Exhibit 770

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF NORTH CAROLINA

IN RE:	)	
	)	
CAMP LEJEUNE WATER LITIGATION	)	7:23-CV-00897
	)	

Andrew Brod, PhD
Tuesday, February 10, 2026

Videotaped deposition taken in the above matter, held at 101 S. Edgeworth Street, Greensboro, North Carolina 27401, commencing at 9:33 a.m. Eastern Time.

Stenographically recorded and transcribed by Lisa Taylor, Registered Professional Reporter, Pennsylvania Notary Public, Pennsylvania eNotary, and North Carolina Notary Public (participating via videoconference).

(Videotaped deposition commences, 9:27 a.m. Eastern Time.)

– – –

(The witness will read and sign the deposition transcript.)

– – –

VIDEOGRAPHER: On record. Today is February 10, 2026, and the time is 9:27 a.m. I'm the videographer, Rachael Corcione, and the court reporter is Lisa Taylor.

This is the video deposition of Andrew Brod, in re: Camp Lejeune Water Litigation.

Will counsel now introduce themselves for the video record, after which the court reporter will swear in the witness.

MR. ROMANO: John Romano with Romano Law Group on behalf of the plaintiffs.

MS. KONSTANTOPOULOS: Melanie Konstantopoulos on behalf of the United States.

MR. TURNER: Joseph Turner on behalf of the United States.

– – –

(ANDREW BROD, PhD, having affirmed to tell the truth, the whole truth, and

nothing but the truth, testified as follows:)

_ _ _

EXAMINATION

BY MR. ROMANO:

Q. Please tell us your full name.

A. Andrew Chappell Brod. Chappell has two P's and two L's.

Q. Who is the individual who you first communicated with regarding your hiring in this case?

A. As I recall, it was Daniel Eagles of US DOJ.

Q. When was it you were first contacted by Daniel Eagles?

A. As I recall, it was late 2022.

Q. Had you ever worked with Daniel -- Eagles or Engles?

A. Eagles.

Q. Had you ever worked with Daniel Eagles before that?

A. No.

Q. Before you got this call from Daniel Eagles, had you had any involvement with respect to the Camp Lejeune litigation matters?

A. No.

Q. When you were first hired on, did you understand you were being hired on as an economist to review and evaluate certain cases and case material?

MS. KONSTANTOPOULOS: And objection -- object to the record for attorney-client privilege.

To the extent that you are not providing substantive communications with attorneys, you can answer that question.

BY MR. ROMANO:

Q. Well, I'll rephrase the question.

What did you understand you were supposed to do after you -- the government got in touch with you?

MR. ROMANO: Same objection.

You can answer.

THE WITNESS: At first, the contact was really exploratory, discussing what kind of damages analyses and what kind of damages project would be pursued.

It wasn't until, I suppose, the next year, the following year, rather, when my role was better defined.

BY MR. ROMANO:

Q. Okay. Once your role was better defined, in your mind, what was it you were supposed to evaluate in terms of categories of damage?

MR. ROMANO: Objection to the extent this question calls for attorney-client correct privilege.

Without revealing the substance of any communications with the attorneys, you may answer the question if you're able to.

THE WITNESS: I was to be a defense damages expert to provide expert testimony and expert reports in the field of economic damages potentially to assess and rebut any plaintiff's experts reports along these lines.

BY MR. ROMANO:

Q. When you were hired, what did you believe in your mind was going to be your goal in this case?

MR. ROMANO: Objection to form.

THE WITNESS: Well, my goal, as always, is to do as objective and as reasonable an economic analysis as I can.

BY MR. ROMANO:

Q. Why is it important to do an objective analysis as an expert?

A. Well, I can't speak for all experts. What I can address is why that's important for an economics expert, for a damages expert.

In principle, I'm on no one's side. My job is to do as reasonable and sensible an analysis as I can.

It's not my job to help the US government here. It's not my job to hurt the plaintiffs here.

It's my job to do the analysis that I think is appropriate and reasonable.

Q. So being an objective and reasonable analyst as an economist is important in your work; correct?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. Likewise, it is essential that you not be an advocate for one side or another when you are working as an expert; true?

A. True.
Q. How long have you been an economist? And by that I mean an economist who is working of -- in the field of analyzing economical and financial data and trends.
MR. ROMANO: Objection to form.
THE WITNESS: I've been an economist, I suppose, since -- well, even before I finished my PhD, I was an economist. I guess that means I've been an economist, using the definition you just laid out, for about 40 years.
BY MR. ROMANO:
Q. All right. How long has it been since you did your first case where you testified in either a deposition or a trial?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: As I recall, my first deposition was in 2001 or 2002, something in that ballpark.
BY MR. ROMANO:
Q. So your work as an economist before that first deposition was doing what? What was your line of work as an economist?

A. Well, I started doing forensic economics work in the mid- to late '90s, and prior to that first deposition, I produced reports. I was never called upon to testify in deposition or trial, but I had done some work in forensic economics.

Prior to that, I was on the faculty at the University of North Carolina at Greensboro. And also after my first deposition. I didn't leave UNC Greensboro until 2010. I didn't retire until 2010.

Q. If you go back to the time of that first deposition in roughly 2001, had you been doing forensic consulting as an economist before that?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, for just a few years.

BY MR. ROMANO:

Q. What was it that drew you into the business of forensic consulting?

A. The initial thing was someone calling the -- the business school at UNC Greensboro and asking if there was somebody who was available to work on a case.

And I was a consultant in many other respects. It sounded interesting. I took the case,

and it was interesting.

Q. All right. After you got that first case, did you then move into the business of consulting and ultimately form your own firm?

A. Yes. It was a slow progress, but yes.

Q. All right. Tell us how that progressed.

A. Well, at first, I worked on a few cases. I mean, once you work on one case, you are on, in a sense, the radar of attorneys. Sometimes you get referrals. Sometimes you get suggested.

And at first that didn't happen very often. I had a smattering of cases, but once we got into the 2000s, that sped up a little bit.

It wasn't until 2010 or so that I decided to make it my primary source of income.

Q. And for how long a period of time has forensic consulting been your primary source of income?

A. Since twenty --

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Since 2010, give or take.

BY MR. ROMANO:

Q. In your work as an economist, you agree that you have professional boundaries similar to staying in your lane in your field of expertise; true?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: There are certainly boundaries or lanes that I believe that I should stay within.

BY MR. ROMANO:

Q. All right. What are those boundaries or lanes you believe you should stay within?

A. Well, that's a pretty general question. So I can give you an example.

Often cases that I work on involve medical issues. I have no medical opinions in the cases that I work on. So one lane is that I don't opine about medical stuff.

Q. All right. As a forensic economist, you're not a medical diagnostician; true?

A. That's true.

Q. As a forensic economist, you do not create and develop life care plans; true?

A. True.

Q. As a forensic economist, you are not the fact-finder when a case goes to court; true?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: My understanding of that term is that the finder of fact is a judge or a jury, so that's correct. I'm neither judge nor jury.

BY MR. ROMANO:

Q. As a forensic economist in these five cases involving Parkinson's disease, you did not create or develop the sources upon which you rely; true?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. And is it true that the primary role of a forensic economist in an injury or wrongful death case is the analysis of economic data and trends?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I would say that the primary role of a forensic economist in a

case like these is to analyze damages, use the data that is -- that are available to me, and come up with what I believe are reasonable conclusions.

BY MR. ROMANO:

Q. And for purposes of today, when you use that term or phrase "reasonable conclusions," what does Andrew Brod, PhD, mean by that?

A. I suppose "reasonable" has a meaning that depends on the setting.

What I take "reasonable" to mean in my work is -- is -- is persuasive, understandable, and not easily rejected.

Q. True that your work as a forensic economist is having expertise which involves the application of economic theories and principles to assess financial implications? True?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: Yes, to assess economic implications, I would say. They're not always specifically financial, but yes.

BY MR. ROMANO:

Q. True you do not evaluate the effectiveness of medical care or treatment in this

case; correct?

A. Yes.

Q. And by "this case," I mean the five cases of Parkinson's disease we're here to talk about today; correct?

A. Yes.

Q. And as a forensic economist in these five Parkinson's disease cases, you did not provide opinions regarding the appropriateness of the medical care or treatment or medical procedures; correct?

A. Yes.

Q. As to medical care and treatment, is it true you defer to the work and decisions of the medical doctors and healthcare providers?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, and other medical experts.

BY MR. ROMANO:

Q. And as to life care planning, you defer to life care planners who have created and developed various life care plans; correct?

A. Yes.

Q. I realize you've had your deposition

taken a lot of times, and I'm guessing that lawyers remind you of all sorts of instructions.

The only thing I would say first, if you want to take a break at any time -- I'm sure you know this -- if you just let DOJ lawyers know or the court reporter, we're going to take a break at any time. Okay?

A. Okay.

Q. And so that you'll know, it does not matter to me what the reason is. If you want to take a break, including if you want to talk to the DOJ lawyers, you tell me. We're going to take a break. Okay?

A. Yes.

Q. As you can already see, I talk very slow, so I don't think there will be a problem with speediness of -- of questions, but if I ask a question and it is something that you don't understand, you know, you can just tell me you don't understand it, and I'll try to rephrase it or ask a different question. Okay?

A. Yes.

Q. Is there anything about your health that would prevent us from moving forward with the deposition today?

A. Not that I know of.
Q. All right. I hope there's nothing. I know sometimes --
A. I hope not as well.
Q. -- people have colds and flu and they're taking medications.
You're -- you're good to go today in terms of your mental alertness; right?
A. I think so.
MR. ROMANO: Okay. All right. We premarked a number of exhibits. Some of them I'm going to need to ask you questions about and some I won't, but I just want to get these on the record for right now.
And I've got these in packets. Perhaps the best thing is just to state on the record what we've got. Then I'll come back and go through them one by one. Okay?
So Exhibit Number 1 is the Brod deposition notice, and then Number 2 is the Brod CV, or curriculum vitae.
By the way, while I'm doing this, I'll give you Exhibit 1 so you can start to take a look at that. Okay?
MS. KONSTANTOPOULOS: Counsel, can you

provide -- pass a copy to --
MR. ROMANO: Yep.
COURT REPORTER: Can we go off the record one second. Off the record.
VIDEOGRAPHER: Off record at 9:44.
(Off the record.)
(Whereupon, Exhibits 1 and 2 marked for identification.)
VIDEOGRAPHER: On record at 9:44.

BY MR. ROMANO:

Q. All set. All right. You have Exhibit Number 1 there in front of you?

A. Yes.

Q. Does that appear to be the deposition notice along with the subpoena for the deposition and the duces tecum?

A. It does.

Q. All right. Have you seen that before today?

A. Yes.

Q. And have you complied with that in the sense of providing all of the necessary documents to the government which in turn they provided to us?

MS. KONSTANTOPOULOS: Objection to -- oh, sorry, Counsel.

MR. ROMANO: That's all right. It's all right.

MS. KONSTANTOPOULOS: Objection to form and objection to the extent it calls for attorney-client privileged communications -- I'm sorry -- privileged communications.

You can answer the question.

THE WITNESS: Yes.

MR. ROMANO: Okay. And I'm going to slow it down based on our discussion a moment ago. It will probably be easier if we do that as we go through these.

I'll hand you what we marked as Exhibit Number 2.

And hang on. Let me give copies of these to counsel.

BY MR. ROMANO:

Q. Exhibit Number 2 appears to be your curriculum vitae; correct?

A. Yes.

Q. Who prepared your curriculum vitae?

A. I did.

Q. Is it accurate and up to date as of today, the date of this deposition?

A. Yes.

Q. Do you have any other CVs that you use on a regular basis for your forensic economics work?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

MR. ROMANO: I'll go to Exhibit Number 3. I'll hand you a copy of that, and I'll hand copies to each counsel.

(Whereupon, Exhibit 3 marked for identification.)

BY MR. ROMANO:

Q. And can you identify Exhibit number 3 for us, please.

A. This appears to be a few pages printed out from my website.

Q. And what is the address of your website?

A. Andrewbrod.com.

Q. As we look at these materials from your website, that first page, just tell us what that is. What do you -- the gist of this page.

A. I think the first page is just the landing page. That is -- it's a fairly low-tech website, and this is just the first page you would see.

Q. All right. Then you go to the second page, and does that contain your biographical data?
A. It does.
Q. And then there is a contact page which comes next; correct?
A. Yes.
Q. And then this page, Case Experience, what is that?
A. It's just a description of some cases that I've worked on.
Q. All right. And then the final page, which says Commentary, what is that?
A. At the time when this website was created, I was a fairly frequent writer in popular and business media, so I wrote articles, monthly articles in newspapers and magazines.
MR. ROMANO: Let me hand you Exhibit Number 4, and I'll hand copies to counsel.
(Whereupon, Exhibit 4 marked for identification.)
BY MR. ROMANO:
Q. Have you seen this before?
A. No.
Q. Do you know what this transmittal letter is dated February 5, 2026, regarding

documents pertaining to you?
A. I believe it's February 6th.
Q. February 6th.
A. I -- I can read it, but I'm not aware of what it's about --
Q. Okay.
A. -- beyond that, no.
Q. You were not a part of creating that letter?
A. I was not.
MR. ROMANO: Okay. I'll move to the -- to the next exhibit, Exhibit Number 5. While you're looking at that, I'll hand copies to each -- each counsel.
(Whereupon, Exhibit 5 marked for identification.)
BY MR. ROMANO:
Q. And you see this is entitled Supplemental Materials Considered by Dr. Andrew Brod, February 3, 2026?
A. Yes.
Q. All right. Do you recognize these as additional materials you reviewed in this case?
A. Yes.
Q. In going through these materials, can

you tell us when you first received these materials?

And I'm not looking for a precise date if you don't have one, but approximately when did you receive these additional materials?

A. First I need to amend my previous answer. I don't recognize necessarily, you know, the Bates numbers. The one -- the documents that have titles, I recognize those, but I don't -- I have not memorized Bates numbers.

Now, as far when I received them, my recollection is that many of these were provided earlier this year. I don't think it was late 2025. I think it was in January of this year.

Q. All right. And is -- does this appear to be an accurate list of the additional supplemental materials that you have considered as a part of formulating your opinions in this case?

A. Yes, barring the Bates-stamped -- the ones that are identified only by Bates numbers. Again, I don't memorize Bates numbers.

Q. Understood.

A. But the others, yes, I -- I recognize them. I have seen them.

MR. ROMANO: Let's go to Exhibit Number 6.

I'm going to skip Number 6 for a minute because I think they're out of order in the folder I've got there.

So we'll go to Exhibit Number 7, and I'll hand copies to counsel.

(Whereupon, Exhibit 7 marked for identification.)

BY MR. ROMANO:

Q. Would you identify Exhibit Number 7, please, and tell us what that is.

A. It appears to be the collection of invoices that I have submitted on this project.

Q. I'll come back to that later, but in looking at what is in Exhibit Number 7, does that appear to be all of the invoices for this case?

And I'd ask -- just look carefully. There may have been supplements to that. I just want to make sure that we've got them all.

A. Yes, they are. They're numbered, but they are out of order.

Q. Okay. Thank you.

A. I haven't -- I mean, I think it's everything, but it's not immediately apparent given that the numbering is out of order.

Q. All right. Let me just say this as to

this exhibit and the invoices: Please feel free during a break and take your time if you want to look through that some more.

I just want to make sure that we have all of the invoices before we leave today. So I'm not holding you to that particular packet. If -- if there are others, it's okay. I just want to make sure we get them included. Okay?

A. I believe this covers it.

MR. ROMANO: Okay. All right. Then I'll come back to these later, but for right now, we don't need to go through all of them.

But Exhibit number 8 would be the Brod materials considered regarding Mr. Sparks.

Number 9, Brod materials considered regarding Mr. Peterson.

Number 10, Brod materials considered regarding Diane Rothchild.

11, Brod materials considered regarding Robert Welch.

And Exhibit 12, Brod materials considered regarding Mr. McElhiney.

(Whereupon, Exhibits 8, 9, 10, 11, and 12 marked for identification.)

BY MR. ROMANO:

Q. Let me -- let me just go to one of these for a moment. We'll take the first one, which is Exhibit Number 8, if you can take a look at that, please. Just tell us what that is.

A. Sure. The title is pretty descriptive. These are materials that I considered in producing my expert report regarding Mr. Sparks.

Q. Okay. And for each of the five cases, is there indeed a materials considered list of documents that you have provided us?

A. Yes.

Q. All right. I recognize that the documents on each might vary, but is the way you have formatted the list -- is it similar in each of the five cases?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. All right. What is the purpose, then, of the materials considered list --

MS. KONSTANTOPOULOS: Objection --

THE WITNESS: -- from your perspective?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Well, it's hard for me to answer that. It was a request made of me.

MS. KONSTANTOPOULOS: Objection to the extent that the question calls for privileged communications.

BY MR. ROMANO:

Q. Did you prepare --

A. It was something I was asked to do.

Q. Did you prepare this document?

MS. KONSTANTOPOULOS: Objection.

THE WITNESS: I believe so.

BY MR. ROMANO:

Q. All right. The materials that were on here, did you consider and review and analyze these documents and materials?

A. Yes.

Q. And did you in a similar way do that for each of these five Parkinson's disease cases?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. Since we're here, I'll quickly hit on

each one of these.

Would you look at Exhibit Number 9. Is this the materials considered list for the Peterson matter?

MR. ROMANO: And I'll hand copies to counsel.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. Exhibit Number 10, is this the materials list for Diane Rothchild?

A. Yes.

Q. Exhibit Number 11, is this your materials considered list on the Robert Welch matter?

A. Yes.

MR. ROMANO: And I'll provide a copy of that to counsel.

BY MR. ROMANO:

Q. And Exhibit Number 12, is this the materials considered list regarding the McElhiney matter?

A. Yes, it appears so.

MR. ROMANO: And just for the record, on these exhibits, I am providing the witness with the exhibit and two copies to government

counsel.

MS. KONSTANTOPOULOS: That is correct.

BY MR. ROMANO:

Q. In addition to any documents and/or materials you've assessed in this case, are there any other documents you feel you need in order to arrive at your opinions before you testify in court?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

BY MR. ROMANO:

Q. Have you requested from any source any documents which you feel you need and which you have not yet received?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

BY MR. ROMANO:

Q. Do you know the date and month you were actually retained as an expert in this case?

MS. KONSTANTOPOULOS: Objection to the extent it calls for privileged communications.

But you can answer that question.

THE WITNESS: I believe that it was

December 29th of '22.

BY MR. ROMANO:

Q. And in this instance, did you in any way before having contact with the government solicit the government to be hired as a forensic economist in this case?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: No.

BY MR. ROMANO:

Q. What do you perceive is your purpose and function in this case?

A. As I said previously, my job is to do the work of a forensic economist, in particular, one doing damages analysis.

My role and job is to assess and rebut plaintiff's experts reports on the subject of economic damages.

Q. Do you agree, Dr. Brod, that the hallmark of an expert is not to be an advocate, but rather to be objective and search for that which is accurate and truthful?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Again, I can't speak for

other kinds of experts, but for an economics expert, that is absolutely the objective, the goal.

BY MR. ROMANO:

Q. In your CV -- by the way, any time you need to go to one of the documents, please feel free to do so and pull it up.

In your CV, under Professional Experience, it notes '97 to the present you've had Brod Forensic Economics as a firm or company; right?

A. Yes.

Q. Are you the owner of the Brod Forensic Economics?

A. So to speak. It's not an entity. It's essentially a letterhead. I'm a sole proprietor, but on my correspondence, invoices, etc., I put "Brod Forensic Economics" at the top.

Q. Okay. How many employees does Brod Forensic Economists now have?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Zero. I work with an assistant, but we work on a contractor basis.

BY MR. ROMANO:

Q. Do you have an office address or do

you work out of your home?
A. I work out of my home.
Q. Are there any other economists who are in any way in a formal sense affiliated with Brod Forensic Economics?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: No.
BY MR. ROMANO:
Q. And as to the company Brod Forensic Economics, what is its primary function? Understanding, as you said, it's a sole proprietorship.
A. Well, the -- given that it's not an actual entity -- it's not an LLC. It's not an S corporation. It's just a letterhead. Its function is the same as mine is when I do forensic economics consulting.
Q. Is it fair to say that Brod Forensic Economics is you?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: Yes.
BY MR. ROMANO:
Q. As an economist, have you authored any

peer-reviewed articles in the field of economics at any time in the last 10 years?

A. No.

Q. As an economist, have you authored any peer-reviewed articles at any time in the last 20 years?

A. I don't think so. My work as a standard academic economist was primarily in the '90s. I can't remember if one of the publication dates of my works was in the early 2000s. I don't recall.

My guess is that the answer is no, not in the last two decades.

BY MR. ROMANO:

Q. All right. In the last 10 years, have you given any lectures at annual national meetings for any group of economists?

A. No.

Q. There is a publication Attorney at Law Magazine. You're familiar with that?

A. I am.

Q. And you've written a number of blogs or articles for that magazine; right?

A. Articles, yes.

Q. All right. What is Attorney at Law

Magazine?

A. It is a magazine whose readership is attorneys. The business model is I pay them to run my articles. So they're essentially advertisements.

My articles touch upon various issues in forensic economics, but it's not -- it's not refereed. It's essentially popular media.

Q. All right. Do you still continue to this day to author these paid articles for Attorney at Law Magazine?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. And for how many years have you been doing this?

A. Seven or eight, I would guess.

Q. The reports that you rendered on each of the five cases, who actually transcribed the reports?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Who -- who wrote them?

BY MR. ROMANO:

Q. Who typed them up?

A. I typed them up.
Q. Okay. You mentioned earlier that you have an assistant who you work with at your business; right?
A. Yes.
Q. What is the name of that assistant?
A. Melissa Hershberger, H-E-R-S-H-B-E-R-G-E-R.
Q. And what is Melissa Hershberger's job title or role?
A. Yeah, there's no title. It's just us. Her role is to provide research assistance. She manages documents, occasionally finds articles and data that I need.
She does not write reports. She does not conduct the analysis, and she doesn't communicate with clients. You know, these are all things that I do.
And I should also add that she doesn't testify. I do that as well.
Q. Is Melissa Hershberger an economist?
A. She has an MBA from Duke and is a former instructor in finance and accounting at UNC Greensboro.
Q. Is she an actual "employee" of your

business or fully contracted?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Right. As I said, I have no employees. She's -- we have a 1099 relationship, she and I.

BY MR. ROMANO:

Q. Right. Dr. Brod, in your completing your work and analysis on these Parkinson's disease cases, have you utilized artificial intelligence in any manner whatsoever as a part of your work?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

BY MR. ROMANO:

Q. Zero?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I can think of no instances when I -- in which I've used AI. I write my own work.

BY MR. ROMANO:

Q. The reports which you have rendered in the five Parkinson's disease cases, are these reports rendered by using any form of a template

report format?

MS. KONSTANTOPOULOS: Objection to form. Objection to the extent it calls for privileged communications.

You can answer.

THE WITNESS: If so, they're templates that I developed, so -- so in a sense, no. I certainly use no one else's template.

BY MR. ROMANO:

Q. All right. I ask that because in each of the reports, there is certain language when you render opinions where the language is identical in those reports. That is why I'm wondering if there is some form of a template which you are using?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: Well, again, there is no template provided to me by someone else.

Did I try to harmonize the language in my reports? I did.

But it was not language provided to me by someone. It wasn't a report format that was provided to me by someone. It's my report.

BY MR. ROMANO:

Q. All right. In work that you did, was there any level of cutting and pasting from one report to another as to these five Parkinson's disease cases?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: Well, sure, that's possible. That's just a typing technique, a word processing technique.

If I want to harmonize my language in certain respects, I might well copy and paste from a different report, but, again, it's a different report that I wrote.

BY MR. ROMANO:

Q. And when you use that term "harmonize" as to harmonizing these reports, what do you mean by that?

A. I thought it would be useful to readers of these reports for my language to be consistent for me to express my opinions in similar ways.

And for what it's worth, this is very similar to what Mr. Staller did for the plaintiffs.

I thought it would help if the reports

were -- if they were constructed and structured similarly.

Q. Have you at any time served on either active or reserve duty in any branch of the US armed forces?

A. No.

Q. Before you were hired as a forensic economist in this case by the government, had you ever been previously hired by the federal government to do any work as a forensic economist?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. Several occasions or just one or two?

A. Several.

Q. All right. Just briefly give us an overview of that work you did for the federal government before being hired in this case.

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I have been engaged -- over the years, I have been engaged a number of times by the three US Attorney's offices in North Carolina as a forensic economist in

cases in which someone sued the federal government.

BY MR. ROMANO:

Q. Were these federal Tort Claims Act cases?

A. I believe.

Q. Okay.

A. I'm not an attorney, but I think so.

Q. Were they, the cases in which you were hired by the federal government, personal injury or wrongful death matters?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I'm pausing.

Yes, but -- certainly the vast majority were. I'm trying to think if there were any -- there might have been one or two that required the analysis -- sort of a business analysis.

Sometimes people -- their personal injury involves -- you know, they're owners of a company, for example, and so you are effectively doing a commercial analysis, even though it is, I suppose, strictly speaking, a personal injury or wrongful death case.

So, yes, I think they were all personal injury or wrongful death cases.

BY MR. ROMANO:

Q. In any of those cases where you were hired as a forensic economist by the federal government, was your deposition taken?

A. Yes.

Q. The case list that you have provided of prior work as a forensic economist, does it have those cases listed, in other words, the cases where you were involved or hired by the federal government?

A. I think so. My recollection is that the list of testimony that I've provided was for the last four years.

And so over the last four years, there have been a couple of instances in which I'm aware in which I was deposed or testified at trial.

Q. As you go back over the years before this last four-year period, approximately how many times were you hired by the federal government in your capacity as a forensic economist?

A. Over the years, about 20 times.

Q. In each of those cases, did you render a report?

A. No, not in all cases.
Q. In approximately how many of the cases did you render a report?
A. Out of 20? Probably 13 or 14 of them.
Q. And of all the cases in which you've been involved where you were hired by the federal government as a forensic economist, did you testify at trial, either a -- a nonjury trial, a judge alone, or jury trial?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: Yes. As I recall, just once.
BY MR. ROMANO:
Q. Was that a jury trial or judge-alone trial?
A. As I recall, it was a bench trial.
Q. Where did that bench trial take place?
A. In the Western District in Charlotte.
Q. Do you remember the name of that case?
A. I have it on the tip of my tongue. Yes, I do remember it. The plaintiff's name was -- name was Carmellie [phonetically].
Q. And was that an injury or a death case or something else?

A. It was an injury case.
Q. In this particular case, did you require a retainer fee of the government upon being hired?
A. I'm sorry. Which particular case?
Q. In this case, the Camp Lejeune litigation, when you were hired, did you require a retainer fee as a part of your being hired?
A. To my knowledge, the federal government doesn't pay retainers.
Q. So no retainer fee?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: Yes, there was none.
BY MR. ROMANO:
Q. What is your arrangement with the federal government in this case in terms of your rates and how you are paid?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: My rate currently is $480 per hour for everything other than travel and testimony. So research, reviewing reports, prepping for depositions, reviewing other experts reports, conducting my own

research.

And half that, $240 per hour, for out-of-town travel, of which there has been none in these cases.

And $750 an hour for time in deposition.

In addition, my assistant bills at a rate of $106 per hour, which I just pass through to the government.

BY MR. ROMANO:

Q. When your assistant, Melissa -- right?

A. Right.

Q. All right. When your assistant, Melissa, does work, does she keep track of her time noting how many minutes or hours she is working on a given project?

A. Yes.

Q. Do you require that she detail out what the work is she is doing so that you know what she did and what she is billing for?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No, I don't require her to provide me with time sheets, but we talk virtually daily, so I know everything she's

doing.

BY MR. ROMANO:

Q. When Melissa works on a given case and spends a certain amount of time on it and you are billing for her time, how do you know what to bill for her time?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: She tells me.

BY MR. ROMANO:

Q. Verbally?

A. Sometimes.

Q. And is there --

A. Sometimes in an e-mail, sometimes in a text, sometimes orally.

Q. All right. Do you require that she provide you with the details of what she did or...?

MS. KONSTANTOPOULOS: Objection. Communications between experts and their assistants are considered privileged pursuant to CMO 17.

So to the extent it goes into substantive conversations with your assistant, I would instruct you not to answer. Otherwise, you can answer the

question.

THE WITNESS: I forgot the question.

BY MR. ROMANO:

Q. When Melissa reports her work to you and her time, what specifics do you require in terms of the information you need so that you can put that in an invoice to the government?

MS. KONSTANTOPOULOS: Same objection.

THE WITNESS: I don't require a time sheet, as I said. I just need to know the number of hours.

BY MR. ROMANO:

Q. What is your charge for a deposition per hour?

A. 750 per hour for depositions and trials with a -- oh, no. I'm sorry. I was going to say with an $1,800 daily minimum, but that's what -- that's with private clients.

There is no daily minimum when you work for the federal government.

Q. When your deposition is being taken like today as a video deposition, do you charge the same amount whether there is a video capturing everything or whether it's a non-video depo?

MS. KONSTANTOPOULOS: Objection to

form.

THE WITNESS: The thought never occurred to me. It's the same fee.

BY MR. ROMANO:

Q. In the last 10 years, have you worked as a forensic economist on the plaintiff's side and also on the defense side in personal injury and wrongful death cases?

A. Yes.

Q. Specifically in personal injury and wrongful death cases, what has been the breakdown, approximate breakdown, of percentage between your work for plaintiff and your work for defendants in the last 10 years?

A. For me, it's been roughly two-thirds plaintiffs, one-third defense. That's a -- a high proportion compared to most forensic economists. I do a little more defense work than most of them, but even for me, it's mostly plaintiffs work.

Q. And I asked you that question based on 10 years. Is it the same for the last five years?

A. As far as I know. I don't keep statistics. This is my best guess, but it's an educated guess.

Q. Do you have any type of a podcast

where you regularly broadcast it?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: It sounds fun, but no.

BY MR. ROMANO:

Q. Have you ever been called upon by the federal government to do any teaching in the area of forensic economists?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

BY MR. ROMANO:

Q. You're familiar with the Daubert case; right?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: I am.

MR. ROMANO: In fact --

THE WITNESS: Well, I should say I'm familiar with what it means to be challenged under Daubert.

I'm not am attorney who's familiar with the case, but I think I'm familiar with what it implies for expert witnesses.

BY MR. ROMANO:

Q. All right. True you've actually written an article about Daubert and challenges to experts; right?

THE WITNESS: I did in Attorney at Law Magazine.

BY MR. ROMANO:

Q. All right. Has any judge or court or tribunal ever restricted or limited your testimony in any way once your testimony was challenged?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. How many times has your testimony or expertise been limited or restricted?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: To my knowledge, just twice.

BY MR. ROMANO:

Q. Where -- where was each case located?

A. One --

Q. Meaning the court.

A. Right, right. One was located in

Cumberland County, and the other one was in, I believe, federal court in the Middle District.

Q. As to the Cumberland County matter, was that a personal injury or wrongful death case?

A. Yes.

Q. Were you testifying for the plaintiff or defense?

A. Plaintiff.

Q. Was it a challenge under Daubert or some other law which may have preceded Daubert, if you know?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: It wasn't under Daubert because it wasn't about my qualifications, per se. It was a challenge.

BY MR. ROMANO:

Q. What was the challenge?

A. Well, as I understood it -- you know, so many of these things happen outside of my knowledge, you know.

Q. Just your understanding is what I'm looking for.

A. My understanding is that a fact witness, I believe the treating physician, changed

his testimony or it was misunderstood or there was miscommunication or something, but the upshot was that I was allowed to testify to past economic damages up until the trial but not future economic damages.

Q. Was a written order rendered by the judge regarding your testimony?

A. I have no idea.

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I'm sorry. I have no idea.

BY MR. ROMANO:

Q. And when approximately did that case take place?

A. I think it was 16 or 17 years ago.

Q. Do you remember the name of that case?

A. No, I do not.

Q. Did that case go to trial?

A. Yes.

Q. Did you testify at trial?

A. Yes.

Q. And was your testimony limited, as you have explained?

A. Yes. It was in -- in the courtroom

where that ruling was made. I may have even been on the stand when -- when it happened.

Q. You mentioned another case that you thought occurred in the Middle District of North Carolina.

A. Right. About 10 years ago.

Q. Was that a personal injury or wrongful death case?

A. No. That was a commercial case.

Q. And was your testimony being challenged by one side or the other?

A. Yes.

Q. All right. What was the nature of the challenge, as you understood it?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I can't speak to the challenge. My understanding is that the judge ruled that my expert opinion didn't add anything to the case.

BY MR. ROMANO:

Q. So your testimony was excluded?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: My -- my testimony was,

right.
BY MR. ROMANO:
Q. Do you remember the name of that case?
A. Yes.
Q. What was the name of that case?
A. It was MSI v. Cree. Cree, C-R-E-E, is the company that's now known as Wolfspeed. And it was a commercial dispute over LED lighting technology.
Q. Other than Melissa, did anyone else work with you as a part of your forensic economics analysis in these five Parkinson's disease cases?
MR. ROMANO: Objection to form.
THE WITNESS: No.
BY MR. ROMANO:
Q. Was it necessary for you to sub out any of your work to get help from another source other than yourself and Melissa?
A. No.
MR. ROMANO: All right. I'm going to next -- I'll try you to give you a heads-up as to where I'm going so you know what area I'm going to cover.
The next area I'm going to get into will be the report on the Eddie Peterson

case.

How is our court reporter doing?

COURT REPORTER: Okay.

MR. ROMANO: Okay. Videographer okay? Everybody okay?

You all set?

THE WITNESS: Sure.

MR. ROMANO: Okay.

MS. KONSTANTOPOULOS: Actually, Counsel, can we take a quick five-minute break?

MR. ROMANO: Sure, sure.

MS. KONSTANTOPOULOS: Okay. Thank you very much.

VIDEOGRAPHER: Off record at 10:33.

(Recess taken.)

VIDEOGRAPHER: On record at 10:43.

BY MR. ROMANO:

Q. All set?

A. Yes, I am.

Q. Okay. One more question relating to Melissa. Do you 1099 her?

A. Yes.

Q. Okay. And do you consider her to be an independent contractor regarding your business?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Right. Whether I consider her that or not, she is.

The way we work, however, is once we -- once she agrees to work on a case with me, then we have a hierarchical relationship where I'm the boss, the leader, the principal, and she is my assistant.

(Whereupon, Exhibit 14 marked for identification.)

BY MR. ROMANO:

Q. Let's go to Exhibit Number 14. Would you identify this, please.

A. This appears to be the report, including tables, regarding Mr. Peterson. This is my December 15th report.

Q. And if we break down the report, is this report structured in a manner that is similar to the report for the Rothchild case, Welch case, McElhiney case, and Sparks case?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. And you can refer to this report as much as you feel the need to, but if we go to the initial section, which is your introductory section, you state, "In this report, I provide a preliminary assessment and rebuttal of the plaintiff expert report regarding economic damages"; true?

A. I do say that.

Q. All right. And when you use that term "preliminary assessment," what do you mean by that? In other words, what is preliminary about this?

A. I guess two things. First, my understanding is that everything is preliminary until you testify to it under oath.

And second, it's preliminary in the sense that, as the last paragraph in that section says, for all I know, perhaps further information will become available, and if so, I may update my analysis.

Q. And it further states that the report -- that in this report you're providing this preliminary assessment and rebuttal of the plaintiff's expert reporting economic damages.

The report written by Staller and Dripps claims damages for lost earnings, lost

household services, and the value of a life care plan; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Actually, no, that's not what the -- the December report doesn't mention a second author.

BY MR. ROMANO:

Q. Okay. So in this particular report, as you go through it in this introductory section -- and when you refer to Staller, you're stating the report by Chad L. Staller claims damages for lost earnings, lost household services, and the value of a life care plan; correct?

A. Yes.

Q. You then state Mr. Peterson was diagnosed with Parkinson's disease in July 2001; correct?

A. Yes.

Q. And Mr. Peterson claims the damages resulted from his exposure to contaminated water at Camp Lejeune; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Actually, the sentence

says that he claims that the diagnosis resulted from his exposure to contaminated water.

BY MR. ROMANO:

Q. All right. I'll read it again and make sure we've got it accurately.

"Mr. Peterson was diagnosed with Parkinson's disease (PD) in July 2001, and he claims that the diagnosis resulted from his exposure to contaminated water at Camp Lejeune"; correct?

A. Yes, that's the sentence.

Q. "He further claims to have incurred economic damages as a result of that exposure"; correct?

A. Yes, that's what it says.

Q. And then you state, "For the sole purpose of this report, I will assume that liability has been established"; correct?

A. Yes, I said that.

Q. Have you received any additional materials to review and evaluate after the date of your rendering this December 15, 2025, report?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, and they appear on

Exhibit 5.
BY MR. ROMANO:
Q. And the documents that were provided to you and which you reviewed, referring to Exhibit 5, we previously discussed as to when you obtained it; correct?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: Yes.
BY MR. ROMANO:
Q. Right. Did they change -- did your review of the materials on Exhibit 5 change your opinions in any way, meaning change your opinions from your December 15, 2025, report?
A. No.
Q. Are all of your opinions that you are rendering in this case contained within your December 15, 2025, report regarding Edgar Allen Peterson?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: Yes, as currently expressed.
As I said before, if new information becomes available, that could change things,

but at this point, this is my opinion.
BY MR. ROMANO:
Q. Well, as we sit here today on the day of your deposition, is it true that all of your opinions that you intend to express in this case are contained in your December 15, 2025, report?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: Yes.
BY MR. ROMANO:
Q. Let's go to your section on page 1 that you number as number 3, Lost Earnings.
Do you have that there?
A. I do.
Q. All right. Define what is meant from your perspective as a forensic economist by the phrase "lost earnings."
A. Well, earnings refers to income earned through work rather than received as dividends, interest, whatever. So "earning" refers to earned income.
Lost earnings is generally the objective in an analysis like this, strictly speaking. Theoretically speaking, it is lost earning capacity. However, in the vast majority of

cases, lost earnings meanings lost earning capacity.

In other words -- put differently, in other words, in the vast majority of cases, lost earning capacity is taken to be lost earnings.

Q. In your work as a forensic economist, do you differentiate between lost earnings and lost earning capacity?

A. Sure, there is a theoretical distinction.

Q. What is the --

A. One -- I'm sorry. Please.

Q. My question is just: What is that theoretical distinction?

A. Right. The theoretical distinction is that lost earnings is often a combination of past earnings lost and expected future earnings lost.

Earning capacity could apply to both past and future, but it's usually applied to the future.

And so the difference between expected future earnings and lost future earning capacity is that the expected earnings are what you expect. It's a reasonable expectation, a reasonable projection of what that person would earn.

Earning capacity refers to the -- in a

sense, the maximum amount of earnings that that person could earn if someone is maximizing the present value of future earnings.

So -- so lost earning capacity is the theoretical objective.

Lost earnings, expected future lost earnings, is almost always our best predictor of it.

Can they be different in practice? Sure, but it just doesn't happen very often, as a rule.

So for our purposes, lost earnings is our best predictor of lost earning capacity.

Q. In the case of Eddie Peterson, in your analysis, is it lost earnings which you are trying to assess as a part of your work?

A. It's lost -- it's both. It's lost earning capacity. In this case, there is no -- there's no distinction. There's no -- there is a -- as I said, a theoretical distinction, but there's no reason, no evidence in this case, that would drive a wedge, so to speak, between lost earnings and lost earning capacity.

Q. You reviewed the reports, Staller and Dripps, and you see that they opine that the lost earnings are at $1,127,639; true?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

BY MR. ROMANO:

Q. All right. What do you have in your report of December 15, 2025, on this as to their conclusion?

A. Right. It's not there because as of December 15th, I was responding to a report by Staller alone. Mr. Staller did not partner with Mr. Dripps -- Dripps? Dripps? -- to produce the report, so there's no Staller and Dripps. It's just Staller. So that's one thing.

I was responding to Mr. Staller's expert opinion in the December 15th report, and the value that Mr. Staller arrives at is $1,126,348.

Q. And you say there is an error in this calculation?

MS. KONSTANTOPOULOS: Objection to form and foundation.

BY MR. ROMANO:

Q. Is that your position?

A. Not so much in the calculation. My -- the error that I identified was based on an expert opinion by the defense vocational expert

Dr. Shahnasarian regarding Mr. Peterson's work life expectancy.

Q. All right. And what is that opinion you rely upon from Dr. Shahnasarian?

A. Mr. Staller assumed that -- that Mr. Peterson's pre-PD -- and when I say "PD," I'm talking about Parkinson's disease -- his pre-PD work expectancy was 68.4 years.

Dr. Shahnasarian says that a more reasonable number was between 65 and 67 years.

I took the midpoint of that range and did a rebuttal analysis, a rebuttal projection based on 66 years of work life expectancy.

Q. And when you conduct your analysis, you come out to a result of this corrected analysis coming to a present value of lost earnings in the amount of $885,284; is that right?

A. Yes.

Q. The conclusion as to life expectancy on which you are basing your numbers, then, is that based solely on the information from Dr. Shahnasarian?

A. Yes, but it's not life expectancy. It's work life --

Q. Work life expectancy.

A. -- work life expectancy.

Q. Right. And explain briefly -- because we do not know who will end up reading this deposition, but it may be not just the judge but many, many people who are involved in this matter. So tell us what is the difference between life expectancy and work life expectancy.

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Life expectancy is a statistical calculation that determines when -- how long a person is likely to live based on attributes of the group that person is in. Males, for example, Latino females, etc., whatever the group is. That's life expectancy, how long is someone expected to live.

Work life expectancy is simply how long someone is expected to work or in this case to what age is someone expected to work.

BY MR. ROMANO:

Q. When you as an economist make a calculation based upon work life expectancy, is that strictly basing it upon statistical data from a government source?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Well, in this case, I -- I don't recall what Dr. Shahnasarian bases his expert opinion on. As I recall, it is based on statistics. It's based on demographic data of some sort. I just don't recall what it was.

And the same way that I don't step on the toes of medical experts to talk about their medical opinions, the same goes for vocational experts and their opinions.

So whereas I recall that he had a firm foundation, a statistical and data foundation for this, I don't really recall directly.

What I recall is his expert opinion was that Mr. Peterson would work until the age of 65 or 67 but for his Parkinson's.

BY MR. ROMANO:

Q. Right. Other than that disagreement, then, with Staller, was his methodology in this analysis acceptable to you?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I don't dispute it.

BY MR. ROMANO:

Q. Did you use the same methodology as Staller except for that one matter?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, that's what it says here in the last paragraph of that section on my report.

BY MR. ROMANO:

Q. And if you would read that, please, into the record?

A. Sure. The report says that I adopted --

MS. KONSTANTOPOULOS: Objection. Is there a question pending?

MR. ROMANO: Yes, yes.

MS. KONSTANTOPOULOS: The question is --

MR. ROMANO: The question is "Would you please read that into the record?"

MS. KONSTANTOPOULOS: The expert report is already entered as an exhibit. If there's a specific question, I would --

MR. ROMANO: That's the question.

MS. KONSTANTOPOULOS: It's --

MR. ROMANO: I'm asking him a question. I'm asking him to read something into the record. He should do that.

MS. KONSTANTOPOULOS: That's not a question.

However, you can answer to the extent that he asked you to read your report.

THE WITNESS: The last paragraph of my Section 3 of my Peterson report dated December 15th reads: "I adopted all of Mr. Staller's other assumptions and replicated their analysis, except for the slightly shorter work life expectancy. The result of this corrected analysis was a present value of lost earnings of $885,284."

There actually is a typo in that paragraph because I refer to Mr. Staller but then use "their." So it should read "his." I "replicated his analysis."

BY MR. ROMANO:

Q. When assessing work life expectancy, did you consider anything upon Eddie Peterson's desire as to how long he wanted and intended to work?

MS. KONSTANTOPOULOS: Objection to

form and foundation.

THE WITNESS: I did not assess his work life expectancy.

BY MR. ROMANO:

Q. Do you know whether or not Dr. Shahnasarian considered Eddie Peterson's intent as to how long he wanted to work?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: I don't know.

BY MR. ROMANO:

Q. In your work as a forensic economist and working with life care planners, do you ever factor into work life expectancy an individual's intended desire as to how long he or she intends to work?

MS. KONSTANTOPOULOS: Objection. Form and foundation.

THE WITNESS: My assumption is that the vocational expert making that assessment does precisely that.

And I should note that in this case, in this particular example, Dr. Shahnasarian is acting not as a life care planner but as a vocational expert.

And so when I use expert opinions of vocational experts, again, my assumption is that they have taken into account precisely what you described.

BY MR. ROMANO:

Q. When you as an economist determine an amount -- an amount to be assessed as damages for lost earnings, do you factor in such things as the worker's attitude, skills and talents, initiative, motivation, vision for the future in his calling as a Marine and a courtroom advocate?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Those certainly can be relevant factors.

In this case, I was assessing and rebutting Mr. Staller's report, and my assumption is that he took those things into account. Or maybe he didn't, but my role here was to assess and potentially rebut his analysis.

BY MR. ROMANO:

Q. All right. Let's move to lost household services. From your perspective as a forensic economist, define what is meant by the term

or phrase "household services."

A. "Household services" generally refers to chores, tasks, duties around the house such as cooking, cleaning, laundry, repairs, maintenance, mowing the lawn, yard work that people do around their house.

And the reason this concept is relevant in forensic economics is that when there's a personal injury or a wrongful death, part of the claim can be the value of those household services because help might have to be hired to replace the services previously performed by the injured person, the decedent, you know, whoever we're talking about.

Q. True that Staller presents a value of lost household services through December 31st of 2025, at which point such services are assumed to be covered by the life care plan?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I would say no. I think you are reading the first sentence of my Section 4 --

MR. ROMANO: Yes.

THE WITNESS: -- and, frankly, I -- I believe I misstated it because I don't think

he did present a value of lost household services.

He claimed to have done an analysis of lost household services that covered a period until December 31, 2025. In my opinion, he did not completely --

No, I'm sorry. I'd like to amend that answer. I take it back.

He does present -- please -- sorry about this. I'm not trying to be confusing.

He does present a value of lost household services. In my opinion, he doesn't do a full analysis of it, but he doesn't present a value of lost house -- lost household services.

BY MR. ROMANO:

Q. Is it true he set forth that value in his report?

A. He presented a value in his report, yes.

Q. All right. And you dispute his value; correct?

A. It's an intermediate value. It's not really a value of lost household services.

Q. All right. What is -- what is your --

as -- as we look through your report, you state, "Staller does not express an expert opinion regarding the number of service hours Mr. Peterson could have provided but for his PD," Parkinson's disease.

You state that; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I did.

BY MR. ROMANO:

Q. Okay. What do you mean by that?

A. What I mean is that -- well, I mean, I'm not sure how to say what I mean other than to say what I just said: He does not claim to know the number of lost service hours.

The way these analyses are typically done in forensic economics is that you determine how many hours -- how many service hours were lost because of the injury, the disease, whatever. You multiply that times a reasonable service wage, the wage that is assumed would have to be paid to someone replacing those services. Then you add them up over time.

He obtained a service wage, but he only did a calculation corresponding to an

assumption of one hour per week, one lost service hour per week.

He did a partial analysis. He just didn't do the complete job.

Q. Do you know what services or chores of a household nature Eddie Peterson performed prior to his Parkinson's disease?

A. I do not, and neither does Mr. Staller. I assume that if he knew, he would have told us, but he didn't.

Q. Have you made any calculation as to what the lost house -- lost household services should be based on any research you've done into what services Eddie Peterson performed in the house pre-Parkinson's disease?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No. How could I? No one has said on the record or in any document how many hours he did provide before his PD, or actually, more relevantly, we should say but for his PD, because, you know, these are all people who are aging through time.

So it's not just what did he do before he contracted PD. The real issue is what

would he be doing now but for his PD.

These are potentially complicated questions, and for whatever reason, Mr. Staller didn't even investigate them.

BY MR. ROMANO:

Q. And in your report, you state that he presented an average number of hours based on data published by the US Bureau of Labor Statistics; correct? That's what you state?

A. I did state that.

Q. You say that number applies to all men of Mr. Peterson's age; correct?

A. It does.

Q. Okay. Tell us what difference does that make.

A. Well, for example, the footnote to my next sentence reminds us that Mr. Peterson used to do chores around the house. So there is probably some amount of lost earnings. There may be. It just can't be qualified given Mr. Staller's analysis.

So his wife said he used to do chores around the house, but he rarely cooked and rarely worked in the yard.

So already we know that he didn't do

the average number of hours as presented by Mr. Staller in his table because that average includes men of Mr. Peterson's age who do some cleaning or cooking, rather, and do work in the yard.

So we already know based on Ms. -- Ms. Peterson's testimony that the value in the table presented by Mr. Staller is wrong, and Mr. Staller didn't do any kind of investigation to determine what the right number would be.

Q. And your criticism of Staller is that he chose this one-hour-per-week model; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I wouldn't call it a model. I would say my criticism is that he did half a job.

BY MR. ROMANO:

Q. Okay. All right. This -- have you ever in your work as a forensic economist done projections for loss of household services where you chose a specific number of hours similar to what Staller has done?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I have never -- I have never done what Mr. Staller has done. Moreover, I have never seen any economist do what Mr. Staller has done.

BY MR. ROMANO:

Q. All right. You are aware, as you've just said, that Mrs. Peterson said that Eddie Peterson did perform household services and chores pre-Parkinson's disease; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes. He used to -- I'm sorry. I'm waiting for the objection. Sorry.

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, he said he did some chores.

BY MR. ROMANO:

Q. Right. So assume for a moment you set aside what Staller says. Have you independently calculated or determined what the value is that should be placed on the loss of household services?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No. That is the job of the plaintiff's economist.

BY MR. ROMANO:

Q. So that I have this correctly, you have no opinion, then, on household services other than to say there is no basis for an award on lost household services since there's uncertainty as to the number of hours, as you're saying, according to Staller's report?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: In a sense, I do have an opinion. My opinion is that the analysis, the quantification of lost -- of the value of lost service hours was not completed.

I have no opinion about the number because I have no access to Mr. Peterson. You know who did? Well, Mr. Staller did.

He could have asked Mr. Peterson what kind of tasks he would be doing but for his PD, but apparently he didn't.

He could have asked Lori Peterson, his wife, what kind of chores Mr. Peterson used to do. She testified to them. It's not even clear that he read her deposition.

There are things that he could have done to find this information, but he didn't.

And so it's not for me to say what the number is because the person in the best position to find the number didn't do so.

BY MR. ROMANO:

Q. Did you do any investigation into this issue of loss of household services to determine what the loss should be?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No. Again, as I said, I did not do that.

My role here, as we've been saying -- as I've been saying, is to assess and rebut the plaintiff's analysis and the plaintiff's report.

For whatever reason, the plaintiff's economics expert in this case, Mr. Staller, didn't complete his work.

BY MR. ROMANO:

Q. Okay. Do I understand, though, that you do agree that Eddie Peterson did, in fact, perform household services and chores for the household before Parkinson's disease?

MS. KONSTANTOPOULOS: Objection to form.

BY MR. ROMANO:

Q. True?

A. Well, it's not for --

Q. You agree with that?

A. It's not for me --

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: It's not for me to agree or disagree.

What I know is that there is evidence, for example, cited on this page of my report that he used to do chores around the house.

Now, if those chores are chores that he would be doing but for his PD, then, yes, there could very easily be lost household services.

On the other hand, "used to do chores" means that he did them in the past. I don't know if he would still be doing them in this world in which he did not have PD. These are some of the questions that have to be discussed.

So do I agree that he had some lost

household services? I absolutely do not agree with that.

Do I agree that it's possible that there is a value of lost household services that's bigger than zero? Sure, that's possible, but we do not have at this point any expert testimony or any expert report that says what that number is.

BY MR. ROMANO:

Q. All right. Let's go to future medical expenses life care plan where you have that on page 2 of your December 15, 2025, report.

Do you have that there?

A. I do.

Q. And you base your projections on the life care plan which was prepared by Dr. Shahnasarian; true?

A. Yes.

Q. And his life care plan describes various medications and treatments and equipment which Dr. Shahnasarian believes Eddie Peterson will need in the future as a result of the PD; correct?

A. Yes.

Q. And from your report, we see that Dr. Shahnasarian took the cost estimates -- or I'm

sorry.

You took the cost estimates provided by Dr. Shahnasarian and obtained growth rates and costs in each category based on components of the Consumer Price Index, CPI; correct?

A. Yes.

Q. Define you what mean as a forensic economist by "growth rate."

A. Just inflation rate. It's the growth rate of future medical expenses and the assumption that that future growth rate will be a function of past inflation rates.

Q. Give us an example of how you would in a practical sense use growth rate on a particular item.

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Sure. If we're talking about -- for example, suppose we're looking at the category for physician services. That's -- that is a component of the CPI, the Consumer Price Index.

And I followed Mr. Staller in using a -- the period from 2014 through 2024. That was the period at that -- at the time he and

I did this report -- he did his report and I did my report, we didn't yet have data for 2025. We were still in 2025.

So 10 years, from 2014 through '24, and essentially you look at the -- the value of the CPI for a component in 2014 and you look at the value in 2024, and you can calculate the average annual growth rate or inflation rate for that component of the CPI over those 10 years.

BY MR. ROMANO:

Q. When you use the term "growth rate," is that the same to you as inflation rate?

A. In this case, yes, but let me -- let me be clear.

Q. Oh, sure, sure.

A. It is -- that is how I mean it when I'm talking about life care plans. One could talk about a growth rate of wages or earnings, but here we're talking medical expenses in a life care plan.

And, yes, the growth rate that I'm discussing here in the context of a life care plan is essentially the inflation rate. It is an average inflation rate.

Q. Over the past -- let's take 10-year

period, has the general inflation rate in the United States been the same as the inflation rate for medical care and medical services?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I'm not going to try to remember the data, but the answer is almost certainly not.

There's almost no reason to think that inflation rates for two -- two different components of the CPI, all items, which is the overall inflation rate, versus some component, some medical services or medical commodities component, would be the same. I'm sure they're different. They might be similar, but, again, I don't remember the exact numbers.

BY MR. ROMANO:

Q. Are you aware of data showing that the inflation rate for the last 10 years regarding medical services has by far exceeded the regular overall inflation rate in the United States?

MS. KONSTANTOPOULOS: Objection to form and foundation.

BY MR. ROMANO:

Q. True?

A. I'm aware of that data, and I'm not surprised to hear that.

Q. Is the growth rate a measure which describes how certain amounts, such as for the cost of a given medication -- how it will increase over a certain period of time?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: It is calculated as the average inflation rate over the period 2014 through 2024.

And it is my assumption, which is standard in the way economists analyze life care plans -- it is my assumption that average inflation rate will be the rate at which elements of that category increase in cost in the future.

BY MR. ROMANO:

Q. Okay. And is it true that the growth rate is usually explained by using a percentage? As an example, a medication costs $100 this year, and it rises by 5 percent each year. In 12 months from now, it will cost $105; true?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, except that it's not exactly that precise. These are annual data, and you're basically saying that within one year, if the cost is $100, then in the next year -- it could be nine months later. It could be 11 months later, but in that next -- or 13 months later, depending on where you are in these years.

These are annual averages. And so the average cost in that following year would be, in fact, $150, as -- you know, as laid out in your example.

BY MR. ROMANO:

Q. True that the growth rate allows us to form a more accurate picture of what the injured party will need to spend in the future for ongoing care?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, it's -- it's -- it's standard for economists to use growth rates, inflation rates in that way to get a better representation of what future medical

costs would be.

In my opinion, it's an indispensable part of the economic analysis of a life care plan.

BY MR. ROMANO:

Q. And did you account for inflation or this growth rate in your calculations?

A. Yes.

Q. What inflation rate did you use? Or what growth rate?

A. No one growth rate. I used a number of growth rates.

Q. And are they shown in your tables?

A. Yes.

Q. I'll come to that shortly. By the way, if it seems at any time that I ask you a question where it's taken out of context and you say, "Well, you must include the table to explain what I'm talking about," I don't mind you at all referring to that, and we'll go to that table. Okay?

A. Okay.

Q. All right. Is it important in your work as a forensic economist in this -- or these five Parkinson's disease cases that the economic

forecast you are making provide a realistic look at the individual's future financial burden?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: When I value a life care plan, it is important to factor in the future cost of those treatments, therapies, medications, etc.

BY MR. ROMANO:

Q. All right. What happens if your forecast is inaccurate and too low? What happens to the patient regarding future medical care needs?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: If the value of any life care plan is too low, as in your example, well, then not enough will be -- not enough compensation will be provided to the plaintiff, assuming a finding of liability, to cover the expense -- those future expenses.

BY MR. ROMANO:

Q. Meaning that the patient with a forecast which is too low could run out of money for the payment of these future care and treatment

needs; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, hypothetically.

BY MR. ROMANO:

Q. You referred in your report to the Consumer Price Index. What is that?

A. The Consumer Price Index, or CPI, is a measure of consumer prices. It is an index designed to capture prices of various commodities and groups of commodities and services and as much as possible to also take into account changes in quality and so on.

The Consumer Price Index is a data series -- or, rather, a series of data series produced by the Federal Bureau of Labor Statistics.

Q. Is it important as a part of your forensic work in these cases to have relied upon the Consumer Price Index?

A. Yes. That is the standard methodology in forensic economics.

Q. Quantify for us the level of accuracy or reliability of the Consumer Price Index from your perspective as a forensic economist.

MS. KONSTANTOPOULOS: Objection to

form.

THE WITNESS: How to classify it?

BY MR. ROMANO:

Q. No. My question is please quantify the -- the CPI's level of accuracy or reliability from your perspective as a forensic economist.

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I don't think I can quantify it, but fortunately I am assessing and rebutting the plaintiff's report, and he uses the same data.

BY MR. ROMANO:

Q. When economists rely upon the Consumer Price Index, is this index something that provides you with 100 percent accuracy or is it an estimate?

A. Nothing we do when we project into the future provides 100 percent certainty. Nothing that anyone does in any field when the future is projected or estimated is 100 percent certain.

The future is unknown, but that doesn't mean that we can make -- that doesn't mean that we can't make reasonable projections about the future.

Q. You rely upon the Consumer Price Index

as part of your forensic economics work in this case; right?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I did, and so did Mr. Staller.

BY MR. ROMANO:

Q. Fine. And that is something that is the norm among economists throughout the country when making projections like this in personal injury and wrongful death cases; correct?

A. Yes. I should note there is one of these categories that doesn't rely on the CPI.

Architectural renovations is a price index that doesn't exist in the CPI, but it is also based on federal government data, in this case construction data produced by the Federal Census Bureau.

So that is, strictly speaking, not an element of the CPI, but it is also standard, normal government data.

Q. If you go to page 3 of your report, you have Table A, Life Care Plan Categories and Growth Rates. Do you have that in front of you?

A. Yes, I do.

Q. All right. Just in picking a couple of examples here, where you have the categories drugs and it shows a growth rate of 1.97 percent and under the CPI component it says "prescription drugs," how did you arrive at the growth rate of 1.97 percent for prescription drugs?

A. The point of Table A is to connect the categories in the life care plan to the relevant components of the CPI.

That category is sometimes called "medications," etc. This time it's called "drugs" in the life care planning.

The corresponding component in the CPI is called "prescription drugs."

What I did is what I described earlier. I looked at the CPI for the component called "prescription drugs." I took the value of that index in 2014, I took the value of that index in 2024, and based on those two numbers and the number of years in between them, I calculated the average annual inflation rate in that component, and it is, as shown in the table, 1.97 percent on average per year.

Q. Let's take one other area, architectural renovations, and it shows a growth

rate that you chose of 5.52, and the CPI component is listed as "New single-family houses under construction." Walk us through how you arrived at that.

A. Sure. First of all, I didn't choose that growth rate. I calculated it based on data.

And this is the one I was mentioning a moment ago. The category new single-family homes -- or houses under construction is not actually a component of the CPI. I got that from data provided by the Federal Bureau of the Census.

The Census Bureau provides a lot of construction data, including construction price data, and so that's the category that I used.

In life care plans, that's typically what I use. That's always what I use. If a life care plan I'm analyzing involves some construction, you know, to make the house more usable for someone who's disabled, for example -- that's typically what it is -- this is the category I use.

So I did the same thing. I took the price index for new single-family houses under construction in 2014, I took the value for 2024, and from those, I calculated this average annual inflation rate of 5.52 percent, and my assumption is

that future expenses in this category will grow at that rate.

Q. You then say -- and I'm on page 3 of the report -- "The Shahnasarian life care plan expresses costs in ranges for some items, so I followed suit and calculated lower and upper bounds on the value of the life care plan."

Is that what it says?

A. It does.

Q. All right. When you use those terms, "lower bounds," "upper bounds," what does mean?

A. As I note here, the life care plan expresses costs and ranges. It's not just cost. Sometimes it's frequencies.

So a range could be a statement that a given doctor's visit will cost between 150 and $200. I would take 150 to be the lower bound and $200 to be the upper bound.

But sometimes that arises because of frequency issues. So if -- if the life care plan says that the doctor visit is $200 per year but it's going to be needed -- the patient will need to visit that doctor between six and 12 times over the course of the year, the lower bound is six times 200 and the upper bound for that year, at least, is 12 times

200.

So the range can arise because of timing and frequency as well as just the actual cost of the item.

Q. As to Eddie Peterson, your projections start on what date?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Let's see. I believe I started -- oh, it says right here. January 1st of this year.

BY MR. ROMANO:

Q. And what is the reason you begin the projections January 1st of 2026?

A. I think the simplest answer is that's when the -- when Mr. Staller -- yes, that's when Mr. Staller started the analysis of the life care plans he analyzed, and I figured that simplicity is a valuable thing for something like this.

Q. Then your projections will extend until the expected end of Mr. Peterson's life; correct?

A. Yes.

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, that's what it says.

BY MR. ROMANO:

Q. And you are assuming a life expectancy for Eddie Peterson for how long?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: The data we used -- we used the same data source, Mr. Staller and I. That data source implies a remaining life expectancy as of January 1st of this year of 9.7, implying a total life expectancy of 86.7 years.

BY MR. ROMANO:

Q. When you as a forensic economist calculate the amount of money needed in a life care plan to pay for all the items in that plan, is it then necessary for you to reduce the total calculated amount to present value?

A. Yes.

Q. All right. Define "present value."

A. Present value is a -- is a -- is an expression of a future dollar value or a series, a stream of future dollar values in today's dollars.

The idea is based on the simple and

very standard concept of a dollar being worth more today than it is next year.

That difference in valuation is summarized by various kinds of rates of return. Interest rates, T-bill, you know, beyond yields. We call them discount rates in -- in the forensic economics because they are discounting the future.

The standard approach in forensic economics in personal injury cases is to use a rate of return that is as close to risk-free as reasonable, as possible.

You generally do not use as a discount rate, for example, a rate of return on the S&P 500.

So Mr. Staller used a fairly low-risk rate. My choice was just to use the one that he did.

Q. The determination of that rate that both you and Staller used, do you find Staller's methodology as to that rate determination acceptable?

A. I did not dispute it.

Q. Would you give us an example of an item in the life care plan? Just -- just pick an item. And you can use a round number to make it easier, if that will help.

But when you take -- where you would take the cost of a given item in the life care plan at today's rate and project it over the course of the life care plan to what it will cost in the last month of life expectancy, knowing that number, and explain how you reduce it to present value.

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Well, let's suppose that something costs $100 now, to use an example that you mentioned earlier, and let's suppose that the discount rate is 5 percent. If the growth rate and the discount rate are the same, what would happen is that it would grow to $105.

Let's suppose it's 5 percent, both the growth rate and the discount rate are 5 percent. It would grow to $105. The cost would grow to $105 next year.

But then when you calculate at the present value this year, you would reduce it by that same 5 percent. So even though in nominal dollars it would be -- it could cost more next year, $105 instead of $100, the present value would still be $100.

Now, alternatively, suppose that the growth rate is 5 percent but that the discount rate is 7 percent. That's unreasonable given -- you know, it's not true. Right? The value he uses is 4.88 percent. I don't dispute that.

But let's just say -- let's suppose that we're in a high interest rate environment, which we are not currently, and that the discount rate is bigger than 5 percent. That $100 expense today turns into a nominal expense of $105 next year, but then when it's discounted to present value, you're taking 7 percent off.

You're multiplying it by -- actually, you're dividing it by 1.07, which takes it below $100. I don't know what the number would be. It would be $98 or something like that, but -- $97. I don't know.

But if the growth rate is smaller than the discount rate, then the present value of the future value is less than that future value. I should say it's less than the current value. I'm sorry.

BY MR. ROMANO:

Q. And then have you a Table B which sets forth your discounted future values using the same 4.88 discount rate which was used by Mr. Staller; correct?

A. These are present values, but, yes, other than that, that's what this table shows.

Q. Right. And as Table B shows and you have in your report, you put the present value of the cost of the Shahnasarian life care plan at between $1,783.882 and 3,451,807; correct?

A. Yes.

Q. Because you have the value of the life care plan at a low -- lower number and then a higher number, what is the reason for that? Why the two numbers?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: As noted earlier, Dr. Shahnasarian's life care plan expresses these values and ranges, so this is nothing more than my calculation reflecting the ranges that are part of his life care plan.

BY MR. ROMANO:

Q. And then Table B. Briefly explain

that to us. What are we looking at and what does it mean?

A. These are the life care plan categories that appear in the Shahnasarian report. I will say that some of them are split up by me. For example, there is a Drugs and a Drugs, OTC, meaning essentially prescription drugs and over-the-counter drugs, but there is a drugs category in the Shahnasarian life care plan.

And so I -- these are the -- the present values assuming that, say, an expense is grown into the future at that -- whatever rate, 3 percent, 2 percent it grows into the future, but then each of those is discounted back to the present.

So these are the sums of all of those expenses except for the fact there are growth rates and discount rates involved.

MR. ROMANO: You doing okay at the time? Keep going?

THE WITNESS: I'm fine. Thank you.

MR. ROMANO: Everybody okay? Good? Okay.

THE WITNESS: At some point, we'll need lunch, but other than that.

BY MR. ROMANO:

Q. Let's move to the next section, then, Offset to Damages. What is it your working definition of offsets?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Well, I don't think there is a formal definition in forensic economics. I think the definition we use is simply the definition in common parlance.

An offset is something that cancels something else out in whole or in part. It's a value that is used to net out some amount of that larger number.

We're talking about economic damages. Very often in forensic economics, you are netting out some element of the damages.

There is a job that the injured person can do, and so there are mitigation wages. That's essentially an offset.

So while there is no formal definition of offset, I think it's something that forensic economic -- economists understand. It's the thing that you in principle subtract off of of a gross economic damage to get a

net economic damage.
BY MR. ROMANO:
Q. In this instance, did you take this section of offsets to damages and divide it into two categories?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: Yes. I believe you're talking about the two subsections. There are disability benefits and medical offsets.
BY MR. ROMANO:
Q. Yes. All right. Have you reviewed Dr. Miller's report?
A. Yes.
Q. In terms of offsets as it relates to these five Parkinson's disease cases, are you relying upon Dr. Miller's work relating to offsets or are you doing your own calculations regarding offsets as to each of the five cases?
A. I'm relying on Dr. Miller's expert opinion regarding these medical offsets.
Q. Does that apply for both offsets -- I'm sorry -- disability benefits and medical offsets?
MS. KONSTANTOPOULOS: Objection to

form.
BY MR. ROMANO:
Q. Applies to both?
A. No. Just if we're talking about Dr. Miller's expert opinion --
Q. Yes.
A. -- it applies to medical offsets only.
Q. And as to disability benefits and the issue of offsets, does Dr. Miller's opinion factor into that at all?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: No.
BY MR. ROMANO:
Q. All right. So any calculations made with respect to offsets and disability benefits are calculations and opinions you have arrived at; right?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: There was a separate expert addressing these, the disability offsets.
BY MR. ROMANO:
Q. Who was that?

A. Dr. Syed Hasan.
Q. And are you relying upon Dr. Syed Hasan's opinions as to offsets pertaining to disability benefits?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: Yes.
BY MR. ROMANO:
Q. If you follow me, I'm going to the section under Disability Benefits.
MS. KONSTANTOPOULOS: At what page?
MR. ROMANO: Page 4.
MS. KONSTANTOPOULOS: Thank you.
MR. ROMANO: Page 4.
BY MR. ROMANO:
Q. And you state, "Mr. Peterson has received disability benefits from the Veterans Benefits Administration, VBA, since 2013. His 2026 monthly benefit will be $4,767.99, which corresponds to a 100 percent disability rating. As a -- as --" I'm sorry -- "a May 1, 2025, letter from VBA along with an accompanying spreadsheet listed Mr. Peterson's disabilities, and all of them are PD-related, therefore all of his VBA benefits are due to his PD, and hence the full amount of

$4,767.99 per month is an offset in the context of this lawsuit."

Did I read that correctly?

A. Yes.

Q. I'll read a little more before I come to my next question, but you state in that next paragraph, "By law, the benefit grows each year according to the Social Security Administration's cost of living adjustment, COLA.

"The average COLA for the years 2025 was 2.57 percent, so I assume that his future VBA benefits will grow at a rate of 2.57 percent per year.

"I used the same discount rate as I did to calculate the present value of the life care plan"; correct?

A. Yes, that's what it says.

Q. And then this final paragraph, you say, "Based on this -- on the above information, the present value of this offset to Mr. Peterson's economic damages in this case calculated from 2013 until his life expectancy is $1,073,280."

Is that your opinion as it relates to these offsets regarding disability benefits?

A. Yes.

Q. As to Dr. Hasan, you said you relied upon his opinion. To what extent are you utilizing his opinions to help you form your own opinions --

MS. KONSTANTOPOULOS: Objection.

MR. ROMANO: -- in this matter?

MS. KONSTANTOPOULOS: Sorry. Objection to form.

THE WITNESS: Dr. Hasan identified -- his role, at least as it pertains to my analysis, was to determine which of the diagnoses used by VBA to determine disability ratings were related to PD and which were not.

If -- if there were extensive diagnoses that were unrelated to PD in his opinion, then perhaps not all or maybe not any of the $4,700, roughly, per month would be relevant to this lawsuit.

What Dr. Hasan found in this case was that all of Mr. Peterson's disability benefits were derived from disability ratings and hence from diagnoses that were PD-related, so therefore his entire amount, this 4,700, approximately, per month was due to -- he received it because of his diagnosis

of PD. Again, according to Dr. Hasan.

BY MR. ROMANO:

Q. What methodology did you employ to evaluate and quantify the offsets in these five Parkinson's disease cases?

A. Well, in the cases where it was relevant -- it wasn't relevant to do so in all of them, but in the ones where it was relevant, I had information based on -- you know, from materials in that materials considered list that told me how much each plaintiff, each relevant plaintiff, each plaintiff relevant to this issue, was receiving in VBA benefits, disability benefits. I had Dr. Hasan's opinion about which of these was related to PD.

In the case of Mr. Peterson, my approach, my methodology was to take the information I had about what he was receiving, I projected it into the future, assuming as an inflation rate the average SSA COLA, the cost of living adjustment, which, as noted and as you just read, I think is 2.57 percent over the last couple of decades, and so I assumed that his future benefits would grow at that rate.

And -- and by the way, I confirmed

that -- that his recent benefits had grown at the rate of the SSA COLA for each of those years.

So it does say "by law," but I'm not claiming any expertise in the law. This is something that I was able to confirm.

So it was simply the current rate grown into the future using an inflation rate, not unlike the approach I used for the life care plan, really.

That number was grown into the future according to this SSA COLA and then discounted back to the present using the interest rate that Mr. Staller introduced.

Q. When you make that reference and you say "by law," what law are you referring to?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I don't know. I read on the VA website that it says by law it must. I was able to confirm that it had. So I don't -- I don't think I need to be an attorney to confirm that. There is some law out there, apparently, that says this.

BY MR. ROMANO:

Q. Under medical offsets, you note,

"Mr. Peterson has received services that were provided or paid for by Medicare and the Veterans Health Administration, VHA. According to defense clinical expert Dr. Syed Hasan, the total value of --"

A. Oh, it does say "Mr. McElhiney," doesn't it? That appears to be a typo, and it's an example of something you noted earlier, that I would cut or copy and paste things from other reports. Yeah, that's -- that's something that we all should have caught.

That should read --

Q. All right.

A. -- "Mr. Peterson's past medical offsets."

Q. Okay. All right. I'll -- I'll just start back at the beginning of that sentence --

A. I apologize for interrupting.

Q. -- and I'll make it Mr. Peterson instead of Mr. McElhiney.

"According to defense medical expert Dr. Syed Hasan, the total of Mr. Peterson's past medical offset is $149,361.21 when accounting for VHA's total cost and $146,773.49 when accounting for VHA's total direct cost."

Did I read that correctly?

A. Yes, with -- and with the correction --

Q. With the --

A. -- yeah, and with the correction --

Q. Okay.

A. -- of Mr. -- inserting Mr. Peterson's name.

Q. Okay. And then you state, "Mr. Peterson's future medical offsets are summarized in a report by Henry Miller of the Berkeley Research Group which lists the projected payments for the I items in the Shahnasarian life care plan by both Medicare and VHA.

"The Miller report retains the categories and treatments of the Shahnasarian life care plan, and its implied results can be construed as a pair of modifications of the LCP.

"The results of the modified Shahnasarian life care plans appear in Tables C and D"; correct?

A. Yes.

Q. All right. And we have Table C there. Briefly tell us what this table is and what it means.

A. First I -- I should clarify that even though I refer to this as a modified LCP, in a way, it isn't. It is a set of calculations of offsets, Medicare or VHA, that are applied to the same treatments and medications, etc., of the life care plan.

So it looks like a life care plan, but it's really an expression of the offsets of the -- of the costs that would -- that would be covered by these other entities. But, as I say, it looks like a life care plan.

And I presented in Table C and Table D for the different sources of the offsets to show how those offsets apply to the categories of the Shahnasarian life care plan.

So, for example, you can see in Table B that the first category, the first row in Table B is evaluations, and so it is in Tables C and D as well.

Table C -- Tables C and D show the value of the offsets that would be applied to the gross expenses that are outlined in Table B.

Q. And as you come down further on page 5, you note that "Medicare is projected to cover between $127,172 and 158,209 of the cost of the

Shahnasarian LCP, and VHA is projected to cover between $398,577 and $462,381."

Did I read that correctly?

A. Yes, I believe so.

Q. Then you state, "The court may decide to subtract these amounts from corresponding lower and upper bounds of the present value of the original Shahnasarian LCP to arrive at a net value of the cost of Mr. Peterson's future medical care"; correct?

A. Yes.

Q. All right. And then we come to Table D. Briefly explain that to us.

A. Well, that's also the opinion of Dr. Miller operationalized by overlaying it on top of the Shahnasarian life care plan in exactly the same way that I did with the Medicare offsets.

These are VHA offsets, so it's the same thing as Table C but for a different -- a different coverage, different set of offsets.

Q. We then come to plaintiff's life care plan, and you're referring here now to Kay Hairston, RN, and her life care plan; correct?

A. Yes.

Q. She was the expert life care planner

hired by the plaintiff in the Eddie Peterson matter; right?

A. Yes.

Q. And in this section, you have a Table E. Explain that to us, please.

A. Table E is similar to Table C in that it summarizes the medical offsets, the coverage by Medicare.

The -- the difference between Tables -- between Table C and Table E is that E applies the offsets identified by Dr. Miller to the plaintiff's life care plan by Hairston, whereas Table C does the same thing but applies it to the defense life care plan by Dr. Shahnasarian.

Q. And when Mr. Staller calculated the present value of the Hairston life care plan, that came to $3,752,303; correct?

A. Yes.

Q. You have Table F. Explain that to us, please.

A. Just as Table E is similar to Table C, Table F is related to Table D.

Table F summarizes the offsets identified by Dr. Miller and applies them to the Hairston life care plan.

Q. And then you show through Tables E and F Medicare projections as to what would be paid regarding the cost of the Hairston life care plan and then the VHA projections as to what they would pay; is that right?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, I -- that's what those tables show, yes.

BY MR. ROMANO:

Q. All right. And then your next section provides your conclusions; right?

A. Yes.

Q. And is that meant to be a summary of opinions you've already provided in the report?

A. Yes.

Q. And you have a Section 9, References. What is that?

A. These are documents and -- and, yes, documents in which I either relied or reviewed and considered to be closely related to my work in this report.

Q. And two of those items include transcript of deposition of Edgar Peterson from February 2024; right?

A. One of them is.
Q. Yep. And the other transcript of deposition of Lori Peterson, April 2024; right?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: Yes.
BY MR. ROMANO:
Q. And then you have a series of appendices and charts attached which further explain what you have discussed throughout the report. Is that a fair way of stating that or not?
A. It's fair.
MR. ROMANO: Okay. All right.
MS. KONSTANTOPOULOS: Counsel.
MR. ROMANO: We will next move to the Gary Layne McElhiney report.
It is 12:03. So why don't we -- first we can go off the record.
VIDEOGRAPHER: Off record at 12:03.
(Recess taken.)
VIDEOGRAPHER: On record at 1:12.
MR. ROMANO: All set.
VIDEOGRAPHER: Um-hum.
MR. ROMANO: Okay.

(Whereupon, Exhibit 13 marked for identification.)

BY MR. ROMANO:

Q. Ready to go?

A. I am.

Q. Okay. I have placed in front of you Exhibit Number 13, which appears to be your report in the matter of Edgar Allen Peterson dated May 8, 2025. Would you identify that for us. Just tell us what it is, please.

A. Yes. It appears to be that report that you just mentioned.

Q. That was the first report that you did on the Peterson matter?

A. Yes.

Q. And then there was the December 15, 2025, report; correct?

A. Yes.

Q. Okay. Going back to two questions regarding Peterson and then I'll move to the McElhiney report.

But you are not an expert on VBA benefits; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I'm not an expert in the determination of how VBA benefits are granted. That's certainly true.

BY MR. ROMANO:

Q. Are you an expert in any aspect of VBA benefits in determining what benefits are due to a given person?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

BY MR. ROMANO:

Q. Regarding your -- the offsets in the Peterson matter, walk us through your methodology for making your findings and calculations.

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Sure. I -- I believe I did so. Happy to do so again.

What I did was look at the benefits, the disability benefits that had been paid to Mr. Peterson, saw what the current rate was, based on the opinion of Dr. Hasan that these were all related to VD, they were all relevant as offsets in this matter, these were amounts that Mr. Peterson would not have

received but for his PD.

I then looked at the average SSA COLA over a number of decades and took that average and treated it as my growth rate moving forward.

And so each future amount was the -- you know, the amount that he's received currently times 12, because these were monthly rates, increased each year by that growth rate of 2.57 percent, I think it was, and then brought back to present value with the application of a discount rate.

MR. ROMANO: Let's move to the McElhiney report dated December 15, 2025, and this will be Exhibit Number 15. And I have copies for defense counsel.

There we go.

(Whereupon, Exhibit 15 marked for identification.)

BY MR. ROMANO:

Q. All right. You have the report there in front of you on --

A. I do.

Q. -- Mr. McElhiney?

You note that -- in the introduction

portion of your report, you state that Mr. McElhiney was diagnosed with his PD July of 2018; correct?

A. Yes.

Q. And you assume liability for purposes of this report on Mr. McElhiney; correct?

A. Right, only -- only during my analysis of -- of -- of his damages and any testimony that follows from it.

Q. All right. As you assessed and evaluated each of these five Parkinson's disease cases from your perspective as a forensic economist, did you use the same methodology and steps of analysis in going through each of the cases?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. If we go first to the -- at the bottom of page 1, on lost earnings, you note that Staller calculates the lost earnings to be at $288,361; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. And then you conclude that Staller omitted an important aspect of the McElhiney work history in that you say he was disabled before his PD diagnosis; correct?

A. Yes, I said he omitted it.

Q. Do you agree that the date of diagnosis does not mean the date of commencement of the signs and symptoms of Parkinson's disease?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: That sounds like a medical assessment. I haven't made that.

BY MR. ROMANO:

Q. When you make your assessments as it relates to Parkinson's disease and Mr. McElhiney, are you making calculations based on the date of diagnosis of the Parkinson's disease?

A. No, not exclusively.

Q. Okay. By "not exclusively," what do you mean? What else are you factoring in?

A. A few things. One is that he also applied for social security disability benefits. That was in 2016. He reported his symptoms. He had no incentive to understate his symptoms. None of

them were related to PD, in the opinion of Dr. Hasan. That's one.

He was -- frankly, I guess that's the main one, you know, that social security determined that he was disabled, 100 percent disabled, and unemployable prior to his diagnosis.

I -- I'm not really saying about when symptoms arose. It's not for me to say whether they arose years before or months before. I don't know.

But the fact is based on the documents in this case that he was declared unemployable on the basis of considerations that had nothing to do with PD.

Q. Are you relying completely on the opinions of medical doctors as to, first, the date of diagnosis of PD?

A. I suppose that's where I got that piece of information. I don't recall precisely. It may have been -- it may have been in a document that I read. I'm certainly not making my own determination about that date.

It's something that I read perhaps in a VBA document, perhaps a VHA document, perhaps written by a medical expert. I don't recall specifically.

Q. Let me give you an example so that I can clarify where you're coming from in your opinion as a forensic economist.

If you have a man who has, let's say, very significant major chest pain for 30 days but does not for whatever reason see a physician until that 30th day and the physician diagnoses cardiac disease, you have a diagnosis of cardiac disease on day 30 but clearly signs and symptoms of that disease for the 30 days leading up to that.

My question is as a forensic economist, first, do you make any determinations as to when he had his cardiac disease in an instance like that?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: No.

BY MR. ROMANO:

Q. You would go by the physician's diagnosis of the cardiac disease?

A. In your example, there's --

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: In your example, there's no information other than this physician.

So, yes, in your example, I would rely on what the physician said.

BY MR. ROMANO:

Q. Assuming you had those medical records in front of you and you could see the history of the severe significant chest pain for that 30-day period, do you factor that into your work as a forensic economist or do you go solely with the diagnosis?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yeah, I don't think it's that simple. What I go by is the expert opinion of medical professionals.

It's not for me to read medical records and decide for myself whether there was cardiac disease. I can certainly read them and see, oh, there are symptoms, but of what, it's not for me to say. I'm not a medical professional.

So if -- in your example still -- we're talking about your example. What I would do is see what medical professionals involved said about this case.

If that medical professional said that

there was an onset of this condition 30 days before this official diagnosis, then that's the information I would take and use.

But maybe that medical professional wouldn't go out on that kind of limb. Maybe he or she would say 10 days before the diagnosis. I don't know.

So fortunately, my opinion here and my calculation doesn't depend exclusively on when that diagnosis happened. We know when the diagnosis happened, you know, and so that is one of the facts.

Beyond that, the other very important fact, it seems to me, is the fact that another branch of the federal government, the Social Security Administration, determined him to be 100 percent disabled, unemployable, and it made that determination on the basis of nothing related to PD.

BY MR. ROMANO:

Q. You agree that the date of diagnosis does not mean the date signs and symptoms of PD commenced?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Again, that sounds like a medical opinion. If you told me that -- if you were a medical person and you told me that was true, I would say, sure, that makes sense, but it doesn't make sense for me to be answering that question. It seems possible, but I'm not a medical professional.

BY MR. ROMANO:

Q. If you are making an assessment as a forensic economist and you are trying to determine what signs and symptoms being displayed make someone unemployable, do you make that determination or is that to the life care planner --

MS. KONSTANTOPOULOS: Object.

BY MR. ROMANO:

Q. -- or to someone else?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Neither. I base my determination along those lines on the documents.

Or, rather, I shouldn't say determination because I did not make that determination.

The documents told me that

determination. The Social Security Administration had made that determination. I took and used the information in those documents.

BY MR. ROMANO:

Q. Did the Social Security Administration, to your knowledge, assess what Mr. McElhiney's signs and symptoms had been prior to the date of diagnosis of PD, if you know?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: Would you mind repeating that?

BY MR. ROMANO:

Q. Yes. Are you aware of whether or not the Social Security Administration assessed whether Mr. McElhiney had signs and symptoms of Parkinson's disease prior to the date he was diagnosed with Parkinson's disease?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: If I had seen something about that in the social security documents, I would have taken that into account in whatever way was deemed valid by medical

professionals working on the case. I saw nothing about that.

Again, Mr. McElhiney gave a detailed assessment of what he thought his disability was, and he couldn't, of course, necessarily say what caused it, but he could say what had happened.

Similarly, in his deposition, as I note here in this report, he said that he quit his job in 2016 and he talks about pain in his -- in his limbs, etc., etc.

At that point, I suppose he's not -- he's not a medical professional himself. I guess he couldn't say whether it was Parkinson's, but at no point did anyone mention Parkinson's disease.

And as I noted previously, it was the -- it's the opinion of Dr. Hasan that those health conditions were not caused by PD.

BY MR. ROMANO:

Q. Have you seen any medical report confirming his pre-Parkinson's disease diagnosis showing symptoms, limitations, or disability that were related to the yet to be diagnosed Parkinson's

disease?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: I don't recall.

BY MR. ROMANO:

Q. True Mr. McElhiney retired, according to your report, in 2016 because of pain from his medical conditions which became too great, every joint in his body was hurting, he had neuropathy in his hands and feet, and could not stand the jarring of the truck; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, that is the comment of his that I quoted.

BY MR. ROMANO:

Q. Have you reviewed any record in this case showing when Mr. McElhiney's signs and symptoms of Parkinson's disease first manifested themselves?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I don't recall.

BY MR. ROMANO:

Q. Have you considered as a part of your formulating opinions as a forensic economist in this

case that Mr. McElhiney did have signs and symptoms of PD well before the diagnosis was ever made?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: No, I don't believe so.

BY MR. ROMANO:

Q. And your conclusion is that the implication is that Mr. McElhiney's PD did not lead to a loss of earning capacity because the loss had already taken place and for reasons unrelated to his PD? That's your conclusion; correct?

A. Yes.

Q. And your opinion is there is no claim for lost earnings; correct?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: No. There appears to be a claim. That's certainly the claim made by the plaintiff and quantified by the plaintiff's expert, Mr. Staller.

My opinion is not that there's no claim. My opinion is that the value of that loss is zero.

BY MR. ROMANO:

Q. Move to lost household services. When

we were discussing the Peterson report, we spent a good bit of time going over the one hour per week theory of Mr. Staller; correct?

A. Yeah, we talked about his methodology.

Q. Okay. In the case of Mr. McElhiney, you state, "Staller does not address the likelihood that McElhiney would have actually done that many hours of household chores, but rather presents a model of one hour per week"; correct?

A. Yes, that's what he did.

Q. And as a result of that, under Loss of Household Services, your determination is that there are none for which money should be awarded?

MS. KONSTANTOPOULOS: Objection.

BY MR. ROMANO:

Q. Is that accurate?

MS. KONSTANTOPOULOS: I'm sorry. Objection to form.

THE WITNESS: The finder of fact will determine whether money should be awarded.

My role here is simply to say what is valid or invalid about the plaintiff's expert's analysis.

My claim is not that nothing should be awarded. My opinion is not that there are

zero lost services.

My opinion is that no one has calculated this number and it's impossible for anyone to address it because, as I said before, Mr. Staller did an incomplete analysis.

He came up with an intermediate number, a number that could in principle be used by someone else -- however, inaccurately -- to come up with a total number for the value of lost household services, but Staller -- Mr. Staller himself did not do it.

So my opinion is that I see no basis for any kind of quantitative claim for lost services here.

BY MR. ROMANO:

Q. You agree in the instance of Mr. McElhiney that there is evidence, though, in the record from materials you have reviewed, including depositions, that he was performing household chores before he contracted or exhibited signs of Parkinson's disease?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: I don't know that there's any such evidence, but, again, I'm not saying that there's zero evidence. I'm saying that a reasonable analysis was not done here.

BY MR. ROMANO:

Q. When a forensic economist is making an assessment of damages for loss of household services, does that forensic economist give due consideration to such things as attitude, work ethic, and work history as it pertains to household chores?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: The standard approach of a forensic economist when trying to quantify lost household services is to count up the hours. That is the main thing a forensic economist does.

Issues of attitude or whatever work ethic or the other issues that you mentioned could conceivably be relevant, but they would ultimately lead to a number. What's missing here is a number.

Mr. Staller chose not to give us a

number, and in that regard, he didn't do a complete analysis.

BY MR. ROMANO:

Q. And therefore your opinion is that zero should be awarded for loss of household chores because Staller didn't give a number?

A. No, as I said a moment ago that my opinion is not that the answer is zero. My opinion is that no one has done the analysis yet, and the person in the best situation to do that analysis has not done it.

I'm not sure what I can do in my role as someone assessing and potentially rebutting the plaintiff's economics report in this regard. The work hasn't been done. There's nothing really for me to assess. There's nothing for me to rebut.

Had he done a complete analysis, I could tell you right now I could testify under oath what I thought of his approach, what I thought of his number, but there's no number here. There's no answer here.

So my opinion is not that it should be zero. For all I know, the finder of fact will say, okay, I think it's X number of hours per week. I don't know on what basis that would be decided, but

it's not for me to say. That's what the finder of fact will do.

I don't think the finder of fact has been given the prop- -- has been given the appropriate assistance and help that an expert witness is supposed to provide.

It's an incomplete analysis, and that's really all I'm saying.

Now, I suppose it's true that if no analysis is done that nothing can be awarded, and so ultimately, effectively the answer is zero.

That would be a shame because there may well be some lost household services that Mr. McElhiney has suffered, but at this point we don't know because the person best situated to give us that answer chose not to.

Q. All right. Is it true from your perspective as a forensic economist that a determination as to the number of hours of household services lost is up to the finder of fact during trial?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: Everything is up to the finder of fact in a trial. That's my

understanding. I'm not a lawyer, but I've done enough work in forensic economics to know I'm not the one who makes the decisions ultimately.

All I can do and all Mr. Staller is supposed to do is help the finder of fact. Everything is ultimately decided upon by the finder of fact.

And if the finder of fact makes a determination on the basis of this insufficient help by Mr. Staller, well, then there's nothing for me to say about that.

But it should not be the case that the finder of fact is effectively required to make these decisions without appropriate assistance by the expert witness, and in this case, he has not been provided with that help.

BY MR. ROMANO:

Q. Move to future medical expenses life care plan, and in this instance you are making calculations based on the life care plan of Michael Shahnasarian; correct?

A. Yes.

Q. And true your economic analysis of the

life care plan involves, A, identifying inflation and growth rates that allow medical costs to be projected into the future, and, B, using a discount rate to express the streams of future costs as lump sum present values; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. One area regarding Consumer Price Index. Are there different types or categories under the Consumer Price Index?

A. Yes.

Q. For example, all --

A. Yeah.

Q. -- urban consumers being one, urban wage earners and clerical workers, another -- you know what I'm referring to, those categories?

A. Yes. Those are actually different price series, and, yes, the Bureau of Labor Statistics produces different -- different price series and hence different price indexes.

Q. All right. And you say that following Staller, you calculated the average inflation rates over the period of 2014 to 2024; correct?

A. Yes.
Q. And you assigned CPI components in order to capture the bulk of the spending in each category; correct?
A. Yes.
Q. Was your methodology the same as Staller's in this respect?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: Yes.
BY MR. ROMANO:
Q. There is a Table A on page 3. Would you explain that to us, please, briefly.
A. Table A is a summary of how different life care plan categories are connected to the CPI components that I used to calculate the growth rates or items in those categories.
Q. And this is similar, at least in structure, to a table that we covered earlier in the deposition regarding the Peterson report; right?
A. Yes.
Q. I'm moving over to page 4. And regarding Mr. McElhiney, your projections start on January 1, 2026, and extend until the expected end of Mr. McElhiney's life; correct?

A. Yes.
Q. And you have Mr. McElhiney as having a remaining life expectancy as of the date of this report being 13.3 years, implying a total life expectancy of 84.4 years; correct?
A. Yes.
Q. And the discount rate you were using with respect to Mr. McElhiney is 4.88 percent; right?
A. Yes.
Q. And that is the same discount rate being used by Mr. Staller?
A. Yes.
Q. And briefly explain Table B on page 4.
A. Table B on page 4 summarizes the present value of each of the costs and each of the categories in the life care plan.
As in the Peterson case, the life care plan values are expressed in ranges. So there is a lower bound and an upper bound that's reflected in Table B, and I simply add them up to get that total at the bottom, a total value of the cost of the Shahnasarian life care plan, a lower bound and an upper bound.
Q. And for the lower bound, you calculate

the value of the Shahnasarian life care plan of being $1,732,298 and the upper bound as being $2,664,264; correct?

A. Yes.

Q. Let's go to the McElhiney Offset to Damages section. Do you explain under the section of Disability Benefits your calculations as to offsets regarding Gary McElhiney? Is that done through Table C?

A. Yes, it is.

Q. All right. Walk us through, then, Table C and explain that to us.

A. Table C is the list of his various diagnoses that appear in the documents that I mention here in this report and accompanied by the disability percentage.

I at least initially determined that these were unrelated to PD, but because I am not a medical professional, I relied, importantly, on the report of Dr. Hasan, who confirmed that the diagnoses in this table are, in fact, not related to PD. So ultimately I relied on Dr. Hasan.

I may have looked at this. I looked at the VA calculator to determine a combined disability rating, but that would have been less

authoritative if I hadn't had the expert report of Dr. Hasan to rely upon.

Q. If you look at Table C for Gary McElhiney's non-PD-related disabilities and you see that first category, adjustment disorder with anxiety and depressed mood, do you see where it shows a disability percentage of 70 percent?

A. Yes.

Q. All right. True you as a forensic economist are not qualified to determine whether PD was or was not causing any of that adjustment disorder? True?

A. That's true --

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: -- which is why I relied on Dr. Hasan's expert opinion to make that determination.

BY MR. ROMANO:

Q. Do you know what Dr. Hasan relied upon in order to arrive at his conclusions?

A. Well, it's not really for me to say, is it? Dr. Hasan is a medical expert, a medical professional. I assume that he used appropriate methodologies and data and resources to come up with

his opinion, but I certainly didn't -- I didn't evaluate it. It's not in my area of expertise to do so.

Q. So for purposes of your expert testimony in this case, when you see adjustment disorder with anxiety and depressed mood and a 70 percent disability rating, your assumption for purposes of your opinion is that that has nothing to do with Parkinson's disease; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No, not correct.

MR. ROMANO: All right.

THE WITNESS: It's not an assumption. It is an opinion based on a medical expert.

BY MR. ROMANO:

Q. All right. So upon whom you rely for his opinion on this item of adjustment disorder; correct?

A. Yes, I relied on his opinion.

Q. At the top of page 5, you say, "I fed the percentages in Table C into the VA's combined disability rating calculator to determine the joint rating of Mr. McElhiney's non-PD-related health conditions. The result of this calculation was a

combined non-PD disability rating of 100 percent."

Is that what it says, first of all?

A. Yes, that's what it says.

Q. All right. How do you go about feeding percentages into the VA combined disability rating calculator? How do you do that?

A. Well, first of all, it should be noted that when I did that -- and I'll explain it further in a moment, but when I did that, I was really just confirming, in effect, Dr. Hasan's opinion.

What I did to confirm it to make it make sense to me, I suppose -- there is a -- a VA disability rating calculator and it has rows that you -- you know, you enter these percentages. I think it's primarily the percentages.

I can't recall exactly how it works, but it is a tool on a website at VA.gov, and when you enter these percentages, there is a relatively complex calculation done by that tool on the VA website that comes up with the determination, the combined rating.

Again, when I did so, that's just confirming what Dr. Hasan had opined.

Q. When we look at adjustment order -- disorder and it says 70 percent and under that,

lumbar disc disease 20 percent and so on and so forth, who came up with these percentages?

A. That was from a VBA document.

Q. Did you have any role in arriving at these percentages which are shown in Table C?

A. No.

Q. Is this VA calculator -- is it like a table or a form or a machine or something on the Internet or is it in a book or what? Where do you get it?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: It is a form on the website VA.gov. It is a disability rating calculator.

BY MR. ROMANO:

Q. And your opinion is that Mr. McElhiney was 100 percent disabled before he contracted PD; correct?

A. Dr. Hasan's opinion is that. I used Dr. Hasan's opinion.

Q. All right. At the middle of page 5, when you state, "Therefore, from the perspective of the VBA, Mr. McElhiney was 100 percent disabled even before he contracted PD"; is that correct?

Is that what it says?

A. It is.

Q. And then it says "The PD-related increment to his regular VBA disability benefit is zero."

Is that what it says?

A. Yes.

Q. Have -- have you reviewed any document in the case of McElhiney which sets forth when his Parkinson's disease signs and symptoms first started?

A. I might have. I don't recall.

Q. Still on page 5, you then state, "Since June 2020, Mr. McElhiney has received a special monthly compensation payment level K, and this benefit is for a condition that is related to his PD. The value of this benefit for 2026 will be $139.87 per month.

"Therefore, the PD-related increment to his overall VBA disability benefit is the SMC-K benefit, which I assume he will continue to receive. 12 months at $139.87 per month works out to $1,678.44."

Did I read that correctly?

A. Yes.

Q. The past SMC-K benefit from various sources, what is that?

A. I'm sorry. What is what?

Q. SMC-K benefit.

A. They're -- VBA grants, depending on eligibility, a series of special monthly compensation payments, SMC, and they're designated by various letters. SMC-L, SMC-K, SMC-S.

Mr. McElhiney received and is receiving an SMC-K benefit from VBA, and more to the point, he's receiving it because of his PD.

Q. And you conclude the present value of the offset is $26,858?

A. Yes.

Q. Regarding medical offsets and Mr. McElhiney, you your report concludes that the past medical offset is $89,891.24 when accounting for VHA's total cost and $78,835.58 when accounting for VHA's total direct cost; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

BY MR. ROMANO:

Q. No. Okay. Clarify that, please.

A. I didn't conclude. You asked if I

concluded this. I haven't concluded this. I'm really just reporting the finding of Dr. Hasan. These were his calculations.

Q. Right. Are you relying on his calculations for anything in your report?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: The only respects in which I relied on Dr. Hasan's expert opinion, as I recall, are his opinions regarding VBA disability ratings and then these calculations of past medical offsets.

BY MR. ROMANO:

Q. Then you state, "Mr. McElhiney's future medical offsets are summarized in a report by Henry Miller of Berkeley Research Group which lists projected payments by Medicare with TRICARE as secondary coverage and CCN/VHA for the items in the Shahnasarian life care plan.

"The Miller report contains the categories and treatments of the Shahnasarian life care plan and can be construed as modifying the life care plan. The results of a modified Shahnasarian life care plan for Medicare (with TRICARE as secondary) and CCN/BHA appear in Tables D and E."

Did I read that correctly?

A. Sure, I think so.

Q. Walk us through the methodology you used in calculating the McElhiney offsets.

A. The one summarized in Tables D and E?

Q. Yes.

A. Sure. As I did in the Peterson example we discussed earlier, I took the offsets laid out by Dr. Miller and applied them to the various treatments and medications and therapies they corresponded to in the Shahnasarian life care plan. These are the amounts that in Table D Medicare and TRICARE would cover.

In Table E, they're the amounts that VHA and its Community Care Network, CCN, would cover.

So I applied each of those amounts to the corresponding treatment or therapy in the Shahnasarian life care plan and added them up over time, applying growth rates and discount rates, and then, as you can see in Tables D and E, added them up over the various categories to get values -- the total present value of the offsets under each coverage scenario.

Q. So your final opinions regarding any

offsets for Mr. McElhiney are what?

A. That if coverage is obtained under Medicare and TRICARE that the total present value of the medical -- of the future medical offsets is between $206,210 -- I'm sorry. I'll say that again -- $206,210 on the upper bound, $273,874 for coverage under CCN and VHA. The offset -- the present value of the offsets is between $532,501 and $600,401.

Q. In calculating the offsets, do you assume he's 100 percent disabled?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No. These offsets have nothing to do with disability ratings. These offsets are determined not by me but by Dr. Miller on the basis of the terms and provisions of medical coverage under these different plans.

BY MR. ROMANO:

Q. If you will look at your section Plaintiff Life Care Plan, you note that Staller calculates the present value of the Hairston life care plan at $3,513,463; correct?

A. Yes.

Q. And the Miller report addresses the Hairston life care plan for both Medicare, TRICARE, and CC and VHS coverage; correct?

A. Yes. It does the same basic analysis that it did with the Shahnasarian life care plan.

Q. Are you holding yourself out as an expert in TRICARE benefits?

A. No.

Q. Are you aware of the types of TRICARE plans, such as TRICARE Prime, TRICARE Select, TFL, or TRICARE for Life, TRICARE Reserve Select and others?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

BY MR. ROMANO:

Q. As a part of you work -- your work, do you make any determinations as to whether or not Mr. McElhiney is eligible for any coverage under these TRICARE plans?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

BY MR. ROMANO:

Q. And you agree TRICARE is the official

healthcare program for the US Department of Defense?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: I -- I think that's right. I don't really have deep knowledge of of Department of Defense or military healthcare.

BY MR. ROMANO:

Q. Do you know who manages TRICARE?

A. No.

Q. If projections were being made by the government that pertain to future payments that would be made by TRICARE, do you as the forensic economist assess the strength and viability of TRICARE as an organization which would be able to make the payments in the future? Do you do that?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No. I base my projections in this case and in others on current -- the current situation, current policy, etc., etc.

TRICARE exists now, and it's on that basis that I made projections.

In any case, I would think that any

discussion about the future viability of TRICARE might have to be had with Dr. Miller, who is the expert on this kind of coverage.

In any case, it would have been speculative of me to assume that it might not exist in the future. The evidence that I have is that it currently exists.

BY MR. ROMANO:

Q. Are you aware of the fact that TRICARE as of May 2025 had not paid over 16,000 health providers, resulting in many dropping TRICARE patients and some even having to close their clinics or facilities? Are you aware of that?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: No.

BY MR. ROMANO:

Q. When you make your calculations as a forensic economist, do you consider or not whether Medicare will have gone broke five or six years from now?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: Does the thought ever enter my mind? Sure, but it's not a relevant

part of my analysis.

My analysis is based on the data that I can observe and the reality that I know is in place right now.

Medicare exists now, and, frankly, it would be speculative of me to start talking about it not existing in the future.

BY MR. ROMANO:

Q. As a part of your work as a forensic economist, is it important for you to be continuously in touch with information about whether or not these government programs will even be in existence in a few years?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Should I be aware of such things in principle? Sure, but, again, I can't -- it's not reasonable to expect me to speculate about possible different future scenarios.

What I can do is base my projections on data and information that exists now.

BY MR. ROMANO:

Q. When you make your determinations in these five cases about any future payments by

TRICARE or Medicare, do you then assume they're in existence today and make the assumption they will be in existence to make these future payments?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: In effect, yes. What I've effectively -- what I've actually assumed is that there will be some program to cover these medical expenses. I can't say what it might be called. I can't say if it will be Medicare or TRICARE. What I can say is that this coverage exists now.

And as I said a couple of times a moment ago, it would be really speculative and, frankly, improper of me to start supposing all manner of different possibilities for the future.

Again, what we know is that Medicare and TRICARE exists now. Am I assuming that they will -- that they or some program like them will continue to cover these -- these medical expenses in the future? Yes, I am.

BY MR. ROMANO:

Q. What is -- you referred in the report to CCN/VHA coverage. What is that?

A. CCN is Community Care Network, which is in effect part of VHA. It's not literally part of VHA, but it's a program that veterans can get coverage from -- coverage from when they are working through the Veterans Health Administration.

Q. How does CCN/VMA coverage differ from Medicare?

A. I don't know.

Q. Do you know how Medicare differs from TRICARE?

A. No.

Q. On page 7 of the McElhiney report, at the bottom of page 7, you make reference showing that Tables F and G show that in present value terms, Medicare/TRICARE is projected to cover between $178,440 and 243,674 of the cost of the Hairston life care plan and CCN/VHA is projected to cover between $1,290,196, and $1,372,014.

Did I state that correctly?

A. I believe so.

Q. If you go to page 8 and the Tables F and G, let's start with F. Would you briefly explain that to us.

A. Table F is the Present Value Costs by category of the offsets identified by Dr. Miller

corresponding to each medication, treatment, therapy in the Hairston life care plan added up across each category, and then -- but then I should say added up in a way that accounts for -- that takes into account growth rates and discount rates, and then those totals for each category are added up to get the total at the bottom of Table F.

Q. And then Table G, explain that.

A. It's the same thing --

Q. The same.

A. -- but it is -- I'm happy to say it again.

It is the summary of the medical offsets identified by Dr. Miller to correspond to the various treatments, therapies, and medications in the Hairston life care plan, but this time the offsets are based on the coverage of CCN/VHA. Then those amounts are added up across the category.

They're added up through time in a way that factors in growth rates and discount rates, and then it's added up across the columns, which gives you the numbers at the bottom of Table G.

Q. Then if you come over to page 9, you state that "The opinions set forth in this report which are my present opinions to a reasonable degree

of certainty."

Do you see that?

A. I do.

Q. All right. When you use that phrase, "opinions to a reasonable degree of certainty," what does that mean to you from your perspective as a forensic economist?

A. Well, it means that it is as certain as I can achieve as a human being and someone making projections into the future.

It is not 100 percent certain because no projection into the future is 100 percent certain. They are all of necessity and by construction uncertain to some degree.

And so the key thing here is not the word "certainty" but the phrase "reasonable degree of certainty."

It's as close to certain as I can make it, and the degree and my effort in this regard has been reasonable. It's not an unreasonable degree of certainty. It's a reasonable degree of certainty.

MR. ROMANO: I'm going to switch gears and move on to your report regarding Richard Sparks. Good to go or you want a break?

Anybody need a break?

MS. KONSTANTOPOULOS: Counsel, I would need a break.

MR. ROMANO: A break? Okay.

MS. KONSTANTOPOULOS: Yes. Thank you.

MR. ROMANO: We'll take about 10 minutes. 10 minutes.

VIDEOGRAPHER: Off record at 2:13.

(Recess taken.)

VIDEOGRAPHER: On record at 2:24.

(Whereupon, Exhibit 18 marked for identification.)

BY MR. ROMANO:

Q. I have handed you -- what is the sticker number on there?

A. 18.

Q. Exhibit Number 18, which appears to be a copy of your report in the Sparks matter dated December 15, 2025. Is that your report on Richard Sparks in this matter?

A. Yes, it certainly appears to be.

Q. In the introductory section, you note that he was diagnosed with Parkinson's disease in January 2014; correct?

A. Yes.

Q. And then in the section under lost

earnings, you note that Stellar opines that the lost earnings are at $414,970; correct?

A. Yes.

Q. But Dr. Shahnasarian opines that Sparks retained his earning capacity even after retirement; right?

A. Right.

Q. And according to your report, Dr. Shahnasarian had concluded that Richard Sparks left his employment voluntarily as a customs and border officer; correct?

A. Yes.

Q. All right. And thus the conclusion -- that he left voluntarily leads to your conclusion that there will be zero awarded as to lost earnings in the past, as far as your opinion goes; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, zero lost earnings, period. Yes, that's my opinion.

BY MR. ROMANO:

Q. Did you attempt to make any independent assessment yourself as to why Richard Sparks stopped working?

MS. KONSTANTOPOULOS: Objection to

form.

THE WITNESS: I relied on the report of Dr. Shahnasarian.

BY MR. ROMANO:

Q. Let's go to Richard Sparks' lost -- lost household services, and would you just walk us through your analysis.

A. Sure. This is the same as for the other two PD plaintiffs we've discussed.

This is where Mr. Staller does a partial analysis. He did a calculation based on an assumption of one hour of -- one lost service hour per week.

He does not determine how many hours Mr. Parks -- Mr. Sparks would have done but for his PD. He doesn't say anything about how many hours Mr. Sparks can do now.

In fact, that's something that I haven't mentioned in the other -- for the other plaintiffs. Not only does Mr. Staller not investigate how much -- how many service hours could have been performed and provided but for the PD, he also doesn't inquire how about many can be provided now. Maybe it's zero. Maybe it's something more than zero.

So it's the same story here. Mr. Staller does not determine, question, investigate whether Mr. Sparks could have actually done the number of hours that he presents in his table.

He just puts that number out there, and I guess he's hoping that we will -- or someone is hoping that we will think that the number of hours for Mr. Sparks not -- the number of lost service hours for Mr. Sparks is close to that number, 20 or 22 hours, but there's no investigation along those lines by Mr. Staller.

He apparently did not ask Mr. Sparks or his -- his wife or anyone how many service hours he was providing, could have provided, or is now providing, so he doesn't give us an answer.

And, again, my conclusion is not that the number of service hours -- lost service hours is zero or that the value of lost service hours is zero simply that I can't rebut something that isn't there.

And there is no -- effectively no complete analysis of lost household services in this report.

Q. Separate and apart from the Staller

work, did you arrive at a determination of hours Richard Sparks could have performed household chores but for limitations because of the PD?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No, I didn't. I was not in the best position to do that. I don't have the same sort of access to Mr. Sparks or his family that Mr. Staller had.

That seems like something Mr. Staller should have done, but, no, I didn't do that.

BY MR. ROMANO:

Q. If you would go to Future Medical Expenses Life Care Plan regarding Richard Sparks, please, on page 2.

If you go to the third paragraph under that heading, Future Medical Expenses Life Care Plan, and it states "I took the cost estimates provided in the Shahnasarian life care plan and obtained reasonable growth rates for the costs in each category based on components of the Consumer Price Index, CPI.

"I calculated average inflation rates over the period of 2014-2024. I assigned CPI components in order to capture the bulk of the

spending in each category."

Did I read that correctly?

A. Yes.

Q. Okay. And then we go from there to Table A, which is on page 3 under the -- with the heading Life Care Plan Categories and Growth Rates. Would you briefly explain Table A for us.

A. Yes. As in the other reports, Table A is -- it provides a crosswalk between the life care plan categories and the CPI components whose inflation rates I use as growth rates for those life care plan categories.

So the first one in that table, Evaluations, that's one of the categories in the Shahnasarian life care plan, and I associate that with the CPI component for physician services.

And so the inflation rate that I calculated for physician services is the one that I'm using as the growth rate for evaluations, the life care plan category Evaluations.

Q. And your projections start on January 2026 and extend until the expected end of Mr. Sparks' life; correct?

A. Yes.

Q. And similar to Mr. Staller, you used

CDC demographic data to determine that Mr. Sparks' remaining life expectancy on the date of this report was 12.7 years, implying a total life expectancy of 84.8 years; correct?

A. Yes.

Q. And like Staller, you used the same discount of 4.88 percent as the discount rate; correct?

A. Yes.

Q. And then the results of your analysis appear on Table B, which is your present value of life care plan by category; right?

A. Yes.

Q. Explain Table B briefly, please.

A. Table B takes the various -- the costs of the various therapies, treatments, and medications in the -- and procedures in the life care plan by Dr. Shahnasarian -- takes the costs associated with them, adds them up across the category, adds them over time in a way that factors in both growth rates and discount rates, and then in the table those different categories are added up to obtain the number at the bottom of the table.

At the bottom of Table B are the lower and upper bound of the cost of the Shahnasarian life

care plan.

Q. And Table B shows that the present value of the cost of the Shahnasarian life care plan is between $992,606 and $1,414,899; correct?

A. Yes.

Q. Moving to the section Offsets to Damages, is this section, at least structurally in the report, similar to the structure you have in the reports of the other Parkinson's disease cases?

A. Quite similar.

Q. Okay. And the methodology that you utilized in any of your calculations regarding offsets, first as to disability benefits, would you walk us through that, please.

A. Sure. As in the other cases we've reviewed so far, I heeded Dr. Hasan's report, who opined that all of Mr. Sparks' disabilities listed in the VBA document were due to PD. They're all PD-related.

Therefore, all of his VBA benefits are amounts that he's receiving because of PD, and therefore, the full amount of his offsets, his VBA benefits, are offsets to his economic damages in this case.

Q. Walk us through the methodology you

are utilizing regarding the medical offsets pertaining to Richard Sparks.

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Sure. As before, I am taking the -- well, actually, let's stop first.

If we're talking about past medical -- medical offsets, I had no approach other than to report the numbers calculated by Dr. Hasan in that first paragraph in the subsection entitled Medical Offsets. So for that, there was nothing I did other than report the number.

For future medical offsets, I did something. For future medical offsets, I took the information on offsets provided by Dr. Henry Miller and applied it to the corresponding medications, treatments, procedures, etc. in the Shahnasarian life care plan, added them up in the same way that I did for the life care plan and arrived at a present value for the cost of these offsets.

In this case, we're only -- in the case of Mr. Sparks, we're only looking at VHA

coverage, and so we're only looking at VHA offsets, and those offsets are summarized in Table C.

BY MR. ROMANO:

Q. Right. I'll come back to that in a moment. Moving back briefly to disability benefits, what is the present value of the offset to Richard Sparks' economic damages which you calculate from 2016 until his life expectancy?

A. The value that I arrive at is $972,889.

Q. All right. Let's move to Table C for Richard Sparks on page 5 entitled Present Value of Modified LCP by Category - HVA. Would you explain that briefly for us?

A. This is the result of my taking the offsets identified by Dr. Miller, applying them to each medication, treatment, therapy, procedure in the Shahnasarian life care plan, adding them up over each life care plan category, adding them through time in a way that factors in growth rates and discount rates to arrive at a present value, then adding them up across life care plan categories, which is actually -- as you move down the table, adding them up across the categories is what leads

to the bottom row of Table C, the total present value of the medical offsets, future medical offsets identified by Henry Miller as applied to the Shahnasarian life care plan.

Q. And those amounts are?

A. The lower bound is $333,205. The upper bound is $339,498.

Q. Then we move on page 5 under number 7, Plaintiff's Life Care Plan. In this instance, plaintiff's life care plan for Richard Sparks was produced by Michael Fryar, and Mr. Staller calculated the present value of the Fryar life care plan to be $1,540,411; correct?

A. Yes.

Q. In Table D on page 5, Present Value of Modified Fryar Life Care Plan, by Category - VHA, would you briefly explain this Table D for us?

A. Of course. Table D is where I took the offsets identified by Dr. Henry Miller, I applied them to the corresponding medications, treatments, therapies, and procedures in the Fryar life care plan and added them up over each category.

Added them up over time in a way that took account of growth rates and discount rates to arrive at a present value, upper and lower bound of

the present value in each category, which I then added up across categories to obtain the numbers at the bottom of Table D, which are the upper and lower bound of the present value of the VHA offsets to the Fryar life care plan.

Q. And what is the lower bound?

A. $1,548,503.

Q. And what is the upper bound?

A. $1,549,332.

Q. And then you state your conclusions on page 6; right?

A. Yes, the overall conclusions in the report are on page 6, yes.

MR. ROMANO: We will move now to the -- your report on Diane Rothchild, which is Exhibit Number 16. If you would look at that, please, and I'll hand copies to counsel.

(Whereupon, Exhibit 16 marked for identification.)

BY MR. ROMANO:

Q. Is Exhibit Number 16 a copy of your report in the Diane Rothchild matter and dated December 15, 2025?

A. Yes, it certainly appears to be.

Q. In the introduction -- introductory section, you note that Ms. Rothchild began experiencing tremors in 1993 and was diagnosed with Parkinson's disease after she began treatment with Dr. Joel Perlmutter in 1999; correct?

A. Yes, that's what it says.

Q. And if you will go to the Lost Earnings section, you see that Mr. Staller opined that Ms. Rothchild's lost earning capacity is $406,660; correct?

A. Yes.

Q. All right. In terms of your decision-making as to lost earnings for Diane Rothchild, would you walk us through your methodology, please.

A. Sure. It's very brief. Dr. Shahnasarian, the defense vocational expert, opined that Ms. Rothchild retired voluntarily and that, as with Mr. Sparks, she had residual earning capacity even after she retired.

He said, in addition to that, "Her transferable skills would have qualified her for employment in numerous positions."

So his expert opinion is that she stopped working voluntarily, and therefore there's

no justification to award lost earnings or lost earning capacity on the basis of her PD.

Q. As to the reasons for her stopping to work at a given time, do you rely upon the report of Dr. Shahnasarian?

A. Yes.

Q. Do you defer to his conclusions as to why she stopped working?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: If someone has an expert opinion outside of the area of economics as Mr. -- I'm sorry -- Dr. Shahnasarian's opinion in this regard is, yes, I defer to it.

BY MR. ROMANO:

Q. If you would go to the section -- well, staying -- staying with lost earnings for a moment, is it true her work life -- Diane Rothchild's work life expectancy was 65 to 67, regardless of the Parkinson's disease?

A. You're asking me if that's true?

Q. Is it true that you stated that in your report?

A. It's true that Dr. Shahnasarian stated

it, and I quoted Dr. Shahnasarian.

Q. All right. And you defer to him for that opinion?

A. Naturally.

Q. Moving on to Diane Rothchild on loss of household services, walk us through your methodology, please.

A. Sure. The methodology such as it is is simply an assessment of the partial analysis done by Mr. Staller.

As in the other reports, he takes us part of the way there but doesn't complete the ride. He does this calculation under the assumption of one hour -- one lost service hour per week and views that as a step toward the full answer.

But he could have given us the first answer. He could have investigated how many hours Ms. Rothchild believes she would have worked around the house but for her PD.

He could have discovered by talking to her or her daughter how many hours she can do now, if any. He could have made those determinations.

He could have -- he could have investigated those issues, but he chose not to, and as a result, we don't know what the number of lost

service hours is for Ms. Rothchild.

My methodology is simply to note that we don't have an analysis here for me to assess or rebut. It's only a partial analysis.

Q. As to Diane Rothchild, you conclude there's no basis to include lost household services in her economic damages; right?

A. Yes.

Q. Right. That opinion is an opinion of yours that is similar in all five of the Parkinson's disease cases; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. If you would go to future medical expenses on the life care plan, please. You calculated average inflation rates over the period of 2014 to 2024; correct?

A. Yes.

Q. Why is it that you utilized that 10-year period?

A. It was the period that Mr. Staller used at least in most of his analyses.

Q. Do you agree with that? That's a

reasonable time period to use?

A. I chose not to dispute it.

Q. And then you find Ms. Rothchild's remaining life expectancy as of the date of this report to be 10.2 years, implying a total life expectancy of 88.9 years; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. Then we come to Table A. Would you explain this to us, please. I'm referring to Table A on page 3 of the Diane Rothchild report.

A. Table A represents my decisions regarding which CPI components to calculate inflation rates in and to use at growth rates for various categories of the life care plan.

So, for example, there's a category called Drugs. These appeared all to be prescription drugs, so I used the CPI category or component, rather, for prescription drugs.

I used that average inflation rate calculated over the past 10 years in -- you know, to grow those numbers into the future to reflect, as I believe you put it earlier, a clearer, more reliable

picture of what those costs will be in the future.

Q. And we come down to Table B, Present Value of Life Care Plan by Category. Briefly explain this to us.

A. These are the sums of all of those -- of the costs of all of those medications, treatments, etc. in the Shahnasarian life care plan.

I grow them over time using the discount rates in Table A. I discount them back to present value using the discount rate of 4.88 percent, the same one that Mr. Staller used, and with that, I arrive at the number in each row for each life care plan category.

There's a lower and upper bound because that's -- that reflects the way that Dr. Shahnasarian expressed his results in his life care plan.

I add those up across categories, which takes us down the table to the row at the bottom where it says Total.

The bottom row represents the total present value of all the categories in this life care plan.

Q. And the value lower bound is what?

A. The lower bound for the present value

of the Shahnasarian life care plan is $454,940.

Q. And the higher bound is what?

A. Is $555,661.

Q. We then come to offsets to damages regarding Diane Rothchild. Would you walk us through your methodology in arriving at these offset calculations or conclusions.

A. Well, there are, I suppose, three categories. There are disability benefits, but that's not relevant to Ms. Rothchild since she is not a veteran, so there's nothing to say about that. There are no benefits to add up, no offsets to subtract.

Then there are past medical offsets. As in previous reports that we've discussed, I -- in that paragraph, I'm really just reporting the calculation done by Dr. Hasan.

And then the third category, I suppose, is future medical offsets, and that's where I took the -- the values from Dr. Miller's report, which are amounts of costs covered in this case by Medicare.

VHA doesn't apply to Ms. Rothchild because, again, she's not a veteran.

And so these calculate Medicare

offsets to the Shahnasarian life care plan. Or at least that's what's going on in Table C.

Q. In Table C, you indicate that Medicare is projected to cover between $26,657 and $38,292 of the cost of the Shahnasarian life care plan; correct?

A. Yes.

Q. If a Parkinson's disease patient were to require a medical procedure in the future, is it your conclusion in these five cases that the amount of money that should be paid for that procedure is the amount of money that would be paid by either Medicare or TRICARE?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: That is not my opinion.

BY MR. ROMANO:

Q. Okay. What is your opinion, then, as to -- let's take Eddie Peterson. If he needs to have a deep brain stimulation procedure done in the future, what is your opinion as to what amount of money should be paid by a government agency?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I don't have an opinion

about that. That's well outside of my area of expertise. I'm not an expert in government health insurance, military or otherwise.

BY MR. ROMANO:

Q. Do you agree that these individuals are entitled within reason to the best medical care available?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Are you asking me as a private person? Because I have no professional opinion about that.

BY MR. ROMANO:

Q. Okay. I'm asking you this question as a private person.

A. Sure, I think --

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I think people should have access to good care. That also is not at all relevant to my expert opinion here, however.

BY MR. ROMANO:

Q. If Eddie Peterson needs a deep brain

simulation -- stimulation procedure done by a neurosurgeon, do your opinions factor in whether or not that should be a top-flight expensive neurosurgeon or not a top-flight neurosurgeon who accepts less money from Medicare or TRICARE?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: Well, these are questions best directed to the life care planners because my opinion in these cases, in all cases involving life care plans, is that the life care planners address the medical issues and I address the calculation of the corresponding present value.

I have my lane. You asked about lanes and boundaries earlier in this deposition. This is one of those boundaries.

It's not my job to determine either medical expenses or the quality of care or which neurosurgeon does the work.

My job is to take the life care plan as is, assume that it has been done properly, reasonably, I should say, and then I calculate the value thereof.

BY MR. ROMANO:

Q. Does the life care plan of Shahnasarian discuss who is supposed to pay for the future medical treatments?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: My understanding is that it does not. He is laying out the cost, not who is to pay.

BY MR. ROMANO:

Q. Well, if you -- when you get a life care plan, you rely on the life care planner's opinions to do your work as an economist; correct?

A. I do.

Q. Okay. Do you assume that the life care planner is creating and developing a life care plan to provide the best possible care in the future for that particular client or patient?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: These are issues between the life care planner and the attorney who hires him or her.

My job is not -- among my jobs is not to stick my nose into medical issues. I'm

not that kind of doctor.

So my job is to take the life care plan as given, and if there are problems with it hypothetically, well, then those are issues for other people to talk about and argue about. It's not for me to say.

BY MR. ROMANO:

Q. When you reviewed the Shahnasarian life care plan, does that plan let you know the future source of payment for a given procedure or medical service?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Well, as I answered just recently, I don't believe that life care plan says anything about how it's to be paid.

My understanding is that the life care plan, in this case the Shahnasarian life care plans, lay out the cost.

The offset studies by Dr. Miller address some issues regarding who is to pay and what the cost is net of those payors, but that's just me interpreting the results of the -- of the Miller report.

I also have nothing to say about his

detailed findings, his specific findings. He's an expert in those coverage issues. I'm not.

Dr. Shahnasarian is an expert in these cost issues. I'm not.

What I am an expert in is the analysis of life care plans.

And by the way, a moment ago you -- ago you said -- you asked me about what happens when I reviewed his report.

In a way, I did not review his report. I quantified his report. I took his numbers and arranged them in a spreadsheet so that they made sense, you know, chronologically and so on and divided them up by categories and I grew them over time, reduced them to present value, and that's it.

BY MR. ROMANO:

Q. If you go to the bottom of page 5 of your report, it states that "The other factor at work here is that Medicare doesn't cover the cost of a CNA when there is no skilled nursing, and, as it happens, there are no RNs or LPNs in the Fryar LCP. As a result, home care is ignored by Miller and absent from Table D. It's still in the underlying

life care plan but not from a Medicare payment perspective. It's absent and cannot offset the cost of facility care in the lower bound.

"Therefore, to calculate the cost of Fryar's life care plan net of offsets, one should subtract the larger number in Table D, $87,465, from the lower bound of the Fryar LCP."

Did I read that correctly?

A. Yes.

Q. And then on page 6 you have your conclusions and references; correct?

A. Yes.

MR. ROMANO: Then we come to the Welch report, and this would be your expert report on Robert Welch dated December 15, 2025.

Okay. Let me hand you -- I've got Exhibit Number 17. I'll hand copies to counsel.

(Whereupon, Exhibit 17 marked for identification.)

BY MR. ROMANO:

Q. Okay. Do you have the -- Exhibit Number 17 --

A. 17.

Q. -- in front of you?

Under the introductory section, you note that Mr. Welch was diagnosed with Parkinson's disease in November 2021; correct?

A. Yes.

Q. And if we go to the section Household Services, is your methodology for loss of household services for Robert Welch similar to the methodology you used for each of the other cases or does it differ?

A. It differs only in one small way. It is basically the same as the others. The only difference is that we know, according to Dr. Hasan and VBA, that Mr. Welch was -- had a number of conditions unrelated to PD, including, as I noted in the report, degenerative joint disease. That's not my determination. That was the VBA's determination.

I don't know -- in fact, I say right here, "I do not have expertise, in particular the medical expertise, to determine which, if any, household chores Mr. Welch's non-PD conditions allowed him to do, and Mr. Staller appears not to have investigated this issue at all."

So it's the same basic idea. Mr. Staller did the start -- he started the analysis, but he didn't finish.

And the only difference here is that, you know, we know that from the documents that Mr. Welch had other things going on. You know, the question is -- other health problems. So the question is but for his PD but acknowledging his other health issues, what -- what number of service hours could he have performed anyway and what number of services hours can he perform now.

As with the other ones, with the other cases, Mr. Staller didn't investigate that, and so as a result, we don't have a completed analysis of lost household services.

Q. We move to future medical expenses life care plan. You did not assign a growth rate to the transportation needs category; correct?

Look at page 2.

A. I am looking -- yeah, yeah.

Q. Yeah.

A. I'm sorry. I interrupted.

Q. That's all right.

A. Yeah, the second-to-last paragraph on page 2, right, I did not assign a growth rate to the transportation needs category, which is a category in the life care plan but did not require a growth rate.

Q. All right. Tell us why.

A. Because it was a one-time cost. There are -- as I note here, there are many one-time costs in life care plans.

And my methodology which I use, regardless of whether I'm working for the plaintiff or defense, but one that is conservative when I am on the defense is to just put that dollar value in the first year.

If there's no -- if I'm not going to be provided with information about timing or frequency by the life care planner, the only thing I can do is put that cost in the first year, and so that's what I did here.

And if there's only a cost that takes place in year zero, which is 2026 in this report, then there's no reason to even look up an inflation rate. There's no reason to determine what the growth rate is. If I had done so, I wouldn't have used it.

Q. And following Mr. Staller, you used CDC demographic data to determine that Mr. Welch's remaining life expectancy as of the date of this report is 7.4 years, implying a total life expectancy of 88.6 years; correct?

A. Yes.
Q. Briefly explain Table A on page 3 of the Welch report.
A. Sure. Table A is where I display the CPI components that I use to -- that I use to calculate inflation rates that I then use as growth rates for the columns of the life care plan that are listed on the left-hand side of the table.
Q. And you discounted all future values using the same 4.88 percent discount rate that Mr. Staller used; correct?
A. Yes.
Q. And then briefly explain Table B on page 3 of your report.
A. Those are the results of my report. I'm sorry. I should say those are the results of my evaluation of the life care plan by category. Then if you add them up across categories, you get the value at the bottom of the table, the total present value of the life care plan.
Q. And the present value of the cost of the Shahnasarian life care plan is between $160,567 and 342,889; correct?
A. Yes.
Q. We then move to offsets to damages,

and you have that broken into the two categories of disability benefits and medical offsets; correct?

A. Yes.

Q. Right. As to the disability benefits, please explain your methodology for your opinions regarding offsets to damages in the category relating to disability benefits.

A. Sure. I mean, the summary of this section is that there are no offsets either for disability benefits or medical expenses.

The methodology I used with the former -- I'm sorry -- whatever the former -- the one I used for disability benefits was the same as in other reports.

The -- the expert opinion of Dr. Hasan confirmed that in effect Mr. Welch was 100 percent disabled, even aside from PD. That means that his VBA disability benefits are amounts he would have received anyway, so they don't amount to offsets to his economic damages in this case. Again, that was based on the opinion of Dr. Hasan.

But I also did what I did in other reports and used that VBA web page to arrive at a combined disability rating that confirmed Dr. Hasan's opinion, but the result here is no

disability -- no offset due to disability benefits.

Q. And your Table C, explain that, please.

A. That's -- those are the values that I fed into the VA's disability rating calculator, and when you do that -- but the ones I added in, the ones I fed into that calculator, were only the ones identified by Dr. Hasan as being non-PD-related, and so you see the result is a combined non-PD disability rating of 100 percent. So even aside from PD, Mr. Welch was 100 percent disabled.

Q. And under Medical Offset, you state, "Based on the information available to me and determinations made by defense clinical expert Dr. Syed Hasan, there are no offsets for past or future medical treatment"; correct?

A. Correct.

Q. Then you have your conclusion section; right?

A. Yes.

Q. Followed by reference materials; correct?

A. Yes.

Q. Let me go back to Exhibit 6. I'll hand it to you in just a moment, but --

A. Okay.
Q. -- there's a February 9, 2026, transmittal letter from the government from Joseph Turner.
A. Okay.
Q. And it appears to be a number of documents that were produced to us yesterday or today. I simply want to go through these briefly and just have you identify what these are, assuming you can identify them.
And we'll make this -- I think the best way to do is we'll just make it Exhibit Number 6, and then each of the individual parts within I'll make 6A, 6B, something like that. Is that all right?
MS. KONSTANTOPOULOS: That's fine.
MR. ROMANO: Okay.
COURT REPORTER: Can we go off the record?
VIDEOGRAPHER: Off record at 3:19.
(Off the record.)
(Whereupon, Exhibit 6A marked for identification.)
VIDEOGRAPHER: On record at 3:22.

BY MR. ROMANO:

Q. All right. I will quickly go through some of these records, but 6A, which we have in front of you, does that appear to be just a February 9, 2026, transmittal letter noting that certain documents were being produced by the government to the plaintiffs? Is that what it appears to be?

A. Yes.

Q. All right.

A. That's what it appears to be.

MR. ROMANO: Let's go to 6B. Will you look at that, please. I'll give copies to counsel.

(Whereupon, Exhibit 6B marked for identification.)

BY MR. ROMANO:

Q. Can you identify this for us, please.

A. Sure. This appears to be my contract, the contract between me and US DOJ for the Camp Lejeune Act Litigation.

Q. Do you know, did you sign different contracts at different times or was there one contract that you signed?

A. Well, interestingly, I don't sign the

contracts. The expert -- the expert doesn't sign the contracts. These are the contracts that I presume that if I accept them, they are binding, etc., etc., but I don't think I ever signed a contract. They're just --

Q. Take a look down at the left bottom of 6B.

A. Oh, yeah, that's my signature.

Q. Is that your signature?

A. Okay.

Q. It looks like your signature?

A. It is my signature.

Q. Yeah, okay.

A. Funny. My -- you know, I think what it was was that this was a modification. Maybe -- I really don't think I signed the contract, but this was a modification of a contract, and clearly -- you're right -- I -- I was asked to sign this and I did sign this.

Q. Okay. But this is a modification of a contract that you had with the government for services performed in this case -- these five cases as a forensic economist; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes. Sorry.

MR. ROMANO: Okay. We'll go to 6C, and I'll give that to you and I'll hand copies to counsel.

(Whereupon, Exhibit 6C marked for identification.)

BY MR. ROMANO:

Q. Can you identify this for us, please, and tell us what this is.

A. Well, given that this is the -- I don't know. It also says that it's a modification. I don't know if this is the original one. This appears to be a modification. The funding and the budgeted amounts have changed.

Q. And is entitled Amendment of Solicitation/Modification of Contract; correct?

A. Right, just as Exhibit 6B is.

Q. Okay. And this is between US DOJ/CIV/OMP/OPBE and Andrew Brod; correct?

A. Yes.

Q. And if you go to the bottom right, it has a date signed by someone on behalf of the government of May 7, 2024. Do you see that?

A. I do.

MR. ROMANO: Okay. By the way, the

order that I'm giving these to you, I do not know if they came in this order or not, so don't let the order of these influence you in any way. They -- they -- they may not be in the order they're supposed to be in, but take a look at 6D.

And I'll hand copies to counsel.

(Whereupon, Exhibit 6D marked for identification.)

BY MR. ROMANO:

Q. What is Exhibit 6D?

A. It is an attachment, possibly to the previous contract modification we looked at, possibly to the original contract. It is an SOW, a statement of work.

Q. And under Section 2.2, does that show scope?

A. It does.

Q. What you would understand to be your scope of work as a forensic economist in this case?

A. It's --

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: It's a description of what I have been contracted to do.

MR. ROMANO: Let's go to 6E, which is one page.

(Whereupon, Exhibit 6E marked for identification.)

BY MR. ROMANO:

Q. Would you identify 6E, please.

A. It says this is also an attachment, I presume, to a contract. It is a schedule rate and cost document. It appears to be fairly early in the process. I don't see a date on it, but I think it's early in the process.

Q. And this is the document -- it says Attachment Number 3, and then it says Schedule Rate and Cost (SRC); correct?

A. Yes.

Q. And at the top, the title shows US Department of Justice requests authorization and contract for services of expert witness litigation, consultant, or ADR neutral; correct?

A. Oh, right, I see it now, yes.

MR. ROMANO: All right. Let's go to 6F.

(Whereupon, Exhibit 6F marked for identification.)

BY MR. ROMANO:

Q. And is this a document at least with the cover page showing Amendment of Solicitation/Modification of contract between the government and you with a date of 8/8/2025?

A. Yes.

MR. ROMANO: And then we come to the last in this, Exhibit 6G, and I'll hand that to you and give copies to counsel.

(Whereupon, Exhibit 6G marked for identification.)

BY MR. ROMANO:

Q. And is this, at least the first page, titled at the top Solicitation/Contract/Order for Commercial Items, and then there is a date signed box at the bottom right showing 12/29/2022; correct?

A. Yes.

Q. Did you conduct a sensitivity analysis as any part of your valuations of the issues in this case?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: No.

BY MR. ROMANO:

Q. At this point, do you intend to

prepare any type of an addendum or supplement to your December 15, 2025, report?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Not at this point.

BY MR. ROMANO:

Q. Have there been any supplements to your opinions, meaning any supplement to the December 15, 2025, report?

A. No. I have produced nothing since that report.

Q. Is it true that as a forensic economist, you value health services at the amount that willing buyers pay and willing sellers accept?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: That is not true.

BY MR. ROMANO:

Q. And your reasons as to why that is not true?

A. I don't put any value on health services. The life care planner does that.

Q. Have you produced all of the materials that you have originated as part of your work as a forensic economist in this case?

A. Yes.
Q. As you were conducting your analysis of the issues in this case, did you make any type of handwritten notes or computer notes?
A. No, not beyond whatever was produced to defense counsel.
Q. Right. Whatever that was, you produced it to them; correct?
A. Yes.
Q. As a part of your work, did you confer with any other experts who have been hired by the government in this case?
A. Yes.
Q. Who did you confer with?
A. Let's see. I -- I had -- I was part of a --
MS. KONSTANTOPOULOS: And objection to the extent it calls for communications between those experts because they're protected under CMO 17.
However, to the extent that you communicated with someone, you can answer that.
BY MR. ROMANO:
Q. Yeah my -- my question right now is

who did you communicate with? I don't want to know when.

MS. KONSTANTOPOULOS: You can answer.

THE WITNESS: I had one -- I participated in one Zoom meeting -- it might have been a Microsoft Teams meeting -- that involved Dr. Shahnasarian. Just one, as I recall.

And then there was one Teams meeting with Dr. Hasan, and, again, I believe just one.

BY MR. ROMANO:

Q. Those are the two times you conferred with other experts in the case?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: As I recall, those are the only two times.

BY MR. ROMANO:

Q. As a part of your work in this case, have you reviewed or read any of the other experts' reports other than the life care planners you've already told us about and the Dr. Miller and the Dr. Hasan report?

A. Well, Mr. Staller's reports, I've --

I've read those.

Q. Any others?

A. Well, let's see. We -- I did read the life care plans by Fryar and Hairston in order to implement the offsets in Dr. Miller's report, so I saw those reports. I can't think of any other at this time.

Q. When you have been doing your work in this case, who do you report that to?

MS. KONSTANTOPOULOS: Object --

BY MR. ROMANO:

Q. Who do you report to?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I work for US DOJ. I report my results, have discussions with them.

BY MR. ROMANO:

Q. All right. I understand that, but is there a particular person who is working with you that you generally make your initial reports to?

MS. KONSTANTOPOULOS: Objection to the extent it calls for privileged information.

Instructing the witness not to reveal substance -- substance of any communications.

However, you can answer this specific question.

THE WITNESS: It appears to be a team. It does not -- there does not appear to be one person to whom I am reporting. My meetings all appear to be group meetings with a collection of DOJ attorneys. Sometimes it's a small collection; sometimes it's a larger collection.

BY MR. ROMANO:

Q. Do you have any further work that you feel you need to do in this case in order to prepare to testify at a trial?

MS. KONSTANTOPOULOS: Objection to form. Objection to privileged communications between attorneys.

To the extent that you are aware, you may answer the question.

THE WITNESS: There's nothing of which I'm aware right now.

BY MR. ROMANO:

Q. When you testify as a forensic economist, do you typically utilize demonstrative aids in court?

A. There have been times when I have,

like PowerPoint presentations, yes.

Q. PowerPoints, charts, graphs, diagrams, blowups, slides, things like that.

A. Yes, there have been times when I've done so.

Q. All right. In this particular case, and setting aside any communications with government lawyers, in your mind, have you formulated any demonstrative aids you would like to use in order to help explain your testimony in court?

MS. KONSTANTOPOULOS: Objection to form. Objection to foundation. Objection to any privileged communications between attorneys.

THE WITNESS: Nothing at this time.

MS. KONSTANTOPOULOS: That's with attorneys, not between attorneys.

