackett Wallace's reports -- I'm sorry -- Ms. Hackett-Wallace's report. She only submitted one report whereas I submitted 16.
BY MS. BUTLER:
Q. And then we go down in that paragraph and you say:
"I have relied on the 1st Amended

Appendix for Karen Amsler produced with Ms. Hackett-Wallace's report to identify providers and allegedly related medical services, but I have conducted my own analysis to determine billed charges and corresponding reasonable values for identified services."

Did I read that correctly?

A. I believe you did.

Q. I believe we've already covered this through the questions we've asked today, but is there anything more to that sentence than what we have already gone through when we went through the bullet points in the scope of your report?

MR. ANTONUCCI: Objection.

THE WITNESS: I believe that we've covered it.

BY MS. BUTLER:

Q. And then I believe we've covered this as well, but Table 1 generally reflects the reasonable values for the past medical services provided to Ms. Amsler as reflected in the charges that you validated from Marjorie Hackett-Wallace's report; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm sorry. I need that one again.

BY MS. BUTLER:

Q. Okay. Table -- what does Table 1 -- well, let me back up. Let me rephrase this.

It's my understanding based on the testimony we've already gone through that Table 1 reflects the billed charges that you validated from Marjorie Hackett-Wallace's report and then your reasonable value calculations for those charges; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Table 1 contains the billed charges from the medical bills. In some cases, those match what was in Marjorie Hackett-Wallace's reports.

As we've noted, though, there were errors in what she did and so the billed charges are from the medical bills.

And then I've calculated the reasonable value of the services that are

identified on those medical bills.
BY MS. BUTLER:
Q. And as we've previously looked at and we can look at again because we have Ms. Amsler's first amended -- let me see what -- first amended appendix for Karen Amsler that if the billed charge in your Table 1 is the same as identified in Marjorie Hackett-Wallace's appendix, then you validated her amounts?
MR. ANTONUCCI: Objection.
BY MS. BUTLER:
Q. Is that correct?
MR. ANTONUCCI: Same objection.
THE WITNESS: By "her" are you referencing Ms. Amsler or Ms. --
BY MS. BUTLER:
Q. No. Marjorie Hackett-Wallace.
MR. ANTONUCCI: Objection.
THE WITNESS: Sorry. I said Ms. Amsler and you shook your head yes. So.
BY MS. BUTLER:
Q. I'm referring to -- okay. I want to

make sure we're very clear about this.

The billed charges indicated on Table 1 for each of the plaintiff's report.

A. Yes.

Q. Are you with me?

A. Yes, I see this.

Q. Do those represent the charges identified in Marjorie Hackett-Wallace's report that you validated?

MR. ANTONUCCI: Objection.

THE WITNESS: In some cases, yes, but not always because there are instances where I found that Marjorie Hackett-Wallace had made an error and so I have gone to the source data, the medical record or -- sorry -- the past medical bills to identify what the charges are for each of the bills that Marjorie Hackett-Wallace included within her reports.

And in some cases, I arrive at the same amount of charges that Marjorie Hackett-Wallace had identified. In other cases, I did not.

BY MS. BUTLER:

Q. And so, for example, we looked at this previously, but with respect to the CVS charge, there was a difference in Marjorie Hackett-Wallace's Exhibit -- this is Exhibit 48 -- amount of she had $19,036.12 and you have $19,063.02; is that correct?

A. That's correct. Yes.

Q. And so in that instance where your billed charge amount is different than what Ms. Hackett-Wallace had on her original appendices, the amount in Table 1 is the amount you validated, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: The amount in Table 1 is what I went to the medical bills that Marjorie Hackett-Wallace has identified are at issue and determined what the charges were. So I validated those -- those charges.

BY MS. BUTLER:

Q. Okay. So if your number is different, as it is here in the CVS example, your number is what you validated, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes.

BY MS. BUTLER:

Q. Okay.

A. What I have included in Table 1 is what I have done based on my review of the past medical bills, and to the extent it is different than what Marjorie Hackett-Wallace has, then it is my opinion that she was wrong.

Q. Okay. And so, for example, in the CVS example, your number is actually larger than Ms. Hackett-Wallace's number, correct?

A. My billed charges are higher than what Ms. Hackett-Wallace had identified.

Q. And there is a less than 30 cents discrepancy, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: No.

BY MS. BUTLER:

Q. What is the discrepancy then?

A. Let's be clear. You said 30 cents.

Q. Oh, sorry. $30. I'm sorry. I apologize.

It's less than $30 discrepancy,

correct?

A. That's correct.

Q. Okay. And so for each of your Table 1s in each of the 16 reports, the amounts in the Billed Charges column are the amounts that you do not dispute are represented by the medical bills that you relied on in this case, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I don't think I understand your question.

BY MS. BUTLER:

Q. For all of your Table 1s in your 16 plaintiff's reports, there is a column called "Billed Charges," correct?

A. Yes, there is.

Q. Okay. And the amounts that you have put in those Billed Charges columns are the amounts that you don't dispute for purposes of this litigation, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Those amounts are included on the medical bills that Marjorie Hackett-Wallace has identified as being at issue.

I have no opinion on whether those bills are or are not at issue.

BY MS. BUTLER:

Q. And those are the amounts from which you calculated your reasonable values that are in the column next door, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: No. So --

BY MS. BUTLER:

Q. Table -- can I just ask you my question because you're not answering my questions.

If you look at Table 1, CVS billed charge 19,063.02, is that not the number that you used to calculate the reasonable value of 18,763.81?

MR. ANTONUCCI: Objection.

THE WITNESS: It's not.

As I -- as we walked through with the methodology section, the methodology is based on the services that are rendered. So on the CPT codes and other service revenue codes. It's not based on the number of billed charges.

BY MS. BUTLER:

Q. Okay.

A. Which is what you indicated in your question.

Q. Is this billed charge number the number that you plugged into your calculation to get your reasonable value?

MR. ANTONUCCI: Objection.

THE WITNESS: No. It was part of the calculation, but the calculation is based on the services and supplies that were rendered.

As we went through in the methodology section, the methodologies are based on the CPT codes and the revenue codes that are included on the bills.

BY MS. BUTLER:

Q. So are you saying this billed charge has nothing to do with your calculation of reasonable value?

MR. ANTONUCCI: Objection.

THE WITNESS: To the extent that I don't calculate a reasonable

value, I accept charges. But to the extent that I do calculate a reasonable value, that reasonable value is based on the services and supplies that are rendered, not based on what the charges are.

As my report indicates on -- in Section 4, it's inappropriate to use charges as a basis for reasonable value.

BY MS. BUTLER:

Q. Okay. So what is the point of putting the billed charges next to the reasonable value in Table 1?

MR. ANTONUCCI: Objection.

THE WITNESS: The point of including it is that Marjorie Hackett-Wallace in her analysis in her report includes charges, and so it is, I think, a helpful thing for the trier of fact to understand the charges that I have included within my analyses.

BY MS. BUTLER:

Q. And included in your analyses, as we've looked at Exhibit -- got to find it -- this

is the big long table that was your appendix. Exhibit 3.

Did we not go through and identify that the charges in the Charges column came from your review of the same charges that constitute that number?

MR. ANTONUCCI: Objection.

THE WITNESS: I'm sorry. I don't understand your question.

BY MS. BUTLER:

Q. What are these charges on Exhibit 3 in the Charges column?

MR. ANTONUCCI: Objection.

THE WITNESS: Those are charges that are present on the past medical bills for the Plaintiff Amsler.

BY MS. BUTLER:

Q. Okay. And so, for example, if this is the Atlantic Radiology Associates and you look at your Table 1 for Ms. Amsler, you have Atlantic Radiology Associates, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I do.

BY MS. BUTLER:

Q. And the numbers, the total matches $1,578.52, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, it does.

BY MS. BUTLER:

Q. And so then you look on Exhibit 3 and you broke down that total, which appears on your Table 1, correct?

A. Yes, it does.

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. So are you telling me that none of this Charges column had anything to do with your reasonable value analysis?

MR. ANTONUCCI: Objection. Asked and answered.

THE WITNESS: I think that you're misunderstanding the methodology.

So the reasonable value that's calculated, for instance, let's take row 9, which is CPT code 62328.

BY MS. BUTLER:

Q. Uh-huh.

A. That methodology is based on the CPT

code of 62328.

Q. Okay.

A. And that's why you see the reasonable value is $427.30.

It is not based -- the reasonable value is not based on what the charges were for that service. The reasonable value is based on what was the service.

The healthcare marketplace is regulated in such a way that providers can charge whatever they want. There's -- there's no requirement on what they charge, and so it would be inappropriate to use the charges as the measure of reasonable value.

Q. Except --

A. And so I have -- so I have relied on the CPT code to derive the reasonable value.

In this case for 62328, the charges were $315.28 and the reasonable value was $427.30. I then identify that when the reasonable value is greater than the charges, I accept the charges, and so here I have accepted the charges of $315.28.

That does not mean that -- that

reasonable -- reasonable value of $427.30 was calculated based off the charges.

Q. I understand. I think we were speaking beyond one another.

So the charges can have an impact on your analysis because of the Lesser of RV and Charges column, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: The charges does have an impact when the charges are less than the reasonable value, then I accept the charges.

BY MS. BUTLER:

Q. And is that -- so, for example, here with respect to Atlantic Radiology, how is that taken into consideration in your reasonable value of 1,079 is that the column Lesser of RV and Charges, which is appearing on Exhibit 3?

A. Yes, that is $1,079.78.

Q. And so it's a combination of whether you determine to take the lesser value or the reasonable value; is that correct?

A. That is correct. Yes.

Q. Okay.

A. You see that for most of the items on Exhibit 3, the reasonable value is higher than the charges, but there is one CPT code --

Q. And that's the one reflected --

A. -- for which --

Q. Sorry.

A. Sorry.

There's one CPT code for which that is not the case, which is 93971 with a 26 modifier and an LT modifier, for which the reasonable value is $38.54, yet the charges were $264.

Q. Going back to Table 1 just to be clear, the Billed Charges column, are those charges that appear to Marjorie Hackett-Wallace's report that you validated, correct?

MR. ANTONUCCI: Objection. Asked and answered.

MS. BUTLER: I'm just trying to make sure because we're getting --

MR. ANTONUCCI: Do you need to take a break, Jenna?

MS. BUTLER: No. I just want to make sure that I'm understanding correctly.

BY MS. BUTLER:

Q. That you took Marjorie Hackett-Wallace's report and she identified certain billing records that she relied on, correct?

MR. ANTONUCCI: Objection. Are you listening to the witness, Jenna?

MS. BUTLER: Yes.

MR. ANTONUCCI: Okay. All right.

MS. BUTLER: But he's not answering my questions directly and --

MR. ANTONUCCI: He's answered your questions every single time.

MS. BUTLER: -- I'm trying to make sure I understand.

MR. ANTONUCCI: You are not listening to him.

MS. BUTLER: Okay. I'm going to ask it another way.

BY MS. BUTLER:

Q. Let's go to Table 2. Explain Table 2 to me.

A. Table 2 is a summary of my analysis of the Plaintiff Amsler's past medical services that Marjorie Hackett-Wallace has determined are at issue and that Dr. Ji has also determined are related to Ms. Amsler's condition.

Q. Now, with respect to this table and any of the services that Dr. Ji agreed were related to Ms. Amsler's condition, did you go back and validate those amounts?

MR. ANTONUCCI: Objection. Asked and answered.

THE WITNESS: I validated them from the medical bills.

BY MS. BUTLER:

Q. Okay. And to the extent you validated those medical bills, those charges appear in the Billed Charges column, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I have reported in the Billed Charges column the billed charges that I have collected from the past medical services that Marjorie Hackett-Wallace has indicated are at issue.

BY MS. BUTLER:

Q. And with respect to Table 2, that Mr. Ji -- sorry -- Dr. Ji agreed were related; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: With respect to Table 2, these are the services that Dr. Ji identified were related to Ms. Amsler's condition.

BY MS. BUTLER:

Q. With respect to any discrepancies between your Table 1 and the appendices of Marjorie Hackett-Wallace, did you do anything to validate the amounts, other than review the billing records?

MR. ANTONUCCI: Objection. Seriously?

THE WITNESS: Other than -- so I went to Marjorie Hackett-Wallace's report. I identified that she was wrong and then I went --

BY MS. BUTLER:

Q. I'm asking how.

A. So Marjorie Hackett-Wallace produced

medical records or -- sorry -- medical bills along with her report, and it was clear that she had made some errors in the work that she did, which she admitted to. And the work that I did relied on the medical bills, not on the amounts that were in Marjorie Hackett-Wallace's report.

I did, though, rely on Marjorie Hackett-Wallace's report with respect to what bills were at issue.

Q. You state on the final paragraph of your report for all 16 plaintiffs that all of your opinions are stated with a reasonable degree of professional certainty.

What does that mean to you?

MR. ANTONUCCI: Objection.

THE WITNESS: That means that I am providing opinions that fit with the industry standard approach in my industry.

BY MS. BUTLER:

Q. And what is your industry?

A. Healthcare finance and healthcare marketplace.

Q. The next exhibit is Exhibit 44.

Did I hand that to you already? I believe I did.

It's your Materials Considered List that goes with the report of Karen Amsler.

Do you recognize that?

A. (Reviews document.)

Yes.

Q. Okay. And with respect to this Materials Considered, if you look at the very end, there are Bates ranges.

Do you see those?

A. Yes, I do.

Q. Do you recall what those were?

MR. ANTONUCCI: Objection.

THE WITNESS: These are the past medical bills.

BY MS. BUTLER:

Q. Okay. That you relied on for your analysis as we have discussed, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I believe these are the past medical bills upon which I have relied for the purposes of my analyses. We've looked at Exhibit 3.

Exhibit 3 has Bates numbers that are included within Exhibit 44.

BY MS. BUTLER:

Q. And so when you have talking -- talk -- sorry.

When you have spoken about what you did to validate the medical billings, those are the records that you're referring to that you reviewed; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes. I went to the past medical bills and reviewed those, given the errors that Ms. Hackett-Wallace had.

BY MS. BUTLER:

Q. And with respect to your December 15, 2025 reports, the materials that you used to render the opinions in those reports are all contained within Exhibit 44; is that correct?

A. Yes, I believe they are.

MR. ANTONUCCI: Objection.

BY MS. BUTLER:

Q. Okay. And while we already looked at your supplemental MCL, which was Exhibit 13, I

believe you've already indicated that none of those materials changed the opinions and that all of your opinions are still as set forth in your December 15, 2025 reports; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I believe that's correct.

MS. BUTLER: Okay. We have gone through Ms. Amsler's report in extensive detail, and I have the rest of the plaintiffs' reports and Materials Considered marked.

I am not going to go through all of these in as much detail, but what I would like to do is to understand if your methodology is any different in any of these reports.

And so I am going to read off this initial batch of the reports and I'm going to give them to you, and I want you to take as much time as you need.

But we have Robert Welch's report dated December 15, 2025 as Exhibit 15.

(Document marked for identification as Russo Exhibit 15.)

MS. BUTLER: And your Materials Considered List for Mr. Welch is Exhibit 16.

(Document marked for identification as Russo Exhibit 16.)

MS. BUTLER: And I'll go ahead and hand you that one while I read for the record the rest of them, which is Edward Peterson's report is Exhibit 17.

(Document marked for identification as Russo Exhibit 17.)

MS. BUTLER: And the Materials Considered List is Exhibit 18 for Mr. Peterson.

(Document marked for identification as Russo Exhibit 18.)

MS. BUTLER: The expert report for Richard Sparks is Exhibit 19.

(Document marked for identification as Russo Exhibit 19.)

MS. BUTLER: And the Materials Considered List for Mr. Sparks is

Exhibit 20.

(Document marked for identification as Russo Exhibit 20.)

MS. BUTLER: The expert report for Diane Rothchild is Exhibit 21.

(Document marked for identification as Russo Exhibit 21.)

MS. BUTLER: And the Materials Considered List for Diane Rothchild is Exhibit 22.

(Document marked for identification as Russo Exhibit 22.)

MS. BUTLER: The expert report for David Fancher is Exhibit 23.

(Document marked for identification as Russo Exhibit 23.)

MS. BUTLER: And the Materials Considered List for Mr. Fancher is Exhibit 24.

(Document marked for identification as Russo Exhibit 24.)

MS. BUTLER: The expert report for David Downs is Exhibit 25.

(Document marked for

identification as Russo Exhibit 25.)

MS. BUTLER: And the Materials Considered List for David Downs is Exhibit 26.

(Document marked for identification as Russo Exhibit 26.)

MS. BUTLER: The expert for Allan Howard is Exhibit 27.

(Document marked for identification as Russo Exhibit 27.)

MS. BUTLER: And the Materials Considered List for Mr. Howard is Exhibit 28.

(Document marked for identification as Russo Exhibit 28.)

MS. BUTLER: The expert report for Jacqueline Tukes is Exhibit 29.

(Document marked for identification as Russo Exhibit 29.)

MS. BUTLER: And the Materials Considered List for Ms. Tukes is Exhibit 30.

(Document marked for identification as Russo Exhibit 30.)

MS. BUTLER: The expert report for Ronald Carter is Exhibit 31.

(Document marked for identification as Russo Exhibit 31.)

MS. BUTLER: And the Materials Considered List for Mr. Carter is 32.

(Document marked for identification as Russo Exhibit 32.)

BY MS. BUTLER:

Q. I will give you all of those right now, and my question would be: Is there any difference in methodology to what we have heard and discussed today?

And if you want to go off the record and take some time to review, but I'm guessing you know your reports and it's up to you how much time you want to take to review them.

A. I don't need to go off the record.

Q. Okay.

MR. ANTONUCCI: Sorry. Are you going to be introducing reports for Cagiano --

MS. BUTLER: Yes.

MR. ANTONUCCI: -- Dyer,

Criswell, Keller?

MS. BUTLER: Do you want me to go ahead and do them all? I have them all.

MR. ANTONUCCI: If they're here.

MS. BUTLER: Okay. Where did we -- what's the last one?

MR. ANTONUCCI: Do you intend to do them?

MS. BUTLER: Uh-huh. I have them all.

MR. ANTONUCCI: Okay. Then might as well get it over with.

MS. BUTLER: Yeah. Okay. So --

THE WITNESS: The last exhibit number or the last report.

MR. ANTONUCCI: It was Carter, Exhibit 32.

MS. BUTLER: Okay. Then I have Scott Keller. The expert report for Scott Keller is Exhibit 33.

(Document marked for

identification as Russo Exhibit 33.)

MS. BUTLER: And the Materials Considered List for Mr. Keller is Exhibit 34.

(Document marked for identification as Russo Exhibit 34.)

MS. BUTLER: The expert report for Terry Dyer is 35.

(Document marked for identification as Russo Exhibit 35.)

MS. BUTLER: The Materials Considered List for Ms. Dyer is 36.

(Document marked for identification as Russo Exhibit 36.)

MS. BUTLER: The expert report for Jefferson Criswell is 37.

(Document marked for identification as Russo Exhibit 37.)

MS. BUTLER: And the Materials Considered List is 38.

(Document marked for identification as Russo Exhibit 38.)

MS. BUTLER: The expert report for Mr. Cagiano is 39.

(Document marked for identification as Russo Exhibit 39.)

MS. BUTLER: And the Materials Considered List for Mr. Cagiano is 40.

(Document marked for identification as Russo Exhibit 40.)

MS. BUTLER: The expert report for Mr. Connard, Stephen Connard is Exhibit 41.

(Document marked for identification as Russo Exhibit 41.)

MS. BUTLER: And the Materials Considered List for Mr. Connard is 42.

(Document marked for identification as Russo Exhibit 42.)

MS. BUTLER: And then I believe we have Ms. Amsler, who's 43, and her Materials Considered List was 44.

So then we have Mr. Gleesing. The expert report is Exhibit 45.

(Document marked for identification as Russo Exhibit 45.)

MS. BUTLER: And the Materials Considered List is 46.

(Document marked for identification as Russo Exhibit 46.)

MS. BUTLER: I believe that is all of them.

BY MS. BUTLER:

Q. Here are the rest of them for your purposes.

A. Okay.

Q. So are there any of the reports that we've introduced where the methodology is different than as we have discussed with Ms. Amsler's report?

MR. ANTONUCCI: Objection.

THE WITNESS:

(Reviews document.)

The methodological approach used in all 16 of the reports is the same in that I have relied upon the economic concept of the willing buyer/willing seller.

There are differences in each of the reports. Some of which we have spoken about, which is that there are elements of the methodology that are

specific to the plaintiff and the -- also specific to the provider's location.

Additionally, there are methodologies that we have not discussed because they were not included within Ms. Amsler's past medical bills that have been at issue.

For instance, in Exhibit 17 for the Plaintiff Peterson.

BY MS. BUTLER:

Q. Okay.

A. There are durable medical equipment, past medical supplies. That is a methodology that we previously did not discuss with respect to Ms. Amsler.

The methodological approach is the same as what I have described, which is based on the willing buyer/willing seller concept. However, the methodological approach is specific to durable medical equipment.

Q. And if there are other reports with durable medical equipment, is it the same as what you just discussed with Mr. Peterson?

A. Yes --

MR. ANTONUCCI: Objection.

THE WITNESS: -- it is.

With respect to Exhibit 25 and the Plaintiff Downs, there are past medical services related to anesthesia that has been rendered in an inpatient hospital setting. That is something that we have not discussed with respect to Ms. Amsler.

The methodological approach is the same in that I am using the economic concept of the willing buyer/willing seller. However, the reimbursement for anesthesia services differs in its approach than reimbursing for other physician services, and so my methodology takes into account how the marketplace reimburses anesthesia services and how anesthesia services are paid.

Continuing. Exhibit 29, which is the report for Plaintiff Tukes, also includes anesthesia services, again, which is something we had not previously discussed.

Exhibit 30 for the Plaintiff Carter includes anesthesia services, which we had not previously discussed.

Throughout all of these reports, the methodological approach is still the same and the approach to determining the reasonable value of anesthesia services is consistent throughout all of them.

BY MS. BUTLER:

Q. Can I stop you for a minute?

A. Yeah.

Q. And with respect to all of the reports, are the materials that you considered with respect to your reports fully identified in the Materials Considered List that we've marked as exhibits with respect to each report?

MR. ANTONUCCI: Objection.

THE WITNESS:

(Reviews document.)

Yes, I believe they are.

BY MS. BUTLER:

Q. And keep going. I think you have some other differences you wanted to note.

MR. ANTONUCCI: Objection.

THE WITNESS: With respect to Exhibit 35, Plaintiff Dyer includes an analysis of anesthesia services for which I determined a reasonable value, and we had previously not spoken about anesthesia services.

Plaintiff -- sorry.

Exhibit 39 for Plaintiff Cagiano also includes an analysis of anesthesia services, which we did not previously discuss when we discussed the Plaintiff Amsler.

BY MS. BUTLER:

Q. Is your methodology --

A. And as I -- sorry.

As I sit here today after reviewing these 15 reports, those are the differences that I have identified.

Q. And these anesthesia fees, for example, in Ms. Dyer's report it's under Section 5.6.3, is your methodology the same for each of the plaintiffs who has the anesthesia analysis?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, my analysis of anesthesia services is a consistent methodology for any of the plaintiffs for which I'm analyzing anesthesia services.

BY MS. BUTLER:

Q. So for each of the 16 plaintiffs' reports, is it correct that you identified which categories are applicable and then applied the same methodology to the applicable categories?

MR. ANTONUCCI: Objection.

THE WITNESS: Marjorie Hackett-Wallace identified the services as being at issue, and I analyzed those at-issue services.

BY MS. BUTLER:

Q. And to the extent a plaintiff had that service at issue, your methodology for the plaintiffs was the same; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: I applied the same methodological approach for each plaintiff that had a past medical service within one of the categories of medical

services.

BY MS. BUTLER:

Q. And with respect to your expert reports, we have reviewed now all 16 reports, not in detail, but I'm offering you the opportunity if you want to; and the Materials Considered List that was produced with respect to that report, which we also have entered into evidence; and the Supplemental Materials Considered List, which we looked at, which was produced February 20, 2026.

Are all of the opinions and methodologies with respect to your opinions contained within your December 15, 2025 expert reports?

MR. ANTONUCCI: Objection.

THE WITNESS: They are either contained in the December 15, 2025 report or as we've spoken about here today.

MS. BUTLER: Okay. If we could take five minutes?

MR. ANTONUCCI: Sure.

MS. BUTLER: Thank you.

THE VIDEOGRAPHER: The time is 3:51. We're now off the record.

(A recess was taken.)

THE VIDEOGRAPHER: This is the beginning of media unit number 6 of the video-recorded deposition of Mr. Gregory Russo. The time is 4:00 PM Eastern. We are now back on the record.

Counsel, you may proceed.

MS. BUTLER: Thank you.

BY MS. BUTLER:

Q. Mr. Russo, I only have a couple additional questions. You can pick any of your expert reports. Just tell me which one you're looking at, and I have a question for you.

A. Exhibit 21.

Q. Okay.

A. For Plaintiff Rothchild.

Q. Okay. 21 for Rothchild.

If you could go to the scope of your report?

A. Yes.

Q. The scope of your report in each of the 16 reports has three bullet points.

We've gone through that, correct?

A. Yes.

Q. And the first bullet point involves reviewing and validating the amounts billed for past medical services claimed by the plaintiff in the report of the plaintiffs' expert Marjorie Hackett-Wallace, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, it indicates that I review and validate the amounts billed.

BY MS. BUTLER:

Q. Now, you have testified that the column in your table with respect to billed charges has nothing to do with the reasonable value calculation, correct?

MR. ANTONUCCI: Objection.

THE WITNESS: The reasonable value is determined based on the services that are rendered.

The reasonable values that appear in Table 1 may include the billed charges when my calculated reasonable value that would appear in Appendix C is greater than the billed charges.

Or I have been unable to

calculate a reasonable value for the service because I didn't have enough information, like I didn't have the CPT code.

BY MS. BUTLER:

Q. What was the purpose in this bullet point 1 of validating the amounts billed for past medical services for purposes of your opinions in this litigation?

MR. ANTONUCCI: Objection.

THE WITNESS: So the purpose was that in the opinion -- sorry -- in Table 1 where I was unable to identify a reasonable value or my reasonable value was greater than charges, I would accept charges.

And so I needed to ensure that the charges that Marjorie Hackett-Wallace had included were the charges that were on the bills, and what I found is that she was -- she was wrong at times.

BY MS. BUTLER:

Q. And your work with respect to that review and validation bullet point is set forth in

your Appendices C to each of your reports; is that correct?

MR. ANTONUCCI: Objection.

THE WITNESS: Yes, I believe that it is.

MS. BUTLER: I have no further questions for you. Thank you.

MR. ANTONUCCI: Okay. Quick redirect.

EXAMINATION

BY MR. ANTONUCCI:

Q. Mr. Russo, thank you for your time today.

Do you have any opinion as to whether the billed charges identified in your reports were ever played -- paid by the plaintiffs?

A. No, I don't have an opinion as to whether the billed charges were paid.

Q. Do you have any opinion as to whether the billed charges identified in your reports were ever actually incurred by any plaintiff in this litigation?

A. No, I don't have an opinion on that.

MR. ANTONUCCI: Okay. That's it for me.

MS. BUTLER: I have no follow-up. Thank you for your time.

THE WITNESS: Thank you.