BY MR. ROMANO:

Q. Have you created or developed a PowerPoint presentation for this case?

MS. KONSTANTOPOULOS: Objection. Same objections.

THE WITNESS: No.

BY MR. ROMANO:

Q. To what extent do tariffs affect any

of your opinions in this case?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: It's an interesting question. I don't know. If tariffs are relevant, then I guess it's possible that they might be relevant to certain -- I don't know -- medical devices.

They're not really relevant to issues of earnings and offsets and so on, but -- at least disability offsets, but it's possible they could be relevant to medical devices, but that's something we would have to discuss with the life care planners.

And I presume it's something that is not going to be incorporated into any analysis until there is some evidence that it's happening.

BY MR. ROMANO:

Q. Well, you are aware that our country has placed tariffs on many other countries who provide services and medical products to us?

MS. KONSTANTOPOULOS: Objection to form and --

MR. ROMANO: Correct.

MS. KONSTANTOPOULOS: -- foundation.

THE WITNESS: I'm aware in broad outlines, of course, that there is something of a tariff war going on, but that's not as relevant to me as -- or that's not as relevant to this litigation as the specific commodities those tariffs apply to.

Again, that's not something that I do. I don't assign costs to medical devices or anything else in the medical field. The life care planners do, and I would hope that they would not make any adjustments for tariffs until there's evidence that such adjustments are needed.

MR. ROMANO: Right.

THE WITNESS: But that's their call, not mine.

BY MR. ROMANO:

Q. Up to this point in time, have you incorporated any information about the effect tariffs may have on the cost of future medical care and services?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: No. Again, I would wait

until there's evidence that it's happening.
BY MR. ROMANO:
Q. If you would go to Exhibit Number 7, please, invoices.
A. I have it.
Q. You have that. Well, let's just go to the first page where it shows this is an invoice and you sent it to Daniel Eagles. It's from you dated July 14, 2023; correct?
A. Yes.
Q. All right. Now, it says research at $480 per hour. Then it provides 13.25 hours and it shows the dollar amount of $6,360; correct?
A. Yes.
Q. Then it shows one hour on general work, 12.2 -- 12.25 on Jones versus USA; correct?
A. Yes.
Q. Do you track anywhere what the work was that you did to conduct that 12.25 hours of research?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: I'm sorry. Do I track it? I keep -- I keep --

BY MR. ROMANO:

Q. In other words, if we look back now and we say, "What did you do during those 13.25 hours," is there a way to go back and find out what you did?

A. Yes.

Q. Okay. Tell us what steps you would take to go and find that out.

A. I keep a time sheet.

Q. You keep a time sheet on all of your work?

A. Yes.

Q. And does the time sheet reflect hour by hour what specific work you are doing on any case, any project?

A. Yeah. It's not necessarily hour by hour. If I spend 13 minutes on a phone call with a client, I would register that as a quarter of an hour. If I spend 33 minutes working on some analysis for some case, I might -- I would record that that as half an hour.

I just do this in 15-minute increments, quarter-hour increments, and so sometimes it's hour by hour, sometimes it's quarter hour by quarter hour.

Q. Is that time kept on a computer?
A. Yes. It's a spreadsheet.
Q. What -- what's the software that you use to track your time with the time entries?
MS. KONSTANTOPOULOS: And for the record, objection to the extent that this calls for privileged communications or information that is considered privileged under the CMO 17 regarding the contents of any such materials.
I would instruct you not to answer to the extent that it seeks information regarding the contents of your work.
BY MR. ROMANO:
Q. I'm not asking about the context of your work. My question right now is what is the software you use to make your time entries?
THE WITNESS: I'm -- I'm not clear what's happening here. It appears that I've been instructed not to answer.
MR. ROMANO: Are you telling him not to answer to tell us what the software is?
MS. KONSTANTOPOULOS: I would object to form.
You can answer to that question

specifically.

THE WITNESS: Microsoft Excel.

BY MR. ROMANO:

Q. And is that Microsoft Excel on your own work computer at your home office?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. When you send an invoice such as this invoice dated July 14, 2023, when you send that to the government, do you send anything else other than this invoice to the government?

MS. KONSTANTOPOULOS: Objection to the extent it calls for privileged communications between attorneys and our expert.

I'm going to instruct you not to answer.

THE WITNESS: Right. I can answer that --

MR. ROMANO: Yes.

THE WITNESS: -- I'm inferring.

You asked -- I'm sorry. You've instructed me not to answer?

MS. KONSTANTOPOULOS: Correct.

MR. ROMANO: Not to answer what he sends along with --

MS. KONSTANTOPOULOS: What other potential documents that he might have sent along with an invoice to an attorney in this case.

BY MR. ROMANO:

Q. You sent -- when you send a document like the July 14, 2023, invoice to the government, does it include your specifically timed time sheets that you keep on the spreadsheet through the software?

MS. KONSTANTOPOULOS: Objection to form, foundation.

THE WITNESS: Oh, but I can answer?

MS. KONSTANTOPOULOS: To the extent that it doesn't include any substance regarding any of the information contained and communicated between you and the attorneys.

THE WITNESS: Got it.

You asked initially in the present tense. Currently there is another document that I provide to DOJ, but it's just other information about billing.

There is -- well, I can say you referred specifically to this invoice. I don't believe I sent anything else along with this invoice.

BY MR. ROMANO:

Q. All right. But let's take this invoice of July 14, 2023. If we now wanted to determine specifically what you did during that 13.25 hours, is there a document somewhere in that computer system that has that information?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: As I answered previously, yes.

BY MR. ROMANO:

Q. All right. When these invoices are prepared, are you the one who prepares them?

A. Yes.

Q. Are you the one who actually physically takes the steps to send them to the government --

MS. KONSTANTOPOULOS: Objection to form.

BY MR. ROMANO:

Q. -- in these five cases?

A. I physically write the e-mail and physically hit send. Yeah, I do that.

Q. And do you typically send them via e-mail?

A. Yes.

Q. The invoices -- the invoice that we see on the first page here with these categories, research, then testimony, then travel, then research expenses, and then total, is this still -- still the same format of invoice that you are sending to the government when you send them an invoice?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: It is basically the same structure, yes.

BY MR. ROMANO:

Q. Do you know in this case what your charges have been thus far for the five Parkinson's diseases cases?

A. Well, I know roughly what my total billings have been since the beginning of my engagement on the Camp Lejeune litigation.

Q. Are you doing any cases other than the Parkinson's disease cases?

MS. KONSTANTOPOULOS: Objection to the

extent that it calls for substantive communications or information between the attorneys and the expert.

I would ask him not to answer. I would instruct him not to answer.

THE WITNESS: To the extent that it addresses that? So you're asking me to assess whether it involves that?

MS. KONSTANTOPOULOS: I'm instructing you not to answer the question, sir.

BY MR. ROMANO:

Q. I'll rephrase the question. I'll rephrase the question.

Are you providing expert consulting services for the government on any Camp Lejeune cases other than the five Parkinson's disease cases we are here on today?

A. No.

Q. You said that you have a rough idea of how much you've charged them since the beginning in the five Parkinson's cases. How much is that?

A. I believe it is in the ballpark of $260,000, but that's total billing. That's not my income.

Q. Are the Camp Lejeune cases for which

your testifying as a forensic economist peculiarly different from an analysis or work perspective from other personal injury and wrongful death cases on which you have worked as a forensic economist?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: A little bit more complex, but the basic ideas, concepts, and methodologies are just the same.

BY MR. ROMANO:

Q. Have you actually sat down to add up your invoices for these five cases?

A. Well, as I told you, I think the -- I know the total amount that I've billed, and I didn't just make that number up. I think that is a pretty good number based on adding up invoices.

Q. If someone were to have calculated that your charges have exceeded $550,000, then -- then that person would be incorrect; is that what you're saying?

A. Sure.

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: My total charges haven't come anywhere near 500 -- 550,000.

BY MR. ROMANO:

Q. All right. Do you keep a running track of the total amount?

A. Yes. That's how I know the number.

Q. And that would be the number on these five Parkinson's disease cases and not any other cases; right?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: It would be my total billing on the Camp Lejeune litigation.

MR. ROMANO: All right. We need to go off the record, and I'll need about 15 minutes.

When we come back, I'll -- I'll either be done or almost done.

MS. KONSTANTOPOULOS: Okay.

MR. ROMANO: Okay.

VIDEOGRAPHER: Off record at 3:55.

(Recess taken.)

VIDEOGRAPHER: On record at 4:14.

BY MR. ROMANO:

Q. All set?

A. I am.

Q. We received production of documents on

the 5th, 6th, and 9th from the government regarding your last production.

When did you first receive notice of our request for that last production?

A. I'm not sure what you're talking about on the 5th, 6th, and 9th. Is that -- are those dates?

Q. Of February. That's when the documents were being sent to us by the government. My question is when did you get notice of the need to send those documents?

MS. KONSTANTOPOULOS: Objection to form and objection to the extent that the question calls for privileged communications.

I would instruct you not to answer.

THE WITNESS: All right, then.

BY MR. ROMANO:

Q. A date, I'm looking for a date.

A. Right. To the extent that... I don't recall. It was recently.

Q. Well, was it within the last 10 days?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I don't recall.

BY MR. ROMANO:

Q. You have no memory as to this recent production as to the approximate date of when you learned you were supposed to get those materials together and send them in? You have no memory of that?

A. I'm not even sure which production you're talking about.

Q. The production that was just made to us on the 5th and the 6th and the 9th.

A. Okay.

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: I still don't know which documents you're talking about. What documents were they?

BY MR. ROMANO:

Q. Did you recently produce documents to the government pursuant to a request from us so that you would have those documents available before your deposition?

A. Yes.

Q. All right. My question is when did you receive notice that you were supposed to produce those documents, approximately when?

A. Right. And my answer is the same. I don't remember exactly.

Q. All right. Can you tell us was it a week ago? Was it a month ago?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I don't recall.

BY MR. ROMANO:

Q. Did you produce the documents that you were asked to produce?

MS. KONSTANTOPOULOS: Objection.

THE WITNESS: Yes.

BY MR. ROMANO:

Q. You sent them to the government?

A. Yes.

Q. Is there anything you were asked to produce that you didn't produce?

MS. KONSTANTOPOULOS: Objection. To the extent that calls for privileged -- privileged communications, I'm instructing the witness not to answer.

THE WITNESS: No.

BY MR. ROMANO:

Q. If you go to the request for production or duces tecum component of the subpoena

in number 2, it requests that you provide us with billing records and it says "This includes all time sheets, time records, billing records, and documents reflecting the time you and/or anyone employed by you and/or on your behalf spent in connection with your work and any aspect of the Camp Lejeune Water Contamination Litigation."

You knew that was in the request; correct?

A. Yes.

Q. All right. We have not seen the time sheets. Did you produce the time sheets?

MS. KONSTANTOPOULOS: Objection and instructing the witness not to answer. This calls for privileged communications.

Invoices and other documents were produced, and objections were provided pursuant to the responses that counsel has been provided.

MR. ROMANO: All right. We will request on the record that this deposition remains open.

We were just provided with documents on the 5th, 6th, and 9th, so the late production alone puts us in a prejudiced

position in not having had time to really review, assess, analyze, and evaluate these documents.

Also, I've asked him a number of questions about these billing records, and specifically this request says time sheets.

He's testified that he has time sheets that he keeps. They should have been turned over to us, and there's no privilege on a time sheet.

MS. KONSTANTOPOULOS: We don't agree with that. We obviously made that clear. The objections are noted in the responses, but your request is noted on the record.

BY MR. ROMANO:

Q. Regarding offsets, you stated that as a part of your report of December 15, 2025, various reports, that you relied upon Dr. Hasan for his calculations pertaining to offsets; correct?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I relied on -- excuse me. I relied on his opinion regarding the determination of a non-PD combined disability rating. He didn't make any calculations

about VBA benefits. I did the calculations.
BY MR. ROMANO:
Q. Did he provide opinions as to his numbers as to what the offset should be so that you could rely upon that and use his numbers for your December 15, 2025, report?
A. No.
MS. KONSTANTOPOULOS: Objection to form.
BY MR. ROMANO:
Q. Did he provide any numbers at all upon which you relied, any offset numbers at all for any aspect of the offsets?
MS. KONSTANTOPOULOS: Objection to form.
THE WITNESS: No. His role was to determine the combined non-PD-related disability rating.
I had documents that told me what the offset amounts were. I didn't need anyone's expert opinion to tell me what had been received by the PD plaintiffs, again, because I had documents that outlined those benefits.
BY MR. ROMANO:
Q. When you did your May 8, 2025, reports

on these Parkinson's disease cases, did you have the benefit of any of the work of Dr. Hasan at that time?

A. No.

Q. Did you make calculations relating to offsets back in May of 2025?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I did the same calculations about offsets that I did in the December 15th report.

BY MR. ROMANO:

Q. Did any of the numbers regarding offset calculations change between the May 8, 2015, reports and the December 15, 2015, reports? 2025 reports?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Yes, as I recall, there was a small change.

BY MR. ROMANO:

Q. What was the change that you recall regarding the offsets?

A. Well, there was new information. I think for the May report, I had to -- excuse me. I

had to project a value for 2026 based on the growth rate, but by the time I did the December 15th report, the monthly benefit -- VBA benefits were published for 2026, so I didn't have to make a projection of it. I just at that point did projections for 2027 on.

Q. So how did those numbers change? What was the difference in the numbers?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: It was not much. I don't recall whether it was a little bit up or a little bit down, but it was a small change.

BY MR. ROMANO:

Q. In terms of the information you obtained from the Dr. Hasan report, just so that we're crystal clear on this, he did not provide any numbers upon which you relied for any reason in your December 15, 2025, report; is that what you were saying?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: I don't recall if there were numbers in his report or not.

What I can tell you, and just so we're crystal clear, is he provided me with determinations regarding the relation to PD of the various diagnoses listed in the VBA documents that I had seen. There may have been numbers involved. I don't know. I don't recall.

What I do recall is that he didn't provide me with the -- the numbers for the VBA benefits because those were numbers that the case documents had already provided to me.

I already knew what, for example, Mr. Peterson was receiving as a VBA disability benefit because there were documents that said so. I didn't need Dr. Hasan's opinion to tell me what that number was.

What I needed his opinion for was to confirm that the determinations of non-PD disability ratings that I had done for the May reports were correct, and it was Dr. Hasan's opinion that each of those determinations that I had made was correct.

So, in effect, I'm relying on

Dr. Hasan, but I'm relying on him for those disability ratings, not the dollar amounts of the disability payments.

So it depends which numbers you're talking about.

BY MR. ROMANO:

Q. Did he give a dollar amount at any time with respect to offsets?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: As -- I'm not sure how I can be -- please let me answer.

I'm not sure how I can be clearer. He did not, to my knowledge, to my recollection, give me numbers for the VBA benefits. Maybe he did. It didn't matter because I wasn't relying on him for that. I had that information. That information was available to me.

And I don't know that -- it would have been a waste of Dr. Hasan's expertise anyway to have him looking up numbers that I had already looked up.

So I knew what the dollar amount was for, for example, Mr. Peterson's disability

benefit from the VBA. I didn't need Dr. Hasan to tell me what that number was. Did he tell me? I can't remember.

So, you know, if we're going to go look at his report and find out that there's a number in it, well, maybe so, but I didn't rely on that number because I had it already.

BY MR. ROMANO:

Q. You mention that you did rely on certain determinations from Dr. Hasan. What specifically are the determinations you're referring to?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: The disability ratings and the identification of different diagnoses as being related to or not related to PD.

BY MR. ROMANO:

Q. Between the time of your May 8, 2025, reports and the December 15, 2025, reports, did the numbers change regarding the offsets?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Well, as I said just a moment ago, yes, there was a small change.

BY MR. ROMANO:

Q. And was it?

A. I now had --

Q. Was it -- go ahead.

A. I now had the announcement, VBA announcement of what the disability benefits were going to be for 2026. When I did the May report, I didn't have them.

So when I was projecting into -- when I was talking about the value in 2026, I had to project that value based on the 2025 number multiplied by a growth factor.

For the December report, I didn't have to do that because I had the actual number for 2026, so I didn't have to project it. I could just look at the document that said here's the number.

Q. When you completed the December 15, 2025, reports, was your offset number higher than it had been from the time back on May 8th of 2025?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: For which plaintiff are we talking?

BY MR. ROMANO:

Q. Let's take McElhiney.

A. Okay. I don't know. It wasn't much different. I think it might have been a little bit lower.

Q. Peterson, higher or lower?

MS. KONSTANTOPOULOS: Objection to form. The records speak for themselves.

THE WITNESS: Well, I think we can probably summarize all of these. The ones for which this is relevant are McElhiney, Peterson, and Sparks and -- right. Those three.

And I think they were a little bit lower for the -- that's my recollection. We can look at the reports if you'd like, but my recollection is that they were a little bit lower in December. Very similar, not much of a change, and it was because -- I think the disability payment for 2026 was a little bit lower than I had projected it to be.

So when I had the actual data, obviously I made the correction and the offset was, I believe, a little lower.

We don't have to speculate. We can find out if you'd like.

BY MR. ROMANO:

Q. Why don't we look. We have the Peterson May 8th report and the Peterson December 15th report. You've got them in front of you.

A. Yeah, I have them.

Q. If you look at them, please.

MS. KONSTANTOPOULOS: Counsel, can you identify them for the record.

MR. ROMANO: Can you pull up the -- each report, the May 8th and December 15th, and just tell us the exhibit number.

THE WITNESS: Sure will.

All right. Here's Peterson May 8th, and this is Exhibit 13, and this is Peterson December 15th, and it's Exhibit 14. Shall I look at it?

MS. KONSTANTOPOULOS: Yeah, yes, please.

THE WITNESS: So in Exhibit 13, which is the May 8th report, we're looking at the disability offset. Okay? And there's the number. It is $1,053,531 for Mr. Peterson.

In the December report, with the new data, it is -- all right. My recollection

was wrong. It's a teeny bit bigger. It is -- in the May report is -- based on the new data, it's $1,073,280.

So I think what that implies is that the -- the datum for 2026, when it was announced by -- by -- by VBA, was a little bit higher than what I had projected it to be back in May.

BY MR. ROMANO:

Q. Is there anything you learned from Dr. Hasan through his report that caused you to change your numbers as it pertains to anything having to do with offset -- offsets as to Peterson?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No.

BY MR. ROMANO:

Q. There is an invoice that shows you recently ordered two books and sent the bill for the books to the government. One of the books is entitled Forensic Economics: Addressing Personal Damages in Civil Litigation.

Is that a book that you ordered for these cases?

A. Yeah.

Q. What was the reason you ordered -- let me go to the other book for a second.

And you also ordered a book called Determining Economic Damages; correct?

A. Right, I think that was the name of the other one.

Q. All right. First, what was the reason you ordered two books and charged the government for them?

MS. KONSTANTOPOULOS: Objection. Calls for privileged communication.

I'm instructing you not to answer that question.

BY MR. ROMANO:

Q. Did you read these books?

MS. KONSTANTOPOULOS: Objection.

THE WITNESS: Not in their entirety.

BY MR. ROMANO:

Q. Have you read the book Forensic Economics: Addressing Personal Damages in Civil Litigation?

MS. KONSTANTOPOULOS: Objection to form and foundation.

THE WITNESS: I don't recall. What book? Who wrote that book?

BY MR. ROMANO:

Q. It's a book that you just ordered --

A. Oh.

Q. -- and charged the government for.

The name of the book is Forensic Economics: Addressing Personal Damages in Civil Litigation.

Did you read the book?

A. No, not in its entirety.

Q. The book Determining Economic Damages, did you read that book?

A. I'm sorry. I thought you just asked that. The answer is no, not in its entirety.

Q. All right. What is your understanding as to the reason you ordered these two books?

MS. KONSTANTOPOULOS: Objection. Calls for privileged communications between the witness and counsel.

I'm instructing him not to answer.

BY MR. ROMANO:

Q. Do you intend to use any information that you have learned from either of these two books as a part of your testimony in this case?

MS. KONSTANTOPOULOS: Same objection. I'm instructing him not to answer.

BY MR. ROMANO:

Q. Has your reading either of these two books adjusted your opinions at all in this case?

A. No.

Q. Is there any information you learned in either one of these books that will have any effect on any opinions you have rendered in the five cases that we've already gone through?

MS. KONSTANTOPOULOS: Objection. Calls for privileged communications between counsel and the witness.

Instructing him not to answer.

MR. ROMANO: Well, let me just state for the record on this one if he orders books and the purpose of the book is to educate himself on forensic economics or economics or whatever is contained in the books, that is now a part of his overall knowledge and base of knowledge in terms of his work as a forensic economist, and that is something that it is appropriate for us to ask him about.

There's nothing privileged about somebody reading a book.

MS. KONSTANTOPOULOS: But why he's

read these books --

MR. ROMANO: I think -- I think he should --

MS. KONSTANTOPOULOS: Why he's read those books is --

MR. ROMANO: Yeah --

MS. KONSTANTOPOULOS: -- considered privileged.

MR. ROMANO: -- and I think we should be able to ask him why he's read those books.

MS. KONSTANTOPOULOS: I'm still going to object and instruct him not to answer.

MR. ROMANO: All right. We're going to also need the deposition open on that because that is something we do need to take up.

BY MR. ROMANO:

Q. Do you know the author of either of these two books?

A. Do I know them personally?

Q. Yes.

A. No.

MR. ROMANO: I have no further questions.

EXAMINATION

BY MS. KONSTANTOPOULOS:

Q. Thank you, Dr. Brod. I have a few questions for you.

Do forensic economists routinely calculate and evaluate offsets?

A. Sure, it is certainly quite routine. It can pop up in a number of ways. Sometimes they're called offsets and sometimes they're not.

It could be mitigation income, as I mentioned earlier. It could be a subtraction for personal consumption, which I refer to in my work as personal consumption offsets.

So any time you are netting out a certain dollar value from a gross damage, you're implying offsets.

Q. Do these include both past and future offsets?

A. They certainly can.

Q. And how do forensic economists typically calculate future offsets?

A. Well, the only way you can do it is in a way similar to calculating the gross economic damage.

You use the information you have. You determine a reasonable growth rate. You project it

into the future, and that path of offsets, whatever form it takes, is then subtracted from the -- the gross damage.

Or sometimes you calculate the present value of those reductions, the mitigation income, the personal consumption offsets, whatever it is, and subtract that from the present value of the gross loss.

Q. And have you calculated future offsets in your work as a forensic economist before this case that we're here about today?

A. Yes, many times.

Q. And did you generally employ the same methodology in arriving at your offset opinions in the five cases we're here about today as you have in the past?

A. Yes.

MS. KONSTANTOPOULOS: No further questions at this time.

MR. ROMANO: Give me one second.

No further questions.

VIDEOGRAPHER: This concludes the deposition. The time is 4:38.

COURT REPORTER: Then, Counsel, before you go, will you just indicate standing

orders or do you have a -- if you wish to order the transcript, I guess. I think the DOJ -

MR. TURNER: We have a standing order.

COURT REPORTER: Okay. Do you...?

MR. ROMANO: We're going to need to order it, yes.

– – –

(Videotaped deposition concludes, 4:38 p.m. Eastern Time.)

C E R T I F I C A T E

I, Lisa Taylor, Registered Professional Reporter and notary public certify:

That the foregoing deposition of Andrew Brod, PhD, was taken before me at the time and place therein set forth at which time the witness was put under oath by me;

That the testimony of the witness and all objections made at the time of the deposition were recorded stenographically by me and thereafter transcribed;

That the foregoing deposition is a true record of the testimony and of all objections made at the time of the deposition.

I further certify that I am neither counsel for nor related to any party to said action, nor in any way interested in the outcome thereof.

My certification as to the accuracy of this transcript, if it has been reformatted or altered from its original form in any manner, is null and void.

In witness whereof, I have subscribed my name this 24th day of February 2026.

ERRATA SHEET

Deponent: Andrew Brod, PhD
Date of Deposition: Tuesday, February, 10, 2026
In Re: Camp Lejeune Water Litigation
INSTRUCTIONS TO THE DEPONENT:
In compliance with the Rules of Civil Procedure, a copy of your deposition is provided for your review and signature. Any corrections/changes to the deposition that you care to make are to be made on this sheet.

PAGE	LINE	CORRECTION/CHANGE & REASON FOR CORRECTION/CHANGE

DEPONENT CERTIFICATE

I have read the foregoing transcript of my oral deposition taken on the date and at the location indicated on the title page of the deposition transcript and I certify that the said transcript is true and correct, with the provision that any corrections and changes appearing therein have been corrected/changed personally by myself by listing them on a separate sheet indicating the page number, line number, and content of correction or change.

I further understand that upon completion of the reading and correcting/changing of the deposition transcript that I am to sign this deponent's certificate in the presence of a notary public and then return this original deponent's certificate with my list of corrections/changes and the deposition transcript to the person so indicated to me by my counsel or the court reporter.

I further understand that if I do not carry out all of the above-mentioned instructions within thirty (30) days from receipt, I automatically waive my right to read and sign the deposition transcript and, thereupon, the original transcript can be filed accordingly.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

VIDEOGRAPHER: We are now on the record. My name is Wilmington Chan. I am a videographer for Golkow, a Veritext Division.

Today's date is Wednesday, January 28, 2026. The time is 10:06 a.m. Eastern.

This remote video deposition is being held In Re: Camp Lejuene Water Litigation, for the United States District Court, Eastern District of North Carolina.

The deponent is Eric Anderson.

All parties to this deposition are appearing remotely and have agreed to the witness being sworn in remotely.

Due to the nature of remote reporting, please pause briefly before speaking to ensure all parties are heard completely.

Counsel will be noted on the stenographic record.

The court reporter is Lisa Taylor, who will now swear in the witness.

– – –

(ERIC ANDERSON, having been duly sworn, testified as follows:)

– – –

EXAMINATION

BY MR. TURNER:

Q. Good morning, Mr. Anderson. My name is Joseph Turner, and I represent the United States.

Before we get started, I just want to stress that this is a court proceeding, even though we're not in a courtroom, and you are under oath.

Do you understand that you are obligated to tell the truth?

A. Yes.

Q. Mr. Anderson, I will be asking questions. Please answer them to the best of your ability. If you don't understand a question, please let me know, and I will do my best to rephrase or clarify it. However, if you do answer a question, I will assume that you understood it. Does that make sense?

A. Yes.

Q. And, you know, in a normal

conversation, it's typical that you may understand what I'm asking before I complete the question.

However, for the record and the court reporter, I just ask that you let me finish the question completely before answering.

A. Yeah, okay.

Q. And as the court reporter already mentioned, when answering questions, please say your answers so that they can accurately transcribe them.

If the answer is yes or no, please say yes or no. They can't transcribe an um-hum or they cannot see if you nod or shake your head.

A. Okay.

Q. I would also add that you talk at a reasonable pace, sort of like I'm speaking now, just so the court reporter can record everything.

A. Okay.

Q. And as the court reporter also mentioned, we should try not to interrupt one another. Otherwise they won't be able to record everything accurately.

You know, please wait until I've finished, again, before you start to answer, and I will not interrupt you while you are answering.

And I -- you know, we are doing this

over a videoconference, so there will be some lag. I just ask that we do our best to give each other time to speak.

A. Okay.

Q. Now, Mr. Anderson, during this deposition, you may hear other attorneys say "objection." Unless your attorney instructs you not to answer the question, please answer the question after the objection has been made.

A. Okay.

Q. Is there any reason why you are unable to give your most truthful and accurate testimony today?

A. No.

Q. Is there any reason your memory might be impaired today?

A. No.

Q. Are you currently taking any medication that might impair you?

A. No.

Q. And is there anyone in the room with you right now?

A. No.

Q. Now, Mr. Anderson, if at any time you need a break today, just let me know. I like to

break every hour at least. But I do ask that if you want a break and I have asked a question that you answer the question before we go on break. Does that make sense?

A. Yes.

Q. Now, Mr. Anderson, can you please state your full name for the record.

A. Eric Kyle Anderson.

Q. And what is your current address?

A. Current address is 21601 Keller Road in Freeland, Maryland 21053.

Q. And right. Now, are you looking at any documents on your screen?

A. No.

MR. TURNER: I am going to add Exhibit 1 to the chat and share it on my screen.

(Whereupon, Exhibit 1 marked for identification.)

BY MR. TURNER:

Q. Mr. Anderson, can you let me know when you can see the document that I'm sharing.

A. I can see the document.

Q. Perfect. Do you recognize this document?

A. Yes.
Q. Did you do anything to prepare for today's deposition?
A. I just reviewed the report and the Matterport tour.
Q. And did you meet with any counsel?
A. Prior to this, on Friday, I met with John.
Q. And was that the only time you met with John?
A. Yes.
Q. And how long did that meeting last?
A. Approximately an hour and a half.
Q. And you didn't meet with counsel any other times; correct?
A. Correct.
Q. Did you take any notes during the meeting with John?
A. No.
MR. TURNER: For the record, I'm adding what I'm marking as Exhibit Number 2 into the chat, and I will be sharing my screen.
(Whereupon, Exhibit 2 marked for identification.)

BY MR. TURNER:

Q. Mr. Anderson, are you able to see what I have been sharing on the screen right now?

A. Yes, I can see it.

Q. Perfect. And do you recognize this document?

A. Yes.

Q. And for the record, what is this document?

A. The document is the report that I submitted for this project.

Q. And were you provided any documents in connection with this matter?

A. No.

Q. Can you identify all of the documents that you relied upon in forming your opinions in your report.

A. I don't understand the question.

Q. Sorry. Let me rephrase.

In drafting your -- in writing your report, what did you reply upon for the opinions in it?

A. I relied on the information in the report.

Q. And did you have any communications

with other experts in this case?
A. No.
Q. You did not communicate with a Kay Hairston?
A. I'm sorry. I communicated via a voicemail, as I noted in the deposition document that I submitted. That was strictly an e-mail and a voicemail message that she left me.
Q. And was that the only time you communicated with Kay Hairston?
A. Yes.
Q. And, Mr. Anderson, in rendering your opinion, did you rely on any facts provided by Kay Hairston in this case?
A. The only fact that I relied on was the diagnosis of Parkinson's and reliance on self-care or for assistance for self-care?
Q. Mr. Anderson, is Deborah Gross an employee of Accessible Housing Services?
A. No, she's not.
Q. Who is Ms. Deborah Gross?
A. She was a catastrophic case manager. She's retired from Liberty Mutual Insurance. She handled catastrophic workers' comp claims.
Q. And what is the extent of her

relationship with Accessible Housing Services?
A. She would engage our services when she was employed at Liberty Mutual for the assessment of residential houses to be modified to accommodate catastrophic injuries obtained at work.
Q. And did Deborah Gross refer clients to you?
A. Yes.
Q. Does she receive compensation for her referrals?
A. No.
Q. Did she refer Mr. Peterson to you?
A. No.
Q. Did you work with her in the case of Mr. Peterson?
A. No.
Q. Did she provide any information to you for your report on Mr. Peterson?
A. No.
Q. Mr. Anderson, do you have any support staff that work for you in this matter?
A. I had somebody assist me with cost estimating.
Q. And are they an employee of Accessible Housing Services?

A. Yes.
Q. What is their name?
A. Shara Anderson.
Q. And what is their role?
A. She's an occupational therapist at Accessible Housing Services.
Q. And you just mentioned, you know, one task that she performed. Were there any other tasks that she performed?
A. No.
Q. Did any support staff perform any calculation on which you relied in rendering your opinion?
A. No.
Q. Did any support staff perform any calculation which you considered in rendering your opinion?
A. No.
Q. Did any support staff perform any calculation which you neither considered nor relied on in rendering your opinion?
A. No.
Q. And did any support staff draft or assist in the drafting of any portion of your expert report?

A. No.

MR. TURNER: I'm now adding for the record what I'm marking as Exhibit number 3 to the chat.

(Whereupon, Exhibit 3 marked for identification.)

BY MR. TURNER:

Q. Mr. Anderson, do you recognize this document?

A. Yes.

Q. And what is it?

A. It's my CV.

Q. And who drafted it?

A. I did.

Q. And is all of the information in your CV accurate?

A. It was -- it might not be up to date currently, but I -- at the time of submittal, it was.

Q. And is it fair to say that this document is a complete representation of your educational and professional background?

A. Yes.

Q. Other than the updates you just mentioned, is there any information that was not

included in your CV?

A. Not that I'm aware of.

Q. And is all of your education, employment, and publications listed on your CV?

A. Yes.

Q. Now, you graduated in 1991 from State University of New York at Buffalo; correct?

A. Yes.

Q. What degree or degrees did you graduate with?

A. Bachelor of science in exercise science and sports management.

Q. And is that the only degree you have, Mr. Anderson?

A. Yes.

Q. Now, you've also listed some professional licenses as well. For USA Rehab, you have a contractor's license; correct?

A. Correct.

Q. What's required to hold that license?

A. It requires a state -- a state examination, and that's governed by the Department of Labor and the board here in Maryland.

Q. And what's required to maintain that license?

A. Just -- just renews every two years.
Q. And you also hold a Maryland Home Improvement Commission license; correct?
A. Yes.
Q. What is this license?
A. It's the same as the license that we just referenced. It's a contractor's license.
Q. Are their requirements the same?
A. Yes.
Q. And are the requirements for maintaining it the same as well?
A. Yes.
Q. And you're maintaining both of these licenses as of today; correct?
A. It's only one license.
Q. One license?
A. Yeah. The Maryland Home Improvement Commission, so -- contractor's license for residential work.
Q. Thanks for clarifying.
Have you ever been subject to any disciplinary action or censured by a licensing body?
A. No.
Q. Have you ever been subject to any disciplinary action or censured by any court or

tribunal?

A. No.

Q. Now, Mr. Anderson, generally could you please describe your work experience for me.

A. Currently with USA Rehab. The business was formed in 1996 [sic]. As a Maryland contractor, we perform home improvement services in Maryland through the Department of Health & Hygiene, the waiver program, and also through the Department of Disabilities Services for accessible modification projects here in Maryland.

Q. Now, Mr. Anderson, you said USA Rehab was founded in 1998; correct?

A. 1998.

Q. And between 1991, when you graduated, and 1998, did you have any work experience relating to housing assessment and/or feasibility studies?

A. No.

Q. Sticking with your work with USA Rehab, your CV states that you serve exclusively in a financial role. Is that true as of to date?

A. No. I also do design and cost estimating for projects.

Q. And when did that work start?

A. It has -- I have always performed

those types of services as secondary to the financial operations.

Q. And are those the only roles you've had within USA Rehab?

A. No.

Q. Can you describe some of those other roles.

A. Some of the other roles, in the beginning, when I started the -- the business, I -- I did it all. I would purchase medical supplies. I would assemble them. I would deliver them. I would install them. I would provide family and patient education. And I would do the billing, medical billing, accounts receivable.

Q. And your CV also mentioned that USA Rehab is partially owned and operated by a licensed occupational therapist; correct?

A. Yes.

Q. Did this occupational therapist assist at all with your report or recommendations in the case of Mr. Peterson?

A. I referenced Shara Anderson, occupational therapist, previously.

Q. Okay. I'd like to switch over to your work with Accessible Housing Services. Now, you

founded that in 2006; correct?

A. Yes.

Q. And have you remained a founder and owner of this business since 2006?

A. Yes.

Q. And what are your responsibilities as owner and founder?

A. I -- my primary responsibility here is handling referrals that come in through special needs trusts and worker comp -- catastrophic worker comp injuries that I noted with Debbie Gross.

That entails collecting on-site information on residential properties, working with the parties that are involved.

There's usually a defendant and plaintiff side of a workers' comp project, as well as counsel and contractors and family members.

So I coordinate the activities of these parties through the process of assessing, designing, drafting documents, contractor solicitation, cost estimating, and project management of the projects.

Q. Now, Mr. Anderson, you alluded to some of this just now, but you mentioned in your CV that your client roster consists of medical and legal

professionals, insurance carriers, executors of trust funds, as well as private-pay individuals. Is that information correct?

A. Yes.

Q. What types of medical professionals do you work with?

A. Catastrophic case managers that are registered nurses.

Q. And what services do you offer for medical professionals?

A. The services that I previously mentioned.

Q. And are those the same services that you offer to legal professionals?

A. Yes.

Q. What percentage of your clients would you say are legal professionals?

A. 33 percent.

Q. Now, what percentage of your clients would you say are medical professionals?

A. 66.

Q. And do you have an idea of how many of your clients are actively involved in litigation?

A. Not off the top of my head.

Q. And overall, what percentage of your

work would you say is for legal professionals?

A. As I mentioned, 33 percent.

Q. Mr. Anderson, your CV also mentions that you provided accessible consulting services to the catastrophic case management unit at Liberty Mutual beginning in 2007; correct?

A. Yes.

Q. Can you describe your work with that catastrophic case management unit.

A. I previously mentioned those. Would you like me to do it again?

Q. Yes, that -- yeah, that would be helpful. Thank you.

A. When -- the primary responsibilities are intaking the referral and speaking to the catastrophic case manager, coordinating the on-site data collection on the residential property, formulating designs, creating cost estimate and plans for construction, contractor solicitation, and project management.

Q. And does this case management unit work with you on all of your cases?

A. Liberty Mutual and Travelers Insurance, they are the two primary clients, and they've been clients since 2007. From time to time,

I will get additional referrals from other secondary workers' comp insurance carriers.

Q. And, Mr. Anderson, did the catastrophic case management unit provide assistance with your report on --

A. No.

Q. -- Mr. Peterson?

A. No.

Q. Did they provide any recommendations in the case of Mr. Peterson?

A. No.

Q. Can you describe what types of individuals you work with through the catastrophic case management unit.

A. In general, catastrophic case management unit handles varying levels of spinal cord injured workers, traumatic brain injury, amputees. They usually have multiple amputees. And then you'll have some miscellaneous diagnoses, but those are the three primary diagnoses.

Q. And other than Mr. Peterson, have you ever worked with any clients who have Parkinson's disease?

A. The only -- no, but I would like to note that my mother was diagnosed with Parkinson's

in 2012 and she died in 2022, and so I have experience working with her and her disease prognosis through Parkinson's.

Q. Now, switching gears just a little bit from your CV, Mr. Anderson, have you ever held any teaching position in the area of housing assessment or feasibility?

A. No.

Q. Have you ever given any lectures or seminars in the area of housing assessment or feasibility studies?

A. Yes.

Q. Where were those lectures or seminars given?

A. They're usually through legal or healthcare association conferences. So throughout the years -- I can't tell you off the top of my head how many I've given, but I've presented to workers' comp and legal and healthcare association seminars or conferences.

Q. Generally do you recall the content of any of these lectures or seminars?

A. It is based on universal design and accessible housing.

Q. And is that the only topic for your

lectures and seminars?

A. Included in that would be assistive devices, so that's additional probably to that.

Q. And have you ever published any articles, papers, books on housing assessment or feasibility studies?

A. I have not published them myself, but I have been covered in magazines and different publications for this type of work.

Q. Do you recall the title of any of those magazines or publications?

A. Not off the top of my head. Ultimate Home Designs in 2008 was a magazine on universal design presentation on aging in place, and then different newspaper articles and publications over the years.

Q. And was the topic of those publications and newspaper articles related to universal design?

A. Yes.

Q. Were there any topics in those publications other than universal design?

A. No.

Q. Now, Mr. Anderson, you don't have a medical degree; correct?

A. Correct.
Q. And you have no education relating to Parkinson's disease; correct?
A. Correct.
Q. And you have no education relating to movement disorders generally; correct?
A. Correct.
Q. And you are not licensed to practice medicine; correct?
A. Correct.
Q. You are not a licensed physical or occupational therapist; correct?
A. Correct.
Q. Would you agree with me that you are not a medical professional?
A. Yes, I agree.
Q. Would you also agree that you are not qualified to offer an opinion on Mr. Peterson's medical care related to Parkinson's disease?
A. I agree.
Q. Would you also agree you are not qualified to offer an opinion on Mr. Peterson's medical care costs related to his Parkinson's disease?
A. I agree.

Q. Thank you, Mr. Anderson.

Switching topics again, have you ever served as an expert in a prior case before?

A. Yes.

Q. How many cases total?

A. I think my first was in 2010. I would say I have completed 15 to 20 expert reports similar to this.

Q. And do you recall the names of any of those cases?

A. Not off the top of my head.

Q. And do you recall the party for whom you were serving as an expert in any of those cases?

A. I -- I provide services both on the plaintiff and the defendant side. I don't remember names off the top of my head.

Q. Do you recall the last time you served as an expert?

A. Probably within the last 12 months.

Q. And in that case, did you draft an expert report?

A. Yes.

Q. And did you submit any affidavits or declarations to the court?

A. No.

Q. And in that case, did you testify at a deposition?

A. No. They didn't require a deposition.

Q. And did you testify at trial?

A. No.

Q. Were any of your opinions excluded by the court?

A. Not that I'm aware of.

Q. And if you can, Mr. Anderson, in this case that we're talking about right now, do you recall your opinion in that case? Was it a housing feasibility study?

A. Yes. It was an existing house that needed to be modified with universal design to accommodate accessibility.

Q. And how did you first learn about the matter with Mr. Peterson?

A. I receive a phone call, a voice message from Kay Peterson [sic] explaining that she had a referral for me, and that's how I learned this.

Q. And was Kay Peterson the first person who contacted you about working on this matter?

A. Yes.

Q. When you were contacted, were you

asked to do anything specifically for this case?
A. No. Just to assess the house.
Q. And at that time, what information were you provided with?
A. Kay Hairston just left a message saying that she had a referral and provided the attorney information.
Q. And when were you formally retained as an expert in this case?
A. I think -- I don't know off the top of my head. We provided the engagement agreement. I'm going to say sometime in September, early October.
Q. September or October of what year?
A. 2024.
Q. And did you write your report in this case before you were formally retained?
A. No.
Q. Did you speak with counsel at all prior to being formally retained?
A. No.
Q. And other than Kay Hairston, did you speak with any other -- any other individuals before being retained?
A. No.
Q. Do you recall who retained you in this

case?

A. I believe it was Leslie.

Q. And have you received any compensation in connection with your work in this case?

A. Yes.

Q. Do you know how much you've been paid to date?

A. I think roughly $3,200. The invoice was submitted.

Q. And how do you charge for your services as an expert?

A. Hourly.

Q. How much do you charge per hour?

A. It depends on the -- the client, but roughly 200 to 350 an hour, depending on the service.

Q. Can you go into detail about what impacts the difference between charging 200 an hour versus 350 an hour?

A. It's primarily fieldwork compared to desk work.

Q. I know this might be obvious, Mr. Anderson, but can you describe desk work versus fieldwork.

A. Fieldwork would be anything that

requires me to travel outside of the office. Desk work would be work in the office at my desk.

Q. And is $200 per hour the minimum you charge?

A. Yes.

Q. And how do you keep track of your time?

A. I have a passive -- a passive timekeeping system called Timely that sits in the background of my computer and then also a GPS for any type of travel.

Q. And are you reimbursed for any expenses or costs associated with your work?

A. Drive time and mileage.

Q. And is your compensation in this matter in any way dependent upon the outcome of the case?

A. No.

Q. And the rate you're charging in the case of Mr. Peterson, is this the same rate you would charge for other similar work?

A. To Liberty Mutual and Travelers, no.

Q. Would you say that this is lower or higher than what --

A. This is higher due to the volume and

the scope of work compared to the work with workers' comp cases.

Q. And do you know the percentage of your annual income that is earned from performing expert services?

A. Probably 2 percent.

Q. And do you recall what percentage of your annual income from 2024 was earned from work you did on this case?

A. You're speaking about this case in particular?

Q. Yes.

A. It's very nominal. I'm not even sure.

Q. So is it just the 3,200 that you mentioned?

A. Yes.

MR. TURNER: I'm now going to share what I'm marking as Exhibit 4 in the chat.

Counsel, can we go off record?

MR. LEHMAN: Of course.

MR. ROMANO: Yes.

VIDEOGRAPHER: Going off video record, 10:44 a.m.

(Recess taken.)

VIDEOGRAPHER: Back on video record,

10:49 a.m.

MR. TURNER: For the record, I'm now dropping what I'm labeling as Exhibit 4 into the chat, and I will be sharing my screen with that as well.

(Whereupon, Exhibit 4 marked for identification.)

BY MR. TURNER:

Q. Mr. Anderson, can you see the document that I'm currently sharing on the screen right now?

A. Yes.

Q. Do you recognize this document?

A. Yes.

Q. Mr. Anderson, I'm scrolling to question 2 -- or response number 2 in this document, for the record -- for the record.

You spoke with Edgar and Lori Peterson on September 20, 2024; correct?

A. September 21st, I believe.

Q. And was this the first time you had spoken with the Petersons?

A. Yes.

Q. And you met with them again on December 10th of 2024; correct?

A. Yes.

Q. And were these meetings conducted remotely?
A. Yes.
Q. And during these meetings, you used a software program called Chief Architect to take notes; correct?
A. Yes.
Q. Did you take any notes during that meeting?
A. Not at that time. This was an introductory phone call to let them know who I was and what I would be doing and to have them -- answer any questions that they had for me.
Q. And after that December 10, 2024, call, did you speak with the Petersons again?
A. I referenced the September 21st -- or 20th meeting in what I just answered. I spoke to them again -- I met with them again on December 10th. Those were the only two times that I had any interaction with them.
Q. And did you take any notes during either of those meetings?
A. Just I made notes in Chief Architect on the canvas.
Q. And were those notes completely

incorporated into your report?
A. They weren't incorporated. They were considered.
Q. Did you speak with any of Mr. Peterson's treating physicians in this case?
A. No.
Q. Mr. Anderson, Mr. Peterson's home address is 1509 Goodbar Avenue, Memphis, Tennessee 38104; correct?
A. Yes.
Q. And this is the property that is the subject of your report; correct?
A. Yes.
Q. In addition to meeting remotely with the Petersons, you also conducted a virtual tour of the property?
A. Yes.
Q. Do you recall when you virtually toured Mr. Peterson's property?
A. I -- I virtually toured the property all throughout the assignment.
Q. And who was part of that tour?
A. No one but myself. It was a LiDAR scan of the property. So a virtual tour or tour, I think, is used loosely here.

What this is is it is a LiDAR scan that allows you to go through the property, and so that is available 24/7 and in the cloud, so I have access to it at any time. So I made multiple tours of the property during the assignment.

Q. And did the LiDAR scanning or tour require any physical equipment in the Peterson home?

A. Yes.

Q. And what equipment was required?

A. It was a camera.

Q. And who controlled the camera during these LiDAR scans?

A. I would like to correct the record. I did hire a -- a local representative that had a camera and -- they have the camera and the technology, and they went on-site and they scanned the property.

Q. Do you recall the local representative's name?

A. Not off the top of my head.

Q. Do you recall the organization that the local representative worked for?

A. Not off the top of my head.

Q. And was that representative the sole controller of the device used to scan the Petersons'

home?

A. Yes.

Q. In part of this scanning, you used Matterport technology; correct?

A. Yes.

Q. What does Matterport technology collect during LiDAR scanning?

A. I don't understand the question.

Q. Apologies, Mr. Anderson. I'll try and rephrase.

The physical camera --

A. Um-hum.

Q. -- you -- employs Matterport technology; correct?

A. Yes.

Q. What data does it collect when you're doing a scan of a person's home?

A. So LiDAR will -- the LiDAR technology will send an infrared beam out to the surfaces, and it goes to the surface and comes back and creates a 3D model of the environment.

Q. And does the camera use, employ technologies other than LiDAR for the purpose of scanning someone's property?

A. No. The camera just has to be a 360

camera, and when you upload it to Matterport, they convert it to the LiDAR scan.

Q. Is that the only requirement for the camera?

A. Yes.

Q. And other than the LiDAR scanning that you just mentioned, did you also conduct a physical tour of Mr. Peterson's property?

A. No.

Q. Why not?

A. For the purpose of this report, there was no need to do that because the LiDAR scan provides all the information I need on the measurements of the house. This is a technology that I use day to day with all my projects.

Q. And is it the industry standard to only perform LiDAR tours of properties you provide feasibility and projected costs for?

A. Depending on the location, yes. If it is -- if it is local to Baltimore and I can drive within an hour or two, at times I will perform an on-site, but for the sake of time and cost, the LiDAR scan is sufficient.

Q. Is location the only factor you use when determining whether or not to conduct an

on-site tour?

A. No. Sometimes I -- my clients will require that I go on-site to understand maybe some of the more complicated case -- the family dynamics and, you know, specialized or -- you know, situations or issues that are going on with a project.

Q. And in the case of Mr. Peterson, did you request to physically tour his property?

A. No.

Q. Now, when you conduct your on-site tours, do you also -- do you make use of technologies other than LiDAR?

A. I will just use a tape measure to, you know, gather additional information maybe on their equipment -- maybe on -- on them, their reach and so forth, but on the house per se, LiDAR is sufficient.

Q. And just so it's clear, as of today, you have not been physically present inside Mr. Peterson's home; correct?

A. Correct.

Q. Mr. Anderson, I'm going to switch back over to Exhibit Number 2. This is your report, if you recall, and I will be sharing it on my screen. Can you confirm that you can see your report?

A. I can see my report.
Q. And does this report contain all of the opinions you have formed to date in this case?
A. Yes.
Q. Are you planning to form any additional opinions?
A. No.
Q. Looking at your accessibility section, did you perform an accessibility assessment regarding Mr. Peterson's disabilities?
A. An accessibility assessment? Can you ver- -- or can you elaborate on that, specifically what that means?
Q. Sure. Did you -- does your assessment account for Mr. Peterson's personal disabilities?
A. Yes, it's considered.
Q. And have you worked previously -- have you previously performed work for individuals with physically debilitating illnesses or injuries?
A. Yes.
Q. With Parkinson's disease?
A. No.
Q. How about with movement disorders?
A. Sure. The -- the catastrophic nurse assignments that I provided, some -- some of the

miscellaneous diagnoses are neurological in nature.

Q. And have you performed work for any individuals requiring wheelchair accessibility prior to Mr. Peterson?

A. Yes.

Q. What percentage of your work would you say falls within individuals with movement disorders?

A. 100 percent.

Q. And do you work with any doctors or medical professionals for these accessibility assessments?

A. No.

Q. Do you ever communicate with the client's doctor or medical care provider in any of your cases?

A. No.

Q. Do you engage with any medical professionals when determining accessibility modifications for a person's residence?

A. At times I will communicate with the catastrophic nurse case managers.

Q. In what instances will you communicate with those managers?

A. When there are questions or options in

regards to possible solutions.

An example would be maybe a tub transfer system that allows a spinal cord individual to transfer into a bathtub using a device that eliminates transfers, physical transfers. The chair transfers with an individual in it.

And the reason why I do this is because most of the time dwellings, apartments and houses, do not have a roll-in shower, and the cost to take out a tub and put in a barrier-free shower can be eliminated if certain pieces of equipment such as a tub transfer system is used.

So those are the types of discussions that I have.

Q. And in the case of Mr. Peterson, did you engage with any medical professionals when determining the accessibility modifications for his home?

A. No.

Q. Do you recall why you didn't engage with any medical professionals for that purpose?

A. When you -- when you practice universal design, universal design is a design that is usable by all people to the greatest extent possible without the need to further modify or

adapt.

So his -- his disease and the self-care falls under good universal design practice.

Q. Mr. Anderson, I'm switching to your residential accessibility portion of your report here.

Would you agree that there are not uniformly accepted codes for implementing accessible features in privately owned homes?

A. Yes.

Q. Would you agree that there are not uniformly accepted standards for implementing accessible features in privately owned homes?

A. Yes.

Q. Would you also agree with that without uniformly accepted codes and standards for privately owned homes and houses, you used universal design to implement certain accessible features in the Peterson home?

A. Can you repeat the last part? Certain features? Can you elaborate or ask differently on that.

Q. Not a problem. Mr. Anderson, I can rephrase.

So you -- as you mentioned, you agreed to a few things just there. Would you agree that without uniformly accepted codes and standards, you used universal design for Mr. Peterson's recommendations?

A. Yes.

Q. Who made the decision to use universal design?

A. That's my specialty and my area of expertise.

Q. And you may have elaborated on this a bit before, but how did you decide to use universal design in the case of Mr. Peterson?

A. Universal design by itself, the practice and the principles will allow Mr. Peterson to use the exterior and interior part of the house with good design without the need to specialize the design to accommodate specifically his disease of Parkinson's.

Q. Is there any authority that you're aware of that says universal design is appropriate when there are not uniformly accepted codes and standards?

A. It's -- I would say over the last 10 or five years, it has become an industry standard

for residential accessibility.

Q. Are you aware of any national or international standards that default to the use of universal design?

A. No.

MR. TURNER: For the record, I'm adding what I'm marking as Exhibit 5 to the chat, and I will be sharing my screen as well.

(Whereupon, Exhibit 5 marked for identification.)

BY MR. TURNER:

Q. Mr. Anderson, can you let me know when you can see the document I'm sharing.

A. Yes, I can see it.

Q. Do you recognize this at all?

A. I don't recognize this document per se. I do recognize the seven principles of universal design.

Q. I'm going to scroll through just to confirm each of these principles, so bear with me if it takes a little bit.

Is equitable use the first principle of universal design?

A. Yes.

Q. Is flexibility in use the second principle?
A. Yes.
Q. Is simple and intuitive use a third principle?
A. Yes.
Q. Is perceptible information the fourth principle?
A. Yes.
Q. Is tolerance for error a fifth principle?
A. Yes.
Q. Is low physical effort the sixth principle?
A. Yes.
Q. And is the final principle size and space for approach and use?
A. Yes.
Q. Thank you, Mr. Anderson.
Now, to you, what is universal design?
A. To me, universal design is -- as I mentioned, it is good design. The design itself is usable to all people to the greatest extent possible.
So in that example, universal

design -- I like to approach it from -- when I have a project -- I just mentioned usable by all people to the greatest extent possible.

The -- in my assignments, I will take an able-bodied individual that can walk without any disabilities. I will consider somebody that uses a wheelchair independently, manual. It could be somebody in a power wheelchair, and then a far extreme of this would be a home delivery service delivering an appliance to the house.

So that is a wide range of individuals with different abilities that are using a particular environment or product.

Q. Isn't that how others in your industry would define universal design?

A. I would assume so. I can't speak for others.

Q. And turning back to your report, in the Residential Accessibility section, you provide six items in a bulleted list. Would you say these are industry standard accessibility features?

A. As I noted, they're baseline.

Q. And when you say baseline, what are you referring to?

A. I -- I'm re- -- I'm referring to the

features that should be considered when trying to achieve or buy or modify a residential dwelling for individuals.

Q. And would your baseline and the principles of universal design -- how do you weigh one principle against another?

A. The seven principles that you mentioned, you -- when you come up with a solution in the design process, you want to be able to consider those -- those principles when designing a house or an exterior feature.

An example of that would be -- we'll say a sidewalk. Universal design is 42 inches. Some will say 36. I do 42. That can accommodate individuals that are walking by themselves, walking side by side, rolling an appliance along a sidewalk.

And the -- if you take the principles, which are, you know, equitable, it's useful to the users, flexible, it can -- you know, the design can accommodate the different target populations that I mentioned earlier.

It's intuitive, you know, to use the sidewalk rather than the grass, and perceptible. You -- it communicates the necessary information for somebody to use it.

Tolerance of error. That is if anything were to -- if a client or a user were to misuse the sidewalk, would it result in any type of -- of hazard or injury, and an example of that would be is if the sidewalk were poured and there is -- this happens a lot.

The sidewalk is poured. The forms are removed, and the sidewalk -- the finished level of the concrete is not at the same level as the ground, so there will be a dropoff. So universal design brings up the ground so it can tolerate error.

If you're not paying attention, the wheel of a wheelchair or the wheel of a dollied appliance doesn't fall off the sidewalk and down onto the -- the -- the ground. So that's an example of tolerate error -- error.

Low physical exertion is that there's little to no slope and there's size and space to use it.

So you take the seven principles of universal design and you implement them into all features of the exterior and interior of a house.

Q. And to the extent those principles conflict, how do you weigh one principle against the other?

A. You don't -- I don't know as if they conflict.

Q. Mr. Anderson, I am switching to the summary section of your report, which I believe is page 3. Is it your opinion that the estimated total cost for the recommended work is $289,000? Sorry. $289,979?

A. Yes.

Q. And when you say recommended work in this case, are you exclusively referring to the recommendations in your report?

A. Yes.

Q. And you also state that your estimate includes a 10 percent contingency for latent issues, change orders, and general exclusions from the cost estimate; correct?

A. Yes.

Q. And that 10 percent contingency equates to $28,998; correct?

A. Yes.

Q. Is this 10 percent contingency an industry standard?

A. Yes.

Q. Have you ever used a contingency other than 10 percent?

A. Yes.

Q. In what cases would you use a contingency other than 10 percent?

A. Job -- specifically job site location, if it -- if it is rural, lack of contractor pool, if there are possibly known defects of the house that would require additional professional opinions from say an architect or a civil engineer. Those are -- those are some of the reasons why there might be an additional 10 percent.

Q. And have you ever used a contingency lower than 10 percent?

A. No.

Q. Now, Mr. Anderson, I think you alluded to some of these, but what are some of the latent issues that may occur?

A. During demolition, you will expose the insides of walls, so you might have mechanical -- mechanical systems in there. You might have some structural components in there, water damage, things that you -- you can't see.

And so once you expose the inside of the walls, you can definitively understand what needs to be done and the scope of work that is required to cure those problems.

Q. And as we sit here today, do you know whether any those latent issues will occur in the case of Mr. Peterson?

A. No.

Q. And even if they did occur, do you know whether they will actually account for the 10 percent contingency?

A. Can you ask that differently?

Q. If any of those latent issues were to occur, would they match the 10 percent contingency recommendation in terms of cost?

A. There's, I would say, an equal chance that it is under or over that amount.

Q. And I don't know if these are overlapping, Mr. Anderson, but what are some of the change issues that may occur?

A. As noted, you might need to hire specialized trades to fix a problem in a house, such as I have a case where we had to hire a structural engineer to come on-site.

The span -- once the ceiling was removed and the span of the ceiling rafters were exposed, you could see the length and the thickness and the -- the span was greater than the thickness of the -- of the rafters, so additional work had to

be done in fortifying the structure, and so it's the additional expense and cost for the professionals.

In that case, you had to get a stamped document.

Q. And as we sit here today, do you know whether any change issues will occur in the case of Mr. Peterson?

A. To tell you the truth, I contemplated more than 10 percent, and the reasons why I thought about that or considered it was that the house was built in 1912, and if you look at the Matterport tour, you can see that there are 10-foot ceilings, and it's just unknown what is in the walls and if additional work would be required to bring it up to code.

Sometimes a jurisdiction requires the mechanical systems of a house to be brought up to code even if it's not in that particular part of the house that's under construction.

Q. But as you mentioned, at the moment, that is one unknown for Mr. Peterson's home; correct?

A. That is unknown.

Q. And even if some of these change issues did occur, do you know whether they will

actually -- will they -- whether they will equal or exceed the 10 percent contingency?

A. As I noted, I would say it's the same percentage, that it would be less or more.

Q. And to date, have you identified any latent issues in your recommendations for Mr. Peterson's home?

A. No.

Q. Have you identified any change orders to date in your recommendations for Mr. Peterson's home?

A. No.

Q. And have you identified any general exclusions to date in your recommendations for Mr. Peterson's home?

A. No.

Q. Now, Mr. Anderson, your report also recommends an additional 10 percent contingency; correct?

A. Yes.

Q. And the dollar value corresponding with that contingency is again $28,000 -- or sorry -- $28,998; correct?

A. Yes.

Q. And this is to account for historical

preservation compliance, to include additional professional services and material upgrades not known at this time; correct?

A. Correct.

Q. Is this additional 10 percent contingency an industry standard?

A. A contingency -- a 10 percent contingency in general is, I would say, an industry standard.

This is -- as I noted, this is for the historical review by the different associations that are associated with the modifications to the exterior part of the house which would more than likely require professional services and review of upgraded materials.

Q. Outside of historical review, were there any other factors that led you to include an additional 10 percent contingency?

A. No. Just I came up with that in my opinion after reviewing -- I believe it was a 75-page document on architectural guidelines by the historical association.

Q. And at this time, do you know whether you will encounter any historical preservation compliance issues with Mr. Peterson's property?

A. This -- no.
Q. And do you have any idea as to whether additional professional services will be required for the recommendations to Mr. Peterson's property?
A. It's reasonable to assume that there are going to be required drawings to be reviewed because you would have a load-bearing structure.
Q. Any additional professional services beyond drawings?
A. You might need a civil engineer based on setbacks and also water runoff based on concrete work.
Q. Now, Mr. Anderson, in your report, you also mention that there may be material upgrades not known at this time in your final paragraph; correct?
A. Yes.
Q. Are there any material upgrades you did not recommend in Mr. Peterson's case?
A. Can you rephrase that?
Q. Sure. Apologies for...
Are there any material upgrades that you would recommend in the case of Mr. Peterson?
A. No, but they're unknown at this time.
Q. So, Mr. Anderson, then is it fair to say that when we look at the 10 percent contingency

and the 10 percent additional contingency that at least 20 percent of the projected cost of this project is uncertain to occur as of today?

A. Correct.

MR. TURNER: Mr. Anderson, we've been going for over an hour. I know we took a short break. I'd like to take a 10-minute one if that's okay with you.

THE WITNESS: That's fine.

MR. TURNER: Counsel, can we go off the record?

MR. ROMANO: Yes.

VIDEOGRAPHER: Going off video record, 11:25 a.m.

(Recess taken.)

VIDEOGRAPHER: Back on video record, 11:35 a.m.

BY MR. TURNER:

Q. Mr. Anderson, earlier in the deposition, you mentioned that the technology and equipment used to conduct a scan of Mr. Peterson's home was LiDAR based; correct?

A. Yes.

Q. And just for my own edification on this, is Matterport the type of LiDAR or the

software used to support the LiDAR?

A. It's the software. They -- they render the scan into a usable product and files.

Q. And this LiDAR scan, again, was conducted via a camera; correct?

A. Yes.

Q. Do you know what the accuracy of the LiDAR used to scan Mr. Peterson's home is?

A. They say within 1 percent. This technology is worldwide used by architects and commercial construction companies for their projects.

Q. And does that 1 percent correspond to a distance or range?

A. The most useful part of Matterport technology is the ability to measure. So when you are touring Matterport, a Matterport tour, there is a tape measure, and you at any time can do custom measurements. The so the 1 percent is related to the actual measurements of the model.

Q. And does the LiDAR used to scan Mr. Peterson's home require any sort of calibration prior to use?

A. No.

Q. Are you aware of any sort of automated

calibration that Matterport employs for its LiDAR?
A. Not that I'm aware of.
Q. Do you know what resolution your LiDAR scanning equipment captures at?
A. No.
Q. In the case of Mr. Peterson's home, do you know how the LiDAR scanner is tracked?
A. I'm not sure I understand what that means.
Q. Let me clarify some. Do you know if the LiDAR used in Mr. Peterson's home was tracked using global navigation satellite systems?
A. No.
Q. Do you know if it was tracked using inertial measurement units?
A. No.
Q. And Matterport is a cloud-based system; correct?
A. Yes.
Q. And in the case of Mr. Peterson, did you use Matterport's mobile scanning application?
A. I don't know if there -- I don't know what you're talking about when you're saying mobile.
Q. Okay. Is there a specific application that's required to use Matterport on a camera?

A. No. There are cameras that are manufactured and sold by Matterport, and earlier -- I've been using this technology, I'm going to say, close to 15 years, and initially the technology required you to purchase a Matterport-manufactured camera, and over the years, I would say within the last five years, they allow third-party cameras to be used, and that's compatible with their technology.

Q. Thank you. That's helpful. Do you know what particular camera was used in the case of Mr. Peterson?

A. It was a Matterport Pro2 camera.

Q. And do you know if Matterport makes use of any artificial intelligence for any of its data processing?

A. I can't answer that. I'm not sure.

Q. Now, for the scanning of Mr. Peterson's home, how many LiDAR scans did you use in capturing the interior of his home?

A. I don't know off the top of my head. I'm going to say probably 50 to 60 scans.

In general, when you take a scan, the camera captures it into the software program, and then you move the camera approximately 5 feet. And

the important part of that is to make sure your next scan can see where the previous scan was, and if you go too far and it's misaligned, it won't capture the scan.

So it checks where it was previous to the scan before it scans and processes the next scan.

Q. And when you say misaligns, can you explain what you mean there?

A. Misaligned? I can't -- that's the -- that's the error that comes up on the screen, and the way -- from a nontechnical interpretation is that I went -- or the scanner went too far.

That happens when you're going through doorways from one room to another. It happens when you go too far.

So there's different things that can happen during the scan that will give you the misaligned error, and then in that instance, you just go back closer to the previous scan. Sometimes you have to go back within a foot or two and capture multiple scans.

Q. And just so I can wrap my head around all this, Mr. Anderson, so in the case of Mr. Peterson, the camera would capture or perform

about 50 to 60 scans, and then the device would need to be moved 5 feet to perform the next series of scans and so on and so on; correct?

A. Each scan would -- each scan takes place that's -- that's -- the camera goes around in a 360 circle and that is one scan, and then you move the camera 5 feet and that would be a second scan.

Q. And is that process pretty standard for your industry?

A. I would say, you know, the feedback I get from my clients, from Travelers and Liberty Mutual, anybody else that they use that would be my competition doesn't use this technology, and they find it very useful and effective in handling the claim.

So I think that's why I get an abundance of work and referrals from them is because of this technology.

Q. And the standard you used here for Mr. Peterson's home, you would use that in other similar homes; correct?

A. Yes. It's the same process and protocol that I follow on other referrals.

Q. Is any of the LiDAR scanning impacted by environmental factors?

A. Sunlight, that will cause a misalignment. When there are maybe a door that -- if you come into a room and you scan it and there's a closet door and the door moves, those are environmental factors that will cause a misalignment.

Q. Outside of those, are there any others that you're aware of?

A. No.

Q. And LiDAR can't see through solid objects such as walls or furniture; correct?

A. No.

Q. Mr. Anderson, I'm going to share my screen again, returning back to your report. Specifically I'm going to be looking at appendix D.

Are you able to see my screen, Mr. Anderson?

A. Yes.

Q. So appendix D of your report contains all of your opinions on the estimated materials and costs of construction for Mr. Peterson's property; correct?

A. Yes.

Q. And each of these lines represents an individual item; correct?

A. Yes, a -- a category. It could be an item. It could be a category.

Q. Okay. And how for each of these was the quantity determined?

A. From the LiDAR scan and the floor plan.

Q. Outside of the LiDAR scan and floor plan, were there any other factors that determined the quantity?

A. I think maybe some personal, you know, opinion or perception based on, you know, experience and visual clues that were -- that could be obtained from the LiDAR scan.

Q. And I may have missed this earlier. Forgive me, Mr. Anderson. Was LiDAR scanning used for the outside of Mr. Peterson's home as well?

A. The LiDAR scan -- there's a different technology for the outside because there's -- there's a 3 -- there's a 3D scan which, you know, as I mentioned before, it's -- it's a -- a ray that goes out, hits an object and comes back, that's 3D and that creates a LiDAR.

When you go outside, that 360 scan -- it's very difficult to have -- to make it work, so you can, but what I did in this case is a 360 scan,

which is just a visual scan and not a LiDAR or a modeling scan.

So there's two different scans. The inside of the house was the 3D LiDAR. The outside, because it's such a broad area, a large area without objects, it was a 360 scan.

Q. Okay. Gotcha. So for some of -- for the items in your appendix D that are outdoors, you would have used this 360 scan and maybe some documents relating to the house to determine some of the quantities; correct?

A. Yes.

Q. What does the wastage column in this appendix refer to?

A. Wastage is -- you know, for the very first thing, if I go down to the wastage, there's 5 percent concrete. That might be that you buy X amount of concrete, but you don't use it all. Because you typically buy more than what you need. So it's unused or wasted materials.

Q. And how did you calculate the wastage percentage -- percentages in this appendix?

A. That is -- it's provided by the cost data software. It's a recommended amount that's provided, and then you can -- you can override that

if you want, you know, based on experience, discretion.

Q. Are these -- for the wastage numbers or percentages that appear in the case of Mr. Peterson, are these standard to the software?

A. I would assume yes. I'm not sure, but they're more of industry standards.

Q. And I notice some of these items have a wastage percentage of zero. What's going on in those cases?

A. In those cases -- for example, you know, if you look at a door, line 12, there's zero percent there because the door doesn't have -- it's -- it's a -- fixed and a pre-hung. So it's an assembled product, so none of that product is wasted, compared to, say, maybe flooring, where you have a piece of floor that needs to be cut to fit a particular area.

Q. So the wasted percentage of zero is typically used when it's just a single item that doesn't need to be cut or modified?

A. Yes.

Q. And does wastage percentage impact the ultimate cost of an individual item in your appendix?

A. I'm sorry? What -- I missed that.
Q. Does the wastage percentage that you list for each item impact the ultimate cost of an item in your appendix?
A. It impacts the cost because you have to buy more material to accommodate the wastage to in this case install the floor so that -- so the wastage does have a direct effect on that.
Q. Is that -- is there a calculation that's performed to determine that total?
A. That's done within the program or established by industry standards or actually from experience as well.
Q. I'm going to switch to the unit material costs column now. For the items in this appendix, specifically looking at this column, are these costs calibrated to the local level?
A. Yes.
Q. So these are specific to Mr. Peterson's area as in Memphis, Tennessee?
A. Yeah, in addition to the -- the month and the year.
Q. And how does month and year impact the unit material cost?
A. If there is a -- a geographical

event -- sort of like this storm would be a great example -- labor to repair items is going to be scarce because there's a demand for it.

And also an example of that would be during COVID, pricing for lumber went very high because, again, the supply for the material was limited. So it's supply and demand based on geographical considerations.

Q. And for the individual items, how did you calculate or reach the unit material cost?

A. It's provided by the program.

Q. And did you use the values provided by the program in this case?

A. For the most part, yes.

Sometimes when you look at a line item, we'll just say an industry standard. Let's say a contractor who performs a decent amount of work, they -- they collect and maintain materials cost and also labor cost for particular items in the project, and when the -- when the cost estimate program comes back, sometimes you want to calibrate that based on historical project data or maybe something that is happening now.

Typically the program is updated every month, but maybe, like in this example, a storm

would impact cost today for a service that needed to be rendered, you know, within the next couple days.

Q. And do you know how the cost estimate program collects or sources these individual unit material costs?

A. They -- they particularly will go out to the market and price and calibrate their -- their expenses based on current market pricing at distributors.

Q. So they consult with multiple sources for materials for populating this value?

A. Yes.

Q. And in the case of Mr. Peterson, do you know when these costs were calculated or estimated?

A. December 2024.

Q. Looking now at the total material costs column, how are each of these calculated?

A. Looking at the material cost -- I'm trying to find which...

Q. It is the column right after --

A. The total material costs? Okay. I'm sorry. So it -- that takes into consideration the market rate for the product, times the quantity, times -- and then it considers the -- the wastage.

So in the example of number 12, a door, the door is 2,850, and it's got a zero waste, and the unit is one. So the material cost is -- it's just the math on that.

Q. And are there any sub-costs that are associated with the total material cost?

A. In some cases -- sub-cost, I'm not sure what you're referring to.

But let me just say for the -- for the example of the concrete, number 10, sometimes you'll have costs categories that include, say in this example, stone.

Usually when you -- good practice, industry practice for concrete is putting a stone base and then rebar. So in that example, that, I think, is what you're referring to.

There's subcategories of expenses under a description. Not all of them have it. It will provide you that information on a -- you know, on an item-by-item basis.

Q. Thank you, Mr. Anderson. I'm sure I did a poor job of explaining there.

Do you know if transportation, materials, and locations are included in that cost as well?

A. Yes.
Q. And do you know if these costs are current as of today?
A. These costs are current as of December 2024.
Q. And is that true for the unit material cost column as well?
A. Yes.
Q. For the unit labor cost column, how are those numbers populated?
A. They -- I'm not sure what their source are, but they will do a -- a study or an audit of local labor expenses. I'm -- I'm not sure if they have -- if they consult with a group or a pool of contractors, but they -- they calculate the -- the skill of the individual doing the job at the hourly rate and then the projected cost to do the -- the job, the service.
Q. And do you know if hourly compensation is included within the unit labor cost?
A. It is.
Q. And, again, that's not something you yourself came up with; right? That's populated by the cost estimate program?
A. Yes, that's -- that's populated by the

cost estimate program.

Q. And then I have a similar question for total labor cost. Do you know how that cost was calculated?

A. That is the -- that's the hourly rate times the quantity or the unit multiplied out into a total item cost.

Q. And for the total item cost, are there any additional factors that went into calculating that value?

A. I did mention that sometimes you -- a contractor will use his own -- his or her own data based on projects.

So at times you might want to override the labor cost based on the skill of your -- your worker, how efficient they are, and you -- you could at times override either, you know, the -- the amount of time or the hourly expense for labor.

Q. And does trade cost -- are those values calculated similar to the other ones?

A. Yes, it -- it -- it's an addition of the columns. So the trade cost on the general is $20,670.

Q. Is trade cost impacted by any changes in the other columns within your appendix?

A. Yes.
Q. Do you know which ones impact trade cost?
A. I'm just referring to what I previously noted that impacts trade cost, and that's geographical considerations in the area for materials and labors -- labor. That is what I understood the question to be.
Q. Now, in the case of Mr. Peterson, is this the most expensive in terms of total cost to accommodate the recommendations for his home?
A. Can you ask that differently? You -- you --
Q. Yeah, sure thing.
Mr. Anderson, is Mr. Peterson's total evaluation the most expensive evaluation you've ever provided to a client based on the recommendations?
A. No.
Q. Is Mr. Peterson's the cheapest?
A. No.
Q. Where would you say Mr. Peterson's total falls within your other clients in terms of total estimated costs for the recommendations?
A. I would say it's -- it's right on par. My projects will range -- I mean, you can see

something as low as 30-, $40,000 for a bathroom. That's an exception, but in general, the prices for my project usually are between 150- and $350,000.

Q. And do you know if you've ever recommended against home modifications because of the total estimated cost?

A. Yes.

Q. Do you know how many times you've recommended against this?

A. I can't -- I can't quantify it, but that happens when the cost to cure the barriers of a home might exceed the value of the home or substitute housing could be cheaper.

Q. Were there any rec- -- sorry. Were there any recommendations for Mr. Peterson's home that fell into this category?

A. No.

Q. And do you know if Mr. Peterson has begun construction or modification on his home, including any of your recommendations as of today?

A. Just clarify. You asked if any of these recommendations were -- were completed?

Q. If any of these projects have been started?

A. I'm not aware of that.

Q. And, Mr. Anderson, when you perform your home assessments and feasibility studies for your clients, do you ever factor in life expectency?

A. I do not.

Q. Do you know if the industry standard accounts for life expectency?

A. I'm not sure.

Q. Mr. Anderson, I'm switching to page 3 of your report. On this page, you state that all work on the property needs to be reviewed and approved by the Central Garden Association and Memphis Landmarks Commission; correct?

A. Yes.

Q. And why does all of this work need their approval?

A. There are statutes and codes in place for that area that these associations govern the work and monitor the work in that area, and they're also part of the permit process.

So if you're going to obtain a permit in this area, they're going to reference and make sure that these associations sign off on the work.

Q. And Mr. Peterson's home is located in an area that requires this type of approval; correct?

A. Yes.
Q. And do you know what the total cost to receive approval is?
A. No. That's what the contingency of the 10 percent in my report is.
Q. And do you have any prior experience working with historical districts, historical associations, and landmark commissions when it comes to remodeling?
A. From time to time, associations come up. I have worked on historical projects in the past. It's not very often.
Q. How many would you say you've worked on?
A. Probably a dozen.
Q. And that work and experience is what led you to conclude it's more expensive than remodeling a traditional home; correct?
A. Yes, there's additional steps and services and expenses associated with the implementation of the recommendations.
Q. Can you provide some detail on -- you know, in what ways those are more expensive than your traditional home?
A. Yeah, as I mentioned previously,

the -- the associations listed would -- would review the proposed modifications, and they may require civil engineer drawings or stamps.

In the example I gave you was runoff. If you're going to alter concrete or impervious surfaces that can't absorb the water, these types of -- of associations and historical districts want to monitor that, and that is just one example of -- of what -- of what is required above and beyond what a traditional project would entail.

Q. So you would agree that work performed on historical homes such as Mr. Peterson's property requires a lot more specificity than standard homes?

A. Yes.

Q. And this includes meeting more codes?

A. Yes.

Q. And generally would you say this includes more work?

A. Yes.

Q. Would you agree that this work is easier to perform in person versus remote?

A. The work that is required would be completed by local licensed contractors and professionals, so this work could not be done remote.

Q. Leading into that, Mr. Anderson, you just alluded to this too. Your report also states that the increased -- this increases the cost since licensed professionals are required for this process.

In this, what type of professionals are you referring to when you say licensed professionals?

A. Civil engineers, physical engineers.

Q. Are those the only two licensed professionals that you would include in this?

A. I am not -- I'm going to say yes, that's what I considered, but I am not actual -- I have never gone through the process itself through these associations, so I just have reviewed their -- their documentation online.

Q. Do you ever work with any historians or historical restoration or renovation contractors --

A. Yes.

Q. -- for this?

And are there specific licenses you're looking for them to have in these cases?

A. No. They're -- that would be governed by the jurisdiction that the work is being performed

in.

Q. And in your work, have you ever employed unlicensed professionals for similar processes or jobs?

A. No.

Q. Is there a situation where you would employee unlicensed professionals at all?

A. No.

Q. In the case of Mr. Peterson, do you know what the cost of using licensed professionals versus unlicensed professionals would be?

A. No.

Q. Now, Mr. Anderson, on page 1 of your report, you also state that all modifications of the house must comply with the architectural guidelines of the Central Garden Association and the Memphis Landmarks Commission; is that correct?

A. Yes.

Q. And you also provided a link to these guidelines; is that correct?

A. Yes.

MR. TURNER: For the record, I am now putting what I'm marking as Exhibit 6 into the chat, and I will be sharing it on my screen.

(Whereupon, Exhibit 6 marked for identification.)

BY MR. TURNER:

Q. Mr. Anderson, can you let me know when you can see the document on the screen.

A. I can see that.

Q. And have you seen this document before?

A. Yes.

Q. And have you reviewed it in its entirety?

A. Yes.

Q. I'm going to turn to numbered page 5 of this document, Mr. Anderson. It's page 12, if you're looking at the bottom. And can you see step 5 on the screen, Mr. Anderson?

A. Yes.

Q. And step 5 reads "Consider consulting Memphis Landmarks Commission staff before submitting a proposal. Scheduling a preliminary review with the MLC staff prior to creating drawings for final review is strongly recommended. Staff can help identify potential conflicts with the design guidelines. Again, doing so may help facilitate the review process."

Did I read that accurately?

A. Yes.

Q. Have you submitted a proposal with the CGA Landmarks committee as of today?

A. No.

Q. And your report also contains drawings of Mr. Peterson's property; correct?

A. Yes.

Q. And did you schedule a preliminary review with the Memphis Landmarks Commission staff prior to creating the drawings of Mr. Peterson's property?

A. No.

Q. Has anyone with the Memphis Landmarks Commission reviewed your drawings?

A. No.

Q. As of today, are you aware of any conflicts with your recommendations and design guidelines?

A. No.

Q. To the right of step 5, you see a drawing; correct?

A. Yes.

Q. And the caption for this drawing imagery is "Preferred drawing mechanically drafted

to scale. This drawing best conveys the character of the proposed work."

Did I read that correctly?

A. Yes.

Q. And are the drawings of -- in -- of Mr. Peterson's report in your report mechanically drafted to scale?

A. No.

Q. Now, Mr. Anderson, do you see step 6 on the same page?

A. Yes.

Q. I'll give you a moment to read it since it's rather lengthy. Can you let me know once you've finished.

A. I'm familiar with it.

Q. Have you completed and submitted an application packet to the City of Memphis at this time?

A. No.

Q. And have you received a certificate of appropriateness from the Memphis Landmarks Commission at this time?

A. No.

MR. TURNER: Counsel, I'd like to go off record.

MR. ROMANO: Agreed.
VIDEOGRAPHER: Going off video record, 12:14 p.m.
(Recess taken.)
VIDEOGRAPHER: Back on video record, 12:19 p.m.
MR. TURNER: Mr. Anderson, I just want to thank you for your time today.
Counsel, I have no further questions.
MR. ROMANO: I will have some questions.

EXAMINATION

BY MR. ROMANO:

Q. Mr. Anderson, how would you best describe your background and qualifications in terms of your movement into this area of specialization?

A. How would I describe my background?

Q. Yeah. In other words, what was it that brought you into this field?

A. I -- I started a -- a business called Allied Rehab Services where I would employ PT, OT, and speech, and I got up to 43 therapists, and I would contract them out to hospitals and we would provide services for home health services such as PT, OT, and speech in the home.

And the therapists would go in the home and issues would come up with the patients that would -- would involve modifications or work to their home to make it accessible.

So I got into out-of-pocket equipment, such as bathroom safety equipment, that is not covered by insurance that the patient would need.

So I started to sell with USA Rehab Medical supplies, such as bathroom safety equipment, and that -- that slowly progressed from 1998 all the way to when I started Accessible Housing Services.

So just being in the home, seeing the need, out-of-pocket expenses, things that would keep patients homebound sort of matriculated into this company and service I provide.

Q. And for how many years have you been working as a specialist in this particular field?

A. Informally since 1998, and I say informally because I would produce drawings or concepts.

The therapists would be in the home. Nurses would be in the home. I would be installing -- I would be setting up a power wheelchair.

Through the course of conversations,

they would ask me, you know, my opinion on how to get the wheelchair out of the house, and so I started doing drawings and, you know, napkin sketches, basically.

And so that sort of lit -- lit the candle or fuse to start pursuing this professionally, and that's what, you know, got me to the point where I am now and taking the classes and obtaining the licenses.

Q. You stated earlier in the deposition that you had been hired on numbers of occasions over the years as an expert in this field.

And did I understand you've been hired both by the plaintiff and the defense side in doing these assessments? Was that accurate?

A. Yes.

Q. In this particular instance, did you conduct an assessment to determine the feasibility and projected costs of necessary modifications for Captain Peterson's home?

A. Yes.

Q. And did you do that?

A. Yes.

Q. You rendered a report, and that is the report that we have attached to this deposition

already as an exhibit; right?

A. Yes.

Q. Earlier in the deposition, you were asked a few questions having to do with your -- your very own mother. Do you remember that?

A. Yes.

Q. Did your mother have a condition or disease?

A. Yes.

Q. What was that condition or disease?

A. She -- her primary diagnosis was Parkinson's and she had a secondary of dementia.

Q. Was there a time when you became a caregiver for your mother?

A. Yes.

Q. For how many years were you personally a caregiver for your mother, who had Parkinson's disease and dementia?

A. She moved in with me. I modified the main level of my house, my current house I live in now, to have a main level bedroom and bathroom so she had one-level living. That was in 2018, and she lived with me for four years, and she passed in 2022.

Q. During that four years and in your

experience with your very own mother, did you come to see and understand those items needed for your home in terms of feasible and necessary renovations because of the experience with your own mother's Parkinson's and dementia?

A. Yes.

Q. In terms of the steps that you took to make your evaluations in this case or your methodology for these assessments, would you briefly walk us through the steps you took once you were retained on the case in order to go step by step by step in order to assess this matter and render opinions.

A. Yes. The first step was meeting the Petersons virtually face to face through Zoom, introducing myself, explaining who I am, what I would be doing, the methodology, and asked them --

I talked to them about a gentleman coming in the house to scan the house and explained that process. It takes two hours, or roughly so, and asked them if they would have a problem with that. They agreed to that, and then I coordinated the scan of their house.

And then after the scan was completed, I started working on the project through the LiDAR

scan, independent of any -- any input from anybody, using my experience and my knowledge. I started to, you know, play with the space, we'll say.

I -- the goal was to create one-level living using the four walls of the main level and doing different configurations and considering how the changes might impact the ability of the caregiver and Mr. Peterson's safety and also marketability in resale of the house.

It was -- it's a very desirable community, from what I understand, and so I had to respect the house.

And so at that point I had a good idea of what was going on and the options. I then contacted the Petersons and I reviewed the Matterport tour. We virtually went through the house together.

I asked them their thoughts, their ideas just as a -- as a -- just being courteous. I like to give the -- the homeowner and patient and caregiver the ability to express their opinion and their desires.

They asked for things that I didn't think were, you know, reasonable. For example, they really wanted an addition on the back of their

house. That was their preference. They also wanted modifications to the second level, and I just, you know, told them that I would take notes on that.

And after that call, I actually called you at that point and said: John, I need some guidance here. I -- what they're asking for and what my recommendations are aren't going to be the same.

I -- they have unused space in the house that can be repurposed to meet his needs that doesn't affect resale value, and it's cost effective compared to an addition or an elevator. These are some of the things that they asked for.

You told me that it would be reasonable to work within the space and that -- we conferred that I was going to work within the four -- the four walls.

I put together a plan to create one-level living, and those are some of the documents in my report.

And it's important to note that this is a feasibility study. It -- these designs are to determine if it's actually appropriate and reasonable and feasible to create one-level living, and that's what I did.

And so I -- I concluded by saying: Okay, this is going to be, I think, a good representation of what this one-level living would look like. These are the changes that are needed, and then I then started to gather the cost involved with those feasible ideas to come up with a price that could be reasonably expected to be obtained from a licensed contractor to then implement those designs and construction.

Q. Was it important for you to factor in his physical needs, meaning Captain Peterson's physical needs, as a part of your work and assessment?

A. It's -- it's important to hear them and to ask them how they see bathing and grooming and getting into and out of the house.

But like I referenced, universal design, really if you implement that, he -- it pretty much eliminates the need for specific or specialized design.

And one thing I would like to note, John, in my CV, I -- in 2005-2006, I bought a house in Baltimore, Maryland, and I made it into a universal design house.

I took a -- just a small house. I

modified it, incorporated 70 features of universal design, and I operated that as a model house for over 10 years. During that time, it was a fully furnished house.

And so part of the feedback I wanted to get is -- I rented it to Johns Hopkins patients coming into Baltimore for spinal cord -- Christopher Reeve's doctor was very prominent down there.

And so I would have individuals with disabilities come in and live in this universal design house, and it was an incredible opportunity to get feedback because everyone's abilities were different.

They lived in the house. They stayed in the house up to a month. I was able to get really good feedback on what worked and what didn't work.

And for the most part, universal design accommodated ADLs, activities of daily living. They were able to get into the house, park, enter the house, get to all areas, use the bathroom, use the toilet, use the shower, use the -- use the laundry, use the kitchen, sit on the back deck, you know.

So I was able to get really good

feedback on universal design, and for the most part, when I asked them what would change, what were their difficulties, for the most part, they didn't have any.

So that is an illustration of how universal design can accommodate a wide range of people, regardless of diagnosis and -- and caregiver assistance, without the need to modify it for each individual or for the progression of the disease.

Q. The recommendations you're making for the Peterson home are recommendations which in your opinion are reasonable, necessary, and feasible?

A. Yes.

Q. You spoke earlier in the deposition about the software which allows you to conduct your analysis by not having to ever enter the home in person. Would you elaborate on that as to how it is that you do that.

A. Depending on the location, as I mentioned, I -- I don't know if I mentioned this, but I provide this service all throughout the US. At this point, after 20 years, I think I might have completed a project in every state. I even did one in Hawaii last year, and I completed a project in Alaska.

What I do is I hire a professional licensed business to go into the house, con- -- conduct the LiDAR scan.

The LiDAR scan creates an OBJ file, and I'm able to import that into my Design Architect program, and within a matter of a couple days, I can have the house -- they call it a digital twin -- be in my -- in my software, and I'm able to interact with the environment virtually through my computer, and this technology is extremely accurate.

What -- what happens is I will do a set of plans. They -- like in this example, they would be estimating plans. They're not construction plans; they're estimating plans.

And I will solicit bids from contractors for this -- this -- this work, and I will get feedback from the contractors about the plans, whether they were accurate or whether they weren't, and in -- in most cases, it's within a couple inches off.

And so to overcome that, when the contractor is hired, they will go on-site and do a preconstruction meeting with me, and I will share the architect program screen.

They will walk around the environment

with a tape measure, and we will calibrate the drawings to be sure that the drawings are construction ready, and so that's a process that takes some time to work through with different steps.

Q. Within your specialty, is it accurate to say that is the standard as to how these steps are taken when conducting that particular evaluation or analysis?

A. I would think, yes. I -- and I say I think because I'm not sure what other people do. There -- I don't know many competitors to me in the field of accessibility.

So what -- what is standard industry -- what is industry standard I think is provided to me on feedback from my clients when they say that, hey, this technology is great. We're there.

And it really brings the parties together because we're able to see and walk through the house virtually together as a group so everybody is on the same page, and not many people of my competitors do that.

Q. You mentioned earlier in the deposition when you were asked about taking notes

that in a certain fashion your notes are -- and I thought I heard you say "on the canvas."

A. Yes.

Q. First, is that you what said, first of all?

A. Yes, and I --

Q. Okay.

A. -- I said canvas referencing the program.

Q. Okay. Now, would you tell us what that means when you say there are notes, so to speak, and they are "on the canvas."

A. Okay. So when I open up the program and start, it's a blank file. It's like a -- almost like a piece of grid paper, we'll say, and I will make notes on that grid paper, and that's the screen, and that's what I call the canvas. And so that canvas is used for the drawings, and I will incorporate those notes into the drawings and the final product.

Q. Were the opinions which you have expressed in your report as well as the opinions which you are expressing here today in this deposition opinions within a reasonable degree of certainty in your capacity as an accessible -- an

accessible housing needs specialist?

A. Yes.

Q. Since this house was originally built back in 1912, what factors do you consider as a part of your assessment that are important because of the age of the original home?

A. Well, in 1912, the construction methods were vastly different, and so the one thing is there's plaster throughout the house, and that is a practice that is no longer current. It's now drywall.

Also the house has 10-foot ceilings. So rarely do you go into a residential house and see 10-foot ceilings.

So with the age of the construction, the methodology of construction, and some of the physical characteristics, such as 10-foot ceilings, those are things that need to be considered when putting together a cost estimate.

Q. You have spoken a good bit today about the principles of universal design. Did you, in fact, in this instance for Captain Peterson's home conduct your analysis and evaluation considering and factoring in the seven principles of universal design?

A. Yes.

MR. ROMANO: Thank you very much. Those are all the questions I have.

MR. TURNER: No further questions on my end, Counsel.

VIDEOGRAPHER: Please stand by. This concludes today's video deposition. Going off video record, 1:23:40 p.m.

MR. TURNER: Thank you.

COURT REPORTER: And then, Counsel, just before you guys hop off, will you just please indicate if you wish to purchase the transcript.

MR. TURNER: We -- our standing order is fine.

COURT REPORTER: Okay.

MR. TURNER: Yeah, just go with that.

COURT REPORTER: I'm sorry. I just have to have it on the record that you're ordering, yeah.

MR. TURNER: Yeah, that's fine.

MR. ROMANO: Yes, whatever the understanding is. I know yes, we are going to want a copy. If there's any change in that, Lisa, I'll call you within 30 minutes.

_ _ _

(Remote videotaped videoconference deposition concludes, 1:24 p.m.)

C E R T I F I C A T E

I, Lisa Taylor, Registered Professional Reporter and notary public certify:

That the foregoing deposition of Eric Anderson was taken before me at the time and place therein set forth at which time the witness personally appeared before me via videoconferencing and was duly remotely sworn or affirmed;

That the testimony of the witness and all objections made at the time of the deposition were recorded stenographically by me and thereafter transcribed;

That the foregoing deposition is a true record of the testimony and of all objections made at the time of the deposition.

I further certify that I am neither counsel for nor related to any party to said action, nor in any way interested in the outcome thereof.

My certification as to the accuracy of this transcript, if it has been reformatted or altered from its original form in any manner, is null and void.

In witness whereof, I have subscribed my name this 3rd day of February 2026.

ERRATA SHEET

Deponent: Eric Anderson
Date of Deposition: January 28, 2026
In Re: Camp Lejeune Water Litigation
INSTRUCTIONS TO THE DEPONENT:
In compliance with the Rules of Civil Procedure, a copy of your deposition is provided for your review and signature. Any corrections/changes to the deposition that you care to make are to be made on this sheet.

PAGE	LINE	CORRECTION/CHANGE &	REASON FOR CORRECTION/CHANGE

DEPONENT CERTIFICATE

I have read the foregoing transcript of my oral deposition taken on the date and at the location indicated on the title page of the deposition transcript and I certify that the said transcript is true and correct, with the provision that any corrections and changes appearing therein have been corrected/changed personally by myself by listing them on a separate sheet indicating the page number, line number, and content of correction or change.

I further understand that upon completion of the reading and correcting/changing of the deposition transcript that I am to sign this deponent's certificate in the presence of a notary public and then return this original deponent's certificate with my list of corrections/changes and the deposition transcript to the person so indicated to me by my counsel or the court reporter.

I further understand that if I do not carry out all of the above-mentioned instructions within thirty (30) days from receipt, I automatically waive my right to read and sign the deposition transcript and, thereupon, the original transcript can be filed accordingly.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

THE VIDEOGRAPHER: We are now on the record. My name is Zach Hone, I'm a videographer for Golkow, a Veritext division.

Today's date is February 23rd, 2026, and the time is 9:24 a.m.

This remote video deposition is being held in the matter of Camp Lejeune Water Litigation, Number 7:23-cv-897 v United States of America.

The deponent is Anirban Basu, Ph.D.

All parties to this deposition are appearing remotely and have agreed to the witness being sworn in remotely.

Due to the nature of remote reporting, please pause briefly before speaking to ensure all parties are heard completely.

Counsel will be noted in the stenographic record.

The court reporter is Mary Foley, who will now swear in the witness.

Whereupon,

ANIRBAN BASU, Ph.D.,

having been first duly sworn, was called as a witness herein and was examined and testified as follows:

E X A M I N A T I O N

BY MR. ANTONUCCI:

Q Great. Good morning, Dr. Basu. My name is Giovanni Antonucci, I'm an attorney for the Department of Justice, I represent the United States in the Camp Lejeune Water Litigation that's currently pending in the United States District Court for the Eastern District of North Carolina.

To get started, could you please state your full name, please?

A Yeah, it's Anirban Basu.

Q And could you please state your current address?

A My home address?

Q Could you please state your current business address, please, Dr. Basu?

A Yeah, it's 1959 Northeast Pacific Street, Box 357631, Seattle, Washington, 98195.

Q Have you ever had your deposition taken before?

A No, I have not.

Q Dr. Basu, you took an oath before we started this morning, correct?

A Yes.

Q Do you understand the nature of that oath?

A Yes.

Q The oath requires you to fully answer each question; if you're not sure of an answer or don't have a complete answer, you must still answer the question to the extent you can; do you understand?

A Yes.

Q A court reporter is taking down everything that we say. Because she can only record words, it's important that you answer her questions verbally. For example, you must say yes or no, rather than nodding or shaking your head, okay?

A Yes.

Q Please speak at a reasonably slow pace; I will do my best to do the same, and that's so the court reporter can get down everything we're saying; do you understand?

A Yes.

Q We should also try not to interrupt one another for the same reason. Please wait until I've finished my question before you start to answer, and I will wait until you are done answering my questions before speaking; understand?

A Yes.

Q Once the deposition is complete, you'll be given an opportunity to read a transcript of your testimony and make any corrections, and you will then

be asked to sign it; do you understand that?
A Yes.
Q Only you are testifying today, you must answer to the best of your ability, and you may not ask other people for their help; do you understand?
A Yes.
Q If you do not understand one of my questions, please let me know, and I will try to clarify. If you don't ask for clarification, I will assume you understood the question; is that fair?
A Yes.
Q During the deposition, you may hear other attorneys make objections. Unless the attorney instructs you not to answer the question, please answer the question after the objection has been made; do you understand?
A Yes.
Q Dr. Basu, is there any reason why you're unable to give your most truthful and accurate testimony today?
A No.
Q Is there any reason your memory might be impaired today?
A No.
Q Dr. Basu, you may ask for a break at any

time. Please don't hesitate to ask for a break. Just please make sure that any question I've asked is answered before we break; does that sound good?

A Yes.

Q Okay. Am I correct that you've been retained by the Plaintiffs' Leadership Group as an expert witness in the In Re Camp Lejeune Water Litigation pending in the Eastern District of North Carolina?

A Yes.

Q Approximately when were you hired?

A I don't recall the exact date, but it should be late in 2025.

Q And do you recall who hired you?

A I was approached by Ben here, who is sitting with me, and a few others from his group.

Q Okay. Prior to being retained, had you ever heard about Camp Lejeune?

A No.

Q Okay. So Dr. Basu, I'm going to be dropping some exhibits in the chat for you to see. You should take the opportunity to review the document and make sure you're familiar with it.

The first one I will mark for identification as Exhibit 1.

MR. VANSLYKE: Counsel, if I can just make a

quick objection for the record, I do want to note that -- so the Zoom was unilaterally noticed -- I'm sorry, the deposition was unilaterally noticed for Zoom, we've had discussions off the record, so I am in person.

Just so that you're aware, he does have unaltered copies of his report with him, so he has those physical in addition to anything you drop online.

MR. ANTONUCCI: Okay.

Q (By Mr. Antonucci) For the sake of consistency, and to make sure that I'm understanding everything, Dr. Basu, I ask that you use the copies I'm sharing with you in the chat; do you understand?

A Yes.

MR. VANSLYKE: I'll object to that as well. He is allowed to refer to his reports. He has copies of them with him. You're welcome to use the online version and direct him to things that you'd like to draw attention to in that format, but he is also welcome to use the physical copies in front of him.

MR. ANTONUCCI: All right. Are you done stating your objection?

MR. VANSLYKE: Yes.

Q (By Mr. Antonucci) Okay. Dr. Basu, I am sending you what I'm marking for identification as

Exhibit 1. This is the January 30th, 2026, Notice of Deposition and Subpoena. Please let me know when you're been able to open this.

I'm also, at the same time, going to share my screen.

Are you able to see my screen, Dr. Basu?

A Yeah.

Q Okay. Do you recognize the document that I'm showing you?

A Yes.

Q Okay. So I'll represent to you this is January 30, 2026, Notice of Deposition and Subpoena for your testimony.

I'd like to turn your attention to page eight. Are you able to see page eight, Dr. Basu?

A Yes.

Q Okay. So Request Number 8 -- excuse me, Request Number 7 of page eight of Exhibit 1 requests a copy of all publications, articles, reports, or studies you have authored or co-authored regarding Camp Lejeune; adjustment of incurred healthcare costs to current dollars or present value using a price index; and any other topics covered in your expert report. Did I read that correctly, Dr. Basu?

A Yes.

Q And you testified that you recognized this document earlier, right?
A Yes.
Q Have you seen this request before?
A I have read this request before.
Q Okay. And did you provide anything to your attorneys that are responsive to this request?
(Reporter seeks clarification.)
THE WITNESS: Yes, I have.
Q (By Mr. Antonucci) Okay. Did you provide --
THE REPORTER: I'm sorry, go ahead.
MR. ANTONUCCI: Thank you. I apologize.
Q (By Mr. Antonucci) Did you provide anything to your attorneys that was responsive to this request?
A I provided all the adjustments and my report regarding this case to my attorneys, and I believe that was submitted.
Q Okay. Other than the adjustments in your reports, did you submit anything else to your attorneys with regard to --
A I did submit my CV that had all the details of all the other work outside of the Camp Lejeune work that had been done with healthcare costs in the United States, and that was a long list of academic papers and work, and the CV was also submitted.

Q Okay. So apart from your reports and CV, did you submit anything else to your attorneys responsive to the request for production?

A No, I did not.

Q Okay. All right. Let's stop looking at this, I'm going to stop sharing my screen, and share with you another exhibit. This will be marked for identification as Exhibit 2.

And I will share my screen again and show you Exhibit 2. Are you able to see Exhibit 2, Dr. Basu?

A Yes.

Q Okay. Have you seen this document before?

A Yes.

Q Okay. And I'll represent to you that this is the Second Amended Notice of Deposition, which was sent on February 20th, 2026; is that correct?

A Yeah, yes.

Q I'm going to stop sharing my screen.

Dr. Basu, did you do anything to prepare for your deposition today?

A I did have conversations with my attorney.

Q Okay. Who are you referring to when you say your attorney?

A Ben and Jenna.

Q Okay. And how many times did you discuss

this deposition with your attorneys?
A Twice.
Q And approximately when were each of those discussions?
A One was last Friday and the other one was last Wednesday.
Q Okay. Did those take place in person or over Zoom or telephone?
A Over Zoom.
Q Okay. And approximately how long did you speak to them for on each occasion?
A It was about one hour in each case.
Q And was anyone else present during either of those meetings?
A During the first meeting, both Ben and Jenna were present; in the second meeting, only Jenna was present.
Q Did you review any documents to prepare for your deposition?
A I reviewed my own reports that I prepared.
Q Other than your reports, did you review any other documents to prepare for your deposition?
A No.
Q Have you reviewed any of the other depositions taken in this case?

A No.
Q Dr. Basu, you previously mentioned you've never testified in a deposition. Have you ever testified at trial?
A No, I have not.
Q Have you ever testified in an arbitration?
A No.
Q Have you ever testified in a mediation?
A No.
Q Okay. Have you ever prepared an expert report prior to the one in this case?
A I had been retained a couple of times regarding healthcare cost damages, I have prepared reports as an expert witness, but I believe that none of those reports were used in the cases.
Q Okay. Do you recall the names of any of the cases in which you were retained as an expert witness?
A I don't recall the exact names, but one was regarding smoking and the other was regarding opioid use.
Q Do you recall the jurisdictions that those cases were pending in?
A The opioid use was Washington state; the smoking case was national.
Q And let's talk first about the smoking case.

Were you retained as an expert by plaintiffs or defendants in that case?

A We were -- I was retained by the government side.

Q Okay. And what was the nature of the smoking lawsuit; do you recall?

A It was mostly trying to estimate damages related to smoking.

Q And for the opioid case, do you recall whether you were served -- you served as an expert for plaintiffs or defendants?

A It was again I was working with the state attorney general.

Q Okay. And in the smoking case, did you calculate the present value of past medical services?

A I did.

Q And in the opioid case, did you also calculate the present value of past medical services?

A I was not -- we didn't go there. We had discussions about how to calculate that, but I was not asked to actually calculate that, those values.

Q Why were you not asked to calculate the past value -- or the present value of past medical services in your opioid lawsuit?

A I'm not exactly sure why, but it ended more

quickly. We had -- we had a few discussions, and then that's about it.

Q Did you present the value of past medical services in -- in another format, other than current dollars?

A No, all damages that I calculated, or even I discussed, were in terms of present value.

Q Okay. Have you ever been involved in any personal litigation, so not serving as an expert?

A No.

Q And when did you first begin serving as an expert witness?

A I think the first one would be -- I don't recall the exact year, but it might be 2014, 2015.

Q Okay. And was that for the smoking case or the opioid case?

A Yes, the smoking case.

Q And approximately when was the opioid case?

A About 2018.

Q And other than the smoking case in 2014 and the opioid case in 2018, have you otherwise served as an expert witness in any litigation, arbitration or mediation?

A No, I have not.

Q Dr. Basu, does your payment depend on the

outcome of this case?

A No, it does not.

Q Do you know how much you have billed to date?

A Yes.

Q How much have you billed to date, Dr. Basu?

A I have billed $31,050, I think.

Q I think -- I think it might be 31,125; does that sound right?

A Yes. Yeah, yes, yes.

Q Okay.

A Yeah, yeah.

Q Is your fee schedule in this case the same as fee schedules used in other cases?

A Yes.

Q Okay. All right. Give me one moment, I will introduce a new exhibit.

MR. ANTONUCCI: Okay. I have shared in the chat what I will mark for identification as Exhibit 4. I will now share my screen to show the witness Exhibit 4.

Q (By Mr. Antonucci) Dr. Basu, are you able to see Exhibit 4?

A Yes.

Q This is Exhibit 3, my apologies.

A I'm sorry, yeah. Yes, Exhibit 3.

Q So to be clear, this exhibit, Exhibit 3, this is a copy of your expert report, and I have appended to the end a copy of your Materials Considered list; do you see that, Dr. Basu?

A Yes, I do.

Q So Dr. Basu, you agree that this is the expert report you've disclosed in the Camp Lejeune Water Litigation, correct?

A Yes.

Q And have you read this report in its entirety?

A My own report, yes.

Q Okay. Did you draft this report yourself?

A I did.

Q Did you have the assistance of folks other than attorneys in drafting this report?

A No.

Q And do you agree with all of the opinions and statements made in this report?

A Yes, I do.

Q Okay. I'm going to turn to the last page of Exhibit 3.

A Mm-hmm.

Q The title on this page is Anirban Basu Materials Considered, January 20, 2026, Expert Report

of Anirban Basu, Ph.D. Do you see this Dr. Basu?

A Yes, I do.

Q Is this a fair and accurate copy of your Materials Considered list?

A Yes.

Q And does this Materials Considered list include all of the documents, articles, and materials you reviewed when preparing your report?

A Yes.

Q Okay. Is there anything you considered in rendering your report that is not included on this list?

A I don't think so.

Q Okay. This question pertains to all of Exhibit 3, your entire report. Is there anything in this report that you believe is incorrect?

A No.

MR. VANSLYKE: Objection. Counsel, I think you just haven't scrolled this far, but just to confirm, does this include the appendices or no?

MR. ANTONUCCI: Yes, I'm happy to scroll and show you, but Appendix A is present, as well as Appendix B, which is Dr. Basu's CV. And I believe Appendix C is the list of prior testimony.

MR. VANSLYKE: Okay. So this -- this version

does not include the amended appendices, only the original; is that correct?

MR. ANTONUCCI: No, my apologies. Thank you, Ben. The amended appendices are included in this version as well. They replaced the original appendices. Thank you for pointing that out.

Q (By Mr. Antonucci) Does that make sense, Dr. Basu? Do you understand what I've done here?

A Yes.

Q Okay. So I'll ask the question again. Is there anything in Exhibit 3, which is your report and updated appendices, that you believe is incorrect?

A No.

Q Is there anything in Exhibit 3 that you believe needs to be updated?

A No.

Q And does Exhibit 3 contain a complete statement of all of the opinions you will offer to the court?

MR. VANSLYKE: Objection.

THE WITNESS: So far -- sorry. So far, this is all the opinion that I've offered.

Q (By Mr. Antonucci) Okay. What opinions are not included in Exhibit 3, Dr. Basu?

A Well, I have not been asked to provide any

other opinion at this point, so but if my lawyers do ask me to provide other opinions, I'll be happy to do so.

Q Understood. Okay. I would like to turn to -- this is page 39 of the PDF, December 2025 curriculum vitae that you disclosed; do you see this?

A Yes.

Q Okay. And this document is titled Curriculum Vitae, Anirban Basu, right?

A Yes.

Q Is this a complete and accurate copy of your current resume?

A Yes.

Q Is there anything that you need to change or add to this resume?

A No. I mean, I had a new publication, but that's okay.

Q Okay. Dr. Basu, you have a bachelor's in pharmaceutical technology from Jadavpur University in India, correct?

A Yes.

Q And you received that degree in 1995, right?

A Mm-hmm, yes.

Q You also have a master's in pharmaceutical sciences from the University of Toledo in Ohio, right?

A Yes.
Q And you received that degree in 1997, correct?
A That's right.
Q You have master's in biostatistics from the University of North Carolina, Chapel Hill, right?
A Yes.
Q Which you received in 1999, correct?
A Right.
Q You also have a Ph.D. in public policy with a concentration in health economics from the University of Chicago, right?
A Yes.
Q And you received that degree in 2004, correct?
A Yes.
Q Doctor, you currently serve as the Stergachis Family Endowed Director of the Comparative Health Outcomes Policy and Economics Institute at the University of Washington, right?
A Yes.
Q And you've been in that role since 2017, correct?
A Actually, 2015.
Q Okay, thank you. So you are compensated at

an hourly rate of $500 per hour for your work on the Camp Lejeune matter; is that right?

A Yes.

Q Dr. Basu, do you have a Doctor of Pharmacy degree?

A I do not.

Q Are you a pharmacist?

A I am not.

Q Are you a pharmacy technician?

A No.

Q Have you ever practiced as a pharmacist or pharmacy technician?

A I have not.

Q Do you hold yourself out to be an expert in pharmacy?

A Pharmaceutical economics, but not clinical pharmacy.

Q Understood. Do you have a law degree, Dr. Basu?

A I do not.

Q Are you a licensed attorney?

A No.

Q Do you hold yourself out to be a legal expert?

A No.

Q And do you have a medical degree?
A I do not.
Q Do you hold yourself out to be a medical expert?
A I do not.
Q Okay. Dr. Basu, what was the scope of your assignment for the Plaintiffs?
A I was asked by my lawyers to review Gregory Russo's approach to calculate reasonable values corresponding to the deemed related healthcare equalizations for the Plaintiffs. I did not review or had any opinion on what equalizations were deemed related.
Q I'm going to stop sharing Exhibit 3 for a moment.
So Dr. Basu, just to be clear, Gregory Russo is one of United States's experts; is that your understanding?
A Yes.
Q Okay. And you authored a report on the methods used by Mr. Russo to determine the reasonable value of past medical services rendered to Bellwether Plaintiffs in the Camp Lejeune litigation; is that correct?
A Yes, yes.

Q Okay. And you are not offering an opinion on whether the water at Camp Lejeune may have led to any Plaintiff's development of any disease, correct?
A Yes.
Q You are not offering any opinion on whether any medical service rendered to a Plaintiff should be considered related or not related to any Plaintiff's condition, correct?
A Yes.
Q You did not review the medical records associated with claimed amounts, correct?
A Yes.
Q You did not check to see whether claims were double billed, correct?
A Yes.
Q You did not analyze the accuracy of any medical billing data, correct?
A Yes.
Q You did not evaluate whether up-billing was present in any of the Plaintiffs' medical bills, correct?
A Yes.
Q You did not check Plaintiffs' medical billing data for any evidence of fraud, correct?
A Yes.

Q You are not providing an opinion on the reasonable value of future medical care in any Plaintiff's life care plans, correct?
A Yes.
Q And you did not perform a cost-effectiveness analysis in this case, right?
A Yes.
Q And for the record, cost-effectiveness analysis is a form of economic evaluation that assesses health outcomes and costs of interventions designed to improve people's health; is that right?
A Yes, but it also is used to actually evaluate a specific technology or a treatment.
Q Okay. And that information is then used to inform decisions about resource allocation; is that right?
A Resource allocation and also pricing of those technologies.
Q And just so that I make sure I'm clear, that is not the analysis you performed for your report in this case, correct?
A No, I have not looked at any effectiveness side.
Q Okay.
A I've only looked at the cost side.

Q Understood. I'm going to share my screen and show you Exhibit 3 once again. This is Exhibit 3, page ten. Are you able to see this, Dr. Basu?

A Yes.

Q Okay. In the -- in the first sentence of the last paragraph on page ten of Exhibit 3 --

A Mm-hmm.

Q -- you wrote, I express these determinations with a level of confidence customarily applied in my field and with a reasonable degree of professional certainty. Did I read that correctly?

A Yes.

Q What is the level of confidence customarily applied in your field?

A I'm not exactly sure what -- what you're asking. If you could rephrase it?

Q Sure. You wrote here that you expressed these determinations with the level of confidence customarily applied in your field, right?

A Let me -- oh, yeah, yeah, okay, I'm looking at -- yes. Yes, so this would be the level of confidence that's customarily applied is a level of confidence that would allow you to present my opinion that would be approved in a peer-reviewed academic journal, and also be accepted by, you know, other

experts in the field in terms of peer reviews.

Q Understood. And what does reasonable degree of professional certainty mean?

A I think, from my point of view, it's -- it's something that I can be confident in presenting to a peer group and explain why I followed certain principles or certain methods, which I can -- I am convinced that I can -- I can actually do a good job in making most people accept what I have done.

Q Okay. I'm going to turn now to page four of Exhibit 3. Are you able to see page four, Dr. Basu?

A Yes, I am.

Q Okay. So under subheading three, Summary of Opinions --

A Mm-hmm.

Q -- the first bullet point states, It is appropriate to apply reasonable value calculations to determine the value of past medical expenses because transactional prices in the United States healthcare market do not accurately reflect the true reasonable value of those services. Did I read that correctly?

A Yes.

Q What is a reasonable value calculation?

A The reasonable value calculation is what you would have incurred on average if -- if you randomly

picked, in this case, a private insurance company in the United States, on average what you would have paid for it.

Q Okay. In your opinion, is the willing buyer/willing seller approach a reliable methodology for calculating the reasonable value of past medical expenses?

A Not in the United States, because there is no real market that would actually reflect the transaction amounts or the transaction price for a willing buyer and willing seller.

Because the markets are concentrated, many health insurance have too much market power. So ideally, if it was a competitive market, that principle really holds, but in the absence of a competitive market, we have to do some kind of averaging across all players in the market to see what reasonable value would be.

Q And that averaging that you were just discussing, that's part of the reasonable value calculation; is that right, Doctor?

A Yes.

Q For calculating damages in a lawsuit, why is it more appropriate to use reasonable value than, for example, amounts paid?

MR. VANSLYKE: Object to form. You can go ahead and answer.

THE WITNESS: It's important to calculate reasonable value because it does not include the situation a certain plaintiff may be, depending on what their insurance company has negotiated the prices, whether they have -- have tremendous market power in one setting, or they are in a more urban setting where there is a lot of other players in the market. So if the idea is to say how much would it cost in general to deliver that care, a reasonable calculation makes a lot of sense.

Q And you just stated if the idea is to understand what went into providing that care; is that right, that's what you said?

A Yes, yes. For example -- I can give you an example. When we do a value calculation of the cost calculations for any specific procedures or treatments, we do not rely on any one insurance company, we actually look at broad claims level data and do an average estimate that averages across many, many plans in healthcare insurance.

Q Are you referring to performing a cost-effectiveness analysis, Dr. Basu?

A No. No, I'm referring to actually doing any

healthcare cost analysis.

Q Okay. So I'd like you to look now -- we're still on page four of Exhibit 3.

A Mm-hmm.

Q If you'll look at the third bullet point on this page?

A Mm-hmm.

Q You wrote, The methodology applied by Gregory Russo to determine the reasonable value of the Bellwether Plaintiffs' past medical expenses is appropriate and appears to be reliable, except for omitting this adjustment to present value. Did I read that correctly?

A Yes.

Q Okay. And later in your report, you state that the most comprehensive and accurate approach to calculating reasonable value would be to rely on a national level claims database representing a majority of private insurers, right?

A Yes.

Q And from that database, one can directly estimate average private insurance costs attributable to a condition in a given year, right?

A That's right.

Q You also wrote that such a database is hard

to come by, expensive to access, and mostly nonexistent prior to 2010; is that right?

A That is right.

Q And you wrote that Mr. Russo's approach to calculating reasonable value was the second most comprehensive and accurate approach after that one, right?

A That's right.

Q You also wrote that Mr. Russo's approach to calculating reasonable value provides an acceptable approximation to these average private payer prices for most of the eight service types; is that right?

A That's right.

Q So you did not redo the reasonable value calculation performed by Mr. Russo using a national level claims database, right?

A I did not.

Q Okay. And so instead, you relied on Mr. Russo's reasonable value calculations, which you adjusted to present value, correct?

A That's right.

Q Okay. So I'd like to walk through the summary of -- excuse me, I'd like to walk through your summary of Mr. Russo's methods, which is presented in section four of your report. So that's going to be

Exhibit 3, pages four, five and six.

A Yes.

Q So we can start with -- start with page four of your report. That's Exhibit 3.

So in general, Mr. Russo determined the reasonable value of past medical services, right?

A Yes.

Q And his general framework started by identifying past medical services by CPT code, correct?

A That's right.

Q CPT stands for current procedural terminology, right?

A That's right.

Q Mr. Russo then converted the CPT codes into Medicare payments; is that right?

A That is right.

Q He then multiplied Medicare payments by a private payer cost multiplier, correct?

A That's right.

Q And that gave him the average price of the services in the private market; is that right?

A That is right.

Q Okay. So let's start specifically with Section 4.A of your report, that's Physician and Other Ancillary Clinical Services, and that starts with

professional fees.

So Mr. Russo first used the CPT codes to identify costs incurred by a clinician when rendering a service, right?

A Yeah.

Q And clinicians are paid based on CPT codes that they bill, right?

A They are paid based on RVUs, which is based on CPTs.

Q Okay. So Mr. Russo identified the relative value units, or RVUs, for each CPT code claimed, right?

A That's right.

Q And RVUs are set by the United States Department of Health and Human Services and the American Medical Association; is that right?

A That is right.

Q And there are three kinds of RVUs, which are physician work, practice expenses, and insurance, correct?

A Yes.

Q So after identifying the relative value units, Mr. Russo then adjusted them for geographic practice cost; is that right?

A Based on -- yes, to get to the Medicare expenses, which has a geographic multiplier.

Q And so that was done by multiplying the RVUs by the GPCI, as published --

A Mm-hmm.

Q -- by HHS, correct?

A That's right. That's right.

Q And Dr. Basu, I apologize, but I think you're kind of like vocalizing to state that you agree with the premise of my question. I'd prefer if you just remain silent --

A Yes, I will, okay. Gotcha.

Q -- for purposes of the transcript.

A Sure.

Q I'm sorry to do that to you. I know depositions are unnatural.

But okay. So after -- after Mr. Russo adjusted RVUs for geographic practice cost, he then applied an adjustment factor to determine market rates, right?

A Yes.

Q And to do that, he multiplied by the inflation percentage from RAND reports; is that correct?

A Yes.

Q Okay. Except for not adjusting to present value, you agree that this method for calculating the

reasonable value of past medical services from physicians and other ancillary clinicians is accepted in your field, correct?

A Yes, I agree that the approach taken is the correct approach. I obviously did not review the accuracy of the actual estimates used.

Q Okay. We will -- we will get to that shortly. I'd like to continue walking through the summaries of his methodology first.

So I think that takes us to Laboratory Services. To calculate the reasonable value of past laboratory services, Mr. Russo used 100 percent of the billed rates; is that correct?

A That is right.

Q And except for not adjusting to present value, you agree that this methodology is accepted in your field, correct?

A Yes.

Q And for the reasonable value of past inpatient and outpatient hospital services, I believe that's Section 4.C and 4.G through H of your report; is that right?

A Yes.

Q So in your summary of Mr. Russo's methods, you noted that inpatient bills have three components,

which include the facility fee or overhead costs, the physician fees, and anesthesia fees, right?

A Yes. Would you mind forwarding the page? Yes, thank you.

MR. ANTONUCCI: Okay. And for the record, I changed the exhibit to page six of Exhibit 3.

Q (By Mr. Antonucci) Okay. So for facility fees, the reasonable value can be calculated by pulling hospital cost data, as reported to HHS, dividing by a specific revenue code for charges reported by that hospital for the same revenue, and then multiplying that by the cost-to-charge ratio to determine costs; is that right?

A Yes.

Q And then, after that step, one would need to calculate the reasonable value of the cost using those cost ratios; is that right?

A Yes.

Q And so to do that, Mr. Russo used the RAND report to calculate the ratio of private sector facility fees to public sector facility fees, correct?

A Yes.

Q He determined the federal government's payment-to-cost ratio for specific hospitals using reported data, right?

A Yes.
Q And multiplied the federal government payment-to-cost ratio by state-specific private sector payment percentages, right?
A Yes.
Q Then, he lastly multiplied the charge by the cost-to-charge ratio to determine the reasonable value of costs for inpatient and outpatient facility fees, right?
A Yes.
Q Except for not adjusting to present value, you agree that this methodology is accepted in your field, right?
A Yes.
Q Okay. And the methodology for calculating the reasonable value of past inpatient physician fees is the same as the non-hospital method, right?
A Yes.
Q And that's also true of outpatient physician fees, right?
A Yes.
Q And except for not adjusting to present value, you agree that this methodology is accepted in your field, right?
A Yes.

Q Okay. So for calculating the reasonable value of anesthesia fees, Mr. Russo multiplied the conversion factor times base units plus time units; is that right?

A Yes.

Q And base units are set by the Department of Health and Human Services, time units are 15-minute increments, and the conversion factor is also set by the Department of Health and Human Services, right?

A Yes.

Q So except for not adjusting to present value, you agree that Dr. Russo's methodology for determining the reasonable value of past anesthesia fees is accepted in your field, correct?

A Yes.

Q So Dr. Basu, to calculate the reasonable value of medications, Mr. Russo used GoodRX retail cost data based on the Plaintiffs' zip codes; is that correct?

A Yes.

Q What is -- do you know what GoodRX is, Dr. Basu?

A I do.

Q What is GoodRX?

A It's a platform that -- it's an online

platform that documents kind of the negotiated prices by large pharmacy chains on certain medications.

Q Does GoodRX reflect the discount programs offered by pharmacy benefit managers?

A Yes, they do.

Q Okay. And GoodRX prices represent what consumers could pay at retail pharmacies, right?

A If they're paying out of their pocket, yes.

Q Okay. However, if they're using insurance, that might not necessarily be the case; is that right?

A That's right.

Q Why is that?

A Well, because the discounts negotiated by pharmacy benefits manager with the manufacturers, not all of those discounts are passed on to the insurance companies. And so the insurance companies, the amount that are paid, which is the transactional amount, are not reflected by those from PBM discounted prices.

Q Okay. And when you say PBM, you're referring to pharmacy --

A Pharmacy benefit managers, yeah.

Q So the prices of a given brand of medication on GoodRX reflects the resources used to deliver pharmaceuticals to consumers; do you agree?

A No, because if you think what resources are

used, you would have to include the pharmacy dispensing fee, and some of the profits that are written by the insurance companies, too.

Q Dr. Basu, you suggested using a different methodology for calculating the reasonable value of past outpatient prescription costs, right?

A Yes.

Q Okay. And I'm scrolling now to page eight of Exhibit 3.

A Mm-hmm, yes.

Q And so you can see here, Dr. Basu, that you recommended multiplying the wholesale acquisition cost, or the list price, by roughly 80 percent, to calculate the reasonable value; is that right?

A Yes.

Q And that's continued on to page nine of Exhibit 3, right?

A Yes.

Q Okay. And in your opinion, that method reflects the actual cost incurred in providing the branded drug to the patient; is that right?

A Yes, that is a best approximation we can do. Ideally, you would actually want to see what the insurance company is actually paying, the net prices, but those prices are often not observed, so this is the

best approximation that one could do.

MR. VANSLYKE: Object to form on the last question.

Q (By Mr. Antonucci) Okay. So Dr. Basu, this -- this method of multiplying the wholesale acquisition cost by 80 percent, that's based on the paper by Sood, et al., right?

A Yes.

Q Okay. That's cited there at the bottom of page nine of Exhibit 3, right?

A Yes.

Q Okay. I'm going to stop sharing my screen, and put a copy of that paper in the chat. One moment, please.

MR. ANTONUCCI: I have placed a copy of Sood, et al., 2017, in the chat. I will mark that for identification as Exhibit 4.

Q (By Mr. Antonucci) I will now share my screen to show you Exhibit 4.

A Mm-hmm.

Q Are you able to see Exhibit 4, Sood, et al., Dr. Basu?

A Yes.

Q Okay. And I'd like to look at page five of Sood, et al. Are you able to see page five of Exhibit

4?

A Yes.

Q Okay. So I'd like to read now from the paragraph at the bottom of page five, which says, Figure 2 applies the gross and net margin estimates in Table 2 to illustrate the average flows of funds to distribution system participants for branded and generic drugs combined; Of a $100 expenditure on pharmaceuticals by consumers, composed of both out-of-pocket and insurer payment, roughly $17 goes to drug production costs, $41 dollars accrues to the manufacturers, a third of which is net profit, and $19 accrues to insurers, three dollars of which is a net profit; PBMs keep about five dollars, two dollars net profit, pharmacies keep $15, three dollars net profit, and wholesalers keep about two dollars, 30 cents net profit. Did I read that correctly?

A Right, yes.

Q So Sood, et al., estimate that the actual cost incurred to an insurer in providing a branded drug to a patient is roughly 20 percent of the wholesale acquisition cost, right?

MR. VANSLYKE: Object to form.

THE WITNESS: It's about 80 percent, if I understand correctly.

Q (By Mr. Antonucci) Can you explain to me why that is, please?

A Um --

MR. VANSLYKE: Object to form.

THE WITNESS: Um, if the drug listed by the manufacturer is $100, which is the W -- which is the wholesale acquisition cost list price, the wholesaler adds about $10 to the price and sell it to the pharmacy, and so -- or sorry, one dollar over $100, so one percent becomes about $101. The pharmacy then marks up the drug and adds a dispensing fee, and then -- you know, and that's about, say, you know, $120.

And then, when the drug is dispensed, the patient has -- you know, usually, typically, has a $50 co-pay. And the pharmacy bills the PBM the remaining $115, which is paid by the insurer.

And so at the same time, the PBM has negotiated, on average, $50 rebate for the manufacturer, and keeps about ten percent of that -- of that rebate.

So basically, the -- what that does is the rebate kind of reduces the insurer's cost, which is about $115 to $70. And so if you think about the total cost, the resources, that was kind of, um, used to

actually transfer the drug from the manufacturer to the consumer, is the $70 that the insurers kind of paid, the $50 that the PBM keeps, and then, also, the five dollars that the PBM keeps and the five dollars that the patient kind of pays.

So the total resource must include what the insurance is paying, the profit that the PBM is keeping, and the patient that -- the out-of-pocket cost that the patient is paying.

So that total is kind of the total resources that should be calculated as reasonable value.

Q In general, Dr. Basu, do you know how often the Plaintiffs in this case opted to purchase generic drugs in their past medical bills?

MR. VANSLYKE: Objection.

THE WITNESS: I do not.

Q (By Mr. Antonucci) And do you know how often the average American opts to purchase a generic drug over a branded drug?

MR. VANSLYKE: Objection.

THE WITNESS: I do not. Usually the most -- 80 percent of all prescriptions sold in the United States are generics, but that's a -- that's a different estimate than what percentage of time patients would opt to take a generic.

Q (By Mr. Antonucci) Dr. Basu, ultimately you chose to accept the reasonable values calculated by Mr. Russo for medications, despite his use of the GoodRX method, correct?

A Um, I actually pointed out that this was not the best estimate, and I also pointed out how it could be recalculated. But -- but I would say that this -- this would be an extensive process to recalculate these costs, and I was not asked by my lawyers to do any recalculation.

Q Okay. And to be clear, you weren't asked to recalculate the costs, and you did not recalculate the costs, right?

A Yes.

Q To calculate the reasonable value of physician-administered drugs, Mr. Russo took the HHS average sales price times percent inflation for private insurers, right?

A Yes.

Q I'm going to stop sharing Exhibit 4.

Except for not adjusting to present value, you agree that that methodology is accepted in your field, right?

A Yes.

Q Okay. And to calculate the reasonable value

of home health services, Mr. Russo took the cost of home health services from the HHS website and multiplied by the state-specific inflation rate provided by HHS to yield a market payment rate, right?

A Yes.

Q Except for not adjusting to present value, you agree this methodology is accepted in your field, correct?

A Yes.

Q And to calculate the reasonable value of durable medical equipment, Mr. Russo used the HHS durable medical equipment fee schedule, right?

A Yes.

Q Except for not adjusting to present value, you agree that this methodology is accepted in your field, correct?

A Yes.

Q Okay. I would like to turn back to page nine of Exhibit 3. I will share my screen and show that to you now.

So Dr. Basu, are you able to see page nine of Exhibit 3 on your screen?

A Yes.

Q So in the last paragraph on this page, you wrote, Second, Russo's calculations fail to account for

the present value of the amounts at issue. Did I read that correctly?

A That's right.

Q Next you wrote that, Damages for medical expenses are meant to restore the injured person to the financial position they would have been -- they would have had absent the harm. Did I -- did I read that correctly?

A Yes.

Q And here you're referring to damages awarded in a lawsuit, right?

A Yes.

Q What did you base that -- that statement on?

A It was based on the idea of a compensation principle that we often used in economics that, if somebody have lost -- have experienced a loss, what the value of that loss is.

Q Did you provide a citation in your report that supports that statement?

A Well, I did provide the reason for inflation calculation, the citation for that. If you want -- I don't think I provided a specific citation for loss calculation, which is -- there are many.

Q What part of your -- excuse me, you said that there was a citation for the insurance --

A For the calculation of the use of CPI and why the inflations are done.

Q I see. And are you referring to Brent, et al., 2001, National Research Council 2002, and the Bureau of Labor Statistics 2020?

MR. VANSLYKE: Objection.

THE WITNESS: Yeah, the Bureau of Labor Statistics.

Q (By Mr. Antonucci) Okay. So on page ten of your report, in the paragraph beginning on the top of the page, close to the end here, you wrote, This approach -- do you see where I'm reading from?

A This approach, yes.

Q So page ten of --

A Mm-hmm.

Q -- Exhibit 3, you wrote, This approach also aligns with the time value of money principle behind prejudgment interest, compensation should reflect the lost use and purchasing power of money over time when paid today. Did I read that correctly?

A Yes.

Q What do you mean by prejudgment interest here?

A What I meant is before -- it's calculating the reasonable value for today. If the judgment is

passed today, what the reasonable value would be.

Q Okay. And you're referring to an award of interest in a lawsuit, right?

MR. VANSLYKE: Objection.

THE WITNESS: I was referring to the calculation of loss related to any -- any intervention or any -- anything.

Q (By Mr. Antonucci) Okay. And so the term "prejudgment interest," you're not talking about a judgment in a lawsuit there?

A No, it was more of a general -- general kind of thing. For any decision-making that happens today, that includes -- that needs a reasonable estimate or value for any harm or loss, that would be the amount, the present value should be the amount.

Q I understand. So if you weren't talking about a judgment in a lawsuit, what prejudgment interest were you referring to here?

MR. VANSLYKE: Objection.

THE WITNESS: Yeah, it refers to all -- all sorts of decision-making, whether you want to calculate the attributable cost that has happened in the past of certain interventions when we calculate certain policies. For example, if a state passes a law, and we want to estimate today how much total benefits or

losses that have produced to determine whether that law should be continued or not. So all sorts of decision-making that would be -- that would be made today based on past damages or expenses.

Q (By Mr. Antonucci) Dr. Basu, you used an overall consumer price index, or CPI, to calculate the current dollars adjustments, right?

A Yes.

Q And that was sort of -- that was a choice that you made rather than using a medical CPI, right?

A Yes.

MR. ANTONUCCI: Okay. I'm going to stop sharing Exhibit 3, and share this document I will mark for identification as Exhibit 5.

Q (By Mr. Antonucci) I'm now sharing my screen to show you Exhibit 5.

Dr. Basu, do you recognize the cover of this book?

A Yes.

Q For the record, this is Cost-Effectiveness in Health and Medicine, edited by Neumann, et al. And this was published in 2017, right?

A Yes.

Q And excuse me, this is the second edition of that text, right?

A Yes.
Q Okay. I would like to turn to page 230. Are you able to see recommendation number 20 here, Dr. Basu?
A Yes.
Q Actually, before I do that, what I'm showing you is Chapter 8 of this text --
A Mm-hmm.
Q -- which is titled Estimating Costs and Valuations of Non-Health Benefits in Cost-Effectiveness Analysis, by Anirban Basu, right?
A Yes.
Q Okay. That's you, right?
A Yes.
Q Okay. So now we'll go to page 230 and look at recommendation number 20. Are you able to see it?
A Yes.
Q So here you wrote, Cost-effectiveness analysis should be conducted in constant dollars that removes general price inflation; If the prices in question change at a rate different from general price levels, that variation should be reflected in the adjustments used; For example, in the United States, the personal consumption expenditure, or PCE, price index and the Personal Health Care, PHC, expenditure

deflator should be used to adjust for inflation in healthcare expenditures; For non-healthcare sector expenditures, the regular Consumer Price Index, CPI, should be used. Did I read that right?

A Yes.

MR. VANSLYKE: Objection.

Q (By Mr. Antonucci) Okay. And so you agree that in your non-litigation work, you recommend the use of a different consumer price index than the one you used in this case, right?

A Yes.

MR. VANSLYKE: Objection.

Q (By Mr. Antonucci) I'm going to stop sharing.

Let's go back to Exhibit 3. That, again, is your report. And I am going to turn to page eight. And I'm looking at footnote seven here. Do you see this, Dr. Basu?

A Yes.

Q So Exhibit 3, page eight, note seven, says, My acceptance of Russo's methodology is subject to the following three caveats: First, the implementations of the reasonable cost calculations are uncertain, based upon the relied-upon Excel files, because they provide numbers but do not show the formulas used to calculate

them; Hence, it is unclear whether the described formulas were implemented correctly, though no errors are apparent to me at this time. Did I read that correctly?

A Yes.

Q So I will represent to you, Dr. Basu, that Mr. Russo's spreadsheets with the underlying formulas were produced to attorneys for the Plaintiffs on February 3rd, 2026, with the Bates range CLJ_USA_Russo_1 through 16.

Have you been provided with Mr. Russo's 16 spreadsheets containing his formulas, Dr. Basu?

A Yes.

Q Did you evaluate whether Mr. Russo's formulas were implemented correctly?

A Yes, they were.

Q Okay. So you agree that Mr. Russo's formulas were implemented correctly, right?

A Yes.

Q Did you discover any errors in Mr. Russo's spreadsheets with the formulas included?

A I did not detect any errors in the formulas, but I did not validate any of the numerical estimates used.

Q What do you mean by numerical estimates?

A The actual numbers that were multiplied.
Q Okay. Why did you not validate those?
A I was not asked by my lawyers to validate those.
Q Okay. Have any of your opinions changed in light of your review of Mr. Russo's spreadsheets?
A No.
Q I'm going to stop sharing my screen.
You calculated the reasonable values for past medical services as indicated by Plaintiffs' expert Marjorie Hackett-Wallace, right?
MR. VANSLYKE: Objection.
THE WITNESS: The rebuttal, yes.
Q (By Mr. Antonucci) Okay. So you -- just to be clear, you looked at her relatedness analysis and then calculated the reasonable value of past medical services she determined were related to a Plaintiff's condition, right?
A Yes.
MR. VANSLYKE: Objection.
Q (By Mr. Antonucci) And you also calculated the reasonable values for past medical services indicated as being related to the Plaintiffs' conditions by the United States' clinicians, Dr. Gee and Hassan, right?

A Yes.

MR. VANSLYKE: Objection.

Q (By Mr. Antonucci) You did not independently verify the work of Marjorie Hackett-Wallace, right, Dr. Basu?

A I did not.

Q And your conclusions are based on the work of Ms. Hackett-Wallace, right?

MR. VANSLYKE: Objection.

THE WITNESS: Yes.

Q (By Mr. Antonucci) If Ms. Hackett-Wallace made a mistake, your tables would replicate that mistake, wouldn't they?

MR. VANSLYKE: Objection.

THE WITNESS: Yes.

Q (By Mr. Antonucci) So it's fair to say your reasonable value calculations are only as accurate as Marjorie Hackett-Wallace's analyses, right?

MR. VANSLYKE: Objection.

THE WITNESS: Yes.

Q (By Mr. Antonucci) Okay. I'm going to turn back to Exhibit 3. This is again your report. I'm turning now to Appendix A1. Are you able to see Appendix A1 of Exhibit 3?

A Yes.

Q So this is Table 1 for Plaintiff Mr. Cagiano. This table is titled Past Medical Billed Amounts and Reasonable Value Analyses Based on Plaintiff MHW Reports in 2025 Dollars.

And MHW here refers to Marjorie Hackett-Wallace, right?

A Yes.

Q Okay. So if we look at the column immediately to the right of Column B, this column has the label Reasonable Values of Column B Adjusted to 2025 Dollars, right?

A Yes.

Q And the Noninstitutional Total in this column is $106,931.50, right?

A Yes.

Q Okay. I'm going to stop sharing my screen and show you your spreadsheet, which is going to be marked for identification as Exhibit 6. And I'm going to share my screen to show Exhibit 6.

MR. VANSLYKE: Counsel, feel free to finish your line of questioning, but I think we might be due for a break in the near-ish future.

MR. ANTONUCCI: Sure thing. I'm really close to being done with my all questions, so --

MR. VANSLYKE: Okay.

MR. ANTONUCCI: -- depending on how much more -- how dire the need for a break is, I'm not sure that it's --

MR. VANSLYKE: We can just keep going for now.

MR. ANTONUCCI: Okay.

Q (By Mr. Antonucci) All right. So I put Exhibit 6 in the chat. That is the document with the Bates number PLG-Expert_Basu_2. Are you able to see Exhibit 6 on my screen, Dr. Basu?

A Yes.

Q Okay. And this is the tab of the spreadsheet Medical Bills Summary, right?

A Yes.

Q Okay. And I'll represent to you that this workbook deals with Plaintiff Cagiano, because I'm not sure if it's clear from -- from just this tab. Does that make sense, Dr. Basu?

A Yeah, yeah.

Q Okay. So the -- if we take a look here at the reasonable values in current dollars for Noninstitutional Total, the value is $109,853.13, right?

A Yes.

Q Okay. And as we mentioned in Amended

Appendix 1 of your report, that total is $106,931.50, right?

A Yes.

Q Is there a reason for this discrepancy?

A It's not apparent to me right now, but I'd have to go and check. There shouldn't be.

I think the one that was calculated as 109 -- let me just see. I'd like to see here. Thirty-nine to forty-two is institutional one.

Yeah, 106 would have been -- that might be a typo, because 106 is the total of the institutional and noninstitutional under the revised report.

Q Understood. So if I stop sharing and return to Exhibit 3 -- and again, we are looking at Amended Appendix A1, Table 1 -- you can see that this error impacts the overall total in Table 1, right, which should be $116,427.55, right?

A That's right.

MR. VANSLYKE: Objection.

Q (By Mr. Antonucci) Okay. And instead, it says $113,505.93, right?

A Yeah.

Q Okay. I'm going to stop sharing.

Let's see. Here is another exhibit that I'm going to drop in the chat. This is Exhibit 7. I will

represent to you that this document the Bates numbers PLG-Expert_Basu_7, and this is a spreadsheet that was produced to the United States on January 27th of this year, and it deals with Plaintiff Ms. Dyer.

I'm going to share my screen to show that to you now. Are you able to see Exhibit 7, Dr. Basu?

A Yes.

Q Okay. And so this is the Medical Bill Summary tab of the workbook that ends in Bates number 7, right?

A Mm-hmm, yeah.

Q Okay. And so if we look here at the Provider column, and scroll to Wilmington Health, the reasonable value in current dollars here is $3,915.76, right?

A Yes.

Q Okay. I'm going to stop sharing and return to Exhibit 3.

This is Exhibit 3, Appendix A3, Table 1. Here for Wilmington Health, the reasonable value provided here is $3,750.59, right?

A Yes.

Q And as we just mentioned in your spreadsheet, that value is $3,915.76, right?

A Yes.

Q Do you know the reason for this discrepancy?

MR. VANSLYKE: Objection.

THE WITNESS: I think -- I think the reason is this was split between 3,750, and the Wilmington Pathology Associates 193, which adds up to the 3,900-something.

Q Okay. So --

A If I understand correctly. I think in that summary, it was the summary of both of them together.

Q Okay. Let's take a look at that. I'm going to return to Exhibit 7.

A Yeah. Actually, if you don't mind, I would love to take a break quickly.

Q Sure. Just really quickly --

A Yeah.

Q -- here is Exhibit 7, here is --

A Yeah.

Q -- Wilmington Health. Wilmington Pathology Associates is right underneath that with the value of 193,017, right?

A Okay, yes. Yes.

MR. ANTONUCCI: Okay. I'm going to stop sharing, and let's go off the record.

THE WITNESS: Okay.

THE VIDEOGRAPHER: Off record, the time is 10:43 25 .

(Recess taken.)

THE VIDEOGRAPHER: Back on record, the time 10:51 3 is .

MR. ANTONUCCI: Okay. We're back on the record.

Q (By Mr. Antonucci) Dr. Basu, as a reminder, you are still under oath; do you understand?

A Yes.

Q Did you have any conversations with your attorneys during the break?

A No.

Q You -- did you say anything to them during the break?

A No, I just said I have to look at these numbers that you are -- you are mentioning.

Q Okay. Apart from telling them you needed to look at the numbers, did you have any other discussions with your attorneys during the break?

A No.

Q Okay. So the discrepancies in the Cagiano and Dyer reports that we just talked about, are you -- you agree that those are likely errors or typos, right?

A They are definitely typos. The methods that are laid out still holds. It might be just a transcription typo, but I have to look at the numbers

carefully, because -- yeah.

Q Okay. Are you aware of any other typos or errors in your reports?

A Yeah, no.

Q I'm sorry, are you aware of any other typos or errors in your reports?

A I am not aware of any other typos and errors.

Q Thanks. At the beginning of the deposition, you mentioned that you have a new publication that is not on your CV, right?

A Yes.

Q What is the title of that publication; do you know?

A Can I pull up my document, near a more later CV?

Q Sure.

A Yeah, okay. Let's just see. Where is it? Okay.

MR. VANSLYKE: Objection. Counsel, I don't think we're going to have the witness share an exhibit.

Q (By Mr. Antonucci) Dr. Basu, are you able to read the name of the publication off of your CV?

A Yes.

Q Could you do that for me, please?

A Yeah, I'm opening up the document now. It's

Trends in Utilization and Costs Following a Hepatitis C Elimination Initiative.

Q When was that published?

A February 2nd, 2026.

Q And was that published in a journal?

A It's the JAMA Network Open.

Q Okay. And Dr. Basu, you also -- your -- Mr. VanSlyke noted for the record that you have copies of your reports in physical format in front of you, right?

A Yes.

Q Do those contain any annotations or highlighting?

A No.

Q Are there -- are there any markings of any kind on them, other than what's printed on the page?

A It has a label saying this is the original Appendix A, and the other has Amended Appendix A.

Q Understood. Apart from those labels differentiating the amended appendix from the original appendix, are there any other markings on your copies of your reports?

A No.

Q Okay. Um, all right. Are there any answers you've given to my questions that you wish to change

before we end this deposition?

A No.

Q Is there any information that I asked you about that you didn't recall at the time, but now remember?

A No.

MR. VANSLYKE: Objection.

Q (By Mr. Antonucci) Were there any questions I asked that you did not understand?

A No.

Q Okay. Do you have any other opinions that you have not testified to yet today?

A Yes, I will say two things. The one that you pointed out in my book, my use of PHE and an inflator of the GDP deflator, one of the reasons often -- even though that was recommended, often people don't use them is because those estimates are not available going back to many years, so they are failing you, and that's why they are not used. Even if you look at healthcare cost analysis today in any published estimates, most people use CPI.

And the only other thing I would say, obviously, as I pointed out, medical CPI has a lot of measurement issues. But not using medical CPI, the results I produced are conservative. Medical CPI

inflates much faster. So if I had used them, these numbers would have been much larger than what it is now.

Q Understood. So other than the issues regarding the use of medical CPI, do you have any other opinions you have not testified to today?

A No.

Q Once it's ready, you'll be provided with the transcript of this deposition. I ask that you carefully read, correct, and sign it; do you understand?

A Yes.

MR. ANTONUCCI: Okay. Well, thank you, Dr. Basu, for your patience in answering my questions today.

I pass the witness.

MR. VANSLYKE: Thank you. I think I'd like to go off the record for a few more minutes before we jump into that question.

THE VIDEOGRAPHER: Off record, the time is 10:57 21 .

(Recess taken.)

THE VIDEOGRAPHER: Back on record, the time 11:02 24 is .

MR. VANSLYKE: Thank you.

E X A M I N A T I O N

BY MR. VANSLYKE:

Q I'm going to share, I believe it was marked as Exhibit 3, the copy of his report with the MCL attached. This is the version that was uploaded to the chat. And I'm scrolling to the last page, which is the Materials Considered List.

Dr. Basu, can you see the Materials Considered List on your screen?

A Yes.

Q Okay. And I see here in the first bullet that you cite the rebuttal expert opinion report of Marjorie Hackett-Wallace?

A Yes.

Q Is it correct that you only reviewed the rebuttal and not her previous reports?

A That is correct.

Q And do you understand that the expert reports of Gregory Russo incorporate Russo's interpretation of Marjorie Hackett-Wallace's reports?

A Yes.

MR. ANTONUCCI: Objection.

Q (By Mr. VanSlyke) And when you provided your opinions and your calculations, were those performed on

Dr. Russo's data or on Marjorie Hackett-Wallace's data?

A Only on Dr. Russo's data.

MR. VANSLYKE: Thank you. I have no further questions.

MR. ANTONUCCI: All right. Thank you very much.

THE WITNESS: Thank you.

THE VIDEOGRAPHER: Off record, the time is 11:04.

(End of video record.)

THE REPORTER: Are you ordering the transcript, Mr. Antonucci?

MR. ANTONUCCI: Yeah, for the United States, we have a standing order.

MR. VANSLYKE: Same here, thank you.

(Signature reserved.)

(Deposition concluded at 11:04 a.m.)

C E R T I F I C A T E

STATE OF WASHINGTON)
) ss
COUNTY OF SNOHOMISH)

I, the undersigned Washington Certified Court Reporter, pursuant to RCW 5.28.010, authorized to administer oaths and affirmations in and for the State of Washington, do hereby certify;

That the annexed and foregoing deposition of each witness named herein was taken stenographically before me and reduced to typewriting under my direction;

I further certify that the deposition was submitted to each said witness for examination, reading and signature after the same was transcribed, unless indicated in the record that the parties and each witness waive the signing;

I further certify that all objections made at the time of said examination to my qualifications or the manner of taking the deposition, or to the conduct of any party, have been noted by me upon said deposition;

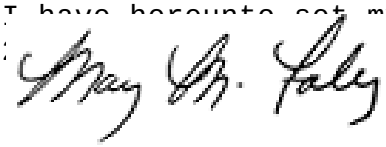
I further certify that I am not a relative or employee or attorney or counsel of any of the parties to said action, or a relative or employee of any such attorney or counsel;

I further certify that I am not in any way financially interested in the said action or the outcome thereof;

I further certify that each witness before examination was by me duly sworn to testify the truth, the whole truth and nothing but the truth;

I further certify that the deposition, as transcribed, is a full, true and correct transcript of the testimony, including questions and answers, and all objections, motions, and exceptions of counsel made and taken at the time of the foregoing examination.

IN WITNESS WHEREOF, I have hereunto set my hand this 9th day of March, 20[illegible].



_____

MARY M. FOLEY, CCR
Court Reporter in and
for the State of Washington,
residing in Snohomish County.

THE VIDEOGRAPHER: We're now on the record.

My name is David Lane. Videographer for Golkow, a Veritext division. Today's date is February 25, 2026. Our time on the record is 8:58 AM Eastern Time.

This remote video deposition is being held in the matter of Camp Lejeune Water Litigation.

Our deponent today is Heather Ford.

All parties to this deposition are appearing remotely and have agreed to the witness being sworn in remotely. Due to the nature of remote reporting, please pause briefly before speaking so that all parties are heard completely.

Counsel, please introduce yourselves and state whom you represent.

MS. WALLACE: Whitney Wallace and I represent the Plaintiffs Leadership

Group and my firm is Wallace & Graham.

MR. KLOTZBUCHER: My name is Bill Klotzbucher from the U.S. Department of Justice representing the Defendant in this action.

THE VIDEOGRAPHER: Our court reporter today is Denise Vickery and will now swear in our witness.

- - -

HEATHER A. FORD

called for examination, and, after having been duly sworn, was examined and testified as follows:

THE VIDEOGRAPHER: Please begin.

- - -

EXAMINATION

- - -

BY MS. WALLACE:

Q. Good morning, Ms. Ford. How are you this morning?

A. I'm fine. Thank you.

MS. WALLACE: Good.

Before we get started, there

is a case management order in effect that requires defense counsel and I to affirm on the record the following statement, and I will read it.

The parties agree that no communication with the deponent by any means, including but not limited to text messaging, will occur out of the view of the other parties while the deposition is proceeding on the record. I affirm.

MR. KLOTZBUCHER: I affirm.

MS. WALLACE: Right.

BY MS. WALLACE:

Q. Will you please state your full name for the record?

A. Heather Ardell, A-r-d-e-l-l, Ford, F-o-r-d.

Q. What is your date of birth, Ms. Ford?

A. [redacted] 1975.

Q. Who is your current employer?

A. The Department of Veterans Affairs.

Q. What is your current job title?

A. Chief financial officer, Veterans

Health Administration.

Q. Do you understand all of your testimony today is under oath?

A. Yes.

Q. Is there any reason that you're not able to be fully truthful today?

A. No.

Q. Can you tell us for the record where you are physically located today?

A. Washington, DC.

Q. Where are you physically? Are you in your office in Washington, DC?

A. Yes, in my office.

Q. Where is your office in DC?

A. 810 Vermont Avenue Northwest.

Q. Is that a department headquarter for the Department of Veterans Affairs in DC?

A. Yes, it's the headquarters building.

Q. Can you tell the me how many people from VHA work in your building?

A. I could not tell you how many VHA employees there are currently located in this building.

Q. Is it more than a hundred?

A. Yes, I would -- I would say it's more than a hundred.
Q. Is anyone present with you today in your office?
A. No.
Q. Because we are remote, do you understand that you can't access your internet for any reason or use your cell phone during the deposition?
A. Yes, I understand.
Q. Do you have any documents there with you today?
A. No.
Q. Are you familiar with the Camp Lejeune water contamination litigation?
A. Not specifically, only limited to the notice of deposition.
Q. Do you know generally what the lawsuit is about?
A. No.
Q. Do you know that it's about water contamination at Camp Lejeune?
A. Yes.
Q. And nothing further than that?

A. Nothing further than that.
Q. Are you or any of your family members veterans?
A. Yes.
Q. Who?
A. My partner is a veteran, my -- both of my grandfathers were veterans, and my great uncle was a veteran, along with --
Q. Did any --
A. -- other family members as well.
Q. Thank you for your family's service.
Do you know anyone that has filed a claim in the Camp Lejeune water contamination litigation?
A. Not that I'm aware of.
Q. Do you know how many persons have filed claims?
A. No.
Q. In this litigation, it's approximately 406,000 have administrative claim forms filed.
Is that greater than you thought the litigation was, or you had no knowledge?
MR. KLOTZBUCHER: Objection.

Foundation.

You may answer.

THE WITNESS: It was -- I'm not surprised.

BY MS. WALLACE:

Q. Do you -- are you aware of your role in this litigation and why you have been designated as an expert?

A. Yes.

Q. Can you describe in your own words what that reasoning is?

A. It is that VHA provides health care to veterans, some of which may be impacted by conditions that they have developed based upon exposure to contaminants, such as water at Camp Lejeune, and there's a cost of that health care.

Q. A cost of that health care to the VHA?

A. Well, to the taxpayer and to VHA.

Q. Have you ever given a deposition before?

A. No.

Q. Have you ever been a party in any civil litigation?

A. No.
Q. Have you ever testified before Congress before?
A. Yes.
Q. What were the circumstances, please?
A. There was a hearing on a potential piece of legislation revolving -- involving the ability to essentially seek funding from -- involving Medicare and Medicaid, and so I testified on that.
Q. Were you in your current role when that occurred?
A. I was in an acting position as the CFO when that occurred.
Q. How is that distinguished from your current position?
A. So that acting means I was detailed into that position for a period of 120 days. So I was not officially in this position permanently, and being the CFO now, I am in this position permanently meaning that's where my job aligns.
Q. So you were in a role that was a pre -- a direct precursor to your current role --
A. Correct.

Q. -- or a temporary?
A. Yes.
Q. Okay. And you said you were seeking funding for Medicare, Medicaid, and how did that relate to the VHA?
A. That relates to VHA in terms of our ability to bill and collect revenue.
Q. Can you explain that to me a little further?
A. Essentially, we don't have the ability to bill Medicare and collect funding from Medicare. That piece of legislation would have allowed us or would allow us to bill -- bill and collect from Medicare and Medicaid, which is a change in our authorities in how we would collect funding.
Q. In what circumstance would you need to bill and collect from Medicare and Medicaid?
A. If the -- if the veteran was part of Medicare or Medicaid and fell into a priority group where, like, copays were due or payments were due, we would have that ability to bill. Just like we would any other health insurance provider.

Q. Your testimony then is that right now the VHA does not have the ability to collect from Medicare or Medicaid?

A. Yes.

Q. And so you were testifying, and if you had been successful or that bill had been successful, it would have allowed VHA an additional revenue source?

A. Correct.

Q. And was that revenue source in the form of copays, or also did it have to do with primary/secondary payor situations?

A. To my recollection, I can't remember that detail or nuance of the bill.

Q. Was the bill successful?

A. It has not been passed into law.

Q. Is that bill the Sharri Briley and Eric Edmundson Veterans Benefits Expansion Act of 2025, otherwise known as GUARD Veterans' Health Care Act?

A. It is the GUARD Act.

Q. And it's your understanding is that's currently pending?

A. Correct.

Q. If that ends up being passed, how would that impact the VHA revenue stream?

A. We would essentially have to adjust how -- first we would have to address our ability to collect. So we would have to update our systems, and then start working through the processes by which we would do that. And once we established those processes, we would bill and collect like we would any other insurance.

Q. Would it have a significant impact on VHA revenue stream?

A. The cost estimates have not been completed, so I couldn't speak to exactly the financial impact.

Q. Based on the analysis done in order to support the bill, did you have a preliminary opinion on that?

A. It would increase revenues but --

MR. KLOTZBUCHER: I'm sorry. I didn't mean to talk over you, Ms. Ford. Objection. Foundation.

You may answer.

THE WITNESS: Okay. Thank you. Apologies for not pausing either.

MR. KLOTZBUCHER: That's fine.

THE WITNESS: Our preliminary analysis was that it would increase revenues. The magnitude or the amount was not finalized or had not been reasonably determined what that would look like.

BY MS. WALLACE:

Q. Thank you.

Any other testimony before an administrative panel or committee --

A. No.

Q. -- that you can think of?

Okay. Regarding your deposition today, when did you learn that you were going to be deposed in the Camp Lejeune contaminated water litigation?

A. I would say I believe it was, like, the November/December time frame.

Q. How did you learn that you were requested to be an expert witness in this litigation?

And please don't -- for all of my questions don't divulge any substance of

communications with counsel.

A. I was notified by VA OGC counsel that an expert witness was being sought, and then I was notified through a notice of deposition via VA OGC.

Q. Did you volunteer to testify once you realized that they were seeking an expert witness on the issues that are under your scope?

A. Yes.

Q. Without divulging the contents of any communication with your counsel, can you tell me how you prepared for your deposition today?

A. I reviewed the notice of deposition. I reviewed my resumé, made sure that was updated. And then I reviewed the scope of what was originally intended to be my expert area -- my area of expertise.

Q. Did you meet with any of your counsel?

A. Yes.

Q. Which -- without telling me the contents of communications, which counsel did you meet with, please?

A. I've met with DOJ attorneys as well

as VA attorneys present.

Q. How many meetings have you had to prepare for your deposition today?

A. Three.

Q. Are you able to tell me the duration of each of those meetings?

A. Total, approximately three to four hours total. So approximately -- so approximately one hour per meeting.

Q. Were there any individuals that are not counsel on those prep session meetings?

A. No.

Q. Are there any materials that you reviewed during your prep session that relate to the scope of your testimony that you've been designated for?

A. Just the notice of deposition.

Q. No other materials?

A. As well as the -- again, the scope of what my expert testimony was intended to be.

Q. Have you had conversations with any other government agency employees related to this litigation, such as CMS, TriWest, TRICARE, Community Care Network employees, VBA?

A. No outside parties or no one from VBA.

Q. Did you do anything else to prepare for today's deposition?

A. No.

Q. All right. I'm going to -- the way we will share exhibits today is, I will upload them into the chat feature and then I will also put them on the screen for your review.

MS. WALLACE: So I'm going to upload what's been previously marked as Exhibit 1.

(Document marked for identification as Ford Exhibit 1.)

BY MS. WALLACE:

Q. And it is uploaded into the chat and I'm going to put it on to the screen for you, Ms. Ford.

A. And I'm going to look up to the left just because I have a larger screen up there.

Q. Okay. I totally understand.

Do you recognize this document?

A. I do not.

Q. Do you recognize your disclosure

topics, which occur on page -- oh, did I pass that? Ah -- 3 and 4?

A. Yes.

Q. Did you help to prepare this paragraph and the designations on pages 3 and 4 of Exhibit 1?

A. I reviewed it and made any technical edits to it in terms of nomenclature or naming conventions.

Q. You were able to make any edits that you saw fit in order to ensure its accuracy?

A. Correct.

Q. Is the items identified on pages 3 and 4 -- do you expect that to be the full scope of your testimony in this litigation?

A. Yes.

Q. Were you asked by your counsel to produce any documents that supported these opinions?

A. No.

Q. Are there any documents that support the opinions that you will be giving that are not publicly available?

A. Not that I am aware of.

Q. Regarding your testimony today, did you sign a retainer agreement with counsel in order to testify?
A. No.
Q. Is it your understanding you're an unretained expert in this litigation?
A. Yes.
Q. And the VHA is an agency of the federal government, true?
A. Yes.
Q. And you're aware that the federal government is the defendant in this litigation?
A. Yes.
Q. And you are a full-time federal employee as you testify here today, correct?
A. Yes.
Q. Your salary is paid by the federal government?
A. Yes.
Q. Are you being compensated in addition to your salary for your testimony today?
A. No.
Q. Does the same answer apply to your preparation sessions? Were you paid any

additional amounts related to your testimony?
A. I was not paid any additional amounts.
Q. And you did not prepare an expert report for this litigation; is that true?
A. That is correct.
Q. Have you reviewed any expert reports in this litigation?
A. No.
Q. Do you have any facts related to any of the bellwether plaintiffs in this litigation, any data, any facts, any information?
A. No.
Q. And if we had -- we have received data from the VHA related to past medical managerial costs for the bellwether plaintiffs.
Were you involved in compiling that data in any way?
A. No.
Q. Were you aware that it existed?
A. I became aware it existed.
Q. When is that?
A. August of 2025.
Q. And how did you become aware that it

existed?

A. When one of my employees was requested to be deposed.

Q. You did not know of it until that, until he was asked to be deposed?

A. Correct.

Q. Is that individual Daniel Clarke?

A. Correct.

Q. And Daniel Clarke is the acting associate CFO of the Managerial Cost Accounting Office for the VHA Office of Finance; is that right?

A. Correct.

Q. I imagine that you have a much clearer understanding of the -- of how that role relates to your role.

Would you be able to describe the organizational chart that compares the two of you's roles, please?

A. Sure. So the CFO resides at the top of the organizational chart under --

Q. Is that you?

A. Correct. That is me.

Q. Okay.

A. There is a deputy CFO that is currently vacant, and then under the deputy CFO are several offices which have either executive directors or associate CFOs, of which the Managerial Cost Accounting group is one of those offices.

Q. And is he at the top of that office?

A. Yes.

Q. And so how many -- so he is certainly your subordinate. You're his boss?

A. I am now.

Q. And you were not then?

A. At that time in an acting position, I have a role as a supervisor, but it was not a permanent structure at that point in time.

Q. Were you involved any way in the data that he pulled for the bellwether plaintiffs?

A. No.

Q. Have you ever reviewed it in any way?

A. No.

Q. Did you consult with him prior to his deposition testimony?

A. He had only mentioned that he was

being asked to be deposed and that he was going to do that because the previous executive director had left, and there was a need for someone with knowledge to provide test -- or provide a deposition in this case.

Q. Can you tell me, just while I have it somewhat visualized, what other offices are beneath you underneath the deputy CFO?

A. Sure. There is an Office of Budget Formulation, which is headed by an ACFO. And I'll use that term to avoid saying associate CFO, chief financial officer. There is an Office of Revenue Operations, which has an executive director. There is Payment Operations, which also has an executive director. There is an Office of Budget Execution, which has an ACFO.

There is -- I'm trying to count here. There's aligned to the deputy is the ARC, which is the Allocation Resource Center. There is -- also I feel like -- oh, there's audit -- there's two offices that do -- there's a Financial Management Office, which has, I believe, an ACFO. It could be an executive director. And then there's Financial Policy and Training, and I think

that's it. There's...

Q. Your role oversees and manages all of that?

A. Correct.

MS. WALLACE: I am going to upload into the chat several additional exhibits and put any on the screen that I want to discuss.

I'm going to upload as Exhibit 2 your notice of deposition.

(Document marked for identification as Ford Exhibit 2.)

MS. WALLACE: Exhibit 3 your responses and objections.

(Document marked for identification as Ford Exhibit 3.)

MS. WALLACE: The cover letter dated 2/19/26 providing us with documents for your deposition.

(Document marked for identification as Ford Exhibit 4.)

I'm including the documents that were provided, which is Exhibit 5, your CV, which has the Bates stamp number

CLJA_USA_FORD_ 1 through 2.

(Document marked for identification as Ford Exhibit 5.)

And another cover letter dated 2/23/2026, which produced additional documents, which are pre-marked as Exhibit 7, which bears the Bates stamp CJLA_USA_FORD_ 3 through 7.

Is that true? Yes.

(Document marked for identification as Ford Exhibit 6.)

(Document marked for identification as Ford Exhibit 7.)

BY MS. WALLACE:

Q. I believe you testified before that you did receive and review your notice of deposition, Ms. Ford?

A. Yes.

Q. I am going to put on the screen what's been previously marked and shared as Exhibit 4 -- excuse me -- 3.

Do you recognize this document?

Anytime you need me to zoom in, please just let me know and I'm happy to.

A. If you could. (Laugh). Thank you.
Q. Sure.
A. That document does look familiar.
Q. Were you asked to produce your resumé and job position description in advance of your deposition?
A. Yes.
Q. And we talked earlier. You don't have any billing invoices between you and counsel or any other government agency related to your testimony, correct?
A. Correct.
Q. Were you asked to identify and produce all documents and materials you reviewed, considered, or relied upon in the course of developing your opinions, which is paragraph 8 on page 6 of 17 on Exhibit 3?
A. Yes.
Q. And did you provide this website source?
A. (Reviews document.)
I don't remember if I provided that source directly.
Q. Is that a source you're familiar

with?

A. Yes.

Q. In the course of your work, how often do you reference publicly available documents to perform your job?

A. Fairly frequently.

Q. Is this one of those websites?

A. On occasion I would reference that website, but not with a lot of frequency.

Q. It looks like that website takes me to the VHA Office of Integrated Veteran Care, which has documents linked, such as fact sheets, forms, policy manuals, program guides, external resources, and contacts.

Is that your understanding as well?

A. Yes.

Q. Which one of those documents would you say that your testimony relies upon?

A. I would say my testimony would be more focused on financial policy, not necessarily community care policy.

Q. Community care is also under your purview from a CFO perspective; is that true?

A. The funding for community care, yes.

Q. As well as the funding for VHA medical services indirect care?

A. Correct.

Q. Can you think of any other notes or memos or charts or presentations that you have given that would be relevant to your testimony before the court that you have not provided to plaintiffs?

A. Nothing that I can think of today.

Q. Are there presentations that you've given or PowerPoint slides that are relevant to the opinions that you have listed in your designations in this case?

A. Not that I can think of at this moment.

Q. And were you asked if you have any e-mails with any of the experts that you see on this screen in paragraph 13?

A. Specific e-mails? I don't think I was asked for that.

Q. Do you have any e-mails or correspondence with the individuals listed on the screen related to this litigation or any topics to which you expect to offer testimony in this

litigation?

A. Other than Dan Clarke, no.

Q. And what do you have between you and Dan Clarke related to this litigation and/or the topics that you are expected to offer in this litigation?

A. Again, notification that he would be requested to provide a deposition in this case.

Q. Any other relevant information or e-mails that you can think of with Daniel?

A. Not that I can think of.

Q. Thank you.

And, again, you testified earlier you have not accessed any information to jog your memory prior to creating the designations in this case?

A. No.

Q. I'm going to open what's been previously marked as Exhibit 5, which has been shared in the chat feature.

Do you recognize this document?

A. Yes.

Q. What is this?

A. That's my current resumé.

Q. Did you prepare this document?
A. I did.
Q. And you testified earlier that you reviewed it prior to this deposition to ensure its accuracy.
Is there anything that you felt you excluded or needed to change or modify in your resumé?
A. The only thing that needed to be updated was the "VHA Chief Financial Officer January 2026 to Present." I had just been officially placed into that role, so I added that.
Q. It's accurate in its current form?
A. Yes.
Q. Let's -- I'm going to -- it's a two-page resumé. I'm going to scroll to the second page, which is CLJA_USA_FORD_ 2.
Can you briefly describe your educational background for the court?
A. I received a Bachelor's in History from what was then Towson State University now Towson University, and then I pursued a Master's of Business Administration and Public Management at Hood College. And those are my two graduate or

my two degrees.

Q. I didn't have a date for your education. So I'm not certain how the resumé jumps from graduating from with an MBA to your next employment position.

Can you help me understand that?

A. I received my Bachelor of Science in 1997, and I believe I received my Bachelor's of Administration in 2007, 2008 maybe.

Q. You went back to grad school?

A. Correct.

Q. Was there a reason that you decided to do that, a job reason or personal reason?

A. Personal.

Q. What -- what type of employment did you have prior to the first -- okay.

Is that under Early Career?

A. Correct.

Q. Will you walk me briefly through those positions just to explain how your career progressed after graduating from undergraduate?

A. In 2001, I accepted a position with what was BearingPoint Consulting. I started off as a consultant, finalized my career there,

finished my career there as a senior consultant. And I worked for several clients, mostly the U.S. military or the U.S. Army specifically, providing different types of service -- client services for them focused on business functions and resource management-type work.

I then left BearingPoint and went to the Defense Intelligence Agency from 2007 to 2008, and I was a program analyst there working in the what would be known as, like, the JH Shop, which is a resource shop.

I then left the Defense Intelligence Agency and went to what was then the TRICARE management activity. It's now known as the Defense Health Agency. I began my career there as a budget analyst. I specifically was working the research development and test and evaluation portfolio for the Defense Health Program, which is an appropriation. I spent my time there doing that.

I was then promoted to a supervisory budget analyst working as the director essentially for the Defense Health Programming Office, and that's where I ended my career there.

Q. What is -- how does the Defense Health Programming Office compare, like, how does that relate to TRICARE under VHA?

A. So the Defense Health Programming Office is responsible for building the internal budget request, as well as the President's budget submission. Those documents request funding to support health care delivery to military service members, their families and retirees, and TRICARE falls under that umbrella.

Q. I see.

And so it sounds like from your first job out of college you were already working as a consultant with the federal government?

A. I had a brief stint prior to becoming a consultant working for Towson University in the Orientation Office. That is not on my resumé.

Q. I see.

But as early it says you -- oh, and you graduated in '97?

A. Correct.

Q. And you began -- you began working with as a consultant for the federal government by

January 2001?

A. Correct.

Q. And you have -- and that was the last time you were a consultant.

It sounds like you transitioned into employee roles with the federal government starting approximately March of 2007?

A. Correct. I transitioned to federal service.

Q. And you've worked -- your resumé reflects that you started your work under the DHA, which is a different department than the VHA?

A. I started my federal service with the Defense Intelligence Agency and then transitioned to TRICARE management activity, which is now called the Defense Health Agency.

Q. Were you working -- you weren't working with VHA in these early years?

A. No.

Q. And so were you working in an entirely different location and office building during those times?

A. For my tenure at Defense Health Agency, I was working in Falls Church at the

Defense Health Headquarters. When I was working at the TRICARE management activity, we were also working in Falls Church in a different building.

Q. When you transitioned to working with the DHDVA -- let me try this. VHA.

When you transitioned to working with the VHA, it looks like that was approximately July of 2019. Where did your office shift to?

A. So when I came to the Department of Veterans Affairs, I started off in the Office of Management, which is the senior advisor role. I did not transition to VHA until this -- this January.

Q. I see.

Explain the how -- explain the difference between that job working for the Department of Veterans Affairs and then your position now with the VHA.

A. So the department -- the Department of Veterans Affairs is the umbrella organization. So when I worked at the Office of Management or within the Office of Budget, I was part of the overarching umbrella or headquarters organization under which there are different administrations.

VHA being one of those. So that's the difference is working under -- working on the umbrella or working under the umbrella.

Q. Thank you.

And yesterday we deposed Andrew McIlroy, who is the Deputy Assistant Secretary for budget VA-wide.

He would be more in that umbrella role that you just described?

A. Correct.

Q. Do you know him?

A. I do. He was my boss until this January.

Q. Okay. So you worked briefly as the senior advisor, Department of Veterans Affairs, and that position was located in Washington, DC in the July 2019 to December 2019 time frame?

A. Correct.

Q. Was that beneath Mr. McIlroy?

A. No, that was for the Assistant Secretary's office. So that would be above Mr. McIlroy.

Q. And so the VA Secretary is currently Doug Collins.

The Assistant Secretary is currently?

A. Richard Topping.

Q. Richard Topping.

And you worked for those two gentlemen or those positions?

A. Those positions.

Q. As a senior advisor.

So that -- so how would you describe that position?

A. It was a job where you are doing a lot of cross-coordination, reviewing correspondence, responses, reports, ensuring it has the voice of the Assistant Secretary, and providing any advice, counsel related to ongoing matters within the broader Assistant Secretary of Management's purview.

Q. Your resumé reflects that in September 2019 you shifted to the acting Associate Deputy Assistant Secretary.

Can you tell me why that transition occurred so quickly?

A. The office had lost the Associate Deputy Assistant Secretary. That position needed

to be filled, and based upon my background and experience, I was asked if I would assume that acting role.

Q. What did you do in that role?

A. I was -- so I oversaw two portfolios under that role: the Veterans Health Administration as well as the Office of Information & Technology and the Electronic Health Record Modernization.

And essentially I provided direct oversight for the budget requests for those, both the internal bill as well as the President's budget request, worked on apportionments requests from -- meaning we requesting our money from OM -- the Office of Management and Budget.

I worked on Congressional Reports, correspondence, and any projects that required attention or fell within those -- within those buckets of responsibility or within those portfolios of responsibility.

Q. I remember reading that there was a lot of issues with that electronic modernization effort.

Do you have any recollection of your

work on that during that job position?

A. Yes.

Q. Can you share that with me?

A. So we oversaw the budget requests for the Electronic Health Record Modernization program. So this would be how much funding they would request annually from Congress. That -- those budget requests were based upon a lifecycle cost estimate that had been built at that point in time.

Q. And what were the -- were there complaints or efficiency issues that you had to work through during that role with the electronic modernization program?

A. From a funding perspective, not necessarily. Those were all technical issues and outside my -- my scope of expertise.

Q. Someone not you was work -- was dealing with that?

A. Yes.

Q. Okay. And so you transitioned out of that role a little less than a year later and moved into the -- into your current role, Associate Deputy Assistant Secretary, but I'm

telling -- let me -- will you explain to me this, how the July 2024 to December 2024 fits into the Associate Deputy Assistant Secretary time frame?

A. So I had been made permanent into that, the Associate Deputy Assistant Secretary role in, I think it was -- let me see -- August of 2020. In July of 2024, the then Assistant Secretary for Management departed, and there was a leadership shuffle at that point in time.

So Mr. McIlroy became the principal Deputy Assistant Secretary for Management, and when he assumed that temporary job, I then moved into the acting position of the Deputy Assistant Secretary role. So I was still permanently within my Associate Deputy Assistant Secretary role and detailed into that position for that period of time.

Q. And help me understand how your job duties changed during that period.

A. So during that period, rather than being focused on just a single portfolio, I was in charge of the entire Office of Budget from day-to-day management, supervision of staff, assigning workload, and that then included

oversight of all equities that fell within the Office of Budget purview.

Q. Essentially, the job duties that Mr. McIlroy would have testified that he performs, you were working on the same --

A. Correct.

Q. -- information?

Okay. And so you have significant experience working on budgeting for the entire -- entirety of the Department of Veterans Affairs, and it wasn't until recently that you have -- that you have only worked for the VHA component of the Department of Veterans Affairs?

A. So under my job within the Office of Budget, VHA was part of my portfolio. I did not move over to VHA as the acting CFO until this past August.

Q. And that's under experience "Acting, VHA Chief Financial Officer (Detail) August 2025 to January 2026"?

A. Correct.

Q. Do you consider yourself knowledgeable and to have expertise on budgeting affecting the entirety of the Department of

Veterans Affairs in addition to VHA?

A. To an extent, yes.

Q. You worked on budgeting for that department since?

When would you say that you -- would that be the August 2020 or would it be the July 2019?

A. I would say the July 20 -- I would say August 2005. Hold on. I'm sorry. Like it's hard -- I have to look up at the left screen.

September 2019 is when I started to become more familiar with and involved in budgeting for VA-wide.

Q. And at the present time, you're responsible for providing leadership and direction over all VHA budget, finance, and managerial cost accounting operations; is that right?

A. Correct.

Q. And your resumé reflects and your job position that you produced that includes oversight of over 200 full-time equivalent professional staff?

A. Could you rephrase that for me?

Q. Sure. Uh-huh.

Your current job position includes oversight of more than 200 VHA staff?

A. Yes.

Q. Would that be the offices that we discussed earlier?

A. Yes.

Q. And those are primarily administrative positions?

A. No.

Q. How would you describe those?

A. Revenue ops is more operational as well as payment ops being more operational, with the remainder of the offices being more administrative oversight with some involvement in terms of operational, like, operational direction.

Q. Your current job title of chief financial officer for the VHA, you are senior leadership for that department?

A. Yes.

Q. Do you oversee the preparation and execution of the VHA budget?

A. From a top level, yes.

Q. What do you mean by "from a top level"?

A. So from a total resource perspective, yes, but the day-to-day execution of funds does not necessarily fall within the scope of this office's operations.

Q. Where would that fall?

A. It falls within program offices as well as other divisions within VHA.

Q. Who runs the program offices?

A. Various senior leaders.

Q. How -- your -- let's look at -- let's look at your job position that you produced.

I have previously shared that document as Exhibit 7, and I will put it on the screen for you.

Do you recognize this document?

A. I do.

Q. What is this?

A. This is my position description or the position description for the CFO.

Q. Do you review this before you accept your current position?

A. I did look at it briefly after the fact.

Q. Do you -- we'll read the position summary together. It says:

"Chief financial officer (CFO), fully responsible for over $150 billion in financial assets."

And I think your resumé reflects that it's increased since this was written?

A. Yes.

Q. To how much now?

A. Approximately 160 billion.

Q. "Incumbent" -- and that's you. That's whomever has this position, right?

A. Correct.

Q. "Incumbent is responsible for providing leadership and direction of all VHA budget, finance, and managerial cost accounting operations through more than 200 full-time equivalent professional staff members in subordinate in-house directorates and out-based data analyses centers."

That's your current job responsibilities?

A. Yes.

Q. And so you are responsible for

direction of all VHA budget and finance and managerial cost accounting operations?

A. Correct.

Q. And it says as a part of this job, you report to the department's DCFO.

What is that job title and who is that currently?

A. Could you increase it real quick?

Q. Of course.

A. I report to the Mr. -- Mr. Ed Murray, Edward Murray, who is the Principal Deputy Assistant Secretary and the deputy CFO for VA.

Q. And if we go down to the Bates number 5 for this document, there's a more in-depth description of your major duties and responsibilities, correct?

A. Correct.

Q. You direct and monitor the financial execution of the VHA's budget?

A. Correct.

Q. And so the way that I have been trying to understand the difference between your role and Mr. McIlroy's yesterday is: He helps to determine how much total funding the Department of

Veterans Affairs requests, how the funds are structured in the budget, and you ensure that you help execute the budget that has been appropriated for the VHA and ensure that the VHA stays within its appropriations.

Am I understanding that correctly?

A. Correct.

Q. Do you often have -- because it's important for you to understand how the budget works in execution, what is -- how do you go about that in your job position? What -- how do you ensure that?

A. So we monitor execution monthly. We can pull reports and develop reports regarding execution -- I'll use the term -- obligations. That's the appropriate word for it. How much funding VHA as well as any of its subordinate organizations have obligated.

We track to make sure that we are not over -- over-obligated, that we will stay within the bounds of the total funds that have been appropriated. If there is a need to move funds between entities, VHA entities, we will do that.

We can -- we will also then work to ensure if we need to transfer funds. We will work the appropriate notifications and approval requests for that, as well as if we are running, hypothetically, short of funds, we would then flag that and work appropriate courses of action.

Q. Are you the individual that would decide, or individuals that work for you, which -- which and how much facilities receive allocations?

A. So we do provide the resource allocations. We do present that to VHA leadership for their knowledge and understanding, and if there's any adjustments that they would like to have made, we would do that, but typically that does not -- adjustments would not occur initially. They would occur during the year of execution.

Q. On an as-needed basis?

A. Correct.

Q. And if you have to increase the amount allocated to one facility, you have to come up with that allocation from somewhere else? You have to pull that money from somewhere else?

A. So we would stay within the bounds of the funds that we have been appropriated. We

cannot just move funds between our accounts. So we would do things like internal swaps, or if we had not moved all -- pushed all the funds out, we could work to move funds to the proper organization. But the top-line control and then the control by appropriated accounts stays the same unless we seek approval to move money.

Q. Who do you seek that approval from?

A. Depending on the statutory requirements, most likely it would be Congress.

Q. And so you need Congressional approval to move -- to do internal swaps? That's not within -- you don't have the authority to do that unilaterally?

A. So yes, we require -- we have a cap in terms of how much we can swap, and the current law has a restriction in terms of what that looks like.

Q. And if it goes above the cap, then you have to seek statutory approval from Congress?

A. Correct.

Q. When there are complaints at individual facilities about inadequate number of doctors or resources, does that make its way up to

you as it relates to the execution of the budget?

A. It can.

Q. And is that when -- are those -- is that an example of a moment where you might try to do internal swaps under the cap?

A. So first it would be an HR matter in terms of positions. However, if it turned into a funding matter, it would then -- they would then loop in my office and my team on that.

Q. How often does that occur in your role?

A. In the six months that I've been here, I can't think of a time where we have been asked to move money to make that happen, with the exception being the EHR deployments.

Q. What is that?

A. That's the new Electronic Health Record.

Q. And you were asked to move money to support that? Can you tell me about that?

A. We were asked to provide additional funding to support hiring of nurses, informaticists to essentially provide surge support for the new Electronic Health Record

deployment.

Q. How much? Do you remember?

A. Not off the top of my head. I do not recall.

Q. Would it be in the millions or?

A. Yes.

Q. And so when a request comes in like that, it's your job to find a place to take that money away from to make room for the new funding?

A. So in this case, we had anticipated the cost of the new Electronic Health Record based upon past deployments. So we had budgeted for -- budgeted funding to support any requirements that would come about as the result of that. So we didn't have to necessarily reduce a facility's budget. We had that money already available within our budget request.

Q. It had already been worked into the budget and a reduction had been made to support it in anticipation of it coming due?

A. The budget request reflected that, and then it was appropriate -- it was included as part of our overall appropriated dollars.

Q. Do you know, was it all new money

allocated or was it a reorganization, if you know?
A. I don't believe it would be considered new money appropriated since the Electronic Health Record has been an existing project. However, given the deployment schedule, we would have adjusted the funds requested based upon that schedule.
Q. And so you testified that -- so you've only really been in this role for six months?
A. Yes.
Q. But you've been working with the VHA for approximately how long?
A. Since I think it was 2020.
Q. And has that always been in a budgeting/financial role?
A. Yes.
Q. As a part of your current role, do you interact with the OMB and the GAO regarding financial and budgeting issues?
A. Yes.
Q. You are aware of those agencies and their role in the -- as it relates to the VHA?
A. Yes.

Q. Will you describe that for me?

A. The Office of Management and Budget is the Administration's arm for development of the overall funding request for the federal government. We interact with a team over there that oversees the Veterans Administration portfolio.

So that would be the group that we would interact with in terms of submitting our budget requests, any budgetary decision-making. They would assist if we were going to do a transfer. They would -- we would engage with them to ensure that they had awareness of that.

We would brief them on -- we brief them monthly on the status of our budget execution, and then GAO is -- comes in and often does reviews depending on, it could be, you know, requested by Congress or something that they're interested in. So they often do reviews of VHA and not necessarily singularly scoped on funding matters.

Q. What about the GAO?

A. The GAO is like -- as I said, it would do reviews of VHA. It could be operational

matters. It could be funding matters. And then they generate reports that are provided to Congress and I believe are made public.

Q. Is it part of your job to review those reports and to make any changes that they recommend?

A. Yes, we are often -- for any report that applies to our area for which we've been involved in the review, we are provided the opportunity to review that report and offer comments.

Q. And now you're in this -- the role that you're in as CFO, that responsibility would fall to you to manage or prepare?

A. If it was applicable to this office, yes, but we do not review every GAO report.

Q. Why is that?

A. Some of them are operational reports that don't involve budgetary resources. So we would not review those types of reports.

Q. But you do review all GAO reports that are relevant to VHA and budgetary and financial matters?

A. Yes.

Q. You -- it says on the screen that you -- part of your job position is to support the administrative -- Administration's strategic and business planning processes.

Is part of your job ensuring that the VHA budget reflects the current Secretary's goals and policies?

A. Yes.

Q. And it's my understanding that right now the VA Secretary Doug Collins has a large initiative that he's pursuing; is that right?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: I can't speak to which initiative you're talking about. There -- I don't know which one you would -- I would need additional information in order to answer.

BY MS. WALLACE:

Q. Are you aware he's recommending a complete restructuring of the VHA?

A. Yes.

Q. Currently?

A. Yes.
Q. And that complete restructuring has a lot to do with the organization's finances and budgeting; is that right?
A. I would not --
MR. KLOTZBUCHER: Objection. Foundation.
You may answer.
THE WITNESS: I would not necessarily characterize it as a budgetary matter or a resource matter.
BY MS. WALLACE:
Q. Can you tell me? My understanding was that he is promoting the dissolution of approximately 40,000 positions. I would have thought that had an impact on budget and finance for VHA.
A. My understanding --
MR. KLOTZBUCHER: Objection to form.
You may answer.
THE WITNESS: My understanding is that is where previously -- those positions have been

vacant for some period of time, and depending on how long those positions have been vacant, it's possible -- it's likely we had not requested budgetary resources. Those positions may have been on the books for many years without being filled.

BY MS. WALLACE:

Q. What do you understand to be Secretary Collins' restructuring plan that he's pursuing for 2026/2027?

A. Of the VHA?

Q. Yes.

A. My understanding is that this is to gain efficiencies, to look at how we change the operational dynamic of VHA, ensure that we do not -- that we are aligning like functions with like functions. Ensuring that we create a seamless organization that breaks down barriers and helps -- helps the veteran's experience in their interaction with VHA.

Q. Have you been consulted regarding how his restructuring plan could affect budgeting or finance for VHA?

A. I have not been directly consulted by VHA leadership.

Q. Have you seen the -- have you visualized the plan from a budgeting perspective, the reorganization plan?

A. I have seen the new versions of the new org chart, yes.

Q. Is it your testimony that you don't expect the restructuring plan of Secretary Collins to affect the budget moving forward?

A. I do not expect a change in the processes we use to budget. I do not expect a change in our overall way that we go about monitoring and executing resources. And I do not expect that, you know, I do not see where we would significantly adjust today the budget for VHA.

Q. Have you seen the risk analyses that the VHA department has performed related to the restructuring?

A. I have seen parts of it.

Q. It's my understanding that it hasn't been publicly produced to date; is that right?

A. My understanding is a lot of documentation has -- is -- remains predecisional.

Q. Regarding the restructuring plan?
A. Correct.
Q. Meaning not available for public?
A. Correct.
MS. WALLACE: Do you guys want to take a break?
I try to break every hour, Ms. Ford. I went a little bit over. Do you want to take, like, a 5- or 10-minute break?
THE WITNESS: That would be fantastic. Thank you.
MS. WALLACE: Okay. I'll see you back at maybe what time, everybody? 10:25?
MR. KLOTZBUCHER: Okay.
THE VIDEOGRAPHER: All right. We're going off the record at 10:16.
(A recess was taken.)
THE VIDEOGRAPHER: We're back on the record at 10:27 AM.
BY MS. WALLACE:
Q. Ms. Ford, I want to finish just going over a couple things on Exhibit 7, and then

I want to talk a little bit more about the budget that you oversee.

So to confirm, do you agree that all of the descriptions on the screen in Exhibit 7 under Description of Major Duties and Responsibilities, do you agree that those are all of your job functions in your current role?

A. Yes, as of today.

Q. As of is it approximately six months?

A. Yes.

Q. And if so and just from A, it looks like it is your job responsibility to take the budget that's been allocated by the VHA and to make sure that the implementation of that budget efficiently supports health care delivered to the nation's veterans, correct?

A. Correct.

Q. And it also appears that in -- I was looking at L -- it's your responsibility to prevent anti-deficiency violations --

A. Correct.

Q. -- and to notify the department's DCFO on a timely basis that a violation may have

or has occurred?

A. Correct.

Q. When it says "anti-deficiency violations," is that under the Anti-Deficiency Act?

A. Correct.

Q. Describe for the court. What is the Anti-Deficiency Act and how does it relate to your role?

A. So it's a law that it makes -- essentially ensures that funds are used appropriately and within the bounds for which they are intended to be used. And for the purposes of the CFO role, it's important that we are using the appropriated funds as Congress intends.

So that would be ensuring that there is a bona fide need, that we are adhering to timelines for execution of funds, that we're not using them for purposes that were not -- that are not legally permitted.

Q. In your role, what happens in the circumstance if Congress fails to pass a full year appropriation by the start of the fiscal year?

A. For VHA, they receive or the

Administration has what's known as the advance appropriation where they receive the next year's fiscal year funding is appropriated in advance of the start of that fiscal year.

So, for example, as part of the 2026 appropriation, there was an advance appropriation for 2027. So VHA has funding appropriated for F -- for fiscal year '27 today.

Q. And I know --

A. So there are --

Q. Go ahead.

A. So there are no impacts under a CR.

Q. And when you use the word "CR," you're referring to Congress passing a continuing resolution?

A. Correct.

Q. Is that what you just described?

A. What I described is the advance appropriation and the impacts it has under a CR scenario for the federal government, or does not enact a continuing resolution.

Q. So what is a continuing resolution?

A. A continuing resolution would provide funding for the government to continue

operations for a specified period of time, allowing Congress additional time to appropriate a full year's budget for departments and agencies.

Q. Would you agree that continuing resolutions can create uncertainty for VA budget planning?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: For VA-wide, it can have impacts for other areas of the department.

BY MS. WALLACE:

Q. Are you saying it would not have an impact on the VHA, or it hasn't since you've been there?

A. It would not have an impact on the VHA because of the advance appropriation.

Q. Have you -- do you have knowledge in the past of the department notifying a potential violation?

A. There have been ADA violations in my six years with VA.

Q. Have you had one since you've been

there?

A. In my role as the CFO?

Q. Yes.

A. No.

Q. But there have been violations throughout the course of your six years with the VA?

A. Yes.

Q. And so based on the job position description, you are the senior official responsible for VHA's budget formulation, financial execution, managerial cost accounting, internal controls, and compliance with federal fiscal law.

Do I understand that correctly?

A. Correct.

Q. And it states on page Bates stamp 6 that your assignments are influenced by the policies and directives issued by the department CFO in governing federal organizations, such as OMB, Treasure, GAO -- I think I meant Treasury -- GAO, etc.?

A. Correct.

Q. And your work is evaluated on the

results achieved.

And would that be results achieved meaning staying within appropriation? No violations? How would you define the results achieved for your role?

A. That would be -- I would say that that would be part of that. Results would be staying within budget, staying within fiscal law meaning no Anti-Deficiency Act violations, ensuring our audit is completed, that we are working to reduce any corrective actions.

So the full span of financial management would drive my evaluated -- would drive the evaluation of results.

Q. It also states in other significant facts that you have to independently -- I think it meant to say -- execute significant actions relating to all CFO financial management functions of VHA's headquarters and field facilities.

Tell me what you do to manage financials for field facilities.

A. So currently we provide funds down to the facility level. We monitor those, the execution of those funds, and then we work to

resolve any funding issues that a facility may have.

Q. And how many facilities are there?

A. Over a hundred.

Q. So when you say "facilities," you don't mean the thousand VA centers?

A. It would only be VHA facilities. So health care medical centers, community-based outpatient clinics, and any other facilities that VHA would be the primary occupant or owner of. Although we probably don't own property.

Q. And so in order to accomplish the oversight of all of that, I imagine that you have people that are responsible for certain things and they all report to you for in your leadership role?

A. Not all CFOs or folks who execute funds report directly to me currently.

Q. Not all?

A. Not all.

Q. Who doesn't?

A. A VISN CFO does not report to me, a facility CFO does not report to me, and any budget staff or finance staff within program offices do

not report directly to me.

Q. Is that part of what Secretary Collins is working to shift the organizational structure to achieve?

A. Yes.

Q. Are you -- have you been consulting with him on the changes that he's recommending and making recommendations to him?

A. For the CFO function, I have been working with the Assistant Secretary for Management as well as VHA leadership generally in terms of what the CFO function will look like moving forward.

Q. Well, it will have increased oversight?

A. That is the goal.

Q. And I understand that it will eliminate many, the majority of the VISNs? V-I-S-N.

A. It will reduce the number of VISNs.

Q. Just so the court understands, will you tell the court what a VISN is?

A. Essentially, it's think of it like a region within the United States where health care

is delivered, and there are currently 18 VISNs. They make up different parts of this country. They oversee the health care operations. They have a number of facilities that fall within that area. They provide funding oversight, guidance direction. So that is essentially what a VISN is.

Q. And am I understanding correctly that you've been in collaboration on the restructuring plan in order to reduce the VISNs?

A. I have not specifically been in any discussions regarding the VISN restructuring. I have only been in discussions regarding the broader organization and some discussions specifically focused on the CFO shop.

Q. Could you say that last word again? CFO?

A. CFO shop.

Q. Shop?

A. Office. Shop or office.

Q. Okay. So you've been involved on how it -- how your office might be able to absorb additional job duties and functions under the new restructuring plan?

A. I've been involved in discussions in

terms of how we could reorganize the finance community, what that would look like potentially moving forward, and where there's efforts to consolidate like functions. Those would be -- that's the nature of those discussions.

Q. Okay. Do you agree with these additional job duties that are listed on pages 6 and 7 that they are consistent with your current role and expertise?

A. (Reviews document.)

Yes.

Q. Thank you.

Part of what you have been designated to talk about before the court in the Camp Lejeune litigation has to do with how the VHA receives its funding from Congress, and your designations E and F state:

"VHA's activities are primarily funded through annual Congressional appropriations.

"These appropriations are from the general fund, meaning care rendered by VHA is primarily funded through general taxpayer revenues and federal borrowing."

Is that your -- what your testimony will be?

A. Yes.

Q. VHA is not funded through a trust the same way that Medicare is.

Are you familiar with how Medicare is funded?

A. Not explicitly.

Q. Were you familiar with how TRICARE was funded when you worked for TRICARE?

A. Yes.

Q. How do you compare how TRICARE is funded versus VHA funding?

A. They're very similar.

Q. How is -- how describe in your own words does VHA receive its funding?

A. VHA submits an annual budget request to Congress through the Administration. That budget request outlines the amount and use of those funds. It breaks it down by account. And then once Congress appropriates funds, we receive those based upon the request we submitted.

MS. WALLACE: Okay. I want to share a document with you that I have

previously marked as Exhibit 8.

(Document marked for identification as Exhibit 8.)

BY MS. WALLACE:

Q. I'm going to upload it in the chat feature. It is called "Budget in Brief 2026."

We looked at it yesterday with Mr. McIlroy.

Have you seen -- have you ever seen this document?

Let me scroll to the top for a moment.

A. Yes, I'm familiar with the document.

Q. Did you help prepare this document at all or contribute to this document?

A. Yes, I helped prepare the document.

Q. Which parts did you prepare?

A. I reviewed the Overview.

Could you scroll down some more, please?

Q. Yes.

A. I reviewed the VHA section, the OIT section, anything dealing with the Electronic Health Record, as well as reviewed the table that

you're showing on page BiB-4. I reviewed the table on BiB-5. I worked -- helped work on the Cost of War Toxic Exposures Fund, or the TEF, details. I reviewed the table on BiB-7. The table on BiB-8. I reviewed the Secretarial Vision section. I reviewed the Veterans Health or the Veterans Health Administration.

Q. Did you review the entirety of the document?

A. No.

Q. Just certain sections --

A. Correct.

Q. -- as you've indicated?

A. Correct.

Q. Did you do the original drafting for any of the document?

A. No.

Q. I wanted to use the document for you to help explain which accounts that the VHA budget includes --

A. VHA --

Q. -- for its -- go ahead.

A. It receives mandatory discretionary medical collections and in some cases the

transformational fund.

Q. And so when we look at page BiB-3, we see a chart that shows VA Funding and beneath funding history it has a distinction between mandatory and discretionary funding.

As it relates to the VHA, can you tell me, would you agree that the majority of VHA appropriations are falling under Discretionary Funding that we see on BiB-4?

A. Yes.

Q. And so that would be Discretionary Funding includes nonemergency appropriations, if you look at Footnote 1, provided in annual appropriations acts and in the 2026 President's budget request.

And it looks like Mr. McIlroy explained yesterday that for VHA would include these different accounts: Medical Services, Medical Community Care, Medical Support and Compliance, and Medical Facilities, correct?

A. Correct.

Q. And that makes up the bulk 119 billion of the VHA's funding categories, correct?

A. That does make up the bulk.

Q. And so let's -- I wanted to understand Medical Services, which is the largest quantity in the billions, 69 billion of the funding for the fiscal year 2026 request.

What does Medical Services include for under the VHA?

A. Predominantly, it would provide health care within the VA system so at VA facilities, as well as support certain programs that VA is required to provide by law.

Q. And so this -- this category if we were just going to say in common sense what it was, if there are over a thousand VA facilities where there are doctors and nurses and staff and landscaping and property costs, is that -- what of that is falling under Medical Services?

A. So direct medical care would -- doctors, nurses, health care delivery would fall under there, not necessarily some of the facility-related costs.

Q. Because that would fall under Medical Facilities which has an $8.89 billion designation?

A. For 2025 yes, an 8 -- 8. -- or I'm

sorry -- 2024 enacted 8.5, yes.

Q. 8.9 or? You want me to zoom in?

A. Yeah. (Laugh). Sorry.

Q. No, you're fine.

A. 8. -- yes, 8.9 in 2024. 9.5 in 2025 enacted.

Q. And the request for 2026 is 11.7?

A. Correct. For 20 -- yes, 2026.

Q. And the amount requested for Medical Services I see has decreased from 2024. It went from 69 billion in 2024 to 69 enacted in 2025, but the request for 2026 is 57 billion, which is a negative change of 12 billion?

A. Correct.

Q. Do you know why that allocation has gone down?

A. There could be a lot of reasons for that to go down in terms of changes in health care demand. It could be lots of staff that attrited. There could be several reasons for that.

Q. Weren't you involved in preparing the 2026 request for Medical Services in your role?

A. Yes.

Q. So don't you know the answer to that? Why it went down 12 billion?

A. Well, there would be a lot of different reasons. There may not be one specific driver for a decrease in funding.

Q. And so for -- this is this year. So do you know what the most significant driver was for the $12 billion decrease?

A. I believe some of it was loss of staff.

Q. Meaning layoffs?

A. Meaning departures over the last year.

Q. What is your understanding as to why physicians have been departing the VA facilities?

A. In some cases, they may have left retired. They may have left for other jobs. They could have left under the Deferred Resignation Program or under a voluntary early retirement.

Q. Do you know how many left?

A. I don't know off the top of my head how many physicians left.

Q. Do you know how many staff and

physicians left?

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: For VHA, I believe it was in excess of 4,000 total people left.

BY MS. WALLACE:

Q. And that was in which year?

A. 2025 into 2026.

Q. That's a significant loss for VHA. Would you agree with me?

A. It is.

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: I would agree it's significant.

BY MS. WALLACE:

Q. Were they offered retirement packages? Was there -- do you understand the reason for such a significant exodus of physicians and staff from VA hospitals and facilities?

A. It could be -- again, I don't know

everyone's individual circumstance. It could be that they -- they accepted the Deferred Resignation Program. Coupled with that could have been a voluntary early retirement. Some people may have been already eligible for retirement and were planning to retire or some may have just found other positions and left.

I don't know, again, what the preponderance of that attrition was.

Q. That didn't come to you in a report?

A. I have not seen a breakdown of attrition over the last year in terms of reasons why for VHA.

Q. When you say "for VHA," you mean? What do you mean?

A. Meaning I have not seen a VHA report breaking that information down.

Q. So as far as funding goes, the exodus of approximately 4,000 staff has resulted in 12 -- approximately 12 billion or less dollars being allocated for Medical Services in 2026?

A. It would be a portion of that, not the whole amount. Because 4,000 would be across the entirety of VHA, which could occur in all

accounts with the exception of Medical Community Care.

Q. Correct.

Because the community care does not directly employ physicians under the VHA. So they would not be included in the 12 -- in the 4,000 or in the 12 billion loss?

A. So Medical Community Care is strictly funding community care. It does not include VHA employee costs.

Q. Right.

Was the accepted deferred resignation, was that a part of the current restructuring plan of Secretary Collins?

A. That preceded the current restructuring.

Q. Was that associated with DOGE?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: I believe, yes.

BY MS. WALLACE:

Q. And DOGE do you understand was established under the Trump Administration and

Elon Musk as the Department of Government Efficiency.

Is that your understanding?

A. Yes.

Q. And part of the recommendation from DOGE was to increase efficiencies in government agencies, including health care agencies; is that right?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: I'm sorry. Could you repeat the question?

BY MS. WALLACE:

Q. Yes.

DOGE, their goal was to increase efficiencies in government agencies, particularly health agencies?

MR. KLOTZBUCHER: Same objection.

You may answer.

THE WITNESS: That would be part of their plan, but not necessarily the driver of it.

BY MS. WALLACE:

Q. Let me just make sure.

So I understand that you've been with the Veterans Health Administration for six years total.

So you were an employee and working for VA when DOGE initiatives went into effect, correct?

A. Correct.

Q. Which was in approximately the 2024 time frame?

A. January 2025.

Q. And so that was that were you in your -- you were not yet in your current role but you --

A. Correct.

Q. What role were you in during that time?

A. I was in the Associate Deputy Assistant Secretary role.

Q. Do you understand that DOGE sent operatives into the VA to identify wasteful contracts and eliminated bureaucracy and reduce costs?

MR. KLOTZBUCHER: Objection as to form.

You may answer.

THE WITNESS: It is my understanding there were DOGE employees within the VA.

BY MS. WALLACE:

Q. Do you recall that part of the DOGE plan the leadership announced plans to cancel 875 contracts worth approximately $2 billion?

A. I am aware.

Q. And did you have any role in developing the impact to the budget or to resources or to delivering quality care to veterans that that would have made to the program?

A. Yes.

Q. And what was your response?

A. My -- my role was to collect the cost impacts of those contract reductions to then understand what those would look like and, as part of those cost reductions, help develop a transfer request of savings.

Q. What savings?

A. Contract savings.

Q. Meaning if the -- if the contracts were canceled?

A. Correct.

Q. And so explain to me, again, what your recommendation was, please.

A. The out -- the out -- the result of my work was the total amount based upon a point in time and based upon data collected from each administration and staff office of the contract -- of the cost of the contracts that had been canceled.

Q. Was that the $2 billion that I just stated?

A. No.

Q. What was it?

A. It was less than that at that point in time.

Q. And so am I understanding that you were tasked to evaluate the cost -- the savings to the program if they canceled 875 contracts?

A. My task was to collect that data from the various administrations and staff offices and then calculate the total amount.

Q. Did you have an opinion on whether

or not the cancellation of those contracts would have been good for the veterans?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: I did not.

BY MS. WALLACE:

Q. You have no opinion?

A. Professionally, no.

Q. Because it's not a part of your accounting job to have opinions. You're there to crunch the numbers.

Is that what you mean?

A. My job was simply to gather the information, calculate the costs, and make sure that the data was accurate to the best of our ability at that point in time. So I tried to leave any personal feelings outside of my professional work.

Q. Did you have a personal opinion on what the cuts would have -- how they would have impacted veterans like your family members?

MR. KLOTZBUCHER: Objection. Form and foundation.

You may answer.
THE WITNESS: Yes.
BY MS. WALLACE:
Q. What is it?
MR. KLOTZBUCHER: Objection. Again, form and foundation.
THE WITNESS: I -- I felt that in some cases there may have been hasty decisions made without a full understanding of impacts, but that was not just for the VA but government-wide.
BY MS. WALLACE:
Q. Thank you.
The accepted Deferred Resignation Program came out of that initiative; is that -- is that correct?
A. It was one of the DOGE initiatives or it was one of the initiatives of the Administration via DOGE.
Q. What were the other ones, if you recall?
MR. KLOTZBUCHER: Objection. Foundation.
You may answer.

THE WITNESS: There -- there was a look at changing the -- how certain government positions are, whether they should be career or schedule policy.

There was a review of union contracts at that point in time. There was Buy America or Buy American Initiatives. There were initiatives to review certain programs and then determine whether those should be funded.

That's all that comes off the top of my head, but there were -- there were many.

BY MS. WALLACE:

Q. Many initiatives under DOGE that would have -- that the goal was to create -- improve efficiencies in the department through -- through a variety of means?

A. Within the department and across government. It was not just singularly focused on VA.

Q. My understanding is that after pushback from lawmakers and veteran advocacy groups, the VA temporarily paused some of the

contract cancellations?

MR. KLOTZBUCHER: Object to form.

BY MS. WALLACE:

Q. Is that your understanding?

MR. KLOTZBUCHER: I'm sorry. Objection. Form.

You may answer.

THE WITNESS: I believe that is accurate.

BY MS. WALLACE:

Q. Was the goal, if you recall, aimed to reduce the VA workforce, including potentially thousands of employees to approximately 2019 staffing levels?

Do you recall that being a goal of DOGE?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: I can't say if I remember that was a DOGE goal, but there were -- there were -- if I recall correctly 2019 and maintaining VA at that

staffing level was a goal overall for VA.
BY MS. WALLACE:
Q. What was a goal? Say that one more time. I'm sorry.
A. To maintain -- to keep VA at the 2019 staffing level.
Q. And that's regardless of the growing number of veterans in the programs or under the PACT Act?
A. I believe, yes.
Q. Because the PACT Act was initiated in 2022 and staffing levels they wanted to freeze at 2019?
A. Correct.
Q. Do you recall there being the advocacy groups were significantly concerned about the impact to access to care and increased wait times and delays on receiving medical treatment at VA facilities?
MR. KLOTZBUCHER: Objection. Form.
You may answer.
THE WITNESS: In terms of the staffing impacts or the contract impacts?

BY MS. WALLACE:
Q. Yes.
A. Yes.
Q. That was the pushback from the public and the VAs?
A. I would say external stakeholders and interested parties.
Q. Is it true that the DOGE recommendations did not have any goals explicitly aimed to improve veterans' access to care or expand health care coverage for veterans?
MR. KLOTZBUCHER: Objection. Form.
You may answer.
THE WITNESS: To the best of my knowledge, I'm not aware of those.
BY MS. WALLACE:
Q. Are you aware of any initiatives under DOGE to shorten wait times for veterans?
A. To the best of my recollection, I am not aware of any.
Q. Or to expand mental health services?
A. There have been efforts to expand mental health services, but I don't know if those

directly came from DOGE.
Q. That's been more recent, correct?
A. Correct.
Q. Part of the DOGE efforts did not involve broadening benefits coverage; is that true?
A. Not --
MR. KLOTZBUCHER: Object --
THE WITNESS: -- that I am aware.
Go ahead, Bill. Sorry.
MR. KLOTZBUCHER: No, I apologize for talking over you.
I said: Objection.
Foundation.
You may answer.
THE WITNESS: Not that I'm aware of.
BY MS. WALLACE:
Q. And so there was also some -- some goals that came out of DOGE regarding increased AI tools being introduced into the VHA.
Do you recall that?
A. Yes.

Q. Do you know what the result of that initiative was with regard to AI?

A. I do not know the results of that.

Q. So regardless of the fact that some of the DOGE initiatives were paused, as we sit here today, from 2025 to 2026 we've had 4,000-person attrition in the physicians and staff across VA hospitals, correct?

A. As of -- it could -- as of a point in time there, that was the number. I can't speak to what that number is exactly today.

Q. It could be higher today?

A. It could be.

Q. Do you know when the last time you recall hearing that 4,000 number was? Was it right when you arrived in the role or during the role?

A. I would say probably around my arrival time in August of 2020 -- or September of 2025. August/September 2025. Sorry.

Q. And so we don't have an update on the 4,000 over the past approximately six months?

A. I have not seen any updated numbers.

Q. Going back to Medical Services on

the screen -- I'm sorry that we digressed from our exhibit -- I wanted to understand.

You also have designations C and D that we're going to talk about a bit later, but for the purpose of this question, I wanted to understand that the veterans who are eligible for enrollment in the VHA related to their residency at Camp Lejeune for 30 or more days, does that fall under this Discretionary Funding that we're looking at on the screen here, or is that under the mandatory funding?

Do you understand my question?

A. I do.

It could be both.

Q. Okay. Tell me how it is under the Discretionary Funding that we're looking at on the screen.

A. So this could be -- so if they are receiving health care or had been receiving health care, that would have -- at a VA facility -- that's important -- they would have -- that health care would have been paid through Medical Services.

Q. And was your testimony that

they -- if they had been -- if they qualified under the -- explain it to me, again, how we know that they were under the VHA discretionary.

A. So -- so if they were eligible and receiving care --

Q. Already?

A. -- already --

Q. Let's say.

A. -- through the VHA, even today, they could -- that could be paid for using medical services.

Q. And how would they -- and just so we're clear, so we're looking at the discretionary section. There is also a mandatory funding section that starts on page BiB- 5.

How would our Camp Lejeune veterans have ended up under this section -- receiving funding under this section?

A. So you'll note that there is a Cost of War Toxic Exposures Fund section. That is considered mandatory funding, which included certain presumptives as part of the PACT Act legislation. It is possible, depending on the nature of the care being provided to those

veterans, that it could be paid for by the Toxic Exposures Fund.

Q. Have you seen any data or analysis as to whether the Camp Lejeune veterans' and family members' eligibility has mostly been compensate under the discretionary versus the mandatory funding?

A. I have not seen a specific split of how health care was delivered or paid for -- sorry -- for those specific veterans.

Q. The Toxic Exposures Fund, do you know when that originated?

A. 2022 within the PACT Act.

Q. And the legislation that allowed veterans access to medical care if they were exposed for 30 days or more at Camp Lejeune, it's my understanding that that legislation predated the PACT Act and it was established in approximately 2012?

A. That would have preceded my time at VA, and I'm not aware of that specific piece of legislation.

Q. Well, you're designated to talk about it under C.

A. Okay.
Q. You're designated to talk about access to health care for the "Veterans who served on active duty at Camp Lejeune for 30 days or more between August 1, 1953 and December 31, 1987" and their eligibility for enrollment in the VHA.
A. Yes, we can talk about that. But that specific piece of legislation I have not looked at, and I'm not familiar with what's included in that specific piece of legislation.
Q. I see.
So if I were to tell you that the -- that legislation was passed in approximately 2012 and the PACT Act was in 2022, would -- would it make sense to you that most of the funding related to those veterans would fall into the discretionary bucket --
A. Yes.
Q. -- of compensation?
A. Yes.
Q. Okay. All VHA funding ultimately depends on federal statutes enacted by Congress, correct?
A. Correct.

Q. Do you agree that Congress has the authority to amend or repeal those federal statutes?

A. Yes.

Q. And that authority applies to both discretionary and mandatory funding statutes, correct?

A. Correct.

Q. Discretionary VHA funding has to be appropriated annually by Congress, correct?

A. Yes.

Q. And Congress determines the amount of discretionary funding each fiscal year as a part of that requirement, correct?

A. Correct.

Q. Congress may increase, decrease, or maintain that funding level from year to year.

Do you agree?

A. Yes.

Q. Do you agree there is no legal guarantee that future discretionary appropriations will remain at the current levels that we see in the report we're looking at?

A. It's possible. So yes.

Q. Yes, you agree?
A. Yes.
Q. Mandatory funding exists only for as long as the authorizing statute remains in effect.
Do you agree?
A. Yes.
Q. Congress can amend or appeal mandatory funding statutes, true?
A. True.
Q. Congress can modify mandatory funding levels through subsequent legislation.
Do you agree?
A. Yes.
Q. Congress can rescind unobligated mandatory balances.
Do you agree?
A. Yes.
Q. Mandatory status does not make the funding Constitutionally protected.
Do you agree?
A. Yes.
Q. The eligibility criteria for VHA enrollment is established by statute.
Do you agree?

A. Yes.
Q. And like with appropriations, Congress can modify eligibility categories in the future, correct?
A. Yes.
Q. Copayment exemptions that you mention in your designations C and D, those are also statutory and can be amended, correct?
A. Yes.
Q. The list of covered conditions that you mention, the 15 covered illnesses and conditions, those can also be revised through legislation; is that true?
A. Yes.
Q. Do you agree with me that the VA reimbursement methodology as it relates to the Community Care Network, which includes Medicare base rates for community care, do you agree that those are established by statute and regulation?
A. Yes.
Q. Do you agree that Congress has the authority to change those reimbursement formulas?
A. Yes.
Q. And payment methodologies are not

permanently fixed by law, correct?

A. Yes, correct.

Q. A patient's access to care depends in the VHA program, not only on eligibility, but also on available funding and staffing.

Do you agree with me?

A. (Pause). Yes.

Q. If funding levels change, do you agree that operational capacity could be affected?

A. Yes.

Q. Do you agree that future funding levels for the VHA depends on future Congressional decisions?

A. Yes.

MR. KLOTZBUCHER: Objection.

THE WITNESS: Oh.

MR. KLOTZBUCHER: You may answer.

THE WITNESS: Yes.

BY MS. WALLACE:

Q. So as we look at current Exhibit 8, the budget that you helped to prepare, no matter whether funding is discretionary or mandatory, continued payment at current levels depends on

ongoing Congressional authorizations and appropriations; is that true?

A. Yes.

Q. Your job in the role that you currently have as CFO for the VHA, you cannot obligate funds in excess of your appropriated authority for the agency, correct?

A. Correct.

Q. Are you familiar with the VA financial policy documents that are published on the VA's website that address appropriations law and funds control?

A. Yes.

Q. What do you use those documents in your role for?

A. So those provide overarching guidance and direction not only to my office and my team, but also to the VISNs and the -- or the VISNs and the field CFOs in terms of use of funds, how to -- how to obligate. So general financial and fiscal policy surrounding monies appropriated by Congress.

Q. Does that have to do with the appropriate -- you have to stay within appropriate

federal laws and regulations as you appropriate funds?

A. Yes.

Q. In your role, you do not have the authority to create a new budget or to spend beyond the appropriated amount provided to you?

A. Correct.

Q. And so the VA's ability to pay benefits is constrained by the amount Congress has apportioned; is that right?

A. The funding we request is sufficient to provide health care for that fiscal year.

Q. The amount that you request?

A. The amount that we request and then is appropriated typically is -- matches what we requested and is sufficient to provide health care.

Q. Do you agree with Secretary Collins that the VA is not fully staffed?

MR. KLOTZBUCHER: Objection. Form and foundation.

You may answer.

THE WITNESS: I would say that there -- that there are staffing

challenges throughout the department.
BY MS. WALLACE:
Q. Are you aware that he testified before the -- as a part of his role, he has to testify before the Congressional committees for veteran affairs.
Do you understand that?
A. Yes.
Q. Is that on an annual basis?
A. It's typically when he is asked to testify.
Q. And were you with him at all when he's testified recently within the last six months before both the House Veterans' Affairs Committee and the Senate Veterans' Affairs Committee?
A. I have not been present for those.
Q. If he testified that the VA is "not fully staffed and we haven't been in 15 years!" do you agree with him on that?
MR. KLOTZBUCHER: Objection. Form.
You may answer.
THE WITNESS: Staffing is all -- I would say there are times when

staffing has been challenged over the last six years I've been here. I think it depends on the administration, the office, but there's always staffing issues. But generally, yes, staffing can be a challenge.

BY MS. WALLACE:

Q. Do you agree with his statement that the VHA is not fully staffed and has not been in 15 years?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: I can only speak to the last six months and then my observations from my time at the Office of Management. I would not necessarily agree with that.

BY MS. WALLACE:

Q. And what is that opinion based on?

A. Observation of hiring -- of hiring and information contained within the budget documents in terms of requested full-time equivalent levels.

Q. Is it your testimony that even with the loss of 4,000 physicians and staff, is it your position that the VA is fully sufficiently staffed currently?

MR. KLOTZBUCHER: Objection. Form and foundation.

You may answer.

THE WITNESS: Was the question specific for VA or VHA? I'm sorry.

BY MS. WALLACE:

Q. VHA, and I'm actually very specifically talking about VHA facility -- their direct care facilities.

A. I can't speak to the VA -- VHA facility level. That would be a facility-by-facility question.

Q. And so you don't have an opinion on whether, like, at the facility, VA facility level whether the VHA is being properly staffed?

A. I think it depends on the facility.

Q. Some are fully staffed perhaps and some are not.

A. I would generally agree with that

statement.

Q. Based on your experience working with the VA and the VHA specifically, what is the effect on the veteran when a VA facility is not fully staffed?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: It can have an impact on health care delivery. It could mean that veterans do not receive care at that facility under a VA physician. They could be referred to the community for that care instead. Or it may delay the time that they have access to VA providers.

BY MS. WALLACE:

Q. The VHA under your direction has to manage staffing contracts and payments within its available funding, correct?

A. We work with -- on the staffing piece, we work with human resources on that, but yes, we need to stay within our -- our budgeted amount.

Q. And as it relates to the budget right now, you guys actually saved money.

You're saving $12 billion in your budget from last fiscal year to 2026 related to --

A. I would --

Q. -- the departure of staff in VA facilities?

A. I would not --

MR. KLOTZBUCHER: Objection.

You may answer.

THE WITNESS: I would not necessarily characterize it as a savings but a --

BY MS. WALLACE:

Q. It's reallocated?

A. -- budgetary change.

Because the overall budget did increase from 2025 to 2026.

Q. That's fair.

It is a re- -- it's a $12 billion opportunity to reallocate those funds elsewhere in the budget.

Is that a better way to say it?

A. Potentially.

Q. Would you mind explaining to us just briefly what the makeup is of these other -- there's four VHA buckets, essentially, of where the funds are spent under this Discretionary Funding column: Medical Services, Medical Community Care, Medical Support and Compliance, Medical Facilities.

We talked a lot about the doctors in the direct care and the nurses at the VA facilities.

Tell me what is falling under the Medical Community Care Discretionary Funding bucket --

A. That --

Q. -- up to 30 billion.

A. That's health care delivered by providers outside of the VA system. So it would be local providers within a community, and then VA -- they submit claims to VA that VA then pays through companies like TriWest and Optum.

Q. The majority of this funding makes up the -- what's called now the Community Care Network?

A. Correct.

Q. And my understanding is that the Community Care Network allows a veteran to receive care outside of a VA facility for a variety of reasons, such as if the care wasn't available in his rural community or may potentially it's a specialized care that might be not offered at the VA facility near his home.

And the VHA contracts with a third party administrator, such as TriWest or Optum, who manages -- who manages that reimbursement event on behalf of the VHA.

Is that your understanding?

A. Correct.

Q. And as a part of what TriWest and Optum, the third party administrators hired by the VHA, do is they apply reimbursement rates according to the service received, the CPT code, the ICD-9 code, the ICD-10 code, and it's their job to pay this outside medical provider the appropriate reimbursement rate for the care?

A. And it has to be within -- I would agree with that, with the -- with the follow-on statement that it has to be based within what the veteran was referred for.

Q. Correct.

And so this is not a situation where the veteran can just go to any doctor he wishes. There is a full process involved with him seeking authorization to receive that care outside of the VA, correct?

A. Correct.

Q. Do you know that process as a part of your role, or is that outside of your expertise?

A. It's outside my area of expertise.

Q. But you do know that it's not automatic eligibility. There are requirements such as medical necessity, preauthorizations, that type of requirement?

A. Yes, I'm familiar that there are requirements and the general -- the general process for it, but the specifics I do not know.

MS. WALLACE: You testified earlier that your -- well, are we -- are we at a break period? I lost track of break.

MR. KLOTZBUCHER: An hour has passed. So.

MS. WALLACE: Do you guys want to do a break?

Do you want to do another -- like maybe do a 5- to 10-minute break and we'll do another hour and then we'll break for lunch?

MR. KLOTZBUCHER: Okay.

THE VIDEOGRAPHER: Okay. We're going to go off the record 11:32 AM.

(A recess was taken.)

THE VIDEOGRAPHER: We're back on the record at 11:45 AM.

BY MS. WALLACE:

Q. Ms. Ford, welcome back. Before the break, we were talking about the budget document that I was sharing on the screen, Exhibit 8, and I will put it back up for us. I have a couple more questions about it, if you don't mind.

The $165 billion that you put on your resumé that you manage for the VHA funding, where -- I see discretionary funding of 100 -- of -- let's look at this year's 2026 -- 114 billion.

Does the other part of VHA funding come from the mandatory section, if you scroll down?

A. Most of that would. However, in the discretionary budget, there's also the medical research piece, which is -- falls under the CFO and VHA. So that would comprise part of that as well as the mandatory funding as well as the collections line as well.

Q. I see.

So tell me which one item then we're looking at to add in research to your budget.

A. Right below the subtotal for Medical Care + BRAVE with MCCF, you will see Medical and Prosthetics Research.

Q. And so the VHA has a separate -- how would you -- department that performs medical and prosthetic research on behalf of the health care services that it offers?

A. Yes, and funds -- funds are appropriated separately for that.

Q. And that's approximately $943 million for fiscal year 2026?

A. Correct.

Q. Do you know, is that research spread out across the country? Is it consolidated? Is it grants? How does that work?

A. Most of it is spread throughout the country at VA facilities.

Q. And that falls under your purview and under the VHA $165 billion budget?

A. Correct.

Q. So, so far we have Medical Services, Medical Community Care which is Community Care Network, Medical Support and Compliance, which we haven't talked about yet, and Medical Facilities and then Medical and Prosthetic Research, correct?

A. Correct.

Q. Tell us --

A. You also -- go ahead. Sorry.

Q. No, you go ahead.

A. In the Medical Collections Fund above that is also included.

Q. What is that?

A. So that is revenue from collections from veterans. It could be other health insurance through copayments. So that's also included as part of the VHA budget.

Q. And that's not an expense. That would be income?

A. Correct. It's revenue.

Q. And that's in the amount for 2026 of $4.5 billion in collected funds from either the patient or other insurance?

A. For 2026, that was our estimated collections.

Q. And what was actually received in 2025? Is that on the screen? Is that the 4.3 billion?

A. As of this document date, May 2025, that fiscal year had not closed out yet. So that was still an estimate.

Q. Is it a pretty reasonable estimate based on your knowledge of how much the VHA received from other insurance and patient payments?

A. Within a reasonable ballpark.

Q. And what else -- first let's describe Medical Support and Compliance and what that section supports for veterans, and it looks like the 2026 request is 12 billion.

A. Medical Support and Compliance funds

Central Office functions and activities, as well as it can support the VISN staff. So, for example, my salary would be paid for medical -- from Medical Support and Compliance, as well as any additional costs related to my position such as travel. So that would be what I would call overhead management might be a more reasonable term for it, not using governmenty terms.

Q. Sure.

Do you know if the Community Care Network third party administrators are paid also out of the Medical Support and Compliance bucket?

A. The third party administrators are paid for out of community care, the Medical Community Care.

Q. Okay. So the Medical Community Care includes both the payment of the third party administrators and reimbursement costs to outside, you know, outside providers. It's bundled together?

A. Correct. The total -- the cost of community care from that perspective, excluding any VA -- VA staff, is included in that appropriation line.

Q. Is that broken down anywhere on this document so I can see how much we're paying the TPAs versus for actual veteran care?

A. I don't believe in the Budget in Brief you will see a specific breakdown of that. This tends to be a high-level document.

Q. Do you know off the top of your head?

A. I don't know the total cost off the top of my head.

Q. Okay. But the Medical Support and Compliance, the 12 billion, that's primarily administrative in operation staff across the country?

A. For the Central Office. So the headquarters of VHA, as well as the VISNs, can be funded out of Medical Support and Compliance. The VISN offices and staff could be funded out of there.

Q. And there are currently 17 or 18 VISNs across the country?

A. 18 VISNs.

Q. And they are supposed to have regional monitoring of the VA facilities in their

region?

A. Essentially.

Q. Do they have a physical location, these VISNs?

A. I believe some do. Some may not have a physical office anymore.

Q. And then Medical Facilities. Can I assume that is the cost of the direct care VA facilities?

A. So yes, it would be maintaining the physical infrastructure, like, the facility. It does not necessarily include all costs associated with maintaining a facility.

Q. Where -- where would that extra cost be -- come?

A. In some cases, depending on the work that's done at a medical facility, we can use minor construction money for improvements at those facilities. So it depends on the scope of the project and the cost of the project. We could use minor construction as well to maintain and improve our facilities.

Q. Thank you.

Do you budget for the copayments and

other patient payments that are expected to be received from the veteran?

A. Could you rephrase that or clarify what you're asking?

Q. It looks to me like you budget with the understanding that you will receive a certain amount of patient contributions and other health insurance contributions based on the current budget that we're looking at, Budget in Brief?

A. Correct. We estimate the cost of that -- or estimate the collection. Sorry.

Q. Understood.

Is there any other category on the page that we're looking at right now, which is BiB-4, other than Medical Services, Medical Community Care, Medical Support and Compliance, Medical Facilities, Medical Care Collections Funds and Medical and Prosthetic Research that is included in the VHA's approximately $165 billion budget?

A. The Bridging Rental Assistance for Veteran Empowerment, BRAVE, would be included in that. Let's see.

The DoD transfers to Joint Accounts

at the bottom would be included in that.

Q. What is that?

A. It's the -- we common -- so there is a joint health care facility in North Chicago. Some people call it the level facility. That's a joint facility with the Department of War and we can -- each department contributes money to running that facility. So we budget for our portion of that.

And then there's the Joint Incentive Fund, which is for, like, innovative projection that we work in coordination and collaboration with the Department of War, and we typically budget money for that as well.

Q. And you have 180 million on that line item for 2026?

A. Yes.

Q. What else on this on the page would be under your budget?

A. Grants for State Extended Care Facilities. So that -- that would also be included.

Q. 171 million?

A. Yes.

Q. Anything else?
A. (Pause).
Q. Is the construction not on your budget?
A. That's a separate appropriation. So I don't have direct oversight of that, and it does not fall under my purview of responsibility or my line of responsibility.
Q. The Medical Facilities bucket.
A. Uh-huh.
Q. Is that -- help me understand. Is that like every year? Is that -- I assume you guys own the property for the VA direct facilities. So help me understand what that annual budget -- like so for 2026 it's 11.7 billion.

What is that actually going towards in 2026?
A. So some of that money will go towards things like repairing walls, painting. It could be that there's a project to renovate a space.

So think of it like if you were going to renovate your bathroom at home, we would

use money from that particular appropriation line to do that. Or if you're going to renovate your kitchen, it would be used for that. So for certain renovation projects.

Again, the scope of those projects as well as the total dollar amount dictates whether we can use that funding or we have go to a different source, like, minor construction for that funding. So that's -- it would be general upkeep for major I would say improvements to a facility.

Q. Thank you.

Anything else before we look at the mandatory funding page?

A. No.

Q. Okay. We are now looking at page BiB-5 of Exhibit 8. Can you tell me which line items would be -- would fall under your VHA budget under mandatory funding?

A. PACT Act section -- well, PACT Act Section 707 typically is for VHA. It does not necessarily. So that would be there. That's for leases.

And then under the Cost of War Toxic

Exposures Fund, the Medical Services line, Medical Community Care, Medical Support and Compliance, and Medical Prosthetic and Research.

Q. And, again, we see similar buckets but they're under -- as above, but they're under the TEF fund, such as Medical Services, Medical Community Care, Medical Support and Compliance, Medical and Prosthetic Research?

A. Correct.

Q. And so this is a relatively new funding stream established in 2022 by the PACT Act?

A. Correct.

Q. And it looks like there's been some allocated increases in that program as it's gotten underway.

Has that been under your purview?

A. Both in this role and my previous role, yes.

Q. And so do you know why this -- this particular item is under the Mandatory Funding section according to the federal statute PACT Act that -- that created it?

A. Correct.

Q. Do you -- can you tell me why you've anticipated such a significant increase in that funding?

A. I would -- number one, I would say there's several reasons. There's been an increase in terms of claims submitted which results in changes in priority groups for veterans which can increase veteran costs related to the presumptives that were outlined in the PACT Act.

Under the PACT Act as well, we were initially supposed to ramp in each of the presumptives over time. However, the Secretary was able to use his authority to essentially waive that and all presumptives became essentially avail -- I hate to use the word "available" but became open for claims to be submitted.

Q. Eligible?

A. Correct.

Q. They became eligible to apply?

A. Correct.

Q. Okay. Thank you.

I wanted to shift gears just a little bit and talk about billing-related practices at direct VHA care facilities.

Do you agree with me that for ordinary care at VA hospitals and facilities, veterans are not billed for their treatment?

A. I would say typically that would be true.

Q. They have patient contributions, but they don't receive a bill?

A. I don't believe they receive, like, a physical paper bill or an electronic bill.

Q. And as far as understanding how -- what the cost is to the VHA for a veteran to receive care at a VA facility, do you agree with me that your -- the managerial cost accounting process is -- is the best method that the VHA has to understand the cost to the VHA of seeing a veteran for a certain service?

A. Yes.

MR. KLOTZBUCHER: Objection. Form. I apologize.

THE WITNESS: (Laugh).

BY MS. WALLACE:

Q. Was your answer yes?

A. Yes.

Q. And you oversee and have expertise

in the managerial cost accounting, and I understand that it is one of the offices that you oversee, including used to oversee with Daniel Clarke?

A. Yes, I oversee the office. I would not say that I am an expert in managerial cost accounting.

Q. For when you were doing your budgeting process, to understand how much money to allocate to VA direct facilities, is managerial cost accounting one of the primary resources that you use in order to understand how to allocate resources?

A. Can I ask for clarification if you're asking about when we develop the budget that we submit to Congress?

Q. Well, so I'm -- so what I'm asking is: If we were looking back at that budget sheet -- and I'm happy to put it back up for you.

And -- here, I'll put it back up just so we can look at it together.

And we have Medical Services line item and it's estimated at 57 billion for 2026 down from 69 billion in 2025, is -- do you use --

is managerial accounting one of the methods that you use to best understand what the cost of care is going to continue to be in those VA facilities?

A. No.

Q. What is? What do you use?

A. There is an actuarial model that's been developed that informs about 90 percent of -- would inform 90 percent of our budget request.

Q. What is that? Do you know anything about how the actuarial model is formulated?

A. I've received many briefings on it, but I will tell you. I do not have knowledge nor the expertise to discuss how the actuaries build that model.

Q. Do you -- and so you don't know yes or no whether managerial cost accounting is one of the methods or considerations that they take into account when trying to understand the cost to the VHA of medical services in these facilities?

A. I'm not. I do not know if they use our managerial cost accounting data.

Q. What role does managerial cost accounting play in understanding the cost of delivering direct care medical services under the

VHA?

A. So that comes in more to -- more when we are actually working to -- we've received money from Congress. It has been apportioned down from OMB, and then we are working to allocate those resources and execute the funding.

Q. So it's actually used in practice to understand how much of your funds to put into the VA direct care?

A. It's -- it's one piece of that puzzle that we use.

Q. It's probably a pretty important piece?

A. Yes.

MR. KLOTZBUCHER: Objection.

BY MS. WALLACE:

Q. And so can I ask? If you are looking to receive the money apportioned and allocate resources for medical services for direct care at VHA facilities, is the reimbursement rates for the Community Care Network, is that anything that you look at in that capacity, or is that a completely, like, irrelevant factor for VHA direct care?

A. So there are considerations in terms of how much care has been provided in the community, what the projections potentially could look like moving forward, and then looking to understand based upon the resources how much should be allocated to community care.

But, again, most of the medical services is driven through that, number one, when it's requested through the actuarial model, but there's different practices that come into play when we actually operationalize and execute the money.

Q. Okay. Let me try my question again. It was a tiny bit different.

I think your answer was that: We always take into account the allocation between how much money we give Community Care Network and how much money we give the VHA direct care facilities.

And my question is: Does reimbursement rates for Community Care Network, that would not have anything to do with how much -- with the allocation of funds for VA direct care?

A. Not necessarily.
Q. No?
A. No.
Q. Okay. Because that's not how you -- that's not how you would analyze the VHA direct care in order to allocate resources. It's not one of the factors?
A. It's not one of the direct factors.
Q. Only with the sense of how much money to give to Community Care Network versus how much money to give to VHA, not to determine the amount of finances or funding to give to VHA direct care?
A. If I could rephrase it?
Q. Yes.
A. We use it. We use community care historic information to inform on the community care budget. For medical services, as we would use things like historic workload data from a facility to understand allocations by VISN and facility. That would be one factor in determining allocations.

But when it comes to requesting money, again, not all of those -- not every factor

comes into play, and the actuaries could give you more information in terms -- the actuaries would have to say how they kind of use data to build the model.

Q. The Community Care Network reimbursement rates, they're used to allocate resources to the Community Care Network, but they're not used to allocate resources to the VHA direct facility?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: I would say that's generally true.

BY MS. WALLACE:

Q. In the MCA, managerial cost accounting, it uses activity-based costing to determine costs, which can sometimes mean the costs are based on the volume of services provided at a VHA direct facility?

A. I believe that's an accurate statement.

Q. And the MCA National Data Extracts, NDEs, report the total cost of each encounter as

well as cost subtotals divided at the department and product level?

A. I'm not familiar with that specific extract, so I couldn't speak to what it contains.

Q. Do you know if MCAs are divided into three categories: fixed direct costs, variable direct costs, and indirect costs, and the sum of these costs equal the total cost?

A. I would say that that -- that is a general principle of managerial cost accounting, as I understand it.

Q. And do you know if the MCA NDEs do not include the cost of care provided by community providers?

A. I am not familiar with the reports and data pulls that they use to inform their cost development. So I could not speak to whether that's included or not.

Q. Does the VA publish its managerial cost accounting or is it internal VA work -- workup?

A. I don't believe we -- it's a public-facing document. At least that I'm aware of that we don't publish it.

Q. Has there ever been, to your knowledge, a comparison between the per unit cost of a service at a direct VA care facility versus the cost of the same care via a reimbursement rate through the Community Care Network?

A. I'm not aware of a per unit cost review or analysis.

Q. Are you aware of whether the VA is costing itself more money to pay for Community Care Network care or to deliver care to veterans through its VA facilities?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: If I could ask for clarification. Are you asking -- are you asking if VHA is conducting cost analysis as to whether it is conducting cost analysis to see the cost of VA care versus direct community care?

BY MS. WALLACE:

Q. Yes.

A. They -- my understanding is that has been done historically in the past. I don't know

the outcome of that.

Q. You don't know whether the VA determined that it's costing them more money to pay out Community Care Network providers or whether to use its existing VA facilities?

A. I haven't seen any reports that would indicate the cost difference or what that would mean. So it would be purely speculative for me to respond to what that would be.

Q. Understand.

And so you're not able to say whether the marginal cost of delivering services inside of an existing VA facility is lower than the reimbursement rate paid under the Community Care Network?

A. Not with any authoritative information or knowledge of what that data would look like.

Q. But you can't testify that they're -- they're not apples to apples. One of them the VA is paying out a certain rate that usually follows the Medicare rates for services, and the other it's an internal cost that's reflected best with managerial accounting?

A. I would generally agree it's not necessarily an apples-to-apples comparison and there are nuances with VHA that need to be taken into account when trying to do comparative analysis.

Q. Which hasn't been done, to your knowledge?

A. I'm not aware of any output of that.

Q. Do you meet with the third party administrators for the community cost network to understand the budgetary impact of that program for the VHA budget?

A. I have not met with the third party administrators.

Q. Do they submit reports or data for your review?

A. They do not report -- they do not submit anything to this office.

Q. And how do you get -- how does your office get the amount of money for the budget for administration costs that goes under the Medical Community Care bucket of your funding?

A. We would work with the integrated veteran care group to understand any cost impacts.

Q. And so that money -- that number comes to you and it's incorporated into -- into your budget, but it -- but you're not directly managing that, the third party component cost component?

A. Correct. We are not directly managing the third party cost.

Q. I wanted to talk to you. We have about 15 minutes until our next break.

You have been designated to -- to talk about the veterans who receive eligibility for VHA medical benefits as a result of residing at Camp Lejeune, both veterans and family members; is that right?

A. Yes.

Q. And you state that:

"Enrolled veterans are eligible for hospital care and medical services under the VHA medical benefits package."

And "Family members of Veterans who resided at Camp Lejeune for 30 days or more between August 1, 1953 and December 31, 1987 are eligible for reimbursement of health care costs related to one or more of 15 covered illnesses and

conditions."

Is that right?

A. Correct.

Q. And you have received the execution of VHA's appropriated funds as it relates to the Camp Lejeune eligibility; is that right?

A. We do not have a specific shred of that data or, you know, a report on execution of that information -- of that particular group.

Q. Meaning you don't know how much -- how many veterans or family members are qualifying for health care under that statute?

A. The Managerial Cost Accounting group may have access to that data, but we don't have from a budgetary perspective how much we have used in appropriated funds for that specific group.

Q. And I want to make sure this is clear for the record.

You -- your testimony is going to have do with eligibility for the program, not how many are using it or what that budget amount is?

A. Correct.

Q. And your testimony also won't have to do with barriers to access to that care or

difficulty with access to that care?
A. Correct.
Q. Are you familiar with the Janey Ensminger Act? Does that ring a bell to you?
A. It does not.
Q. Okay. And if I were to tell you that that is the Act that was codified in 38 USC 1710 that allowed for family members' access to health care based on the Camp Lejeune exposure, does that jog your memory?
A. Not specifically.
Q. Do you know anything about veterans' access to care and the criteria related to their access to care under that Act?
A. I couldn't speak to the specific criteria for care as outlined in that specific act.
Q. Do you know what the list of 15 diseases are, or is that something that you are familiar with?
A. I believe I have knowledge of a few, but not necessarily all 15.
Q. Do you know if the statute that created that eligibility, do you know if it offers

health care to these veterans and family members for any preventative care?

A. That I do not know.

Q. And if I told you that it does not offer that for family members, do you have any reason to disagree with me?

A. Without seeing the specific language, I couldn't opine one way or another.

Q. Do you know if that care creates comprehensive health care coverage for those veterans or family members --

MR. KLOTZBUCHER: Object --

BY MS. WALLACE:

Q. -- exposed at Camp Lejeune?

MR. KLOTZBUCHER: I'm sorry. Objection. Form.

You may answer.

THE WITNESS: I couldn't speak to comprehensive health care. I would need to understand the definition of that within the -- within the Act.

BY MS. WALLACE:

Q. And your testimony states that these family members are "eligible for hospital care and

medical services under the VHA medical benefits package."

Are you testifying that you don't know the extent of the care that could be offered or provided to the veteran or family member under that program?

A. The care that would be provided would be whatever was outlined within the statute in terms of eligibility, but specifics for each veteran or specifics for that group I would not be able to say with definitive -- with a high level of confidence.

Q. And so you -- it doesn't sound like you're going to be testifying that those veterans if they served or if they resided at Camp Lejeune for 30 days or more between August 1, 1953 and December 31, 1987, you don't know today what -- what health care costs may or may not be covered for those veterans under the VHA?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: Could you repeat the question?

BY MS. WALLACE:

Q. Yes.

And so for veterans or family members that served or resided at Camp Lejeune for 30 days or more between August 1, 1953 and December 31, 1987, you've stated that they are eligible for hospital care and medical services or reimbursement of health care costs related to one or more of the 15 covered illnesses and conditions, but it doesn't sound like your expertise extends to which -- the extent of health care services that that would be offered to them in accordance with that statute?

A. I could not speak to the specific health care services that would be offered.

Q. And so help me understand exactly what you mean by these designations.

Do you just mean, "I know that Congress passed a statute that allowed eligibility based on time at Camp Lejeune"?

A. I would say that the extent of my ability to respond to any questions would be that a law was passed. The law increased or opened access for this group of veterans and family

members to receive health care through VHA and through the VA for the list -- for the list of conditions that was outlined within that specific law.

But in terms of the health care that they have received or could receive, I could not specify what they are -- what today they are receiving or have received in the past.

Q. Okay.

A. Just that they would be eligible for care.

Q. Do you know if it would be required that the -- what the process might be to gain coverage, such as would they have to meet medical necessity requirements?

A. Based upon my knowledge, if it was outlined within a statute that these veterans and family members could receive health care for these for a list of conditions, that they would, I would assume, file a claim to identify themselves as Camp Lejeune veterans and family members or as Camp Lejeune veterans. Family members have a separate process.

And then based upon the outcome of

that, they would then receive care for, you know, that would increase -- that would change potentially their priority level, but then they would be receiving care for those specific at no cost to them.

Q. Do you know -- I'm going to stop sharing for just a second.

Do you know whether or not there's an application process required for the family member program?

A. I believe there is a process for family members. I don't know if I would use the word "apply" but, you know, to receive benefit -- or health care and benefits through that program -- through the CHAMPVA or other programs.

Q. Do you know if the statute was applied retroactively or whether the care had to be provided on or after March 26, 2013, but no more than two years prior to the date the VA received the application?

A. That I don't know.

Q. Do you know whether receiving care must include a certification from a treating physician that the care relates to covered

illness, and it also must provide information from the physician as to any comorbidities, risk factors, or other exposures that may have contributed to the illness or condition?

A. If that was included in the statute, then, yes, I would agree that that's a requirement. But I don't know the specifics of the statute again.

Q. Do you know if the VA member has to use other health insurance if it's available before it can have access to the VA assistance?

A. I believe that's an accurate statement.

Q. Do you know if the VA has to make a clinical finding under VA Clinical Practice Guidelines that the illness or condition did not result from a cause other than the residence of the family member at Camp Lejeune before coverage will be provided?

A. I'm not familiar with the clinical practices -- how clinicians make those determinations or the Clinical Practice Guidelines.

Q. And so when you say "eligibility,"

you mean just that.

You don't know how this statute, in effect, it's been able to be accessible by family members or veterans under the program?

A. I couldn't speak to specifics. It would be speculative in some cases.

Q. Do you know if the program only provides reimbursement for certain qualifying medical expenses?

A. I believe that to be true.

Q. Do you know how the VHA takes into account the exposure component of the statute that they must have resided at Camp Lejeune for at least 30 days?

A. I'm not sure what documentation or other information would have to be provided to show that they were a resident there for 30 or more days.

Q. Would you agree that the qualifying residency or exposure must be documented according to the VA satisfaction in order to qualify?

MR. KLOTZBUCHER: Objection. Form and foundation.

You may answer.

THE WITNESS: Generally speaking, I would say yes, but it would have to meet VA's criteria.

BY MS. WALLACE:

Q. Do you know if in the case of an individual who has a history of breast cancer, which is one of the enumerated conditions, do you know if the VA would cover the cost of future mammograms for preventative care under that program?

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: That's outside my scope of knowledge and expertise.

BY MS. WALLACE:

Q. Who would be the best person to better explain?

Because it sounds like you're going to testify that these individuals are eligible for hospital care and medical services and reimbursement, but I don't have an individual who's able to say the difficulties of qualifying for care and, in reality, how that's worked out.

Who might that be?

A. We have an eligibility group. So that, and there's also -- for family members, there's a CHAMPVA group. So someone from one or both of those offices could provide more information in terms of eligibility and the mechanics of applying for the -- for family member benefits.

Q. Is -- which department of the VHA would that fall under?

A. So there's CHAMPVA. I don't know if they're an office or a group. And then they may fall under the eligibility group but, frankly, I don't know their current name. But someone within those offices, or whatever they are currently called, could probably -- would be the best subject matter experts in terms of that.

Q. As far as budgeting and cost allocation, you're not able to tell me today and therefore you won't be testifying as to how much the -- how much the VHA spends on offering health care or reimbursement for health care to veterans or family members under the Camp Lejeune program, correct?

A. Correct. I have not seen any documentation that would allow me to definitively provide information on those costs.

MS. WALLACE: Okay. I think we are at a perfect stopping point for our lunch break.

THE VIDEOGRAPHER: Okay. We're going to go off the record at 12:34 PM.

(Whereupon, at 12:34 PM, a luncheon recess was taken.)

AFTERNOON SESSION

(1:18 PM)

HEATHER A. FORD

called for continued examination and, having been previously duly sworn, was examined and testified further as follows:

EXAMINATION (CONTINUED).

THE VIDEOGRAPHER: Back on the record at 1:18 PM.

BY MS. WALLACE:

Q. Ms. Ford, earlier this morning you testified that part of your job duties currently with the VHA include assignments that are influenced by the policies and directives issued by the department CFO and governing federal organizations, for example, the OMB, Treasury, GAO, correct?

A. Correct.

Q. And so part of your job duties can often involve taking guidance from the GAO reports and influencing your budget and determinations based on the guidance that the GAO provides?

A. I would not -- I would not agree with that statement from a funding perspective.

Q. How would you modify what I said?
If a GAO provides guidance to you, what do you do with it related to VHA health?
A. So if there are recommendations that GAO makes, we would work to implement those recommendations to the best of our ability. Whether or not that would impact how we request or allocate resources may not necessarily be fully implemented. It would depend on the nature of the recommendation that was made by GAO.
Q. But it is within your job description to work to implement the recommendations of GAO?
A. Yes, where applicable.
MS. WALLACE: All right. We're going to look through just a couple of GAO recommendations that relate to VHA health over the past couple years.
I am going to put in the chat what's been previously marked as Exhibit 9, which is GAO-23-106203, and I have uploaded it into the chat and I'm going to put it on the screen for you.
(Document marked for

identification as Ford Exhibit 9.)

BY MS. WALLACE:

Q. This is an April 2023 GAO report entitled "High - Risk Series - Efforts Made to Achieve Progress Need to Be Maintained and Expanded to Fully Address All Areas."

And I want to scroll down and this -- first of all, have you seen this particular GAO report?

A. I have not seen it nor have I -- so I have not read it in detail.

Q. Okay. And if I scroll down to High-risk areas identified by GAO, I see -- and it's highlighted on the screen -- that one of those high-risk areas is "Managing Risks and Improving VA Health Care."

Do you see that?

A. I do see that.

Q. And then if you go down to the Contents section, we find that we can jump to that section by clicking on the correct link -- one second -- which is on page 258 of the document.

Do you see that?

A. I do see it.

Q. Are you aware in your current role that the VA health care has been on the GAO's High-Risk List since 2015?

A. I am aware that there are -- that there are areas of high risk, but I was not aware that they had been on the High-Risk List since 2015.

Q. Do you see there in the first paragraph:

"VA operates one of the largest health care systems in the nation. It provides services to more than 9 million veterans who generally have greater health care needs than the broader population. Due to challenges we identified with VA's ability to provide timely, cost-effective, and quality care, we added VA health care to the High-Risk List in 2015 with five areas of concern: (1) ambiguous policies and inconsistent processes; (2) inadequate oversight and accountability; (3) IT challenges; (4) inadequate training for VA staff; and (5) unclear resource needs and allocation priorities."

Do you see that?

A. I do see that.

Q. Were you aware of those challenges?
A. Broadly. I have been in conversations where those have been broadly discussed but not tied to this specific GAO report.
Q. You are aware of those challenges within the VA health system?
A. Yes, but, again, not tied to this specific GAO report.
Q. Understood.
The next paragraph states:
"VA has continued to face system-wide challenges since our 2021 High-Risk Report. These challenges include overseeing patient safety and access to care, addressing critical staffing, and meeting future infrastructure needs. Additionally, VA has a number of major modernization initiatives that are still in the early stages of implementation, including those related to financial management and electronic health records."
Do you see that language?
A. I do.
Q. Can you describe for the court what

your understanding is of the challenges described in that paragraph?

A. So VA is undergoing a modernization effort of its financial management system currently known as the Financial Management System, FMS, and they are working to deploy a new system. I think the FMS is fairly old, and this implementation in the new financial management system has not started, has only dipped its toe, so to speak, into VHA. So yes, that would be considered a risk area.

Q. Do you know how GAO defines high risk?

A. Not specifically.

Q. In your role, you are aware that VA health is high risk.

Are you working on any of these areas for improvement personally?

A. So --

MR. KLOTZBUCHER: Objection.

You may answer.

THE WITNESS: -- the financial management modernization would fall under the purview of the CFO as that is

deployed within the -- the VA health system. Part of the reorganization touches upon the remaining areas.

BY MS. WALLACE:

Q. If we scroll down, the report begins to go through the various high-risk categories, including the "Ambiguous Policies and Inconsistent Processes."

Do you see that?

A. I do.

Q. And then it says at the bottom of this section:

"VA should also continue to implement our other recommendations. Since March 2021, we have made 14 new recommendations, four of which have been implemented. For example, we recommended that VA establish a national policy to document complaints about community living center care so that they can be tracked and resolved."

Do you see that?

A. I do see that.

Q. Are you aware of the recommendations that are in effect from the GAO as it relates to VHA currently?

A. I'm not aware of where GAO stands in terms of resolving those high-risk recommendations.

Q. Do you mean where VHA is?

A. I'm sorry. Yes, VHA. Sorry.

Q. No problem.

But you are aware in your role that they exist because part of your job is to work to implement recommendations --

A. Correct.

Q. -- of the GAO?

A. Correct.

Q. Under the section and on the screen that states "What Remains to Be Done," it states:

"We have made 508 recommendations related to this high-risk area since 2010. As of February 2023, 104 recommendations remain open. For example:

"We recommended in June 2018 that VHA establish a metric for its Veterans Community Care Program to monitor whether veterans are receiving community care within time frames comparable to those at VA facilities. The Consolidated Appropriations Act, 2023, requires

VHA to apply designated access standards as an overall performance measure for community care. This will allow VHA to monitor timeliness under the Veterans Community Care Program. We plan to review VHA's implementation of this requirement."

Are you aware that there has been a continual problem with timeliness of receiving appropriate care through the Community Care Network for veterans?

A. I'm generally aware that there have been continued concerns around the timely access of care both within VA and the community.

Q. Are you aware that the GAO has been collecting data regarding appointment scheduling challenges and clinical care concerns, as it states on page 267?

A. I was not aware within -- within my role currently or formerly that they were collecting that information for that specific high-risk area.

Q. Are you aware they're also collecting data to attempt to resolve pending enrollment applications and timely processing of applications and accurate enrollment

determinations to prevent veterans from experiencing unnecessary delays when enrolling for health care benefits?

A. Similar response. I was not aware that GAO was collecting that information. It's outside the scope of my position within VA and the -- and my responsibilities.

Q. Because that particular, like, that particular data doesn't relate to financial planning?

A. It's because that responsibility for maintaining enrollment data is outside the Office of Finance.

Q. But in your role as CFO, you are aware that these types of deficiencies within the VHA program do exist?

A. So -- so, again, broadly, I'm aware that there are challenges within VHA around these types of areas, but, again, the providing of data to GAO falls outside the scope of the Office of Finance. We are not the holders of that data.

Q. And my question just has to do with the deficiencies in the program.

You're aware that the deficiencies

identified by the GAO do exist in the program?

A. I'm aware generally that there remains concerns around timely access to care and other issues surrounding the community care for veterans.

MS. WALLACE: Let's look at another report.

I'm going to upload what's been previously marked as GAO -- I'm sorry -- Exhibit 10, which is GAO-23-106836.

(Document marked for identification as Ford Exhibit 10.)

BY MS. WALLACE:

Q. Do you recognize this GAO report released on approximately May 17, 2023?

A. This one looks familiar, but the contents of it I can't say that I could -- I have read in-depth.

Q. Under the section "What GAO Found," it states in the second sentence:

"VHA's ability to attract, hire, and retain high-performing staff is critical to its mission to provide quality and timely care for the

nation's veterans. In recent work, GAO has made several recommendations to VHA to help address certain staffing challenges, which would help the agency meet veterans' health care needs. VA has agreed with these recommendations and reported steps to implement them."

Do you see that?

A. I do.

Q. And it looks like, again, the GAO has identified staffing issues connecting with the community care needs. They state specifically in the first bullet that:

"Additionally, facility staff GAO spoke with -- spoke with reported challenges, recruiting and retaining administrative and clinical staff needed to support the community care program. GAO recommended that VA medical facility leadership assess their facilities' needs and develop a plan to address any identified risks, including strategies to address recruitment and retention challenges."

Do you see that?

A. Yes.

Q. And is my understanding from that

there is an issue that there's not enough administrative staff and clinical staff needed to support the preauthorization and processing of these veterans' community care requests so that they can be seen with authorization at community care providers?

A. So I can speak to the generally that there are -- my understanding is there are staffing issues within VHA facilities -- some VHA facilities and across VHA, but the specifics around community care, I cannot speak to what those -- what those shortages or shortfalls would look like.

Q. If the issue is a staffing issue, wouldn't -- if the VA was working on correcting that issue, wouldn't they need to allocate additional funding for that staffing and go through you to do that?

A. So generally, yes, if staffing is an issue. However, from a budgetary perspective, it's not necessarily down to the eaches of why we're providing more funding for staffing increases. It could be broadly.

HR could provide a broad assessment

that we need to hire more of and this will cost Y dollars, and then we would then provide the funding for that need.

And in some cases, these are local decisions. So they can roll up, again, into broader needs, and so we may not know every time the specifics for the staffing requirements.

Q. Can you tell me whether during your six months that you've been in your current role have you -- have you been made aware of this issue for low staffing in the Community Care Network area in order to properly budget or allocate funding for that particular need?

A. For community care or for I'll say community care support, I have not been made specifically aware of that staffing shortage and need for additional funding.

Q. And so that would mean that it's not -- no adjustment has been made into the budget for this particular reason; is that right?

A. Specifically for community care support? No. Broader FT -- or broader needs, again, could be wrapped up in those.

Q. Broader needs related to community

care?

A. Broader needs in terms of staffing overall.

Q. You have been made aware of staffing issues also in the VHA direct facilities and you have allocated funds for that?

A. So we have allocated funding to -- to facilities for staffing -- for staffing. Again, some of these decisions are local decisions, and so they would be provided a number of people, like, an up-to number and then those facilities would determine what folks they needed to hire to meet their needs.

So we would provide money to them, but it's a local decision in terms of hiring.

Q. But it doesn't sound like any specific adjustments were made in the budget to include for additional hiring for the community care staff needs that are identified in this GAO report?

A. Yes. No staffing -- no specific budget adjustments were made for this specific need.

Q. Do you see in this also in this GAO

report in the second bullet:

"GAO recommended that VHA comprehensively evaluate and implement strategies to help mitigate staffing challenges" connected to the mental health care for veterans?

A. Yes.

Q. Do you know if that has been an issue that's been brought to your attention for fund allocations?

A. There have. I've been privy to discussions where mental health needs and mental health care providers are needed in terms of addressing staffing issues and what the potential level of resources would be needed for that.

Q. Do you see in the third bullet that GAO identified that:

"VHA lacks the reliable data -- complete, accurate, and timely -- needed to monitor the completion of key onboarding tasks for new hires"?

I'll highlight it for you.

A. Thank you.

Q. My pleasure.

A. Yes, I see that.

Q. Have you been made aware of that?
A. Within the scope of my job responsibilities, I am aware that there are discussions and have been discussions about how to improve the onboarding process.
Q. For -- for new hires.
Does that have to do with training?
A. I can't speak to the span of it, but it could -- it could be the credentialing process, background checks, a myriad of issues. HR could provide more information in terms of what that would look like. It's not within my scope.
Q. And that's a very important factor to ensure that veterans receive quality care from quality medical providers.
Would you agree with me?
A. I would agree. Timely hiring is important.
Q. Well, timely hiring as well as background checks and proper training.
A. Yes.
Q. Do you agree?
A. Hiring meaning the broad -- the tooth-to-tail process for that for VHA, which

would include onboarding tasks.

MS. WALLACE: Let's look at another GAO report. I'm uploading into the chat what's been previously marked as Exhibit 11, which is GAO-24-105308.

(Document marked for identification as Ford Exhibit 11.)

BY MS. WALLACE:

Q. Do you recognize this March 2024 Veterans Community Care Program report that states "Additional Information on VA Statutory Appointment Timeliness Measures Is Needed?"

A. I have not seen this particular report.

Q. Based on the section under "What GAO Found," it sounds like GAO is a little critical of the VA that it has not met "the statutorily required measurements on the timeliness of scheduling community care appointments because its approach prevents it from making certain measurements. Specifically, VA's approach cannot yield data on a certain time point -- the date a provider accepts a referral for care -- which is needed to calculate two required measurements.

According to VA, staff are not required to collect referral acceptance dates."

Do you see that?

A. I do.

Q. And if you go to -- would you agree with me that the GAO has found that it's difficult for them to assess whether VAs are getting timely appointments at a Community Care Network because the VA doesn't seem to be measuring it. They state that the VA is not capturing the date the provider accepts the referral for care.

Do you agree with how I characterized that?

A. Based upon what I'm seeing in this document, that's how I would read that highlighted section.

Q. And are you familiar with the Isakson-Roe Act which requires the VA to measure community care appointment timeliness?

A. I am familiar with the Act.

Q. The statute requires measurement from the date care is required to the date the appointment occurs.

Is that your understanding?

A. I believe that is contained within the statute.

Q. In this report, the VA is admitting that it cannot calculate certain required measurements under that Act.

Do you agree with me?

A. Based upon what I'm seeing here, I can't say whether or not GAO is specifically tying it to that statute based on the yellow highlighted section. So I couldn't opine whether --

Q. It's right here.

A. Sorry.

Q. No problem.

Do you see that in the first paragraph?

A. Oh, yes, I see it there at the bottom. Okay.

Yes. Then I would say yes.

Q. Do you agree with the GAO's findings that there are challenges the VA has had in ensuring community care appointments are scheduled by VHA medical facility staff in a timely manner and overseeing the appointment scheduling process?

A. Based upon my position within VHA as

well as my previous position, I could not provide specifics in terms whether or not that's accurate.

Q. And you can't dispute its accuracy either?

A. I could not dispute its accuracy.

Q. Is this an area that you have allocated any additional reallocated any funds to address the deficiencies that have been identified in this report?

A. (Reviews document.)

I can't recall if there were specific budget adjustments related to these specific findings.

Q. Do you know at all what efforts the VHA is making to address these findings at the current time?

A. Since most of these areas fall outside of the financial or budgetary area, I can't speak to what efforts other offices may or may not be taking to address them.

MS. WALLACE: I'm going to upload into the chat Exhibit 12, which has been -- which is GAO-24-106390.

(Document marked for

identification as Ford Exhibit 12.)

BY MS. WALLACE:

Q. And I will share it on the screen for you.

Do you recognize this GAO report from August 2024 entitled "Veterans Community Care Program - VA Needs to Strengthen Contract Oversight"?

A. I did not review this specific GAO report.

Q. From your position in financial management and oversight, would this particular action item fall under your purview related to the VA needing to strengthen contract oversight?

A. I would need to understand the contents of the report in order to understand what potential financial impacts there would be from an oversight perspective.

Q. We're looking at the first page under "What GAO Found" and it states that:

"The program -- Community Care Program -- has grown rapidly in recent years and accounted for nearly 40 percent of VA's total contract obligations in fiscal year 2023."

Is that also your understanding based on your views of the budget?

A. I would not dispute that statement.

Q. "Contract oversight is complex and responsibility for oversight is spread across multiple areas within the Office of Integrated Veteran Care (IVC). IVC was created in 2022, and it continues to restructure some roles, such as the Contracting Officer's Representatives (COR), who keep contracting officers informed and provide technical direction to contractors."

Do you see that?

A. I do.

Q. And it says below:

"IVC has not developed a clear and complete set of documentation to guide contract oversight."

Were you aware of that deficiency on behalf of IVC, or does that fall outside of your purview?

A. That falls outside of my purview.

Q. What about the next paragraph?

"IVC has eliminated a program manager position identified in the oversight plans

for the contracts."

A. That --

Q. Sorry. I was just going to read the next sentence.

"While IVC officials identified alternative processes for some program manager functions, officials have not assessed whether they fulfill all functions. Additionally, VA has not updated its plans to reflect its current processes. These gaps increase contract oversight risks."

Does this deficiency fall within your purview?

A. It does not.

Q. Were you aware of this generally or not?

A. No.

Q. Would a deficiency such as this affect the budget or appropriation allocations?

A. It could.

Q. Do you have an opinion on whether that this deficiency could affect quality of care or access to care for veterans?

A. I couldn't opine on that given the

information that I see there what impact it would have on access or delivery of care.

MS. WALLACE: I think I have one last GAO to show to you. This is marked as Exhibit 13, GAO-25-106969.

(Document marked for identification as Ford Exhibit 13.)

BY MS. WALLACE:

Q. Have you seen this GAO report of November 2024 "Veterans Health Administration - Additional Actions Needed to Improve Oversight of Health Care System"?

A. This one does not look familiar from the title alone.

Q. We're on the first page. The first paragraph it states that:

"GAO found that VHA has made various organizational changes to its oversight offices since 2015. Most recently it reorganized them in 2024 with the goal of eliminating fragmentation, overlap, and duplication, according to the VHA."

Do you see that?

A. I do.

Q. Were you involved in collaborating

on that reorganization?

A. No.

Q. Because you weren't yet in the role that you are now at this in 2024?

A. Correct.

Q. And you testified earlier that you are involved in collaborating on the current reorganization that Secretary Collins is working on implementing; is that right?

A. Correct.

Q. Do you know how the reorganization referenced in this article -- and you can see a chart of it on the screen in this document.

Do you know how that might affect finance or budgeting under your department?

A. Could you increase it so I could read the teal boxes?

Q. Certainly.

A. I couldn't speak to how this would impact this particular office during that time based upon the org chart that's shown.

Q. Okay. Thank you.

As a part of your role, do you -- are you also informed of Veteran Service

Organization requests related to VHA care?

A. I have limited engagement with the Veteran Service Organizations or requests that they may have, unless it's particularly -- unless it's directly related to funding and budgetary matters.

Q. And can you think of any time that you've been in the role for the six months that you've been there that there has been a VSO request or concern that has made it to you related to budget matters?

A. I can't think of anything that has come across my desk within the last six months specifically related to budget or funding matters.

Q. If those organizations are continuing to discuss capacity and staffing as an access to care problem, that has not made it to you in the budget office, correct?

A. Correct.

Q. And if they are continuing to discuss wait time issues for access to care for veterans, that has not made it to you in the budget office?

A. Correct.

Q. And issues with community care coordination and standards in access, that also has not made it to you in the budget office, right?

A. From the VSO? Correct. It has not come across my desk from the VSOs.

Q. What about their concerns with coverage disputes, requesting additional preventative care, and expanded eligibility coverage and plus long-term care support for severely disabled veterans?

A. That, again, has not specifically -- I have not seen any e-mail traffic or information from the Veteran Service Organizations regarding those matters.

Q. Have you received any requests regarding PACT Act funding for contractors responsible for implementing the PACT Act?

A. In the last six months, I can't think of anything directly related to contractors implementing the PACT Act for VHA.

Q. Have you received any feedback that there are delays, denials, or disruption in those benefits affecting veterans?

A. I have not received any feedback related to that.

Q. Have you been involved in drafting any VHA responses to concerns about Secretary Collins' current plans to restructure the VHA?

A. Yes.

Q. What has that role been, please?

A. Development of responses to Congressional questions related to the reorganization.

Q. Can you tell me which responses that you have personally developed responses to?

A. I believe there's two from a recent hearing. I can't think of the verbatim words of the questions that were asked, but it was around resourcing and budgeting.

Q. Do you remember the substance of what you drafted?

A. One -- I do.

Q. Could you share that with us?

A. One was in regards to whether or not a cost estimate had been prepared for the reorganization, and I can't think of the second one.

Q. Has a cost estimate been prepared for the restructuring recommended by Secretary Collins?

A. There's an internal predeliberative estimate that's been prepared but not shared publicly.

Q. Does Congress have access to it at the current time, to your knowledge?

A. I don't know.

Q. And you can't remember the other content, right?

A. Not the specific question or the content of the specific response. It's been a while since I looked at that.

MS. WALLACE: I'm going to upload into the chat what's been previously marked as Exhibit 14 and 14B, which is Secretary Collins' statement before Congress written and an article about his presentation.

(Document marked for identification as Ford Exhibit 14.)

(Document marked for identification as Ford Exhibit 14B.)

BY MS. WALLACE:

Q. Did you testify earlier that you were not present at the hearing before Congress on the VHA's restructuring?

A. Correct. I have not been present at any point Secretary Collins has testified.

Q. At the hearing, he testified that he wants to put resources where they need to be and not send them to some amorphous administrative office.

Is that your understanding of his plan for the restructuring?

A. Yes.

Q. And it looks like he was criticized at the hearing based on Congress -- particularly Congressman Takano, who's the chair of the House Veterans Benefits Committee, testified that -- stated:

"That the VA is poised to restructure the nation's largest health care system 'with little more than a half-page notification and a 10-page slide deck' for Congress."

Are you aware of that criticism of

the restructuring plan by the Congressman?

A. I did not watch the hearing. So I cannot state with certainty if that is what he said.

Q. And this is this month.

Representative Morgan McGarvey.

Let me share my screen at 14B. Sorry. This is what I'm reading from.

Representative Morgan McGarvey said, "Here's the problem -- we don't know what the changes are. What you have provided here is not much."

Were you aware of that feedback from Congress as to the restructuring?

A. Again, I didn't watch the hearing or read any news articles or anything after the fact. So I'm not aware of committee members quotes.

Q. Are you aware that the VHA was criticized for not putting sufficient information regarding the restructuring before Congress?

A. It is my understanding through conversations that I have heard that there was concerns from Congress, but specific concerns I don't know.

Q. So tell me what you are aware of that the feedback was regarding the restructuring.

A. That generally --

MR. KLOTZBUCHER: Objection. Foundation.

You may answer.

THE WITNESS: Generally that there were concerns with parts of the structure, but the feedback received internally has been that overall it was positive.

But, again, I haven't watched any of the hearing. So I can't speak to specific concerns that have been raised.

BY MS. WALLACE:

Q. Are you aware that he has testified before Congress that he is aware that GAO's VHA health has remained on the High-Risk List for more than a decade?

A. I'm not aware that he specifically testified to that, but I believe there's general knowledge that VHA has high-risk issues, as identified by GAO.

Q. He also testified that VHA currently

has vacant clinical positions.

I think you stated that you agreed with that earlier in your testimony; is that true?

A. I --

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: I would generally agree to that.

BY MS. WALLACE:

Q. And those vacancies include doctors, nurses, and specialty providers.

Do you agree?

A. I can't speak to specific vacancies.

Q. Do you know if some of the 4,000 or more vacancies would include physicians, nurses, and specialty providers?

A. I would state generally I would. There likely are vacancies within those areas.

Q. Would you agree that staffing levels can directly affect appointment availability?

A. Yes.

Q. Would you agree that if a specialty clinic is understaffed, it can see fewer patients?

A. Yes.
Q. Do you agree that fewer available equipments can result in longer wait times?
A. I would generally agree with that.
Q. Would you generally agree that longer wait times can delay diagnosis or treatment?
A. Yes, it's possible.
Q. So today you would agree that access to care for veterans would depend on staffing capacity?
A. I would generally agree seeking care within the VA health system, meaning VA facilities, could be impacted by staffing levels.
Q. I understand we talked earlier that a risk assessment has not been fully either performed and/or released by the VHA regarding the restructuring, correct?
A. Correct. I -- correct.
Q. And part of the restructuring recommendation is the reduction of VISNs which oversee multiple medical -- VA medical centers and outpatient clinics; is that correct?
MR. KLOTZBUCHER: Objection.

You may answer.
Object to form.
You may answer. Excuse me.
THE WITNESS: Correct. There is an intent to reduce the number of VISNs. V-I-S-Ns.
BY MS. WALLACE:
Q. Do you agree that VISNs manage regional staffing and budget execution currently?
A. I would agree with that.
Q. Do you -- does the VHA understand at the present time how a reduction in VISNs could affect access to quality patient care across the VA direct care facilities?
MR. KLOTZBUCHER: Object to form.
You may answer.
THE WITNESS: I can't speak to any assessment that's been done in terms of impacts to health care delivery by reducing the number of V-I-S-Ns, VISNs.
BY MS. WALLACE:
Q. Do you agree that the restructuring

recommends the elimination or cancellation of tens of thousands of physicians that currently exist under the VHA?

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: I would not necessarily agree. I would not agree with that description.

BY MS. WALLACE:

Q. Do you disagree with the description?

A. As I understand the reorganization, I would disagree with that description.

Q. How many jobs do you anticipate the restructuring will eliminate or cancel, if you have a better understanding?

A. My understanding is that there will be no reductions in the workforce as a result of reorganization. That everyone will have a job within VHA. It just may not be -- you may not work for the supervisor that you work for today, but there is no plans to reduce the overall size of the workforce as part of that reorganization.

Q. And if Secretary Collins quoted a 40,000-person number, you do not know what he's referencing?

A. That was --

MR. KLOTZBUCHER: Objection.

You may answer.

THE WITNESS: That was based upon a review of open positions or unfilled positions in a manning document and positions, again, that were unfilled for a significant period of time were -- or had not been activated were removed from the manning document. So they were unfilled positions.

BY MS. WALLACE:

Q. So you have 40,000 positions that should be filled but aren't?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: I would not agree with that description of it.

BY MS. WALLACE:

Q. How would you rephrase that? Is it

40,000 designated positions that aren't filled?

A. I would -- I would describe it as it's possible that people requested positions be added at some point in time with the intent to fill those positions, but those positions were never filled for whatever reason, and so they have essentially been sitting on our manning document or personnel document. If you want to phrase it that way.

And given that they have been, let's say, vacant for 10 years, they were removed because they were no -- they were seen as not being needed because they had been unfilled.

Q. But when they were established, there was the intent from the VHA that they were to be filled, correct?

A. I would -- I would assume, yes.

Q. And that intent would be to provide veterans with quality and timely access to health care?

A. I don't know the specific positions that were eliminated off the manning document. So I can't speak to whether they were direct care providers or support staff. I could only make

assumptions.

MS. WALLACE: Let's take a quick look at Exhibit 14 that I uploaded into the chat.

BY MS. WALLACE:

Q. This is a written statement by Secretary Collins.

Have you ever seen this statement?

A. No.

Q. So I take it you did not help prepare this for him for his testimony on this earlier this month February 11, 2026?

A. Correct. I did not help prepare his written testimony.

Q. He states:

"The current VHA leadership structure is burdened with redundancies that slow decision making, create confusion, and foster competing priorities -- each of which undermine the quality of care for Veterans."

Do you agree with Secretary Collins on that point?

A. Based upon my time within this position, I would -- I would agree with that.

Q. Do you agree with his next sentence:

"The current structure also lacks clear accountability, leading to the frustration we hear from Veterans and staff regarding VA operations"?

A. I would agree with that.

Q. And then he states in the next paragraph:

"But you do not have to take my word for it. This is the same conclusion we have heard for years from the VA's Office of Inspector General (OIG), the Government Accountability Office (GAO), and many in Congress -- all of whom have repeatedly underscored the need to reorganize VHA."

Do you agree with him?

A. I can't speak to specific OIG or GAO reports, but I would generally agree that concerns have been raised from certain external stakeholders, such as Congress.

Q. He quotes the 2024 OIG report and he states:

"Weaknesses in VA's governance and oversight have affected many aspects of the

program's performance and operations."

Do you agree with Secretary Collins on that point?

A. Could you highlight that for me? I'm sorry.

Q. No problem.

A. I apologize. Is that bullet 4?

Q. Yes, it is.

A. (Reviews document.)

I would agree with that.

Q. And then he quotes Chairman Moran.

Did you tell me earlier that's your superior? No.

A. I'm sorry. You broke up a little bit.

Q. Chairman Moran. Do you know who that is?

A. I do.

Q. Who is that?

A. I believe he's chair of the -- maybe the SVAC or the FVAC -- HVAC or SVAC.

Q. Is that -- I'm sorry. Forgive me.

Is that within VHA or not?

A. No, he's a Congressional member.

Q. Oh, thank you. Okay.

He said Chairman Moran said last year "The VA needs reform. If the status quo were working, we would not spent two weeks hearing from VSOs on the way the VA needs to improve."

Do you see that?

A. I do.

Q. Were you involved in any of those hearings where the VSOs testified before Congress on the ways that VA needed to improve?

A. No, I was not.

Q. But this statement is contained within Secretary Collins' written statement before Congress, correct?

A. Correct.

Q. Secretary Collins indicates that it is his -- one of his goals to improve health care quality for veterans, empower local hospital directors, eliminate duplicative layers of bureaucracy, and ensure consistent application of VA policies across all medical facilities.

Do you see that?

A. Yes.

Q. And he's outlined clear -- "clear

lines of authority and accountability to ensure that everyone is focused on what they need to do to improve our service to veterans."

Do you see that?

A. Yes.

Q. And it states:

"The VHA Central Office will have responsibility for setting policy goals and conducting financial management, oversight, and compliance."

That is you, right?

A. Correct.

Q. And so really you're the -- you'd be the tip head of that effort in, like, we talked about earlier that would end up consolidating more oversight and financial management on you that the VISNs right now are currently performing, correct?

A. Correct. That is the intent.

Q. And the VISNs will take policy direction from VHA Central Office -- that's you -- to develop operational quality and performance standards that will guide VA's nearly 1300 medical facilities; is that right?

A. Correct.

Q. And so I guess I'm confused as to I thought that you were already -- based on your job description, which is very detailed, I thought you already had that organizational control over conducting financial management, oversight, and compliance over the entirety of the VA medical facilities structure.

So help me understand how this would -- is that not true?

A. So that is true, but, again, not every -- not every chief financial officer reports to this office and so that can create duplicative or overlapping responsibilities.

Q. The VISNs are more knowledgeable right now. They're more focused and specialized in the region in which they operate, correct?

A. Correct.

Q. And if there's only 18 of them and there's 50 states, that would mean that their regions are -- include multiple entire states for many of them, correct?

A. Correct.

Q. Is that the reason that -- because that's already a pretty large territory to

understand VA hospitals on a minute level.
Do you agree with me?
MR. KLOTZBUCHER: Object to form.
You can answer.
THE WITNESS: I would say that, yes, the current span of a VISN is -- is broad and encompasses large portions of the continental United States.
BY MS. WALLACE:
Q. So now instead of 18 of those, they recommend going to five, and they would have the responsibility for covering an even greater geographic area related to how the VA facilities' needs and budgetary allocations are?
Do I understand that correctly?
A. Yes.
Q. And no change will be made until Congress approves it; is that right?
A. I don't know if there needs to be Congressional approval of the reorganization. There is a notification process that is required of Congress, but specific approval I do not -- I

do not know if that's required by statute.

Q. Is that why the reorganization has already been underway even prior to the risk allocation being completed?

A. Could you rephrase that? I'm sorry. I'm thinking about it.

Q. No problem.

The reorganization, is it already underway?

A. Reorganization.

Q. And so what is needed from Congress in order to -- for Secretary Collins to implement his restructuring program, if anything?

A. So my understanding is that we need to provide Congress with notification of our intent to restructure and then wait 45 days. Again, I have not read that specific part of the statute to see whether or not it requires Congressional approval before we can proceed, but we do have to provide Congressional notification with a 45-day wait time.

Q. So the --

A. But that --

Q. Go ahead.

A. No, go ahead. Sorry.
Q. The reorganization of the VHA is not one of the -- does not require Congressional approval.
Is that your testimony? It just requires Congressional notice and a wait period?
A. I can't -- I can't say whether or not the stat -- the specific statute -- I have not read it -- requires Congressional approval, but notification is required.
Q. And I think you agreed with me earlier that there hasn't been a fully completed budget assessment done with regard to the reorganization?
MR. KLOTZBUCHER: Object to form.
You may answer.
THE WITNESS: Correct. A comprehensive budget review of impacts has not been completed.
BY MS. WALLACE:
Q. But yet the reorganization is already underway, right?
A. I would say discussions of the

reorganization are occurring. However, the mechanics of reorganizing have not begun.

Q. Is that because -- are you waiting on the 45-day?

A. I believe there's been -- there's still ongoing discussions in terms of the organizistic -- the organizational structure, and then also the need to provide Congress that notification. So there's still a lot of work that's being done while we work the Congressional notification as well.

Q. And you testified earlier that there has not been a risk analysis done involving the reorganization as it relates to how the reorganization could affect access to care?

A. I have not seen a specific risk analysis involving the reorganization and its impacts to access to care.

Q. Do you agree that organizational restructuring can create transitional instability in some cases?

A. In some cases, yes.

Q. So we have several variables in that the VHA is currently addressing with regard to its

reorganization that could affect access to care.

Do you agree with that?

A. Since access to care is mostly a policy determination, I can't -- I cannot from where I sit today, or what my knowledge of the reorganization is, see where that would impact the policy around access to care.

Q. What about the in-reality access to care is in community care and access measurement weaknesses?

Are you able to state with certainty that the scope of VHA care and eligibility will remain material unchanged -- materially unchanged over the coming years?

MR. KLOTZBUCHER: I'd object to foundation.

You may answer.

THE WITNESS: I can't say with certainty, but also access to care is in the metrics, and a lot of what we've discussed today is not within the purview of the Office of Finance in terms of how that could change or be impacted out.

BY MS. WALLACE:

Q. Office of Finance doesn't analyze how allocations affect access to care? That's not a part of your department?

A. So we would certainly look at access to -- or workload data from a facility perspective. However, sometimes impacts are not felt immediately. They are felt over time and so, again, today I could not say whether or not there would be a budgetary impact without seeing data and what that would look like.

Q. You cannot say whether there would be a budgetary impact as a result of what?

A. If we changed metrics or a policy change or staffing changes, I would want to see the workload data to better understand the impacts of that because there's a lot of variables that go into development of a budget and the allocation of resources.

Q. Are you aware of any of VA Secretary Collins' initiatives to reduce direct care in rural communities?

A. No, I am not.

Q. We've talked about a lot of

high-risk criteria that have been identified by the GAO and then many of which was mentioned in Secretary Collins' statement before Congress, including issues with staffing, weaknesses in oversight, deficiencies in the VHA's organizational structure, the need for a new governance model. And that's all current.

Would you agree with me?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: I would agree those are problems that still exist today or challenges that still exist today.

BY MS. WALLACE:

Q. Your designation indicates your opinion that the general scope of care and eligibility for care for veterans is unlikely to be significantly constricted in the future.

Based upon all of the deficiencies and high-risk designations and issues that we've discussed today, does that remain your professional opinion?

A. Yes.

Q. Are you able to guarantee to a veteran that the scope of his care and his eligibility care is unlikely to be constrained in the future?

MR. KLOTZBUCHER: Object to foundation.

You may answer.

THE WITNESS: That's certainly not a guarantee I could make.

BY MS. WALLACE:

Q. Do you have any idea what Congress may do to address the national deficit moving forward as it relates to VHA funding?

MR. KLOTZBUCHER: Object to foundation.

You may answer.

THE WITNESS: No.

BY MS. WALLACE:

Q. And my understanding is that VA spending, both mandatory and discretionary, is a part of the federal -- the broader federal debt.

Is that true?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: Yes.

BY MS. WALLACE:

Q. Do you agree with me that in the federal budget debate, programs such as VHA are increasingly the focus of deficit reductions discussions?

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: Based upon my knowledge and experience to date, I would not necessarily agree with that statement.

BY MS. WALLACE:

Q. Did you agree with it when the DOGE efforts were being underwent in the 2025 time frame?

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: Professionally, I could understand the need to gain efficiencies within the federal

government and look at ways to make improvements.

BY MS. WALLACE:

Q. Do you agree that in the broader federal budget debate, programs such as the VHA have been the increasing focus of deficit reduction discussions?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: No, I would not agree with that.

BY MS. WALLACE:

Q. And so you don't agree that DOGE was looking at reductions to the VHA in the 2024/2025 time frame?

A. I would agree that DOGE was looking at reductions across the veterans -- the Department of Veterans Affairs or ways to gain cost savings and efficiencies.

Q. And didn't you say earlier that it was also -- it also looked they were announcing plans to cancel 875 contracts worth roughly $2 billion?

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: That was the -- my understanding is that was the total amount that came out of that review.