THE VIDEOGRAPHER: Will there be a read and sign? The witness.

MR. ANTONUCCI: We would like to read and sign, yes.

THE VIDEOGRAPHER: Okay. If there are no more questions, this will conclude today's video-recorded deposition testimony as given to us by Mr. Gregory Russo. The time is 4:04 PM Eastern and we are now off the record.

(Signature not waived, the deposition concluded at 4:04 PM.)

GREGORY S. RUSSO

CERTIFICATE OF REPORTER

DISTRICT OF COLUMBIA)

I, Denise Dobner Vickery, a Registered Court Reporter and Notary Public of the District of Columbia, do hereby certify that the witness was first duly sworn by me.

I do further certify that the foregoing is a verbatim transcript of the testimony as taken stenographically by me at the time, place and on the date herein set forth, to the best of my ability.

I do further certify that I am neither a relative nor employee nor counsel of any of the parties to this action, and that I am neither a relative nor employee of such counsel, and that I am not financially interested in the outcome of this action.

Denise D. Vickery

DENISE DOBNER VICKERY, CRR,RMR
Notary Public in and for the

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

THE VIDEOGRAPHER: We are now on the record. My name is Julie Robinson. I'm a videographer for Golkow Litigation Services. Today's date is February 25, 2026, and the time is 9:00 a.m. Eastern Time.

This remote video deposition is being held in the matter of Camp Lejuene Water Litigation. The witness is Heidi Schwarz, MD, FAAN.

All parties to this deposition are appearing remotely and have agreed to the witness being sworn in remotely. Due to the nature of remote reporting, please pause briefly before speaking to ensure all parties are heard completely.

Will counsel please identify themselves and state whom they represent, after which the court reporter, Robin Clark, will swear

in the witness.

MS. LaMACCHIA: Leslie LaMacchia, Bell Legal Group for the PLG.

MR. TELAN: Pat Telan, also from Bell Legal Group for PLG.

MS. HURT: Cindy Hurt for the United States.

MS. PLATT: Elizabeth Platt for the United States.

MR. GIBBONS: Hanley Gibbons for the United States.

MR. TURNER: Joseph Turner for the United States.

- - - - -

HEIDI SCHWARZ, MD, FAAN, having been duly sworn, was examined and testified as follows:

- - - - -

BY MS. HURT:

Q. Good morning, Dr. Schwarz.

A. Good morning.

Q. We're going to go through

this whole spiel again like we did the last time where I go through and explain what's going to happen today and then I'll start asking some questions.

So can you please state your full name for the record?

A. Heidi B. Schwarz. That's my full name.

Q. And what is your current address?

A. Are you referring to where I'm sitting now or my home address or --

Q. Where you reside?

A. Where I reside, I reside at 20 Ellen Polimeni Boulevard, Apartment 431, in Canandaigua, New York.

Q. And you just took an oath and you understand you're obligated to tell the truth, correct?

A. I do.

Q. A court reporter is taking down everything we say, just like last time, it's important that you answer every question verbally. For example, you must

say "yes" or "no" rather than nodding or shaking your head. Do you understand?

A. I understand.

Q. Please talk at a reasonable pace like the pace we are speaking now so the reporter can record everything.

We should also try not to interrupt one another, otherwise, the reporter will not be able to record us accurately. Please wait until I have finished my question before you start to answer and I will not interrupt you while you are speaking. Because we are doing this over video conference, there will be some lag, but let's give the best that we can to make sure that we can wait for each other to begin speaking.

Once the deposition is complete, you'll be given an opportunity to read a transcript of your testimony to make any corrections. You will then be asked to sign it.

I ask that if you don't have any -- I'm sorry, I ask if you do not

understand a question, please let me know and I will try to clarify. If you do not ask for clarification, I will assume that you understood the question; is that fair?

A. That is fair.

Q. Okay. During the deposition, you may hear other attorneys say, "objection." Unless your attorney instructs you not to answer the question, please answer the question after the objection has been made. Is there any reason why you are unable to give your most truthful and accurate testimony today?

A. No.

Q. Is there any reason your memory might be impaired today?

A. No.

Q. Are you currently taking any medication that might impair you?

A. No.

Q. Of course, you can ask for breaks at any time, please just let me finish my question -- please just answer the question before we take a break.

So similar to last time, I want to start off, because -- I want to start off with abbreviations because we're dealing with some chemicals of concern. I don't think that most of these will come up in today's deposition, but I just want to make sure, like, if I use one of these terms, we're on the same page by using an abbreviation.

So for trichloroethylene, that's TCE, correct?

A. Correct.

Q. And tetrachloroethylene, that's TCE or PERC, correct?

A. Correct.

Q. And Parkinson's disease is -- can be abbreviated as PD, correct?

A. Correct.

Q. Do you have any materials in front of you today?

A. I have the letter that I sent and I have the medical record that, I believe, is in question today.

Q. Do you have the Bates number

of that medical record?
A. I do not.
Q. Okay. I'm going to ask for you to send that document to your counsel so that they can send it to me.
A. I'll do that.
Q. We can take a break while we -- while we do that. It is something you have electronic, right?
A. Correct. Okay. I'm just doing that right now. And what you would like sent is the medical record and the letter or just the medical record?
Q. It's okay if you have your letter, just the medical record. I want to make sure we're talking about the same document.
A. Gotcha.
Q. And you will -- I'm sorry?
THE VIDEOGRAPHER: Do you want to go off the record?
MS. HURT: Yes, please.
THE VIDEOGRAPHER: Off the record. The time is 9:06 a.m.

- - - - -

(A recess was taken at this time.)

- - - - -

THE VIDEOGRAPHER: We're back on the record. The time is 9:10 a.m.

BY MS. HURT:

Q. I'm going to share my screen and this will be Exhibit 1.

- - - - -

(Medical Record from University of Colorado Healthcare System Bates 00682__SPARKS__0000006849 to 6855 marked Schwarz Exhibit 1 for identification.)

- - - - -

BY MS. HURT:

Q. Dr. Schwarz, can you see the screen?

A. Yes, I can.

Q. And this is the document that you just provided to your counsel, correct?

A. Correct.

Q. And let the record reflect that it is a medical record from the University of Colorado Healthcare System. It's Bates-stamped 000682__SPARKS__0000006850.

MS. LaMACCHIA: No, that is not correct, Counsel, it starts with 49.

BY MS. HURT:

Q. This isn't the -- oh, that's -- correct, that was, yes, it starts with 49. Five zero is the second page. I'm going to stop sharing now.

Did you do anything to prepare for today's deposition, Dr. Schwarz?

A. Well, I sent a letter in January regarding this matter and I had a previous conversation with Ms. LaMacchia earlier this week.

Q. And by brief, how long was it?

A. Fifteen minutes.

Q. Okay. And was anyone else

present during that meeting?

A. No.

Q. I'm going to share my screen again. This will be Exhibit 2. This is the subpoena that was sent to Dr. Schwarz on February 17, it's dated February 17, 2026.

Dr. Schwarz, do you recognize this document?

A. Yes, I do.

- - - - -

(Subpoena marked Schwarz Exhibit 2 for identification.)

- - - - -

BY MS. HURT:

Q. And you saw this document before today, correct?

A. I have.

Q. Now, I'm going to add what is going to be Exhibit 3. This is the Notice of Deposition of and Request for Production for Dr. Schwarz. It is dated February 17, 2026.

Dr. Schwarz, have you seen

this document before today?
A. Yes, I have.
- - - - -
(Notice of Deposition of and Request for Production marked Schwarz Exhibit 3 for identification.)
- - - - -
BY MS. HURT:
Q. And I'm going to scroll down and there is a section called Attachment A. Have you seen this part of the document before today?
A. Yes, I have.
Q. Attachment A is the documents that are being requested by the United States. Do you have any responsive materials to Attachment A?
A. No.
Q. I'm going to turn -- I'm going to now open what is going to be Exhibit 4. Exhibit 4 is Plaintiff's Objections and Responses to Defendant's Notice of Deposition and Request for

Production. It is dated February 20, 2026. Dr. Schwarz, and if you need me to, I can scroll down so you can look at the document, but have you seen this document before today?

A. Yes, I have.

- - - - -

(Plaintiff's Objections and Responses to Defendant's Notice of Deposition marked Schwarz Exhibit 4 for identification.)

- - - - -

BY MS. HURT:

Q. Turning to page 7, and I'm going to read this number seven, the response -- the question and the response. The request was for, "All bills, invoices, or other documents reflecting compensation paid to you related to the CLJA litigation." And then the response was previously, "PLG produced these as CL__PLG-EXPERT__SCHWARZ underscore, there's a series of zeros and then one through four.

Dr. Schwarz, the invoices that were produced to the United States, we've received two to date. One is dated February 26, 2025, and it was for the amount of $30,387.50 for Mr. Sparks. And then a second invoice on June 8, 2025, for 4,550 for Mr. Sparks' case.

Have you billed for any other additional time and sent invoices for this case?

A. I will have to check.

Q. The last time would have been a little bit before your deposition.

A. There was a bill on July 10, which would have been after the deposition.

Q. Okay.

A. And that was actually to be delivered to the DOJ.

Q. And we're in the process of paying that.

A. I would like to inform you that it has been paid.

Q. Okay.

A. And then there is also from

July 10, which was after the deposition on July 1st, there was a bill for $4,225 related to preparation for the deposition.

Q. Okay. Are there any other invoices?

A. Those are the only three invoices.

Q. Okay. I'm going to request that counsel, not right now, but according to the ESI protocol to produce the July 10, 2025, invoice for $4,225.

I'm going to open what is going to be Exhibit number 5. This document is, "Plaintiffs' First Amended Designation and Disclosure of Phase III Damages and Offsets Rebuttal Expert Witnesses." It is dated February 5, 2026.

Dr. Schwarz, and I can scroll, if you need me to, have you seen this document before today?

A. No, I have not.

- - - - -

(Plaintiffs' First Amended Designation and Disclosure of

Phase III Damages and Offsets Rebuttal Expert Witnesses marked Schwarz Exhibit 5 for identification.)

- - - - -

BY MS. HURT:

Q. So I'm going to scroll back up top. If you want to take a moment to read this first paragraph, and then I'll scroll down to the section that's pertinent to you.

A. I've read the first paragraph.

Q. Okay. So now on page 5, and it says, "Parkinson's Disease," at the top. Can you take a moment to read this?

A. I have read that page.

Q. So I just want to draw your attention to, we're going to go down a little bit further to page 6. And it says, I'll highlight the text and I'll read it. "With respect to Drs. Longo, Schwarz, and Barbano, the expert's qualifications, opinions, fee schedule, and a list of all

other cases in which, during the previous four years, the witness testified as an expert, as required by Federal Rules of Civil Procedure, 26(a)(2)(B), was previously set forth in their expert reports produced February 7, 2025. Any facts and data considered by the above-named experts not already produced in this action and/or not readily available to the public has already been produced pursuant to the stipulated Order Regarding Expert Discovery, Case Management Order number 17. Docket entry 305."

Did I read that correctly, Dr. Schwarz?

A. Yes.

Q. So I want to turn down to what's going to be -- it's going to be your first report, it's going to be Exhibit number 6. Can you see the screen?

A. Yes, I can.

- - - - -

(Schwarz Expert Report dated 2/5/25 marked Schwarz Exhibit 6

for identification.)

- - - - -

BY MS. HURT:

Q. I can make it bigger.

A. It's a little cutoff.

Q. Yeah, there we go. Dr. Schwarz, do you, I can scroll if you need me to, but this is your report for Mr. Richard Sparks in this matter. It is dated February 5, 2025, and you can see here that it's for Mr. Richard Sparks.

It says, "My qualifications are set forth more fully in my CV, attached to Appendix 1. I am being compensated $650 per hour for my time and services rendered."

Is that still your bill rate, Dr. Schwarz, $650 per hour?

A. Yes, it is.

Q. Have you offered any additional testimony since July 1st, 2025, the date of your last deposition in this case?

A. No, I have not.

Q. And your CV is at the end of your specific causation report. It's a very long CV. Okay. Dr. Schwarz, you can take a moment to look at it if you need to, but do you know if you have any additional updates to your r?sum? since this was provided to the United States on February 5, 2025?

A. No, I do not.

Q. Okay. You are a neurologist, correct?

A. Yes.

Q. And you hold yourself out to be an expert in Parkinson's disease, correct?

A. Yes.

Q. And what is the basis of your expertise in Parkinson's disease?

MS. LaMACCHIA: Object to form.

THE WITNESS: In addition to completing a neurology residency, I did a fellowship in movement disorders and then for the last

30-plus years, I've treated patients with Parkinson's disease.

BY MS. HURT:

Q. And you're not an economist, correct?

A. I am not an economist.

Q. And you are not a cardiologist, correct?

A. I'm not a cardiologist.

Q. Were you provided with any documents when you were preparing your report?

MS. LaMACCHIA: Objection, form.

BY MS. HURT:

Q. I can rephrase that. That wasn't -- that was poorly phrased.

Did counsel provide you any documents for your damages correspondence?

A. Are you referring to the correspondence of January 2026?

Q. Yes. I can introduce that as an exhibit. All right. Let the record reflect that Exhibit 7 is dated January 9,

2025, and it is signed by Dr. Heidi Schwarz. This is the report you prepared for the damages Phase IV, correct?

A. Correct. My apologies, it should be 2026.

- - - - -

(Schwarz Damages Report dated 1/9/26 marked Schwarz Exhibit 7 for identification.)

- - - - -

BY MS. HURT:

Q. Okay. That was going to be my next -- that was going to be one of the questions I had later.

Do you -- for the purposes of today's deposition, is it fine if I refer to this as your report from January 9, 2026?

A. That would be most appropriate.

Q. Okay. Thanks. I always do that too at the beginning of the year, you put the wrong year.

So were you provided any

documents in connection with preparing this report?

A. The only document I was provided was the one that's already been entered into evidence, which was the Bates file previously referred to.

Q. Okay. And that would be Exhibit 1. How did you determine which documents to look at to prepare this report?

A. I read Exhibit 1.

Q. Okay. Did you look at any other medical records --

A. I did not.

Q. -- to prepare --

A. I'm sorry.

Q. That's okay. I'm going to introduce what's going to be Exhibit 8. Exhibit 8 is the, "Materials Considered List for Dr. Heidi Schwarz's reports on Plaintiffs Robert Welch and Richard Sparks."

This is the first materials considered list that was provided to the

United States. It says at the beginning of the document, "Plaintiffs hereby identify the facts, data, and publications considered by Heidi Schwarz in forming her opinions set forth in her reports concerning Plaintiffs Robert Welch and Richard Sparks served on February 7, 2025. (the Reports)."

Dr. Schwarz, have you seen this materials considered list before?

A. I'm not sure. I think I saw it prior to the deposition.

- - - - -

(Materials Considered List for Dr. Heidi Schwarz's reports on Plaintiffs Robert Welch and Richard Sparks marked Schwarz Exhibit 8 for identification.)

- - - - -

BY MS. HURT:

Q. When you say, "prior to the deposition," you mean the one that was in July?

A. The July 2025 deposition,

correct.

Q. I'm just scrolling down to where we get to the section that's related to Mr. Sparks. It says, "Schwarz in forming her opinions related to Richard Sparks," and has a colon and it lists several publications. And then under 78, number 78, it says, "Bates Numbered Medical Records."

Dr. Schwarz, are these all of the medical records that you reviewed for Mr. Sparks' case in this matter?

A. I'm not sure.

Q. That's understandable, it's a series of Bates numbers. I am going to introduce what's going to be Exhibit 9. Just so we have an accurate reflection of your materials considered list, this Exhibit 9 is a supplemental materials considered list for Dr. Schwarz, February 7, 2025 report.

And then Exhibit 10 is a --

MS. LaMACCHIA: Counsel, do you -- Counsel, do you intend on

dropping all of these exhibits into the chat as if we were in an in-person deposition?

MS. HURT: Yes, I do, and we can take a break and I can do that.

MS. LaMACCHIA: Go ahead and do that, please --

MS. HURT: Okay.

MS. LaMACCHIA: -- because if you refer to additional exhibits, the witness has the opportunity to review what exhibit you're referring to.

MS. HURT: Okay. We can take a break.

MS. LaMACCHIA: Thanks.

THE VIDEOGRAPHER: Off the record. The time is 9:33 a.m.

- - - - -

(Supplemental Materials Considered List marked Schwarz Exhibit 9 for identification.)

- - - - -

(A recess was taken at this time.)

- - - - -

THE VIDEOGRAPHER: We're back on the record. The time is 9:40 a.m.

BY MS. HURT:

Q. Exhibit 10 is Dr. Schwarz's second supplemental materials considered list. It is in relation to Dr. Schwarz's February 7, 2025, report.

Dr. Schwarz, these are all of your materials considered lists in this case, correct?

A. To the best of my knowledge.

- - - - -

(Second Supplemental Materials Considered List marked Schwarz Exhibit 10 for identification.)

- - - - -

BY MS. HURT:

Q. And to the best of your knowledge, are these all of the materials that you have considered?

A. For my expert witness

statement, yes.

Q. When you say, "expert witness statement," what do you mean?

A. The statement that was submitted, I believe, in February 2025.

Q. Okay. So you mean your specific causation report --

A. Right.

Q. -- for Mr. Sparks? And earlier, you just said that the only additional material that you've reviewed before preparing your January -- January 9, 2026, report was the document that you put in the chat -- in the chat box, which is Exhibit 1 and Bates number ending in 49, correct?

MS. LaMACCHIA: Objection to form.

THE WITNESS: Correct.

BY MS. HURT:

Q. Without discussing any specific details of your conversation, have you spoken with any other experts in the damages and offset phases of this

litigation?

A. I have not.

Q. What about Marjorie Hackett-Wallace?

A. I do not know who that is.

Q. I'm going to introduce what's going to be Exhibit 11.

Dr. Schwarz, have you -- what I've introduced as Exhibit 11 is the rebuttal expert opinion report of Marjorie Hackett-Wallace dated January 20, 2026, and I can scroll down if you would like, but have you seen this report before?

A. No, I have not.

- - - - -

(Marjorie Hackett-Wallace Expert Report dated January 20, 2026 marked Schwarz Exhibit 11 for identification.)

- - - - -

BY MS. HURT:

Q. Okay. Do you know who Dr. Syed Hasan is?

A. No, I do not.

Q. He is, just for your awareness, he is one of the United States experts in the Phase IV damages. So you haven't reviewed this report that he submitted, correct?

A. No, I have not.

Q. Okay. I'm going to introduce what is going to be Exhibit 12. Actually -- scratch that.

Were you aware that Marjorie Hackett-Wallace relied upon the January 9, 2026, report that you prepared?

A. No.

Q. Did you know that you were disclosed as an expert in the damages and offset phase of the litigation?

MS. LaMACCHIA: Objection, form.

THE WITNESS: I am not aware.

BY MS. HURT:

Q. When were you approached by counsel to work on the damages phase?

MS. LaMACCHIA: Objection, form.

THE WITNESS: I'm not sure I understand the question.

BY MS. HURT:

Q. Let me rephrase it. When were you approached by counsel to work on your January 9, 2025, report?

MS. LaMACCHIA: Objection, form. Counsel, you indicated earlier that you were going to refer to that exhibit as January of 2026, not January of 2025.

BY MS. HURT:

Q. That's correct. That is my mistake. Let me repeat that. When were you approached, Dr. Schwarz, by counsel, in relation to your January 9, 2026, report?

A. I don't recall the exact date.

Q. Do you remember what month?

A. I am not sure whether it was late December or early January.

Q. Okay. And what was the scope of your assignment?

A. My understanding was to

review the -- the evidence in the first submitted document today and form an opinion as to whether or not the test requested was related to his Parkinson's disease.

Q. Do you believe there would have been any other medical records that would have been helpful for you to review when preparing your January 9, 2026, report?

MS. LaMACCHIA: Objection, form.

THE WITNESS: I don't believe so.

BY MS. HURT:

Q. What about any additional medical records?

A. I did not feel the need for further records.

Q. Did you evaluate the relatedness of any of Mr. Sparks other medical visits to Parkinson's disease?

A. No.

Q. And why not?

A. I was asked to specifically review this document.

Q. Okay. I'm going to go back to your report. I'm going to show you on the screen, Exhibit 7, your January 9, 2026, report. Did anyone assist you in writing this?

A. No.

Q. We are here to talk about this report, but just so the record is straight, you previously prepared another report on Mr. Sparks in the specific caution phase of the litigation, correct?

A. If you're referring to the longer document from February 2025, yes, I did.

Q. Yes. Thank you. Did these two reports contain all of the opinions that you have formed to date in this case regarding Mr. Sparks?

A. Yes.

Q. Are you planning to form any additional opinions regarding Mr. Sparks?

A. I can't answer that. I'm not

very good at predicting the future.

Q. Understood. What opinion did you reach in your January 9, 2026, report?

A. I was asked to review the first piece of evidence submitted and opine about whether this was related to his Parkinson's disease and after reviewing the document, I felt that the MRI scan of his brain was directly related to his diagnosis of Parkinson's disease.

Q. And what about that record led you to that conclusion?

A. Because the indication for the MRI scan from Dr. Leehey was Parkinson's disease and because I have evaluated the patient in the past and I know he has Parkinson's disease, so I felt that this was directly related to his Parkinson's disease.

Q. It says in the last sentence, "Therefore, in short, to a reasonable degree of medical acceptor, this April 6, 2018, visit, test and results are directly related to his symptoms of PD."

Did I read that correctly?
A. Yes, you did.
Q. What does to a reasonable degree of medical certainty mean?
A. It means that I have a greater than 50 percent belief that this is directly related to his Parkinson's disease.
Q. And why did you use a reasonable degree of medical certainty in your report?
MS. LaMACCHIA: Objection, form.
THE WITNESS: That's the legalese that you guys like.
BY MS. HURT:
Q. When you say, "you guys," who are you referring to?
A. Lawyers.
Q. Lawyers, any specific lawyers?
MS. LaMACCHIA: Objection, form.
THE WITNESS: No, it's just --

no, all lawyers in medical cases like reasonable degree of medical certainty.

BY MS. HURT:

Q. And have you used this standard before in expert reports?

A. Yes.

Q. And what was the context of the other reports in which you used this standard?

MS. LaMACCHIA: Objection to form.

THE WITNESS: I, honestly, I honestly can't remember all the times I've used that.

BY MS. HURT:

Q. So you've used it several times?

A. Yes.

Q. Why did you choose not to use at least as likely as not in this report?

MS. LaMACCHIA: Objection, form.

THE WITNESS: Because I think

that in this situation, the indication for the MRI scan was clearly much more than 50 percent related to his diagnosis of Parkinson's disease.

BY MS. HURT:

Q. And how would you say a reasonable degree of medical certainty is different from at least as likely as not?

MS. LaMACCHIA: Objection, form.

THE WITNESS: My understanding is as likely as not means that there's clinical equipoise, meaning it's a 50/50 chance that it's related, whereas a reasonable degree of medical certainty means it's more than 50 percent.

BY MS. HURT:

Q. Okay. Why did you choose not to use more likely than not as the standard for this report?

A. Because I felt that this scan and report were clearly much more than

50 percent related to his diagnosis of Parkinson's disease.

Q. And in your opinion how is a reasonable degree of medical certainty different from more likely than not?

MS. LaMACCHIA: Objection, form.

THE WITNESS: I believe I just answered that.

BY MS. HURT:

Q. The previous question was at least as likely as not. And then I asked you why you used this -- why you didn't you use more likely than not. This question I'm asking how is reasonable degree of medical certainty different from more likely than not?

MS. LaMACCHIA: Objection to form.

THE WITNESS: I don't think I have an answer for that.

BY MS. HURT:

Q. Okay. And why don't you have an answer to that?

MS. LaMACCHIA: Objection to form.

THE WITNESS: I guess I'm not really sure what you're asking for. I would say that I feel without any qualms or uncertainty that this was clearly related to his diagnosis of Parkinson's disease.

BY MS. HURT:

Q. And with more likely than not, is that a lower standard than reasonable degree of medical certainty, in your opinion?

MS. LaMACCHIA: Objection.

THE WITNESS: I would have to defer to legal advice on that.

BY MS. HURT:

Q. Okay. At the beginning of your January 9, 2026, report, it says, "The attached medical record is for a head MRI with report included."

This attachment, is that Exhibit 1, the document you provided ending in 6849?

A. Yes.
Q. I'm going to go back to Exhibit 1.
Actually, can we take a break for just a couple of minutes while I grab Exhibit 1?
THE VIDEOGRAPHER: Off the record. The time is 9:58 a.m.
- - - - -
(A recess was taken at this time.)
- - - - -
THE VIDEOGRAPHER: We're back on the record. The time is 10:02 a.m.
BY MS. HURT:
Q. Dr. Schwarz, can you see Exhibit 1 on your screen?
A. Yes, I can.
Q. And this is the MRI that's the focus of your January 2026 report, correct?
A. Correct.
Q. I scrolled down to Bates number ending in 6852 of the document. And

I'm looking at the -- where it says, "Imaging Results." Do you see where I'm looking, Dr. Schwarz?

A. Yes, I do.

Q. And on the right side, it says resulted by Nyberg, Eric M, MD, correct?

A. Correct.

Q. And it says it was performed on April 6, 2018, at 9:16 to April 6, 2018, 9:40 a.m., correct?

A. Correct.

Q. And Dr. Leehey referred Mr. Sparks for this MRI, correct?

A. Correct.

Q. And Dr. Leehey is one of the neurologists treating Mr. Sparks for Parkinson's disease, correct?

A. Correct. She was the head of the department -- or the division of movement disorders.

Q. I'm going to scroll down and now I'm on page Bates number ending in 6853. It says, "Patient Questionnaire

Submission, Questionnaire," and then the first question is, "Do you have or have you ever had a pacemaker, pacing wires, implanted cardioverter defibrillator, Life Vest, or artificial heart valve?"

Did I read that correctly?

A. Yes.

Q. Is this what you meant by the pre-procedural checklist mentioning a heart valve replacement in your report?

A. Correct.

Q. And your opinion is that this is a standard pre-procedure checklist for MRIs, correct?

A. Correct.

Q. And this MRI is related to Mr. Sparks' Parkinson's disease, correct?

A. Correct.

Q. I'm going to introduce, I believe this is Exhibit 12. Actually, let's take -- I'm just going to put the stuff in the chat box, so if I can have, like, another, like, five-minute break and then I'll put the documents in the chat

box.

THE VIDEOGRAPHER: Off the record. The time is 10:06 a.m.

- - - - -

(A recess was taken at this time.)

- - - - -

THE VIDEOGRAPHER: We're back on the record. The time is 10:09 a.m.

BY MS. HURT:

Q. I just put in the chat box, which is going to be Exhibit number 12. And I'm going to share it. Let me know when you can see the screen.

A. I can see it.

- - - - -

(Itemization of Charges for UCHealth Bates 00682__SPARKS__0000006663 to 6664 marked Schwarz Exhibit 12 for identification.)

- - - - -

BY MS. HURT:

Q. Okay. Exhibit 12 is going to

be a list of charges from UCHealth. It says the admission date is April 6, 2018 and the discharge date is April 6, 2018. And the Bates number, the first Bates number is 000682__SPARKS__6663.

Dr. Schwarz, have you seen this document before?