BY MS. WALLACE:

Q. The criticism from veterans and the public was that many of these contracts were tied to medical service care, cancer -- sorry -- cancer care infrastructure, doctor recruitment, exposure assessments, and other health-related functions.

You recall that?

A. I haven't seen a complete list of contracts that were canceled. So I can't opine as to what -- whether those were included on the final list.

Q. Didn't we also talk earlier about DOGE's agenda emphasized workforce reduction and reorganization, and we talked earlier that that is where the severance opportunity packages came from? Accepted deferred resignation is what it's called.

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: Yes, the Deferred Resignation Program was part of a DOGE effort to restructure and reduce the size of the workforce.

BY MS. WALLACE:

Q. And so I guess I'm trying to understand why you don't disagree with the statement that VHA has increasingly become the focus of deficit reduction discussions on behalf of the broader federal budget debate.

MR. KLOTZBUCHER: Objection. Form and foundation.

You may answer.

THE WITNESS: Through the lens of budgetary requests and appropriations, the VHA budget has grown over time, not decreased. So the overall resources provided by Congress have -- have only grown.

BY MS. WALLACE:

Q. Didn't we talk earlier about they

wanted to return staffing to 2019 levels?

So while the program may be growing as a whole, that doesn't necessarily mean that medical services has grown.

Do you agree with that?

A. I believe when you look at the total resources available, both mandatory and discretionary, for medical services, it would show that they have grown over time or at least remain steady-state.

Q. And mandatory and discretionary includes all of those categories that we talked about earlier?

A. Correct.

Q. And so while the budget has grown since you've been with the program, that doesn't mean necessarily that it's grown in each category each year. For example, we talked earlier about the $12 billion decrease in funding for direct care at VA medical facilities.

Remember that?

A. Yes.

Q. And so while it's increased as a whole, that doesn't mean that necessarily

services -- that each category is increasing each year?

A. I would agree with that from a discretionary budget perspective there, that adjustment or that decrease exists within the discretionary side of the funding.

Q. Do you think that there is -- actually, let's take a quick break. It's been an hour.

THE VIDEOGRAPHER: Okay. We're going to go off the record at 2:42 PM.

(A recess was taken.)

THE VIDEOGRAPHER: Back on the record at 2:55 PM.

BY MS. WALLACE:

Q. Ms. Ford, before the break, we were talking about eligibility under the VHA program.

Do you remember that?

A. Yes.

Q. And we talked earlier today that your opinions with regard to Camp Lejeune eligibility are -- are limited in that you do not have an opinion on how -- on access to care for

veterans under that program.

Is that true?

A. I don't have any influence or involvement in the -- in the process for eligibility. So I can't opine on -- on people being eligible for care.

Q. And you have one of your designations: Congress has not constricted eligibility for care through VHA since its establishment.

Is that true?

A. From a statutory perspective, I would agree with that.

Q. There are other ways that Congress could restrict access to care other than through eligibility statutes.

Do you agree with that?

Such as reducing funding?

A. I can't -- I can't see reduced -- reductions in funding impacting eligibility since eligibility is a separate. It's -- it's essentially different than funding.

Q. Yes, and my question had to do with access to care.

A. It is possible that funding reductions could result in challenges to access to care.

Q. Being eligible for VA care does not guarantee necessarily that the veteran receives medical care through the VHA.

Do you agree with that?

A. Yes.

MR. KLOTZBUCHER: Objection. Form.

You may answer. I apologize.

THE WITNESS: That's okay.

Yes, because it's a veteran's choice as to whether to receive care from VA.

BY MS. WALLACE:

Q. Well, and there are also eligibility criteria that we touched on earlier relating to Camp Lejeune that can also be a barrier in a more broad and general sense.

And you testified you're not an expert on the criteria needed to access care, just on the fact that the statute allows for a veteran to be eligible for the care.

Is that true?

A. Correct.

Q. And so, for example, being eligible for VA care does not guarantee that a veteran can receive a timely appointment for needed medical treatment; is that true?

A. I would generally agree with that.

Q. And being eligible for care does not necessarily mean that there is an available provider within a plaintiff's geographic area that can treat his medical needs at any given time.

Do you agree with that?

A. Are you referring to a VA provider or a community provider?

Q. Both.

A. That is possible.

Q. Being eligible for VA care does not mean that the veteran will be able to timely receive the care that he needs.

Do you agree with that?

A. Could you repeat that?

Q. Being eligible for VA care does not guarantee the veteran will receive timely medical treatment that he or she needs.

A. That would be a fair assumption.
Q. There are certain types of medical care, such as mental health and specialty care, that are among the hardest to fill.
Do you agree with that?
MR. KLOTZBUCHER: Objection to form.
You may answer.
THE WITNESS: Based upon my understanding, those are -- that is an accurate statement.
BY MS. WALLACE:
Q. And when positions remain unfilled, that increases or decreases -- that can decrease access to care for veterans or at the very least increase wait times for them to receive the care that they need.
Do you agree with that?
A. I would agree that for the ability to access care within the VA direct care system that could have an impact.
Q. And we talked earlier about GAO recognized deficiencies in wait times for referrals under the Community Care Network.

Remember that?

A. Correct.

Q. And so just because a veteran has access to VA care, that does not mean that he or she won't have barriers to timely access to medical treatment, including under the Community Care Network program, correct?

A. That could be a possibility.

Q. It sounds like it currently is. It is occurring currently based on what we've reviewed today by Secretary Collins and the GAO reports.

MR. KLOTZBUCHER: Objection to form much.

You can answer.

BY MS. WALLACE:

Q. Do you agree with me?

MR. KLOTZBUCHER: You may answer.

Objection to form.

THE WITNESS: I'm sorry. Could you repeat the question?

BY MS. WALLACE:

Q. Yes.

I think you said that's a possibility that wait times could be increased in the Community Care Network program for veterans, but we've talked a lot today about Secretary Collins acknowledging those current deficiencies under the VA. And we also analyzed GAO reports that identified that deficiency with regard to VHA provided services at the present time.

Do you agree with that?

MR. KLOTZBUCHER: Same objection to form.

THE WITNESS: Based upon the body of information provided to me today, I could agree with that.

BY MS. WALLACE:

Q. Do you agree that many eligible veterans can often live hours from a full service VA facility?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: I couldn't state with certainty whether many or most veterans live -- their distance from a VA

facility. I have not seen population data to support that characterization.

BY MS. WALLACE:

Q. Would you imagine that based on the number of VA direct facilities nationwide and the number of veterans nationwide that there are many that live hours from a full service VA facility?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: I can -- I could imagine where there are veterans who live many hours. But, again, not understanding the population data and whether most veterans live within urban or rural areas, I couldn't provide specifics in terms of quantity or percent or number of.

BY MS. WALLACE:

Q. And I don't need anything specific. My question was just that most likely many eligible veterans live hours from a full service VA facility, correct?

MR. KLOTZBUCHER: Object to

form.

You may answer.

THE WITNESS: Again, I can't say many. I will say there are veterans who live hours fracture VA facility.

BY MS. WALLACE:

Q. That's fine. Thank you.

Would you agree with me that rural veterans face greater barriers to in-person care than urban veterans?

A. I would say that's -- that's a fair characterization.

Q. And some rural regions may disproportionately lack specialty providers under direct VHA facilities.

Do you agree with that?

A. Based upon the knowledge and information I have, I could generally agree with that.

Q. And based upon the representation of Secretary Collins that we discussed earlier to Congress earlier this month that the VHA is not fully staffed and has not been in 15 years, would you agree that staff shortages would affect access

to care for veterans in the VHA program?

A. So, again, I would agree that staff shortages at any point in time could impact access to care.

Q. And if staffing shortages are occurring at the present point in time, then that would affect access to care?

A. Yes, at those facilities that are experiencing shortages.

Q. Do you have stats on how many VA facilities of the -- is it 1200 are experiencing staff shortages?

A. That's out of the scope of my office's responsibility.

Q. Does the VA systematically measure unmet demand across the system?

A. I'm not familiar with any reports or data that I have been privy to that would show that information.

Q. And so maintaining eligibility does not necessarily guarantee that a plaintiff will continue -- will have access to care under the VA system.

Do you agree with that?

MR. KLOTZBUCHER: I'm going to object to form.

You may answer.

THE WITNESS: Could you repeat that, please?

BY MS. WALLACE:

Q. Sure.

Maintaining eligibility -- statutory eligibility does not guarantee that any patient will have timely access to care.

MR. KLOTZBUCHER: Same objection.

You may answer.

THE WITNESS: Based upon the information I am aware of, I would generally agree with that.

BY MS. WALLACE:

Q. And maintaining eligibility statutorily does not guarantee that a patient will have access to quality care.

Do you agree with that?

MR. KLOTZBUCHER: Objection. Form.

You may answer.

THE WITNESS: Yes, I would generally agree with that.

BY MS. WALLACE:

Q. And so your testimony that is focused around eligibility, you are not providing testimony, and don't intend to, that that eligibility would equate to access to care, ease of care, geographic access to care, the type of care, whether their reasonable necessity requirements were met, timeliness, quality of care. You're giving just an eligibility opinion.

Do I understand that correctly?

A. A general --

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: Correct. I'm giving a general eligibility response.

BY MS. WALLACE:

Q. Okay. An eligibility opinion that the eligibility -- the statutory eligibility has not significantly changed since you've been there?

What's the scope of your opinion on eligibility?

A. In general, eligibility has not changed. However, certain statutory changes like a PACT Act can change eligibility.

Q. Yes, we talked earlier that anytime it wants to, Congress could reduce, modify, or increase eligibility for veterans, correct?

A. Yes, that's a fair statement.

Q. We talked earlier about how the VA uses managerial cost accounting to determine the cost of delivering care within its VHA facilities, correct?

A. Correct.

Q. And you testified that managerial accounting is the best method that you have available to you to understand the cost of delivering care within VHA facilities, correct?

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: It's a best managerial cost accounting practice, and it's one tool that we could use to determine that and it's a finance tool.

BY MS. WALLACE:

Q. And did you testify earlier it's the primary tool that you use?

A. It's one of the primary tools we use.

Q. Are you familiar with the HERC "Technical Report Practical Guide to Using MCA"?

A. No.

Q. It states that "MCA data is the national source of cost information for VA."

Do you agree with that?

MR. KLOTZBUCHER: Object to form.

BY MS. WALLACE:

Q. I'm happy to put it on the screen if you'd like to see it.

A. I would generally agree that, yes, managerial cost accounting is a source of data for costs.

Q. It says "MCA data are the national source of cost information for VA."

Do you agree with that?

A. Could you put the document up on the screen for me?

Q. Happy to.

Do you see this document is "Technical Report 44: Practical Guide to Using MCA NDEs in VA Research and Operations"?

A. Uh-huh. Yes.

Q. Does this look familiar to you at all, this document?

A. No.

Q. It says:

"Overview. The VA Managerial Cost Accounting program (MCA) provides detailed cost information for all VA provided services, including the cost of all VA inpatient and outpatient encounters. The Managerial Cost Accounting Office (MCAO) creates National Data Extracts to facilitate access to workload and cost data."

And then it says:

"MCA data quick facts."

First "MCA data are the national source of cost information for VA."

Do you see that?

A. I do:

Q. And then it says.

"MCA uses activity-based costing to

determine costs, which means that costs are based on the volume of services provided."

Do you see that?

A. I do.

Q. And it refers to the MCA in the fourth bullet as being "divided into three categories: fixed direct costs, variable direct costs, and indirect costs."

Do you see that?

A. I do.

Q. And it says:

"The MCA NDEs do not include the cost of care that is provided by community providers, often referred to as community care."

And my questions are: Do you agree with all of those facts articulated on this document?

A. Based upon what I can see in the document, yes, I would agree with the highlighted sections.

Q. Great.

And so when a veteran receives care through the Community Care Network, the VA does not incur those costs like it would medical

treatment received in a VA facility.

Do you agree with that?

A. Yes, I would agree with that.

Q. And just like the document said that we just looked at, managerial cost accounting does not take into account those reimbursement rates for VHA direct costs.

Do you agree with that?

A. It would not include the costs of community care.

Q. And so when the VHA is evaluating direct care at a VHA facility, it's using managerial cost accounting. And when the VHA is evaluating the cost of care under the Community Care Network, it's applying the reimbursement rates paid to outside providers. And these are two very different methods of assessing costs.

Do you agree with me?

MR. KLOTZBUCHER: Object to form.

You may answer.

THE WITNESS: I would agree generally with that statement.

BY MS. WALLACE:

Q. And for the reimbursement rate cost, it sounds like the way that your allocation takes into account Community Care Network costs is: They bundle the reimbursement rates paid to outside providers, which follows Medicare methodologies, and they add an additional administrative cost that they pay to the third party administrator, such as TriWest or Optum, and that is how they would assess the cost to the VA associated with Community Care Network.

The combination of those two factors; is that correct?

A. I would agree that's how today those costs would be assessed.

Q. And so if we wanted to know how much care costs to the VA under the VA direct care system, we're going to use managerial accounting?

A. That would be a source of information to determine those costs.

Q. And we're not going to use reimbursement rates, correct?

A. I would not utilize the reimbursement rates.

Q. For VHA direct care?

A. Correct.
Q. I wanted to confirm.
You do not have any opinion on whether -- on how the VA may quantify costs in the future related to the bellwether plaintiffs' estimated future life care plans in this litigation; is that right?
A. I do not have an opinion. Correct.
Q. And you don't have an opinion on the quantity of offsets as it relates to the VHA in the future?
A. Correct.
Q. And you don't have an opinion in the future that could guarantee that plaintiffs would have access to care in the future under the VHA program?
A. I can only speak to today's access. I could not hypothesize what the future access would look like.
Q. Is there anything that we have discussed today that you think I have misunderstood that you'd like to clarify?
A. (Pause). I can't think of anything at this time.

Q. All right. Then that is all the questions I have for you today, Ms. Ford. I thank you for your patience with me.

A. Thank you.

MR. KLOTZBUCHER: Can we just go off the record for five minutes, take a short break?

MS. WALLACE: Sure.

THE VIDEOGRAPHER: We're going to go off the record at 3:20 PM.

(A recess was taken.)

THE VIDEOGRAPHER: We're back on the record. Time is 3:26 PM.

MR. KLOTZBUCHER: Ms. Ford, how are you doing?

THE WITNESS: I am pretty tired right now, to be honest.

MR. KLOTZBUCHER: I understand.

Well, I want to thank you for your time. I have nothing further.

I appreciate you taking the time to sit and -- sit through the deposition and give your honest answers.

So thank you. I have nothing further.

MS. WALLACE: Thank you, Ms. Ford. I echo that sentiment, and I'm sorry you're tired. I am too, if it's any consolation.

THE VIDEOGRAPHER: All right. This ends today's deposition. We're going to go off the record. The time is 3:27 PM.

(Signature not waived, the deposition concluded at 3:27 PM.)

HEATHER A. FORD

CERTIFICATE OF REPORTER

DISTRICT OF COLUMBIA)

I, Denise Dobner Vickery, a Registered Court Reporter and Notary Public of the District of Columbia, do hereby certify that the witness was first remotely duly sworn by me.

I do further certify that the foregoing is a verbatim transcript of the testimony as taken stenographically by me at the time, place and on the date herein set forth, to the best of my ability.

I do further certify that I am neither a relative nor employee nor counsel of any of the parties to this action, and that I am neither a relative nor employee of such counsel, and that I am not financially interested in the outcome of this action.

Denise D. Vickery

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF NORTH CAROLINA

IN RE: CAMP LEJEUNE WATER LITIGATION	)	Case No. 7:23-cv-00897
This Document Relates to: ALL CASES	)	

VIDEOTAPED DEPOSITION
OF
MICHAEL FRYAR
Monday, March 2, 2026
Salisbury, North Carolina

Reported by: Christine A. Taylor, RPR

Job No.: 7897326

On March 2, 2026, commencing at 9:02 a.m., the videotaped deposition of MICHAEL FRYAR was taken pursuant to notice and pursuant to the Federal Rules of Civil Procedure, on behalf of the Plaintiffs at the offices of Wallace & Graham, 525 North Main Street, Salisbury, North Carolina.

THE VIDEOGRAPHER: On record at 9:02 a.m. Today's date is March the 2nd, 2026.

Will all counsel present please introduce themselves and our court reporter will swear in the witness.

MS. WALLACE: Whitney Wallace with Wallace & Graham, for Plaintiff Leadership Group.

MR. TUBIN: Marcus Tubin with the Department of Justice for the United States.

MR. CARPENITO: Good morning. Joshua Carpenito on behalf of the United States.

* * *

MICHAEL FRYAR,

having first been duly sworn, was examined and testified as follows:

* * *

EXAMINATION

BY MR. TUBIN:

Q. Mr. Fryar, is there anything preventing you from thinking clearly today?

A. No.
Q. Anything preventing you from testifying truthfully today?
A. No.
Q. You understand that the oath you just took is the same as you were if you were testifying in a courtroom; correct?
A. Yes.
Q. Okay. I'm going to assume that you understand my question, unless you tell me otherwise; is that fair?
A. Fair.
Q. Okay. If you want a break at any time, just please let me know. Otherwise, as we stated off the record, we'll plan for about once an hour.
A. All right. Appreciate that.
Q. Did you bring any materials with you, sir?
A. Yes. I brought my life care plans, some research materials, the economist report, my invoices, CV, testimony list. I think that about covers it.
Q. What research materials?
A. So they're over here. Some of the

things I cite in the back of the life care plan. They are more life care planning oriented items. And there's actually two treatises from life care plan I brought with me in case I needed them.

Q. Are those all materials that were cited in your report?

A. Yes.

Q. So nothing that we haven't -- hasn't been disclosed to the United States already?

A. Well, I have a methodological statement about costing that's in here. I don't know if you actually have that. But I have that --

Q. Was that part of your report?

A. It wasn't part of my report. It's just part of explaining my methodology for costing.

Q. Is that something you drafted?

A. Yes. I mean, I have it in my office as a reminder to myself.

Q. Okay. We're going to want to make copies of that during a break.

A. Sure.

Q. Okay. Have you formed any opinions in this case that are not stated in your reports?

A. No.
Q. Did you review any docs -- documents before your deposition today to refresh your memory?
A. I did. And I actually saw some new documents. I went back through all my life care plans, of course. I reviewed Mr. -- the Stradler economist reports. I reviewed some reports from Dr. Miller, Ms. Tricia Yount. Of course, since I released my reports, I saw the life care plans from Ms. Navarro, and I'm -- we'll just call him "Dr. S" because I can't say his last name.
Q. Shahnasarian.
A. Yes. And then I saw some amended damage assessments.
Q. Okay. Is that what's listed on the paper, the notes --
A. Yeah, I just wrote them down as other things I saw.
Q. Okay. Did you review all of those materials for the specific purpose of testifying today?
A. Yes. Before my deposition, yes, I did.
Q. Okay.

A. I had seen the life care planning -- life care plans previously.

Q. Right.

A. I just went and reviewed them again.

Q. Now, you're a member of the International Academy of Life Care Planners; correct?

A. Yes.

Q. Members of the International Academy of Life Care Planners have pledged to adhere to all published standards of practice maintained by the organization; correct?

A. Agree. We have to abide by them.

Q. Okay. This includes the Standards of Practice For Life Care Planners; correct?

A. Yes. 4th edition is the most current.

Q. And it also includes a consensus of majority statements published in The Journal of Life Care Planning; correct?

A. Well, I don't know if that's actually -- that's their publication, so I guess you could say it's from the academy. But it's in The Journal of Life Care Planning, yes.

Q. Okay. One of the sources you rely on

in your life care planning practice is the Standards of Practice for Life Care Planners, 4th Edition; correct?

A. That's one of them, yes.

Q. Do you consider this text to be an authority in the field of life care planning?

A. I consider it to be a treatise.

Q. Okay. Do you agree with all the standards of practice and practice competencies listed within that document?

A. Yes. I mean, there's nothing I've ever seen that I specifically disagree with.

Q. Okay. Now, a treating physician has examined their patient; correct?

A. Ask me one more time.

Q. A treating physician has examined their patient; correct?

A. They do examine their patients, yes.

Q. They have often diagnosed their patient; correct?

A. Yes.

Q. They have, in some cases, operated on their patient; correct?

A. Yes.

Q. They often have a long-term

relationship with their patient; correct?

A. Can.

Q. Can. They have authored the patient's medical records; right?

A. Or a PA under their supervision or nurse practitioner, yes.

Q. And they have often been with the patient throughout the patient's disease treatment; correct?

A. Can. I mean, there's exceptions to that, of course.

Q. Would you agree a treating physician knows their patient better than a non-treating physician?

A. I think they have more experience with their patient than a doctor who just did an evaluation, yes. But in life care planning, there's really no distinction drawn between treating versus evaluating, but yes.

Q. A plaintiff's life care planner has greater access than a defendant's life care planner to the plaintiff's treating physicians; would you agree?

A. If the plaintiff's life care planner had a release signed, yes, and the defense

didn't, I agree.

Q. And isn't that easier for the plaintiffs to obtain than the defense?

A. Not necessarily, but often when you're on the defense side, you don't necessarily have access to the plaintiff.

Q. Okay. In your past life care plans for plaintiffs, do you consult with the treating physician?

A. I attempt to, yes. They don't always want to be involved, but yes.

Q. But you always try?

A. Unless I know they're specifically just not going to be involved, yes.

Q. And how would you know that they're specifically not going to be involved? How would you learn that?

A. I was told in these cases that several of the treating doctors from the VA would not be access -- accessible to me. The ones that I did understand would have -- I'd have access potentially to, I wrote letters to.

Q. Who explained to you that you would not have access to them?

MS. WALLACE: Objection to the extent

that that calls for attorney-client privilege.

BY MR. TUBIN:

Q. Who explained that to you?

A. The attorneys on the case, that the veterans physicians would -- the VA physicians wouldn't necessarily respond to anything.

Q. Would you agree a consulting physician should still be a board-certified doctor?

A. Preferably, you're board certified in your discipline, yes.

Q. Would you agree a consulting physician should still be treating patients?

A. That's -- I mean, I speak to a lot of physicians who have had 30 years of training and experience and now they're semi-retired. So I don't necessarily think that has to be the case.

Q. Would you give more weight to an opinion from a consulting physician who is actively treating patients than one who hadn't in, let's say, a decade?

A. You know, and that's a real tricky question to answer because I can't really give greater weight to any physician because I'm not a

physician. So in life care planning, there's a consensus that says I have to methodically manage divergent opinions.

So if I have three neurologists saying three different things, my job is just explain what the impact of those three different opinions are. I can't really say that this doctor should be favored over that doctor. And the only person who can is another physician.

So any life care planner who is nonphysician can't really speak to the credibility of one set of medical facts versus another from a different physician.

Q. So how -- how do you methodically account for divergent opinions?

A. Sure.

Q. What considerations do you look for when you have two physicians that are disagreeing with each other?

A. So, here, you have that. You have the physicians that spoke to the defense life care planners versus physicians I spoke to.

I think that's left to the trier of fact. I mean, you have a life care plan built by other life care planners using the foundation

from other doctors. And I don't take exception that that's what foundation they received, and you have life care plans that I've built, they were from other doc -- from the doctors I consulted with.

I don't take exception with either one. If I had followed what they had -- the defense experts had -- had received, I would probably came up with the same conclusions.

Q. All right.

A. So it's really to the trier of fact because we're not -- if I selected one of those physicians over the other, I'm acting as if I can prescribe medical care. And that's outside of my scope.

Q. Right. So if you have one physician recommending care, who is actively treating patients, and you have a second physician who's recommending care, but hasn't treated patients in over a decade, are you likely to give more weight to the first physician than the second, or maybe you give equal weight to both?

A. It's not my call. I mean, I can't tell you that one should be more highly valued than the other. Life care planning doesn't

address that. They say you can get your foundation from treating or evaluating physicians. It doesn't say they have to be actively treating. So ...

Q. So if you have somebody who's never treated a patient and they're recommending treatment, and you have a doctor that's been treating patients for 50 years and they're recommending treatment, you can't -- you don't distinguish between the two?

A. I don't know if I ever ran into a situation where a doctor has never treated a patient. So ...

Q. Let's say they have treated one patient.

A. There's nothing in the -- there's nothing in our treatises that distinguishes that for us. There's just nothing.

Q. Okay. Thank you. Now, aside from the treatise, what about in your practice? Is there anything that you use to distinguish between a scenario like that?

A. Again, if I did that, I'd be acting outside of my scope. So no.

Q. Okay. As part of the life care

planning process, you should request depositions of the client, family, or treatment team that may be useful; correct?

A. As far as the life care planning process, yes.

Q. Okay. Are you drawing a distinction there?

A. So if -- I learned life care planning from the gentleman who started life care planning. He was my teacher. And then I learned from his first generation student for -- he was my mentor for 23 years. The first gentleman I was talking about, Dr. Deutsch.

Q. Dr. Paul Deutsch; correct?

A. Yes. So I learned from him and then his second kind of lead was Julie Kitchen. That's who I learned from.

What I -- was explained to me was that if the medical care I'm reviewing does not meet 75, 80 percent of the tables in the life care plan, it's not really a life care plan. It's not life care -- a life care plan is not the appropriate title to use because we have certain tables distinguish certain types of care.

In that situation when you're --

like, for example, if you had just you're pricing out just a surgery or you're pricing out -- here, like, a transplant, that is a cost analysis.

So the reason I'm answering it that way is that life care planning says that a consensus is I have to meet with the person, do an assessment. I'm not -- some of these I did not do a life care plan. I just simply spoke to the doctor, this is the foundation I received, and priced out the information as a cost analysis.

So that didn't meet, as I understand it, the 75, 80 percent rule that Dr. Deutsch taught me about when to do a life care plan on a case versus a cost analysis.

Q. Can you explain that 75 to 80 percent rule again?

A. Yeah. So there's certain tables, like there's projected evaluations, therapeutic modalities. If you have a prosthetic, there's a separate table for that. Separate table for surgery. Separate table for DME, attendant care, facility care, transportation, housing, and so forth and so on.

If it's not meeting, you know 75, 80

percent of those tables, it's really not in line with what a life care plan was built to be.

Q. And when you say "meeting" those tables, what does that mean?

A. There's care items that would fall on those tables.

Q. Okay. And where are these tables located?

A. Well, they were originally located in the Guide to Rehab book by Deutsch. I think they're also in some of the treatises that we -- the original tables are probably in the -- only in The Guide to Rehab.

Q. Dr. Deutsch created these tables?

A. Yeah, or he -- yes, he was the originator of the tables. Him and a gentleman named Raffa, and then there was another -- Raffa was an economist. And there was another gentleman in some of the -- in some of the books.

Q. Do you know if the book that they were published in has been peer reviewed?

A. Well, things in that book have been peer reviewed in the journal, I do believe, later on. But those are the first books of life care planning.

Q. Right.

A. There was an amicus brief that he wrote way back when, that was published in the journals. I don't know if that book per se was, but it was the original book.

Q. Okay. Would you agree that the consensus statements published by The Journal of Life Care Planning apply to all life care planners?

A. Yes, absolutely, 100 percent agree with that.

Q. And do you agree with all the consensus statements published by The Journal of Life Care Planners?

A. Yeah. For development of the life care plan, yes.

Q. Okay. So, again, is there a distinction there?

A. So when I do a cost analysis, I'm following life care planning methodology for costing. But there are certain things that I don't necessarily have to follow, like meet with the person, if I'm simply giving you a cost for a surgery.

Q. So for -- so there's a distinction

between a cost analysis table and a life care plan?

A. Yes, that's how I was taught.

Q. Right. And for a cost analysis table, you don't need to meet all the same criteria as you would for a life care plan?

A. The main thing being that I wouldn't necessarily have to meet face to face with a person, see their home, you know, explore what accommodations they need, because they didn't need any. It was more of a projection about what their surgery requirements were, or what their -- you know, interventional requirements were for pain management. That's not necessarily a life care plan.

Q. Right. And what are the minimum requirements you would need to meet for a cost analysis table to be accepted in your field as legitimate?

A. You would need to follow the costing methodology from life care planning.

Q. Even though --

A. And -- I'm sorry. And, also, I would certainly never venture beyond my scope and I've had foundation from a doctor for what I'm saying.

I wouldn't say -- I've seen some cost analyses where folks don't have foundation and they say, well, I'm anticipating these future needs.

I would never do that. So I'd want foundation from a doctor and I'd follow life care planning costing methodology.

Q. The life care planning costing methodology, where is that located?

A. It's in the standards that you spoke about. It's in the consensus statements. It's in our treatises.

Q. Okay. The 4th edition and the consensus statements --

A. Well, there's a 5th edition now, yes.

Q. Okay. I thought you said earlier the 4th edition is the most recent?

A. The 4th edition of the standards -- the book -- I'm sorry, maybe I confused you.

The treatise that I spoke about, I have them both here. The 4th -- there's a 4th and a 5th --

Q. Yeah.

A. -- that I commonly use.

Q. And the 4th is the one you cite in your report; correct?

A. I think I cited as a resource the 4th and the 5th book. The life care planning case management handbook. The standards you're talking about, the 4th edition from the academy, yeah, I cited the 4th, yes.

Q. Okay. Thank you.

Do you consider the consensus statements from Volume 16 of The Journal of Life Care Planning to be a treatise?

A. That's from 2018?

Q. Yes, that's from 2018.

A. The volume threw me off, that's what I'm asking.

Q. Right.

A. Is it a treatise?

I mean -- so I can tell you what it is and then maybe there could be some arguments to say if it's a treatise or not.

It is a -- it was produced by life care planners through multiple rounds of surveys, through what's termed the Delphi study, which is an empirical way to arrive at expert consensus without group pressure.

And from that, we got basically guidelines about what's needed for a valid and

reliable life care plan. So it is a very important piece of literature that is a consensus statement. If you want to refer to a consensus statement as a treatise, a learned document, yes. But it's really more empirical research about what an evidence-based life care plan should include.

Q. Okay. And do you agree with all the consensus and majority statements listed in that 2018 version?

A. I don't take exception. But I don't typically -- the majority, I feel a little bit more as though they're an absolute. But, yes, the consensus statement -- the majority have a little asterisk by them at the very end. But the consensus, yes.

Q. Okay. And one of the consensus statements is that life care planners shall conduct an in-person interview whenever permitted; correct?

A. Right.

Q. And you're saying that that is different in a cost analysis table scenario?

A. Right. It's not a life care plan.

Q. Okay. But for a life care plan, you

shall conduct an in-person interview wherever possible?

A. Yeah. The reason for that is to be onsite so I can see the environment, I can see what accommodation requirements they require, see if a wheelchair is involved, very commonly in a life care plan. So that's the reason why that's in there.

And there actually is a little bit of debate now about should that be onsite or through Zoom. But for a cost analysis, it's standard for that to be based upon the foundation you receive and the costing you completed.

Q. Right. So if an in-person is unavailable, then you should try for a remote interview; correct?

A. Right. Or if it's just traveling issues, yes. I don't have issue with a remote. And I think there's some literature coming out that says remotes can be done.

Q. If you don't interview the plaintiff, you should note this in your report; correct?

A. You should. I mean, I think I noted that in the reports or explained that, because I was asked to simply cost out the material. But I

would certainly explain if I met with a person, the findings.

Q. Right. Because standards of practice for the life care planning says that if access to a source of information is not possible, this should be noted; correct?

A. You're right about that. What I'm saying is if I met with a person, you're going to see it in my report.

Q. Right.

A. You're going to see the information they gave me. If I didn't meet with them, you're not going to see that information.

Q. Now, another of the International Academy -- I'm going call it IARP, I think that will -- is that okay with you?

A. So IARP is the governing group and then the academy -- the International Academy of Life Care Planning is the section. So that's fine.

Q. Okay. So one of the IARP's practice competencies is to ensure appropriate foundation or rationale for each recommendation; correct?

A. Agree.

Q. And another is to identify relevant

research and references in the development of the life care plan. Agree?

A. Relevant research and --

Q. Research -- relevant research and references in the development of a life care plan.

A. I agree.

Q. Okay. And one of The Journal of Life Care Planning's consensus statements is that life care planners shall include a basis for recommendations; correct?

A. Agree.

Q. Another is that life care planners shall identify the sources of their recommendations; correct?

A. Correct.

Q. Now, for every item or service listed in your cost analysis tables, you identify the recommendation source; correct?

A. Yes.

Q. So you are following these standards of practice and consensus statements; correct?

A. Yes, for costing, yes.

Q. Now, omitting the recommendation source for a line item would violate the

standards of practice and practice competencies; correct?

A. If it was done. There was one I wanted -- something I want to clarify on one report where I had left something out, but yes.

Q. What is that that you wanted to clarify?

A. So on Mr. Laramore -- I'm sorry, there's two things I wanted to clarify. Something on Mr. Laramore and then something on Mr. Sparks.

So Mr. Sparks -- Dr. Schwarz said -- and for some reason it just inadvertently got left out of my frequency table. She said in the first two years, with the attendant home care service, it should be 12 hours a week. And I had put -- it was 3 hours a day, but the first 2 years should be every other day. So that part got left out.

So for the first 2 years, it should be 12 hours a week. And I'd be happy to tell the economist that that was -- it's in the questionnaire responses from her, but it got left off of my frequency. So just to clarify that point.

Q. You said that was an inadvertent mistake?

A. It was inadvertent, yeah.

Q. So that's for Sparks?

A. For Sparks, yeah.

Q. What is the issue for Laramore you want to clarify?

A. So Laramore -- so there was a digit off on one of the CPT codes --

Q. Okay.

A. -- for one of the procedures. I caught it after I had sent it to the doctor and then I sent him another version of it with the correct CPT code, the actual coding listed. He signed off on that later. What you got in the report was the first one. So I have the second one he signed.

Q. Is there any difference in the price that resulted from that?

A. No, didn't change any of that. Just changed that there was a code -- like the number was 5 -- the number was 6 instead of 5.

Q. Right.

A. Just explained it was the correct code.

Q. And that the incorrect code didn't refer to, like, a separate procedure that had a different cost that you were relying on?

A. That didn't change any of my costs. It just was the final one he signed.

Q. Okay. A plan that makes medical recommendations without specifying the recommendation source, lacks medical foundation; correct?

MS. WALLACE: Objection.

THE WITNESS: No. You'd need to specify. And I feel like I have done that on every one of these plans.

BY MR. TUBIN:

Q. Yeah, i'm not necessarily talking about anything --

A. Right.

Q. -- in your reports. I'm just saying a plan that makes medical recommendations without specifying the source of that information would lack medical foundation?

A. Right. I attached -- you know, the foundation I received, other than what we just talked about.

Q. And you've previously stated that a

plan lacking appropriate medical foundation may not be accepted into the evidentiary record for an evaluee; correct?

MS. WALLACE: Objection.

THE WITNESS: Without appropriate foundation, yes.

BY MR. TUBIN:

Q. Your statement also notes that a life care plan that is incongruent with accepted standards of practice and consensus statements will likely be challenged and, ultimately, may not be accepted into the evidentiary record; correct?

MS. WALLACE: Objection.

THE WITNESS: Of course, we need to follow the standards in the consensus.

BY MR. TUBIN:

Q. Okay. In your report, you provided the 50th and 75th percentile costs; correct?

A. I did.

Q. This is standard practice in life care planning?

A. So the 80th and 75th are kind of the threshold of ceiling of costs. There's literature that speaks to the 50th as being used

too. That's talked about in this methodology statement that I mentioned earlier.

Q. Why do you choose the 50th?

A. Because there's literature in life care planning that says the 50th should be used.

Q. So do you believe that it's -- there's -- it's more supportable to use the 50th and the 75th than anything else?

A. My methodology statement explains it. But the 80th is difficult to always get because we don't -- our resources don't allow us to get it. We have to be consistent in how we're researching things.

Q. Okay.

A. Secondly, there's a costing summit that was done. And if you look at the numbers between -- people were surveyed at the 50th and 75th, that was the majority of the survey. The 75th was the number 1 percentile that was used, the 80th was number 2, and 50th was number 3. But when you combined the 50th and 75th together, it's the greater majority of the survey.

We have to follow a published policy statement from the AMA about defining usual, customary, and reasonable. You have to give a

range.

So we have literature that says we need to use the 50th. It's in our treatises too, we need to use the 50th. And that literature in the journals was some empirical study of random sampling of bills. Then we have the UCR definition that says we have to use a range.

So I don't take exception if someone uses the 80th. But all my resources won't give me the 80th. So I want to be consistent, so I use the 50th percent.

Q. And you believe that is the better practice; correct?

A. Yes. I mean, current practice in life care planning, I mean, of course this has evolved over time.

Q. Right. But current best practice in life care planning is to use the 50th and 75th percentiles?

A. Yes.

Q. Would you agree that using FAIR Health to assess treatment costs is a generally accepted practice?

A. Yes. It's -- actually, there's a partnership between FAIR Health and the academy.

Q. Okay. And you'd agree it's a reliable method?

A. Yes. They have spoken in our symposiums. I've spoken to them many times through their database manager, yes.

Q. Now, is using Context4 Health to assess treatment costs also a generally accepted practice?

A. Yes.

Q. And would you also agree it's a reliable method?

A. Yes. Also on the academy's web -- their web page about a resource we can use, yes.

Q. Okay. What about the R-A-P-E-L methodology to assess lost earning capacity, is that a generally accepted practice?

A. I don't know that -- I don't follow that methodology. I can't answer for that one.

Q. Okay.

MS. WALLACE: Objection. Will you restate that. I think they call it "RAPEL."

BY MR. TUBIN:

Q. RAPEL --

A. Oh, I'm sorry. You threw me off with

spelling it.

Q. I didn't know if it was an acronym or not. The RAPEL methodology.

A. Okay. I'm sorry. I follow -- I was thinking -- I thought you said R-L-P. Sorry.

Q. No. No. R-A-P-E-L.

A. RAPEL is an accepted methodology, yes.

Q. And you consider it a reliable methodology?

A. Oh, yes. I've been using it my whole career. It is the most relied upon methodology in publication.

Q. And the Earning Capacity Assessment Theory, is that a generally accepted practice?

A. I've seen that out there, but I've -- I don't know a lot about that one.

Q. Okay.

A. I'm not saying it is or is not, but I don't know a lot about it.

There's probably 20 different published methodologies for earning capacity.

Q. Understood.

Did you ever work as a nurse?

A. Yes.

Q. How long?

A. So I worked in the hospital for -- I have to look back at my resume. I think part-time and full-time, probably around four or five years. I was an in-patient rehab nurse, brain injury floor, spinal cord injury, polytrauma.

But then I was also a catastrophic and non-catastrophic nurse case manager pretty much my whole career. I was even doing that before I was a nurse.

I worked on cases where we moved patients all around the country to different centers of excellence for care.

Q. As a nurse, did you ever work with bladder cancer patients?

A. In context to bladder cancer being the primary only diagnosis, no. But in context to a complication from other things, yes.

Q. What does that mean?

A. So spinal cord injury patients get bladder cancer. They get -- they get bladder stones. They have all kinds of bladder problems. It's a consequence of that.

I've had people who have had trauma

to their bladder who have had to have, you know, surgical procedures done that they're causing them, you know, difficulties. The same kind of thing with -- with the kidneys. Polytrauma.

Q. Did you ever work as a nurse with Parkinson's disease patients?

A. Yes. Many times with the deep brain stimulator situation would maybe go a little bit awry. And a lot of times, brain injured folks develop Parkinson's-like syndrome where they do the shuffling gait and the tremor, an element of dementia.

So I've seen it in that population. I've seen them treated it in the hospital. I've actually treated people with cancer in the hospital, but not chemo. I've treated them with rehab, when they were coming through rehab to try to recover from their condition.

Q. What about leukemia patients?

A. I've seen some of that in the hospital. I don't think I've ever treated someone who had it as a primary, but had developed as a secondary. Like as a case manager, I remember some cases where someone developed leukemia while I was managing them for

another issue.

Q. Do you recall the specific type of leukemia?

A. I don't remember the specific type, no.

Q. What about kidney cancer?

A. Maybe just a handful of kidney cancer. I've had some other types of cancer. That's why I'm hesitating -- where folks were found out they have cancer. Like, I was the case manager and we found out they had cancer from a scan, and then they had to divert and have care for their cancer.

So I just don't remember kidney cancer was exactly specifically one of them.

Q. Okay.

A. Oh, thank you. I'm doing too much talking.

Q. Have you ever done a life care plan for bladder cancer before?

A. Outside of the -- being -- the primary diagnosis being spinal cord injury, no.

Q. Have you ever done life care plan for Parkinson's disease?

A. I've taken care of them in the

hospital. And I've taken care of folks who have been diagnosed with Parkinson's-like syndrome. Quasi Parkinson's. They have it -- they have it resulting from a traumatic brain injury.

Q. But have you ever done a life care plan for a Parkinson's disease case?

A. Well, they were having those symptoms from a brain injury. But not -- so, again, it's the -- not as the primary diagnosis, as secondary diagnosis.

Q. So they were diagnosed with Parkinson's disease?

A. Well, they called it Parkinson's-like syndrome.

Q. But there wasn't an actual diagnosis of Parkinson's disease that you recall?

A. Not a full-blown Parkinson's, no.

Q. Have you ever done a life care plan for any form of leukemia before?

A. I think many years ago, my mentor had one and I helped on it. I was not the lead.

Q. Is your mentor Dr. Paul Deutsch?

A. So Deutsch's -- I said first generation student, I also -- was my mentor for many, many years, that was Steve Yuhas. He

retired last year.

Q. Okay.

A. Y-U-H-A-S.

Q. Would you consider Dr. Paul Deutsch a mentor?

A. I mean, he was the one who taught me the whole process, so yes.

And then I went to his -- Dr. Deutsch was retiring when I was coming through. So then I went to his first generation student.

Q. Had you ever done a life care plan for kidney cancer before?

A. Not specifically kidney cancer that I can remember, no. Not as a primary diagnosis, no.

Q. At Carolina Case Management, you were there from 2007 to 2008, give or take.

A. Probably was one more year in there. But, yes, it was -- it was not very long.

Q. Was that solely litigation?

A. No, that was medical case management -- vocational case management.

Q. Did you also do litigation work?

A. I did some kind of -- I just was getting out of life care planning training at

that same time. So I maybe did just a handful of things. I don't remember doing a lot.

Q. What about at Fryar Rehabilitation Services?

A. Yes, I have.

Q. That was -- what percentage was litigation?

A. Well, depending on how you define the word "litigation." A lot of that's workers' comp, long-term disability, medical case management in the worker's comp system, vocational case management in the workers' comp system, Social Security.

I do private hire where I'm more of like a career counselor for someone wanting to figure out what they want to do for a living.

Q. Let me -- let me define it as anything where there was an adversarial nature, there was a plaintiff or a defendant or a claimant and a defendant and you were tasked on one side of creating a life care plan?

A. On a life -- so a lot of Fryar Rehab was case management. So there would be an insurance carrier involved.

Q. Okay.

A. But what you're asking about, Fryar Rehab probably was -- for life care planning, probably -- it's varied through time -- maybe 25 percent of what I did. For vocational rehab, was probably more litigated, was probably 25 percent and then 50 percent was case management.

Q. Now, can you explain to me a little bit more what you mean by case management?

A. So, there, I'm the -- I'm their -- they're my client then. So as a life care planner, they're my -- they're an evaluee, they're not my client.

There's some language in some of the previous treatises that use the word "client." But if you look at current standards, they're referred to as an evaluee. So I'm their advocate as a case manager, I'm not their advocate as the life care planner.

Q. So what are they coming to you for? Why are they coming to you in that --

A. In a case manager?

Q. Yeah.

A. I also did that for the U.S. Department of Labor, in that same role. I skipped that one when I was explaining it.

So I'm coordinating medical care. So with the U.S. Department of Labor, I was coordinating the -- actually, I could approve any medical care other than invasive, like, surgical procedures.

So I'm coordinating the medical care, going to appointments with them, getting them set up for therapy, getting them set up for some procedures, communicating to the insurance company and/or attorneys.

And also with the U.S. Department of Labor, I was helping them return to work. That's also part of the medical case management. I'm seeing if there's a job available to them. So coordinating care and helping them to return to work.

Q. Okay. Now, InQuis Global -- am I saying that correctly?

A. You are.

Q. InQuis Global, 2018 to present; correct?

A. Well, just a slight variation there. In December -- I think it was 22nd, we were acquired by the YA Group. I have a new current CV I can give you. But the YA Group is -- we

became a part of them. The InQuis whole team came over to YA.

Q. That was in December 2025?

A. Of 2025. I think it was December 22nd of 2025.

Q. Okay. So before that, from 2018 to 2025, at InQuis Global, what percentage of your work was litigation in an adversarial nature?

A. Oh, that's 100 percent forensic work.

Q. When you say "forensic work," you mean for plaintiff or defendant in a lawsuit?

A. Yes. Yes. I mean, I kept Fryar Rehab going the whole time too. But, yes, if it was an InQuis referral, it was a forensic evaluation.

Q. And is that also true at the YA Group?

A. Yes.

Q. Okay. Now, have you ever prepared a life care plan outside of litigation?

A. So in the case manager role that was mentioned earlier when I moved people all around the country, I worked for a company called Paradigm. But I -- you're not going to see that listed per se on my resume because I ran that

through Fryar Rehab.

Q. Okay.

A. I was a contractor for them. We would make smaller versions of the life care plan to predict out what care is needed. We had a whole treatment team of folks who helped build those. In-house, we had a doctor we consulted with, the Allied Health therapist.

And that was to guide the whole treatment process for very complicated cases, like persistent vegetative states, quadriplegia, multiple amputations, that type of thing, burns.

Q. So why didn't you list it in the resume?

A. Because it was part of the case management part I did through Fryar Rehab.

Q. Okay.

A. I was a contractor with them. I wasn't an employee.

Q. So were they a separate entity?

A. They were a separate entity that contracted me.

Q. Okay. And how did you -- how do you spell --

A. Paradigm. P-A-R-A-D-I-G-M.

Q. Were there others that contracted you?

A. Well, the U.S. Department of Labor contracted me.

Q. Uh-huh.

A. And I ran that through Fryar Rehab.

Q. Any others you recall?

A. Through the years, there's been a couple of the case management companies who contracted me for short-term reasons.

Q. Okay. But they're in no way a part of Fryar Rehab? That's why you --

A. Yeah. They're not a part of Fryar Rehab. It was, like, basically a contract I had through Fryar Rehab.

Q. Okay. I want to talk about several of your past cases for a minute.

So listed in your past testimony -- and you can bring it up in front of you, if you want.

A. Sure. Okay.

Q. The Goodwin matter, do you see that, where you prepared an assessment for the defense?

A. I recall it. I think he maybe had a spinal cord injury, if I remember correctly.

Q. Okay. Did you consult with the treating physician in that case?
A. No, I didn't have access.
Q. Okay. And you were on the defendant side in that case; correct?
A. As I recall, yes.
Q. Now, what about the Laws matter, L-A-W-S? Did you consult with the treating physician in that matter?
A. I didn't have a release.
Q. And you were on the defendant side, as well; right?
A. Yes.
Q. Now, the DiMonte matter, did you consult with a treating physician in that case?
A. I don't think I had to because it was laid out in the medical records, as I recall, about -- I was asked to do a vocational opinion. And it was laid out in the records that she was not employable.
Q. What about the Henderson matter? Did you consult with a treating physician in that case?
A. I don't think I sent the doctor a letter. But I think it was -- it was also a

vocational matter and it was laid out what the restrictions are. So it wasn't needed.

Q. If I wanted to read your reports in these past cases, where would I look?

A. I'm assuming it's attached to the -- the commission has a database that's attached to my depo. I mean, I'm -- well, actually, I think one of those, the Henderson maybe, I just had notes. I don't know if the notes got it in. But if I had a letter or a report, it would be attached.

Q. So were all of these publicly filed?

A. I mean, they're part of a public record for that case, yes.

Q. So you go to look on the commission's database, you can find your depositions and your reports in these cases?

A. I'm assuming -- I know you can find the depositions. I don't know if you can find the reports. I don't know. I've never done that search, I don't know.

Q. Okay. Between a consulting and a treating physician, would you agree it's preferable to interview the treating physician if you have access?

MS. WALLACE: Objection.

THE WITNESS: I think that you should if you have access. Again, our standards say treating or -- I mean, they use the word "treating" or "evaluating."

So -- or consulting.

So they don't draw a distinction. But, of course, if I have access to it, I'm going to try, yeah.

BY MR. TUBIN:

Q. Which is listed first, treating or consulting?

A. I think treating is listed first. But, I mean, they don't draw a distinction between --

Q. Okay.

A. -- this is preferable versus that.

Q. How do you know they don't draw a distinction?

A. It's not there in the language.

Q. So you don't know one way or another?

A. Well, I think if it would have been important, they would have stated it.

Q. Right. How did you first hear about this case?

A. I think Ms. Wallace called me or her office called me.

Q. And when was that?

A. I have to go back in the memory banks for that. I think it was probably -- let's see, the reports were written in '25. So sometime in maybe '24.

Q. And when you say "Ms. Wallace" you mean --

A. The attorney here, Ms. Whitney Wallace, yes.

Q. Did you receive an assignment?

A. Well, at first they just asked me some questions about my background and there was more than -- there was several attorneys involved that wanted to speak to me. And then eventually we -- I don't -- I don't deal with the retainer situation. I don't deal with that type -- side of the business for InQuis. And, eventually, I was notified -- I was asked to review these cases and prepare life care plans.

Q. Do you recall who the other attorneys were?

MS. WALLACE: Just objection to the extent that any of this line of

questioning calls for confidential communications with counsel.

You may answer.

THE WITNESS: I don't specifically remember. There were several attorneys. And I don't remember all their names.

BY MR. TUBIN:

Q. So, again, just -- maybe I didn't understand you correctly. Were you given an assignment at this time?

A. Not until later was I approved to begin making a life care plan.

Q. Okay. And what was the assignment you were given?

A. To make a life care plan or cost analysis, whatever was appropriate.

Q. And did you have any questions about this assignment?

A. Not per se. I mean, I know how to make a life care plan. So I didn't have any immediate questions.

Q. Did you ask to change the assignment in any way?

MS. WALLACE: Objection to the extent that the question calls for confidential

communications with counsel.

THE WITNESS: I explained at some point that some of these cases wouldn't meet the -- what we were discussing earlier, the 75, 80 percent of what's needed to make a life care plan. So I would be terming them cost analyses.

Like, for example, Mr. Laramore was just simply -- I was asked to -- what was the surgical cost? So that's not a life care plan.

BY MR. TUBIN:

Q. So any of the plaintiffs for which there's just a cost analysis table, they did not meet the 75 to 80 percent to qualify as a life care plan?

A. Not in my finding. Not what all the detail that's needed for a life care plan, no.

Q. Okay.

A. Or all the services are needed for a life care plan.

Q. Did you agree to serve as an expert before reviewing any of the documents?

A. I agreed that I could do a life care plan, yes. I mean, I don't -- I don't think I

had any documents yet. I was going to give an honest, objective life care plan.

So, no, I didn't take exception without seeing the documents. I was going to give my honest opinion.

Q. Have you attended any conferences related to Camp Lejeune?

A. No.

Q. Okay. Now, you do not determine the medical necessity of an item or service in your life care plan; correct?

A. 100 percent agree.

Q. The items and services listed in your cost analysis tables are based on consulting physician recommendations; correct?

A. Be it treating or evaluating, yes.

Q. Right. If their recommendations were to change, that would impact your report; correct?

A. I agree.

Q. If a recommendation is found to be without merit or unjustified, then that recommendation no longer has medical foundation; correct?

A. Depending on who found it without

merit. But -- I mean, if there was a reason why a procedure wasn't going to be done now because of a change of medical status or complication, yes.

Q. Let's say it was objectively found to be unjustified or without merit.

MS. WALLACE: Objection to form.

You may answer.

THE WITNESS: Really difficult for me to answer that about who would be determining that.

I mean, if there was objective medical information from a doctor that countered something in the plan, then, yes.

BY MR. TUBIN:

Q. Okay. You used the Physician's Fee Reference 2024 to assess treatment costs; correct?

A. I did.

Q. And that document's updated annually; correct?

A. Right. I did see that the -- the defense life care planners made mention of that. I didn't quite understand what we were saying,

though.

Let me explain. It is updated every year. They also said that it can't be adjusted to the region, that's not correct. There's a geographical conversion factor in the back, you can adjust it to the geozip.

The fact that this updated every year, not really that relevant because we use billing that's at least a year old, if not more, and the economist updates the numbers. So if anything -- if I had used -- you know, if I turned around and did -- the 2025 just came out. It might increase the number slightly, but it's not increasing dramatically and the economist would make those adjustments anyway.

Q. And the prices, as you said, are a national average; correct?

A. They're a national average, but they -- there's literally a geographical conversion factor in the book that tells me where I can -- it tells me for a region. So I can adjust it to a region.

Q. And where is that published?

A. In the book.

Q. What book?

A. The Physician's Fee Reference.
Q. Okay. I understand.
A. I cited the actual factor -- the geographical factor in my report.
Q. Do you know how current those conversion factors are?
A. I'm assuming they're -- it's as current as the book.
Q. You did not contact local providers to verify your cost estimates; correct?
A. No, I did not. You're talking -- when you're looking at FAIR Health, Context4 Healthcare, and PFR, you're looking at literally thousands and thousands of standard charges.
So I don't -- in my protocol, I don't see that as a necessity to call a single provider when I've already looked at standard charges from thousands and thousands of providers.
Q. The websites you list for medical devices, how did you find those websites?
A. They're standard ones I use.
Q. What makes them standard?
A. I think most of those are listed on the IARP site. My research over the years, there are certain ones that I've -- we -- that are more

prevalent that are used. I've used a lot of those as a nurse case manager when I'm trying to find equipment bids.

Q. How did you decide which to select for your report?

A. Those are just the common ones I use.

Q. So it's just your common practice?

A. Right. And I think some of those -- I have to go back and look, I think some of those are still also on the academy's website.

Q. Are there any that you looked at but did not end up listing in your report?

A. No.

Q. Did anyone send you websites to look at --

A. No.

Q. -- for your report?

Okay. Did you factor baseline aging care into your life care plans?

A. Baseline -- like, meaning what would be needed based upon the normal course of aging --

Q. Correct.

A. -- as opposed to the diagnosis?

Q. Uh-huh.

A. When I asked the doctors the question about what they needed, specifically was for that diagnosis. So that was their answer. And I can't -- you know, it would be outside my scope as a life care planner and a nurse, as a rehab counselor, to try to suggest I know the standard care requirements for aging only, but I specifically asked them for this diagnosis.

Q. Okay. So they didn't give you -- they didn't factor that into their recommendations to you?

A. Again, they were telling me what was needed because of the diagnosis. That was my understanding.

Q. And that does not encompass baseline aging?

A. My understanding that -- specifically told them, I need to know for just this exclusive reason. So no.

Q. Okay. How did you account for non-litigation-related medical needs?

A. Explain what you mean by "non."

Q. Well, say a condition a patient has that is unrelated to their diagnosis but still is going to impact their future care.

A. It's unrelated to their diagnosis still going to impact their -- are you meaning like something they get from the general population? Like, a normal, like, study we get as -- outside -- I'm not quite --

Q. Let's say someone has diabetes or something else.

A. Oh, I see what you're saying. Again, I asked specifically for this diagnosis.

There's times where you'll see where I offset and say what I got was consistent with general population about CBCs or BMPs. So I didn't include it, but I'm asking the doctors for this diagnosis. So -- and that's what, my understanding, I got in response.

(Exhibit 1 marked for identification.)

BY MR. TUBIN:

Q. Okay. This is Exhibit 1.

A. Thank you.

MS. WALLACE: Is this the same?

MR. TUBIN: I believe they're both for Ms. Dyer?

MS. WALLACE: Yes. I mean, are these identical?

MR. TUBIN: Yeah.
MS. WALLACE: You gave me two copies.
MR. TUBIN: I did. I -- normally there's two attorneys. I think I just instinctively --
MS. WALLACE: No problem. Thank you.
THE WITNESS: Are those both front and back? If they're not, I'd rather have one -- that's fine. All right.
MR. TUBIN: Just trying to save paper.
THE WITNESS: I understand.
BY MR. TUBIN:
Q. If you have the exact same and want to look --
A. I have this attachment. I don't know if you meant to give me that.
Q. Yeah. It's the materials considered.
A. Okay. All right.
Q. Do you recognize this document?
A. Yes. This is my cost analysis for Ms. Dyer.
Q. And how do you recognize it as that?
A. I just reviewed it yesterday, and I recall the header and the date.

Q. So now please turn to the cost analysis tables.

A. Okay.

Q. Now, these tables rely on Context4 Health, FAIR Health, or The Physician's Fee Reference Manual for the cost data; correct?

A. Right. I explained that in the introduction.

Q. Right. Now, let's look at the first item. I think it's on page 3.

So you have the unit cost listed here all the way in the right column; correct?

A. Yes.

Q. Now, it does not specify here whether this cost is coming from Context4 Health, FAIR Health or Physician's Fee Reference; correct?

A. No. I explain that it's the highest point of those three databases and the lowest point of those three databases.

Q. Okay.

A. Full range --

Q. Is there --

A. -- all three databases.

Q. Right. Is there any way to know -- let's say the $421, which database that's coming

from?

A. I'd have to go pull the raw data.

Q. Okay. And the same for the $137.21, you need to pull the raw data?

A. Yeah. But what I'm telling you is from those three databases, the lowest point at the 50th percentile to the highest point, the 75th percentile, across all three databases is what is presented there.

MR. TUBIN: Okay. Good time to take a break.

THE WITNESS: Okay.

MR. TUBIN: I'm going to move on to something different after we come back.

THE WITNESS: Okay. All right.

THE VIDEOGRAPHER: Off record at 9:52 a.m.

(Recess taken from 9:52 a.m. until 10:03 a.m.)

THE VIDEOGRAPHER: On record at 10:03 a.m.

MR. TUBIN: Exhibit 2.

(Exhibit 2 marked for identification.)

BY MR. TUBIN:

Q. And these -- this is an excerpt from

Ms. Navarro's rehabilitation evaluation of Mr. Laramore.

A. Okay.

Q. Specifically, the summary and impressions section.

A. Okay.

Q. If you could turn to page 25. And you see the paragraph that starts, "When considering Mr. Laramore's claim" -- it's one, two, three, fourth down.

A. Yes, I do.

Q. "When considering Mr. Laramore's claim for damages he attributes to alleged exposure to contaminated water incidents at MCBCL, his unrelated physical and mental health medical history is important to consider."

Do you agree with that?

A. Yes.

Q. Going up one paragraph, "As indicated above, Mr. Laramore's medical records document several preexisting and unrelated medical problems before his diagnosis of bladder cancer. Again, he sustained a work-related neck injury and was diagnosed with service-related PTSD."

Do you agree with that?

MS. WALLACE: Objection.
You may answer.
THE WITNESS: I did notice that he had some other preexisting problems I think I cite in my report to.
BY MR. TUBIN:
Q. But are you agreeing with these two statements, or no?
MS. WALLACE: Objection.
THE WITNESS: I don't know how I can medically determine the progression of those without a physician. So ...
BY MR. TUBIN:
Q. But do you agree that medical records documented what's in these statements?
A. That he had preexisting problems, yes.
Q. And he sustained a work-related neck injury and was diagnosed with service-related PTSD?
MS. WALLACE: Objection.
THE WITNESS: I do remember the work-related neck issue or spine issue. And I do remember something -- other mental health problems, yes.

BY MR. TUBIN:

Q. Was PTSD among those other mental health problems?

A. Let me look in my report.

Q. Sure.

A. Yes.

Q. And do you recall -- do you have there the year of the diagnosis?

A. I don't. I just have that I saw there was a diagnosis.

Q. Okay.

A. Additional diagnosis other than the cancer diagnosis.

Q. Okay. If we could turn back to Exhibit 2, go to page 26. And third paragraph down.

You see the third sentence, "His bladder cancer is in remission and his treatment consists of monitoring his condition."

Do you agree with that statement?

A. I don't know if I can agree or disagree with that statement because I'm not a physician. I do remember this being something that was discussed in the consult with the doctor I spoke to, that he felt as though signs were

that he was not in remission.

Q. Have you seen any medical records that indicate he's not in remission?

A. No. But that doctor's finding was that he's progressing where he's not in medical -- in remission and would need the procedure.

Q. Do you recall --

A. I distinctly remember him telling me that.

Q. Which doctor?

A. The doctor I spoke to.

Q. Is this Dr. Sfakianos?

A. Yes. Thank you for saying his name, yes.

Q. You can put that document aside.

A. Sure.

MR. TUBIN: Exhibit 3.

(Exhibit 3 marked for identification.)

BY MR. TUBIN:

Q. This is summary impressions from Ms. Navarro's rehabilitation evaluation of Ms. Terry Dyer.

Can I see that one?

A. Yeah. Sure.
Q. I think I gave you -- all good.
A. Okay.
Q. All right. If you could turn to page 48, please.
A. Okay.
Q. And fourth from the bottom, the paragraph that starts, "As for her mental health," do you see that?
A. I do.
Q. "As for her mental health before her bladder cancer diagnosis, medical records indicate Ms. Dyer has had panic attacks since 1999. She was then prescribed Ativan and has since continued to take medication for anxiety."
Do you agree that the records reflect that?
MS. WALLACE: Objection.
You may answer.
THE WITNESS: I do have a history of anxiety --
BY MR. TUBIN:
Q. Since --
A. -- in my report.
Q. Since 1999?

A. I don't know the -- I don't have the date listed. But I do have listed in my preexisting medical history of anxiety. So ...

Q. Do you have any reason to disagree that it was in 1999?

A. No.

Q. Now, back to Exhibit 3, on page 48, the next paragraph down that starts with "Dr. Boldizar."

"Dr. Boldizar, family medicine specialist, testified that obesity is the most likely cause of Ms. Dyer's sleep apnea problems."

Do you agree with that?

MS. WALLACE: Objection.

THE WITNESS: I'm not giving a medical opinion, so I don't agree or disagree.

BY MR. TUBIN:

Q. Have you seen Dr. Boldizar's deposition testimony?

A. No.

Q. Did you ask for it?

A. No, I have not. I didn't know it existed.

Q. It wasn't offered to you?

A. No. It's not in the list of records I reviewed.

MS. WALLACE: Objection.

BY MR. TUBIN:

Q. Okay. And you didn't request it; correct?

A. I couldn't request something I didn't know it existed. So ...

Q. All right. On that note, you were given materials in this case; correct?

A. Yes.

Q. Who gave you the materials in this case?

A. The plaintiff attorneys.

Q. Okay. Did you ask for any additional materials?

MS. WALLACE: Objection.

THE WITNESS: I don't specifically remembering asking for -- I mean, maybe as things kind of came to me, I was, like, there are some more records here missing, yes. I don't specifically remember which ones now.

BY MR. TUBIN:

Q. Okay. Now on that same page, 48, the

last sentence of the second paragraph from the bottom, "Ms. Dyer also testified that she had PTSD related to the 2014 lawsuit verdict."

Do you recall her testimony as to that?

MS. WALLACE: Objection.

THE WITNESS: I did review her testimony. I don't specifically remember that verbatim, but I did review her testimony.

BY MR. TUBIN:

Q. Do you recall her having PTSD related to that prior lawsuit?

A. Now that you say that, I do. Yes, I do have a memory of her talking about that in a deposition.

Q. Now, the next paragraph regarding the life care plan recommendations associated with her 2014 lawsuit, "Ms. Dyer noted she had not undergone several recommendations in the past 10 years, including a psychological evaluation, individual and family counseling, or a weight loss program. She also denied that she has had licensed practical nursing services or formal housekeeping services."

Did you ever review her prior life care plan?

A. Her prior life care plan?

Q. From the 2014 lawsuit.

A. No.

Q. Were you aware it existed?

A. No.

Q. It wasn't offered to you; correct?

A. I have not reviewed it, so no.

Q. Now, on page 49, the first full paragraph, second sentence, "Despite her presenting problems, she describes several avocational pursuits in which she continues to engage, including swimming, gardening, and crafts."

Were you aware of that?

MS. WALLACE: Objection.

THE WITNESS: I was aware she still had activities, but she participated in with -- the issue sometimes was that her other urinary bag would leak and cause her distress.

But, yes, I know she still tried to participate in activities.

BY MR. TUBIN:

Q. How did you learn that she was still engaged in those activities?

A. She explained to me she would try and then she would have an incident and it would make her not want to participate.

Q. Understood.

(Exhibit 4 marked for identification.)

MS. WALLACE: Thank you.

BY MR. TUBIN:

Q. This is Ms. Navarro's rehabilitation evaluation of Bruce Hill, the summary and impressions section.

A. Okay.

Q. If you could turn to page 42.

A. All right.

Q. Third paragraph down that begins "During his April 9, 2024, deposition," I want to look at the last sentence, "I am unaware of any documate" -- sorry. "I am unaware of any documented vocational contraindications for Mr. Hill, who apparently continues to be an active -- active in a clergy capacity in his church and had worked as a lead pastor, earning income from 2013 to 2018."

Do you agree with that statement?
MS. WALLACE: Objection.
THE WITNESS: He did mention that he was able to fill in sometimes part-time, when he had good days. He has good days and bad days.
BY MR. TUBIN:
Q. Are you aware of any documented vocational contraindications for Mr. Hill?
MS. WALLACE: Objection.
THE WITNESS: So ...
MR. TUBIN: What's the objection?
MS. WALLACE: Calls for speculation.
MR. TUBIN: How --
MS. WALLACE: Medical.
BY MR. TUBIN:
Q. Okay.
A. Could you repeat? Sorry.
Q. Are you aware of any documented vocational contraindications for Mr. Hill?
A. So the doctor I consulted with said he should not be working.
Q. Say that again.
A. The doctor I consulted with said he should not be working due to his leukemia.

Q. So the only documented vocational contraindications you have are from the consulting physician; correct?
A. Yes.
Q. Okay. Now, do you know what ECOG stands for?
A. No.
Q. Are you familiar with the ECOG scale?
A. If you could tell me what the abbreviation is, maybe I would.
Q. Yeah. Sure.
A. No.
Q. I don't have it memorized either.
Eastern conference of oncology grading, something along those lines?
A. I mean, there's different grading schemes for cancer. I don't know -- if I refer to it as ECOG, though.
Q. Eastern Cooperative Oncology Group. That's what it stands for.
Does that sound familiar?
A. No, sir. I've seen other staging ones, though.
Q. So if a patient was ECOG status 1, you don't know what that means?

A. Typically, a state they normally rank those from stage 1 to 5. So stage 1 is early.

Q. Okay. And do you have any idea of what ECOG status 1 --

A. No, I don't. I'm just saying if it's in line with typical staging, 1 to 5, 5 is the more severe rating. I don't know for sure. I don't know if I've ever seen ECOG.

Q. Have you seen any records classifying Mr. Hill has ECOG status 1?

MS. WALLACE: Objection. Foundation.

THE WITNESS: I don't recall seeing those at this point in time. Maybe I did when I did those a year ago, but I don't recall that now.

BY MR. TUBIN:

Q. Okay. If you turn to the next page, page 43, and do you see the paragraph that starts, "During my exam"?

A. Yes.

Q. The next sentence, "Additionally, Mr. Hill reported he was independent with his ADLs and had essentially no problems living alone other than loneliness."

Do you agree with that?

MS. WALLACE: Objection.

THE WITNESS: So what he told me was that there are days when he can do his ADLs and there's days when he can't do anything.

So it's really a matter of his fatigue, his symptoms from treatment, you know, et cetera. So there are days he has better days, thank goodness. But there's days when he can't get out of bed.

So I think that's -- from my understanding of what he explained to me, that's partially correct, that there are days he can do his ADLs and days he can't.

BY MR. TUBIN:

Q. Would you agree that he's independent in activities of daily living?

MS. WALLACE: Objection.

THE WITNESS: Upon his -- for his good days, yes. That's what he explained to me.

BY MR. TUBIN:

Q. What about on his bad days?

A. No.

Q. He's incapable of doing his

activities of daily living on those bad days?

A. On those bad days, he says he doesn't attempt to do them. He's incapable of doing them.

Q. If you go to page 44. Do you agree Mr. Hill would have been able to extend his work life beyond 2012 working in environments compatible with his CLL diagnosis?

MS. WALLACE: Objection.

THE WITNESS: First off, I wasn't really giving any kind of earning capacity opinion here. I was looking at it from a life care planning standpoint: Does he need vocational services, including the life care plan.

I've going to defer to what the doctor told me about his capacity to earn, and he said he couldn't -- he shouldn't be employable now. They did not give me a date and time frame of when that would begin.

BY MR. TUBIN:

Q. Okay. Well, middle of this paragraph titled Number 2, do you see a sentence that starts, "After his retirement"?

A. Give me -- number 2?
Q. Yeah. It's like midway through.
A. I see it, yes.
Q. "After his retirement, Mr. Hill demonstrated the capacity to successfully transition to employment applying his transferable skills as a lead pastor two Sundays per month with Galilee" -- G-A-L-I-L-E-E -- "Baptist Church from 2013 to 2018, and he earned wages of $300 per day. Mr. Hill possessed transferable skills that would have enabled him to continue his employment in an office environment with minimal exposure to others."
Do you agree with that last statement?
A. Yes. He does have skills that he could be in office environment. The minimal exposure to others, though, if he was a pastor, I don't -- I mean, he would be exposed to others.
Q. Okay. Now, you see this list towards the bottom of possible employments: Online counselor, reception and information clerk, remote customer service representative.
Do you see those?
A. Yes.

Q. Could Mr. Hill have used his transferable skills in these following occupations in an isolated workspace?

A. "Isolated" by -- meaning he had no contact with others?

Q. Correct.

A. Some of these are not going to have -- be able to do that.

Q. For the ones that you would be able to do it?

A. I think only one here where you legitimately not have to be around others be remote customer service rep.

Q. All right. Thank you. You can put that document aside.

MR. TUBIN: This will be Exhibit 5.

(Exhibit 5 marked for identification.)

BY MR. TUBIN:

Q. Same format, the summary and evaluations from Dr. Shahnasarian's rehabilitation report of Plaintiff Rothchild.

A. Okay.

Q. Now, page 33, last sentence of the second paragraph, "I am unaware of any medical

records addressing Ms. Rothchild's PD condition near the time she left her full-time employment as a special education teacher in 2009."

Are you aware of any medical records that do address her Parkinson's condition at that time?

A. Sorry. I couldn't find the sentence initially when you started reading it. Give me just a second.

Q. Yep.

A. So the consultation I had with Dr. Andruski, if I'm saying that correctly, the neurologist, she said that -- I'm just going to -- this is quoted from her consult.

No, it's not safe for Ms. Rothchild to be working in any competitive employment capacity at present. Would have been medically indicated and appropriate for her to discontinue all competitive employment activities during 2009.

Q. Right. But I'm asking you, are you -- are you aware of any medical records addressing her Parkinson's disease condition near the time she left her full-time employment in 2009?

MS. WALLACE: Objection.
THE WITNESS: Not treatment records, no.
BY MR. TUBIN:
Q. Right, okay. Thank you.
Turn to page 34. Do you recall Ms. Rothchild testifying that she could perform all her job responsibilities, apart from those requiring her to use a keyboard to prepare and update the IEPs required for her students?
A. Yes.
Q. Now, going down towards the bottom of this paragraph, the sentence that starts, "If her employer had been unable to."
A. We're in the large paragraph?
Q. Correct. Bottom quarter --
A. I see it.
Q. All right. "If her employer had been unable to continue to make typing services available to her, other resources could have been solicited, such as assistance from coworkers and/or a student intern."
Do you agree with that statement?
A. That's a bit speculative. I mean, that would be relative to the employer. I mean,

we couldn't just assume that'd be the case.

Q. Okay. Relative to the employer, would that depend on the employer's resources?

A. Yes. And what they're willing to accommodate.

Q. Okay. All right. Turn to the next page, please. All right. Second to the last paragraph.

A. Okay.

Q. Starting with the second sentence, "Before she voluntarily left her PSHS employment, she could have more fully sourced options to continue to work as a special education teacher beyond what she presented to me, including making use of her voice-activated software, persisting in her request for typing accommodations, recruiting a student intern to assist with her typing, and enlisting coworker assistance by negotiating job responsibilities."

Do you agree with that?

MS. WALLACE: Objection.

THE WITNESS: Well, there's medical disagreement about that. And I mean -- to explain, as a vocational rehab counselor, we don't define function.

So Ms. Navarro had consulted with the doctor who said that Ms. Rothchild could participate in employment. I consulted with a doctor who said she needed to stop employment.

So there's a divergent opinion there -- or opinions. And as a vocational rehab counselor, you have to explain the implications of each opinion, not pick one or the other.

So there is a doctor saying that she could have continued to work. There's one saying she could not. So it's not for a vocational rehab person to decide. It's actually in our advisory opinions that we shouldn't do that.

BY MR. TUBIN:

Q. But you have to explain the implications of each; correct?

A. Yes.

Q. Did you explain the implications of the divergent opinion in this report?

A. I didn't have this report when I wrote my report. And, secondly, I'm not giving an earning capacity opinion.

Q. But you said divergent medical opinions. So this is isn't a medical opinion, this is a life care planner's opinion; correct?

A. No, I'm talking about the sentence above. She said she spoke to a physician who included -- that said that she -- that opined that she possessed the capacity to perform alternate employment.

So she's basing it upon this physician's findings. There's an alternate physician I spoke to who said she just stopped working in 2009. What I'm telling you is as a vocational person, we can't tell you which one should be followed because we don't find function. That's well documented in our advisory opinions and our treatises.

So -- but long story short is I'm not giving an earning capacity opinion. I was looking at this from the vantage point of are there vocation services needed in the life care plan?

Q. Now, this neurologist, PD expert, did you consider that in your report or no?

A. I didn't know that he had said this information. I didn't have this when I wrote my

report.

Q. Okay.

A. It looks like she's spoken to him. I wouldn't have information about that.

Q. Well, it would be in Ms. Navarro's report?

A. Right. I didn't get the report until after I wrote mine.

Q. Okay. Understood.

So the last sentence here, "Additionally, if she were interested in maintaining full-time employment with her former employer, Ms. Rothchild had opportunities to leverage her extensive work experience to potentially transition to alternate assignments at her place of employment."

You disagree; correct?

A. I don't agree or disagree. Again, I'm telling you there's conflicting medical foundation. One doctor who says she should not be working and one doctor is saying she can. So it's not for a vocational rehab person to decide.

Q. When you have that situation, but both doctors are -- let's say they were both treating plaintiffs of the -- treating physicians

of the plaintiff.

A. Uh-huh.

Q. Right? Not one doctor on the defendant side and one doctor on the plaintiff side but both on the plaintiff side. How do you account for that divergence?

A. So they're -- you're asking me there are two treating doctors only and they disagreed?

Q. Correct.

A. Same way. So if -- oftentimes, you're having a doctor who's specifying a body part. So I'm -- he's discussing restrictions for the shoulder versus another doctor discussing restrictions for the back. But if you're saying it's the same body part, the same diagnosis --

Q. Uh-huh.

A. -- then you have to explain the implications of both.

Q. Okay. And how do you pick between the two of them for the recommendation?

A. You don't. You say if we based upon Dr. A, the vocational implications of his restrictions would lead to these earning options, these wages; and according to Dr. B, it would lead to this. But that's as far as I can take

it. Otherwise, I am defining function, which is outside my scope.

Q. Understood.

(Exhibit 6 marked for identification.)

BY MR. TUBIN:

Q. This is Dr. Shahnasarian's summaries and impressions for Mr. Welch.

MS. WALLACE: Is this marked as Exhibit 6?

BY MR. TUBIN:

Q. Yes, that's correct.

Okay. The paragraph second from the bottom.

A. I'm on page --

Q. On page 28, I'm sorry.

A. Okay.

Q. "Apart from medical problems Mr. Welch attributes to his MCBCL experiences, his medical history is significant as noted and includes problems with a seizure disorder, bilateral knee problems, and a significant assault incident that caused him injuries in 1985. Mr. Welch's records also document hearing problems and degenerative disc disease. He takes

atenolol for unrelated cardiac problems. Additionally, in March 2024, Mr. Welch testified about a history of chronic headaches. Then the aforementioned medical problems should be considered when assessing his claim for rehabilitation intervention needs secondary to his MCBCL experiences."

Do you agree with that last statement?

A. To the extent that those cause restrictions for him, yes.

Q. Okay.

A. That were medically documented.

Q. All right. You can put that document aside.

(Exhibit 7 marked for identification.)

BY MR. TUBIN:

Q. This is a summary and impressions for Mr. Sparks. Turn to page 49.

A. Okay.

Q. Third paragraph from the bottom.

A. Okay.

Q. "On a positive note, apart from a knee brace, I am unaware of adaptive aids

Mr. Sparks uses."

Do you agree with that statement?

A. Mr. Sparks was having a lot of difficulties when I spoke to him with falls. I do believe he said he uses a cane. You know, he doesn't like to use a cane, but he uses it.

Q. So apart from a cane and a knee brace, are you aware of any other adaptive aids?

MS. WALLACE: Let me just object to the extent that he needs more time to review any of these documents and/or his prior report and being asked about such specific components.

THE WITNESS: I'm going to look at my report --

BY MR. TUBIN:

Q. Sure.

A. -- and see if there's --

Q. Okay.

A. He talked about being very fatigued, having multiple falls within his home, having problems maintaining his balance and ambulating. He spoke to me about all of those things.

Q. But none of those are adaptive aids; right? Those are conditions?

A. Right, those are conditions. I guess my point is that it sounds like he needs some adaptive aids.

Q. Right. But are you unaware, apart from a knee brace and a cane, of any adaptive aids?

A. That he's currently -- that he was using at that point in time? No.

Q. Okay. Thank you.

Back to page 49. Now, the middle of the last paragraph. "Again, personnel records from his former employer indicate Mr. Sparks voluntarily pursued retirement. I am unaware of any medical advisement that he should have left the workplace at that time."

Are you aware of any medical advisement that he, Mr. Sparks, should have left the workplace when he retired?

MS. WALLACE: Objection.

THE WITNESS: So that goes back to who I spoke to in consultation, Dr. Schwarz. He indicated --

BY MR. TUBIN:

Q. A little. I mean, it's more if there's any medical advisement that he should

have left at that time which would have been before Dr. Schwarz.

A. I'm just going to look. I was trying to remember what date she said. So give me just a second.

Q. Yeah. No problem.

A. So she said in 2016. So what was the date you were asking me?

Q. 2017 is when he voluntarily left.

A. So she said -- this is on page 8 of her questionnaire responses that she signed. And the question was: "Is it medically safe and appropriate for Mr. Sparks to attempt to pursue gainful employment with an open labor market given his status of Parkinson's disease?"

Her answer was: "No, it's not medically safe or appropriate for Mr. Sparks to attempt any type of gainful employment/activity now. Mr. Sparks has had to stop working during 2016 due to Parkinson's disease, as such was medically necessary for him."

Q. Are there any treating physician records to that point?

A. None --

MS. WALLACE: Objection.

THE WITNESS: None I've directly reviewed, no.

BY MR. TUBIN:

Q. Would you agree that Mr. Sparks possessed transferable skills that would have allowed him to transition to employment that remained within his capacity?

A. Well, again, I don't determine the functional capacity. He has transferable skills, yes. A lot of those skills are transferred to light to medium type work, if not heavy.

Q. So page 50. The first full paragraph.

A. On page -- okay. It starts with "Based on"?

Q. "Based on," yeah. And then the last -- second to last sentence says, "No healthcare provider recommended work restrictions or an advisement that he change occupations, Mr. Sparks conveyed."

Other than the consulting physician, are you aware of any health care provider who has recommended work restrictions or advice that he change occupations?

A. Not in the records I reviewed.

Q. Okay. All right. You can put that document aside.

Two more here, I think.

A. Okay.

(Exhibit 8 marked for identification.)

BY MR. TUBIN:

Q. Exhibit 8, same thing, summary and impressions, but for Mr. Mousser.

If you look at page 46, and the second to last paragraph and sentence that starts, "Mr. Mousser advised me."

A. 46?

Q. Correct.

A. What did it start with again? I'm sorry, I didn't see it.

Q. "Mr. Mousser advised me he is independent."

A. Let me see -- oh, further down. I thought you said at the beginning of the paragraph.

Q. Gotcha.

A. Yeah, I see it now.

Q. Okay. Great.

"Mr. Mousser advised me he is

independent in activities of daily living. He described recreational activities in which he regularly engages, including riding in a friend's all-terrain vehicle around his friend's ranch and regularly fishing in a fish pond."

Do you have any reason to disagree with these statements?

A. No.

Q. Are those activities you were aware he was engaging in?

A. On Mr. Mousser, I did a cost analysis of the transplant surgery. So I didn't speak to Mr. Mousser.

Q. Okay. If you turn to page 47, second paragraph from the bottom that begins, "Richard Eugene Mercer."

A. Okay.

Q. Were you given Mr. Richard Eugene Mercer's deposition transcript?

A. No.

Q. You didn't ask for it; correct?

A. I didn't know it existed. I'm not giving a vocational opinion. But, no, I didn't see any employer's depositions for him.

Q. And it wasn't offered to you;

correct?

A. I mean, I didn't receive it. So I didn't know to ask for it -- that it existed.

Q. So if you see the third sentence in that paragraph, "Mr. Mercer noted Mr. Mousser did not express medical issues as a reason for his retirement and he responded affirmatively when asked whether Mr. Mousser could perform the physical and mental requirements of his job during his 10-month tenure preceding his resignation."

Assuming that testimony -- assuming that accurately reflects his testimony, is that testimony you would have liked to have reviewed?

MS. WALLACE: Objection.

THE WITNESS: It wouldn't have any bearing on what I did. So ...

BY MR. TUBIN:

Q. Why not?

A. Because I'm not rendering a vocational earning capacity opinion for Mr. Mousser.

Q. Then the next sentence, "Dr. Andrew Rockwood, Mr. Mousser's treating urologist, testified on July 24, 2024, that he did not

advise Mr. Mousser to cease working and that he would have said no, do not stop working if Mr. Mousser had asked him."

Did you review Dr. Andrew Rockwood's deposition testimony?

MS. WALLACE: Objection. Foundation.

THE WITNESS: No.

BY MR. TUBIN:

Q. Was it offered to you?

A. I mean, I didn't receive it in my file, no.

Q. Would you have liked to have received the treating physician's deposition transcript?

A. To the extent that it had information about future care, but not regarding -- it wouldn't be relevant to me because I'm not giving a vocational opinion, what you just read.

Q. But you would need to review it to know if it has any relevance to future care; correct?

A. It's his primary care physician, is that --

Q. It's his treating urologist.

A. Neurologist.

Q. Urologist.

A. Urologist. Relative to what I did was I spoke to a transplant specialist. So that would not be the person who would do that procedure.

Q. How do you know that?

A. That's just not who does the procedure. A transplant surgeon does.

Q. Okay.

A. A urologist treats urological conditions and does procedures, not transplants.

Q. So if he's facing a kidney transplant, you don't think it's useful or helpful to review the deposition transcript of his treating urologist?

A. I'm not saying it's not helpful. But, ultimately, we would go to the transplant surgeon to see if he's a candidate for transplant. That's -- we go to the specialist.

Q. If this was made available to you, would you have reviewed it?

A. Certainly, if they made it available to me. But would it change what the transplant surgeon told me? No. I would anticipate it, but potentially.

Q. Bottom of page 47, the last paragraph

states, "Mr. Mousser has multisystem disabling problems apart from his UTUC, including musculoskeletal problems impairing his neck and lower back functioning, diabetes with neuropathy in his extremities, and cardiac problems that adversely affect his functionality and likely would have required treatment regardless of the UTUC." Do you agree?

MS. WALLACE: Objection.

THE WITNESS: It's a medical decision. I mean, that's certainly a medical finding. I don't know if this person -- if this -- the life care planner is citing something from the doctor or -- but my understanding, this life care planner is not a doctor, he's a psychologist. So that's a medical scope of practice question.

BY MR. TUBIN:

Q. Have you seen any records that reflect these multisystem disabling problems, apart from the UTUC?

A. Let me look.

Q. Yeah.

A. I did make mention that he had some

chronic low back pain, coronary bypass grafting in his history.

Q. Would that adversely affect his functionality?

A. I mean, that's a medical decision. I guess what I was saying earlier, though, is that to say those would likely require treatment, regardless, that's not really for anyone to make a decision other than a doctor.

Q. If you turn to page 48 of Exhibit 8, and the third sentence from the top, there's a conclusion here that "There is insufficient evidence to support a claim that Mr. Mousser's UTUC required him to exit the workplace and to refrain from re-entering it."

Do you agree with that statement?

MS. WALLACE: Objection. Foundation.

THE WITNESS: I didn't give it that type of opinion. So, I mean, I don't have opinion one way or the other about that.

BY MR. TUBIN:

Q. You don't have opinion on that?

A. I wasn't asked to do that. That was not the scope of what I completed for Mr. Mousser.

Q. Okay. Thank you, sir.

MR. TUBIN: I'm at a good breaking point, if you want to take ten.

THE WITNESS: Okay. Sounds great.

THE VIDEOGRAPHER: Off record at 10:45 a.m.

(Recess taken from 10:45 a.m. until 11:01 a.m.)

THE VIDEOGRAPHER: On record at 11:01 a.m.

BY MR. TUBIN:

Q. Mr. Fryar, you completed a Zoom assessment with Mr. Laramore in early 2025; correct?

A. Yes.

Q. Did you have any time constraints for that assessment?

A. Not that I recall.

Q. Where was Mr. Laramore during that assessment?

A. At his home.

Q. Do you know who else was there with him, if anyone?

A. I don't recall anyone else being there. At least they weren't represented on the video.

Q. Do you know how long your assessment took?

A. I don't recall exactly, but I can maybe give you an answer.

An hour. It was approximately an hour.

Q. Okay. Did you take any notes?

A. No.

Q. Did you ask Mr. Laramore whether any of his physicians have recommended bladder removal?

A. Back to your question about notes. They went into my report. So I -- I complete the -- simultaneously in the report. So I didn't take any handwritten notes, if that's what you're asking me.

Q. Did you take typed notes?

A. Like, it's what you see in the report.

Q. So you wrote them directly into the report?

A. Right, I did.

Q. Okay.

A. I'm sorry, could you repeat that?

Q. Yes. Certainly, sir.

Did you ask Mr. Laramore whether his physicians had recommended bladder removal?

A. I did. And at that point in time, they had not.

Q. Okay. Is that in your report?

A. Well, I summarize the medical records in the -- as an enclosure, I do believe.

Q. Right. But a note from the interview mentioning --

A. Oh, specifically, no, not to that. I let the record speak for that.

Q. Did you take a note that he had told you that none of his physicians had recommended bladder removal?

A. I didn't specifically write that in the report. But that's evident in the medical records I reviewed.

Q. Okay. What else did you ask him?

A. We talked about his ADLs, his medication, his -- you know, where he was living. Driving, if he was able to drive. His past vocational history education. Symptoms -- I think I said that.

Q. Dr. David Gabriel Alonzo treats Mr. Laramore for his bladder cancer; correct?

A. Yes.
Q. Was Dr. Alonzo's deposition transcript offered to you?
A. I don't think I have reviewed that to date, no.
Q. Did you request it?
A. No.
Q. Did you know he was deposed?
A. Not until you said that, no.
Q. You did not consult with any of Mr. Laramore's treating physicians; correct?
A. I did not.
Q. You asked Dr. Alonzo for a consult; correct?
A. Yes. I'm pretty sure I sent him a questionnaire.
Q. Right. Is that how you contacted him?
A. Yeah. We send the questionnaire and we try to follow up on it through phone.
Q. You did not hear back from him; correct?
A. I did not.
Q. Did you follow up?
A. My office and I followed up a few

times, yes. We never got a response.
Q. How many times?
A. I know I tried a handful of times. And I -- I know the office did for a couple more times, but we never got a response.
Q. You did that over phone?
A. Uh-huh. Yeah.
Q. You consulted with Mr. John Sfakianos; correct?
A. Yes.
Q. How did you find Dr. Sfakianos?
MS. WALLACE: Objection to the extent that it calls for any communications with counsel.
You may answer.
THE WITNESS: It was my understanding he was a physician that was available for me to consult with from the attorneys.
BY MR. TUBIN:
Q. You got that understanding from the attorneys?
A. Yes.
Q. Okay. You spoke with Dr. Sfakianos over the phone; correct?
A. I don't remember if it was over the

phone or on Zoom now.
Q. Okay. But it was remote?
A. It was remote, yes.
Q. Dr. Sfakianos has never interviewed Mr. Laramore?
A. No. My understanding is he reviewed the medical records.
Q. The consult with Dr. Sfakianos was about surgical intervention; right?
A. Yes.
Q. Dr. Alonzo had already operated on Mr. Laramore; correct?
A. Yes.
Q. Dr. David Spencer is Mr. Laramore's most recent surgeon; correct?
MS. WALLACE: Objection.
BY MR. TUBIN:
Q. Page 5 to 6 might detail that.
A. Yes, urologist.
Q. But you did not try to consult with Dr. Spencer; correct?
A. No, I did not send him a -- any -- a letter, no.
Q. You did not contact him in any way; correct?

A. Well, he's not a surgeon.
Q. Okay.
A. But, no, to answer --
Q. But he performed surgery on Mr. Laramore; right?
A. He did, but he's not the type of surgeon would do this.
Q. Okay. Was his deposition transcript offered to you?
A. I don't recall it being, no.
Q. Did you review it?
A. I would have listed it, if I had. I don't have it listed.
Q. Page 4 of your report indicates that a Dr. Hitt also operated on Mr. Laramore; correct?
A. Dr. -- tell me the name again.
Q. Hitt, H-I-T-T.
A. He did, on his prostate.
Q. You did not try to consult with Dr. Hitt; correct?
A. No, that was on his prostate.
Q. Are you aware he was deposed?
A. No.
Q. His deposition transcript was not

offered to you; correct?
A. I have not reviewed it.
Q. Okay. Your recommendations are contingent on Mr. Laramore having his bladder removed; correct?
A. That was the foundation I received from the surgeon I spoke to.
Q. Dr. Sfakianos indicated it is medically likely Mr. Laramore will require bladder removal in the future due to reoccurrence of bladder cancer for him; correct?
A. That's what he told me, yes.
Q. Do you know how likely? Did he indicate that to you?
A. Well, the question is -- context of more likely than not. So likely meaning greater than -- greater than chance.
Q. Where does it say more likely than not?
A. It doesn't. It says medically likely. So that's understood to be beyond probability of chance.
Q. How do you understand it to be that?
A. That's -- when I ask a doctor that, I'm saying, is it likely this is going to happen

greater than 50 percent.

Q. Is that common practice in life care planning that medically likely means greater than 50 percent?

A. Yes.

Q. Has any physician other than Dr. Sfakianos stated that Mr. Laramore will require bladder removal?

MS. WALLACE: Objection.

THE WITNESS: I haven't seen those depositions. But what I've reviewed, no.

BY MR. TUBIN:

Q. You would have noted it in your cost assessment if they had; correct?

A. Yes.

Q. Did you identify any medical records stating that Mr. Laramore will need to have his bladder removed?

A. Not that I recall.

Q. Did you identify any medical records indicating Mr. Laramore currently has bladder cancer?

A. I think that was an evolving topic matter at the point when I was reviewing records. So not at that point in time, no.

Q. You did not review Dr. Sfakianos's expert report on Mr. Laramore; correct?
A. No, I spoke to him.
(Exhibit 9 marked for identification.)
BY MR. TUBIN:
Q. This is 9, I believe. Do you recognize this document?
A. No, I have not seen this document before.
Q. What does this appear to be to you?
MS. WALLACE: Objection.
THE WITNESS: A report from the surgeon we were just discussing for Mr. Laramore.
BY MR. TUBIN:
Q. Would it have been helpful to review this report?
MS. WALLACE: Objection.
THE WITNESS: I mean, I understood his opinions when he -- what he gave me in consult and he signed those opinions as being valid. So it would certainly be something I would take in to review.
BY MR. TUBIN:

Q. Can you turn to page 7, please. That first full paragraph, the last sentence, could you please read that?

A. The first full paragraph, okay.

Q. It begins, "Given."

A. Yeah, sure. "Given Mr. Laramore's multiple bladder cancer recurrences after the best standard of care therapy available, it is my opinion that he will need continued treatment and possibly require surgical intervention, remove his bladder with the development of a urinary diversion."

Q. So when you asked him whether it was medically likely, you were indicating 50 percent or more; correct?

A. Yes.

Q. Or more than 50 percent? Which one?

A. Greater than 50 percent.

Q. Do you understand "possibly" to mean greater than 50 percent?

A. No, I don't initially understand possibly to mean that. But that's what he told me.

Q. Right. Do you think that this conflicts with what he told you?

A. I have to understand more what he means by "possibly." Does he mean possibly is greater than 50 percent? Then, no.

Q. Okay. So he would have to mean that possibly is more than 50 percent for his opinion to agree with yours -- for this to agree with what he told you?

A. Yes. In order for it being on a life care plan on the table and not labeled -- if it was just possible, we would label it potential.

Q. To you, medically likely is different than possibly?

A. Possibly could mean less than 50 percent, but it could mean something different to him. I don't know his use of that word. You have to clarify it with him.

Certainly, if he says it's possible, then that would be labeled as potential surgery, if it's less than 50 percent, I should say.

Q. Gotcha. And the part you wrote where it's -- read where it says, "It is my opinion that he will need continued treatment and possibly require surgical intervention," do you have any idea what continued treatment Mr. Laramore would select if he were to have a

recurrence of bladder cancer?

A. We didn't discuss that. It was -- we discussed -- that's why it's called a surgical cost analysis. We talked about the surgical requirements.

Q. I believe on page -- you can put that exhibit to side.

A. Okay.

Q. I believe on page 7 of your report --

A. We're still on Mr. Laramore?

Q. Correct.

A. Okay. All right. Okay.

Q. It states, "Dr. Sfakianos indicated Mr. Laramore, postoperatively, would require daily home health services for one month. The specific frequency of such home health services is deferred to Dr. Sfakianos for determination."

That's stated in your report; correct?

A. Yes.

Q. Did Dr. Sfakianos ever give you a frequency?

A. No.

Q. How did Dr. Sfakianos indicate to you that Mr. Laramore would need these services?

A. He said he would need it for a short period of time for that -- I think you just read it, for one month. But he didn't say how frequently during the week.

Q. And why was this not listed in the cost analysis table?

A. It was listed under the notes.

Q. Right. But why is it not in the table as an item?

A. Because I'm not going to determine frequency. That's outside of my scope of practice.

Q. So if something says -- oh, so if a doctor hasn't determined frequency, you can't put it in your cost?

A. I'm not putting it in the table.

Q. And why is that?

A. Because it's outside my scope to determine frequency.

Q. And that's because you're a life care planner and it would be outside a life care planner's scope to determine frequency?

A. Well, I am a life care planner who is also a nurse. So I can administer care, but I cannot prescribe care.

Q. Uh-huh. Do you know what home health services Mr. Laramore would require?

A. Give me just a second.

Q. Yeah.

A. See if he gave us any more details about that. Well, he said to support his instrumental ADL. So that would typically fall to a CNA. Unless -- unless there was some kind of skilled service, it would be a CNA that would be doing that.

Q. That's what Dr. Sfakianos said?

A. Well, he said to support and assist in the performance of instrumental activities of daily living. Meaning cooking, cleaning, you know, shopping, that type of thing, or helping get dressed. That would be a CNA, not a skilled nurse.

Q. Are you assuming that's what he means when he says "postoperatively would require daily home health services for one month"?

A. Yeah. Because he said instrumental ADLs. So if there was -- typically, when a doctor tells you that, that's meaning a CNA. It's not -- he would -- it be a skilled nurse if there was something like wound dressing or

et cetera, intravenous medication.

So based on that, there's indication it would be a CNA. But I'd defer him for clarification on that.

Q. Okay. Now, when you earned your life care planning certificate, Dr. Paul Deutsch was your primary instructor; correct?

A. Him and Ms. Kitchen.

Q. Who?

A. So Ms. Kitchen also was -- Julie Kitchen also was involved on that program. I guess she was like an advisor for the students.

Q. You named Dr. Paul Deutsch in your report; correct?

A. Both of them were, yeah.

Q. And you said he's the founder of modern life care planning?

A. He's considered the father of it, yes.

Q. Okay.

A. Founder, father, whatever term you want to use.

Q. And do you consider him an authority on life care planning?

A. He was the one who originated it,

yes.

Q. He was skilled enough to give you adequate life care planning training; correct?

A. Yes.

Q. And his lessons helped equip you to perform as a competent life care planner?

A. Him and Ms. Kitchen, yes, and his first generation student, Mr. Yuhas.

Q. And you have followed his teachings in your practice; correct?

A. I do my best to honor those, yes.

Q. Okay. Now, you completed a Zoom assessment with Ms. Dyer in November of 2024; correct?

A. Yes.

Q. Where was Ms. Dyer during that assessment?

A. At her home.

Q. Do you know where in her home?

A. I can't specifically recall the room, sorry.

Q. Did you have any time restrictions on this interview?

A. No.

Q. How long did it last?

A. I have to reference my billing again. 1.4 hours.

Q. Okay. Who was present, other than Ms. Dyer, if anyone?

A. I think for moments her husband was present. But he was in and out of the screen.

Q. Was he there -- did he give any answers?

A. He did answer some things about how he put on the urinary bag and how he needed to assist her. But he wasn't there for the whole assessment.

Q. Did you take any notes?

A. It would have run to the report.

Q. Is that the same for all of your reports?

A. That's my -- that's what I do, yes.

Q. Okay. You recommend mental health counseling for Ms. Dyer; correct?

A. Well, technically, I didn't medically recommend that.

Q. It's listed as a recommendation in your tables; correct?

A. It is, but it came from a physician.

Q. Right. Is Ms. Dyer currently

receiving mental health counseling?

A. I don't think -- when I spoke to her, she was not.

Q. Did you ask her if she intends to seek mental health counseling?

A. We did speak about it and she explained that she would consider it, yes.

Q. Is that in your report, that she would consider it?

A. No. I just remember her telling me that she would consider it. I think something came up about, you know, needing support and being able to talk to someone. So from her, actually.

Q. Right. And none of that's in your report, though?

A. Not specifically that -- stated like that, but I do recall her saying that.

Q. Okay. Has anyone besides Dr. Longo recommended mental health counseling for Ms. Dyer?

A. Well, he recommended it and then deferred to a counselor about the frequency, but no.

Q. No one but him has recommended it?

A. That's correct.
MS. WALLACE: Object -- objection.
THE WITNESS: To my knowledge.
BY MR. TUBIN:
Q. Are you aware he is an expert for the plaintiffs in this case?
A. My understanding, yes, he was a retained expert.
Q. Frequency is listed as "to be determined" here; correct?
A. It is.
Q. And it's still in your table; correct?
A. Yes.
Q. How can we quantify costs where the frequency is listed as "to be determined"?
A. At this point in time, you can't include that.
Q. But it's included?
A. I mean, you can't quantify it exactly, no.
Q. Okay.
A. I gave the unit cost and is to be determined by a mental health specialist. I was very clear about that.

Q. You list quetiapine -- Q-U-E-T-I-A-P-I-N-E -- as a recommendation.
A. Where are you at?
Q. It's in the tables. I can pull it up. This is Laramore. It's on page 5 --
A. Okay.
Q. -- of your tables.
A. I am looking at page 5 and I don't know what you were spelling there.
Q. The bottom medication that starts with a Q.
A. On page 5? There's no medication.
MS. WALLACE: Are you on Dyer?
BY MR. TUBIN:
Q. On page 5 of Dyer's tables, not the report, but the tables.
A. Okay. This is Dyer. Can you show me what you're --
Q. Yeah. I have -- Ms. Terry Dyer, cost analysis tables.
A. That's strange, I don't have that in mine.
Q. So turn to Exhibit 1.
A. Exhibit 1.
Q. That's your report.

A. Okay. Something just didn't get printed off. Sorry.

Oh, this is on backwards. Maybe -- I don't know what happened there. Sorry. I was looking at my copy. Give me just a second.

Q. Uh-huh.

A. Okay. Now I see what you're on. Sorry about that.

Q. No, that's fine.

Is Ms. Dyer currently taking this medication?

MS. WALLACE: Objection. Foundation.

THE WITNESS: I don't recall if she was actively taking it at the time I spoke to her.

BY MR. TUBIN:

Q. Are you aware of any treating doctor that has prescribed this medication?

A. Obviously, it's been recommended by this psychiatrist.

Q. Is he a treating physician of Ms. Dyer's?

A. He was an evaluating physician.

Q. So, no, he's not Ms. Dyer's --

A. No.

Q. -- treating physician?
A. Right now I'm remembering, I think I reviewed the report from him.
Q. Uh-huh.
A. So, no, this is from an evaluating physician.
Q. You would have listed here any treating physician that had also recommended --
A. Yes. I mean, that's who I saw as recommending it. I would have listed another doctor if someone else had recommended it.
Q. You list two to three nursing visits per week as a recommendation; correct?
A. Two to three a week, yes, sir.
Q. She is not currently receiving nursing visits; correct?
MS. WALLACE: Objection.
THE WITNESS: No, but her husband is assisting her. And the life care plan is to look at what she would need absent family members.
BY MR. TUBIN:
Q. Did you ask her if she plans to have nursing visits in the future?
MS. WALLACE: Objection to form.

THE WITNESS: She explained to me it would be nice to take some of the burden off her husband, yes.

BY MR. TUBIN:

Q. How would she take some of the burden off her husband?

A. Have nursing visits.

Q. She specifically said that to you?

A. Yes. Well, the concern in life care planning is that something could happen to the husband, so he couldn't do it. So life care planning is very clear on that, that we have to speak to what the value is of the care they're receiving if they're receiving it from family members.

Q. No one else besides Dr. Longo has recommended nursing visits; correct?

MS. WALLACE: Objection.

You may answer.

THE WITNESS: Not to my knowledge.

BY MR. TUBIN:

Q. Ms. Dyer relies on her husband for much of her care; correct?

A. For putting on the urostomy bag, yes.

Q. And that's one of the items in your

tables; correct?

A. Yes.

Q. And there's several entries related to that; correct?

A. There's three, I think, yes.

Q. Okay. Was Ms. Dyer's husband's deposition transcript offered to you?

A. No, I've reviewed Ms. Dyer's. I did not review her --

Q. You've not reviewed her husband's deposition transcript --

A. No.

Q. -- correct?

Page 8 of the tables --

A. Okay.

Q. -- states at the bottom in notes, "Dr. Longo explained during consultation that without the aid of her husband, Ms. Dyer would require physical assistance from a licensed practical nurse or registered nurse to apply her urinary bag/pouch correctly upon the stoma to avoid leakages due to necessary body positioning and the difficulties associated for persons with a larger body habitus"; correct?

A. Correct.

MS. WALLACE: Just to note for the record, it says -- I think you left out the word "necessary."

MR. TUBIN: Oh. Leakages due to necessary body positioning necessary and the difficulties --

THE WITNESS: Yeah, I think there's a double word there, so sorry about that.

BY MR. TUBIN:

Q. Oh, it's fine.

Do you have any reason to believe Ms. Dyer's husband will stop helping her with her urinary bag?

A. Not as we sit here today, but that -- from a life care planning perspective, we don't know. We don't know the answer to that long term. And the husband could have a disability himself, there could be a divorce, there could be the husband could pass away.

I mean, I don't want any of those things to happen to Ms. Dyer. But that's how we view in life care planning is that what he's doing is a service for her. And that service has a value, and this is what it would cost to replace that value.

Q. Did you note any of that in your report?

A. No, that's life care planning fundamentals.

Q. You reviewed Ms. Dyer's deposition; correct?

A. I did.

Q. Now, she testified that she lost her bladder because of Dr. John Lovett's malpractice; correct?

A. I do recall seeing in that in the deposition. I can't tell you precisely, if you could show me the deposition transcript. I can't tell you.

Q. Yeah.

A. Lots of documents in this case.

Q. Yeah, I'm impressed with how well you know them.

A. Well, thank you.

Q. That's made this go a little quicker, to be honest.

(Exhibit 10 marked for identification.)

BY MR. TUBIN:

Q. So I can speed you up.

A. That would be great.
Q. If you turn to page 200.
A. Okay. Okay.
Q. And line 17 to 18, states -- I'll read the prior line as well.
"But you have to remember that Lejeune water caused my cancer. I lost my bladder because of Dr. Lovett."
A. Give me just a second. Let me read.
MS. WALLACE: Are you on line 16? I think that may help.
MR. TUBIN: Yeah, I started on 16, yeah. Thank you.
THE WITNESS: Okay. I see that.
BY MR. TUBIN:
Q. And on line 20, she says, "Because of the malpractice of what he did." Correct?
A. Correct.
Q. Several of your life care planning recommendations are because Ms. Dyer no longer has a bladder; correct?
A. Yes.
Q. Did you ask to review Dr. Lovett's deposition transcript?
A. I don't think that I knew that there

was a transcript, so no.
Q. It wasn't offered to you?
A. It wasn't offered when I reviewed -- prepared the life care plan, no.
Q. Okay. Now, you asked Dr. Rock A. McCarthy, plaintiff's treating urologist, for a consult; correct?
A. On Ms. Dyer?
Q. Yeah.
A. Yes, I'll hand you back your transcript.
Q. Keep that. Yes, I have a copy.
A. I think I documented that in the report.
Q. Uh-huh.
A. Yes, I sent Dr. McCarthy a letter on 1/20/25.
Q. And the letter consisted of a questionnaire; correct?
A. Yes.
Q. You did not hear back; right?
A. I did not.
Q. Did you follow up?
A. We tried several times, me and my staff.

Q. Do you know approximately how many times?
A. I don't know exactly how many.
Q. How did you follow up?
A. That would have been through phone.
Q. Did you ask for Dr. McCarthy's deposition transcript?
A. Not at the time of writing this report, no.
Q. Was it offered to you?
A. Not specifically, no.
Q. Were you aware that he was deposed?
A. No.
Q. How you did you identify Dr. Longo?
A. He was a physician that -- was explained to me was retained, and I had availability to speak to about Ms. Dyer's future care.
Q. Who explained that to you?
A. The attorneys involved in this matter.
Q. Who was he retained by?
A. By -- I don't remember specifically who, but one of the plaintiff attorneys.
Q. Did you speak with Dr. Longo?

A. Yes.
Q. Dr. Longo has never examined Ms. Dyer; correct?
MS. WALLACE: Objection.
THE WITNESS: As I recall, he had looked -- reviewed her records.
BY MR. TUBIN:
Q. But he has never examined her; correct?
A. That's what I recall, yes.
Q. Okay. You based Ms. Dyer's psychiatric treatment recommendations on Dr. Haresh Tharwani's expert report; correct?
A. Yes.
Q. You did not ask Dr. Tharwani for a consultation; correct?
A. No. It was explained pretty clearly in his report.
Q. You did not send Dr. Tharwani a questionnaire; correct?
A. Correct. Because it was clear what he was recommending.
Q. You relied solely on his expert litigation report?
A. On his report, yes.

Q. Okay. You understand that that report is disclosed in the context of litigation?
A. Yes.
Q. Who gave you his expert litigation report?
A. It came from the plaintiff attorneys.
Q. But they did not give you his deposition transcript; correct?
A. Not at this point in time, no.
Q. Did you ask for his deposition transcript?
A. I didn't specifically ask for it, no.
Q. Okay.
A. Often those come, you know, as matters progress and I see depositions later.
Q. Do you know the date of his deposition?
A. I do not.
Q. Just give me a moment to locate the next exhibit.
A. Sure.
Q. Did you review records from Dr. Suzanne Hentz?
A. Still talking about Ms. Dyer?
Q. Yes.

A. Yes, I cited it in my list of medical records reviewed.

Q. Okay. Do you recall Ms. Dyer testifying that Dr. Hentz prescribed her antianxiety medication in 1999?

A. Not specifically. I don't remember that from the transcript.

Q. You did not review medical records from Dr. Andres Joseph Esposito; correct?

A. No, I did not list that.

Q. Do you recall Ms. Dyer testifying she had anxiety and anxiety prescriptions in 1999?

A. I'm not sure on the date. I do remember her saying that she had previous anxiety because I listed it in my report.

Q. If you turn to page 133 of her transcript.

A. 133?

Q. Uh-huh.

A. Okay.

Q. And I'm going to read from lines 8 to 16.

"Suzanne Hentz.

"How do you spell that?

"I think it's H-E-N-T-Z.

"Okay.

"She's got a practice on Oleander, right near Hugh McCrae Park.

"QUESTION: That would have been what year? When did she start giving you Zoloft?

"ANSWER: 1999 to 2000."

A. That's what it says, yes.

Q. Okay. Would you agree her depression is due to the bladder removal?

A. Well --

MS. WALLACE: I'm sorry. Objection, please.

THE WITNESS: Sequela thereof and the life -- and the quality of life problems thereof, yes. As she described it to me. I'm not diagnosing her with depression, but her mental health issues as she explained to me rise from the sequela of losing her bladder.

BY MR. TUBIN:

Q. So if we turn to the next page, 134, lines 3 to 4.

"ANSWER: Depression did not hit me until after I had my bladder removed which was in 2010."

That's what it states; correct?

A. Right.

Q. And she blames Dr. Lovett for her bladder loss; correct?

A. She did earlier in the deposition, yes.

Q. She got PTSD from losing a malpractice case against Dr. Lovett; correct?

MS. WALLACE: Objection. Foundation.

THE WITNESS: I don't remember the reason for the PTSD diagnosis.

BY MR. TUBIN:

Q. Turn to page 242.

A. Okay, I'm there.

Q. Can you read lines 20 to 23.

A. "I'm sorry, I have PTSD because of that. My husband and I both do. We have -- it's very -- we have PTSD because of that trial. We can't -- if we talk about it just -- it we just" -- there's some typos -- "it would just start going."

Q. Do you have any reason to disagree with Ms. Dyer's testimony here?

MS. WALLACE: Objection. Foundation.

THE WITNESS: I mean, that's her

testimony there. I don't have any reason to disagree with her deposition testimony.

BY MR. TUBIN:

Q. Could Ms. Dyer become independent with her stoma if she lost weight?

MS. WALLACE: Objection.

THE WITNESS: If her body habitus changed, then, yes, that could be something that could happen.

BY MR. TUBIN:

Q. Ms. Dyer had a history of anxiety and depression that predated her bladder cancer; correct?

MS. WALLACE: Objection.

THE WITNESS: Yeah, we just -- yes, based on the information we just reviewed, yes.

BY MR. TUBIN:

Q. If you cannot provide a frequency for a cost, then it should not be in your plan; correct?

A. Until it can be qualified, yes. I mean, it should be in the -- it's in the plan, explaining that a doctor's recommended it. But the frequency is not determined. So to the

extent the unit cost is in there, yes.

Q. Are you aware Dr. Paul Deutsch performed a life care plan for Ms. Dyer?

A. I am not.

Q. Is that something you would have liked to have reviewed?

A. Depending on the time span and when -- what it was for. Because in the -- in life care planning, we have to speak to the incident in question.

MS. WALLACE: Rob, will you make sure there's nobody waiting to be let in.

(Exhibit 11 marked for identification.)

BY MR. TUBIN:

Q. These are excerpts from the deposition of Paul Deutsch --

A. Okay.

Q. -- given in Ms. Fryar's 2014 malpractice lawsuit.

Now, you can turn to --

MS. WALLACE: Objection. I'm going to have to ask that -- he's never seen this exhibit before this deposition. It's numerous pages. He won't have context for

this deposition without reading the entirety of the deposition transcript.

So I would object to any line of questioning on this document.

MR. TUBIN: Is that an objection to form or foundation?

MS. WALLACE: It's an objection that he -- I don't know what he's going to be asked to provide testimony on, but he needs the opportunity to review the complete file that was just put in front of him.

MR. TUBIN: All right. I'm not opposed to him having time to review it. But I'm going to ask him questions about it.

And I just want to introduce now, this will be Exhibit 12.

(Exhibit 12 marked for identification.)

MR. TUBIN: This is the stipulated Rule 30 deposition protocol in this case.

If you look at page 5, "Objections will be limited to form and foundation."

If you look at page 7, it's signed by

all four district court judges. Page 9 signed by Mona Lisa Wallace of Wallace & Graham, PA.

MS. WALLACE: Yes. So let me be more clear. I would ask that we stay on the record and he be entitled to review the entire new document that you've put in front of him prior to asking us any questions about the document.

MR. TUBIN: He can review that document.

THE WITNESS: Okay. Okay. It's going to take a few minutes.

MS. WALLACE: It should take a while.

THE WITNESS: Okay. Is this the only document you want me to --

BY MR. TUBIN:

Q. These are excerpts from the deposition. So you won't even have the full deposition to review.

A. It's not the full deposition?

Q. I'd say you want to take five minutes to review. Your counsel is more than welcome to ask you questions after I'm finished on it and to draw out however she feels about the weight of

the document.

But I'll give you five minutes to review it on the record and then I want to ask some questions.

A. There's no way I can review this in five minutes.

MS. WALLACE: Yeah, he would need to -- he needs to be able to review the entirety of the document.

MR. TUBIN: There's nothing that stops me from asking him about this document.

MS. WALLACE: No, there's nothing at all. But he needs the opportunity to review the entirety of the document. If you -- that's --

MR. TUBIN: I'm going to ask him about this document.

MS. WALLACE: Okay. Sure.

MR. TUBIN: If you want to draw that out on your redirect, that not the entire document was put in front of him, that's fine. But I'm going to ask him about this document.

THE WITNESS: But this is not his

whole deposition.

MR. TUBIN: It's not the full deposition transcript.

THE WITNESS: Well, I mean --

MR. TUBIN: There's excerpts of testimony.

If you want to later establish that these excerpts are incorrect or not his true deposition testimony, that's fine. I welcome you to try it.

MS. WALLACE: Are you prohibiting the witness from reviewing the entire document that you've put in front of him?

MR. TUBIN: No. He can review that entire document.

MS. WALLACE: It's going to take him longer than five minutes to do that.

MR. TUBIN: Okay. Then I'm going to ask him about the excerpts I want to ask him about.

MS. WALLACE: He needs the chance to review the whole document and you can ask him anything you want about it.

MR. TUBIN: I don't agree that he needs a chance to review the whole

document.

MS. WALLACE: He does.

MR. TUBIN: Why?

MS. WALLACE: Because you put it in front of him.

MR. TUBIN: What rule says he needs to review the whole document?

MS. WALLACE: It's an entire exhibit.

MR. TUBIN: What rule says he needs to review the entire document before I ask any questions?

MS. WALLACE: Deposition ethics. I mean, he has to have the opportunity to review the whole document.

MR. TUBIN: I don't know where that is under Rule 30 or in the stipulated protocol or what you're referring to.

MS. WALLACE: Well, I've already told you what my position is on this. He needs the opportunity to fully review the document.

MR. TUBIN: Well, the objection is noted. Are you preventing him from answering a question?

MS. WALLACE: Until he reviews the

entire document, yes.

MR. TUBIN: Do you have a basis for that under attorney work product or a court order saying he can't answer the question?

MS. WALLACE: Yes.

MR. TUBIN: Because if you don't -- what's the objection?

MS. WALLACE: He's never seen this deposition transcript before.

MR. TUBIN: Okay.

MS. WALLACE: He's being asked to answer questions about it.

MR. TUBIN: We'll note the objection. It's your responsibility to file a motion to strike if you disagree with the testimony.

MS. WALLACE: Let's go off the record.

MR. TUBIN: I don't -- no, I don't -- why? I want to resume this deposition.

MS. WALLACE: Well, I'd like the opportunity to look at our protocol more specifically to see what -- why you're not allowing the witness to review a document

that you've put in front of him in its entirety.

MR. TUBIN: Okay. Do you want five minutes to look at the protocol? How much time do you need?

MS. WALLACE: I'll take 10 minutes.

MR. TUBIN: Okay.

THE VIDEOGRAPHER: Are we going off record?

MR. TUBIN: For 10 minutes.

THE VIDEOGRAPHER: Okay. Off record at 11:46 a.m.

(Recess taken from 11:46 a.m. until 11:57 a.m.)

THE VIDEOGRAPHER: On record at 11:57 a.m.

MS. WALLACE: Okay. We're back on the record and I was just going to make a brief statement regarding the issue that we were discussing before the break.

I had a moment to look up the Federal Rules of Civil Procedure, specifically Rule 30. It does provide that the witness may inspect any document put in front of the witness.

So, typically, the witness is allowed

to read documents before answering questions. Opposing counsel often requests time to review documents as well. So we would like to at least take you up on the offer that he be permitted to review the document for five minutes.

And then I will have a standing objection to this line of questioning given the document includes deposition transcript, which is 118 pages, on a prior legal matter of which the witness has no expertise or knowledge.

So we'll have a standing objection to any questions that he's asked about the document. And I'll restate that before we get started.

MR. TUBIN: For what it's worth, I'm not going to ask him to interpret any of the testimony or anything. Just kind of confirm this is what the testimony says.

So welcome to take that time to review. I don't think it's necessary to be able to do that. But it's your prerogative.

THE WITNESS: Okay. I'd rather

review it. Okay.

MR. TUBIN: Yeah.

MS. LAMACCHIA: Are we back on the record?

MS. WALLACE: Yes.

Can you hear the witness?

MS. LAMACCHIA: Hi, this is Leslie. Are we back on the record?

MR. TUBIN: Yes.

MS. WALLACE: Yes.

MS. LAMACCHIA: Michael, it's muted. The laptop's muted, so that's why --

MS. WALLACE: Did you hear my objection?

She can't hear anything.

(Discussion off the record.)

MS. WALLACE: Can you hear us, Leslie?

MS. LAMACCHIA: Now we can. Were you back on the record?

MS. WALLACE: I just gave an objection on the record. Did you hear that?

MS. LAMACCHIA: No, we didn't hear anything.

MS. WALLACE: Oh, okay.
THE VIDEOGRAPHER: Is it staying on?
MS. WALLACE: It might have just -- what do you think that was?
THE VIDEOGRAPHER: When you hit the top, it turned red. As long as that blue light is on, that speaker should be working.
MS. WALLACE: For those on Zoom, the witness is taking five minutes to review the deposition transcript.
(Reviewing document.)
MR. TUBIN: We're past five minutes.
THE WITNESS: I'm not through it, but if the five minutes was what I was granted, then, yes, we can go ahead.
MS. WALLACE: Okay. And I'm just going to state the objection one more time, especially because the Zoom participants weren't able to hear me.
So under Rule of Federal Procedure 30, the witness is permitted to inspect the document and courts have sufficiently -- have typically allowed claimants the opportunity to review -- to

review documents, particularly deposition transcripts that are 118 pages on subject matter that the witness has testified that he's unfamiliar with.

And so I will be objecting to form and foundation for each of the questions moving forward on this basis.

BY MR. TUBIN:

Q. Okay. So if you could turn to page 15 of this deposition transcript.

A. Okay.

Q. And can you read lines 14 to 17.

A. On page 15; correct?

Q. Correct.

A. "For example, she went from 212 to 228, which is the wrong direction for what we need in our situation. She could be independent with weight loss. Weight gain is only going to worsen that problem."

Q. And then the next question is: "And what weight or has it been determined, to your knowledge, at what weight she would be independent with her stoma?

"ANSWER: No, no specific weight, but I'm the one who brought up with Dr. Inman, the

question, do you agree that her weight or obesity is what is interfering with her being independent and managing the stoma, and he said, yes, I agree."

Did I read that correctly?

A. You did.

Q. Okay.

MS. WALLACE: Object to the form and foundation.

BY MR. TUBIN:

Q. If you turn to the next excerpt on page 54.

A. Okay.

Q. Can you read from line 22 on page 54 to line 12 on page 55.

MS. WALLACE: Objection to form. And foundation.

THE WITNESS: 22 to -- tell me one more time.

BY MR. TUBIN:

Q. To then 12 on the next page.

A. Okay. "All right" -- this is the question.

"All right. Let's talk about the individual counseling. I'll give you a second to

get there.

"ANSWER: I'm there.

"QUESTION: All right. This individual counseling, who is this proposed to be done by? You don't have the specialty here.

"ANSWER: Well, because I had a psychologist evaluate her, I would follow with that psychologist. But if there's a really good rehabilitation psychologist in the area, someone who knows disability and how it impacts an individual, or mental health counselor who works with a great deal of -- works a great deal with individuals with disability, I would prefer to see it be someone who has experience in working with people whose self-image, sense of body worth and self-worth are being impacted by disability."

Q. Okay. Thank you.

And Ms. Dyer, to your knowledge, has not pursued mental health counseling; correct?

MS. WALLACE: Objection.

THE WITNESS: Not specifically to my knowledge, no.

BY MR. TUBIN:

Q. Okay. Turn to page 80.

A. Okay.

Q. And could you read lines 13 to 21.

MS. WALLACE: Object to form and foundation.

THE WITNESS: "So the question is, you know, where is the anxiety and depression coming from. Well, she had a history of it before. Is it possible that she's going through now has to -- is it possible that what she's going through now has severely exacerbated it. I don't think there's any question that it has, and I'm certainly within my license area to talk about the exacerbation. Is there some preexisting history, absolutely, which makes her more vulnerable to having a severe exacerbation of anxiety and depression."

BY MR. TUBIN:

Q. And you agree with Dr. Deutsch that there's some preexisting anxiety and depression; correct?

MS. WALLACE: Objection.

THE WITNESS: Anxiety is mentioned in her records, yes, preexisting.

BY MR. TUBIN:

Q. Now go to page 88.
A. 88?
Q. Yeah, 88.
A. Okay.
Q. And read lines 9 to 14.
MS. WALLACE: Objection to form and foundation.
THE WITNESS: "Do you stand by that general line of thinking, that if you can't cost something out as to frequency, it needs to be out of your plan?
"Well, that's absolutely true. I mean, PRN is just as needed, so you have no statement as to the actual frequency, so there's no way to include a PRN statement."
BY MR. TUBIN:
Q. Do you agree with that testimony?
MS. WALLACE: Objection.
THE WITNESS: Well, I haven't calculated a total cost for that at all. So -- I don't know what he means by "not being in the plan" or -- supposed to put -- if a doctor said something is medically indicated, I listed that, and I

said the frequency's deferred.

BY MR. TUBIN:

Q. And in that case, you still believe that should be in your plan?

A. Well, there's no cost other than the unit cost. So, obviously, if the doctor says she's needs some, then there's going to be at least one occurrence. How frequently that is, I don't know, and it needs to be deferred to a appropriate mental health specialist. I said that in the plan.

Q. Okay. If you turn to page 97.

A. Okay.

Q. And if you could read -- and you can read it to yourself, you don't have to read it out loud -- lines 11 to 24.

MS. WALLACE: Object to form and foundation.

THE WITNESS: Okay.

BY MR. TUBIN:

Q. So, here, Dr. Deutsch is recommending in-home nursing visits; correct?

A. Yes.

MS. WALLACE: Objection.

THE WITNESS: Well, he's citing

that -- the need for them, yes.
BY MR. TUBIN:
Q. Okay.
A. I don't know if he's specifically recommending them or not.
Q. And Ms. Dyer did not follow that recommendation; correct?
MS. WALLACE: Objection.
THE WITNESS: My understanding is her husband is doing that type of care for her.
BY MR. TUBIN:
Q. So she does not have in-home nursing?
A. Not when I last spoke to her, no.
Q. And her husband was still alive, to your knowledge, at the time of this deposition?
A. Yes, he was alive when I spoke to him. So by virtue, he had to be alive in 2014.
Q. Right. But, yet, skilled nursing was still being recommended?
A. Yes, skilled nursing is being recommended.
Q. Okay.
A. Specifically an LPN.
Q. Okay. You can put this exhibit

aside.

Go to page 4 of your report on Ms. Dyer.

A. Okay.

Q. It's Exhibit 1.

A. I have it right here.

Q. All right. Actually, I want to go to page 4 of the table. I'm sorry.

A. Okay. I'm there.

Q. Fast. So under notes it states, "Dr. Longo explained during consultation that it was medically reasonable for Ms. Dyer to receive services from a licensed professional counselor or psychologist in the future."

"Dr. Longo deferred the determination of counseling frequency and duration to a treating mental health specialist for Ms. Dwyer -- Dyer."

MS. WALLACE: What page are you on, please?

MR. TUBIN: 4.

MS. WALLACE: Thanks.

BY MR. TUBIN:

Q. Do you see where it says that?

A. Well, you skipped a sentence, but

yes.

Q. Right.

A. Yeah.

Q. To your knowledge, does Dr. Longo have any mental health training?

A. That's why he's deferring the situation as far as frequency.

Q. Uh-huh.

A. But he's saying that it's not some -- when I discussed it with him, he said this is something common when people have -- go through removal of their bladder or have some significant change in their quality of life like this, and it's reasonable to have her be evaluated and let that person determine the frequency.

Q. But does his medical training qualify him to make those determinations?

MS. WALLACE: Objection to foundation and form.

THE WITNESS: That happens all the time. Physicians send someone for an evaluation by a psychologist and let them determine the frequency. That's just what happens.

BY MR. TUBIN:

Q. Without a determination of frequency or duration, there's no way to assess the future costs of the treatment; correct?

A. No, not at this time. Not without that being completed.

Q. You list a kidney CAT scan once per year and an ultrasound -- or an ultrasound once per year?

A. Yes.

Q. It's on page 6.

A. I did.

Q. Did you review Dr. Longo's owes deposition?

A. I don't think so, no.

Q. Was it offered to you?

A. Not that I recall.

Q. Okay. Ms. Dyer's bladder was removed in 2010; correct?

You want to check --

A. That's a hard one for me to remember the date.

Q. I think page 4 might have it.

A. Yes, looks like 2010.

Q. Okay. Now, turning back to Table 6.

I know you haven't reviewed his

deposition transcript, so let me represent to you that he testified that after five years, Ms. Dyer could switch to an ultrasound.

A. Okay.

MS. WALLACE: Objection.

BY MR. TUBIN:

Q. Would that change anything here in your Table 6?

A. If he came -- in his deposition, he said that it should be ultrasound, then we can take away the kidney CT scan.

Q. Okay.

A. If he's saying that in lieu of the kidney CT scan.

Q. Right. Okay.

MR. TUBIN: Want to break for lunch?

MS. WALLACE: Sure.

THE WITNESS: Sure.

THE VIDEOGRAPHER: Off record at 12:15 p.m.

(Recess taken from 12:15 p.m. until 1:08 p.m.)

THE VIDEOGRAPHER: On record at 1:08 p.m.

BY MR. TUBIN:

Q. Mr. Fryar, I want to look back at the

three-page document you brought that I think you were talking about using the 75th or 80th percentile. Do you know what I'm referring to?

A. I have a copy, but I could look at your -- well, I have another copy of it.

Q. Yeah, I have some notes on mine.

A. Yeah, that's fine. I'm sorry, lots of files.

Q. It's okay. I have a copy here.

A. I got one. I'm positive I got one here.

MR. TUBIN: I'm going to mark this one.

(Exhibit 13 marked for identification.)

MS. WALLACE: Marked as Exhibit?

MR. TUBIN: 13.

MS. WALLACE: Thank you.

BY MR. TUBIN:

Q. Is any of this information in your original report?

A. No. This is just a methodological statement that I followed for costing, when I have questions about -- it helps me kind of -- is a synthesis of different literature.

Because I'm sure you had questions about costing and it's in here about why my protocol is what I do.

Q. Right. When did you put this together?

A. I've had this together for years. Well, I add to it as new literature comes out, but, yes.

Q. Are you considering this to be a supplement to your expert report?

A. It's an explanation as to why I'm using the 50/75th percentile, and why -- how I'm defining UCR. So to that extent, yes.

Q. And all the materials you're referencing in here were published at the time of your original report; correct?

A. They would have been, yes.

Q. Okay.

A. They're cited in my resources. Like, these articles and books are cited in my resources. This is an explanation of the information in those resources.

Q. But you personally put this together; right?

A. Yes.

Q. And you typed some of the text that's in this document; right?
A. Typed every word in this document.
Q. Okay. You didn't copy and paste certain things?
A. There's quotes.
Q. Quotes. But you also typed a lot of the explanation that's in this document?
A. Yes.
Q. Okay. All right.
A. I mean, I typed it from the -- quoting it from the book, if that's what you're asking.
Q. Is there your own independent -- like, when you say on the last page, for example --
A. Oh, okay. Yeah, sure.
Q. "My standard protocol or method to determine customary charges includes ..."
You wrote that statement?
A. That's a statement, a synopsis of everything else you just read, yes.
Q. Okay. But you typed that statement?
A. Yes. That's explaining why I'm using 50/75th.

Q. Okay.
A. And what -- and the literature above it supports that.
MR. TUBIN: Okay. Well, at this time, the United States is going to object to this as an untimely expert report or untimely supplemental expert report. Just put that on the record.
Okay. This is 13. My copy.
BY MR. TUBIN:
Q. All right. Turn to Mr. Hill.
A. You want this as exhibit -- okay.
Q. You -- on the first page of your report in Mr. Hill -- do you want to take a second?
A. Are you going to hand me an exhibit?
Q. I can introduce it --
A. I didn't know if you were going to hand me one.
Q. Nope, I absolutely can. I just know you brought them. I just figured if you --
A. It's probably quicker for you to hand me that one.
Q. Okay.
(Exhibit 14 marked for

identification.)

THE WITNESS: Thank you.

BY MR. TUBIN:

Q. Do you recognize this document?

A. I do.

Q. What do you recognize it to be?

A. The cost analysis that I did for Mr. Hill.

Q. And at the back of the document, there should have been another attachment. See that, materials considered list?

A. Yes.

Q. Okay. And what do you recognize that as?

A. Looks like a listing of the records I've seen.

Q. Okay.

A. Which are also noted in the report.

Q. Right. So on the first page of the report, it states, the second sentence, "An initial Zoom assessment was completed with Mr. Hill on August 12, 2024." Correct?

A. Yes.

Q. This says "initial." Were there any others after this?

A. No, there was just that one.
Q. Okay. Why do you use the word "initial" for this one, but not the others?
A. I did -- just turn a phrase. I didn't -- yeah. It was the only assessment.
Q. Okay. Where did this take place?
A. Zoom. He was at his home. I was in my office.
Q. And did you have any time restrictions?
A. Not that I recall.
Q. And you recall how long --
A. Well, he was a little fatigued that day. But, I mean, we didn't -- he would have kept going, but he was fatigued. So ...
Q. Do you recall how long your interview lasted, your assessment?
A. An hour, a little bit over an hour.
Q. Would you have liked more time?
A. No. I think I got to the heart of what I needed to know.
Q. Who was present?
A. I think on that one, my nurse researcher was present.
Q. Who is she?

A. I think with him it was Ashley -- Dr. Ashley -- Ashley's last name is very difficult to say, so we say G -- Grzybowicz.

She had helped me go through some of the medical records and if I had a question.

Q. I believe earlier you testified that any notes were made directly into the report?

A. Right. I'm typing as I go.

Q. Okay. Did you ask Mr. Hill if he needs housekeeping services?

A. We talked about that and he explained that he had good days and bad days. And that, you know, on his bad days, he just can't really do anything. So I knew that at that point in time he had not sought them out, but he had family helping him.

Q. Did you record any of that in your report?

A. I'm pretty sure I said that -- yes. Environmental status, he talked about there that he can't tolerate heat. It was hard for him to maintain his yard. He talked about having problems performing ADLs, had to take naps.

And there's a part in here where he told me -- I'm pretty sure I documented, where

his -- yeah, his grandchildren are helping him with his yard. So -- but ADLs, meaning he had problems doing any ADL -- meaning, you know, instrumental or basic ADLs on certain days.

Q. But nowhere does it say he needs housekeeping services?

A. Instrumental ADL is housekeeping services.

Q. Instrumental ADL means housekeeping services?

A. Yes. That's -- I mean, instrumental ADL is like cleaning, cooking, travel, home management. Basic ADLs, like cleaning -- grooming, bathing, you know, hygiene, that type of thing, bathroom.

Q. He told you he's going to need someone for that?

A. He told me he had days when he couldn't do that for himself. Did he say he needed a housekeeper? No. He said he had days when he couldn't do that for himself.

Q. Would you agree he's in a better position than Dr. Dean Felsher to know whether that's true or not?

A. I mean, he was in a position to tell

me what he could do and could not do, yes. Dr. Felsher was saying that he's going to continue to decline.

Q. You think Mr. Hill is more knowledgeable of his own condition and what he can and can't do than Dr. Felsher?

A. He's knowledgeable about what he can and can't do today, that day, that moment. His current status. I can't say he'd be more knowledgeable how the future prognosis would be medically. That's something for a doctor to determine.

Q. You tried to consult with Mr. Hill's treating oncologist, Dr. Jessica Schmit; correct?

A. I did.

Q. What efforts did you make?

A. Phone calls. And my understanding, she wouldn't be available to talk to me.

Q. When did you try to contact her?

A. Well, hold on just a second. Yeah, it would have been phone calls.

Q. When did you make phone calls?

A. I don't remember specifically the date. But at some point, I was told that the VA doctors wouldn't be available for me to consult

with.

Q. As your report states, "It was explained that Dr. Schmit would not be available for consultation with me regarding Mr. Hill's life care plan."

That's what you're referring to; right?

A. Right. I was eventually told that, yes.

Q. Who explained that to you?

A. The plaintiff attorneys.

Q. Did you ask why?

A. Just that they didn't want to be involved in the litigation side of this matter.

Q. Did you explain the importance of speaking with Dr. Schmit?

MS. WALLACE: Objection to the extent it calls for --

THE WITNESS: I didn't speak to her to explain it, so no.

BY MR. TUBIN:

Q. Who is -- what do you mean "her"?

A. I didn't speak to Dr. Schmit.

Q. No. But did you explain the importance of speaking with Dr. Schmit?

A. Well, I had made that clear that I preferred to speak to the treating. But they're not gonna speak to me, there's nothing I can do to make that -- I mean, I can't force them to speak to me.

Q. Would you agree that Dr. Schmit is more familiar with her own patient's treatment than Dr. Felsher is?

MS. WALLACE: Objection.

THE WITNESS: I would -- I would agree that she's had more experience with Mr. Hill, yes.

BY MR. TUBIN:

Q. All the life care planning recommendations are from Dr. Felsher; correct?

A. The medical foundation derives from him, yes.

Q. Dr. Felsher has never examined Mr. Hill; correct?

A. No, it was a -- he had done a review of his records.

Q. Dr. Schmit has examined Mr. Hill many times; correct?

A. I'm sure, yes.

MS. WALLACE: Objection.

BY MR. TUBIN:

Q. You did not incorporate any of her recommendations into your life care plan; correct?

A. Again, she wasn't available for me to speak to her, so no.

Q. Would you have liked to speak to her?

A. It'd be beneficial to speak to her.

Q. You only relied on Dr. Felsher; correct?

A. That's the medical foundation I had available.

Q. Does Dr. Felsher currently treat patients?

A. To my understanding --

MS. WALLACE: Objection.

THE WITNESS: My understanding, he's at Stanford in the Cancer Institute. So I understand he does research as well.

BY MR. TUBIN:

Q. Do you know whether he currently treats patients?

A. Not as we're sitting here today, I don't know if he's currently treating patients, no.

Q. Do you know whether he's board certified in any medical discipline?

A. My understanding, he was the oncologist. I didn't ask about the board certification.

Q. Would it make a difference to you if Dr. Felsher does not treat patients and is not currently board certified?

A. He still has a medical opinion about the oncology needs. He's an oncologist. So there's nothing that says that that foundation can only come from a treating doctor or from a board-certified doctor. So, no, it doesn't change what foundation we can rely upon in the life care plan.

Q. Are you aware he hasn't treated patients in over a decade?

MS. WALLACE: Objection.

THE WITNESS: Not aware of that.

BY MR. TUBIN:

Q. You reviewed Dr. Schmit's deposition; correct?

A. Yes.

Q. And Dr. Schmit gave recommendations regarding Mr. Hill's future treatment in her

deposition; correct?

A. She did.

Q. Did you consider Dr. Schmit's testimony on lifestyle changes?

MS. WALLACE: Object to form and foundation.

You may answer.

THE WITNESS: You got to be a little more specific what you mean by "lifestyle changes."

MR. TUBIN: Sure.

(Exhibit 15 marked for identification.)

BY MR. TUBIN:

Q. This is Exhibit 15. These are excerpts from Jessica Schmit's -- Dr. Schmit's deposition transcript that you testified you reviewed.

If you turn to page 58, and you look at line 6, to -- actually, no, it's -- sorry, page 59.

A. Okay.

Q. You see line 6 to 8?

A. It says, "Have you recommended any lifestyle changes for Mr. Hill?

"No, I don't think so."

Q. So what do you understand lifestyle changes to mean?

MS. WALLACE: Objection.

THE WITNESS: I have no idea. I don't understand what she's meaning.

BY MR. TUBIN:

Q. So you didn't include this testimony in your report?

A. No, I did, actually. I quoted her about what she said about life expectancy.

Q. But this part of her testimony --

A. Well, I mean, I don't know how she's -- her answer was that she didn't include anything about life -- so I don't know -- what would I include it?

Q. Isn't that a diversion opinion from, say, housekeeping services being included?

A. I don't know if that means -- I mean, lifestyle changes. I don't know -- that could mean a lot of different things. That doesn't necessarily mean housekeeping.

Q. What are the different things it could mean?

MS. WALLACE: Objection.

THE WITNESS: Living independently, living in a facility, living with support, sleep schedule. I mean, lifestyle change is a very broad idea.

BY MR. TUBIN:

Q. Right. So one of the things I believe you recommend -- recommendation you adopted for Mr. Hill is housekeeping services; correct?

A. Yes.

Q. Because it's in -- it's one of those independent ADLs; right?

A. Right. It's foundation from the doctor I consulted with.

Q. Would a lifestyle change be no longer being able to do an ADL?

MS. WALLACE: Objection.

THE WITNESS: Not necessarily. I wouldn't -- I would never interpret that to mean that.

BY MR. TUBIN:

Q. Okay.

A. I would have had to have her say -- that would take very -- multiple levels of interpretation to get to, that I would need her

to say that she's not recommending -- like, homemaker or housekeeping services for him. I would not have taken that statement to mean housekeeping services.

Q. So right now, this is too vague for you to understand what she means by lifestyle changes?

A. It's not qualified. Yes. So it's not specific enough for me to understand -- I mean, I don't know how else -- I'd have to interpret that to mean -- housekeeping services, I wouldn't have done that.