A. No, I have not.

Q. And let's just go through the charges at the top. There are a series of charges, five charges at the top, and these are all dated April 6, 2018, correct?

A. Correct.

Q. And the first listed is heart muscle image SPECT multiple.

Do you know if this stands for myocardial perfusion imaging --

MS. LaMACCHIA: I'm going to object --

MS. HURT: -- SPECT scan?

MS. LaMACCHIA: I'm going to object to this line of questioning, Dr. Schwarz is sitting here for a deposition based on an opinion she

rendered solely for the April 6, 2018 medical visit. You are now showing her an itemization of charges. This Bates number was not within her MCL that was marked as Exhibit 8. She's never seen this document. She's not here testifying about charges, itemization, so I'm going to object to this entire line of questioning.

MS. HURT: Are you going to end the dep -- are you going to instruct her not to answer?

MS. LaMACCHIA: I am going to instruct her not to answer any questions about the itemization of charges. She's never seen this document before. She's -- she's a neurologist here giving an opinion as to the relatedness of the April 6, 2018, medical visit as to Parkinson's disease. She just testified she's never seen this document before. It is not

contained within any of her Bates ranges in her MCL.

MS. HURT: So is it your position that Marjorie Hackett-Wallace is not challenging Dr. Hasan on the four charges that are highlighted in yellow?

MS. LaMACCHIA: It is not what we're here about. It is exactly not what we're here about. You are here to get an opinion from Dr. Schwarz as to her opinion and her conclusion as to the relatedness of the visit as it relates to Parkinson's on April 6th of 2018 and that is it.

MS. HURT: And so your position is that these charges are not related to the Parkinson's, but you're not --

MS. LaMACCHIA: It has nothing to do with the charges, Ms. Hurt, nothing to do with the charges. Dr. Schwarz is not here to opine on

charges. You can ask these questions to Marjorie Hackett-Wallace in her deposition.

MS. HURT: So you would not allow her to answer the question of whether or not a myocardial perfusion imaging is related to Parkinson's disease?

MS. LaMACCHIA: You can ask her that question, but you cannot ask her about itemization, CPT codes, charges, you can't ask her questions about this document.

BY MS. HURT:

Q. That's fine. I don't need to ask her questions about the specific charges.

Dr. Schwarz, I'm going to stop sharing my screen.

In your opinion, is a nuclear stress test related to Parkinson's disease?

A. Generally not.

Q. It's usually a nuclear stress test is designed to assess blood flow to

the heart muscle and evaluate its pumping function, correct?

A. I believe so, I'm not a cardiologist.

Q. And nuclear medicine imaging tests typically uses Tech Tc-99m sestamibi, correct?

A. I have no idea.

Q. Okay. But your overall position is that a stress test is typically not related to Parkinson's disease, correct?

A. Correct.

Q. Okay. I'm going to take a five-minute break and --

MS. LaMACCHIA: Counsel, Counsel, I'm sorry, this is -- this is the sixth break that we've taken and we have been on record for less than an hour. I mean, it seems like there's a lot of unpreparedness for this deposition today.

MS. HURT: I mean, this is my

deposition. We can go off the record and just talk about this, but I can use my time as I see fit.

THE VIDEOGRAPHER: Do we want to go off the record?

MS. HURT: Yes.

THE VIDEOGRAPHER: Off the record. The time is 10:15 a.m.

- - - - -

(A recess was taken at this time.)

- - - - -

THE VIDEOGRAPHER: We're back on the record. The time is 10:21 a.m.

BY MS. HURT:

Q. I'm entering into the chat box which is going to be Exhibit number 13. Exhibit 13 is a medical record from UCHealth. It is dated 4/6/2018. The Bates number is 000682__SPARKS__0000003960.

Dr. Schwarz, I can give you a moment to look at this document. When you are ready for me to scroll down, just let me know.

A. I'm ready to scroll down.

- - - - -

(UCHealth Record dated 4/6/2018 Bates 000682__SPARKS__0000003960 to 3965 marked Schwarz Exhibit 13 for identification.)

- - - - -

BY MS. HURT:

Q. Okay.

A. And I'm ready to scroll down. And I'm ready to scroll down.

Q. I'm sorry, if I scrolled too far, let me know.

A. You can scroll down further. And you can scroll down further. And you can scroll down further. And you can scroll down further.

Q. I think that's the extent -- that's the extent of what I wanted you to look at.

Dr. Schwarz, have you seen this document before today?

A. No, I have not.

Q. Based on your assessment of the document, is this related to Mr. Sparks' Parkinson's disease?

MS. LaMACCHIA: Objection, form.

THE WITNESS: I wasn't asked to review this document to render an opinion.

BY MS. HURT:

Q. Do you have an opinion on whether or not this is related to Mr. Sparks' Parkinson's disease?

MS. LaMACCHIA: Objection, form.

THE WITNESS: As I stated previously, the MRI scan of the head was related to his Parkinson's disease.

BY MS. HURT:

Q. Wouldn't that mean that this charge is not?

MS. LaMACCHIA: Objection, form.

THE WITNESS: I'm not here to

opine about charges.
BY MS. HURT:
Q. I'm sorry, let me rephrase that. Is it your opinion that this visit was not related to his Parkinson's disease?
MS. LaMACCHIA: Objection, form.
THE WITNESS: I believe the head MRI scan was directly related to his Parkinson's disease. It was part of this visit.
BY MS. HURT:
Q. Okay. Looking back here, I want to point you to the timestamp. It says, April 6, 2018, at 4:15 p.m., correct?
A. Correct.
Q. And when we were looking at the MRI earlier, that was in the morning on 4/6/2018, correct?
A. Correct.
Q. So this would have been several hours after the morning visit, correct?
A. Correct.

Q. Okay. And this procedure note is written by a Mr. Eric Nyberg, MD -- I'm sorry, I went down too far to the MRI, let me pull up. I'm sorry, this is where I was trying to get, it says the authorizing provider is Huong Lam, MD, correct?

A. Correctly.

Q. And that is not Dr. Leehey, correct?

A. Correct.

MS. HURT: Okay. I have no further questions.

MS. LaMACCHIA: Can you take down that exhibit, Cindy?

MS. HURT: Yes, I will.

BY MS. LaMACCHIA:

Q. Dr. Schwarz, you've never seen Exhibit 13 prior to today, right?

A. Correct.

Q. And you weren't asked to give a causation opinion in your January 2026 report, right?

MS. HURT: Objection to form.

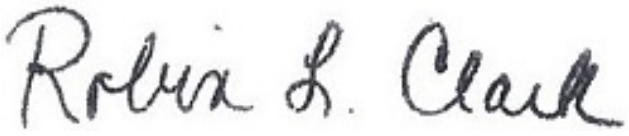
THE WITNESS: Could you

restate what -- the question?
BY MS. LaMACCHIA:
Q. Sure. Sure. You weren't asked to give any type of causation opinion in rendering any kind of opinion in your January 2026 report, right?
A. Correct.
MS. HURT: Objection to form.
BY MS. LaMACCHIA:
Q. Okay. Your conclusion, your conclusion in your January 2026 report regarding the relatedness of the medical record of 4/6/18 to Parkinson's was based on accepted scientific principles, your experience, and evidence, right?
MS. HURT: Objection to form.
THE WITNESS: Correct.
I'm sorry.
BY MS. LaMACCHIA:
Q. It's okay. And you were asked some questions about reasonable degree of medical certainty, at least as likely as not, more likely than not. Do you remember that line of questioning?

A. I do.
Q. Okay. And do you remember that you were asked those type of questions at length in your prior deposition given and you gave opinions on those, right?
A. I do remember and I did give opinions.
Q. Okay. And you're not -- I have no further questions. Thank you.
MS. HURT: I think that ends the deposition.
THE WITNESS: Okay.
THE VIDEOGRAPHER: All right. That concludes the deposition. The time is 10:28 a.m.
- - - - -
(Whereupon, the deposition was concluded at 10:28 a.m.)
- - - - -

C E R T I F I C A T I O N

I HEREBY CERTIFY that the proceedings and evidence are contained fully and accurately in the stenographic notes taken by me upon the foregoing matter on February 25, 2026, and that this is a correct transcript of same.



_____

Robin L. Clark

Registered Professional Reporter

(The foregoing certification of this transcript does not apply to any reproduction of the same by any means unless under the direct control and/or supervision of the certifying reporter.)

INSTRUCTIONS TO WITNESS

Please read your deposition over carefully and make any necessary corrections. You should state the reason in the appropriate space on the errata sheet for any corrections that are made.

After doing so, please sign the errata sheet and date it.

You are signing same subject to the changes you have noted on the errata sheet, which will be attached to your deposition.

It is imperative that you return the original errata sheet to the deposing attorney within thirty (30) days of receipt of the deposition transcript by you. If you fail to do so, the deposition transcript may be deemed to be accurate and may be used in court.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

REPORTER'S KEY TO PUNCTUATION:

-- At end of question or answer references interruption.

... References a trail-off by the speaker. No testimony omitted.

"Uh-huh" "Um-hum" References affirmative sound.

"Huh-uh" "Um-um" References negative sound.

CERTIFIED STENOGRAPHER'S NOTE: All quotations from exhibits are reflected in the manner in which they were read into the record and do not necessarily denote an exact quote from the document.

VIDEOGRAPHER: We are now on the record. My name is Jeff Flemming. I'm a videographer for Golkow, a Veritext division.

Today's date is Tuesday, February 17th, 2026. The time is 9:19 a.m.

This video deposition is being held in Tampa, Florida, in the Camp Lejeune Water Litigation case.

The deponent is Dr. Michael Shahnasarian.

Counsel, please state your appearances for the record, after which the court reporter, Dawn Hillier, will swear in the witness.

MR. ROMANO: John Romano of Romano Law Group on behalf of the plaintiffs.

MR. TUBIN: Marcus Tubin of the Department of Justice for the United States.

MR. CARPENITO: Good morning. Joshua Carpenito on behalf of the United States.

MS. LaMACCHIA: And by Zoom, Leslie LaMacchia, Bell Legal Group on behalf of the plaintiffs.

MR. MALONE: And by Zoom, JT Malone, Davis, Bethune & Jones, also on behalf of plaintiffs.

MICHAEL SHAHNASARIAN, Ph.D.,

was called as a witness and, having first been duly sworn, was examined and testified as follows:

THE WITNESS: I do.

CERTIFIED STENOGRAPHER: Thank you.

EXAMINATION

BY MR. ROMANO:

Q Please tell us your full name.

A Michael Shahnasarian.

Q In the field of rehabilitation and life care planning -- true? -- you do not make medical diagnoses?

A That's correct. I am -- I do make psychological diagnoses at times, but not medical diagnoses.

Q True, that in your capacity as a rehabilitation specialist and life care planner, you do not render a medical prognosis?

A That's correct, sir.

Q Do you prescribe medications?

A No.

Q Do you, in your work in any capacity whatsoever, render medical care?

A I make referrals to patients for evaluations but I do not personally provide medical treatment.

Q Okay. And you do not render any medical advice to patients or clients; correct?
A Did you say requests?
Q You do not render any medical advice to individuals who come to you for rehabilitation counseling or where you can --
A Not --
Q -- put together a life care plan?
A Not in terms of treatment, but I will make referrals to specialists for evaluations.
Q All right. What I'm getting to is this: You don't give the actual medical advice to a given patient. True?
A Other than I recommend you see a specialist. But in terms of actually -- an intervention, that would be true, apart from an evaluation, recommending, you know, an evaluation.
Q In this case involving Camp Lejeune and the cases we're here on today, some different individual Marines or their family members or an individual who was on the base at that time, do you expect to provide any type of rehabilitative services or counseling services to any of these folks?
A No, sir.

Q When you created and developed the life care plans in each of these cases, did you consider the effect of tariffs on the life care plan recommendations you were making?

A Can you define what you mean by "tariffs"?

Q Well, what do you -- in your capacity with your degrees, your education, the work that you do, what is your understanding of what a tariff is in the sense of a tariff announced by the President of the United States? What is a tariff?

A I don't have an understanding of that as it pertains to life care planning. Perhaps that would be -- fall into the bailiwick of an economist.

Q All right. When you create and develop a life care plan in this instance, as to any of these life care plans, did you give any consideration at all to the effect of tariffs on such things as costs of medications or costs of medical equipment?

A No, I did not. That perhaps would be something that would fall under the purview of an economist, but traditionally, no, that does not fall under the purview of a life care planner.

Q Have you -- as a part of your work, when you make recommendations for a life care plan, do you consider the cost of such things as medications

a person will need in the future months and years?
A Yes.
Q Do you consider, similarly, the costs that a given patient or individual will need in the future with respect to medical equipment or devices?
A Yes, sir.
Q Do you consider the cost in the future for such things as a medical procedure like surgery, including something like a deep-brain stimulation surgery?
A Yes.
Q All right. When you consider those costs in these seven Camp Lejeune cases you have assessed and that we're here on today, did you consider at all the subject of the effect tariffs have or would have on those costs?
MR. TUBIN: Objection, form.
THE WITNESS: I considered the present value in the geography in which each of the seven plaintiffs reside. And I defer to an economist if there's an increase in the future for that. That's the manner in which I consider these costs, sir.
BY MR. ROMANO:
Q All right. Was it necessary for you, in

creating and developing the life care plans, to assess the effect of tariffs on future costs as to medical care, medical services, medical equipment?

A No. If that is applicable, it would fall under the purview of an economist who does consider factors such as life expectancy, growth, inflation, and computes future costs and reduces it to present value. That is something that is not under my scope of expertise.

Q In considering how future medical-related costs will get paid for once recommended in a life care plan, did you factor into any of these life care plans payments in the future by Medicare?

A No. There's no collateral source offset that was factored into my analysis.

Q Not in any of these cases?

A That's correct.

Q All right. Similar question. As you were creating and developing the life care plans, did you consider any future payments which may be made through Tricare?

A No.

Q Did you consider, when you created and developed these life care plans, payments from any source whatsoever, whether it be a government

source, an insurance source, private pay, any source at all?

A No. I am aware that some of the plaintiffs are receiving services and equipment in some cases through the Veterans Administration but I did not consider those or any other offset.

Q All right. Let's take an example of a given medication that would be recommended in the life care plan. For purposes of my question, it doesn't matter what the medication is.

When a medication is recommended in the life care plan, and you set forth a cost for that medication, what are the steps you go through in order to determine that cost?

A If you look at the life care plans, you'll see that the costing sources are all identified in the footnotes. So for a medication, you'll see there are pharmacies that are identified that provide the cost of the medication in the locale in which the plaintiff resides. There are pharmacies like CVS, Walgreens, Good Drugs.

It's all documented in the life care plans.

Q All right. So if we look in any one of these life care plans and want to know the source

information for your determination of a cost for a medication, that information will be right in the life care plan?

A Yes, sir.

Q All right. As a part of your work in these cases, did you ever speak to any one of the treating physicians?

A No. That would not be proper. I don't have access to them since I'm retained by defense counsel.

Q Did you, at any time, ask for permission or consent to communicate directly with any of the treaters?

A I don't recall. I may have.

Q If you may have done that, where would we find that information so that we know whether you did or you did not?

A Possibly in notes that I kept during consultations with defense counsel. Possibly a formal request in a letter.

Q All right. As you sit here right now, do you remember ever doing that; in other words, requesting authority or a consent to speak or communicate with one of the treating doctors?

MR. TUBIN: Objection.

To the extent that calls for conversations with counsel, do not answer the question.

THE WITNESS: I've been instructed not to answer the question.

BY MR. ROMANO:

Q Would it have helped you in any way in assessing these cases, in order to formulate your opinions, to have obtained consent to speak to any of the treaters and to have done that?

A It's possible; however, I feel I had very good input vis-a-vis tens of thousands of medical records that I reviewed, including medical records from the treaters, and also the consultations that I had with the defense expert specialists, and also the life care plans. So I had an opportunity to review that life care plan that's retained by plaintiff counsel, prepared.

Q In each of the instances of these seven cases we're here on today, were you able to communicate directly with physicians which were hired by the defense?

A Yes.

Q I don't want to go through all of them so I'll ask a more general question. But what are the steps you went through in order to commence those

communications, first of all?

MR. TUBIN: Objection, CMO 17.

If you can answer the question without disclosing communications between you and other experts, then that's okay. But to the extent it calls for communications between you and the expert, that material is not discoverable under CMO 17 and should not be answered.

THE WITNESS: You used the word "commence," which to me means to begin?

BY MR. ROMANO:

Q Yes.

A So I -- I became familiar with records of the different plaintiffs. The records would include when they were diagnosed with different conditions, what treatment was rendered. There was testimony from their treating doctors and healthcare providers.

After I became familiar with the records, I requested opportunities to speak with the defense-retained specialists. That's what I did to commence the communications.

Q All right. And then in each given case, were you able to speak with the defense-retained specialists?

A Yes.
Q We have reviewed your reports and I know you have a lot of information in the reports about those. Other than the reports that you rendered where you discuss your communications with those physicians or specialists, are there any other documents that you have prepared that contain information about those communications?
A I have notes that I took contemporaneous with my communications. And also after the life care plans were prepared, I transmitted them to the contributors, asked them to review and then to respond if there were any changes or amendments that they wished to make.
Q Okay. I don't know if we can lump them all together. But when you did speak with the defense-retained physicians or specialists, were those all via Zoom call or phone call?
A Zoom.
Q Zoom. Did you meet with any of them in person?
A No.
Q And when you had the Zoom calls with the physicians, was it you, one-on-one, or was somebody else, without identifying that person, present?

A Others were present.
Q All right. As to any of the individual plaintiffs whose cases you have assessed, did you observe any of the plaintiffs in person engaged in activities within their own homes?
A Can you be more specific?
Q Yes.
First, did you visit any plaintiff -- any plaintiff's home to where you were able to observe his or her activities in the home?
A No.
Q All right. Did you observe any of the plaintiffs in his or her activities in the home by video?
A Yes.
Q All right. Was it each of them or certain ones?
A Well, I -- Ms. Tukes I did not examine at all. That was a paper review and consultation with doctors. The others were all by Zoom.
Q All right. Meaning when you conducted the interview --
A The interview, yes.
Q -- of the individuals?
Let me go to -- I think it's over here.

I've got a lot of boxes.

Let's just go off the record for a minute --

CERTIFIED STENOGRAPHER: Okay.

MR. ROMANO: -- so I can find this.

VIDEOGRAPHER: Off record, 9:36 a.m.

(Off the record.)

VIDEOGRAPHER: On record, 9:39 a.m.

(Exhibit 1 was marked.)

MR. ROMANO: I have handed the witness a copy of what we've identified as Exhibit 1 to the deposition.

BY MR. ROMANO:

Q Would you identify this for us, please?

A Yes, sir. This appears to be my curriculum vitae.

Q Who prepared this curriculum vitae?

A My office.

Q Is it a CV that you, yourself, have read and approved?

A Yes.

Q Is it accurate?

A I haven't looked at everything, but it appears to be accurate, sir.

Q Well, have you, at any time, when you've

looked over your CV, found anything that is in any way an error or that needs to be changed out?

A Not to my knowledge, just, you know, perusing it quickly.

MR. ROMANO: All right. Let's go to Exhibit 2.

You know, I'm going to go into the billing records. I think I'll come back to that in light of what you all produced this morning --

MR. TUBIN: Okay.

MR. ROMANO: -- so that I can look at all of it together. And then we'll come back to billing and invoices after I've seen the documents that you just produced.

BY MR. ROMANO:

Q What do you see as your role in this case?

A I was asked to provide an opinion on damages that are being claimed by the seven plaintiffs, damages specifically in areas related to vocational rehabilitation and life care planning.

Q Was your role, in terms of rehabilitation and creating or developing the life care plan, ever changed from the time you started working on this case?

A I don't believe so, sir.

Q All right. And when you hold yourself out to the public or to courts as an expert, what is -- or what are your fields of expertise?

A I am trained as a rehabilitation psychologist with subspecialties in vocational rehabilitation and life care planning.

Q And when you use that phrase or those words "rehabilitation, vocational" or "vocational rehabilitation," explain to us what that area is. What it is that you do in vocational rehabilitation?

A Vocational rehabilitation is a subspecialty of rehabilitation that has to do with one's work capacity. Everybody is different in terms of their education, work experience, transferable skills, disabling problems that may or may not affect their ability to work.

In vocational rehabilitation, we consider all of those factors. We also consider, in the case where there's a question of someone's earning capacity, their demonstrated earning capacity, their demonstrated earnings after an incident in question. Vocational rehabilitation considers all those factors.

In some cases, we consider things like someone's capacity for retraining, if they're unable

to resume their prior work. In some cases, we consider factors such as accommodations, reengineering the workplace. So those are the main types of activities involved.

There's different protocols that we use to obtain information, including standardized testing. In this situation, that was not a factor. But we do administer IQ tests, aptitude batteries, personality measures, occupational interest inventories, sometimes to gather information about a vocational profile when it's relevant.

But generally speaking, vocational rehabilitation has to do with assessing ability to work and earn wages and facilitating ability to work and earn wages when people have had a disruption to their career.

Q In your work, do you actually conduct rehabilitation counseling aside from your expert witness work?

A Yes.

Q What else do you do, aside from your -- in a professional sense, what else do you do aside from your expert witness, consulting, testifying, and assessing cases?

A I have a practice in Tampa that I founded

in 1986 called Career Consultants of America, Inc. It's grown over the years. We currently have 20 employees. I manage the day-to-day operations, and I also train and supervise other people to do career counseling, vocational counseling, life care planning.

I have interns, I have residents, I have staff who -- and the interns and residents rotate in and out.

Q All right.

A I have one that's coming on in summer of 2026.

Q Is CCA a company -- a Florida company?

A Yes.

Q How many employees does CCA have right now?

A Twenty.

Q If you were to approximate the percentage of your personal work which is done in activities as an expert, either in consulting, being hired on cases, assessing cases, depositions, trials, and related matters, what percentage of your work is in that area as compared to the percentage of your work in actually conducting vocational rehabilitation and counseling work?

A Expert witness work consumes approximately 60 to 70 percent of my professional time.
Q All right.
A And there are other activities I do beyond what I described to you.
Q Regarding CCA as a company, what percentage of the business of the company is expert-witness related as opposed to non-expert-witness related?
A I don't know specifically but definitely over half is expert-witness related.
Q All right.
A I have two other people who are doing expert witness work in the practice. One you'll meet tomorrow, Ms. Navarro.
Q Okay. In addition to Ms. Navarro, who is that other person?
A Marianne Abadir.
Q Abadir?
A Yes.
Q Is Marianne -- what is Marianne Abadir's specialty?
A She is -- she has a license as a mental health counselor. She just became certified as a life care planner. But mental health counselor I

would say is more of her specialty.

Q All right. As to the individuals who worked on these cases with you, other than yourself and Ms. Navarro, who else within your company worked on these cases?

A I don't know if I can tell you all of the people who did it but I had support staff who worked on the cases. They were doing thing -- a lot of -- there was a lot of logistics, especially with a case with this many records. So I had at least two or three support staff who were involved in logistics and also a lot of clerical work, a lot of typing was done.

I had at least two other staff who were involved in, let's say, reviewing records, assembling records, putting them in chronological order for me. So probable five, at least, other staff. Six, maybe.

Q In the instances of these seven individuals, as to those who were active or reserved duty Marines, were you able to review the -- what is called the SRB, or the Service Record Book of any of them?

A I reviewed a lot of military records. I don't know all the different acronyms.

Q All right. You reviewed what was supplied to you; correct?
A I did.
Q And then you have noted that in your report?
A Yes.
Q Okay. If we look at your report, does that include everything you reviewed as a part of your assessment as an expert witness in each of the seven cases?
A I should.
Q Well, "it should" is different from "it does."
A To the best of my knowledge, it does.
Q Okay.
A We don't live in a perfect world, but to the best of my knowledge, it does.
Q I'm going to walk you through, in a little while, each of those cases. And I promise you, I'll try do it in the most efficient way that I think we can do it because it's a number of cases.
But walk us through, briefly, when you're hired on one of the Camp Lejeune cases, what are the steps you personally take in terms of starting off your work, conducting the analysis, reviewing

records, arriving at your opinions? Give us a brief overview of that.

And keep out of that any conversations you had with any government lawyers.

A Yes, sir.

You want to talk -- me to speak specifically to this Camp Lejeune litigation or generally as an expert witness?

Q Well, if your work, generally, as an expert is similar to the way in which you approached each of the Camp Lejeune cases, then that will suffice, yes.

A Yes, sir.

Upon an engagement as an expert witness, I request records. And the records are in different areas. Some records are employment records which would include someone's personnel file from different places that they worked with. And that would be very comprehensive. It would include job responsibilities, job descriptions, performance reviews, attendance records, and of course payroll records. I also request tax returns, when there's an earning capacity claim.

Other categories would include pleadings, which would include a copy of the complaint, answers

to interrogatories. In this case, there were some specialized types of information of that sort; deposition testimony of the plaintiff. And then of course, treating doctors and others who have knowledge of a person's diagnosis, prognosis, treatment.

Treatment records, of course, are important to me as well so I'm interested in any operative reports, diagnostic reports such as CTs, MRIs, x-rays. And of course, assessments, I'm interested in that as well.

So at the onset of the case, I'm interested in reviewing records so I can become familiar with the case. And then as I learn more about the nuances of the case, I'll learn more about different records, and I'll ask opportunities to review those as well.

Some of the records also, I should mention, would predate an issue in dispute and some would postdate an issue in dispute. So I gather records, become familiar with the case, and then I request an opportunity to do an examination.

In this case, I was limited by the Court to a four-hour examination. Typically, my examinations will include a clinical interview and

administration of standardized tests, depending on, again, with case-specific factors. In this case I -- in these cases I did not have an opportunity to administer any standardized tests because of the Court-imposed limitations.

So the process would be, become familiar with the records so that I know the history and I can ask pertinent, on-point questions during the clinical interview, then I conduct the clinical interview. In these cases, again, the time allotted to me was four hours; so they were three and a half hours to four hours in these cases.

After the clinical interview, I correlate information from the records with information from the interview, clinically correlate the data; and that would include things like onset dates, types of complaints, treatment that was rendered, functional capacities of an individual, as documented in records, and then, again, clinically correlating that with self-report.

Then after that, I conduct any additional research that may be necessary, including consulting with specialists, as I did in this case. I had an opportunity to consult with different specialists, again, case-specific. And then distilling that

information to address the referral questions. The referral questions are in two areas; the vocational is one area, and then the life care plan is another area.

During the consultations with the specialists, I first inquire of -- about their assessment of the plaintiff, based on their examination, based on their review of the records in terms of things, again, like onset dates, symptoms, how profound the symptoms may have been at different times. And then I elicit from them their recommendations for the various conditions of the -- and, again, all case-specific because everyone's case is different.

And we also review at that time the life care plan produced by the plaintiff-retained life care planner.

I obtain the protocols. And then the next step is to cost the interventions, again, applying this -- the standard of practice in life care planning, which has different requirements, including the types of information that is relied on and the different sources that are used.

All of that information is synthesized into a life care plan. It's transmitted to each of

the contributors. They're asked to review it, and then to respond back with agreement or any disagreement they may have.

Q All right. You mentioned the standard of practice for life care planners; correct?

A Yes.

Q What is that?

A The governing body of the certification for life care planners is the International Association of Life Care Planners, IALCP, and they publish standards of practice.

Q All right. Are you a member of that organization?

A Yes.

Q When did you become a member of that organization, roughly?

A '80s or '90s.

Q And the -- is that the governing body that issues the standards by which life care planners are required to handle the assessment of cases in order to render a life care plan?

A Yes.

Q All right. In your work, do you find yourself retained by both the plaintiff's side of personal injury cases and the defense side of

personal injury cases?
A Yes, sir.
Q In the last ten years, what is your best estimate as to how you would divide that by a percentage in terms of percentage of times you're hired by the plaintiff, percentage of your work where you're hired by the defense?
A Very even.
Q All right.
A More or less, half and half.
Q All right. When you are hired by the defense, such as in this case, and you go through the approach to conducting your expert work, do you do that work exactly the same as the way you would do that work if you had been hired on the plaintiff's side?
A No.
Q All right. What --
A Not exactly the same. The main difference is, I don't have access to the plaintiff or any healthcare providers that the plaintiff is treating with.
Q All right. Let me back up so that I can ask a full question on that.
When you are hired by the defense in a

personal injury case, such as this case, what is the difference between the way you approach assessing and arriving at your opinions as compared to when you were hired by the plaintiff?

A I just explained, the main difference is I don't have access to consult with any healthcare providers treating the plaintiff. So I cannot consult with those individuals. I have to read their records, deposition testimony, but I don't have an opportunity to actually interactively consult with them.

Q All right.

A Also, when I'm retained by plaintiff counsel, I have -- I publish my life care plan first, not the defense.

Q All right. Are there any other differences that you can tell us about as between the times when you were hired on the defense side as compared to the plaintiff's side other than what you've explained --

A Yes. Another one I can think of is, a good example is this case where there was a limitation placed on my scope of my examination. When I'm retained by plaintiff counsel, there's not any limitation placed on the scope of my

examination.

Q Okay. And by "examination," are you talking about an in-person interview or --

A Interview and testing --

Q Okay.

A -- and time limitation, whatever the Court may impose. There's sometimes limitations such as a certain test I can't administer because someone else administered it.

Q Setting aside any communications you've had with government counsel and setting aside the interviews you have had with the plaintiffs in these cases and with specialists hired by the defense, have there been any other people outside of your firm that you have interviewed in order to arrive at your opinions in these cases?

A Not that I can think of, sir.

Q You have not been called upon to try to render any kind of opinions regarding causation; correct?

A You're right.

Q Before being hired by the government in this case, had you ever been hired by the federal government to work in the area of rehabilitation or life care planning before?

A Yes. I've been retained by them. I've also been on the opposing side of the United States government.

Q Sticking just for a moment to the previous occasions when you've been hired by the government in your specialty, approximately how many times has that happened, or approximately how many cases?

A I couldn't give you a precise, but I'll give you my best estimate, 10 to 20 --

Q All right.

A -- over the course of my 43-year career. That might be high.

Q All right. As to the lawyers who are currently working for the Department of Justice and who are on this case, have you worked with them on any previous cases?

A No.

Q In assessing these seven cases, and as it relates to any claims relating to either wage claims or earning capacity claims, was it important for you to assess the daily work activities each of those plaintiffs was involved in on a day-to-day basis when he or she was working?

A Yes.

Q All right. Why is that important?

A For several reasons. I wanted to understand what was required exertionally and non-exertionally, as well as the cognitive complexity of the different types of work they were performing and difficulties that they may have had, and then, of course, evaluating whether or not those difficulties may have been able to be mitigated through a vocational rehabilitation intervention.

Q What is your office address?

A 11019 North Dale Mabry Highway, Tampa, Florida 33618.

Q How long has that location been your firm's office, primary office?

A Since approximately 1997.

Q Does CCA have any branch offices?

A No.

Q In the work that you do through CCA, does CCA conduct marketing activities?

A No.

Q Do you have a website?

A Yes.

Q And do you personally review the website from time to time?

A Yes.

Q Is there anything currently on that

website you object to?

A No.

Q Do you have someone in charge of creating and maintaining your website?

A Creating. There's really rarely maintain -- maintenance. If we get a new employee, you know, or someone leaves, we might put their picture of a new person. There's not much maintenance.

Q And is it maintained in-house, or do you have an outside service that does that?

A Outside.

Q I see in your CV, you have written two books; right?

A Thirteen.

Q Thirteen books.

All right. As to the books that you have written, I'm sure you consider them personally to be authoritative works?

A I'd like to think so.

Q Okay. Aside from the books that you have written, first in the field of rehabilitation, are there any publications which are books which you personally consider to be authoritative reference tools?

A I believe I would consider The Valuation of Monetary Damages in Injury Cases to fall under the category that you're describing; Assessment of Earning Capacity would be another one. That's been published in four editions.

Q Right. Those are your books?

A Yes.

Q Okay. In addition to your books, are there any books by other authors which you consider in the field of rehabilitation to be authoritative books and reference tools?

A Yes.

Q What are those?

A One that comes to mind is Foundations of Forensic Vocational Rehabilitation.

Q All right. Any others?

A There are a few others. I couldn't tell you the exact titles as we sit here. But I can tell you one author is Strausner, S-t-r-a-u-s-n-e-r. He's at the University of Wisconsin, I believe.

Q And the book of which you are thinking that was authored by Strausner, what is the subject of that book?

A It has vocational rehabilitation in the title, but I couldn't tell you the exact title as we

sit here.

Q All right. Switching to life care planning and setting aside your books for the moment, are there any books from other authors which you consider to be authoritative, including as reference tools in the field of life care planning?

A Yes.

Q What are those?

A Roger Weed has written several editions of a book. I don't recall exactly the name. I believe it has the word "handbook," something like handbook to life care planning, co-authored by Debbie Berens, B-e-r-e-n-s.

Q Okay. Any others?

A There are several others. Again, I couldn't give you the titles. But the last book I wrote in 2022, published by the American Bar Association, has a good reference list in it. I reference those books because I did have respect for the contents of them.

Q As you sit here today, can you give us an approximate number of how many times you have had your deposition taken?

A Over a thousand.

Q And as to testifying in jury trials,

approximately how many times has that occurred?

A Again, I -- giving you my best estimate, maybe 500 to a thousand, maybe more, maybe less. A lot.

Q And have you also testified, over the years, in hearings and arbitration proceedings?

A Yes.

Q All right. All right. Going to the report you rendered in each case -- and we'll mark them in a little bit -- and by the way, I should have gone through this before, but during the deposition, if there's anything that you want to look at in the way of a document, we will take the time to do what we can to pull up that document so that you can refer to it. Whatever it is, if that's what you want to do, we'll do it.

A Thank you.

Q If at any time you want to take a break, you tell us, we'll take a break. I don't care what the reason is. Even if you want to talk to the government lawyers, we'll take a break if you want to take a break; okay?

A Yes, sir.

MR. TUBIN: We're getting close to an hour or so, I think, so we should take a short

break.

MR. ROMANO: Yeah. Let me just finish my little instructional spiel first.

MR. TUBIN: Go for it.

BY MR. ROMANO:

Q If -- I know that you know this, but if I ask you a question and you don't understand, will you please just tell me you don't understand it?

A I will.

Q Okay. And if there's something where you just don't know the answer to it, will you just please tell me you don't know?

A Yes, sir.

MR. ROMANO: All right. We'll do that. About ten minutes good?

THE WITNESS: Yes.

MR. ROMANO: It is 10:09, so how about 10:20?

THE WITNESS: Thank you.

MR. TUBIN: Perfect.

VIDEOGRAPHER: Off record, 10:10 a.m.

(A brief recess is had from 10:10 a.m. to 10:23 a.m.)

VIDEOGRAPHER: On record, 10:23 a.m.

(Exhibit 2 was marked.)

BY MR. ROMANO:

Q I have handed you what we have marked as Exhibit 2 to the deposition. And can you identify this as a copy of the notice of the deposition and a request for production of documents?

MR. ROMANO: Did I give you the right one? I may have not. I might have given you the -- oh, I see what they did. They put them together. Let me get those back. Probably easier to do it that way.

That's 2. And I'll hand copies to defense counsel.

THE WITNESS: Thank you.

BY MR. ROMANO:

Q I've handed you what we've marked as Exhibit 2. And does this appear to be a copy of the Plaintiffs' Notice of Deposition and Request for Production of Documents regarding this case and your deposition? Is that what it is?

A It appears to be that, sir.

Q All right. Have you seen this before today?

A I think I have.

Q All right. If you go to the -- several pages over, you will see the actual request for

production. Have you seen that?
A Yes.
Q All right. As to the items requested, did you produce all of those items to government counsel?
And just for the record, I'm referring to the request for production that would be on page three, four, five, and six.
A I believe so, yes, sir.
Q All right. Are there any recent -- let's say within the last two weeks -- items that you produced to the government, or had everything been produced well before ten days ago?
A To the best of my knowledge, before ten days ago.
Q All right.
A I have a records custodian who handles this, and any documents that are requested, we provide.
Q All right. I'll come back to that later because there were some documents that were produced either last night or early this morning. I'm going to look at those during the lunch break. And then in combination with this and the new documents, I'll have some questions; okay?

MR. ROMANO: Now, let's mark as exhibit number -- are we at 3?

CERTIFIED STENOGRAPHER: Yes, sir.

MR. ROMANO: 3. This will be the report on Gary McElhiney.

If you would mark that as Number 3.

(Exhibit 3 was marked.)

BY MR. ROMANO:

Q If you would look at that for a moment, Doctor, just to make sure we're looking at the same thing before I start my questions.

All set?

A Yes.

Q All right. Please tell us what it is that you are looking at referencing Exhibit 3.

A This is Exhibit 3, and it appears to be a copy of my rehabilitation evaluation report along with my life care plan for Mr. McElhiney. Also attached is my curriculum vitae. There's also a confirmation form by Dr. Young. I discussed this with you earlier.

There is my testimony list --

Q All right.

A -- as well.

Q And this is your report on Gary Layne

McElhiney, Sr. dated May 8th, 2025; correct?
A Yes.
Q As to Gary Layne McElhiney Sr., did you render any addendum report or any supplemental report?
A None other than what's contained herein.
Q All right. Is this report on Gary McElhiney formatted in a way similar to the way you formatted the reports on the other six Camp Lejeune cases that you assessed?
A Yes.
Q All right. And I'm going to go through this first report in a little more detail than the others to make certain that we cover not only the formatting but the details of the report. But that will save us time on down the line; okay?
A Yes, sir.
Q All right. Going to page two, and I'll just refer to it as "the McElhiney report," that first section at the top of page two is entitled Examiner Backgrounds/Qualifications; right?
A Yes.
Q Where it says Certified Life Care Planner, you're a certified life care planner?
A Yes.

Q What does it take for a person to become a certified life care planner?

A I don't know what the criteria are at this time. But when I became a certified life care planner, to the best of my recollection -- again, this was in the -- sometime in the '90s, early '90s when the credential first came out, there were different components.

One was a scholastic component where you have had to had some courses at the master's and Ph.D. level such as medical aspects of rehabilitation, psychosocial aspects of rehabilitation, standardized testing measurements, and so forth. I don't recall exactly what there were, but there was a scholastic component.

There was a clinical component where you have had to be practicing under someone who was supervised for a certain -- a specified period of time.

Q Practicing what?

A Rehabilitation counseling.

And there were two -- at that point, there were two work samples that were blind peer reviewed of life care plans. And then there was an examination. And there may have been some other

criteria. Obviously, letters of reference, things like that.

Q All right. It states you were a "psychometric evaluator." What is that?

A That is another certification that is governed by the American Board of Vocational Experts. It has to do with being qualified to administer different types of standardized tests.

Q What does "psychometric" mean?

A Psycho is mental, metric is measure; so it's mental measurement.

Q And it states, "I specialize in career guidance, vocational rehabilitation, human resources counseling, and life care planning."

Correct?

A Yes.

Q If you come down to the next section, it is entitled Methodologies; right?

A Yes.

Q All right. A general question as to this report and all of the other reports. Is this report created using any type of a software template?

A I do have a template that I use for my reports.

Q And the purpose of the template, what is

it? In other words, why is it that you use a template in order to create your reports?

A To provide structure and to provide information in an organized way.

Q All right. And that is why when we look at each of these reports, they are structured in a very similar way; right?

A Yes.

Q In many of the sections of the reports -- we can look at one report on one case, then look at another report on another case, and the wording will be identical. Is that due to the templating, or is there some level of cutting and pasting which takes place?

A I don't know that I would agree with you in terms of identical. So, for example, there may be -- and I'm thinking this -- or speaking, my clinical impressions, I may have said, you know, this person's, you know, memory is good, concentration is fair. There might be some identical language by that, but, no, it's not a cut-and-paste. It's not templated. It's all clinical impressions as they're generated.

Q All right. Well, take this section that we're discussing, Examiner

Backgrounds/Qualifications. That section is identical in each of the reports; right?

A All seven of them would have the same because it's my qualifications.

Q Okay. So if it's more generic information, we would likely see that templated?

A Yes. That would be true.

Q But if it's your --

A Well, let me -- I'm sorry.

When you say "templated," I'm not sure how you're using that word, but --

Q And here's how I'm using it. In other words, if I look at each of the seven reports, under this section, Examiner Backgrounds/Qualifications, that wording is going to be identical in each one because you're following the template language; right?

A It's identical in each one. I would agree with that. I wouldn't say templated language. It's who I am so it's not going to change from one report to another. It's the same --

Q If we use that word, "it will not change" --

A Yes.

Q -- "from one report to another."

A It should be identical.
Q All right. When we go to this next section, Methodologies, is that laid out word for word the same in each of the seven reports?
A Yes.
Q All right.
A It should be.
Q Let's go to Methodologies. When you use that word "Methodologies" in the context of your work as an expert witness, how do you define "methodology"?
A Methodologies are procedures that are applied to conduct an analysis.
Q Okay. And do you lay out, in this section, on pages two, three, and four your methodology?
A Yes.
Q In your work as an expert, have there been any occasions where your testimony or your proposed testimony has been challenged with the filing of what are called either Daubert motions or Frye motions or similar types of motions?
A Yes.
Q Has your testimony at any time ever been limited or restricted or stricken by any court for

any reason?

A To my knowledge, never stricken. There have been cases when there's been limitations on my testimony. And they're typical -- they're typically for procedural reasons or a judge's decision that some information might be overly prejudicial such as a criminal history, drug abuse history, things of that nature, that should not be admitted because they would be overly prejudicial.

So, yes, I've had limitations of that type. And in this case, too, limitation on the time I was permitted to examine the plaintiffs.

Q All right. Let me back up and I'm just going to go through it briefly step by step as to Daubert or Frye challenges in Florida or a similar challenge in another jurisdiction which might be under some other case law or statute.

Under those circumstances, has your testimony ever been limited or restricted based upon your not being qualified in any given area?

A Not to my knowledge.

Q All right.

A There was a ruling, I recall, in the First District of Florida, 25 years ago, maybe, had to do with -- I was not to give any standard-of-practice

testimony. And I viewed that more as a cautionary ruling rather than, you know, instructive otherwise because I had no intention of offering any standard-of-practice testimony on medical matters.

Q All right. Would that be a limitation that you were not to comment on any physicians alluding up to the standard of care in terms of medical treatment?

A I -- I interpreted it as a cautionary ruling by the judge.

Q All right. All right.

Moving away from qualifications and to methodology. Have there been any motions challenging your testimony or your ability to testify where the attack was against your methodology?

A Yes.

Q All right. How many times has that occurred? Multiple?

A More than three, four, five times. I mean, I don't know all the times that it is attacked because I'm not always brought into the conversation, but to my knowledge, at least five, maybe five, up to five.

Q All right. Have there been any occasions

where a judge has issued an order or a ruling limiting or restricting your testimony in any way based on an attack having to do with methodology?

A Not to my knowledge.

Q All right. Under Methodology, you refer to -- and I'm right around the middle of the page. You say "For cases involving claims of loss of earning capacity, the RAPEL and Earning Capacity Assessment Theory methodologies were used to formulate our opinions."

That is what it says?

A Yes.

Q All right. And then you lay out here -- am I pronouncing that correctly, RAPEL?

A Yes.

Q All right. And as we look through this section on page two, and then three, and four, does this provide us with your information as to the methodologies you applied to make your assessments in each of these seven cases?

A Yes, sir.

Q All right.

A Now, some of the cases did not have a wage loss claim so methodology would not necessarily be applicable. But the overall analysis in terms of

the damages claim, yes.

Q All right. As to page four where you have these pyramids, and it says Phases of Assessment, and Assessment Processes, then Analytical Processes, tell us briefly what this focus is on, why it's in your report.

A It's in the report because it's a methodology that was applied. This is a -- I actually have a model of it in my office. It's a three-sided triangle, which is called a tetrahedron. And if you saw the model, you would see it is color coded. And the base of each of the sides of the tetrahedron identifies different activities that are undertaken at that juncture.

And the analytical process proceeds from the base to the pinnacle of the tetrahedron which has to do with the evaluation.

So the areas below the pinnacle are identifying different steps, different processes, different type of information that's considered in rendering an opinion of loss of earning capacity. This is from a peer-reviewed methodology I reviewed based on about 25 years of research.

Q And when you say it was "peer reviewed," who peer reviewed it?

A Many people. Individuals who are well known, including Roger Weed who was the -- he developed the RAPEL model that you started off this discussion with. There have been lawyers who peer reviewed it. It was peer reviewed in the Journal of -- well, Rehabilitation Professional.

Q Was it peer reviewed by any person or group of persons where that peer review itself was then published?

A Yes.

Q Where was it published?

A In Rehabilitation Professional.

Q Is that a magazine?

A It's a periodical. Professional periodical --

Q What you'd call a journal?

A -- of the International Association of Rehabilitation Professionals.

It's in my -- well, you'll see there's many citations to it in my CV.

Q All right. As you move to page five, we then come to the section entitled Overview.

You see that?

A Yes.

Q Again, the format of this report, as we

work through it, it is similar to each of the other reports in terms of format?

A Yes.

Q All right. In that first paragraph, you say "He initially reported his Parkinson's disease began in February 2016."

Do you see that?

A Yes.

Q Do you know, in the case of Mr. McElhiney, if he reports that his Parkinson's disease began in February of 2016, specifically what is meant by that as to whether or not it was a time of a diagnosis or whether a time of first seeing signs and symptoms?

A Are you asking me when the diagnosis was actually rendered?

Q No. No. What I'm asking is, when you see this statement "He initially reported his Parkinson's disease began in February 2016."

When you put that statement in your report, do you know, is that the time of diagnosis or was that the time when he began to experience his first signs and symptoms of the Parkinson's disease?

A My understanding from this record is that this is his self-report of when his Parkinson's disease began.

Q All right. Do you know, in looking at your report and in evaluating these records, the time he first began to experience any signs or symptoms which were related in any way to Parkinson's disease?

A I think that question is better posed to a medical doctor. I'm not giving any medical opinions.

Q If you look at that next paragraph, beginning "According to Mr. McElhiney's March 2024 deposition."

Do you see that?

A Yes.

Q You then have information in here regarding where he was stationed, when he was stationed, how long he was stationed, what jobs he held, and the work that he was in. That is important as a part of your assessment; correct?

A Yes. It provides contextual information.

Q Okay. And, Dr. Shahnasarian, you will see that as we go through the report, I may pick out a sentence in an area or a paragraph and you may think or feel I'm taking something out of context. If I do that, will you please tell me? And then we'll read whatever it is you want to read and then we'll

discuss that; okay?

A I'll do the best I can.

Q Okay. We then come on page six to this section, Records Reviewed. Tell us what is in this section.

I know some of these may seem self-explanatory, but tell us anyways so that there's no mistake.

A Well, I tried to give you an overview earlier when you asked me about the methodology that I applied. You'll see a variety of documents. There are some complaint-specific documents that are listed. There are depositions by different individuals that are listed including their relationship to the plaintiff and the date.

There are many medical records that are listed. I would say the majority of these are medical records and assessments. There are reports by plaintiff-retained experts. There are many military records, Social Security records, earning records.

Generally, those are the type of records contained in this directory.

Q All right. When we look at the "Records Reviewed" section in any one of these reports, does

that provide us with a complete list of all of the records you reviewed and assessed in a given particular case?

A Yes. I believe so, sir.

Q Then we come over on page nine to this section Background Information.

What is this section meant to show or lay out in each of these reports?

A There's some demographic information. There's information about the problems the plaintiff is presenting. There's information about the type of treatment, including procedures and medications prescribed, as well as conservative treatment. There's information about the plaintiff's doctors, at least at the time that the report was published, education information, and some work history information.

Q And then, as you go down near the bottom of page nine in the case of Mr. McElhiney, it has Presenting Problems; right?

A Yes.

Q And what do you set forth as to his presenting problems?

A Musculoskeletal issues since the early 1980s; and cranial nerve damage since 1991; pain in

both knees; right leg pain; numbness in left leg; left knee lateral meniscus tear; right knee medial meniscus injury; lumbar radiculopathy; chronic lumbar sciatica; fifth cranial nerve paralysis.

And other health issues: Tremors in head, face, right arm, hand, left hand, right leg; speech production difficulties; trouble with swallowing; hypotension with syncopal episodes; frequent urination; constipation; erectile dysfunction; right foot drop, began using orthotic device in 2023; neuropathy in hands and feet.

Q In your capacity as a specialist in rehabilitation -- by the way, is that how you phrase it? You are a specialist in rehabilitation? Or would you phrase it some other way?

A That's fine.

Q Okay. All right. In your capacity as a specialist in rehabilitation, when you placed the word in here "tremors," what is a tremor?

A It is an involuntary movement, sometimes medically referred to as dyskinesia.

Q And in this instance, he's presenting to you with tremors in his head and his face and his right arm and hand, the left hand, and right leg; correct?

A Yes.
Q We come to another section here on page 46, Consultation with Dr. Michael Young, Parkinson's Disease Expert/Neurologist.
Do you see that?
A I do.
Q All right. First, what was the purpose of your needing to consult with Dr. Michael Young?
A Dr. Michael Young is an expert on Parkinson's -- he's a neurologist who specializes in Parkinson's disease. I do not -- I do not have that training or expertise, and I mentioned to you that I'm not giving any medical opinions. So I had a consultation with him in order to elicit his background in those areas and knowledge of the plaintiff so that I could get information I needed to fulfill my area of analysis.
Q Jumping ahead for a moment, when you created your life care plan for Gary McElhiney, was it based on the consultation and thereby recommendations from Dr. Young?
A In part. It was based on all of the information I had. I didn't rely solely on Dr. Young. I obviously considered all the records I reviewed. I considered the treatment plan that the

plaintiff life care planner prepared. I considered information from my examination of Mr. McElhiney. So it was not solely on Dr. Young. It was an integration of all of the information available to me.

Q When you, as an expert, are creating a life care plan and a treating doctor recommends a particular procedure, let's say two years in the future, but a consulting physician hired by the defense says the procedure is unnecessary, how do you go about reconciling that for purposes of the life care plan you create as the defense life care planner?

A That is the purpose of the consultation that I have with the specialist, is to determine if there, in fact, are differences. And if there are, in fact, differences, I attempt to discern why are there differences of opinion between a treating doctor or a plaintiff-retained expert and a defense expert. I try to make that understanding.

And, again, I'm not a medical doctor. I'm not qualified to make independent medical decisions. But what I am doing in this case is, I am providing a second opinion. So if there is a difference of the type that you're describing, I am giving a

second opinion, and I am going to be relying on the expert available to me for that input; recognizing fully that there is a difference of opinion.

Q All right. And in this case the expert, at least in the McElhiney case, is Michael Young, who was the Parkinson's disease expert hired by the defense?

A That's -- he is hired by the defense, yes.

Q Well, and you rely on that consultation from Dr. Young as a part of your creating and developing that life care plan; right?

A In part, sir. Again, I consider all of the information available to me.

Q In the case of Mr. McElhiney -- and you can feel free to look at the --

A Um-hum.

Q -- any of the records you want, was there any particular item you can look to where Dr. Young and the treating physician disagreed as to an item that was necessary for the future?

A I would -- do you happen to have the life care plan that your expert prepared in this case and I can -- that would help me?

Q We don't have that right here. I mean, we could get that during the break if you want to see

that. Would --

A That would facilitate my --

Q Yeah.

A -- ability to answer your question.

Q Okay. We'll do that.

The key that I'm -- that I'm honing in on here for a moment is simply this: That if there is an area where the treating physician has recommended something for Gary McElhiney and the consulting physician disagrees with that recommendation, what I'm trying to find out is what result you end up with as the life care planner for the defense and how you got there.

A Um-hum. Okay. I understand your question --

Q Okay.

A -- if it's elicited as a question.

Q What we'll do is, during the break, probably during the lunch break, we'll go ahead and get that to you so that you'll be able to look at it; okay? Will that work?

A Fine.

Q All right. Near the bottom of page 46 in the McElhiney report, you say -- and, again, this is still in the section where you're referring to the

consultation with Dr. Young -- "Our discussion also included a review of Mr. McElhiney's unrelated musculoskeletal problems and peripheral nerve issues including radiculopathies. Dr. Young noted PD can affect some of the same areas of motor functioning as Mr. McElhiney's underlying musculoskeletal problems."

Did I read that correctly?

A You did.

Q All right. And then you say "Dr. Young concluded that Mr. McElhiney appears to have a well-supported diagnosis of PD, including motor (bradykinesia) and nonmotor features."

Do you see that?

A Yes.

Q All right. So you know that Dr. Young is fully supportive of a strong diagnosis of the Parkinson's disease for Gary McElhiney, correct?

A My understanding is he believes that Mr. McElhiney is appropriately diagnosed with Parkinson's disease.

Q And as you go over to page 47, in that first full paragraph right around the middle, "He elaborated about Mr. McElhiney's complex medical condition and indicated he would require ongoing

neurological care, along with integrated care for his conditions related to PD."

Correct?

A You read that right.

Q Now, when you are creating a life care plan, let's take a given area, for example, medications which will be needed in the future, my question is: Do you list out the items first that you believe the plaintiff is going to need in the way of future medications and then get that approved by a physician, and perhaps a consulting physician, or does the physician make those recommendations first and then you include them in your life care plan?

A In all cases, I conduct the interview before I consult with the physicians, and during the interview, I elicit from the plaintiff what their prescribed medications are so I know that going into my consultation with the physician.

Then during the consultation with the physician, I review the plaintiff's prescribed medication protocol and at the same time look at what is in the plaintiff-retained life care planner's life care plan, and then we discuss which are related and which are not related.

And in that way, I ultimately defer to the consulting physician for what medications should be included in my life care plan.

Q When you include medications in your life care plan, are these brand name drugs or generic?

A Whatever is being prescribed. If it's a generic, then we use a generic. If it's a brand name, we use brand name. Whatever the treating doctor prescribed is what we use --

Q All right.

A -- unless I'm instructed otherwise.

Q Instructed otherwise by --

A To use -- to use a different medication by the consulting doctor.

Q All right. So but that recommendation would be from a consulting doctor or a treating doctor; right?

A I always use the treating doctors. But if there's an override, then I'll defer to the consulting doctor.

Q All right.

A As you elicited from me earlier, I don't prescribe medications.

Q I understand that. What I just want to make sure of and clarify before moving on to the

next area is this: You don't put together a life care plan, and then once you've got what you want the life care plan to be, you then go to a doctor and say, Now I want your support for it? You wouldn't do that, do you?