Q. What do you -- if a doctor says lifestyle changes to you in the -- in the context of Mr. Hill, what do you take that to mean?

A. I don't think a doctor's ever really ever said that to me in that specific way. And that's a question to ask. But I mean, that's not how we discuss things in the life care planning, counsel. We talk about services -- support services. I don't think I've ever used the term "lifestyle changes."

Q. Okay. Does Mr. Hill currently receive housekeeping services?

A. No.

MS. WALLACE: Objection.

THE WITNESS: I don't think he does. But he has days where he just doesn't do anything for himself.

BY MR. TUBIN:

Q. Has any treating physician recommended housekeeping services from Mr. Hill?

A. Not that I recall seeing at this point in time.

Q. Does Mr. Hill receive landscaping services?

A. He receives landscaping support services from his family, but not hired as -- maybe he pays his grandson some money to do that, I'm not sure. But not a company he's hiring on a regular basis, no.

Q. Has any treating physician recommended he received landscaping services?

A. Not to my knowledge. That wouldn't be something you'd commonly find in a medical record.

Q. Did you ask him if he plans to seek landscaping services?

A. Well, his comment to me was that he he's no longer able to tolerate heat and do it

himself and that his family's helping him now.
So to the extent that's -- again, family's doing something that from a life care planner perspective, we have to quantify what that would cost if the family can no longer do it.
Q. But you didn't ask him that question; correct?
A. Well, he explained the circumstances to me. He couldn't do it himself.
Q. I -- I'm just trying to understand if you asked him that question.
A. If I asked him was he going to seek landscaping services?
Q. Correct.
A. I don't think I specifically worded it that way. I asked what he functionally could do, what he had difficulties doing, and one of them was he could not maintain his yard --
Q. I understand.
A. -- independently.
Q. Does Mr. Hill currently receive attendant care services?
MS. WALLACE: Objection.
THE WITNESS: No. But, again,

there's days when he does -- doesn't leave the bed.

BY MR. TUBIN:

Q. Has any treating physician recommended attendant care services for Mr. Hill?

A. Not a treating physician, no.

Q. Did you ask him if he plans to seek attendant care services?

A. He did say that it would be beneficial to him on bad days to have someone there to help him, yes.

Q. Okay. I'm going to turn to Dr. Felsher's questionnaire. So the rehabilitation -- vocational rehabilitation question here from Dr. Dean Felsher --

A. Yes.

Q. -- dated February 2, 2025.

A. Yes.

Q. You asked Dr. Felsher -- Question Number 3: "Is it medically safe and appropriate for Mr. Hill to attempt to pursue competitive gainful employment within the open labor market, given the current status of his chronic lymphocytic leukemia? If no, at what point after diagnosis during 2004, was he medically unable to

safely perform any type of competitive gainful employment within the open labor market?"

I read that correctly; right?

A. You did.

Q. Okay. Dr. Felsher responded, "Mr. Hill has incurable progressive cancer and is not capable of performing in a job." Correct?

A. Yes.

Q. Did Dr. Felsher explain to you what symptoms are preventing Mr. Hill from performing any job?

A. Not in that answer, but he specifically said he's not able to perform a job.

Q. Not in that answer? Is there anywhere else where he explained the symptoms that are preventing him from performing in a job?

A. Well, he explains that he has -- he's high risk for life-threatening infections. He has progressive fatigue and reduced exercise tolerance.

So -- but did he relate that to work? But, no, he talked about functional things -- other functional issues in other questions.

Q. Right. In other questions, not in response to Question Number 3?

A. Well, the Question Number 3 asked him was he medically safe, and his answer was no.

Q. Right. Did you ask Dr. Felsher what symptoms are preventing Mr. Hill from performing in a job?

A. I didn't ask him. I sent him this questionnaire. He filled it out.

Q. Right.

A. I mean, I asked him through writing, but not in person.

Q. And your report does not mention that after Mr. Hill's retirement, he worked as a lead pastor two Sundays per month with the Galilee Baptist Church from 2013 to 2018, does it?

A. I don't think so. I wasn't -- I didn't know all those details. I know that he sometimes filled in. But it wasn't -- my understanding, it wasn't, like, in a paid role.

Q. Well, so it does not mention he earned wages of $300 a day doing this, does it?

A. It doesn't. But I -- again, I mentioned, I'm not giving earning capacity. I was looking to see does he need vocational rehab services. And per my consult, he wouldn't be appropriate for him.

Q. Besides Dr. Felsher's statements, is there any evidence that Mr. Hill could not use transferable skills to find alternative employment?

A. There's no other --

MS. WALLACE: Objection.

THE WITNESS: There's no other doctor restricting him from work. So if you go under the assumption that he has no restrictions and he can use his transferable skills, then, no.

BY MR. TUBIN:

Q. After your initial questionnaire to Dr. Felsher, you sent follow-up questions; correct?

A. So I first sent -- I think what happened here was my first questionnaire didn't get attached. I first sent another questionnaire.

Q. Right.

A. Then I sent the vocational one, secondary.

Q. Right. Then you sent this vocational one.

Did anyone ask you to send this

second questionnaire?

A. The vocational one? No, I wanted to -- because I didn't address it in the initial one. And I wanted to know should I include vocational rehab, evaluation counseling services and the plans. So that's why I was asking.

Q. You could have put these all on the first questionnaire; correct?

A. It just didn't make it in the first questionnaire.

Q. Let's look at Question Number 1 in this --

A. Vocational one?

Q. Yeah, correct, sir.

You ask: "What specific mental physical and/or environmental restrictions/guidelines does Mr. Hill need to follow due to his diagnosis and its sequela in order to remain safe and avoid injuries complications and other negative consequences?" Correct?

A. I did.

Q. Does Mr. -- does Dr. Felsher provide in his answer any environmental restrictions or guidelines?

MS. WALLACE: Objection.

THE WITNESS: He did not specifically state a guideline. He said he was highly susceptible to life-threatening infections.

BY MR. TUBIN:

Q. But the question was what specific physical, mental, and/or environmental restrictions or guidelines does Mr. Hill need to follow; correct?

A. It was.

Q. So Dr. Felsher did not provide an answer to this question, did he?

MS. WALLACE: Objection.

THE WITNESS: He provided his answer to it, which was he had life-threatening infections.

BY MR. TUBIN:

Q. Would you have liked him to answer what specific physical, mental, and/or environmental restrictions/guidelines Mr. Hill needs to follow?

A. Of course, if he felt comfortable expounding on that, that would be great.

Q. He had a chance to review his answer;

correct?

A. He --

MS. WALLACE: Objection.

THE WITNESS: He composed his answer.

BY MR. TUBIN:

Q. Okay. For Question Number 3, the second question there specifically asks, "If the answer to the first question is no, at what point after diagnosis during 2004, was he medically unable to safely perform any type of competitive gainful employment within the open labor market?"

Dr. Felsher answers no to the first question; correct?

A. Yes.

Q. He does not answer the second question; correct?

A. He does not qualify with a year, no.

Q. Okay.

A. Just so you know, this exhibit doesn't have my other questionnaire in there. I just thought I'd tell you.

Q. I know. This was a report that was produced to us, and then supplementally.

A. Okay. Just making sure you didn't --

Q. Yeah.

A. There's not a missing questionnaire. Okay.

Q. Yeah. No. I just printed it as it was produced to us. I have the supplemental --

A. Okay. Fine. That's great.

MS. WALLACE: Would you like to see it for --

THE WITNESS: No. If he asks me something from that, I'll ask him to hand it to me, if that works.

MR. TUBIN: Yeah. Okay.

Let's move on to Ms. Welch.

(Exhibit 16 marked for identification.)

BY MR. TUBIN:

Q. Handing you what's been marked as Exhibit 16. Do you recognize this document?

A. I do.

Q. What do you recognize it to be?

A. This is my life care plan for Ms. Rothchild.

Q. And you performed a Zoom assessment with Ms. Rothchild; correct?

A. I did.

Q. And where -- do you know where she

was located during that assessment?
A. Her home.
Q. Okay. And did you have any time restrictions?
A. Not that I recall, no.
Q. Do you know -- I'm going to ask you again how long the assessment lasted?
A. 1.4 hours or so.
Q. Okay. And who was present?
A. Her partner was there. I think his last name was -- I noted in the report, I think Mr. Smith.
Q. And you conducted the interview; correct?
A. Yes.
Q. And was anyone else present on your end?
A. No.
Q. And you -- again, your notes were -- would have been taken directly into the report?
A. Yes.
Q. Did you ask Ms. Rothchild if any treating physicians have recommended a deep brain stimulator?
A. I did actually. Yes, I did.

Q. What did she say?
A. She said not at that point in time, they had not.
Q. Is that -- the fact that you asked her that question, is that anywhere in your report?
A. No, it's not.
Q. Okay. Ms. Rothchild is not in the fitness program; correct?
A. Not in a Parkinson's based one, no.
Q. In any kind of fitness program?
A. I think she tried to stay active, but not like going to a gym, no.
Q. Did you ask her if she plans to enroll in a fitness program?
A. Not in specifically in that manner. What -- we talked about her symptoms, her issues in the home. She was going -- she was hopeful that she was doing some therapy, that it would help her. I think -- thinking about fitness for her, would have been difficult at that point in time because she was having all kinds of falls.
Q. She's not seeing a nutritionist; correct?
MS. WALLACE: Objection.

THE WITNESS: Not actively. I don't remember that occurring at the moment I was speaking to her.

BY MR. TUBIN:

Q. You list nutritionist as a recommendation; correct?

A. I don't list -- I mean, it's in the life care plan. It's foundation I received from the doctors I consulted. So, yes, it's in there.

Q. Did you ask Ms. Rothchild if she plans to see a nutritionist?

A. No, I didn't specifically ask that because this is foundation from -- received from the doctor, that -- or what she medically needs.

Q. She's not seeing a urologist; correct?

A. Urologist?

Q. Urologist, U-R-O-L-O-G-I-S-T.

MS. WALLACE: Objection.

THE WITNESS: Not that I recall. But, again, this is foundation I received from the physicians I consulted.

BY MR. TUBIN:

Q. No treating physician has recommended she see a urologist; correct?

MS. WALLACE: Objection.

THE WITNESS: Dr. Pelmutter did not recommend it. The consultant doctor recommended it.

BY MR. TUBIN:

Q. Right. And Dr. Perlmutter is the treating physician?

A. That's correct. I spoke to him at length.

Q. She's not seeing a dermatologist; correct?

MS. WALLACE: Objection.

THE WITNESS: Not actively, but that was due to the risk of a complication.

BY MR. TUBIN:

Q. And no treating physician has recommended she see a dermatologist; correct?

A. No, the consulting doctor did.

Q. Just the consultant?

A. Yes.

Q. She is not receiving housekeeping services; correct?

MS. WALLACE: Objection.

THE WITNESS: Well, she's receiving services that help manage her home from

her partner. So to that extent, yes.
BY MR. TUBIN:
Q. Other than that, no; right?
A. Well, he's helping manage the house. So that'd be housekeeping services. So outside of that, out -- with an outside agency, no.
Q. Right. And did you ask her if she plans to hire an outside agency for housekeeping services?
A. Not specifically. But she's getting support for it. And, again, as I said earlier, we have to consider the value of that in the life care plan, if that person wasn't available to provide it.
Q. She's not receiving attendant home care services?
MS. WALLACE: Objection.
THE WITNESS: She's receiving support services in that regard from her partner.
BY MR. TUBIN:
Q. Did you ask her if she plans to seek attendant home care services from an outside agency?
A. Not in that kind of direct way. Just the fact that she is receiving support to

complete her ADLs.

Q. She's not going to physical therapy; correct?

MS. WALLACE: Objection.

THE WITNESS: She was getting ready to embark into some, I think, occupational therapy. But I don't remember specifically her saying physical therapy.

BY MR. TUBIN:

Q. Did you ask her if she was planning to embark on physical therapy?

A. No. She volunteered that she's getting ready to start occupational therapy given her falls.

Q. What -- to you, what is the difference physical therapy and occupational therapy?

A. Occupational therapy is more focused on the upper extremities and, like, performance of safe ADLs. I think that's what -- she's making her way there. Physical therapy is more whole body and endurance and physical paralysis.

Q. Does Ms. Rothchild have any type of home modifications?

MS. WALLACE: Objection.

THE WITNESS: She couldn't go in her basement. And I have to look to see if she had -- I feel like made some minor changes in her house to accommodate herself, but --

BY MR. TUBIN:

Q. You don't recall?

A. I mean, she was on a -- she couldn't get in her basement. I do remember there were steps for that, of course. And -- but she was still falling in the home, that was the concern.

Q. Did you ask her if she plans on making any home modifications?

A. Not direct in that way. Because I don't know if she would know what those home accommodations would be, without professional input.

So she was concerned that she was falling, no matter what she did. She was having to hold on to walls to move around the house. So that's, obviously, a safety risk.

Q. Has she sought any professional input as to home modifications?

MS. WALLACE: Objection.

THE WITNESS: Has she gotten an

estimate? Not to my knowledge.

BY MR. TUBIN:

Q. Has she consulted with anyone, to your knowledge, on home modification?

A. No, but I spoke to her treating physician about it.

Q. She is not in a Parkinson's disease support group; correct?

MS. WALLACE: Objection.

THE WITNESS: Not at last report, no.

BY MR. TUBIN:

Q. Did you ask her if she plans to join a Parkinson's disease support group?

A. I did not specifically. But, I mean, those are typically free of charge.

Q. Was she driving a car -- able to drive a car around the time of your report?

A. No. Her partner was doing that.

Q. Was she able to?

A. I don't think she felt safe doing it given her body's not responding the way she wants her body to respond when she's trying to drive.

Q. Is there any physician, treating or consulting, that has said it's unsafe for her to drive?

A. I'll have to recall what they each said. Give me just a second.
Q. Sure.
A. So Dr. Andruska said she requires a formal driving evaluation now.
Q. And that's the consulting physician; correct?
A. Right. And then Dr. Perlmutter: "It's likely she will require a future conference of driving evaluation to determine if she continues to be safe to drive."
Q. Okay. If she continues to be safe to drive.
A. Meaning he's questioning is she safe to drive.
Q. Isn't he saying right now she's safe to drive, but we're not certain if in the future she will be?
A. I don't think he's saying that at all. I think his concern was we need someone to figure out is she safe to drive.
Q. He uses the words "continues to be safe"; is that correct?
A. Well, meaning it is -- at some point he's saying she was safe and is she continuing to

be safe now to drive at this point in time.

Q. If a doctor tells you it's hard to predict whether attendant care will be required, would you want more evidence before recommending attendant care?

MS. WALLACE: Objection.

THE WITNESS: If a doctor said it would be difficult to say if more attendant care was required? Meaning over -- as someone ages? Is that what you're asking?

BY MR. TUBIN:

Q. If he says it's hard to predict whether attendant care will be required.

A. I mean, I want him to qualify what he means or she.

Q. Let's say you didn't have a qualification, you just had that.

MS. WALLACE: Objection.

BY MR. TUBIN:

Q. Would you want more information before recommending -- before listing attendant care as a line item or service?

A. Well, I don't think that's at all what he said, if that's what you're asking me.

Q. Just for now, it's a hypothetical.
A. If he said it was difficult -- I want to understand what he needed to know to pinpoint that.
Q. Okay. If a doctor were to tell you it's possible attendant care would be required, would you want more information before recommending attendant care?
MS. WALLACE: Objection.
THE WITNESS: If a doctor said it was possible, I'd want to know what they mean by "possible." Does that mean greater than 50 percent? What other information they needed to make that decision.
BY MR. TUBIN:
Q. And you consulted with Ms. Rothchild's treating physician, Dr. Joel Perlmutter; correct?
A. Yes. Extensively, it was a long call.
Q. How long did it last?
A. I recall it being a long call. I was on the phone with him for an hour.
Q. One hour, you said?
A. Yes. It took me, like, almost an

hour and a half to write up all his responses.

Q. Did you also have a phone consultation with Dr. Andruska?

A. Yes, I was just trying to remember the date. Yes, on 2/3/25.

Q. And you know how long that lasted?

A. 1.4.

Q. Okay.

A. 1.36. I'm rounding up there.

Q. That's fine.

(Exhibit 17 marked for identification.)

BY MR. TUBIN:

Q. Let me have that back. I marked the wrong copy.

This is your excerpts from the deposition you reviewed of Dr. Joel Perlmutter?

A. Okay.

Q. If you could turn to page 57.

A. 57, you said?

Q. Yeah. Yes, sir. If you could read from lines 14 to 24.

A. "And do you think Ms. Rothchild will a require attendant care at any point in the future?

"That's hard to predict. That's possible. A lot of people with Parkinson's do. She has been slowly progressive, but, again, that can change as she gets older and the disease may progress more."

Q. All the way to 24.

A. Oh, I'm sorry.

"I mean she's taking a fair amount of carbidopa/levodopa. This is not a tiny dose. So she could have more trouble. So far she's doing pretty well."

Q. So he's not testifying that she will require attendant care, is he?

A. Well, his deposition was on May 3rd of 2024 and I spoke to him on -- subsequent, in November of '24.

In that period of time, I do know that she was progressively getting worse. So this is what he told me. This is what he confirmed. He did say that in his deposition, but I -- I guess he's of a different opinion now about her status.

Q. Okay. Did Dr. Kristin Andruska review Dr. Perlmutter's questionnaire?

MS. WALLACE: Objection.

THE WITNESS: I don't know if she asked me for that or not. To be honest with you, I can't remember.

BY MR. TUBIN:

Q. Ms. Rothchild has never seen Dr. Andruska for treatment; correct?

A. No.

Q. And Dr. Perlmutter and Dr. Andruska are both neurologists, correct?

A. Yes, both movement disorder.

Q. Both movement disorder specialists; correct?

A. Yes.

Q. Dr. Andruska has no relationship with Ms. Rothchild; correct?

MS. WALLACE: Objection.

THE WITNESS: She's not a treating physician for her, no.

BY MR. TUBIN:

Q. She's never prescribed medication for Ms. Rothchild; correct?

A. That would be what a treating physician is, so no.

Q. So she's never diagnosed Ms. Rothchild?

MS. WALLACE: Objection.

THE WITNESS: Well, I can't say that. I mean, she reviewed the records, if she's told me she has Parkinson's. So I don't -- to that extent.

BY MR. TUBIN:

Q. Dr. Perlmutter has examined Ms. Rothchild; correct?

A. Yes.

Q. And he's been treating Ms. Rothchild since at least 2013; correct?

A. For an extended period of time, yes.

Q. He has prescribed medication for Ms. Rothchild; correct?

A. Yeah.

Q. Who sent the questionnaire to Dr. Perlmutter?

A. I did. Well, my office emailed it to him. I wrote the questionnaire.

Q. Did he reply directly to your office?

A. Oh, I spoke to him and then he told me his answers. I don't know what you mean by "reply."

Q. Did he fill out the questionnaire?

A. Oh, no, no, no. So we had -- I

actually spoke to him on the phone. I remember it was actually a Zoom. Because I remember seeing him. And he told me his answers, and then I sent it back to him for review, which he reviewed, and he initialed every page and every answer. And didn't change anything. So but --

Q. Is -- sorry. Go ahead.

A. So this is the answers he told me about those questions.

Q. Is this the only doctor for which you filled out the questionnaire?

A. No, I think there are other ones who told me things and I wrote it down and then gave it to back to them to review, yes.

Q. How come his is the only one with an option to initial?

A. I think he put that on there. I don't remember if we put that on there. I think he somehow put that on there to initial it.

Q. Okay.

A. I'm not positive on that. I saw that too. It was a little different. I'm not sure where that came in, but ...

Q. And the initialing option was not on the questionnaire sent to Dr. Andruska; correct?

A. No. I really think that maybe that was something he put on himself. I don't remember. When I sent it to him, as -- you know, we sent it to him as a Microsoft Word. So he can change it, if there's something to change.

Q. Right. Did you do the same thing with Dr. Andruska, where she told you the answers on the phone and you wrote them in the questionnaire?

A. Yes -- when I get on the consult with the physicians I ask them, is that how you want this to proceed or do you want me just to -- you answer these questions and you're going to document it and send it back to me? And nine times out of the ten, they want me to send it back what they're telling me.

Q. Okay. Turning you back to Ms. Rothchild.

Your life care plan, in the tables, list which doctor recommends what treatment; correct?

A. Yes.

Q. For many recommendations, Drs. Perlmutter and Andruska agree?

A. I agree.

Q. You're free to count these, if you want, but I'll represent to you that there are 12 recommendations that Dr. Andruska made that Dr. Perlmutter did not. Does that sound accurate?

A. Can you give me just a second?

Q. Yeah.

A. Did he have no opinion about at all? Is that what you're asking me?

Q. Well, there's 12 recommendations where you list her name but not his as a recommending physician.

A. Okay. Because sometimes they have differing frequencies, but they're still recommending the care. So ...

I counted 11. Let me do it one more time.

Q. Sure.

A. All right. You're correct, it's 12.

Q. Okay. So 12 recommendations that Dr. Andruska made that Dr. Perlmutter did not; correct?

A. Yes.

Q. Okay. Thank you.

I want to do a kind of comparison

amongst some of the life care plans for the Parkinson's diseases. So do you have Welch and Sparks in front of you? I can give them to you.

A. Yeah, that would be great, if you can give me the ones you have.

(Exhibit 18 marked for identification.)

MR. TUBIN: This will be 18. This is the life care plan for Sparks.

MS. WALLACE: Thank you.

(Exhibit 19 marked for identification.)

MR. TUBIN: This is Welch.

MS. WALLACE: Thank you. Is this 19?

MR. TUBIN: Yes.

BY MR. TUBIN:

Q. Okay. Try to correlate this here.

So can we turn to the tables for Welch and Sparks.

A. Okay.

Q. And, specifically, I want to look at the power wheelchair.

A. The power wheelchair, is that what you said?

Q. Yes.

A. Okay. In the table?
Q. In the table, yeah.
A. Okay. All right.
Q. And if you go to both of them. So I think it's page 8 for Welch.
A. I have it, and page 8 on the other one too. Same page.
Q. Okay. Great. Makes that easy.
And now looking at Ms. Rothchild's report on page 13 of the tables. So you list power wheelchair as the item; correct?
A. Let me get to hers, just a second.
Q. Yeah. It's on page 13.
A. Okay.
Q. So power wheelchair and the unit cost/vendors is Rollz; correct?
A. Yes.
Q. And $3,490 to $3,999?
A. Yep. Yes.
Q. Now, Rollz motion is Sparks and Welch, is that the same company or provider?
A. Yes, it's the same general power chair.
Q. Okay. You have the same price, right, that 3,490 to 3,999; correct?

A. Yeah. It was actually -- on Sparks and Welch, spoke to the same doctor and she actually said, you know, use that type of wheelchair, just a general power chair.

Q. How come the frequency replacement for Ms. Rothchild is every five years, but for Sparks and Welch, it's one time only?

A. Because their life expectancy wouldn't afford that beyond that.

Q. Okay. So ...

A. That's without -- there was -- Ms. Rothchild had a longer life expectancy.

Q. Ms. Rothchild, do you know how old she is?

A. I don't know how old she is, but I remember that she had a normal -- the doctor said she had a normal -- she was 77. But the doctors had -- when I did the math on it, it would have been -- I was anticipating she would need a replacement. So I said every five.

The other ones would be one time only because by the time it's replaced, their life expectancy would be exceeded.

Q. Mr. Sparks was 71 years old; correct?

A. Right. But you're right, but the

life expectancy --

Q. Right. I understand.

A. -- issue, yeah.

Q. Just confirming his age.

A. It all went to what the life expectancy would have been.

Q. Okay.

A. Based upon the consults.

Q. Understood.

Now, this might get a little complex, try to do it as straight forward as possible. Why does Ms. Rothchild require a lift recliner, but not Mr. Welch or Ms. Sparks -- Mr. Sparks?

A. This is not something he told me that those other two needed. I mean, she was having all kinds of falls. And maybe I -- I don't remember the precisely why that was included, but that was what I got.

Q. Why does Ms. Rothchild require a shower chair, but not Mr. Welch or Mr. Sparks?

A. Rothchild's situation is a little more difficult. So she's going to need more things, more items. You know, Mr. Welch was having -- not as having as much lower mobility problems.

Q. Okay. And --
A. Mr. Sparks probably was somewhere in the middle. So you're kind of looking at a more difficult Parkinson's situation versus moderate and a little bit less severe.
Q. Understood. You can put Welch and Sparks aside for the moment.
A. As it is actively now, is what my point is. Where they're at -- when they wrote the life care plan.
We can put these away, you said?
Q. Not Ms. Rothchild, not done with that.
A. Okay. Okay. Understood.
Q. Now, on page 11 of the life care plan tables for Ms. Rothchild, under notes --
A. Okay.
Q. -- page 11.
A. Under page 11, but tables is that what you're at?
Q. Correct.
A. Okay.
Q. You state that, "Placement of a deep brain stimulator is not currently a likely cost for Ms. Rothchild." Correct?

A. That's the word -- why the word "potential" is there, yes.

Q. It's dependent on a future neurologist evaluation; correct?

A. Yes.

Q. And no doctor is currently recommend she receive a deep brain stimulator; correct?

MS. WALLACE: Objection.

THE WITNESS: Not at this point in time. Dr. Perlmutter wanted her to be seen by a specialist neurologist -- who specialize -- like a neurologist that specializes in putting those -- doing those evaluations and serving as a specializing in putting them in.

BY MR. TUBIN:

Q. And so Dr. Perlmutter himself is not recommending a deep brain stimulator?

MS. WALLACE: Objection.

THE WITNESS: Let me go tell you exactly what he said about that. I know he deferred to those other professionals.

So he said, Ms. Rothchild's potential future final candidacy for a deep brain stimulator device placement would be

determined by the evaluating neurologist and neurosurgeon.

And then he explained the programming, which he would be responsible for helping her have coordination of the programming for it after it's put in. But he's deferring it.

BY MR. TUBIN:

Q. And you reviewed his testimony; correct?

A. I did.

Q. All right. Do you recall him testifying that he doubts she would be considered for a deep brain stimulator because her Parkinson's disease is so mild and she's reasonably well treated?

A. I honestly don't remember that out of memory. But, again, she had kind of went downhill was my understanding. That's kind of what he explained to me when I spoke to him. She was starting to fall, having more and more symptoms.

So -- but if he told -- I mean in consult, he told me she's a potential candidate. That's why it says potential.

Q. Does she have an appointment scheduled for a deep brain stimulator evaluation?

MS. WALLACE: Objection.

THE WITNESS: I don't know currently. And she didn't have it at the time I wrote the life care plan.

BY MR. TUBIN:

Q. Ms. Rothchild is 78 years old; correct?

A. Well, she was 77 when I wrote this. So she would be approaching 78.

Q. Approaching 78, okay.

Would you agree she's at high risk for cognitive decline?

MS. WALLACE: Objection.

THE WITNESS: Based upon my consultations, all the Parkinson's cases were at high risk for such things.

BY MR. TUBIN:

Q. And Mr. Sparks was 71 at the time of your report; correct?

A. Yes.

Q. And you may need to look at the Sparks report for this, that's fine.

But Dr. Schwarz said Mr. Sparks is

not a likely candidate for surgical placement of a deep brain stimulator, given his age and cognitive decline. Is that correct?

A. She did say that, yes.

Q. Okay. The --

MS. WALLACE: Did you read from the report? Sorry.

MR. TUBIN: No, that was my question.

MS. WALLACE: Sorry.

MR. TUBIN: Similar to the report language, though.

BY MR. TUBIN:

Q. The IARP standards say to take age into account in a life care plan; correct?

A. As far as aging and different difficulties that come with compounding aging on disability, yes.

Q. And the Journal of Life Care Planning Consensus statements say to take age into account; correct?

A. The consensus statements?

Q. Yeah.

A. They do mention it at one point, yes.

Q. Did you ask any of the physicians if there are risk factors associated with the deep

brain stimulator procedure?

A. Not specifically. I've looked at some research about it -- I have looked at research about it in the past.

Q. Did you consider any of the risk factors associated with the procedure?

A. That's not for me to decide. That's a surgical decision.

Q. Did you ask any of the physicians if she's at greater risk?

A. Again, that -- that's why he's sending her for review by a specialist.

MR. TUBIN: Okay. This is a good time for a break.

THE WITNESS: Sure.

THE VIDEOGRAPHER: Off record at 2:05 p.m.

(Recess taken from 2:05 p.m. until 2:16 p.m.)

THE VIDEOGRAPHER: On record at 2:16 p.m.

BY MR. TUBIN:

Q. Let's turn to Mr. Sparks.

A. Is that already -- it's already an exhibit. I got it. Okay.

Q. Now, you completed a Zoom assessment

with Mr. Sparks; correct?
A. Yes, on 8/12/24.
Q. Where was Mr. Sparks during that?
A. His home.
Q. How long did that assessment take?
A. Approximately an hour.
Q. And did you have any time restrictions?
A. No.
Q. Who was present?
A. Just me and him.
Q. Okay. And you conducted with the interview obviously?
A. Yes.
Q. And, again, all your notes are taken into your report --
A. Yes.
Q. -- correct? Okay.
In this case, Mr. Sparks, you consulted with his treating physician; correct?
A. Yes.
Q. Dr. Trevor Hawkins; right?
A. Well, I was -- I think that he just responded to my questionnaire, if I recall correctly. I have to refresh.

Yeah, he just responded to my questionnaire.

Q. When you say "he just responded," you mean you didn't speak to him over the phone?

A. I would use the word "consult" meaning I'm speaking directly to you. So terms in life care planning.

I sent him a questionnaire. He responded to it.

Q. Okay.

A. So, yeah, I -- I guess I consulted with him through the questionnaire.

Q. Okay. And you consulted meaning "spoke to" Dr. Heidi Schwarz?

A. Yes, I did.

Q. And Mr. Sparks has never seen Dr. Schwarz for treatment; correct?

A. No.

Q. And both doctors are neurologists; correct?

A. Yes.

Q. And Dr. Schwarz has never examined Mr. Sparks; right?

A. No. I'm not sure if -- I have to look back and -- if Dr. Hawkins is a movement

specialist. I'm not positive on that. But I know Dr. Schwarz is.

Q. And Dr. Schwarz has never prescribed medication to Mr. Sparks; correct?

A. Not to my knowledge.

Q. And Dr. Hawkins has examined Mr. Sparks many times; correct?

MS. WALLACE: Objection.

THE WITNESS: I don't know how you define many times. I remember thinking Mr. Sparks --

BY MR. TUBIN:

Q. Say repeatedly.

A. He's had multiple doctors involved in his care over time. So ...

Q. Okay.

A. But, yes, he's seen him more than once.

Q. And Dr. Hawkins has been treating Mr. Sparks since at least 2018; correct?

A. That sounds correct. But let me just make sure.

Yes.

Q. And Dr. Hawkins has prescribed medication for Mr. Sparks; correct?

A. Well, what date did you say again, 2018?

Q. As of 2018, yeah. At least as of 2018.

A. Oh, I was on -- let me go back to that. I don't want to tell you the wrong date.

Q. Do it this way. Go to page 8 of the report.

A. Uh-huh.

Q. And then the first underlined, bolded date. During a neurology --

A. You're right. You're right. I didn't -- I skipped that page. Sorry.

Q. No problem.

A. 2018.

Q. Okay. Dr. Hawkins has prescribed medication for Mr. Sparks; correct?

A. Yes.

Q. Would you agree Dr. Hawkins is more familiar with the treatment he's given Mr. Sparks than Dr. Schwarz is?

MS. WALLACE: Objection.

THE WITNESS: I could say that, I mean -- Dr. Schwarz has head his records. So she's familiar with what treatment he's

received. So ...

BY MR. TUBIN:

Q. But Dr. Hawkins is the one who's giving the treatment; correct?

A. He's the one who's prescribed it.

Q. Dr. Hawkins is the only treating physician you received handwritten responses from; correct?

A. Yes.

Q. All right. Mr. Sparks is not receiving psychological counseling; correct?

MS. WALLACE: Objection.

THE WITNESS: At the time of my evaluation, he was not.

BY MR. TUBIN:

Q. Has any treating physician recommended psychological counseling?

A. Dr. Hawkins did not mention it in his responses, but he left a lot of questions blank.

Q. Do you recall Mr. Sparks' deposition -- well, let me ask this.

Did you review Mr. Sparks' deposition testimony?

A. Yes.

Q. Do you recall his testimony that

psychiatrists don't -- I just don't have any faith in them?

A. Not specifically. But you asked me about counseling, typically I stand by a psychologists or LPC, licensed professional counselor.

Q. Did you ask Mr. Sparks if he plans to pursue psychological counseling?

A. Not in that specific terminology, no. You know, life care planning, assessment is not -- that's not typically what we ask. We ask about their function, their symptoms, their complaints, their history of problems, their education, you know, their ADL.

We don't ask are you planning on pursuing this, because we're going to the doctors to get that foundation if it's medically necessary. An evaluee could never tell me if something was medically necessary. We have to go to doctors for that.

Q. Mr. Sparks is not in physical therapy; correct?

A. I don't think he was at the time of my evaluation.

Q. Has any treating physician

recommended physical therapy?
MS. WALLACE: Objection.
THE WITNESS: No. Dr. Schwarz did, but not a treating physician.
BY MR. TUBIN:
Q. And Mr. Sparks is not receiving speech therapy; correct?
MS. WALLACE: Objection.
THE WITNESS: He has in the past. But for his vocal issues, as to his -- tone of his -- the loudness of his vocalizations. But not at the moment I was speaking to him, he was not getting it.
BY MR. TUBIN:
Q. Has any treating physician recommended speech therapy for Mr. Sparks?
MS. WALLACE: Objection.
THE WITNESS: I was thinking he had some in the past, but Dr. Schwarz definitely recommended it.
BY MR. TUBIN:
Q. But as you sit here today, you're unaware of any treating physician who's recommended it?

A. Recommending going forward, no.
Q. Mr. Sparks is not in a fitness program; correct?
MS. WALLACE: Objection.
THE WITNESS: In a formal fitness program, no.
BY MR. TUBIN:
Q. Has any treating physician recommended a fitness program?
MS. WALLACE: Objection.
THE WITNESS: No, that was recommended by Dr. Schwarz. But, again, Dr. Hawkins left a lot of things unanswered in his report, in his questionnaire. I don't know if that was one he left unanswered without looking at it.
BY MR. TUBIN:
Q. Aside from his questionnaire, have you seen any medical records where a fitness program has been recommended for Mr. Sparks?
A. I don't remember if the -- if a home exercise program was recommended for him. If you're saying, like, a fitness outside of the home, no, I don't recall that.

Q. Mr. Sparks does not use a lawn care service; correct?

MS. WALLACE: Objection.

THE WITNESS: No. His grandson completed all that for him.

BY MR. TUBIN:

Q. Has any treating physician recommended he hire a lawn care service?

MS. WALLACE: Objection.

THE WITNESS: No, but you're not going to find that typically in a medical record, without asking the physician.

BY MR. TUBIN:

Q. Mr. Sparks does not use a housekeeping service; correct?

MS. WALLACE: Objection.

THE WITNESS: He has someone perform -- providing that for him. His grandson.

BY MR. TUBIN:

Q. But he has not hired somebody to do it currently; correct?

A. No. He has a family member doing it.

Q. Has any treating physician recommended he hire someone for housekeeping

services?

MS. WALLACE: Objection.

THE WITNESS: Not specifically in that -- those terms. We shouldn't -- again, that's a question you have to ask. It's not going to be necessarily in a medical treatment record.

BY MR. TUBIN:

Q. Did you ask any of the physicians that?

A. I asked Dr. Schwarz that. I had that question in Dr. Hawkins' letter, I'm sure.

Q. Did you follow up with Dr. Hawkins to get more responses?

A. No. I mean, often when I get these blanks like this, it indicates to me the doctor didn't have an opinion or didn't feel comfortable answering it.

I mean, obviously, the question was there and he didn't answer them all.

Q. How does he indicate that to you?

A. Well, I mean, he didn't answer.

Q. So you don't follow up with him to see, hey, did you forget to answer this or did you skip this or are there more answers?

A. I don't remember specifically doing that with him. But that's just my experience, when I do follow up, that I don't get any more answers.

But certainly, if he -- if he wants to finish answering, that'd be great. But my experience is that when you have these blanks like this, either they don't have an opinion about it or they don't feel comfortable answering.

Q. Mr. Sparks does not receive attendant home care services; correct?

A. Again, his grandson helps with those types of things. But not from an agency, no.

Q. Has any treating physician recommended attendant home care services?

MS. WALLACE: Objection.

THE WITNESS: Not a treating physician, to my knowledge.

BY MR. TUBIN:

Q. And, lastly, Mr. Sparks does not receive skilled nursing care; correct?

MS. WALLACE: Objection.

THE WITNESS: He does not receive skilled nursing care, no.

BY MR. TUBIN:

Q. No treating physician has recommended skilled nursing care?

MS. WALLACE: Objection.

THE WITNESS: The evaluating physician has recommended it.

BY MR. TUBIN:

Q. I understand. But there's not been a treating physician who's recommended it; correct?

A. Let me look real fast --

Q. Yeah.

A. -- what Dr. Hawkins said.

You're correct.

Q. Now, Mr. Sparks voluntarily retired; correct?

MS. WALLACE: Objection.

THE WITNESS: He retired -- my understanding, he got early medical retirement, to some degree. Some type of -- he described it as -- the words he used with me were -- I was just trying to find the part in my report.

BY MR. TUBIN:

Q. Yeah. Take your time.

A. He accepted a pension in 2017, that's

how he phrased it to me.

Q. He didn't tell you that he voluntarily retired?

A. That's not how he phrased it. He said he accepted a pension. So I don't know if it was early pension. I just know he said he accepted a pension.

Q. Has any health care provider recommended work restrictions for Mr. Sparks?

A. Dr. Schwarz did.

Q. Any treating health care provider?

A. That was a question Dr. Hawkins did not respond to.

Q. Since he left the workplace, Mr. Sparks has not searched for another job; correct?

MS. WALLACE: Objection.

THE WITNESS: I don't know specifically. I don't know specifically he's never searched for another job. But he wasn't working at the time I spoke to him.

BY MR. TUBIN:

Q. Did you ask him if he had searched for another job?

A. Trying to recall if I asked that specific question. He just told me he was retired. And he -- I mean, there was no indication he'd been searching for a job per se.

Q. So you didn't ask him, though, if he searched for other employment; correct?

A. He didn't -- he didn't offer it. And I was -- again, I wasn't doing an earning capacity analysis. And we had a doctor saying that he shouldn't be working.

Q. Did you consider Mr. Sparks' performance reviews before he voluntarily retired?

A. That would be something that goes into earning capacity analysis. That was not the intent of what that section of our report covered.

Q. So you didn't review those records?

A. No. Again, the vocational sections are just looking at our vocational rehab services indicated medically. And based on my consult with the doctor, the answer is no.

Q. Do you know whether he was meeting his employer's performance expectations at the time of his retirement?

MS. WALLACE: Objection.

THE WITNESS: I don't remember those performs reviews, what they specifically entailed.

BY MR. TUBIN:

Q. Your report does not mention Mr. Sparks worked as a police dispatcher from 1996 to 2001; correct?

A. Yeah, I saw that in the other report. I don't think he mentioned that job to me.

Q. Do you know which of his symptoms would have prevented him from performing that job in 2017?

A. Well, based upon what Dr. Schwarz said, he's not medically appropriate to be engaged in any employment. So that would be the reason.

Q. Right. So it's your inquiry is -- doesn't need to go beyond Dr. Schwarz?

A. I'm not giving an earning capacity analysis.

Q. Right. Okay.

A. I -- a life care plan has a component of vocational services. So I'm asking those questions. Does a person need a vocational

evaluation, career counseling, adjustment services, a rehab counselor to work within the job placement?

And so based on the found -- medical foundation I received, the answer would be no. So that's why it's not included in the life care plan.

Q. Understood. Okay. Turn to Mr. Welch.

A. Okay.

Q. I believe you have that one as well.

A. I do.

Q. So, again, you conducted a Zoom assessment with Mr. Welch; correct?

A. Yes, on 8/13/24.

Q. I can see you're anticipating my next question.

How long was the assessment?

A. One hour.

Q. Did you have any time restrictions?

A. No. That's typically how long it takes me to complete the assessment, an hour to an hour and a half.

Q. Okay. Who was present?

A. I think maybe my administrator had

opened up the Zoom call. But it's just me and him, as I recall.

Q. Anyone on the other line besides Mr. Welch?

A. No, I don't remember anyone else being there.

Q. And all the notes you took have been subsumed within your report?

A. Yes.

Q. Is Mr. Welch receiving psychological counseling?

MS. WALLACE: Objection.

THE WITNESS: At the time I did my assessment, the answer would be no.

BY MR. TUBIN:

Q. Has any treating physician recommended psychological counseling?

MS. WALLACE: Objection.

THE WITNESS: Based upon my review of the record, I did not see that specifically mentioned.

BY MR. TUBIN:

Q. Is Mr. Welch receiving physical therapy?

MS. WALLACE: Objection.

THE WITNESS: Not at the time I did my evaluation, no.

BY MR. TUBIN:

Q. Has any treating physician recommended physical therapy?

MS. WALLACE: Objection.

THE WITNESS: The consulting physician did, but not a treating.

BY MR. TUBIN:

Q. Has Mr. Welch ever had an occupational therapy evaluation?

MS. WALLACE: Objection.

THE WITNESS: I'm not 100 percent sure on that one. He was not engaged in occupational therapy at the time I met with him.

BY MR. TUBIN:

Q. Is Mr. Welch receiving speech therapy?

MS. WALLACE: Objection.

THE WITNESS: No, but that was a recommendation received from Dr. Schwarz.

BY MR. TUBIN:

Q. I'm sorry?

A. I said no, but that was a

recommendation received from Dr. Schwarz.

Q. She's a consulting physician; correct?

A. Right. He's not actively receiving it.

Q. Has any treating physician recommended it?

MS. WALLACE: Objection.

THE WITNESS: Not that I recall on the records I've seen.

BY MR. TUBIN:

Q. Is Mr. Welch in a formal fitness program?

MS. WALLACE: Objection.

THE WITNESS: He did tell me he tried to be as active as he could possibly be with walking as much as he could. But if you're meaning, like, going to a fitness center, that was not my understanding.

BY MR. TUBIN:

Q. Has any treating physician recommended he go to a fitness center?

MS. WALLACE: Objection.

THE WITNESS: No. A consulting one has, but not a treating.

BY MR. TUBIN:

Q. Does Mr. Welch receive attended home care services?

MS. WALLACE: Objection.

THE WITNESS: Not actively. He received housekeeping services. And part of the -- what Dr. Schwarz told me is that Mr. Welch has a bit of denial going on about his issues.

BY MR. TUBIN:

Q. What do you mean by that?

A. That he's not accepting, you know, he's falling, he's having more problems than he's actually portraying. You know, he is not really readily admitting that he's having difficulties.

Q. Has any treating physician recommended home care services for Mr. Welch?

MS. WALLACE: Objection.

THE WITNESS: No, not a treating but a consulting.

BY MR. TUBIN:

Q. Does Mr. Welch receive skilled nurse care?

A. Not at the time of my assessment, he did not.

Q. Have any treating physicians recommended skilled nurse care for Mr. Welch?

MS. WALLACE: Objection.

THE WITNESS: No. But to be all -- to be fair, he was in the middle of transitioning to a new doctor. So his previous doctor, I reached out to and she was retiring. So his care was a bit in limbo when I met with him.

BY MR. TUBIN:

Q. Okay. Have any of Mr. Welch's treating physicians recommended lifestyle changes?

MS. WALLACE: Objection.

THE WITNESS: You have to tell me what you mean by lifestyle changes.

BY MR. TUBIN:

Q. What do you understand lifestyle changes to mean?

A. It could be a host of things. A lifestyle change could be abstaining from using alcohol, abstaining from using smoking. It could be being more physically active. It could be a whole host of things. I don't know what you mean by that.

Q. Okay. Let's skip that then.
Go to page 12 of the tables for Mr. Welch.
A. Okay.
Q. And the second sentence reads, "Mr. Welch explained during assessment that a cleaning service currently provides services at his home every other week for a charge of $90 each visit. Given the specific additional out-of-pocket expense that Mr. Welch is paying for the cleaning service and considering the same service was medically determined necessary for him now due to Parkinson's disease by Dr. Schwarz, such was included within the above table."
Did I read that correctly?
A. Yes.
Q. Okay. So he is currently paying for a cleaning service; correct?
A. He is.
Q. Do you have any idea if that is in connection with his Parkinson's disease?
A. She is saying -- Dr. Schwarz is saying it is necessary -- be medically -- medically necessary because of that.

Q. Going forward; right?
A. Right. So the life care plan looks at forward care.
Q. But he's already been paying for this service; correct?
A. He has in the past, but she's saying now it's medically necessary for him to have it.
Q. Do you know if he was paying for it in the past just because he didn't want to do the cleaning or if it was because of his Parkinson's?
MS. WALLACE: Objection.
THE WITNESS: I know that he's had difficulties. I don't know if that -- in his mind, why he was paying for it. But I know he's had physical difficulties.
I guess the important point from life care planning perspective is the doctor said it's medically necessary now due to the Parkinson's.
BY MR. TUBIN:
Q. Uh-huh. You have occupational therapy evaluations listed at three times a year; correct?
It's on page 5.
A. That that's correct, until his

admission to a SNF, per Dr. Schwarz.

Q. He told you during a Zoom assessment that he has no difficulties performing basic activities of daily living or driving; correct?

A. He did say that, but there's also an indication that he's not -- he's in a bit of a denial.

Q. What is that indication?

A. Based upon -- if you look at collectively the medical records. And that was Dr. Schwartz's finding as -- I mean, that was her finding; that he's progressively further down functionally than he wants to put on -- that he wants to admit.

Q. When you say collectively from the medical records, where in the medical records are you determining that he is not representing his restrictions accurately?

MS. WALLACE: Objection.

THE WITNESS: So here, on 10/12/23, he had a follow-up exam with Dr. Neff for Parkinson's disease, endorsed having fatigue with disruptive sleep despite using a continuous CPAP machine, morning stiffness, intermittent memory, the small

handwriting.

Those are all pretty significant symptoms for Parkinson's. So how he perceives that and his function and his quality of life. I mean, I'm glad that he sees optimistically, but those -- what Dr. Schwarz is saying those symptoms start to point to the progression of the disease.

BY MR. TUBIN:

Q. And SNF is a skilled nursing facility; correct?

A. SNF? Skilled nursing facility, the abbreviation, yes.

Q. A number of the line items frequency -- lists frequency as, until placement in an SNF; correct?

A. It does. She gave an idea about when that would happen --

Q. What did she say?

A. -- as I recall.

Give me -- just go -- I'm thinking on his, she said less years of his life. But let me just make sure.

So on page 3 of the questionnaire, as

noted above, attendant care services, medically necessary at present and up to -- Mr. Welch required skilled nursing facility placement during the final -- and the reason that's written that way, "year or years." I mean, one to two years of his life.

Q. We were -- are you getting the one to two years figure from?

A. Well, meaning it could be singular one, or more than one. I mean, it's hard -- it was hard for her to say precisely would it be three years, would it be -- but she's saying the final years of his life, to anticipate a SNF.

Q. Do you know why she didn't write one to three years or one to two years?

A. Her answer to me was that it's terribly difficult to pinpoint exactly to the year the rate of the decline. But she expects it in the final year to years of his life.

Q. And what does "medically expected" mean?

A. Medically expected based on the diagnosis.

Q. Well, she says, is medically expected for Mr. Welch during the final years of his life

during -- due to the Parkinson's.

A. Right.

Q. Do you know what she means by "medically expected"?

A. Well, doctors give medical prognosis. So they're -- you know, Parkinson's has stages. And that's her opinion that it's medically expected in his life, at the end of his life, that this would happen.

Q. Is that like -- can you quantify that as medically expected means it's at least 50 percent likely to happen?

A. No, I don't think that's how that works.

Q. Did you ask Dr. Schwarz how it works?

A. Well, the last question in this questionnaire was -- were all her findings, recommendations, opinions rendered in the life care plan represented to the medical degree of medical certainty greater than 50 percent likelihood. Her answer was yes.

Q. That applies to all of her answers?

A. That would be one of the answers.

Q. Right. But medically expected, just like if we were -- if she had used the word

"possibly," right? Would be less than 50 percent maybe. But she puts that qualification at the end, it doesn't change that.

MS. WALLACE: Objection to form.

THE WITNESS: No. I think she's saying that all of the things she said -- this is what she said.

Yes, all of my findings medi -- all -- yes, all of my medical findings, recommendations and opinions as detailed within the questionnaire reflect a reasonable degree of medical certainty greater than 50 percent likelihood of future occurrence.

BY MR. TUBIN:

Q. Okay. So you take that to then mean "medically expected" means the same thing?

A. Well, sometimes doctors would use the word "expected" as for prognosis.

Q. Okay.

A. The medical prognosis points to the fact this he's going to be in a SNF the last few years of his life.

Q. All right. Let's turn to Mr. Mousser.

A. To Mr. who?
Q. Mousser.
A. Mousser? Okay.
Do I have that one?
Q. I think we're done with the Parkinson's.
(Exhibit 20 marked for identification.)
BY MR. TUBIN:
Q. Handing you Exhibit 20, Mr. Fryar. Do you recognize this document?
A. I do.
Q. What do you recognize it to be?
A. It is a cost analysis. There's an entry letter. It's a cost analysis with there's a medical timeline summary that I completed for Mr. Mousser, and a consult summary that was completed with the transplant physician, Dr. Cooper.
Q. Okay. Now, I think you testified earlier you did not see a need to interview Mr. Mousser; correct?
A. I specifically asked to price out what Dr. Cooper's findings were for his future care relative to if he needed a transplant or

not.

Q. So you did not need to interview Mr. Mousser to do that?

A. No.

Q. Okay. Did you ask to interview Mr. Mousser?

A. Not specifically, no. Not given the request.

Q. Are you aware that the United States expert interviewed Mr. Mousser?

A. I did notice that they did, yes.

Q. Did you try to --

A. But they were doing -- they termed theirs a life care plan and I did not do that.

Q. Did you try to consult with any of Mr. Mousser's treating physicians?

A. No. I was specifically asked to do a cost analysis exclusively based upon what Dr. Cooper's findings were. And I made that clear in the letter.

Q. Right. You didn't ask for any other deposition transcripts; correct?

A. No. Because -- what the nature of the request was.

Q. Did you ask for his wife's deposition

transcript?

A. No. I just explained that I was asked to price out what Dr. Cooper's findings were specifically.

Q. Did you ask for Mr. Richard Mercer's deposition transcript?

A. No.

Q. The recommendations from Dr. Cooper assume that Mr. Mousser will require a kidney transplant; correct?

A. Yes, sir.

Q. So if that assumption is wrong, then the recommendations would become moot; correct?

A. For the kidney transplant, yes.

Q. Turn to page 2.

The third sentence, "In summary, Dr. Cooper explained during our consultation that based upon the current rate of kidney decline occurring for Mr. Mousser, he will likely medically require a kidney transplant in the future, or alternatively he will need to be placed upon dialysis in three to five years."

Did I read that correctly?

A. Yes.

Q. Did you ask Dr. Cooper what he meant

by "likely medically require"?

A. Let me get back to where he signed off. I don't see the consult summary of Dr. Cooper in this one. Let's see.

MS. WALLACE: Tables.

THE WITNESS: There it is, okay. Sorry. I skipped it.

Again, at the very end there, he indicated everything he told me was to the reasonable degree of medical probability, greater than 50 percent.

BY MR. TUBIN:

Q. Understood. Can you identify any records that support Dr. Cooper's rationale that Mr. Mousser's kidney functioning was declining?

MS. WALLACE: Objection.

THE WITNESS: That is a medical question for Dr. Cooper and not for me as a nurse.

BY MR. TUBIN:

Q. No, just if you have identified any records that say that.

MS. WALLACE: Objection.

THE WITNESS: Well, the last indication that I had from a visit in '23

was he was chronic kidney disease stage G3a, which, if my memory serves, that's moderate. Moderate, like, decline.

BY MR. TUBIN:

Q. You turn to page 7 of your report.

A. Okay.

Q. And would you agree your summary details medical records that found Mr. Mousser's kidney disease to be stable; correct?

A. Yes, at one point in time.

Q. This April 18, 2022, treatment note showed excellent and preserved renal function; correct?

A. It did. And then later there was some progression, as I recall.

Q. Then the note later, on July 19, 2022, you see in italics at the bottom, stable CK -- CDK and nonproteinuric kidney disease, which I'm probably butchering --

A. I think those initials are backwards. I think chronic kidney disease, it should be CKD, not DK. Just -- I don't know which way -- if that was me typing that wrong or just quoted that way.

Q. Gotcha.

A. But, yes, I see that. And then you see in '24, where there's a mention that he is progressed to stage G3a.

Q. Uh-huh. So page 8, just going to 2023, Dr. Bucci recommended Mr. Mousser be discharged from the nephrology clinic because his CKD was stable and he had no albuminuria or complications; correct?

A. At that time that point in time, yes.

Q. Okay. So how do you square these divergent opinions with Dr. Cooper?

MS. WALLACE: Objection.

THE WITNESS: Well, specifically, I was asked to -- a divergent opinion applies to a life care plan. This is a cost analysis.

Number 2 -- so I was specifically asked to explain the cost for the care that Dr. Cooper recommended. And it looks like, to me, that he is -- there is some changing happening. And I spoke -- I did speak to a transplant, like, specialist about this. So -- and that was his findings.

BY MR. TUBIN:

Q. There are no records in your summary from 2024; correct?

A. I know it stops at 20 -- looks like the last entry was 20 -- yeah, there is. 6/7/24, the last entry.

Q. What page is that? Okay.

A. Page 8.

Q. So have you requested records after 6/7/2024?

A. Not specifically requested them. Often they'll come in later, after my report is released. But I haven't specifically asked for them yet.

Q. Are you aware of how Mr. Mousser's kidney function was in 2024, before you relied on Dr. Cooper's assessment and issued your report?

A. I'm aware to what it was is documented in the summary that I have here.

Q. As of that date, right, June 7, 2024?

A. Yes.

(Exhibit 21 marked for identification.)

BY MR. TUBIN:

Q. Handed you Exhibit 21. It's hard to see at the bottom, it's kind of cut off, but it's

Bates stamped MOUSSER VHA 01631-01638 -- 0638 that's the range.

MS. WALLACE: I'd like for the witness to have a moment to review the document.

MR. TUBIN: Yeah.

THE WITNESS: Okay.

BY MR. TUBIN:

Q. So if you turn to Bates page 1633, it's kind of cut off at the bottom, but it's page 86.

A. I see it.

Q. Okay.

A. 86, yeah. Okay.

Q. And do you see at the top, the second paragraph starts, "He was last seen"?

A. Yes.

Q. Can you please read that full sentence.

A. "He was last seen on 6/7/24 without change in medications, stable renal function, and encouraged to monitor blood pressures."

Q. Okay. Thank you.

Did you review Dr. Daniel Flood's deposition?

A. Is this regarding Mousser?
Q. Yes.
A. No.
Q. Has Mr. Mousser been examined by a surgeon for a kidney transplant?
MS. WALLACE: Objection.
THE WITNESS: I've consulted with a transplant surgeon, who reviewed his records.
BY MR. TUBIN:
Q. You did. I'm asking if Mr. Mousser has himself been examined by a surgeon for a kidney transplant.
MS. WALLACE: Objection.
THE WITNESS: I'm not sure if he has, since I don't have any documentation that he has.
BY MR. TUBIN:
Q. Okay. Have any treating physicians stated he will need a kidney transplant?
MS. WALLACE: Objection.
THE WITNESS: Not specifically, but they're documenting that he has chronic kidney disease G3a.
BY MR. TUBIN:

Q. Has any treating physicians stated he will need dialysis in three to five years?

MS. WALLACE: Objection.

THE WITNESS: No, a consulting physician indicated that.

BY MR. TUBIN:

Q. On page 2 -- give me a moment.

A. Okay.

Q. Actually, page 7 of the tables.

A. Okay.

Q. And that first sentence that reads, "Necessary antirejection medications were not specified by Dr. Cooper during our consultation."

So you have no medical foundation for antirejection medications; correct?

A. No. He's -- that's saying that -- let me get back to his questionnaire.

He can't tell you exact ones and the dosing until -- that's very individualized, is what he's explaining to me.

So if you look back at his questionnaire -- he medically expected Mr. Mousser remain on immunosuppressive medications throughout his lifespan, should he receive a transplanted kidney in the future.

So he -- that point is that he couldn't tell he it's going to be specifically this medication. That's so individualized and what the person responds to, he couldn't do that and he couldn't tell me the specifics of the medication. So I put there a range of costs of those medications, identified in research.

Q. Where -- so what's the basis for that range?

A. That the research says this is a typical range of what those meds cost.

Q. What are "those meds"?

A. The antirejection meds.

Q. They weren't specified; correct?

A. Antirejection meds.

Q. That's what they're called? There's not, like, a name for a specific kind of -- just antirejection meds?

A. Right. So they're saying these are the anti -- this is a range of charges -- that's the best I can do with that entry, given what he explained to me for those types of meds.

Q. Okay.

A. So it ranged between -- in the current transportation report 2015, 10 to 14

thousand dollars annually for those meds. And then -- then the article also said that transplant admission to 180 days of the charges, a little bit higher, 18,200 to 30,300.

Q. So I'm clear, so neither Mr. Mousser nor any of his treating physicians provided any input into this analysis?

A. Yeah. I've explained that I was specifically asked to describe the charges that Dr. Cooper's recommendations -- the cost of Dr. Coopers recommendations for Mr. Mousser.

Q. Does Mr. Mousser currently receive housekeeping services?

A. It's not documented in the records I've seen.

Q. Does he currently receiving attendant care?

MS. WALLACE: Objection.

THE WITNESS: Not currently, but that was a forecast in the future from Dr. Cooper.

BY MR. TUBIN:

Q. Only Dr. Cooper; correct?

A. Yes. Yes, we have established that, it was only Dr. Cooper.

Q. Right. On page 7 of your report, you discuss Mr. Mousser's treatment with Dr. Rockwood; correct?

A. On page 7 of the report?

Q. Uh-huh.

A. Oh, in the actual timeline, okay. Yeah.

Q. Yeah.

A. With Dr. -- again --

Q. Dr. Rockwood, it's the 4/18/2022 entry.

A. Yes, I do.

Q. You were not offered Dr. Rockwood's deposition; correct?

A. No. If I didn't list it in my -- beginning of this timeline, I have not seen it.

Q. If Mr. Mousser's treating physicians testified that he does not need to make any lifestyle changes, would that change your recommendation for housekeeping?

MS. WALLACE: Objection.

THE WITNESS: Again, this idea of what lifestyle changes means. So I can't say that I understand what that means in that context.

BY MR. TUBIN:

Q. If Mr. Mousser's treating physician testified that his current kidney function has essentially zero impact on his ability to carry out normal day activities, would this change your attendant care recommendations?

MS. WALLACE: Objection.

THE WITNESS: So this was recommendations from Dr. Cooper. And it was forecast to happen into the future, after the kidney transplant, and in the last three years of his life.

BY MR. TUBIN:

Q. Understood.

A. Not talking about current moment.

Q. Right. Okay.

MR. TUBIN: Good time for a break and then we'll do Tukes after.

THE VIDEOGRAPHER: Off record at 3:00 p.m.

(Recess taken from 3:00 p.m. until 3:15 p.m.)

THE VIDEOGRAPHER: On record at 3:15 p.m.

(Exhibit 22 marked for identification.)

BY MR. TUBIN:

Q. This is Exhibit 22. Mr. Frye, you recognize this document?

A. I do.

Q. What do you recognize it to be?

A. It was the cost analysis I did for Ms. Tukes.

Q. You did not interview Ms. Tukes; correct?

A. No, I did not. It is very similar to what we talked about with Mr. Mousser.

Q. You did not ask to interview her; correct?

A. No. But given the nature of the request.

Q. Your cost analysis for Ms. Tukes focuses on kidney transplant and post-transplant care; correct?

A. Yes.

Q. It would be useful, then, to consult with the surgeon who performed her kidney transplant, would it not?

A. If he was available for me to speak to, that the information -- if he had available to me, yes.

Q. It would be useful to consult with the nephrologist responsible for her post-transplant care; correct?

A. Yes, if available.

Q. Did you try to consult with any of Ms. Tukes' treating physicians?

A. No. Again, the request was specifically for me to -- I explained that in the letter -- to utilize the foundation I received from Dr. Cooper. That was the task that was provided to me.

Q. Did you ask for any of the deposition transcripts of the treating physicians?

A. No.

Q. Were you offered any other deposition transcripts?

A. No. Given the nature of the request I was asked to formulate.

Q. Ms. Tukes depends on her husband for much of her care; correct?

A. I do recall reading that in some point in the records, yes.

Q. Were you offered her husband's deposition?

A. I have not reviewed that.

Q. Is Ms. Tukes currently using a home cleaning service?

MS. WALLACE: Objection.

THE WITNESS: I did not see that reported in the medical records I reviewed. But again, as I mentioned earlier, you're not going to typically find that in the records.

BY MR. TUBIN:

Q. Is Ms. Tukes receiving any attendant care?

MS. WALLACE: Objection.

THE WITNESS: It was not documented in the medical records reviewed.

BY MR. TUBIN:

Q. Your report does not mention Mr. Tukes' testimony that he was his wife's caretaker during her dialysis; correct?

A. I didn't see his deposition, so no.

Q. Your report does not mention that Mr. Tukes took classes to learn how to hook up her to the dialysis machine; correct?

A. I've not seen his deposition, but that makes sense. Sometimes family members are taught how to do that.

Q. It does not mention that Mr. Tukes attended classes related to kidney transplant so he could be her caretaker; correct?

A. If that was in deposition, no. I didn't have that information.

Q. Do you have any reason to believe Mr. Tukes will stop serving as Ms. Tukes' caretaker?

MS. WALLACE: Objection.

THE WITNESS: Well, again, I don't have any reason, and I hope that he's able to continue doing that. But from a life care planning perspective, we have to speak to what would happen without a family member. That's very clear in our -- in our guidelines.

BY MR. TUBIN:

Q. And your report does not mention Dr. Jones' testimony that Ms. Tukes has recovered to her pre-transplant status?

A. What -- who was the doctor again?

Q. Dr. Heather Jones.

A. I had records from Dr. Jones mentioned in my timeline.

Q. Uh-huh.

A. You're asking me does it include what now?
Q. Her testimony that Ms. Tukes --
A. Oh, her testimony.
Q. -- recovered to her pre-transplant status?
A. I did not see her testimony. I've seen medical records.
Q. Her testimony was not given to you?
A. No, I've not reviewed that testimony.
Q. You list home cleaning services for Ms. Tukes; correct?
A. I did. I'm just trying to get to that section of the report. Yes.
Q. Ms. Tukes testified that since her cancer diagnosis, her children help her with housekeeping; correct?
A. I honestly don't recall that, but okay.
Q. It's not in your report; correct?
A. I'm not going to argue with you, if it's in there.
Q. Your report does not mention that Ms. Tukes testified that since her April 2024 kidney transplant, she can cook, perform

household chores, and mop, and that going walking, shopping, and fishing are easier for her.

A. Right. So the foundation I received, was that was regarding the last three to four of her life that home cleaning services would be needed, not now.

Q. But your report doesn't mention anything about she can cook, perform household chores, mop, and that going to -- walking, shopping, fishing are easier for her; correct?

A. It does not report that. But again, this is based on what Dr. Cooper's findings were. It is not addressing -- it's not saying she needs it currently. It's saying she's going to need last it the three four years of her life.

Q. You can put Ms. Tukes' report aside.

You have a two-year nursing degree; correct?

A. Correct. And I have a graduate degree in -- a dual master's in another discipline.

Q. And you have a psychology degree; correct?

A. Yes.

Q. You've never been certified as a psychologist?
A. No.
Q. You have no other medical training; correct?
A. Well, we're going to consider nursing medical -- health care training is my nursing training, yes.
Q. What is that additional training?
A. Oh, I thought you said. I do.
Q. I said in addition --
A. In addition to? Beyond -- well, there are medical aspects of the rehab counseling program.
Q. You would consider that medical training?
A. Well, there's medical classes that -- medical aspects of disability you take.
Q. What type of classes?
A. Where you discuss different diagnoses and expected complications, medical -- it's literally called, medical aspects of disability.
Q. You completed a certificate in life care planning; correct?
A. Yes, 2005 or so, I'd have to look at

my CV.

Q. And it was through Kaplan University; correct?

A. Yeah. That was Dr. Deutsch's program at that time.

Q. And Kaplan had no physical location at the time; correct?

A. It was all online, which is what it is right now.

Q. Kaplan University no longer exist; correct?

A. It became IRET. Dr. Deutsch retired. His program went to IRET, which I've taught at IRET.

Q. Now, to the life care planning certificate program, you applied online; correct?

A. That was a long time -- I'm trying to answer your question honestly. I think I did back then. That was a long time ago.

Q. You registered online; correct?

A. To the best of my memory. I mean, it was a long time ago.

Q. And you completed all your study modules online; correct?

A. Yes. But I think there were some

video portion ones, too, and we had constant interaction with the professors.

Q. Were the video portions prerecorded videos?

A. That's what I recall.

Q. Was there any live interaction with professors in realtime, where you could ask questions?

A. Not at that point. Everything had moved to digital.

Q. You never sat for a proctored examination?

A. Yes, I did.

Q. You did?

A. Yes.

Q. When was that?

A. Whenever I got the certification. I had to go to a -- as I recall it, I had to go to, like, a testing center, like I did for my RN license.

Q. You sat for an exam there with a bunch of other life care planning applicants?

A. Well, I think it was -- I might be -- I think it was just me going there is like a proctored center.

Q. Okay. How long was the course from start to finish?

A. It took me about 18 months.

Q. Okay. Have you ever had any of your credentials suspended or revoked?

A. No.

Q. Have you ever been a party to a disciplinary proceeding?

A. No.

Q. What percentage of your current professional time is spent as an expert witness?

A. So as we sit here today, it typically before, it was about 40 percent case management. But I purposefully have brought that down because I'm embarking on doing some career counseling with a -- with a colleague.

So I'm kind of in transition. But right now, case management probably makes up about 20 percent.

Q. And litigation is 80 percent?

A. At the moment, yeah. Until I'm -- it's simply because I'm making a transition.

Q. Once you make the transition, what do you expect to that balance to be?

A. 60/45, 50/50.

Q. And the larger majority being litigation work?
A. Right. I mean --
Q. Right.
A. -- it'd probably likely be 60/40.
Q. What percentage of your expert work is for the North Carolina Industrial Commission?
A. That's really hard to quantify. It used to be a lot. But I would say probably these days, more like 20, 25 percent, if that.
Q. Do you recall a case, Santos Tinajero?
A. I do recall that case.
Q. Do you recall what the Commission said about your opinions in that case?
A. I do. And I recall a lot about that case, actually. That was a case where that gentleman was in a nursing home and was being maltreated, and I had to speak up to kind of save his life.
Q. Do you know what the Commission said about your opinions?
A. I do know what they said. They said they won't object if -- because they felt like I was acting like an advocate. But in reality, I

had an obligation as a nurse to address this because I felt -- I honestly believed he was going to die in the nursing home.

Q. Is that the reason that the Commission gave for why your opinion was deemed unbiased?

MS. WALLACE: Objection.

THE WITNESS: They said it was an objective, is only thing I could come up with. I had that life care plan independently blind peer reviewed. I redacted it.

I mean, this is when this -- you're talking about something that happened like 2009 or '10 when I wrote that plan.

BY MR. TUBIN:

Q. Uh-huh.

A. So 15 years ago.

I had that blind peer reviewed by the lead commissioner -- i ended up being the lead commissioner with the International Commission of Health Care Certification who gives me the credential. He actually wrote me back a letter saying that it was life care plan and he asked to use it in the teaching of other life care

planners.

So I felt strongly that I had met the standards and requirements for the life care plan. And I think there was some misunderstanding about my obligation as a nurse to explain that he was in harm's way.

MR. TUBIN: What number are we on now?

(Exhibit 23 marked for identification.)

BY MR. TUBIN:

Q. When you disagreed with the behavior of an alleged defendant, do you always feel the need to speak up?

A. When I disagree with the alleged behavior?

Q. Yeah.

A. If someone is in harm's way, I'm going to -- I have an obligation to speak up.

Q. That obligation comes from your nursing certificate?

A. Well, those consensus say that I must follow my standards of ethics first. So, yes.

Q. This is Exhibit 23. So if you could turn to page 18.

A. Page 18?
Q. Yeah. The top right corner, the page number in the top right corner.
Actually, let me back up. Look at first page of the document.
A. Sure.
Q. Do you recognize this document?
A. Yes, this is what you're talking about from 2009.
Q. Okay. Have you seen this before?
A. Maybe back then. I haven't seen it in a very long time.
Q. So, yes, now turn to page 18.
A. Okay.
Q. So the Commission starts, at the top of the page in the paragraph, by discussing your background; correct?
A. Yes.
Q. As a life care planner.
Then at the bottom of paragraph 27, it says, "Mr. Fryar cites extensively to literature from the Internet and extracted portions of the medical records and his assessment contains little original work. The life care plan does not contain a comprehensive

summary Mr. Fryar's recommendations and lacks a concise conclusion that explains these recommendations."

That's reasoning that the Commission is giving; correct?

A. You know, I could give you this peer-reviewed life care plan. I don't know why it says that. I don't know why it says the thing about my background because life care planners are either nurses -- 95 percent of life care planners are either nurses or rehab counselors or both.

And the report was extensive. It gave all kinds of medical foundation. I don't quite -- I never understood this opinion and that's why I gave it to my professional body to peer review. And that's the response I got.

Q. Okay. Now, one that's a little more recent, Kari Henderson.

Do you recall that one?

A. Vaguely.

(Exhibit 24 marked for identification.)

THE WITNESS: And just one other point. You know, that was 2009. My life

care plan have been accepted by the Commission numerous times since then. And it was accepted then, they just didn't agree with it.

So -- but I did testify and it was a -- and then subsequently, I've testified on numerous other cases.

BY MR. TUBIN:

Q. So this is from -- do you recognize this document?

A. No.

Q. You see Ms. Henderson's name mentioned at the top under North Carolina Industrial Commission?

A. I do.

Q. You see it was filed September 25, 2025?

A. Yes.

Q. If you turn to page 32.

A. Okay.

Q. And do you recall what the Commission said about your testimony in this case?

A. No. I think this was a vocational case, but that's all I remember.

Q. So paragraph 109 says, "The

Commission assigns little weight to Mr. Fryar's testimony regarding plaintiff's ability to earn wages, as the Commission gives more weight to, among other considerations, plaintiff's proven ability to organize, self-pace, travel, attend events and her receipt of an offer of employment which resulted from her time serving as a volunteer."

Do you recall that?

A. No, I've never seen this review. I have to go back and look at my notes. I thought there was doctors who said she couldn't return to work.

Q. Do you know what it means when -- like, when the Commission says it "assigns a little weight" to your testimony.

What is that?

A. Well, there's --

MS. WALLACE: Objection.

THE WITNESS: I don't specifically know. I mean, maybe they're assigning greater weight to something else.

But as I recall, there were -- there were doctors who said that she shouldn't be working. And we spoke about that

earlier, where I can't override those decisions.

MR. TUBIN: Right.

(Exhibit 25 marked for identification.)

BY MR. TUBIN:

Q. This is 25. Do you recognize this document?

A. No.

Q. See, it says, "Filed: November 5, 2025"?

A. Yes.

Q. If you turn -- do you recognize the name Thomas Clayton?

A. Not specifically, no.

Q. Okay. He was listed in one of your -- I believe, your prior four years of testimony?

A. Okay.

Q. If you turn to page 18, and at the top, paragraph 48.

Do you recall what happened to your opinions in this case?

A. I've never seen this until now.

Q. Tell me if I'm reading this

correctly. "Based upon the preponderance of the evidence in view of the entire record, the Full Commission assigns a little weight to the testimony of opinions of Mr. Fryar based on Mr. Fryar relying on plaintiff's not credible self-reports of pain to Mr. Fryar and Dr. Shrimanker and not taking into consideration the following when formulating his TSA and opinions."

And then it lists the number of information.

A. Well, all I can tell you is that I would not have formulated a TSA without doctor's input. So I don't know what that's mean, not agreeing with Dr. Shrimanker. But it was certainly medical -- medical restrictions I was looking at from a vocational perspective.

Q. Okay.

A. And, you know, there's going to be times when the Commission doesn't agree with me. I gave my honest opinion.

Q. You can put that one aside.

A. Okay.

(Exhibit 26 marked for identification.)

BY MR. TUBIN:

Q. Do you recognize the name Robert Carter?

MS. WALLACE: Can you identify which exhibit number this document is?

MR. TUBIN: This is Exhibit 26.

MS. WALLACE: The one before it was Exhibit 25?

MR. TUBIN: Correct.

THE WITNESS: I don't remember this case at all. But it's been several years ago.

MS. WALLACE: Can you give the witness a moment to review the document?

MR. TUBIN: Uh-huh.

THE WITNESS: Okay.

BY MR. TUBIN:

Q. If you turn to page 12.

A. Okay.

Q. And paragraph 24, the last sentence, "However, Mr. Fryar admitted that he was unable to identify what tasks of plaintiffs's current position could not be performed 'unless I go out and see the job,' which Mr. Fryar did not do in this matter."

A. Right. I mean, yeah -- I mean, I don't think I had an option to go do that.

Q. Then on the next page, and under paragraph 26, the second sentence starts, "The Full Commission notes that both Mr. Fryar's report and testimony indicate that he would have needed to observe the Process Handler I position to determine if it was within the scope of plaintiff's restrictions..." and it continues.

Did I read that correctly?

A. Yes.

Q. Then the last sentence, "Therefore, the Full Commission assigns no weight to Mr. Fryar's report or testimony in this matter."

A. Well, if I didn't get a chance to see it, I didn't get a chance to see it.

Q. Do you know why you didn't go and see it?

A. I don't recall in this case as to why. Maybe I didn't have access to go do it.

MR. TUBIN: I'm marking Exhibit 27.

(Exhibit 27 marked for identification.)

BY MR. TUBIN:

Q. Do you recognize the name Jorge A.

Espinosa?

A. I do. This is from a case back many, many years ago.

Q. If you turn to page 11.

A. Okay.

Q. Top of page 11, it states, "In preparing the life care plan, Mr. Fryar reviewed plaintiff's medical records, met with plaintiff at his current apartment and conducted a comprehensive interview, researched various medical practice guides and other related literature and communicated on several occasions with Dr. Bockenek."

Do you recall who Dr. Bockenek was?

A. He's a spinal cord injury physiatrist.

Q. He was a treating physician in this matter?

A. I don't -- I think so. I don't remember precisely, it was a long time ago.

Q. We go to paragraph 31.

"In those areas where the two life care plans differ on the same issue, the Full Commission gives greater weight to the life care plan prepared by Mr. Fryar, as it is more

consistent with the recommendations of plaintiff's current treating, Dr. Bockenek."

A. So I guess he was treating, I just don't remember.

Q. Okay. And you were hired for the plaintiff in this matter; correct?

A. I'm going off memory, but I think I was, yes.

Q. Okay.

(Exhibit 28 marked for identification.)

BY MR. TUBIN:

Q. This is being marked as Exhibit 28.

Do you recognize the name Anthony Douglas Pryor?

A. I do not at all. That's many years ago as well.

MS. WALLACE: Can you give him a moment to review the document?

MR. TUBIN: Yeah.

THE WITNESS: Okay.

BY MR. TUBIN:

Q. If you could turn to page 7.

A. Okay.

Q. And paragraph 14, I'm going to read

into the record.

"Michael Fryar is a vocational case manager. Mr. Fryar met with plaintiff and completed a vocational assessment on 10 March 2016. A 3 June 2016 letter from Mr. Fryar to plaintiff's attorney reflects Mr. Fryar's conclusion: 'Based upon review of cited medical records, a physician has not released [plaintiff] to return to employment. Thus, [plaintiff] is not appropriate for vocational rehabilitation services to include the consideration of future job placement within the open labor market."

I read that correctly; right?

A. Right. But we have to have a release for someone to return to work.

Q. Right. So is the converse true? And I can elaborate on that if you'd like me to.

A. Please.

Q. If no provider recommends work restrictions, then vocational rehabilitation and future job assessment is appropriate.

MS. WALLACE: Objection.

THE WITNESS: I'd have to go back and look at the context of that. It must have been there was a doctor saying there were

restrictions. The -- saying no one released him to work, I think it must have been that someone said he couldn't work.

BY MR. TUBIN:

Q. Right. So if no provider recommends work restrictions -- let's say, a separate case -- no provider recommends work restrictions, then is a vocational rehabilitation and future job assessment appropriate to perform?

MS. WALLACE: Objection to form.

THE WITNESS: If no doctor is recommending work restrictions -- or no doctor has said this person is not medically qualified to work, meaning a doctor has said they're capable -- medically capable of working outside the restriction, then they're appropriate for service.

But if the reverse is true, where a doctor has said someone's not medically safe to work or assigned a restriction where they couldn't work, then they're not.

MR. TUBIN: Okay. This is the last one.

THE WITNESS: Okay.

(Exhibit 29 marked for identification.)

MR. TUBIN: This is 29. One day I'll be able to keep track of this.

BY MR. TUBIN:

Q. This is Exhibit 29. Do you recognize the name Jeffrey L. Alston?

A. I recognize the name, but I don't remember much about the case.

MS. WALLACE: Can he have a moment to review, please.

MR. TUBIN: Yeah, absolutely.

THE WITNESS: Okay.

BY MR. TUBIN:

Q. If you could turn to page 14.

A. Yes.

Q. Paragraph 40, "Although a CNA employed with a home health care agency could expect to behave -- to be paid anywhere between $11 to $15 per hour depending on experience, Mr. Fryar noted that if a family member had not been available to provide home health aide services for plaintiff, then necessary professional steps from a case management

perspective would have included direct contact with at least two different license home healthcare agencies in the region as referenced in his report."

Did I read that correctly?

A. Yes.

Q. So can you explain a little bit more to me, are you saying that you only need nursing if a family member is unavailable?

MS. WALLACE: Object to form. You can answer.

THE WITNESS: Ask me that one more time.

BY MR. TUBIN:

Q. Are you saying in this, where it says you noted, and then the remaining part of the statement, that you only need nursing if the family member is unavailable?

A. No, I'm not saying that. I'm saying that -- the reverse. That if it hadn't been for the family member, then they would have needed CNA, based on the evidence that was in that case, obviously. And that -- that would be if you got contact with the home health company, you know, to determine those charges, and what I'm saying

there is that the CNA is typically paid in that range based on -- I'm sure I looked at the U.S. Department of Labor to find that range.

Q. Okay. Do you have that document that had your handwritten notes on it? I remember the beginning --

A. I don't have any handwritten notes.

Q. In the beginning of the deposition, you showed me a -- it was on the back of a document.

A. Oh, I'm sorry. I do know what you're talking about. It was just a listing of additional records I saw, just so I would remember.

I jotted them down right before I came, actually. It was on the back of this.

MR. TUBIN: So what I'd like to do is if we can make copies of this and I'm going to enter it as an exhibit and then I think I'm done.

THE WITNESS: Yeah. If you can -- if you can read my handwriting. It was me jotting down the things I've seen after the reports were produced. Yeah.

MR. TUBIN: Yeah. I may ask you on

the record to just explain it, but we can do that real quickly.

THE VIDEOGRAPHER: Go off the record?

MR. TUBIN: Yes.

THE VIDEOGRAPHER: Off record at 3:45 p.m.

(Recess taken from 3:45 p.m. until 3:49 p.m.)

(Exhibit 30 marked for identification.)

THE VIDEOGRAPHER: On record at 3:49 p.m.

BY MR. TUBIN:

Q. I marked for the record Exhibit 30, which are your handwritten notes on some additional materials; correct?

A. Yes.

Q. So can you explain again what this is?

A. This is just a note to myself about additional records I had reviewed since I released the reports.

Q. Okay. Are all of these records, records that were disclosed in your materials considered list?

A. I'm not positive on that. I think

some of these came after my report was released.

Q. Do you know, because --

A. Most of these came after my report was released.

Q. Because we received a supplemental materials considered list.

A. I'm not positive on that. I'd have to compare it.

Q. Okay.

A. But definitely, all of this was things I saw after I released the reports -- that that we've talked about today.

Q. And can you just read this for us?

A. So I know it's difficult to read, so apologize for that.

Yount, as meaning the economist, I read her -- saw her reports for Dyer, Mousser, Tukes, Laramore.

Brood, the economist, I saw -- PD means Parkinson's cases. Welch, Rothchild, and Sparks.

For Miller, I think the ones -- I didn't write it there, but I think I saw his reports for the -- more of the cancer cases. The -- and then, of course, I saw -- we've talked

about it today, I saw the life care planner expert's opinion of Navarro and then we'll just say Dr. S for their reports. I listed them. For Dr. S was Welch, Rothchild, Sparks, Mousser, and Tukes. And the Navarro was Hill, Dyer, and Laramore.

And that says underneath it, she's a CRC and he was a CRC in psychologist, that's what that language is there. And then I saw Staller's reports, all -- for all the cases.

And then there were second, third, and fourth amended track plaintiff damage assessments that I saw.

Q. Okay. And so the last thing I just want some clarity on before I end my questioning.

There's a standard for when you have divergent opinions; correct?

A. Yes.

Q. You have to square them -- you have to methodologically square divergent opinions?

A. In the context of life care plan, yes.

Q. Now, in the context of a cost analysis, that doesn't apply?

A. No. Cost analysis is looking at --

we're using the cost methodology for life care planning. And, of course, I'm not gonna go outside my scope and recommend something I can't recommend as a nurse or rehab counselor. But it's not a life care plan.

Q. So what happens when you get diverging opinions in a cost analysis table? What do you do?

A. If you do -- I mean, those opinions would need to be considered, but it's just -- specifically, a life care plan -- the divergent opinions about life care planning methodology from a -- what goes into arriving at your opinions.

Q. Right. So I guess where I'm a little confused is in a cost analysis table, if you have divergent opinions on one of the items, how do you decide which one to choose?

A. I don't.

Q. You include both of them?

A. So here, the cost analyses opinions, I was asked to -- for Tukes and Mousser to rely upon Dr. Cooper. So that was part of that -- I wasn't asked to look at anything else. And that one I did not prepare a life care plan.

For Hill and Dyer, I mean, I didn't have divergent opinions at the time I wrote the reports. I don't take exception with the other experts relying on the foundation they received. I don't take exception with that.

This is what I had available when I wrote the reports. Certainly, they relied upon other opinions.

Q. So for Dr. Cooper, for example, let's say some of the treating physicians don't agree with his analysis. How do you account for that in your cost analysis tables?

A. Again, the task presented to me was to explain the cost for Dr. Cooper, based on his recommendations, that's it. That's what I was asked to do exclusively. So I --

Q. So you don't even look at the others?

A. I mean, that's not what it was asking me to do.

Q. Okay. All right. Are there things you can recommend as a nurse in a cost analysis that you can't recommend as a nurse in a life care plan?

MS. WALLACE: Objection.

THE WITNESS: I mean, you still have

to stay within your scope of practice.

BY MR. TUBIN:

Q. But that applies across both?

A. I mean, it applies to everything that we do. I mean, anytime I'm out of my scope of practice, you're certainly going to ask me about that.

MR. TUBIN: Right. Okay. Pass the witness.

MS. WALLACE: Thank you. I'd like to take a break and go off the record.

MR. TUBIN: Yeah.

THE VIDEOGRAPHER: Off record at 3:54 p.m.

(Recess taken from 3:54 p.m. until 4:41 p.m.)

THE VIDEOGRAPHER: On record at 4:41 p.m.

EXAMINATION

BY MS. WALLACE:

Q. Mr. Fryar, I have some questions for you. I wanted to start with you -- there was an exhibit marked as Exhibit 13.

And during your testimony, you testified -- you were asked questions about materials that were in your briefcase that you

brought with you today; is that right?

A. My reference sources, yes.

Q. All right. And I want you to clarify for the record, did you intend for this document to be a supplement to your expert reports?

What is the purpose for why you brought this with you today?

A. It's an easy reference. It has information in it from -- easier to show you sometimes.

There's two thick books here I have. The life Care Planning Case Management Handbook, and there's -- multiple articles from the journal. It's an easy reference for me to go to about dates and information that's quoted in those resources, stop from flipping through the pages. So it's a reference source I keep on my desk.

Q. Are any of your reports incomplete without this these notes in this document that you were asked to provide?

A. No, it's just a reference source about why I'm using the 75th percentile for costing.

Q. Did you end up referencing or needing

to reference these notes in any way during the questions today?

A. No, not directly. But sometimes it's easier to reference that and try to flip to the book.

Q. But you weren't asked any questions that even required you to look at this -- these notes today?

A. No. What I had, I could pull from memory the questions that are asked.

Q. All of these notes that are on Exhibit 13, are those notes contained within the resources that you've stated in all of your reports?

A. Yes. Those notes came from those resources, yes, and they are listed in my reports.

Q. So is it your testimony that everything in these notes is already referenced?

A. In my report and the resource list, yes.

Q. Okay. Thank you.

And you don't need to supplement your reports in any way to add anything additional from Exhibit 13?

A. No. I didn't mean to be confusing about that. That's a reference source for me to -- so I don't waste time trying to flip through the books.

Q. And you were asked to produce it, based on the fact that it was in your briefcase; you didn't intend to bring it to be produced to add to a report today?

A. That's right.

Q. Okay. As a life care planner, are you required to usual, customary, and reasonable market rates when you're performing your analyses?

A. Yes, that's a policy statement by the American Medical Association. It's actually outlined in that treatise I was holding up in the earlier version of it.

Q. Is it appropriate for a life care planner to include discounted rates such as noninsurance discount, cash pay amounts, or insurance fee schedule rates?

A. No, we have to use standard rates. We can't -- specifically the consensus says we can't use discounted rates.

Q. That's part of your discipline and

training as a life care planner?

A. Yes, that's in the consensus statements, that's taught to us from day one -- or early on in our training.

Q. You were asked a number of questions today regarding the services that you have identified for future care in your charts. And I wanted to clarify that if you have a medical service listed in one of your charts for any of the plaintiffs, the source of that information has come from a either a treating and/or consulting doctor, and that doctor has confirmed in writing that all of the opinions that support that testimony are reasonably likely to occur 50 percent or greater. Is that true?

MR. TUBIN: Objection to form.

THE WITNESS: Yes, 50 percent greater probability. Yes, that's true for every one of my consults.

BY MS. WALLACE:

Q. So for every chart that is contained within one of your reports, that is supported -- each of those medical services have been -- there is a either treating and/or consulting doctor that has provided evidence that that service is

reasonably likely to occur 50 percent or greater?

MR. TUBIN: Objection to form.

THE WITNESS: Yeah. Yes.

BY MS. WALLACE:

Q. You were asked a number of questions about whether you had reviewed medical records from a treating doctor that had quantified support or articulated support for a number of support services, such as housekeeping, home health attendant care, skilled nursing visits.

Do you remember that testimony?

A. Yes.

Q. Is that -- are those types of support services typically articulated and identified in treating medical records?

A. No.

Q. Can you tell me why?

A. Often doctors, when they're treating patients, are looking at what's needed at the immediate time, and not necessarily forecasting the future. That's why we have to complete consults.

Q. And so if, as a life care planner, you are looking for more information about whether a certain plaintiff, such as a

Parkinson's plaintiff, is going to require support services in the future, what do you usually have to do to elicit that type of information from a medical doctor?

A. Make a phone call, have a consultation, or write a questionnaire to that doctor, asking him to respond he or she to respond.

Q. And so in your practice, just because those types of services are not articulated in current or past medical records, that does not mean that the doctor does not believe them to be necessary for that particular plaintiff?

MR. TUBIN: Objection to form.

THE WITNESS: Not necessarily does not mean that, no. Certainly that's why we ask them.

BY MS. WALLACE:

Q. Typically, if you want that type of information as a life care planner, you have to ask for it?

MR. TUBIN: Objection form.

BY MS. WALLACE:

Q. Do you agree?

A. Yes. Majority of time, yes. It's

very rare for it to be in the record for long-term needs.

Q. The methodology that life care planners use in order to determine costs in a life care report, are you taught -- tell us what you're taught regarding which sources are appropriate to draw from in order to quantify costs.

A. Databases. You can make phone calls to clinics and get information directly from the clinic. You can do research online with vendors that are offering DME. Make phone calls to agencies. Look at literature that pinpoints some costs when it's difficult to know a precise rate.

Q. So there are a variety of different sources, including surveying physicians within the geographical area that can be used?

A. Yeah, via databases or via telephone, yes.

Q. And typically, is it important for the sources of your information to be contained within either your report or your file?

A. Yes.

Q. Regarding making phone calls to providers, have you done that on occasion?

A. Yes, I have. I mean, I did it here. I called the agencies for home health care to determine that or mainly here for home health care.

Q. And that's within accepted methodological practices for life care planners?

A. Yes. I mean, that's the only way I actually get that information. It's not -- you're got not going to find that in a database. You might find some survey stats, but you're not going to find specific information that you need.

Q. And if there is a not a provider for an individual plaintiff that is recommending the care needed in the life care plan, what do you do in that situation?

A. There's -- can you repeat the first part.

Q. What if there's not a provider for the care that a life care planner is providing the cost analysis for?

A. So there, we have to ask for evaluations, sometimes IMEs are completed. If there's not someone providing the care -- that happens often where someone's seeing, you know, a primary care physician, they have a spinal cord

injury, we really need to see a spinal cord specialist, and there's an IME that's done and then I consult with the IME doctor.

Q. In life care planning practice methodology, how many providers or resources do you typically try to contact or review in order to get a range of costs?

A. So the early tenets of life care planning spoke about getting three sources. What the consensus statement says is more than one.

Q. You were asked a number of questions regarding whether you had access to a treating physician in the case to support certain future medical services that were needed.

Do you recall that testimony?

A. Yes.

Q. Did you have the opportunity to also review the defense life care planners' reports in this case?

A. I did.

Q. And did you observe that they issued opinions in this case without access to treating physicians?

A. Yes.

Q. And in your opinion, did that

disqualify their methodology, that they didn't have access to a treating physician?

A. No.

Q. And so in a situation like that, it's appropriate to consult with consulting physicians as well?

A. Yes.

Q. And so from that perspective, both you, as the plaintiff expert, and our defense experts, have as needed relied upon consulting physicians to support services identified in your life care plans?

MS. WALLACE: Objection to form.

THE WITNESS: Correct.

BY MS. WALLACE:

Q. Is that true?

A. Yes, that's true.

Q. There are certain plaintiffs that you have sections in your report, such as Hill, Rothchild, and Sparks, where you've identified vocational rehabilitation findings from the -- based upon surveys that you received or conversations that you had with either treating or consulting physicians.

A. There's information about what the

treating physician said about future work for those -- for those individuals, yes -- or excuse me, treating or evaluating.

Q. Yes. And so for an evaluating or treating physician who has opined to you that the plaintiff is disabled and incapable of further employment, what -- from a vocational expert standpoint, what do you do with that knowledge?

A. There's nothing more you can do, if there's not -- at that point in time, that was all the information I had. And there's -- you have to have a release from a physician for -- to pursue employment.

So like I said earlier, we have advisory opinions from the people who give our board certification for rehab counseling that say, I can't opine about function.

So if a doctor has said that someone can't work and that's all I had and there's no one saying the opposite, then there's nothing I can recommend as far as vocational rehab services. Or if I was taking it a step further with an earning capacity analysis, there's no -- you can't apply transferability in that situation because the doctor hasn't released the person to

pursue employment.

Q. You cannot do a transferable skills analysis, if they've been deemed permanently and totally disabled?

A. Right. Because we lean on the doctors to tell us about function. In that situation would be they can't work.

Q. So in that circumstance, some of your reports state that you would defer the total loss wages calculation to an economist.

Is that your typical practice in that situation?

A. Yes.

Q. And the economist -- what does the economist do as a result of that medical determination, if you know?

A. They typically look at tax records and provide a present value calculation on the loss.

Q. And you testified earlier that you've reviewed the economist reports for the plaintiffs that you reviewed?

A. Yes.

Q. And is that what was done, to your knowledge about --

A. Yes. Yes.
Q. You were asked questions specific to plaintiff Jimmy Laramore.
Do you recall that?
A. Yes.
Q. Do you recall the line of questioning regarding Dr. Sfakianos' opinion as to the likelihood of future bladder removal procedure?
A. Yes.
Q. Do you recall -- why don't you pull up. I just want to clarify for the record.
Do you have Jimmy Laramore's report there?
A. I'm sure I did.
Q. It should be --
A. I'm still looking. I don't see it in this exhibit. I must have skipped it. Let me try again.
Q. That can't be the only one we didn't mark.
A. I don't see it in my stack.
MS. WALLACE: Do you have it? Did we mark Jimmy Laramore's?
MR. TUBIN: I think he relied on his op key.

BY MS. WALLACE:

Q. I don't mind you pulling out your copy.

A. I can pull my copy out.

Q. Thank you?

A. Okay. I have it.

Q. Thank you.

You were asked some questions about Dr. Sfakianos potentially indicating in that -- the language that it was possible -- he would possibly require surgical intervention to remove his bladder with the development of urinary diversion.

Do you remember that line of questioning?

A. Yes.

Q. Can you pull your questionnaire with Dr. Sfakianos and let us know if the opinion about needing a future bladder removal was rendered to a reasonable degree of medical probability and that based on your reliance materials?

A. It was -- he signed off on that on 1/23/25, and he's indicated that there was a bullet that he agreed that it was correct in what

he told me; that all his medical findings and conclusions for Mr. Laramore were rendered to a reasonable degree of medical probability, greater than 50 percent medical probability.

Q. Does your report -- also on the survey that you sent to Dr. Sfakianos, does it also indicate at the bottom that should a listed recommendation require change or modification, that you are to be contacted?

MR. TUBIN: Objection to form.

THE WITNESS: Yes, it does. All of them, I say that.

BY MS. WALLACE:

Q. And have you received any subsequent communication from Dr. Sfakianos altering in any way his medical opinion in that regard?

A. No.

Q. And did he sign the physician statement stating, I have reviewed the 1/22/2025 consultation summary letter, and then later the letter is valid and accurately reflects my medical findings and conclusions for Jimmy Laramore?

A. Yes, as he conveyed to me. That was dated -- that's what I was mentioning, it was

dated 1/23/2025. I spoke to him on 1/22/2025.

Q. So as we sit here today, you're unaware of Dr. Sfakianos changing his opinion regarding the likelihood of Mr. Laramore's future bladder removal procedures as you've identified in your report?

A. I'm not aware of that, no.

Q. When you reviewed the expert report for Jimmy Laramore prepared by the defense, did you also see that they quantified bladder removal?

MR. TUBIN: Objection. Form.

THE WITNESS: Yes, they did.

Ms. Navarro did.

BY MS. WALLACE:

Q. You were asked some questions regarding Terry Dyer, a bladder cancer plaintiff.

Do you recall that?

A. Yes, I do.

Q. And in your materials considered, one of the materials that you reviewed was the expert report of Haresh Tharwani; is that true?

A. Yes.

MS. WALLACE: Can I have an exhibit sticker, please.

(Exhibit 31 marked for identification.)

BY MS. WALLACE:

Q. Mr. Fryar, I have handed you what's been labeled Exhibit 31 for this deposition. And it is the expert report for Terry Dyer by Haresh Tharwani.

Do you see that?

A. I do, yes, ma'am.

Q. Will you turn to the section that describes the required psychotherapy for Ms. Dyer.

THE VIDEOGRAPHER: I don't mean to interrupt you, but your mic --

MS. WALLACE: Yes. Can you hear me at all.

THE VIDEOGRAPHER: Well, it sounds like you're in the closet.

MS. WALLACE: Would you like for me to repeat that question.

THE VIDEOGRAPHER: I can hear you, it just sounds different.

MS. WALLACE: How's that?

THE WITNESS: Maybe you could point me to the page you're speaking of?

BY MS. WALLACE:

Q. Certainly. Page 10, top of the page.

A. Okay.

Q. Do you recall being asked questions about the frequency of psychotherapy in Ms. Dyer's case?

A. I was. I do remember that, yes.

Q. And can you read aloud in this paragraph on the top of page 10, what Dr. Tharwani indicated was the recommendation for psychotherapy to include the frequency required?

A. Sure. This is under Section a. Psychotherapy. Page 10.

"Ms. Dyer will require consistent follow-up care to monitor the progression of her symptoms, identify potential side effects, and medications and to begin a course of supportive psychotherapy. I have recommended to Ms. Dyer that she immediately begin seeing a trained psychiatrist for at least one hour every month. It is likely such support will be needed for the rest of her life along with medications. Supportive psychotherapy focuses on reducing the symptoms of psychological conditions by listening to, encouraging, and teaching the patient healthy

coping strategies when faced with outside triggers. Supportive psychotherapy is often used in settings where the patient is faced with external stressors outside their control, like cancer."

Q. Do you see an indication by Dr. Tharwani of what the frequency is indicated for psychotherapy for Ms. Dyer in that paragraph?

A. One hour every month.

Q. And when does that start and end?

A. Immediately.

Q. When does it end?

A. Through life.

Q. Can we take a look back at Ms. Dyer's expert report, which has been previously marked as, I believe, Exhibit 1?

A. Okay.

Q. And if you could turn to your charts where you quantify psychotherapy.

A. Okay.

Q. And that falls on -- is it page 4?

A. Yes, of the tables.

Q. Is -- do you have reflected in your current report the duration identified by Dr. Tharwani as it relates to psychotherapy for

Ms. Dyer?

A. No.

Q. Do you have sufficient medical support in order for that frequency to be recommended?

MR. TUBIN: Objection form.

THE WITNESS: Yes. To add the item in, yes.

BY MS. WALLACE:

Q. In your opinion, would -- based upon the paragraph that you just read, based upon your methodology and guidelines, should you add the duration in for Ms. Dyer's report?

MR. TUBIN: Objection. Form.

THE WITNESS: Yes. You would have to indicate there that you were referring to a psychiatrist as well. But yes, and you could indicate his report noted one time a month for life.

BY MS. WALLACE:

Q. And based upon your unit costs, that would be either a 45-minute session or 60-minute session, which would range from $133.64 to $226 per hour?

MR. TUBIN: Objection. Form.

BY MS. WALLACE:

Q. I'm sorry, per session.

A. Per session, the lower end being the 45-minute session.

Q. And so based upon the -- what we've just reviewed from Dr. Tharwani's report and the life care plan table on 4, under therapies, do you intend to make an update to this report?

A. I certainly can, yes. We could list that foundation from that psychiatrist there.

Q. You were asked a number of questions about whether or not it is appropriate to put a service in your life care plan, if the treating or evaluating doctor hasn't provided you support for the frequency of that service.

Do you recall that testimony?

A. Yes.

Q. I want to clarify. Are you required and encouraged to include a service, regardless of if you have the frequency identified in a life care plan, if it is supported by the 50 percent more likely than not support?

MR. TUBIN: Objection to form.

THE WITNESS: Yes, you have to include the unit cost. Here, Dr. Longo

was saying an evaluation of at least one treatment session needs to happen and that he was deferring the frequency.

So I would have to include that and to defer the frequency. But now we have a frequency for psychotherapy that you can include from a psychiatrist.

BY MS. WALLACE:

Q. My question is more general.

So, in general, if you don't have the frequency, but you do have support that it's more likely than not a medical service that will be needed in the future, are you required to include that information in your charts for unit cost?

MR. TUBIN: Objection. Form.

THE WITNESS: Yes, that's my understanding. In 20 years of doing life care planning, yes, that's my understanding.

BY MS. WALLACE:

Q. So it shouldn't be excluded from the chart, just because you weren't able to seek clarification on the frequency?

MR. TUBIN: Objection. Form.

THE WITNESS: Right. That would be

excluding medical care and foundation I received, that wouldn't be appropriate.

BY MS. WALLACE:

Q. And sometimes there can be testimony that where the court can make a finding or determination regarding the frequency based upon the cumulative record before the court.

Is that your understanding?

MR. TUBIN: Objection. Form. Foundation.

THE WITNESS: I have seen that happen, yes.

BY MS. WALLACE:

Q. And so in my general line of questioning, it shouldn't be excluded from a chart just because you don't have the frequency at that time?

MR. TUBIN: Objection. Form.

THE WITNESS: A life care plan's a dynamic document. We're getting more information. As we get it, we update the plan. So yes, we need to document what foundation we received and update it as we get additional information.

BY MS. WALLACE:

Q. You were asked some questions regarding Mrs. Dyer's weight.

Do you recall that testimony?

A. I do.

Q. When you are doing a life care plan and you have a recommendation from a treating or reviewing physician -- or what's the --

A. The term evaluating or consulting physician is used.

Q. Thank you.

And you have an opinion from a treating or evaluating physician that certain -- that certain care is needed for the plaintiff at that time, in a situation where Mrs. Dyer is continues to have -- to be overweight weight at the time that she was evaluated, are you required as a life care planner to take the plaintiff as she is now rather than the potential that she may lose weight in the future?

MR. TUBIN: Objection to form.

THE WITNESS: Yes, as she is now, and as the foundation I received explained to me, yes. The medical foundation, that is.

BY MS. WALLACE:

Q. You were asked some questions

regarding Ms. Dyer's prior medical malpractice lawsuit.

Do you recall those questions?

A. I do.

Q. And you were previously limited to any information that you reviewed in Ms. Dyer's deposition regarding that issue.

Do you recall that?

MR. TUBIN: Objection form.

THE WITNESS: Yes.

BY MS. WALLACE:

Q. Do you have any knowledge as -- let me ask you this: Your evaluation -- if you look at Mrs. Dyer report, which is Exhibit 1, in your opening paragraph on page -- I think it's on page 29 -- is that right?

A. Are you asking me to open paragraph to the tables?

Q. Yes. Let me look.

A. It's on page 2 of the tables.

Q. Thank you.

I was talking about where it says that your life care plan process for Ms. Dyer was performed secondary and exclusively related to her bladder cancer diagnosis.

A. Oh. That would have been in the questionnaire that Dr. Longo reviewed and signed. That's towards the back of the report, but it says that in the intro to the -- in the life care planning questionnaire responses for Dr. Longo.

Q. Yes.

A. That it was -- I'll just read the paragraph.

Based upon your medical expertise -- this is me telling -- asking him this -- reviewing medical records and past clinical experiences, please provide responses for the following questions with direct consideration of the medical and rehabilitative services which will be required to accomplish the goals of the life care planning process for Ms. Terry Dyer, secondary and exclusively to the bladder cancer diagnosis.

Q. So all of the opinions in the charts for Mrs. Dyer, is it your understanding that all of those services are secondary and exclusively related to her bladder cancer diagnosis?

A. Yes.

MR. TUBIN: Objection. Form.

THE WITNESS: That's what I asked for

him to respond regarding.

BY MS. WALLACE:

Q. And do you recall reading in her deposition testimony on page 39, that Ms. Dyer stated, "The only lawsuit that I've ever filed was against Dr. Lovett for malpractice and now that happened because I would have never had the bladder cancer had it not been for Camp Lejeune"?

MR. TUBIN: Objection. Form.

BY MS. WALLACE:

Q. Do you recall also reading that testimony in her --

A. Yes.

Q. So is it your understanding that the your life care plan is the secondary and exclusive to her bladder cancer diagnosis, regardless of what prior life care plan that may have been performed in 2014 by Dr. Deutsch?

MR. TUBIN: Objection to form.

THE WITNESS: Yes. I mean that's specifically what I asked for Dr. Longo to base his findings upon.

BY MS. WALLACE:

Q. Thank you.

You were asked some questions

regarding the Mr. Mousser's chronic kidney disease do. You recall that line of questioning?

A. I do.

Q. And you were asked to read a number of excerpts regarding -- that stated that the chronic kidney disease was stable at Stage 3a.

Do you recall being asked?

A. Yes.

Q. Can you -- based upon your nursing background, do you understand chronic kidney disease to be a chronic and progressive disease by nature?

MR. TUBIN: Objection to form.

THE WITNESS: I -- speaking as a nurse, yes. I mean, that's nature, chronic kidney disease.

BY MS. WALLACE:

Q. And so "chronic" meaning what in that context, if you know?

A. Meaning it's been that way for long-term and there's reason -- reasons to believe that it could progress.

Q. And if it is stable, does that recur -- does that refer to the current staging of the disease, if you know?

A. That's my understanding reading that record. They were saying that it was staged in a 3a, which is -- to the best of my memory, is listed up to the moderate level of disease and that it's stable at that stage at that point in time.

Q. And being stable at that stage at that point in time, based on your understanding, does not mean that it may not progress and get worse in the future?

MR. TUBIN: Objection to form.

THE WITNESS: Certainly does not mean that. And that's why we consult with specialists that explain to us the medical prognosis expected.

BY MS. WALLACE:

Q. And the specialist in this case that you relied upon, did hold that opinion?

MR. TUBIN: Objection form.

THE WITNESS: That it would progress, yes, that he would need eventually a transplant, yes.

BY MS. WALLACE:

Q. You were asked a number of opinions -- a number of questions about prior

opinions and awards before the North Carolina Industrial Commission in workers' compensation cases.

Do you recall that?

MR. TUBIN: Objection. Form.

THE WITNESS: I do.

BY MS. WALLACE:

Q. Do you recall if most of the expert opinions that you were giving in those reports actually had to do with your expertise as a vocational rehabilitation expert?

A. I think all of them did, except for one.

Q. And would you agree with me that you have been -- how long have you been an expert before the North Carolina Industrial Commission, in either a life care planning or a vocational rehabilitation expert capacity?

A. I think I did my first deposition before them in 2006, 2007.

Q. So almost 20 years?

A. 20 years. I've about probably been deposed upwards of 175 times at some point during my career, maybe more at this point.

Q. Have there been many expert opinions

where the Commission has found your opinion to be the prevailing opinion when they weighed the evidence in the case?

MR. TUBIN: Objection. Form.

THE WITNESS: Absolutely. I just got one a couple of days ago where they did that and actually asked me to take over the case and help the person return to work.

BY MS. WALLACE:

Q. And same question regarding life care planning. Have there been many cases where the industrial commission, a specific deputy commissioner or the full commission panel, has taken your expert opinion and it was the credible one giving greater weight in the case?

MR. TUBIN: Objection. Form.

THE WITNESS: Yeah. And one of those was actually in the ones that were handed to me, Espinosa.

But, yes, I've given opinions in life care plans about attendant care costs throughout my career.

BY MS. WALLACE:

Q. Have you ever been disqualified by

the industrial commission as a life care planner or vocational expert?

A. No. There's been times, obviously, where they didn't agree with my opinion that I arrived at. But they've never -- I've never been excluded in that way.

Q. The methodology that you follow as a life care planner in workers' compensation, is it the same as the methodology you apply in civil cases?

A. Yes. Often attorneys need to know certain things that won't be covered by, say, it's a little different because attorneys need to know what won't be covered by Medicare because it's Medicare set aside. But the things that won't be covered we do follow the same life care planning methodology.

Q. You have to sometimes be more specific?

A. If needed. I mean, there's times where it's -- includes everything. There's times when attorneys ask me about specific support services.

Q. And you mentioned there the one case that counsel brought up first that you mentioned

was the life care plan related, was it Santos --

A. Yes. I think that was his first name. The last name Tarajara.

Q. Tinajero? T-I-N-A-J-E-R-O?

A. You may be correct on that, I don't remember how I exactly said it.

Q. I'm sorry. We talked over each other. I'm sorry.

Do you -- and you mentioned that you had reviewed this opinion and you actually sought peer review of your report to ensure the reliability of your report?

A. Right.

MR. TUBIN: Objection. Form.

THE WITNESS: So I was a very -- I was a new life care planner when I wrote that life care plan. I don't know if I actually saw what was presented to me the day. It's been a long time ago.

I mean, we're talking, you know, 20 years ago, something along that neighborhood. But yes, I gave it to the International Conventional of Healthcare Certification, which is the group that certifies me as a life care planner, and

asked them to peer review it, blind peer review it. I redacted what I had to redact.

And then they responded with the fact that it was a -- met all the standards of life care planning, that it was a wonderful example of a life care for someone with spinal cord injury. And, actually asked me to allow them to use it to teach other life care planners. And --

BY MS. WALLACE:

Q. Tell me again how does the international committee of health relate to your field help me understand that?

A. International Commission on Healthcare Certification. They are the governing body who grants and manages the CLCP, which is my -- the accredited credential for life care planning, certified life care planning. They've been around since the beginning of life care planning as a certifying body.

Q. So this sentence that is in the opinion and award of Commissioner Linda Cheatam, where she states, "It is unclear from the record whether Mr. Fryar's level of experience in

preparing life care plans is adequate to prepare an assessment for this catastrophic situation," are you telling me that the governing body of CLCP disagrees with Deputy Commissioner Cheatam on that issue?

MR. TUBIN: Objection. Form.

THE WITNESS: They certified me as a life care planner. As I mentioned earlier, most life care planners either are nurses or rehab counselors or both.

I think there's some -- there was some misinformation about my background, maybe, the way it's portrayed in -- was in the deposition, I was -- maybe I wasn't asked the right questions.

But no, I was -- I'm -- I was certified by my commission at that point in time, peer reviewed by them, and that life care plan was found to be valid and reliable by my professional body.

Certainly gave me pause to hear that as a new life care planner. So I wanted input from my professional committee, which I got.

BY MS. WALLACE:

Q. If Ms. Cheatam stated in her opinion and award that you "cited extensively to literature from the internet and extracted portions of the medical records and his assessment contains little original work," did the peer-reviewed analysis that you received back from -- ICHCC --

A. ICHCC, yes, you're correct.

Q. -- did they agree with that analysis on behalf of Ms. Cheatam?

A. No. They said it was an excellent representation of the literature I have to reference for life care planning and foundation after reference. I think maybe it was a misunderstanding about what -- how a life care plan is produced.

Q. And you testified that you have never actually been disqualified as an expert in life care planning.

MR. TUBIN: Objection form.

THE WITNESS: No, I've never had a Daubert challenge. I testified there, they just didn't agree with the findings.

But I will say that that gentleman did get out of the nursing home and went

on to live a very happy life, which was important to me and it's good to hear.

BY MS. WALLACE:

Q. Are there any other -- you testified that there was a -- for Mr. Laramore, there was a one-digit CPT code that was misstated in the questionnaire signed by Dr. Sfakianos.

Do you recall that testimony?

A. Yes.

MS. WALLACE: May I have an exhibit sticker, please.

(Exhibit 32 marked for identification.)

MS. WALLACE: Thank you.

BY MS. WALLACE:

Q. I've marked as Exhibit 32. Do you recognize this document?

A. Yes.

Q. What is this?

A. So this was -- let me just make sure. There was an earlier one, I think it's dated 1/22, it was signed by the physician. And the -- one of the were -- was -- there's a digit off. I think it was the bottom code, but I have to go back and compare.

The 51595, I think I had a 596 there. I caught it after I had sent it to the doctor. And so I sent him back a corrected one the same day, but he had already signed the first one.

So there's two versions of it and I think the first version is what we went on our report versus which was the confirmed one with the correction.

Q. Is there any substantive change to your report based on this one-digit CPT mistype?

A. No. I still use the correct CPT for the costing. I just wanted to confirm that that was a typo and that that was the correct coding that he had recommended.

Q. So if we have a perfect record, then, for this plaintiff, we would substitute Exhibit 32 for the -- for the questionnaire that's identical to it in every way except for the one-digit difference in that CPT code?

A. Correct.

MR. TUBIN: Objection. Form.

BY MS. WALLACE:

Q. Okay. You also testified on direct that in one of the tables for Mr. Sparks, you noted when you were preparing for deposition,

that your chart lists 21 hours weekly, and there was a modification to 12.

Could you explain that again, please?

A. So the consultant doctor had indicated the first two years, that the -- it's three hours every other day. So that would have been -- specifically noted that would be 12 hours a week. So for the first two years, it would be 12 hours a week, and thereafter, it would go up to 21. That was inadvertently left out of that column.

(Exhibit 33 marked for identification.)

BY MS. WALLACE:

Q. I'm handing you what's been marked as Exhibit 33. And can you please take a pen and mark how that should actually be properly reflected on the report, please.

MS. WALLACE: And Counsel, if you want to look over his shoulder or just watch him or I'll pass to it to you.

MR. TUBIN: Just see it after he's done, yeah.

BY MS. WALLACE:

Q. Okay.

A. So this says first two years, 12 hours weekly. Again, I apologize for the handwriting.

Q. And would you -- do you mark anything out, it all stays as is?

A. You can draw a line that separate the two so that's not confusing for the economist.

Q. Will you go ahead and do that.

A. Yeah. Sure.

Like that.

Q. Thank you.

MR. TUBIN: We'll have it in the record. Madam Court Reporter will take it.

BY MS. WALLACE:

Q. Mr. Fryar, you were asked questions about some handwritten notes that you had on the back of one of your pieces of paper in your briefcase that were reminders to yourself on some of the documents that you reviewed.

A. Yes, after I released the reports, yes.

Q. And those included economist reports and -- is that right?

A. Multiple economists, yes. Ms. Yount,

Mr. Brood, Mr. Miller, and Mr. Staller.

Q. It also -- do you recall providing supplemental materials considered list that included those materials to the defendant in this case?

A. I don't specifically remember that, but I know there were some supplemental materials provided.

(Exhibits 34 and 35 marked for identification.)

BY MS. WALLACE:

Q. Mr. Fryar, I'm handing what's been previously marked as Exhibits 34 and 35.

Do you represent -- do you recognize those materials that were also additionally reviewed by you in this matter?

MR. TUBIN: Counsel, which is which is?

MS. WALLACE: The February -- I should backwards. It's -- 34 is the February 24, 2026, production.

MR. TUBIN: Okay.

MS. WALLACE: And 35 is the January 28 production -- of 2025.

THE WITNESS: The February 24, yes, I

recognize that.

BY MS. WALLACE:

Q. Do you -- do you recognize Exhibit 35 as well?

A. Some of that I can't really -- the way the exhibit is written, because it just says there's VA records. I don't recall all of these depositions.

Q. If they are listed in your supplemental materials considered, is it your understanding that you would have had them available to you to review?

A. Yes. That they were -- that they were provided and listed there, yes.

Q. Have you continued to supplement materials considered in this matter as needed?

A. Yes.

Q. Are there -- are there any other changes that we have not mentioned today that you may need to make to your expert reports or charts for the plaintiff?

A. Not at this time. I mean, of course, additional records come to me, I review them; if there's something new, I'll certainly -- someone know. But as we sit here today, no.

MS. WALLACE: Thank you. I don't have any further questions.

MR. TUBIN: A couple of little quick questions.

FURTHER EXAMINATION

BY MR. TUBIN:

Q. Can you pull up Exhibit 13. That's the three-page document that you summarized the --

A. The --

Q. The three-page document you brought with you to the deposition.

A. Oh, sure. I can find that again.

Q. You know what --

A. I know what -- you're talking about the one that talked about methodology.

Q. Yeah, Exhibit 13.

A. Yes.

Q. Do you intend to bring this three-page document to trial with you?

A. Not necessarily. It's a reference list for me.

Q. Do you intend to rely on that document at trial?

A. I mean, to the extent it's a

reference list. Most of it I have to put to memory because I've written it. So I don't necessarily have to bring that with me. It's just easy reference.

Q. Again, I'm asking, do you have intention to bring it with you to trial?

A. If I'm allowed to bring reference materials, yes.

MR. TUBIN: Okay. I've got nothing further.

MS. WALLACE: Nothing further.

THE WITNESS: Okay.

THE VIDEOGRAPHER: This concludes the deposition. Off record at 5:31 p.m.

CERTIFICATE OF REPORTER

I, Christine A. Taylor, Registered Professional Reporter and Notary Public for the State of North Carolina at Large, do hereby certify:

That the foregoing deposition was taken before me on the date and at the time and location stated in this transcript; that the deponent was duly sworn to testify to the truth, the whole truth and nothing but the truth; that the testimony of the deponent and all objections made at the time of the examination were recorded stenographically by me and were thereafter transcribed; that the foregoing deposition as typed is a true, accurate and complete record of the testimony of the deponent and of all objections made at the time of the examination to the best of my ability.

I further certify that I am neither related to nor counsel for any party to the cause pending or interested in the events thereof.

Witness my hand, this 16th of March, 2026.

Federal Rules of Civil Procedure

Rule 30

(e) Review By the Witness; Changes.

(1) Review; Statement of Changes. On request by the deponent or a party before the deposition is completed, the deponent must be allowed 30 days after being notified by the officer that the transcript or recording is available in which:

(A) to review the transcript or recording; and

(B) if there are changes in form or substance, to sign a statement listing the changes and the reasons for making them.

(2) Changes Indicated in the Officer's Certificate. The officer must note in the certificate prescribed by Rule 30(f)(1) whether a review was requested and, if so, must attach any changes the deponent makes during the 30-day period.

DISCLAIMER: THE FOREGOING FEDERAL PROCEDURE RULES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY. THE ABOVE RULES ARE CURRENT AS OF APRIL 1, 2019. PLEASE REFER TO THE APPLICABLE FEDERAL RULES OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS

COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted

fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.

P R O C E E D I N G S

THE VIDEOGRAPHER: We are now on record. Today's date is March 4, 2026. The time is 9:08 a.m. This is the video deposition of Marjorie Hackett-Wallace in the matter regarding Camp Lejeune Water Litigations being held in Salisbury, North Carolina.

Our court reporter is Christine Taylor, and I'm Matt Walters, the videographer.

Would counsel please introduce themselves.

MS. WALLACE: Whitney Wallace with Wallace & Graham for Plaintiffs' Leadership Group.

MS. KONSTANTOPOULOS: Melanie Konstantopoulos on behalf of the United States.

MR. ANTONUCCI: Giovanni Antonucci for the United States.

* * *

MARJORIE HACKETT-WALLACE, having first been duly sworn, was examined and testified as follows:

* * *

EXAMINATION

BY MS. KONSTANTOPOULOS:

Q. Can you please state your full name.

A. My name is Marjorie Hackett-Wallace.

Q. Can you please state your current business address?

A. My current business address is my home, 103 Elbridge Road, New Britain, Connecticut 06052.

Q. As you heard, my name is Melanie Konstantopoulos, and I am an attorney for the Department of Justice. I represent the United States in the Camp Lejeune Water Litigation currently pending in the Eastern District of North Carolina.

Have you ever had your deposition taken before?

A. Yes, I have.

Q. How many times?

A. Two times.

Q. What kind of cases did you have your deposition taken in?

A. There were two civil cases.

Q. Were you an expert in those cases or

were those personal cases?
A. Those were personal cases.
Q. What was the nature of those personal cases?
A. Motor vehicle accidents.
Q. You took an oath before we started this morning; correct?
A. Yes.
Q. Do you understand the nature of that oath?
A. Yes, I do.
Q. It requires you to fully answer each question; is that correct?
A. It -- it requires me to answer each question fully and truthfully.
Q. If you're not sure of an answer or don't have a complete answer, then you must still answer the question to the extent that you can. Do you understand?
A. Yes.
Q. As you can see, a court reporter is taking down everything that we say. Because she can only record words, it's important that you answer any question verbally. For example, you must say "yes" or "no" rather than nodding or

shaking your head. Do you understand?

A. Yes, I do.

Q. Also, please talk at a reasonable pace like the pace I'm speaking now so the reporter can record everything; is that fair?

A. Yes.

Q. We should also try not to interrupt one another during the deposition. Otherwise, the reporter will not be able to record us accurately. So please wait until I finish my question before you start to answer, and I will not interrupt you either. Do you understand?

A. Yes.

Q. Once the deposition is complete, you will be given an opportunity to read the transcript of your testimony and to make any corrections. You will then be asked to sign it. Do you understand?

A. Yes.

Q. Only you are testifying today. You must answer to the best of your ability. You may not ask other people for their help. Do you understand?

A. Yes.

Q. If you do not understand a question,

please let me know and I will try and clarify. If you do not ask for clarification, I will assume that you understood the question. Is that fair?

A. Yes.

Q. During the deposition, you may hear other attorneys say "objection." Unless your attorney instructs you not to answer the question, please answer the question after the objection has been made. Do you understand?

A. Yes.

Q. Is there any reason why you are unable to give your most truthful and accurate testimony today?

A. No.

Q. Is there any reason your memory might be impaired?

A. No.

Q. Have you taken or do you intend to take any medication that might affect your ability to testify accurately or honestly today?

A. No.

Q. So you know you may ask for breaks during the course of the deposition. Please just answer any question that I have asked before we

take a break. Do you understand?
A. Yes.
Q. Am I correct that you have been retained by the Plaintiffs' Leadership Group as an expert witness in the In Re: Camp Lejeune Water Litigation pending in the United States District Court for the Eastern District of North Carolina?
A. Yes.
Q. When were you hired?
A. I don't recall off the top of my head. I believe it was September 2025.
Q. Who hired you?
A. I think it was a concensus of the leadership group.
Q. That would be the Plaintiffs' Leadership Group?
A. Yes.
Q. Before being retained, had you heard about Camp Lejeune?
A. Only in passing.
Q. What did you know?
A. I hadn't -- I -- a headline here and there, but I've not read any of the articles.
Q. What was your understanding of Camp

Lejeune before you were hired in this case?

A. I really didn't have an understanding of it because I didn't read the articles.

Q. Had you seen any commercials on the television regarding Camp Lejeune?

A. No.

Q. At this time, I am going to be showing you what will be marked as Exhibit 1.

(Exhibit 1 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. If you could please examine this. You would agree that this is a copy of the deposition notice and subpoena in this case; is that correct?

A. Yes.

Q. Did you have any of the previously mentioned materials in your custody or control that are contained in the subpoena?

MS. WALLACE: Object to form.

THE WITNESS: What specifically are we talking about? This request for emails, letters, correspondence with these people?

BY MS. KONSTANTOPOULOS:

Q. Correct.
A. I have no communication with them.
Q. Did you provide responsive documents to this subpoena to plaintiffs' counsel?
A. Everything was provided to counsel.
Q. When did you provide that?
A. Exactly? Hmm. It was prior to the required date. Off the top of my head, I don't know. I want to say it was the end of January or February.
Q. Did you do anything to prepare for your deposition today?
A. Yes. I reviewed files.
Q. What files did you review?
A. I reviewed my reports. I reviewed the footnotes. I reviewed depositions. I reviewed some of the -- just in passing, some of the Excels that were provided.
Q. And did you speak to anyone in preparation for today's deposition?
A. Just counsel.
Q. How many times did you meet with the plaintiffs' attorneys to prepare for your deposition today?
A. Once.

Q. And how long was that meeting with the plaintiffs' attorneys, approximately?

A. Approximately eight, maybe nine hours.

Q. And who was present during those meetings -- during that one meeting?

A. Whitney.

Q. Was anyone else present?

A. We did have a brief videoconference with Leslie and Jenna.

Q. Okay. Earlier, you stated that you reviewed depositions in preparation for today's deposition; is that correct?

A. Yes.

Q. What deposition transcripts did you review?

A. Daniel Clarke. I -- can I just -- I think their names are in here. I don't remember all of their names. I'm sorry.

Q. If you need to refresh your recollection with any of those doc -- any of your documents, that's fine.

A. Thank you. Ms. Hartwell, I reviewed hers. Briefly Ms. Zikaryan's.

Q. Thank you. And I noticed that you

were looking at a document that's in front of you. What document are you refreshing your recollection with?

A. My report. I have my report. I have my rebuttal and my materials consider lists. Would you like copies?

Q. No, that's okay. Thank you.

Are any of the documents in front of you marked up in any way?

A. Yes. Yes. I had noticed during our meeting yesterday that some of the pages for -- for example, Daniel Clarke, where we had notated were incorrect. So we made some corrections, if you'd like copies.

Q. Yes. I would ask for copies during one of the breaks.

MS. WALLACE: Yeah.

MS. KONSTANTOPOULOS: Thank you.

BY MS. KONSTANTOPOULOS:

Q. Other than the documents that you mentioned, do you have any other documents here today?

A. I have, as I said, my rebuttal and my materials considered lists.

Q. So nothing else?

A. Nothing else.
Q. Okay. Other than the markings that you just mentioned earlier, are there any other markings on any of the documents you brought today?
A. No. Just, like I said, wherever we found that the page might not be correct. And it was mostly Daniel Clarke. There might be one -- Ms. Hunter. And I believe on the rebuttal report, we made a correction on a Bates number that was incorrectly stated on one of the Peterson documents.
Q. Have you ever testified at trial?
A. No.
Q. In arbitration?
A. No.
Q. Have you ever testified at mediation?
A. No.
Q. Prior to this case, had you ever prepared an expert report for litigation?
A. No.
Q. Prior to this case, have you served as an expert?
A. No.
Q. So this is the first case that you

started serving as an expert witness; is that correct?

A. Correct.

Q. Why did you start working as an expert witness?

A. A gentleman had approached me maybe a year or so ago. He has a group of people that he, I guess, manages as an expert witness. He felt that my qualifications were perfect for that. And he asked me if I was interested in, you know, him sending me any cases. And I said, certainly, I'd be glad to.

Q. What is name of the gentleman?

A. Craig -- I may say this wrong -- Moskowitz. He does -- he's a civil engineer who does a lot of engineering cases, but he said he's had people approach him and ask him for an expert in billing, coding, and documentation.

Q. How much have you billed to date in this case?

A. I would have to look at my invoices. I don't know. And I believe you have copies of them.

Q. Does your payment depend on the outcome of this case?

A. No.

Q. Did you have the opportunity to be an expert in other cases that you may or may not have turned down?

A. I have a couple of other cases that I am an expert in. One is a criminal case where I'm working with the defense. One is an accident case where I'm reviewing medical records. And I recently had someone reach out on a qui tam case.

Q. In the personal injury case that you just referred to, are you serving as an expert for the plaintiff or the defendant?

A. The defendant.

Q. But you have not prepared expert reports in those cases yet; is that correct?

A. No, I'm still reviewing records.

Q. At this time, I will be marking your invoices as Exhibit 2.

(Exhibit 2 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. If you could please review those.

Are these the invoices that you produced in response to the subpoena that you saw earlier?

A. These are the invoices I have submitted to counsel.

Q. Are there any other invoices that you have yet to submit to counsel that are not included?

A. I have not submitted one for February yet. I haven't even totaled all the hours yet, so...

Q. And what is your fee schedule for this case?

A. It's 200 an hour to review records. It's 275 an hour for deposition.

Q. I'm now going to show you what we will be marking as Exhibit 3, which is a copy of your engagement letter.

(Exhibit 3 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. First, you would agree that this is a copy of the engagement letter; correct? Your engagement letter?

A. Yes.

Q. And it is dated September 24, 2025?

A. Correct.

Q. And I'm going to point your attention

to the scope of work section. The scope of work section states, "You will act as a testifying expert to review records, including medical and billing records of plaintiffs, and to formulate and render opinions regarding charges that were incurred with respect to the plaintiff's Camp Lejeune-related illnesses."

Did I read that correctly?

A. Yes, you did.

Q. You were not engaged to provide any medical opinions in the scope of your work in this case; is that correct?

A. That is correct.

Q. I am now going to show you -- be marking as Exhibit 4 a copy of your expert report dated October 29th of 2025.

(Exhibit 4 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. You would agree that this is a copy your October 29, 2025, report; is that correct?

A. Yes, it appears to be.

Q. I'd like to turn your attention to Attachment 1 of Exhibit 4.

A. Yes.

Q. This attachment is your curriculum vitae, or CV; is that correct?

A. Yes.

Q. Is this a complete and accurate copy of CV or resume?

A. It needs to be updated. I start a new position on Monday, March 9, with Geisinger Health as director of compliance audits.

Q. Other than this update, looking at your resume now, is there anything else you would like to change or add?

A. No. I think it -- it encompasses everything. The only piece missing would be my AAPC fellow. But I don't put that on every document anyway.

Q. What does AAPC stand for?

A. American Academy of Professional Coders. I'm a fellow.

Q. What does that mean?

A. It's a fancy title for reaching a high level of coding and providing documentation to support that.

Q. How do you become a fellow?

A. You write a research paper.

Q. Is that research paper peer-reviewed?

A. No.

Q. Okay. What was the subject of that research paper?

A. It had to do with labs that are ordered by providers not fully understanding the lab that they've ordered or the results that they're obtaining and how they impact the patient care.

Q. Are there specific labs that you refer to in this paper?

A. I have not reviewed the paper in several years, so I would not know off the top of my head. But there were some labs that had historically been ordered by providers that they did not interpret the results as would be recommended, I guess is the best way to put it.

Q. What's --

A. They were ordering multiple labs for a patient, and it did not really address the patient's health care issues. And it was based on percentages and ratios that they were using.

Q. What sort of providers were ordering these labs that you referenced in this research paper?

A. It was a vast number of providers,

all specialties.

Q. Was this -- were these private insurance providers?

A. Again, I don't recall. It's been a while since I've looked at it. It was never published. It was just presented.

Q. Is it publicly available?

A. No.

Q. Do you recall when you wrote the paper -- the report -- I'm sorry -- when you wrote this -- this document?

A. It had to be September of 2018.

Q. And did you write it for the purpose of becoming a fellow?

A. Yes. Correct.

Q. Since that time, have you written any other reports?

A. No.

Q. Or publications?

A. No.

Q. You have a Bachelor of Science in health information management and healthcare administration from Charter Oak State College; is that correct?

A. Yes.

Q. Did you obtain your bachelor in science in 2018?
A. Yes. May of 2018.
Q. You also have a master of legal studies from Northeastern University School of Law; is that correct?
A. Yes.
Q. And you obtained your master's in legal studies in 2020; is that correct?
A. Yes.
Q. Have you obtained any other educational degree since graduating from high school?
A. No. I do maintain multiple certifications, which is quite a lot to maintain.
Q. But you do not have any other profession -- educational degrees; is that correct?
A. No educational degrees.
Q. Okay. Do you agree you're not a lawyer or attorney in any jurisdiction; correct?
A. Correct.
Q. You do not have a juris doctorate; correct?
A. Correct.

Q. You do not have an LLM degree; correct?
A. Correct.
Q. You are not offering legal opinions in this case; correct?
A. Correct.
Q. And you are not a doctor; correct?
A. Correct.
Q. You are not a nurse; correct?
A. Correct.
Q. And you are not licensed to provide medical care to patients; correct?
A. Correct.
Q. And you are not offering any medical opinions in this case; correct?
A. Correct.
Q. And you are not a clinician; is that correct?
A. That is correct.
Q. You would agree that a clinician is a doctor who provides direct hands-on -- hands-on care to patients, including diagnosing, treating, and monitoring illnesses; correct?
A. I would agree that it's medical doctors, advanced practice nurse, registered

nurses, and physician assistants are all kind of in that same category.

Q. And you agree with the statement that you are not a clinician and do not purport to make clinical determinations throughout the course of your analysis in this case; correct?

A. That is correct.

Q. You agree that you do not have medical expertise in the diagnosis or treatment of bladder cancer; correct?

A. That is correct.

Q. The same for kidney cancer?

A. Correct.

Q. The same for non-Hodgkin's lymphoma?

A. Correct.

Q. The same for leukemia?

A. Correct.

Q. And the same for Parkinson's disease?

A. Correct.

Q. And you don't hold yourself out as a medical expert; correct?

A. I do not.

Q. Moving back to your curriculum vitae, the first position you held on the CV was as an accounts examiner with the Medical Audit Division

of Department of Social Services Office of Quality Assurance for the state of Connecticut -- I mean, excuse me -- yes, Connecticut; is that correct?

A. Yes.

Q. And you worked there from 2007 to 2021; is that right?

A. Correct.

Q. As an accounts examiner -- I'm reading from your CV -- you identified potential fraud, waste, and abuse in the state medical assistance program using data analytics. You analyzed American Medical Association current procedural terminology, CPT and health care common procedures, coding systems, HCPCS, and the international classification of diseases tenth revision, ICD-10 coding.

You initiated investigations of medical providers for double billing, upcoding, false claims, unbundling, and Stark Law violations. You determined areas for recouping funds and guide the recovery of over payments from medical providers. You ascertained gaps in claims, edits, policies, and procedures.

You reviewed patient documentation

from compliance with federal and state regulations. And you communicated audit findings for -- to federal and state law enforcement agencies and to senior management. You also recommended actions. Is that correct?

A. Yes.

MS. WALLACE: Object to form.

You may answer.

THE WITNESS: Yes.

BY MS. KONSTANTOPOULOS:

Q. You indicated that you initiated investigations of medical providers for double billing, upcoding, false claims, and Stark Law violations in your role as an accounts examiner; is that correct?

A. Yes.

Q. What is double billing?

A. Double billing is where a provider may bill the same service two times. It could also be a situation where a provider and their advanced practice practitioner that works with them bills the same service. It's essentially the same person, the physician and the advanced practice.

I've also identified where we had a

dental provider who enrolled 13 times using different middle initials, first name, last name. He confused it several different ways, and that was another double billing situation related to orthodontia.

Q. Is that an example of a false claim that you just gave?

A. It's also an example of double billing because he billed the same orthodontia from two different provider IDs.

Q. And what is upcoding?

A. Upcoding is a situation where a provider uses a higher level code than what is substantiated in their documentation.

Q. And you indicated that you investigated false claims. Can you describe what kind of false claims you investigated in your role as an accounts examiner?

A. Certainly. It would be a provider who had submitted a claim and there was no documentation to support that.

Q. And you also mentioned that you investigated Stark violations. Can you indicate what Stark violations are?

A. I always get Stark and anti-kickback

confused. Stark is where they're referring a patient to an organization that they have a connection to. And we saw that in some cases with labs where it was the same lab director referring labs to another lab that he was overseeing, so yes.

Q. As an accounts examiner, did you work on a team with other accounts examiners?

A. No. We worked independently.

Q. You would agree this wasn't a managerial position; is that correct?

A. That is correct.

Q. And did you have a manager?

A. Yes.

Q. Okay. As a part of your role as an accounts examiner, did you ever consult with clinicians or other doctors in your position?

A. Yes.

Q. What sort of work would you consult with them on?

A. If there was a situation that I needed clarification on a document, on a medical record, or on a procedure that was performed.

Q. What sort of clarification would you have needed from the doctor in your position as

an accounts examiner?

A. We did not have doctors on staff -- well, we had a dentist. I would consult with the dentist on dental claims. We did not have a doctor on staff to ask clinical questions to. I would ask them to our -- our nurse team.

Q. And your nurse team, did they have medical degrees, to your knowledge?

A. Yes. They were registered nurses.

Q. What kinds of questions would you ask them, the nurse team?

A. I believe we covered that. Anything that -- procedural-related that I was -- I wanted clarification on.

Q. Would that be related to treatment?

A. That would be related to the procedure itself.

Q. Can you give an example?

A. Related to a procedure? If I had a question about an op note, as an example, I would ask them a question regarding the procedure. You know, I did not see any complications, is that your assessment as well.

Q. Now, I'm looking again at your CV, at the second to last bullet point under your role

as accounts examiner, it states, "Led the investigation and prosecution of CMAP providers by the Office of the Attorney General, Office of the Chief States Attorney, Medical Fraud Control Unit, and U.S. Department of Health and Human Services Office of the Inspector General, resulting in multiple fines and license revocations."

A. Uh-huh.

Q. Can you please explain how you led this investigation of prosecution?

A. Well, it -- this is -- we'll talk about one case that I can discuss because it's a public knowledge. It came in as a complaint. I analyzed the data identifying multiple situations where pediatric patients were having multiple surface restorations on their molars, sometimes on baby teeth, sometimes on permanent teeth.

In identifying this through data, I then went out and collected the records, met with the OAG, met with MFCU. That case was prosecuted. I worked through that case from beginning to end. The MFCU investigator brought 18 of my patients to UConn Dental to validate that the patients who were -- their

parents were told were getting an upgraded sealant were, in fact, having their teeth damaged by this dentist.

He's permanently excluded from the Medicaid program, and he was fined -- I want to say it was $50,000, which in my opinion was not enough.

Q. Did you ever testify in any proceeding regarding this investigation?

A. No, because MFCU -- what happens is we develop the case. We work with MFCU or with the OAG. In some cases, both. In some cases, HHS OIG gets involved. And they take it from there. We're still consulting and giving them information needed to understand some of the data, some of the documentation, but they essentially take the case over, and they prosecute it based on what we found.

Q. In your role as an accounts examiner, were there any certifications or trainings that were required of you?

A. Yes. There was the CPIP, which is a certified -- certified and program integrity, which was held at the National Advocacy Center in Columbia, South Carolina, the Medicaid Integrity

Institute.

Q. Were there any other certifications that were required of you to complete as an accounts -- accounts examiner?

A. Not required for me to complete, but were encouraged for me to obtain. So I took it upon myself to obtain my certification as a professional coder, professional medical auditor, and document expert.

Q. And did you do that while you were an accounts examiner?

A. Yes. I also obtained my certification as a fraud examiner, registered health information administrator, all during that time.

Q. Okay. According to your CV, from 2021 to 2025, you held the position of program manager for revenue compliance for Hartford HealthCare in Hartford, Connecticut; is that correct?

A. That is correct.

Q. And in reviewing your CV, you indicated in your role as program manager that you conducted chart-to-bill audits and risk assessment for providers and acute care

hospitals; is that correct?

A. Yes.

Q. What sort of chart-to-bill audits did you do as a program manager?

A. We looked at -- me specifically, I looked at professional billing and professional claims.

Q. Can you explain step by step how you would perform a chart-to-bill audit?

A. I would -- it was based on our work plan, unless, of course, it was an ad hoc issue that my director required me to look at.

I would run a query, download the data into Excel. I would use random sample within Excel to select a random sample of whatever claims were required, sometimes it was ten, sometimes it was 20. It depend upon what my director wanted me to look at. I would pull a random sample and then review the documents, and validate whether or not the diagnosis codes and the procedure codes were appropriate.

Q. What percentage of your work as a program manager included performing chart-to-bill audits?

A. Quite a lot of it. A lot of it had

to do with ad hoc issues that were identified by other providers that needed to be reviewed in a sensitive manner.