A That's true. I don't do that.

Q All right. That would be unsatisfactory life care planning to do it that way; right?

A I personally don't do it that way. I don't know if that violates a, you know, ethic code, their standard of practice. But it's getting somebody to do this rubber stamp on a life care plan that's published, no, I don't do it that way.

Q All right. And you don't do it that way for what reason?

A Because I believe it's appropriate to do it the way I do it.

Q All right.

A And because I'm not a medical doctor so I believe it's appropriate to have an interactive discussion. And some medical doctors do not like to be consulted with, and they'll ask you to put things in writing. That's not my preferred way to go. They'll say, Give me questions, and I'll answer the questions.

But in my opinion, it's more, let's say, beneficial to have an interactive discussion and discuss why certain recommendations are included or not included.

Q All right. We then come to a section, Summary and Impressions. And I note you have this in each of your reports. What is the purpose of this section, Summary and Impressions?

A Well, it's a lengthy report. There's a lot of information, including medical information which appears in the appendixes from medical records. So this is basically, as the heading states, intended to be a high-level summary and boiling down, okay, well, what are my opinions.

Q If you come over to page 48 in the McElhiney report, you'll see, near the bottom of the paragraph beginning with the words "Concerning his claimed loss."

You see that?

A Yes.

Q All right. It says "Concerning his claimed loss of earning capacity damages, during my February 12th, 2025 clinical interview of Mr. McElhiney, he apprised me that he 'stopped being a truck driver in 2014,' and he then pursued

part-time employment from 2015 through early 2016, well before his July 18th [sic] PD diagnosis."

Do you see that?

A Yes.

Q Here's my question. First, it's your understanding he had the diagnosis of Parkinson's disease made in 2018; right?

A Yes.

Q Okay. When was it, pre-diagnosis, that Gary McElhiney first began to experience signs and symptoms which were being caused by his Parkinson's disease?

A I think that's a question better posed to a medical doctor. That is a medical question.

Q All right. That's not something that you know; correct?

A I'm not a medical doctor.

Q That's not something you've considered; correct?

A No. I considered it but I'm not giving opinions on that matter.

Q Well, if you've considered it, just tell me what is it that you considered about that.

A That it's possible that he did have some manifestations of Parkinson's before it was formally

diagnosed.

Q Okay. Let me give you an example; okay?

Today is the 17th of February. Assume you have someone who today begins to experience significant chest pains, and the person is 70 years old, and this goes on for 30 days and it gets worse every day, and for whatever reason no physician can be consulted.

And on day 30, the person sees a physician and the physician says, You have significant cardiac disease, and gives a stamp of that diagnosis and then begins treatment. In that instance, the diagnosis is made on day 30, but for 30 days before that, the person is experiencing signs or symptoms of the heart disease.

Do you follow that so far?

A Yes.

Q Okay. For purposes of your analysis, as to when a person can or cannot work, or has the ability or doesn't have the ability to work, do you go by the diagnosis date or the date when the person began to experience the signs and symptoms of a disease and illness or condition that will later be diagnosed?

A In your hypothetical, we need to consider

both.

Q All right. In that hypothetical it would be essential to consider both; correct?

A I believe it would be important to consider both. If you want to use the word "essential," I'm okay with that word as well.

Q Okay. All right. This section in each of these reports entitled "Summary and Impressions," is that the section meant to contain your opinions?

A Well, there are opinions in other areas, but my overarching opinions, I would -- that's a good way to put it. I gave you an example earlier. In the Mental Health section, though, there are my opinions in terms of how the person presented cognitively, affectively, interpersonally.

Q All right. And then you have an area in this report, Appendix A, Review of Medical Records. What is this section all about and as it relates to each of the seven cases?

A Yes. This is information obtained from medical records. It's verbatim statements, chronologically organized and categorically organized. The categories are results of diagnostic testing, procedures, and assessments.

Q All right. And then you come to your Life

Care Plan Prepared for Gary Layne McElhiney Sr. And that was prepared as of the date of May 8th, 2025; correct?

A Yes.

Q You have in the report a Work History chart. What is that chart meant to show us?

A Mr. McElhiney's Work History chart appears on page 13. There's three different columns. It has his Job Title, his Name of Organization, and his Dates of Employment. This is chronologically organized, reverse chronological order, actually.

Q Okay. It's meant to have a summary of the work history in a chart form so it's a little easier to view?

A Yes, sir.

Q And if we go to page 14, you see a little bit beyond the middle of the page, the paragraph beginning with the words "When asked about adaptive."

Do you see that?

A I do.

Q All right. It says "When asked about adaptive aids Mr. McElhiney was using during my exam, he cited only his deep brain stimulator device. He apprised me he has hearing aids, though

he was not wearing them."

Is that what it says?

A Yes.

Q All right. And the deep brain stimulator device, do you know whether it was turned on or off during the time you interviewed him?

A I believe it was turned off.

Q Okay.

A It had just been implanted, I believe, 15 days before I interviewed him.

Q All right. Do you have it documented that it was turned off at the time of the interview?

A No.

Q What makes you think it was turned off?

A Because it had been relatively recent onset since the interval when it was implanted and that time I saw him.

Q And that would make you think it was therefore turned off?

A Or he had just been continuing to adapt to it.

Q Is it fair to say you don't know whether it was turned on or off at the time of your interview? Without guessing.

A I can't recall exactly, sir, because it's

been a while ago. But as we sit here, my best recollection is it was not turned on because it was still relatively new.

Q All right. Is there any other reason you know of other than this, because it was relatively new, that would make you otherwise think it was not turned on?

A No.

Q In that final paragraph on page 14, it notes "In 2016 or 2017, Mr. McElhiney recalled, his wife left the workplace to provide him caregiver services."

Correct?

A That's what it says.

Q So you understood during that time period, as well as by the time of your interview, that his wife was his caregiver?

A Yes.

MR. ROMANO: You want to take a break?

MR. TUBIN: I think now is a good time, if that's okay with you.

VIDEOGRAPHER: Off record, 11:17 a.m.

(A brief recess is had from 11:17 a.m. to 11:36 a.m.)

VIDEOGRAPHER: On record, 11:36 a.m.

THE WITNESS: Mr. Romano, you had asked me the last question. I just want to maybe supplement my answer to that.

BY MR. ROMANO:

Q Yes. Sure. Go ahead.

A You had asked me whether I knew if Mr. McElhiney's deep brain stimulator device was on or not.

Q Yes.

A And I told you it was over a year ago, I don't recall exactly. But after we took the recess, I looked at my report. It says "was using" his DBS, which leads me to believe that I was aware that he had it on. It is progressive active in my report so I do believe I was aware that he did have it on.

Q All right. What page of your report are you looking at?

A Page 14, third paragraph in the bottom.

Q Tell us what it says.

A "When asked about adaptive aids Mr. McElhiney was using during my exam, he cited only his deep brain stimulator device. He apprised me" he was -- he has hearing aids, "though he was not wearing them."

But the operative words are "was using

during my exam."

Q When you have a patient with Parkinson's disease, if you learn at some point that person has a deep brain stimulator into his brain, what difference does it make to you as the interviewing rehabilitation specialist and life care planner as to whether or not it is on or off during the interview?

A I think it's probably more material to a medical doctor than it would be to me because I'm not making any independent judgments. However, if the person is complaining about it either being effective or ineffective, then I would -- that would have some materiality to me.

Q All right. Have you ever had the occasion to interview a patient with advanced Parkinson's disease where you were able to watch him or her with the deep brain stimulator on and watch them at another time with it off?

A No. I can't think of an occurrence of that.

Q If we go to the Exhibit 4, which I've placed in front of you. And I've provided copies to counsel. This appears to be the report on Frank Wayne Mousser. Do you have that?

(Exhibit 4 was marked.)

THE WITNESS: Yes, sir.

BY MR. ROMANO:

Q All right. Just take a look at it a moment there. Take your time just to make sure you're familiar with it, and then we'll go through some questions.

A Yes, sir.

Q And you're aware that Mr. Mousser is -- has suffered through both kidney cancer and a later diagnosis of bladder cancer; correct?

A Yes.

Q Is this report formatted in a similar way to the other reports?

A Yes.

Q If you will go to your section on Summary and Impressions, page 45. Are you there?

A Yes.

Q Okay. And one question, before I move on from there. When you work as a rehabilitative specialist and are hired as an expert in a case and you do a life care plan, do you make any determinations at all with respect to either liability or underlying causation?

A No.

Q You leave that up to others including, in many instances, physicians; correct?
A Yes, sir.
Q All right. So if you take someone in a case like this, Frank Wayne Mousser, when you render an opinion, it is based on the condition that he has as of the time you see him in terms of your future -- your recommendations for his future. Is that accurate?
A Yes. It's not prospect- -- it's not retrospective. It's prospective, going forward, if that's what you're asking.
Q Right. So, for example, when you create and develop a life care plan, your concern is not on what got the person into that condition. Your focus is on what his or her needs are for the future?
A Yes.
Q If you come over to page 47, I want to go through this paragraph, near the top. "Additionally, Mr. Mousser is pursuing a claim of loss of earning capacity he associates with his MCBCL experiences."
All right. Do you see that?
A Yes.
Q When you use that phrase "loss of earning

capacity" in this paragraph, are we talking about loss of earning capacity in the future?

A No.

Q Are we talking about loss of earning capacity in the past?

A Since he left the workplace --

Q All right.

A -- or earlier, depending on when he's -- when he's alleging his condition precluded him from working.

Q From Dr. Shahnasarian's perspective, is there a difference between lost wages in the past and loss of earning capacity in the past?

A I'm not sure I understand what you're asking. Can you rephrase it, please?

Q Sure.

From your perspective and your work as an expert, when you were assessing a person's past earnings, is there a difference between lost wages or lost earnings in the past and loss of earning capacity in the past?

A Yes.

Q All right. What is the difference, from your perspective?

A A person may be able to continue to work

but in a compromised capacity where they're not able to realize their -- let's say true earning capacity before they became disabled.

So, for example, a person theoretically may have worked full-time throughout their career and then an event came, and they're still working but they're only working half time so they're -- and there are cases like that where that happens and their earning capacity is diminished even though they're still working.

Q And then when you are assessing loss of future earning capacity or loss of ability to work in the future, what do you mean by that? Define that for us.

A That is an impairment to someone's ability to optimize their earning capacity or their earning potential.

Q Here, again, on page 47, you state "Mr. Mousser contends that problems with UTUC, including an October 20, 2020," and you see this "nephroureterectomy he underwent adversely affected his ability to maintain his employment. He continued to work in the auto industry after he left CAM, and he last worked as a sales manager with Mercer Motor Company between January and

October 2023."

Did I read that right?

A You did.

Q All right. You then state "Again, he conveyed kidney-related problems interfered with his ability to work. Mr. Mousser's wife testified on March 2024 that her husband ceased working and retired, 'because it was too taxing on his health. He had a lot of pain. His blood pressure would be up... His eyes would be puffy... Those symptoms happened at least a few times a week.' The Moussers assert that Mr. Mouser's MCBCL water contamination incidents shortened his worklife."

You see that?

A Yes.

Q All right. Is it important for you to take into consideration the observations of a man's wife as to what he can or cannot do in his work?

A In some cases, it is.

Q Well, in this case, was it --

A Yes.

Q -- important?

A I did.

Q Okay.

A I took it into consideration.

Q And is it important to take into consideration the symptoms and the pain being expressed by an individual as to his own observations about his health and how it affects his work?

A It's something that is important to consider and I always do consider it.

Q All right. Why is it important to consider that?

A Because it's a subjective report and I have to consider it with respect to not just his subjective report but all of the evidence, but I am interested in a person's self-report of what their limitations and capacities are.

Q All right. When you take into account those considerations, do you go back in your work and assess that person's work ethic throughout life?

MR. TUBIN: Objection, form.

BY MR. ROMANO:

Q Is that important?

A I'm not sure how you're defining "work ethic" but some of the metrics that I do hone in on are their work propensity, stability of their career, stability of their earnings history, trajectory of their career development, all of those

things.

Q All right.

A I'm not sure if that's synonymous with how you're defining "work ethic."

Q Well, you know at some point in time, Mr. Mousser took it upon himself to join the United States Marine Corps; right?

A I understand he was enlisted, yes, and he served and he was honorably discharged, is what I understand.

Q Okay. But does that, for example, become a factor you consider that someone at a very young age volunteered for military service in the United States Marine Corps? Is that a "tell" for you about his attitude towards work?

MR. TUBIN: Objection, form.

THE WITNESS: I think it has to be considered along with all other information.

Some people go into the military -- one of the people was, I believe, Mr. Sparks, for reasons that he associated with the dysfunctional family life and that was his motivation for going into the military service.

People have different motivations for pursuing military service, sir.

BY MR. ROMANO:

Q All right.

A There's not a one-size-fits-all.

Q As to Mr. Mousser, do you know the reasons he had made a decision to go into the United States Marine Corps?

A I don't recall that we had that discussion. Perhaps it's in my report. If you have a place you can refer me to, I'm glad to look at it. But as we sit here, I don't recall.

Q Well, my real overall question is simply: Is it something you want to consider? In other words, the work history of an individual, and as a part of that the individual's work ethic, is that something to consider when you're trying to assess earning capacity and a person's employment?

A Again --

MR. TUBIN: Objection, form.

THE WITNESS: -- I'm not sure how you're defining "work ethic" but I told you some of the metrics that a vocational expert will examine, the ones I mentioned to you, stability of their work, their work propensity, the trajectory of their career development, types of work that they've initiated, those are

important factors.
BY MR. ROMANO:
Q All right.
A So I do consider all of those factors that you had mentioned.
Q True, you are familiar with the phrase "work ethic?"
A Yes.
Q All right. What is your definition of "work ethic"?
A Well, as an employer for my employees, when I am assessing work ethic and giving performance appraisals and raises, and, you know, things of that nature, perhaps similar to you, who goes above and beyond their job responsibilities, who is there early, who is there late, who does more than, you know, their job description says to do.
Q All right.
A I think everybody has a different definition, but as an employer and you're asking me personally, those are some of the things that I look for.
Q All right. If you have someone with a good work ethic who has a desire to work, to do a job and to do a job well and to be steady and solid

in that job, that is an important factor to consider in terms of the likelihood of that person wanting to continue down the path with a good work ethic; right? That makes sense?

MR. TUBIN: Objection, form.

THE WITNESS: I'm not sure I'm following you. But there's an adage in psychology, the best predictor of future behavior is past behavior. I think that's what you're alluding to.

BY MR. ROMANO:

Q And you opine on page 47 "I am unaware of any evidence that associates a medical basis for Mr. Mousser being unable to work as an automotive salesperson/manager secondary to his UTUC."

Do you see that?

A Yes.

Q And the basis for your opinion is what?

A The paragraph above indicates --

Q On page 47?

A Yes, sir. There's a citation from Mr. Mousser's treating urologist on July 24, 2024. He said that he did not advise Mr. Mousser to cease working. He said he would have "said no, do not stop working" if Mr. Mousser had asked him.

There's also a discussion of Mr. Mousser's former treating nephrologist, Dr. Daniel Kevin Flood, and he provided similar testimony in August of 2024. He said he would have encouraged Mr. Mousser to maintain his employment.

So those are two treating doctors. And I'm not aware of any medical advisement that Mr. Mousser cease working.

Q Any other items you considered to form your opinion on this point?

A Well, down in the same paragraph, I did have consultations with Dr. Stadler and Dr. Johnstone. Dr. Stadler is an oncologist. Dr. Johnstone is a nephrologist. And their opinion was similar to the treating doctors, that there were no physical disqualifications from Mr. Mousser continuing his former employment in auto sales.

Q And if you go back up to page 47, you see where his wife said that he has ceased working? You see where I'm pointing to?

A No.

Q It's the paragraph that begins with the words "Additionally, Mr. Mousser is pursuing."

You see that?

A Yes, sir.

Q Okay. Go down several lines and you'll see Mr. Mousser's wife testified on March 2024 that her husband "ceased working and retired because it was too taxing on his health."

You see that?

A Yes.

Q "He had a lot of pain."

Right?

A Yes.

Q She says "His blood pressure would be up."

Yes?

A Yes, sir.

Q She says "His eyes would be puffy."

Yes?

A Yes.

Q And then it said "These symptoms happened at least a few times a week."

You see that?

A Yes, sir.

Q If you go over to page 48, you then state your opinion up at the top on those two paragraphs -- correct? -- about work?

A I do.

Q All right. And go to the life care plan, please. And specifically page seven of seven of the

life care plan.

You there?

A I am.

Q Okay. I'm just picking these out as an example. But on page seven, it says at the top, for the item, Cystoscopy.

You see that?

A Yes.

Q And then it says "Duration, year one"; and then "Frequency, one time"; right?

A Yes.

Q Okay. And then to the right, it has estimated cost, $509.21 to $631.04 each time; correct?

A Yes, sir.

Q All right. Here's my question: What is the source of information to you to determine that range of cost? And if there's a place in the document you can refer us to, please do.

A Yes. If you look in the footnote in the document, you'll see the source of the cost.

Q All right.

A There's two --

Q And the source for this is right there on page seven --

A Yes.
Q -- at the bottom of the printed areas; right?
A Yes.
Q Okay.
A Underneath the entry, you'll see the source specified.
Q Okay.
A So here --
Q What is the source?
A There are two sources.
Q What?
A These are both medical databases, FAIR Health and Context4 Healthcare.
Q Okay. When you use that phrase "medical database," what is a medical database?
A There's a description of these two medical databases on pages that precede page seven that you just referred to.
Q What is a database, though?
A It's a compilation of medical bills that are sorted by CPT codes, which are billing codes used in the medical profession.
Q All right. And is it these CPT codes that you rely upon from these databases to determine the

cost you have put here for these items on page seven?

A In part.

Other parts to it include the geography. So these are all specific to the locale where Mr. Mousser lives, and also the percentiles that we use. We used the 50th and the 75th percentile.

Q All right. Explain that.

A Within a distribution of scores, or numbers in this case, or dollar values, the 50th would be the median, the exact midpoint. And then as you go to the right of the bell curve, 60th would be 60 percent of the values are higher, 40 percent are -- I'm sorry. 60 percent are lower, 40 are higher. When you get to the 75th, you would have 75 percent are lower, 25 percent are higher.

Q All right. When you go to get the cost for this particular -- this cystoscopy, where do you, Dr. Shahnasarian, go to physically to look? Is it a site on the internet? Is it a book? Where is it? Physically, where do you go to find this information?

A There's a book called Physicians Fee Reference that specifies CPT codes. And the CPT codes are pretty universally used.

There are two different databases that I subscribe to, the ones that are mentioned there, FAIR Health and Context4 Healthcare.

Q All right. Do you give any consideration when completing a life care plan to what a patient would have to pay privately if he were to go to a private physician and pay cash out of his or her own pocket for a procedure such as a cystoscopy?

A These are non-negotiated, non-discounted rates that are included in the database.

So this is what you would pay if you were a private payor. There are no collateral sources. There's no insurance. There's no Medicare that is offset.

Q So if Frank Wayne Mousser were to go on his own to get a cystoscopy, the range he would pay in his geographical area would be $509.29 to $631.04? Is that what you're saying?

A Yes. Within a reasonable degree of rehabilitation certainty, correct.

Q When you go to this reference to make these cost determinations, do you do any research to determine the source upon which the author or writer of that publication did in order to arrive at the conclusion that you are utilizing?

A I'm not certain I understand your question. These are very widely accepted within the rehabilitation profession. In fact, your expert used the same two databases.

Q No. My question is this: If you want to find out the cost of a CT scan, because you're going to put it in a life care plan, you go to that reference book; right?

A Well, it's a database.

Q Database.

A Okay.

Q Well, is it a -- I thought you said it was a book.

A Physician Fee Reference is a book that you get the CPT codes from.

Q Okay.

A But the databases provide the billing information.

Q Okay. Do life care planners, including yourself, typically then go to research, well, what is the source upon which they base their information to put their CT -- the code together?

A I'm not sure I'm following you but these are medical bills. They're millions of medical bills. If you look at the description on page four

and seven, I believe one of them -- there's 493 different geographic areas.

Q Let me -- let me rephrase the question.

A 32 billion billed procedures --

Q Yeah.

A -- included in this database. And it's updated every six months.

Q Okay. What I'm trying to find out is, in the real world when people go in for a procedure, what are they having to pay for that procedure? Are you telling me what you have here in the life care plan, those are real world numbers as to what an individual would have to pay if he were to go private pay?

A Within a --

MR. TUBIN: Objection, form.

THE WITNESS: Within a reasonable degree of certainty, the numbers I have are reasonable estimates within the locale in which Mr. Mousser resides of what he would pay. These are non-discounted and non-negotiated rates.

BY MR. ROMANO:

Q In the case of Frank Wayne Mousser, did you prepare an update life care plan dated May 23rd,

2025?

A Yes.

Q All right. You see that at the back? It should be way at the back.

A I recall I did prepare an update for him, yes.

Q Okay. My question is simply this: What was the reason which made it necessary for you to prepare an update life care plan which was issued May 23rd, 2025?

A Because he disclosed to me a new medical problem when I examined him, which was the bladder cancer. We knew about the kidney cancer but we did not know about the bladder cancer. So I just learned about that when I interviewed him, and I wanted to have an opportunity to consult with Dr. Stadler and Dr. Johnstone regarding any change to the initial life care plan based on his new problem with the bladder cancer.

MR. ROMANO: Let's go off the record, please.

VIDEOGRAPHER: Off the record, 12:07 p.m.

(A luncheon recess is had from 12:07 p.m. to 12:56 p.m.)

VIDEOGRAPHER: On record, 12:56 p.m.

(Exhibit 5 was marked.)
BY MR. ROMANO:
Q Good afternoon, again, Dr. Shahnasarian.
A Good afternoon.
Q I've handed you what we have marked as Exhibit 5. And have you taken a look at that where you can identify this as being the Rehabilitation Evaluation of Edgar Allen Peterson IV, dated May 8th of 2025?
A Yes, sir, it appears that way.
Q The format of this report, is it similar to the format of the other six cases?
A Yes.
Q If you come over to page five, you see at the top that he was at Camp Lejeune from January 1975 to January 1977 for a total of 24 months while serving in the US military --
A Yes.
Q -- right?
He reported his Parkinson's disease began on July 1st, 2001. Is that what it says?
A Yes.
Q All right. Do you know what that means when he says "My Parkinson's disease began on 2001" without speculating as to what he meant by that?

A Well, I don't want to speculate on any of my testimony. But my interpretation of what he said is onset -- I'm -- I'm interchanging the word "began" and "onset." Again, he's not a medical doctor or a neurologist.

Q And then around the middle of the page, it says -- page five, "During Mr. Peterson's February 2024 deposition, he used a text-to-speech software device called NaturalReader when he could not verbally answer. Throughout the testimony, there were issues reading and understanding the text-to-speech software."

Correct?

A Yes.

Q And then you come down to this indented and italicized paragraph where he states during his February 1st, 2024 answers to interrogatories "I was terminated from my associate attorney position with the Hardison Law Firm suffering a staggering loss of income. I have lost the ability to walk. I cannot speak coherently. I have lost my sense of smell. I can no longer produce a discernible writing in print or cursive. I lost my independence upon the voluntary surrender of my Tennessee's driver's license."

Do you see that?

A Yes, sir.

Q Between the time he was discharged from active duty in the United States Marine Corps and the time he went to work for the Hardison Law Firm, do you know what he was doing to make a living?

A I have his work history on page 11 of my report and it indicates that after the Marine Corps he worked as an Assistant District Attorney General in Tennessee. And then he also worked as a Special Assistant US Attorney during that interim period. I understand he was not compensated in the latter position. And then he joined the Hardison Law Firm in 2000.

Q And the years he was with the District Attorney's Office, were you aware that he was a prosecutor for the State?

A Yes.

Q All right. And you're aware of the rigors involved of trial and trial lawyering; correct?

A I am, sir.

Q All right. You're certainly aware of the rigors involved of being an expert because you've been in court many times yourself; right?

A True.

Q All right. And in doing the work he was doing as a courtroom advocate, it was necessary for him at all times to be someone who was physically capable and alert in terms of mobility; correct?

MR. TUBIN: Objection to form.

THE WITNESS: In terms of the exertion, using the United States Department of Labor nomenclature, I would characterize his exertional demands as light, being a trial lawyer, but cognitively complex.

BY MR. ROMANO:

Q In your work, have you ever considered exactly why it is that an individual who is thought processing with intensity all day, while sitting at a desk, goes home and is exhausted, exhausted from the work?

MR. TUBIN: Objection to form.

THE WITNESS: Have I ever considered that?

BY MR. ROMANO:

Q Yes.

A Sure.

Q The ability of a courtroom trial lawyer to verbally communicate is vital; correct?

A It's an essential function of the job.

Q And another essential function of the job

would be reasonably speedy thought processing while you're on your feet advocating a position in the courtroom; right?

MR. TUBIN: Objection, form.

THE WITNESS: You have to be able to think on your feet quickly.

BY MR. ROMANO:

Q Yes.

A You have to integrate information. And thought processing is another important cognitive capacity in that job.

Q And over the years, in your work, you have certainly run into thousands of trial lawyers on the plaintiff or defense side; right?

A Probably over my career.

Q Okay. On page six of the report, you then move to your Records Review section. And that goes on for -- up until page eight where you then start with the Background Information section; right?

A Yes.

Q And in this instance -- and I'm moving over to page 38 -- you've consulted with disease expert Dr. Michael Young who is a neurologist; correct?

A Yes, sir.

Q How many times did you consult with Dr. Young regarding Eddie Peterson?

A We had one interactive consultation and then we had exchanged correspondence.

Q All right. And the interactive exchange, that was April 9th of 2025 where you consulted for 45 minutes with Dr. Young?

A Yes.

Q All right. Was that in person or via telephone or via Zoom?

A Zoom, I believe.

Q You come to page 40 near the top "In late 2004, Mr. Peterson underwent implantation of a deep brain simulator."

Correct?

A Yes.

Q And then below that in the next paragraph Dr. Bertorini, a neurologist who previously treated Mr. Peterson, opined that his patient's" conviction -- "condition is progressive and incurable."

Correct?

A Yes, sir.

Q It also states "Mr. Peterson's Parkinson's disease sequelae has included problems with falling

and inpatient psychiatric admissions."

Correct?

A Yes.

Q And in the next paragraph below, you see where a physician had characterized Eddie Peterson's condition as "severe"; correct?

A Yes.

Q Come over to page 41, please, that second paragraph down. "Mr. Peterson apprised me he did not request accommodations before his dismissal. He stated 'no physicians said I couldn't go back to work,' and he denied applying for any job after his severance. He and his wife described an approximately 2-month self-employment attempt Mr. Peterson initiated after" the time he left work at that law firm.

"The Petersons conveyed Mr. Peterson's PD symptoms -- including tremors, fatigue, and cognitive difficulties -- impaired his ability to persist in his self-employment. Mr. Peterson has not had subsequent employment or made vocational rehabilitation attempts."

Is that what it says?

A Yes.

Q He states that the "Parkinson's disease

symptoms -- including tremors, fatigue, and cognitive difficulties -- impaired his ability."

Did you ask him how it impaired his ability to work?

A You'll see on page 36, there's a discussion to that end. He identified his tremors in his hands, fatigue. His wife provided some supplemental information about concentration. She indicated the fatigue also was a main factor.