Q. What types of providers did you review?

A. All of them. Physicians, APRNs, PAs, all of them. It depended upon what the issue was.

I had a physician who was -- she was the medical director of a SNF and also performing E&M visits, evaluation and management visits, on the patients in the SNF, and I was asked to look at her documentation and validate it. So it was quite a lot of -- I -- I did at least one audit a month, if not more, depending upon what needed to be done. As well as managing primary care and specialty care physicians, reviewing whatever the leadership needed to me to look at.

Q. How did you manage physicians in your role as a program manager?

MS. WALLACE: Object to form.

You may answer.

THE WITNESS: Can you be more clear on what you mean by manage? I didn't manage the physicians. I worked with

their leadership on different cases, giving them insights into regulations that were coming, changes to CPT codes, changes to their workflow. I also taught many providers.

BY MS. KONSTANTOPOULOS:

Q. What did you teach those providers?

A. Documentation mainly.

Q. What sort of documentation?

A. How to document in a patient record to make sure that it's clear and concise and meets the standard of what CPT code they were billing.

Q. You would agree that Hartford HealthCare accepts various government insurance plans and provides specialized services for veterans; correct?

MS. WALLACE: Object to form.

You may answer.

THE WITNESS: I don't know.

BY MS. KONSTANTOPOULOS:

Q. You would agree that Hartford HealthCare accepts Medicare; correct?

A. Yes, they accept Medicare. They accept Medicare, managed Medicare, Medicaid, and

many commercial insurance companies.

Q. You would agree that Hartford HealthCare also accepts TriCare; correct?

A. I have not reviewed any TriCare claims. I would think that it -- they were minimal.

Q. Did you ever review any Medicare claims when you were at Hartford -- Hartford HealthCare?

A. Yes, I reviewed Medicare claims.

Q. In what context did you review medical claims in your role as a program manager at Hartford HealthCare?

A. I'm sorry. What's your question?

Q. What was the purpose of reviewing Medicare claims in your role as a program manager at Hartford HealthCare?

A. It was to validate that the providers' documentation met the expectation of the code billed and the expectation of the diagnosis.

Q. Did you perform chart-to-bill audits for Medicare records?

A. All records.

Q. Did you perform chart-to-bill audits

for review of TriCare records in your role at Hartford HealthCare?

A. As I said, I don't recall seeing any TriCare. If we had any TriCare claims, they were very, very minimal and probably not enough population to be selected in an audit. We stuck mainly with Medicare and Medicaid. Those were our biggest payers of claims.

Q. According to your resume, from 2025 to present, you have been a revenue integrity manager at Connecticut Children's Medical Center; is that correct?

A. Yes.

Q. When -- earlier you indicated that you were going to start a new position soon; is that correct?

A. Uh-huh, yes.

Q. Are you still currently working at Connecticut Children's Medical Center?

A. No. My employment ended on the 27th.

Q. Can you describe your role as a revenue integrity manager at Connecticut Children's Medical Center?

A. Certainly. Our -- my job was to identify any revenue leakage or try to identify

any areas where we could bill for a service based on the documentation we had.

Q. Did you conduct -- conduct chart-to-bill audits as a revenue integrity manager?

A. I had to review many different medical records in identifying whether or not something was correct. They weren't necessarily chart-to-bill audits. They were -- we identified an issue, and I would look at the claims and at the documentation to validate. It wasn't a standard audit where I would create a report.

Q. You would agree that Children's Medical Center in Hartford, Connecticut, accepts Medicare; correct?

A. I want to say our Medicare population at Children's was less than 10 percent, so it was very minimal. The largest part of our claims were Blue Cross and Medicaid.

Q. And Children's Medical Center in Hartford, Connecticut, accepts TriCare; is that correct?

A. I'm not aware. I saw absolutely no TriCare claims while I was there.

Q. In your role -- your upcoming role as

director of compliance audits at Geisinger, what will that role have you be doing?

A. We will be looking across the system. I will be developing a work plan for both facility and professional to address any potential concerns identified by HHS OIG or Medicare or Penn Medicaid.

Q. And Geisinger accepts Medicare, to your understanding; is that correct?

A. I believe so. I'm not sure. I haven't started, so I can't really speak to what claims they -- they have. I know they have their own insurance company as well.

MS. WALLACE: Object to form. I didn't quite have time to get that in.

THE WITNESS: Oh, I'm sorry.

MS. WALLACE: No problem.

BY MS. KONSTANTOPOULOS:

Q. And do you know if Geisinger accepts TriCare?

A. I'm not aware.

Q. And according to your CV, you have a number of certifications listed; correct?

A. Yes. Correct.

Q. And can you please let me know which

of these certifications is a -- has a continuing education requirement?

A. All of them except for the CPIP. Every last one of them. AAPC, I'm required to have 45 CEUs every other year. CHC is 20 every year, 10 live, 10 not live. CFE is 20 every year. And RHIA has gone up. I believe it's 30. I -- I have to double-check that, but I believe it's 30 every other year.

Q. And you indicated that the Certified Program Integrity Professional -- Professional certification does not have a continuing education requirement; is that correct?

A. That is correct.

Q. When did you obtain that?

A. Oh, gosh. I don't recall. I don't recall. It was a number of years ago.

Q. Prior to 2015?

A. I don't recall, honestly. It had -- we were one of the first classes to obtain a CPIP from the Medicaid Integrity Institute. I don't recall what year that was. It was a new certification that they had developed.

Q. You agree that you did not list any publication authored by you in the previous ten

years in your CV; is that correct?

A. I have not published anything in the past ten years or prior to that.

Q. I am going to point your attention back to your actual report, your October 29th report. And the report that you have in front of you, is that the report that you brought with the notes annotated or the exhibit?

A. This is the one you just gave me. Hold on. No. This is the one you gave me.

Q. I would ask that when I'm asking you any questions about the report, that you would refer to the exhibit.

A. I'm sorry.

Q. That's okay. When did you draft this report?

A. I think we completed it on the 29th.

Q. Okay. Do you agree with all the opinions and statements made in your first report?

A. Yes.

Q. Okay. Is there anything in this report that you believe is incorrect?

A. No.

Q. You indicated earlier that there were

some citations that might be different. Was that in your October 29, 2025, report?

A. Yes.

Q. Can you please indicate what you believe may be incorrect that you've identified?

A. Well, it's -- certainly. I think the first one is on page...

MS. WALLACE: Do you want a copy of this before she goes through it?

MS. KONSTANTOPOULOS: Sure. Can we take a brief break?

MS. WALLACE: Yeah. And I'll get a copy.

THE VIDEOGRAPHER: Going off the record. The time is 9:56 a.m.

(Recess taken from 9:56 a.m. until 10:07 a.m.)

THE VIDEOGRAPHER: Going back on the record. The time is 10:07 a.m.

MS. KONSTANTOPOULOS: Thank you.

BY MS. KONSTANTOPOULOS:

Q. During the break, counsel for plaintiffs provided us with a copy of your expert opinion report dated October 29, 2025, that you had markings on; is that correct?

A. That is correct.

Q. We can mark that as Exhibit 5.

(Exhibit 5 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. Please go through Exhibit 5 to tell us what markings are on the report and why you made them.

A. Certainly. I believe the markings begin on page 13. We updated the footnote at 11 to say Supra Footnote 9.

Q. Why did you do that?

A. Because it appeared that we -- that I did not put the appropriate citation there. It's all part of the same document above.

Q. So in Footnote 11, the citation that is currently there, is that incorrect?

A. I would have to look at that and review it.

Q. Currently, the footnote for Footnote 11, you indicated in your notes "See Supra Footnote 9." Should it be the same citation as Footnote 9?

A. Correct. Yes, that is correct.

Q. Can you please explain your next marking on this report?

A. Certainly. The next markings are on page 15. I paraphrased some of the phrases in here, and these additional pages provide more clarification.

Q. So you included a set of numbers next to the citation for Clarke deposition; is that correct?

A. That is correct.

Q. And you added additional page numbers to provide context for the paraphrasing that you add -- you had in your report; is that correct?

A. That is correct.

Q. At the bottom of the second full paragraph, you have a quote that says, "cost assignments, page 44"; correct?

A. Yes, that is correct.

Q. What does that mean?

A. That's where you can find cost assignments.

Q. What does cost assignments mean there?

A. It's what the deponent answered in his deposition.

Q. And in the next paragraph, the third -- the third full paragraph, you also have

some additional page numbers?

A. Correct. To add context to the paraphrasing.

Q. Are these page number -- what are these page number referencing? For example, in the first sentence, there's a reference to page 141. Page 141 of what document?

A. Correct. That's where Mr. Clarke acknowledged that veterans are not billed for care within the VA system.

Q. So that's for -- that's page 141 of his deposition?

A. Correct.

Q. And on the left of that paragraph, I see 188 --

A. Well, it's -- I believe it's 88 and 96. That's a quote around CPT. That's where he's identifying CPT codes where he talks about them.

Q. And that was not in your original citations; is that correct?

A. That is correct.

Q. And you also include at the bottom of the third full paragraph, page 96 -- in a marking, page 96, "not a flat cost related to the

CPT code, page 152 to 153"; is that correct?

A. That is correct. And, again, that's to add context to the -- the paraphrasing.

Q. Can you please identify the next markings that you made in this report?

A. Certainly. It's on page 17. At the top of the page, it identifies Ms. Hartwell's depo. And it said pages 3 and 37 when it should have said 120 to 121, to add context to the paragraph.

Q. So in this marking, you crossed off pages 3 and 37 and added pages 120 to 121; is that correct?

A. That is correct.

Q. So the original citations that you had in your expert report of October 29, 2025, were incorrect here; is that correct?

A. I believe that 120 to 121 gives a better, clear understanding.

Q. If that's the case, why cross off pages 3 and pages 37?

A. Well, again, because I felt 120 and 121 give a much clearer indication of what she was trying to express.

Q. And in the first full paragraph of

page 17 of Exhibit 5, you also included a notation that says "page 30"?

A. Yes. And that's where she states she's an end user of the data and not the individual who is responsible for the data.

And I believe that's it for this -- oh, sorry. I apologize. On page 19, and this is Ms. Hunter's deposition. Paragraph 4 on the right-hand side, it says "page 88." And it just gives some context to history of codes and what she's talking about at that page number.

Q. So --

A. I want to be sure that it's clear.

Q. Thank you. So for the last paragraph on page 19, you reference the Hunter deposition. Your marking of page 88, you would -- that is for her deposition that you want to add to this report?

A. Yeah, well, to add context to this report.

And I believe that's it.

(Exhibit 6 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. I'm now going to mark as Exhibit 6 a

copy of rebuttal expert opinion report with your markings that you identified prior to the break.

A. Yes. And in this report, it's on page 21, it -- it dropped a number for some reason. It should be citing Bates Number 1 -- 01576_Peterson_000003905, and not 390.

BY MS. KONSTANTOPOULOS:

Q. So the citation 01576_Peterson_000000390 was incorrect in your original --

A. Well, it dropped a number. Somehow the number was removed. So it should say 3905.

Q. All right. Are there any other markings?

A. Not in this report.

Q. I am now marking -- I'm going to mark as Exhibit 7 a copy of your materials considered list dated December 2nd, 2025.

(Exhibit 7 marked for identification.)

MS. WALLACE: Thank you. Did you say December 2nd?

THE WITNESS: Yeah. That's...

BY MS. KONSTANTOPOULOS:

Q. So this document, Exhibit 7, is

entitled "First Amended Materials Considered List for October 29, 2025, expert report of Marjorie Hackett-Wallace, RHIA, CHC, CFE, CPMA, CPC, CDEO, CPIP; is that correct?

A. Yes.

Q. And do you recall producing this document on or around --

A. Yes, I do.

Q. -- December 2nd, 2025?

A. Yes, I do.

Q. Okay. Is there anything else other than in this materials considered list, Exhibit 7, that you considered in rendering your report for October 29, 2025, that is not included in this list?

A. No.

Q. I am now going to mark as Exhibit 8 a copy of your supplemental materials considered list for October 29, 2025, report.

MS. KONSTANTOPOULOS: Exhibit 8.

(Exhibit 8 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. Does this materials considered list include all documents, articles, or other

materials you reviewed in preparing your first report along with Exhibit 7?

A. Correct.

Q. Were there any other materials considered list that you were provided along with your expert report of October 29th of 2025?

A. No.

Q. These were the only two?

A. Correct.

Q. Okay. I'm now going to show you what will be marked as Exhibit 9.

(Exhibit 9 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. You would agree that this is a copy of the expert report of Dr. Wang Ji in this case; is that correct?

A. Yes.

Q. And in response to your expert report of October 29, 2025, Dr. Ji submitted this report in the Camp Lejeune litigation; is that correct?

A. I believe so, yes.

Q. And this report was related to the bladder cancer Track 1 plaintiffs, kidney cancer Track 1 plaintiffs, leukemia plaintiffs, and

non-Hodgkin's lymphoma plaintiffs in the Camp Lejeune litigation; is that correct?

A. Yes.

Q. I'm now marking as Exhibit 10 a copy of the expert report prepared by Dr. Syed Hasan.

(Exhibit 10 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. And you've reviewed this document before; is that correct?

A. Yes.

Q. And in response to your expert report, Dr. Hasan submitted this report with regard to the Parkinson's Track 1 plaintiffs in this case; correct?

A. Yes.

Q. I will now be marking as Exhibit 10 -- 11 a copy of a table with lists of conditions for the plaintiffs.

(Exhibit 11 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. Would you agree that this is a table that was a part of your October 29, 2025, report that you relied on?

A. Yes.
Q. Did you create this table?
A. It was provided to me.
Q. And it was provided to you in the form that it is currently in front of you?
A. Yes.
Q. Can you please explain what the table includes generally?
MS. WALLACE: Object to form.
BY MS. KONSTANTOPOULOS:
Q. You can answer.
A. It provides the Track 1 and the related diagnoses.
Q. You would agree that there are three columns in this table; correct?
A. Yes.
Q. And the first column says "Name of Plaintiff"; correct?
A. Yes.
Q. The second column next to that says "Track 1 Injury"; correct?
A. Yes.
Q. And the third column next to that says "Also assume to be related to Track 1"; correct?

A. Yes.
Q. And the Track 1 injury is listed as either kidney cancer, bladder cancer, NHL, Parkinson's, leukemia, NHL, or some combination of the two; is that correct?
A. Yes.
Q. And then there are specific conditions for each plaintiff in this case that are listed in more detail next to that; correct?
A. Yes.
Q. And you were to assume that these were the conditions related to the Track 1 injury for each plaintiff; correct?
A. Yes.
Q. And did you not independent -- independently verify these -- that these conditions were caused by the Track 1 injury for each plaintiff; is that correct?
A. This list was provided by counsel.
Q. And just -- I don't believe you answered the last question, but you would agree that you didn't independently verify that these conditions were related to the Track 1 injuries; correct?
A. Could you rephrase that?

Q. Sure. Did you assume that the conditions in this table were true?

MS. WALLACE: Object to form.

THE WITNESS: These were provided to me by counsel. You would have to not -- I -- what I am interpreting from your question is that I'm an expert to determine whether or not these are associated with the Track 1 illness, and that's not within my wheelhouse.

BY MS. KONSTANTOPOULOS:

Q. So you didn't independently verify these with any specific causation expert reports to determine whether they were accurate; is that correct?

A. That is correct.

Q. I'm now going to show you what I will be marking as Exhibit 12.

(Exhibit 12 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. I'm showing you another table of conditions. Would you agree that this table of conditions is associated with your rebuttal expert report?

MS. WALLACE: Object to form.
You may answer.
THE WITNESS: Yes, I would agree.
BY MS. KONSTANTOPOULOS:
Q. And you would agree that there were some changes to this chart; correct?
A. I see one addition.
Q. Did you yourself make that addition?
A. I did not add that.
Q. What is the addition?
A. Diabetic neuropathy.
Q. Which plaintiff is that for?
A. That is Mr. Keller for NHL.
Q. I'm now going to show you what we'll be marking as Exhibit 13, your rebuttal expert opinion report dated January 20th of 2026.
(Exhibit 13 marked for identification.)
BY MS. KONSTANTOPOULOS:
Q. You would agree that was the report that you drafted for this case; correct? Submitted January 20th of 2026?
A. Yes.
Q. I'm now showing you what will be marked at Exhibit 14, material considered list

for the January 20, 2026, rebuttal expert report.

MS. WALLACE: Did you say 14?

MS. KONSTANTOPOULOS: Yes.

(Exhibit 14 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. Does this materials considered list include all of the documents that you rely upon for preparing your January 20, 2026, rebuttal expert opinion report?

A. Yes.

Q. Is there anything else that you considered for that rebuttal expert opinion report that is not included in this materials considered list identified as Exhibit 14?

A. No.

Q. Okay. Now going to be showing you what will be marked as Exhibit 15, which is a copy of your rebut -- rebuttal expert opinion report, dated January 27, 2026.

(Exhibit 15 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. Is this, in fact, a copy of your corrected rebuttal expert opinion report --

A. Yes.
Q. -- of January 27, 2026?
A. Yes.
Q. And on March 3rd, there was an additional materials considered list that was provided by counsel. Are you aware of this?
A. Yes.
Q. What was included on that materials considered list?
A. Do you have it? I -- I don't have it memorized. I'm sorry.
MS. KONSTANTOPOULOS: And for the record, we reserve the right to keep the deposition open in light of the late disclosure.
BY MS. KONSTANTOPOULOS:
Q. Isn't it true that the additional documents that you reviewed for the materials considered list that was provided March 3rd, 2026, included Greg Russo's expert reports and appendices?
A. I believe so, yes.
Q. Do you recall anything else that was added to that materials considered list provided on March 3rd, 2026?

A. No. Can I see a copy of it?
Q. You were just provided to us -- it was provided to us just last evening.
MS. WALLACE: If you'd like for me to get copies for you guys to mark, I'd be happy to.
MS. KONSTANTOPOULOS: That would be great. Thank you. We can take a short break.
THE VIDEOGRAPHER: Going off the record. The time is 10:35 a.m.
(Recess taken from 10:35 a.m. until 10:39 a.m.)
THE VIDEOGRAPHER: Going back on the record. The time is 10:39 a.m.
MS. KONSTANTOPOULOS: Thank you.
(Exhibit 16 marked for identification.)
BY MS. KONSTANTOPOULOS:
Q. In front of you, plaintiffs' counsel provided us with a copy of the third supplemental materials considered list for October 29, 2025, expert report and January 20, 2026, expert rebuttal report of Marjorie Hackett-Wallace, RHIA, CHC, CFE, CPMA, CPC, CDEO, CPIP.
That was marked as Exhibit 16;

correct?

A. Yes.

Q. And this was the supplemental materials considered list provided on March 3rd of 2026; correct?

A. Correct.

Q. Okay. And you would agree that the materials considered that are listed in Exhibit 16 are reports from Gregory Russo regarding the plaintiffs along with appendices; is that correct?

A. Yes, that is correct.

Q. Other than what I just identified, is there anything else contained in these -- this materials considered list?

A. No.

Q. And when did you first review Gregory Russo's reports and appendices for these plaintiffs?

A. I believe I reviewed -- started looking at one of his reports after they were submitted, but it really -- his report is not within my expertise, and I did not go any further with it, but Whitney and I reviewed some of the documents yesterday.

Q. And did you review his reports after you submitted your January 27, 2026, corrected rebuttal opinion report?

MS. WALLACE: Object to form.

You may answer.

THE WITNESS: I reviewed them, really, yesterday because, as I said, my expertise is not in his area.

BY MS. KONSTANTOPOULOS:

Q. Okay. Now that we've entered all of those exhibits, I will point you back to your October 29, 2025, report, which is Exhibit 4.

What was the scope of your assignment for the plaintiffs?

A. The scope of my assignment was to review the billing and coding and validate the medical record.

Q. On page 3 of Exhibit 4 under the heading "Documents Relied Upon," you would agree that you indicated, "My analysis was based on a comprehensive review of the documentation provided to me for each plaintiff. I was provided medical and billing records for each plaintiff and a list of Track 1 conditions for each plaintiff and other conditions that I was

assumed are related to the Track 1 condition or its treatment."

Did I read that correctly?

MS. WALLACE: What page did you say?

MS. KONSTANTOPOULOS: I am on page 3 of Exhibit 4, under the heading "Documents Relied Upon."

THE WITNESS: Okay.

MS. WALLACE: I think you cited page 4. That's why we weren't able to follow along. You might want to reask it.

MS. KONSTANTOPOULOS: I apologize. Thank you.

BY MS. KONSTANTOPOULOS:

Q. You would agree that on page 3 of Exhibit 4, you indicated that "I was provided medical and billings records for each plaintiff and a list of the Track 1 conditions for each plaintiffs and other conditions that I was assumed -- I was to assume are related to the Track 1 condition or its treatment."

Did I read that correctly?

A. Yes.

Q. And the table of conditions, which was listed -- which was provided to you as

Exhibit 11, that was one of the documents that was provided to you by the plaintiffs' attorneys; correct?

A. Yes.

Q. And Exhibit 11, which was the additional table of conditions, that was also provided to you after this expert report was created; is that correct?

A. After? I'm sorry. Could you rephrase your question?

Q. Sure. So there was an original table of conditions that was provided to you so that you could prepare your October 29, 2025, report; correct?

A. And which exhibit are you identifying.

Q. Exhibit 11.

A. Okay. Yes. This is -- was available to me when I created the -- drafted the first report.

Q. Okay. Thank you.

And then there was a subsequent updated table of conditions just listed as exhibit -- which I provided to you as Exhibit 12.

A. Correct.

Q. That was provided to you for your rebuttal expert opinion report; is that correct?

A. Yes.

Q. On page 3 of your expert report, Exhibit 4, you also state later in that paragraph -- in the first full paragraph, "In making relatedness determinations, I then reviewed the available medical records and billing information to confirm that the billing records included charges related to the Track 1 condition or its treatment or to the other conditions and/or treatments identified."

Did I read that correctly?

A. Yes.

Q. What does "relatedness determinations" in this sentence mean?

A. It means conditions that were identified as being related to the initial diagnosis and any of its treatments.

Q. Keeping on page 3 of Exhibit 4, under the heading "Medical Expenses Based on Private Insurance," you stated in the first sentence, "With regard to payments issued by private medical insurance companies and out-of-pocket costs, my analysis was based on a comprehensive

review of all potentially related medical records, corresponding billing records, and lien information from private insurance carriers."

Did I read that correctly?

A. Yes.

Q. Okay. And then at the end of that paragraph, still on page 3, the last sentence you indicated, "Unfortunately, I did not have access to all billing and medical records for all plaintiffs, Track 1, and related conditions. Therefore, with respect to certain plaintiffs, my work conservatively quantifies private medical insurance charges, payments, and patient contributions -- contribution."

Did I read that correctly?

A. Yes.

Q. You agree that your analysis is limited by the information provided to you by the plaintiffs' attorneys; correct?

MS. WALLACE: Object to form.

You may answer.

THE WITNESS: Yes.

BY MS. KONSTANTOPOULOS:

Q. Staying on that same page under the section "Government Medical Expenses" in

Exhibit 4, you indicated in that first sentence, "With regard to payments or reimbursements by government agencies, my analysis was based on data files and payment extracts which I understand were produced to the Department of Justice by CMS, TriCare, the Veterans Health Administration, TriWest, and the Community Care Network."

Did I read that correctly?

A. Yes.

Q. You would agree that you had access to not only medical bills in this case but also medical records; is that correct?

A. No, that's not correct. I did not have bills for all of this, no. I had your data extracts. I did not have access to all of the medical records.

Q. But you were -- you did have medical records in your possession for each of the plaintiffs; is that correct?

A. With regard to?

Q. Did you have medical records in your possession that you reviewed to make determinations in this case?

A. With regard to what payer?

Q. My question is more general than that. Did you have medical records that was provided to you by plaintiffs counsel to make determinations in this case?

A. Yes. Yes.

Q. Did you attempt to evaluate the available med -- medical records you had and correspond them with various claims data produced by CMS?

MS. WALLACE: I would -- I would just say objection. You may need to show her what data you're referring to. She has a large number of appendices in this case.

BY MS. KONSTANTOPOULOS:

Q. Okay. Let me rephrase the question.

You agree that you did not review any medical records when reviewing CMS data; is that correct?

MS. WALLACE: Object. Objection to form. Foundation.

THE WITNESS: I don't know that I would agree or not agree to that. I reviewed medical records for the billings that I had. Could some of those billings have also had primary, secondary, and

tertiary payers that may be Medicare, Medicaid, TriCare, any one of those? Yes, that's a possibility. But the billings that I had were not the government billings. They were private. So, I mean, your question is a little ambiguous to me.

BY MS. KONSTANTOPOULOS:

Q. Okay. You did have data from CMS, VHA, CCN, TriWest, and TriCare -- not billings as you described, but you did have data; correct?

A. That is correct.

Q. And you did not attempt to correlate the medical records that you did have in your possession with this agency data; is that fair?

MS. WALLACE: Object to form. Foundation.

THE WITNESS: Again, your question is a bit ambiguous to me. The medical -- I reviewed a medical record. How that medical record was billed by the organization is not available to me, I would say.

BY MS. KONSTANTOPOULOS:

Q. Okay. Turning to page 5 of your report under "Background Principles of Medical

Billing and Coding," reading the first paragraph there, you state, "Understanding how medical billing and coding operate is essential to evaluating the reliability and accuracy of the medical expense data at issue in this case."

Did I read that correctly?

A. Yes.

Q. So you would agree that a proper coding, unbundling, or duplicative billing can occur in private medical billings; is that correct?

A. That's a very limited list. A lot of things can happen in medical billing and coding that are beyond that.

Q. Other than what I listed, can you please describe what other --

A. It depends --

Q. -- coding or billing errors there could be?

A. Certainly. It -- it depends upon who is dropping the bill, who is coding that service.

Q. What do you mean by that?

A. In some cases, in a facility, facility billing is billed by a coder, and it depends upon the coder's knowledge and experience

with the information they're coding. Professional claims can be billed by the provider. They can be billed by his office staff. They can inappropriately take a diagnosis code off of a problem list and use that in place of the diagnosis for which the patient came in. There are multiple -- as many possibilities in the universe are as many possibilities in billing coding and documentation.

Q. Moving to page 7 of Exhibit 4. The first full paragraph, you state, "Because billing codes are administrative tools created for reimbursement, not clinical documentation, they are not by themselves a reliable indicator of causation or relatedness in a legal setting."

Did I read that correctly?

A. Yes.

Q. You would agree that there is no citation provided here to support that statement in your report; correct?

A. That is correct.

Q. Can you please explain what you mean by causation in this sentence?

A. Again, providers, coders, using diagnosis codes may not select the correct code

indicating what the causation of the patient's visit is.

Q. Is the term "causation" a typical term used in medical coding?

A. Describe what you mean by typical.

Q. Is causation frequently used for describing medical coding in your field?

A. In certain diagnosis codes, causation is the code. It is the descriptor in the code, so...

Q. This is not a legal term that you were using but a medical coding term; is that correct?

A. Yes.

Q. And in that same sentence that I read, can you explain what you mean here by relatedness?

A. A code a person uses, whether it be a provider or a coder -- let me be specific. A diagnosis code may not be the appropriate code to use to tie together a primary, secondary, tertiary diagnosis indicating that it's related to the primary or secondary.

Q. So you're not using the term "relatedness" in the legal sense; correct?

A. Not in a legal sense, but it does come into play in a legal setting.

Q. What do you mean by that?

A. Well, for example, if you take diagnosis codes out of the billed sequence, you've now changed the relatedness of those diagnosis codes.

Q. How does this apply in the legal setting?

A. Again, if you take the diagnosis codes out of their billed sequence, you've now changed what that billing was from its original, and it changes the sequence of those diagnosis codes. Maybe removing "relatedness," maybe removing "causation," maybe taking it out of context for the patient visit, which is why we look at the medical record to validate that the diagnosis code on the claim is the diagnosis code that was present and used in the visit.

Q. So when you referenced legal setting earlier, are you saying that it could be -- this could be important for this litigation? Is that what you mean by that?

A. Yes.

Q. In the second full paragraph on

page 7, Exhibit 4, you indicate, "It is the rule of an expert to perform this analysis, to systematically evaluate each billed service, correlate it with the underlying medical records, and apply professional judgment to determine whether the billing is genuinely related to the compensable condition."

Did I read that correctly?

A. Yes.

Q. How are you able to determine whether the billing was genuinely related to the compensable condition?

A. Based on what the provider wrote in his note.

Q. Can you please explain your methodology for evaluating past medical payments in this case?

A. Reviewing the medical record as it relates to the billing record, identifying the chief complaint, history of present illness, the data points the provider used in his medical decision-making, which include the exam and any imaging studies or related labs, and what his assessment and plan is.

Q. And can you please explain your

methodology for evaluating TriCare payments?
A. Are you talking about the data?
Q. I'm --
A. Can -- can you be clear on your question, please?
Q. Absolutely. Did you review TriCare data in this case?
A. I did review TriCare data in this case.
Q. What was the methodology that you used in order to review TriCare data in this case?
MS. WALLACE: Object to form. Do you have the TriCare dataset to show her?
MS. KONSTANTOPOULOS: I'm just asking her what her methodology was.
THE WITNESS: I would really need to see the data in order to walk through it.
BY MS. KONSTANTOPOULOS:
Q. So is it fair to say that as we sit here today, you can't articulate what methodology you used?
A. I would not --
MS. WALLACE: Object to form and foundation.

THE WITNESS: I would not say that.
BY MS. KONSTANTOPOULOS:
Q. Would reviewing your expert report help refresh your recollection as to what your methodology was when you reviewed TriCare data?
A. I would prefer to review the -- the data itself.
Q. I'm going to move on to page 7, again, the last complete paragraph under Private Medical Payments. You indicated, "For this analysis, I relied on the medical billing Bates numbers and medical record Bates numbers compiled and provided by plaintiffs' counsel. These materials were organized by patient provider and date of service allowing for a side-by-side comparison of billed entries with the corresponding medical documentation. Using this compiled list, I reviewed each billing line to determine whether the service was supported by and consistent with the associated clinical record."
Did I read that correctly?
A. Yes.
Q. Starting at the bottom of the page, that last paragraph on page 7, still under the

"Methodology for Private Medical Payments," you state, "First, I identified the compensable diagnoses at issue and in consultation with the applicable ICD-9 and/or ICD -- and/or 10 and procedural code sets, determine the diagnostic and procedural codes that could reasonably represent the evaluation or treatment of those conditions."

Did I read that correctly?

A. Yes.

Q. In other words, you first determined whether the procedural and diagnostic codes in the medical billing records for a particular plaintiff could be associated with one of the listed conditions for the plaintiff; is that correct?

A. I reviewed the billing along with the medical record. I did not review the billing independently to identify whether or not a diagnosis was compensable or not. I reviewed this in conjunction with the medical record.

Q. But first did you have to determine what ICD-9 or ICD-10 codes were related to the list of conditions that were provided to you by plaintiffs' counsel?

A. There are 80,000 ICD-10 codes, all identifying specific conditions and causes and -- I reviewed the record along with the ICD-10 and the billing.

Q. Did you determine that any of the bills that were provided to you were not related to the list of conditions that were provided to you by plaintiffs' counsel?

A. Yes. And they're on the appendix. There should be -- I believe there's a listing by provider, and they're at the bottom beneath what was related. There's a listing of unrelated.

Q. How did you determine that diagnostic and procedural codes could reasonably represent evaluation and treatment for a specific condition?

MS. WALLACE: Object to form.

You may answer.

THE WITNESS: Oh, I'm sorry.

I reviewed the medical record.

BY MS. KONSTANTOPOULOS:

Q. When you reviewed the medical record, what were you looking for specifically to determine whether these diagnostic and procedural codes reasonably represent the valuation and

treatment for a specific condition?

A. I reviewed the chief complaint, the history of present illness, the data points identified by the provider, whether they are within his exam, within a clinical lab, within an imaging study, and his assessment and plan.

Q. And you did not consult with a clinician or a doctor to make these determinations in your October 29, 2025, report; is that correct?

A. No, I did not.

Q. Did you reference any document or literature to assist you in determining whether a diagnostic code was associated with a specific condition?

A. I consulted the ICD-9 and ICD-10.

Q. Was there anything else that you looked at to assist you?

A. I looked at the ICD-9 and ICD-10.

Q. So the answer is no?

A. No.

Q. Okay. After identifying related diagnostic and procedural codes, you then determined whether there were operative notes and facility charges to substantiate the related

codes and the billing records; is that correct?
MS. WALLACE: Object to form.
THE WITNESS: Yeah, could you rephrase that?
BY MS. KONSTANTOPOULOS:
Q. After you determined what the diagnostic and procedural codes were, you then reviewed medical records to ensure that there were records that correspond to those codes; correct?
A. I reviewed the billing in conjunction with the medical record and determined whether or not the provider documented the procedure and the diagnosis that matched the billing. Does that make sense?
MS. WALLACE: Yes. I had an objection to that question again for the record. Thank you.
BY MS. KONSTANTOPOULOS:
Q. What did you refer -- review first, the billing record or the medical record --
A. Again --
Q. -- for your methodology?
A. Again, I reviewed them in conjunction. I reviewed the billing and the

medical record in conjunction.

Q. I understand. But when reviewing them together, did you review the medical bills first and then look at the medical records, or did you review the medical records first and then look at the billing records?

A. I reviewed them in conjunction. I pulled them both up on my screen and went, this is the Bates number, this is the Bates number, and I pulled them both up and read them. Does that make sense?

Q. I'm just trying to understand. Is it possible to read two documents at the same time?

A. I think your question is ambiguous. The record -- I pull up both records and review both records, and I have my coding book in front of me. I am not sure if my eyes looked at this screen first or that screen first, but they're reviewed in conjunction.

Q. Okay. Thank you for the clarification.

On page 8 of your report, you indicated at the bottom of the first full paragraph that, "This comparison was performed to confirm that the service was actually performed

and the service was rendered for the purpose of evaluating, treating, or managing the compensable condition or a direct secondary consequence of that condition."

Did I read that correctly?

A. I'm sorry. What paragraph are you looking at?

Q. I'm looking at the last sentence of the first full paragraph above the bullet points on page 8.

A. Okay.

Q. And it indicates that, "This comparison was performed to confirm that the service was actually performed and the service was rendered for the purpose of evaluating, treating, or managing the compensable condition or a direct secondary consequence of that condition."

Did I read that correctly?

A. Again, you're on page 8?

Q. Yes. Of Exhibit 4.

A. Okay. And --

Q. The beginning of the paragraph starts with "next." It's the first full paragraph. And then the last sentence starts with "this

comparison."

A. Correct.

Q. Okay.

A. Service was performed, service rendered found -- yes.

Q. And you would agree that only those services for which the compensable condition was clearly identified as the reason for treatment or evaluation was classified as related by you in this report; is that correct?

A. Yes.

Q. Right underneath those bullet points on page 8, you indicated that, "When multiple diagnoses were present, I analyzed the medical documentation to determine whether the compensable condition was the primary clinical driver of the accounter or whether it represented a coincidental or historical diagnosis. Only those services for which the compensable condition was clearly identified as the reason for treatment or evaluation were classified as related."

Did I read that correctly?

A. Yes.

Q. And what do you mean here by the

primary clinical driver?

A. The reason for the patient's visit.

Q. And to ensure consistency and accuracy in your methodology, you agree that you conducted an internal quality control review of a representative subset of the correlated records; is that correct?

A. Yes.

Q. And you indicated that, "This confirmed that the coding documentation linkages were applied consistently across providers and service types"; is that correct?

A. Yes.

Q. What internal quality control review did you perform specifically?

A. Random sample of a few for each patient.

Q. And you agree that coding -- coding errors often occur in private -- private -- private pay insurance records as we discussed earlier; correct?

A. I would not agree with that. Coding errors happen across all payers.

Q. You would agree that coding errors occur in private pay insurance records; correct?

A. I would agree that billing errors occur across all payers.

Q. Going back to your internal quality control review, how many were included in the sample?

A. It was a random sample, five to ten, depending upon the size of the data.

Q. And how did you determine representativeness for this sample?

A. Meaning?

Q. How did you determine what sample you would use to conduct --

A. Random sample. So random sample generator within Excel.

Q. Why are only five claims -- approximately five claims representative for an internal control review?

A. Compliance standards are ten. This is a much smaller sample of claims.

Q. So you would agree that you did not perform an internal quality control review for all of the patients' medical records in this case; is that correct?

MS. WALLACE: Object to form and foundation.

THE WITNESS: I would not agree with that.

BY MS. KONSTANTOPOULOS:

Q. You agree that there are 22 plaintiffs in this case; correct?

A. I'm not sure I would agree with that. I think there are a couple that are not a part or may have settled, so...

Q. Okay. You indicated that you did a internal quality control review by reviewing a random sample of approximately five of the records; is that correct?

A. Yeah.

Q. Okay. And you would agree that there are more than five plaintiffs in this case that you reviewed; correct?

A. Right. We're talking five per plaintiff.

Q. Okay. Thank you for the clarification.

You indicated that compliance requires typically ten; correct?

A. Require -- compliance standards are typically ten, but you're talking about a sample size of several thousands claims and several

different providers. And it would be stratified based on how many claims per provider.

Q. Do you know how many claims and providers there are that you reviewed for this litigation?

A. No. Off the top of my head, I would not have that answer.

Q. And when you reviewed the plaintiffs' private pay insurance records, did you review their medical bills for coding errors?

A. No. I did not perform an -- a compliance audit of, you know, their E&M levels, no.

Q. Could you have?

A. I was not -- it's not within my scope. Could I have? Yes. I've been doing that for 19 years.

Q. But that's not what you did for your expert report of October 29th of 2025?

A. I was -- my scope was to validate the diagnosis codes and the documentation with the billing. It was not to validate did Dr. Smith bill level 5 versus a level 3.

Q. I'm going to point your attention to page 9 under the heading TriCare Payments. You

indicated that you were asked to examine TriCare billing data for plaintiffs Tukes, Hill, Cogiano, and Downs to identify potentially related billing associated with their Track 1 diagnoses and secondary conditions; is that correct?

A. Yes.

Q. And you completed that analysis for each of the four plaintiffs; correct?

A. Yes.

Q. You indicated at the bottom of that page that, "Unfortunately, not all medical records were able to be identified for each claim in line item in the TriCare data extractions"; is that correct?

A. That is correct.

Q. Did you attempt to correlate the data extraction with medical records for TriCare data?

A. In some instances if we had a medical record, but we did not have all the records.

Q. Going back to page 2 of your report, the beginning of the second paragraph starting with "I was retained."

A. Uh-huh.

Q. You indicate, "I was retained and assigned by Plaintiff Leadership Group to," and

under Number 1, "use my training, expertise, and experience to quantify past medical expenses claimed by all 22 of the remaining bellwether plaintiffs to include patient payments related to the Track 1 diagnoses and those injuries or conditions stemming from a Track 1 illness or its treatment."

Did I read that correctly?

A. Yes.

Q. What do you mean by the phrase "patient payments" in this sentence I just read?

A. Payments made by patients.

Q. Are patient payments the same as out-of-pocket payments made by plaintiffs?

A. I would think so, yes.

Q. You agree that patient payments and billed charges are not necessarily the same; correct?

MS. WALLACE: Object to form. Foundation.

You may answer if you can.

THE WITNESS: Charges are not my wheelhouse. What a provider charges is not within my scope or my expertise.

BY MS. KONSTANTOPOULOS:

Q. You would agree that patients don't always pay 100 percent of what they're billed; is that correct?

MS. WALLACE: Objection.

THE WITNESS: I don't have any data on that. I'm sorry.

BY MS. KONSTANTOPOULOS:

Q. So you're not aware of whether patients can negotiate their bills down?

A. I am not a part of that. That's not within my expertise.

Q. I'm going to point your attention to page 3 of your report. One moment. I apologize.

Again, I'm pointing you to page 3 of your report under Section A. I'm looking at the second full section -- second full sentence -- excuse me -- which is, "The combination of medical billing and insurance data allowed me to reconcile and quantify known billed and paid amounts related to the plaintiffs' care, as well as patient payments to the extent this data was available."

Did I read that correctly?

A. Yes. To the extent the data is available. We did not have access to all of

their payments.

Q. And that's what you state in the next sentence in your report, which states, "Unfortunately, I did not have access to all of the billing and medical records for all plaintiffs"; is that correct?

A. Yes.

Q. In that first sentence that I read, why did you use the phrase "billed and paid amounts" here?

A. Why did I use it?

Q. Correct.

A. Because providers submit charges and receive payments from multiple locations. Some patients have multiple insurance. Some patients pay out of pocket. Some patients prefer to pay self-pay. Where it's available, I reviewed it.

Q. And you would agree there's a difference between amounts billed and amounts paid; correct?

A. That's not something I look at.

Q. You would agree that you separated out billed and paid amounts related to each plaintiff's care; is that correct?

A. Where it was available, yes.

Q. Now I'm going to refer you to page 2, the last sentence of Number 2 under "Introduction and Assignment." You indicate, "The analysis addresses how these deviations from standardized protocols -- standardized protocols affect the reliability of billing data, particularly when used to determine medical relatedness or quantified damages in litigation."

Did I read that correctly?

A. Yes.

Q. You reviewed plaintiffs' medical billing records and added the billed charges for conditions that you determined were related to plaintiffs' compensable condition; correct?

MS. WALLACE: Objection.

THE WITNESS: I entered the amount that was present on the bill. It's not something I review or opine on.

BY MS. KONSTANTOPOULOS:

Q. And did you present those as patient payments?

MS. WALLACE: Objection.

THE WITNESS: That's a very vague question.

BY MS. KONSTANTOPOULOS:

Q. You agree that you didn't review payment receipts from plaintiffs to verify that they made payments on billed charges; is that correct?

A. I would not agree with that. In some cases, we had some handwritten notes or payments from patients, but not a complete list or from all patients.

Q. Are these handwritten notes that were drafted by patients in this case?

A. I don't know who drafted them. I'm not privy to the providence of the document.

Q. In what cases were there handwritten notes regarding patient payments?

MS. WALLACE: Objection.

THE WITNESS: Off the top of my head, I have no idea.

BY MS. KONSTANTOPOULOS:

Q. You agree you did not review credit card records from plaintiffs to verify that they made payments on billed charges; correct?

A. I reviewed whatever documentation that I had, I reviewed.

Q. Did you review credit card records from plaintiffs?

A. I don't recall.
Q. Did you review bank statements from plaintiffs to verify that they made payment on billed charges?
MS. WALLACE: Objection.
THE WITNESS: I don't believe so.
BY MS. KONSTANTOPOULOS:
Q. And you didn't interview plaintiffs to verify that they made payment on billed charges; is that correct?
A. That was not within my scope.
Q. So you would agree that you did not do anything to verify that plaintiffs actually made payment on the billed charges; correct?
MS. WALLACE: Objection. Form. Foundation.
THE WITNESS: I did not validate that they made the payment, no. That was not within my scope.
BY MS. KONSTANTOPOULOS:
Q. Thank you. I'm going to move on to page 10 of Exhibit 4. And in the second full paragraph, starting the third sentence down, starting with "based upon my training."
A. Uh-huh.

Q. You indicate, "Based upon my training, education, experience, and review, and subject to the qualifications articulated above, all billing entries included in my charts as related are in my professional opinion and to a reasonable degree of certainty as a result of and/or related to the applicable Track 1 diagnoses for that plaintiff; i.e., kidney cancer, bladder cancer, Parkinson's disease, non-Hodgkin's lymphoma, or leukemia, and those injuries or conditions stemming from that illness or its treatment."

Did I read that correctly?

A. Yes.

Q. What does reasonable degree of certainty mean here?

MS. WALLACE: Object to form. Foundation.

THE WITNESS: Could you clarify?

BY MS. KONSTANTOPOULOS:

Q. Yes. You indicated in your report that "all billing entries included in my charts as related are in my professional opinion and to a reasonable -- reasonable degree of certainty as a result and/or related to the applicable Track 1

diagnoses for that plaintiff."

What do you mean in your report when you state "reasonable degree of certainty"?

A. My reasonable degree of certainty in reviewing and validating the records and the billing.

Q. Does that mean you have confidence that your work is 50 percent accurate?

A. I would have confidence in my accuracy is much higher than that.

Q. What would you estimate the accuracy of your work to be in this expert report?

A. I don't -- I don't know. I did not validate my accuracy. I can say that your experts agreed with approximately 97 percent of my findings.

Q. How did you calculate 97 percent?

A. It was --

MS. WALLACE: Objection.

You can answer.

THE WITNESS: It was based on just side-by-side comparison.

BY MS. KONSTANTOPOULOS:

Q. Did you make that 97 percent calculation yourself?

MS. WALLACE: Objection.

THE WITNESS: No.

BY MS. KONSTANTOPOULOS:

Q. Who did?

A. Counsel.

Q. Did you check to determine whether that 97 percent accuracy was correct?

A. Yes.

Q. You did calculations to make that determination?

A. We reviewed the document together.

MS. WALLACE: I'm very close to objecting on the basis of attorney-client privilege to this line of questioning.

BY MS. KONSTANTOPOULOS:

Q. And I'm not asking you to indicate what you and your attorney have discussed. So just to clarify.

Did you perform the actual calculations yourself to make a determination that your work was 97 percent accurate as identified by the plaintiff -- the United States experts?

A. I reviewed the document --

Q. Okay.

A. -- and the findings.

Q. You reviewed the document, but you didn't perform the calculation; is that fair?

A. I reviewed the calculation. It made sense.

Q. Okay. But you didn't actually calculate the amount yourself; correct?

A. I reviewed the calculation. If the calculation is correct -- there's no question in my mind that it's correct.

Q. You agree that you're not offering an opinion on whether the water at Camp Lejeune may have led to any of the plaintiffs' development of any disease; correct?

A. I'm not a medical expert, no.

Q. Move forward to page 20 of your expert report under the heading Conclusion, you indicated, "In conclusion, I am able to testify to a reasonable degree of professional certainty only with respect to those billed services for which I was able to review and correlate medical documentation, demonstrating that the treatment was rendered for the compensable condition or a directly associated secondary effect."

Did I read that correctly?

A. Yes.
Q. The subset of data that you reviewed that you're referring to here, that was comprised primarily of private pay billing records; is that correct?
A. What is your question?
Q. Strike that. I'll ask a different question.
MS. KONSTANTOPOULOS: I think at this time, I'd like to take a brief break. Is ten minutes all right?
MS. WALLACE: Sure.
THE VIDEOGRAPHER: Going off the record. The time is 11:31 a.m.
(Recess taken from 11:31 a.m. until 11:47 a.m.)
THE VIDEOGRAPHER: Going back on the record. The time is 11:47 a.m.
MS. KONSTANTOPOULOS: Thank you.
BY MS. KONSTANTOPOULOS:
Q. Would you agree that to determine whether data is reliable, you must review that data?
MS. WALLACE: Objection.
THE WITNESS: I don't agree with that. You need to validate that the data

represents what you anticipate it to represent, and you can only do that if you're validating it against what the data was built on.

BY MS. KONSTANTOPOULOS:

Q. So you would agree that there would need to be some sort of review to validate data. Is that fair to say?

MS. WALLACE: Objection.

THE WITNESS: I don't agree. What your question sounds to me like -- and maybe you need to rephrase it -- is that if I review the data, I can validate whether or not it's correct. I can't. You need to validate it against the system with which the data is pulling from to validate that what you have is actually what is in the system.

BY MS. KONSTANTOPOULOS:

Q. You agree that you can't validate data without reviewing that data, though; correct?

A. I don't agree with your statement again. It's more than reviewing the dataset. You need to validate it against where you're

pulling the data from. The data is coming from a source. Claims is an example. And you have to validate that what you have pulled is actually what was in that system.

Q. So it includes more than just review. It includes what you just described; is that correct?

A. Correct.

Q. I'm going to point your attention to Exhibit 4, which is your October 29, 2025, report again. Specifically on page 14. Looking at the Section 8 -- Roman Numeral 8 entitled The Limitations of the Government Agency Review Processes in CLJA Litigation, VHA, CCN, TriWest, TriCare, CMS.

You agree in this section you lay out issues that you have with the reliability of VHA, CCN, TriWest, TriCare, and CMS data; correct?

A. Could you rephrase that? Your question sounds as if you're putting words in my mouth, and I'm having a problem with that. So could you just ask your questions more directly and not "would you agree."

Q. Did you not understand the question?

A. I -- your questions are phrased in

such a way that you're putting words in my mouth, and I'm having a difficult time answering them.

Q. So, Counsel -- if your attorney does not object to a question, you do have to answer the question. Do you understand?

A. Okay. Please rephrase.

Q. Did you not understand the question that I just asked you? Or are you choosing not to answer it because you don't like the way I asked it?

MS. WALLACE: Objection.

THE WITNESS: I --

MS. WALLACE: Can I -- she's asked you to rephrase. She didn't understand the question.

MS. KONSTANTOPOULOS: That's not exactly what she said. She said she didn't like the way that I phrased the question because it put words in her mouth.

THE WITNESS: Please rephrase. I did not understand your question.

BY MS. KONSTANTOPOULOS:

Q. In Section 8 of your report, did you lay out issues that you had with VHA, CCN,

TriWest, TriCare, and CMS data regarding their reliability?

A. Yes.

Q. What does reliability mean to you as a billing and coding expert?

A. That I can rely on the data representing what the system has in it. So in a billing system such as Epic, that the Epic data and the Epic data extraction would match, and I could rely on that data.

Q. On page 16 of your expert report at the very top, this is the last sentence under the section -- Section 8, Subsection A for VHA, you state, "Consequence -- consequently, any use of MCA-generated data to establish damages, offsets, or fair market value would be methodologically unsound and contrary to the system's stated purpose."

Did I read that correctly?

A. Yes, you did.

Q. You, therefore, declined to review any of the plaintiffs' specific VHA data and compare that to their medical records; is that correct?

MS. WALLACE: Objection to form and

foundation.

THE WITNESS: Can you say that -- can you ask that again, please?

BY MS. KONSTANTOPOULOS:

Q. Sure. In light of what I just read, you would agree that you did not review medical records and compare that to VHA data that you were provided?

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. Is that correct?

A. No, I did not.

Q. Are you saying that you reviewed medical records and tried to correlate that to VAH -- VHA data?

A. No, I did not.

Q. You would agree that the VA incurs cost for the care of patients; correct?

MS. WALLACE: Objection.

THE WITNESS: That's outside my expertise. I am not an expert on VA financials or how it's funded.

BY MS. KONSTANTOPOULOS:

Q. On page 14 -- going back to page 14 of your report, under Section 8 -- Roman

Numeral 8, Subsection VHA, second paragraph. I am looking at the second sentence of that second paragraph. You indicate, "Errored -- errors in clinical coding, workload reporting, or resource classification can propagate through the MCA's cost modeling process without detection or correction."

Did I read that correctly?

A. Yes.

Q. MCA stands for managerial cost accounting system; is that correct?

MS. WALLACE: Objection.

THE WITNESS: That's my understanding of the acronym.

BY MS. KONSTANTOPOULOS:

Q. You would agree that many hospitals use managerial cost accounting systems; isn't that true?

A. I would not agree with that.

Q. Do hospitals use managerial cost accounting systems?

MS. WALLACE: Objection. Foundation.

THE WITNESS: I don't agree with that. As far as what? Running their financials or submitting claims?

BY MS. KONSTANTOPOULOS:

Q. I'm asking generally. Do hospitals use managerial -- managerial cost accounting systems?

MS. WALLACE: Objection.

THE WITNESS: It's not within my scope. That's not something that I would be privy to.

BY MS. KONSTANTOPOULOS:

Q. So you -- so do you know one way or the other if hospitals use cost accounting managerial -- managerial cost accounting systems?

MS. WALLACE: Objection.

THE WITNESS: I would not know. I'm not a -- I don't work as an accountant in a hospital.

BY MS. KONSTANTOPOULOS:

Q. Okay. You would agree that coding errors, unbundling, and duplicative charges can occur with private pay insurance?

MS. WALLACE: Objection.

THE WITNESS: I would agree that it happens across all payer sources. It's not specific to just primary. I mean, I'm sorry, not specific to just commercial.

BY MS. KONSTANTOPOULOS:

Q. Isn't it true that the cost of medical services on average is less at a VHA facility than at a private hospital for the same services?

MS. WALLACE: Objection. Foundation.

THE WITNESS: It's not within my expertise.

BY MS. KONSTANTOPOULOS:

Q. You agree that you're never opined on the reliability of VHA payments in the past as an expert; is that correct?

MS. WALLACE: Objection.

THE WITNESS: No, I have not.

BY MS. KONSTANTOPOULOS:

Q. And you have not authored any peer-reviewed publications that express any opinion about VHA medical payments; is that correct?

A. No, I have not.

Q. You've never worked for the VHA or worked with -- directly with VHA records prior to the litigation that we're here about today; correct?

A. No, I have not.

Q. And you've never worked the VA; correct?
A. No, I have not.
Q. And you've never written articles about the VA; is that correct?
A. No, I have not.
Q. You're not aware of VHA medical payments being offset in any other type of litigation; is that correct?
MS. WALLACE: Objection.
THE WITNESS: I have no knowledge of that, no.
BY MS. KONSTANTOPOULOS:
Q. You did not look into any other context where VHA medical payments can be taken as an offset; is that correct?
A. I'm sorry. Could you rephrase that?
Q. Did you look into any other context outside of this litigation where VHA medical payments could or could not be taken as an offset?
MS. WALLACE: Objection.
THE WITNESS: Here's the issue I'm having with your question is I did review GAO reports and DOD reports and Inspector

General reports, all talking about that. So your question is a bit -- I'm -- to answer no would be incorrect. To answer yes would be incorrect.

BY MS. KONSTANTOPOULOS:

Q. Have you looked to see whether VHA offsets can be deducted in any other sort of case -- have you looked --

A. I have not looked --

Q. -- to see if that's possible?

MS. WALLACE: I'm sorry. Objection to form and foundation.

THE WITNESS: I've not any experience looking at that.

BY MS. KONSTANTOPOULOS:

Q. Okay. It's generally true that all U.S. government agencies have some sort of oversight; correct?

MS. WALLACE: Objection.

THE WITNESS: It's not something I am following or are privy to.

BY MS. KONSTANTOPOULOS:

Q. So you don't know what the purpose of oversight is; is that correct?

MS. WALLACE: Objection.

THE WITNESS: Could you rephrase your question, please?

BY MS. KONSTANTOPOULOS:

Q. Do you have expertise regarding the purpose of government oversight?

A. No.

Q. Moving on to page 17 of your report. Excuse me. Page 16 under CCN. You would agree that you indicated that "The CCN dataset cannot be considered a verifiable or reliable representation of VA medical expenditures or offsets"; is that correct?

A. I identified inconsistencies in the data and duplications between CCN and VA data.

Q. Thank you.

And to assist in this questioning, I'm going to direct your attention to page 17, the last paragraph before the section TriCare. It's the last sentence of the section for CCN, which states, "Consequently, the CCN dataset cannot be considered a verified or reliable representation of VA medical expenditures or offsets, and any analysis derived from it should be treated as informational only, not suitable for forensic or economic quantification."

Did I read that correctly?

A. Yes, you did.

Q. You do not have a degree in forensic accounting; correct?

A. No.

Q. You don't have any economics-related degree as well; correct?

A. Correct.

Q. And you've never opined on the reliability of CCN medical expenditures or offsets in the past as an expert; is that correct?

A. That is correct.

Q. You have never worked for CCN; is that correct?

A. No.

Q. You have never worked directly -- strike that.

And you've not cited in the section to any document or literature that states that CCN expenditures cannot be used as an offset; is that correct?

MS. WALLACE: Objection to form. Foundation.

THE WITNESS: Not in this section,

but I believe there were some reports that identify issues with the data.

BY MS. KONSTANTOPOULOS:

Q. My question was specific to offsets, though. You would agree that you haven't cited to any document or literature that state that TriCare is specifically unreliable as an offset?

MS. WALLACE: Objection.

THE WITNESS: I would say it would be questionable to use as an offset based on the inconsistencies in the data.

BY MS. KONSTANTOPOULOS:

Q. I'm not sure you're answering my question. Did you cite to any document that states that CCN data cannot be used as an offset?

A. No, I have not cited to any, but the duplications between CCN and other data would lead me to believe that there's inconsistencies.

Q. And to be clear, you did not verify whether there were inconsistencies with the plaintiffs' specific CCN data because you did not review underlying medical records associated with them?

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. Is that correct?
A. I would not agree with that. I compared it to the VA data and found duplicates between the two datasets.
Q. Are you saying that you reviewed medical records and compared it --
A. That's not what I --
Q. -- to VA data?
A. That's not what I said. I said I compared the two datasets.
Q. What two datasets did you compare?
A. VA and CCN.
Q. Did you review underlying medical records to verify that data?
A. No.
Q. Subsequent to your report dated October 29th of 2025, you agree that Dr. Ji and Dr. Hasan submitted expert reports; correct?
A. Yes.
Q. Those -- just for reference, Dr. Ji's report was Exhibit 9 and Dr. Hasan's report was Exhibit 10.
You agree that their reports included clinical review of CMS, VHA, CCN, TriCare, and TriWest data; isn't that correct?

MS. WALLACE: Object to form.
You may answer.
THE WITNESS: I'm not privy to what they reviewed. I have their expert reports, and I've reviewed that.
BY MS. KONSTANTOPOULOS:
Q. You would agree that their expert report include -- expert reports included information regarding what they reviewed; correct?
A. In some cases, and Dr. Ji did not identify who the providers were, so I hesitate to answer that question.
Q. I'm going to point your attention to your rebuttal expert report, which I believe is Exhibit 15.
At -- towards the bottom of the second full paragraph of Exhibit 4 of your rebuttal expert report starting with "because" --
MS. WALLACE: Of Exhibit 4? Did you say the word "Exhibit 4"?
MS. KONSTANTOPOULOS: Page 4, Exhibit 15.
BY MS. KONSTANTOPOULOS:
Q. Towards the middle of the second

paragraph starting with "because" -- "because many substantive."

I want to make sure everyone was there.

MS. WALLACE: Will you help both of us again?

MS. KONSTANTOPOULOS: Sure, of course. It would be Exhibit -- Exhibit 13. My apologies, Counsel.

BY MS. KONSTANTOPOULOS:

Q. First, we all agree that we're looking at the rebuttal exhibit report that you drafted on January 20th of 2026; is that correct? Okay.

Pointing your attention to page 4, in the middle of the second full paragraph, starting with "because many substantive," are we all there? Okay. Wonderful.

You stated in your report, "Because many substantive concerns continue to exist with respect to data relied upon by the defendant, I have not conducted a full validation, reconciliation, or relatedness review of alleged past payments or billing charges administered by CMS Medicare, the Veterans Health Administration,

VHA, or TriWest Community Care Network, CCN."

Did I read that correctly?

A. Yes.

Q. You do not offer an opinion in your rebuttal expert report on the methodology used by Dr. Ji or Dr. Hasan to determine whether offsets are clinically related to the plaintiffs' Track 1 conditions; is that correct?

MS. WALLACE: Objection to form.

You may answer if you can.

THE WITNESS: Yes.

BY MS. KONSTANTOPOULOS:

Q. You did not review clinical records to determine whether any of the offsets claims data was clinically related to the alleged Track 1 disease for plaintiffs; correct?

MS. WALLACE: Objection to form.

THE WITNESS: I'm sorry. Could you be more specific?

BY MS. KONSTANTOPOULOS:

Q. Did you not understand the question?

A. It was very broad.

Q. Did you review any clinical records to determine whether any of the offsets claims data that you reviewed was related to a

plaintiffs' Track 1 disease?

A. Which offsets are we talking about?

Q. Did you review any clinical records --

MS. WALLACE: Object to form.

BY MS. KONSTANTOPOULOS:

Q. -- related to offset data?

Let me rephrase that. Did you compare clinical records for any of the plaintiffs to the agency data?

A. That -- again, because some patients have multiple insurance companies, they may have Medicare primary or Medicare secondary, I may have reviewed those records, so that's why I'm having a problem answering your question.

MS. WALLACE: Yeah, and object to form. You may want to do it by agency because it's really broad. TriCare, for example, she's already testified she reviewed records for. And it's confusing which ones are being claimed as offset, so I think you might need to be a little more specific.

BY MS. KONSTANTOPOULOS:

Q. Okay. You agree that you haven't

conducted a full validation, reconciliation, or relatedness review of CMS Medicare, VHA, TriWest, CCN records as stated in page 4 of your report; is that correct?

A. It says, "I have not conducted a full validation, reconciliation, or relatedness review." Yes, not a full, no.

Q. And did you review all of the records that Dr. Ji and Dr. Hasan reviewed in their expert reports?

A. I don't know that I reviewed all of the records that they reviewed. I reviewed where we conflicted.

Q. On the bottom of page 4 of your rebuttal expert report, starting at the first bottom paragraph, it states, "If the defendant's data and methodology are nonetheless found to be reliable and/or otherwise accepted by the court as sufficient proof of an applicable offset for care provided through or expenses administered by CMS Medicare, VHA, and/or CCN, then I incorporate the amounts defendant is allowed as an offset into my report as a corresponding damage."

Did I read that correctly?

A. Yes.

Q. You would agree that this is a legal opinion; correct?

MS. WALLACE: Objection. Form.

THE WITNESS: I would not agree with that.

BY MS. KONSTANTOPOULOS:

Q. Did you provide this opinion as a billing and coding expert?

MS. WALLACE: Objection to form.

BY MS. KONSTANTOPOULOS:

Q. Or is this based on a fundamental fairness argument that you're making?

MS. WALLACE: Objection.

THE WITNESS: I don't have a way to validate thoroughly any of the data you provided. And this is just my statement saying that if the court accepts it, then I accept it. Does that make sense?

BY MS. KONSTANTOPOULOS:

Q. You're saying that if the court accepts an offset amount, then you incorporate those amounts that defendant is allowed as an offset into your report as a corresponding damage. What do you mean by corresponding damage?

MS. WALLACE: Object to form.
You may answer.
THE WITNESS: If your expert is saying that these are related to their Track 1 or their related diagnoses, then I am ex -- accepting it as also a damage. Does that make sense?
BY MS. KONSTANTOPOULOS:
Q. You agree that in your expert report, you don't cite to any documentation or publications to support this position; isn't that correct?
MS. WALLACE: Objection.
THE WITNESS: I would agree, yes.
BY MS. KONSTANTOPOULOS:
Q. But you're currently willing -- unwilling to accept these as offsets -- offset amounts; is that correct?
MS. WALLACE: Objection.
THE WITNESS: It's -- I don't believe it's my place to accept them or not accept them.
BY MS. KONSTANTOPOULOS:
Q. But you indicated if the court accepts them, you're willing to forget the issues

you have with them. Is that fair to say?
MS. WALLACE: Objection.
THE WITNESS: I'm not in agreement with that. What I'm saying is if the court accepts your data, then I accept your data.
BY MS. KONSTANTOPOULOS:
Q. On the top of page 5, you indicate starting with "I do so in acknowledgment that any award, payment, or benefit provided to a plaintiff for medical care through a program administered by or through CMS/Medicare, VHA, or CCN TriWest which is sufficiently validated for purposes of being allowed as an offset necessarily constitutes proof of an expense that was incurred by that plaintiff for the medical care that was provided."
Did I read that correctly?
A. Yes.
Q. Do you agree that this is a new opinion that was not previously provided in your October 29, 2025, report; correct?
MS. WALLACE: Objection.
THE WITNESS: I agree.
BY MS. KONSTANTOPOULOS:

Q. And you did not cite to any documentation or literature to support this position in your report; isn't that correct?

MS. WALLACE: Objection.

THE WITNESS: No. But to the extent that the patients were treated and the services were paid by Medicare, VHA, CCN, or TriWest, those should be accepted as an offset as well.

BY MS. KONSTANTOPOULOS:

Q. This is not an opinion that is based on your own independent evaluation of the billing records; isn't that true?

MS. WALLACE: Objection.

THE WITNESS: We did not have complete sets of data -- of billing records. I was not provided those, so...

BY MS. KONSTANTOPOULOS:

Q. You agree, then, that you did not independently verify whether government offset amounts equalled the amount that the patient has actually paid for those services; correct?

MS. WALLACE: Objection.

THE WITNESS: It's not information that I had.

BY MS. KONSTANTOPOULOS:

Q. So you weren't able to independently verify it; is that correct?

A. That is correct.

Q. You would agree that you've never asserted this opinion before this rebuttal expert opinion report of January 20th, 2026; is that correct?

MS. WALLACE: Object to form.

BY MS. KONSTANTOPOULOS:

Q. Sorry. I didn't hear your answer. You said yes?

A. Yes, I would agree.

Q. And you would agree that determinations regarding what constitutes proof in a case is a legal determination; correct?

A. Yes.

Q. Have you read the language of the Camp Lejeune Justice Act?

A. Yes.

Q. Was this opinion based on your interpretation of the Camp Lejeune Justice Act?

MS. WALLACE: Objection.

THE WITNESS: No.

BY MS. KONSTANTOPOULOS:

Q. What was this opinion based on?

MS. WALLACE: Objection. Which opinion? I'm sorry. I lost track of what opinion the question is in reference to. I apologize.

BY MS. KONSTANTOPOULOS:

Q. Well, you had stated that -- go back to page 4. "If the defendant's stated methodology are nonetheless found to be reliable and/or otherwise accepted by the court as sufficient proof of an applicable offset for care provided through or expenses administered by CMS, Medicare, VHA, and/or CCN, then I incorporate the amounts defendant is allowed as an offset into my report as a corresponding damage."

What was the basis of that opinion?

A. As I explained, it's based on the court accepting your data for these different agencies, then I would accept that data.

Q. And then later you indicate at the top of page 5 again, "I do so in acknowledgment that any award, payment, or benefit provided to a plaintiff for medical care through a program administered by or through CMS, Medicare, VHA, or CCN, TriWest, which is sufficiently validated for

purposes of being allowed as an offset necessarily constitutes proof of an expense that was incurred by that plaintiff for the medical care that was provided."

What was the basis for that opinion?

A. I believe you're separating the context. It's based on the data and the court accepting your data.

Q. What authority do you have -- what authority did you rely upon to make this opinion?

MS. WALLACE: Objection to form.

THE WITNESS: I'm sorry. I don't understand your question, what authority. I'm basing it on the Court accepting your data.

BY MS. KONSTANTOPOULOS:

Q. Why would an offset necessarily constitute proof of an expense that was incurred by a plaintiff?

A. You're separating it from the context listed above as the data. If the Court accepts your data, then I accept your data.

Q. Again, my question was, why does an offset necessarily constitute proof of an expense that was incurred by a plaintiff?

A. Because --

MS. WALLACE: Objection to form.

THE WITNESS: I'm sorry.

MS. WALLACE: You may answer.

THE WITNESS: Again, you're separating one sentence from the context. As I explained, there are many inconsistencies with five different -- five different, six different, I can't even keep track now -- government agencies and how they pulled their data and what inconsistencies were relied upon in that data. And what I'm saying is if the Court accepts your data, then I accept your data, and it should be included based on that acceptance.

BY MS. KONSTANTOPOULOS:

Q. Understood. So if the Court accepts this data, you indicated that an offset necessarily constitutes proof of an expense that was incurred by that plaintiff. How do you know that it constitutes proof of an expense that was incurred by a plaintiff?

MS. WALLACE: Object to form.

THE WITNESS: It goes back to your

data. In your data, you got charges and payments in there. I'm merely accepting your data.

BY MS. KONSTANTOPOULOS:

Q. So is it your testimony or your understanding -- strike that.

Is it your understanding that if an offset can be proved, that offset would be the exact same amount as the expense incurred by the plaintiff?

MS. WALLACE: Object to form.

THE WITNESS: I'm sorry. Could you rephrase that question?

BY MS. KONSTANTOPOULOS:

Q. Do you not understand it?

A. No. We've gone in circles on this question for quite some time now.

Q. So I'm reading your own report, and I can read the section again.

"I do so in acknowledgment that any award, payment, or benefit provided to a plaintiff for medical care through a program administered by or through CMS, Medicare, VHA, or CCN, TriWest which is sufficiently validated for purposes of being allowed as an offset

necessarily constitutes proof of an expense that was incurred by that plaintiff for the medical care that was provided."

Do you understand the sentence that's in your own report?

A. Yes, I do understand the sentence that's in my own report. However, you're separating it from the context, which is what you seem to be hooked on.

The context of that sentence is based on the data and the methodology. You had multiple agencies pull information based on your -- the DOJ's requirements, and that data has inconsistencies. To the extent that the Court accepts it, then I accept it and I accept it as an offset.

Q. Okay. Do you understand the difference between what patient payments are and what an offset is?

MS. WALLACE: Object to form. Can you rephrase?

BY MS. KONSTANTOPOULOS:

Q. What is your understanding of what an offset is?

MS. WALLACE: Objection.

THE WITNESS: It's not my expertise.
MS. KONSTANTOPOULOS: I think this is a good time to take a break for lunch. It's about 12:23.
THE VIDEOGRAPHER: Going off the record. The time is 12:24 p.m.
(Recess taken from 12:24 p.m. until 1:08 p.m.)
THE VIDEOGRAPHER: Going back on the record. The time is 1:08 p.m.
BY MS. KONSTANTOPOULOS:
Q. You recall you are still under oath; correct?
A. Correct.
Q. Did you have any substantive communications about your deposition testimony with your counsel during the break?
MS. WALLACE: Objection.
THE WITNESS: Substantive meaning? Define what you would suggest is sub -- substantive.
BY MS. KONSTANTOPOULOS:
Q. Did you discuss how you were to answer questions --
MS. WALLACE: Objection.
BY MS. KONSTANTOPOULOS:

Q. -- for the deposition?

MS. WALLACE: I would object to the extent that it calls for confidential attorney-client work product communications.

BY MS. KONSTANTOPOULOS:

Q. Without telling me what counsel said, did counsel instruct you on how to respond to questions, the deposition during the break?

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. You can answer the question.

A. No.

Q. All right. I'm going to point your attention back to Exhibit 7, which is Dr. Ji's report.

MS. WALLACE: I have Exhibit 7 as the First Amended Materials Considered List.

MS. KONSTANTOPOULOS: Thank you, Counsel.

BY MS. KONSTANTOPOULOS:

Q. I would point your attention to Exhibit 9, Dr. Ji's report. Please confirm that the number -- exhibit number is correct.

A. Yes.

Q. Thank you. Sorry about that.

At the bottom of the page, "Summary of Damages," Dr. Ji stated, "Assuming the conclusions from the plaintiffs' expert Dr. Sfakianos are correct for purposes of my opinions, these claimed medical expenses submitted by Mr. Cogiano were reviewed. The plaintiff reported total medical expenses of $148,972. $27,672 of charges were reviewed but determined to be unrelated to the claimed condition. $121,300 of charges were verified to be related to the claimed conditions."

Did I read that correctly?

A. What page are you on?

Q. Page 7.

A. Yes, that's what his report says.

Q. And then in his report, moving on to page 10, under "Noninstitutional," Number 1 is listed as the Emory Clinic Incorporated; is that correct?

A. Yes.

Q. Okay. And the note says for the entry 6/9/2009 -- June 9, 2009, he writes, "The charges referred to cystourethroscopy and TURBT, but primarily for benign prosthetic hypertrophy,

(EUH OPS RPT). This was nine years prior to the diagnosis of UTUC, and the results did not show cancer at that time."

Did I read that correctly?

A. Yes.

Q. And he indicated the charges total $3,009 but are not related to the claimed diagnosis; is that correct?

A. Well, that's what it states, yes.

Q. And on page 11 of his report under Number 6, Southeastern Regional Medical Center, he indicates for 2/2/2024, or February 2, 2024, he writes, "This was -- was a hospitalization for management of prostate cancer. A transurethral prostate resection was performed by Dr. Ravi, but this was not indicated for the surveillance or management of bladder cancer."

Did I read that correctly?

A. Yes, that's what it states.

Q. And he stated, "The charges totaled $23,763 but are not related to the claimed diagnosis"; correct?

A. That's what he states, yes.

Q. I'm going to point your attention back to your amended -- I'm sorry -- rebuttal

report, Exhibit 13, and ask you to turn to page 6. And I am referring to the very top at the -- at the top, you indicated, "After review, I am reducing the amount of medical billing expenses to the amount confirmed by the defense expert Wang Ji, M.D., and have amended my totals accordingly to reflect $121,300 in charges verified by the experts for both parties to be related to the conditions claimed"; correct?

A. Correct.

Q. And you would agree that you deferred to Dr. Ji's opinion regarding prostate cancer because he's a clinician?

MS. WALLACE: Objection. Form.

THE WITNESS: I agree that -- with Dr. Ji's opinion, yes.

BY MS. KONSTANTOPOULOS:

Q. Moving on to -- going back to Dr. Ji's report, which was Exhibit 9, for Jefferson Criswell.

A. What page?

Q. Page 12.

You would agree under "Summary of Damages" in the first bullet point in bold, Dr. Ji wrote, "The plaintiff reported total

medical expenses of 200 -- $202,674, and these were charges -- these charges were all verified to be related to the claimed conditions"; correct?

A. Yes.

Q. There was no dispute regarding the past medical expenses --

A. Correct.

Q. -- for Jefferson Criswell; correct?

A. That is correct.

Q. Staying on that Exhibit 9 regarding Terry Dyer on page 20. Under "Summary of Damages," Dr. Ji wrote, "Assuming the conclusion from the plaintiffs' experts Dr. Longo and Tharwani are correct for purposes of my opinion, these claimed medical expenses submitted by the plaintiff were reviewed.

"The plaintiff reported total medical expenses of $279,994. They were incorrectly entered -- there were incorrectly entered charge amounts, data entry errors on 7/31/2013 and 5/6/2021 with a difference of plus $210 (plus 341 and minus $131). After correcting for this, I reached the following conclusions: 282,204 of the charges were identified on the review -- on

review of the plaintiffs' analysis; $23,979 of charges were determined to be unrelated to the claimed conditions; $256,224 were verified to be related to the claimed conditions."

Did I read that correctly?

A. Yes, you did.

Q. Going back to your report on Exhibit 13 -- in Exhibit 13, page 7.

A. Uh-huh.

Q. You indicated in the second full paragraph under your heading for Terry Dyer, "Based upon my review of the medical records for the dates of service disputed by the defense expert Dr. Wang Ji, I agree with certain disputed medical expenses and disagree with others as detailed below."

Did I read that correctly so far?

A. Yes.

Q. Okay. Under Number 1, you indicated right underneath that, "Dr. Ji alleged data entry errors on 7/31/2013 and 5/6/2021 with a difference of $210 (plus $341 and minus $131). I agree with these assessments."

Did I read that correctly?

A. Yes.

Q. And under A, "Duke Health charges for the date of service July 31, 2013, related to plaintiff's Track 1 condition for cytology and pathology services were inaccurately understated by $341 -- $341. This amount has been corrected to reflect a total of $18,381.31."

Did I read that correctly?

A. Yes.

Q. So you agreed with Dr. Ji's opinion for those Duke Health charges; correct?

A. Correct.

Q. Under B, you stated, "The Novant Health Regional Medical Center charges for an emergency department visit, laboratory services, and CT scans on May 6, 2021, were inaccurately reported as $1,097.99"; is that correct?

A. Yes.

Q. And they were inaccurately reported in your expert report --

A. And the appendices.

Q. And appendices. Okay.

And that was the expert report dated October 29, 2025; correct?

A. Correct.

Q. You stated, "This total had been

revised to reflect the correct amount of $966.74"; correct?

A. Correct.

Q. And under C, you stated, "Additionally, advanced imaging performed on August 4, 2022, was inaccurately reported twice. The duplicate charge from Columbus Regional HCS in the amount of $1,671 has been removed."

Did I read that correctly?

A. Yes, you did.

Q. So you made the following adjustments based on Dr. Ji's report; is that correct?

A. Yes.

Q. And under Number 2 -- strike that.

Moving to page 8, Exhibit -- same exhibit, Exhibit 13, under Subsection C, you indicated, "Because of the dispute with respect to these charges raised by Dr. Ji, I sought further input from the urologist Dr. Thomas Longo to confirm relatedness as assessed. I have relied upon this letter dated January 14, 2026, in formulating the opinions set forth in this report"; is that correct?

A. Yes.

Q. And the dispute that you're referring

to here, is that related to charges for dates of service for June 22, 2014, and December 2, 2015?

A. Yes.

Q. You would agree that you did not speak to Dr. Longo directly about Terry Dyer's case; correct?

A. That is correct.

Q. And you didn't have any email correspondence with Dr. Longo; correct?

A. Correct.

Q. Other than the letter from Dr. Thomas Longo dated January 14, 2026, you did not review any of his prior reports that he drafted for Terry Dyer; is that correct?

A. That is correct.

Q. I'm going to mark the letter from Dr. Thomas Longo dated January 14, 2026, as Exhibit 17.

MS. WALLACE: Thank you.

(Exhibit 17 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. Is this a copy of the letter that you reviewed and relied upon in your rebuttal expert report?

A. Yes.

Q. You would agree that in this letter, Dr. Longo does not state that he reviewed the medical bills associated with these visits; isn't that correct?

MS. WALLACE: Object to form. Foundation.

THE WITNESS: That's correct.

BY MS. KONSTANTOPOULOS:

Q. And in that later -- letter -- January 14, 2026, letter, he indicated that he reviewed certain Bates documents; is that correct?

A. Yes.

Q. The first was for records for -- for June 27, 2014, visit --

A. Yes.

Q. -- which is Bates Number 000357_Dyer_0000002061-73. Did I read that correctly?

A. Yes.

Q. I am marking as Exhibit 18 Novant Health records with that same Bates number regarding -- Bates number range for -- for June 27, 2014, visit.

(Exhibit 18 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. Take a moment to review those. You would agree that these are the records cited by Dr. Longo for the June 27, 2014, visit; correct?

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. Would you agree that based on those Bates numbers, that the records that Dr. Longo reviewed for the June 27, 2014, visit are the same as the records in front of you?

A. Yes.

Q. And you would agree that there are no bills contained in the records that he reviewed, correct, for the -- specifically for the June 27, 2014, visit?

A. No, there are no billing records that he reviewed.

Q. Okay. And I'm going to show you what will be marked as Exhibit 19.

(Exhibit 19 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. What I'm showing you are records for

Ms. Dyer's December 2, 2014, visit, _00357 -- excuse me -- 00357_Dyer_000000061-84.

You would agree that these are the records that Dr. Longo reviewed for the December 2, 2014, visit, according to his letter?

MS. WALLACE: Objection.

THE WITNESS: Yes, that appears to be the -- the records.

BY MS. KONSTANTOPOULOS:

Q. Okay. And you would agree that Exhibit 19, the records from the December 2, 2014, visit referenced by Dr. Longo do not include any medical bills; correct?

A. That is correct.

Q. You're aware that Dr. Ji reviewed both the medical visits and bills to make his determinations regarding Ms. Dyer; is that correct?

MS. WALLACE: Objection.

THE WITNESS: I'm not sure how I would know what Dr. Ji looked at. I can presume he did.

BY MS. KONSTANTOPOULOS:

Q. Okay. I'll point your attention back to Dr. Ji's report, which is Exhibit 9, and point

your attention to page 24. Looking towards the top of page 24 under Section C, he indicated on 6/27/2014, -00357_Dyer_0000002653, under that heading, he stated, "These are charges from 6/27/2014" -- and I apologize. Do you want me -- do you know where we are?

A. Uh-huh.

Q. Okay. Start over. These are -- he stated, "These are charges from 6/27/2014 related to an ER visit with primary complaints of fever and abdominal pain with a chief complaint of fever, PT states. Dr. William Hope wants to be called when I'm here.

"This chief complaint is the primary reason for the ER visit, which was a request for general surgeon Dr. William Hope to evaluate her for right upper quadrant abdominal pain (00357_Dyer_0000002061 to 2067). Dr. Hope evaluated and found the pain to be due to gallstones and she was discharged from the ER (00357_Dyer_0000002067 to 2069)."

Did I read that correctly so far?

Did I read that correctly so far?

A. Yes.

Q. Okay. And about three weeks in -- he

continues to state, "About three weeks later on 7/17/2014, she underwent a laparoscopic cholecystectomy" --

A. Cholecystectomy.

Q. -- "cholecystectomy with intraoperative cholangiogram with Dr. Hope (00357_Dyer_000002074 to 2075). While she did also have a urinary infection, this was sensitive to ciprofloxacin, an oral medication, and was not the primary reason for ER visit. This is not related to the claimed conditions. The charges were related to gallstones. The total charges of $1,787 were not related to the claimed condition."

Did I read that correctly?

A. Yes, you did.

Q. Okay. You would agree that gallstones are unrelated to Ms. Dyer's Track 1 condition; isn't that correct?

MS. WALLACE: Objection.

THE WITNESS: Reading --

BY MS. KONSTANTOPOULOS:

Q. I'd like to refer to the table of conditions in Exhibit 11 to refresh your recollection.

A. Yes, I would agree with that. However, they found the patient had a urinary tract infection that was not responsive to the ciprofloxacin and was given Rocephin. IV Rocephin.

Q. You would agree that the urinary tract infection was not the primary reason for her visit to the hospital; isn't that correct?

A. No, I would not agree with that. She came in with a fever and pain, and what they found was a urinary tract infection that they treated.

Q. Again, you're not a medical expert; correct?

A. I'm following the provider's note.

Q. So you're interpreting what the provider is stating; correct?

A. Yes.

Q. And you're interpreting the medical records in this case; is that correct?

A. That is correct.

Q. And is it your testimony that your interpretation of the medical records are more accurate than Dr. Ji's interpretation of the medical records?

MS. WALLACE: Objection.

THE WITNESS: Based on my education, training, experience, and knowledge base, I follow objectivity when I'm looking at a medical record. The provider states that the patient had a urinary tract infection that was not sensitive to the antibiotic that had been previously prescribed.

BY MS. KONSTANTOPOULOS:

Q. You would agree that Dr. Ji is a clinician; correct?

A. Yes.

Q. And you are not a clinician; correct?

A. No.

Q. And you agree that a clinician would be in a better position to interpret medical records; correct?

MS. WALLACE: Objection.

THE WITNESS: No, I would not agree with that.

BY MS. KONSTANTOPOULOS:

Q. You believe that your interpretation of medical records is superior to Dr. Ji's interpretation of medical records who is --

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. -- a clinician and doctor?

MS. WALLACE: Objection. Sorry.

THE WITNESS: I would state that I have spent 19 years training physicians on how to document in a medical record, and I am trained in reviewing medical records with objectivity.

BY MS. KONSTANTOPOULOS:

Q. You've never been to medical school; correct?

A. No.

Q. And you don't train doctors on the types of treatments that are related to specific diseases; correct?

A. I train doctors on how to document their notes and how to interpret the codes that they're using.

Q. You don't train doctors on how to interpret diagnoses; correct?

MS. WALLACE: Objection.

THE WITNESS: I do, to a certain extent, provide guidance on how to interpret ICD-10 and how best to document clearly and concisely in their note.

BY MS. KONSTANTOPOULOS:

Q. You would agree that you previously indicated that when multiple diagnoses are present, that you would analyze medical documentation to determine whether the compensable condition was the primary clinical driver of the accounter or whether it was represented -- whether it represented a coincidental or historical diagnosis. Do you recall that?

A. Yes, I do recall that.

Q. Was it your testimony here today that the UTI that was found during the ER visit was the primary clinical driver of this ER visit?

MS. WALLACE: Objection.

THE WITNESS: I'm following the medical record written by the provider with the support of a clinician who reviewed the same medical record I reviewed and is in agreement with my assessment.

BY MS. KONSTANTOPOULOS:

Q. Dr. Ji had indicated that the charges were related to gallstones for the June 27, 2014, visit; correct?

MS. WALLACE: Objection.

THE WITNESS: You're asking me if his statements are -- what he is assessing is gallstones? I would agree that that's what he wrote, yes.

BY MS. KONSTANTOPOULOS:

Q. I'll move on to plaintiff Jimmy Laramore. Referring to Exhibit 13, your rebuttal report, page 8, starting right under Laramore, Jimmy Carol. You indicated for Jimmy Laramore, "I quantified $0 in medical billing expenses"; is that correct?

A. Yes.

Q. So it is your opinion that Mr. Laramore, based on the information you had been given, has $0 in past medical expenses; is that correct?

MS. WALLACE: Objection.

THE WITNESS: I would not agree with the way you stated it, no. I was not provided documentation or billings to review.

BY MS. KONSTANTOPOULOS:

Q. And you noted also on page 8 in the second paragraph under Mr. Laramore's heading

that the government claimed VHA offsets and CCN/TriWest offsets; is that correct?

A. That's what it says, yes.

Q. And you did not conduct a full validation, reconciliation, or relatedness review of those past payments and billing charges administered by VHA or CCN, TriWest; correct?

A. Correct.

Q. Okay. For Mr. Laramore, is it fair to say that you have not reviewed any of his medical records in this case?

A. No, I have not.

Q. Moving on to Mr. Frank Lee Mousser on page 9 of your report under Kidney Cancer Plaintiffs. Again, Exhibit 13, page 9. For Frank Mousser, you stated "I quantified $0 in medical billing expenses."

And you did not review any past billing expenses or records of Mr. Frank Mousser; is that correct?

MS. WALLACE: Objection to the form.

THE WITNESS: I was not provided any information regarding billing or documentation for Mr. Mousser.

BY MS. KONSTANTOPOULOS:

Q. You noted for Mr. Mousser that the government claimed VHA offset; is that -- VHA offsets; is that correct?

A. Yes.

Q. You didn't independently evaluate those VHA offsets; correct?

MS. WALLACE: Objection.

THE WITNESS: I believe those VHA offsets are coming from your expert.

BY MS. KONSTANTOPOULOS:

Q. So you did not independently evaluate those; correct?

MS. WALLACE: Objection.

THE WITNESS: The VHA data, no.

BY MS. KONSTANTOPOULOS:

Q. And you haven't reviewed any of Mr. Mousser's medical billing expenses or records in this case; is that correct?

MS. WALLACE: Objection.

THE WITNESS: None were provided.

BY MS. KONSTANTOPOULOS:

Q. Moving on to Mr. Allan Howard on page 9 -- strike that.

Still on Mr. Howard, going back to Dr. Ji's expert report, Exhibit 9. Point your

direction to page 30 of Exhibit 9. Under Howard, Allan Wayne -- Plaintiff 6, Howard, Allan Wayne, under "Summary of Damages" starting at the bullet points, Dr. Ji indicated, "The plaintiff reported total medical expenses of $839,643.06. $187 of charges were determined to be unrelated to the claimed conditions. 839,401 were verified to be related to the claimed conditions."

Did I read that correctly?

A. Yes.

Q. Moving on to page 33 of Dr. Ji's report, Exhibit 9, staying with the same exhibit. I point your attention to Number 2 under Kettering Health. He indicated, "There was one charge for 3/21/2011 for an office visit for internal medicine. However, the visit was focused on hyper" --

A. Hyperlipidemia.

Q. Thank you.

-- "hyperlipidemia with no indication for management of any cancer, lymphoma, or RCC, -00490_Howard_0000000957 to 963. This is not related to the claimed conditions. $184 is not related to the claimed conditions."

You agreed with that assessment and

removed that charge from your calculations; correct?

A. Yes.

Q. Moving on to Mr. Fancher, David Fancher. I would refer you to Exhibit 13, back to your rebuttal expert opinion report, page 10. You agree that, "For Mr. -- for David Fancher, I quantified $6,475.30 in medical billing expense. Of these expenses $6,475.30 was confirmed by the defense expert Wang Ji, M.D., leaving a disputed amount of charges totaling $0."

Did I state that correctly?

A. Yes.

Q. And you also indicated that the government claimed additional offsets for VHA; correct?

A. Again, those offsets, I believe, are in Dr. Ji's report. And we are -- I'm merely accepting his finding.

Q. Okay.

A. Or whatever page he might be on.

Q. Fair enough. Moving to David Downs, I would refer you to, again, page 10 of your rebuttal report, Exhibit 13. You indicated for David Downs, "I quantified $49,971.61 in medical

billing expenses all incurred under the TriCare program. Of these expenses, $49,971.61 was confirmed by the defense expert Wang Ji, leaving a disputed amount of charges totaling $0.

Did I read that correctly?

A. Yes.

Q. Moving on page 11 of your expert report, under Section 5, Tukes, Jacqueline. Keeping on that same plaintiff, I will actually ask you to refer whack to Dr. Ji's report, Exhibit 9, page 39.

At the bottom of the page under "Summary of Damages," under the bullet points, he states, "The plaintiff reported total medical expenses of $410,564. $78,632 were duplicate charges that were flagged as denials by TriCare. $3,478 of charges were not related to the claimed conditions. $328,454 were verified to be related to the claimed conditions."

Did I read that correctly?

A. Yes, you did.

Q. You would agree that you were incorrect to include these charges; correct?

A. I would preface that by saying the -- this is an illustration of the TriCare data's

inconsistencies showing that the information provided by the Department of Justice included duplicate charges.

Q. Once Dr. Ji -- once Dr. Ji in his reported determined that there were duplicative charges, you removed those from your totals for --

A. Yes, I removed the duplicates.

Q. Okay. Going back to your report, Exhibit 13, page 11, under Jacqueline Tukes, the third paragraph starting with "I reviewed."

You indicated, "I reviewed the $78,632 duplicate charges that were flagged initially as denials by TriCare. I note that there are no duplicates in the paid amounts, only in the charges in the TriCare dataset. My review is consistent with the assessment of Dr. Ji, and duplicative billing entries have been excluded from the related damages totals. I have amended my totals to deduct the duplicate -- duplicative billing charges."

Did I read that correctly?

A. Yes, you did.

Q. You also indicated underneath that paragraph on page 11 in Exhibit 13 -- 13,

"Further, after review, plaintiffs agree to the disputed medical expenses identified by Dr. Ji in the amount of $3,478. I have amended my totals to reflect $328,454 in charges verified to be related to the claimed conditions."

Did I read that correctly?

A. Yes, you did.

Q. I'm going to point your attention back to Exhibit 9, Dr. Ji's report, on page 42.

One of the disputed charges that Dr. Ji mentioned and that you agreed to revise your amount for Ms. Tukes was a 5/12/2021 visit, and that's according to Dr. Ji's report, Carolina Healthcare Associates, Inc., under Section D, 5/12/2021.

You would agree it reads "Perioperative medicine consult for a knee replacement surgery. This is not related to the claimed concerns"; is that correct?

A. That is correct.

Q. And then the other charge that he was referring to that you accepted was on page 46 of Exhibit 9, which was the Onslow Memorial Hospital, Inc., visit on July 16th of 2010; is that correct?

A. Yes. Colonoscopy.

Q. Okay. And it states, "Routine colon cancer screening with colon -- colonoscopy found with diverticulosis without evidence of any cancer." He indicated that $3,002 was not related to the claimed conditions, and you agreed; correct?

A. Correct.

Q. Please stay with Exhibit 9, Dr. Ji's report, and ask that you flip to page 52. This is under Plaintiff 10, Amsler, Karen. Moving to the second paragraph in the bullet points of page 52, Exhibit 9, Dr. Ji indicated, "The plaintiff reported total medical expenses of $831,690.04. On review, based on the plaintiff's cited billing records, there were two data entry errors detected totaling a difference of $714 ($741 overcharged and $27 undercharged). After correctly for these errors, $830,977 of billing charges were identified."

Did I read that correctly?

A. Yes, you read that correctly.

Q. And you agreed with Dr. Ji's assessment of these billing errors; correct?

MS. WALLACE: Objection.

THE WITNESS: No.

BY MS. KONSTANTOPOULOS:

Q. All right. I'm going to point your attention to -- strike that.

You did not agree with the disputed amount of $714; correct?

A. Correct.

Q. Yes. And your opinions with respect to Karen Amsler are, therefore, unchanged. Is that fair to say?

A. That is fair to say. Well, I think the $27 that was allegedly undercharged, I think we made a correction for that. But the other amount, the 741, we did not reduce.

Q. Okay. Thank you.

Staying with Dr. Ji's report, Exhibit 9, page 55. In reviewing Vivian Connard's medicals, I'm going to direct your attention to the "Summary of Damages" section towards the bottom of the page beginning with the bullet points.

Here, Dr. Ji stated, "The plaintiff reported total medical expenses of $560,984.97. There was a small data error of $4. Corrected for this error, $560,981 in charges were

identified and were related to the claimed condition."

Did I read that correctly?

A. Yes.

Q. And you agreed with Dr. Ji's assessment regarding the additional charge amount; is that correct?

A. That is correct.

Q. Okay. And you, therefore, corrected that amount in your records?

A. That is correct.

Q. Now, moving back to your rebuttal expert report, Exhibit 13, page 13. For Joseph Gleesing -- Plaintiff Joseph Gleesing, you indicated at the top on the first paragraph under Gleesing, Joseph, "For Joseph Gleesing, I quantified $397,144.90 in medical billing expense. Of these expenses, $381,452 was confirmed by the defense expert Wang Ji, M.D., leaving a disputed amount of charges totaling $15,692.90."

Did I read that correctly?

A. Yes.

Q. And further down in the second -- beginning of the second paragraph, you indicate,

"Based upon my review, the amounts disputed by the defense expert Dr. Wang Ji, I agree with certain disputed -- disputed medical expenses and disagree with others, as detailed below."

A. Correct.

Q. And you indicated that you agreed to the data entry -- data entry errors totaling a difference of $9,315; is that correct?

A. That is correct.

Q. And under A, under that section, you indicated, "I agree that the charged amount for three separate dates of service, 12/2/2017, 7/2/2019, and 9/27/22, performed at the Borgress Medical Center were overstated."

A. Correct.

Q. And you adjusted those charges; correct?

A. Yes.

Q. You also agreed under B that the laboratory services identified under the multiple locations tabbed inaccurately included charges in the amount of $885.67; correct?

A. Correct.

Q. And you adjusted that amount accordingly in your records; correct?

A. That's correct.

Q. And then under C for date of service, 4/11/2018, multiple providers, you disagreed with Dr. Ji's determination that plaintiff's charges -- charges claims were overstated; correct?

A. Yes.

Q. Under Number 2 on page 14, you indicated that "Dr. Ji identified $6,824 in medical charges as unrelated to the claimed conditions and $381,452 in charges as related."

You stated in your report, "While the plaintiff has raised objections to the relatedness determinations involving the aortic aneurysm and pancreatic lesions, absent -- absent physician confirmation, I have not challenged Dr. Ji's determinations for purposes of this billing analysis"; is that correct?

A. That is correct.

Q. And you also adjusted those patient payments to reflect those amendments?

A. That is correct.

Q. And you added $446 in --

A. Pharmacy copays, yes.

Q. And you added $446 in pharmacy

copays; correct?

A. Correct.

Q. I'm going to move on to Mr. Bruce Hill on page 14 of your report, Exhibit 13. For Mr. Bruce Hill, you quantified $0 in medical expenses; is that correct?

A. I was not provided any billing or medical records to validate that, yes.

Q. And although the government claimed VHA and Medicare offsets for Mr. Hill, you did not evaluate those offsets; correct?

A. Correct.

Q. You have not reviewed any of Mr. Hill's medical billing expenses in this case; correct?

MS. WALLACE: Objection. Form.

THE WITNESS: Correct. Oh, I'm sorry.

BY MS. KONSTANTOPOULOS:

Q. Sorry. I didn't hear you. I apologize.

MS. KONSTANTOPOULOS: Can we take a brief break?

MS. WALLACE: Sure.

MS. KONSTANTOPOULOS: Wonderful.

THE VIDEOGRAPHER: Going off the record. The time is 2:02 p.m.

(Recess taken from 2:02 p.m. until 2:18 p.m.)

THE VIDEOGRAPHER: Going back on the record. The time is 2:18 p.m.

BY MS. KONSTANTOPOULOS:

Q. Thank you. And you recall you are still under oath; correct?

A. Yes.

Q. Did you have any substantive communications about your deposition testimony with your counsel during the break?

MS. WALLACE: Objection to the extent that the question calls for confidential communications.

THE WITNESS: No.

BY MS. KONSTANTOPOULOS:

Q. I am going to move back to Dr. Ji's expert report, which is Exhibit 9. I'm going to point your attention to page 67 where he discusses plaintiff Ronald Lee Carter.

MS. WALLACE: What page, Counsel?

THE WITNESS: 67.

MS. KONSTANTOPOULOS: Page 67.

MS. WALLACE: Thank you.

BY MS. KONSTANTOPOULOS:

Q. At the top there are bullet points.

A. Uh-huh.

Q. Dr. Ji states, "The plaintiff reported total medical expenses of $600,016 and 900 -- excuse me -- $616 and 910 -- $616,000 excuse me -- $616,910. $1,121 of charges were reviewed but determined to be unrelated to the claimed conditions. $615,789 of charges were verified to be related to the claimed conditions."

Did I read that correctly?

A. Yes, you read that correctly.

Q. Thank you.

On page 69 of Exhibit 9 of his report -- Dr. Ji's report, under Number 3, CCHC Coastal Primal Care, he noted a total of $4,681 in charges were identified.

Under B, five charges, all primary care visits were identified as not related to claimed conditions. Those five charges that he noted included a charge on 2/4/2014, and he indicated that the visit was focused on a post hospital visit for heart attack; correct?

A. That's what it states, yes.

Q. He indicated that the lymphoma was in remission and there was no mention of any management for the claimed conditions. That's what he stated; correct?

A. Yes.

Q. And in the second Roman numeral, he mentioned three visits on -- one on 12/15/2015, one on 12/17/2015, and one on 12/21/2015. And he indicated that "These three visits were all focused on the management of a lung infection/pneumonia. Lymphoma was in remission, and there was no mention of any management for claimed conditions."

That's what Dr. Ji stated in his report; correct?

A. Yes.

Q. And then that final visit of the five charges he was referring to in his report was on April -- excuse me -- May 14, 2018. He stated that "This visit was for an upper respiratory infection with cough. The lymphoma was in remission, and there was no mention of any management for the claimed conditions."

Those were the charges that he was referring to that were unrelated in his report;

is that correct?

A. Yes.

Q. You disputed these charges on the basis that you believe that they're related to his NHL; is that correct?

A. I believe they're related to his chronic infection, if I'm not -- Mr. Carter...

Q. Well, actually, moving back to your rebuttal expert report, Exhibit 13.

A. Chronic infections.

Q. Page 16. You comment on those charges.

A. Yes.

Q. Under Number 6 -- Section 6, on page 16, you stated in your report, Exhibit 13, "Because of the dispute with respect to certain charges raised by Dr. Ji, I was provided with additional materials considered for the plaintiff, specifically the deposition testimony of Dr. Michael Davis.

"Dr. Davis testified that when a patient has non-Hodgkin's lymphoma or mantle cell lymphoma, their treatment for those conditions, particularly chemotherapy, tremendously suppress your immune system. Davis, pages 123 to 124.

For the aforementioned reasons, I dispute Dr. Ji's relatedness opinion with respect to this treatment."

Did I read that correctly?

A. Yes.

Q. I am marking the deposition of Dr. Michael Davis, M.D., as Exhibit 20.

(Exhibit 20 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. I ask that you turn to the deposition pages you cited, 123 and 124 in your report.

On page 123, line 18, there's a question. "Okay. When you are -- when you have non-Hodgkin's lymphoma or mantle cell lymphoma or -- the treatment for that, that can cause immunosuppression; right?

"ANSWER: Oh, yeah.

"MS. O'LEARY: Objection. Foundation.

"THE WITNESS: The -- the -- yeah, the chemotherapy suppresses your immune system tremendously."

Was that the basis for your opinion in this case report?

A. Yes. That and the -- what is this called? Exhibit 11, where it states that his secondary also assumed related to Track 1 talks about chronic infections, and pneumonia is an infection.

Q. You agree you did not review the specific causation report --

A. I'm sorry --

Q. -- for Mr. Carter; correct?

A. What was your question again?

Q. You -- you agreed earlier that you did not review specific causation reports in this case?

A. This is true.

Q. In this deposition testimony, you would agree that Dr. Davis generally stated that chronic infections can occur with NHL patients in a treatment, but he didn't specifically state that this occurred with Mr. Carter; isn't that right?

MS. WALLACE: Objection.

THE WITNESS: I -- I -- I'm not going to agree with that. The list that I was provided to also include states that chronic infections for Mr. Carter should

be included.

BY MS. KONSTANTOPOULOS:

Q. And you would agree when we were reviewing Dr. Ji's notes in his report, that his lymphoma was in remission at these disputed visits; correct?

A. I would have to see the medical record.

Q. But you would agree that's what Dr. Ji noted in his report; correct?

A. That's what he states, but I would like to see the medical record. And, again, to reiterate, my -- I was provided by counsel these related Track 1 -- these conditions that are related to Track 1. And the patient had pneumonia and was given, I believe, an antibiotic, azithromycin.

Q. You would agree that in this deposition testimony, pages 123 to 124, this specific dates of service February 4, 2014; December 15, 2015; December 17, 2015; December 25, 2015; and 5/14/2018 are not specifically discussed in the deposition testimony; correct?

MS. WALLACE: Objection.

THE WITNESS: I would have to say that -- who is this doctor? Dr. Davis does not state in his deposition testimony when a patient's immune system would be bounced back and functioning normal in his testimony.

So I would still reiterate that I was provided guidance to follow related symptoms -- related issues for a patient, and one of those related issues was a chronic infection, and clearly he had pneumonia.

BY MS. KONSTANTOPOULOS:

Q. And you didn't speak to doc -- Dr. Davis directly; correct?

A. No, I did not.

Q. You haven't had any other email correspondence with him?

A. No.

Q. So other than reviewing his deposition testimony, you haven't reviewed any other reports that he has made; is that correct?

A. No, I have not.

Q. Okay. Moving back to your expert reports -- rebuttal expert report Exhibit 13,

page 16. For Davis, Cometto, you stated for Cometto Davis, "I quantified $0 in medical billing expenses"; is that correct?

A. That is correct. I was not provided any medical billing or documents to support medical billing.

Q. So you did not review any of his past medical bills or records; correct?

A. They were not --

MS. WALLACE: Objection to form.

THE WITNESS: They were not provided.

BY MS. KONSTANTOPOULOS:

Q. And you note on page 16 that the government claimed VHA offsets; is that correct?

A. Yes.

Q. But you did not independently evaluate the government-alleged VHA offsets; correct?

A. When you're using the term "offsets," these offsets, quite frankly, come directly from Dr. -- your expert Dr. Ji's report, so...

Q. So is it fair to say you didn't review that information --

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. -- independently?
A. Could you be more specific about what information you're referring to?
Q. Did you evaluate the government's alleged offsets -- VHA offsets?
MS. WALLACE: Objection.
THE WITNESS: Their data? Their data had inconsistencies. And, again, it was reviewed by your expert.
BY MS. KONSTANTOPOULOS:
Q. I'm going to point your attention to your report page 16 in Exhibit 13, second paragraph. You indicate, "Consistent with the framework set forth in Sections 3 and 4 above, I did not independently evaluate the government's alleged VHA offsets of $3,178 or $1,614."
Did I read that correctly?
A. You did read that correctly.
Q. Thank you.
Moving on still on page 16 to Keller, Scott, which is under Number 3 of your report. You indicated for Scott Keller, "I quantified $404,537.96 in medical billing expenses. Of these expenses, $403,404 was confirmed by the defense expert Wang Ji, M.D., leaving a disputed

amount of charges totaling $1,133.96."

Did I state that correctly?

A. Yes, you did.

Q. Moving on to page 17, first paragraph starting with "based upon."

You indicated that "Based upon my review of the amounts disputed by the defense expert, Dr. Wang Ji, I disagree with the disputed medical expenses as detailed below."

Now I would like to turn your attention to Dr. Ji's report again, which is Exhibit 9, page 76.

Page 76 includes an itemized review of claimed medical expenses for Mr. Keller in Dr. Ji's report; correct?

A. Yes.

Q. And in summary under Number 1, it states, "Providence Sacred Heart Medical Center. Dr. Ji indicated the plaintiff claimed $101,303 in billed charges. On office visit 2/21/23 was identified as gastroenterology visit related to duodenal ulcers and was unrelated to the claimed conditions $657,000" -- I mean, excuse me -- "$657." Very different.

Let me start over. I apologize. For

the record.

Under Number 1, Providence Sacred Heart Medical Center, "The plaintiff claimed $101,303 in billed charges. On office visit 2/21/23 was identified as a gastroenterology visit related to duodenal ulcers and was unrelated to the claimed conditions, $657. The remaining $100,646 was found to be related to the claimed condition of CKD. No charges related to the cardiomyopathy or lymphoma were identified."

Did I read that correctly?

A. Yes.

Q. You disputed Dr. Ji's findings related to this visit; is that correct?

A. It was based on the documentation provided.

Q. What do you mean?

A. The patient's medical record.

Q. You disputed Dr. Ji's finding based on your review of the patient's medical records?

A. Correct.

Q. This was not a dispute based -- that was -- strike that.

You did not rely on official -- physician's note or opinion to dispute the

Providence Sacred Heart Medical Center charges; is that correct?

MS. WALLACE: Objection.

THE WITNESS: I referred to the medical record and based it on what was found in the medical record.

BY MS. KONSTANTOPOULOS:

Q. Was that opinion confirmed by any other doctor or clinician regarding Providence Sacred Heart Medical Center?

A. It was confirmed by the medical record that is in the patient's file.

Q. And do you believe that your interpretation of medical records is -- strike that.

Dr. Ji and you both evaluated the Providence Sacred Heart Medical Center record; correct?

A. I'm not privy to what Dr. Ji looked at or didn't look at. I can tell you I reviewed the medical record, and I found that in my opinion -- my expert opinion as a billing coding and documentation expert, evidenced by my education, training, and experience, that it was related to the rest of the bill that was produced

for his visit.

Q. You agree that you made a determination based on your interpretation of these medical records regarding whether cardiomyopathy or lymphoma was related to the claimed conditions in this record; isn't that true?

MS. WALLACE: Objection to form. You can answer.

THE WITNESS: I related based on my education, experience, and training that that 600 and -- $657 charge on January 4, 2023, was part of the entire visit and was related. That was my determination.

BY MS. KONSTANTOPOULOS:

Q. And that, in your opinion, does not involve a medical decision-making; is that correct?

MS. WALLACE: Objection.

THE WITNESS: Dr. Ji should not be making medical decision-making in reviewing a patient's medical record. He is not being objective if he's making that opinion.

BY MS. KONSTANTOPOULOS:

Q. But it's okay for you to be making medical decisions as a nondoctor --

A. I --

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. -- regarding your review of medical records?

A. I am --

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. And Dr. Ji, a clinician, is not?

A. I am not a medical person. I am following what another provider has written, and based on what the provider is documenting in the patient record, that's what my opinion is.

Q. So your opinion is based on your interpretation of another doctor's medical notes; is that correct?

MS. WALLACE: Objection.

THE WITNESS: My interpretation is based on the medical record presented.

BY MS. KONSTANTOPOULOS:

Q. Moving on to page 76 of Exhibit 9, Dr. Ji's report, Number 3, Rawling's Lien.

A. Uh-huh.

Q. It indicates here, "The plaintiff claims $62,192 in billed charges. A hospitalization service -- service on 4/30/2017 by internal medicine physician Dr. Feldman was related to an influ -- influenza pneumonia infection and not related to the claimed conditions."

Did I read Dr. Ji's report correctly?

A. Yes, you did.

Q. And going to C, he indicates in his report on that same page 76, "A total of $62,192 were confirmed as total billed charges. Of those, $477 were found to be unrelated to the claimed conditions. The remaining $62,192 were found to be related to the claimed condition of CKD and $36,082 were related to the cardiomyopathy with some charges related to both. No charges were related to lymphoma. A total of 62,192 were related to either cardiomyopathy or CKD. And a total of $477 of charges unrelated to the claimed conditions were identified."

Did I read Dr. Ji's report correctly?

A. Yes, you did.

Q. Going back to your expert report, Exhibit 13, page 17. Under paragraph B, you

indicated that you disagreed with Dr. Ji's assessment; is that correct?

A. That is correct.

Q. And you indicated in B, second sentence, "Although the plaintiff presented to the emergency department with influenza A, the provider noted in the history of present illness that the chemistry panel revealed worsening renal function."

A. Yes.

Q. "The plaintiff's chronic kidney disease was a contributing factor in the provider's medical decision-making process."

Did I read that correctly?

A. Yes.

Q. What do you mean by "contributing factor" here?

A. The patient was very ill with a fever, apparently dehydrating, which was also creating more kidney issues. His assessment and plan specifically referenced acute kidney injury. The treatment plan included instructions to hydrate gently and to monitor strictly his intakes and outputs, which would indicate to me that the kidney function was also impacted by the

influenza A.

Q. And why does it say "a contributing factor" what you just read -- or stated?

A. Because the physician in the ED is stating that it's a contributing factor, that they have to be careful with his kidneys because of this illness.

Q. Moving on to Number 2 on page 17 of your expert report, Exhibit 13, you stated that "Dr. Ji also questioned the relatedness of plaintiff's medical treatment associated with his diabetes diagnosis"; correct?

A. Uh-huh. I was to assume that diabetes and diabetic neuropathy are related conditions for the purpose of my analysis.

Q. And diabetes was a new condition that was added in a subsequent table of conditions; is that correct?

A. Yes.

Q. Okay. And that was the table of conditions --

A. Well, I did --

Q. -- notified -- that we noted as Exhibit 12; is that correct?

A. That is correct.

Q. In the prior table of conditions that was originally provided to you by plaintiffs' counsel, Exhibit 11, diabetes was not listed as one of the conditions for Mr. Keller; correct?

A. Correct.

Q. And you stated that you did not add diabetes in this table; is that correct?

A. That is not my -- yeah, it's not my addition, no.

Q. And that was not your decision; correct?

A. No.

Q. I want to go back to Dr. Ji's report. Exhibit 9, page 18.

A. 18?

Q. No. Excuse me. Page 74 of Dr. Ji's report, Exhibit 74 -- I mean Exhibit 13.

MS. WALLACE: 13?

MS. KONSTANTOPOULOS: Exhibit 13.

THE WITNESS: Page 74.

BY MS. KONSTANTOPOULOS:

Q. Excuse me. Strike that. Exhibit 9, Dr. Ji's report, page 74.

Under the table for Mr. Keller, Dr. Ji writes, "The disability diagnosis to

non-Hodgkin's lymphoma with anemia is clinically related to the claimed diagnosis lymphoma, but the diabetes diagnosis is neither claimed nor related to lymphoma. The patient's NHL was diagnosed and treated in 1997. There was no clinical documentation to suggest the NHL or treatment led to diabetes."

You would agree that according to Dr. Ji's report, he is not questioning whether the diabetes diagnosis is related to his NHL. He is definitive that it is not; correct?

A. Well, that's what he's stating. However, there is expert testimony from Dr. Dean Felsher who I believe states otherwise.

Q. Did you ever review the deposition testimony of Dr. David D'Alessio?

A. No.

MS. WALLACE: Do you want to spell that for the court reporter?

MS. KONSTANTOPOULOS: We'll do that during...

(Exhibit 21 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. I'm showing you what has been marked

as Exhibit 21, the deposition transcript of Dr. Dean W. Felsher.

Is this the deposition transcript that you reviewed that you were mentioning earlier?

A. Yes.

Q. Looking at your rebuttal expert report, you cited to pages 294 and 296 of Dr. Felsher's deposition.

A. Uh-huh.

Q. And that was to support the statement in your report that Dr. Felsher explained that "steroids are known to accelerate and exacerbate diabetic often causing metabolic decompensation. He further testified that in patients such as Mr. Keller, diabetes may be acutely aggravated by these treatments because steroids adversely affect the medical processes -- processes associated with diabetes."

Did I read your report correctly?

A. Yes.

Q. Okay. And you cited to pages 294 to 296 of his deposition, so let's start there.

Can you please identify in those two pages where Dr. Felsher specifically states that

Mr. Keller's diabetes was acutely aggravated by steroid treatments?

MS. WALLACE: Objection.

THE WITNESS: Well, on -- starting on 294, line 20. So I would say, you know, he'll always have more risk getting a worse infection. There would be a multitude of other things, often part of the high-dose chemotherapy and some stem cell -- sorry -- stem cell transplant, he'll go on high-dose steroids.

Steroids accelerate diabetes, heart disease that can cause cataracts and other problems. I didn't see a description of those, but I would tell you although all of those things can be associated with people who have received the high-dose chemotherapy. Very common.

Unfortunately, they'll have -- it may be subclinical now, but he's more likely to have this problem, many, many other problems. It is not something you can casually decide to get somebody just to do it, a stem cell transplant and high-dose chemotherapy.

It goes on.

Not all that I can anticipate. Obviously, he's -- has a higher -- obviously, he has a secondary cancer related to his exposure and treatment, then he'll need specific, given the fact that his kidney disease and cardiomyopathy, he'll need management. He can go into end-stage renal disease, and there's a chance he'll need a nephrologist and dio -- dialysis.

So, I mean, he goes on and he continues.

BY MS. KONSTANTOPOULOS:

Q. And you just only cited, though, to pages 294 and 296 and 301 to 318 in your expert report; correct?

A. Yes.

Q. Okay. And in those two pages, you would agree --

MS. WALLACE: Objection. It's three pages.

MS. KONSTANTOPOULOS: Correct. Thank you.

BY MS. KONSTANTOPOULOS:

Q. You would agree that in 294, 295, and 296, Dr. Felsher didn't say that Mr. Keller's diabetes has been acutely aggregated by these treatments. He's saying that it's possible --

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. -- correct?

A. I don't agree with that. He's saying that there's a high likelihood of this happening.

And we could go on.

Patients who have diabetes when treated with stem cell high-dose chemotherapy, often their diabetes can be short-term aggravated because often part of their treatment is high-dose steroids that usually causes decompensation of people's diabetes.

So I would -- so I would disagree, but I don't completely disagree. I appreciate the opinion that diabetes is a factor as I clarified for you. I didn't say diabetes is a nonfactor and had no influence.

Q. So based on your interpretation of Dr. Felsher's deposition, it's your position that he has stated that Mr. Keller's diabetes was acutely aggravated by treatments of steroids; is

that correct?

A. I would agree with Dr. Felsher's statement regarding what happens to a patient who's been on stem cell transplant and high-dose chemo and steroids. I would agree with that.

Q. Are you aware that Dr. Felsher wrote a specific causation report regarding Plaintiff Mr. Keller?

A. No.

(Exhibit 22 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. I am showing you what's been marked as Exhibit 22. The specific causation expert report of Dr. Dean W. Felsher, M.D., Ph.D.

Is that what's in front of you?

A. Yes.

Q. Okay. I want you to go to page 29 of this report, which is Dr. Felsher's conclusion.

MS. WALLACE: I just want to object to the extent that the witness has testified she has not seen this document, and it is --

THE WITNESS: Extensive.

MS. WALLACE: -- voluminous in

length. It's almost 70 pages. She hasn't had sufficient time to review the document prior to being asked questions about its contents.

MS. KONSTANTOPOULOS: Understood.

BY MS. KONSTANTOPOULOS:

Q. So if you can please go to page 29 under "Conclusion."

A. Uh-huh.

Q. It's about half a page and then a quarter of a page onto page 30.

Can you please read that to yourself, and let me know when you're done.

A. I am done.

Q. Okay. In Dr. Felsher's conclusion on pages 29 to 30, you would agree that he does not state that the Camp Lejeune water caused his diabetes; correct?

MS. WALLACE: Object to form and foundation for these questions.

You may answer if you can.

THE WITNESS: Well, I would not agree with that because he's not opining on the treatment that Mr. Keller received for his cancer. In his deposition, he is talking

about the treatment of his cancer having stem cell transplant, high-dose chemotherapy, and repeated steroid use as what was affecting his possible getting diabetes. To me, you're comparing apples to oranges.

BY MS. KONSTANTOPOULOS:

Q. You would agree that the word "diabetes" isn't even mentioned in his conclusion?

A. What is --

MS. WALLACE: Objection to form and foundation.

THE WITNESS: I'm sorry.

MS. WALLACE: No problem.

THE WITNESS: What is not mentioned in his conclusion has nothing -- it has no statement whatsoever about the treatment, which is what he opined on in his deposition. It's comparing apples to oranges.

BY MS. KONSTANTOPOULOS:

Q. I'm going to point your attention to the same report, page 27, the very top of the page of Dr. Felsher's report.

In his report, he states at the very top, "Mr. Keller was diagnosed with diabetes after his diagnosis of NHL. Diabetes can be associated with an increased risk of cancer. However, the timing suggests that it is unlikely to be a contributing cause."

Did I read that correctly?

A. Yes, you did read that correctly. But, again, it doesn't talk about the treatment that Mr. Keller received. In his deposition, Dr. Felsher speaks directly to what can happen with a patient on high-dose chemotherapy, on stem cell transplant, and repeated steroid use. I think you're comparing apples and oranges.

Q. And that's based on your interpretation of Dr. Felsher's deposition; correct?

MS. WALLACE: Objection. Form and foundation.

You may answer.

THE WITNESS: I believe these two reports are looking at things through two different lenses. One report is looking at the contaminated water case. The other one, his deposition, is looking at the

treatment that the patient received.

Now, this deposition was taken in 2025 and this report was generated in February of '24. So my question would be: Did Dr. Felsher have the information related to his treatment at that time and did he provide an opinion on the finding.

This is, what, a 70-page report? I think you're comparing two very different things. In his deposition, he's clearly stating that he's talking about what can happen with treatment.

BY MS. KONSTANTOPOULOS:

Q. Do you know when he was diagnosed, Mr. Keller, with Type 2 diabetes?

A. No.

Q. Did you review the report of the United States's -- United States's expert endocrinologist for Mr. Keller?

A. No, I did not.

Q. So you're basing your opinion after reviewing a deposition transcript -- one deposition transcript; correct?

A. This is what you have presented to me to provide you clarity on why I wrote what I

wrote. I -- I'm telling you that based on what Dr. Felsher wrote, what he deposed his statement as, he identified as a clinician that there were concerns with the treatment creating diabetes.

Q. To be clear, when you say that I presented you with this documentation, you're saying that I showed this documentation to you at today's deposition; correct?

A. Yes.

Q. But I did not represent this deposition to you before this deposition; correct?

A. Correct.

Q. And you were not presented with any other documentation other than the medical records that you reviewed in this deposition transcript; is that correct?

MS. WALLACE: Objection.

THE WITNESS: Yes.

BY MS. KONSTANTOPOULOS:

Q. Are you familiar with the court's -- court management order, Number 12?

A. I have no idea what you're referring to.

Q. Are you aware that the court issues

various orders in the Camp Lejeune litigation?

MS. WALLACE: Object to foundation.

(Exhibit 23 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. In front of you is an order at the top right regarding Track 1 trial plaintiff selection protocol case management order Number 12.

I'm going to point your attention to the second paragraph, and it is the third sentence. And it states, "The Track 1 plaintiffs will be waiving their rights to allege that any other illnesses or injuries besides Track 1 illnesses and those injuries or conditions stemming from Track 1 illnesses or its treatment were caused by the water at Camp Lejeune."

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. Did I read that correctly?

MS. WALLACE: Object to this line of questioning of this witness. Object to form and foundation.

BY MS. KONSTANTOPOULOS:

Q. Did I read that correctly? I'm

sorry. I --

A. Yes, you read that correctly.

Q. Okay. Do you understand what stemming from a Track 1 illness means in this order?

A. Yes.

MS. WALLACE: Object to form and foundation.

THE WITNESS: I -- I understand what it means, yes.

BY MS. KONSTANTOPOULOS:

Q. And you are not aware of any doctors stating that Mr. Keller's diabetes stems from his NHL; correct?

A. It stems from the treatment of his NHL.

Q. And that's -- that opinion is not based on your own medical opinion; correct?

A. I have no medical opinion.

Q. Moving on to Robert Kidd, looking at Exhibit 13 of your rebuttal report. For Robert Kidd, you indicated, "I quantified $0 in medical billing expenses. Despite no past medical -- despite no past medical damages being claimed for the plaintiff, the government claimed the

following offset damages."

So far did I read that correctly?

A. Yes.

Q. And the government claimed VHA offset damages, TriWest, CCN -- and CCN damages; is that correct?

A. Yes, that's what it states.

Q. And you indicated, "Consistent with the framework set forth in Section 3 and 4 above, I did not independently evaluate the government's alleged VHA and TriWest offsets"; is that correct?

A. That is correct.

Q. And you have not reviewed any of Mr. Kidd's medical billing expenses in this case; is that correct?

MS. WALLACE: Object to form and foundation.

THE WITNESS: None have been provided.

BY MS. KONSTANTOPOULOS:

Q. Moving on to Gary McIlheny, looking again at your report, Exhibit 13, page 18. You indicated that "For Gary McIlheny -- McIlheny, I quantified -- quantified $0 in medical billing

expenses"; correct?

A. Yes.

Q. You noted that the government claimed VHA and TriWest, CCN, Medicare, and TriCare offsets; is that correct?

A. Yes.

Q. And you did not independently evaluate the government's alleged offsets; is that correct?

MS. WALLACE: Object to --

THE WITNESS: That is --

MS. WALLACE: -- form and foundation.

THE WITNESS: That is correct.

BY MS. KONSTANTOPOULOS:

Q. Moving on to Edgar Peterson in your report, Exhibit 13, page 19. You indicated under the heading Peterson, Edgar, "For Edgar Peterson, I quantified $616,336.09 in medical billing expenses. Of these expenses, $611,735.93 was confirmed by the defense expert Dr. Syed A. Hasan, leaving a disputed amount of charges totaling $3,127.61. I quantified $181,586.98 in past medical and $10,201.11 in patient payments, totaling $191,788.01."

Did I read that correctly?

A. Yes.
Q. And you indicated in the next paragraph, "Based upon my review of the amounts disputed by defense expert Dr. Hasan, I agree to reduce the plaintiff's medical billing expenses from $616 and -- $616,000 -- 616 --
A. -- thousand and 336 dollars and 90 cents.
Q. Thank you.
-- "to $614,000" -- 614 dollar -- excuse me.
A. $614,836.90.
Q. Correct.
-- "due to an inadvertently included 1,500 duplicate charge"; is that correct?
A. Yes.
Q. So you would agree that Dr. Hasan discovered a duplicative charge in your billing of $1,500; is that correct?
A. Yes.
Q. And you adjusted that payment in your records?
A. Correct.
Q. However, for the date of service for 9/12/2017 -- September 12, 2017, you disagreed

with his opinion; is that correct?

A. That is correct.

Q. Okay. And you indicated under Number 1 for page 19, "For date of service 9/12/2017, a review of the plaintiff's medical documentation for September 12, 2017, emergency visit at Methodist University Hospital does not support the conclusion that it was unrelated to the plaintiff's Track 1 disease.

"In the history of present illness, the provider described the cord of the plaintiff's deep brain stimulator as notable for palpable cord centrally -- centrally to erythema from medial calf to thigh, which corresponds to the documented location of the plaintiff's superficial thrombophlebitis.

"During this encounter, the plaintiff was educated on the proper technique and timing of Lovenox injections. The plaintiff was also provided guidance on taking Parkinson's medication to reduce tremors prior to administering Lovenox for treatment of thrombophlebitis. These instructions demonstrate that management of plaintiff's Track 1 disease was directly relevant to and addressed during the

emergency department visit."

Did I read that correctly?

A. Yes.

Q. You would agree that you reviewed the medical bills and then summarized them here in your report; is that correct?

A. I reviewed the medical record and summarized it in my report.

Q. Are you aware that there is no cord that is part of a deep brain stimulator?

A. Correct. But the provider had to educate the patient on how to take his medication so that he could inject himself with his Lovenox. It's related. And there is an expert witness -- or I should say a physician's note from Dr. Barbano that formulates an opinion that supports.

Q. So is it your opinion that there is a cord that is part of a deep brain stimulator?

A. It is my opinion that the plaintiff's tremors created a problem for him to inject himself with his Lovenox, and Dr. Barbano supports that for all -- I believe it's all of these dates of service.

Q. Is it fair to say you don't know

whether there is a cord that is a part of a deep brain stimulator?

A. What the -- what the provider is talking about is a feeling in the patient's leg that felt like a cord. Could be a muscle, could be a vein, could be a tendon, the ligament. What he felt, he corresponds to his thrombophlebitis.

Q. The cord didn't have anything to do with the deep brain stimulator; is that correct?

A. That is correct.

Q. And you're aware that a deep brain stimulator is not located in the upper thigh?

A. Correct.

Q. But that is not what you stated in your report; correct?

A. Yes. That's an error.

Q. And are you aware that Dr. Hasan was deposed in this case?

A. I'm not aware, no.

Q. Okay. I'll mark Dr. Hasan's deposition exhibit as Exhibit 24.

(Exhibit 24 marked for identification.)

THE WITNESS: Oh, I'm sorry. I have him confused with Dr. Barbano. Yes, I am

aware. Yes. And he states in here that he feels I was confused, and I probably was. But my findings are backed up by Dr. Barbano.

BY MS. KONSTANTOPOULOS:

Q. On page 84, line 6, of Dr. Hasan's deposition, he was asked if he agrees with your assessment. On line 6, he says: Answer -- I'm sorry. Let's start at page 83, line 25.

"So having reviewed Ms. Hackett-Wallace's opinion here, do you agree with her assessment?

"ANSWER: Actually, I do not agree with her assessment.

"QUESTION: Okay. Why not?

"ANSWER: Well, for a few reasons. One, she writes in her report that -- let me find the right paragraph. The provider described the cord of the plaintiff's deep brain stimulator as notable for a palpable cord simply to be erythema from medial calf to thigh. I don't believe Marjorie Hackett-Wallace is a medical -- has formal medical training. But irrespective of that, she's -- she's I think confused by the word 'cord'. Her example, a deep brain stimulator has

a pulse generator that's usually in the chest or abdomen. And then she's referring to the cord -- a palpable cord centrally" --

A. Erythema.

Q. -- "erythema for medial calf to thigh. Cord in the latter part is described in a physical exam finding where when you palpate the thigh, you feel like a rope-like structure or like a hard vein or a hard vessel.

"So I think she's getting mixed up between the cord in the medial calf and thigh with the deep -- where she's writing the cord on the patient's -- the patient's deep brain stimulator. There's -- there's no cord that's part of a deep brain stimulator, and that's nowhere in the position of the upper thigh, so I don't -- I'm not sure if she -- yeah, I don't agree with it."

Did I read that correctly?

A. Yes, you did.

Q. Okay. And he disagrees with the description that you provided in your report; correct?

A. Correct.

Q. And you admit that you were confused

when you wrote this report?

A. I admit that I was incorrect.

Q. Okay.

A. However, it was -- the thrombophlebitis was backed up by Dr. Barbano.

Q. And by backed up by Dr. Barbano, are you referring to a letter that Dr. Barbano wrote dated January 12th of 2026?

A. Yes.

(Exhibit 25 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. I'm going to mark that same letter from Dr. Barbano dated January 12, 2026, as Exhibit 25.

Is this a copy of the letter that you're referring to?

A. Yes.

Q. You have not spoken directly to Dr. Barbano; correct?

A. Correct.

Q. You have not exchanged correspondence with Dr. Barbano; correct?

A. Correct.

Q. And other than this letter, you have

not reviewed any additional information from Dr. Barbano; correct?

A. Correct.

Q. In this letter, Dr. Barbano has not identified the documents he has reviewed by providing Bates numbers; is that correct?

A. Correct.

Q. Do you have any reason to dispute that Dr. Hasan has reviewed all medical records and bills available to him?

MS. WALLACE: Object to form and foundation.

THE WITNESS: I have no opinion on that.

BY MS. KONSTANTOPOULOS:

Q. You would agree that you can't say from looking at this January 12, 2026, letter that Dr. Barbano reviewed all of the medical record reports and corresponding bills --

MS. WALLACE: Objection.

BY MS. KONSTANTOPOULOS:

Q. -- is that correct?

A. I would dispute that. Dr. Barbano reviewed the medical records for 8/31/17, 9/15/17, and 9/12/17, and he related the

treatment to superficial venous thrombophlebitis. Immobile -- he states "immobility is a significant risk factor for development of this condition."

Q. So my question specifically was that you can't say from looking at this letter that Dr. Barbano has reviewed all of Mr. Peterson's medical bills and records; correct?

MS. WALLACE: Object to form and foundation.

THE WITNESS: I would not agree with that. He reviewed the three records that he identified in this letter.

BY MS. KONSTANTOPOULOS:

Q. You would agree that Mr. Peterson has more than these three visits; correct?

A. I would agree to that, yes.

Q. So --

A. Dr. Barbano is opining on the three visits that I'm disputing.

Q. Correct. And my question was more broad than that. You would agree that you can't tell from this letter by itself that he's reviewed all of Mr. Peterson's records; correct?

MS. WALLACE: Objection to form and

foundation.

THE WITNESS: I don't know what Dr. Barbano has reviewed beyond these three records.

BY MS. KONSTANTOPOULOS:

Q. Okay. Moving on to Diane Rothchild. I'm going to turn your attention back to your report, Exhibit 13, starting at page 21 at the top. You indicated, "For Diane Rothchild, I quantified $43,401.44 in medical billing expenses. Of these expenses, $38,594.44 was confirmed by the defense expert Dr. Syed A. Hasan, leaving a disputed amount of charges totaling $4,807."

Did I read that correctly?

A. Yes.

Q. You go on to state, "Based on my review of the amounts disputed by the defense expert Dr. Hasan, I agree with the disputed medical expenses. Please see amended appendices and materials considered."

A. Correct.

Q. You agreed with Dr. Hasan's determination for Ms. Rothchild's past medical billing expenses and changed your findings; is

that correct?

A. Yes.

Q. Now moving on to Robert Welch, still on Exhibit 13, page 21. You indicated, "For Robert Welch, I quantified $5,155.92 in medical billing expenses. These were confirmed by the defense expert Dr. Hasan, leaving a disputed amount of $0"; is that correct?

A. That is correct.

Q. And according to your report, the government claimed no additional offset damages; is that correct?

A. That is correct.

Q. And you did not review any medical bills or records for Mr. Welch; is that correct?

A. That is correct.

Q. Now, moving on to Mr. Sparks. I am in Exhibit 13, your rebuttal report, and page 21. You indicated, "For Richard Sparks, I quantified $36,602.89 in medical billing expenses. Of these expenses, $33,084.46 was confirmed by the defense expert Dr. Syed A. Hasan, leaving a disputed amount of charges totaling $3,418.43."

Did I read that correctly?

A. Yes.

Q. And then you stated that -- in the next paragraph, "Based upon my review of the amounts disputed by the defense expert Dr. Hasan," you disputed or disagreed with -- excuse me -- "I disagree with the disputed medical bills"; is that correct?

A. Yes.

Q. And specifically you disagreed with -- starting with Number 1, you indicated, "For date of service 4/6/2018," and you included Bates Number 00682_Sparks_000006849, "a review of the medical documentation for services performed on April 6, 2018, indicates that the plaintiff underwent a brain MRI without contrast and then -- and the stated indication for this radiologic study was the plaintiff's diagnosis of Parkinson's disease."

Did I read that correctly?

A. Yes.

Q. I'm going to point your attention to Dr. Hasan's report on page 22, which is Exhibit 10.

A. Am I looking at the right...

Q. On the top of the page, Dr. Hasan indicates that "The treatment that Mr. Sparks

receives -- received that were clinically unrelated to his Parkinson's disease include medical care at University of Colorado Hospital around April 6, 2018, involved Mr. Sparks undergoing cardiac stress test for evaluation of dyspnea or exertion and chest pain for patient with significant smoking history as well as oxygen monitoring during stress test."

Did I read that correctly?

A. Yes.

Q. Do you agree that Dr. Hasan did not state in his report that the MRI was unrelated?

MS. WALLACE: Object to form.

THE WITNESS: I -- I agree, I guess.

BY MS. KONSTANTOPOULOS:

Q. Okay. I'm going to point your attention back to Dr. Hasan's deposition, which was Exhibit 24. I'm going to ask you to go to page 106 of his deposition. I'm going to direct your attention to line 7.

"So a portion of the charges from this visit are related and a portion are not; is that correct?

"ANSWER: Yeah, I just -- I just want to make sure I explain my answer. So it looks

like on the same date of service, there's multiple testing, different testing modalities were done. So, yes, the MRI of the brain is related. The other testing based on the cardiac stress test, which was also done on the same day, was unrelated."

Did I read that correctly?

A. Yes, you did.

Q. But you would agree that Dr. Hasan does not take the position that the MRI is unrelated?

A. Correct.

Q. Okay. You indicated back in your report that "Because of the dispute with respect to these charges raised by Dr. Hasan, I further sought input from a physician to confirm relatedness as assessed"; is that correct?

A. Yes.

Q. And you were provided with a letter from Dr. Heidi Schwarz?

A. Correct.

Q. I'm going to show you what will be marked as Exhibit 26.

(Exhibit 26 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. You've based your opinion for Mr. Sparks on Dr. Schwarz's letter; is that correct?

A. Yes. In the documentation, it states it's a brain MRI.

Q. And you never spoke to Dr. Schwarz directly; isn't that correct?

A. That is correct.

Q. You haven't had any correspondent with -- correspondence with her directly?

A. No, I have not.

Q. And you were not provided with a copy of the documents that she reviewed in response to this letter; is that correct?

A. That is correct.

Q. Are you aware that Dr. Schwarz was deposed in this matter?

A. No, I was not.

Q. Okay. I'm going to show you what will be marked as Defendant's Exhibit 27. This is a copy of the deposition transcript of Dr. Heidi Schwarz.

(Exhibit 27 marked for identification.)

BY MS. KONSTANTOPOULOS:

Q. I would like to point your attention to page 31, line 18.

On line 18, the question posed to Dr. Schwarz is, "Without discussing any specific details of your conversation, have you spoken with any other experts in the damages and offsets phases of this litigation?

"ANSWER: I have not.

"QUESTION: What about Marjorie Hackett-Wallace?

"ANSWER: I do not know who that is."

Did I read that correctly?

MS. WALLACE: Objection.

THE WITNESS: Yes.

MS. WALLACE: For the record, the witness has testified that she's not seen or had sufficient time to review the deposition transcript that was taken on February 25, 2026. I'd ask for the witness to be given sufficient time to review the deposition transcript before being asked questions about the content.

MS. KONSTANTOPOULOS: Well, I'm just showing her specific portions.

MS. WALLACE: I'd like to note my objection for the record to design a question based on deposition transcript she's not had the opportunity to fully review.

BY MS. KONSTANTOPOULOS:

Q. I'm going to point your attention to page 51, line 18 of Dr. Schwarz's deposition, Exhibit 27.

Excuse me. I'm going to point your attention to page 51, line 7.

"QUESTION: Okay. But your overall position is that a stress test is typically not related to Parkinson's disease?

"ANSWER: Correct."

You'd agree here that Dr. Schwarz indicated that a stress test is not typically related to Parkinson's disease; is that correct?

A. Yes.

MS. WALLACE: Object to form and foundation.

BY MS. KONSTANTOPOULOS:

Q. So you wouldn't disagree with the position that Dr. Hasan took that the stress test was unrelated to Parkinson's but the MRI was

related to Parkinson's?

A. Correct.

MS. WALLACE: Objection. And I just -- this is all related to the date of service for 6/20/18?

MS. KONSTANTOPOULOS: This is for April 6, 2018.

MS. WALLACE: Objection to this line of questioning based upon the lack of the witness's ability to review the full content and context of the deposition testimony.

MS. KONSTANTOPOULOS: I stated for the record, we are indicating to keep the deposition open in light of the supplemental materials considered list provided yesterday evening and the corrected reports provided this morning, which are Exhibits 5 and 6 that were entered into evidence.

BY MS. KONSTANTOPOULOS:

Q. Are there any answers you have given to my questions that you wish to change before we end this deposition?

A. No.

Q. Is there any information I asked about that you didn't recall at the time but now remember?

A. No.

Q. Were there any questions I asked that you did not understand?

A. I think we addressed those.

MS. WALLACE: I -- I'd like to make for the record my objection to keeping the deposition open on the basis of what you just stated.

MS. KONSTANTOPOULOS: Noted.

BY MS. KONSTANTOPOULOS:

Q. Do you have any other opinions that you have not testified to today?

A. No.

Q. Once it is ready, you will be provided with the transcript of this deposition. We ask that you read it carefully, correct, and sign the deposition transcript as applicable. Do you understand?

A. Yes.

MS. KONSTANTOPOUS: Thank you for your patience and answering my many questions today. I will now pass the

witness, and, of course, if you'd take like to take a break.

MS. WALLACE: Yes. I would like to take 5- to 10-minute break prior to any redirect.

THE VIDEOGRAPHER: Going off the record. Time is 3:34 p.m.

(Recess taken from 3:34 p.m. until 4:20 p.m.)

THE VIDEOGRAPHER: Going back on the record. The time is 4:20 p.m.

EXAMINATION

BY MS. WALLACE:

Q. Ms. Hackett-Wallace, I have just a couple questions for you in follow-up to the questions you've been asked today.

I wanted to start with some of the questions that you were asked about the Plaintiff Sparks. Do you recall those?

A. Yes.

Q. You were asked about a date of service 4/6/2018 for Plaintiff Sparks. Do you recall that based upon the information that you reviewed, he received an MRI on that date of service that you, Dr. Schwarz, and Dr. Hasan have all opined was related to his Parkinson's

disease?

A. Yes.

MS. KONSTANTOPOULOS: Objection to form. Foundation.

BY MS. WALLACE:

Q. Is that the reason that MRI you included that date of service and medical visit in your report?

A. Yes.

MS. KONSTANTOPOULOS: Object to form. Foundation.

BY MS. WALLACE:

Q. Regarding Plaintiff Peterson, your report attributed the dates of service that you deemed to be related to the thrombophlebitis that he suffers from --

A. Yes.

Q. -- is that correct?

A. Yes, that is correct.

Q. And based upon the assumptions that you were asked to make -- make by counsel, which are Exhibits 11 and 12, if you recall, was leg pains and difficulty walking two of the assumptions that you were asked to make regarding the Plaintiff Peterson?

MS. KONSTANTOPOULOS: Objection. Form. Foundation.

THE WITNESS: Yes.

BY MS. WALLACE:

Q. And is it correct based on the materials that you've reviewed, that both you and Dr. Barbano attributed the dates of service that are related to the thrombophlebitis?

MS. KONSTANTOPOULOS: Objection. Form. Foundation.

THE WITNESS: Yes.

BY MS. WALLACE:

Q. And so the error that you testified to earlier had to do primarily with the language regarding the deep cord stimulator; is that right?

MS. KONSTANTOPOULOS: Objection. Form. Foundation.

THE WITNESS: That is correct.

BY MS. WALLACE:

Q. But your relatedness opinion as well as Dr. Barbano's has to do with the thrombophlebitis that was being treated on those dates of service?

A. That is correct.

MS. KONSTANTOPOULOS: Objection. Form. Foundation.

BY MS. WALLACE:

Q. You were asked questions earlier today regarding confirmation of patient payments. Do you recall that testimony?

A. Yes, I do.

Q. You testified earlier that you did not independently review bank statements or credit card records to confirm that the patients had actually paid the patient payments. Do you recall that testimony?

A. Yes, that's correct.

Q. Did you, however, review billing records and data extractions from the defendants that indicated that patient payments had been made?

A. Yes, I did.

MS. KONSTANTOPOULOS: Objection. Form.

BY MS. WALLACE:

Q. And was that the reliance material that permitted you to make the past medical expense determinations regarding patient payments?

MS. KONSTANTOPOULOS: Objection. Form. Foundation.

THE WITNESS: Yes.

BY MS. WALLACE:

Q. You were asked as a part of your expert reports to correlate the TriCare data extractions that you reviewed and received from government and their experts to the medical records corresponding to those data extractions for relatedness to the T1 conditions in your first report; is that correct?

MS. KONSTANTOPOULOS: Objection. Form.

THE WITNESS: Yes.

BY MS. WALLACE:

Q. And you identified medical expenses related to TriCare based upon that methodology and process; correct?

MS. KONSTANTOPOULOS: Objection. Form. Foundation.

THE WITNESS: Yes, that is correct.

BY MS. WALLACE:

Q. The notations that you had included on your reports that we made copies of and are included as exhibits in this deposition under

Exhibits 5 and 6, I wanted to ask you, did you add any additional source material on those notes or were those sources already identified in your report?

MS. KONSTANTOPOULOS: Objection. Form.

THE WITNESS: Those sources were already identified in the deposition, and I did not add any additional source material.

BY MS. WALLACE:

Q. Your notes, as you testified earlier, just added context and additional page cites to the statements that you made?

MS. KONSTANTOPOULOS: Objection. Form.

THE WITNESS: This is correct.

BY MS. WALLACE:

Q. You testified earlier today that you did not review actual billing records related to CMS, Medicare, VHA, or Community Care Network; correct?

MS. KONSTANTOPOULOS: Objection. Form.

THE WITNESS: This is correct, yes.

BY MS. WALLACE:
Q. But in your first report, you indicate throughout that you did review the datasets, the financial and billing datasets, provided by those agencies for the plaintiff; correct?
MS. KONSTANTOPOULOS: Objection. Form. Foundation.
THE WITNESS: Yes.
BY MS. WALLACE:
Q. And you identified in your first report the reliability issues that you identified within those datasets?
A. Yes.
MS. KONSTANTOPOULOS: Objection. Form. Foundation.
THE WITNESS: That is correct.
BY MS. WALLACE:
Q. And so when you testified regarding certain of the plaintiffs that you did not have billing records for, were you referring to actual physical billing records such as those that you reviewed for private payers in this litigation?
MS. KONSTANTOPOULOS: Objection. Form. Foundation.

THE WITNESS: That is correct.
BY MS. WALLACE:
Q. You were asked questions regarding the -- the findings in your report related to Drs. Hasan and Ji regarding their -- their verbiage of offsets. Do you recall that testimony?
A. Yes, I do.
Q. And is your testimony that if the court accepts the data in the data extractions as reliable and related to healthcare expenses related to the plaintiffs T1's conditions, then you have adopted those expenses into your rebuttal report as evidence of past medical expenses?
MS. KONSTANTOPOULOS: Objection. Form. Foundation.
THE WITNESS: Yes, that is correct.
BY MS. WALLACE:
Q. Okay. I don't have any further questions for you. Thank you.
A. You're welcome.
MS. KONSTANTOPOULOS: Thank you. Could we possibly order a rough? Is it possible to get it tonight?

THE COURT REPORTER: Yes.

THE VIDEOGRAPHER: Going off the record. That ends the deposition. The time is 4:27 p.m.

MARJORIE HACKETT-WALLACE

CERTIFICATE OF REPORTER

I, Christine A. Taylor, Registered Professional Reporter and Notary Public for the State of North Carolina at Large, do hereby certify:

That the foregoing deposition was taken before me on the date and at the time and location stated in this transcript; that the deponent was duly sworn to testify to the truth, the whole truth and nothing but the truth; that the testimony of the deponent and all objections made at the time of the examination were recorded stenographically by me and were thereafter transcribed; that the foregoing deposition as typed is a true, accurate and complete record of the testimony of the deponent and of all objections made at the time of the examination to the best of my ability.

I further certify that I am neither related to nor counsel for any party to the cause pending or interested in the events thereof.

Witness my hand, this 18th of March, 2026.

P R O C E E D I N G S

VIDEO OPERATOR: Good morning. We are now on the record.

This is the deposition of Kay Hairston In Re: Camp Lejeune Water Litigation in the United States District Court for the Eastern District of North Carolina.

This deposition is being taken at 1300 L Street, Northwest, Washington, D.C. The time is approximately 9:02:00 a.m. The date today is February 27, 2026.

Our court reporter is Carmen Smith on behalf of Veritext Golkow. I am the video operator, Larry Flowers, also with Veritext Golkow, 1650 Market Street, Suite 5150, Philadelphia, Pennsylvania 19103.

Will all counsel identify themselves and who they represent.

MR. ROMANO: John Romano on behalf of Plaintiffs.

MR. CARPENITO: Good morning. Joshua Carpenito on behalf of the United States.

MR. TUBIN: Marcus Tubin on behalf of the United States.

MS. LA MACCHIA: I'm sorry, this is Leslie

LaMacchia. Can we put the video on the witness?

VIDEO OPERATOR: Can we go off the record?

MR. CARPENITO: Let's go off.

VIDEO OPERATOR: We're going off the record.

The time is approximately 9:03 a.m.

(Discussion off the record.)

VIDEO OPERATOR: We are back on the video record.

The time is approximately 9:13 a.m.

Whereupon,

KAY FRANCES SEARS HAIRSTON

was called as a witness and, having first been duly sworn, was examined and testified as follows:

EXAMINATION

BY MR. CARPENITO:

Q Can you tell us your full name, please.

A Kay Frances Sears Hairston.

Q Ms. Hairston, what do you do for a living?

A I am a certified nurse life care planner.

Q What's your understanding as to why we're here today?

A My understanding -- what I've been asked to do is work with two individuals who have been diagnosed with Parkinson's Disease and identify the

supports and services that they now need relative to their injuries.

Q You were retained by Plaintiffs counsel in connection with the Camp Lejeune water litigation; right?

A Yes.

Q And you were asked to prepare two life care plans in that litigation; is that right?

A Yes.

Q One of those cases was for Mr. McElhiney; correct?

A Yes.

Q The other case is Mr. Peterson's case; correct?

A Yes.

Q Did you prepare a written life care plan for Mr. McElhiney?

A Yes.

Q Did you also prepare a written life care plan for Mr. Peterson?

A Yes.

(Government Exhibits 1 and 2 identified.)

BY MR. CARPENITO:

Q I'm going to go ahead and introduce what will be marked as Exhibit 1 and Exhibit 2.

Ms. Hairston, if you would take a look at Exhibit 1 there that I've handed you and let me know what you recognize that to be.

A So this document contains the life care plan I prepared for Mr. McElhiney, my CV and a list of my testimony and fee schedule from The Coordinating Center.

Q Thank you.

And if you could also take a look at Exhibit 2 and let me know what you recognize that to be.

A Exhibit 2 is the life care plan I prepared for Mr. Peterson, my CV, my list of testimony and the fee schedule of The Coordinating Center.

Q Thank you. Each of those reports is dated February 5, 2025; correct?

A Yes.

Q As we sit here today, those are the only life care plan reports that you've issued in connection with the Camp Lejeune water litigation; is that right?

A Yes.

Q Have you issued a supplemental report in Mr. McElhiney's case?

A No, I have not.

Q Do you plan to issue a supplemental report in Mr. McElhiney's case?

A I can't say yes or no at this point. It depends on if there is new information that becomes available and what I'm asked to do by the law firm that's retained me.

Q Have you issued a supplemental report in Mr. Peterson's case?

A No, I have not.

Q Do you plan to issue a supplemental report in Mr. Peterson's case?

A I can't answer yes or no. It depends on if new information becomes available and what I'm asked to do by the law office that's -- has retained me.

Q You agree that if new information has come available, that impacts the future care of one of these individuals that could potentially change the interventions outlined in your life care plans?

A If new information becomes available, that information would have to be reviewed and analyzed and determined if there is any impact on the life care plan.

Q I want to go over just a couple ground rules so we make sure we understand we're on the

same page today.

You understand that you took an oath as if you were testifying in court; right?

A Yes.

Q Is there anything preventing you from thinking clearly today?

A No.

Q Is there anything preventing you from testifying truthfully today?

A No.

Q I'm going to assume that if you answer one of my questions, that you understood it. Is that fair?

A Yes.

Q If you don't understand one of my questions, will you please tell me that you don't understand it?

A Yes.

Q Okay. If you need a break at any point throughout today's deposition, we will take that break with one exception. If there is a question pending, I will ask that you answer that question before we take our break.

Do you understand that?

A Yes.

Q Okay. Do me a favor and turn to appendix 1 in Exhibit 1. Let me know when you're there, please.

A Appendix 1, yes.

Q And appendix 1 is the first page of your life care plan in Mr. McElhiney's report; correct?

A Appendix 1 is the first page of the spreadsheet that talks about the supports and services that he will need.

Q And it is -- page 1 of your life care planning table; correct?

A Yes.

Q Let's take a step back and from a general sense, do both reports Exhibit 1 and Exhibit 2 follow the same general structure?

A Number one, I would ask you to clarify. And number two, these are both client-specific individualized reports.

Q Right. Substance aside, Plaintiff specifics aside, does the organization of both reports follow the same structure?

A Again, they are client specific and individualized reports.

Q Let's do this. Look at column 1 or the first column there, and it's titled

"SERVICE/RATIONALE." Correct?
A Yes.
Q And the next column is titled "BEGIN"; correct?
A Correct.
Q The next column is titled "DELETE"; right?
A Correct.
Q Then "DURABILITY"?
A Correct.
Q Then "PROVIDER"?
A Yes.
Q Then "ANNUAL COST"?
A Yes.
Q That structure is the same across Mr. McElhiney's report and Mr. Peterson's report; is that right?
A Yes.
Q Okay. What I want to do is I want to go through each of those columns that we just identified, and briefly can you explain to me what each one represents.
A Okay. Can you clarify where you want me to start?
Q Certainly. When you list "SERVICE/RATIONALE," explain to me the information

that falls under that column, in a general sense.
A Okay. In general, that indicates the service that is indicated for Mr. McElhiney and gives a brief description of why that service is indicated for him.
Q And what is rationale?
A The need or the indication for that service.
Q When you say "the need or the indication for that service," are you referring to an underlying recommendation from another professional?
A I'm sorry, can you repeat that?
Q Certainly. When you list a rationale next to a service, is the rationale coming from another medical provider?
A The rationale provided is an indication as to why that recommendation has been made for that individual.
Q And where would that recommendation come from?
A That recommendation can -- is going to be coming from a number of sources.
Q And what are those sources?
A It is coming -- I am making the recommendation, and I am providing the rationale or

the indication for that recommendation. And part of the information that I use in terms of providing that recommendation are the sources that I collaborate or input that I receive to help develop or identify the need for that recommendation.

Q So you provide the underlying recommendations for each of these line items that falls under service and rationale; is that right?

A I would ask you to explain that a little bit -- or clarify that a little bit more for me when you say I provide the underlying recommendation.

Q Well, as I understand your testimony, and please tell me if I'm incorrect, you just testified that you supply the recommendation; right?

A Yes.

Q Let's move to begin, the column entitled "BEGIN." Is that the year in which the future service recommendation is indicated to start?

A For the purposes of the life care plan, the services that are recommended would begin in 2025.

Q In this example?

A Yes.

Q And what does the column "DELETE" stand for?

A Delete indicates when that service would end.

Q For example, if we look at the first item there, it lists "Primary Care," correct, under "PHYSICIAN" and "MEDICAL"?

A Yes.

Q And under the "DELETE" column, it lists "L.E."; correct?

A Yes.

Q And does L.E. stand for life expectancy?

A Yes.

Q The next column there is "DURABILITY"; right?

A Yes.

Q Can you explain to me what the "DURABILITY" column represents?

A The "DURABILITY" column represents how frequently that item is indicated for the individual.

Q So if I refer to frequency throughout today's deposition with respect to the "DURABILITY" column, will you understand what I'm talking about?

A Yes.

Q The next column is the "PROVIDER" column; is that right?

A Yes.
Q Is this the costing source information identified under that "PROVIDER" column?
A Yes.
Q In other words, if a physician's name appears under that "PROVIDER" column, that does not mean that that physician recommended the service; is that right?
A Can you -- I'm sorry, just to clarify, in the "PROVIDER" column -- say that again, please.
Q Certainly. In the "PROVIDER" column, if a physician's name appears, that does not mean that that physician recommended the underlying service; is that right?
A Correct.
Q Okay. The next column is "UNIT COST"; correct?
A Yes.
Q What does the "UNIT COST" column represent?
A It represents one episode of service.
Q When you say "one episode of service," you just mean the cost of one episode of service; right?
A To clarify, for a visit or a session, yes.
Q And lastly, what does the "ANNUAL COST"

column represent?
A The annual cost represents the total cost for visits or sessions or as otherwise indicated over one year.
Q That structure and those definitions that we just discussed, that would be the same across both of your reports in this litigation; right?
A Typically. There may be instances where it's otherwise indicated.
Q Okay. In other words, it would be indicated in your report if there was any difference; right?
A Yes.
(Government Exhibit 3 identified.)
BY MR. CARPENITO:
Q I'm going to introduce what will be marked as Exhibit 3.
Ms. Hairston, have you seen this document before?
A Yes.
Q This is your notice of deposition with an accompanying subpoena and a document request; correct?
A Correct.
Q Have you produced everything listed in

attachment A, which falls after the subpoena there?
A I'm sorry. Yes.
(Government Exhibit 4 identified.)
BY MR. CARPENITO:
Q I'm going to introduce what will be marked as Exhibit 4.
A I'm sorry, did you mean for me to have two copies of that?
Q Thank you.
A Okay.
Q Take a look at Exhibit 4 and let me know, please, what you recognize this to be.
A This is my CV.
Q And keeping that CV, Exhibit 4, in front of you, if you would also turn to your CV that is attached to the back of Exhibit 1 and let me know when you have those in front of you.
A Yes.
Q Now, Exhibit 4 is an updated CV when compared to the CV attached to Exhibit 1; correct?
A Yes.
Q Tell me if I am incorrect, but my understanding is that the only update is listed under "Professional Experience" where you list "Life Care Planner/Consultant 2025 to Present"; is that

right?
A Yes.
Q Are there any other updates to your CV since you provided the CV attached to your reports in this case?
A No.
Q Who is the position with with respect to this most recent update to your CV?
A I'm sorry, can you clarify what you're referring to?
Q Well, we just identified that the update is life care planner/consultant; correct?
A Okay. Thank you, yes.
Q Who is that position with?
A I am an individual contractor, a 1099.
Q Thank you.
Are you still with The Coordinating Center for Home and Community Care, Inc.?
A I do contract work for The Coordinating Center.
Q Understood. So if I refer to The Coordinating Center for Home and Community Care, Inc. as The Coordinating Center throughout today's deposition, will you understand who I'm referring to?

A Yes.
Q Let's take a step back and just generally speaking, approximately how many life care plans have you prepared?
A Okay. Just for clarification, several of the life care plans that I prepare, some I do individually and some life care plans I do jointly with other life care plans, okay. And so just for clarification, are you referring to plans that I've done individually or plans that I've done jointly with another life care plan?
Q Let's walk through both. Let's start with individually. How many life care plans have you individually prepared?
A I am going to say between 25 to 50.
Q And then life care plans that you work on with others, how many of those have you prepared?
A 100 to 200.
Q What would be the reason or some of the reasons in which you would work on a life care plan with somebody else?
A For clarification, when I say work on a life care plan with someone else, I work -- I prepare life care plans with other life care planners in my position, in my former position at

the medical-legal department at The Coordinating Center. Often, we prepare plans jointly because we bring different areas of expertise and experience and skills to the life care plan and we can collaborate together.

Q Of the 25 to 50 life care plans that you have prepared individually, have any of those life care plans related to someone with Parkinson's disease other than the two that you have offered in this case?

A Not that I recall at this time.

Q Of the 100 to 200 life care plans in which you've worked with other life care planners, have any of those life care plans that you've worked on related to someone with Parkinson's disease, again other than the two that you've offered in this case?

A Yes.

Q How many approximately?

A Approximately five.

Q Do you recall when you would have worked on those five life care plans?

A No, I can't recall.

Q Would it have been in the last five years?

A I can't actually recall.

Q You can't say if it would have been more

or less than five years ago?

A I can say between five and 10 years.

Q Okay. If you can recall, what was the nature in which those five life care plans that related to someone with Parkinson's disease arose? How did they come about?

A At this time, I can't recall the specifics of the cases.

Q How involved were you in preparing those five life care plans?

A In preparing life care plans jointly, I am involved from the beginning of assessment of the life care plan until completion of the life care plan. With clarification, in those cases, I was not the designated expert and I did not provide testimony.

Q When you are creating a life care plan individually or jointly, do you typically conduct an interview with the person who is the subject of the life care plan?

A During my assessment of the individual, typically that includes an interview with the individual, yes.

Q Do you typically conduct those interviews in person?

A No, it's not typical. It depends on the circumstance.

Q What are some of those things that it depends on?

A Well -- I'm sorry. During COVID, a lot changed, and there may -- so for assessment and interviews, we moved to a virtual platform for many assessment and interviews. And if individuals do not live in the same particular area, it's, you know, out of a 30-, 40-, 50-mile region, interviews can be done assessment.

So it depends on the situation how best to determine to interview and get the assessment information from that individual.

Q Understood. What topics do you typically cover in these interviews?

A Can you be more specific?

Q What is the reason for conducting the interview in the first place?

A The interview is -- it's part of the assessment to identify the needs of the individual. I do use an assessment or interview tool to make sure that I capture pieces of information. But there may be pieces of information that I identify in addition to what's in the assessment tool.

Q When you are referring to an assessment tool, are you referring to some kind of like standard form?

A Yes.

Q How long do these interviews typically last?

A Can I clarify?

Q Please.

A Okay. So as I'm developing the life care plan, typically, there is an initial interview with the client, which may last two to three hours. But during the course of the interview, if there are additional pieces of information that I need to obtain from the client or clarify, I may be in touch with him at additional times as well.

So every piece of information that is used to develop the life care plan may not be contained in that initial assessment piece.

Q Thank you for that clarification.

Do you typically administer any tests during the interviews?

A Well, can you clarify what type of test are you referring to?

Q When you work as a life care planner, do you administer any kinds of tests when you prepare

life care plans?

A If there is a specific test that you're referring to, that would be helpful.

I typically use my assessment form for the interview.

Q Do you typically take notes during these interviews?

A It depends on -- it depends on the interview. There may be times all of the information I capture, I'm able to put on the assessment form. And there may be times, if there's additional pieces of information, I supplement them, you know, with notes.

Q When you interview an individual who is the subject of a life care plan, is that interview typically conducted by themselves? In other words, they're answering the questions by themselves?

A Oh, it's very individualized. It depends on each specific case. And -- it depends on each specific case.

Q So are there instances in which family members may join an interview?

A Oh, yes.

Q Are there instances in which anybody else other than an individual's family members would

join?

A There are instances where an individual may want a very close friend or -- it's specific to that individual, who they feel comfortable with sharing information and who they feel like is helpful in terms of communicating their needs.

Q When you conduct an interview, do you typically conduct that interview on your own?

A Again, it's client specific and individualized.

If I am working with another life care planner, that other life care planner may participate in that interview.

Q What would be some of the reasons in which another life care planner would join that interview with you?

A So just to clarify, at the -- working at The Coordinating Center as a contractor with The Coordinating Center, it is -- many of the cases that we work on, there are two life care planners who bring many skills, sets of experience and expertise. And so there are several cases where we will both participate in an interview to listen to what the individual has to say.

Q Is it common, when there is more than one

life care planner on an interview in the work that you do, for both life care planners to take notes during the interview?

A It's individualized and depends on what information is communicated during that interview.

Q I want to go back to my question about administering tests.

Has there ever been any point in your career when you have administered any kind of standardized test to an individual so that you can build out a life care plan?

A At this time, I don't recall a specific -- well, I'm sorry, let me back up and say that.

For clarification, you're talking about a standardized, formalized test. At this point, I don't recall that there has been any formalized, standardized test that I have administered to an individual.

Q Do you remember earlier I asked you about a form given during the interviews?

A Can you clarify? I don't typically give a form to clients. I use an assessment form as part of the interview process.

(Government Exhibit 5 identified.)

BY MR. CARPENITO:

Q I'm going to introduce what will be marked as Exhibit 5.

Ms. Hairston, will you please take a look at Exhibit 5 and let me know what you recognize that to be.

A Yes, this is the assessment tool that I have used during interviews with individuals.

Q Did you use this assessment tool during your interview with Mr. McElhiney?

A Yes.

Q Did you use this assessment tool during your interview with Mr. Peterson?

A Yes.

Q Do you still have both assessment tools with respect to the interviews that you conducted of Mr. McElhiney and Mr. Peterson?

A Can you clarify -- I'm sorry, repeat the question.

Q Well, my understanding is that you just testified that you utilized this assessment tool in your interviews with respect to Mr. McElhiney and Mr. Peterson; correct?

A Correct.

Q Do you still have possession of those filled-out assessment tools with respect to their

interviews?
A I have assessment tools that I have used in the interview, and I have, to the best that I produced to you, the documents that were requested.
Q I'm talking about the completed assessment tool.
A Yes.
Q Do you still have possession of those?
A Yes.
Q Have you provided them to Plaintiffs' attorneys in this case?
A I have provided the documents as requested of me.
Q I don't think that quite answers my question, and you can probably understand why.
I'm talking specifically about this assessment tool that have been completed with respect to Mr. McElhiney and Mr. Peterson's interviews, have you provided those to Plaintiffs' counsel in this case?
A I have provided the documents that were requested of me.
Q Were those documents, the completed assessment tools, requested of you?
A I provided this assessment tool.

Q That one there?
A Yes.
Q That one is not filled out; correct?
A This is not filled out.
Q And you have just testified you have two completed assessment tools; correct?
A Yes.
Q Okay. Where are those?
A They are not with me today. I have provided the documents that were requested of me.
Q Was one of those documents or two of those documents that you provided the filled-out assessment tools?
A I have provided the assessment tool as indicated here.
Q The blank one?
A Yes.
Q But you did not provide the filled-out assessment tools; correct?
A I have provided the assessment -- the documents that were requested of me.
Q Do you typically speak with a patient's physician when you draft a life care plan?
A Each life care plan is client specific and individualized, so it will depend on the information

that's obtained from the client and what is needed to develop the life care plan.

Q Okay. Are you aware that the United States asked for any notes associated with any of the calls that you had with Mr. McElhiney or Mr. Peterson?

A I'm sorry, say that again.

Q Yes, ma'am.

A Uh-huh.

Q Are you aware that the United States requested any notes taken during any of your calls with Mr. McElhiney and Mr. Peterson?

A I provided -- I have provided the documents that were requested of me.

Q That wasn't my question.

A Okay.

Q Is it fair to say that you're aware that the United States asked for any notes that you may have taken during your calls with either of the Plaintiffs?

A That's fair to say.

Q Would you consider a filled-out assessment tool form notes?

A This is an assessment tool.

Q Right.

A Separately I also take notes that are handwritten that are documentation of phone calls or communication I have with the individuals.

Q Okay. And when you complete one of these assessment tools, your input into the tool, would you consider that your own notations?

A I would consider that it is information that I have filled out on the assessment tool.

Q Okay. Taking another step back here with respect to your professional experience, is most of your case management experience for children or working with children?

A No.

Q Okay.

A I'm sorry, can I clarify?

Q Please.

A I have provided case management services to individuals throughout the lifespan from infants to teenagers to young adults, adults and to the elderly.

Q So when I say "children," I'm talking about anybody less than 18 years old.

Do you understand that?

A Yes.

Q Okay. If I refer to pediatric patients,

you understand that I'm referring to anyone less than 18 years old?

A Yes.

Q And if I refer to adults, you understand that I'm referring to anyone from 18 years old onward?

A Yes, we can.

Q What percentage of your case management work, approximately, has involved pediatric patients compared to adult patients? Would you like to look at your CV?

A Oh, no, I don't need to look at my CV, I'm sorry.

For the number of years that I have provided case management services to individuals, which has been for over 25 years, it has been through individuals completely throughout the lifespan, from infants all the way up to the elderly.

So I cannot say that it has been more heavily toward a particular age group. It has been through every -- through every age group.

Q Do you recall earlier you testified that individually, you have prepared somewhere between 25 to 50 life care plans?

A Yes.
Q And you also testified that when working with other life care plans, you have prepared or worked on somewhere between 100 to 200 life care plans?
A Yes.
Q Of the life care plans, those 25 to 50 that you've prepared individually, how many of those were related to adult patients?
A Honestly, I don't recall.
Q Do you recall how many of the 25 to 50 life care plans that you prepared individually related to pediatric patients?
A I don't recall, but I also want to -- again, as a certified nurse life care planner, I have worked with individuals throughout the life span, from infants to the elderly. And I cannot say that it leans any more heavily toward one particular age group.
And then I'm sorry, can we take a quick break, please?
MR. CARPENITO: Sure.
VIDEO OPERATOR: We are going off the video record. The time is approximately 9:55 a.m.
(Recess.)

VIDEO OPERATOR: We are back on the video record. The time is approximately 9:58 a.m.

BY MR. CARPENITO:

Q Ms. Hairston, would you agree that the medical management of Parkinson's Disease is typically directed by a movement disorder specialist, such as a neurologist?

A No, I am not going to agree or disagree. It's individualized, and it depends on that particular individual who is directing their care.

Q Are you aware of the title of some of the medical professionals that may direct the care, using your phrase of direct the care, for an individual with Parkinson's Disease?

A I'm aware of the titles of physicians who may be involved with individuals with Parkinson's Disease.

Q What are those titles?

A It can be a neurologist, a neurologist, yes.

Q Any others?

A Well, it depends. It's client specific, and it depends on who that individual and their primary care have determined needed to be involved in their care.

Q Outside of a neurologist and a primary care physician treating an individual with Parkinson's Disease, are there any other medical professionals that you've seen direct care for an individual with Parkinson's Disease?

A It can be any number of individuals or providers who are involved in the care of an individual with Parkinson's Disease.

Q And that's what I'm asking you. Who are some of those any number of individuals?

A Well, it is going to be individualized. There are -- for some Parkinson's individuals, there could be providers of neurology, neurosurgery, rehab providers. Again, any number of providers. I may not be recalling them all at the time. Any number of providers may be involved in the care.

Q You've mentioned a couple times now that you're a certified nurse life care planner; right?

A Yes.

Q Can you just describe for me, when you're telling me that you're a certified nurse life care planner, what does that mean? What does that entail?

A Okay. It involves the fact that I have taken an exam that identifies me as a certified life

care planner. In order to sit for that exam, I had to have been a registered nurse for three years. I had to have worked in a role preparing long-term care plans for individuals for two years. But as I did, I took a course in life care planning, 120 hours in training and life care planning, and then I sat for an exam.

Q How many years working as a registered nurse did you have in terms of years of experience before you became a certified nurse life care planner?

A I have worked as a registered nurse for over 35 years, working with individuals across the life span and in a number of settings, hospital settings, inpatient settings, outpatient settings, clinics facilities.

I am utilizing the nursing process as I continue to work as a life care planner.

Q When did you receive your RN?

A I'm sorry, I received my RN and my -- in 1984.

Q Did you receive your RN and your BSN at the same time?

A Just for clarification, when you say "at the same time," I completed my BSN program and then

sat for the exam. So it was within a six-month time period.

Q Okay. And that was done at the University of Oklahoma; correct?

A Correct.

Q And so you received a bachelor of science of nursing in 1984?

A Correct.

Q And then you sat for the exam in which you passed and obtained your RN?

A Correct.

Q Would that have also been in 1984?

A Correct.

Q Or about?

A About.

Q And then you became a certified nurse life care planner in 2011; right?

A Yes.

Q As it relates to Parkinson's Disease patients, have you ever heard of a deep brain stimulator?

A Yes.

Q Or referred to as a DBS; right?

A Yes.

Q So if I refer to DBS throughout today's

deposition, you'll understand I'm referring to deep brain stimulator?

A Yes.

Q What is your understanding of what a deep brain stimulator is?

A A deep brain stimulator is going to be a tool to help the individual manage some of the movements that they have. I'm sorry, let me clarify, some of the abnormal movements that they are exhibiting.

Q Do you agree that DBS is a surgical intervention used to improve certain symptoms associated with Parkinson's Disease?

A I'm sorry, repeat that again.

Q Would you agree that DBS is a surgical intervention that is used to attempt to improve certain symptoms that are associated with Parkinson's Disease?

A DBS is going to be used for -- on an individual basis, and the use of that device is going to have to be managed to determine how it is going to impact the movement on that individual.

Q In other words, if the DBS was thought to have no meaningful impact on an individual's Parkinson's Disease symptoms, would there be any

reason for them to attempt placement of a DBS in the first place?

MR. ROMANO: Objection to the form of the question.

Go ahead.

THE WITNESS: I mean, that's up to an individual and their physician if they're going to determine the need for placement of DBS.

BY MR. CARPENITO:

Q Right. And I'm not asking about the physician. I'm asking about what is your understanding of why a DBS would be placed in an individual.

A The DBS is going to be used for that individual, and it is going -- the individual, with their physician, will determine if it -- how it impacts their movement.

Q You've never programmed a DBS device before yourself, have you?

A No.

Q You do not manage DBS stimulation parameters; correct?

A No.

Q No, that's not correct or no, you do not do that?

A No, I do not -- I'm sorry, repeat the question.

Q You do not manage DBS stimulation parameters; is that correct?

A I do not manage the parameters.

Q Thank you, Ms. Hairston.

Do you have any understanding of how often a DBS is recommended for a Parkinson's Disease patient?

A That's a little general for me. Can you clarify what you're asking?

Q Well, earlier, you testified that you've worked on -- with other life care planners, five life care plans in which the individual who was the subject of that life care plan had Parkinson's Disease; right?

A Correct.

Q In those five life care plans, have any of those individuals who had Parkinson's Disease had a DBS?

A I don't recall the specifics of those cases.

Q Have you ever worked with a patient at any point in your career who had a DBS?

A Over the years, I have worked with an

individual with DBS. I don't remember the specifics of the case.

Q How many individuals?

A One to two.

Q Have you ever performed or prepared a life care plan for a patient where a DBS was implanted?

A At this time, I don't recall that I have.

Q Okay. Will you turn back to -- if you could turn to the first page of Exhibit 1, please. That's Mr. --

MR. ROMANO: The first page of Exhibit 1?

MR. CARPENITO: Yes, sir.

BY MR. CARPENITO:

Q Do you see in the top left-hand corner it lists "MEDICAL LEGAL SERVICES," underneath, "A Division of The Coordinating Center"?

A Yes.

Q At The Coordinating Center, are all of your life care plans for the medical-legal services division?

A Yes.

Q What is the medical-legal services division of The Coordinating Center?

A The medical-legal services division is a smaller unit of The Coordinating Center. Can I just

talk a little bit about The Coordinating Center?

Q Please, yeah.

A The Coordinating Center is a nonprofit agency located in Maryland that provides case management in care coordination to individuals with special healthcare needs and disabilities across the life care span. The Coordinating Center employs about 300 individuals who provide care case management and care coordination services through various contracts and programs throughout the state of Maryland.

The medical-legal service is a smaller division within The Coordinating Center.

Q Understood.

What are the differences, if any, in the medical-legal services division compared to The Coordinating Center at large?

A The Coordinating Center at large provides case management care coordination services. The medical-legal division provides life care plan planning and case management services.

Q The life care plans that you prepare in connection with the medical-legal services division of The Coordinating Center are for lawsuits; correct?

A I'm sorry, life care plans prepared can be used in the course of litigation, but life care plans can also be prepared for the elderly or individuals with special healthcare needs.

Q I am asking specifically about life care plans that you prepare in the medical-legal services division of The Coordinating Center.

A Uh-huh.

Q Are those life care plans prepared for litigation?

A Not all of the life care plans are prepared for litigation. We have also prepared life care plans at the request of someone who needs them for -- elderly or someone with special health needs.

Q And so in those instances in which they are not prepared for litigation, why would the medical-legal services division of The Coordinating Center prepare that life care plan?

A It is still -- it is still a medical life care plan.

Q Do you draft life care plans and prepare life care plans outside of use for litigation?

A I'm sorry, are you asking me personally?

Q Yes, ma'am.

A Or are you asking about The Coordinating

Center?

Q I'm asking you personally.

A In my work at The Coordinating Center, I prepare plans for litigation. I am also a case -- I also continue to provide case management services to individuals.

Q I'm sorry, I did not mean to cut you off.

A Yeah, within my role as my work at the life care -- at The Coordinating Center and as a contractor.

Q When you say "case management work," how does that differ, if at all, from work when you prepare life care plans in litigation?

A As a case manager, I am actively working with an individual to help them locate, monitor, and coordinate medical and community services that they need.

Q Do you prepare life care plans outside of litigation?

A I'm sorry, can you give me a time frame?

Q With The Coordinating Center, do you prepare life care plans for use outside of litigation?

A And can I ask, are you asking me personally? Are you asking if the medical-legal

department at The Coordinating Center has prepared life care plans; yeah?

Q I am asking you, Ms. Hairston, do you prepare life care plans for use outside of litigation?

A I have not prepared life care plans outside the use of litigation, outside for the use of litigation.

Q Let's go back to Exhibit 4, which is your updated CV. Let's work backwards, so let's go to the second page first, please.

Do you see Children's Memorial Hospital listed there?

A Yes.

Q In your role with Children's Memorial Hospital, did you regularly attend to patients with Parkinson's Disease?

A No.

Q In your role at Malcolm Grow Medical Center Andrews Air Force Base, did you regularly attend to patients with Parkinson's Disease?

A I don't recall that I attended -- well, I'm sorry.

Can you clarify when you say "attended"? I should have asked you that.

Q Did you provide care to patients with Parkinson's Disease during your time with Malcolm Grow Medical Center, Andrews Air Force Base?

A I don't recall that I provided care to individuals with Parkinson's Disease.

Q When you say you don't recall, does that mean you don't remember or you don't believe that you have?

A I don't recall all of the diagnoses of the individuals that I provided care to at that facility.

Q Was there anything that would help you remember?

A No.

Q During your time at Children's Memorial Hospital, going back down --

A Yes.

Q -- was there ever a time in which you recall providing care to a patient with Parkinson's Disease?

A No.

Q During your time with Children's Home Care, listed at the top there, was there ever a time that you recall providing care to a patient with Parkinson's Disease?

A Not that I recall.
Q During your time with Holy Cross Hospital, was there ever a time that you provided care to an individual with Parkinson's Disease?
A I don't recall the specific diagnoses of all of the individuals I provided care to while employed at Holy Cross Hospital.
Q Is there anything that would help you recall?
A No.
Q At Union Labor Life Insurance Company, first can you just explain generally what your roles there were?
A Yes. As a utilization nurse reviewer, I was asked to review information relative to inpatient hospitalizations and identify the medical necessity.
Q The medical necessity of what?
A Of the need for inpatient hospitalization.
Q Did you ever determine the medical necessity for medications?
A Not medications specific.
Q What was your role as a case manager at Union Labor Life Insurance Company?
A As a case manager, I provided case

management, again to individuals throughout the life span to help them access the medical and community services that they needed.

Q When you were the utilization nurse reviewer at Union Labor Life Insurance Company, did you ever make the medical necessity determination with respect to treatment for a Parkinson's Disease patient?

A I don't recall.

Q When you say you don't recall, do you say you don't remember or you don't believe that you have?

A I don't recall all of the diagnoses for the individuals that I worked with in that role.

Q Okay. Is there anything that would help you remember that?

A Not at this time that I can identify.

Q Okay. Let's start and go to your work with The Coordinating Center. It lists from 2001 to 2011, you were a clinical care coordinator; right?

A Yes.

Q In that role during that time, did you ever care for any patients with Parkinson's Disease?

A Not that I recall.

Q And from 2011 to 2025 with The

Coordinating Center, it lists you were a life care planner and care manager; right?

A Yes.

Q The five cases that you testified earlier you have worked on with another life care planner that involved an individual with Parkinson's Disease, would those five cases have taken place in that time period?

A Yes.

Q Okay. You've never given an expert opinion in an environmental exposure case before, have you?

A Can you clarify, please?

Q What's your understanding of environmental exposure?

A I just want to make sure I understand what you're asking. Can you repeat the question?

Q Yes, ma'am. You have never given an opinion as an expert witness in an environmental exposure case before; is that correct?

MR. ROMANO: I'll object to the form of the question.

Please answer.

THE WITNESS: I have not.

BY MR. CARPENITO:

Q Your prior expert opinions have been in the medical malpractice context; is that right?
A Repeat the question and let me go -- can you repeat the question, please?
Q Your prior expert opinions have been in the medical malpractice context; is that right? You can look at your testimony.
A No, I --
Q It would be attached to Exhibit 1.
A Yeah, thank you.
Q Yes, ma'am.
A I have testified in the cases as indicated here on my testimony.
Q That's right. And that does not answer my question. Do you agree with me that you've never given -- or your prior expert opinions have been in the medical malpractice context?
A Based on the information provided here, yes.
Q Any of these prior cases that you have listed here attached to Exhibit 1, did any of them involve Parkinson's Disease?
A No.
Q Do you recall what injuries they involved?
A Not at this time. I don't recall all of

the injuries.

Q Okay. But you do recall that they did not involve Parkinson's Disease; right?

A I do not recall that they involved Parkinson's Disease.

Q And what do you mean when you say that you do not recall that?

A These were not Parkinson's Disease cases to the best that I recall.

Q When being hired as an expert, you've never testified for a defendant before; is that right?

A Not that I recall.

Q In your professional capacity, have you ever published anything related to Parkinson's Disease?

A No.

Q In your professional capacity, have you ever published anything on care related to neurological disorders?

A No.

Q In your professional capacity, have you ever had any speaking engagements related to Parkinson's Disease?

A No.

Q Have you in your professional capacity ever had any speaking engagements related to neurological disorders?

A No.

Q You have a presentation listed on the second page of your updated CV. My question to you is, are there any other presentations that you've given outside of that one listed there?

A No.

Q Do you have any graduate training, Ms. Hairston?

A Can you clarify?

Q Outside of receiving your BSN from the University of Oklahoma, do you have any other graduate training or degrees?

A I completed a certification course in nurse life care planning, setting the standards in life care planning.

Q And that's listed at the top of the first page of your updated CV, which is Exhibit 4, which occurred in 2011; right?

A Yes.

Q Okay. Ms. Hairston, you are not a physician; correct?

A No, I am not a physician. I am an

experienced case manager, life care planner, registered nurse with many years of education, experience, clinical skills and expertise.

Q You are not an MD; correct?

A I am not an MD.

Q You've never attended medical school; right?

A I have not attended medical school.

Q You don't diagnose patients; correct?

A I do not provide medical diagnoses.

Q You do not diagnose Parkinson's Disease; right?

A I have not diagnosed Parkinson's Disease.

Q And you don't prescribe medications; correct?

A I do not prescribe medications.

Q Before we move on, I just want to ask you to turn back to the certification that you received in 2011, setting the standards in life care planning.

A Yes.

Q Was that online or in person?

A That was a virtual course.

Q And how did that work?

A I'm sorry?

Q Well, you stated it was a virtual course. So you completed the scholastic component online?

A It was -- it was with a -- it was a course with -- I don't want to say video, a teleconference course.

Q Did you have an instructor?

A Yes.

Q In your work as a life care planner, you do not make medical diagnoses; right?

A I do not make medical diagnoses.

Q In your work as a life care planner, you do not render any medical prognosis; right?

A The recommendations I make are based on the individual's response to the injury that they have.

Q Ms. Hairston, I appreciate that. That does not answer my question.

In your work as a life care planner, do you agree with me that you do not render medical prognosis?

A In my role as a life care planner, I work with providers of care as needed to identify the needs, the supports and services of an individual based on the response that they have had to their injury.

Q What would be one of the reasons that you need to work with a provider of care?

A I work with a provider of care, collaborate to obtain input on the anticipated needs of an individual based on the response that they have had to their injury.

Q And why do you need to work with a provider to obtain the needs with respect to a particular individual?

A It is a source of information that helps in the development of the life care plan.

Q In your work as a life care planner, you don't prescribe medications; correct?

A I do not prescribe medications.

Q In your work as a life care planner, you do not prescribe medical treatment; right?

A In my work as a life care planner, I provide recommendations to meet the needs of an individual based on the response that they have had to an injury.

Q So, for example, if a Parkinson's Disease patient needs to meet with a neurosurgeon, are you testifying that you are the one who makes that recommendation?

A I'm sorry, can you clarify? Am I -- can

you clarify?

Q Certainly. Let's turn to appendix 1 of Exhibit 1. Look at the fifth service on appendix 1 is listed as "Neurology"; right?

A I'm sorry, yes. "Neurology."

Q Underneath it lists "Specialty care"; correct?

A Correct.

Q Who is making the recommendation for neurology?

A For this particular instance, this recommendation was made by both Dr. Sherwood and Dr. Huffnagle.

Q Okay. Their names are not listed there. Do you agree with that?

A I agree with that.

Q So how would a reader of your life care plan determine that Drs. Huffnagle and Sherwood provided that recommendation?

A I would agree it is not listed here. I have documentation that Dr. Huffnagle and Dr. Sherwood provided the recommendation for the neurology care.

Q What is that documentation? Is it the questionnaires that you sent to them?

A Yes.
Q Okay. We'll get to those in a little bit.
Let's go back to some other questions. When you prepare a life care plan, you rely on medical doctors to identify what medical intervention should be included in the life care plan; correct?
A During the development of the life care plan, I -- one of the resources I use are input from providers of care to identify the services and support that an individual would need.
Q What are some of the other sources?
A I'm sorry, are you asking in general or is there -- are you referring to specific --
Q If I'm asking about particularized medical interventions listed throughout your life care plans, you're telling me that physicians or medical doctors are one of the sources that you use.
And so my question to you is, what are some of the other sources, if any?
A In general, there may be other providers of care, there may be clinical guidelines, research data. I may not be naming everything, but there may be other resources in addition to the physician that is going to provide input into the support and

services that the individual needs.

Q If a medical doctor does not recommend a particular intervention with respect to an individual in their life care plan, would you still put it in your life care plan?

A I need clarification on that. When you say "does not recommend."

Q What clarification do you need with respect to that?

A Well, are you asking have they said no, they don't need it, or is it just that they haven't provided any input on that particular recommendation?

Q Let's address both. Let's first address the example in which they say no, they don't need it. Would you still include it in your life care plan in that example?

A Well, it's very individualized and client specific, so I don't know -- again, I would need more information. I don't know if you're talking about one particular physician and their recommendation.

When I look at the life care plan and develop the life care plan, I look in total about what have all the providers of care recommended and

all of the sources -- I'm sorry, and all of the sources of information that have been used to develop the life care plan.

Q What are the other sources outside of medical providers?

A Sources of information could be clinical practice guidelines, databases, you know, published research.

Q Now let's address the example if a particular provider just hasn't addressed a specific intervention. How would you treat that situation with respect to making the decision about whether or not to include something in your life care plan?

A I'm sorry, I don't mean to be -- I would need a specific example of what you're referring to. I can't give a generalized statement like that.

Q Well, I just gave you an example when we looked at appendix 1.

A Exhibit 1? I'm sorry.

Q Yes, excuse me. Appendix 1 of Exhibit 1. If you turn back there, we can talk about that page for a moment.

So I want to compare two different services on this page. Let's first take a look at "Primary Care," and underneath it lists "Parkinson's

Disease related conditions, per Drs. Huffnagle and Sherwood."

Do you see that?

A Yes.

Q And then if we go back down to "Neurology," there's no provider listed under there; right?

A Under "Neurology."

Q Do you agree with me that there's no provider's name listed underneath that?

A There is not a specific provider listed under that.

Q And under "Neurosurgery," there is also not a specific provider's name listed underneath that?

A Correct.

Q Nor is there for "Analysis and Programming of the DBS"; right?

A Correct.

Q Or for "Battery Replacement for DBS"?

A Correct. And can I just clarify that for "Neurology," "Analysis" and "Battery Replacement," those are all indicated as to be determined.

Q Right. So for example, if a provider had not addressed one of those topics that we just

talked about but you believe it should be included in the life care plan, how would you handle that situation?

A Are you referring to this specific entry?

Q Sure --

A Which specific entry are you referring to?

Q Just by way of example, we'll take "Neurology."

A Yes, okay.

Q And if the providers had not addressed neurology in your work-up of a patient with respect to their life care plan, but you, Ms. Hairston, believed that it should still be included in the life care plan, how would you address that situation?

A For this particular situation, this neurology service was addressed by Drs. Huffnagle and Sherwood. It is not indicated on this specific entry.

Q Right. And the example that I'm asking about is, if it was not indicated by a provider and you still believed that it needed to be included in a life care plan, how would you handle that situation?

A Well, I'm sorry, that's a theoretical

situation. It's very individualized. So I would have to identify the specifics for that particular situation, and it would be -- it would be handled very individualized based on that case.

I can't give a generalized answer as how that I would -- how it would be included in the report.

Q If you disagreed with respect to something that a medical provider believed should not be included in a life care plan, do you believe that you are qualified to make medical recommendation that should be included in a life care plan?

MR. ROMANO: I'll object to the form of the question.

THE WITNESS: When I develop life care plans, I develop them with consideration with the input and information I receive from the resources that are utilized for that life care plan.

BY MR. CARPENITO:

Q Ms. Hairston, you agree with me that didn't answer my question; right?

A I can't agree with that.

Q If a medical doctor's recommendations change that you relied on for a life care plan and a medical doctor's recommendations changed after

submission of the life care plan, do you agree that your plan would need to change?

A If a provider's recommendation changed, I would need to see that information and review it and analyze it and determine its impact on the life care plan.

Q When two doctors give materially different projections about the future care required for the same patient, you can't determine which one is medically correct. Do you agree with that?

A I'm sorry, I can't agree with that whole statement. It's too general for me.

Q Okay. Well, then explain in a way in which you can answer it.

A Ask the question again, please.

Q Okay. If Dr. A says patient needs medication for five years, but Dr. B says patient needs medication for 10 years, you, as a certified nurse life care planner, can't determine whether Dr. A or Dr. B is medically correct. Do you agree with that?

A That statement is too generalized. Each case is very individualized. I have to look at all of the information together. I can't give a specific answer on that situation.

Q If a Parkinson's Disease patient undergoes DBS placement surgery after you prepare a life care plan, that would represent a material change in treatment; right?

A If new information came -- becomes available after a life care plan is issued, that information would need to be reviewed and analyzed and determined how it would impact the life care plan.

Q If a patient had a DBS placement surgery after you provided a life care plan, that's information that you would want to review; correct?

A If I am being asked to review that information, that would be information that would want to be reviewed to determine if it has any impact on the life care plan.

MR. CARPENITO: Can we go off?

VIDEO OPERATOR: Sure. We're going off the record. The time is approximately 10:41 a.m. This is the end of media number 1.

(Recess.)

VIDEO OPERATOR: We are back on the video record. The time is approximately 10:53 a.m. This is the beginning of media number 2.

BY MR. CARPENITO:

Q Ms. Hairston, earlier we talked about cases in which you have provided testimony in the past.

Do you recall that?

A Yes.

Q How many meetings with attorneys do you usually have when you prepare to give testimony?

A Well, number one, when you say "meetings," what are you referring to? Can you just clarify that question a little bit, please?

Q Ms. Hairston, what do you understand a meeting to be?

A I understand a meeting. I want to make sure I'm understanding what you're asking. Are you referring to a telephone conversation, a meeting? How many --

Q Any of the above.

A And I can't give a specific number. It's individualized based on the case.

Q How many meetings did you have with attorneys prior to your deposition today in preparation of your deposition today?

A To the best I recall, one meeting.

Q Okay. Do not tell me the substance of those conversations.

How long did those meetings last?

A To the best that I can recall, between 45 minutes to an hour.

Q And is my understanding correct that you had one meeting that lasted 45 minutes to an hour to discuss your deposition today?

A Correct.

Q Who was present?

A At that meeting, John was present and Leslie was present. I'm sorry, it was a virtual meeting.

Q Outside of that one meeting with John and Leslie that lasted for 45 minutes to an hour, did you have any other types of meetings with attorneys to prepare for today's deposition?

A Schedule for depo preparation, that was the meeting that we had.

Q Any other phone calls?

A I don't recall at this time what other phone calls I had.

Q Before today's deposition and preparing for it, did you review any videos on depositions?

A I'm sorry, can you -- did I look at other videos? Can you clarify what you're asking, please?

Q Did you review videos about giving

deposition testimony in preparation for your deposition today?

A No, I did not.

Q Did you review any audio recordings on how to provide deposition testimony in preparing for your deposition today?

A I did not.

Q Before we took the break, we were discussing DBS.

Do you remember that?

A Yes.

Q Okay. If a patient's Parkinson's Disease symptoms improve following the placement of a DBS, that would reduce the severity of their functional limitations; correct?

A That would be very individualized. I can't answer that question.

Q But it's a possibility; right? It could happen?

A Again, it's very individualized, client specific. I don't -- it would have to be determined how that DBS is impacting that individual.

Q Right. And that doesn't answer my question.

My question was it could happen that a

patient's symptoms related to Parkinson's Disease could improve following the placement of a DBS; right?

A A patient's -- following placement of a DBS, a patient's symptoms could change.

Q Do you agree that functional limitations with respect to an individual who has Parkinson's Disease can drive many of the projected services in a life care plan?

A Can you repeat the question, please? Can you repeat the question?

Q Do you agree that if an individual has functional limitations with respect to their Parkinson's Disease, it could drive many of the projected services in a life care plan?

A That would have to be reviewed on an individual basis.

Q Going back to our example, assuming that a patient's Parkinson's Disease symptoms improve following the placement of a DBS, that improvement could impact the patient's future care needs; right?

A Following placement of a DBS stimulator -- a DBS, if there were changes in function for a patient, it would have to be examined at that time and determined what their needs are.

Q And I'm asking you about the example that we just talked about in which there was a possibility discussed that a patient's symptoms could improve following DBS.

Do you remember that?

A Yes.

Q Okay. Assuming that has happened in a patient, that could change their future care interventions in a life care plan; correct?

A Assuming there were changes -- I'm sorry, I don't like to assume anything. That's theoretical.

Whatever -- whatever the status is of that individual, it would have to be reviewed and determined what their needs are at that time.

Q And assuming a patient's symptoms improved following placement of a DBS, could that affect the frequency of certain life care plan interventions?

A I'm sorry, that's a little too general for me. I don't know what life care plan interventions.

Again, whatever impact that DBS has on the individual, it would need to be reviewed and determined what their needs are at that time.

Q Do you agree that DBS can alleviate symptoms for at least 15 years?

A That's a generalized statement. I can't agree with that.

(Government Exhibit 6 identified.)

BY MR. CARPENITO:

Q I'm going to introduce Exhibit 6.

Ms. Hairston, I'd represent to you that this is a small portion of the deposition transcript of Dr. Richard Barbano, who is one of Plaintiffs' retained experts in this litigation. I'll ask that you turn to the last page. Let me know when you're there.

A Okay.

Q Do you see, I'm going to read into the record lines 20 through 23, and it starts with a question, and I quote, "Would you agree that a patient's improvements from DBS surgery can last at least 15 years?"

Dr. Barbano's answer, "Yes."

Did I read that correctly?

A You read that correctly.

Q Do you have any reason to disagree with Dr. Barbano at this point?

MR. ROMANO: I'll object to the form of the question and this entire line of questioning about disagreeing with a physician.

Go ahead.

THE WITNESS: What I would say is this is not the type of setting for me to read information that is just being introduced to me and analyze it and make any type of comment on it.

BY MR. CARPENITO:

Q You're aware that Dr. Barbano is one of the Parkinson's Disease experts hired by Plaintiffs attorneys in this litigation; right?

A I am not familiar with Dr. Barbano.

Q Can you look -- turn to page -- the second cover page of Exhibits 1 and 2, please. And if you look at the second paragraph of both of those exhibits, they discuss that you received input from Mr. McElhiney's treating providers and Mr. Peterson's treating providers.

Do you see that?

A Yes.

Q Are there any other treating providers in either case that you received input from in formulating your life care plans in these cases that are not listed here?

A Not that I recall. I don't have any information from any other treating providers.

Q If you did, it would be listed in your

report; right?
A It would be.
Q And you obtained at least some of that input by sending written questionnaires to certain providers; correct?
A Correct.
Q And some of those providers completed and returned questionnaires to you; right?
A Well, I'm sorry, when you say "some of those providers," I don't --
Q Did you provide questionnaires to all of them?
A I have identified the providers of care that I reached out to and what I received from them.
Q Did you send a written questionnaire to every provider identified on the second page of each of these reports?
A Let me look at them individually.
And so just for clarification, for Mr. McElhiney, I sent questionnaires to Dr. Huffnagle and Dr. Sherwood. For Mr. Peterson, I sent questionnaires to Dr. Kumar. I had conversations with the other providers.
Q And the other providers would be the speech therapist Ms. Celia Lyons; correct?

A The speech therapist and the physical therapist.
Q Ms. Ellen Markwell; right?
A Yes.
Q Did you send any type of questionnaire to Mr. Eric Anderson?
A No.
Q So I'm just trying to understand the process here. So we'll take Mr. McElhiney, for example.
You sent questionnaires to Drs. Huffnagle and Sherwood; correct?
A Yes.
Q And then they completed those questionnaires and sent them back to you; right?
A Yes.
Q Did you at any point in time send a draft of your life care plan back to those providers after you received their answers to the questionnaires?
A No.
Q Okay. And would that process have been the same with respect to Mr. Peterson's report?
A The question being did I --
Q After you received input from the individuals listed in the second paragraph on the

second cover page of your report in Mr. Peterson's case, did you at any point after receiving that input send your life care plan back to those providers or other individuals to receive their confirmation of the life care plan?

A No, I did not send the life care plan. But may I clarify, please?

Q Yes.

A With Dr. Huffnagle, I did require some clarification on questions, so there was a second questionnaire that was sent out. And with Dr. Kumar, I provided him a summary of the conversation and asked him to review that and provide any additional commentary.

Q Right. But I'm saying the life care plan specifically, none of those individuals reviewed it after you received their input?

A I did not send it to them.

Q In your life care plans that you work on, are you ever the source of the underlying recommendation or service for daily care from CNA services?

A Can you repeat the question?

Q Yes. Let's go to appendix 1 of Mr. McElhiney's report, which is Exhibit 1. And I

think I told you appendix 1, but we should turn to appendix 8, I'm sorry.

A Okay.

Q Ms. Hairston, before we look at that I should ask, going back to the line of questions that we were just discussing with respect to whether or not you sent your life care plan back to those individuals after receiving their input. Do you remember us discussing that?

A Yes.

Q Was there anybody else who would have sent your life care plan back to those people after you received their input?

A Not within my organization.

Q Okay. Are you -- okay.

Are you aware of anybody else?

A I am not aware of anyone else.

Q Okay. Looking at appendix 8 of Exhibit 1, do you see listed under "DAILY CARE," there is a service of "CNA"?

A Yes.

Q Are you ever the source of the recommendation of that CNA care when you prepare a life care plan?

A Again, each individualized -- each life

care plan is individualized, so depending on the information that has been obtained, I utilize input that I have received from resources involved in the -- of the plan of care along with my experience, expertise, and knowledge of the area.

Q How did you first hear about the Camp Lejeune water litigation?

A I'm sorry, in this particular litigation? Which -- I'm sorry, can you be a little bit more specific?

Q The Camp Lejeune water litigation.

A I mean, I've seen about it on TV.

Q Okay. How did you first hear about Mr. McElhiney and Mr. Peterson's case?

A While as an employee at The Coordinating Center, my medical director presented the information to these cases to me and asked if I would like to work on the case.

Q When did that occur?

A Quite honestly, I don't know the exact date that that occurred.

Q It would have been sometime before February 5 of 2025; right?

A Yes.

Q Would you agree that it probably occurred

sometime in 2024?

A Yes.

Q Okay. Who, without telling me the substance, who contacted you from Plaintiffs counsel?

A I'm sorry, I was just -- are you referring to about the case initially?

Q Yes, about these two cases.

A Again, my work typically I am -- agree to or identify work that I'm going to work on after conversations with the medical-legal director of the med legal department at The Coordinating Center. So at what point in time she spoke with the attorneys office, I don't exactly know. I get the information from her, and we've talked about it.

From there, I begin work on the case.

Q So your assignment came from that individual at The Coordinating Center? Am I understanding that correctly?

A Yes.

Q Your assignment didn't come directly from the attorneys?

A She initially communicated with the attorneys about the case.

Q And then she informed you of what she

thought the project should be?

A And then we've talked -- we talked about is this a case, Kay, you would like to work on.

Q Did you -- again, do not tell me the substance.

Did you ever speak with them about your understanding of what they were asking you to do?

A Oh, yes. After the case was assigned to me, then I began communications with the law office, okay.

Q What did they -- what was the assignment that you were asked to do?

A I was asked to prepare a life care plan to identify the supports and services that the individuals need based on their response to the injury.

Q Do you have any understanding as to why you were assigned two cases that dealt with Parkinson's Disease?

A I'm sorry?

MR. ROMANO: Without revealing any communications with the attorney.

THE WITNESS: I'm sorry, are you asking, for clarification, a communication -- how the cases came to The Coordinating Center, how the cases came

to my medical director?

BY MR. CARPENITO:

Q I'm asking if you have an understanding, without disclosing any conversations, substance of that, that you may have had with attorneys, do you have an understanding as to why you were asked to work on two cases that dealt with Parkinson's Disease?

A I was asked to work on two cases to provide a life care plan and identify the supports and services that these individuals needed now relative to the Parkinson's Disease.

Q So is the answer to my question no, you don't have an understanding as to why?

A That is what I was asked to do for these cases.

Q Do you have an understanding as to why you were asked specifically to work on Mr. Peterson's case?

A I was asked to work with Mr. Peterson to identify the supports and services that he needed and develop a life care plan.

Q Is that the same with respect to Mr. McElhiney?

A Yes.

Q Did you ever have questions about your assignment or what you were asked to do?

A Can you be more specific, please? I'm sorry.

Q Did you ever questions about what the attorneys were asking you to do with respect to your expert work in this litigation?

A Well, I was asked to prepare a life care plan for both of these individuals that speaks to supports and services that they need relative to the response they have had to their injuries.

Q I'm not asking what you were asked to do. I'm asking if you ever asked the attorneys questions about the scope of your assignment.

MR. ROMANO: Objection. That would all be attorney-client privileged.

BY MR. CARPENITO:

Q Are you going to take your counsel's instruction?

A Right now I would have to ask you to repeat the question so --

Q Without telling me the substance of any questions, if any, my question was did you ever have any questions about the assignment that the attorneys asked you to provide in this litigation?

A I was asked to develop a life care plan that speaks to the supports and services that these -- that Mr. McElhiney and Mr. Peterson need relative to their injuries associated with the Parkinson's Disease.

Q Did you agree to serve as an expert before reviewing any documentation with respect to Mr. McElhiney or Mr. Peterson?

A I'm looking like that, I'm sorry.

Again, I work on cases as my medical director and I agree that, you know, is it appropriate or if I would like to work on the case. So I don't have an answer to that question.

Q You don't remember if you reviewed any documentation with respect to Mr. Peterson or Mr. McElhiney before you agreed to serve as an expert witness?

A I don't believe I -- there was any -- I'm sorry. What documentation are you referring to?

Q Any documentation with respect to either of the Plaintiffs.

A I don't recall there was any specific documentation presented to me about the cases other than you're being asked to prepare a life care plan.

Q If we can look at the first cover page of

Exhibit 1, please. The first sentence of that first paragraph reads, "Enclosed you will find The Coordinating Center's preliminary life care plan on behalf of your client, Gary McElhiney."

Did I read that correctly?

A Correct.

Q Was there anyone else involved outside of employees from The Coordinating Center that worked on this life care plan?

A As identified in the report, the resources that were used in development of the life care plan are identified. Outside of individuals at The Coordinating Center, there was no one else involved in the development of the life care plan.

Q It says that this is a preliminary life care plan; correct?

A Correct.

Q Is this not a final version?

A This is a plan that is based on the information available up until the time the report was issued. Should there become additional information available or if the case continues on to trial, if there is any new information available, you know, the plan -- that would be reviewed and determined if there would be any supplement to the

plan.

Q Okay. In other words, this is not a final life care plan; is that right?

A This is a preliminary life care plan.

Q The third sentence of that first paragraph reads, "This plan was developed consistent with published standards of practice and with my regular practice in life care planning."

Did I read that correctly?

A Correct.

Q What published standards -- let me back up.

What publications are you referring to?

A At the American Association of Nurse Life Care Planning Scope and Standards of Practice, along with the methods that are consistently used within my life care planning practice.

Q What are the standards that you're referring to in that paragraph?

A The standards -- American Association of Nurse Life Care Planning Scope and Standards of Practice, which is a publication.

Q You also state that your plan reflects your regular practice in life care planning; correct?

A Yes.
Q When you use the phrase "regular practice," that does not mean Parkinson's Disease specific practice, does it?
A It means -- it indicates the methods that are used in my practice to develop a life care plan.
Q Ms. Hairston, I'm going to ask you to answer my question.
When you use the phrase "regular practice," that does not mean Parkinson's Disease specific practice; correct?
A It does not -- it includes -- it is referring to the recommendations that an individual needs based on the response to the injury that they have had.
Q Do you remember earlier we talked about individually when you've prepared life care plans, the number of those life care plans was between 25 to 50; right?
A Correct.
Q When you work on life care plans of other life care planners, you approximated that number of life care plans was 100 to 200; correct?
A Correct.
Q So you would agree, then, that we are

somewhere between total, whether it's individually you creating a life care plan or together, 125 to 250 life care plans that you have either created or worked on; right?

A Yes.

Q Okay. And you also testified that of that 125 to 250 life care plans, only five dealt with somebody with Parkinson's Disease; correct?

A Yes.

Q Okay. So my question to you, when you state that this reflects your regular practice, your regular practice does not mean Parkinson's Disease specific practice. Would you agree with that?

A It is not only Parkinson's Disease clients, yes.

Q It does not mean neurology-focused practice; right?

A Well, it's individualized. It depends on if a -- you know, an individual's response that they have had to the injury and what service is indicated for them.

Q Do you agree that this plan applies the same general life care planning framework that you use in all your cases, regardless of the diagnosis?

A It is individualized and client specific.

Q Do you use the same methodology that you use in other life care plans?
A Yes.
Q We'll turn to the second page, second cover page there on Exhibit 1. Thank you. The first paragraph, last sentence there reads, "As part of the evaluation process, medical records provided by the law office were reviewed and are listed at the conclusion of the narrative portion of this evaluation."
Did I read that correctly?
A Yes.
Q Did you ask for any medical records besides what Plaintiffs counsel provided to you?
A At this time, not that I can recall.
Q In other words, you did not ask for medical records besides what Plaintiffs counsel provided to you; is that right?
A At this time, not that I can recall.
Q Do you agree with me that you did not ask for additional medical records besides what the Plaintiffs attorneys provided to you?
A At this time, not that I can recall.
Q Were there any records that you didn't have but wanted access to?

A Not that I can recall.
Q For either case?
A Not that I can recall.
Q Is there anything that would help you recall?
A Not at this time.
Q Let's look at both Exhibits 1 and 2, and we're going to turn to page 17 of those.
This is your section entitled "Records Reviewed." Correct?
A Correct.
Q And you don't identify the Bates number for these records on these pages; right?
A Correct.
Q Looking at your report on Mr. McElhiney specifically, your report states that you reviewed records from Dixon Medical Association from February 11, 2016, to March 11, 2024; right?
A As listed there, yes.
Q Have you received any records from Dixon medical associates after March 11, 2024?
A Not that I recall.
Q Looking at the same page, you have Department of Veterans Affairs records beginning August 9 of 1999; correct?

A Yes.
Q Are you aware that Mr. McElhiney's VA records predate 1999?
A At this time, I would have to respond it's what's listed here on this records review. I don't recall any other time frames.
Q In other words, you didn't request any VA records related to Mr. McElhiney that predate 1999?
A Not that I recall at this time.
Q And you did not note in your report that VA records with respect to Mr. McElhiney predating 1999 were unavailable to you, did you?
A At this time, not that I recall.
Q Are you aware that Mr. McElhiney also has medical records from his time with the United States Marine Corps that predate 1999?
A At this time I'd have to defer to the records review as listed in the report.
Q You did not request Mr. McElhiney's records from his time at the United States Marine Corps that predate 1999, did you?
A I did not request them.
Q Did anybody request them from Plaintiffs counsel and provide them to you?
A I'm not aware of -- the records that I'm

aware of, I have to defer to what's listed here in the records review at this time.

Q Will you turn to page 5 of Exhibit 1. Let me know when you're there.

A Page 5, yes.

Q Could you look at the last paragraph on that page. The first sentence reads "Mr. McElhiney acknowledged that prior to his Parkinson's disease, he experienced low back pain."

Did I read that correctly?

A Correct.

Q If those VA records that predate 1999 relate to the back pain Mr. McElhiney has now, would those records have been relevant to your analysis?

A Can you repeat the whole question again, please?

Q You recall we were just talking about Mr. McElhiney's VA records; right?

A Correct.

Q Okay. If those VA records that predate 1999 relate to Mr. McElhiney's back pain, would those records have been relevant to your analysis in his case?

A Well, it's -- records would need to be reviewed on an individual basis and analyzed and

determine the impact on the development of the life care plan.

Q That doesn't answer my question.

A Okay. Would you like to ask again?

Q Yes. If those VA records that we just discussed that predate 1999 relate to Mr. McElhiney's back pain, would those records have been relevant to your analysis in this case?

A Any information available can be reviewed and analyzed and determined how they would impact or be involved in the development of the life care plan.

Q If Mr. McElhiney's medical records from the United States Marine Corps that predate 1999 also relate to Mr. McElhiney's back pain, would those records have been relevant to your analysis in this case?

MR. ROMANO: Objection to the form of the question.

Go ahead.

THE WITNESS: Information that is available to review would be reviewed and analyzed and determined how it would impact the development of the life care plan.

BY MR. CARPENITO:

Q That's right. So you would need to review those records to make that determination; right?

A If there are records available, records could be -- records would be reviewed and analyzed and determined if they would be -- impact the development of the life care plan.

Q Would you need to review the two sets of records that I've just asked you multiple questions about to determine whether they would be relevant to your analysis in Mr. McElhiney's case?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: I -- if there are records available -- is there something specific that we're talking about in the medical records or --

BY MR. CARPENITO:

Q My question stated to you was if they related to his low back pain.

A So relative to his back pain, I mean, it's talked about in the report that he acknowledged that he's had low back pain, and with the appropriate medical interventions and management, he maintained an independent lifestyle.

Q For life care plans that you author, is it important -- is it an important part of your

analysis to consider a patient's historical consumption of medical services?

A That's a very generalized question. I would need something more specific as it relates to the development of the life care plan.

Q So when I say a patient's historical consumption of medical services, I'm talking about whether or not they have utilized a particular medical service in the past.

Do you understand that?

A Yes.

Q For life care plans that you author, is it important for you to consider the patient's historical consumption of medical services, yes or no?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: Medical services, I would need something more specific. Medical services specific to what? I mean, that's a very generalized.

BY MR. CARPENITO:

Q Let's take therapy, for example. If you recommended one session of therapy a week for an individual, would you also want to know historically

has this individual gone to therapy one time a week?

A Again, that is very generalized. There are multiple factors that would need to be looked at in terms of reviewing when they had therapy, how much therapy they had, the outcomes of the therapy and how it's relevant to the response that they're having to the injury at the time the report is developed, and other factors that I might not be mentioning at this time.

Q If a patient has never historically utilized a particular intervention, is that something that you would want to account for before projecting it into the future?

A It depends on what that -- I would need something more specific. That's very general.

Q That's fine. In life care planning, it's common for pricing data to be reported by percentile; right?

A That's very general. I don't know what you're --

Q In other words, life care planners typically cost out within a certain percentile range; right?

A That's extremely general. I would need to --

Q Do you as a life care planner cost out your sources within a particular percentile?

A It depends on the service that I'm looking at, and that's still a very general statement. I cannot say that there is a particular percentage that I typically use in the development of the life care plan.

Q Can you identify the percentile that you used in these life care plans?

A Well, can you please refer to the specific service that you're talking about?

Q So is your opinion that the percentage used changes depending on the particular line item in your life care plan?

A No, I'm not going to agree to that either. I would need to ask what particular service are you referring to.

Q Let's go to appendix 1.

A For which exhibit?

Q Great question. Exhibit 1, Mr. McElhiney.

MR. ROMANO: The front of the appendix?

MR. CARPENITO: Yes, sir, appendix 1.

BY MR. CARPENITO:

Q So let's take primary care listed there. And your unit cost is listed as $291; right?

A Correct.
Q What percentage did you use in costing out primary care?
A That is the actual cost of the service.
Q Right. But when you use a percentile-based price, it allows the reader of the life care plan to understand where within the market the pricing falls; right?
A Uh-huh.
Q My question is, what is the percentages that you used in your reports in these cases?
A Okay. For that particular cost, it is not reflected as a percentage cost. My -- our -- my methodology is to contact the provider that is providing services and asking what is the cost for him to come and visit you.
Q So you call Dixon Medical Associates and say what does it cost Mr. McElhiney to come and have a primary care physician visit with you; is that right?
A Yes.
Q Okay. Turn to appendix 2, please. Do you see podiatry listed about halfway down the page?
A Yes.
Q You see the unit cost is 60 to $199?

A Yes.
Q What percentage did you use there?
A Again, in my practice, if an individual does not have a particular provider, we survey providers within close proximity to that individual and identify the cost for him to come in and receive treatment.
Q Right. And based on those costs, what are the percentages that you used?
A These are the actual costs, so it is a range of the actual cost of the providers from the lowest cost that was obtained to the highest cost that was obtained.
Q I see, okay. For any line item where you used a range of providers, how many providers are you contacting?
A Typically in my practice, we will contact at least three providers to get the range of costs. If there are three providers available in that area.
Q What if there's not three providers available?
A If there's not three providers within proximity for this individual to travel to, we use the costs for the providers that are available to that individual.

Q What if there are more than three providers available?

A What is consistently done in my practice is we will contact three providers.

Q How do you choose those three providers?

A Typically, we look at the proximity of the providers to the individual and will contact three providers that he can get to within at least 30 minutes.

Q Do you do any type of analysis to compare to other providers in close proximity in a situation where there's more than three available to compare pricing to see if there are lower prices available?

A Typically, we will -- I will -- and the individuals will identify three providers. I will look at the pricing for those three providers. If it does not appear reasonable or with a typical range for that service area, it is analyzed, but --

Q How do you determine what's reasonable?

A Look at the cost.

Q And what are some of the things that you're looking for when looking at the cost?

A Typically in my practice, we are going to look at three providers that are within close proximity to the individual.

Q In other words, there is no discrimination of the criteria that you used to choose one provider over the other in your report; right?

A As what is typically done consistently in my practice is we are going to identify providers who can provide the service indicated and are within proximity for the individual to travel within 30 minutes or less.

Q Other than proximity, there's no methodology anywhere, anywhere in either of these reports, in which you state how you choose the providers; correct?

A Typically, we're going to identify three providers that are within the service area of the individual.

Q Your reports don't explain the number of providers that are identified for each of the line items in which there is a range of costs; right?

A I'm sorry, say that again.

Q Do your reports anywhere explain the number of providers that you contact to provide your range of costs?

A It is not indicated on this report.

Q It's not indicated in Mr. Peterson's report either, is it?

A Let me look. He has range of local providers as well.

Q And so in Mr. Peterson's report, you also agree that your reports don't explain how many providers were contacted to generate a range?

A So let me clarify.

For each line item, there may be a range of local providers and other -- and on other line items, there are specific providers identified.

Q I understand that. We've been talking about the line items in which there is a range of pricing identified.

A Yes.

Q And those examples, across both reports, your reports do not explain how many providers were contacted to generate the range of cost; correct?

A It is not reflected on the report. It is typical in my practice that three providers will be contacted.

Q Turn to appendix 2 of Mr. McElhiney's report, which is Exhibit 1.

A Appendix 2?

Q Yes, ma'am. And you see at least three of those line items list a range of providers; right?

A Yes.

Q And those same three line items list a range of unit costs; right?
A Yes.
Q And the title of appendix 2 is "PHYSICIAN/MEDICAL CONT."; correct?
A Correct.
Q If you will please then flip to page 18 in Mr. McElhiney's report.
A I'm sorry, page?
Q 18.
A Page 18.
Q Yes, ma'am. This is your resources page; right?
A Correct.
Q And these are some of the providers that you contacted in the process of filling out your life care plan; correct?
A Yes.
Q I count under "Physician/Medical" 14 different providers listed there.
Do you see that?
A Okay. Yes.
Q Do you agree with that number?
A Yes.
Q And if you turn back to appendix 2, your

report does not tell us which of those providers were contacted to generate the range of which you provided.

Do you agree with that?

A Yes.

Q Okay. And the same would be true in a similar example for Mr. Peterson's report; correct?

A Well, if I can clarify.

Q Yes, ma'am.

A The resources that were contacted are listed in the report. They have not been identified specific to each line item.

Q So how is a reader of your life care plan supposed to understand which resources were contacted to generate these ranges?

A Yes, the resources are listed in the report. They are not specifically identified per line item on the appendix.

Q But you agree that you just testified that your typical practice is to contact three of them; right?

A Typical practice, when available, we'll contact three providers within close proximity.

Q Yes, ma'am. And you just testified that there's 14 providers there listed under

"Physician/Medical"; right?
A Yes.
Q So are you telling the reader of the life care plan to call every single one of those 14 providers to figure out how you calculated your range?
A Well, the resources are listed in the report.
Q Your report does not factor in whether insurance or Medicare would cover any of these costs; right?
A The costs listed are the prices obtained from the providers that were contacted.
Q So is the answer to my question no, it does not consider that?
A It is -- it reflects the costs that are charged by the providers of care.
Q Before insurance or Medicare would cover costs; right?
A These are the -- this is what is charged by the providers.
Q Did you take into account whether Mr. McElhiney's or Mr. Peterson's services anywhere in either of these reports have previously been covered by insurance or Medicare?

A When -- as I develop reports, I never have any indication that an individual will continue to be eligible for a particular type of medical coverage, nor will that particular coverage exist for whatever time period. And the costs that are reflected in the report are the costs that are charged by that provider.

MR. CARPENITO: Understood. Ms. Hairston, why don't we take a break.

VIDEO OPERATOR: We are going off the video record. The time is approximately 11:52 a.m. This is the end of media number 2.

(Recess.)

(Whereupon, at 11:52 a.m., the deposition was recessed, to be reconvened at 12:45 p.m. this same day.)

AFTERNOON SESSION (12:45 p.m.)

Whereupon,

KAY FRANCES SEARS HAIRSTON

resumed the stand and, having been previously duly sworn, was examined and testified further as follows:

VIDEO OPERATOR: We are back on the video record. The time is approximately 12:45 p.m. This is the beginning of media number 3.

EXAMINATION (Continued)

BY MR. CARPENITO:

Q Ms. Hairston, if you will grab Exhibit 1 again and turn to appendix 2.

A Yes.

Q Do you recall before the break, we were talking about these line items on appendix 2 where you have a range of unit costs listed?

A Yes.

Q And next to "PROVIDER," you have a range of local providers listed; correct?

A Yes.

Q Did you conduct any research to determine, in instances in either report where you have a range of local providers and a range of unit costs, did you conduct any research to determine whether the

pricing was representative of the broader market?

A Can you explain or clarify when you say "broader market"?

Q Did you compare the prices from the providers that you identified to any other providers in the market in the locale in which either of the Plaintiffs reside?

A As indicated previously and as is typical in my practice, we identified the cost of providers that were in close proximity to the individual.

Q So is the answer to my question that you did not conduct any research to determine whether the providers that you list on your resources page was representative of the broader market?

A I don't know how you -- again, that's a general statement. I don't know how you define broader market in comparison to identifying three providers that were identified within range of a close proximity of the individual.

Q Your resources list does not identify which specific provider supplied which specific cost in your life care plan; correct?

A For some of the resources identified in the report, the names of the providers are listed and can be correlated with some of the line items on

the spread.

Q I'm asking specifically in instances across either report where you use a range of local providers, your resources list or your life care plan table does not identify which specific provider supplied which specific cost; correct?

A The list of the resources are listed in the report, and they are not identified on each line item.

Q Okay. So, for example, let's look at appendix 2. Do you see podiatry listed on appendix 2 of Exhibit 1?

A I do.

Q Do you see range of local providers there?

A Yes.

Q Do you see the cost -- the unit cost range of 60 to $199?

A Yes.

Q And if you'll turn to page 18, on your resources, please tell me which of those resources listed under "Physician/Medical" correlates to the range of costs that you have for podiatry on your appendix 2.

A Based on the information provided to me for podiatry, the costs would be Advanced Foot &

Ankle Care centers and Ankle & Foot Centers of America.

Q Okay. Is there any identification in appendix 2 that those are the providers where that cost comes from?

A No.

Q Are you familiar with Context for Health?

A The name -- I've heard of the name, yes.

Q What do you understand Context for Health to be, the organization?

A My understanding, Context for Health compiles data, statistics and analysis.

Q With respect to what type of information?

A Medical services.

Q Billing costs?

A I am not -- I am not familiar with all the specifics of the data provided by that source.

Q Have you ever heard of Physicians Fee Reference?

A I have heard of it, yes.

Q What is your understanding of what Physicians Fee Reference is?

A Again, they provide data, statistics and analysis of costs of services.

Q What about FAIR Health?

A FAIR Health provides data, statistics and analysis of medical services based on a vast number of claims.

Q Do you agree that Context for Health is a reliable costing source used in the field of life care planning?

A Context for Health is a good source of information.

Q For costing sources in the field of life care planning; correct?

A For costing services.

Q In the field of life care planning?

A The resources that I have identified in my report are the resources that I typically use when developing a plan of care.

Q I understand that. But I want to talk about these three.

A Okay.

Q So do you agree that Context for Health is a reliable costing source in the field of life care planning?

A It is a cost that is used. I have not used it frequently.

Q Do you agree that Physicians Fee Reference is a reliable costing source in the field of life

care planning?

A It is also a resource that is used in the field of life care planning.

Q And for FAIR Health, would you agree that that is also a costing source in the field of life care planning?

A It is a resource used in the field of life care planning.

Q Turn to appendix 1 in Exhibit 1, please.

Looking at appendix 1, the provider listed for the neurology service, you have FAIR Health and VA Vanderbilt; correct?

A Correct.

Q If you turn to appendix 2, you have FAIR Health listed as the provider for associated physicians fee; correct?

A Correct.

Q Other than those entries on appendices 1 and 2 in Exhibit 1, you do not list FAIR Health anywhere else in Mr. McElhiney's life care plan tables. Would you agree with that?

A I would agree with that. Yes.

Q Do you agree that you do not list Context for Health anywhere in Mr. McElhiney's life care plan tables?

A I do not list Context for Health in the tables.

Q Do you agree that you do not list Physicians Fee Reference anywhere in Mr. McElhiney's life care plan tables?

A I do not list Physicians Fee Reference in Mr. McElhiney's life care planning tables.

Q If you will turn to appendix 1 of Exhibit 2, which is your report in Mr. Peterson's case.

A I'm sorry, appendix -- which appendix?

Q Appendix 1, please.

Do you see Physicians Fee listed as the provider for the battery replacement for DBS service?

A Yes.

Q Other than that entry in Mr. Peterson's case, you do not list Physicians Fee anywhere else in this life care plan; correct?

A So I'm sorry, just for clarification, when you're referring to Physicians Fee, what is your definition or what are you using as Physicians Fee?

Q Is Physicians Fee the same thing as Physicians Fee Reference?

A No.

Q Okay. So in other words, you don't list

Physicians Fee Reference anywhere in your life care plan for Mr. Peterson?

A No.

Q And it's also true that you do not list Context for Health anywhere in Mr. Peterson's life care plan; correct?

A I do not.

Q And you do not list FAIR Health anywhere in Mr. Peterson's life care plan; correct?

A I have not used FAIR Health in Mr. Peterson's life care plan.

Q Are you aware that Plaintiffs counsel retained another life care planner in this litigation?

A No, I'm not aware.

Q You're not aware that Plaintiffs retained Mr. Michael Fryar in this litigation?

A No.

Q So is it safe for me to assume, then, that you have not had any calls with Mr. Fryar?

A I have not had any calls with Mr. Fryar.

Q Do you -- you also would not know that Mr. Fryar uses Context for Health?

A I am not familiar with what Mr. Fryar uses.

Q He also uses Physicians Fee Reference as a costing source in his life care plans. Did you know that?

A I am not familiar with what Mr. Fryar uses.

Q And Mr. Fryar uses FAIR Health. You also didn't know that; is that right?

A I'm not familiar with that.

Q So you would agree that if Mr. Fryar uses a different costing source than you do, that you two could prepare life care plans for the exact same individual and it's possible that the projected cost of those plans for that same individual would be different?

A They're going to be individualized. Yes, they may be different.

Q Let's talk about the "SERVICE" and "RATIONALE" columns in your plans.

A I'm sorry, can I make a clarification on the previous question?

Q Sure.

A Yeah, they're individualized. And yes, they may be different based on the information and resources that were used in the development of the life care plans.

Q If you will turn to appendix -- we can look at appendix 1 of Exhibit 1.
A Appendix 1?
Q Yes, ma'am. So looking at the "SERVICE" and "RATIONALE" column, that column, at least in part, is intended to explain the service that is included in the life care plan; right?
A Yes.
Q And that service could be primary care visits; correct?
A Yes.
Q That service could be cardiology; right?
A Yes.
Q That service could be neurology?
A Yes.
Q The "SERVICE" and "RATIONALE" column also at times provides who recommended the underlying service; right?
A Yes.
Q For example, in "Primary Care," it says "per Drs. Huffnagle and Sherwood"; right?
A Yes.
Q And when you include the provider's name there, you're signaling to the reader that the recommendation comes from that provider; right?

A It signals that that provider provided input into the recommendation, yes.

Q And we touched on this briefly earlier, but I need to make sure that I understand.

For other service line items in that same column, there are times throughout both reports in which there's no doctor's name listed. You would agree with that; right?

A I would agree. I would also want to refer to the specific service that you're talking about.

Q Well, earlier we used as an example neurology. If you look at that, you agree with me that there's no doctor's name listed under "Neurology"; right?

A There is no doctor's name listed under "Neurology."

Q Right. And when you compare that with "Primary Care," where "per Drs. Huffnagle and Sherwood is listed," my question to you is, how is a reader of your life care plan supposed to distinguish when there is a provider recommending the underlying service and when there is not?

A In most of the line items, the input that was received in terms of identifying that recommendation, the physicians are noted. There may

be a line item where that physician or -- who provided input or the source that provided into that recommendation is not noted.

Q So if a physician's name is not explicitly listed for a particular service, does that mean that the underlying recommendation did not come from another individual?

A I will -- it is not always consistent in each category. If I could just say, for instance, under "MEDICATIONS" and "SUPPLIES" --

Q What appendix are you on?

A I'm sorry, under appendix 3.

Q Yes, ma'am.

A Under the "SERVICE/RATIONALE," "MEDICATIONS" and "SUPPLIES," a physician is not listed under the rationale for each one of those recommendations. But the recommendations did come from the physicians as these are the prescribed medications that Mr. McElhiney is receiving.

Q But where is that information so that a reader of your life care plan can go and point to and go, okay, on appendix 3, I know that midodrine is coming from this underlying physician?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: There is a question. For clarification, someone can ask me. But it is not the particular physician or source of who provided input into that recommendation is not listed on each and every line item.

BY MR. CARPENITO:

Q Is there any service recommended in either of these reports where you, Ms. Kay Hairston, are the one recommending the service, aside from a physician or other medical professional recommending that service?

A Well, I can go by line item and identify -- are you referring to any particular item?

Q I'm referring to any line item in either of these reports in which there is not a physician's name listed next to the service or under the service.

A And for clarification, you're asking if a particular physician or provider of care has provided input into that recommendation?

Q Turn to appendix 8 of Exhibit 1, please. Do you see "CNA" there?

A Yes.

Q And there's no physician's name listed

under "CNA"; correct?
A There is not a physician's name listed under "CNA."
Q There is not any medical professional's name listed under "CNA"; correct?
A Correct.
Q And do you see "Skilled Nursing"?
A Yes.
Q And there is no medical professional's name listed under "Skilled Nursing"?
A It is not listed on the tables.
Q And you see "Respite Care"?
A Yes.
Q There is not a medical professional's name listed under "Respite Care"?
A Correct.
Q And if you see "Companion Care" there too?
A Correct.
Q There is not a medical professional's name listed under "Companion Care," is there?
A There is not.
Q Are you the source or the rationale for the recommendations of CNA, skilled nursing, respite care and companion care?
A In collaboration with Drs. Huffnagle and

Dr. Sherwood, as well as my experience, education and expertise, the level of care or the indication for CNA was identified as a recommendation.

Q Right. And I want to turn to -- I'm going to introduce what's going to be marked as Exhibit 7.

(Government Exhibit 7 identified.)

BY MR. CARPENITO:

Q Ms. Hairston, can you take a look at that and let me know what you recognize it to be.

A This is the questionnaire that was sent to Dr. Huffnagle.

(Government Exhibit 8 identified.)

BY MR. CARPENITO:

Q I'm going to introduce what will be marked as Exhibit 8. Take a look and let me know what you recognize that to be.

A These are the follow-up questions to Dr. Huffnagle.

(Government Exhibit 9 identified.)

BY MR. CARPENITO:

Q And lastly for now, I will introduce what's been marked as Exhibit 9. Can you also let me know what you recognize Exhibit 9 to be.

A These are the questions to Dr. Sherwood, the questionnaire to Dr. Sherwood.

Q First I should ask, have there been any other questionnaires besides those exhibits that you have sent to Dr. Huffnagle or Dr. Sherwood?

A No.

Q Let's look at the questionnaire to Dr. Huffnagle, the initial questionnaire to Dr. Huffnagle, and the questionnaire to Dr. Sherwood. And turn to of Dr. Huffnagle's questionnaire, which is Exhibit 7, turn to page 5, please. And with Dr. Sherwood's questionnaire, which is Exhibit 9, turn to page 5.

Question 22, which is the same question with respect to each Plaintiff on page 5 of both of these exhibits, reads, and I will use the example from Mr. McElhiney's case, and I quote, "With his evident dyskinesia, upper extremities, impairments and gait and balance dysfunction, Mr. McElhiney reports that he has difficulty reaching, bending, stooping, and standing for any length of time to complete chores and tasks around his home. Is it reasonable to include services in the plan to assist Mr. McElhiney with activities of daily living, personal care and tasks and chores?"

Did I read that correctly?

A Yes.

Q And then you ask both doctors the same question with respect to Mr. McElhiney; right?
A Correct.
Q And my understanding is that question 22 relates to the daily care services listed in appendix 8 of your life care plan for Mr. McElhiney; right?
A It was information that provided input in terms of identifying what the appropriate recommendations are in the life care plan.
Q These questionnaires, though, to either of these physicians do not list CNA as a specific service; correct?
A Not in the -- it does not in the question.
Q The questionnaires to either doctor also do not list skilled nursing; right?
A It does not list skilled nursing.
Q The questionnaires do not list respite care; correct?
A It does not list respite care.
Q Or companion care; right?
A It does not list companion care.
Q Nor do the questionnaires to either physician ask about the durability; right?
A If I can clarify, the questions do not ask

about durability, but the questionnaires do ask about Mr. McElhiney's functional abilities as he continues to age with his impairments.

Q I'm asking about if either of these providers are the ones who recommended, for example, CNA care for eight hours per day.

A No. Their input was used in terms of identifying the level of care and the amount of care that Mr. McElhiney needed.

Q Well, this to me, and tell me if I'm interpreting this incorrectly, the level of care and type of care to me could be interpreted as CNA for eight hours per day?

MR. ROMANO: Objection to the form.

BY MR. CARPENITO:

Q And you just testified that that information is not coming from the physicians; right?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: The information obtained from Dr. Huffnagle and Dr. Sherwood was used to identify the recommendations that were appropriate for Mr. McElhiney in the life care plan.

BY MR. CARPENITO:

Q Ms. Hairston, can you point me to anywhere where Drs. Huffnagle or Sherwood recommended 24 hours per day CNA care for Mr. McElhiney?
A Doctor --
Q What page are you reading from?
A I'm sorry.
Q That's okay.
A Let me take a minute, please.
Q Of course, yeah.
A Again, the report identifies the time frames at which Mr. McElhiney will require the level of care that he needs. The information that was obtained from Dr. Huffnagle and Dr. Sherwood was used in identifying -- analyzing that information, putting everything together and making a recommendation in the life care plan as to the level of care and the amount of care that would be appropriate for him at that time.
Q That did not answer my question.
Can you point me to anywhere in your report where either Drs. Huffnagle or Sherwood identifies, for example, 24 hours per day of CNA care?
A They have -- their input was used to develop the recommendations indicated in the report

for Mr. McElhiney.

Q In other words, there is nowhere in this report where Drs. Huffnagle or Sherwood recommended 24 hours per day of CNA care; right?

A Dr. Huffnagle and Sherwood provided information and I used that information along with all of the other information I gained through the assessment pieces and my experience, expertise as a registered nurse, as a licensed life care planner and a case manager, to identify the level of care that Mr. McElhiney will need to continue -- for him to remain in the home and community setting.

Q So you determined that Mr. McElhiney needed, for example, 24 hours per day of CNA care; right?

A I used the input and information from Dr. McElhiney -- from Dr. Huffnagle and Sherwood to identify the level of care that is indicated for Mr. McElhiney.

And I'm sorry, can I also add that I utilized the information that was given to me as to what his function will be as he continues to age with his impairments to identify the level of care for Mr. McElhiney.

Q What information in your report from the

doctors did you base these frequencies and these services on listed in appendix 8?

A The information that they provided in the questionnaire indicating that he would require services to assist him on a day-to-day basis, as well as what his functional limitations will be as he continues to age with his impairments. That combined with all of the other information that was obtained in terms of assessment and development in the report and putting that together with my experience as a nurse, a case manager and a life care planner.

Q Question 22 asked whether it would be reasonable to include services in the plan to assist Mr. McElhiney with activities of daily living, personal care and tasks and chores; right? Did I --

A For which --

Q Both questions.

A Yes.

Q It doesn't ask Drs. Huffnagle or Sherwood to agree to 24 hours per day of CNA care, does it?

A That is not in the question.

Q It does not ask Drs. Huffnagle or Sherwood to agree to one to two times per month of skilled nursing care, does it?

A That is not in the question.
Q It does not ask Drs. Huffnagle or Sherwood to agree to 336 hours per year per 24 hours per day per 14 days per year for respite care, that's it?
A The information that was provided by Dr. Huffnagle and Sherwood was used in combination with the information that was obtained through the assessment and identification of the activities that Mr. McElhiney is no longer able to carry out at home in combination with those activities that he will not be able to carry out as he continues to age with his impairments as well as identifying the caregivers in his area who could provide care to individuals like him in the home setting.
Q That did not answer my question and I'll ask it again.
The questionnaires do not ask Drs. Huffnagle or Sherwood with the specific durability of 336 hours per year for 24 hours per day for 14 days per year of respite care, does it?
A That is not in the questions to Dr. Huffnagle and Dr. Sherwood that was identified as to the need for the services for Mr. McElhiney based on his need for services and who was available to provide services to him and identifying that his

wife is not going to be available to provide all of the care giving services to him.

Q And the questionnaire also does not ask Drs. Huffnagle or Sherwood to agree to three four-hour trips per week for companion care; correct?

A That is not in the question. It is based on the need for him to get out in the community and maintain care with his providers in the community as well as doing other tasks and chores that he may need to do out in the community.

Q If you will turn to appendix 9, please.

A Sorry.

Q That's okay.

A Appendix 9 on --

Q Exhibit 1. Do you see "DAILY CARE CONT." in Mr. McElhiney's report?

A Yes.

Q Do you agree with me that the questionnaire that you sent to Drs. Huffnagle and Sherwood also does not ask those doctors to agree to 21 hours weekly of replacement services; right?

A The questionnaire refers to task and chores, and that information from the doctors was used to -- used in combination with the information

that was obtained that Mr. McElhiney, due to his impairments, is no longer able to carry out the tasks and chores to maintain his house and property and used to identify the replacement services that would be needed to do that.

Q Ms. Hairston, point me to where in question 2 of either of these exhibits you asked these doctors whether they agree to 21 hours weekly of replacement services.

A Okay. And for clarification, I think you might have said question -- did you say question 2 or question 22?

Q Question 22.

A The information that was obtained from input from Drs. Huffnagle and Sherwood was used in combination with several other pieces of information to identify the replacement services that are provided to Mr. McElhiney in the appendix 9.

Q In other words, a request to either doctor of 21 hours weekly of replacement services is not listed in either questionnaire?

A Specific 21 hours is not in the questionnaire. Their input was used to identify the replacement services that Mr. McElhiney would need.

Q And that's because the questionnaires only

contain asking for general agreement that assistance with these activities would be reasonable; right?

A The questionnaires are -- come back to me with input which I am able to utilize in collaboration with other resources and my experience, expertise working with individuals with these type of injuries and identifying the services that they need because they are no longer able to carry out those services due to their impairments.

Q Do you remember earlier you testified that after you provided the questionnaires and the doctors sent them back to you, you did not send a draft back with your life care plan to the providers; right?

A Correct.

Q So it's possible, then, that Drs. Huffnagle and Sherwood would disagree with you on any of the specifics which you did not ask them about in either of these questionnaires?

MR. ROMANO: Object to the form of the question.

THE WITNESS: I don't know what they would do.

BY MR. CARPENITO:

Q And I think -- strike that.

If we could look at Dr. Huffnagle's questionnaire, I believe that's Exhibit 7. If you will turn to the first page, I just want to talk generally about these questions that are asked.

Did you draft the questions in this questionnaire?

A Yes.

Q Did you draft the questions in the questionnaire that was sent to Dr. Sherwood?

A Yes.

Q So if we look at Dr. Huffnagle's questionnaire, question 1 contains a prewritten list of diagnoses; right?

A Yes.

Q That list was written by you before the questionnaire was sent to Dr. Huffnagle; right?

A Yes.

Q In other words, Dr. Huffnagle was not asked to create this list; correct?

A I sent the questionnaire to Dr. Huffnagle.

Q And you agree that Dr. Huffnagle's role was limited to either checking in this instance or not checking those predetermined items on that list; right?

A And there is space for her to provide

additional information. There's a question that says "Other" in terms of the diagnoses.

Q Dr. Huffnagle's check mark does not reflect when the Parkinson's Disease diagnosis was made; correct?

A Not -- no.

Q It does not reflect whether the condition requires future treatment; right?

A What was the second question, I'm sorry?

Q With respect to question 1, his check mark next to "Parkinson's disease" does not reflect whether that condition requires future treatment?

A I wouldn't agree with that.

Q Why not?

A It does not reflect if he requires future treatment? Is that what you said?

Q I'm just trying to understand what the check mark here next to "Parkinson's disease" means with respect to question 1.

A Oh, okay. I'm sorry.

It is confirmation of the diagnosis.

Q If we can look at question 2 on that questionnaire.

A Exhibit 7?

Q Yes, ma'am. Question 2 reflects the last

time that Dr. Huffnagle saw Mr. McElhiney; correct?

A Yes.

Q Question 2 reflects that Dr. Huffnagle at least at the time that he filled out this questionnaire, last time he saw Mr. McElhiney was in September of 2024; right?

A Based on the information on this questionnaire, yes.

Q So all of Dr. Huffnagle's answers in this questionnaire are based on Mr. McElhiney's condition as of September 17, 2024; correct?

A I wouldn't agree with that. The question asks the last time Mr. McElhiney was examined. I don't know if since that time there was any other communication -- I mean, I can't agree or disagree. The question asks when was the last time Mr. McElhiney was examined.

Q Right. And he answers that it was September 17, 2024; correct?

A Correct.

Q And for purposes of information that he filled out in this questionnaire, that information is based on Mr. McElhiney's condition as Dr. Huffnagle knows it as of September 17, 2024. Do you agree with that?

A I'm not going to completely agree with that. They may have had other communication between this date and the time that the report -- the questionnaire was completed. I mean, I don't know. This says he was examined on September 17, 2024.

Q Would you agree that information in this questionnaire from Dr. Huffnagle relies on Mr. McElhiney's condition from the year 2024?

A Dr. Huffnagle indicated that Mr. McElhiney was examined on September 17, 2024. I don't know what other information the doctor may have relied on in terms of completing this questionnaire.

Q Well, if Dr. Huffnagle had seen Mr. McElhiney after this date at the time that he completed this questionnaire, do you agree that it's at least possible that he would have listed that date; right?

A It is possible.

Q In question 2 Dr. Huffnagle recommends follow-up at Vanderbilt for placement of deep brain stimulator; correct?

A Yes.

Q Your life care plan for Mr. McElhiney does not assume that deep brain stimulator placement successfully occurs before any future services

begin; right?

A Deep brain stimulator is listed in the report as to be determined, yes.

Q Right. Instead, your life care plan for Mr. McElhiney assumed ongoing and increasing care needs without accounting for the DBS outcome; right?

A The life care plan is developed based on the response that Mr. McElhiney was having to his injury at that time and based on the information obtained from the physicians on what his aging -- how he would age with his impairments.

Q When you say based at that time, that time was before Mr. McElhiney had his DBS placed; right?

A If there is new information about medical treatment or interventions that Mr. McElhiney has received, I don't have that information.

Q Would you want to review any information related to Mr. McElhiney's condition post placement of his DBS?

A Any information would need to be reviewed and analyzed and determine how that's impacting his response to his injury and the life care plan.

Q Are you aware that Mr. McElhiney underwent a deep brain stimulator placement surgery?

A I'm not aware that the -- I'm sorry.

The plan says it was to be determined. I have not had any follow-up to identify if indeed he had the deep brain stimulator and how it's functioning.

(Government Exhibit 10 identified.)

BY MR. CARPENITO:

Q I'm going to introduce what will be marked as Exhibit 10.

A Okay. I think I have two -- is that okay? Just a second copy?

Q I'll keep that, sorry.

If you look at the top left, do you see Mr. Gary McElhiney listed?

A Yes.

Q Do you see it's an office visit from March 6, 2025?

A Yes.

Q Do you see a provider name there listed Daniel Sherwood, MD?

A Yes.

Q And Dr. Sherwood is Mr. McElhiney's primary care physician; right?

A Correct.

Q In fact, you sent a questionnaire to Dr. Sherwood; right?

A Correct.

Q Your life care plan for Mr. McElhiney does not incorporate these records into what you reviewed in preparing your report in this case; right?

A I am not familiar with these records, but let me just say, based on this very brief review at this point in time.

Q Understood. If you will look at this first page here, and I'm going to reference these Bates numbers here down in the bottom right-hand corner so we all know where we are, okay?

We're on Bates number 448. I'm going to read this first paragraph. "Gary, a patient with a history of Parkinson's disease, presents for a follow-up visit after undergoing Deep Brain Stimulation (DBS) surgery. The patient reports a significant improvement in his symptoms following the surgery, which is performed in three stages.

"Despite the discomfort and swelling associated with the recovery process, the patient describes the outcome as," and I quote, "'astronomical' and feels that the procedure has restored much of his dignity."

Did I read that correctly?

A Correct.

Q The third paragraph there reads, "The patient's medication regimen has been adjusted following his DBS surgery. He is currently in the process of deescalating his Sinemet dosage, with the goal of reducing the frequency to three times a day. He has also discontinued metoprolol, a beta blocker, as per Vanderbilt's recommendation."

Did I read that correctly?

A Yes.

Q Outside of what I'm sure was a mispronunciation of that medication.

If you will turn to the next page, which is Bates ending in 449, do you see "Neurological" listed down about a quarter of the way down the page?

A Yes.

Q And there's a "Comments" section, and it reads, "Parkinsonian facial expression is no longer present! No tremor no cogwheeling no rigidity. Slightly wide-based gait."

Did I read that correctly?

A Yes.

Q This documents improvements in Mr. McElhiney's symptoms following the placement of his DBS device; correct?

A This document is a visit to Dr. Sherwood and on March 6, 2025.

Q What is your interpretation of Mr. McElhiney's symptoms as it relates to Parkinson's based on this document following the placement of his DBS device?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: With all due respect, this is not the type of setting for me to -- I don't know if this is one clinic note, multiple clinic notes. This is not the setting for me to review records and analyze them and provide any type of commentary.

BY MR. CARPENITO:

Q What would be the proper setting?

A When they are appropriately provided to me, typically when I receive records, they're in some sort of context. I am in my office setting. I have a chance to read them, I have a chance to put them in context with all of the other medical records, whatever plan has already been developed.

I mean, there are several factors, but this is not the setting for me to look at this note. I'm not agreeing or disagreeing with you. This is just not the setting for me to review these notes.

Q Ms. Hairston, are you refusing to review this record?

A This is not the setting. I can read it, but this is not the setting for me to analyze it and to provides any commentary on it.

Q Would you have wanted to review this record if it was available to you at the time you were formulating your life care plan?

A Typically, if there are records available to me --

Q I'm talking about this specific record.

A Typically, records -- medical records are going to be resources that are going to be used to provide input and assist in the development of a life care plan. I don't know when this record became available.

Q You agree that any of the information contained in this medical record was not incorporated into the development of your life care plan for Mr. McElhiney; correct?

A This is a record that I have not reviewed and have not used it in the development of the life care plan.

Q Do you agree with me that the answers provided in Dr. Huffnagle and Sherwood's

questionnaires do not incorporate the information contained in this record; right?

A I have the dates that the questionnaires were sent to them and the date on this medical record. So the questionnaires were provided prior to the date of this medical record.

Q And based on that information, you would agree with me that the answers from Drs. Huffnagle and Sherwood and the questionnaires that you provided to them would not have contained information from this medical record in Exhibit 10; right?

A I had not reviewed this medical record when these questions were developed.

Q Can you turn to Bates number 452 in Exhibit 10.

A 45 -- I'm sorry.

Q 452.

MR. ROMANO: Number 452?

MR. CARPENITO: Yes, sir.

THE WITNESS: Okay.

BY MR. CARPENITO:

Q If you look under "Assessment & Plan" about three fourths down the page, it reads "Parkinson's Disease, DBS surgery significantly

improved motor symptoms. Sinemet dosage reduced. Metoprolol discontinued due to interaction with midodrine. Battery replacement needed every 3-5 years."

Did I read that correctly?

A Correct.

Q Do you agree that based on this record that Dr. Sherwood notes that the DBS surgery significantly improved Mr. McElhiney's motor symptoms?

A That's what I'm reading in the medical record.

Q In other words, it does not document Mr. McElhiney's symptoms getting worse. Would you agree with that?

A I don't see that here in this medical record.

Q Could this information require you to reassess the future needs of Mr. McElhiney?

A Based on -- any new information that is received, it would have to be considered and determined do I need to go back to the individual, get an update, providers of care and get an update. And all of that information would have to be reviewed and reconsidered to be determined if there

would be any changes in the plan of care.

In answering that question, I may have left off other resources that would need to be re-reviewed and updated.

Q Let's turn to Bates number 456. Do you see the "Instructions" section up at the top, top list a list of instructions?

A Okay. 456?

Q Yes, ma'am.

A Yes.

Q Underneath that it says "Follow up with Daniel Sherwood, MD in about 6 months (around 9/6/2025)." Right?

A Yes.

Q And a follow-up with Dr. Sherwood would be a follow-up with Mr. McElhiney's primary care physician; right?

A Based on the information on this record.

Q Well, and based on the information in the questionnaire that you sent to Dr. Sherwood; right?

A I'm sorry. For clarification, what's your question again? I'm sorry.

Q Dr. Sherwood is Mr. McElhiney's primary care physician; right?

A Yes.

Q Every six months, Mr. McElhiney is seeing Dr. Sherwood, would add up to Mr. McElhiney having two follow-up visits with his primary care physician per year; right?

A Yes.

Q And if you turn to appendix 1 of your report in Mr. McElhiney's life care plan, do you see that you have a frequency noted under the durability section of Mr. McElhiney receiving four to eight times per year for primary care physician visits?

A Yes.

Q That's more than double what Dr. Sherwood recommends in this medical record; correct?

A It's more than what is listed on this medical record.

Q Will you turn to -- let's go back to Exhibit 7 and 9. And with respect to each exhibit, I want us to look at -- give me one moment.

On page 1 of both exhibits, but we're on different question numbers. But they're asking the same question.

So when we're looking at Exhibit 9, which is Dr. Sherwood's questionnaire, we're looking at question 3. And when we're looking at Exhibit 10, excuse me, Exhibit 7, it's Dr. Huffnagle's

questionnaire, we're looking at question 4.

So are you there with me?

A Yes.

Q Each question is asking whether the physician anticipates Mr. McElhiney requiring more than the usual number of visits to his primary care physician related to his Parkinson's Disease; right?

A Correct.

Q Does this question first identify historically how many times Mr. McElhiney has seen his primary care physician related to his Parkinson's Disease?

A And are you talking about the question in both exhibits or --

Q Yeah, either question. Either questionnaire, excuse me.

A There's not a specific number of visits indicated in the question.

Q Dr. Huffnagle checks yes, and he says, how many extra visits, in response to that question he answers eight visits per year; right?

A Correct.

Q Dr. Sherwood checks yes, and he doesn't provide a number; right?

A There's not a number there.

Q He answers "Eventually perhaps double # of visits"; right?
A Yes.
Q Dr. Sherwood's response does not state, again, a precise number of visits that Mr. McElhiney may require with his primary care physician; right?
A It does not state a specific number of visits.
Q Despite that, your life care plan provides a frequency of four to eight times per year for primary care physician visits; right?
A It does.
Q And at least part of that assumption is based on Mr. McElhiney's neurologist, Dr. Huffnagle; right?
A Dr. Huffnagle provided some input into that recommendation, yes.
Q But you agree that based on that medical record we were looking at earlier, that Dr. Huffnagle's response is likely no longer accurate?
A I would say if there was new information that was available, that information could be reviewed and the information analyzed in context of all of the other information that has been gathered

in reference to Mr. McElhiney's needs and determining what is appropriate for the plan, for the life care plan.

Q Will you turn to page 2 of Exhibit 7, which is Dr. Huffnagle's questionnaire. Under question 5, one of the parts there you ask "How often do you anticipate his DBS will require replacement as indicated below." Correct?

A Correct.

Q Dr. Huffnagle at least in part answers a battery change one time per five years; right?

A Yes.

Q And then if you look at appendix 1 of your life care plan, for Mr. McElhiney. If you'll let me know when you're there?

A I'm sorry, yes. I am here at appendix 1.

Q Under "Battery Replacement For DBS," which is the last line item on that page, you have the durability listed as to be determined.

My question to you is Dr. Huffnagle provided this information to you in the questionnaire. Why is this listed as to be determined?

A Yes, if you could give me just a minute, please.

As indicated in the report, what I've identified is that if the writing --

Q What page are you reading from?

A I'm sorry.

Q That's okay.

A This is page 11 on Exhibit 1. "Mr. McElhiney was undergoing the staged procedures for placement of the deep brain stimulator. While Dr. Huffnagle provided guidelines for management of the device, the life care plan assumes once the device has been inserted and is functioning properly, ongoing management of the device and associated care will be confirmed."

Q So are you testifying, then, that you were picking and choosing when to incorporate Dr. Huffnagle's recommendations and when not to? I'm just trying to understand here how you made the decision of what to include in your life care plan and what not to include.

MR. ROMANO: Objection to the form of the question.

THE WITNESS: Dr. Huffnagle provided some information regarding the DBS, but in looking at the full life care planning and -- life care plan, and understand, there was also a provider that was

involved with the deep brain stimulator. Additional information could be obtained specific to the provider and the -- who placed the deep brain stimulator and the associated care.

MR. CARPENITO: Can we go off the record?

VIDEO OPERATOR: Sure thing. One second. We are going off the record. The time is approximately 1:55 p.m. This is the end of media number 3.

(Recess.)

VIDEO OPERATOR: We are back on the video record.

The time is approximately 2:06 p.m. This is the beginning of media number 4.

BY MR. CARPENITO:

Q Ms. Hairston, if we can continue looking at Exhibit 7, and I want to turn to question 6 and look at Exhibit 9 and turn to question 6 as well. Let me know when you're there for both.

A Page 6, you said?

Q No, ma'am, question 6.

A Question 6.

Q It's on page 2 of both the questionnaires.

A Oh, okay. Okay.

Q Question 6 asks "How often do you

anticipate that Mr. McElhiney will require surveillance by the following specialists related to his Parkinson's disease and associated impairments?"

Did I read that correctly?

A Yes.

Q And then it lists a variety of specialties; right?

A Yes.

Q One being, in Dr. Huffnagle's questionnaire, "Neurosurgery"; right?

A Yes.

Q And "Cardiology"; right?

A Yes.

Q And then "Podiatry"; correct?

A Yes.

Q Okay. Dr. Sherwood's questionnaire asks the same question and includes those same subspecialties; right?

A Yes.

Q Question 6 does not ask whether a cardiologist would recommend fewer visits than what Dr. Huffnagle has indicated; correct?

A I'm sorry, say that again, please.

Q Question 6 is not directed at a cardiologist; right? In other words, Dr. Huffnagle

is not a cardiologist. Would you agree with that?
A Agree.
Q Would you agree that Dr. Sherwood is not a cardiologist?
A He is not a cardiologist. He's a primary care physician who often directs individuals toward their treatment.
Q Looking at the "Cardiology" line specifically in both questionnaires, Dr. Huffnagle recommends "4 times per year for 20 years"; right?
A Yes.
Q And Dr. Sherwood recommends cardiology one times per year for what he notes as indefinite years; right?
A Yes.
Q If you look and compare that to appendix -- appendix 1 in your report on Mr. McElhiney, you have cardiology listed there as four times per year; right?
A Yes.
Q Is it fair to assume that you adopted Dr. Huffnagle's recommendation of four times per year cardiology follow-up visits?
A Dr. Huffnagle's input was used in the recommendation for this specific item, yes, for this

item.

Q And you agree that Dr. Sherwood recommended a lower frequency with respect to cardiology visits; correct?

A Dr. Sherwood indicated a different frequency than Dr. Huffnagle.

Q And you chose to adopt the higher frequency provided by Dr. Huffnagle; correct?

A Dr. Huffnagle's input was used in the recommendation of this particular item.

Q Next if you look at question 8 on each questionnaire. Let me know when you're there.

A Okay. Question 8. Okay.

Q Asks "What diagnostic testing, if any, will Mr. McElhiney require related to his Parkinson's disease and associated impairments?" Right?

A Correct.

Q And you asked that question of both providers in each of their respective questionnaires; right?

A Yes.

Q Dr. Huffnagle recommends one MRI per year for 20 years, right, if DBS not placed?

A Correct.

Q Dr. Huffnagle recommends serum studies 12 times per year and he does not indicate the number of years; right? In that questionnaire, he does not indicate the number of years; correct?

A Correct.

Q In response to the same question, Dr. Sherwood responded "Nothing specific that I am aware of." Correct?

A Correct.

Q If you go to appendix 2, your life care plan for Mr. McElhiney.

A Yes.

Q There is a serum studies is the first service there listed, and you list the durability as 12 times per year; correct?

A Yes.

Q So you chose to adopt the higher frequency recommended by Dr. Huffnagle; right?

A I used the input that was provided by Dr. Huffnagle in terms of the recommendation that's included in the life care plan.

Q But Dr. Sherwood, Mr. McElhiney's primary care physician, said that there was nothing specific that he was aware of; right?

A He said that he was not aware of anything.

Dr. Huffnagle indicated what she was aware of.

Q Right. And that's why I'm asking. How did you make the determination as to which one to include in your life care plan?

A Dr. Sherwood said he wasn't aware of anything. Dr. Huffnagle indicated she was aware of something.

Q I understand what their responses are.

My question to you is, Dr. Sherwood, in response to a question asking what diagnostic testing, if any, Mr. McElhiney will need, responds, "Nothing specific that I'm aware of." But Dr. Huffnagle responds with the frequencies identified in his questionnaire. How do you as a life care planner make the determination as to which one of those recommendations you're going to go with?

A Based -- for this particular question, I'm going to say it's individualized because I have to look at each question, Dr. Sherwood again said nothing that he was aware of. Dr. Huffnagle identified the tests that she felt were appropriate.

Q You agree with me, based on Dr. Sherwood's questionnaire, that an option was to include nothing with respect to serum studies, right, based on

Dr. Sherwood's response to the questionnaire?

A In developing the life care plan, I review all of the information together.

Q Ms. Hairston, that doesn't answer my question.

A Okay. Go ahead.

Q So I'm asking you, wasn't it a possibility when you were preparing this life care plan and you got Dr. Sherwood's questionnaire back and you looked at his response to question 8, that you could have not included serum studies on appendix 2 of your life care plan for Mr. McElhiney, based on Dr. Sherwood's response to that question?

A In developing the life care plan, I had Dr. Sherwood -- Dr. Sherwood's response and Dr. Huffnagle's response, and I look at everything together.

Q And you chose Dr. Huffnagle's recommended frequencies; correct?

A Dr. Huffnagle provided a -- provided input for that particular question. Dr. Sherwood said "Nothing specific that I'm aware of."

Q Why did you choose to follow Dr. Huffnagle's recommendation?

A Dr. Huffnagle had a recommendation --

provided input.

Q Can you explain the methodology behind how you go about choosing what recommendation to provide when two treating physicians for a particular individual on which you are preparing a life care plan disagree about a particular intervention?

MR. ROMANO: I'll object to the form of the question.

THE WITNESS: So I would have to say that, to begin with, I don't think their answers disagree. Dr. Sherwood said nothing specific, and Dr. Huffnagle provided something more specific in terms of providing input.

BY MR. CARPENITO:

Q In a situation, let's assume this situation, where two providers disagree on the same question in a questionnaire that you send to them with respect to the same person on which you're preparing the life care plan, what is the methodology that you follow in making the decision about which one of those recommendations you will adopt in that life care plan?

A I have to look at all of the information that is received with respect to the information that I have for the individual, could possibly

looking at all of the resources available, medical records, any information I have received from any other treating providers of care.

And I may go back to any one of the physicians to ask for clarification. But there's not one specific route in terms of determining if there are -- that answers from two different physicians do not match exactly.

I have to consider how to -- the context of each of those questions for each individual case.

Q But in this case, you didn't go back to the providers to ask for clarification, did you?

A Not on question 8.

Q On any question did you?

A Well, for Dr. Huffnagle, I went back and asked for some clarification.

Q And we'll address that question in a few minutes.

Outside of the additional questionnaire that you sent to Dr. Huffnagle that is marked as Exhibit 8, was there any other point in time in which you sought clarification from either of these providers when preparing your life care plan for Mr. McElhiney?

A No.

Q Question 9, if we can look at that, asks whether Mr. McElhiney will demonstrate improvement in his functional abilities beyond his current level.

Did I read that correctly?

A Yes.

Q Dr. Huffnagle checks no; correct?

A Correct.

Q Dr. Sherwood checks yes, correct, and explains DBS may provide some -- what I think he's saying is improvement.

Do you agree with that?

A Yes.

Q Do you agree that the response from Dr. Sherwood reflects the possibility of functional improvement; right?

A He indicated that, yes, Mr. McElhiney may demonstrate improvement.

Q And, in fact, based on the medical records that we reviewed earlier, the DBS did provide some support with respect to Mr. McElhiney's functional abilities; right?

A The records are what they are. I have not had a chance to review and digest all of that information.

Q Did your life care plan for Mr. McElhiney assume functional improvement, or did your life care plan for Mr. McElhiney assume a decline in his functional abilities?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: In developing the life care plan, I reviewed and obtained input from resources as well as Dr. Huffnagle and Dr. Sherwood to identify what was going to be anticipated in his functional level as he continued to age with his impairments.

BY MR. CARPENITO:

Q And if we look at appendix 8, Mr. McElhiney's life care plan --

A Appendix --

Q 8.

A 8?

Q Yes, ma'am.

The durability for CNA care increases from eight hours for 2025 to 2029 to 16 hours for the years 2030 to 2032; correct?

A Correct.

Q And then from years 2033 through life expectancy, the CNA care increases to 24 hours per

day; correct?

A Correct.

Q And so my question to you is, where does that escalation of services come from? Did you assume that Mr. McElhiney's functional abilities would continue to decline?

A Based on the information obtained from Dr. Sherwood and Dr. Huffnagle indicating how -- or identifying how they anticipated he would decline as he ages, and understanding the general progression of Parkinson's disease, all of that was used to identify the level of care that he would need as he aged, and during those time periods.

Q You did not create an alternative projection scenario based on DBS improving Mr. McElhiney's condition, did you?

A There is only one life care plan.

Q You did not reduce any future care needs based on the potential of the benefit gained from DBS with respect to Mr. McElhiney, did you?

A There is only one life care plan.

Q Would your answer to my question be no?

A There -- the care that's reflected in the life care plan is the care that's projected for Mr. McElhiney.

Q And that care that's projected for Mr. McElhiney does not reduce future care needs based on potential DBS benefits for Mr. McElhiney; right?

A If there is additional information for Mr. McElhiney discussing any other interventions that he's had, including the DBS and the outcomes of that DBS, that would need to be reviewed, analyzed, to determine how it would impact the life care plan.

Q Lastly on these questionnaires, I want to look at questions 11 and 12, both questionnaires, so we can start with question 11, and let me know when you're there. Are you there?

A Yes. I'm sorry, yes.

Q That's okay. Question 11 asks about "annual re-evaluation services from the following disciplines for the purpose of updating Mr. McElhiney's home exercise program and/or maintaining his physical function"; right?

A Yes.

Q And Dr. Sherwood lists one to two times per year for reevaluation of physical therapy, occupational therapy and speech therapy; right?

A Yes.

Q Dr. Huffnagle for those same reevaluations

lists two years for physical therapy; correct? Two times per year for physical therapy?

A Yes.

Q Two times per year for occupational therapy; right?

A Yes.

Q And four times per year for speech therapy; correct?

A Yes.

Q And then if you look at question 12.

A Okay. I'm there.

Q Question 12 reads, "What services do you anticipate he will require now and in the future to improve and/or maintain his functional mobility?" Correct?

A Yes.

Q Okay. For physical therapy treatment Dr. Sherwood responds "1-2 times per year"; right?

A Yes.

Q Dr. Huffnagle responds "two times per year"; right?

A Yes.

Q Moving down to "Speech Therapy treatment," Dr. Sherwood responds "1" time "per year"; correct?

A Yes.

Q Dr. Huffnagle responds "4 times per year"; right?
A Yes.
Q If you look at appendix 5 of Exhibit 1, if you look at the speech therapy listed there, the durability is listed as four times per year; right?
A Yes.
Q In other words, you chose the higher frequency recommended by Dr. Huffnagle; correct?
A I utilized the input from both Dr. Sherwood and Huffnagle in terms of identifying the recommendation for Mr. McElhiney.
Q Well, Dr. Sherwood's recommendation is one time per year for speech therapy; right?
A He does, yes.
Q And Dr. Huffnagle recommends four times per year for speech therapy; right?
A Yes.
Q So you agree with me that you did not adopt Dr. Sherwood's recommendation at least with respect to speech therapy treatment and the frequency thereof?
A They were both utilized -- input from Dr. Huffnagle and Sherwood, along with other information, including the fact that Mr. McElhiney

is having issues swallowing and with his speech.

Q You agree that there are some instances in which Drs. Huffnagle and Sherwood disagree with respect to the frequency for a particular item that you asked about in the questionnaire?

A I would not say they disagree. They both provided their input into what they felt like the needs were for Mr. McElhiney.

Q And that input that they provided is not always the same; correct?

A It is not always the same.

Q Let's take a look at appendix 8 of Mr. McElhiney's life care plan. Appendix 8 onto the top of appendix 9 are the daily care services portion of your life care plan for Mr. McElhiney; right?

A Yes.

Q I want to look at the descriptions that you have underneath each of those and talk about that. Under CNA you write that the services include assistance with personal hygiene, HEP, meal prep, assistance with tasks for household management, community mobility.

Did I read that correctly?

A Yes.

Q You agree that Ms. McElhiney has been providing at least some of these services to Mr. McElhiney; right?

A I'm sorry, state that again, I'm sorry.

Q Do you agree that Mr. McElhiney's wife, Ms. McElhiney --

A Okay.

Q -- has been providing at least some of these services to Mr. McElhiney?

A Yes.

Q And beginning in 2025, you project eight hours per day of CNA care; right?

A Yes.

Q And then you increase that, starting in the year 2033, to CNA care for 24 hours a day; right?

A Yes.

Q Now, let's look at "Respite Care" below that, and that reads underneath "Respite Care," short-term relief for Ms. McElhiney for rest, renewal, attend to personal affairs; correct?

A Yes.

Q If a CNA is present for eight hours per day, that means for those eight hours Ms. McElhiney is not providing sole supervision of Mr. McElhiney;

right?

A Yes.

Q If the CNA is present for 16 hours per day, that means for those 16 hours Ms. McElhiney is not providing sole supervision to Mr. McElhiney; correct?

A She is not providing sole supervision. Ms. McElhiney is still available and still present to supervise, monitor and assist in Mr. McElhiney's care.

Q If a CNA is present for 24 hours per day, that means for those 24 hours Mrs. McElhiney is not providing sole supervision of Mr. McElhiney; correct?

A Correct.

Q During the times in which a CNA is present, whether it's for eight, 16, 24, hours per day, Mrs. McElhiney could leave the house; right?

A There would be some times, depending on the agency providing care, that Ms. McElhiney would be able to leave the house.

Q And during the times in which a CNA is present, Mrs. McElhiney could take a nap, for example; right?

A Mrs. McElhiney -- there would be times

when Mrs. McElhiney could attend to those things that she needs to take care of for herself and household and out in the community.

Q Right. She could attend appointments; right?

A Perhaps.

Q She could grocery-shop?

A Perhaps.

Q In other words, the CNA services include some of the same types of tasks that respite care is intended to relieve; right?

A There is some overlap. The respite care is included in the plan to provide for extended periods so that Mrs. McElhiney can go beyond the time frame that the CNA would be at the home or to attend to, again, her personal affairs or even relax and have some recreation, without having to rush back to the house.

Q Well, how many waking hours per day are you assuming that Mr. McElhiney has per day?

A Well, I'm sorry, can you rephrase that?

Q How many hours per day are you assuming that Mr. McElhiney is awake? Do you note that assumption anywhere in your report?

A I guess my question is --

Q No, no, no, Ms. Hairston. I just want you to answer my question.

A Go ahead, I'm sorry.

Q My question is, how many hours, if any, are you assuming that Mr. McElhiney is awake per day?

A And I am asking, in relationship to you asking questions about the CNA and the skilled nursing and the respite care, if you could put that all together for me.

Q If Mr. McElhiney -- let's envision a scenario, Mr. McElhiney is awake for eight hours per day, and there's a CNA at the house for eight hours per day. During that time, Ms. McElhiney could leave the house and attend to her needs; right?

A There could be some times she could leave the house and attend to her needs.

Q Let's look at "Companion Care," which is on appendix 8, that's the last line item. And that service includes "Driving the van, community mobility, access to medical appointments, therapeutic exercise"; right?

A Correct.

Q Before we go to "Companion Care," I do just want to confirm, on page 12 of your report, you

actually acknowledge that Mrs. McElhiney already leaves Mr. McElhiney at home for short periods of time; right?

A And that is absolutely not the safe and ideal scenario for them. She does it because they have no other choice.

Q You project companion care at 12 hours per week; right?

A Three four-hour trips per week, yes.

Q Under "CNA" Services, you already included the description as "community mobility"; correct?

A There is description of "community mobility" there.

Q And under "Companion Care," there's a description of "community mobility"; correct?

A Yes. So the companion would actually be driving the van to all of these different venues or areas in the community. The CNA would actually be there to physically assist Mr. McElhiney getting in and out of the vehicle, into and out of the venue, and to whatever appointments or tasks needed to be completed while he is at the venue.

Q Can the CNA drive the van?

A No, they can't.

Q Why?

A In contacting agencies in that area, in general, the CNAs were not allowed to drive the van.

Q Could Mrs. McElhiney drive the van?

A Well, she can drive a van, but we -- the services provided in this are to make sure Mr. McElhiney can get to all of the services that he needs and at the same time not completely wear Mrs. McElhiney out, relieve her of some of the caregiving chores and services and let her return to being a wife and the things that she did around the home.

Q Right. But we just discussed, and tell me if you disagree, but we agreed that some of the respite care was relief by what was included in the CNA care. And so my question to you is, if Mrs. McElhiney is able to be relieved by the mere fact of the CNA being present, couldn't she then drive the van for Mr. McElhiney?

A So some of the relief provision of the CNA is to make sure someone is there with Mr. McElhiney because he has a syncope episodes, to make sure that if he does have one of these episodes, emergency services can be contacted right away.

The respite care provides -- again, this is 14 days per year, so that's time that allows

Mrs. McElhiney to have extended time out of the house if she needs to.

The companion is there to drive the van. The companion is not going to do the hands-on -- the same hands-on care that the CNA is going to do.

Q Do you agree that some of the functions of companion care could be performed by the CNA that's already included in your life care plan; right?

A Well, the CNA is not able to drive the van, and the CNA is not able to drive the van and take care of the needs of Mr. McElhiney at the same time. Go ahead, I'm sorry.

Q No, I didn't want to cut you off.

A No, go ahead.

Q I'm not asking about driving the van.

A Okay.

Q I'm asking specifically about community mobility. I see it listed twice there.

And so my question to you is, you agree that at least some of the functions of companion care could also be performed by the CNA that's already included in your life care plan; right?

A Well, no, I disagree with that.

The CNA is there to provide hands-on -- care to Mr. McElhiney. The companion is there to

drive the van and to make sure the CNA and Mr. McElhiney are able to get to the venues in the community that he needs to get to and allow the CNA to just exclusively provide the care to Mr. McElhiney that he needs.

Q Where in your report does it document that the CNA cannot drive the van?

A Give me just a second.

Q Okay.

A It is not specifically listed in the report. It is my recollection from speaking with the research assistants who contacted the agencies who provide CNA care.

Q When you say research assistants, who are you referring to?

A Assistants -- research assistants, individuals who work in the Coordinating Center in the medical-legal division who provide research in terms of identifying services in the community.

Q So your research assistants are the ones who reach out to the providers listed on your resources page in these reports?

A Yes.

Q You yourself don't reach out to those resources?

A I am not -- it depends on the resources. We -- there are several people who work on the development on life care plan, so some of the resources I may contact directly, and I may have some research assistants who also contact some of the resources.

Q What kind of quality control, if any, do you have over that process? What if one of your research assistants makes an error in collecting the costing information? How do you control for that type of situation?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: You would have to ask something a little bit more specific. These are research assistants who have worked consistently in the medical-legal department for a number of years. We all work very closely together, and we all have an understanding of the process in terms of reaching out to providers of care and obtaining costs.

BY MR. CARPENITO:

Q But how would you become aware if they made an error in obtaining any of the types of costing information that you've used to source the unit costs in your life care plan?

A We work closely together, and all of the information is reviewed as the life care plan is being developed.

Q That doesn't answer my question.

MR. ROMANO: Well, object to counsel's statement.

Wait until there's a question.

BY MR. CARPENITO:

Q So let's go back to page 18 of Mr. McElhiney's report. Just looking under the "Physician/Medical" as an example as we did earlier, there's 14 different costing sources listed there; right?

A Yes.

Q Your research assistants are the ones who reach out to those costing sources, and then they provide you the costs; right?

A There's a format that the research assistants use to document who they have contacted and the information that they have obtained.

Q My question to you is, how do you control for the potential of one of your research assistants inaccurately notating the costing that they obtain from any of these sources listed here?

A Well, that's a very general question.

Again, all the information is obtained using a consistent process and one that we all understand we use, and all of the information is reviewed during the development of the life care plan.

Q You noted a consistent process. What is that consistent process?

A Well, as I've discussed before, they -- typically, if we're looking for a resource, three providers will be contacted, and, during the development of the life care plan, we are all in communication and can identify the specific service that is indicated for the individual and the needs associated with that service.

Q Let's turn back to appendix 8 of Mr. McElhiney report. If you look at -- excuse me, appendix 9, which is the daily care continued, top portion of that page.

A Yes.

Q Do you see "Replacement Services"?

A Yes.

Q "Household for tasks including heavy cleaning, laundry, household simple maintenance, repairs," and "lawn care"; right?

A Yes.

Q And under "CNA," you have "Assistance with personal hygiene," "meal prep, assistance with tasks and household management, community mobility."

And so it's the same question that you can likely expect, Ms. Hairston, some of the services covered in the CNA service in this life care plan overlap with the services that replacement services covers as well; right?

A No.

Q So what is the difference, then, for household tasks, including heavy cleaning, laundry, household simple maintenance and assistance with tasks for household management?

A The CNA is going to assist with tasks for household management as they relate to assisting Mr. McElhiney with carrying out his activities of daily living.

Q Okay.

A So if they are helping him eat a meal, they are going to prepare the meal, they are going to monitor and supervise him eating, and then they're going to clean up the meal.

If they help him with his personal hygiene, they are going to help him in the bathroom, they are going to clean up the bathroom and they are

going to pick up the towels. They may throw a load of clothes in the washing machine. So they're going to help him with those tasks that are associated directly with his activities of daily living.

The replacement services are going to replace those services that Mr. McElhiney -- the tasks and chores that he did to maintain his home and property prior to his injuries. So that's mowing the lawn, cleaning the gutters, getting up on ladders, managing the maintenance for the cars, moving the furniture so someone can vacuum behind it, shoveling snow, and any number of other tasks.

Q Can you turn to page 14 for both Exhibit 1 and Exhibit 2, please.

A Page 14?

Q Yes, ma'am. And in the -- on both of those pages, pages 14 in both reports, the third full paragraph, second sentence reads, "The life care plan provides," insert the Plaintiff's name, "with homemaking services to carry out the many tasks and chores that he previously completed in his home."

Correct?

A I'm sorry, which paragraph are you reading from?

Q Third full paragraph there.
A Okay. Go ahead.
Q Let's just look at Mr. McElhiney's report. It reads, "The life care plan provides Mr. McElhiney with homemaking services to carry out the many tasks and chores that he previously completed in his home." Correct?
A Yes.
Q And then it says the same thing in Mr. Peterson's report, but with respect to Mr. Peterson; right?
A Yes.
Q It then goes on to discuss that "The hours of homemaking services were derived from the publication, Dollar Value of a Day (DVD)" in parentheses; correct?
A Yes.
Q And you utilized the Dollar Value of a Day for the hours of homemaking services in both reports; right?
A Yes.
Q Dollar Value of a Day is a statistical publication; right?
A It provides data, yes.
Q It is not an individualized assessment of

Mr. McElhiney personally; right?

A Dollar Value of a Day provides the information that is provided for Mr. McElhiney and for Mr. Peterson, it was individualized in that specific tables were used for each individual.

Q What tables?

A Those are actually reflected on the spreadsheets.

So for Mr. McElhiney, on appendix 9, under "Replacement Services," underneath that table, the average -- the specific tables that were used for Mr. McElhiney are indicated, and the same for Mr. Peterson.

Q Right. And I think that's what I'm trying to understand. Dollar Value of a Day reflects average household production for a particular individual; right? Or a particular category of individual?

A It -- there are categories reflected, yes.

Q It does not measure whether either Mr. McElhiney or Mr. Peterson actually -- what they actually did in their home before any of their alleged limitations related to Parkinson's Disease; right?

A During my assessment and development of

the life care plans, the information that I obtained identifies the tasks and chores that an individual performed prior to their injuries, and using that information along with the information, that data that's published with the Dollar Value of a Day, I identify those categories under which those tasks fall and use that to identify the number of hours to be provided to replace the services that the individual can no longer perform.

Q Did you document how many hours per week either Plaintiff spent performing household tasks before progression of their Parkinson's Disease?

A I'm sorry, Mr. McElhiney's -- I'm sorry.

The Dollar Value of a Day was used to identify the number of hours for age ranges for these individuals for the market estimate of the time, or the costs to support or replace the services that they are no longer able to perform.

Q I'm not asking about Dollar Value of a Day now. I'm asking about you, Ms. Kay Hairston, did not document how many hours per week each Plaintiff spent performing household tasks, did you?

A I do not have specific hours noted for each individual.

Q You did not obtain any logs of actual

household activity for either Plaintiff?

A I do not have logs. In preparing the report, I used the data that was published in Dollar Value of a Day.

Q Did you obtain any calendars reflecting actual household activities for either Plaintiff?

A I do not have a calendar for each individual.

Q Did you reduce in any way the numbers derived from the DVD to account for any existing outside support that either Plaintiff may have in their life, for example, their spouse and/or a friend coming to help with cutting the grass?

A The services that are provided in the plan are reflective of what is indicated to provide that service. It does not -- you know, if the wife or someone is doing it out of generosity, it provides the costs to replace those services so those people don't have to do it out of generosity or he does not have to pay for them.

And can we take a quick break?

MR. CARPENITO: Yes, ma'am.

VIDEO OPERATOR: We are going off the video record. The time is approximately 2:59 p.m.

(Recess.)

VIDEO OPERATOR: We are back on the video record. The time is approximately 3:06 p.m.

BY MR. CARPENITO:

Q Ms. Hairston, I want to turn to the second page of both Exhibits 1 and 2. When I say "the second page," I mean the second cover page.

A I'm sorry, the second --

Q Cover page of Exhibits 1 and 2. Let's start with Mr. McElhiney. The second paragraph on that page of Mr. McElhiney's report says "In addition to review of records, the life care planner met with Mr. McElhiney and his wife, Mrs. Simonne McElhiney, on August 8, 2024, by means of videoconference."

MR. ROMANO: Excuse me one second. Can you let Leslie back in? I just got a text that she needs to reenter the Zoom.

VIDEO OPERATOR: Sure thing.

She's in.

MS. LA MACCHIA: Thank you.

MR. ROMANO: There you go.

Sorry about that.

MR. CARPENITO: That's all right.

BY MR. CARPENITO:

Q Ms. Hairston, you had an interview with

Mr. and Mrs. McElhiney on August 8, 2024; correct?
A Correct.
Q And it was conducted via videoconference; right?
A Yes.
Q How long was your interview of the McElhineys?
A I -- actually, I can't give you the exact time right now. I mean -- I'm sorry, I don't mean to say -- I can give you a range. I don't have --
Q That's fine.
A -- the information that gives the exact time.
Q Approximately.
A Between two to three hours.
Q Okay. And did Mr. McElhiney answer questions on his own during that two to three hours?
A He was able to answer questions. And Mrs. McElhiney was there -- I'm sorry, give me a second.
Q Yes, ma'am.
A As I have written in the report.
Together Mr. and Mrs. McElhiney were able to appropriately answer all questions.
Q And so is it fair to assume that

Mrs. McElhiney provided the answers to some of your questions?

A Yes.

Q Is that common, in these interviews in which you're preparing a life care plan for an individual, for their spouse or another person attending the interview to answer for the individual who is the subject for the life care plan?

A It is individualized, but, yes, that happens -- it does happen on many occasions where a close family member is there during the course of the interview to assist with answering questions and providing more specific details.

Q Do you recall any of the topics that were discussed in which Mrs. McElhiney provided an answer as opposed to Mr. McElhiney?

A I don't remember all of the specific topics.

Q Are there any -- is there anything that would help you recall that?

A Not at this time.

Q Did you take notes during that videoconference on August 8, 2024?

A I am not sure if there were additional notes. All of my work regarding that

videoconference were submitted.

Q Submitted where?

A They were provided as directed.

Q Provided to who?

A Well, they were provided with all of the documents that I provided to the law office in response to the deposition. And I'm sorry, I don't mean to be evasive. I don't --

Q That's okay.

A -- recall if I had handwritten notes with this visit. They would have been provided as directed.

(Government Exhibit 11 identified.)

BY MR. CARPENITO:

Q I'm going to introduce what will be marked as Exhibit 11. And I'm going to ask you to turn to Bates number 46. These are some of the documents that Mr. McElhiney's attorneys produced to the United States in response to the document requests that we sent relating to your deposition.

A Okay.

Q Are these notes that you took during the videoconference that is referenced on the second page of your report in Mr. McElhiney's case?

A Yes.

Q Are these the only notes that you have from that call?

A To the best that I can recall at this time, yes.

Q Okay. The second paragraph on that page of Mr. McElhiney's report, page 2 there, says "Also on the videoconference was Ms. Nancy J. Bond, a certified life care planner." Right?

A Yes.

Q Who is Ms. Nancy J. Bond?

A Nancy J. Bond is a life care planner, a colleague also employed, or previously employed, at the Coordinating Center.

Q She was actually on both of the videoconferences with Mr. Peterson and Mr. McElhiney; right?

A Correct.

Q Why was she on those calls?

A As I previously mentioned, as may often occur, as we are developing life care plans at the Coordinating Center, there will be two life care planners who are present during assessment and other pieces of development of the life care plan as we both bring -- or both of the life care planners bring different -- or bring vast amount of

experiences, education, skills and expertise.

Q What differences in experience does Ms. Nancy J. Bond have that you may or may not have?

A Nancy bond has a significant background in special education and rehabilitation services.

Q So how does her experience in special education provide the context for which she would be included in these videoconferences?

A As we often do at the Coordinating Center, if two life care planners are on the call, they're both hearing the information. During the development of my life care plan or a life care plan, I may consult with another life care planner or we may talk about different aspects of the life care plan. And if someone else has been on the call, that's another source of information that's helpful or can provide input in developing the life care plan.