And, of course, there's some testimony from his prior employer.

Q All right. And where do you have that noted? Which page?

A Page 34, has prior employer, Mr. Potter, near the bottom.

There's some other testimony from -- yeah, Jerry Potter, June 2024.

Q Okay. And if you look on page 41, you will see, going to that second to the last paragraph there where it says "Based on my review of Mr. Peterson's medical records, clinical interview of him, collateral information his wife provided, and consultation with Dr. Young, within a reasonable degree of vocational rehabilitation certainty Mr. Peterson's capacity to continue work as an

associate lawyer expired on or about the time he left the Hardison Law Firm.

"The constellation of his PD symptoms exempted him from continuing to work in his former capacity. If not for the PD symptoms, it is reasonable to presume Mr. Peterson would have had a worklife expectancy between the ages of 65-67."

Correct?

A Yes, sir.

Q All right. Now, getting very basic for a moment. What is the difference between life expectancy and worklife expectancy?

A Life expectancy is how long you're expected to live. Worklife expectancy is how long you're expected to remain in the workplace and earn wages.

Q All right. To what extent do you give consideration to formulate your opinion by considering how long a given individual intends to work as opposed to how long statistical databases suggest he might work?

A I considered that --

Q All right.

A -- as well as other factors.

Q All right. Well, what are the other

factors you consider in prognosticating how long somebody would have worked if someone you learned has expressed a desire to work well into his 70s?

A Other factors that I consider are where the person is at in their worklife cycle. I consider factors such as financial need. So if someone is in their early to mid 60s and has a big mortgage they have to pay and they tell me that they want to work five more years, that's very credible.

Health problems the person may or may not have could be another factor. Personal factors of myriad types, having to pay a big alimony when you're in your 60s, young kids, there's many factors that can extend a worklife beyond the traditional worklife years.

Q Did you ask Eddie Peterson how long he intended to work?

A I believe I asked him about his career plans, which would embed that question. I don't believe he stated any time frame beyond the traditional worklife.

Q What is the traditional worklife?

A Typically age 65 to 67, according to Social Security guidelines.

Q And does that mean typically that's when

people do retire or typically that's when people think they may want to retire?

A It depends. Some vocations people retire earlier such as people who do heavy labor. This man was not doing heavy labor in his career. He was doing light-duty work. But you'll see in some occupations, construction work, for example, some of the skilled trade occupations, they have an earlier than traditional worklife which is 65 to 67 according to Social Security guidelines. Every case is different.

Q Are there any guidelines for professionals such as lawyers or life care planners --

A I mean --

Q -- in terms of worklife expectancy?

A I don't know about life care planners or lawyers. I don't - I'm not familiar with anything.

Q Are there any such --

A But there are others -- for example, the American Medical Association, they had a publication that they published every two years, Social Economic Characteristics of Physicians, and it was broken down by many factors, including physician specialty area.

So, for example, the AMA found that

surgeons tend to have a shorter worklife than primary care doctors and their earnings peaked earlier. There was a curvilinear relationship between -- not, likes. For example, a trial lawyer might have a linear earnings curve. But, yes, I am familiar with some publications of professional associations that address worklife.

Q On page 41, you state "While Dr. Young conveyed to me that Mr. Peterson was likely incapable of performing the type of cognitively complex work required of him as an associate lawyer after 2003, he opined Mr. Peterson likely possessed the residual capacity necessary to perform" lex -- "less cognitively complex work after his employment with the Hardison Law Firm ended."

Correct? That's what it states?

A Yes, sir.

Q "I discussed with the neurologist/PD expert employment that would have made use of Mr. Peterson's transferable skills such as conducting basic legal research and reviewing/proofreading legal documents. And Dr. Young noted that employment of these sorts would have been within Mr. Peterson's residual capacity."

Is that what it states?

A Yes.

Q All right. And then you state "My review of Mr. Peterson's records has led me to conclude that he would have been able to persist in the workplace working in a reduced, less remunerative position, until approximately mid-2004 to mid-2005. Thereafter, my analysis has led me to conclude it is less than probable that Mr. Peterson would have been a vocational rehabilitation candidate."

Did I read that correctly?

A You did.

Q And then you have your Records Review starting on page 44, followed by your life care plan for Eddie Peterson; correct?

A Yes, sir.

Q All right. And you note, as a part of your work, he graduated from law school back in 1973; right?

A Yes.

Q Then he went into the US Marine Corps and ultimately became a member of the US Marine Judge Advocate Division, or JAG officer; right?

A Yes.

Q And you learned that when he left the Hardison Law Firm in 2003, he started receiving

disability benefits; correct?
A He did.
Q And those benefits came through the Social Security Administration; correct?
A Yes.
Q And Social Security had determined, obviously, that he was totally and completely disabled from work; correct?
A They did.
Q The Social Security Act defines disability as "The inability to engage in any substantial, gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months."
That's the definition; correct?
MR. TUBIN: Objection to form.
THE WITNESS: I don't have it memorized but I will accept if that's how you're representing it.
BY MR. ROMANO:
Q All right. And so that I understand it, your opinion is that Eddie Peterson would have been able to persist in the workplace working in a

reduced, less remunerative position, until approximately 2004 to mid-2005; right?

A Yes, sir.

Q If you go to that period of 2000 to 2003, what is your understanding of what his daily responsibilities were working as a law firm associate at the Hardison Law Firm?

A His former -- well, a letter that he wrote to the Social Security Administration said that he had been involved in 300 jury trials with the Office of District Attorney. Okay. That was before Hardison.

I believe he tried maybe eight cases or so with Hardison, is what he told me, but he was a litigator.

So to that end, he was taking depositions. He was conducting research. He was writing briefs. He was arguing, did hearings and trial.

Basically performing the full scope of job responsibilities you would expect of a trial lawyer.

Q All right. Those responsibilities, would you agree, required mental acuity and alertness on a steady, continuous basis when he's doing that work; correct?

A Yes.

Q All right. And physically, you have to have the stamina to be able to conduct yourself as a high-level advocate when you're in the courtroom or taking depositions?

A Yeah.

MR. TUBIN: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q All right. Did you ever see the letter that was written back on June 26th of 1991 by the Attorney General of the United States to Eddie Peterson? The Attorney General at the time, Dick Thornburgh.

A There's thousands of pages that I -- tens of thousands of pages. I can't recall that specifically. But if you see it in my directory and can identify it, then perhaps I can remember --

Q I'm just asking if you remember seeing it. If you don't remember seeing it, let me just -- let me ask you a question.

Assume that on June 26th of 1991, the Attorney General of the United States of America wrote a personal letter to Eddie Peterson expressing appreciation for Eddie Peterson's role in a very important and successful prosecution, and thanking

him for his devotion to the system, hard work, and for being successful in that prosecution.

Assuming that to be true, does that tell you something about the kind of person we're dealing with, with Eddie Peterson, in terms of his work ethic and drive and ability to complete tasks?

MR. TUBIN: Objection to form and foundation.

THE WITNESS: It certainly is very positive and it does tell me -- yes, it tells me that he obviously impressed his supervisor.

BY MR. ROMANO:

Q By your records, you see that he was involved, when he was a prosecutor, in over 300 jury trials; right?

A Yes.

Q But as I understand your opinion, it's that as of December 2003, he had transferable skills to conduct basic legal research and reviewing/proofreading of legal documents; correct?

A Yes.

Q And that -- does that opinion come from you or does that come from Dr. Young or a combination?

A Combination, plus the records --

Q All right.
A -- plus his wife's statements.
Q Do you know if Mr. Peterson was conducting basic legal research and reviewing/proofreading legal documents in his role as a trial attorney?
A More likely than not, he was doing that kind of work while doing other more complex work and multi-tasking.
Q In your opinion, but for Eddie Peterson's Parkinson's disease diagnosis, would he have continued to receive $82,000 annually as an attorney?
MR. TUBIN: Objection, form.
THE WITNESS: Can you restate the question?
BY MR. ROMANO:
Q Yes.
Assuming he had no Parkinson's disease, he's with the Hardison firm and he stays there, he keeps making $82,000 or more per year; right?
MR. TUBIN: Objection to form.
THE WITNESS: You're citing his terminal rate of pay, yes. Okay.
(Interruption.)
THE WITNESS: Mr. Romano, I think there's

something there for you.

MR. ROMANO: Thank you.

Just so the record may reflect this, somebody just walked in and handed me some documents. I need to take five to look at these documents because I think it's going right into what we're talking about now.

So the documents are here and I just want to ask you about them. And I would just share this with you, it has to do with the letter from the Attorney General and one more letter. But I think that's what are in these.

Let's take a break, let me look at these quickly.

MR. TUBIN: Okay.

VIDEOGRAPHER: Off record, 1:29 p.m.

(A brief recess is had from 1:29 p.m. to 1:43 p.m.)

(Exhibit 6 was marked.)

VIDEOGRAPHER: On record, 1:43 p.m.

BY MR. ROMANO:

Q I've handed the witness a copy of Exhibit 6, which appears to be a letter from the Attorney General of the United States dated June 26th, 1991 to Eddie Peterson from Dick

Thornburgh. Do you have that in front of you?
A Yes, sir.
Q All right. I know we've talked a little bit about this letter. But now have you had a chance to read it?
A I have, sir.
Q And you see where he is throwing accolades to Eddie Peterson for his work on this particular criminal prosecution?
MR. TUBIN: Objection, foundation.
THE WITNESS: Positive comments, yes.
BY MR. ROMANO:
Q And you see where he says "I understand that your contributions were instrumental in obtaining the series of convictions against" -- I won't mention the person's name here -- "Although this case required the combined efforts of many representatives of the State Attorney General's Office and the Department of Justice, the convictions in this case are a testimony to your dedication and expertise as an attorney."
Is that what it says?
A It does, sir.
MR. TUBIN: Objection, foundation.
BY MR. ROMANO:

Q All right. We know from your testimony that he worked for a few years at the Hardison Law Firm; correct?

A Yes.

Q All right. If you would look at what we have marked as Exhibit 7, a letter from David Cook of the Hardison Law Firm to the attention of Ms. Parker in Memphis, Tennessee with the Social Security Administration and a letter dated April 21st, 2004.

Do you see that?

(Exhibit 7 was marked.)

THE WITNESS: Yes, sir.

BY MR. ROMANO:

Q All right. And you see where he says "I am the president of and a shareholder in the Hardison Law Firm, which is a professional corporation."

Correct?

A Yes.

Q "I have been employed with this office and its predecessors since I've passed the Bar examination in April of 1977. I have known of Mr. Peterson and his reputation virtually that entire span of time."

Correct?

A Yes.

Q And then he explains how Mr. Peterson went to work for their firm in the next paragraph. You see that starting with "In May of 2000, Mr. Peterson came to work for the Hardison Law Firm" --

A Yes.

Q -- "as an associate attorney"?

A Yes, sir.

Q "His ethical reputation was and is outstanding. And he had the reputation of being an excellent litigator or trial lawyer with approximately 300 jury trials with the Office of the District Attorney General in Shelby County on his resumé."

Correct?

A Yes.

Q All right. And then in that next paragraph, he states "Initially, he maintained that reputation as an excellent litigator with Hardison, which is a firm that concentrates on the civil aspects of litigation. Mr. Peterson adapted quite readily from his criminal law roots, but during the summer of 2003, something happened to him which altered his performance at Hardison."

Do you see that?

A Yes.

Q And then in that next paragraph, he states "Sometime around June or July of 2003, he began to ignore his responsibilities and his job performance would seem to deteriorate rather precipitously. His billing had become virtually non-existent and it was noted that he was out of the office for extended and unexcused periods of time."

Do you see that?

A Yes.

Q As you go to the next to last paragraph, you see his statement "If I were asked to give Mr. Peterson a positive reference to a potential employer, I could not and I would not be able to do so as he is, in my opinion, no longer capable of the rigors required for the practice of law."

Is that what it states?

A You read that correct.

Q All right. So a partner in the firm where Mr. Peterson worked has said that there was a shift or a change in Eddie Peterson in 2003; right?

A Yes.

Q And that shift caused him, meaning this attorney David Cook, to ultimately come to the

conclusion he "no longer capable of the rigors required for the practice of law."

Right?

A Yes.

Q And he doesn't state anything about what aspects of the practice of law; correct?

A He doesn't state anything beyond what is written here.

Q All right.

A He states that the man was a lawyer who had been an accomplished lawyer who worked for him and he does no -- he feels he no longer can practice in that capacity, is how I'm interpreting this statement.

Q All right. When you look at the Attorney General's letter and you look at what David Cook is saying about Eddie Peterson, is it true that you can take from that that he was a -- just a terrific advocate, lawyer, professional. True?

MR. TUBIN: Objection to form.

BY MR. ROMANO:

Q Before Parkinson's disease?

A I'm not sure how you're using "terrific," but that would not be a clinical term I would use to describe him, but certainly accomplished, respected,

very positive comments about him, those would be words that I would use.

Q All right. As a lawyer and as an employee, you don't know anything at all negative about Eddie Peterson before the Parkinson's disease. True?

A Before 2003 date that he's citing, I would agree with that.

Q Okay.

A What I know about him, and he was well thought of, well regarded as a professional.

Q Okay. Then we come to 2003, and his employer, a shareholder of the firm, president of the firm says he's got to leave because he cannot meet the rigors of the practice of law. And he's out; right?

A That's what the letter says.

MR. TUBIN: Objection to form.

BY MR. ROMANO:

Q All right. When you look at that in this particular case, does that give you pause in the opinion you've already given and say, Hey, I should go back and reconsider this because it appears as though the Parkinson's disease is what placed him in a position where he can no longer work as a lawyer

in any capacity?

MR. TUBIN: Objection to form.

THE WITNESS: Sir, I think I maybe -- I didn't make it clear in my report, by I accepted this premise. That's why we cut his worklife as a lawyer off at 2003, part of the reason, not the only reason, but the records support this. And I'm not disputing that he was quite debilitated when he left the Hardison firm and likely would not have been able to continue to work as a trial lawyer. That's in my report, I believe.

BY MR. ROMANO:

Q All right.

A I can show it to you, where it is.

Q Let's go to --

A Yeah. That would be on my page 41.

Q All right. Let's go to --

A Last paragraph.

Q All right. Let's go to the last paragraph. And I look at the wording where you say "I discussed with the neurologist/PD expert employment that would have been made" -- well, I'm sorry.

"I discussed with the neurologist/PD

expert employment that would made use of Mr. Peterson's transferable skills such as conducting basic legal research and reviewing/proofreading legal documents. And Dr. Young noted that employment of these sorts would have been within Mr. Peterson's residual capacity."

So do I understand, then, you're saying no to that practice of law over in 2003?

A What I'm saying is, his former work as a trial lawyer, within a reasonable degree of vocational rehabilitation certainty, would have come to the end in 2003, which is consistent with this letter I just reviewed from Mr. Cook.

Q Right.

A But he did have some residual capacity to perform far less cognitively complex work. It would have been a short-lived period, as I cited later on in that paragraph, but he did have some residual capacity.

Q All right. You know, from looking at the letter from his employer and conducting your own analysis that in 2003, Eddie Peterson is struggling mightily as a lawyer. You know that. True?

MR. TUBIN: Objection. Objection to form.

THE WITNESS: I'm not disputing that he

wasn't able to continue to perform the essential functions of his job as a lawyer, and hence I appropriated that in my analysis. That's why we have a cutoff date of his work as a lawyer of 2003.

BY MR. ROMANO:

Q All right. To where he would be earning zero or be earning some amount?

A Some amount.

Q And the "some amount" would be what?

A Very modest amount. He would not have been able to earn the kind of wages he historically earned, and it would have been for a short-lived period of time.

Q And the short-lived period of time would have been to what?

A As I indicated in the last sentence on that page, mid-2004 to mid-2005.

Q If your opinion were accepted, are you saying, then, that during that period for one to two years or so, the transferable skills would have kept him in law, but doing such things as legal research and writing?

A Much less cognitively complex. Not necessarily just in law. Perhaps for an insurance

company, something making use of his transferable skills, which I delineated earlier in the report. And it would have been less -- his compensation would have diminished.

Q All right. We'll switch and go to the Rothchild matter.

MR. ROMANO: And what's our --

CERTIFIED STENOGRAPHER: 8.

MR. ROMANO: 8? Thank you.

(Exhibit 8 was marked.)

BY MR. ROMANO:

Q We have now marked as Exhibit 8 your report in the Diane Lynn Rothchild matter dated May 8th of 2025. Do you have that in front of you?

A Yes, sir.

Q If you would go over to page five, please. At the top, you indicate that "During her 2024 testimony, Ms. Rothchild indicated she resided off base and that she frequently visited MCBCL for recreational purposes. She reported her Parkinson's disease began in 1993."

Does it state that?

A Yes.

Q All right. When you say "her Parkinson's disease began in 1993," does that mean that is when

she was diagnosed with Parkinson's disease or is that when she had the onset of signs and symptoms related to Parkinson's disease?

MR. TUBIN: Objection to form.

THE WITNESS: This is her self-statement, her self-report, and I'm accepting it as what it says. She reported she believes her Parkinson's disease began in 1993.

BY MR. ROMANO:

Q And then it is stated a little bit below that "According to Ms. Rothchild's February 2024 deposition, DeLalio Elementary School at MCBCL employed her from August 1972 for a school year, then she was employed by Tarawa Terrace II Elementary School at MCBCL from August 1973 to January 1975."

Correct?

A Yes.

Q "According to Ms. Rothchild's February 2024 testimony, she stopped teaching at Parkway South High School in 2009 due to her Parkinson's disease symptoms."

Does it state that?

A Yes.

Q And then in that next paragraph

"Ms. Rothchild testified that she learned about contaminated water issues at MCBCL approximately 20 years ago when she received a survey from the Federal Government. She noted she developed tremors, unsteady walking, moving slowness, fatigue, weakness, sleeping issues, balance problems, swallowing issues, voice problems, slurred speech, handwriting changes, freezing feet, dry eyes, teeth chattering, difficulty concentrating, body stiffness, urinary retention, and low blood pressure -- all of which she attributes to the MCBCL contaminated water incidents."

Is that what it states?

A Yes.

Q If you go over to page seven, you note her current weight was 94 pounds; right?

A Yes.

Q And then a little bit below on page seven, it has Presenting Problems.

You see that?

A Yes.

Q What did she report to you as her presenting problems?

A Tremors throughout body worsened by stress and cold temperatures, chattering teeth, need to use

mouth guard, increased saliva production, gait problems, body feels stiff, fatigue and weakness, difficulty sleeping, speech production difficulties including with projection and articulation, problems with swallowing and choking, concentration difficulties, trouble voiding bladder contributing to interrupted sleep, vision problems, lower extremity cramping, prominent in morning before taking medications.

Q Then come over to page eight, please. And you see Education. And she received a high school diploma in 1965; right?

A Yes.

Q And a bachelor's degree in 1969 --

A Yes, sir.

Q -- in elementary education from Southern Illinois University; right?

A Yes.

Q Then she received a master's degree in special education from Southern Illinois University around 1976; correct?

A Yes.

Q Then doctoral studies, special education, Southern Illinois University.

A Yes.

Q And she was a certified high school special education teacher; right?
A Yes.
Q Elementary education certification license; right?
A Yes, sir.
Q And special education certification license. True?
A Yes.
Q Did you, at any time, discuss with Ms. Rothchild her work as a special education teacher --
A Yes.
Q -- and how that differed from the work of a teacher in a school not doing special education of children?
A Yeah. Yes.
Q All right. Explain to us your understanding, from your perspective as an expert in this case, as to the difference between a special education teacher and a teacher who is not teaching special education children classes in the school setting.
A Some of the main differences she presented to me -- obviously, there's commonalities. You're

doing lecture planning, you're delivering instruction, you're assessing student progress, you're interfacing with parents and others, and so forth, so there's some similarities.

The main differences that she presented in her particular job had to do the potential need to interact with children who were behaviorally acting out, would be one major difference. Obviously that happens in traditional classrooms but it's more, let's say, apt to happen in a special education classroom.

And the other main difference, she was preparing individualized education plans, which are called IEPs in Florida and elsewhere, and these are plans that she indicated she personally typed, prepared. So you have to have insight beyond what a traditional classroom teacher would have. You have to know the children, their special needs, how they can benefit from different interventions.

Q And in terms of education, she did go beyond her bachelor's degree to get further education in the field of special education; right?

A Yes.

Q And then she became certified as a professional in the area of -- or as a teacher in

the area of special education; correct?
A Yes, sir.
Q All right. If you go to the top of page 11, the first full paragraph, when asked about her mental functioning, Ms. Rothchild cited problems with memory. She expressed her belief, her cognitive capability -- or capacities had diminished. She complained of short-term memory trouble and cited recent onset of long-term memory problems. "I can't multi-task anymore at all."
And she also told you about difficulties with comprehension and processing; correct?
A Yes.
Q If we go to page 22, you see where it states "Mr. Smith is the only person that provides Ms. Rothchild caregiver services"?
And he does that, but is not compensated for it; correct?
A Correct, sir.
Q They describe the following attendant care services. And then you have listed in your report "Transportation, assisting with meal preparation, home repairs, scheduling medical and other appointments, help with personal errands, general daily assistance as needed, occasionally reading

documents."

You see that?

A Yes.

Q And if you come down to the next to last paragraph on page 22, she informed you that she enjoys visiting with her 11-year-old grandson but she states "I am no longer able to read. Television is okay but I can't see."

Correct?

A Yes.

Q Then to page 24 where she states -- and I'm going to the paragraph closer to the bottom that says "Again, Ms. Rothchild informed me," that paragraph.

"Again, Ms. Rothchild informed me she is unable to use a computer board. She said 'That's why I had to quit working. I could not use a computer.'"

You see that?

A Yes.

Q And in the final area on page 24, she told you that through training and work experience, she developed the following skills. And then she stated "preparing and delivering classroom instruction, participating and developing 504 plans and

individualized education plans or IEPs, managing classroom behavior, interacting with parents and teachers to coordinate IEPs, facilitating the development of students who have behavioral disorders."

Is that what she stated to you?

A I elicited them from -- she didn't just articulate them, but I elicited those skills from her.

Q All right. Do you know what level of special education children's needs she was teaching? And here -- here's where -- the gist of my questions.

Is it children in a regular school with special needs, or children who are profoundly challenged, or do you know?

MR. TUBIN: Objection to form.

THE WITNESS: When you say "profoundly challenged," you're talking about kids, like, on G-tubes and breathing devices, you know, unable to ambulate, unable to --

BY MR. ROMANO:

Q With significant behavioral problems. In other words, I know there are levels of challenges the children have. Do you know what level it was in

terms of the children she was teaching in her capacity as a special education teacher?

MR. TUBIN: Objection to form.

THE WITNESS: I don't -- from what she described to me, they weren't medically challenged because she didn't say, you know, I had to know how to, for example, administer emergency first aid if it was required, or, you know, help a child who was on a catheter or intervene with a G-tube or a trach or anything like that. So she wasn't dealing with children who were that type of medically challenged.

My understanding was that they were basically intellectually challenged and behaviorally -- some had behavioral issues.

BY MR. ROMANO:

Q All right. And for purposes of your assessments in Ms. Rothchild's case, did you make any assumptions as to the additional skills or talents needed by her in her work as a special education teacher as compared to a teacher who is doing work not in the field of special education?

A Yes, I did.

Q All right. Tell us about that, please.

A Well, I've been doing this for a long time

and I've had many special education teachers over the years. I've interacted with them professionally as well as clinically. So I do know the kind of work that they need to do, things like redirecting children, intervening when there are behavioral issues, being sensitive to accommodations that they require.

There's a lot of diagnostic work that's done as well, especially -- she told me a major part of her job was the IEPs. So there's quite a bit of diagnostic work and prescriptive work that's done when you're writing IEPs as well.

Q All right.

A That would not be true of a traditional classroom teacher.

Q All right. Did you give consideration to the fact that although all teachers need to be paying attentions -- attention to their students, that when in a classroom, whether a special education teacher is needed, the alert level of that special needs teacher is enhanced over and above regular teaching in a classroom because of the challenges of the children?

A I'm not sure I can agree with that because the special ed classrooms tend to have fewer kids in

them than mainstream children, number of students. You have to be -- if you're teaching 40-plus kids, which is not uncommon nowadays, in a classroom, and you're the only teacher, you have to really be really alert.

Not to say you don't have to be really alert in the same situation if you have, let's say, 12 special needs kids, but the student-teacher ratio tends to be much lower.

Q Did you ask her to give you any examples of specific challenges the children that she was teaching had? In other words, this child had this condition or disease or illness or was in a position where he or she needed more help because...?

Did you ever get into the specifics with her using specific examples of children she had taught?

A I don't recall. But what I do recall is, I don't believe there was, like I said, medically challenged kids, so to speak. And you used the word "illness." My understanding was that the main challenges she encountered were of a behavioral or disciplinary behavior.

And they weren't -- they weren't necessarily frequent, which is another reason you

have to be very alert because you have to preempt these occurrences because sometimes they are spontaneous, and you can redirect kids. That was my understanding of the kind of awareness, classroom awareness she had to have with the population of students that she taught.

Q Going over to page 27, near the bottom, you see that it is stated "Ms. Rothchild indicated she had a caseload of 24 students and that the classrooms where she taught had from 20 to 25 students. She discussed the cognitive demands of her former employment including her need to multi-task, rapidly shift mental sets, and tend to students who had special needs. Ms. Rothchild left full-time employment at the end of 2009 academic year."

Correct?

A Yes, sir.

Q And then in this instance, going over to page 32, you did have a consultation with disease expert Steve Gollomp, who is a neurologist; is that right?

A Yes.

Q Did you discuss the need of a deep brain stimulator with Dr. Gollomp?

A Yes.
Q And because off her age, was it determined it would not be worth the risk to do that?
A Yes. That was his assessment.
Q True that Diane Rothchild stopped working full-time in 2009 and at that time she was 63 years of age; right?
A Yes.
Q And she had been working as a special education teacher; right?
A Until that time.
Q Right. Your opinion is that the only reason you believed Diane Rothchild retired was because she could no longer use a keyboard. Is that accurate?
A That's --
MR. TUBIN: Objection to form.
THE WITNESS: Well, she didn't completely retire. She did hold jobs after she left the school but she retired from the school because she told me that she could no longer use a keyboard. And, now, she had an accommodation. It's in my report. You'll see. You probably read it.
The school accommodated her and she was

able to perform her job but she said the school chose not to continue to extend that accommodation to her of making a typist available. And she said that's the only reason she left. She said she could do everything else in her job.

BY MR. ROMANO:

Q At the time she stopped working, she had been making $78,000 annually; right?

A Yes.

Q And it is your understanding that she obtained part-time employment without the use of a keyboard and as a substitute teacher until 2011; correct?

A Yes. That's true.

Q And that one to two times a week at $150 per day; correct?

A That's what her testimony said.

Q All right. So that means she went from making $78,000 annually to, at most, $10,800 annually, if you do the multiplication; correct?

A I haven't --

MR. TUBIN: Objection to form.

THE WITNESS: -- done the math.

BY MR. ROMANO:

Q Well, if you do the math at $150 a day, one to two times per week, we'll take even two times per week, so 300 a week times four weeks time nine months comes out to $10,800 --

MR. TUBIN: Objection to form.

BY MR. ROMANO:

Q -- as an approximation; correct?

A It sounds in the ballpark.

Q All right. And she told you that being a substitute teacher was too difficult and not worth the money; correct?

A That's what she said.

Q And what did you interpret that to mean when she said it was too difficult for her to be a substitute teacher?

A She also cited the drive time to her place of employment.

What I interpreted it as, she made a value judgment and determined that the compensation she was deriving either wasn't needed for her -- I know she is making quite a bit of money now through her pension. So she made a value judgment based on multiple factors and decided not to continue her work participation.

Q That was your interpretation of what she

meant when she said "it was too difficult"?
A Where are you referring to me, please? What part of my report?
Q I have here a quote from you. Well, actually, it's a quote from her that you put in your report where you're speaking to her --
A I think that's her statement, not my interpretation.
Q -- about a substitute. And she said "It was too difficult and not worth the money."
And I asked you for your interpretation.
A Well, basically, what I told you, basically, she made a value judgment looking at multiple factors and determined that she did not want to continue working.
Q You had asked Ms. Rothchild whether she believed she could have continued to work as a substitute teacher beyond 2011. And she stated "I guess I could have, but being a sub is more difficult."
Do you know what she meant by that when she said being a substitute teacher "is more difficult"?
A Well, I would obviously defer to her. But what I perceived that statement -- I know from my

working with other people who have done that kind of work is, it's not steady work. You might be called, you know, at the spur of a moment, so a teacher gets sick and you're asked to substitute for that teacher. So it's not steady. In some ways, it's more difficult than having a sustained, dedicated job.

The work was within her capacity, is what I understood, but she, again, made a value judgment. And her value, her perception was it's difficult.

Q You agree that behavioral management is involved in special education -- in a special education classroom?

A Yes. In all classrooms, but also in special education classrooms.

Q And you understand that it would have been Diane Rothchild's job at all times to create a safe environment in the classroom for each student. True?

MR. TUBIN: Objection to form.

THE WITNESS: I believe that's inherent in a position of authority such as a teacher.

BY MR. ROMANO:

Q So true in her instance also?

A All teachers.

Q And you understand that sometimes students require physical assistance from their special education teacher; correct?

A Some more than others. But I don't know if I can say that as a blanket statement. Obviously there's limits, too, in terms of safety. I mean, unfortunately, we have terrible things happening in schools today beyond -- well beyond the teacher's control.

Q And is it accurate to state that a special education teacher has specialized knowledge as to each student's disability or limitations in the classroom?

MR. TUBIN: Objection to form.

THE WITNESS: They have knowledge of the IEP, if that's what you're asking. But they wouldn't -- for example, if a student has neuropsychological difficulties, not necessarily have that level of depth, but generally, yes, they would have knowledge of what the IEP specifies.

BY MR. ROMANO:

Q Well, they need to know about the conditions their children in the classroom have; correct?

A The conditions.
Q Yes. And some of these limitations can be individualized. True?
A Most are individualized.
Q And the limitations can be limitation on the ability to learn. True?
A Could be.
Q And the limitations can be limitations which are emotional in nature. True?
A Sometimes.
Q And the limitations can, in some instances, be physical in nature. True?
A Sometimes.
Q When she talked to you about work as a substitute teacher, did you understand her to mean being a substitute special education teacher or a substitute teacher in the regular school setting, not special education?
A I understood the latter because she did not say substitute special education teacher.
Q If you go to page 34 with regard to typing accommodation, Diane Rothchild told you that a substitute typing IEPs was not sustainable. And then you indicated that you have not reviewed any documentary or testimonial evidence addressing these

representations. And you then state you would be surprised if no accommodations whatsoever would have been extended to Ms. Rothchild after the 2009 school year when she left her job; is that correct?

A Yes.

Q All right. Did you review any documents that support your position on this?

A I'm not sure I understand your question. It sounds like two negatives in there.

Q Yeah. Let me -- yeah. Let me rephrase the question. You said that, in your discussions "I would be surprised if no accommodations whatsoever would have been extended to Ms. Rothchild after the 2009 school year."

When you say you would have been surprised, and we are working through your methodology as an expert, are you saying there were no accommodations or you don't know?

A What I'm saying is that I understand that they were extended -- she did get the accommodations for one year. She said the only thing she couldn't do was use a typewriter to type the IEPs up. And for one year, accommodations were extended to her, a typist was made available to her. And then she said it was not sustainable thereafter. I believe that's

her testimony.

Q Right.

A She used the word "sustainable." And, yes, I am surprised that a public organization would not accommodate extend -- Americans with Disabilities Association accommodations to a very experienced special education teacher like Ms. Rothchild, or that there wasn't some opportunity to make some exception to one job duty that, by her own statement, she indicated she was unable to perform, or to swap duties with a co-worker.

Or as I indicated in there, students who are aspiring to become teachers need internship placements, and that would have been an exceptional opportunity for a student to have insight into how to prepare IEPs from a very experienced special education teacher like Ms. Rothchild. So that's where my surprise comes in.

Q All right. When she said it was not "sustainable," did you conduct any research as part of your assessment of opinions in this case to find out whether or not she was correct that no accommodations were being extended to her?

A No, I don't know how I could do that to go retroactively back that many number of years and do

that with any, you know, certainty.

Q As part of your opinions, are you assuming that a typing accommodation by a substitute creating an IEP is sustainable?

A I'm not sure I would make the statement the way you posed the statement. I think the way I put it is better put, which is I am surprised that there would not be any accommodation whatsoever extended to her, including the different modalities that I just described. That would be surprising to me, yes, with a woman of her experience, who had a stable work history, advanced credentialing, the number of years of experience, I would be -- I am surprised that there's not some accommodation that was made for her.

Q Are you, then, assuming that the school would have offered the accommodation she needed?

A I don't know that she approached them so we don't know that because she never did say, Would you work with me? Are there other things we can do to help? The only thing I can't do is type up these IEPs.

Q Well, are you making the assumption, though, that the school would have offered that accommodation?

A I'm not going beyond what I said, which is I am -- I would be surprised. That's -- that's where I'm going to stand. I'm not going to assume that they would have actually done it, but, yes, there are ways that she could have been accommodated, that I've seen accommodated. I don't know that she reached out to her doctor and say, Doctor, can you, you know, help me with this, can you write me a letter?

I mean, if I was counseling her on how to preserve her job and stay there, these are different things I would have definitely explored with her.

Q Did you review any policies or procedures from the School District or the State with respect to special accommodations for teachers with disabilities within their classrooms?

A No.

Q Would it be a fair statement to say that as of 2009, Diane Rothchild was essentially a disabled person in a classroom of disabled children?

MR. TUBIN: Objection to form.

THE WITNESS: She definitely had some disabilities, including manual disabilities. And she did teach disabled children.

I'm good if you are.

MR. ROMANO: Are you, Dawn?
CERTIFIED STENOGRAPHER: I'm good.
MR. ROMANO: All right.
THE WITNESS: Did you need to see the others?
CERTIFIED STENOGRAPHER: No, no, no, no.
MR. ROMANO: We'll go to the next exhibit, which will be Exhibit --
CERTIFIED STENOGRAPHER: 9.
MR. ROMANO: Exhibit 9. This will be the report on Richard Douglas Sparks.
(Exhibit 9 was marked.)
BY MR. ROMANO:
Q And I have handed you Exhibit 9, which is the report that you completed regarding Richard Douglas Sparks with a date of May 8th, 2025. Is that what you have in front of you?
A Yes.
Q All right. If you would go to page 48 of your report. And down at the bottom of the page, you see "The earliest record I reviewed suspecting Mr. Sparks was experiencing PD is an office note Dr. Clemons authored on December 18th, 2013. This note references a diagnosis of possible PD that a neurologist in Portugal considered four years

earlier and describes symptoms of tremor and stumbling Mr. Sparks apparently exhibited. Subsequent records identify several neurological complaints Mr. Sparks presented including increased tremors on his right side, upper extremity worse than lower extremity, impaired fine motor movement, shortness of breath, sensory deficits, and cognitive dysfunction."

Is that what it states?

A Yes.

Q And then come over to page 49, second paragraph down shows "A disability evaluation conducted on February 12th, 2018, determined Mr. Sparks' PD adversely affected his ability to work. Records from the Department of Veterans Affairs identified service-connected disability benefits to which he was deemed entitled."

Is that what it states?

A Yes.

Q And then come down to the final paragraph on page 49. And you're discussing his employment. And you say "I appreciate Mr. Sparks' representation of difficulties he experienced that led to his decision to sever his employment. However, within a reasonable degree of vocational rehabilitation

certainty, he possessed transferable skills that would have enabled him to transition to employment that remained within his capacity.

"He was in the withdrawal/decline phase of his career development when he exited the workplace, and it is reasonable to presume his worklife expectancy would have been in the range of 65 to 67 had he chosen to seek alternate employment."

There. Is that what it says?

A Yes.

Q All right. I know we've talked about this a few times today. Very briefly, define "transferable skills."

A A transferable skill is something that you develop vis-a-vis your education and training, work experience that has value, not just in the occupation in which you may be working in at a point in time, but it can be transferred to other occupations or other places of employment.

Q All right. If you go to page 50, and you go to the second full paragraph, what transferable skills are you referencing when you state "Mr. Sparks possessed transferable skills that would have afforded him a competitive advantage in alternative positions"?

A There's a transferable skills analysis I presented on pages 36 and 37 of my report. He does have several work-related credentials. He has computer-use skills that I identified including with MS Word, Excel, PowerPoint. And there's specific proprietary law enforcement software that he had been using.

He had skills in questioning and interrogating people requesting entry into the United States at a stationary post, physically inspecting vehicles for contraband, enforcing federal laws and regulations, searching vehicles with K9s and other tools, making referrals to appropriate regulatory authorities, documenting contacts of individuals requesting entry into the United States, using weapons including shotguns and handguns, arresting people, supervising up to 60 customs and immigration agents, knowledge of endangered species and insects, performing security operations both locally and abroad, interacting with the traveling public, he said literally thousands of people during a typical day.

Q Would an applicant who suffers tremors be a more competitive candidate as a TSA officer than one who does not suffer from tremors?

A It depends on how prevalent the tremors are.

Q You saw the tremors present in Mr. Sparks. True?

A I saw them? You mean visibly saw them?

Q Yeah.

A I --

Q When you interviewed him.

A Again, I was by Zoom. I wasn't person to person and I can't recall specifically if I saw the manifestations of his tremors.

Q Generally --

A But I do accept that he has them. I do accept that he has them.

Q All right. Generally, if you have two people applying to become a TSA officer and all things are equal except one has tremors and one does not have tremors, would an applicant who suffers tremors be a more competitive candidate or less competitive candidate as a TSA officer than one who does not suffer the tremors?

A Well, under the Americans with Disabilities Act, the criteria for hiring an individual is, are they able to perform the essential functions of the job, or are they able to

perform the essential functions of the job with some reasonable accommodation. This is what would qualify you.

Q All right.

A So the fact that he has tremors, alone, is not a disqualifying factor. The factor is, is he able to perform the essential functions of a job with or without his tremors and with or without reasonable accommodations. That's the criteria.

Q So specifically as to a TSA officer, you understand they do have arrest powers; correct?

A I'm sorry. What?

Q They can arrest somebody, a TSA officer?

A I don't know that to be a fact.

Q Well, if you assume that they do have arrest powers, would an applicant who has difficulty applying handcuffs be a more competitive candidate as a TSA officer or a security guard than one who does not have that difficulty?

A If that's an essential function of the job and he had difficulty performing that job, he would be less competitive.

Q All right. He would be at a disadvantage in terms of trying to get that job?

MR. TUBIN: Objection, form.

THE WITNESS: If, in fact, that is an essential function of a job. I don't know that it is.

BY MR. ROMANO:

Q Would an applicant who has trouble with memory be a more competitive candidate as a dispatcher than one who does not have any memory issues at all?

A So, again, it goes back to my definition of essential and marginal functions of a job and can accommodations reasonably be extended to a job incumbent. That's really the criteria.

The fact that they make -- and, again, memory is such a general, how -- how impaired is a memory and can -- you know, can it be mitigated.

Q Would an applicant -- I'm sorry.

If you go to page 50 of your report, you state "Mr. Sparks's decision to leave his employment as a customs and border protection officer in April 2017 was" voluntarily -- "voluntary and not necessitated solely by his PD. However, he quite likely would have been rendered incapable of employment as a customs and border protection officer due to the progression of his PD" systems -- symptoms."

Correct?

Is that what it says?

A Yes.

Q All right.

A And it goes on. It says "and unrelated co-morbidities at that time, including his larynx and vision."

Q All right. And you also say that "Work opportunities remaining viable for Mr. Sparks would have involved semiskilled, sedentary and light work along the lines discussed herein"?

A Yes.

Q Okay. And you state "Work opportunities remaining viable for Mr. Sparks would have involved semiskilled, sedentary and light work along the lines discussed herein."

That's similar to the wording of the last question, but same answer? Yes?

A That's what it says.

Q All right. Is it your opinion that a TSA officer is semiskilled and they only do sedentary and light work?

MR. TUBIN: Objection, form.

THE WITNESS: The essential functions of what a TSA officer does are in the sedentary

and light-exertion range.
BY MR. ROMANO:
Q All right.
A And "semiskilled" is another term of art from the Department of Labor on the taxonomy of unskilled, which is you learn how to do a job at an average level from a short demonstration to 30 days of on-the-job work experience, then the next category is semiskilled. So, yes, it would fall in that semiskilled range.
Q When we talk about TSA officers, are we talking about these individuals like the ones we see at the airports guiding us into and out through security?
A Some are in airports. There are other locales. They are --
Q Right.
A They are not exclusive things. --
Q But the ones most people come into contact with are TSA officers in airports?
A I would say the public. But they do -- they do work in other work environments.
Q Have you ever seen the medical and psychological guidelines for TSA officers which was created by the US government?

A I have.
MR. TUBIN: Objection.
BY MR. ROMANO:
Q All right. Do you have a copy of that?
A No.
Q I don't mean here, but --
A No.
Q -- at your office.
A I've had -- I've had people who went into that line of work in the past.
MR. ROMANO: Let's go to -- Exhibit 10?
CERTIFIED STENOGRAPHER: Yes, sir.
(Exhibit 10 was marked.)
BY MR. ROMANO:
Q All right. Tell me when you're ready.
A Ready.
Q Ready? All right. Does this appear to be a copy of the Medical & Psychological Guidelines for Transportation Security Officers with an effective date of March 8th, 2018; correct?
A Yes.
Q All right. If you would go to page two, you see that it provides a Mission Impact Statement.
Do you see that?
A Yes.

Q And then right under that, you have Purpose.

Do you see that?

A Yes.

Q And it says "The medical guidelines provide a responsive connection between a medical condition and a predictable degree of job performance, conduct and mission readiness. The medical guidelines are designed to reflect the underlying correlation between recognized medical conditions and safe and effective job performance. The medical guidelines apply to Transportation Security Officers, Expert Transportation Security Officers, Lead Transportation Security Officers, Supervisory Transportation Security Officers, and Security Training Instructors."

Correct?

A Yes.

Q All right. And then we go to page three and you will see a Table of Contents. And that lists the areas you can go to to find information throughout these guidelines; right?

A Yes, sir.

Q All right. Then if you'll go to page 20. This is the section noting "Essential Job

Functions." And it includes essential job functions for a TSO officer; right?

A Yes.

Q All right. Then if you flip to the next page, 21, we have here what are now a total of 89 essential job functions; correct?

A Yes, sir.

Q And under these functions, is it true it includes lift and carry baggage up to 50 pounds without assistance, and squat, bend, stoop, and do pat-downs?

A It does say that.

Q Stand continuously up to four hours without a break?

A What number are you on?

Yes, I see that. Number 10.

Q Walk up to 3 miles during the shift?

A Yes.

Q Climb ladders, climb stairs?

A Yes.

Q Operate controls on ETD to determine if sample explosive -- if sample contains explosive substance?

A What number, sir? Oh, I'm sorry. I see it. Number 25.

Q You got it.
A If you don't mind mentioning the number when you read it, please.
Q As you go through these -- I won't hit every one of them, but as you go through them, you see, like, number 33 reading "travel documents in order to verify travel date and time for current day and selective dates [sic]."
And just in looking through it, you see this entire list; right?
A Yes.
Q Okay. The question is, then: How would you expect someone who suffers from vision, speech, tremors, and Parkinson's disease symptoms to ever be able to perform all of these tasks as a TSO officer?
MR. TUBIN: Objection to form.
THE WITNESS: I'm reviewing my report and looking at his representation of his functional capacities to me. And this -- my examination was conducted in, I believe March of 2005 -- 2025 based on what he told me. At that time, he would not have been capable of performing the physical demands of these jobs, if, in fact, these are the essential functions and they can't be accommodated.

BY MR. ROMANO:

Q If you go back to page 13, you'll see here on 13 and 14 it shows restrictions for those who might have a neurological disorder; correct?

MR. TUBIN: Objection to form, foundation.

THE WITNESS: I'm not sure I understand the question.

BY MR. ROMANO:

Q Yeah. If we look at the -- again, we're still talking about our Medical & Psychological Guidelines for Transportation Security Officers. And if you look on page 13 and 14, there's a section "Other Neurological Disorders."

You see that?

A Yes.

Q Okay. And this provides restrictions for those who are affected by these various neurological disorders; correct?

MR. TUBIN: Objection, form, foundation.

THE WITNESS: I'm not sure I understand the content of this document here. It says "Provide restrictions for 12 months after surgery," for example. And I'm not sure who is to provide these. I don't know if it's the job incumbent or healthcare provider. I'm not sure

I understand this language.
BY MR. ROMANO:
Q All right. Well, you see this section, for example, it provides restrictions. In fact, look over on page 14. "Provide restrictions for Parkinson's disease unless all of the following conditions are met."
And then you see it lays out the conditions, including "tremors and muscle rigidity are not inferring with performance of essential job functions."
You see that?
A Yes.
Q All right. So these are all things that are going to have to be considered on whether or not somebody is going to be hired to become a TSO officer; right?
MR. TUBIN: Objection, form.
THE WITNESS: I think these are considerations but the language is a little bit confusing to me. Who is to provide these restrictions in these areas? I don't know if it's the job incumbent or healthcare provider or an independent examiner who is going to do a fitness-for-duty examination. But it appears

that these are criteria used to assess whether the person is a qualified candidate.

BY MR. ROMANO:

Q All right. And if you look on page 15, you have an area near the bottom there where it has psychiatric disorders, and then it lists out psychiatric disorders which on becoming or applying for a job, these are going to be considerations that they are looking for to see if someone qualifies or fails to qualify, right?

MR. TUBIN: Objection to form.

THE WITNESS: Apparently these are criteria that are considered. It's not as clear as I would like it to be to really assess how it pertains to job candidates.

BY MR. ROMANO:

Q All right. And true in this instance, Richard Sparks was diagnosed with depressive mood disorder; correct?

A He was.

Q All right. Is it your opinion that a dispatcher is semiskilled?

A Yes. Obviously it's going to depend on -- some are unskilled. Again, the definition is up to 30 days of on-the-job training, but generally, the

more complex ones, yes, they would be in the semiskilled area.

Q All right. When you consider you're talking about him becoming a dispatcher, what is it that you are contemplating as to the type of dispatcher he would be? What I really mean for that, the type of organization he might work for as a dispatcher.

A It could be a building company. I've had people who perform that jobs. They work, for example, for concrete companies, sending out concrete trucks to different destinations.

Q Would you consider him for a job as a dispatcher for a police or sheriff's department?

A Well, he's past retirement age. I think we have to put everything into perspective now. I believe he's 70 or 71 years old, and he's been out of the workplace --

Q Sure.

A -- for a number of years, so.

Q Well, backing up, though --

A Yeah. To be backing up --

Q -- to the time period you say he should have been working.

A At the time he left the workplace, he

voluntarily left his job, there were no medical recommendations or advisements. And he chose not to pursue other employment. He said it was his own decision. He totally made that decision on his own.

So we're looking -- we're at a different point in time now than we were when he left the workplace.

Q All right. At the period of time when he stopped working, your conclusion is he could have kept working; right?

A Yes.

Q All right. And your conclusion is that at least one field he could have gone into was to be a dispatcher; right?

A Well, he -- what he was doing was more physically demanding than a dispatcher. And, again, he chose -- he chose to leave that job.

Q All right.

A But, yes, he could have at that time gone into being a dispatcher.

Q All right. My question is only this: From your perspective, what level of a dispatcher? And by that I mean, you just mentioned a business, for example. Could he have been a dispatcher for 911 in a big city?

A I would not recommend that for him.
Q All right. And why would you not recommend that for him?
A He does have some cognitive difficulties. He's -- and, again, are we going back to when he was --
Q Back. Yes, back.
A At that time, he was interacting with the public extensively. He, I believe, was at the Phoenix airport. These are international arrivals. And he was -- he said he had to -- there's a lot of information that he had to be aware of, including different visas from different countries. That's all documented in my report.

He had to -- he had to be able to size someone up quickly to determine if there was something suspicious about the person. And, yes, he did have to apprehend people if there was an issue that arose. I understand it was infrequently but it could happen.

So at that point in time, it appears that he did have quite a bit of ability to multi-task, process information, make decisions rapidly. I would not have ruled out at that point in time some types of dispatching jobs for him.

Q Back at that time -- true? -- he did have neurocognitive deficits, though; correct?

A You're asking me about the period around 2017?

Q Yes.

A He had mild cognitive impairment, according to the records, around that period of time.

Q And if you go back to 2018, had the VA made any decisions regarding his ability to work?

A Is this somewhere in my report specifically that you can point me to? I can find it. It will just take a while.

Q Well, I have my notes. I don't have the page of your report, but I have my notes that the VA had concluded he could not work, going back to 2018.

Let me ask it this way, Dr. Shahnasarian. If you assume the VA had determined he could not work as of 2018, would you have any reason to disagree with that?

A No, I don't. If that's what records show, that's what the records show.

MR. ROMANO: All right. This would be a good time for a break, then.

MR. TUBIN: Yeah.

MR. ROMANO: And then I'm going to go right on to the Tukes matter.

MR. TUBIN: Okay.

VIDEOGRAPHER: Off record, 3:09 p.m.

(A brief recess is had from 3:09 p.m. to 3:24 p.m.)

(Exhibit 11 was marked.)

VIDEOGRAPHER: On record, 3:24 p.m.

BY MR. ROMANO:

Q I've handed you what we've marked as Exhibit 11, which is a copy of your report on Jacqueline Yvonne Tukes dated April 8th, 2025. Is that what you have in front of you?

A Yes, sir.

Q Okay. And if we go to page five, you indicate at the top that she had been at Camp Lejeune from June of '85 to January of '87 for a total of 19 months, noting that she resided at Hadnot Point besides Tarawa Terrace. Is that what you have?

A Yes.

Q And then if you would go to page 12, under General Information, you note that "Ms. Tukes conveyed during her April 2024 deposition that she was hospitalized for pancreatitis circa 1990. She

indicated she was first diagnosed with left kidney cancer on June 15th, 2010, after she experienced blood pressure problems and that she underwent a partial nephrectomy on August 20th, 2010, performed by a Dr. Matthew Nielsen."

And then just below that she conveyed that "she underwent at least five nephrectomies from 2010 to 2023."

Do you see that?

A Yes.

Q And in this instance, on page 19 under your section Consultations with Disease Experts, you note that you consulted with Dr. Walter Stadler, who is a medical oncologist, and with Dr. Duncan Johnstone, who is a nephrologist; correct?

A Yes.

Q And when we get to page 20, the section that includes your Summary and Impressions, in that middle paragraph, you note that "Dr. Jayaram, Ms. Tukes' treating hematologist oncologist, testified in 2024 that his patient's kidney transplant is expected to last between 10 and 15 years and that she will likely need a second kidney transplant.

"In his May 10th, 2024 office note,

Dr. Jayaram stated 'Hopefully at this point she should be cured of disease, but she would need to be followed for 5 years to say that. But she will need to have continued chronic monitoring. We will consider CT imaging in 6 months' time but I" do -- "but I want to see how she does from a transplant standpoint before ordering.'"

Is that what the note says?

A Yes.

Q All right. And then you have your appendix, where you conduct a complete review of the medical records; correct?

A Yes, sir.

Q Okay. And, again, as we go through your report, is it formatted similar to the way in which each of the other reports are formatted or structured?

A Yes.

Q And in this case, there's no claim being pursued as it relates to wages or lost wages; right?

A That's what I understand, sir.

Q Then for Ms. Tukes, on April 8th, 2025, you prepared a life care plan, which is attached to your report; correct?

A Yes, sir.

Q In the life care plan, do you lay out what her challenges are going to be in the future in light of her suffering through this kidney cancer and kidney disease?

A The life care plan identifies her future rehabilitation and intervention needs.

Q And the physician upon whom you are relying for the life care plan, was that the two physicians that were mentioned earlier?

A Well, again, I'm relying on all the information available to me. But I had consultations with Dr. Johnstone specifically in this case.

Q All right. And have there been any -- is there an addendum or any type of a supplement to the report you did in Ms. Tukes' case?

A No.

Q I'll go to Exhibit 12, which will be a matter relating to Robert Eugene Welch.

(Exhibit 12 was marked.)

MR. ROMANO: I have a copy of the exhibit for you, as usual, and copies to counsel.

BY MR. ROMANO:

Q Do you have there in front of you the report you rendered in the case of Robert Eugene

Welch which is dated May 8th of 2025?

A I do.

Q All right. And if you would go to page five of your report, you note at the top "According to Mr. Welch's military records, he was on active duty from August 1968 to September 1973 and was discharged from military service at the rank of captain. Records note his military occupational specialty was judge advocate."

You have that?

A Yes.

Q And then as you come down a few paragraphs below, you have "In May 2024, Maureen Welch," his spouse, "testified that the Workers' Compensation Appeals Board employed her husband from 1976 and that he had the same job, in different offices of the Appeals Board. She conveyed Mr. Welch was a presiding judge for the Appeals Board in Pomona, California. And she indicated that her husband retired from the Appeals Board in 2005. And then one week later, he returned to part-time work until 2010. Mr. Welch provided similar information about his work history during my clinical interview with him on February 2nd, 2025."

Is that what it states?

A Yes.

Q And then when you come over to page 28, we are at the section dealing with your Summary and Impressions; correct?

A Yes.

Q And as to Mr. Welch, what are the areas in which you are offering opinions for him? By "areas," I mean, what opinions?

A I understand that he does not have a claim of loss of earning capacity or lost past wages. So in his case it is a life care plan. I have developed, again, the same methodology I applied earlier.

Q If you come down to the last paragraph on page 28, it states "Apparently Mr. Welch's last seizure was in April 2014. Dr. Markus, Mr. Welch's treating neurologist for his problems with epilepsy, documented his patient's right-hand tremor problems in a note dated August 24th, 2021, and suspected Mr. Welch might have been exhibiting PD symptoms.

"Dr. Neff, also a neurologist, diagnosed PD on November 16th, 2021. Additionally, on March 10th, 2022, Dr. Neff indicated Mr. Welch was experiencing mild cognitive impairment, without dementia, along with obstructive sleep apnea.

"Dr. Tracy, June 9th, 2022 office note includes an assessment of mild cognitive impairment for which Mr. Welch was prescribed Aricept. Mr. Welch and his wife dispute a dementia diagnosis."