Q Was there any particular portion of either life care plan in which you found Ms. Nancy J. Bond's input necessary?

A I can't identify any specific portion of the plan.

Q Did Ms. Nancy J. Bond in any way help you write either of your reports offered in this case?

A Can you clarify help write the report?
Q Well, what kind of input did she provide?
A At this point, I don't recall what input she provided.
Q Ms. Hairston, are you testifying that you don't recall whether Ms. Nancy J. Bond helped you to write either of these reports in this case?
A What I'm saying is Nancy J. Bond -- I wrote the report, okay. At this point in time, I don't recall if I had any conversations or questions or ran anything past Nancy bond.
Q Would there have been any reason for Ms. Nancy J. Bond to write any portion of either of these reports?
A No.
Q If she did, would it have been noted in the respective report?
A Nancy J. Bond did not write any portion of these reports.
Q To your knowledge, has Ms. Nancy J. Bond been retained as an expert in this case?
A To my knowledge, she has not been retained as an expert in this case.
Q And either of the videoconferences for Mr. Peterson or Mr. McElhiney, did Ms. Bond take any

notes?

A I have produced, based on the work that I have done on the case, I have produced that documentation as directed.

Q So is it possible that Ms. Bond also has notes from either of these calls?

A There may be a possibility.

Q Okay. If you wanted to figure out whether Ms. Bond had notes related to these calls, how would you go about doing that? Would you just ask her?

A I could just ask her. I could ask her.

Q Okay. Were there attorneys present during either of these videoconferences for Mr. Peterson or Mr. McElhiney?

A No.

Q Was either videoconference for Mr. Peterson or Mr. McElhiney recorded by anybody?

A No.

Q Let's turn to Mr. Peterson now specifically and the videoconference. That one was also conducted via videoconference; right?

A I'm sorry, let me catch up.

Q Yes, ma'am.

A Yes.

Q Do you recall, and an approximation is

fine, how long that interview lasted?

A With Mr. Peterson, approximately between two to three hours, if I recall correctly.

Q Were there any questions in which -- I should take a step back.

Did Mr. Peterson answer questions on his own?

A I'm sorry, I wanted to make sure I accurately reflected the interview.

Mr. Peterson appeared to understand the questions, although he had difficulty clearly verbalizing his answers.

Q Go ahead. No, please.

A No. Mr. Peterson typed some of his answers on a computer, which Mrs. Peterson read to the interviewers.

Q How much did Mrs. Peterson answer versus Mr. Peterson?

A I can't approximate.

Q So just to confirm my understanding of the videoconference, you would ask Mr. Peterson a question; right?

A Correct.

Q And then Mr. Peterson would type his answer on a computer; right?

A Yes.
Q And then Mrs. Peterson would read that typed answer to you; right?
A Yes.
Q Okay.
A And just to be clear, Mrs. Peterson was also able to answer questions posed regarding Mr. Peterson's former and current healthcare needs. She was able to assist with clarifying Mr. Peterson's verbal responses. Stop, I'm done.
Q Did you confirm Mrs. Peterson's answers with Mr. Peterson?
A Mr. Peterson was there sitting next to Mrs. Peterson.
Q My question is, did you explicitly confirm any of Mrs. Peterson's answers with Mr. Peterson?
A I don't recall that I did.
Q Did you offer Mr. Peterson the opportunity to add to any of Mrs. Peterson's responses?
A The interview is an open interview. Yes, if he wished to -- I'm sorry.
I can't be specific. I don't know every specific question and answer, if he came back and typed more. He was there doing the interview. It was open for him to offer any additional

information.

Q You also had additional calls with the Plaintiffs and their spouses beyond the interviews that are referenced in your report; right?

A Yes.

Q And you took notes during those calls; right?

A Yes.

Q And those notes reflect information that you obtained directly from the Plaintiffs, Mr. Peterson and Mr. McElhiney, or their spouses; right?

A Yes.

Q On Exhibit 11 -- and I'm just going to walk through these dates to make sure that we have the full universe here. Bates number 47.

A Okay. Bates 47.

Q Yes, ma'am. That reflects notes from a call that you had with Mr. McElhiney on December 9, 2024; right?

A Yes.

Q Bates number 48 reflects notes from a call that you had with Mr. and Mrs. Peterson on December 19, 2024; right?

A Yes.

Q Bates number 49 reflects notes from a call that you had with Mr. McElhiney on December 23, 2024; correct?

A Yes.

Q Bates number 50 reflects notes from a call that you had with Ms. Peterson on December 4, 2024; correct?

A Yes.

Q How common is it for you to have calls with only the spouse of an individual for whom you are preparing a life care plan?

A Again, it is individualized, but it happens. If the -- if I know this is an individual who is familiar with the care and the needs of the individual for whom the report is being prepared.

Q If you'll turn to Bates number 60. Are you there?

A Yes.

Q That reflects notes from a call that you had with Mr. McElhiney on January 9, 2025; right?

A Yes.

Q The next page, Bates number 61, reflects notes from a call that you had with Ms. Peterson on January 9, 2025; correct?

A Yes.

Q Bates number 62 reflects notes from a call that you had with Ms. Peterson on July 2, 2024; right?

A Yes.

Q Bates number 63 through 64 reflect notes from a call you had with Mr. and Mrs. Peterson on July 22, 2024; correct?

A Yes.

Q And finally, Bates number 65 reflects notes from a November 7, 2024 call with Mr. and Mrs. Peterson; right?

A Yes.

Q Okay. Those calls, at least in part, discussed the Plaintiffs' medical conditions; right?

A The information provided updates on the care that they were receiving, yes.

Q But your report refers generally to one interview for each Plaintiff; right?

A The initial interview is listed in the report, yes.

Q Your reports do not separately identify each of those additional calls as sources of information; right?

A It does not list all of the -- each additional call.

Q There's no section of your report listing these calls as materials considered; is that right?
A So can you clarify what you're asking?
Q There is no section of your report that lists these calls as materials considered; correct?
A It's not listed in the report.
Q Did you use information obtained during these calls in preparing portions of these reports?
A The information in the calls was used to help clarify details in terms of developing the report.
Q Does the information in the narrative section of your reports in these cases come from what the Plaintiffs or their spouses told you during these calls?
A I'm sorry, just repeat the question.
Q Yes, ma'am.
Does the information in the narrative section of your reports come from what the Plaintiff or the spouses told you during these calls?
A Information obtained during the calls, some of that information provided clarification that was used in developing the report and preparing the narrative.
Q A reader of your reports would not know

from reading the report alone that multiple follow-up calls occurred. You agree with that?

A It's not specifically indicated in the report.

Q Your report does not distinguish which information came from treating providers versus what came from these additional phone calls; right?

A I would have to ask you to be specific on that, what information came -- what information from treating providers.

Q Okay. We can go back to that in a moment.

The report does not explain which information in your reports were informed by which call; right?

A It does not detail areas of clarification or details that were specified in the report.

Q The notes that we just reviewed, are those the only written documentations of those additional calls?

A Yes.

Q Was Ms. Nancy J. Bond with you during these calls?

A No.

Q Outside of all the calls that we just referenced in walking through these notes, did you

have any additional calls with either of the Plaintiffs, their spouses or their friends?

A Not that I can recall. To the best that I can, I document when I have additional conversations with the individuals.

Q Are there any audio recordings of the calls that we just reviewed?

A None that I took.

Q There's no verbatim transcripts of those calls?

A No.

Q Was anyone else on the call besides yourself and the Plaintiff or their spouse?

A I documented the individuals who I understood were on the phone calls.

Q Do you recall when you provided this documentation in Exhibit 11 to Plaintiffs' counsel?

A I'm sorry, are you asking for the exact date?

I'm sorry. If I recall, the e-mail requested that I provide the documents by a specific date, and whatever that date was, my goal was to get the information to them by that date.

Q In other words -- we'll use Bates number 48, for example. There are notes there on December

19, 2024, you had a call with Mr. and Mrs. Peterson; correct?

A Correct.

Q Would it have been your normal practice after completing these notes to send these notes to Plaintiffs' counsel immediately or in the near future?

A Typically, when I document these notes, I maintain them in my file until I'm asked to produce them.

Q And you provided them to Plaintiffs' counsel in response to the document requests that we sent to you; right?

A Yes.

Q Let's turn to Mr. Peterson's report, and let's turn to appendix 8 of Mr. Peterson's report.

A Yes, I'm sorry. I'm there.

Q We're going to jump around here for a moment. Appendix A for Mr. Peterson's life care plan you have a service listed of home adaptation; right?

A Yes.

Q The unit cost is listed as $318,977; correct?

A Yes.

Q The annual cost is the same as the unit cost reflected as a one-time-only cost; right?

A Yes.

Q If you will turn to page 15 of your report on Mr. Peterson, do you see the housing and transportation section listed down towards the bottom of page 15?

A Yes.

Q In that paragraph, you discuss that, flipping to page 16 the last sentence in that paragraph, you state, "The reader is referred to Mr. Anderson's full report of December 16, 2024, for details regarding his recommendations and the basis of those recommendations."

Did I read that correctly?

A Yes.

Q Are you relying on Mr. Eric Anderson for the home adaptations service listed in your life care plan for Mr. Peterson?

A Relative to the home modifications, Mr. Anderson's report was used to provide that recommendation.

Q You did not independently design any of the proposed home modifications for the Petersons' home yourself; correct?

A No, I did not.
Q You did not independently propose any of the home modifications to the Petersons' home yourself; right?
A I did not.
(Government Exhibit 12 identified.)
BY MR. CARPENITO:
Q I will introduce what's going to be marked as Exhibit 12.
I would represent to you, Ms. Hairston, that Exhibit 12 is a copy of Mr. Eric Anderson's housing report for Mr. Edgar Peterson. Would you agree with that?
A Yes.
Q And it's a report dated December 16, 2024; right?
A Yes.
Q The costs associated with the home adaptation costs listed in appendix 8 of your report are taken directly from Mr. Anderson's December 16, 2024 report; correct?
A Yes.
Q Ms. Hairston, you're not a licensed contractor; right?
A I am not a licensed contractor.

Q You are not licensed to perform construction work; right?

A I am not licensed to perform construction work.

Q You are not licensed to estimate construction work; right?

A I am not licensed to estimate construction work.

Q You did not independently verify Mr. Anderson's costs, did you?

A I -- his report -- Mr. Anderson's report is his report.

Q If Mr. Anderson's pricing changes, the costs for home adaptations listed in appendix 8 of your life care plan would need to change as well; right?

A If new information was introduced as to the cost for home modifications, that information would need to be reviewed and analyzed to determine how it would apply to the life care plan.

Q If Mr. Anderson's pricing contains errors, the cost for home adaptation listed in appendix 8 of your life care plan would also contain those same errors; right?

A My information came from Mr. Anderson's

report.

Q Did you ever meet with Mr. Anderson?

A I'm sorry, during the course of the -- I don't recall meeting with him.

Q But you did refer this case to him; right?

A Yes.

Q You called Mr. Anderson and left a voicemail explaining that you had a referral for him; right?

A I don't remember the details of the referral, quite honestly.

(Government Exhibit 13 identified.)

BY MR. CARPENITO:

Q Exhibit 13. Ms. Hairston, I represent to you that Exhibit 13 is a copy of Mr. Eric Anderson's January 28, 2026, deposition transcript in this litigation. And I'll ask that you turn to page 28.

I'm going to read --

MR. ROMANO: Just a second.

MR. CARPENITO: Of course.

BY MR. CARPENITO:

Q Ms. Hairston, I'll read page 28, line 16, through page 29, line 7.

"Question: How did you first learn about the matter with Mr. Peterson?

"Answer: I received a phone call, a voice message from Kay Peterson [sic] explaining that she had a referral for me and that's how I learned this.

"Question: And was Kay Peterson the first person who contacted you about working on this matter?

"Answer: Yes.

"Question: When you were contacted, were you asked to do anything specifically for this case?

"Answer: No. Just to assess the house.

"Question: And at that time, what information were you provided with?

"Answer: Kay Hairston just left a message saying that she had a referral and provided the attorney information."

Did I read that correctly?

A Yes, you read that correctly.

Q You were the first person to call Mr. Anderson about working on this case; right?

A According to the deposition. I -- again, I may have called him. I mean, I don't agree or disagree.

Q According to Mr. Anderson, you were the first person to call him about the Petersons; right?

A Okay. Okay. Yes.

Q I'm asking if you agree.
A I don't remember the specifics of the phone call. I don't remember the day I called him, I don't remember what we talked about.
Q Do you understand that Mr. Eric Anderson never personally inspected the Peterson residence?
A I don't know all of the details of how Mr. Anderson prepared his report.
Q Okay. If you will turn to page 39 of this deposition transcript, let me know when you're there.
A Okay.
Q I'm going to read lines 8 through 10 on page 39. The question to Mr. Eric Anderson, "And in the case of Mr. Peterson, did you request to physically tour his property?
"Answer: No."
Would you have a reason to dispute what Mr. Anderson testified to with respect to him visiting the Petersons' home?
A This is the first time I am looking at the deposition, but I don't have a reason to dispute what he says.
Q And page 18 through -- excuse me.
Page 39, same page, lines 18 through 21.

"Question: And just so it's clear, as of today, you have not been physically present inside Mr. Peterson's home; correct?

"Answer: Correct."

Did I read that correctly?

A Yes.

Q Are you aware that the scanning of the Petersons' residence was done by somebody other than Mr. Anderson?

A I am not going to comment on the details of how Mr. Anderson performs his assessment or prepares his report.

Q You didn't meet with the third party who conducted the scanning of the Peterson residence, did you?

A If that was done -- I haven't met with anybody regarding the assessment of Mr. Peterson's home.

Q You never personally conducted on-site evaluation of the Petersons' residence; right?

A Correct.

Q You never personally conducted a virtual evaluation of the Peters' residence; right?

A When you -- can you clarify, what do you mean virtual?

Q I mean a virtual tour of their home.
A I don't know if there's a specific name for the virtual tour of their home. During the videoconference call with Mr. and Mrs. Peterson, they showed different areas of the home during the virtual call.
Q What areas?
A I'd have to look in my -- I don't know that I have that information in the report.
I recall they did go to another room of the home. I did not -- I did not see all of the home, so that's why I'm asking for clarification, what you say, did I do a virtual tour of the home.
Q How many other rooms did they show you during the virtual -- the videoconference that you had with the Petersons?
A One to two.
Q Are you aware that Mr. Anderson testified in his deposition that at least 20 percent of the total cost that's reflected for these home modifications or adaptations represents contingencies?
A I'm not aware of what he testified to.
Q Would you agree roughly 20 percent of 318,000 is approximately 60,000?

A I don't have a calculator. If that's the numbers that you're telling me right now, I'm going to defer to your math.

Q Let's look at page 56 of that deposition transcript and look at the very bottom of page 56 onto page 57. I'm going to read starting with line 24 on page 56.

"Question: So, Mr. Anderson, then is it fair to say that when we look at the 10 percent contingency and the 10 percent additional contingency that at least 20 percent of the projected cost of this project is uncertain to occur as of today?"

Mr. Anderson's answer, "Correct."

So do you have any reason to dispute that Mr. Anderson takes the position that at least 20 percent of the projected costs of the project related to the Petersons' home is uncertain to occur?

A I can defer to what is written in the -- what is being presented to me in the deposition.

Q If those contingencies never materialize, do you agree that the relevant portion of your life care plan in appendix 8 for Mr. Peterson would overstate the actual costs?

A If there is additional information regarding the cost of the home modifications and a modification in Mr. Anderson's report, that information would need to be reviewed and analyzed, and determine how it would apply to the life care plan.

Q And if the additional information given to you is that the contingencies never materialize and $60,000 roughly of the home adaptation costs is then decreased, then that cost in your life care plan for Mr. Peterson would need to be reduced; right?

A Any new information would need to be reviewed and analyzed and determined how it would apply to the life care plan.

Q You note in your narrative section for Mr. Peterson's report that their home is located in a historic district; right?

A Yes.

Q And let's turn to page 16.

A One-six?

Q Yes, ma'am.

A Of the Peterson report?

Q Yes, ma'am.

A Okay. Yes, I'm there.

Q That paragraph at the top of the page,

about halfway to three fourths down that paragraph, there is a sentence that starts with the word "Briefly."

Do you see that?

A Yes.

Q It reads, "Briefly, Mr. Anderson indicated that the Peterson home is located in Central Gardens National Historical District. All modifications to the house must comply with the architectural guidelines of the Central Garden Association and the Memphis Landmarks Commissions."

Did I read that correctly?

A Yes.

Q Are you aware that at the time of his January 28, 2026, deposition Mr. Anderson had not communicated with either housing authority about these proposed modifications to the Peterson home?

A I don't know the details of what he did when preparing his report.

Q Is that something you would have wanted to know before including that in your life care plan?

A All of that is information that would be considered in terms of developing the life care plan.

Q But you didn't have that information, did

you?
A I am not aware of that information.
Q You didn't personally review the guidelines of either of those governing bodies; right?
A The governing bodies of?
Q The Central Gardens National Historical District or the Memphis Landmarks Commission.
A I did not.
Q Will you turn to page 81 of the deposition transcript?
A Are you still on Exhibit --
MR. TUBIN: 13.
THE WITNESS: 13?
BY MR. CARPENITO:
Q Yes, ma'am.
A Okay. I'm there.
Q And I'm going to read lines 3 through 16 on page 81 of Exhibit 13.
"Question: Have you submitted a proposal with the CGA Landmarks committee as of today?
"Answer: No.
"Question: And your report also contains drawings of Mr. Peterson's property; correct?
"Answer: Yes.

"Question: And did you schedule a preliminary review with the Memphis Landmarks Commission staff prior to creating the drawings of Mr. Peterson's property?

"Answer: No.

"Question: Has anyone with the Memphis Landmarks Commission reviewed your drawings?

"Answer: No."

Did I read that correctly?

A Yes.

Q You agree that, as of the time of his deposition, not a single person with the Memphis Landmarks Commission reviewed Mr. Anderson's proposed drawings of the Peterson home; right?

A I'm reading along with you what's in the deposition.

Q If the relevant housing authorities that we've just discussed deny Mr. Anderson's proposals, that would impact appendix 8 in Mr. Peterson's life care plan; right?

MR. ROMANO: Just one second. I'm going to object to the form of the question. I'm going to object to any of the testimony and questioning having to do with somebody else's deposition, another expert's deposition under these

circumstances.

Go ahead.

THE WITNESS: I'm sorry, can you ask the question again?

BY MR. CARPENITO:

Q Yes. If the relevant housing authorities that we've discussed today, and that you have noted in your report, if they deny Mr. Anderson's proposals, that would impact appendix 8 in your life care plan; right?

MR. ROMANO: Object to the form of the question.

THE WITNESS: That is all having to do with Mr. Anderson's report. All I can say is if there is new information provided to me, that information would have to be reviewed and analyzed and determined how it would impact the report.

BY MR. CARPENITO:

Q Ms. Hairston, you testified that you relied on Mr. Anderson's report for the costs in your life care plan; right?

A I used his report to provide the costs for the home modifications.

Q Right. So you can see kind of my thought process here, like if either of these housing

authorities says, no, Mr. Anderson, we're denying your proposal, that line item in your life care plan would need to be removed; right?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: I can't answer how that would impact his report, how that would impact his report. And so once all of that information is -- whatever scenario plays out, once that scenario -- once that information is provided, I would have to review the information and determine if it impacts the report.

BY MR. CARPENITO:

Q Are you aware that the Central Gardens has architectural design guidelines that have been approved by the Memphis Landmarks Commission?

A I am not familiar with --

MR. ROMANO: Same objections.

(Government Exhibit 14 identified.)

BY MR. CARPENITO:

Q I am going to introduce what will be marked as Exhibit 14.

Ms. Hairston, I would represent to you that these are the "Central Gardens Historic Zoning: Architectural Design Guidelines and Users Guide."

Do you see that on the first page?

A Yes.

MR. ROMANO: Let me interject an objection to any question about -- asking a life care planner to now start interpreting historic zoning guidelines. So I'll make that a continuing objection.

MR. CARPENITO: That's fine.

MR. ROMANO: As it would be like asking her to start looking at a surgical textbook talking about surgery.

BY MR. CARPENITO:

Q I'm going to ask that you turn to page 4.

A Where are you seeing page numbers? Oh, I see it. There it is.

Q Down in the bottom in the black box. Do you see at the top of page 4 it says "The Design Review Process"?

A Yes.

Q And if you skip to page 5, skip down to step 6, I'm going to read step 6 here. It talks about "Prepare and submit a complete application packet for" "review. An application packet should be prepared and submitted to the City for projects subject to review. Adequate documentation is

essential to provide complete understanding of the work proposed. Applicants are encouraged, and may be required, to submit the following documentation."

And then the last two bullet points there list "Site plan (drawn to scale)," "Proposed building elevations (to scale) with materials and dimensions specified."

Did I read that correctly?

A You read that correctly.

MR. ROMANO: Objection to the form of the question and to this entire line of questioning.

BY MR. CARPENITO:

Q Now keeping that in front of you and in mind, let's turn back to Mr. Anderson's report, on which you state you rely for appendix 8 in your life care plan. And turn to what is marked as page 1 in the bottom right-hand corner, but it is technically the fourth page of Mr. Anderson's report.

Do you see down there in all caps it says "NOT TO SCALE - ILLUSTRATION PURPOSE"?

MR. ROMANO: Continuing, same objections.

MR. CARPENITO: John, the deposition protocol in this case states that you can't have speaking objections. I noted your continuing objection. It's on the record.

THE WITNESS: I don't know if I'm on the same page as you.

BY MR. CARPENITO:

Q Does it say page 1 in the bottom right-hand corner?

A "NOT TO SCALE," I see that.

Q If you flip the page, do you see "NOT TO SCALE"?

A Yes.

Q Do you see page 3, "NOT TO SCALE"?

A Yes, I see that.

Q And page 4 it says "NOT TO SCALE"?

A Yes.

Q And page 5 it says "NOT TO SCALE"?

A Yes.

Q Page 6 says "NOT TO SCALE"?

A That's what it says.

Q Page 7 says "NOT TO SCALE"?

A Yes.

Q And page 8 says "NOT TO SCALE"?

A Yes.

Q As does page 9?

A Yes.

Q And page 10?

A Okay.

Q And page 11. As written, Mr. Anderson's drawings do not satisfy at least one submission requirement under the relevant guidelines; right?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: I can't comment on the details of his report. I just don't have any comment on it.

BY MR. CARPENITO:

Q Would you agree that the approximately $318,000 line item listed in appendix 8 of your life care plan for Mr. Peterson is not tied to any approved scope of work submitted by Mr. Anderson?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: I can't comment on that. I don't know those details.

BY MR. CARPENITO:

Q The specific home adaptations in Mr. Anderson's report come from Mr. Anderson; right?

MR. ROMANO: Objection to the form of the question.

THE WITNESS: The information that I used in development of the life care plan, I used input from the report of Mr. Anderson.

BY MR. CARPENITO:

Q What I'm trying to understand is the specific home adaptations in Mr. Anderson's report don't come from any of Mr. Peterson's treating medical providers; right?

A I can't speak to the details of Mr. Anderson's report.

Q Did any of Mr. Peterson's treating medical providers discuss with you any home adaptations?

A They have not discussed with me home adaptations.

Q Instead, you relied on a licensed contractor to determine if these home modifications were medically necessary; is that right?

A I disagree with the way you've worded the questions. In developing the life care plan, I used input from the report of Mr. Anderson to identify the home modifications that were appropriate for Mr. Peterson, for him to remain at his home and the community.

Q Are you aware that Mr. Peterson has been diagnosed with Parkinson's disease for more than 20 years?

A He has had Parkinson's disease for quite a while.

Q During those 20 years, him and Mrs. Peterson have lived in the same home; right?

A It is my understanding they have resided in the same home.

Q Are you aware of the Petersons ever undertaking structural accessibility renovations to their home at any point in the past?

A I do not have all of the information as to what -- modifications or accessibility features that have been identified for their home.

MR. CARPENITO: Why don't we take a short break.

VIDEO OPERATOR: We are going off the video record. The time is approximately 4:02 p.m. This is the end of media 4.

(Recess.)

VIDEO OPERATOR: We are back on the video record. The time is approximately 4:12 p.m. This is the beginning of media 5.

BY MR. CARPENITO:

Q Ms. Hairston, if you will turn to the second cover page of Mr. Peterson's report, please. And on that page, it states that "Input into the life care plan was sought and received from Mr. Peterson's treating providers of care including

neurologist, Dr. Vishad Kumar; licensed speech therapist, Ms. Celia Lyons; and licensed physical therapist, Ms. Ellen Markwell"; correct?

A Yes.

Q Outside of those individuals listed there and outside of Mr. Anderson, is there anyone else that you sought and received input from when preparing Mr. Peterson's life care plan?

A No, not that I recall.

Q How did you determine which treating providers you would seek input from for Mr. Peterson's life care plan?

A I reviewed the medical records and after speaking with Mr. Peterson and obtaining information on those providers who were involved in his care, I determined that these were the individuals who could provide appropriate information as to the supports and services that he needs.

Q Were there any other treating providers that you wanted to talk to but were unable to?

A I did not reach out to any other physicians or providers.

Q Were there any others that you wanted to talk to?

A Those were the providers of care that I

identified who could assist, and provide input into the life care plan.

Q What criteria did you use in deciding which providers' input was necessary versus which was not?

A Can you be more specific, please?

Q Yes, ma'am. Was there any criteria that you used in deciding which providers you would seek input from versus which providers you would not seek input from?

A Again, after the assessment, speaking with Mr. Peterson, and having -- reviewing the medical records, I identified the providers who were involved in his care and could identify the supports and services that he needed.

(Government Exhibit 15 identified.)

BY MR. CARPENITO:

Q I'm going to introduce what will be marked as Exhibit 15. This is a copy of the questionnaire that you sent to Dr. Kumar.

A Yes.

Q Dr. Kumar is Mr. Peterson's neurologist; right?

A Correct.

Q If you'll turn to question 2 on page 1, do

you agree with me that question 2 indicates that the last time Mr. Peterson was examined by Dr. Kumar, at least at the point in which he filled out this questionnaire, was July 30, 2024; right?

A Yes, that's what's indicated in the questionnaire.

Q And would you also agree that Dr. Kumar's responses then would be based on his assessment of Mr. Edgar Peterson up and to the point of July 30, 2024?

A I would say that he examined Mr. Peterson on July 30, 2024. I can't say that there were other opportunities for him to communicate or have information about Mr. Peterson's condition after July 30.

Q Based on Dr. Kumar's response to this questionnaire, none of the information reflected in his answers in this questionnaire would be based on Mr. Peterson's condition after July 30, 2024; right?

A Well, I can't say that.

Q Well, the date listed here is July 30, 2024 for the last time that Dr. Kumar examined Mr. Peterson; right?

A Yes, he examined Mr. Peterson -- he indicated that he examined Mr. Peterson on July 30.

Q And your life care plan relies on this questionnaire at least in part; correct?
A Yes, it was used -- the input was used in development of the life care plan.
Q Your life care plan is dated February 5, 2025; right?
A Yes.
Q You don't have an updated questionnaire from Dr. Kumar, do you?
A I have the questionnaire that is dated as here reflected on this document.
Q And that's what I've just handed you as Exhibit 15; correct?
A Correct.
Q Any changes in Mr. Peterson's condition after July 30, 2024 would not be reflected in Dr. Kumar's responses; right?
A Well, that's a general statement. Can you say that again, please?
Q Any changes in Mr. Peterson's condition after July 30, 2024 would not be reflected in Dr. Kumar's responses in this questionnaire at Exhibit 15?
A The date that I have on Dr. Kumar's responses are August 7, 2024.

Q If we look at question 4, "Do you anticipate that Mr. Peterson will require more than the usual number of visits to his primary care physician related to his Parkinson's disease and related impairments?" First, did I read that correctly?

A Yes.

Q Dr. Kumar's response is no; right?

A Correct.

Q And if we look at appendix 1 of your life care plan for Mr. Peterson, do you see "Primary Care" there listed?

A Yes.

Q Do you see for "DURABILITY" it states "As indicated"?

A Yes.

Q What is as indicated?

A That is going to be based on Mr. Peterson and his relationship with his primary care physician and however often his primary care physician wants him to come in to see him.

Q Who is his primary care physician?

A Dr. Allen.

Q Why didn't you receive input for Mr. Peterson's life care plan from Dr. Allen?

A Again, after reviewing the records, and talking with Mr. Peterson and reviewing all of the information, I determined that I would reach out to Dr. Kumar for input into the life care plan.

Q But you received input from Mr. McElhiney's primary care physician; right?

A Yes.

Q But you didn't receive input from Mr. Peterson's primary care physician; correct?

A These are both individualized, client-specific plans, and for each plan I look at the information available to me, and determine how best -- appropriate to that individual to develop the life care plan.

Q And they're both individuals with Parkinson's disease; right?

A Yes, they are.

Q So why did you make the decision to rely on the primary care physician, at least in part, for one of them and not the other?

A It was based on the information that was available to me and in determining the physicians that could provide input into the life care plan.

Q And Dr. Allen could not provide input into the life care plan? Is that what you're saying?

A I did not reach out to Dr. Allen.
Q Why?
A Based on the information -- after review of the information, the medical records, speaking to the Petersons, all of the information was considered, and for Mr. Peterson I contacted Dr. Kumar for input into developing the life care plan.
Q What if Dr. Allen has information that could have been relevant to your analysis of this life care plan?
A As I developed the life care plan, I determined that Dr. Kumar could provide input appropriate to the development of the life care plan. If there's any new information available, that information will be reviewed and analyzed and determined if it impacts the life care plan.
Q Can we turn to question 11, please, in Exhibit 15. If you look at question 11, it asks, "Do you recommend annual re-evaluation services from the following disciplines for the purpose of updating Mr. Peterson's home exercise program and/or maintaining his physical function?"
Did I read that correctly?
A Yes.

Q And then question 12, excuse me, asks separately what treatment services Dr. Kumar anticipates Mr. Peterson will require? Right?
A Question 12?
Q Yes, ma'am.
A Yes.
Q It asks about physical therapy; right?
A Yes.
Q Occupational therapy?
A Yes.
Q And speech therapy?
A Yes.
Q Now, if you turn to appendix 4 of your life care plan, your life care plan includes separate line items for a "Physical Therapy Evaluation"; right?
A Yes.
Q And then "Physical Therapy," is that treatment?
A Yes.
Q And then a separate line item for "Occupational Therapy Evaluation"; right?
A Yes.
Q And then "Occupational Therapy" treatment?
A Yes.

Q And then lastly, "Speech Therapy Evaluation"; correct?
A Yes.
Q And a separate line item for "Speech Therapy" treatment; right?
A Yes.
Q A reevaluation is simply a therapy appointment where the relevant therapist is reassessing progress; right?
A I'm sorry, say that again?
Q An evaluation, or reevaluation, is simply a therapy appointment where the relevant therapist is reassessing the patient's progress; right?
A No, I'm not going to define it as simply as that.
Q Could it occur during a regularly scheduled therapy visit?
A There are evaluations for therapy, and there are actually therapy sessions where they are actually providing treatment.
Q But physical therapy evaluation is listed three times per year here; right?
A Yes.
Q And Mr. Peterson in his life care plan that you've drafted also has physical therapy

listed, 24 to 30 visits per year; right?
A Yes.
Q And so what I'm asking you is, those three physical therapy evaluations, could they not occur at the same time as a physical therapy treatment?
A If I can get to all of my information -- can I get just a minute, please?
Q Of course.
A Okay. Well, simply, I'm not sure if I can find the exact document. Those recommendations come from the physical therapist.
Q Can you -- did you ever ask them, those therapists, whether the evaluation could occur during a therapy treatment session?
A What is identified in the report is what was recommended from the physical therapist.
Q And you didn't request clarification with respect to this topic; is that right?
A To the best that I can recall, the physical therapist indicated that these evaluations would be separate from the actual sessions of physical therapy.
Q Do you recall why they said that was needed?
A This is the information that was provided

to me by the therapist who was treating him -- treating him at the time.

Q Did they provide you any requirement that states that the evaluation must be completely separate?

A I don't remember those details of the conversation.

Q Okay. Is there anything that would help you remember?

A Not at this time.

Q Now, let's look at the "PROVIDER" column in appendix 4.

A Okay.

Q For physical therapy, occupational therapy and speech therapy, in the accompanying evaluation, your provider lists one single provider; right?

A Correct.

Q And I'm not going to attempt to pronounce that, but it is -- can you explain what this provider is and where it is?

A This provider -- during the development of the life care plan, Mr. Peterson began active participation in therapy services at this facility. And this facility was specifically contacted and questioned about the cost of therapy services

relative to Mr. Peterson.

Q In other words, for each of these therapies on appendix 4, other than the access to adaptive gym, you list only one costing provider; right?

A Yes.

Q You did not obtain pricing from multiple physical therapy providers in Mr. Peterson's geographic area; is that right?

A As is consistent with my practice, if an individual is -- has received services from a specific provider, that's where they like to receive services, or as in this case is actively being treated as the life care plan is developed, then that is the cost of services that will be reflected in the life care plan.

Q Ms. Hairston, my question to you was whether or not you agree that you did not obtain pricing from multiple physical therapy providers in Mr. Peterson's geographic area.

A No. I obtained pricing -- as consistent with my practice, I obtained pricing from the provider for which he was receiving services from.

Q You did not obtain pricing from multiple occupational therapists providers in Mr. Peterson's

geographic area; is that right?

A As consistent with my practice, I obtained pricing from the provider for which he was receiving services from.

Q You did not obtain pricing from multiple speech therapy providers in Mr. Peterson's geographic area; correct?

A As is consistent with my practice, I received pricing from the provider for which he was receiving services.

Q You didn't identify the lowest available market rate for comparable services with respect to any of these therapies; right?

A As consistent with my practice, I obtained pricing from the provider for which he was receiving services.

Q Ms. Hairston, I'm going to ask my question again.

You did not identify the lowest available market rate for comparable services with respect to these -- physical therapy, occupational therapy or speech therapy?

A So I -- I don't know any of the way to say it except to say I take issue with the question.

I don't go out and ask for the lowest

price for a service provider.

As is typical with my practice, I have identified the price for services for the provider from which he was receiving services at the time during -- as the report was being developed.

Q You didn't perform any type of market survey to determine whether other providers charge less, did you?

A I obtained the cost from the provider that was providing services to Mr. Peterson at the time.

Q Earlier you testified that sometimes your practice is to identify three providers; right?

A And consistent with my practice, if an individual does not have a particular provider for services, then the cost for three providers will be obtained.

Consistent with my practice, if a provider -- if an individual is receiving services from a specific provider, the costs from that provider will be used.

Q Your life care plan on this page lists physical therapy visits for 24 to 30 visits per year; right?

A Correct.

Q Is Ms. Markwell the rationale of that

service?
A I spoke with Ms. Markwell, and she provided input as to the frequency of services for Mr. Peterson.
Q Did you send her a questionnaire?
A I'm sorry, let me -- I'm sorry, give me just a second, please. Why do I not see Mr. Peterson's report? Oh, sorry.
Q That's okay.
A I'm sorry, can you repeat the last question, please?
Q Did you send Ms. Markwell a written questionnaire like you did with Mr. Kumar?
A No, I did not send her a written questionnaire. I had a phone conversation with Ms. Markwell.
Q How many phone conversations did you have with Ms. Markwell?
A To the best I recall it was only one.
Q Do you have notes from that call?
A Yes.
Q Okay. Have you provided those notes to the United States?
A I believe that I did.
Q Okay. Page 15 of -- actually, strike

that.

Do you recall how many pages those notes were reflecting your call with Ms. Markwell?

A I believe it was one page.

Q Did you provide those notes to Mr. Peterson's attorneys?

A I believe I produced the documents as requested.

Q So your frequency numbers are based on your understanding of a phone call with Ms. Markwell; right?

A Are based on the input following the conversation with Ms. Markwell, yes.

Q If we look at the occupational therapy service on appendix 4.

A I'm sorry, yes.

Q That's okay.

Your life care plan recommends occupational therapy evaluation; right?

A Yes.

Q And then an occupational therapy of four to eight times per year; right?

A Yes.

Q You attribute the occupational therapy service to Ms. Markwell; correct?

A Yes.
Q Ms. Markwell is a physical therapist; right?
A Yes.
Q In fact, you identify her in your report as a physical therapist; right?
A Yes.
Q Ms. Markwell is not an occupational therapist, is she?
A Ms. Markwell is a physical therapist.
Q Do you agree with me that Ms. Markwell is not an occupational therapist?
A To the best that I know, Ms. Markwell is not an occupational therapist. She works in rehabilitation services.
Q So you obtained a recommendation from an occupational therapist supporting -- excuse me.
You did not obtain a recommendation from an occupational therapist supporting four to eight visits per year for occupational therapy?
A As Ms. Markwell works in rehabilitation services and we discussed occupational therapy for Mr. Peterson, she indicated that an occupational therapy visit every few weeks is reasonable for Mr. Peterson to identify adaptive equipment and work

on his activities of daily living.

And with the consideration for the benefit of occupational therapy, there was also information that was obtained from the Parkinson's Foundation, and considering those two pieces of information together, as well as my experience, expertise, working with individuals with these type of injuries, this was what is reflected in the life care plan.

Q Well, your experience working with these individuals with these types of injuries, you testified earlier that you've only worked on, with others, five life care plans for people who had Parkinson's disease, between the 125 to 250 life care plans that you've worked on; right?

A I did. But I have also worked with many individuals who have had the same response to their injury, which is -- are gait impairments and functional limitations.

Q And you didn't quite answer my question earlier, so I'm going to ask it again.

You did agree with me that Ms. Markwell is not an occupational therapist; right?

MR. ROMANO: Objection to the form of the question.

BY MR. CARPENITO:

Q You can answer.

A To the best that I know, she is a physical therapist.

Q You did not obtain a recommendation from an occupational therapist supporting this occupational therapy line item in your appendix 4 of Mr. Peterson's report; right?

A I did not speak to an occupational therapist.

Q Your life care plan lists 16 to 18 speech therapy visits per year; right?

A Yes.

Q And that came from Ms. Lyons?

A Yes.

Q Has Mr. Peterson historically required 16 to 18 speech therapy visits per year?

A Can I go back to -- you're using the word "required" speech therapy. I would say it needs to be considered whether or not he's had the ability to get to 16 to 18 speech therapy visits a year.

Q I'm not sure I understand. What do you mean by that?

A Well, you know, one of the issues is his ability to get out of the house and for someone to

take him to all of the medical appointments and therapy that he requires.

Q Right. And so I'm asking you, has Mr. Peterson historically utilized 16 to 18 speech therapy visits per year?

A I don't know if he's utilized them. Ms. Lyons indicated that is what he needs now.

Q Would it be important for you to consider whether Mr. Peterson had utilized 16 to 18 speech therapy visits per year in the past?

A Well, what he needs now is 16 to 18 visits per year, and with implementation of all of the services in the life care plan he would be able to get to those appointments.

Q And you had a telephone consultation with Ms. Lyons; right?

A Correct.

Q Did you take notes during that call?

A Yes.

Q Okay. Did you produce those notes from that call to the United States?

A I believe that I did.

Q Okay. Did you only have one call with Ms. Lyons?

A To the best that I recall, it was one

call.

Q Okay. Did you send Ms. Lyons a questionnaire like you did with Dr. Kumar?

A No.

Q So as it relates to Ms. Lyons and Ms. Markwell, why did you decide to have a phone call with them as opposed to sending them a questionnaire?

A Well, number one, I have to look at all of the information together and identify what's the best way to contact them. And if I recall, when I contacted the therapy department, they both said they were available to talk to me. It is also helpful in terms of getting input from the therapists in developing the life care plan to talk to them about the goals of therapy, what they're working on, the outcome, the number of visits.

So for this particular situation, they were available to talk to me by telephone, and that's how I was able to obtain input into the life care plan.

Again, it's individualized, and it can depend on the situation to determine what's the best way to get the information from the provider of care.

Q So why didn't you submit them a questionnaire?

A Again, as -- it was identified to me these were the therapists, this is where they work, and if I recall, in contacting the rehabilitation departments to identify the best way to contact them, I was informed they were available to talk by phone. And if someone is available to talk to me by phone, I will talk to them and we can discuss and get input to develop the life care plan.

Again, it's individualized, client-specific. So every situation has to be worked out for each individual person.

Q Will you turn to appendix 7, please, of your report in Mr. Peterson's case.

A Yes. I'm there. Did you hear me?

Q Yes, ma'am.

A Okay. Sorry.

Q No, that's okay.

Do you remember earlier when we were looking at the similar page in Mr. McElhiney's case related to daily care, I was asking you some questions about whether there was overlap in some of these services? Do you remember that?

A Yes.

Q Would you agree that that same overlap can occur with the services listed on the daily care appendix 7 page in your Mr. Peterson report?

A Can you please identify the overlap that you're referring to?

Q Well, certified nursing assistant is listed here as 24 hours per day; right?

A Correct.

Q And one of the things that they are asked to do -- excuse me.

"Replacement Services." Looking at "Replacement Services" and "Certified Nursing Assistant," they both deal with household tasks; right?

A They deal with different type of household tasks.

Q Are there any household tasks that a certified nursing assistant would do that somebody with replacement services would also conduct?

A Certified nursing assistant is going to carry out those tasks that are associated with the activities of daily living that they are assisting the individual with. It is not within their scope of practice to carry out tasks around the home and property to maintain the home and property.

They're not going to do lawn care. They're not -- they're not going to clean the gutters. They're going to do some very basic laundry. They're not going to do -- you know, they're not going to change light bulbs, they're not going to do simple repairs.

The tasks that the CNA and the replacement services do are going to be two different categories of services.

Q What of these services is Mrs. Peterson helping with?

A What's your question? Can you be more specific, please?

Q Well, there are a variety of different services listed underneath each service here.

A Uh-huh.

Q And would you agree first, as it relates to the services listed under certified nursing assistant, that Mrs. Peterson helps Mr. Peterson with his personal hygiene?

A It is my understanding currently she helps him.

Q Does she help with meal prep?

A She is his wife. It is generous of her to be a caregiver. But based on the injury that he has

had, it was not anticipated that she was going to be -- have to be his caregiver.

Q Does she help with meal prep?

A Currently, she helps with meal prep. But that -- someone else should be in the house to help with meal prep so she can turn to the role of being a wife.

Q Does she help with assistance for tasks of household management?

A She does share in those tasks.

Q Does she drive Mr. Peterson to appointments?

A Currently, she is the -- it is my understanding she is the only person available to drive him to appointments.

Q Are you aware of who conducted the heavy cleaning in the house before Mr. Peterson's Parkinson's disease progressed?

A I don't have the information in -- I don't have the information. It is -- if I list these here, it would mean that he shared in those tasks prior to his injury.

Q Do you have any documentation that notates how much Mr. Peterson shared in these services with Mrs. Peterson prior to his injury?

A It is my understanding he shared in the services. I don't have specific documentation.

Q So let's look at, then, your cost summary 1, and let's look at the daily care column there. The total is listed as just over $3.8 million; right?

A Where are you?

Q On cost summary 1 in Mr. Peterson's report, if you look under the "DAILY CARE" column, the total is listed for $3.8 million; is that right?

A Yes.

Q And you're telling me that you don't have any documentation that shows the hours that Mr. Peterson spent on these household tasks before his Parkinson's disease?

A Okay. And I -- in order to identify the number of hours of replacement services, I have used data that was obtained from Dollar Value of a Day as a reference to identify the number of replacement hours.

Q Can you turn to page 6 of the questionnaire that you sent to Dr. Kumar, please. It's the last page of that questionnaire.

A Page 6?

Q Yes, ma'am.

A Yes.
Q Do you see question 22 there?
A Yes.
Q That is the question related to daily care services; right?
A Yes.
Q Okay. That question there, question 22, does not list CNA as a specific intervention; right?
A It is not in that question.
Q Nor does it list 24 hours per day as the durability; right?
A Not in that question.
Q That questionnaire does not specifically identify replacement services; correct?
A Well, it does. The question asks about tasks and chores.
Q Can you identify for me where in that question it identifies the durability of 19.36 hours weekly coming from Dr. Kumar?
A That information was -- let me double-check. What are you referring to, information from where?
Q Well, the durability listed for replacement services on appendix 7 is 19.36 hours; right?

A Yes.
Q I'm asking you if question 22, to Dr. Kumar -- does it identify the frequency of replacement services, in asking your question to Dr. Kumar?
A That information or the replacement hours was obtained from data from Dollar Value of a Day.
Q Does question 22 to Dr. Kumar specifically identify companion care?
A The daily care services that are indicated for Mr. Peterson were obtained based on information from Dr. Kumar, along with all of the information which identified his functional limitations, his impairments, his ability to carry out his activities of daily living, his inability to complete the tasks and chores that he previously performed.
And putting all of that information together, along with my experience and expertise and clinical skills and identifying the appropriate services that he needs now.
Q Dr. Kumar did not select specifically any of these services; right? Can you slide your microphone up a little bit?
A Oh, sorry.
Q That's okay. So my question was,

Dr. Kumar did not identify specifically any of these services outside of a couple of the replacement services; right?

A He provided input which was used to identify the appropriate services to provide care to Mr. Peterson so he could remain in the home and community setting.

Q You didn't conduct an in-home observation of Mr. Peterson, did you?

A Can you define or clarify what you --

Q Did you go to the Petersons' house and conduct an observation of how long it took Mr. Peterson to complete a task?

A I did not go to his house. Mr. Peterson, as indicated in the report, did -- he was observed during the video call.

Q In your narrative section of this report on page 13, and you can turn there if you would like, you state in the third paragraph, "Mr. Peterson requires a caregiver throughout his waking hours and an individual to be available to him during the nighttime hours."

Do you see that?

A Yes.

Q Did I read it correctly?

A Yes.

Q How many waking hours did you assume per day for Mr. Peterson?

A I can't say that I calculate a specific number of waking hours. Mr. -- my report indicates, you know, the hours that Mr. Peterson typically sleeps. I'm sorry, give me just a minute, please.

In my report, it indicates that by p.m. Mr. Peterson is in bed for the night, and he indicated that, during the day, he does not rise until 11:00 or 12:00. During the night, he does -- he has -- he rises multiple times during the night to travel to the bathroom to urinate. And he also wears a diaper to help maintain urine leakage or incontinence.

Q So when taking the assumption of his waking hours, did you have to input that number that you assumed he's awake per day into the Dollar Value of a Day?

A And that's -- so the Dollar Value of a Day provides the time or cost for the services that would need to support or replace the services that Mr. Peterson previously performed around his home and property to maintain his home and property.

Q I see. Did you work in the assumption of

how many hours Mr. Peterson was awake per day into the services listed in appendix 7 in your report?

A Which specific services are you referring to?

Q CNA.

A The CNA is provided 24 hours per day.

Q Right. And that's what I'm asking you. Why does he need a CNA when he's asleep?

A As indicated in my report, Mr. Peterson experiences -- he has -- frequently gets up to urinate at night. It is not safe for him to be getting up by himself. He can experience falls, he experiences falls very frequently. It is very difficult for him to travel to the bathroom. It is an arduous task for him to cleanse himself after he urinates and clean up his surroundings.

So there is a caregiver day and night, particularly at night, to ensure that if he does need to get up and go to the bathroom, someone is there to ensure that -- his safety and that he does not fall.

Q Is Ms. Peterson ever with him when he goes to the restroom in the middle of the night?

A It is my understanding that he attempts this task at night. It is not safe for him to do

it. It is absolutely not an ideal situation.

He should not be getting up by himself at night.

Q Ms. Hairston, I'm asking you if his wife helps him to the restroom in the middle of the night.

A I do not know all of the circumstances of how they carry out his care at night.

Q That would have been very important to know when you were assigning 24 hours per day of CNA services; right?

A He needs 24 hours of care now. That -- it doesn't matter whether -- if she's helping him or not. That's what he needs now. It is not safe for him to get up at night and go to the bathroom by himself.

If and when she helps him now, it is not a task that she should be continuing to do every single night. He needs a caregiver to be with him.

Q Do you think it could have been reasonable for Ms. Peterson to help some nights and not others? In other words, maybe have a CNA present 24 hours per day half of the week and have Ms. Peterson there to help the other half of the week?

A Well, Ms. Peterson also indicated that she

has concerns about being smaller than Mr. Peterson and being physically able to help him.

And so there needs to be a competent CNA in the house who can safely help him, sorry, get up to the bathroom, whether that's two times a night, four times a night, or six times a night.

And Mrs. Peterson should not have to get up, if he needs to get up six times a night, help him to the bathroom, change his clothes, change his diaper and change the linen on the bed.

Q You state in your report that CNAs do not administer medication under Tennessee rules; right?

A That's my understanding based on the rules at the time this report was issued.

Q A CNA can only remind Mr. Peterson to take his medications; right?

A That's my understanding.

Q And then you also include an automatic pill dispenser in the life care plan; right?

A Yes.

Q And you have a skilled nurse listed here. Is that for medication management?

A Let me -- yes.

Q Is there any evidence anywhere in your report that Mr. Peterson has mismanaged medications

to the point of medical injury?

A Can you be more specific with the question?

Q Has Mr. Peterson ever mismanaged any of his medications?

A Well, when you say "mismanaged," what do you mean by that?

Q What do you understand mismanaged to mean?

A Well, I'm asking you what do you mean in the question. I may have a different meaning of it than you.

Q How does Mr. Peterson -- right now, currently when you were preparing your life care plan, how was he being reminded of when his medications were due, to be taken?

A As indicated in the report --

Q What page is that?

A I'm sorry.

Q That's okay.

A On page 13, Mr. Peterson understands his medication regimen. However, with his dyskinesia, he has diminished ability to properly sort and dispense his medications.

Q So are you -- are you listing the skilled nurse there just to get the medication out of the

pill dispenser, and give it to Mr. Peterson?

A No. Actually, I'm not. This was very conservative. I did not include the skilled nurse to come in on a daily basis and administer his medication.

The skilled nurse is included one to two times per month.

Q Yes, ma'am.

A And that's why the pill dispenser is included in the life care plan. The skilled nurse would have to come in and fill that pill dispenser and make sure that, you know, the right medications are in there to be dispensed at the right time.

Q Could Mrs. Peterson fill the pill dispenser?

A Again, these services are provided in the plan so that whether -- if Ms. Peterson is able to do that -- again, she has done it out of the generosity -- out of her generosity for years, for the years that she has done it. And this is to make sure that those pills are -- a conservative amount of skilled nursing visits, one to two times a month, to make sure that the medication is appropriately placed in the pill dispenser.

And that skilled nurse will also provide

assessment. She can also come in and just make sure Mr. Peterson is taking his medications as prescribed, and doing a general assessment of his condition, and determining if there are some other needs that he had.

MR. CARPENITO: I'm in a good place to take a break.

VIDEO OPERATOR: We are going off the video record. The time is approximately 5:00 p.m.

(Recess.)

VIDEO OPERATOR: We are back on the video record. The time is approximately 5:16 p.m.

BY MR. CARPENITO:

Q Ms. Hairston, I have just a few remaining questions for you. If you will look at Exhibit 8, which is the additional questionnaire that you sent to Dr. Huffnagle. And if you'll also look at, with that beside it, Exhibit 11, which is the notes and other documents that you produced to the United States in response to the document request.

And on Exhibit 11, if you'll turn to Bates number 49.

A Bates 49?

Q Yes, ma'am, in the bottom right-hand corner.

A Okay. Okay.

Q So I want to first look at a question on Dr. Huffnagle's additional questionnaire, it is question 2. And it reads, "For clarification, you previously indicated that the medication Entacapone was not prescribed for management of Parkinson's disease. Can you please explain why this medication is prescribed for Mr. McElhiney?"

Did I read that right?

A Yes.

Q And Dr. Huffnagle responds that Mr. McElhiney was "prescribed this med by an outside neurologist, but stopped 11.3.24 by our records."

Right?

A Correct.

Q And then if you look at Bates number 49, you had a December 23, 2024 call with Mr. McElhiney; right?

A Yes.

Q And that would have been four days after this additional questionnaire was received or dated by Dr. Huffnagle; right?

A Yes.

Q And if you look down there in the second paragraph on Bates number 49, it states, "For the

Entacapone, it has not been discontinued. Still taking it at 200 milligrams 4 times per day."

Right?

A Correct.

Q And then if you look at appendix 3 of your life care plan for Mr. McElhiney, you have that medication listed at one tab four times per day; right?

A Correct.

Q Are you aware of whether or not Mr. McElhiney is still taking this medication?

A As of now, I don't know if he's still taking it or not.

MR. CARPENITO: Okay. Ms. Hairston, those are all the questions I have today, thank you.

MR. ROMANO: I do have some questions.

EXAMINATION

BY MR. ROMANO:

Q You said earlier in the deposition that you are a member of the American Association of Nurse Life Care Planners; is that right?

A I am a member, yes.

Q What is that organization? What is its purpose, its function?

A It is the organization for -- it is one

organization for life care planners, but specifically for -- nurse life care planners have formed an organization to identify curriculum and scope and standards of practice that are consistent among nurse life care planners.

Also associated, but not the exact same thing, the board for certification for nurse life care planners is also affiliated with the American Association of Nurse Life Care Planners.

Q You said the organization has or publishes what it refers to as standards of practice for creation and development of life care plans?

A For nurse life -- the Scope and Standards of Practice for Nurse Life Care Planning.

Q Over the years, have you read, become familiar, with those standards of practice by the organization?

A Yes.

Q And did you incorporate the standards of practice of the association into your creation and development of the life care plans in both the Peterson matter and the McElhiney matter?

MR. CARPENITO: Object to form.

THE WITNESS: Yes. In developing the life care plan, the nursing process was used to guide and

develop the development of the life care plans.

BY MR. ROMANO:

Q When you actually commence your work in order to create and develop a life care plan, would you walk us through the steps you take to put that life care plan together?

A Yes. Utilizing the nurse process, typically, as identified, there are going to be medical records that are provided. So as the life care plan is developed, medical records are read, depositions are read, assessment pieces are completed, which include interview with the individual, and if, as indicated, if they have a family member with them.

Again, input is sought from providers of care who are involved in the individual's treatment. And as indicated in the report, there are numerous other resources that would be contacted in preparing the life care plan, as well as utilizing my years of education, experience, expertise and skills as a registered nurse, a certified case manager and a certified life care planner.

Q When you develop a life care plan and you rely upon input from physicians who are medical doctors, is it necessary for you to be a physician

or an MD?

MR. CARPENITO: Object to form.

THE WITNESS: I'm sorry, it's necessary for me to be a physician or an MD to --

BY MR. ROMANO:

Q Right. In other words, when you as a nurse life care planner develop the life care plan and you receive input from a doctor, true, it's not necessary for you to be a doctor?

A Oh, as a -- as a nurse life care planner, I have the training and skills to take the information that's received, interpret it and put it in context with all of the other information that is received in terms of developing a life care plan and identifying how this impacts the supports and services that are indicated for the individual.

Q When you reach out to a physician to obtain his or her input, what is the reason you are doing that as a life care planner?

A As a life care planner, I am -- want to identify appropriate sources of information that can provide input and provide basis for my opinion in the life care plan.

Q In this instance, there were a number of questions about Eric Anderson, who is the specialist

who made the assessments regarding home renovation needs. True, you are not a home renovation needs specialist who assesses buildings and renovations; correct?

MR. CARPENITO: Object to form.

THE WITNESS: Correct.

BY MR. ROMANO:

Q All right. In a case such as this for Mr. Peterson, do you then reach out to a specialist like Eric Anderson, allow him to do his work, and then you consider that input as a part of your life care plan?

MR. CARPENITO: Object to form.

THE WITNESS: For -- it's individualized and client-specific, and because the Petersons indicated, you know, they live in an historic home, when I reach out to individuals such as Mr. Anderson, I consider the information that is provided in the report, is it consistent and reasonable with information I am familiar with in terms of home modifications.

You know, I look at the information.

BY MR. ROMANO:

Q Have you ever served on active duty yourself in any branch of the United States Armed

Forces?

A Yes, I have.

Q What branch did you serve in?

A I served in the United States Air Force.

Q Were you on active duty for a period of time?

A Yes.

Q How long were you on active duty?

A A little -- a little more than 3-1/2 years.

Q And what was your MOS or military occupational specialty?

A I was a -- I'm sorry, I was a nurse in the United States Air Force Nurse Corps stationed in the area at Malcolm Grow Medical Center.

Q Very briefly, what type or kind of nursing were you engaged in while you were on active duty in the Air Force?

A It was a wide variety. I worked -- I may have been assigned to a particular unit in a hospital. At one point, I was on a pediatric unit, and at another point, I was assigned to a medical surgical unit.

But as the need arose, I could have been temporarily or for that shift gone to work anywhere

in the hospital, which I did, which was, you know, IC -- intensive care unit, cardiac care unit, any one of the orthopedic floors, the surgical floors, the medical floors. Basically, you know, we serve in the hospital as needed.

Q And regarding your active duty service, what year did you go on active duty and what year were you discharged from active duty?

A 1985 I went in and discharged, honorable discharge, in 1989.

Q And at the time you were discharged with an honorable discharge, what was your rank?

A First lieutenant.

Q You had stated earlier that it was your typical procedure and your practice to contact three providers.

Would you walk us through when you utilized the three-provider method of contacting professionals for input for your life care plan.

A So typically, if a particular service or support has been identified, if an individual has received services from a provider in the past, you know, for a length of time, or they have even indicated, you know, last year I went to physical therapy at this particular service, or, you know,

this is the physician that I see, then it is typical that we would obtain the cost from that particular service.

If it is a service or support that they have never received, or they have not received it in years, it is a new intervention or service that is being recommended for them, and we have no, you know, billing costs for them, no history of charges, then we do seek providers in the community, and typically identify three providers that the individual can reach within a 30-minute drive.

Q You also mentioned earlier in the deposition that it was important for you to consider the entire picture when making an assessment for a given patient for whom you are developing a life care plan.

Why is it important to have a grasp of that big picture?

A Right. Well, there are going to be multiple sources that are -- that you're receiving information in to identify what are the most appropriate supports and services for that individual. You know, it's very client-specific and individualized, you know, who is providing their care, where they are receiving their care, what

their -- what their response to the injury is, what their specific response to the injury is, what their functional limitations are, who -- what their age is.

There are just so many factors to consider that it's not -- that, you know, although the methodology is the same, you have to -- there were different points where you have to identify variances based on the individual.

MR. ROMANO: That's all the questions I have.

MR. CARPENITO: I don't have any additional questions.

VIDEO OPERATOR: One moment. We are going off the record. The time is now 5:32 p.m. This is concludes today's testimony of Kay Hairston.

MR. ROMANO: We'll have her read and sign.

COURT REPORTER: Does anybody need a rough draft?

MR. CARPENITO: Yes, ma'am. I think we have a standing with you guys.

MR. ROMANO: Standing order. We'll take the rough.

(Whereupon, at 5:33 p.m., the deposition was concluded.)

I HEREBY CERTIFY that I have read this transcript of my deposition and that this transcript accurately states the testimony given by me, with the changes or corrections, if any, as noted.

Los Angeles, California

Wednesday, February 4, 2026, 9:02 a.m. - 12:33 p.m.

THE VIDEOGRAPHER: Good morning. We are now on the record.

My name is Darnell Brown and I'm the videographer with Golkow.

Today's date is February 4th, 2026, and the time is now 9:02 a.m. This video deposition is being held in Los Angeles, California, in the matter of Camp Lejeune Water Litigation, the United States District Court for the Eastern District of North Carolina. The deponent is Dr. Syed Hasan.

Counsel will be noted on the stenographic record.

The court reporter is Heidi Hummel-Grant, who will now swear in the witness.

SYED HASEN M.D.,

called as a witness by and on behalf of Plaintiff, having been first duly sworn by the Certified Shorthand Reporter, was examined and testifies as follows:

EXAMINATION

BY MR. MALONE:

Q Good morning, Doctor. Could you please state your full name for the record?

A Syed Ashraf Hasan.

Q And we briefly met before we had started, but my name is JT Malone, and I represent the plaintiffs in this case that you were retained in.

Do you understand that?

A Yes.

Q Okay.

You ever been deposed before?

A Yes.

Q Okay.

How many times have you been deposed?

A This would be the third time.

Q Okay.

So we're just going to cover a couple of ground rules first.

So obviously you were just sworn in. So you understand the testimony you're giving today is under the same oath you would take if you were testifying in court.

Do you understand that?

A Yes.
Q Okay.
If I ask you a question that you don't understand, just let me know and I'll try to rephrase it.
Is that fair?
A Yes.
Q If you tell me -- sorry.
If you don't tell me that you don't understand my question and you answer it, I'm going to assume that you know my question.
Is that fair?
A Yes.
Q Okay.
We can take a break at any time you need one -- I'll try to take a break, you know, about every hour for the court reporter and everyone -- but just let me know if you need a break. Okay?
A Okay.
Q Obviously we have a court reporter here who's taking a record of what we say. So let's try not to talk over each other. Let me finish answering the question before you get the answer, and I'll not to cut you off. It just makes it easier for record. All right?

A Yes.

Q Other thing: Verbal answers show up on the record, head nods and those kinds of things don't so let's just avoid uh-huhs and hums and head nods and just give verbal answers today. Okay?

A Yes.

Q Is there any reason you can't provide truthful and complete answers to my questions today?

A No.

MR. MALONE: Okay. Okay.

Doctor, I'm going to hand you what we are going to mark as Hasan Exhibit 1.

(Exhibit 1 was marked for identification by the Certified Shorthand Reporter, a copy of which is attached hereto.)

MR. MALONE:

Q Do you recognize this document?

A Yes.

Q Okay.

And what is this document?

A This is the subpoena to testify.

Q Okay.

So do you understand that you were requested to be here pursuant to this subpoena?

A Yes.

Q Okay.
And I will direct your attention to the second to last page. Let me know when you get there.
A Okay. Okay. I'm here.
Q Okay.
Do you see it says Schedule A up at the top?
A Yes.
Q Okay.
Did you review all of these requests and perform a search to ensure that you were providing responsive documents to this?
A Okay. Let me just read this.
Q Sure.
A Yes.
Q Okay.
Back at the top of page 1 of Schedule A we were looking at it says: Pursuant to the foregoing deposition subpoena respondent is requested to produce on or before January 28th, 2026, the documents requested herein.
Do you see that?
A Yes.
Q Okay.
When did you provide the responsive

documents to your attorneys?

MS. KONSTANTOPOULOS: Objection. To the extent that it calls for attorney-client privilege. I would instruct the witness not to answer.

Otherwise, you can answer the question posed.

MR. MALONE:

Q And let me just clarify -- and this list will be going forward today -- I am not going to ask for or try to get you to tell me any conversations or the contents of conversations between you and your attorneys. So to the extent that you can answer without discussing the contents of your discussions with your attorneys, I --

A You know, I don't remember the exact date that the information was submitted. The -- I don't remember how many days it was before January 28th. I just don't recall.

MR. MALONE: Okay.

I'm going to note for the record the subpoena issued to Dr. Hasan requested documents to be produced no latter than January 28th, 2026. The documents were not produced until the February 2nd, which is 48 hours prior to this deposition, and so the plaintiffs will reserve their right to hold this

deposition open given the untimely production of the responsive documents.

Q My next question for you, Doctor, what did you provide to your attorneys in response to the subpoena?

MS. KONSTANTOPOULOS: Objection to the extent it calls for attorney-client privilege and the substance of conversations.

Otherwise, you can the question.

THE WITNESS: I'm sorry, could you rephrase the question?

MR. MALONE:

Q Sure. What documents did you provide to your attorneys in response to this subpoena?

MS. KONSTANTOPOULOS: Same objection.

You can answer if you know.

THE WITNESS: Yeah, I created a report for the work I was asked to do. I had gave some of the basic information, my CV, those -- those were really the main -- the main items.

MR. MALONE: Okay.

Doctor I'm handing you what we will mark as Hasan 2.

(Exhibit 2 was marked for identification by the Certified Shorthand Reporter, a copy of which is

attached hereto.)

MR. MALONE: There should be three copies there. All right. There we go.

Q Do you recognize this document?

A No.

Q Okay.

What does it appear to be to you?

A It's an invoice for hours.

Q Okay.

Does this appear to be an invoice that was submitted for the work you've done in this case?

A Yes.

Q Okay.

And it is -- it appears to be for work performed in November of 2025; is that right?

A Correct.

Q Okay.

And down in to the bottom right corner, the total amount paid is $7,848.25; is that right?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: Yes, that's the number that's in the corner.

MR. MALONE: Okay.

Q ,Doctor do you know who Vident Partners is?

A Yes.

Q Who is Vident Partners?

A It's an agency that does expert work. So they -- I've contracted with them and they bring forth cases that I might be eligible for.

Q Okay.

Doctor, if I represented to you -- but if you add up these hours here in the hours column it gets to 20.21 hours in this case.

Does that sound about right?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I mean, I could -- if I add them up, yeah, that -- that seems right.

MR. MALONE: Okay.

Q And about midway down in the column Description of Services, it says Work Done By Registered Nurse -- Registered Nurse.

Do you know who the registered nurse is that's being referred to here?

A Yes.

Q Okay.

What is their name?

A Ani Mardyan.
Q Okay.
Could you spell the last name?
A Sure. M-A-R-D-Y-A-N.
Q And is it Miss Mardyan?
A Mrs.
Q Okay.
Is Mrs. Mardyan your employee?
A We -- we work together, not directly my employee.
Q Do you know who. Mrs. Mardyan's employer is?
A Yes.
Q Who is that?
A Regal Medical Group.
Q And it's your understanding that she's a registered nurse?
A Yes.
Q Okay.
Do you know any of her background qualifications beyond that?
A Yes. She is an intensive care unit nurse; she has extensive clinical training; she has worked at Regal Medical Group for approximately 13 years; she's well versed in prior authorization,

claims review, medical necessity. That's probably the main things that she's involved in.

Q Okay.

Do you know if she has any certifications related to medical coding?

A I do not know.

Q Okay.

Do you know if she's ever worked for CMS?

A I do not know.

Q Do you know if she's ever worked for the VA?

A I do not know.

Q Okay.

Did she write any portion of your expert review?

A No.

Q If you'll look back at the description of services column under that work done by registered nurse that we're talking about, the last one, two -- five entries are data analysis done by the registered nurse.

What data did she review?

A So she would review medical records to help justify or show aligned services that may or may not be related to the plaintiffs' medical

conditions for Parkinson's disease or related to medical conditions of that.

Q Okay.

Did you validate the accuracy of her analysis?

A Yes.

Q And when you say that she reviewed the medical records -- I'm just trying to get an understanding of the division of work here -- were there some records that you looked and some that she looked at or did you --

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: She -- there were some records she looked at, but I looked ultimately at all of the records. So she looked at a small portion, which I also reviewed, but there are records that she never reviewed that I did.

MR. MALONE: Okay.

Q What portion of the records did she review?

MS. KONSTANTOPOULOS: Objection to form.

You can answer if you know.

THE WITNESS: I -- I don't know.

MR. MALONE:

Q Did anyone besides the registered nurse perform work on this report?

A No.

Q Okay.

How many invoices have you submitted for your work in this case?

A One.

Q One. Okay.

And how much have you been paid so far for your work in this case?

A I haven't received any reimbursement yet.

Q Did you sign a retainer agreement for your work in this case?

A I have an agreement with Vident Partners -- I don't know if it's a retainer agreement -- I don't know the term, if it's a retainer agreement -- it seemed to me like a contract.

Q So did you sign a contract to work on this case?

A I signed a general contract to work on any case but it was not specifically for this case.

Q Okay.

Do you have a copy of the contract that you signed with Vident Partners that lets you work on this case?

A I -- I -- yeah, I probably have it in my email.

Q Okay.

And I would just ask that you provide that to your attorneys so it can be produced to us --

A Okay.

Q -- responsive to the subpoena. Thank you.

Doctor, what is your hourly rate for work in this case?

A $450.

Q Is that a flat rate for all services, or are there varying fee schedules?

A It's a flat hourly rate except for like court appearance. It's a -- it's a flat rate.

Q What is the rate for court appearances?

A I believe it's $4,000 for the day.

Q Would that information be in your contract with Vident?

A I believe so.

Q Okay.

Does Vident receive any portion of the fees

that you receive in this case?
A I don't know --
Q Okay.
A -- I don't know the arrangement.
Q What's your understanding of your agreement with Vident?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: I -- I'm sorry, can you clarify the question?
MR. MALONE:
Q Sure. When you -- I'll back up.
How did you come to be associated with Vident?
A The -- the individual there said he saw my experience on LinkedIn and reached out to me.
Q Okay.
So is it your understanding that Vident would connect you with opportunities for legal expert work?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Yes.
MR. MALONE: Okay.
Q Is it your understanding that they would

be paid for that service?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: I -- I would assume so. I don't know.
MR. MALONE: Okay.
Q When were you first contacted about working on this case?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: It was approximately late September or early October of 2025.
MR. MALONE:
Q Have you ever worked with the Department of Justice before?
A No.
Q ^Do you know how the Department of Justice found you?
MS. KONSTANTOPOULOS: Objection. To the extent it calls for attorney-client privilege, I'm going to instruct you not to answer.
THE WITNESS: Okay.
MR. MALONE:
Q Do you have any personal connections with any other expert in this case?

A Can you --
MS. KONSTANTOPOULOS: Objection to form.
Sorry, you can answer.
THE WITNESS: Can you say -- just clarify personal connection?
MR. MALONE:
Q Do you know any of the other experts in this case on a personal level?
A I -- I -- yes, I do. We have Dr. Wang Ji.
Q And we spoke to him other day, you just mentioned that.
Do you have any connections with any attorney in this case on a personal level?
A No.
Q Okay.
What was the scope of work presented to you for your work in this case?
A I was -- I was asked to review the medical records and claims on basically three -- three particular areas: The first one is to assess the medical damages as asserted by the plaintiffs' expert Marjorie Hackett-Wallace to determine if those medical damages were or were not related to the patients' Parkinson's disease or conditions

stemming from it; the next thing I did was I reviewed the medical treatment that was rendered by the U.S. Government or an agency of the government to determine which treatments were given as related to the patients' Parkinson's disease or conditions stemming from it; and then thirdly I reviewed the veterans -- the disability -- service-related disabilities that were related to the plaintiffs' Parkinson's disease or conditions from it.

Q Okay.

Doctor, how many times have you been an expert a witness in a legal setting?

A Can you define leal setting?

Q Sure. So how many times have you either provided expert opinions, expert reviews or expert testimony in a legal case?

A Probably six times.

Q Can you describe generally the types of cases you've worked on in the past?

A Sure. So I work for group, Heritage Provider Network, and at times I would be asked to review medical records for our in-house attorneys and give my medical opinions on the specific questions they ask for those cases.

Q Have you ever worked on any other type

of case besides that you just described?

A No. I mean, the only other thing was if patients received services at the institutions and whether or not those medical bills, again, were related or appropriate to the care rendered.

Q Okay.

And so you mentioned earlier that you've been deposed twice before this --

A Ye.

Q -- is that right?

Were both of those cases related to the kind of disputes you just described?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yes.

MR. MALONE: Okay.

Q Have you ever provided expert opinions on the value of past government health benefits?

A Yes.

Q When did you do that?

A About two years ago.

Q And who retained you in that case?

A Our in-house counsel for my -- for my employer.

Q Did you prepare an expert report in that

case?

A No, I did not need to.

Q Okay.

Were you deposed in that case?

A No.

Q And did you testify at trial in that case?

A No.

Q Okay.

Do you know how the case resolved?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: There was some kind of settlement amount -- I don't know how much or what -- between the institution that rendered services and our group.

MR. MALONE:

Q So this was a dispute between the institution that --

A Rendered services and our group that is the payor of those services.

Q Okay.

Have you ever provided expert opinions related to veterans benefits?

A No.

Q Have you ever worked for the VA?
A No.
Q Have you ever worked for CMS?
A No.
Q Have you ever worked for any government agency?
A No.
Q Okay.
Doctor, again with the caveat that I'm not seeking any communications between you and your attorneys, what did you do to prepare for today's deposition?
A I reviewed my -- my report thoroughly; I reviewed the reports of the plaintiffs' experts.
Q Anything else?
A No.
Q Did you have any meetings with your attorneys before this deposition today?
MS. KONSTANTOPOULOS: Objection. To the extent it calls for substance regarding those meetings, assert attorney-client privilege.
You can answer the question.
THE WITNESS: Yes.
MR. MALONE: Okay.
Q How many meetings did you have?

A Four.

Q Again, without revealing the substantive content of communications with your attorneys, what are the names of the attorneys you met with?

A Melanie Konstantopoulos, Manuel Ortiz, Joe Turner and Michael Cromwell.

Q Okay.

And was your nurse assistant present at these meetings?

A Not all of them. I don't recall which ones she was present at or not, but she wasn't present at all of them.

Q Okay.

Referring back to Exhibit 2, the invoice, there are -- it appears there are three line items in the description of services for services of Dr. Hasan and the RN assistant for TEAMS calls on November 10th, 2025, November 12th, 2025 and November 19th, 2025.

Were those TEAMS calls the meetings that you're referring to?

A Yes, I believe so.

Q I want to direct you a little further down in the section Work Done by Registered Nurse on 11-20-2025 there are 0.67 hours for TEAMS call with

DOJ.

Were you present for that meeting with the DOJ?

A I don't believe so.

Q Okay.

MS. KONSTANTOPOULOS: Counsel, for the record are you asking about meetings in preparation for the deposition for today or just any meetings?

MR. MALONE: I'm kind of referring to both of them right now.

MS. KONSTANTOPOULOS: Okay.

MR. MALONE:

Q But I will clarify. I appreciate that.

These -- these meetings on your invoices were not in preparation for your deposition; is that right?

A Correct.

Q Were these meetings in preparation for your report?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Not -- not necessarily. Sometimes it was --

MS. KONSTANTOPOULOS: Objection. To the extent it calls for attorney-client privilege, I

would instruct you not to answer regarding the substance of these meetings.

MR. MALONE: That's -- that's totally fine.

Q When were the meetings you had to prepare for this deposition?

MS. KONSTANTOPOULOS: Objection to form.

You can answer if you know.

THE WITNESS: I believe over the last two weeks --

MR. MALONE: Okay.

THE WITNESS: -- maybe three weeks.

MR. MALONE:

Q How many hours have you spent working on this case since November 2025?

A I'm not sure because I haven't tallied up all my hours.

Q What's your best estimate?

MS. KONSTANTOPOULOS: Objection to form.

You can answer if you know.

THE WITNESS: Maybe 80 to 100 hours.

MR. MALONE:

Q I believe it was your testimony earlier that you have not submitted those invoices for that time yet; is that correct?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yes, I have not. I have not submitted it.

MR. MALONE:

Q Does that include the hours worked by your nurse?

A No, she -- she keeps her own tally of her hours.

Q Okay.

Do you review the invoices submitted by your nurse?

A No.

Q Okay.

You can set those aside.

A Okay.

MR. MALONE: Doctor I'm handing what we're going to mark Exhibit 3.

(Exhibit 3 was marked for identification by the Certified Shorthand Reporter, a copy of which is attached hereto.)

THE WITNESS: Okay. Sorry.

MR. MALONE:

Q Do you recognize this document?

A Yes.

Q And what is it?

A This is the report I prepared for this case.

Q Okay.

And we are going to start -- I'll ask you to turn to Appendix I.

MS. KONSTANTOPOULOS: Counsel, what page would that be on?

MR. MALONE: I am not sure if it is numbered.

THE WITNESS: 28?

MR. MALONE: Let's see here. Yeah, page 28, Appendix I.

Q Are you there?

A Yeah.

Q Okay.

And flipping to the next page, is this your current CV?

A Yes.

MS. KONSTANTOPOULOS: For the record, Counsel, a copy of his CV was provided in response to the subpoena. So I assume you have that.

MR. MALONE: Okay.

Q Doctor, if you could turn to page 4 of Appendix I and just let me know when you're there.

A Sure. I'm here.

Q Okay.
So you completed your bachelor's degree in 1993; is that correct?
A Yes.
Q And your received that MPH -- is that a master's in public health --
A Yes.
Q -- in 1996?
A Yes.
Q Okay.
Turning back to page 3, you completed medical school in the year 2000; is that right?
A Yes.
Q And you completed a residency in internal medicine in 2004; is that correct?
A Yes.
Q Did you complete any fellowships?
A No, I did not.
Q Okay.
Doctor, are you a neurologist?
A No, I am not.
Q Okay.
Do you have any specialized training of movement disorders?
MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: No, I do not.

MR. MALONE: Okay.

Q Moving up the page there, you were a hospitalist at Apollomed Hospitals from 2005 to 2006; is that right?

A Yes.

Q And what did you do as a hospitalist when you were at Apollomed?

A I would admit patients from the emergency department and care for them through the continuum until they discharged out of the hospital and go to home or to another facility.

Q And then just on page 1 of -- or it says Summary of Executive Experience.

You are currently the chief -- is it chief medical officer at Regal Medical Group?

A Yes.

Q Okay.

How do you describe what you do as chief medical officer?

A I have a whole lot of duties. So I oversee a clinical program for hospitalists and nurse practitioners; I oversee clinical coding in the institutional setting; I review institutional

claims and professional claims for primary review and appeal; I train medical directors; I train nurses and care coordinators, discharge planners; I train and clinically oversee our clinical team, new doctors, nurse practitioners; I am involved in contracting with institutional professional settings. That's -- that's probably --

Q Sure.

A -- most of my day.

Q And actually I wanted to kind of discuss a little bit about that.

So it sounds like you have quite a few duties.

What percentage of your day is spent treating patients?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: About 30 percent.

MR. MALONE: Okay.

Q And is Regal Medical Group, is that one hospital or are there multiple facilities?

A Regal Medical Group -- it's not a hospital; it's a managed care organization yeah.

Q What is a managed care organization?

A So the -- the group, our group,

contracts with health plans and patients that are aligned to different health plans, like HealthMed, Blue Cross Blue Shield -- there's 16 different health plans -- those patient lives are aligned to our group and we are responsible for all the care coordination of that patient along multiple disciplines.

Q So I guess my question: In what setting do you treat patients typically?

A Predominantly in the hospital.

Q Okay.

Where else?

A In a clinic, but that's just a very small percentage.

Q Do you see patients in a neurology clinic?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: No, I do not.

MR. MALONE:

Q Doctor, are you a certified professional medical auditor?

A No.

Q Are you a certified professional coder?

A No.

Q Are you a registered health information administrator?
A No.
Q Are you a certified fraud examiner?
A No.
Q Okay.
How much of your time is spent coding in the hospital?
A Probably about a third of my time.
Q Okay.
Are you familiar with the term miscoding?
A Yes.
Q What does miscoding mean?
A For our group miscoding is if a -- if a code is attached to a patient that does not correspond with the care they receive or the diagnosis they have.
Q Are you familiar with the term upcoding?
A Yes.
Q What does upcoding mean?
A Upcoding is charging for services at a higher rate -- generally speaking, a higher CPT code or rate than the services that were rendered.
Q How much of your time is spent auditing other providers' coding?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I don't know if I can quantify the exact. But since I train and oversee the -- our physicians and nurse practitioners, I end up reading like all of their notes on a daily basis. So I don't know if I can tell you the exact timing of it. It would be several hours a day.

MR. MALONE: Okay.

THE WITNESS: Yeah.

MR. MALONE:

Q When you're actively seeing patients, does anyone assist you in your coding?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: No, no.

And just to clarify, when I -- we're practicing, we have to write notes, so we're practicing and writing notes and coding. It's all kind of simultaneous.

MR. MALONE: Okay.

Q Thank you for clarifying that. I appreciate that.

How much time do you spend doing legal expert work like this?

MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Probably -- maybe less than two percent of all of my work. I'm very busy at my job.
MR. MALONE:
Q Have you ever worked for CMS?
A No.
Q Have you ever worked for VBA?
A No.
Q Have you ever worked for any government agency?
A No.
MS. KONSTANTOPOULOS: Objection to form. Asked and answered.
MR. MALONE: Doctor, I'm going to hand what we'll mark as Exhibit 4.
(Exhibit 4 was marked for identification by the Certified Shorthand Reporter, a copy of which is attached hereto.)
THE WITNESS: Okay.
MR. MALONE:
Q Do you recognize this document?
A Let me take a quick look. Yes.
Q What is this document?

A This is a list of materials considered for the report I put together.

MR. MALONE: Okay.

I will now hand you what we will mark as Exhibit 5.

(Exhibit 5 was marked for identification by the Certified Shorthand Reporter, a copy of which is attached hereto.)

MR. MALONE:

Q Do you recognize this document?

A Yes.

Q What is this document?

A This is the supplement to the original document for materials considered.

Q Okay.

So Exhibit 4 and Exhibit 5 are a list all the materials that you read and reviewed in forming your report and opinions in this case; is that right?

A Yes.

Q Did you read all of these documents?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yes.

MR. MALONE:
Q In their entirety?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Yes.
MR. MALONE:
Q Doctor, you can set those aside for right now --
A Okay.
Q -- and turn back to Exhibit 3, your report.
A Okay.
Q Can you turn to page 1 of your report?
A Okay.
Q At the bottom of the first paragraph you write --
MS. KONSTANTOPOULOS: Counsel, for the record, page 1 is the cover page. Are you referring to page 2?
MR. MALONE: Oh, thank you for clarifying that. Yes, it is page 2.
Q At the bottom of the first paragraph on page 2 you write: I was not retained and I have not been asked to provide any analysis as to whether any individual plaintiff's Parkinson's disease was

caused by the alleged respective exposure to the water at Camp Lejeune and I am not offering any opinion on this subject.

As we sit here, is that still true?

A Yes.

Q Just below that, the bullet points, you write: Specifically, I have been retained to provide independent expert analysis as to whether the past medical damages asserted by plaintiffs' expert Marjorie Hackett-Wallace to the extent applicable are or are not clinically related to each plaintiff's Parkinson's disease or any conditions stemming from their disease.

Did I read to right?

A Yes.

Q Okay.

How do you define clinically related?

A If the -- with a patient's Parkinson's disease they could have multiple other kind of comorbid conditions or conditions that could develop as a result of the Parkinson's disease. So when that occurs, I looked at those -- those medical conditions in the medical records, and then I determined whether or not it was related to the Parkinson's disease itself or associated with it.

Q Turn to page 3 of your report under the heading Methodology for Review.

Do you see that?

A Yes.

Q You write: My approach to reviewing the provided medical bills, invoices and governmental medical claims data is consistent with my work as a hospitalist and as a medical director for a managed care organization. I am often tasked with reviewing medical claims, bills and payments to determine the appropriateness of medical treatment.

Did I read that correctly?

A Yes.

Q Could you give me an example of when you were tasked with doing that?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yes. So on a daily basis I review medical claims for my employer. I look at patients who like enter institutional facilities like hospitals and then the different services that were rendered during that hospitalization, whether or not they were appropriate to the primary diagnosis of the patient coming in; and I look at the services that were ordered, if they were

administered in a timely manner, were they related to the primary diagnosis coming in or they may have been extra or additive. So I do that on a daily basis.

MR. MALONE:

Q Is the appropriateness of medical treatment the same as the relatedness of treatment to a specific disagree?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: The -- it's a little bit different.

Appropriateness of medical treatment is -- is treating the core disease or the disease process or condition from it. Relatedness could be a medical condition that stems from it but may not meet the treatment necessarily at that time.

MR. MALONE: Okay.

Q I'll direct to the last page in that paragraph that we were discussing on page 3, you write: Using this experience and applicable standards, I reached my opinions for each of the plaintiffs regarding their claimed medical expense damages, past government medical offsets and service-connected disability as they're related to

their Parkinson's disease or any condition stemming from or clinically related to their Parkinson's disease.

Did I read that correctly?

A Yes.

Q What applicable standards did you use in this case?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Okay. Let me read this again.

The applicable standards are through my medical experience and understanding, knowing and treating thousands of patients with Parkinson's disease. So I'm familiar with their related illnesses.

So when I -- when I look at the patients or when I've treated patients with Parkinson's disease and understanding what those other clinical conditions are, that is the experience and -- that I actually apply to -- to the work that I brought forth here.

MR. MALONE: Okay.

Q So it's not necessarily a written set of standards; it's your experience dealing with these conditions?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: It's -- it's partly experience, and then the other part of it is standard treatment in the medical community and for patients with these conditions related conditions.

MR. MALONE: Okay.

Doctor, we've been going about hour. Would you like to take a five, ten-minute break here?

THE WITNESS: Yeah.

MR. MALONE: Okay.

THE VIDEOGRAPHER: The time is now 9:56. Going off the record.

(A recess is taken.)

THE VIDEOGRAPHER: The time is now 10:10. Back on the record.

MR. MALONE:

Q Dr. Hasan, we're back on record after a short break. I just have a couple of kind of follow-up questions on things we talked about already. Okay?

You said you have seen thousands of Parkinson's disease patients; is that right?

A Yes.

Q In what setting did you see or do you

see Parkinson's patients?

A Mostly hospital.

Q Where else do you see Parkinson's patients?

A A very small percentage in -- in like a clinic setting, continuity clinic setting.

Q What is a continuity clinic?

A When a patient leaves the hospital and they're continuing, we see them in a clinic to make sure they continue to improve, they're feeling better, they pick up their medications, really to take the plan from the discharge to make sure it's being effectuated when the patients actually leave the hospital.

Q So these are like follow-up visits after you visit the hospital?

A Yes.

Q So the Parkinson's patients that you treat are in the hospital for any reason?

A Correct.

Q And those patients have Parkinson's?

A Correct.

Q They're not necessarily there because or to get treatment for Parkinson's?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: It could be both.

MR. MALONE: Okay.

Q And you are not the treating neurologist for those Parkinson's disease patients; is that right?

A Correct.

Q I wanted to ask a question about -- forgive me, I've already forgotten the -- your nurse that you worked on in this case, what was her name?

A Ani Mardyan.

Q Thank you.

In what setting does Nurse Mardyan typically work?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: In the office.

MR. MALONE:

Q Does Nurse Mardyan -- strike that.

How often does Nurse Mardyan see patients?

A In the work I do with her, she -- she sees patients maybe 10 to 20 percent of the time.

Q So 80 to 90 percent of Nurse Mardyan's work would be administrative?

A Yes, administrative.

Just to clarify, she does care management. So even though there's administrative work, there's clinical aspects to that. So her team of nurses and discharge planners are reviewing medications, speaking to the patients about their clinical illnesses and the treatment plans set forth by the doctors.

Q Okay.

A She's not giving direct patient care, giving patients their medication themselves but all the care coordination associated with it. So there's some clinical and some administrative.

Q Got it. Okay.

Doctor, if you could turn back -- open Exhibit 3, which is your report, and turn to page 4. Let me know when you're there.

A Okay.

Q In the first sentence of the second paragraph you write: To determine what charges plaintiffs claimed as past medical damages, comma, I reviewed the plaintiffs' expert report prepared by Marjorie Hackett-Wallace and the corresponding charges that were listed in each of the five plaintiffs' amended demanded damages forms. I then reviewed the charges listed on the plaintiffs'

amended damages forms and the billing and medical records cited by Hackett-Wallace to support those charges to determine whether the charges were clinically related to the diagnoses.

Did I read that correctly?

A Yes.

MS. KONSTANTOPOULOS: Objection to the inclusion of the word comma, it's just a comma, just for the record.

MR. MALONE: Noted.

Q So you began with billing data and then looked at the corresponding medical records?

A No, no, not necessarily.

Q Okay.

A The -- some of the billing data was on spreadsheets that had billing information, but I looked at the services that were rendered and validated it by the medical records.

Q Okay.

In the last paragraph of page 4, I believe the second to last sentence, you write: In making my clinical determinations I relied on my training, education and years of clinical experience treating patients with the same conditions as the plaintiffs who are the subject of this report.

Did I read that correctly?

A Yes.

Q Okay.

Doctor, so neurologists and movement disorder specialists are the clinicians who typically massage and assess Parkinson's disease patients; is that right?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yes.

MR. MALONE:

Q In this next sentence, the last sentence on page 4, you write: For issues related to the ICD-9 and ICD-10 codes referenced in the available document, I refer to and rely upon the CMS coding guidelines and follow the CMS standard conventions.

Did I read that right?

A Yes.

Q What issues did you identify relating to ICD-9 and ICD-10 codes?

A Can you be more specific?

Q I'm -- I'm just trying to understand what you mean when you say issues related to the ICD-9 and ICD-10 codes.

A Oh, okay. Sure. So ICD-9 and 10 codes

are diagnosis codes. So the diagnosis codes are sometimes listed as part of a medical record, they're often a part of the billing. Sometimes from the ICD-9 to 10, some of the codes have changed, some of them are omitted. So for anything that may have been under the prior coding from ICD-9 as it subsequently changed to 10, those are some of the things that don't always crossover so I had to use my experience and knowledge to see if the ICD-9 code and 10 code were more or less relevant, the same or the newer code that was maybe omitted or deleted in the prior -- in the ICD-9.

Q So you would not just simply rely on whatever the ICD code says without verifying it?

A Yes.

Just to clarify my answer, the -- the code -- the ICD-9 and 10 codes are just codes. So I actually looked at the medical record to determine that if the codes are documenting, is it substantiated in the medical reports. So that's the way to really actually put the right diagnosis code based on the -- what the patient is being seen for. So I relied on the medical records heavily, not just the code.

Q Doctor, if you can turn to page 5 of

Exhibit 3.

And in the first paragraph discussing the amounts charged versus what you call the negotiated rate, the third to last sentence reads: The allowed amount, also called the negotiated rate, is the maximum amount an insurance company will cover for a service based on its contract with the provider. This figure is often, but not always, reflective of the actual cost of rendering medical services. Sorry, of rendering the medical service.

Did I read that correctly.

A Yes.

Q Okay.

Would an uninsured patient have to pay the amount charged?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I -- I don't -- I'm not familiar with what uninsured patients pay or don't pay. So I'm not sure what they would ultimately pay.

MR. MALONE:

Q Is it possible they could pay that amount?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: The whole amount or the total amount?

MR. MALONE:

Q Correct.

A I think it's possible.

Q In the third sentence of the first paragraph on page 5 referring to amount charged, you write: It is often an inflated figure that does not reflect the actual market value of what the provider expects to collect.

Did I read that correctly?

A Yes.

Q What do you mean by inflated?

A The -- the figure is higher than the provider expects to be reimbursed.

Q But these charges aren't fraudulent; correct?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I -- I can't say specifically if they're fraudulent or not. The -- the provider offices set forth usually these retail prices, if you will, and -- and that's what they charge. But I wouldn't say it's fraudulent.

MR. MALONE: Okay.

Q Would you say that these retail prices have some rational basis in the cost of treatment?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: No, I -- I'm not certain if it has any rate rational to it.

MR. MALONE: Okay.

Q Would you agree that the negotiated rates reflect the negotiating power of the payor --

MS. KONSTANTOPOULOS: Objection --

MR. MALONE:

Q -- in their contract with the provider?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Could you -- can you restate the question?

MR. MALONE:

Q Sure. I'll actually point you to page 6 of your report.

A Okay.

Q And this is the second to last paragraph, third sentence, and you say: By way of example only, charges for services provided by

medical providors to Medicare are generally significantly higher than the amounts that those medical providers are generally reimbursed.

So I guess I would ask with regards to that why are charges to Medicare generally higher than to other payors?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Again, I don't know if I'm following your question. Can you restate it?

MR. MALONE:

Q Sure. So -- and this was back on page 5 we were talking about in the first paragraph where you wrote: The allowed amount, also called the negotiated rate, is the maximum amount an insurance company will cover for a service based on its contract with the provider.

So what I'm asking is: Do some insurance companies and healthcare payors have more negotiating power in their contract negotiations with the provider in your experience as a medical director?

MS. KONSTANTOPOULOS: Objection form.

You can answer.

THE WITNESS: Yes, sometimes.

MR. MALONE:

Q Could you give me an example of that?

A Yes, the -- the payor will let the -- will negotiate a rate with the provider that would be, let's say, 95 percent of the Medicare -- the going Medicare rate but would also put in like a 5 or 10 percent quality metric if services are rendered timely or patient satisfaction is high aligned with quality metrics. So sometimes part of the reimbursement is slightly lower, but it's also made up in quality metrics so that the patients ultimately get good outcomes.

Q In the last sentence in the first paragraph of page 5 you write: The final payments are adjusted due to deductibles, copayments and other payments that may not be covered by insurance.

Did I read that correctly?

A Yes.

Q Would you agree that there are costs to the patient that wouldn't be captured in billing data alone?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: It -- it -- it is mostly caught or it is caught because most billing forms

also have an EOB or an explanation of benefit for patient portion versus the amount paid by insurance. So there are mailings that go out to patients and providers for -- for those amounts to cover the total cost of what was negotiated.

MR. MALONE:

Q Second paragraph of page 5, first sentence, you write: I am not offering an opinion regarding the validity of bill charges versus reimbursed payments in reflecting the cost of care of medical damages.

Did I read that correctly?

A Yes.

Q And is that, in fact, your opinion in this case?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yes.

MR. MALONE:

Q Doctor, you're not an attorney; correct?

A No, I'm not attorney.

Q Turning down to the next section on page 5, Methodology for Reviewing Past Government Medical Offsets, the first sentence you write: To determine whether a past medical offset is

clinically related to the diagnosis -- diagnoses alleged by plaintiffs, I reviewed plaintiffs' payment data from CMS, TRICARE, the VHA, TriWest and CCN.

Did I read that correctly?

A Yes.

Q And in the last sentence of that same paragraph you write: However, by reviewing this data I could ensure that my review is not tainted by any such potential deficiencies.

It goes on to state: My analysis was not focused on billing practices but instead focused on the clinical relatedness of claims.

Did I read that correctly?

A Yes.

Q How did you review the data to ensure that there were no potential deficiencies?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: For every claim that was made I found an associated medical record to substantiate that particular bill. So if the bill was for a particular service, I reviewed and found the medical record that would be -- that would, again, substantiate that -- that service that was

rendered. I didn't rely only on one billing or coding.

MR. MALONE:

Q What's your understanding of the process by which payment data gets from the patient's treatment facility to the data set that you were given?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: I -- I do not -- I'm not knowledgable of that at all.

MR. MALONE: Okay.

Q Did you speak to anyone at CMS, TRICARE, the VHA, TriWest or CCN about the data you received?

A No, I did not.

Q OKAY.

Turning to page 6 of your report, second to last sentence of the first paragraph, you write: In my calculation of these offsets I included only the actual amount paid that was reported instead of what was charged to only reflect the actual amount the government paid for each related medical condition.

Did I read that correctly?

A Yes.

Q So you did quantify the amount that the patient ultimately paid for these amounts?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: No, I did not. That was not what I was asked to do, to quantify payments that the patient made.
MR. MALONE:
Q Doctor, Parkinson's disease is a complex neurological disorder; is that right?
A Yes.
Q And evaluating whether other conditions are secondary to Parkinson's or related to Parkinson's disease can involve pretty complex medical judgment. Is that fair?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Yes.
MR. MALONE:
Q You did not consult a neurologist or a Parkinson's specialist when you made your relatedness determinations here; is that right?
A Correct.
Q Doctor, are you familiar with CMS's Medicare Program Integrity Manual?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: No, I'm not.

MR. MALONE: Okay.

Q Doctor, on page 2 of your report, the last sentence you write -- I'll let you get there, I'm sorry.

A Um-hum.

Q You state: I am well versed in the -- in the billing and reimbursement practices for various insurance types/lines of business, including, but not limited to, Medicare, Medi-Cal, TRICARE, VA and commercial and exchange products.

Did I read that correctly?

A Yes.

Q But you've never reviewed the Medicare Program Integrity Manual?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: No, no, I have not.

MR. MALONE:

Q Not something that was in your training?

MS. KONSTANTOPOULOS: Objection to form.

Foundation.

You can answer.

THE WITNESS: No, it was not.

MR. MALONE:

Q Doctor, is it your opinion that what you referred to as offsets represent payments from CMS, TRICARE, VHA, TriWest and CCN for charges incurred due to the plaintiffs' allegedly Camp Lejeune-related medical treatment?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I'm sorry, could you -- that was a long question.

MR. MALONE: I'm sorry. No, there's a lot of providors --

THE WITNESS: Sure. Sure.

MR. MALONE:

Q What I'm trying to ask is when you're using the term offset here, you are referring to past payments made by government providers for medical bills, the billing which is related to their Parkinson's disease and related conditions?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yes.

MR. MALONE: Okay.

Q And with regard to plaintiffs' claimed related conditions, you are assuming the conclusions of the plaintiffs medical experts; is that right?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I'm not assuming their opinions are correct or incorrect. I reviewed their records, their expert on testimonies and their writeups, and hen I used that against the clinical medical records that -- for what the patients actually received.

MR. MALONE:

Q Doctor, if you'll turn to page 8 of your report, Appendix A. And in the third paragraph -- I'm sorry, the third sentence of the first paragraph under the heading Overview of Case, you write: Assuming the conclusions from the plaintiff's expert are correct for the purposes of my damages opinions, charges related to medical care that is directed towards the management, monitoring and treatment of Parkinson's disease and alleged symptoms are considered related.

Did I read that correctly?

A I'm trying to follow you.

Let's see. Could you reread that? You said that you were on the first paragraph.

Q Yes, of page, 8 Appendix A --

A Yeah.

Q -- plaintiff is Gary McElhiney?

MS. KONSTANTOPOULOS: McElinhey.

MR. MALONE: McElinhey. Thank you.

Q So you write: Assuming the conclusions from the plaintiff's expert are correct for purposes of my damages opinions, charges related to medical care that is directed towards the management, monitoring and treatment of Parkinson's disease and the alleged symptoms are considered related.

Did I read that correctly.

A Yes.

Q So is it fair to say that for purposes of your damages opinions you are assuming the conclusions from the plaintiffs' experts are correct?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Again, for the -- for what was written in their reports, everything, again, was validated with the medical record. So if they -- if the plaintiffs' expert wrote that services were

related or unrelated, I -- again, I validated and made my own independent determination.

MR. MALONE:

Q So did you assume the conclusions of the plaintiffs' experts were correct for your purposes within the scope of what you were asked to do?

MS. KONSTANTOPOULOS: Objection to form. The report speaks for itself. You just read it exactly.

You can answer.

MR. MALONE: Are you instructing him not to answer?

MS. KONSTANTOPOULOS: No, no, you can answer.

THE WITNESS: Yes, I didn't make independent opinions of what was -- what was causative or not. I, again, reviewed the medical record -- I'm trying my best to answer your question -- I did it based on the information that was submitted to make sure everything was validated. That was -- that was my portion of the work that I was asked to do.

MR. MALONE: Okay.

Q Let's turn to page 6 of your report under the heading Methodology for Review of Veteran's Service-Connected Disability

Determinations.

Do you see that?

A Yes.

Q Okay.

Doctor, have you ever evaluated VA disability ratings?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: No.

MR. MALONE:

Q Have you ever been trained in evaluating VA disability claims?

A Not VA disability claims.

Q Okay.

What is your understanding of what VBA disability rating percentages represent?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: The disability rating is set forth by the -- by the associated medical condition or disability incurred from the -- from the patient's subsequent medical condition and to the extent it would affect their life or their well-being.

MR. MALONE:

Q So it's your opinion that VBA disability ratings are based on impairment to their life -- the claimant's life or well-being?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: Health-related. Health-related well-being.

MR. MALONE: Okay.

Q Health-related well-being.

Did you calculate the value of these VBA benefits?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: The -- the value? I -- again, can you clarify?

MR. MALONE:

Q Sure. Did you assign a dollar value to the VBA benefits you reviewed?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I -- I did not personally assign a dollar value to that.

MR. MALONE:

Q And you didn't calculate the future value of any government benefits that you reviewed?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: No, I did not.

MR. MALONE:

Q Doctor, if you'll turn to page 7 of your report in the paragraph directly before your Conclusions section -- and this is the -- beginning with the second to last sentence, you write: I am not opining whether the VBA's determinations that a certain condition or illness is secondary or connected to a plaintiff's Parkinson's disease is correct. Instead, I am merely noting that the conditions are identified by VBA as being presumptively connected with plaintiff's Parkinson's disease and/or his or her Camp Lejeune exposures and therefore would be considered related for the sole purpose of determining the amounts paid by the United States in connection to plaintiffs' Parkinson's disease.

Did I read that correctly?

A Yes.

Q Okay.

The word related is in quotes.

What does related mean to you in this context?

A The -- the disability is related to their Parkinson's disease or a condition stemming from it.

Q ^Doctor, were you asked assume that VBA disability service connections were related?

MS. KONSTANTOPOULOS: Objection to the extent it calls for attorney-client privilege and the substance of communication.

Instruct you not to answer the question.

MR. MALONE: Okay.

This is a good spot for a break. Ten minutes?

THE VIDEOGRAPHER: The time is now 10:47. Going off the record.

(A recess is taken.)

THE VIDEOGRAPHER: Time is now 10:58. Back on record.

MR. MALONE: Okay.

Q Dr. Hasan, we're back from another break. Just wanted to ask a few follow-up questions on what we discussed, and then we'll discuss some of the plaintiffs you evaluated a little more.

Is that okay?

A Yes.

Q Doctor, have you read the Camp Lejeune Justice Act?

A No, I have not.

Q I just want to make sure I'm capturing the scope of your opinions in this case.

You were asked to quantify the amounts that were paid by Medicare and -- let's call them government agencies -- as well as verify past payments identified by the plaintiffs' expert Marjorie Hackett-Wallace; is that correct?

MS. KONSTANTOPOULOS: Objection to form. Objection to attorney-client privilege to the extent it goes to the substance of communications with counsel.

However, regarding the scope, you can answer the question.

THE WITNESS: For the work I had to do, I -- again I assessed the related medical conditions, the services that were rendered by those governmental agencies and then the -- the disability assessments that were made by the VBA.

MR. MALONE:

Q So you're not offering an opinion on

which of those categories should be included as an offset --

MS. KONSTANTOPOULOS: Objection --

MR. MALONE:

Q -- is that right?

MS. KONSTANTOPOULOS: Objection to form.

MR. MALONE: And, Counsel, please let me finish my question before the objection, please.

MS. KONSTANTOPOULOS: Sure.

You can answer.

THE WITNESS: The -- I'm sorry could you just rephrase the question to make sure I got it?

MR. MALONE:

Q Are you offering an opinion on which of the amounts and benefits that you quantified should be offsets in this case?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I -- I looked at the treatments that were rendered, and if they were related to those Parkinson's disease or those related conditions, then I did include it in my report as a related condition and service that was rendered.

MR. MALONE:

Q But you don't have an opinion on which of those relatedness conditions should be applied as an offset?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: If those services were rendered, I included it in my report as part of the services that were rendered as an offset.

MR. MALONE:

Q Does that include then -- I'm sorry.

What is your understanding of what the word offset means in context with the Camp Lejeune Justice Act?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: That if a service was rendered and there was an associated payment with it, that that payment was used to look at what -- what the government or government-related agencies had paid for part of the treatment for those related conditions.

MR. MALONE: Okay.

Q So you are offering the opinion that --

strike that.

Do you hold an opinion on what a legal offset is?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: No, I do not.

MR. MALONE: Okay.

Q You were asked to quantify the amounts paid by the VHA, Medicare and TRICARE; is that right?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: Yes, for the service that related to the patient's Parkinson's disease.

MR. MALONE: Okay. Okay.

Q Doctor, let's turn back to page 8 of your report, Exhibit 3, Appendix A. Let me know when you get there.

A Yeah, I'm here.

Q Okay.

This was your evaluation of Gary McElhiney; is that right?

A Yes.

Q Okay.

If you'll turn to page 10, which is still in

the section for this plaintiff, under the heading Conclusions?

A Okay.

Q And the last sentence of that paragraph reads: Additionally, the total amount the United States government via CMS, Medicare, VHA, CCN and TRICARE paid for Mr. McElhiney's Parkinson's disease and clinically related conditions come out to $89,891.24 when accounting for VHA's total costs and $78,835.58 when accounting for VHA's total direct costs.

Did I read that correctly?

A Yes.

Q Okay.

And I believe you have a breakdown of the VHA costs on page 8 in that chart. Let me know when you see that page 8 of your report?

A Yes.

Q Okay.

And for the column Government Payments with VHA Total Cost Payments for payment source VHA you have $24,485.69; is that right?

A Yes.

Q And the cell to the right under the column Government Payments with VHA Direct Cost

Payments, you have $13,430.03; is that right?

A Yes.

Q Okay.

What is your understanding of the difference between VHA direct costs and VHA indirect costs?

MS. KONSTANTOPOULOS: Objection to form. Foundation. Do you mean total cost versus direct cost?

MR. MALONE:

Q Yeah. Let me rephrase, Doctor.

What's the difference -- or what is your understanding of the difference between VHA total cost and VHA direct cost?

A The total costs includes overhead services and all other services associated with the -- with the care of the patient. So the direct is the -- is the direct care to the patient. The overhead would include other services related to rendering of the care for the patient.

Q And are you offering any opinion on whether VHA total cost or VHA direct cost should be used to calculate any offset?

A No, no, I am not.

Q Staying on that chart for Payment Source CMS, Medicare, you found $3,756.25; is that right?

A Yes.
Q Okay.
So that figure represents the $3,756.25 was paid by Medicare to pay for treatment of Mr. McElhiney's Parkinson's and related conditions?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Yes.
MR. MALONE: Okay.
Q Is that true for all of the CMS Medicare payment sources you identified across these five plaintiffs?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Yes, I believe so.
MR. MALONE:
Q Moving down Payment Source CCN, you found $59,504.27; is that right?
A Yes.
Q Okay.
And similar question here: So that amount represents that $59,504.27 was paid for by CCN to cover treatment of the plaintiff's Parkinson's-related condition?
A Yeah.

MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: I would just like to verify that for each specific patient, that's all, but --
MR. MALONE:
Q Please go ahead.
A -- yeah, just to let me do that.
So just the -- the -- for CCN, not -- CCN was not a payment source for all the individual patients. So -- so I can't say necessarily it was the same because it wasn't listed as a payment source for each one.
Q For all of the plaintiffs with CCN as a payment source, does the answer you provided apply to those?
A Yes. Yes.
MS. KONSTANTOPOULOS: Objection. Form.
MR. MALONE:
Q Staying on the chart on page 8, Payment Source TRICARE, you found $2,145.03; is that right?
A Yes.
Q And so this figure represents that the $2,145.03 was paid by TRICARE to pay for treatment of the plaintiff's Parkinson's and related conditions?

MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Yes.
MR. MALONE:
Q Is that true for each plaintiff with the payment source of TRICARE that you evaluated in your report?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Yes.
MR. MALONE: Okay. Okay.
Doctor, you are going to be handed what we will mark as Exhibit 6.
(Exhibit 6 was marked for identification by the Certified Shorthand Reporter, a copy of which is attached hereto.)
MR. MALONE:
Q Do you recognize this document?
A Yes.
Q What is it?
A It's the rebuttal expert opinion report from Marjorie Hackett-Wallace.
Q And have you reviewed this report?
A Yes.
Q Okay.

Please turn to page 20 of Exhibit 6. And let me know when you're there.

A Okay.

Q Okay.

And under heading 2 Peterson, Edgar you -- it states: For Edgar Peterson I've quantified $616,336.90 in medical billing expenses. Of these expenses $611,735.93 was confirmed by the defense expert Dr. Syed Hasan, leaving a disputed amount of charges totaling $3,127.61.

Did I read that correctly?

A Yes.

Q Okay.

And the following sentence reads: I quantified $181,586.90 in past paid medical and $10,201.11 in patient payments totaling $191,788.01.

Did I read that correctly?

A Yes.

Q The following sentence reads: The paid past medical expenses and patient payment totals were not disputed.

Is that; correct?

A Yes.

Q Did you dispute any of the past paid medical expenses or past patient payments?

MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Can you -- again, can you rephrase the question?
MR. MALONE:
Q Sure. Did you quantify or verify, validate or -- are you offering any opinion on Marjorie Hackett-Wallace's quantification of past paid medical and patient payments?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Yes, for the -- for what was written in her initial report and also on her rebuttal, I didn't necessarily agree that all of her opinions of what was a related illness -- or unrelated -- as she related specifically was my opinion. So there were differences in opinion between her report and my report.
MR. MALONE:
Q Are you referring to the medical billing expenses, or are you referring to the medical billing expenses, paid past medical and patient payments?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.

THE WITNESS: I'm referring most specifically actually to the review of the records and clinical relatedness.

So based on the clinical relatedness those service that were clinically related were part of the -- that were -- that were part of the calculations or the addition in the table of services that were rendered and paid for by governmental agencies.

MR. MALONE:

Q Doctor, are you offering any opinion on whether the $181,586.90 in past paid medical identified -- quantified by Marjorie Hackett-Wallace is accurate?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: No, no, I'm not.

MR. MALONE: Okay.

THE WITNESS: Having -- if it's accurate or not.

MR. MALONE:

Q Are you offering any opinion with regards to the $10,201.11 in past paid medical -- or sorry, in patient payments quantified by Marjorie

Hackett-Wallace?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: No, no, I am not.

MR. MALONE:

Q So are you offering any opinions about the past paid medical and patient payments quantified for any plaintiff by Marjorie Hackett-Wallace?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: No, I'm not having any opinions --

MR. MALONE: Okay.

THE WITNESS: -- on that.

MR. MALONE:

Q Doctor, I'd like to turn your attention to page 21 of Exhibit 6, the report that is in front of you now. And I would ask to -- I would ask you to reread to yourself subsection 1 and just let me know when you've had a chance to read that.

A Okay. Okay. Yeah, I've read it.

Q Okay.

So having reviewed Ms. Hackett-Wallace's

opinion here, do you agree with her assessment?

A Actually I do not agree with her assessment.

Q Okay.

Why not?

A Well, for a few reasons. One, she writes in her report that -- let me find the right paragraph: The provider described the cord of the plaintiff's deep brain stimulator as notable for a palpable cord centrally to the erythema from medial calf to thigh.

I don't believe Marjorie Hackett-Wallace is a medical -- has formal medical training. But irrespective of that, she's -- she's, I think, confused by the word cord. For example, a deep brain stimulator has a pulse generator that's usually in the chest or abdomen, and then she's referring to the cord, a palpable cord, centrally erythema from medial calf to thigh. Cord in the latter part is describing a physical exam finding where when you palpate the thigh, you feel like a -- a rope-like structure or like a hard vein or a hard vessel. So I think she's getting mixed up between the cord in the medial calf and thigh with the deep -- where she's writing the cord of the

patient's -- the plaintiff's deep brain stimulator. There's -- there's no cord that's part of the deep brain stimulator, and that's nowhere in the position of the upper thigh. So I -- I don't -- I'm not sure if she's -- yeah, I don't agree with it.

Q Okay.

Was there anything else? I think you said there were a few things, but was there anything else in that paragraph that you disagreed with?

A Let me read the rest.

No, that's mainly what I disagreed with.

Q Okay.

So you agree that the plaintiff was provided guidance on taking his Parkinson's medications during that visit?

A I would have to review the medical document just to confirm that? If you have that document, this one, 1576 Peterson.

Q That's okay, Doctor. Let's turn to paragraph 2 of page 21. Could you just reread that briefly to yourself --

A Sure.

Q -- and let me know -- okay. All right.

So having reviewed paragraph 2 on page 21 do you agree with Marjorie Hackett-Wallace's

assessment?

A I -- I would, again, like to just review the -- this Peterson document because I can't say I necessarily agree with it.

MR. MALONE: Okay. Okay.

Doctor, I'm going to hand you what we will mark as Exhibit 7.

(Exhibit 7 was marked for identification by the Certified Shorthand Reporter, a copy of which is attached hereto.)

MR. MALONE:

Q And could you please take a look and let me know if you recognize this document?

A Okay. Yes.

Q And what is the document?

A This is the -- a medical record for treatment, and it appears an emergency department.

Q For the record, this is Diamond Bates labeled 1567_Peterson_000003900.

A Yes.

Q And, Doctor, I will ask you to turn to the page ending in Bates Number 3901.

A Okay.

MS. KONSTANTOPOULOS: And, Counsel, to the extent there's a question pending, do you mind --

MR. MALONE: I'm sorry.
MS. KONSTANTOPOULOS: -- stating it again?
MR. MALONE: Sorry, I do have a question, sorry.
Q Doctor, what is Lovenox.
A It's a medication that's given subcutaneously as a blood thinner.
Q Okay.
Doctor, on page 3901 the date of observation is 9-15-2017; correct?
A Yes.
Q In your review of this record does that give you any further ability to evaluate Ms. Hackett-Wallace's statement in paragraphs 1, and 2 of page 21?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Yeah, I -- in her report she's summarizing the -- she's summarizing the -- the clinical aspects of this follow-up visit here. It's my opinion that the patient's conditions that are documented here, which is superficial thrombophlebitis, is not related at all to the patient's Parkinson's disease. So I don't agree with her opinion here.

MR. MALONE: Okay.

Q And even if some of the treatment included counseling for taking Parkinson's medication, this does not meet the standard of relatedness for you?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: No, becuase as a part of the primary visit for -- the patient's seeking care for, which is this like redness in the medial thigh, it's not uncommon for a practitioner or provider to address the conditions but not necessarily treat them.

So if I were to see a patient with a diabetic problem, I would remind them to also take all their medications, including their cholesterol medication. But it's not the primary reason why the patient is seeking services.

MR. MALONE:

Q So if a patient is seeking primary services for an unrelated condition but does get treatment for a related condition, not just counseling, not just that it appears in the record, but actual treatment for it, would that be related?

MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: It would depend on the scenario. But if that were the case, then what you just described would not make it necessarily like a -- a latter diagnosis, it would be closer to the primary diagnosis of -- of what the patient was seeking treatment for -- or seeking a visit for, I should say.
MR. MALONE: Okay.
Q So if Mr. Peterson was administered medication for his Parkinson's during this visit, would it have been related, in your opinion?
MS. KONSTANTOPOULOS: Objection to form. Foundation.
You can answer.
THE WITNESS: Not -- not necessarily. Again, it will depend on the condition, on the scenario.
MR. MALONE: Okay.
Doctor, I'm going to hand you what we will mark as Exhibit 9?
THE REPORTER: Did we have an 8?
MR. MALONE: Oh, I'm so sorry. We -- oh, I'm sorry, this is -- this is 8.

THE WITNESS: 8.
MR. MALONE: Sorry.
THE WITNESS: Yeah.
(Exhibit 8 was marked for identification by the Certified Shorthand Reporter, a copy of which is attached hereto.)
MR. MALONE:
Q Doctor, do you recognize this document?
A Yes.
Q And what is it?
A It's a letter from Dr. Barbano regarding the patient Peterson.
Q Okay.
Do you agree with Dr. Barbano that immobility is a significant risk factor for the development of thrombophlebitis?
MS. KONSTANTOPOULOS: Objection to form. May I give the witness time to read the letter, to review it, before answering questions?
THE WITNESS: I -- I wouldn't -- I wouldn't -- I wouldn't say it's a significant risk factor, but it's a risk factor. So that would be the only word that I wouldn't necessarily agree with. But immobility is a risk factor for development of Parkinson's -- of thrombophlebitis.

MR. MALONE:

Q Have you ever seen a Parkinson's patient develop thrombophlebitis?

A Yes, yes, I have.

Q Was it caused by immobility?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yes.

MR. MALONE:

Q Having reviewed Exhibit 8 do you agree with Dr. Barbano's assessment here in this letter?

A I do not. Because as part of my work as a hospitalist, I see a lot of patients with advanced Parkinson's disease that are essentially bedbound. So when I look at all of the patients that came in with different associated medical conditions, a majority of them did not thrombophlebitis and were significantly immobile. So I don't think immobility is a significant risk factor based on the experience and the patients I've treated with these concomitant conditions.

Q Would a neurologist be in a better position to make that distinction than a hospitalist?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I think it will -- not necessarily. I think it would be based on the experience of both individuals. So treating patients in a hospital setting, the patients are more acutely ill, so what ends up happening is we start -- we -- again, seeing patients that are at their most advanced in their medical conditions. So at that time, again, it was -- immobility is at a higher or greater percentage of the patients being treated.

I would say that in this case a hospitalist can be equally, if not more, qualified to make that -- to make that assessment, especially because thrombophlebitis is also not necessarily related only to Parkinson's disease. So I've treated many patients without Parkinson's disease that also have superficial thrombophlebitis.

MR. MALONE:

Q Did you consult a neurologist in coming to your determination that these visits were unrelated?

A No, I did not.

Q Is it your opinion that a hospitalist is in a better position to make a determination on

which conditions are related to Parkinson's than a neurologist?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I think again it depends on the hospitalist and the neurologist and the years of experience. There's a multitude of factors that would go into it.

As a hospitalist or a generalist, we do get training in a multitude of neurologic disorders, and Parkinson's disease is one of the more common neurologic disorders so that's well -- a significant part of, at least, my practice.

MR. MALONE:

Q Is a hospitalist's training or a neurologist's training more specialized to make that determination?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: I think a neurologist's training is more specialized in the management and treatment of the patient's condition but not necessarily making a diagnosis of a general medical condition that may or may not be related to immobility or Parkinson's disease.

MR. MALONE: Okay.

Q That's fair. I understand that. I'm not asking about a general diagnosis. I'm asking about relatedness.

So would a neurologist have more specialized to opine upon the relatedness of the diagnosis to the Parkinson's disease?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Again, I would say not necessarily. Because if the -- the generalist would be treating all of the patient's medical conditions so they might be able to -- or should be able to better separate, again, conditions that are unique to their medical condition based on their symptomatology and how they present, not necessarily the neurologist.

MR. MALONE: Okay.

Q And you've never treated Mr. McElhiney, have you?

A No, I have not.

Q You reviewed his records; right?

A Yes, that is correct.

Q And Dr. Barbano reviewed his records.

MS. KONSTANTOPOULOS: Objection to form.

Foundation.

You can answer.

THE WITNESS: I believe so, yes.

MR. MALONE:

Q And it's still your opinion that you're in a better position to make that determination than he is?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Based on the letter and how he wrote it, he -- he speaks in general terms, as a lot of physicians would, "Immobility is a significant risk factor," that's a general -- that's general medical knowledge. In this particular document he's not citing any specific definitive reason. He's saying, "I'm doing this with some reasonable degree of certainty," and he's hypothesizing, "Given the lack of other reasonable causes for his immobility, it's my opinion that it's a direct result." I don't think there's any way of really knowing.

The other thing is if -- if his immobility is progressive, of which he is writing in here, in his letter, then the chance of ongoing recurrences of thrombophlebitis would be higher, and there --

there was nothing in his records thereafter. So this was more of a -- a single episode. And since it's a single episode and his Parkinson's disease is chronic and his immobility is chronic, I made that determination that they weren't necessarily related.

MR. MALONE: Okay.

Q Doctor, a moment ago you testified there's no way of really knowing.

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: If I -- if I said there's no way of really knowing, I -- let me clarify. Again, based on the information we have in front of us and with enough proper workup, sometimes we can find out the cause of the thrombophlebitis. Sometimes the reason is not necessarily identified.

MR. MALONE: Okay.

Q You can set that letter aside.

A Okay.

Q And if you will turn to page 22 of the Hackett-Wallace report -- excuse me -- the Hackett-Wallace report?

A Um-hum.

Q Under the heading Section 3: Rothchild, Diane -- do you see that?

A Yes.

Q And the first -- the first paragraph reads: For Diane Rothchild I quantified $43,401.44 in medical billing expenses. Of these expenses $38,594.44 was confirmed by defense expert Dr. Sayed Hasan, leaving a disputed amount of charges totaling $4,807. I quantified $2,155.44 in past paid medical and $1,645.96 in patient payments totaling $3,801.40. The government claimed the following additional offset damages: Medicare totaling 72,27602 for a total alleged offset of $72,000 -- $72,276.03.

Is that right?

A Yes.

Q And the next paragraph reads: Based on my review of the amounts disputed by the defense expert Dr. Hasan, I agree with the disputed medical expenses.

Did I read that correctly?

A Yes.

Q Okay.

And if you need to refer to your own report, please do so.

But is it your understanding, then, that there is no dispute between yourself and

Ms. Hackett-Wallace as to Ms. Rothchild at this point?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Sorry, let me just kind of verify the amount.

Yeah, for her statement there's not a disputed amount with respect to the alleged offset. Yeah, I would -- I do agree with that.

MR. MALONE: Okay.

THE WITNESS: It's the same figure in my report.

MR. MALONE: Okay.

Q Turning down the page now, Number 4: Welch, Robert.

Do you see that?

A Yes.

Q And this paragraph states: For Robert Welch I quantified $5,155.92 in medical billing expenses. Of these expenses $5,155.92 was confirmed by defense expert Dr. Sayed Hasan, leaving a disputed amount of charges totaling zero dollars.

Did I read that correctly.

A Yes.

Q And does that accurately reflect your

opinion with regards to the medical billing expenses?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yeah, that is the figure that I wrote in my report.

MR. MALONE:

Q Is that the amount that you verified?

A Yes.

Q Okay. Okay.

Let's -- continuing on page 22 here, heading Number 5: Sparks, Richard.

Do you see that?

A Yes.

Q And based on the first paragraph, it appears there is a disputed amount charges totaling $3,418.43; is that right?

A Yes.

Q Okay.

Turn to page 23, the next page of the Hackett-Wallace report.

And if you could just review paragraph 1 and let me know when you've had a chance to?

A Okay. Starting at Number 1?

Q Yes.

A Okay. Okay.
Q Let's turn back to your report briefly here, page -- page 21 Appendix E.
A Yup.
Q Got it? Okay.
And this is your evaluation of the same plaintiff, Richard Sparks; is that right?
A Yes.
Q Okay.
And if you will turn to page 22 of your report, the first paragraph reads: The categories of medical treatment that Mr. Sparks received that were clinically unrelated to his Parkinson's disease include medical care at the University of Colorado Hospital around April 6th, 2018, involved Mr. Sparks undergoing cardiac stress test for evaluation of dyspnea on exertion and chest pain for a patient with significant smoking history as well as oxygen monitoring during stress test.
Did I read that correctly?
A Correct.
Q Am I pronouncing that right? Is it dyspnea?
A Dyspnea, yeah.
Q Okay.

What is dyspnea?

A Shortness of breath.

Q And in the following paragraph you write: My claim level determinations regarding clinical relatedness for the asserted past medical damages are fully contained in Appendix G.

Is that right?

A Yes.

MS. KONSTANTOPOULOS: For the record, are contained in full in Appendix G, not fully contained.

MR. MALONE: Thank you.

Q And if you turn to page 26, does that appear to be Appendix G?

A Yes.

MR. MALONE: Okay. Okay.

And just for the court reporter, this is an electronic exhibit that I'll provide you a copy of.

THE REPORTER: Thank you.

MS. KONSTANTOPOULOS: Just to object, as noted in the Court Management Order Number 3: In in-person depositions the questioning attorney shall provide hard copies of each exhibit.

MR. MALONE: If you read further on, it allows the use of electronic exhibits. So I'm

going to -- please, yeah.

MS. KONSTANTOPOULOS: Have you provided us a copy of the electric exhibit if you want to use it?

MR. MALONE: I -- it's in his own report. You provided it to us.

MS. KONSTANTOPOULOS: Here at a deposition you're supposed to provide copies of exhibits to counsel --

MR. MALONE: It's a --

MS. KONSTANTOPOULOS: You need to provide a copy for review as well.

MR. MALONE: Okay.

Let's take a five-minute break and I'll produce it.

THE VIDEOGRAPHER: The time is 11:50. Going off the record.

(A recess is taken.)

THE VIDEOGRAPHER: The time is now is 12:06. Back on the record.

MR. MALONE: Okay.

Doctor, we are back on the record and we were -- we left off and on page 26 of your report, Appendix G.

And I am going to share with you my screen here, what we will mark as Exhibit --

THE REPORTER: 9.

MR. MALONE: 9. Yes, Exhibit 9.

(Exhibit 9 was marked for identification by the Certified Shorthand Reporter, a copy of which is attached hereto.)

MR. MALONE:

Q Can you let me know if that looks familiar to you?

THE WITNESS: Yes.

MS. KONSTANTOPOULOS: Objection for the record, the Exhibit 9 is using -- on a laptop is in violation of Case Management Order 3 Stipulated Deposition Protocol. Although copies were provided to counsel during the break, it's my understanding that the court reporter, unless otherwise -- I am unaware was not provided with a copy of this either.

So noting my objection for the record, but you can continue.

THE WITNESS: Okay.

MR. MALONE:

Q What do you recognize this document to be?

A This is the Excel spreadsheet I prepared with a summary of charges and notes and accompanying

medical documentation of where the decisions were made.

Q And, I'm sorry, is this related to Plaintiff Sparks?

A Yes.

Q Okay.

And you may still be there, but I will direct you to Tab, on that spreadsheet, 16655670.

Are you there?

A Yes.

Q Okay.

And then within that spreadsheet I would direct to you Row 23.

A Okay.

Q Okay.

What is row 23?

A Sorry, it's a very long spreadsheet.

So it is a -- okay. It's a -- a charge that's noted for cardiac stress test on 4-6-2018.

Q Okay.

And then can you identify what is -- what data that is in Row 24?

A Yes. Sorry, let me just -- just have to scroll. It's so long. Okay.

Row 24 is -- it looks like it's additional

charges that were -- that were rendered for part of the cardiac stress test as well.

Q Okay.

Row 25. Could you identify that, please?

A Yeah. Just one second. All right.

Yes, that is a service for oxygen monitoring during the cardiac stress test.

Q Okay.

And Row 26?

A Okay. That is -- okay. That's -- again, it's an additional charge for part of the services rendered as part of the cardiac stress test.

Q Okay.

And I believe in your Appendix G, which you're looking at right now, you marked Row 23, 24, 25 and 26 unrelated; is that correct?

A Correct.

Q Okay.

Can you identify and describe Row 27 of that sheet, please?

A Yes. 27 is on the date of service April 6th, 2018. It's -- it is a charge for an MRI of the brain.

Q And is that the same date of service as

the dates of service in Row 23 through 26?

A Yes.

Q And in Row 27 you marked that related; correct?

A Correct.

Q Okay.

So a portion of the charges from this visit are related and a portion are not; is that correct?

A Yeah, I just -- I just want to make sure I explain my answer. So it looks like on the same date of service there's multiple testing -- different testing modalities were done. So yes, the MRI of the brain is related. The other testing based on the cardiac stress test, which was also done on the same day was unrelated.

Q Okay.

A It's not part of the same testing, if you will. They're distinct tests.

Q Okay.

A I just want to clarify that.

Q But it's your understanding -- so two tests were performed on the same day that this plaintiff visited the facility?

A Yeah, yes --

Q Okay.

A -- based on this record for dates of service, yes.

Q Okay.

And so because some of testing that was done is related to the Parkinson's in your opinion and some is not, you marked the charges related or unrelated accordingly?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Correct.

MR. MALONE: Okay.

Q And that was your methodology for -- for all the plaintiffs you evaluated and all the records; right?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: No, I -- for every service I -- I looked for medical records. So I -- you know, I didn't realize at that time, maybe when I was writing my report, the date of services were the same, but I looked at each clinical service that was rendered and I made an independent opinion irrespective of the date. So if this happened be two tests that were done on the same day but I didn't -- I didn't look at it that way, whether

they were done on the same date of service or not, I looked at the actual testing that was done.

MR. MALONE: Okay.

Q So you didn't just conclude that the entire visit was unrelated because the MRI was related, even if, in your opinion, the cardiac stress test was not?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yes, correct.

These services were done at University of Colorado Hospital. So it's not uncommon that university hospitals, they batch or -- they batch testing in one day. They'll say, "Patient come at 8:00 a.m. Get your labs. Get your MRI. Get your stress test. Get this. Get that." Because the way the universities -- or the hospitals are set up, they oftentimes do multiple services in one day in these settings. It's not uncommon.

MR. MALONE: Okay.

Doctor, I am -- you're going to be handed what we will mark as Exhibit 10.

(Exhibit 10 was marked for identification by the Certified Shorthand Reporter, a copy of which is attached hereto.)

MR. MALONE:

Q Do you recognize this document?

A Yes.

Q Okay.

And what is this document?

A It's a letter from Heidi Schwarz with respect to the patient's MRI and an additional pre-procedural checklist done for an MRI. And she's saying that they're related.

Q So you disagree with Dr. Schwarz?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: I don't. For the service that she's describing here, pre-procedural checklist for MRI, asking about a heart valve replacement is standard for all MRIs. Why I disagree is because the services rendered were not -- it was not a pre-procedural checklist for an MRI. That was not -- the cardiac -- the cardiac evaluation was an actual stress test. So the -- the part that she's talking about here is not related to the services that on that -- for that report.

MR. MALONE:

Q Are cardiac stress tests part of the workup procedure for MRIs?

A No.

Q Okay.
How often do you order MRIs for Parkinson's patients?
A It would be an estimate. Maybe 20, 25 percent of the patients may get an MRI in the hospital.
Q 25 percent of your Parkinson's patients?
A Yeah.
Q Okay.
A It depends what they present for. Sometimes it's difficult to distinguish between strokes and Parkinson's disease illness exacerbation. So an MRI is often necessary to rule out a stroke.
Q Do you consult with neurology before ordering an MRI?
A Not necessarily. It depends on the clinical case.
Q So you never perform cardiac stress tests prior to having a Parkinson's patient given an MRI?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: No, because the cardiac stress test has -- the results of that test has nothing to

do with the patient getting an MRI, meaning the results of one test will not affect the ability to obtain the second test, i.e., the MRI.

MR. MALONE: Okay.

Q Doctor you can set that aside.

Doctor, I just have a couple of more questions. I appreciate you patience in being here today. I really do.

We have discussed, you know, the five plaintiffs that you evaluated. We spent a lot of time covering areas where you and the plaintiffs' expert Marjorie Hackett-Wallace are in disagreement on charges.

But for the most part you -- you verified the amounts that she found; is that right?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: Again, I didn't verify the -- the amounts that she did. I reviewed the medical records for clinical relatedness. So I -- I wouldn't say especially with what her charges are or agreeing with them.

MR. MALONE:

Q You verify -- or sorry, you quantified

the relatedness of the charges and for the -- with limited exception, you did you not disagree?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer the question.

THE WITNESS: No, I wouldn't say I -- I think there was some alignment with what she wrote. When I did, I noticed some discrepancies --

MR. MALONE: Okay.

THE WITNESS: -- or differences.

MR. MALONE:

Q So with respect to Plaintiff McElhiney, there was, you know, zero dollars that you had to quantify.

So there's no disagreement there; right?

MS. KONSTANTOPOULOS: Objection to form.

THE WITNESS: Let me just get to the right --

MR. MALONE: Sure.

THE WITNESS: -- page.

MS. KONSTANTOPOULOS: Object also as to no foundation.

THE WITNESS: I'm sorry, could you just repeat the question?

MR. MALONE:

Q Sure. You know, let me pull this out too.

So with respect to the past paid medical with respect to Mr. McElhiney, the plaintiff did not present any dollar amount that you needed to quantify?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: No, she did not.

MR. MALONE: Okay.

Q With respect to plaintiff Edward Peterson -- I can direct you to page 11 of your own report or page 20 of Ms. Hackett-Wallace.

MS. KONSTANTOPOULOS: Which are you directing him to counsel?

MR. MALONE: Whichever.

Q Why don't go to page 11 of your report.

A Okay.

Q So the ultimate amount in dispute for the past billing total was $3,100.97. Does that sound right?

A You know, I don't -- I don't see that figure on my report.

Q Oh, I'm sorry.

A So I would have to do it --
Q Oh, page -- page 20. Thanks.
A Okay.
MS. KONSTANTOPOULOS: Page 20 of which exhibit? Exhibit 6 is the expert report of Marjorie Hackett-Wallace.
MR. MALONE: Counsel, are you raising an objection?
MS. KONSTANTOPOULOS: I'm asking what exhibit you're referring to because you've been referring to two separate exhibits.
MR. MALONE: And I referred to the Hackett-Wallace report and he knew what I was saying.
Let's proceed.
MS. KONSTANTOPOULOS: Okay. Exhibit 6, then.
THE WITNESS: Exhibit 6.
MS. KONSTANTOPOULOS: Thank you.
MR. MALONE:
Q So my question there was: The disputed amount of charges totaled $3,127.61; correct?
A Yeah, that is the figure she wrote in her report.
Q Okay.

A Yes.
Q And that reflects the difference between the amount she quantified in medical billing expenses and those that you confirmed?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: Yeah, I don't want to speak for her, for what she wrote in her report and how she got to it. But the figure that is listed in the report is 3127.61. I don't have a figure in my report about the actual -- the total disputed cost. I'm sure I could -- yeah, I don't have it. No, I'm sorry, I do. I do. It's right here. Yeah, the disputed amount is 3127.67 -- 61, excuse me.
MR. MALONE: Okay.
Q If you turn to page 22 of Exhibit 6 Rothchild?
A Okay.
Q Just let me know when you're there.
A Yeah, I'm here, yeah.
Q Okay. Great.
A Yes.
Q And in paragraph 2 she states that based upon her review of the amount disputed by the defense expert Dr. Hasan, I agree with the disputed

medical expenses.

So would you agree that there is no longer a dispute between yourself and Ms. Hackett-Wallace with regard to those medical expenses?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yeah, it appears so. That's what she's writing in her report. She's writing: I agree with the disputed medical expenses.

MR. MALONE: Yes.

THE WITNESS: Which is the amount of what I came up with.

MR. MALONE: Okay.

Q For Robert Welch, Number 4 on Exhibit 6 page 22, Ms. Hackett-Wallace writes in the second sentence of Section 4: Of these expenses $5,155.92 was confirmed by the defense expert Dr. Sayed Hasan leaving a disputed amount of changes totaling zero dollars.

Do you agree that there is a disputed amount of charges totaling zero dollars?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yeah, but our figures of clinically unrelated claim conditions are both

zero.

MR. MALONE: Okay.

Q And if you go down to Number 5, Richard Sparks, on Exhibit 6 page 22, first sentence for Richard Sparks: I quantified $36,602.89 in medical billing expenses. Of these expense $33,084.46 was confirmed by the defense expert Dr. Sayed Hasan, leaving a disputed amount of charges totaling three $3,418.43.

Is that an accurate reflection of your understanding of the dispute between yourself and Ms. Hackett-Wallace?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Her -- on my report the charges for the clinically unrelated -- unrelated claim conditions were 35 -- 3,518.43, and hers is 3,418.43. So there's -- it's a hundred dollars off.

MR. MALONE: Okay.

Q So the total amount of these disputed -- it total of the disputed amounts is 5 percent of the total billing that you guys both reviewed?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

MR. MALONE:
Q Does that sound right?
A I don't know. I'd have to quickly like add it all up.
Q Okay.
And I'm not going to ask --
A I can't --
Q -- you to do that.
But is it -- you agreed with her at least 90 percent of the time on these?
MS. KONSTANTOPOULOS: Objection to form. Foundation.
You can answer.
THE WITNESS: I would say that there's kind of a like alignment with some of the things that she agreed with and some of the things that I -- I wrote in my report.
MR. MALONE: Okay.
Q Those disputes on relatedness, they center around the interpretation of the -- of the medical records; correct?
MS. KONSTANTOPOULOS: Objection to form.
You can answer.
THE WITNESS: I can only speak for myself.
So when I reviewed the records, I looked at

the relatedness to the conditions. I'm not sure exactly what methodology she had used or --

MR. MALONE: Okay.

Q So you have no opinion on the methodology she used?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: Yeah, I -- on the methodology she used for that specific part to determine relatedness or unrelatedness, I mean, she had some, you know, additional records from -- from her experts, some of which I did not necessarily agree with.

MR. MALONE: Okay.

Q But the vast majority of your -- of you and Ms. Hackett-Wallace's independent reviews were in alignment?

MS. KONSTANTOPOULOS: Objection to form. Foundation.

You can answer.

THE WITNESS: I would say in -- in -- for what I was asked to do, to look at related charges, looks like her rebuttal report is the one who said that she's in alignment with my report. So I don't know if the converse is necessarily true. I'm not

trying to split hairs. So --

MR. MALONE: Okay. All right.

Q In forming your opinions you did not consult with any certified professional medical auditors; correct?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: No.

MR. MALONE: Okay.

Q You didn't consult with any neurologists; correct?

MS. KONSTANTOPOULOS: Objection to form --

THE WITNESS: No.

MS. KONSTANTOPOULOS: -- you can answer.

MR. MALONE:

Q Or any certified professional medical billing expert?

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: No.

MR. MALONE:

Q You consulted with your nurse assistant, though?

A She --

MS. KONSTANTOPOULOS: Objection to form.

You can answer.

THE WITNESS: She actually assisted me --

MR. MALONE: Okay.

THE WITNESS: -- with certain services and things like that.

And again, for what I was asked to do, for the scope I was asking for relatedness, that's kind of well under the auspices of what I've been doing in practice in the last two decades.

MR. MALONE: Dr. Hasan, that's all I have for you. Thanks for your time.

THE WITNESS: Thank you.

MS. KONSTANTOPOULOS: I don't have any questions on redirect.

And we will go ahead and read the transcript.

THE REPORTER: Did you need to purchase a copy of the transcript?

MS. KONSTANTOPOULOS: I believe we have a standing order, but if not, I can talk to you afterward.

THE REPORTER: Thank you.

THE VIDEOGRAPHER: Okay. Time is now 12:33. This concludes the deposition. Going off the record.

(End of Proceedings. Declaration of penalty of perjury on the following page hereof.)

(Deposition concluded at 12:33 p.m.)

***

I do solemnly declare under penalty of perjury, under the laws of the State of California, that the foregoing is my deposition under oath;

That these are the questions asked of me and my answers thereto;

That I have read the same and have made the necessary corrections, additions or changes to my answers that I deem necessary.

In witness thereof, I hereby subscribe my name, this _____ day of _____, 20____.

_____

Witness Signature

Certification of Court Reporter Federal Jurat

I, the undersigned, a Certified Shorthand Reporter of the State of California do hereby certify:

That the foregoing proceedings were taken before me at the time and place herein set forth; that any witnesses in the foregoing proceedings, prior to testifying, were placed under oath; that a verbatim record of the proceedings was made by me using machine shorthand, which was thereafter transcribed under my direction; further, that the foregoing is an accurate transcription thereof.

That before completion of the deposition a review of the transcript was requested.

I further certify that I am neither financially interested in the action nor a relative or employee of any of the parties.

IN WITNESS WHEREOF, I hereby subscribe my name this 22nd day of February 2026.