Is that what it states that I just read?

A You read it correctly.

Q All right. And then if you go to the middle of page 29, "He described problems with falls, complained of intermittent hand tremors, 'grabbing of the feet' problems, trouble with balance, fatigue, concentration problems, sleep problems, loss of sense of smell, illegible handwriting, and other manifestations he associates with PD as noted. Additionally, Mr. Welch describes symptoms of mild cognitive impairment and emotional distress. He provided a similar account during my February 2nd, 2025 clinical interview."

Is that what it states?

A Yes.

Q And from here, your work has been to create and develop a life care plan for Mr. Welch, and you did that and it is attached to the report?

A I did.

Q Correct?

A Yes.
Q All right. Have you done any recent, let's say within the last three years, speaking presentations to any statewide or national or international life care planning groups or organizations?
A I don't think so. My CV lists all of my presentations at professional association meetings. I don't believe so in the last three years.
Q In the last three years, in the area of rehabilitation, have you done any -- or given any speaking presentations to any statewide, national, or international organizations?
A On what topic?
Q Rehabilitation.
A I don't think so. Again, my CV would correct me if I'm wrong, but I don't believe so in that time frame.
I've lectured at other places such as universities but not in -- not in front of the groups you mentioned.
Q Yeah. The groups I'm referring to would be life care planning groups or rehabilitation groups or professionals.
A I don't think so.

Q As a part of your work as an expert, do you have a --

A Actually, let me correct myself.

Q Sure. Sure.

A I think there may have been one.

Q Okay.

A Yeah.

Q When, where, and around what --

A Around '22 or 2023, in that time frame.

Q What's the location and the group?

A I believe it was the American Board of Vocational Experts. It would be on my CV.

Q It's in the CV?

A Yeah.

Q All right. In your work as an expert, do you ever provide the attorney who hired you on the case with a direct examination outline for him or her to follow when conducting your direct examination at trial?

A I've been asked to do that and I have done that.

Q All right. Do you do it on your own or only if you were asked to do it by the particular lawyer?

A If I'm asked to propose questions. And

some of them may be used, not used, especially in the technical content, that's -- that's when it tends to occur most often.

Q Do you save those --

A No.

Q -- direct examination outlines from case to case?

A No.

Q Are they published anywhere? On the internet? In blogs? Speeches? Books?

A They could be published as sample questions in -- in my books, my Assessment of Earning Capacity in particular.

They're case-specific. So every case is different. So there are technical questions that can arise and I'm asked to help to present questions that would help be understandable.

Q We'll go to the next exhibit.

CERTIFIED STENOGRAPHER: This is 13.

(Exhibit 13 was marked.)

BY MR. ROMANO:

Q All right. If you could look at that, please. This is Exhibit 13.

All set?

A Ready when you are.

Q Okay. I will represent to you that Exhibit 13 are documents provided to me which I understand are the documents that the government produced for us regarding your deposition either last night or this morning; okay? I have not been able to assess them but I did look at them quickly during the lunch break.

So, first, have you had a chance to page through them?

A I --

MR. TUBIN: Can I --

MR. ROMANO: Sure.

MR. TUBIN: So these were produced six days ago. This stuff from this morning is not contained within these documents, I don't believe. These were produced when the document demands were responded to on February 11th. That's the only correction I'll make.

MR. ROMANO: If you are correct, then I have -- then I don't even have the documents you produced this morning.

BY MR. ROMANO:

Q Let me do this: Let's -- let's -- we'll keep moving with this exhibit. I don't know what it will ultimately be called other than Exhibit 13.

But the first document here is -- looks -- and I've got these all together in this exhibit. But it is a 15-page exhibit. And it says at the top left, Amendment of Solicitation/Modification of Contract. Do you recognize this document?

A Vaguely. This is -- I have people in my office who handle all billing and contract work but I probably have seen this.

Q When were you first hired on this case?

A I don't know, as we sit here. This says 11/29/23. That would sound to be about the time but I couldn't tell you precisely.

Q All right. As you look at this cover document, page one of 15, it is dated 11/29/2023, Amendment of Solicitation/Modification of Contract.

You see that?

A Yes.

Q All right. And this is a contract between the government and Career Consultants of America, Inc.; correct?

A Yes.

Q And as you come down below, it discusses -- whoops. Let me fix the microphone here.

It shows "The purpose of this modification

is to increase the contract ceiling."

You see that?

A Yes, I do.

Q When you first agreed to work as a rehab specialist and life care planner on this case, was there a contract ceiling placed on you in the beginning?

A I don't remember. I believe so.

Q And what was that amount?

A That, I don't know.

Q Who within your organization would know?

A Perhaps Rose Bock, B-o-c-k.

Q And what is Rose Bock's title?

A Bookkeeper/accounting. We don't really have titles. We're not that official.

Q All right.

A But that's her area.

Q And you see down in the right-hand corner, it indicates a date signed by a representative from the government of 11/29/2023?

You see that?

A Yes.

Q All right. And then when you come to the next page, two of 15, it has a description of the contents and different pages we can look to to find

these various documents.

You see that?

A Yes.

Q When you first were hired to be an expert on this case, did you, in any way, solicit the government to get you involved as an expert in this case?

A No.

Q All right. So somebody from the government reached out to you to engage your services as an expert?

A Correct.

Q All right. Are you the one who made the decision to agree to have CCA provide expert services for the government in this case?

A Yes.

Q The fee schedule that you normally use in personal injury cases, does that fee schedule apply to the work you were doing in this case?

A Yes.

Q Is there any difference between your normal fee schedule and the fee schedule being utilized in this case where you were employed by the government to do this work?

A One small difference.

Q What's the difference?
A They told me that the government does not pay a retainer fee in advance.
Q All right. Other than that, your fee schedule is identical to what you would be charging in a personal injury case for your rehab and life care planning services?
A Yes.
Q As you sit here today, do you know what your charges total for CCA?
A I don't. It looks like you have the invoices and you could probably do the math.
Q I won't go through all this with you. I'll just go through some of the pages.
A Yes, sir.
Q All right. When you get past page 15, that very next page, there is an invoice dated June 30th, 2025.
Do you see that?
A Yes.
Q All right. Is this invoice the same format and structure CCA uses for each of its invoices it submits to the government?
A Yes.
Q Okay. Is this invoice similar in form and

structure to the invoice you would generally use in personal injury cases when hired by private law firms as opposed to the government?

A Yes.

Q All right. Then go three or four pages over, and you will come to a document, page one of five.

Actually, if you go to the top, you'll see what look to be Bates-stamped numbers. You see at the top?

A Yes.

Q And it's -- you see that 15JC1V23 right in there?

A Yes, sir.

Q Okay. Well, the last three digits are 003 and it says page one of five.

A Yes.

Q Are you on the same page I'm on?

A I am.

Q Okay. And this says Amendment of Solicitation/Modification of Contract, and a date of 4/23/2025. Is this the type of information that is being handled by your bookkeeping department?

A Yes, sir.

Q There is several pages after that. You

will see a -- an additional Amendment of Solicitation/Modification of Contract with a date, which it shows page one of 13. That's up in the top right corner, page one of 13.

A I see one of 13.

Q Yeah. There you go. That would be -- you see it? One of 13?

A 13. Did you say 13 or 14?

Q One of 13.

A Oh, I have that one, yeah.

Q Okay. And then down at the bottom right-hand corner, it shows a date signed of 11/20/2024.

A Yes.

Q Do you see that?

A I do.

Q Okay. As you sit here right now, do you know what ceiling has been placed on you --

A No.

Q -- as --

A No, I don't.

Q No idea?

Do you know you're getting paid?

A Yes, I am getting paid, yeah.

Q Okay.

A The scope of the project has changed from the beginning, so...
Q All right. When it started, what was your understanding as to the scope of your work to be done?
A I understand there was a hundred plaintiffs over five different tracks broken down by disease category.
Q All right.
A Twenty per track. And ten chosen by plaintiff, ten chosen by defense, is what I understood.
Q And as things evolved, what did you understand how that changed --
MR. TUBIN: Objection.
BY MR. ROMANO:
Q -- without revealing any discussions you had with government lawyers.
MR. TUBIN: Yeah. Objection, attorney work product.
As he said, no discussions with attorneys to be disclosed during that answer.
THE WITNESS: Can't answer that question, then.
BY MR. ROMANO:

Q All right. You did have a scope of work change, though, from the time you started the project; right?

A Correct.

Q So as you were about to begin your work on this project, what did you understand your role to be?

A Basically what I described to you earlier, that the plaintiffs were pursuing damages and I was asked to assess damages in areas of vocational rehabilitation and life care planning.

Q When you submit your invoices, is -- do you do that within certain time parameters such as once every 30 days, once every 90 days? Is that how you do it?

A Yes. We do it on the 1st of the month -- I'm sorry. Well, whatever the last day of the month is. So if February is 28 days, more or less, it's not a perfect world, but that's our goal to run the -- and so the 1st and the 15th typically is what we do. Twice a month, monthly.

Q Is that what you typically do in non-government work cases?

A Yes.

MR. ROMANO: All right. What we'll do,

when we take a break, let me make a phone call because this package that was delivered to me I thought was the package that would have the documents that you all were producing this morning. But if that's not them, then I don't have them.

MR. TUBIN: Right. So these are the documents that were produced last week on the 11th.

This morning, you should have been copied on the email that had those documents as an attachment. But I understand if you need to make a call and get those.

MR. ROMANO: It's possible that I was copied but I would have been driving over here so I don't have those.

MR. TUBIN: Right.

MR. ROMANO: Let me just state this: Among other things, because of the late production and because of our not having them, I just need to make a statement on the record that we'll need to keep the deposition open.

By the way, I'm not done yet, but we'll need to keep this deposition open in order to have an opportunity to adequately review and

assess those documents and then complete the deposition at a later time.

BY MR. ROMANO:

Q Do you consider the area of vocational rehabilitation to be a science?

A I do.

Q Do you consider the area of life care planning to be a science?

A Yes.

Q All right. If each is a science, then is it true that it is essential to be as precise and accurate as reasonably possible?

A Yes, sir.

Q As a part of your firm's work on these seven Camp Lejeune cases, did you make any what we would call field notes, meaning handwritten notes or typewritten notes or dictations as you were moving along? Did you do that?

A Yes.

Q All right. Have you saved and preserved all of those notes?

A All of my handwritten notes, yes.

Q All right. Now, I recognize there may be some notes you make of meetings you have with government counsel. Are there notes you made as you

were doing your actual field work on the case, reviewing documents, meeting with witnesses, conferring with consultants? Did you keep those kinds of notes?

A Yes, sir.

Q Are those handwritten notes or are they typed or recorded in some way?

A Handwritten notes, and there's some dictation that I did when I was writing my reports.

Q All right. Have the handwritten notes been produced to the government?

A If they asked for them, I produced them. Again, I have a records custodian, but anything that was asked for, we produced.

Q All right. As to any recordings such as dictation, has that been produced to the government?

A No.

Q All right. But you do --

A But --

Q -- you do have it?

A The dictations would be included in the reports, the -- transcribed, of course.

Q All right. Those recordings, though, the dictation recordings, are they preserved? You still have those?

A Could be. I -- I personally don't keep them but my secretaries may. I don't know.

Q When you do a dictation, is it transcribed by someone in-house within CCA?

A Yes.

Q When you testify as an expert, do you typically use demonstrative aids to assist you in explaining your testimony to the judge and jury?

A Sometimes.

Q When you do use demonstrative aids in your capacity, first, as a life care planner, do you use any demonstrative aids other than in some way displaying the life care plan itself?

A Typically, it is the life care plan, and I'll go through the life care plan as it's being shown.

Q As it's being displayed?

A Um-hum.

Q Yes?

A Yes.

Q Okay. And as to any components, rehabilitative work in nature, do you have any demonstrative aids that you typically take to the courthouse with you?

MR. TUBIN: Hold on a second,

Dr. Shahnasarian.

CMO 17 specifies that the parties will confirm a timeline for disclosure of demonstrative exhibits. And to the extent that we're eliciting -- or you're eliciting information to be put on demonstratives, I believe that conflicts with the order so I would instruct you not to answer that.

BY MR. ROMANO:

Q The questions I'm asking about is in the past, what have you done? In other words, in the past, you've created demonstrative aids to take with you, such as for a life care plan. When you display it, is it displayed on a computer and on a big screen?

A Sometimes on a board. Sometimes on an ELMO.

Q All right. As to -- and in the past when you have testified, have you been frequently using a PowerPoint or a keynote presentation in order to present your testimony?

A No.

Q Have you ever done that?

A No, not that I can recall.

Q As a part of your work in this case, did

you take any photographs?
A No.
Q As a part of your work in this case, did you take any video or digital film footage?
A No.
MR. TUBIN: That looks like it could be perhaps what was produced this morning.
Yep.
MR. ROMANO: Is that it?
MR. TUBIN: That was what was produced this morning.
MR. ROMANO: Let me just hand it to you first.
Is that what this is?
MR. TUBIN: Yep.
MR. ROMANO: Okay. Well, that's great.
MR. TUBIN: So do you want to retract your statement about keeping the deposition open, or do you want to go through this first?
MR. ROMANO: No. Let me go through this.
MR. TUBIN: Okay.
MR. ROMANO: Let's make this Exhibit --
CERTIFIED STENOGRAPHER: 14.
MR. ROMANO: -- 14, please.
(Exhibit 14 was marked.)

MR. ROMANO: Did I give one to each of you?
MR. TUBIN: Yes.
MR. ROMANO: Thank you.
MR. TUBIN: With the pool log on the back and all.
MR. ROMANO: What's that?
MR. TUBIN: With the towel log on the back and all.
MR. ROMANO: I will confess to you my wife is making these copies from over at the hotel, and apparently the back side of all the paper has that. It's kind of funny.
MR. TUBIN: It is funny.
MR. ROMANO: All right.

BY MR. ROMANO:

Q All right. You have Exhibit 14 there in front of you?

A I do, sir.

Q All right. And you see up at the top, it says Attachment to Statement of Work.

A Yes.

Q And then right under that -- well, above that, it says, at the top, US Department of Justice. And then over to the right, it says Request,

Authorization and Contract for Services of Expert Witness, Litigative Consultant, or ADR Neutral. Is that what it says?

A Yes.

Q And then we come down and it says Attachment to Statement of Work.

A Correct.

Q "Career Consultants of America, CCA, agrees to provide the following service and be bound by the following terms in support of the government case in the Camp Lejeune Justice Act litigations."

Is that what it says?

A Yes.

Q All right. And then you have a series of provisions on page one which are the items you were agreeing to in order to be utilized as an expert in the case; right?

A Yes, sir.

Q By the way, it says Attachment 2. Do you know what Attachment 1 would be?

A No.

Q All right. And then we come to the next page and it says Attachment 3 and it has Schedule, Rate, and Cost, SRC.

You see that?

A Yes.
Q All right. And then 3.1. It states "The contractor for this contract is Career Consultants of America, Inc."
That's what it says?
A Yes.
Q Go to 3.3. Well, let me go to 3.2 first.
True, it states "The contractor shall provide the government expert witness services in support of the case: Camp Lejeune Act Litigation."
Is that what it says?
A Yes.
Q And then 3.3, under the heading Labor Rate, it states "The identified labor rate represents the fully loaded hourly rates for each labor skill classification."
Correct?
A Yes.
Q Do you know what that means "fully loaded hourly rate"?
A I'm interpreting it as hourly rate. I don't know what "fully loaded," per se, means.
Q It then states "The contractor shall provide personnel in the labor categories and at the hourly rate set forth below. The addition of other

labor categories requires a modification of the contract and can be approved only by a contracting officer."

Is that what it states?

A Yes.

Q And then in 3.5, under Funding, it states "The contractor shall not exceed the amount of $199,810."

You see that?

A Yes.

Q Did you come up with that ceiling amount?

A No.

Q Do you know how that ceiling amount was arrived at by anybody?

A I do not.

Q Was it discussed with you before it was decided?

A Not that I recall.

Q It then states "As judicial action obviates the need to increase/decrease workload, a modification will be issued to adjust the level of funding as necessary. If work is performed above the said amount without a proper modification from the contracting officer, the contractor is potentially working at risk."

Is that what it says?
A Yes.
Q And then we have a chart which shows a number of items at basically the bottom third or so of this page; right?
A Yes, sir.
Q Then on the next page the chart continues; right?
A Yes.
Q Okay. If you go back to the first page of the chart, it shows, President (Reports), and then Unit, hourly, and then Rate, $715. Is that the rate that would be charged for your services?
A Yes.
Q Underneath that, it refers to Counselor. And that person is charged at a rate of $450 per hour; correct?
A Yes.
Q All right. What is a counselor at CCA?
A Other staff on my -- other people on my staff.
Q Are they life care plan --
A They're professional staff who would testify as experts.
Q Professional staff?

A Correct.
Q Professional staff that can testify?
A Right. As expert witnesses. So obviously my custodian right -- you could subpoena anybody, but -- but these are professional expert witnesses.
Q All right. And then you come over to Attachment 3.
Do you have that in front of you?
A I do.
Q All right. And then we have another chart. Do you see the chart?
A Yes.
Q Right above that, you have Funding.
A I see that.
Q You have 3.5?
A 3.5? I'm sorry? Yes. I see that. Funding. Correct.
Q And in this document, it says "The contract schedule ceiling shall increase to $299,810."
Do you see that?
A Yes.
Q By the way, the seven cases that we have discussed today, are those the only seven where you personally were on board as an expert to render

reports for the Camp Lejeune litigation?

A I'm not a hundred percent sure. I'm half of -- and, again, we've been on this so many years, it's kind of hard for me to recall everything. But I have a vague recollection of maybe a couple of plaintiffs who maybe passed away early on.

Q Okay. And Dr. Navarro, whose deposition will be taken -- is it Dr. Navarro or not?

A Ms. Navarro.

Q Ms. Navarro. Ms. Navarro, who we will be deposing tomorrow, is she full-time with CCA?

A Yes.

Q All right. And what is her title or job title?

A Again, we're not that formal. We're a small business, but --

Q Well, when she holds herself out as an expert, what is her area of expertise?

A Vocational rehabilitation and life care planning. She does some office management responsibilities, director -- operational responsibilities.

Q Then, let me see. There's another Attachment 3. Yeah.

If you page through the last page of this

exhibit --

A Yes.

Q -- there is another Attachment 3.

Do you see that?

A Yes.

Q Okay. Then come down to 3.5. And under the heading of Funding, it says "The contract scheduled ceiling shall increase to $549,750."

You see that?

A Yes.

MR. ROMANO: This will be the next exhibit.

CERTIFIED STENOGRAPHER: There you go. It's Exhibit 15.

(Exhibit 15 was marked.)

MR. ROMANO: 15?

CERTIFIED STENOGRAPHER: 15, yes. Thank you.

BY MR. ROMANO:

Q All set?

A Yes.

Q All right. I've handed you, and also to government counsel, a copy of Exhibit 15. Does this appear to be another packet of contract-related documents between the government and CCA?

A It does.
Q All right. And this contains, among other things, different modifications of the contracts at different times --
A Yes.
Q -- correct? All right.
A These look similar, if not identical to what was in the previous --
MR. TUBIN: Yeah.
THE WITNESS: -- exhibit.
MR. ROMANO: All right. Going to invoices. We'll make this Exhibit 16.
(Exhibit 16 was marked.)
BY MR. ROMANO:
Q All set?
A Yes, sir.
Q All right. If you go to Exhibit 16, these invoices, move over to page -- or Bates-stamped number -- you see the Bates-stamped numbers at the bottom?
If you'll move over to 0052. And at the top, it shows it is page one of 19. And it says Solicitation Contract Order for Commercial projects -- Products and Commercial Services.
You see that?

A Yes.
Q And this is a contract between the government and the CCA; right?
A Yes, sir.
Q All right. Now, when you look at that date, it says "Award/Effective Date 5/5/2023"?
A Yes.
Q Does this appear to be the initial contract document that you had with the government?
A It looks that way.
Q All right. And if you go to Bates-stamped page number 70, you see down on page 70, it has "List of Attachments." And then under that, it has "Statement of Work."
You see that?
A Yes.
Q And then Schedule, Rate, and Cost.
You see that?
A Yes.
Q Okay. Do you know, as you sit here right now, what those attachments were?
A No.
MR. TUBIN: John, I don't --
MR. ROMANO: Yeah.
MR. TUBIN: -- mean to interrupt you.

If I can be any help, Tom, Exhibit 14 should correspond into that, if that's any help.

MR. ROMANO: All right. To the Statement of Work?

MR. TUBIN: (No verbal response.)

MR. ROMANO: Okay. Let's go back to 14. I just want to make sure that we are -- all right. This is the document that was produced?

MR. TUBIN: This morning.

MR. ROMANO: This morning? Okay.

BY MR. ROMANO:

Q We've been advised by government counsel that Exhibit 14 corresponds to the attachment of the Statement of Work.

Do you see that?

A Yes.

Q All right. This appears to at least be a form document.

A Okay.

Q If you need to grab something, sir, go ahead.

A Okay.

Q Other than this Statement of Work appearing in Exhibit 14, have you seen any other

document which is a CCA-specific Statement of Work which sets forth in a bullet-point fashion your scope of work for this case?

A That my office generated?

Q No. That you received.

A Oh. Not that I can -- not that I recall, no.

Q Did your office generate anything in the nature of a scope of work type of a document?

A I have a standard retention letter that I send. It's pretty boilerplate.

Q Okay. In this case, there was no retainer; right?

A That's correct.

Q All right. But even though there was no retainer, did you send the government your standard retention letter?

A I don't recall. I don't get involved in that. It's usually my secretaries who do that. And typically we do.

Q All right. But the retention letter that you would have used with the government, is it identical to a retention letter you would use on any injury or tort case?

A Yes.

Q All right. As you sit here today, do you know what your current ceiling is for CCA?
A No.
Q Are you aware that it exceeds $700,000?
A I -- I don't know.
MR. TUBIN: Objection to form.
THE WITNESS: I have no idea where it is other than if I looked at these, you know, ceiling levels specified here.
BY MR. ROMANO:
Q Okay. Is CCA a corporation?
A Yes.
Q Does it have shareholders?
A I'm the owner of the company. I'm the only shareholder.
Q You're it?
A Yes.
Q Okay. Are you the president?
A Yes.
Q Are you the CEO?
A As I said, we're a small business. We don't really have formal titles but I do go by president.
Q Okay. But you are the head of the company?

A Yes.
Q All right. On a matter like this where you are talking about billings into the multiples of hundreds of thousands of dollars, are you saying you actually have no idea what the billings are on a case of this magnitude?
A Well, I have some idea.
Q All right.
A I wouldn't say no idea.
Q Well, do you have an idea that the ceiling is $799,654.75?
A No. But if that's what the documents shows, I'll, you know, defer to that. I don't think our billings have come close to that but you can do the math. I don't know.
Q If you look on page -- by the way, we're on Exhibit 15. Look at Bates-stamped page number 23.

As you look at this, does this invoice --
MR. TUBIN: Do you mean -- sorry -- Exhibit 16?
MR. ROMANO: I'm sorry. It is 16.
MR. TUBIN: Okay.
MR. ROMANO: Yeah.

BY MR. ROMANO:

Q Exhibit 16, invoices. Go to Bates-stamped page 23, 0023. Is this invoice the first invoice that CCA sent to the government?

A I don't know, sir.

Q All right. Well, looking at this invoice on February 28th, 2025, did CCA begin its practice of billing on the 1st and 15th of each month shortly after you entered into the agreement with the government to work as an expert on this case?

A No. That's been a longstanding practice for us.

Q The 1st and 15th?

A Yes.

Q Okay. Then here's my question: If you entered into a contract with the government back in 2023, would your practice have been to send invoices to the government right after you signed the contract on the 1st and 15th of each month?

A Yes.

Q All right. And your office has all of those invoices; correct?

A I hope so.

Q All right. Your bookkeeping department --

A Yes.

Q -- will have those?

A I'm sorry I'm not able to probably give you as full information because I don't do the billing, but I'm doing the best I can today with it.

Q When you complete a life care plan in your work on a case such as these cases in the Camp Lejeune matter, once the life care plan is completed, do you have any automatic system in place whereby you go back and reassess everything to make sure you got it right?

A The measure that I apply after the life care plan is completed, I do a final review on it, and then we transmit it to whoever contributed and give them an opportunity and an invitation to review it and respond with any changes, amendments, or indicate their approval.

Q And the people who would --

VIDEOGRAPHER: Sorry, Counsel, microphone.

MR. ROMANO: Oh.

All set?

VIDEOGRAPHER: Um-hum.

BY MR. ROMANO:

Q When others review that completed life care plan, are you referring to people in-house with CCA?

A Well, ultimately, it's trans-- yes. My

CCA people are looking at it, as am I, but also the final step is where we send it to the contributors; so, for example, Dr. Young, Dr. Gollomp, Dr. Stadler, Blackstone [sic].

Q In these seven cases, in each instance, did you forward the completed life care plan to each of those physicians?

A Yes.

Q All right. And what is it that you ask that physician to do when you submit the completed life care plan to him or her?

MR. TUBIN: Objection.

Under CMO, those communications are not discoverable, and I instruct you not to answer the question.

BY MR. ROMANO:

Q I'm not asking you to reveal anything that anybody told you. I'm just saying, when you complete a life care plan, you say you send it out to a contributor. This applies to all life care plans that you do?

A Yes.

Q All right. A contributor would be a consulting physician or a treating physician in a given case?

A A healthcare provider, or it could be a teacher if it is a child case in, you know, a pediatric situation.

But it is the people who have made contributions to the life care plan in terms of interventions, specifying treatment protocols.

Q All right. So when you have one of those contributors and you have a completed life care plan and you submit the life care plan to her, for example, what is it that you expect that contributor to do?

A To review --

MR. TUBIN: Same -- same objections, same instruction not to answer.

BY MR. ROMANO:

Q In terms of the life care plan, in any of your life care plans in this instance, did you complete the life care plan and then send it to a contributor and then edit it?

A No. There weren't any changes that were communicated back to me. The contributors agreed that the life care plan was appropriate, had no changes to make.

So there were no, let's say, subsequent editions published.

Q All right.
A That would include the Mousser case after he had the bladder cancer diagnosis.
Q And then the supplement?
A Yes, the same life care plan, you'll see.
MR. ROMANO: All right. This would be a good time to take 15 minutes, please. Let me chat with co-counsel. But I'm about done. I may be done. I may have some additional questions but I'll try to expedite this.
VIDEOGRAPHER: Off record, 4:48 p.m.
(A brief recess is had from 4:48 p.m. to 5:06 p.m.)
VIDEOGRAPHER: On record, 5:06 p.m.
BY MR. ROMANO:
Q Going back for a moment to Exhibit 14.
Under the first page under Statement of Work, if you go to number 5, it says "CCA will submit detailed itemized statements for services rendered and costs incurred in connection with this contract for payment monthly and a final invoice within 60 days of the completion and acceptance of all services."
Do you see that?
A Yes.

Q All right. My understanding is, in this instance, you actually were sending your invoices to them twice a month, 1st and 15th; right?

A To the -- to the best of my knowledge, that's our standard practice, unless my bookkeeper was doing it differently. Again, I don't get involved in the minutiae of the billing, so...

Q Right. You know of no reason why she should do it differently in this case; correct?
